## CAMPBELLTON

STILL TO

THE FRONT

Re-Building Steadily Progressing

and Many up-to-date Structures

in Course of Erection.

The building inspector's report

for the month of July shows that

the building boom is still holding

out, and that we can congratulate

ourselves that there is no danger

of Campbellton dropping back.

We are going forward and our

rate of progress is being well

maintained. During July 33

building permits were issued, the

total value being \$112,900, of

these buildings 26 are wood and 7

either brick or concrete.

For comparison the figures for

May and June are as follows:—

In May 29 permits total value

\$168,700. In June permits

total value \$111,000.

Since the building

inspector Mr. Reid took over the

duties he has issued 179 permits,

to the total value of \$593,440.

Well may we say let Camp-

bellton flourish.

YOU NEEDN'T DESPAIR

Here's an Offer that Should Interest

Sufferers of Skin Irritation.

First of all we want to explain that

the remedy we are about to tell you

of carries our promise money back

for the mere asking to anyone not

thoroughly pleased with its use. That

should unquestionably establish the

sincerity of our faith we have in it.

Parasites or germs cause eczema and

eczema is probably the most prevalent

cause of all skin ailments. To over-

come them, the remedy must of

necessity destroy or remove the

parasite or germ before relief can be

obtained.

Possessing remarkable antiseptic,

germicidal, cleansing, soothing and

healing power, the curative value of

Reckall Eczema Ointment is very

pronounced in the treatment of eczema

and allied skin diseases, whether of

the dry scaly sort, the weeping type,

where there is a flow of ill-smelling

excretion, or the intermediary kind,

such as pimples, blotches, discolora-

tions, ringworm or acne. It is very

useful for treating bites, nettle rash,

insect bites and wounds. It is ideal

for the skin ailments peculiar to

children.

Reckall Eczema Ointment is grayish-

white in color, has a pleasant odor,

and is very cleanly for use. If you

are a sufferer of skin irritations or

eruptions in any form whatever, we

urge you to try a box at our risk. At

the mere hint of dissatisfaction you

may have your money back. Two

sizes, 50c, and \$1.00. Remember, it is

only sold at our store—The Reckall

Store.—Thos. Wran.

Premier Hazen was a passenger

on the Limited last Friday and in

conversation with a reporter stated

that one of the things which im-

pressed him greatly on his return

from his coronation trip was the

marvellous development of Camp-

bellton which is now practically a

new town.

## BASEBALL GOSSIP

A the News of the Cam

Owing to the number of postponed

and drawn games a new schedule has

been put in operation.

Last week's games being omitted

the remarks on the games must be

very short, one game however stand-

ing out prominently, that of the

Town versus I. C. R. This was with

out doubt the best game of the season,

referred by Delaney, and enjoyed by

a good following of the free and

enlightened electors and sweet young

things. A game with only 2 errors on

each side, and the score ending 2 to 1

was some ball game, believe us.

Details of the bright and glorious

exposition will be found further on in

this column.

RESULTS OF GAMES.

July 28th, Mechanics v. I. C. R.

MECHANICS.

O'Keefe CF 3 1 0 0 0 0

THE GREAT GAME

In the Town versus the I. C. R.

game played 31st July it would be

unfair to make comparisons between

any of the players the class of ball

served up being away ahead of any

thing we have had the pleasure of

seeing so far. Both pitchers played

steadily but Shirley was found for 7

hits whereas the I. C. R. could only

connect with Diamonds curves four

times. No extra charge was made for

this game. Details herewith.

MACKEN IE-MACBETH

At Tide Head, on the evening of

## IN THE PROBATE COURT OF

## RESTIGOUCHE COUNTY

To the Sheriff of the County of Restigouche, or any Constable within the said County, Greeting:

WHEREAS David A. Harquail, sole executor of the last will and testament of James S. Harquail, late of the town of Dalhousie in the said county, Restigouche, deceased, has filed in this court, an account of his administration of the estate of the said deceased and by his petition dated the seventeenth day of July, A. D. 1911, has prayed that the same may be passed and allowed in due form of law, and also by his said petition, has prayed that license may be granted to him to sell or lease the whole of the lands of the said deceased within the said County of Restigouche, or such parts thereof as to the Judge of this Court may seem meet and necessary, to pay the debts of the deceased, his personal estate not being sufficient for that purpose:

Given under my hand and the Seal of the said Probate (L.S.) Court, the seventeenth day of July, A. D. 1911.

(Signed) WILLIAM MURRAY,  
Judge of Probate,  
County of Restigouche.

(Signed) JOHN BARBERIE,  
Registrar of Probates,  
County of Restigouche.

W. A. TRUENMAN,  
Proctor for Executor.

Sine-July 25.

## Notice of Sale.

To Andrew Henry Nolan of the Town of Dalhousie, in the County of Restigouche, and Province of New Brunswick, Merchant, and to Eliza J. Nolan, his wife, and to all others whom it may concern:

Notice is hereby given that under and by virtue of a power of sale contained in an Indenture of Mortgage, dated the eighth day of April, A. D. 1910, and duly registered in the office of the Registrar of Deeds for the said County of Restigouche, under Number 12,304 on pages 303, 307, 309 and 310 in Book B-2 of the Records of said County, made between the said Andrew Henry Nolan of the first part, and the undersigned Reginald Clervaux Chaytor, of Point La Poudre, in the said County and Province, of the second part, for the purpose of satisfying the moneys secured by the said Mortgage, default having been made in the payment of the first instalment of the principal money thereof, due under the terms of said mortgage, and in pursuance of the said power of sale, there will be sold at Public Auction, in front of the Court House, in the said Town of Dalhousie, on Friday, the thirteenth day of October, next, at eleven o'clock in the forenoon, the lands and premises mentioned and described in said mortgage as follows:—All and singular, that certain lot or parcel of land and premises, situate, lying and being in the Parish of Dalhousie, in the County of Restigouche, and bounded and described as follows:—Commencing at the Junction of Adelaide Street and Ramsay Street, in the Town of Dalhousie, in the said Parish, having a front of one hundred feet on the southerly side of said Adelaide Street, and two hundred feet on the westerly side of Ramsay Street, and is known and distinguished as lot number one hundred and forty-eight, (148) in the town plot of Dalhousie, the said lot having been heretofore conveyed to one Alvin Rankin by "one John McAllister," together with all the buildings and improvements thereon, and the rights and appurtenances to said lands and premises belonging and appertaining.

Dated the eighth day of July, A. D. 1911.

(Signed) Reginald Clervaux Chaytor,  
Mortgagee.

W. A. Trueman,  
Solicitor for Mortgagee,  
Province of New Brunswick, ss.  
County of Restigouche.

I, W. Alder Trueman, a Notary Public in and for said Province, by Royal authority duly appointed, commissioned and sworn, residing and practising at the Town of Dalhousie, in said County and Province, do hereby certify that on this eighth day of July, A. D. 1911, before me, the said Notary Public, personally came and appeared Reginald Clervaux Chaytor, the Mortgagee named and referred to in the above Notice of Sale, and acknowledged to me that he did sign and execute the said foregoing Notice of Sale as his act, to and for the uses and purposes therein written and contained.

In Faith and Testimony whereof, I, the said Notary Public, have hereunto set my hand and affixed my Notarial Seal, at the Town of Dalhousie, the day and year above, in this certificate written.

W. Alder Trueman,  
Notary.

## MY LADY'S COLUMN.

Many a serious cold has been caused by sleeping in damp shoes. They must always be thoroughly aired before being put into the linen closet and aired again when they are given out to be placed on the rack, the same dry before they are put away. When examining linen to see if it is sufficiently aired do not test it with the hand, but hold it to the cheek and so detect damp much more easily. If still in doubt, breathe on it and then pass over the cheek. If the least damp clings it will be directly.

Maybe You'd Like a Russian Bear.

Among the novelties for summer is this Russian Blouse, or chemise with a stonch pattern.

Dark Rings Are Aid to Harms. When selecting rings or carapets, it is always remember this fact, that they must be just as much darker than the walls as the walls are darker than the ceiling, to keep the balance right in the room, says a writer in a trade paper. When a floor is too light in color it gives you a feeling that it floats. A rug or carpet that is too light in color for its surroundings never appears to lie down, but it seems to want to rise to meet the ceiling, and throws the whole room scheme out of balance. This is a common fault that I notice in many houses. The ugly idea is prevalent that when buying and the dealer that a light-colored rug does not show the dust nor wear so plainly has been the argument and has been used to get people to accept it as an axiom and do not stop to move it. If they had they would see the fallacy of the argument, and the dealer's beauty and harmony for a false price.

## PASTE THIS IN YOUR COOK BOOK.

Boiled Eggs. Cover five eggs with boiling water and let boil twenty minutes. Remove the shells, chop the whites fine and the yolks separate. Put a half-cup of milk to boil, then rub in a lump of butter the size of a walnut and one tablespoonful of salt starch. Add it to the milk. Then add the whites of the eggs, with salt and pepper. Place five squares of toast on a fire hot dish and spread the mixture on them. Fry the toast with salt and cayenne pepper and serve in the oven two minutes before serving.

Washing Blankets. A woman who has some blankets 16 years old that are as dirty as the day they were bought says she washes them with soap jelly. She shaves a half-bar of yellow laundry soap and pours this into a pint of boiling water. She stirs this until it becomes a thick jelly and pours it into three buckets of lukewarm water. Into this she puts the blankets and washes thoroughly. She does not rub soap on the blankets. She puts them through a wringer and in another tub of clear lukewarm water. Then she keeps on rinsing in clear water until every particle of soap is removed, and hangs them in the hot sun taking care to hang them perfectly straight. She leaves them in the sun for several hours until perfectly dry; then she beats them with a rattan beater, as she would rugs and furniture. This brings up the nap and makes them fluffy.

Helps for the Housekeeper. Colored stockings are fashionable, and the question of washing them has certainly to be considered. Put a good handful of common salt in the washing water to set the color.

Your Discolored Table. This may be greatly improved by this treatment: Scrape a little brick-dust over the table, especially on the stained parts in the ordinary way.

## LOOK OUT FOR YOUR THROAT.

Necessity of Right Prevention Emphasized.

Necessity of right prevention and the skilled care of a specialist in all cases of serious illness and especially in the case of communicable diseases is emphasized in the following clipping from the publication of the Board of Health, the "Sanitary Bulletin" for May:

"Every member of a certain family had a sore throat four weeks ago, which was diagnosed as follicular tonsillitis or quincy. Two of the girls served as maids in other families, in each of which one of the children took diphtheria and died. Calendars were then taken of members of the first family with sore throats and each showed diphtheria. As they were kept to be around, and apparently getting better of their local trouble, constitutional treatment was neglected. They persisted in refusing to believe that they had diphtheria, until they could no longer stand the strain—and died. Three deaths from 'quincy' sore throats, and all this because of neglect."

## HOMELY WISDOM.

For the People of the South.

A recent biographer of Abraham Lincoln has some interesting things to say of "Honest Old Abe's" views on the dependence of the different classes on society on one another. "The farmer and the manufacturer," the president once said, "with his characteristic shrewdness, 'are both in the same boat and I reckon they've got to learn to navigate the craft together or they'll upset.'"

"He compared the case of a Pennsylvania farmer," continues the historian in question, "and a Pennsylvania iron implement maker whose properties adjoined. Under a protective policy the farmer supplied the ironmaker with bread, meat, vegetables, fruit, fodder for horses, etc., and the ironmaker supplied the farmer with all the iron implements, etc., which he needed. Assuming that a change is made and the Protective policy abandoned, the farmer then discovers that he can buy his iron implements cheaper from Europe than from his neighbor, assuming that he sells a sufficient quantity of flour to the ironmaker to enable him to effect the purchase of the iron. He ultimately discovers that the cost of carriage to the coast, transportation by sea to England, insurance and cartage on arrival, does not enable him to receive such a good reward for his labor as he formerly did when selling his flour to his neighbor, the ironmaker. He, therefore, determines to sell his flour as before to his neighbor. But meantime the farmer discovers that while he has been purchasing his iron implements from Europe he has been selling his flour to his neighbor, the ironmaker, as before to his neighbor, the ironmaker, as he has gone out of business."

## DANGEROUS TO USE "ESQUIRE."

How One Writer Was Cured in Germany.

The recovery of a letter which had been sent to a little town in Germany and never delivered to the person addressed, the writer of the custom of adding "Esquire" to a name on the superscription of mail matter. The letter in question would probably have been promptly delivered had the address read simply, "Mr. John Brown." But the sender had addressed it, "John Brown, Esquire," and the communication rested comfortably in the "E" compartment of the post restante department, waiting to be called for by "Mr. Esquire."

One of the popular guide books warns against the use of "Esq.," saying that it might be mistaken for a name.

## ON A GRAIN OF WHEAT.

A Prayer Containing 556 Letters Inscribed and Four Figures.

Prayers have been written and engraved on many very small objects, but only one person ever has been patient and painstaking enough to inscribe a complete prayer on a grain of wheat. One day Sir Moses Montefiore, the great Jewish financier of England, received a small tin box in the mail. On the cover of the box was written, "A prayer for Moses Montefiore, by David Montefiore, son of Zebi Hirsch Scheinmann, of Jerusalem." The box contained a single grain of wheat, on which was inscribed, in characters so small that they could only be read with the aid of a powerful microscope, the 556 Hebrew letters of the prayer, and the date of the year (Hebrew reckoning), 5645. Sir Moses kept the prayer in his desk until he died, and it is now preserved with religious care by one of his friends.

One per cent. of the water of the oceans would cover all the land to a depth of 280 feet.

If the four bills of Canada were opened to their capacity, they could produce flour enough for 20,000,000 people.

A well known judge has ruled that wives have a perfect right to read their husbands' private letters. We found that out long before the judge.

Men think that we are smarter than they are.

## NAVAL BATTLE WITH HORSES.

How 8000 Cowboys Captured the Spanish Fleet.

Paez, who was the first President of the Republic of Venezuela, was perhaps the only man who ever fought a naval battle on horseback. It is a matter of history that he, to whom more than any other man, apart from Simon Bolivar, Venezuela owes her independence, actually attacked and captured with his cavalry a fleet of ships.

Bolivar was endeavouring to cross the Apure River in the struggle for independence, but was prevented from doing so by some eight Spanish gunboats, which moved up and down the stream as he did. Bolivar was in despair for a while. To Paez, who was second in command, he appealed for counsel, saying that he could never cross the river so long as the Spanish gunboats were there. "If only we could capture them," the revolutionary leader observed, "the rest would be easy."

Paez decided that he would have those ships or die, and he accordingly told his regiment of cowboys to follow him. Paez himself had been a cowboy on the plains of the Orinoco, and was the idol of his men. So when he spurred his horse into the stream, calling on his men to follow, of the 3,000 cowboys and their mounts, which are taught to swim as well as to gallop, there was not a single man to hold out in this unique assault upon the gunboats. It being night, the Spanish fleet were taken quite unawares. The cowboys wriggled from their saddles to the decks of the vessels, letting their mounts swim back to shore. Having thus cut off their own retreat, it was a question of win or die. They fought well, and every gunboat was captured.

## The Butter Trade of Canada.

In the year ending 1910 Canada shipped only 4,615,280 pounds of butter, worth \$1,010,274. Canada's imports of butter on the other hand amounted to 687,454 pounds, worth \$104,301.

These imports into Canada last year are given below, with the rate of duty that had to be paid on coming into the country; and also with the changes in that rate which would be effected under Reciprocity.

Country	Quantity	Value	Rate under Reciprocity
Great Britain	45,837 lbs.	\$11,573	Free
Australia	547,149 lbs.	\$5,734	Free
Newfoundland	3,830 "	76	Free
New Zealand	21,840 "	4,871	Free
Norway	1,000 "	200	Free
Turkey	240 "	65	Free
United States	67,568 "	15,976	Free

Rate of Duty. Br. Pref. 3c. per lb. B. Pref. Free. Gen. Tar. 4c. per lb. Possibly Free. 4c. per lb. Free. 3c. " " " " 4c. " " " " 4c. " " " " 4c. " " " "

## Prince Arthur as Footman.

Prince Arthur of Connaught who will probably come out to Canada with his father, of "Young Arthur," as he is usually known about the Court, and to his intimate friends, was once stationed at Aldershot, where some engagement had prevented him from changing into the prescribed uniform before going to a State ball.

Consequently he turned up in a suit of ordinary dress-clothes. One of the ladies who was fairly well known in society was departing, when she saw what she took to be one of the Court footmen, and ordered him, in none too polite terms, to find her carriage for her.

His Royal Highness fell into the snare of the joke, and promptly did as he was told. The lady's carriage was summoned, when, to his utter astonishment, she pressed him to accompany her into his palace, remarking, "I know I am quite wrong in doing that, but don't say a word about it; I hope you will shortly improve your position!"

## Very Convenient.

An enterprising builder was one day in conversation with several friends, when he was accused of using inferior material in the construction of a house which he had recently built, of which a gentleman arrived with a hot argument ensued in the midst of which one of the jerry-built cottages, and the matter was referred to him.

"Well, sir," said he, "I can assure you they are the most convenient houses I ever abode in."

"But," said one of the listeners, "why convenient do you say?"

"Oh, hand yer wheel till I explain. When first I came to bid in Mr. Jerry's house, I had to rise 't the middle of the night and open the door to let out the cat; but the cat can gang out an' come in noo thro' the cracks, an' I'm saved a lot o' bother."

When a man goes out to buy a collar he comes back with a collar, and perhaps a necktie or two. When a woman starts out to buy a collar she returns exhausted with a new silk blouse, a pair of gloves, some slippers, a cake of soap, a paper of pins, some window-curtains, a sewing machine, and a mangle.

An expert states that all one needs to do to put out a gasolene or kerosene fire is to put foam on it. He does not say so, but we presume the gentleman means to imply that it is always well to have a mast dog around the house to supply the foam.

## Winnipeg's Growth.

Winnipeg, 55 years ago a Hudson's Bay trading post, now ranks fourth in Canada's industrial centres. Manufactured goods to the value of \$1,000,000 are produced here.

CAMPBELLTON, N. B., AUGUST 11, 1911.

### DR. MCCULLY HAS PASSED AWAY.

Well Known Physician Succumbs to Brief Illness.

Moncton Aug. 9.—The death of Dr. O. J. McCully occurred this afternoon shortly after four o'clock. The deceased was a native of Sussex and came to Moncton to practice his profession some twenty-five years ago, where he continued his practice for some years, after which he removed to St. John, returning to Moncton about two years since, where he has been actively engaged in his profession up to the time of his recent illness.

Dr. McCully was well known on the North Shore and many friends will regret to learn of his sudden death.

It was with sincere regret that we learned of the serious illness of Mr. John McDonald. He was removed at the end of last week to an operation which was very successful. From latest reports Mr. McDonald is still very weak but his condition is satisfactory to his medical attendants. We trust he will have a speedy recovery.

We have received the following communication from one of our subscribers. We give it prominence as it is the first pronouncement we have had from any one on the probability of outside candidates. We still desire to remind our readers that we are not responsible for the views of our readers. The following is the communication:

#### NOTICE

The Liberal delegates of the County of Restigouche, gentlemen if you elect your man, elected Hon. Charles LaBelle of Dalhousie is your man or Mr. Wm. Murray, Barrister, of Campbellton. Either is sure of election; otherwise you are sure of a defeat.

### THE VANISHING FORESTS

Timber Resources of the United States Showing Signs of Exhaustion.

Commissioners and commissioners have been appointed in various parts of the United States to make reports on what should and could be done to stem the destruction and prepare for the restoration of timber supplies, but wherever actually a response to the recommendations was secured the means employed were too feeble to prevent the former and too inefficient to secure adequate results in the latter direction. For instance, the latest State to move in the matter of taking care of its important timber interest, Alabama (whose annual lumber output is valued at \$5,000,000), appropriates \$500 for carrying out the provisions of the act providing a commission with various duties. The great State of Minnesota whose forest products in one year approach in value \$45,000,000, devotes less than \$12,000 to its forest interests, and \$20,000 on prairie planting. The State of Maine, which still cuts more than one billion feet, and is indebted to the forest for a product of \$12,000,000 in value, keeps within the modest sum of \$25,000 to pay for the protection against fire and the support of a commissioner. Examples of such piecemeal and inadequate measures are found in many other States.

The only two States which have not hesitated to spend money for forestry purposes are New York and Pennsylvania. The former, in purchasing forest lands for preservation, which now comprises about one and a half million acres only, has expended millions of dollars, and is annually appropriating money for further purchase, besides liberal provision for its Forest, Fish and Game Commission. But alas! the policy of forest preservation which had begun on economic grounds, has degenerated into providing a pleasure ground—a park—for the wealthy, and there is little consideration to economic forest questions given by the State or the Commission.

Pennsylvania is the only State which can be said to have started on a true policy of recuperation, buying up waste lands, protecting them, and in a small way beginning to reforest them, an appropriation of about \$500,000 being at the disposal of the Forest Commission.

#### NEED OF THE HOUR.

Major George Washington Stephens Talks on Canadian Transportation.

Not long ago Major Stephens, the President of the Harbor Commissioners of Montreal, delivered a masterly address before the Empire Club of Toronto on the development of the St. Lawrence route. "In the possession of this great national asset, the St. Lawrence waterway," said Mr. Stephens, "into which has gone the genius, the courage and the money of the Canadian people, Canada unquestionably has within her midst the cheapest and most efficient national trade route on the Continent."

"The St. Lawrence River to-day carries to and from the port of Montreal one-third of the country's national trade."

"In this enterprise there are just 6,000,000 Canadian shareholders, all equally interested."

"At her present rate of increase Canada will, during the twentieth century, contribute to the Empire a surplus exceeding that now occupied by the British Isles, and will produce from one-quarter of her available area in the West more wheat than now constitutes the total wheat crop of the United States."

"There are two methods of providing for the handling of this new business, not to mention the concurrent industrial production of the country: first, by increasing transportation and terminal facilities on Canadian soil; second, by allowing business to be taken care of by transportation routes and sea terminals not within the limits of this Dominion."

"I like to regard this system extending from Fort William to the sea, a distance of 2,500 miles, as a great national undertaking, into which are going the money, the genius and the patriotism of the Canadian people, and out of which are coming year by year privileges and powers the transportation interests of Canada, instead of diversity of control and authority."

St. John's Presbyterian church, Dalhousie had their 75th anniversary on Aug. 6. Large congregations assembled at both services. In the morning the Rev. P. McIntyre and in the evening the Rev. Mr. Haddow preached excellent sermons. A splendid offering of over one hundred dollars was placed on the plates. Few congregations have lost more families than this one, there having been over 50 who have gone from us, yet the remaining ones are full of zeal and courage and hope.

On Aug. 3rd, at the residence of John Dickey, Pt. Levis, his daughter Elizabeth and W. J. Dickey were married.

### THE POWER OF SYMPATHY.

Mothers Too Often Form a Habit of Constant Reproof.

Although conscious of the power of sympathy, many loving but overworked mothers not only forget to show affection but form a habit of constant reproof. Naturally enough, the children, unless exceptionally callous to their surroundings, become sulky and resentful. How can they realize that the nagging is an expression of anxious affection?

When Johnny comes rushing into the house full of enthusiasm over some new play or new idea, and eager to tell his plans, such a mother exclaims, "How many times have I told you to wipe your feet before you open the door?" The greetings fill his enthusiasm, and hurt and wound him, unless exceptionally callous to their surroundings, become sulky and resentful. How can they realize that the nagging is an expression of anxious affection?

There is sound psychology in the statement that if you believe a man is honest he will be honest; that if you trust a young man he will prove trustworthy; that if you praise a child he will deserve praise. Benjamin West's mother kissed her boy when he showed his drawings to her, and the boy, when grown to manhood, said that her kiss made a painter of him.

### A RAVENOUS INDUSTRY.

How the Paper Makers are Destroying the Forests of the United States.

The forests of the United States cover 550,000,000 acres, or about one-fourth of the area of the country. Forests publicly owned contain one-fifth of all timber standing. The timber privately owned is only about 10 per cent. of the total, but it is generally more valuable.

Forestry is not practised on 70 per cent. of the forests publicly owned. The annual cut from the forests is about 12,000,000,000 cubic feet of wood. The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres with a stand of not less than 5,000,000,000 board feet of merchantable timber, according to present standards of use. There were five great forest regions—the northern, the southern, the central, the Rocky Mountain and the Pacific.

The present rate of cutting is three times the annual growth of the forests of the United States. The great forests of the Lake States are now being exhausted and great tracts have been made up of yellow pine lumber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centres of lumber industry towards the South and West. In consequence, the State of Washington has had for several years in lumber production, followed in order by Louisiana, Texas, Mississippi, Wisconsin and Arkansas. In 1908 the production of yellow pine lumber amounted to eleven and one-quarter billion feet; the Douglas fir of the Northwest held second place, with three and two-thirds billion feet; while white pine came third, with three and one-third billion feet.

The annual cut from the forests, including waste in logging and in manufacture, is 20,000,000,000 cubic feet of wood.

There is used in a normal year 20,000,000 cords of fire wood, 40,000,000,000 board feet of lumber, 118,000,000,000 feet of shingles, 1,500,000,000 staves, over 125,000,000 sets of heading, nearly 500,000,000 barrel hoops, 3,000,000 cords of native pulp wood, 165,000,000 cubic feet of round mine timbers and 1,250,000 cords of wood for distillation.

In 1909 4,602,000 cords of wood were used in the manufacture of paper, of which 724,000 cords were imported from Canada. The demand for pulp wood is making a severe drain on the spruce forests, which furnish the principle supply. The Forest Service of the United States Department of Agriculture is conducting investigations to determine what other woods, such as scrub pine, white fir, tamarac and the like, can be successfully used.

A larger drain upon forest resources is made by the demand for railroad ties, of which 125,754,000, equivalent to three and three-quarters billion board feet, were used in 1908. White oak, hitherto the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many parts of the country the supply of chestnut, cedar andypress is dwindling; however, seasoning and treating methods are being found, largely through the work of the Forest Service, by which cheaper and more plentiful woods, such as lodgepole pine in the Northwest and locust, pine in the South, are made fit for ties as well as for other uses. The amount of two and one-half billion feet was used in 1907 for mine timbers. A great saving has been effected in the naval stores industry, too largely through the work of the Forest Service, by the introduction of the so-called "cup" system of turpentine tapping in place of the destructive system of "boxing." The new systems insure a larger product of better quality and prolong the life of the longleaf pine forests upon which the industry depends.

Sine creamery butter was made as early as 1898 B. C.

Just The same, we wish our grocer would stop sending that kind.

The women named Mary in England have given a \$2,000 fund to Queen Mary.

And A British clergyman in the

for the King.

### LITERATURE AND SCIENCE

Although Canada cannot be said to have a very large number of men who have achieved distinction in the world of literature, yet there are a few who have attained this honor, and of whom she has every reason to be proud. Among this number is Sir Gilbert Parker, Kt., D.C.L., M.P., who

SIR JAMES GRANT

is a native of Belleville, Ont. He began his career by doing newspaper work in Australia. He has travelled very extensively, and has written many books, the best known of which are "The Seats of the Mighty," "The Light of the World," and "The Trail of the Sword." He is now living in England. Sir James MacPherson Lemoine, Kt., D.C.L., F.R.S.C., was born in Quebec in 1826. He is best known through his scientific and other publications, among which are "Maple Leaves" (3 vols.), "Quebec Past and Present," "L'Oratoire de la Capitale." He was President of the Royal Society of Canada for some time.

Sir James Alexander Grant, K.C., M.G., M.D., F.R.S.C., who while in politics introduced the Pacific Railway Bill, is principally distinguished for his medical and scientific work. He has published works on Organic Heart Disease, and numerous essays

SIR GILBERT PARKER

on various medical and scientific subjects. He was President of the Royal Society of Canada in 1902.

Prominent as a philanthropist is Sir William Macdougall, Kt. He is a Governor of McGill University, and of the Montreal General Hospital, to the former of which he has given large sums of money. He has established and endowed the Macdougall Agricultural College at Ste. Anne de Bellevue, at a cost of \$5,000,000.

### The Canadian Mint.

The place where money is made or what is perhaps more accurate where it is created has always appealed as most seemingly mysterious things do to the general reader. In Canada the Mint is located on Sussex Street at Ottawa. Here are made our gold and silver coins—the real money of the country. The paper medium of exchange is in the hands of the engraving firms and one does not see any trace of it in the Sussex Street establishment.

The Mint is open to visitors after certain formalities have been complied with. The essence of these, as with every thing connected with the institution is punctuality.

Unless the workman arrives exactly on time he finds himself locked out. It is necessary for him to telephone in and get a written order, before he is allowed to enter. Prior to the worker beginning his day he must change his clothes, put them in a locker which is locked and down special garments supplied by the Mint. The workman is not permitted to leave for dinner, therefore each department has a kitchen of its own which supplies the midday meal to the staff. The metal to be used for the day's work is in weighed out in the morning and no employee of the Mint is allowed to leave the building till the weight of the coins made and the material left over tally exactly with the weight of gold and silver handed out in the morning. Aside from all this, each member of the staff is locked in his or her department and is not permitted, even in case of illness to leave without a written permit. This, in the Mint changes for dishonesty are reduced to a minimum.

The expediting process of weighing and automatically packing the coins into packages, requires the most finely adjusted machinery of all. In this department is a scale so delicate that it is said to be moved on a concrete pier, sunk in the ground down to bedrock.

This machine automatically weighs the coins, throwing them into three

oversight are detected in the other 25.

### Baby Remedies

IT REQUIRES years of experience and a high degree of expert knowledge to make baby remedies that are safe but effective.

There are several among the Nyal Family Remedies designed for the children only.

They are made right and are recommended with confidence.

Nyal's Baby Cough Syrup.

Nyal's Laxative—to regulate the bowels.

Nyal's Teething Syrup.

Nyal's Teething Lotion to rub on the gums.

Nyal's Soothing Powders.

Nyal's Talcum or Baby Powder—Antiseptic and soothing.

Nyal's Soothing Syrup—contains no opiates.

Every one of these is admirably suited to the particular purpose.

They are each worth the quarter asked and should be in your children's medicine cabinet.

## The Talk of the Town

Rev. Dr. Frost of Evanston Ill., who is expected here next week to visit his daughter Mrs. George Morris, will occupy the pulpit of the Methodist church on Sunday, Aug. 20th.

Mr. and Mrs. J. O. Pichette are receiving congratulations on the arrival of the 28th, of a little son at their summer home at St. Omer.

Mr. S. W. Dimock has commenced the excavating for a reinforced-concrete structure 35x70 on the old Oak Hall stand. When completed it will be one of the most up-to-date buildings in town.

Buy it now. Now is the time to buy a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed before the summer is over. This remedy has no superior. For sale by all dealers.

Manager Dimock of the Opera House is making extensive improvements to the Opera House. The seating capacity on the main floor will be increased to one thousand and more stage room provided.

An ordinary case of diarrhoea cat, as a rule, is cured by a single dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. This remedy has no superior for bowel complaints. For sale by all dealers.

Mr. and Mrs. Richard Murray, have the sympathy of their many friends in the loss of their bright little ten month old baby, Elizabeth Yvonne who died Tuesday evening Aug. 1st.

Mr. D. A. Stewart has on hand the contract for putting on a nice tidy building on Gerrard street for Mr. A. Landry of Bathurst, lately of this town.

The I. N. R. baseball team played a friendly game with Shives Athol on Thursday evening, the Wood boys winning a pleasant game by 2 to 1.

A well known Des Moines woman after suffering miserably for two days from bowel complaint, was cured by one dose of Chamberlain's Colic Cholera and Diarrhoea Remedy. For sale by all dealers.

The new post office building is getting well forward and we may now expect to see the free and enlightened electorate comparing their full-jeweled chronometers with that beautiful sample of the clock-maker's art which we are going to have. Ah my.

Last week a party of young people enjoyed the hospitality of Mrs. Sowerby at Oak Bay. They had a nice run over in a motor launch and please note they returned that same evening.

As an offset to election enthusiasm we are going to have ball games by moonlight. A start was made with these this week, but did not prove an unqualified success. The I. C. R. lost.

### MARRIED

At Bethel Church, River Louis, Rest. Co., N. B. on Aug. 9th, by Rev. J. M. McLeod, Wm. E. Bagwell, Harcourt, N. B., and Hattie E. Irvine, Matapedia, Que.

Mr. and Mrs. P. J. Crowley have the sympathy of all in the death of their daughter Mary Gertrude, aged 8 months. The little one died of Cholera Infantum Wednesday and the funeral was held Friday.

### BORN

At Matapedia on August 30th to Mr. and Mrs. Geo. A. Craswell, a son.

A Conservative convention has been called for Monday Aug. 14th. Among the names of Conservatives being considered by the party as possible candidates are W. S. Montgomery, Frank Blackhall and Arthur Culligan.

A little over a year ago a number of Campbellton gentlemen purchased stock in a paper milk bottle manufacturing company which has lately been enlarged and incorporated under the name of the Universal Paper Bottle Co. This company's stock is now selling for \$5.00 per share, par value \$10.00. The bottle and other appliances have been patented in nearly every country in the world and the demand for the bottles is bound to be large. The machines for making the bottles are now perfected and the company will shortly commence placing them on the market. For a few days this stock is offered at \$5.00 per share. After Aug. 15 it will not be sold for less than \$6. There is hardly a doubt but that this company will earn large dividends, and the stock will prove a good investment. If interested ask for circulars at the Graphic Office.

### VISITORS TO

#### PRICHARD'S LAKE

Mr. and Mrs. Reg. K. Shives, Mrs. R. M. Hope, Miss Ina Downes, Miss Greta Gray, Mr. and Mrs. I. J. Boudreau, Mr. and Mrs. S. LeBlanc, Mr. and Mrs. T. LeBlanc, Mr. and Mrs. H. Thibideau, Edward Boudreau, L. Boucher, T. D. LeBlanc, Palmer Keith, Walter Clark, Thom Andrew, Archibald Noble, A. C. Roy, Fred Alexander, A. Martin, M. D. Austin, W. McDonald, Austin R. Murray, John Downes, Edmund Sargeant, Ernest Sargeant, Ernest Boudreau, Fred Hillman, H. B. Anslow, Gordon Anslow, Campbellton, Mrs. E. B. Prichard, Miss Mary Barthe, Dalhousie, N. B., Miss Kate Hillman, Woodstock, N. B., H. R. Munroe, Taymouth York Co., N. B.

School District Assessment sheets and rate notices for sale at the Graphic Office, Aug. 12th

### NEVER FORGET THIS!

When packing for the country cottage, don't forget your box of Zam-Buk and your Zam-Buk Soap!

Blisters, sunburn, scratches, insect stings, etc., if not immediately attended to are likely to spoil your pleasure. Zam-Buk ensures you against trouble from these.

Zam-Buk is antiseptic; kills all poison in wounds, whether from barbed wire fence, or insect sting. Soothes aching feet and blistered hands; heals baby's chafed places; cools those sunburn patches, and prevents freckles. No mother should be without it. Purely herbal in its composition, Zam-Buk is superior to the ordinary ointments containing animal oils and fats, and mineral coloring matter. All druggists and stores 50c. box. Use also Zam-Buk Soap. Best for baby's bath and for tender skin. 25c. tablet.

Are you going fishing? Fishing tackle at cost at S. M. Moore's.

### JAMES MURCHIE

Mr. James Murchie, an old time resident of Port Angeles, Wash., passed over to the great silent majority on Monday morning last. Mr. Murchie was born in Ecuminao, P. Q. in 1841. He left home while a young man. He served in the Indian Rebellion under Gen. Custer for 3 years. He came to this place 22 years ago and made many friends during his residence here. One brother survives him, Daniel Murchie who is now visiting his daughters in Black Cape, P. Q. Canada. His reice, Mrs. J. Adams from Canada attended him during his illness and he often expressed his gratefulness to God for sending him such kind and gentle care. Sunday before his death he partook of the Sacrament. During the little service he called Mrs. Adams little boy to him and uttering his arm around him said Graham my dear boy seek the Lord while you are young and do not leave it until you are old when it is so hard to find him. The day before he became unconscious he called his niece to him and said, Jennie walk close to God and we will meet in heaven where there is no parting. The funeral service was one of the most impressive we have ever witnessed and as Rev. Fulmer spoke from the 23rd Psalm many were deeply touched and I can safely say prayer went up from many hearts that those who were strangers to the Lord might not refuse the promises of the Holy Spirit and that that service might be so impressed on their hearts that they might give heed to their old friends warning to seek the Lord while he may be found. For now is the accepted time. Now is the day of Salvation. The funeral offering was beautiful, his friends seeming to remember his great love for flowers.

Don't forget the big reduction sale at S. M. Moore's. Watch for posters.

The Graphic Print Shop is now prepared to print monthly account systems, counter check books and loose leaf forms. Our merchants should remember this and patronize home industry, especially when prices and workmanship are equal to city offices. Let us have your order.

## BRITAIN AND JAPAN

The British-Japanese Alliance signed in 1905 for ten years, has been largely revised and again signed for ten years, thus prolonging the life of the treaty till 1921. By this change, Britain is relieved of the necessity of helping Japan against any nation with which Britain may have an arbitration treaty. This provision will eliminate the possibility of Britain having to fight the United States (should it ever be expected, the proposed arbitration treaty with that country materialize) or France in Japan's quarrel. This will tend to make Japan more careful in dealing with these two powers, and we may reasonably suppose that there will be no trouble between any of these four powers for the next ten years. This will give Australia and New Zealand, which states mutually fear Japan, a longer breathing space in which to prepare themselves for the conflict they expect in the near future. And for even ten years of assured peace every body should be thankful.

## IMPORTANT QUESTION SETTLED

A very important treaty was settled last month between Britain, the United States, Japan and Russia, by which the vexed question of seal hunting in the North Pacific Ocean was settled. The seals are to be taken into the open sea for fifteen years. As the rookeries, except one very small one owned by Japan, belong to Russia and the United States, these two powers are to pay Japan and Canada for the latter's attention from sealing. Russia agrees to pay Japan 20 per cent. of the value of all the seals she takes in her own rookeries and Canada 10 per cent. The United States will pay Canada and Japan 15 per cent. each of the value of her catch. The contracting parties are forbidden to permit an entry of seal-skies to their countries which are not identified as having been killed under government supervision. China, Mexico, Chili and Norway are to be requested to

join the treaty agreement to prevent the sealers from hunting seals under the flags of these nations.

The United States is to pay \$200,000.00 to Canada to compensate the owners of sealing schooners for the loss of their trade. This amount, however, is to be refunded by Canada out of her annual share of the general fund until the whole amount is refunded.

The seals to be killed under the treaty are the three-year "bachelors" who are regarded as being harmful to the herds. The number of "bachelors" subject to killing was 14,331 in 1900 in the American rookeries, and the number in the Russian rookeries may have been about 5,000, although no reliable statistics are obtainable. The seals caught by Japanese and Canadian sealers annually numbered about fifteen thousand. The number of "bachelors" killable under the present agreement may run from twenty thousand to thirty thousand. Out of this number seven thousand to ten thousand, valued at from \$200,000 to \$300,000, are to be contributed to Japan and Canada.

This is removed from dispute a question that once threatened to seriously disturb international friendship.

## DOUGLASTOWN

Douglstown, Aug. 3.—Mr. Jos. McKnight has had his store newly painted and large and elegant plate glass windows installed making its place of business more attractive than ever.

The many friends of Miss Elizabeth Hayden, will be sorry to hear that she is suffering from an attack of typhoid fever.

Sterling Wood, who has had typhoid several weeks, is, we are glad to learn, able to be around again.

Guy Mercereau and several other members of Chatham Sons of Temperance paid a fraternal visit to Caledonia Division on the 1st instant.

Arthur McKenzie of Chatham spent the 30th ult. in town.

John A. McKendry, manager of the Royal Bank, Edmundston, N. B., returned on Wednesday from two weeks visit here.

Mrs. Clifford Greenfield of Boston is visiting Miss Campbell.

Miss Daisy McKendry and Miss

McKnight of the R. I. hospital are spending their vacation at their homes.

Mr. and Mrs. M. Connolly of Boston, Mass., are visiting relatives in town.

Mrs. Samuel Craig of Newcastle, is visiting her parents, Mr. and Mrs. Chas. Williston.

Wm. F. McKnight, B. Sc., employed with the Canada General Electric Company, Peterboro, Ont., left on Wednesday for his home here, after a two weeks visit to his parents, Mr. and Mrs. Jos. McKnight. His sister, Miss Annie, accompanied him back for a visit.

Miss Gladys Bane who has been ill for the last few days is improving.

Rev. Axel Chadir preached in St. Mark's last Sunday night, dedicating his experience as a missionary in Sikhim and Nepal, India.

Douglstown, Aug. 8.—Miss Katie Kirkpatrick arrived home Thursday evening after spending the winter in Boston.

Rev. F. C. Simpson spent Tuesday and Wednesday in Oak Point.

Addie E. McKnight and Daisy A. McKendry, senior nurses at Rhode Island Hospital, returned to Providence on Monday.

Mrs. Ernest Tracer and little son of Chatham spent Monday with friends in town.

The Newcastle Tigers were defeated by the Douglstown Nimbles in a fast game on Saturday evening by a score of 6-4.

Howard, you can certainly play your position alright.

Sanny is not far away when the batter misses the ball.

It takes Frank to send the sphere to the road.

If Billy always pitches as good, he will soon have a call from Detroit.

Of the four pupils of Douglstown Superior School who wrote the Normal School Entrance examinations for second class license at Chatham last month, Miss Katie Breen, Miss Miriam E. Murray and Master Simon Driscoll have passed very successfully, while the fourth, who will remain another year at school, narrowly failed to make the required average.

DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness caused by Catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O. Sold by Druggists, etc. Take Hall's Family Pills for constipation.

BODY FOUND AT CHATHAM—Chatham, Aug. 1.—The body of Allan Currie, of Georgetown, P. E. I., was found this afternoon in the river near Morrison's cove. The deceased was 27 years old. He had disappeared off the schooner Ethel on Saturday night, but Capt. McLeod thought he had gone ashore. There were no marks of violence on him and the coroner decided death was accidental.

## Wanted

GEO. C. HUNT—DEAD

One of Fredericton's Leading Business Men Passes Away.

The death of Geo. C. Hunt of Fredericton occurred on Friday evening in his 83rd year. Mr. Hunt had removed to Fredericton from St. John in 1882, and had run a drug store there ever since. Deceased was a prominent Mason. The funeral took place yesterday afternoon in Fredericton. Four daughters, Mrs. Jones W. Davidson of Newcombs, Miss Ella P. Hunt at home, Miss Kate L. A. Hunt of Boston and Miss Mary L. A. Hunt of St. John, survive.

## STEPHEN LEACOCK

Prof. Stephen Leacock B. A. Ph. L. is man of complex accomplishments. His gifts are very varied and in each he excels. His realm of thought embraces topics ranging from the deepest to the most flippant and entertaining. Prof. Leacock can write with equal facility and success an article on the most obscure point in Political Science or a humorous essay on some trivial subject of the day. Nor does he only interest himself in academic and literary pursuits. He uses his talents towards the development of his country by means of direct personal appeals to the people. Dr. Leacock is a real orator. His personality is magnetic and this coupled with his fine, clear, voice, his flow of English, his logic combine to make his speeches convincing even to the skeptic and to rouse his own adherents to enthusiasm.

It is as a Professor that he is best

Dr. STEPHEN LEACOCK

known. His students are all enthusiastic. He is able by means of his humor to infuse life into and to make interesting even the dry elements of Economics as they were explained by John Stuart Mill. It is in Political Science, however, that the professor really excels. Here he is on his own ground and it indeed needs an erudite opponent to question or argue a point with him on this, his hobby subject. He is the author of an invaluable little book on the subject entitled, "Elements of Political Science." So lucidly is it written, that even the layman, through its personal, may get a comprehensive grasp of the more salient points of the subject.

In 1907 Dr. Leacock was chosen by the Cecil Rhodes Trust to tour the British Empire, delivering lectures on Imperial Problems. He was everywhere received with much enthusiasm and accomplished his mission with signal success.

It was significant that a Canadian should have been chosen for this all-important work. Therefore, not only Professor Leacock, but Canada as a whole should have felt herself flattered and dignified and prominent position in the eyes of the Empire.

Dr. Leacock's many-sided man is hale, hearty, and a good reader. This man is not to be absolutely despised. Dr. Leacock's humorous works make delightful reading. They take the veriest pessimist out of himself and make him a human, fun-loving man. They are overflowing with clean, inoffensive, satirical wit. Literary Lapses had a phenomenal run. His latest effort, "Nonsense" Novels published by Publishers' Press Ltd., Montreal, and by the John Lane Co., London and New York, according to all indications will have a still larger circulation.

It is unnecessary to dwell on what Dr. Leacock has done for McGill since his appointment to the Chair of its Department of Economics and Political Science. It is sufficient to say that from insignificance, Prof. Leacock's department has become the strongest of any in the Faculty of Arts.

Dr. Stephen Butler Leacock was born at Swanmoor, Hant. Eng., in 1839. He came to Canada in 1876. He received his primary education at Upper Canada College and from there entered Toronto University. After receiving his degree Dr. Leacock taught at his old school, Upper Canada College. He then took his Ph. D. at the graduate school of Chicago University receiving it in 1902.

## DON'T TAKE OLD-TIME PI

"Fruit-a-lives" Brings Natural In A Natural Way.

"I am a seventy-five-year-old and a great believer in, an 'Fruit-a-lives'." "Stricture of the Bowel complaint I suffered from an that 'Fruit-a-lives' did me then any other remedy. I advised me to stick to 'Fruit-a-lives' and I have done so with best. I have been in business good many years and have a dent of Ottaville for over fifty years."

W.M. PA

OTTAVILLE, ONT., JUL

Fruit is Nature's laxative. "Fruit-a-lives" is made of the juicy oranges, figs and prunes which act on the human fresh fruit—easily and gently as effectively as the old-time "Fruit-a-lives" does. It irritates the intestines. It bowls and cures Constipation. "Fruit-a-lives" acts directly. Just try "Fruit-a-lives" a mild, gentle yet effective liver regulator. 50c. a box—6 for \$2.50—At all dealers, or from Limited, Ottawa.

OLD-TIME PHYSIC"Fruit-a-lives" Brings Natural Results  
In A Natural Way.

"I am a seventy-nine-year-old man and a great believer in, and user of, 'Fruit-a-lives'."

"Stricture of The Bowels was the complaint I suffered from and I found that 'Fruit-a-lives' did me more good than any other remedy. My doctor advised me to stick to 'Fruit-a-lives' and I have done so with best result."

"I have been in business here for a good many years and have been a resident of Ottaville for over fifty years."

WM. PARSONS.  
OTTAVILLE, ONT., July 8th, 1910.

Fruit is Nature's laxative. "Fruit-a-lives" is made of the juices of apples, oranges, figs and prunes. "Fruit-a-lives" acts on the human system like fresh fruit—easily and gently—yet just as effectively as the old-time pill.

"Fruit-a-lives" does not gripe or irritate the intestines. It regulates the bowels and cures Constipation because "Fruit-a-lives" acts directly on the liver.

Just try "Fruit-a-lives" when you need a mild, gentle yet effective laxative and liver regulator.

Box 6 for \$2.50—trial size, 25c. At all dealers, or from Fruit-a-lives Limited, Ottawa.

SIR WILFRED FOR  
MARITIME PROVINCESWill Be Down East From Aug.  
28th to Sept. 4th.

Ottawa, Aug. 3.—Sir Wilfred Laurier will open his platform campaign on Tuesday August 15 in one of the Ontario ridings.

From August 28 to September 2 he will be in the maritime provinces for a series of six or seven meetings speaking in Halifax, where a strong effort will be made to defeat Mr. Borden and his running mate, Mr. Crosby, and at St. John (N. B.), where Dr. Daniel, one of the two supporters of the opposition leader who weathered the Liberal sweep of that province in 1908, is likely this time to lose his seat. Sir Wilfred will be in St. John Aug. 28th and in Moncton on Sept. 2nd.

Facts  
About  
Motherhood

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not only is the mother in a hundred ways prepared to undergo the trial of strength, and when the strain is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under right conditions need be no hazard to health or beauty. The understandable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, women will persist in going blindly to the trial.

It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty.

In many houses once children there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

Any woman who would like special advice in regard to her motherhood is cordially invited to write to Mrs. Pinkham at Lynn, Mass. It will be held in strictest confidence.

## FARM AND FIELD

CARED UNDER.

Respected Too Often the Cause, Says Expert.

The usefulness of thousands of milch cows is damaged every year by udder trouble. Prompt treatment will usually avert serious trouble, but cases of long standing are very difficult to handle. Many factors act to cause udder trouble. It is common to heavy milkers at milking time. At that time the udder is naturally swollen and inflamed, and if it is exposed to a cold draft or bruised in any way serious trouble is likely to follow. Although commencing early in the lactation period, udder trouble may occur at any time, being due to injury or cold, hard, damp ground, to bruises, to incomplete milking, to exposure to cold, occasionally to changes in food, and sometimes being due to an infected teat of the udder.

There are many forms of udder trouble, which are variously known as garget, mammitis and caked udder. In the most severe form there is a chill, followed by a fever, and the udder becomes much swollen, red and tender; the milk decomposes into whey and cheesy curd; the udder and the udder mortifies; it may be completely lost.

## TURNING OUT COWS.

Grass Insects, Now Supply But Not Quality.

When the grass begins to grow sufficiently for the cows to graze they thrive away, as the change is highly beneficial to their health, but it has a tendency to weaken the milk. As a rule the constant supply of grass will improve the milk supply, but the quality does not rise proportionately. On the contrary, it generally drops, and attention should be given to this to prevent too much degeneration, but a good deal depends on the pastures. Where these are rich, and the supply ample, there will be no reduction of quality. Unfortunately, such pastures are not the rule. Plenty of not only poor material, and from not only grass is scarce. The whey, or, of course, has an influence on this, and when general the supply may keep up the demand. At first there may be plenty, but it is apt to be scarce, and it is most necessary to watch the milk yield at this time.

## NEW LEADER IN CLYDESDALE

Scotland Produces a New Sire Horse.

The show season has come round once more and three important fixtures have been held in as many weeks. In the West of Scotland in season proper opens with Kilmarnock—noted for its display of Ayrshire cattle and Clydesdale horses—then comes the Ayr event which is followed by the Glasgow Agricultural Society's show. At the last named one finds a good turn out of horses, both light and heavy breeds being well represented, and while there is always a good display of Ayrshire cattle, the other breeds, such as Shorthorns and Aberdeen Angus are also to the fore. The heavy shows have brought out a lot of promising young stock, but nothing really sensational has yet been seen. In the Clydesdale section one of the outstanding features has been the great success of the "gets" of the noted sire Baron of Buchlyvie. This horse stands absolutely without a rival as a breeding horse, and, although a young sire, his stock are coming to the front in a truly remarkable manner. Got by that grand old horse, Baron's Pride, he bids fair to rival his sire as a breeder.

## TENT CATERPILLARS.

One often finds in May or June, on the limbs of apple and wild cherry trees, compact, silken nests, or tents, containing a large number of handsome caterpillars. These are the insects which have been known for many years as tent caterpillars.

The eggs are deposited during July in compact masses around the twigs. After they are laid the parent moth secretes a viscid liquid which hardens over the eggs as a protection. The insects remain in this state until the following spring, when they hatch into young caterpillars.

These insects feed on the foliage for about six weeks, until they become fully developed, when they leave the tree and seek some place to pupate in. Two or three weeks later the moths appear, and in a short time deposit the eggs, after which they soon die. This there is but one brood each season.

## THE GOOD DAIRY COW.

The dairy cow possesses a long face, thin, slender neck, a sharp, projecting shoulder. She is not very wide in the chest, but her capacity of chest is due to her depth, which is greater in proportion to her size than you will find in the beef animal. She possesses large barrel, which indicates a good capacity for digesting her food. Her depth here should exceed her depth in any other portion of the body. A dairy cow should have a good width at the hips. Her thighs should be lean and free from muscling. She should be open between her thighs.

## FRUIT GROWERS' ORGANIZE.

A meeting of interested fruit-growers of the Newcastle, Ont. District was held last week for the purpose of forming a Co-operative Fruit-growers' Association. Mr. P. J. Carey, Dominion Fruit Inspector, gave a helpful address. The chair was occupied by Mr. R. S. Duncan of the Department of Agriculture.

The organization came to be known as the Durham Co-operative Fruit-growers' Association. It was decided to take good care of their orchards.

## NEWCASTLE WANTS JUSTICE DONE

At the regular monthly meeting of Newcastle Board of Trade on the 7th instant the following were accepted as new members, bringing the membership of the Board up to about 115:—

Ald. C. M. Dickson, and Messrs. H. R. Moody, Ernest Maill, W. L. Durick, S. E. Miller, J. E. T. Lindon, and E. A. O'Donnell, Newcastle; Everett J. Parker, Derby; Elijah Vye, Chatham Junction; C. R. Parker and George R. Vanderweck, Millerton; Wm. Sullivan, Redbank; C. I. Monroe, Chatham; and Thos. Gill, Barnaby River.

The following were elected delegates to represent the Board at the Maritime Board of Trade which meets in Moncton Aug. 16th and 17th inst.—

President Patrick Kennedy, Secretary E. A. McCurdy, Ald. George Stables, W. J. Jardine, J. D. Croghan, Ald. H. H. Stuart, George McDade, Hon. Donald Morrison, Ald. John Clark and John Ferguson, Alternates—Ald. T. W. Butler, S. W. Miller, R. A. Murdoch, C. C. Hayward and J. D. Pauling.

Great dissatisfaction was expressed with the tardiness of the I. R. C. Managing Board in not extending the Newcastle—Blackville service to Doaktown so as to allow the people of Doaktown, who are only 50 miles from Newcastle but 64 from Fredericton to trade in Newcastle, their natural market, where they sell most of their lumber. Trains run so that they now are compelled to do their trading in Fredericton, thus giving business to the C. P. R. that should go by the I. R. C. The putting on of a shunter to relieve the Blackville train of shunting duty at Newcastle, Derby Junction, Lower Derby, pulp mill and Millerton is greatly needed, and the daily train service now coming here from Blackville must be extended to Doaktown. It would cost but \$40 or \$45 a day extra but the extra traffic would soon repay the extra costs. The alternate daily service from Doaktown to Newcastle and Chatham, proposed by Mr. W. S. Laggie and Mr. Tiffin, would cost \$100 a day. It was time for Newcastle and up river districts to assert their rights. It had taken fifteen or twenty years to get the missing link completed, and steps should be taken to prevent such a delay for the extension to Doaktown.

It was decided to authorize the secretary to telegraph the Ottawa authorities for an immediate reply to the representations made them by Newcastle Board of Trade on July 1st, and if necessary, a delegation will be sent to Ottawa to press the matter.

After the transaction of some minor business, the Board adjourned to meet again next Friday August 11th at 8 p. m.

In an effort to stimulate interest in apple raising in the Province of New Brunswick, the Saint John Board of Trade is offering a silver cup to be awarded at the annual apple show to be held this Fall at Saint John. Fifteen of the leading merchants of that city have also offered cash prizes of Ten Dollars. The President of the Board of Trade and the Secretary of the New Brunswick Fruit Growers Association will be the judges at the exhibition. Full details have not yet been dealt with, but will be available later.

In the meanwhile fruit growers who are interested can get fuller particulars from W. E. Anderson, Secy. of the Board of Trade, St. John.

## NEWCASTLE WANTS JUSTICE DONE

At the regular monthly meeting of Newcastle Board of Trade on the 7th instant the following were accepted as new members, bringing the membership of the Board up to about 115:—

Ald. C. M. Dickson, and Messrs. H. R. Moody, Ernest Maill, W. L. Durick, S. E. Miller, J. E. T. Lindon, and E. A. O'Donnell, Newcastle; Everett J. Parker, Derby; Elijah Vye, Chatham Junction; C. R. Parker and George R. Vanderweck, Millerton; Wm. Sullivan, Redbank; C. I. Monroe, Chatham; and Thos. Gill, Barnaby River.

The following were elected delegates to represent the Board at the Maritime Board of Trade which meets in Moncton Aug. 16th and 17th inst.—

President Patrick Kennedy, Secretary E. A. McCurdy, Ald. George Stables, W. J. Jardine, J. D. Croghan, Ald. H. H. Stuart, George McDade, Hon. Donald Morrison, Ald. John Clark and John Ferguson, Alternates—Ald. T. W. Butler, S. W. Miller, R. A. Murdoch, C. C. Hayward and J. D. Pauling.

Great dissatisfaction was expressed with the tardiness of the I. R. C. Managing Board in not extending the Newcastle—Blackville service to Doaktown so as to allow the people of Doaktown, who are only 50 miles from Newcastle but 64 from Fredericton to trade in Newcastle, their natural market, where they sell most of their lumber. Trains run so that they now are compelled to do their trading in Fredericton, thus giving business to the C. P. R. that should go by the I. R. C. The putting on of a shunter to relieve the Blackville train of shunting duty at Newcastle, Derby Junction, Lower Derby, pulp mill and Millerton is greatly needed, and the daily train service now coming here from Blackville must be extended to Doaktown. It would cost but \$40 or \$45 a day extra but the extra traffic would soon repay the extra costs. The alternate daily service from Doaktown to Newcastle and Chatham, proposed by Mr. W. S. Laggie and Mr. Tiffin, would cost \$100 a day. It was time for Newcastle and up river districts to assert their rights. It had taken fifteen or twenty years to get the missing link completed, and steps should be taken to prevent such a delay for the extension to Doaktown.

It was decided to authorize the secretary to telegraph the Ottawa authorities for an immediate reply to the representations made them by Newcastle Board of Trade on July 1st, and if necessary, a delegation will be sent to Ottawa to press the matter.

After the transaction of some minor business, the Board adjourned to meet again next Friday August 11th at 8 p. m.

Father Morrissey's  
Liniment  
Relieves Pain

Aches and pains yield quickly to Father Morrissey's Liniment. It is absorbed quickly by the skin, and penetrates deep into the tissues, making it splendid for sore muscles, stiff joints, rheumatic pains, backache, sore throat or lungs, or any deep-seated pain.

It cures at once and heals surface hurts, such as cuts, bruises, burns, scalds and frost-bites.

For tooth-ache and ear-ache it is an excellent remedy.

Father Morrissey's Liniment is exceptionally good as a "rub" for athletes. It takes out stiffness and soreness after severe exercise, and never blisters the skin.

Keep a bottle handy, for

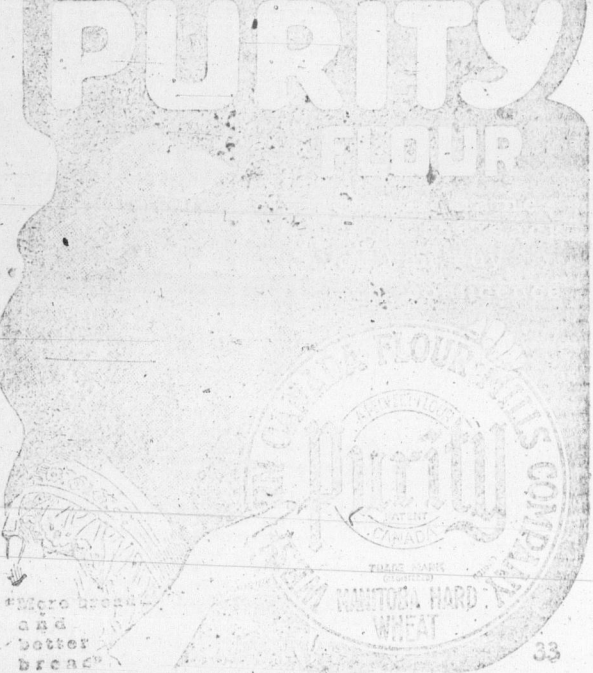

"There's ease in every drop".

25c. a bottle—at your dealer's.

Father Morrissey Medicine Co., Ltd., Montreal, P.Q.

Rev. Father Morrissey

## Wise Men and Women Know

that most of the sicknesses of life come from inactive bowels and from unhealthy condition of the organs of digestion. If your digestive system is not working right, your food does not nourish you—poor blood and weakness follow. If your bowels are inactive—waste matter poisons the whole system and serious sickness is sure to follow. To take promptly

BEECHAM'S  
PILLS

is to save yourself trouble and expense. Gentle, but quick; safe, but thorough, they enable the bowels to carry away waste matter naturally and tone up the whole digestive system. They will not injure the most delicate. They help you to get your bowels and your digestive organs in that condition when they can take good care of themselves and of you. Beecham's Pills

## Do Good Naturally

For females, Beecham's Pills are especially suitable. See instructions with each box. Prepared only by Thomas Beecham, St. Helier, Jersey, England. Sold everywhere in Canada and U.S.A. America. In boxes 25 cents.

## Important to Grocers and Consumers!

The absolute purity and healthfulness of

BAKER'S COCOA  
and CHOCOLATE

are guaranteed under the pure food laws of Canada. Made by a perfect mechanical process, they are unequalled for delicacy of flavor and food value.

The New Mills at Montreal are now in operation and for the convenience of the Canadian trade we have established Distributing Points at Montreal, Winnipeg, Vancouver

## WALTER BAKER &amp; CO. LIMITED

ESTABLISHED 1870 DORCHESTER, MASS.

Canadian MRS. 1000 BERT STREET, MONTREAL

Dalhousie has an excellent harbour for vessels up to 25 feet draught. Large quantities of lumber and pulpwood are shipped from this port. River open for navigation late in the fall. Splendid site for NEW industries requiring shipping facilities.

**DALHOUSIE, N. B.**  
Incorporated 1903  
**Shiretown of Restigouche County**

Population about 1,200 Lumbering, the Chief Industry

If interested in promotion of new industries, write L. D. JONES, Town Clerk

As a summer resort it has no superior in New Brunswick or Quebec. Has good up to date Water Works and Fire protection. Will have electric light this year.

**SWALLOW'S NEST OF BANK-NOTE**

Also How a House Stole \$40 Worth of Notes to Make a Home.

A pair of swallows of Fibersburg, in the Tyrol, have stolen a number of ten-kron bank-notes to line their nest.

The parent birds discovered that the new notes were just the shade of blue to match their eggs, the tissue being tough but flexible, and exactly the material they needed. The nest and the missing notes were only discovered when the swallows had abandoned it and it fell to the ground.

This feat has been equaled by that of an enterprising mouse in Normandy, which abstracted a number of twenty-kron notes to the value of \$40, of a delicate reddish brown shade, from the cash drawer of a butcher, and tearing them to pieces, adapted them to the purpose of making a nest for her family of seven.

The butcher in his search for the notes suspected and traced the mouse, and found the nest under the eaves, resort to the use of sticky fly paper, keep garbage pails and privy vaults securely closed; if possible, keep stable manure covered.

Some farmers' wives hang sticky fly paper, sticky side out, on the outside of their screen doors, at the top; which, in warm weather, catches flies which gather there.

Flies are attracted and can be killed by the following solution: Place in a room two teaspoonfuls of formaldehyde (formalin) in a pint of water. Flies drink this and shortly die. This not only kills the fly, but serves to disinfect the insect after death.

Intestinal discharges from patients suffering from typhoid or any other fever, should be sterilized before being emptied into the cesspool.

**THE HOUSE FLY.**

The Most Filthy Insect Known.

This fly, called "Typhoid Fly," on account of its being known as a carrier of typhoid germs, is one of the filthiest insects with which we have to contend. It also carries the germs of tuberculosis and other diseases, and is a menace to the health of the family.

It breeds in fresh horse-manure and other filth, hence, when the stable is near the house, flies are apt to be more numerous. Use screens on the windows; resort to the use of sticky fly paper; keep garbage pails and privy vaults securely closed; if possible, keep stable manure covered.

Some farmers' wives hang sticky fly paper, sticky side out, on the outside of their screen doors, at the top; which, in warm weather, catches flies which gather there.

Flies are attracted and can be killed by the following solution: Place in a room two teaspoonfuls of formaldehyde (formalin) in a pint of water. Flies drink this and shortly die. This not only kills the fly, but serves to disinfect the insect after death.

Intestinal discharges from patients suffering from typhoid or any other fever, should be sterilized before being emptied into the cesspool.

**Traffic on the Lakes.**

Canada's Soo Canal traffic, 1909, season of eight months, 57,925,149 tons; Great Lakes, all of 1909, 15,407,537 tons.

Canada's canal traffic, 1910, 45,000,000 tons.

The "Midland Prince" broke all records in grain cargoes on July 7th, 1910, by sailing from Port William with 124,251 bushels of oats.

There are 111 vessels in the Lake Superior trade over 500 feet in length, and 157 between 400 and 500 feet in length.

There were carried down the lakes during 1909, 112,253,561 bushels of wheat, and over 45,000,000 bushels of grain other than wheat.

**Dairying in Ontario.**

Ontario's dairy industry was valued in 1909 at \$21,000,000, with 97 creameries and 1,772 cheese factories, and 35 Government dairy institutions.

Three-quarters of the dairy product of Canada comes from Ontario.

Milk delivered at cheese factories, 1,661,039,751 lbs.; cheese production therefrom, 120,624,436 lbs.; value of cheese, \$18,106,919. Butter made at creameries, 9,859,109 lbs.; value of butter, \$2,355,170. Value of milk and butter made on farms, over \$10,000,000.

Average value of Ontario dairy products for the past 5 years is at least \$20,000,000, and in two or three banner years, \$35,000.

**Railroad Ticket Printed While You Wait.**

The Lancashire and Yorkshire Railway Company have installed a remarkable automatic machine at Sandhills Station, Liverpool, by which, on dropping a penny in a slot, a ticket is printed, dated and out. The machine is worked electrically, the power being supplied from the live rail. When the supply of cardboard is running short, the clerks in the office are warned by the ringing of a bell.

**Cannet Export Feathers.**

Plumage skins or eggs of native birds of Australia and New Guinea can no longer be exported, this having been prohibited by the Australian Commonwealth Government.

**Average value in farm crops and fruits in Canada, 1901, \$10.33 per acre; United States (including sub-tropical products), \$9.41.**

**Canada's Fishing Fleet.**

Canada has a fishing fleet of 1,725 vessels, and 41,170 boats, manned by 68,663 men. 21,694 employed on shore. Total, 90,357.

**A Big Investment.**

Capital employed in manufacturing industries, 1900, \$446,916,487; 1906, \$455,555,033; 1911, estimated at \$1,000,000,000.

He raised only \$18, and everybody's wondering who the other 12 bucks were who gave a dollar apiece.

The worst poet now endeavoring to get into the class of those who are "a sea-shore rhyme."

**SHACKLETON'S ENPHATIC STYLE**

The great explorer not always choice in his words.

When Sir Ernest Shackleton was in the depths of the Antarctic regions, on his trip toward the South Pole, he kept a diary describing the adventures he had every day, the kind of country he traversed, the weather, and all the details of the journey. He wrote his notes in a free and emphatic style, using the adjectives and phrases which seemed best suited to impress himself on those who might read the volume at a later time.

After he had just missed reaching the pole and had returned to civilization as the man he had gone "farthest south," he was asked to print a book about his experiences. He hurriedly edited his diary and turned it over to the publishers. A few days after the book appeared in the shops he began to get letters from religious folks, upbraiding him for a sentence he had used in describing a certain stretch of country over which he had traveled.

Shackleton looked it up and found he had not edited out all the emphatic language he had used in the original. The sentence, to which objection had been made, read as follows: "The surface of this section plays hell with the feet."

**BOSTON VS MONTREAL**

A Montreal Journal Investigates Farmers' Prices.

A newspaper of Montreal compiled a table of comparative prices in that city and Boston, and the result is a startling revelation.

This statement was prepared with the assistance of prominent produce dealers and food experts.

Cheese, eggs, live poultry, carrots, celery, lettuce, onions, squash, tomatoes, beans and cranberries all command higher prices in Montreal than in Boston. Hay and oats were considerably higher in Boston.

The best creamery butter was then a cent and a half per pound higher in Boston than in Montreal, while storage creamery butter was one cent higher in Boston.

Since then butter prices have declined in most of the markets of the United States.

Not long ago a leading produce dealer of Montreal received a telegram from Chicago offering him 300 tubs of September creamery butter, cold stored, at 18 cents. Chicago. At the time this telegram was received the same kind of butter was worth 24 cents to 25 cents in Montreal.

Mr. Gage, president of the Toronto Board of Trade, recently prepared a table of prices in Toronto and New York, covering the Toronto market reports with the New York market reports as given in the New York Commercial Bulletin. This table follows:

	Toronto	New York
Best Creamery Butter		
in prime		
wholesale . . . . .	20	23 1/2
Prime chickens . . . . .	18 to 20	16
Prime turkeys . . . . .	20	22 1/2
Ducks . . . . .	18	20 to 15 to 16
Geese . . . . .	15	16 1/4
Bacon . . . . .	16	16 1/4 to 16 1/2
Hams . . . . .	15 1/2	15 1/4

**Waterways of Canada.**

Canada has 6,000 miles of waterways from the St. Lawrence to the Pacific. The Mackenzie is a hard break. The Mackenzie is with its tributaries, 2,500 miles long, equal to distance from Liverpool to Halifax, draining a region three times as large as France. The Saskatchewan is 1,000 miles long; the Columbia 1,000; the Yukon 1,000; the Fraser and the Red River each 650 miles. The Saskatchewan basin is as large as that of the St. Lawrence.

**Laws.**

Laws are what some chap, or collection of chaps, wrote in a book in an attempt either to approximate or side-step public opinion. This is true of all laws except unwritten laws, in which case you are entitled to as many guesses as you wish, and the last guess is right.

All laws, both written and unwritten, may be viewed according either to the letter or to the spirit. The legal profession supports the letter and is in turn supported by the spirit. That is why a poor man seldom gets a box seat where he can see the spiritual side. In spite of the excess of legal verbiage, the letter of the law is supposed to be plain, so a poor man is supposed to know all about it without bothering the judge with extenuating circumstances.

The spirit of the law, on the other hand, is as shifting as the sands of the sea, so that the Supreme Court may divide five to four without humiliation.

**Last Call.**

Professor Lozcock tells the following story about a young man who sometimes drank more whisky than was good for him:

He had been making a night of it, but had forsaken his companions. He was acquainted with an undertaker named George, and got the crazy notion at three o'clock in the morning that he must see this particular man. Accordingly, he found George's undertaking establishment, over which George had his sleeping apartment. The intoxicated young man rang and rang George's bell, and at last said him. The undertaker put his head out of the third-story window, expecting to find that his funeral services were required immediately. Indeed, he recognized his friend George.

"What's wrong?" he exclaimed crossly.

"I've been drinking," said the young man, "and I've got to do business with."

**BAY DES CHALEURS ROUTE**

L. T. JOUDRY Auctioneer.

Campbellton, Aug. 11-2wks.

**PUBLIC NOTICE**

The attention of the public is directed to sections 6 and 7 of By-Law No. 24 of the Town of Campbellton, as follows: 6.—All property owners or tenants are hereby required to provide two good, strong and sufficient ladders to be placed on each dwelling house or other building owned or occupied by them respectively, and such ladders shall be placed by them on such dwelling house or other building, one to reach from the ground to the roof of the said building, and the other to be laid on the roof, and held firmly at the top by two good and sufficient iron hooks or fasteners; such ladders to meet at the eaves of the house or other building and to be so placed as to give easy access to the roof of such house in case of fire.

7.—Any tenant who may be required by the preceding section to place, or cause to be placed, on any building of which he is a tenant, ladders as aforesaid, shall forthwith notify the landlord that he, such tenant, is required to provide ladders for the buildings occupied by him, and if the landlord refuses or neglects to comply with the requirements, made upon the tenant in regard to providing such ladders, it shall be lawful for the tenant to find and provide the ladders so required, and to deduct the cost of the same from any rent due, or to become due, from him to his landlord, or to recover the same from him by an action of debt in any court of competent jurisdiction.

All persons are hereby required to govern themselves accordingly under penalty of forty dollars as prescribed by said By-law No. 24.

John T. Reid Building Inspector, Campbellton, Aug. 11, 1911.

**NOTICE TO CONTRACTORS**

Tenders for Terminal Station Quebec SEALED TENDERS, addressed to the undersigned, and marked on the envelope "Tender for Terminal Station, Quebec" will be received at the office of the Commissioners of the Transcontinental Railway at Ottawa, Ont., until 12 o'clock noon of the 31st August proximo, for the construction and erection complete, in accordance with the plans and specifications of the Commissioners of Terminal station in the City of Quebec.

Plans and specifications may be seen and full information obtained at the office of Mr. Gordon Grant, Chief Engineer, Ottawa, Ont., and of Mr. A. E. Duquet, District Engineer, Quebec, P. Q.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied by the Commissioners.

Each tender must be signed and sealed by all the parties to the tender, and witnessed, and be accompanied by an accepted cheque on a chartered Bank of the Dominion of Canada, payable to the order of The Commissioners of the Transcontinental Railway, for the sum of One Hundred Thousand Dollars (\$100,000).

The cheque deposited by the party whose tender is accepted will be deposited to the credit of the Receiver General of Canada as security for the due and faithful performance of the contract according to its terms. Cheques deposited by parties whose tenders are rejected will be returned within ten days after the signing of the contract.

The right is reserved to reject any or all tenders.
