Flight officer R. F. P. Abbott, son o our townman, Mr. C. H. Abbott, who recently completed his course at the Curtis Aviation School, left for Montreal last week after a brief holiday at home. He will leave shortly for overseas to join the aviation corps of the British Navy.

Had an Arm Fractured. Mr. Jos. Lewis, of the 7th Line Beck-with, had the misfortune to have an arm with, had the misfortune to have an arm broken last Thursday. He was engaged with the manure spreader when his horses bolted and threw him out, causing the mishap. Medical aid was summoned from Carleton Place and the fracture was reduced.

Innisville Boy Meets with Mishap.

Mervin Morris, son of Mr. J. H.

Morris, Innisville, met with rather a
serious mishap on Saturday last, by
which he lost part of a thumb and twofingers. He was emptying the powder
out of a shell over a stove when the
shell exploded. Dr. McEwen was summoned from town who dressed the ined from town, who dressed the in jured hand.

Major A. B. Gillies Wounded The casualty lists of last week contained, in the list of the Canadians wounded, the name of Major A. B. Gillies, of Carleton Place. Enquiry from the parents here elicits the information that the Major has not been wounded in the physical sense, but is suffering from shell shock, and hopes to be on duty again years one probably is Mrs. S. Wilson received a message from the Militia Department on Saturday advising her of the wounding of her son Harvey S. S. Wilson, who has lost one foot and had a hand badly injured. Harvey was with the Queen's Battery, enlisting from Kingston. He has "done his bit" like thousands of others, and will likely be invalided home as soon as he is able to stand the voyage. be on duty again very soon—probably is back in the trenches now.

Rev. Mr. Dobson Accepts Call.

At an adjourned meeting of the Hamilton Presbytery, held last Tuesday, the call from Zion Church to Rev. W. A. Dobson, B.A., B.D., of Dunnville, was formally accepted, and his translation to the Presbytery of Lanark and Renfrew was agreed to. Rev. J. J. Monds represented the latter Presbytery and Rev. Dr. Drummond represented Zion congreation at the meeting. Mr. Dobson preaches his farewell at Dunnville on the 10th December, and will probably Mr. K. P. Hutton, the teller of the Bank of Ottawa, is off duty for a week now with a bone fracture. He fell upon the 10th December, and will probably be inducted to his new charge on the 15th

A Canadian State-owned line of steamships is to be operated between Atlantic and Pacific ports by way of the Panama Canal, the contracts for two vessels having been authorized.

Beckwith's Day of Prayer.

Thursday (St. Andrew's Day) will be observed by the Presbyterian people of Beckwith as a day of prayer and fasting. Divine services will be held in Franktown Church at 11 a.m., and the noon hour will be spent in solemn prayer and meditation. Service will also be held in Black's Corners Church at 2 p.m. Rev. James Taylor, of Braeside, will be the special preacher of the day. The public will be cordially welcomed to these services.

The youngest soldier to leave Kingston From the firing line has been killed in action. He was Driver Percy George Lazell. When only a little over fitten the was of age he went overseas with C Battery, R.C.H.A., being transferred to the 48th Howitzer Battery, with which he was fighting when killed. Driver Lazell, who was only sixteen last May, has two brothers in the Royal Navy and one with No. 1 Canadian Field Ambulance Corps.

bred loafer instead of like a gentleman. Here is your picture, fast young man, true to life. Look at it! How do you like it? What have these characteristics made of you? What has the future in store for you? Unless you change your course most radically—Ruin.

SPOILING CHILDREN.

The president of the Chicago Board of Education is severe in his criticism of parents, of whom there seems to be a legion in that city who manifest no discretion in the training of their sons. The high schools are full, according to this official, of pampered boys who wear wrist watches, think only of society-life, its ills and pleasures, and are carried to and from their homes in limousines with siveried chauffeurs at the wheel.

Only boys of exceptional qualities can

and from their homes in limousines with diveried chauffeurs at the wheel.

Only boys of exceptional qualities can survive much of this sort of thing, as anyriads of parents have realized bitterly and too late. Over indulgence spoils many a man and a woman in the making, who might if thrown entirely on their own resources have made worthy human products of themselves.

The fact is not generally realized, but it requires the co-operation of two wise and loving parents to train a child up and bring out his latent possibilities. Now and then an unusual father and mother can do it, if the child is somewhat above the average. But ordinarily if the father is too occupied with business or away most of the time, or if the mother is too busy with her woman's interests or too neglectful, or if either ene of them is defective in head or heart, the vain and silly girl, the selfish

Each year some new feature of importance to the farmers of Eastern Ontario and Quebec is brought out or Thousands of thankful mothers throughout Canada — many of them your own peighbox — speak with the and the 1917 Show, which will be held from January 16th to 19th, will be no exception. Each year also finds this great Winter Fair larger than ever hefore in one or more departments. Mrs. Albert Nie, St. Brieux, Sask., who and the 1917 Show, which will be held great Winter Fair larger than ever great Winter Fair larger than ever before in one or more departments. Sheep and poultry were special features at the last Show, both these departments having the largest and best display in the history of the Show. Ottawa is situated in one of the greatest dury sections in Canada, and should have the excitons in Canada, and should have the control of the control of the control of the greatest dury sections in Canada, and should have the control of the best three day Dairy Test of any show in Canada. The dairy classes will be a special feature in connection with the coming show. The dairy buildings are anequalled by any other show in Can-ada, and the conditions are ideal for making high records as the animals are making high records as the animals are stabled in the most modern, well light-ed, heated and ventilated stables. Arstabled in the most modern, well lighted, heated and ventilated stables. Arrangements are being made for the installation of equipment that will make it possible to test the milk after each milking and to have the results tabulated and posted in the stables, so that the exhibitors will know after each milking just exactly what their animals are doing. Arrangements are also being made for having the stables specially superintended so that the ventilation and sanitary conditions will be as near ideal as possible. In connection with special privileges the Executive have found it advisable to discontinue special pass privileges to the members of the Farmers' Institutes and County Boards of Agriculture. In lieu of passes a special admission rate has been adopted by the use of strip tickets at the rate of eight for One Dollar, and these may be shained through Secretaries of County Boards of Agriculture. made for having the stables specially superintended so that the ventilation and sanitary conditions will be as near ideal as possible. Children Cry FOR FLETCHER'S CASTORIA

THE BOY AND HIS MOTHER. One of our young men asks us the

following question:
"What do you think of a young-lady
while in the company of a dude masher,
remarking of an old schoolmate of hers, the shoes of a boy who is kind to his old mother. Such a girl has no more heart in her than a turnip, and is only fit—oh, she isn't fit for anything. She ought to be taken across the knee of her own mother until she thinks it is about the middle of August. The most heart-less thing in the world is for a person to less thing in the world is for a person to make such a remark as that quoted above about a young man who is proud of his mother, and loves her so that a tear in her eye is like a drop of melted lead on his heart. The young man who heard of such a remark being made about his relations with his mother no doubt felt that he had rather not have heard of the remark, but it is lucky that he did, if he thought he had any affection for that girl. She would not have said it in his hearing, which shows that she is a hypocrite and a two-sided person. If he married that girl he would have a little hell of his own. Such a girl would make a man wish he had never seen any woman except his

Rafrigaration by Electricity.

Refrigeration is among the conveniences now supplied by electricity for the model house. Two white-enameled electric refrigerators shown at the Grand Central Palace, New York, were somewhat larger than the average household ice-box, each weighing 150 pounds, but they received no aid from the ice-man, and, on being connected to an electric.

Children Cry FOR FLETCHER'S CASTORIA

FOOD THAT FEEDS

Why Do We Eat, Anyway, In Summer Time?

WHAT IS A GOOD MENU?

Most Housewives Don't Know Food Values to the Extent of Giving a Family, Especially Growing Children,

One of the most important things that every housewife should know about food is its value as nourishment for the body. We must in fact have foods that feed. There are several kinds of values that all human bodies need in the food they eat and with-out which they cannot be healthy and well nourished. These are:

Material to build the body and repair

Material to give heat and strength.

Let us take them in order.

Let us take them in order.

It may be said of the body building material that, in a sense, it is the most important of all, because we cannot live without it, while we might go on living for some time without most of the others (though we could not long remain healthy). Chesse lentth hardest. main healthy). Cheese, lentils, harlcot beans, split peas, meat, fish, oatmeal, eggs, nuts and, to a somewhat less ex-tent, good bread, all have much body building material.

Fats of all kinds, such as butter nut butter, give warmth and energy strength and power to work. Sugar, molasses and golden sirup are also heat giving, and so are starchy foods, such as potatoes, rice and cornstarch. These foods, however, contain very lit-tle body building material.

Vegetables and fruit (other than ly any of the body building materials, but they give the body what no other foods give—that is, certain juices which purify and enrich the blood and without which no one can be healthy. It is these precious juices which are thrown away when vegetables are boiled in water and the water poured down the sink. If these juices were taken by people every day in properly cooked vegetables there would not be nearly so much money spent at the drug store, as they are the best pos-sible form of natural medicine.

The bone forming materials are to be found principally in milk and cheese, good bread, oatmenl and in onlons and many green vegetables. They are ab-solutely necessary for growing children. The result of children not getting enough of them is only too often to be seen in bad teeth and stunted growth.

One cupful of grape juice, one cupful of water, one cupful of sugar, one-fourth cupful of taploca, the juice of one lemon, a plinch of salt and stiffly beaten whites of three eggs. Soak the taploca for fifteen minutes in a cup of water; place in saucepan, add the sugar; when hot add the grape juico. Cook until the taploca is transparent, then add the lemon juice and salt. Lastly fold in the beaten whites of the

WHAT'S COMING.

Fine Feathers Make Fine Birds This

Fall, You See.

Feather trimmings promise to take the place of beads, which are going on to handbags. This snug little shape

of black velvet with its chic brim is made more dashing by two tall, bright green birds that perch on the crown and turn tail to breezes.

SACRED TREE OF SPAIN.

And Its Connection With the Ancient Euskarian Language.

You all know about the Charter oak, that tree that figured in the fight for independence of the American colonies, and perhaps you have heard of other trees with national significance.

Did you ever hear of the sacred tree of Spain and the means by which it is perpetuated? It stands close to the town of Guernica, in Biscay, and under its spreading foliage the general junior of the stands of the sacred trees. tas are inaugurated. Several centu-ries ago, when Spain was a loosely tied bundle of more or less independent states, the lords of Biscay took their oath under one of the parents of this same tree, where a stone bench was provided for their suse, as symbolic of the enduring solidity of their reign. er symbolism than is to be found in the bench of hewn stone, for both the family dignity and the Euskarian lan-guage are handed from father to son. In that isolated region a form of-speech that is utterly different from both French and Spanish has been In some respects the tree shows a deep-

both French and Spanish has been maintained since the beginnings of European civilization because each father made it his business to instill into his eldest son the idea that it was his

duty to perpetuate his language and the peculiar institutions of his race. The tree of the Basques is one of the bardlest of all the hardy things to be found around the bay of Biscay and the Fyrenees mountains. The one that is now standing was taken from the parent tree in 1780 and had been growing for thirty years when its 300-year-old progenitor succumbed to age and a hard windstorm. Another shoot was started from this one forty years ago.

CHINESE LETTER CARRIERS.

Feats They Must Perform Would Tire

How many of our own postmen would care to transfer their services to

the Chinese postoffice?

To get into the postal service in Chi-

To get into the postal service in Chlna is not an easy matter.
In the first place an applicant must
have strength and courage, and in order to gain these he must be prepared
to undergo a very queer method of
training. He must wander through
mountains and valleys, forests and
coves. The exact time to be occupied
in a trip of this sort is fixed by the
law, and a very heavy fine is imposed
for any unnecessary delay.

The would be postman must repeat these trips at night, and if he listens to the bad spirit, thereby failing to ap-pear at the required time at a specified place he is sure to lose his chance of being a postman.

being a postman.

But that is not all, for he is obliged to carry enormous weights for many miles and must return with his burden within a given time, though his road usually takes him through districts thick with bandits.

thick with bandits.

In training, the postman eats very little—though he is used to this—and tries every training exercise. Then comes his real examination, under the direction of the government officials. He is taken into a large room, where, suspended from a high beam, are very heavy sacks filled with rocks. He must give a swinging motion to all these give a swinging motion to all these sacks, run to and fro between them carefully guarding himself against a blow from the heavy weights.—London Globe.

Ancient Football.

Philip Stubbes wrote in 1583 in his book on "The Anatomie of Abuses:" book on "The Anatomie of Abuses:"
"For as concerning football I protest unto you it may rather be called a freendly kinde of fight than a play of recreation; a bloody and murthering practice than a felowly sporte of pasractee than a felowly sporte of pas-tyme. For dooth not every one lye in waight for his Adverserie, seeking to overthrow him and to picke him on his nose, though it be on hard stones, so backs, sometimes their legs, sometimes their arms, sometimes one part thrus out of joynt, sometimes another; some-times the noses gush out with blood, sometimes their eyes start out—fight-ing, brawling, contention, quarrel pick-ing, murther, homicide and great effu-sion of blood, as experience dayly teacheth."

Beethoven's Fits of Rage. Beethoven's behavior was often atrocious. In giving lessons to young la-dies he would sometimes tear the music to pieces and scatter it about the music to pieces and scatter it about the floor or even smash the furniture. Once when playing in company there was some interruption. "I, play no longer for such hogs!" he cried and left the piano. He once called Prince Lobkowitz an ass because a bassoon player happened to be absent.—Dole's "Famous Composers."

Horns of a Dilemma.

We apply the term "horns of a di-lemma" to a situation in which a per-son is confronted by two opposite and conflicting lines of conduct, the advantages or disadvantages of which appear to balance; hence the analogy to the "horns" of an animal.

Humility Not All. Humility is the part of wisdom and is most becoming in men. But let no one discourage self reliance. It is of all the greatest quality of true manli-

FATALITY IN A WORD.

Why France Changed the Name of the "Life Saving Belt."

A vivid illustration of the power of mere words over human beings was once brought to the attention of French people by Francisque Sarcey.

After the wreck of the Bourgogue

After the wreck of the Bourgogne many passengers were found floating drowned with life preservers on. These life preservers were fastened upon the bodies, but round the middle instead of under the arms, and the greater weight of the upper part of the body had tipped the head under water and the person of course was inevitably drowned.

Now it appears that the greater ways

Now it appears that the greater num Now it appears that the greater number of the persons so drowned were French. The French term for life preserver is ceinture de sauvetage, or "life saving belt." This word ceinture suggests to the mind in its moments of disorder and upreadiness, such as a great catastrophe brings, the idea of putting on a belt, and as a belt is put round the waist and nowhere else the frightened person instinctively adjusts the life preserver close about the hips.

the life preserver close about the hips.

The result is that as soon as the person so provided falls into the water his body tips over, with the heavier part downward, and the head is plung-ed beneath the surface. The word "belt," therefore, was the

cause of the loss of many lives in the Bourgogne disaster. Sarcey according-ly proposed to counteract the fatal ef-fect of the French word by renaming ing the word bras, or arm, to mind to teach people to put a life preserver on just underneath the arms.

ANCIENT POSTAL SERVICE.

The Old Persian and Roman System of

While the Roman postal service of ancient days was, of course, a crude system, yet the mails were forwarded. with considerable speed. The system of couriers on horseback was borrowed from the Persians, who, according to Xenophon, had established it under Cyrus. The Roman adaptation of this was the best system of transmitting letters around the ancients. letters among the ancients.

Ail along the great Roman roads sta-tions were erected at distances of five or six miles from one another. At each of these stations forty horses were constantly maintained, and by the help of relays it was easy to travel 100 miles in a day.

the help of relays it was easy to travel 100 miles in a day.

These services were intended for the state only, it being imperative to secure the rapid interchange of official-communications. In the time of Julius Caesar the system was so well organized that of two letters the great soldier wrote from Britain to Cleero at Rome the one revided its destination.

eight days.

Private citizens were obliged to resort to the services of slaves, and it was not until the end of the third century that there was an establishment of a postal system for private persons by the Emperor Diocletian, but how long this system endured history does

The supply of horses and their maintenance was compulsory, and only the emperor could grant exemption from

No Harmful Drugs.

DEPLETION OF POULTRY STOCK NOT WARRANTED.

Judging from the unprecedented heavy deliveries of poultry on the central eastern markets so early in the season, it would appear that farmers and producers generally are not only depleting their flocks unwarrantably, but also rushing them to the market in an unfinished condition. As a result, the current price of chickens is much below normal value at the present time, in comparison with the prices of other meats. This is directly due to the overloading of the market.

overloading of the market.

With the brisk inquiry for Canadian poultry from Great Britain, it is expected by exporters that the demand for well-finished, good quality stock will be very keen during the coming winter. be very keen during the coming winter. Besides, there will be good demand for home consumption. The price for well-finished birds continues firm, but with so much poor stock arriving wholly unsuited for either storage or export, many buyers have recently reduced their quotations for all low grades.

The presence of pullets and young fowl has also been noted in many shipments. This is most unfortunate con-

fowl has also been noted in many ship-ments. This is most unfortunate, con-sidering the price of eggs. The very firm prospect for the profitable market-ing poultry products points to the necessity of conserving in every possible way all suitable laying and breeding stock. Unless this is done, there will be but little poultry left in a short time on the farms in the central eastern portion of the country. Even though portion of the country. Even though feed is scarce and high, it would pay farmers well to finish the birds before

farmers well to finish the birds before offering them for sale and spread their deliveries over a longer period.

Current receipts to date have consisted mainly of live poultry. The season is now sufficiently advanced, however, to warrant more liberal shipments of dressed poultry. In light of the fact that there will be a considerable movement of Canadian poultry to Great Britain, it is of the utmost importance that all poultry killed on the farms, in addition to being well-finished, be properly killed and dressed. The British market, in fact all large markets prefer poultry bled in the mouth and dry picked. While killing by dislocation may be preferred by some, the tion may be preferred by some, the presence of blood in the neck and the resultant discoloration make it unsuit-

able for storage or export purposes.

Proper and complete bleeding is most Sometimes the arteries of the neck are not completely severed, the bird fails to bleed properly, with the result that the carcass takes on a red-dish appearance. With proper atten-tion to details, a useful reputation for Canadian results, as the stabilished on tion to details, a useful reputation for Canadian poultry can be established on the British market this year. It is of British on the Indian frontier. the greatest importance, therefore, that all poultry marketed be well-finished, well bled and dressed and packed in the most attractive manner possible.

An Easy Capture

A British chaplain, while searching the battlefield of the Ancre for wounded hidden in the shell craters during the British advance, accompanied by a few soldiers, came upon an isolated trench soldiers, came upon an isolated trench containing nearly 400 Germans, who ordered the men to file out upon the open ground, preparatory to passing them back with an escort, when the German officer, seeing the small size of the force to which he was surrendeaing, tried to rulk his wen and overnower it. tried to rally his men and overpower it. He was about to kill the chaplain when a British infantryman shot him dead, whereupon the other Germans again held up their hands and shouted their eagerness to be made prisoners.

German Hopes for Peace Based on Roumania.

Count Albert Apponyi, former Hungarian Premier, said last week that the opening of peace negotiations may perhaps be expected with fair prospects of success in the course of the coming winter. "We cannot expect," he said, to see peace negotiations opened within the next few weeks while the Roumania the next few weeks while the Roumania campaign is still undecided. However, I regard our chances for success there as excellent, and once Roumania is crushed I think both sides will be willing to consider the question of peace. Roumania was the Entente's last card and is proving a losing one. We are massing a big army against the Roumanians, and I think that the end will come shortly."

Children Cry CASTORIA

A moral Hero.

Among the innumerable heroes that the great war has revealed, there is none who deserves a higher place on the roll than Lieutenant Colonel Elkington of the British army. The newspapers have given his story briefly, but their accounts have done him cant institue. scant justice.

He entered the army in 1886, became

He entered the army in 1886, became a captain in 1896 and a major in 1901. The last promotion came during the Boer War, in which he took a distinguished part and earned a medal with four clasps. Soon after the present war began he was court-martialed for some offence, the nature of which has not been disclosed, and was cashiered. His dismissal from the service in disgrace carried with it the forfeiture of his treasured military decoration, and seem-

dismissal from the service in disgrace carried with it the forfeiture of his treasured military decoration, and seemed to have closed his career forever, not merely as a soldier, but also as a man entitled to the respect of his fellows.

It did nothing of the sort. Colonel Elkington at once crossed the Channel and enlisted under his own name as a private in the famous French Foreign Legion, a military body that included Swiss, Swedes, Spaniards, Turks, Armenians and Americans, although the officers were all French. From the very day the war began, the Legion was in the thick of the fighting.

By personal bravery in the field, Colonel Elkington won the Medaille Militaire and the Croix de Guerre. The last is inscribed "Valeur et Discipline," and was pinned upon his breast by one of General Joffre's staff officers. He was severely wounded in battle—his knee was shattered by Maxim gunfire. "I am afraid," he said, referring to what he humorously termed "fragments from France," "that it has put an end to my career in the field," but he glories in his "experience of twenty-two months in the trenches with a regiment that has gained the reputation of having the finest troops in the world."

His pay as a soldier was at first one sou—that is, one cent—a day, but was afterwards increased to five sous. He never took a higher rank than that of private.

Such a feat of self-redemption deserv Such a feat of seit-redemption deserved and has received its reward. He is again Lieutenant Colonel Elkington in his old regiment, for the sentence of the court-martial has been quashed. His commission has been restored to him, together with the right to wear again his British medals.

Why is the Church Losing Ground P

Even before the war the Church was Even before the war the Church was loosing ground in many quarters and nowhere was the backward movement more marked than in England. A clergyman, whose letter is quoted in Public Opinion, endeavors to state the cause of the decline. He says this must be looked for in the lack of courage and faithfulness of the church itself. "We have," he says, "been sadly deficient, clergy and laity alike, in moral courage and spiritual faith. The great organized forces of sin in town and country do not forces of sin in town and country do not tremole before the local Church as before a vigilant, inveterate and unrest-ing fee, which will use all legitimate

means to defeat and hamper them."

As one means of meeting the conditions existing the Church of St. Martinin-the-Fields, Trafalgar square, will be open continuously day and night. It is not proposed at present to hold any services during the night, but bibles, prayer and hymn books will be found in all the pews. But the extension of the hours during which churches remain ways will varil little tables from these open will avail little, unless from these churches comes the message that will arrest and hold the attention of the

IMPROVING FIELD PLANTS.

Corn Readily Lends Itself to Produc-ing New Varieties.

That a farmer can improve his field plants and thus increase the yield of his crops has been proved not only by the numerous experiment stations, but by farmers themselves, according to H. F. Roberts, professor of botany in the Kansas State Agricultural college.

Professor Roberts is in charge of the plant genetics work at this station.

"Plant breeding is not practicable on the average farm." says Professor Roberts, "but by selecting and preserving the best types he finds in fields he can get encouraging results. Taking advantage of nature's work in crossing plants, the farmer is able to improve

Professor Roberts is in charge of the

SOME PRIZE CORN

his field plants by the process of se lection. There is not a single crop plant that does not offer a great many opportunities in this direction.

"Corn probably is the best example of an agricultural plant in which new varieties are produced by natural field crossing. The wind scatters the pollen of some corn plants upon the silks of others in the same or adjoining fields, This natural crossing gives rise to the large number of variations to be found in the average cornfield.

"Any farmer can begin by selecting plants in the cornfield—plants showing superior vigor, stockiness, abundance of foliage, ears at right distance from ground and other equally important points. Any farmer can thus originate his own variety or strain of corn by careful, rigid and continued selection carried on year after year. tion the farmer is not creating new plants, as is the case in crossing, but he is saving out that which nature has provided as the result of its process of

true of wheat, oats, barley and the sorghums so far as selection goes, al-though there is little, if any, crossing by nature as far as wheat, oats and barley are concerned. It is easy to get a pure strain in working with the smaller cereals, as they are naturally self fertilized and seldom crossed by

nature and consequently generally come true from the seed.

"The sorghums cross freely. Almost ta and the sweet sorghums shows a variety of plants that are 'off type,' due to natural crossing in the field in previous years."

Stop Those Gullies!
[M. F. Miller, Missouri station.]
Small gullies that have started in the field should be stopped by filling them with straw or similar material. If the gully is large it is advisable to plow in soil on top of this material and sow to oats or later to sorghum so that the rop will come up thick and form a ng root mass to bind the soil to-

What Might Be Revealed if Na-

WONDERS OF THE INVISIBLE.

Evidence That What We Call the Universe is Only a Part of a Far Grander and Perhaps Infinite System of Suns and Worlds and Planets.

Men of science have found reasons for believing that there may be, far off in infinite space, other material systems besides the one visible to us. We seem to be able with modern telescopes to reach the boundaries or farthest limits of the stellar system

to which our sun belongs.

It is found that with increase of distance the relative number of stars decreases until, in most directions at least, a point is reached beyond which virtually no more stars can be seen. Then, too, it has been found that the stellar system has a fairly definite shape—a fact which in itself implies boundaries. The shape is that of a vast spiral, with curving arms surrounding a central agglomeration. If you will imagine floating in the middle of the room where you sit a roughly globular swarm of bright particles, distributed with a fair degree of uni-formity as to distance from the auother, and then outside of the swarm surrounding it, but separated from it by a space which is nearly but not quite empty, an irregular spiral ring of similar shining particles, you will have before you a picture of one of the latest astronomical conceptions of the form of the visible universe. The central swarm will represent the

assemblage of stars of which our sun is a modest member, while the envel-oping spiral will represent the im-mense system of the Milky way, whose stars are vastly more numerous than those composing the globular swarm. The stars of the Milky way are the most distant members of the entire system, which appears to be shut in all around by black space. Viewed from afar off in the ebon depths of that space, this universe of ours would resemble a phosphorescent jellyfish, with faintly sparkling tentacles, afoat in the sea of immensity.

This being so, the question naturally arises, May there not be, or must there not be an indefinite number of other.

not be, an indefinite number of other such systems scattered through the limitless expanse of space? That question would forever remain a matter of pure conjecture if we did not have cer-tain very suggestive facts which seem to indicate that it ought to be an-

The facts of which I speak are objects of visual observation. But that does not necessarily make them parts of the "visible universe," because they appear to be unconnected with it and to lie beyond its boundaries. to lie beyond its boundaries.

These objects are known as spiral nebulae. The photographs that have been made of them in the past few years are simply amazing. The forms of many are surprisingly like that which has been described above as characterizing the stellar system. They have central agglomerations with enveloping spirals. They have knots of light which recall the globular clusters of stars found in the visible universe but they are so distant that no separate stars can be detected in them.

They look like masses of more or less ondensed glowing gas, but the speccondensed glowing gas, but the spec-troscope shows that the light coming from them is not that which is charac rom them is not that which is charac-teristic of gaseous nebulae, but that which belongs to true stars. The influ-ence is that these wonderful objects may actually be other universes lying out in the ocean of space beyond our

This inference is strengthened by what we know of the distance of son of these objects. The utmost diameter of the great spiral of the Milky way probably does not exceed from 4,000 to 6,000 "parsecs," or from 800 to 1,200 million times the earth's distance from the sun. A parsec, which corresponds to a parallax of one second of arc, equals about 19,000,000,000,000 (nineteen tril-lion) miles. But some of the spiral nebulae appear to be at least 10,000

parsecs distant.

If that is so there exists between them and the outer frontiers of the vis-tible universe a gap far broader than the entire diameter of that universe. It can hardly be supposed, then, that they are outlying parts of or attendants upon our universe, but it is much more reasonable to conclude that they are reasonable to conclude that they are other universes constructed on a similar plan, but so far away that as viewed with our utmost visual powers, our mightlest telescopes, they are but gleaming specks! Perhaps the nearest of these strange objects is the Andromeda nebula, which, in a small telescope, looks like a faint spindle shaped with Genett P. Servise in New York wisp.—Garrett P. Serviss in New York Journal.

Have a Cheery Kitchen.

One should bear in mind that the kitchen is the engine room of the home, and the comfort and happiness of the family depend upon its running smoothly and well. Lack of system, inadequate equipment, inconvenient arrangement of furniture and utensils and the total absence of beauty and cheer are the things that make drudgery of housework. Servants are as susceptible to surroundings as their mistresses, and the little aids to housework, such as cheerful aspect and pretty furnishings, do much to secure a more loyal interest and co-operation. A harmonious environment in a kitchen will go a long way toward making a happy home.—Harriet Sisson Gillespie in Mother's Magazine. Mother's Magazine.

Weakness of the Great The two greatest men who appear in Julius Caesar"—namely, Caesar him

self and Cicero-are allotted but minor seri and Cicero—are allotted but minor parts in Shakespeare's play, and to each with daring originality the dramatist has attributed a physical defect, for the existence of which history supplied him with no evidence. Caesar, for instance, confesses to deafness, bidding Antony—

"Come on my right hand, for this ear is deaf," while Brutus speaks of Cleero's "ferret and fiery eyes," as if no one could fail to note them. Respect for those two limmortals was no doubt thus diminished, but by showing them as not above human weaknesses Shake-speare made them more easily realized.

—London Opinion.

A Smiling at Breakfast.
One should always wear a smile at breakfast. If you are in a good humor at breakfast you will be merry and bright all day. The breakfast face is the most important face to cultivate. The other faces take care of them-selves, for if the face is pleasant and easy to look upon in the morning it will improve as the day goes on. But if the breakfast face is hard, scowlir the breaking face is hard, scowning and forbidding it becomes set in its disagreeable form, and it takes hours for it to smooth out into a smile, and that smile is of the sickly, half-hearted nature that only expands the heart slightly. If is worth trying.

TUESDAY. NOVEMBER 28TH, 1916

THE British Red Cross Fund in Or tario has now reached a total of \$1,600,

Last year was the first in the history of Canada when there was a trade balance in favor of the country.

A Royal proclamation announces that henceforth gold, silver and paper money securities, cheques, drafts, letters of credit and any negotiable instrument or documents relating to the transfer of money, credit or securities will be treat ed as contraband of war.

ONTARIO has been satisfied with an annual tax upon its nickel production of \$40,000 a year, when at 3 per cent upon the revenue the income would be \$450,000. If ever there was an inter national institution which should be soaked in the interests of Canada or the province, it is the nickel producing company.-Kingston Whig.

THE NICKEL QUESTION.

Teronto, November 25.-More light continues to be shed on the nicke question, and more and more does the government show up unfavorably government show up unfavorably. Among the public men who have discussed the question within the last ten days are The Rt. Hon. Sir Wilfrid Lanrier, Mr. N. W. Rowell, K.C., M.P.P., Mr. Hartley Dewart, K.C., M.P.P., Hon. A. E. Kemp and Hon. Arthur Meighen. The last two were on the defensive for the Governments, but they were laboring under tremendous difficulties and failed completely to shift the burden of responsibility.

Sir Wilfrid Laurier at Ottawa was most emphatic that in view of the

most emphatic that in view of the statements that the "Deutchland" on her second trip to Germany was again carrying Canadian nickel, more thorough

a surances than had been given up to the present should be given by the government on the point.

Mr. Rowell, at the annual meeting of the General Reform Association, as well as in Tilsonburg, showed how the Outario Government had been remiss in the matter on two fundamenta points. First, they had voted down the Opposition's proposal that the production and sale of nickel in the province s'iould be under government control, and secondly they had voted down the Opposition's resolution that the International Nickel Company should be taxed in accordance with the law and not allowed to escape with a paltry

axed in accordance with the law and not allowed to escape with a paltry sum.

Mr. Dewart created a sensation by reading letters which he said showed that the International Nickel Company on their own admission in a letter written by their General Manager of Sales stated they were handling all their export business of metallic nickel through their London agents, and Mr. Dewart showed that this agent company had been dealing with the enemy, quoting a judgment of the Admi alty-Prize Court in proof of his statement.

The Toronto World (Conservative) commenting on Mr. Dewart's speecn, said, "the startling charges of Mr. Dewart must be probed to the bottom * * * the flow of Canadian nickel to German munition works must be stopped. The men responsible for it must be punished and all the nickel plated Cabinet ministers must be retired to private life * * * Hon. Frank Cochrane has close affiliation with the men who control the nickel trust and Mr. Hearst and Mr. Ferguson are his appointees."

Our Forest Products.

The state of Canada's trade in timber ince the war is a matter of the greatest ince the war is a matter of the greatest importance to our citizens. The figures for the calendar years 1914 and 1915 are given in the bulletins of the Forestry Branch of the Department of the Interior. The subject is divided in this way. Inmber is dealt with in Bulletin 58A; pulp and pulpwood in 58B; and poles and cross-ties in 58C. Any citizen interested who has not received a copy of any of these bulletins may secure one free by writing to the Director of Forestry, Ottawa,

Capleton Place Revald | BUCHAREST IN DANGER

Teuton Generals Have Joined Forces in Big Offensive.

ation in Roumania Becomes Critical, General von Falkenhayn's Troops Having Gained the Railroad at Craiover-The Invaders Are now at Alexandria Which Is About Fifty Miles From Roumanian Capital.

ian Capital.

LONDON, Nov. 27.—The situation in Roumania as described in Sunday's news shows that Gen. von Falkenhayn's forces, having gained the railway at Crajova, have rapidly pushed to the southeast, and are, according to German efficial account, already in touch with Field Marshal von Mackensen's force which crossed the Danube at Zimnitza and advanced with equal rapidity and are now before Alexandria.

The German reports do not state where the two forces joined hands, but say that the roads leading eastward from the Alt River are encumbered with fleeing Roumanian supply columns, and marked by burning villages.

The Roumanian official communi-

villages.

The Roumanian official communication to a large extent corroborates this news by reporting an engagement with an enemy column advancing towards Roshiori de Vede on the railway a little north of Alexandria. Thus the central forces are now within 50 miles of Bucharest, which is threatened from the west, north, and south.

threatened from the west, north, and south.

The German communique also brings the interesting news that Field Marshal von Mackensen is personally commanding the movement across the Danube. There is no indication yet, however, as to what strength he has been able to put into this sector, but his movement seems to confirm the impression previously formed that his latest withdrawal into Dobrudja was voluntary in order to assemble forces for the Danube crossing. Neither is anything definite known as to whether Gen. von Falkenhayn has transferred any considerable portion of the forces lately engaged in forcing the Red Tower and other Transylvanian passes to the operations through Vulcan Pass. Shoulf Roumania be driven to defend the line running north and south from the mountains between Red Tower and Toersburg Passes to the Danube, in order to protect Red Tower and Toersburg Passes to the Danube, in order to protect Bucharest, military critics here consider that her position would be extremely critical. It is hoped, however, that Russia has been able to send sufficient reinforcements to relieve Roumania of the necessity of devoting large forces to the defense of her northing and Dobrudja frontiers, and that she will have sufficiently strong forces to carry on an effective fight in the Wallachian plain.

Aliens Want Votes.

Aliens Want Votes.

KITCHENER, Nov. 27.—At the general sessions of the peace on December 12th 204 applications for naturalization will be submitted to Senior Judge Hanning, 197 of which are made by aliens of enemy birth. Of this number 61 came from Germany, many of whom have resided in this city for years, and have exercised their franchise: 24 from Austria, nine from Bulgaria, three from Turkey. The other applicants originate from Russia, the United States, and Belgium. and Belgium.

and Belgium.

Representatives of the Citizens'
League, which has been organized to
have the former name of this city restored after the next municipal elections, have canvassed the aliens who
are so designated in this year's
voters' lists with a view to securing
the franchise for them to exercise in
the coming election.

Would Muzzle Press.

Would Muzzle Press.

BERLIN, Nov. 27.—Dr. Helfferich, secretary of the interior, during the course of the discussion of the budget before the committee of the reichstag Saturday, combatted a suggestion looking to the suppression of some of the newspapers. He said the government recognized the necessity of keeping alive even the smaller newspapers during the war, and had already taken steps to facilitate their continuance. Where local officials showed want of appreciation of the importance of the newspapers, he continued, this would prove without significance, as all local authorities could be controlled by uniform instructions from the War Office.

French Obtain Freedom.

PARIS, Nov. 27.—Twenty thousand French civilians, mostly old men, women, and children, from the occupied districts of France, are about to be sent to France from Germany. about to be sent to France from Germany. Trains, each carrying 500 persons, will effect the transportation to Switzerland, en route to this country before Christmas. This is in accordance with an agreement between Frince and Germany for the exchange of civilian prisoners.

LONDON, Nov. 27.—The wrecking of a super-zeppelin in a storm on Tuesday is reported by travelers réaching Amsterdam from Munich, says an Exchange Telegram despatch from Amsterdam. They report there was only one survivor of the crew of 28.

The zeppelin is said to have been on the way from Friedrickshaven to Wilhemstaven on its first voyage, when it was blown out of its course and fell in the woods near Mainz.

Sir Sam on Holiday.

Sir Sam on Holiday.

OTTAWA, Nov. 27.—LieutenantGeneral Sir Sam Hughes, M.P.,
left Sunday night for Lindsay, and
in a few days will proceed to the
Southern States on a motor trip, accompanied by members of his family. The ex-Minister has been occupted since his leaving the department in attending to personal business, and now feels free for a holiday. Sir Sam will be away from Ottawa for a couple of weeks.

that the Allies consider the Salomica triumvirate as the government de facto, Greece is now virtually at war with Bulgaria.

The provisional government has also declared war on Germany because it torpedoes ships carrying national forces and partisans of the provisional government.

The Entente Allies have delivered an ultimatum to Greece requiring delivery of Greek arms and guns, which was demanded recently.

The ultimatum, which comes from Vice-Admiral Du Fournet, commander of the allied squadron, while allowing only a short period in which the arms now in Athens are to be surrendered, declares willingness to grant a longer time for delivery of war materials in Thessaly and Macedonia. The shortest time allotted is 48 hours, and longest one week. Unless the demand is complied with, the Admiral declares, he will take measures calculated to induce compliance with it, progressing in severity if the delay increases.

The first delivery of arms demanded of the Greek Government by Vice-Admiral Du Fournet consists of ten batteries of mountain guns. The demand declares that fishiure to comply with it before Dec. 1 will result in measures being taken by the admiral. Admiral Du Fournet's latest note fixing a brief period in which Greek arms are to be surrendered greatly excited the people of Athens. The Premier informally explained that the admiral, in reply to the government's refusal of his demand, brushed aside the reasons for this refusal and simply set December 1 as the date for the surrender of the artillery required and December 1 as the date for the surrender of the artillery required and December 1 as the date for the surrender of rifles.

According to the diplomatic representatives of the Entente powers the time allowed would enable the Greek Government to reflect with mature deliberation before making its decision.

New Railroad Line.

NIAGARA FALLS, Ont., Nov. 27.

—Engineer Stanley, of the Hydro-Commission has announced that when the Hydro-Radial line is built to Niagara Falls from St. Catharines, it will enter this city at a point between Stamford and Southend. It will be the miles shorter than the Niagara, St. Catharines and Toronto Railway line, now operated between the two cities, and 1½ miles shorter than the Grand Trunk. The line will take in Merritton, Thorold and Stamford. No by-law will be submitted here at the coming elections, the plan being to merely submit by-laws to the municipalities between St. Catharines and Port Credit. This move is looked upon here as an evidence that the Hydro will make an effort to buy the Niagara, St. Catharines and Toronto line, which project has been spoken of. Niagara Falls with an assessment of \$9,000,000 will not be called upon to guarantee as much towards the Hydro-Radials as St. Catharines, with its \$13,000,000, the share of that city being placed at arines, with its \$13,000,000, the share of that city being placed at \$633,000:

Raiders Driven Off.

Raiders Driven Off.

LONDON, Nov. 27.—A raid by six German torpedo-boat destroyers on the English coast, which took place on Thursday night, was announced in an official statement Sunday. The raid was ineffective, according to the statement, which declares that the six German destroyers participating in it steamed away quickly after firing a dozen rounds, one shell striking a small vessel, but causing little damage and no injury to the crew.

Apparently the raiders were operating in the vicinity of Ramsgate, on the coast about fifteen miles north of Dover. The official announcement reads:

"Six German destroyers during the

reads:

"Six German destroyers during the night of Thursday attempted to approach the north end of the Downs, but were seen by a patrol vessel. The enemy fired about twelve rounds and quickly steamed off at once. One shell hit a drifter without injuring any of the crew and only damaging her upper works. No shells fell anywhere near the open town of Ramsgate."

No Prisoners Taken.

ST. JOHN'S, Nfid., Nov. 27.—
Governor Davidson publishes an official message from the War Office intimating that enquiries were made through the American embassy at Berlin respecting 150 Newfoundland soldiers missing after the opening of the battle of the Somme on July 1, in which the Newfoundland regiment was decimated, discloses that none of these Newfoundlanders are prisoners in Germany, hence they are now posted officially as believed to be killed.

Duke is Chief Boy Scout.

OTTAWA, Nov. 27.—His Excellency the Duke of Devonshire has accepted the office of chief scout of the Boy Scouts' Association in Canada, and is the third Governor-General to occupy the position. The Duke has expressed a desire to ally himself with the movement to the fullest extent.

Sir Herbert Tree, the knight actor, gave a delightful talk before the Canadian Club at Toronto.

Provisional Government Moves
Against Central Powers.

Former Premier Venizelos Defies Bulgaria and Germany—The Entente Allies Have Delivered Ultimatum Requiring Greek Government to Deliver All Arms and Guns Within a Week.

ATHENS, Nov. 26.—The Greek provisional government composed of followers of Former Premier Venizelos has formally declared war on Germany and Bulgaria.

Venizelist circles assert that the provisional government declared war against Bulgaria to prevent the entry of the Venizelist forces into the campaign from being interpreted as a political manoeuvre. In view of the fact that the Allies consider the Salonica triumvirate as the government defacto, Greece is now virtually at war with Bulgaria.

The provisional government has

evening services in the Methodist church Sunday evening.

Mr. T. A. Thompson is in Napance this week making final arrangements for the convention of the Dairymen's Association of Eastern Ontario to be held there in January, 1917.

The annual meeting of the Almonte Curling Club was held at Mr. P. A. Greig's office Friday night and preparations were made for the coming season. A surplus in funds was reported and so the membership fee was left as formerly. The officers elected for the coming The officers elected for the coming season are as follows: Honorary President—Mr. Peter Young; President—Andrew Young; 1st Vice-President—Mr. T. J. Reid; 2nd Vice-President—Mr. T. Jas. McLeod; Sec. Treas.—Dr. W. C. Young; Management Committee—Messrs. A. C. Wylie, J. T. Kirkland, J. D. McCallum, W. E. Scott, Dr. Oliver and Thos, Walker.

LANARK.

Mrs. (Rev.) D. C. McIntosh received a letter this morning from her brother, Pte. Lance Affleck, of the 130th Batt. The letter was written on the way to France, a draft having been made from the 130th which included all the Lanark

France, a draft having been made from the 130th which included all the Lanark boys. While at West Sandling Camp, England, Lance met the Army Medical Corps contingent from Lanark, all of whom were well and in high spirits.

After an illness of three weeks with bronchitis, Mrs. Matthew Stanley, a highly respected resident of Bathurst, passed away at her home (Armstrong's Corners), on Friday, Nov. 17th, at the advanced age of 83 years. Deceased was a native of Drummond, her maiden name being Sarah Mills. Three children name being Sarah Mills. Three children name teft to mourn—William at home; Mrs. Strong, Glentay, and Miss Hattie, who is teaching at Arnprior. Her husband died about fifteen years ago.

Wedding bells were ringing on the 3rd line of Bathurst last Wednesday, Nov. 18th, at Elm Grove Farm, the home of Mr. and Mrs. George Korry, the occasion being the uniting in the bonds of matrimony Miss Elizabeth, the eldest daughter of the family, to Mr. Horace W. Coleman. Rev. J. G. Greig, proclaimed the nuprials.

The Village Council, at its meeting held in the Council Chamber, Saturday evening, Nov. 18th, passed a grant of \$250 for the British Red Cross Fund.

Fire destroyed Limoilou parish church at Quebec, valued at \$180,000.

Lieut. Guyremer, the French aviator, brought down his 22nd German machine.

Allied bankers have protested against the Chinese loan of \$5,000,000 from Chicago.

CARLETON PLACE BOYS AT THE FRONT.

They are Boing their Part Hobly.

Old Lake Avenue has "done its bit" in turning out stalwarts of metal that ring true. Billy and Alex Robertson, Bob McCallum and Watty McIlquham, were all born within a hundred feet of each other. The Robertsons, now of New Westminster, were sons of W. C. and Isabella Robertson. Billy went to South Africa, was wounded and returning home died of his wounds, and Alex is the hero of the following letter, taken from the Vancouver World:

CHICK" ROBERTSON ALL THROUGH THE

To be in every scrap indulged in by the First Canadians since landing in France is some record and held by mighty few. Such a record falls to Sergt. Alex. ("Chick") Robertson of the 7th Battalion, Canadians.

Somewhere in France, Nov. 1.

Somewhere in France, Nov. 1.

I am writing this in a shell-wrecked barn in France where a few moments ago I had the pleasure of congratulating this same "Chick" Robertson, an old personal friend of mine.

From now on kindly address this pal of mine as Lieut. Alex. Robertson, D.C.M., brigade bombing officer, —th Infantry Brigade, Canadians. The honor of being promoted on the field was never better deserved than by this same "Chick" Robertson. His deeds in the front line and his pranks in the rest camps would fill a book. Nearly every westerner has either met him or heard of him, not as Sergt. Alex. Roberson, D.C.M., but as plain "Chick" Robertson.

My memory takes me back to New

Robertson. D.C.M., but as plain "Clinck" Robertson.

My memory takes me back to New Westminster, August 1914, and the first call for overseas issued by the officer commanding the 104th Regiment was being answered. "Chick" Robertson was away from the Royal City at the time but on the eve of the day for entraining he lands in Ifrom the woods, "No room for you, Robertson, sorry," was the answer he got at the recruiting station at Queen's Park.

"No room, eh," says "Chick." Guess there will be room at Valcartier." That Saturday, in August, 1914, saw "Chick" Robertson, dressed in mufti, board the troop train at Vancouver, eastward bound. His friends in Vancouver and New Westminster lost track of him for

troop train at Vancouver, eastward bound. His friends in Vancouver and New Westminster lost track of him for some little time, an occasional paragraph in a letter from one of the boys being the only news of the Royal City product. The strenuous training at Salisbury Plain completed and the spring of 1914 found the 1st B.C. Regiment in the thick of it out here in France and Flanders. The Coast province suffered in that first big smash at Y—as you all know; Robertson won his spura in those dark days. From boys who were with him I have learned of his prowess with the bayone, clubbed rifle and even with his feet when the Prussian guard came nigh breaking through. During all those battles of 1915 Robertson was in the mixup. He had with him, or under him as the survivors put it, a small party of New Westminster and Vancouver boys who looked upon him as a leader. He led, they followed.

THE FIRST RAIDING PARTY.

The monotony of winter trench war fare gets on any person's nerves. Things were dull along towards January, 1916, at a time when the 7th Battalion were at a time when the 7th Battalion were occupying a line in front of Mossines, that something really had to be done. Colonel, now Brigadier Odlum thought of a raid and in connection with these thoughts Sergt. "Chick" Repertson was figured on as one who would lead the bombers over. You probably remember the story attached to this raid, successful in every way, Sergt. "Chick" Robertson, D.C.M., "For conspicuous bravery" it read.

Things died down a little, the affair in June at Y—being a diversion. I

in June at Y-being a diversion. met Robertson at various times but coming down here his name was mentioned to me as having been in a particularly warm spot. The advance was on and on Robertson's bunch pulling up for a breather it was found that a portion of a trench some 300 yards in length was occupied by the Boche.

HAD LOST HIS CHUM. Robertson was in no mood to argue with any person for his best pal, Louis Jaggers, one of the originals, had been killed alongside him by a hidden sniper. When the boys had got their second killed alongside him by a hidden sniper. When the boys had got their second wind along came a message from head-quarters which read as follows: "The trench must be cleared before being relieved." Sergt. Robertson looked around him. He appeared to be in command but they were few. Back went a message, "Looks like a job for the duration but will do my best" (Signed) "Chick Robertson." The scrap lasted exactly five minutes.

So here he is Lieut. Alex. Robertson, D.C.M., and dame rumor has it that a further decoration will be tacked upon him in the near future. His new duties do not call for very much front line work, but I venture a guess that the advanced positions will frequently see him especially when his "old gang" is occupying that particular section.

In civilian life Robertson was no mean wielder of a lacrosse stick. Every Saturday afterncon during the struggle between the Royals and Con Jones' lacrosse stars, Robertson could be found pulling strong for the Salmon Bellies, He is related in a way to the Minto Cup holders, for Mrs. Tom Gifford is his sister.

TAUGHT THEM A LESSON.

Czar's Rebuke to the Offic

The Czar's Rebuke to the Officers of One of His Regiments.

The czar is greatly loved by his own soldiers, and no wonder, for the following story is typical of him:

A certain Russian lieutenant who was none too well off was one day seen riding in a tram. The other officers of his regiment were furious at what they called an insult to the uniform, and they told the lieutenant that he must send in his papers. The unfortunate young officer had no alternative, but before he could do so the czar heard of the affair. Immediately putting on his colonel's uniform of the regiment in question, his majesty left the palace, hailed a passing tram and, entering it, sat calmiy down untils it stopped in front of the barracks.

There he got out and, assembling all the officers, said to them:

"Gentlemen, I have just ridden from the palace in a tram, and I desire to know if you wish me to send in my papers. I presume I have disgraced my uniform."

Naturally the officers were dumfounded.

Naturally the officers were dum-

Naturally the officers were dumfounded.

"Sire," stammered the major nervously, "you could never do that."

"Then," answered the czar, smiling,
"as I have not degraded the uniform
Lieutenant — cannot have done so
and will thus retain his commission in
this regiment even if he, like me, dares
to ride in a tram."

After that snobbery died a speedy

After that snobbery died a speedy death in that particular regiment.—Pearson's.

Weather Variety. Some growl perpetually at the weather; it is too hot or too cold; too wet or too dry. And yet a kind Providence arranges it infinitely better than we rould. What a beautiful promise this was in the early history of the race: "While the early remaineth, seed time and harvest, and cold and heat, and summer and winter, and day and night shall not cease."

Looking Ahead.
"I think I had better get a job before we marry."
"Don't be so unromantic, Freddy. I

won't need any clothes for a long, long "But you may want to eat almost any time, my dear."—Pittsburgh Post.

Knocking on Wood.

The "knock wood" superstition is mid to date back to the days of sylvan gods, when oak, ash and rowan were sacred trees, whose deities would come to the assistance of the knocker.

Rules for Dressing—All poultry must be starved twenty-four (24) hours before killing. Dry plucked and perfectly clean of all feathers; heads left on turkeys and chickens. heads off geese and ducks. All poultry to be undrawn and well fattened.

REMEMBER THE DATE, DECEMBER 5

************* Another Nation Stricken by War *************

HEN the daily press of Canada published the brief announcement re cently that a great battle had been fought in Abyssinia, twenty five miles outside the capital, resulting in a complete victory for the new

five miles outside the capital, resulting in a complete victory for the new Government, the average reader did not realize that this battle affected \$,000,000 people living in a country larger than the combined areas of France, Holland, Belgium, England, Scotland, Ireland, and Wales.

And inasmuch as the despatches failed to give the name of the capital few Canadians could recall it—Adis Ababa, the city founded by that remarkable black monarch, Menelik II. in 1892, the third year of his eventful reign, which extended over a period of a quarter of a century. Abyssinia is a wholly inland nation, being cut off from the Red Sea and the Gulf of Aden by French and Italian possessions, varying in width from forty to 250 miles. To the morth is the Italian possession of Eritrea, to the east British, French, and Italian Somaliland territories, to the south British East Africa, and to the west the Anglo-Egyptian Sudan. The whole Empire, which was formerly known as Ethiopia, lies within the tropics, although most of the interior has such a high elevation that the climate is temperate and healthful.

Adis Ababa has an elevation of more than a mile and a quarter above sea level, so that although it is in the

more than a mile and a quarter above sea level, so that although it is in the same latitude as the Isthmian seapors of Panama, it enjoys a most salubrious climate.

Except for its royal residence and

Except for its royal residence and grounds, which occupy a hill commanding a view of the country in all directions, the city resembles a temdirections, the city resembles a temporary military camp more closely than the capital of a vast kingdom, for white tents and mean huts cover the country in a circle whose diameter is about three miles. No railroad connects this city of 40,000 inhabitants with the outside world, while the 'highways' of the country are scarcely more than narrow trails traveled by pack mules and donkeys. Even Harrar (population estimated

color than their fellow-countrymen, and retain many evidences of their Semitic origin. The Dankalis are a practically independent people of the Mohammedan faith, whereas the other groups have been Christian since the Fourth century, being allied with the Alexandrian church. Education has made slow progress in Abyssina. In fact, it is said that the only native school in the entire country is located in the capital, and is attended most irregularly, the entired that the original country is contained to the capital, and is attended most irregularly, the entired that the capital country is located in the capital, and is attended most irregularly, the entired that the capital capita

is attended most irregularly, the en-rollment being not more than 100

rollment being not more than 100 pupils.

When Menelik II. died in December, 1913, he was succeeded by his 17-year-old grandson, Lij Yasu (also apelled Lidj Eyassu), the monarch whose party the 'new Government' will have displaced if the reported battle should prove to have been decisive. This boy ruler faced an almost impossible task during the last three years, for his wily grandparent was an exceptional man, of remarkable energy. A striking picture of the multiplicity of details handled by the old sovereign is given by A. the old sovereign is given by A. Henry Savage Landor in his ac-

Henry Savage Landor in his account of a year's journey across "Widest Africa." Mr. Landor says; "Everything in Adis Ababa is referred to the Emperor. It is quite amazing what an amount of mental work Menelik must go through daily. While attending to most important political affairs, matters of the most trivial character are brought to him political affairs, matters of the most trivial character are brought to him for assent. This is practically what happens every minute of the day at the palace: Menelik, with his head bandaged in a white shash (a sort of silk handkerchief) and with a cheap French felt hat far back upon his French felt hat far back upon his skull, is pondering with some Minister over some political problem of great importance—let us say, the projected railway between the sea and Adis Ababa. The Emperor is deeply absorbed in thought.

"Enters a servant, who whispers in the Emperor's ear, regardless of the presence of the foreign representative of a great European country.

tative of a great European country: 'Your Majesty, the carpenter wants some more nails to mend the ve-

"'Here are the keys. Give him twenty nails,' says the Emperor. 'If he needs more, come again to tell

The Emperor is again deep in

me.'

"The Emperor is again deep in thought. Intruder number two comes up and whispers that a mule has escaped from the palace.

"The Emperor jumps down from his throne—a high packing case covered with Oriental carpets—slips quickly into the shoes which he has discarded, and hastens to his telescope, scanning the country all around with it, in order to see whether the missing animal can be detected upon the hills near adis Ababa. The escaped mule is much more important to the Emperor than all the railroads in the world.

"The foreign representative vainly attempts to drive the Emperor again to his throne. The Emperor on his side endeavors to induce the Minister to come and look for the mule."

********* Scandinavian Nations

Becoming More Friendly

And Exchange Courtesies *****************

VER since the famous meeting of the Scandinavian kings at Malmo, in December, 1914, a strong undercurrent of good-will has been manifested among the three nations, a goodwill that ha come to be visibly expressed of late. in various ways, notably in the exchange of ideas in dramatic art, nat ural science, and so forth. Meetings and conferences have also been held in the three countries, which have helped to draw the Scandinavian nations more closely together through mutual respect, and the will-ingness of each to learn from the

ingness of each to learn from the other.

In May, this year, for instance, the actors from the National theater, Christiania, visited Stockholm and gave performances there, while the Swedish actors played at the National theatre, Christiania, the friendly criticism of the press being highly appreciated in both countries. During the summer months, too, meetappreciated in both countries. Dur-ing the summer months, too, meet-ings of naturalists and archeologists from the three nations have been held in Christiania, and various sport meetings have been arranged in all three countries from time to time. A delegation of farmers from Norway

KING HAAKON.

and Denmark visited Sweden recent-

and Denmark visited Sweden recently, and commercial men from the three nations have lately held a conference. At all 'these various meetings and functions the idea of the unity of the Scandinavian countries has been emphasized in speeches, King Haakon making special reference to it in his address of welcome to the Scandinavian naturalists when they were his guests at the Royal palace in Christiania.

Another interesting speech was made by General Balch at the opening of the Svenska Spelen in Stockholm this year, where sportsmen from the Scandinavian countries were competing in friendly rivalry. The General said: "At this meeting we have overstepped the limits originally laid down for the Svenska Spelen, by inviting our kinsmen, the Norwegians and Danes, to compete with us, and we have done this because the northern nations are linked together, more especially in these grave times. We are striving for the together, more especially in these grave times. We are striving for the same goal, a strong race, and in these circumstances the victory is a common one."

It is evident that these countries

have opened their doors to each other, and that goodwill is sweeping other, and that goodwill is sweeping away strife and misunderstanding. This was especially apparent in the visit of the women students' choir to Sweden last May. In an account of the visit "Nylende" writes that when the Norwegian students left Upsalathe Swedes sang the Norwegian national anthem, "Ja ci elsker," this being the first occasion on which it had been sung there since 1905. being the first occasion on which it had been sung there since 1905. Writing to one of the Christiania papers, one of the Swedish hostesses says: "It is somewhat unusual to find a choir of 80 women giving concerts, but it is still more remarkable when every one of the 80 is entitled to wear the student's cap. The fact that the choir was led by a university professor inspired such respect even in this country where women are voteless that it made one wonder, and even the press was stirred. The first concert in the Academy of Music was filled to overflowing. The platform was like a garden, and last, but not least, the two nations' flags floated together. Within a few minutes after the concert commenced the enthusiasm of the audience was aroused, and this enthusiasm accompanied the singers wherever they went in Union 1905. went, in Upsala as in Stockholm, and at concert after concert. Yes, it was a great joy, so great that no one who loves his country will ever forget it."

When Your Foot Sleeps.

When Your Foot Sleeps.

If we sit for some time with our legs crossed our foot "goes to sleep.". We are really pressing on the sciatic nerve, which supplies nearly all of the nerves of the leg and foot, says London Answers. The nerve imelastic, and is flattened by pressure just like a rubber hose. The fibres which make up the nerve are sensory, that is to say, they carry sensations to the brain. Motor nerves carry sensations from the brain to the body. The only ways to stop a nerve carrying there the missing animal can be detected upon the hills near Adis Ababa. The escaped mule is much more important to the Emperor than all the railroads in the world.

"The foreign representative vainty attempts to drive the Emperor again to his throne. The Emperor again side endeavors to induce the Minside endeavors in the pressure is on the nerve matter returns to its place and does its work.

One day upon our heads? Modern war is a very apt examble of fitting after events to a prophecy.

The Chippewayan Woman.
Ideals may vary, but it seems that
the Chippeway Indians also had a
well rounded conception of "woman's
sphere." "Women were made to labor,"
an old chief told the traveler Hearne.
"One of them can carry or haul as "One of them can carry or haul as much as two men can do. They also patch our tents and make and mend our clothing—in fact, there is no such thing as traveling any considerable dis-tance without their assistance."

BRITISH FISHING VILLAGES.

Many Important Changes Are Caused

by the war.
The last two years have seen many changes in many places and in many things, but in no one thing, perhaps, more than in the fleets, which, in times of peace spread their brown sails to the winds from almost every port on the east coast of Great Britain, from Duncansbay Head to Dover. Many thousands of fishermen who, in times past, were wont to sweep the North sea for fish, are now sweeping many seas for mines, and those who may still launch out into the deeps in search of fish, launch out in other waters. Quite recently, for instance, there has come from Yarmouth, the town that made the bloater famous, news that the Admiralty has decided to prohibit herring fishing from the port this season, and that the time-honored invasion of the great fishing port by Scottish fisher-girls, who were wont to perform their office as cleaners and salters of innumerable herrings with bewildering rapidity, will not take place. The Scottish fisher-girls will, no doubt, be quite unmoved by the order. Here, too, are great changes. The large majority of such girls are surely "on munitions," and earning "better money."

But to return to the fishing fleet. There is a certain port on the east coast, greatly beloved of painters, where a fishing fleet is not the least of the many attractions, for the man with an eye for color and a heart for the ways of the sea. The place is built round the mouth of a little river which tumbles down, in much haste at first, but anon with more decorum, from the moorlands away to the west, and finds its way to the sea through a great dike in the cliff-to the south are those of an abbey once famous, as a place of song and of learning, the world over.

When the tide is high the estuary of the river between the hills is a wonderful lake, and brown-sailed ships and red-sailed ships move slow-ly or rapidly over its surface; whilst the fishing fleet, if it is in port, lies up, boat against boat, four and five and six deep, all along the quayside. There is a forest of masts, all leaning one way, a maze of ropes and tackle, with great brown fishing nets slung up at masthead, whilst in and out amidst innumerable crates and barrels move, slowly and leisurely.

The master, the mate, and the seafaring man.

The master, the mate, and the seafaring man.

A closer view shows much mending of nets going on; many brownoveralled groups gathered round hatches, working away, in between much desultory converse, with peg and line. Then dotted about the quay, leaning against capstans, or squatting, in true fisher laboure, the jetty against the pile heads that line the edge, are yet other groups, men who, for the time being, are men of leisure, who have discarded brown overalls, and appear in all the wonder of the blue jersey and the blue trousers of the deep-front pockets. Great matters are often under discussion, and every now and again the channel of thought will be diverted by the man with the newspaper, who is forever discovering new matters of interest.

But to return once more to the fleet. It is always good to look upon; but it is specially good to catch a glimpse of when it is putting to sea, some night of a full moon; when the shadows are all purple; when voices carry with a strange clearness across still waters; when the ripples from the bows of the boats catch the moonlight, and the creaking of the halyards as the sails are slowly hoisted comes in, now from here, and now from there, and now from there, silence, as the boats move slowly down towards the open sea.

Sikh Boy Won Fame.

The story of Sirdarn Bahadar Ram Singh, whose death occurred recently, is that of a Sikh boy, born in humble circumstances, who rose to honor and distinction by his own merit and endeavor and who remained, in spite of that distinction, unspoiled, a kind-hearted, modest, genuine man to the end, "L.J." writes in The Indiaman. Ram Singh, as a lad, attracted the attention of Lockwood Kipling, father of Rudyard Kipling, and under the auspices of the famous Anglo-Indian artist the young son of a Punjabi cultivator became almost equally widely known as a designer. Later he succeeded to Mr. Kipling's post as principal of the Mayo School of Art at Lahore. In 1891 Ram Singh was ordered to proceed to England to design and supervise the decorations of the Dunbar Hall at Carborn bears. Sikh Boy Won Fame ceed to England to design and supervise the decorations of the Dunbar Hall at Osborne house. The new room was to be in Indian style, and the work was executed with remarkable beauty and effect. The Queen took great personal interest in the work during its progress, and much admired it on completion. Ram Singh might have obtained many commissions in England after that, but he was a singularly unambitious, modsions in England after that, but he was a singularly unambitious, modest man. He loved his work, but in the strange surroundings he was often homesick, and in 1892 he returned to the Pullinh with the treasured possession of the silver cup given to him by Queen Victoria.

Even the most aesthetically inclined of American millionaires would hardly consider the luxury of living in a residence built of meerschaum as within the range of their fortunes, yet there are many unpretentious houses of this material in the Spanish town of Vallecas, near Madrid, where a coarse variety of this substance may be found. Oddly enough, fust across the Straits are the Moroccans, who have discovered that still another variety of meerschaum lathers freely and makes a good substitute for the ordinary toilet soap.—The Popular Scienze Monthly.

The Old Cider Woman

POOR old cider woman of long ago explained to her customers that she lost on every glass she sold, but made it up on the great number sold. Figure it out for yourself.

Now we feel sometimes like the old cider woman.

We lost on every subscription at a dollar a year, yet try to say to ourselves that we make it up on the large number of our subscribers.

A good weekly newspaper cannot be produced for \$1.00 a year. \$1.50 is the absolute minimum-and this only when the newspaper carries a goodly amount of advertising. On the advertiser is placed the burden of losses on subscriptions. This is no secret. Yet it is not right.

And so, to-day, the publishers of dailies and weeklies are trying to set things right-by raising the price of their papers to subscribers in order that no heavier load will be placed on the advertiser.

For the costs of publishing are going higher every month. And this higher cost must be collected from some source.

We believe that you are ready in your mind to pay more for your weekly newspaper. You know that in your own buying and selling, prices in scarcely anything remain "fixed" year after year, as has the price of your weekly paper. You are paying more-very much more-for almost everything in common use

We put it to you: Is that reasonable that the old dollar rate of the country weekly remain unchanged in the light of the costs of other manufactured products ?

We are counting on you to fall into line with the necessities of the situation. and that you will agree with us when we say that three cents a week for THE HERALD is little enough when one figures out what it costs to produce it every week.

-or

claims above yours," Bert hedged, his impatience, however, only slightly modified. "The fundamental fact is that we must gain time."
"I don't see how unless Molly marries Sledge," suggested her father, with

a laugh.

Molly started to laugh also, but found
Bert looking at her speculatively.

"She doesn't need go that far," he

Molly looked at him in sharp incredu-ity for a moment; then, without a word, she turned to leave the room. "Where are you going?" asked her

"To see Sledge," she responded. think you told me that he is always at the bank between 11 and 12 in the

morning,"
"Molly," commanded Bert sharply,
hy her bearing,

recalled to his senses by her bearing, "you musto't see him. I forbid it."
"I am taking your advice, but I refuse to take your orders," she calmly informed him, surprised to find in her self an inclination to giggle over her use of that splendidly ringing remark, "Molly will shield you from all harm," she added, and she was snickering when she rejoined Fern.

"What's the joke?" asked that young lady. "I've been dying all morning to hear somebody giggle."
"You're to chaperon me while I go
over and make love to Sledge," Molly

gayly informed her.

"You're not really," protested Fern.
"I am really," retorted Molly, he eyes flashing a trifle more than a mere jest would seem to warrant. "I must, Fera. I plunged both father and Bert into this trouble, and Bert seems to think it's up to yours truly Molly to fool Sledge along until they have time to get out of it. Besides that, it's a ort of a game between Sledge and my-self, and I'm not going to have that big duffer win it."

"This is too delightful for anything," applauded Fern. "I'm perfectly mad about it, Molly. I hope Sledge is in." Sledge was in. He was closeted with

Senator Allerton and Governor Waver on a most important conference, one involving the welfare and prosperity of half the voters in the state; but, nevertheless, he promptly stifled his con-science and allowed the interests of the sovereign people to suffer when Davis whispered in his ear that Molly Marley wanted to see him.

"Bring ber right in," said Sledge "Men, you'll have to go. It's a lady," and he opened the rear door for them

ing to the shining big limousine occupied the center of the floor. "All it needs is gasoline," replied the "Just one moment," parleyed Gov-ernor Waver, his hand on the door-knob. "I'm returning to the capital this salesman.
"Put some red roses in that flower thing, and send it up," Sledge directed.
"About dinner time?" surmised the

afternoon, and"—
"I'll see you up there," interrupted

salesman. "Possibly I'd better send it up before, Mr. Sledge. It has some im-provements your man might want to look into."

"I'll send Billy down," decided

Sledge.

He turned to go when, in the adjoining window, he caught sight of a little, low, colonial coupe, with seating capacity for three. It was of an exquisitely beautiful shape, with small, latticed window panes and dainty lace curtains. He walked slowly toward this helitally cold great ways helpful. it, his habitually cold gray eyes bright-ening, and as he stood before it he thrust his hands deep in his pockets and positively laughed aloud.

"That's our newest ladies' car," ex-plained the salesman, following him. "The women are crazy about them. Self starting, electric lights inside, shopping flaps everywhere, adjustable satin seat coverings and all the latest boudoir improvements." Sledge scarcely heard him. He was

still laughing. Nothing he had ever seen had struck him so humorously as the "cuteness" of this car.

"It's swell!" he chuckled. "Got a

id the gov-

"No, they're only made in black,"
the salesman told him. "The color effects are obtained by the cushion coverings and silk curtains."

"Put red ones in this. Got another "There's one just being set up in the shop," stated the overjoyed salesman.

"It's an order."
"Make that one blue."

"Do you want them this afternoon?" asked the clerk, figuring that it was worth while to put off the other cus-

"Sure!" said Sledge. "Right away."
"I'll get busy immediately," promised
the salesman, delirious with happiness. Marley considered that statement carefully. He was beginning to learn that he really needed caution in dealing with Sledge.

"One of us might be gobbled up," he sagely concluded. "As I understand it, was over 150 per cent of the new com-Where do they go?" "Molly Marley gets the rec one. The blue one's for her friend Fern. Nix on

who sent 'em."
"They'll want to know," the sales an insisted. "Aw, tell 'em Frank Marley."

sagely concluded. "As I understand it, you own 75 per cent of the new company, while I only hold a bare majority of the old one. It would scarcely be possible that in a consolidation I would still have control."

"We'd have to pool our stock for either one to hold it," agreed Sledge.

Marley looked at him wonderingly.
"I don't quite understand the advantage to you in this," he puzzled. "Frankly, Mr. Sledge, I'd have to see that advantage before I could consider the matter." Just across the street was the largest jewelry shop in town, and the display in its windows gave him an idea. He strode in, asked for the proprietor and got him.

"I want a rock that weighs about a pound," he stated.
"A diamond? Yes, Mr. Sledge, Something for an emblem?"

thing for an emblem?"
"Naw! Lady's ring—solltaire."
"We have some beauties," bragged
the jeweler, immediately aglow with
enthusiasm. "Here is a nice little "There ain't any," Sledge confessed.
"I want to protect you if everything's all right. Molly was just over."
"Yes; she said she was going to see you," replied Marley, clutching eagerly at the straw. three carat stone which is flawless and perfectly cut."

"Is this the best you got?" inquired

Sledge, looking into the case.

Sledge, looking into the case.

"We have some larger ones unset, but they are not usually mounted in ladies' rings," responded the jeweler, struggling between his artistic conscience and his commercialism.

"Let's see 'em."

Reverently the jeweler produced from "Yes; site is," assented Marley, won-dering just how much she had safd to make such a remarkable change in Sledge. The would proba-bly be a very sensible thing. It would

Reverently the jeweler produced from the a covered and locked tray, in which on white velvet reposed a dozen sparkling white stones.

Sledge poked a stuffy forefinger at the largest one.

"Is this one right?" he wanted to know

by be a very sensible thing. It would enable us to plan extensions, lines and loops which would increase our revenues tremendously, with no possibility of dividing the patronage. Moreover, a mere announcement of such a move would add immediately to the market value of the stock in both companies."

"We consolidate after the marriage." know.
"It's a very good stone," the jeweler told him.
"The next one to it, however, though

a trifle smaller, is of much finer qual ity. In fact, we have not one in the shop of any size which I consider so perfect as this one. It's worth \$500 more than the large one."
"That'll do." Sledge decided. "Put it

in a ring."
"Very well," agreed the jeweler, trying to be nonchalant as he consulted a slip of paper in the edge of the tray.
"This one weighs six and three-eighths carats, plus a sixteenth, Mr. Sledge.

"All right; tomorrow night, then," suggested Marley, his mind firmly fixed on the commercial opportunity.
"Daytime," corrected Sledge. "I'm busy nights. Say, Marley, is that game between Molly and Bert called clear off?" Have you the size of the ring?"
"Naw!" he returned in disgust at his
own thoughtlessness. "I'll take it
loose." And he slipped the stone in his waistcoat pocket.

CHAPTER XIV.

"No," Sledge hesitated. "Is it?"
"That's entirely Molly's affair."
"I believe you," coincided Sledge, and Molly Insists on Protecting Bert. D the Marley gate and trod on the Marley porch and punched the Marley doorbell in a fine condition of manly indignation, and he demanded of the emaciated butler with the intellectual brow that Molly Mar-ley be brought into his presence at once. He waited in the library while the butler went upstairs with that hasty message, and it was no comfort to his soul whatsoever to hear the girls devoting painstaking attention to an

apparently endless job of giggling.

With scant consideration for the importance of the occasion. Molly, her face flushed and her eyes glistening with moisture from her recent earnest efforts, came down when she was ready, and she was still tittering, while ern, upstairs, could be heard in the

throes of frantic laughter. "Hello, Bert," laughed Molly, holding her hand to her jaw, and she sat down "What's the mad rush"

"What did you say to Sledge?" he sternly demanded.

SCHOOL.

Lesson X .- Fourth Quarter, For Dec. 3, 1916.

THE INTERNATIONAL SERIES.

Text of the Lesson, Rev. i, 1-8, 17-20, Memory Verses, 4-6 — Golden Text, Rev. i, 17, 18-Commentary Prepared by Rev. D. M. Stearns.

It is certainly a rare privilege to have some studies in this last and in some respects best and most wonderful of att the sixty-six books of the Bible. the only one that has a special blessing pronounced upon those who read and hear and keep its precious words (i, 3). The correct title of the book is found in verse 1, "The Revelation of Jesus Christ," and it is the summing up and unfolding of all things concerning Him and His Kingdom. It tells of that which God gave Him to show unto us, and He sent it by His messenger unto His servant, John. It does seem most unkind to and rebellious against such a God and Father to turn away from such a book and refuse to read it or refer to it, as many, even among preachers, do. It was John's business, as it is ours, to bear record of the Word of God and of the testimony of Jesus Christ, even though we should be banished for it, as John was, or even killed, as others were (i, 2, 9; vi. 9; xii. 17).

vi, 9; xii, 17).

He is and was and will be ever the same Jesus Christ, the Son of God, whose goings forth have been from of old, from the days of eternity; who in the fullness of time came as God man-ifest in the flesh, the Word made flesh, and is coming again to set up His kingdom on this earth (verses 4, 8; Mic. v, 2, margin; Gal. iv, 4; I Tim. iil, 16; John i, 14). The message concerning Him is always to every sinner the grace that saves and the peace which He has purchased by His own blood (verse 4; chapter xxii, 21; Eph. ii 13: Col 1 20): The Spirit loves to bear witness to Him, and the seven Spirits suggest the perfect fullness of the power and testimony of the Spirit

the power and testimony of the spirit (verse 4; chapters iii, 1; iv, 5; v, 6). He is the faithful witness, called Faithful and True, and all His words are true and faithful (verse 5; chapter iii, 14; xix, 11; xxi, 5; xxii, 6). He is the first begotten of the dead, Christ the first fruits (verse 5; Col. i, 18; I Cor. xv, 23). Because of His resurrection others have risen and others will rise they that are Christ's at His coming. He is the Prince of the kings of the earth, King of kings and Lord of lords, and all kings shall fall down before Him, all nations shall serve Him (verse 5; chapter xvii, 14; xix, 16; I rease 5; chapter xvii, 14; xix, 16; 1
Tim. vi. 15: Pa ixxii 111. How glorious He is and will per book pour
heart cry out, "Yea, He is altogether
lovely; this is my Beloved, and this is
my Friend?" (Song v, 16.)
As John thinks upon these things he
by the Spirit breaks forth with the
ascription, "Unto Him that loveth us
and washed us from our sins in His
own blood," reminding us of much we
have so recently written in the lesson

have so recently written in the lesson notes concerning all believers being washed, sanctified, justified (I Cor. In John xiii, 10, He said, vi. 11). that is washed is clean every." It is our standing in Him which is perfect because of His come-liness (Ezek, xvi, 14). Then, as to our future, see the wonders of His grace and glory in making us kings and priests unto God to reign in His king-dom (verse 6; chapters v, 9, 10; xx, 6). "Behold, He cometh with clouds" (verse 7). This is His coming in glory (verse 7). This is His coming in glory with His saints, as the Sun of Right-eousness, of which Enoch prophesied before the deluge; His coming to judge the nations, when they shall wail and be angry because of Him, when Israel shall look on Him whom they pierced ceive Him as their Messiah (Jude 14; Zech. xiv, 5, l. c.; Mal. iv, 2; Zeph. 8: Zech. xii. 10: xiv. 1-3: Rev. xi. 18: vi, 15-17). He is Alpha and Omega, the beginning and the ending, the first and the last (verses 8, 11; chapters iii, 14; xxi, 6; xxii, 13; Isa. xli, 4; xliv,

6; xlviii, 12). Not all His titles can tell of Him as He should be known, and it will always be true of Him, at least while we stay here, that the half has not been told. John, being in the Spirit, heard behind him a great voice as of a trumpet, and, turning to see the voice, he saw seven golden candle-sticks, which, he was told, represented seven churches, of which we shall hear e in our next lesson (verses 10-12, In the midst of the candlesticks he saw Him on whose bosom he had leaned when He was on earth, but he had never seen Him like this, not even when He was transfigured, and he was so overcome that he fell at His feet as dead (verses 13-17), but the same right hand was laid upon him, and the same voice said so kindly, "Fear not; I was dead, but I am alive for-

In studying this book I have always used the following outline: Chapter I.— Christ in the midst of the churches. II and III.—His last messages to the II and III.—His last messages to the churches. IV and V.—The church gone from the earth. VI to XVIII.—Between the rapture and the return. XIX.—The marriage and the return. XX.—The thousand years. XXI and XXII.—The New Earth. I would urge all to memorize the description of Him in verses 13-16 until you can close your eyes and see Him somewhat as John saw Him. Memorize also the description of Him as given in xix: 11-16, for then we shall be coming 11-16, for then we shall be coming with Him in His glory.

FISHED WITH A GANDER. And Now the Poor Fowl Shows a Dis-tinct Aversion to Water.

A gander was so upset by experi-ments made upon and through him by a mischievous boy that for a long time

he would not go into the water.

The gander's determination to abstain from water as a means of bathing grew out of the following circum

ing line to the gander's leg and with a hook properly baited turn the bird out into the water. The bait was a frog.

The gander went into the mill pond where he swam around for half an hour, turning "flipflaps" and diving for food. Suddenly he felt a pull at his leg and looked as surprised as the "lone fisherman" when he caught a whale.

The gander thought there was some thing the matter, and he looked to as-certain the cause. The pickerel on the hook gave several jerks, whereupon the gander decided be wanted to go

He at once started for the shore, but the pickerel on the hook wanted to go the other way. The gander seemed frightened at first. Then he evidenced

frightened at first. Then he evidenced signs of anger and tried to fly to shore, but the pickerel pulled him back.

After half an hour of the hardest work he had ever done the gander came ashore, dragging a six pound pickerel up the bank.

The boy took off the pickerel and balted the hook with another frog. He tried to induce the gander to go in for another swim, but no amount of persuasion could get the bird to do so. He suasion could get the bird to do so. He suasion could get the bird to do so. He simply would not be driven in. For many weeks the gander would not go into the water. He would proceed with the rest of the flock to the water's edge, but there he would stop. He would seem to be arguing with them with reference to the danger they were counting. They have a Tiera have the simple Tiera water.

EXTRAVAGANT EUGENIE

The Empress Boasted That She Neve Wore a Gown Twice.

It is true that the cost of w dress has so increased that it is not given to the many to be as truly elegant as their grandmothers were able to be at comparatively small cost. But, then, those were the days when an elaborate ball gown consisted of yards of flounces of tarlatan or some other light and uncestly material.

other light and uncostly material.

Empress Eugenie, it is said, declared she never wore the same gown twice. She it was, by the way, Worth, the renowned Paris couturier, famous. The great luxury in those days was to wear several ball gowns during the course of a single ball. Dressing rooms were provided, and the ladies retired to reappear resplendent and as fresh as at the beginning of the evening. The gowns of the day, which were flimsy of train and spread by crinolines, suffered much from an evening's wear: hence these wasteful

There is a tale of the lovely Empre Elizabeth of Austria which recounts her appearing at a function in a white tulle gown, flounced and ample, deco-rated with garlands of real camellias, and changing both gown and camellias every now and then to preserve the impression of absolute and uncrumpled

Near Enough.
"When I was a young girl," mused
Mrs. Lapsling, "a poet once sent me
some verses. I read the first letters of the lines downward and found they spelled the words 'I adore you.' You know, they call that sort of poem an agnostic."—Chicago Tribune.

A German scientific journal published in 1897 a story to the effect that a golden eagle shot in that year at Eszeg, Slavonia, was found to have a ring about its neck engraved on which were the arms of a Slavonian family

and the date 1646.

In 1793 the Gentleman's Magazine told about a hawk, captured when fig-ing in the vicinity of the Cape of Good Hope and taken by an Indian ship to England, which wore a gold collar in-

England, which wore a gold collar inscribed:
"This goodlie hawk doth belong ta his Most Excellent Majesty James, King of England, A. D., 1610."
If this bird really escaped from England in the reign of James 183 years elapsed between its escape and its recapture, and it had flown a distance of 6500 miles away from its formes. 6,500 miles away from its formes

STEARNE EDWARDS WITH THE ALLIED AIRMEN.

Written Home by Another of

her son Stearne on Friday last from Carleton Place, a returned soldier, now London, where he is now on a week's in the employ of the Interior Depart leave of absence after spending five ment, has been given to Pte. Terrence worths in France. Stearne's work is not individual, he is with a squadron, and they have to work as such. Their business is dropping bombs on munition factories and other important places in the enemy country. His letters are interesting:

On the 13th October he writes:

Well, we have started business at last. Yesterday we raided a big munition factory 110 miles away, about 60 miles this side of the Rhine. It was the biggest raid ever carried out, more than 50 machines taking part. I do not think there is much left of the munition biggest raid ever carried out, more than so machines taking part. I do not think there is much left of the munition factory to-day. Oberndorf is the name of the place. Nine of our machines did not come back, six French and three British. It is likely they were stot down by anti-aircraft guns for they shelled us very heavily and the sky was thick with bursts. However, on a raid of that size and distance, one expects to lose some machines, and eight of the loops each shot down a Hun, which helps some. The shells came near me enly once, and I dived a thousand feet to change the range. We have the fastest bombing aeroplane in the world. We were the only flight (A No. I lowith squadron) to come back complete. B Flight had some of its pilots lose themselves as it was dark when we got back and they landed in fields some distance from our aerodrome. We were about three a hand hours is the gair, those in the slower machines of course much longer. My engine was not any too good coming back, and before I recrossed the lines I thought I would have to descend, but it held out, and took me over the Vosges at 55 instead of 80 miles and I got home. A Hun machine was over a few nights ago and startled us by dropping bombs near our hut. We lost no time in getting into our dugout which is only 20 feet from the door. The bombs did no harm, and when the searchlights picked him out and the guns started shooting he soon left.

On the 29th October he wrote again:

We have been very busylately and have

On the 29th October he wrote again On the 29th October he wrote again:
"We have been very busy lately and have
moved twice in three days. We have
done nothing in the way of raids for the
past week, as there has been a continued
gale blowing and plenty of rain. The
day we flew over here it was very rough,
the worst any of us had experienced.
It took me 40 minutes to fly only 15
miles, and we should do it in 10. We
are now at a little place about 18 miles are now at a little place about 18 miles from Nancy, and will probably stay some time. It is not very far from the lines. Think we will move farther north soon. Of course it is very nice to be moving about so much for one sees so much of the country. Nancy is a very nice little city. Little Paris they call it. It is about the size of Ottawa, and only seven miles behind the lines. That paper clipping I sent home some time ago had Murray in it. He is hundreds of miles from us. I suppose you have heard that Murray got the D.S.C. (Distinguished Service Cross), for bringing down that German machine some time ago. I am very glad for I think he deserves it."

On November 5th Sterne writes of

On November 5th Sterne writes of not receiving any mail for over a week, and is suffering with a cold. Have been doing nothing on account of rough weather for some time. Have been down to Luxena and Epinal. There is some talk of leave soon, and if it does we go seven at a time for 10 days, and being out here first I expect to be in the first seven, and hope to see Bob before he comes to France. Had the officers of a French regiment billettel near by to dinner. The regiment is the Alpine Chausseurs, one of the crack regiments of France. We had a good time and they invited us to their mess to-morrow night. Our C.O. got a letter the other day from General Joffre, signed by himself, saying he was much pleased with so. 3 Wing, or something to that effect, and there is a rumor that we may be allowed to wear a decoration of some kind. We have just been supplied with plenty of good flying clothes, boots, headgear and seal gauntlets, and they are necessary as it is very cold up high now.

Will wire from England if I get leave. On November 5th Sterne writes of

NEW DRIVE FOR SOFIA. Italians and Serbs Make Progress

North of Monastir.

PARIS, Nov. 27.—Fresh progress for the Italians in their northward drive west of Monastir between Lake Presba and Lake Orchidra is reported by the War Office Sunday in its statement dealing with operations on the Macedonian front. There has been artillery fighting on the other wing of the Monastir position, but bad weather has interfered with infantry activities. British airmen bombarded enemy encampments in the region of Neohori, at the mouth of the Struma.

The Serbian official communication issued Sunday says:

"Except for an unsuccessful enemy

2-16-5

The Serbian official communication issued Sunday says:

"Except for an unsuccessful enemy attack near Grunishte height (18 miles east of Monastir) Friday and local combats there is nothing of importance to report."

The Allies have made good progress north of Monastir the past week. After capturing that town on Sunday the French moved along the Prolep road, the Serbians followed up their victory on the right along the Cerna, while the Italians cleared the left flank of Bulgars between Lake Presba and Lake Ochidra. The hasty flight of the Prussians and Bulgars north-east of Monastir is shown by their abandonment of food stores, engineering implements, and other material.

ANZACS MAKE REPLY.

an Effort to Cause Hard Feeling is Denov

WITH THE BRITISH ARMIES IN FRANCE, Nov. 27.—From a staff correspondent of the Associated

FRANCE, Nov. 27.—From a star correspondent of the Associated Press:

Wireless reports from Berlin Saturday, charging that the British have favored their own contingents at the expense of the colonial troops, particularly the Australians, in the recent fighting, were denounced at the Australian headquarters as false. That the Australians have been in hard fighting is true. They have the honor of being considered among the best troops on this front, and have been used the same as the other famous divisions.

The official representative of the Australians told the Associated Press correspondent that they would have been aggrieved if they had been treated as inferior in organization, personnel or material. He added that the recent attacks had their natural difficulty, but that the Australians and British had been side to side, and that the heaviest fighting fell upon the shoulders of the English, Scottish, and Irish divisions.

The German wireless story in characterizing recent attacks as "stupid and futile," and made solely for the sake of prestige had overlooked the fact that the Australians brought in 7,000 prisoners, said the representative of the Australians had fought hard and suffered along with the other good soldiers, but that they regarded it an insult for the Germans to take up their cause.

Shot in Mimic Battle.

Shot in Mimic Battle.

Shot in Mimic Battle.

TORONTO, Nov. 27.—While fighting an imaginary battle against a make-believe army of Germans in the yard of his home, little Charlie Izzo, aged eight years, was accidentally shot in the left eye with a bullet from his air rifle. The eyeball was so badly shattered by the bullet that it was necessary to remove the eye from the socket at the Hospital for Sick Children, and late Sunday night his condition was reported to be critical. According to the information received young Izzo, and a boy friend, both armed with air-rifles, were advancing on imaginary German trenches represented by the rear fence in the yard. Nearing the make-believe "No Man's Land" Izzo dropped on his knee to aim at the supposed Germans in the yard-fence-trench. His companion shouted "shoot!" at the same time playfully striking Izzo on the shoulder with his gun. The rifle held by Izzo in some way fell from his hand and striking the ground, with muzzle pointed towards him, was discharged by the impact of the fall.

by the impact of the fall. Coal Miners Strike.

Coal Miners Strike.

FERNIE, B.C., Nov. 27.—Officials of the Miners' Union are hurrying to Ottawa in connection with the ultimatum to the operators which expired Sunday night. It is also understood that officials of the Operators' Association will visit Ottawa, where the Department of Labor is making an effort to avert a strike. It is stated, however, that the prospective conference will not keep the mines in operation pending its conclusion, and that most mines in District 18 will be closed down Monday.

The twenty-four hours ending at ten o'clock Sunday night is the regular weekly idle period of the miners. The ultimatum expired at midnight Saturday night, but the strike did not effectually commence until ten o'clock Sunday night.

German Assaults Repulsed. LONDON, Nov. 27.—Attempts by the Germans to assume the offensive

the Germans to assume the offensive on the Western front at three points Sunday failed. British troops holding the lines east of Beaumont-Hamel, north of. the Ancre, repelled a German attacking party. Berlin claims to have taken 160 prisoners Saturday night. Enemy raids south of Arras were also repulsed. In Champagne the enemy launched an attack east of Auberme, but was repulsed by the French barrage.

Senator Dies for Treason LONDON, Nov. 27.—Senator Abdul Hatidzehravi was sentenced to death by court-martial and executed for conspiring against the Turkish Government, according to a Constantinople telegram to German newspapers, says a Reuter's despatch from Amsterdam. The senator, the despatch adds, was charged with attempting to make Syria an independent Arabian principality.

THE ONLY WAY TO **CURE RHEUMATISM**

Must be Treated Through the Blood and the Poisonous Acid Driven Ont.

Acid Driven Ont.

The twinges and tortures of rheumatism are not due to cold, damp weather as so many people suppose. Rheumatism comes from poisonous acid in the blood. This is a medical truth that every rheumatic sufferer should realize. There is only one way to cure rheumatism—it must be treated through the blood. All the liniments and rubbing and so-called electrical treatment in the world will not cure rheumatism, and the sufferer who tries them is not only wasting money, but is allowing the trouble to become more firmly rooted in the system and harder to cure when the proper remedy is tried. Dr. Williams the system and harder to cure when the proper remedy is tried. Dr. Williams Pink Pills have had remarkable success in curing rheumatism because they go right to the root of the trouble in the blood, driving out the poisonous acid, releasing the stiffened joints, clearing away the torturing pains, and giving the victim renewed health and ease. Mr. Vincent Brow, Havre Boucher, N.S., says: "For two years I was an almost constant sufferer from rheumatism, the trouble being so bad at times that I could scarcely get about. The trouble seemed to bring with it anaemia, and altogether I was in a very bad condition. I used doctor's medicine for almost a year without relief. Then on the advice of a friend I decided to try Dr. Williams Pink Pills. I think I took altogether about a dozen boxes, with the result that I am again enjoying perfect health."

You can get these pills through any medicine des her cannot be a successive to the control of the property of the property

You can get these pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams Medicine Co., Brockville, Ont.
