Seven Thousand Boers Have Been Killed in the War to Date.

BOER FORCES ARE COMPELLED TO ABANDON COLENSO

All England is Cheered and Bets Are Made That Buller Will Occupy Ladysmith.

Canada Worked Up as Never Before in Her History-Millions of Money and Thousands of flen at Disposal of British Government-Boers Becoming Disorganized-Steamer Townsend Is Rescued From Her Perilous Position, Only to Be Wrecked Again.

From Saturday's Daily London, via Skagway, Jan. 27 .- brought forward favorable comment Accurate returns from Capetown gives from papers which hitherto have been the total loss of the Boer forces to date hostile to the government and a more more than 7000 killed. British losses cheerful feeling generally prevails. The will reach 8000, making a total of war spirit is at its very highest and the 15,000 men kiled to date.

Driven From Colenso.

London via Skagway Jan. 27. - Atter a sharp bombardment lasting 24 hours the Boers have been driven from Colenso. Betore leaving they destroyed Methuen is still at Modder river. The everything in the town of any value and Boer position is not clearly defined. set fire to all the buildings. Before any Methuen has made several strong reconmeasures could be taken to stop the nisances recently in the hope of drawspread of the flames the entire town ing the Boers into battle. These efforts practically was in ashes.

Canada Wild.

Ottawa via Skagway Jan. 27.—Canada is worked up to a tremendous spirit of patriotic enthusiasm over the war. Offers of volunteers are coming in from all over the Dominion. Lord Strathcona's offer to equip 400 men from the Northwest and maintain them to the end of the war has been accepted.

Townsend Re-Wrecked.

Skagway, Jan. 27.-The steamer Townsend which was reported in these dispatches some time ago as having been wrecked on the way from Seattle to Juneau was rescued from her position on the rocks, but two days later sank again, and is now lying at the bottom of the sea a total wrec k.

Building Trenches.

London via Skagway Jan. 27 .- The Boers have detached 10,000 men from the forces surrounding Ladysmith and despatched them to Potgeiter's Drift at which point long lines of most formidable trenches are being constructed. News of an important battle at this point may be expected at any time. This leaves the attacking force at Ladysmith very considerably weakened.

A Cheerful Feeling.

London, via Skagway Jan. 27.-Condence in the ability of the government to prosecute the war to a successful close is again being restored in the minds of the public. The news of Bul-

ler's advance upon Ladysmith has utmost confidence is now expressed that the war will be b ought to a successful conclusion very shortly.

At Modder River.

London via Skagway Jan. 27.-Lord have proven unavailing so far and the situation remains practically unchanged. There is no news direct from Kimberley.

Change of Feeling.

London via, Skagway, Jan. 27.-A great change has come over the public mind during the past tew days owing to encouraging news from South Africa. A special to the Daily News dated Jan. 19 states that Gen. Buller moved his entire force across the Tugela river on the 17th inst, His whole army including a waggon train 19 miles long is now marching toward Ladysmith, which point his officers are wagering will be reached on the 20th. Bullers army including the artillery forces numbers 40,000 men. His pres-Ladysmith in a semi circle from the south and west.

Boers Working Hard.

London via Skagway, Jan. 27. - The Boers have been engaged for ten days in strengthening their position outside of Ladysmith. Heavy fighting took place again on the 21st. The number of casualties is as yet unknown but are thought to have been very large. The Boers have thrown up long lines of en trenchments and are preparing to make a desperate stand.

Papers Criticise.

London, via Skagway, Jan. 21.-The London papers almost unanimously indulge is harsh criticisms of the methods which have been used in the conduct of the war up to date. The Times is especially severe and rakes the government fore and aft.

Soldiers From B. C.

Victoria, via Skagway, Jan. 19.-The seriousness of the war situation is fully

realized here. Nothing but the war and the necessity of prompt action on the part of the government is talked of. Influential men of the province have forwarded to the war office in I ondon an offer to raise, equip and maintain a force of 500 men to be secured from volunteers in the province.

Is America to Apologize?

Rome, Jan. 13.-Minister of Foreign Affairs Venosta in the chamber of deputies today, in answer to an inter pellation touching upon the lynching of Italian subjects at Tallulah, La., said the government had received assurances Late Editor of Sunday Gleaner from Washington that Italy will receive moral satisfaction, besides a pecuniary indemnity.

Found Dead in Bed.

Last night a man about six feet tall, and whose gray hair and gray full beard would indicate that he was past 50 years of age, applied for employment to Mrs. G. A. Croff, who conducts a boarding and lodging house at No. 7 below on Bananza, at which she provides for the miners whom her husband employs in working his lay on that claim. The man said that his name was Cooper, and that he had been stopping in a cabin on No. 6 Adams creek. Mrs. Croff told him that he could go to work for her husband in the morning; and he decided to remain in her bunk house

From Saturday's Daily. THE WAR.

There is very little comfort in the news which is brought from the seat of war after a suspension of communication covering 10 days. The situation apparently is but little altered.

Briefly summed up it appears that England now has in the field an army approximating 120,000 men to accomplish a task which before it was undertaken was estimated would require but 35,000 at the outside. She has been more than three months engaged in the issuing an "extra" edition. It was task and as yet has not penetrated into exactly 5:35 p. m. when the last wire the enemy's country, although, according to the sanguine predictions of the 45 minutes later the type for the ministers for the colonies and of war, "extra" had all been set, the proof Christmas day would be celebrated by the British generals in Pretoria.

Three important British garrison stations are still being beseiged by the Boers and aside from the repulse at Ladysmith, where, as noted in yesterday's dispatches, 3000 Boers were killed as against 800 British, no engagements minutes were all that the Nugget's husof importance have taken place.

It must, nowever, be borne in mind that the very strictest censorship is maintained over all press matter and our contemporaries quarrel over their that but little news escapes the vigit respective telegraphic services, and call lance of the censor. For which reason each other hard names, the Daily it is difficult to arrive at any definite idea as to the exact situation. It is apparent, however, that the knot is a much harder one than was anticipated by Chamberlain, when he so confidently told the people of England how easy it would be to untie it.

MISSING PEOPLE.

The list of people who have never been heard from since coming into the Yukon country continues to grow Every few days a list of names of men who have thus disappeared is published in the newspapers, and information sought from any one who may know anything as to their whereabouts. These requests for news from missing friends form a sad and striking sequel to the great rush to the Klondike which succeeded the announcement. of the discovery of gold. Hundreds of men who left comfortable and happy homes in the states, hoping to gain for themselves and their families a competence from the riches known to be sto ed in the bosom of the earth in this country, have never been heard from at all. Whether they are alive or dead their friends on the outside do not know. Many of them having failed to meet the expectations which they had in mind and being unable to return with the coveted amount of wealth have disappeared from the knowledge of their friends merely because they have purposely avoided. communicating with them.

There is every reason for believing that a great many have met death as a result of dangers and hardships encountered in their search for gold, but

many others might relieve a world of sorrow and anxiety by merely writing to their friends and assuring them of their safety. No true man will shirk this duty, no matter how unpleasant his situation may be or what misfortunes may have befallen him.

THE FIRST.

The Daily Nugget was the first newspaper in Dawson to furnish the reading public with outside news after telegraphic communication had been reestablished yesterday between Dawson and the coast. The fact that the wire had been down for a period of 10 days had whetted the appetite of newspaper readers for information from the seat of war. Owing to the amount of commercial matter which had been filed at Skagway, no press reports had been received at half past three, the hour at which the forms for the Daily Nugget

The regular issue was therefore printed and sent out as usual. Shortly after, the press telegrams began coming in and it was seen that the war news was of sufficient importance to justify was received in the Nugget office and sheets read, the forms made up and placed on the press. Five minutes afterwards the Nugget's street salesmen were calling the "extra" edition of the Nugget in the streets 30 minutes in advance of the appearance of either of our esteemed contemperaries. Those 30 tling salesmen required, and they reaped a golden harvest from hundreds of eager buyers of the "extra." While

People who will strain at a gnat will be found in every community. That they are not wanting in Dawson was shown conclusively when so much opposition was stirred up over the proposal to give a series of Sunday night concerts. Ministers of the gospel who stand idly by while al! sorts of vices run in full swing on Sunday nights and then throw up their hands in holy horror at the suggestion of an evening spent in listening to classic music, cannot be charged with the possession of too much consistency.

The "beef" ed tor of the News knows about as much concerning that question as the News "grub" editor knew about the question of chickens, turkeys and eggs. Stolen telegrams are more in your line, Brother News. When you handle proposition concerning which the public are informed, you almost invariably get beyond you depth.

Now comes a rumor that Japan and Russia are going to war. It will come about shortly that the only place on earth where the gentle dove of peace really reigns supreme in in the heart of the Yukon country. We couldn't do much in the way of fighting here, right now, even if we wanted to. A bullet would freeze up this weather before it lett the gun barrel.

A complete line of toilet requisites. Cribbs Regers, druggists.

Get your eyesight fixed at the Pioneer When in town, stop at the Regina.

When it comes to things of a touching character, the sight of George Hillyer, as Michael Strogof, leaning over a prostrate figure on the floor and saying: "Mother! She is lost to me forever;" would bring tears to the eye of a potato. What makes the scene really more pathetic than it would otherwise be is that Mike, who does the turn in his shirt sleeves, always has a Vanity Fair package of cigarettes protruding from the flask pocket of his pants.

The old timer whom the Stroller men ioned a few days ago as having lost of faro tables a mile long and all the his prestige by recent acts of the old war horses I ever knew were there weather endeavored to reinstatte himself dealing to the same old gang. The by asserting with confidence that the nearest table to me had Billy McRae backbone of winter was broken as soon dealing with Jim Donaldson in the as last Tuesday night's wind died lookout chair, and they gave me a down, and that at no time until next hand that made me feel jollied considerwinter would mercury go lower than able. 25. In less than 48 hours it dropded to 50, where it has since remained. In and commenced to play, winning every desperation over his second fall, the old bet; even the splits and things were timer attenuted suicide. He was pre- easy. I turned the box over the first vented from doing away with himself deal and Mac chased down the line for by friends who are now taking turns at more money, coming back smiling and watching him and feeding him on insisting on opening wine. I we malamute stew at his cabin. He swears everything in sight until I had that if he ever gets out of this country money than I could carry away. he will go to Cuba and offer himself as and Donaldson were tickled to death a victim to y llow fever or some other and offered to make another deal, tropical disease.

"Did I get any mail? No; and I didn't expect any," said a man in the hearing of the Stroller in front of the postoffice the other day in answer to a question put by an acquaintance. Continuing he said: "I go to the postoffice through force of habit and I'll tell you, how I contracted the habit: Three years ago I loved a girl back in Arkansas and she apparently loved me. We had it all fixed up to be married, when, damn me, if she didn't go plumb back on me for a spindleshanked barber that hit the village. As the boys guyed me nigh to death about sweet scented and I did. Befor I left I made an old friend promise to write me just one letter and write it when Jennie, that was her name, married the barber. For two years I went to the postoffice regu larly and at last that letter came. Jennie had married the barber. That letter is up to my cabin quilted in the lining of the best vest I own. But some way I can't stop coming to the postoffice every time I hear of the arrival of a mail although I know very well there will be nothing for me. But then I think that if anything would happen back there, my triend would write one more letter. I have not been in a harber shop for three years; I let my beard grow and cut my own hair; I never pass a striped pole or sign on the st-eet without wanting to kick some body. To be plain about it, I am what might be termed a tonsorial wreck; but if thought that spindleshanked puppy wasn't good to Jennie I'd start out over the ice tomorrow and go hack 'to Arkansas and kill him, d-n him, if I was lynched for it during the next 15 minutes."

"Hello! Maxie," said the Stroller, espying that disciple of Epicurus at the Bank Cafe with a lay out of the good things of life spread temptingly before

"Howdy, slave," said Maxie; "the world looks good to me today. I dreamed last night I was dead and say, that is not all, I thought I went to hell. Ugh! Yes, sir, to hell. It was a fright, and my nerves are shot to pieces.

"It came on me easy, and if the real thing is like the run I got, I don't want any more offit in mine, and by the way, Mr. Stroller, you had better look a little out in what direction you

Birds were singing gloriously, the air was laden with the most delightful

perfume, there were umbrageous trees and vestas of green sward that would delight the eyes and make a native son prance with joy. I walked along a shaded avenue of royal palms, stopping occasionally to drink from fountains flowing with ambrosial nectar. After a short walk I came suddenly upon an immense structure with flags of all nations flying from innumerable min. arets. As I entered the massive build ing the strains from an immense orche tra greeted my ear and who should I espy but Pring giving out tickets, each one being a \$20 gold piece stamped "admit one." He gave me a stack of them as he shook hands, telling me I'd like the place.

"When I got inside there was a row

"I called for the cases and got them doubling the limit, but I got a hunch and quit as happy as a bird. So I started in feasting, everybody offering to settle the bill and looking sad when I insisted on paying.

"I was having a great time when along comes a tall, ha dsome looking chap covered with diamonds, who lined. everybody up. To every man that was broke he gave a white check. I noticed he gave one to McRae and Donaldson. To me he gave a red check and the minute I put it in my pocket everything looked different; no more music, a terrible thirst took possession of me, hunger was knawing at my vitals, the memory of every mean act of my life lather and bay rum and Florida water came rushing through my brain and no and mustache wax, and other barber matter how I tried I could not remember shop furniture, I decided to skin out one kind act to offset the others. I tried to throw the cursed red check away, but when I touched it ten thousand shrieking devils sprang at my throat. I rushed up to the tall fellow in black, demanding the meaning of the check and why I got it.

"He explained that in this country if is everyone's desire to give away their money, the man having the least beil the most happy, those having the r the most miserable, and that I shou try and dispose of my money to some fortunate fellow who was broke.

"All this time I was suffering mental tortures, so I rushed out in the air. I noticed a fellow with a sort of hard luck story written on his face, so I pulls out my poke and was just about to offer him the whole business when I woke up. That was the most narrow escape I ever had."

The Klondike Nugger (DAWSON'S PIONEER PAPER)

ISSUED DAILY AND SEMI-WEEKLY.

(From Friday's Daily) AN IMPORTANT CONSIDERATION.

Two years ago, at this time, the trail leading from Skagway to the summit of the White Pass was thronged with hundreds of venturesome spirits intent on reaching Dawson at the very earliest possible moment. Hundreds of tons of supplies were sledded and packed over the trail at an immense cost, it being no uncommon thing to pay as high as 25 cents per pound for delivery of goods at Lake Bennett, which but marked the starting point for the real trip into Dawson,

With the completion and successful operation of the White Pass & Yukon railway from Skagway to Bennett, the rate at which freight could be brought to Dawson from the outside was immediately lowered. At the present time work is being pushed as rapidly as pos sible on the extension of the line to Whitehorse, and its operation to that point is promised at an early date after the opening of navigation in the coming spring. When this is accomplished it will be possible to bring treight to Dawson from Skagway with but a single-handling after leaving the last named point. As a natural consequence another material reduction will bemade in through freight rates.

The Nugget is of the opinion that the development of the Yukon country will hinge to a very great extent upon this question of freight tariffs. It is altogether probable that as yet the Yukon has not paid its way. By that we mean that in the aggregate the expense bill to the territory has been greater than the total gold output. This fact is no indication of any lack either in quantity or "local" writer to lead the public into force upon our attention the fact that expense of production must be lowered. Prices of all commodities, machinery, etc., are governed almost exclusively by the existing freight rates. Competition may be relied upon to keep prices at an equitable figure in so far as the Dawson merchants' profits are concerned, but one thing is absolutely cerfain, the merchant cannot go below the cost of landing his goods in Dawson, and remain in ousiness.

When treight rates are cut 10 per cent it means an almost proportionate de crease in the cost of living in Dawson, and a simile decrease in the cost of developmen of our single resource. With every increase in the mileage of railway which is gradually penetrating into the heart of the Yukon country, the outlook for the country becomes brighter.

SMELTING WORKS.

Nugget by a practical man of affairs that Dawson may at no distant period ot time become the center of large smelting and reducing plants. He bases his theory upon the belief that there have been quartz discoveries made of sufficient value to warrant their ng worked on a large scale just as s th as a reduction in freight rates es it possible to land machinery supplies on the Yukon at a reason-

om a perusal of the article on the the

of the matter is concerned—and it will be granted that it is a most important feature—the question is practically set tled. Coal has been located in sufficient quantities, as has been amply demonwork already done, to furnish fuel in Dawson tor all possible purposes for years and years to come.

It will not he long before active work will be begun in the development of the copper ledges at Whitehorse. At the present time treight charg s are so high that to ship the raw ore to the outside at a profit is an impossibility.

It will be equally difficult to land coal at Whitehorse for reduction purposes. The key to the situation lies in the coal resources near Dawson. Ore can be floated down the Yukon from Whitehorse much more cheaply than coal can be taken against the current the same

The Nugget is of the opinion that an investigation into this matter would be wise move on the part of the Board of Trade. If Dawson has what we believe she has to offer capitalists as an inducement for the establishment of enter prises such as suggested, it would be well to have the facts brought out and clearly laid before the public.

The following is taken verbatum from the local columns of the last issue of the ex-organ, the Yukon Sun: "Rev. Father Gendreau went up to Dominion creek for the purpose of officiating ac the dedication of the Catholic church built by Father Corbeil on Sunday." After a perusal of the above rhetorical gem it occurs to the casual reader to pause and wonder for a moment as to exactly what idea the writer desired to convey. There is apparently an intention upon the part of the Sun's value of resources. It merely serves to the impression that the Rev. Father Corbeil has been guilty of violating the Sunday ordinance, which expressly stipulates that all work, such as the construction of buildings, and we do not think that churches are excepted, must close on the day set aside for public worship. Yet between the lines there is a very clear endeavor on the part of the Sun rhetorician to "square" himself with the reverend gentleman, for he credits the latter with having completed the construction of the church, alone and single handed, in the course of one day. The Nugget has not as yet secured possession of all the facts in the case but we are strongly impressed with the belief that a certain element of exaggeration enters into the story as related by the Sun. We agree with the "better the day, better the deed" theory, but we were not aware before that a man could accomplish more work on the Lord's day than on The suggestion has been made to the any other. Father Corbeil's priestly once may have something to do with his capacity for Sunday church construction, but still we feel inclined to the opinion that the Sun man in some manner or other has the facts twisted.

The Nugget's attention has been directed again to the matter of abandoned shafts on the creeks. Mention was made of this some time ago in these columns. Through the carelessness of individuals, a great many shafts, often of considerable depth, themunt and character of the fuel supply have been left exposed, furnishing pitof Dawson which appeared in a falls for the unwary traveler which it issue of the Nugget it is clear already have resulted in a number of the man who was never before drunk. by this evening

that in so far as that particular feature accidents. At this season, of the year when the openings to those shatts are very likely to be almost if not entirely concealed by reason of snow, they become particularly dangerous. We again parties abandoning claims will be com pelled to protect the public against danger from open shafts.

> solve the question of getting currency into general circulation without working a hardship upon the man who is a producer or holder of gold dust, he will made in yesterday's paper as being up be entitled to the lasting gratitude of a thankful community. It is a natural duty devolving upon the government office at which the miner may effect an equitable exchange of his dust for currency. Experience has proven, how ever, that the things which should be done are the ones that are left undone, and vice versa. The solution of the gold dust problem therefore will probably come through other than governmental agency.

Now that we have had a taste of what it means to be in touch with affairs on the outside the shutting off of communication by wire, seems to work a veritable hardship. The wire has been down for a matter of more than ten days and meantime in so far as recent affairs on the outside are concerned we might as well be in the same condition as last winter. Today the wire is down between Dawson and the first station up the river, so we are more isolated than ever. We shall be very much disappointed if war news of the most stirring kind does not come singing over the wire when the line is again in working order.

A quiet investigation among business | B. C. men in Dawson reveals the fact that "A decision was rendered today by while little or no talk of "good busi- Justice Iiving in the gambling test ness" is being made, the state of trade in general is every bit as flourishing as was the case at this time last year. It is quite safe to assume that there will be from this time forward a steady inrease in the volume of business tranacted. Within/less than 60 days we opine that Dawson will feel as jubilant as Uncle Sam does after a Republican

An anxious public has been waiting with a very commendable degree of patience for some decisive movement on the part of one or the other of the belligerents in the News Sun telegram episode. If no developments occur within a short time, a suspicion will begin to take root in the minds of people that the whole affair has a very

Police Court.

More soothing than are the effects of long trip down Front street this morn ing, with mercury nestling under 50.

The honor (?) of dedicating Magistrate Perry's bran new record book fell rapidly growing dumps. to James McCann, who, according to his own statement, kept sober 50 years and got drunk yesterday. The deviation from the paths of sobriety so effected the formerly staid James that he became boisterous in the Pavilion and greatly disturbed the gambling tables, and, while, to the unsophisticated, it may appear somewhat incompatible, yet the gamblers invoked the strong arm of the law to protect themselves

In court this morning James had no ecollection of his actions of yesterday further than that he arrived from the Forks during the day. Had he pe sessed that fertility of brain so often exercised on similar occasions he would urge upon, the Yukon council the have added that he was nearly frozen strated by the preliminary development necessity of an ordinance whereby on teaching town, and just took a never having taken any before it had proven too much for him; but he didn't. A fine of \$10 and costs or 14 days at hard labor was imposed. The If some one will come forward and cash was paid and James will probably permit another half century to come and go, before he again permits himself to look upon the flowing bowl.

Foster Power, of whom mention was on the charge of critelly heating a dog, was fined and paid \$10 and costs.

A. F. George brought suit against the Allen Brothers for the sum of \$161 alleged to be due as a balance for services rendered. Mr. George claime l that he had been employed at a salary of \$300 per mouth. It was shown in the evidence that the rate of compensation at which Mr George had been employed was \$260 per mouth; it was also shown that Mr. George had performed certain services in Seattle last summer, for which he had been allowed the sum of \$100; it was also shown that the further sum of \$175 had been advanced to Mr. George in Seattle prior to his departure for Dawson, leaving, according to defendants' statement a balance of \$71 in their favor. The court held that he had no jurisdiction over the Seattle transaction, and after figuring the time which the plaintiff had worked in Dawson at the rate of \$260 per month as claimed by defendants, found a balance for Mr. George of

Concerning Black-Jack.

It will be amusing as well as of interest to the many devotees, of Dawson, to that game in which "hit me," "come again" and ""nough here," are current expressions, to know that the question of its being a "gambling game' has ever been raised, but such is the case, as will be seen by the following late telegram from Vancouver,

mination as to whether or not blackjack is a gambling game. It was con tended that it was a game of skill, not of chance, and that, as in the test case, no "kitty" was operated, and the bank was not kept by the house, but moved with the deal, and could not be considered a banking game. The court, however, ruled that black jack is gambling, and, as a banking game, is illegal.''

Possibly the Vancouver judge would hold that even fare and stud poker are gambling.

Sulphur the Banner Creek.

George Noble came down yesterday from a several days' visit to the creeks, the greater of the time being spent at his own claim, 12 on Hunker, where he says most satisfatory progress is being made. Mr. Nobie operates a thawer on his claim, and now he can not see how strong taint of advertising fake attached any progress was made in former years by the old process of thawing by means of fires in the shaft.

Mr. Noble says that Sulphur will turn out more gold at the cleanup than the balm of Gilead was the effect of the any of the other creeks and a large police court's red hot stove after the amount more than was Eldorado's output last year. There are over 100 steam thawers now being operated on Sulphur and very rich dirt is being added toothe

> Mr. Noble is well satisfied with the quality of dirt being hoisted from the shaft of his claim, and when the cleanup is over in the gentle spring time he will be several thousand dollars better off than at present.

From Saturday's Daily. THE WAR.

There is very little comfort in the news which is brought from the seat of war after a suspension of communication covering 10 days. - The situation apparently is but little altered.

Briefly summed up it appears that England now has in the field an army approximating 120,000 men to accomplish a task which before it was undertaken was estimated would require but in and it was seen that the war new 35,000 at the outside. She has been more than three months engaged in the issuing an "extra" edition. It was task and as yet has not penetrated, into the enemy's country, although, according to the sanguine predictions of the 45 minutes later the type for the ministers for the colonies and of war, Christmas day would be celebrated by the British generals in Pretoria.

Three important British garrison stations are still being beseiged by the Boers and aside from the repulse at Ladysmith, where, as noted in yesterday's dispatches, 3000 Boers were killed. as against 800 British, no engagements of importance have taken place."

It must, however, be borne in mind that the very strictest "censorship is of eager buyers of the "extra." While maintained over all press matter and that but little news escapes the vigilance of the censor. For which reason it is difficult to arrive at any definite idea as to the exact situation. It is apparent, however, that the knot is a much harder one than was anticipated by Chamberlain, when he so confidently told the people of England how easy it would be to untie it.

MISSING PEOPLE.

The list of people who have never been heard from since coming into the Yukon country continues to grow.

Every few days a list of names of men who have thus disappeared is published in the newspapers, and information sought from any one who may know anything as to their whereabouts. These requests for news from missing friends form a sad and striking sequel to the great rush to the Klondike which succeeded the announcement. of the discovery of gold. Hundreds of men who left comfortable and happy homes in the states, hoping to gain for themselves and their families a competence from the riches known to be sto ed in the bosom of the earth in this country, have never been heard from at all. Whether they are alive or dead their friends on the outside do not know. Many of them having failed to meet the expectations unable to return with the coveted amount of wealth have disappeared from the knowledge of their friends merely because they have purposely avoided communicating with them.

There is every reason for believing that a great many have met death as a result of dangers and hardships encountered in their search for gold, but

many others might relieve a world of sorrow and anxiety by merely writing to their friends and assuring them of their safety. No true man will shirk this dut, no matter how unpleasant his situation may be or what misfortunes may have befallen him.

THE FIRST.

The Daily Nugget was the first newspaper in Dawson to furnish the reading public with outside news after telegraphic communication had been reestablished yesterday between Dawson and the coast. The fact that the wire had been down for a period of 10 days had whetted the appetite of newspaper readers for information from the seat of war. Owing to the amount of commercial matter which had been filed at Skagway, no press reports had been received at half past three, the hour at which the forms for the Daily Nugget are closed.

The regular issue was therefore printed and sent out as usual. Shortly after, the press telegrams began coming was of sufficient importance to justify exactly 5:35 p. m. when the last wire was received in the Nugget office and "extra" had all been set, the proof sheets read, the forms made up and placed on the press. Five minutes afterwards the Nugget's street salesmen were calling the "extra" edition of the Nugget in the streets 30 minutes in advance of the appearance of either of our esteemed contemporaries. Those 30 minutes were all that the Nugget's hustling salesmen required, and they reaped a golden harvest from hundreds our contemporaries quarrel over their respective telegraphic services, and call each other hard names, the Daily Nugget gets the news and prints it first.

People who will strain at a gnat will be found in every community. That they are not wanting in Dawson was shown / conclusively when so much opposition was stirred up over the proposal to give a series of Sunday night concerts. Ministers of the gospel who stand idly by while all sorts of vices run in full swing on Sunday nights and then throw up their hands in holy norror at the suggestion of an evening spent in listening to classic music, cannot be charged with the possession of too much consistency.

The "beef" ed tor of the News knows about as much concerning that questionas the News "grub" editor knew about the question of chickens, turkeys and ggs. Stolen telegrams are more in your line, Brother News. When you handle proposition concerning which the public are informed, you almost invariably get beyond you depth.

Now comes a rumor that Japan and Russia are going to war. It will come about shortly that the only place on earth where the gentle dove of peace really reigns supreme in in the heart of which they had in mind and being the Yukon country. We couldn't do much in the way of fighting here, right now, even if we wanted to. A bullet would freeze up this weather before it lett the gun barrel.

A complete line of tollet requisites. Cribbs

When in town, stop at the Regina.

When it comes to things of a touching character, the sight of George Hillyer, as Michael Strogof, leaning over a prostrate figure on the floor and saying Mother! She is lost to me forever: would bring tears to the eye of a potato. What makes the scene really more pathetic than it would otherwise be is that Mike, who does the turn in his shirt sleeves, always has a Vanity Fair package of cigarettes protruding from the flask pocket of his pants.

The old timer whom the Stroller men tioned a few days ago as having lost his prestige by recent acts of the old war horses I ever knew were there weather endeavored to reinstatte himself dealing to the same old gang. The by asserting with confidence that the nearest table to me had Billy McRae backbone of winter was broken as soon dealing with Jim Donaldson in the as last Tuesday night's wind died lookout chair, and they gave me a down, and that at no time until next hand that made me feel jollied considerwinter would mercury go lower than able. 25. In less than 48 hours it dropded to 50, where it has since remained. In and commenced to play, winning every desperation over his second fall, the old bet; even 'the splits and things were timer attenuted suicide. He was pre- easy. I turned the box over the first vented from doing away with himself deal and Mac chased down the line for by friends who are now taking turns at more money, coming back smiling and watching him and feeding him on insisting on opening wine. I won malamute stew at his cabin. He swears everything in sight until I had that if he ever gets out of this country money than I could carry away. he will go to Cuba and offer himself as and Donaldson were tickled to death a victim to y llow fever or some other and offered to make another deal, tropical disease.

"Did I get any mail? No; and I didn't expect any," said a man in the hearing of the Stroller in front of the I insisted on paying. postoffice the other day in answer to a question put by an acquaintance. Continuing he said: "I go to the postoffice through force of habit and I'll tell you how I contracted the habit: Three years ago I loved a girl back in Arkansas and she apparently loved me. We had it all fixed up to be married, when, damn me, if she didn't go plumb back on me for a spindleshanked barber that hit the village. As the boys guyed me nigh to death about sweet scented and I did. Befor I left I made an old friend promise to write me just one letter and write it when Jennie, that was her name, married the barber. For two years I went to the postoffice regu larly and at last that letter came. Jennie had married the barber. That letter is up to my cabin quitted in the lining of the best vest I own. But some way I can't stop coming to the postoffice every time I hear of the arrival of a mail although I know very well there will be nothing for me. But then I think that if anything would happen back there, my triend would write one more letter. I have not been in a harber shop for three years; I let my beard grow and cut my own hair; I never pass a striped pole or sign on the st eet without wanting to kick some body. To be plain about it, I am what might be termed a tonsorial wreck; but if thought that spindleshanked puppy wasn't good to Jennie I'd start out over the ice tomorrow and go back to Arkansas and kill him, d-n him, if I was lynched for it during the next 15 minutes."

"Hello! Maxie," said the Stroller, espying that disciple of Epicurus at the Bank Cafe with a lay out of the good things of life spread temptingly before

"Howdy, slave," said Maxie; "the world looks good to me today. I dreamed last night I was dead and say, that is not all, I thought I went to hell. Ugh! Yes, sir, to hell. It was a fright, and my nerves are shot to pieces. .

"It came on me easy, and if the real thing is like the run I got, I don't want any more of it in mine, and by the way, Mr. Stroller, you had better look a little out in what direction you

"Birds were singing gloriously, the air was laden with the most delightful

perfume, there were umbrageous trees and vestas of green sward that would delight the eyes and make a native son prance with joy. I walked along a shaded avenue of royal palms, stopping occasionally to drink from fountains flowing with ambrosial nectar. After a short walk I came suddenly upon an immense structure with flags of all nations flying from innumerable min. arets. As I entered the massive build ing the strains from an immense orches tra greeted my ear and who should] espy but Pring giving out tickets, each one being a \$20 gold piece stamped 'admit one." He gave me a stack of them as he shook hands, telling me I'd like the place.'

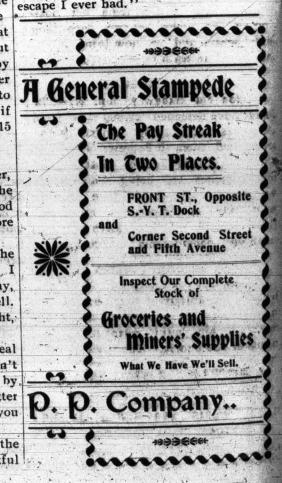

"When I got inside there was a row of faro tables a mile long and all the

"I called for the cases and got them, doubling the limit, but I got a hunch and quit as happy as a bird. So I started in feasting, everybody offering to settle the bill and looking sad when

"I was having a great time when along comes a tall, ha dsome looking chap covered with diamonds, who lined everybody up. To every man that was broke he gave a white check. I noticed he gave one to McRae and Donaldson. To me he gave a red check and the minute I put it in my pocket everything looked different; no more music, a terrible thirst took possession of me, hunger was knawing at my vitals, the memory of every mean act of my life lather and bay rum and Florida water came rushing through my brain and no and mustache wax, and other barber matter how I tried I could not remember shop furniture, I decided to skin out one kind act to offset the others. I tried to throw the cursed red check away, but when I touched it ten thousand shrieking devils sprang at my throat. I rushed up to the tall fellow in black, demanding the meaning of the check and why I got it.

> "He explained that in this country it is everyone's desire to give away their money, the man having the least being the most happy, those having the the most miserable, and that I should try and dispose of my money to some fortunate fellow who was broke;

"All this time I was suffering mental tortures, so I rushed out in the air. noticed a fellow with a sort of hard luck story written on his face, so I pulls out my poke and was just about to offer him the whole business when I woke up. That was the most narrow escape I ever had."

(DAWSON'S PIONEER PAPER)

ISSUED DAILY AND SEMI-WEEKLY

(From Friday's Daily)

AN IMPORTANT CONSIDERATION

Two years ago, at this time, the trail

leading from Skagway to the summit of

the White Pass was thronged with

hundreds of venturesome spirits intent

on reaching Dawson at the very earli-

est possible moment. Hundreds of tons

of supplies were sledded and packed

over the trail at an immense cost, it

being no uncommon thing to pay as

high as 25 cents per pound for delivery

of goods at Lake Bennett, which but

marked the starting point for the real

With the completion and successful

operation of the White Pass & Yukon

railway from Skagway to Bennett, the

rate at which freight could be brought

to Dawson from the outside was im-

mediately lowered. At the present time

work is being pushed as rapidly as pos

sible on the extension of the line to

Whitehorse, and its operation to that

point is promised at an early date after

the opening of navigation in the com-

ing spring. When this is accomplished

it will be possible to bring treight to

Dawson from Skagway with but a

single handling after leaving the last

named point. As a natural consequence

feature—the question is practically set

years and years to come. It will not he long before active work will be begun in the development of the copper ledges at Whitehorse. At the present time treight charg is are so high that to ship the raw ore to the outside at a profit is an impossibility.

It will be equally difficult to land coal at Whitehorse for reduction purposes. The key to the situation lies in the coal resources near Dawson. Ore can be floated down the Yukon from Whitehorse much more cheaply than coal can be taken against the current the same

The Nugget is of the opinion that an investigation into this matter would be a wise move on the part of the Board of Trade. If Dawson has what we believe she has to offer capitalists as an inducement for the establishment of enter prises such as suggested, it would be well to have the facts brought out and clearly laid before the public.

The following is taken verbatim from the local columns of the last issue of the ex-organ, the Yukon Sun: "Rev. Father Gendreau went up to Dominion reek for the purpose of officiating as the dedication of the Catholic church built by Father Corbeil on Sunday,' After a perusal of the above rhetorical gem it occurs to the casual reader to pause and wonder for a moment as to exactly what idea the writer desired to convey. There is apparently an intention upon the part of the Sun's 'local' writer to lead the public into the impression that the Rev. Father Corbeil has been guilty of violating the Sunday ordinance, which expressly stipulates that all work, such as the construction of buildings, and we do not think that churches are excepted, must close on the day set aside for public worship. Yet between the lines prices at an equitable figure in so far as there is a very clear endeavor on the part of the Sun rhetorician to "square" himself with the reverend gentleman, tain, the merchant cannot go below the for he credits the latter with having cost of landing his goods in Dawson, completed the construction of the When treight rates are cut 10 per cent church, alone and single handed, in the it means an almost proportionate de course of one day. The Nugget has not as yet secured possession of all the crease in the cost of living in Dawson, and a similer decrease in the cost of facts in the case but we are strongly impressed with the belief that a certain developmen of our single resource. With every increase in the mileage of element of exaggeration enters into the story as related by the Sun. We agree railway which is gradually penetrating with the "better the day, better the into the heart of the Yukon country, the outlook for the country becomes deed" theory, but 'we were not aware before that a man could accomplish more work on the Lord's day than on any other. Father Corbeil's priestly The suggestion has been made to the o.hce may have something to do with Nugget by a practical man of affairs' his capacity for Sunday church conthat Dawson may at no distant period struction, but still we feel inclined to ot time become the center of large the opinion that the Suu man in some smelting and reducing plants. He

The Nugget's attention has been directed again to the matter of abandoned shafts on the creeks. Mention oon as a reduction in freight rates was made of this some time ago in these columns. Through the carelessness of individuals, a great many shafts, often of considerable depth, From a perusal of the article on the amount and character of the tuel supply have been left exposed, furnishing pitback of Dawson which appeared in a falls for the unwary traveler which recent issue of the Nugget it is clear already have resulted in a number of the man who was never before drunk, by this evening.

manner or other has the facts twisted.

that in so far as that particular feature accidents. At this season of the year of the matter is concerned—and it will when the openings to those shatts are be granted that it is a most important very likely to be almost if not entirely concealed by reason of snow, they betled. Coal has been located in sufficient come particularly dangerous. We again quantities, as has been amply demon- urge upon the Yukon council the strated by the preliminary development necessity of, an ordinance whereby work already done, to furnish fuel in parties abandoning claims will be com Dawson for all possible purposes for pelled to protect the public against danger from open shafts.

> If some one will come forward and solve the question of getting currency into general circulation without working a hardship upon the man who is a producer or holder of gold dust, he will be entitled to the lasting gratitude of a thankful community. It is a natural duty devolving upon the government office at which the miner may effect an equitable exchange of his dust for currency. Experience has proven, how ever, that the things which should be done are the ones that are left undone, and vice versa. The solution of the gold dust problem therefore will probably come through other than governmental agency.

Now that we have had a taste of what it means to be in touch with affairs on the outside the shutting off of communication by wire, seems to work a veri of \$71 in their favor. The court held table hardship. The wire has been down for a matter of more than ten days and meantime in so far as recent affairs on the outside are concerned we might as well be in the same condition as last winter. Today the wire is down between Dawson and the first station up the river, so we are more isolated than ever. We shall be very much disappointed if war news of the most stirring kind does not come singing over the wire when the line is again in working order.

A quiet investigation among business men in Dawson reveals the fact that "A decision was rendered today by while little or no talk of "good busi- Justice Irving in the gambling test ness'' is being made, the state of trade in general is every bit as flourishing as was the case at this time last year. It is quite safe to assume that there will of chance, and that, as in the test case, be from this time forward a steady increase in the volume of business transacted. Within less than 60 days we opine that Dawson will feel as jubilant as Uncle Sam does after a Republican victory.

with a very commendable degree of patience for some decisive movement on the part of one or the other of the belligerents in the News-Sun telegram episode. If no developments occur within a short time, a suspicion will people that the whole affair has a very his claim, and now he can not see how

Police Court.

police court's red hot stove after the long trip down Front street this morn ing, with mercury nestling under 50.

The honor (?) of dedicating Magistrate Perry's bran new record book fell to James McCann, who, according to his own statement, kept sober 50 years and got drunk yesterday. The deviation from the paths of sobriety so effected the formerly staid lames that he became boisterous in the Pavilion and off than at present. greatly disturbed the gambling tables, and, while, to the unsophisticated, it nay appear somewhat incompatible, yet the gamblers invoked the strong arm of the law to protect themselves

In court this morning James had no recollection of his actions of yesterday further than that he arrived from the Forks during the day. Had he possessed that fertility of brain so often exercised on similar occasions he would have added that he was nearly frozen on reaching town, and just took a 'mere dhrap'' to warm himself, and never having taken any before it had proven too much for him; but he didn't. A fine of \$10 and costs or 14 days at hard labor was imposed. The cash was paid and James will probably permit another half century to come and go before he again permits himself to look upon the flowing bowl.

Foster Power, of whom mention was made in yesterday's paper as being up on the charge of cruelly beating a dog, was fined and paid \$10 and costs.

A. F. George brought suit against the Allen Brothers for the sum of \$161 alleged to be due as a balance for services rendered. Mr. George claime l that he had been employed at a salary of \$300 per month. It was shown in the evidence that the rate of compensation at which Mr George had been employed was \$260 per mouth; it was also shown that Mr. George had performed certain services in Seattle last summer, for which he had been allowed the sum of \$100; it was also shown that the further sum of \$175 had been advanced to Mr. George in Seattle prior to his departure for Dawson, leaving, accord ing to defendants' statement a balance that he had no jurisdiction over the Seattle transaction, and after figuring the time which the plaintiff had worked in Dawson at the rate of \$200 per month as claimed by defendants, found a balance for Mr. George of \$47, 10.

Concerning Black-Jack.

It will be amusing as well as of interest to the many devotees, of Dawson, to that game in which "hit me," 'come again's and " 'nough here," are current expressions, to know that the question of its being a "gambling game' has ever been raised, but such is the case, as will be seen by the following late telegram from Vancouver, B. C. :

mination as to whether or not blackjack is a gambling game. It was con tended that it was a game of skill, not no "kitty" was operated, and the bank was not kept by the house, but moved with the deal, and could not be consinered a banking game. The court, however, ruled that black jack is gambling, and, as a banking game, is illegal. ""

Possibly the Vancouver judge would An anxious public has been waiting hold that even faro and stud poker are

U. S. Authorities Decline to Give Title

TO ALL GROUND BELOW HIGH TIDE

An Important Decision Affecting Many Applicants.

The Government Has No Right to Grant Tide Lands to Individuals or Companies-Must Be Held for Benefit of Future States.

(From Thursday's Daily.) Washington Jan. 5. - A very important question has just been decided by Com missioner Hermann, of the general land office covering placer mining upon the beach of the Bering sea, off the coast of Alaska at and near Cape Nome the new gold field. The decision affects mining localities embracing tide lands below the line of ordinary high tide Numer ous applications are pending before the interior department as to locations upon such lands which have been demonstrated to contain gold in marvelous quantities. Individuals or associations companies are seeking concessi ns from the government by which they may acquire exclusive mining rights and privileges pertaining to such tide land.

The commissioner decides that tide lands in the district of Alaska are not public lands, subject to disposal to individuals, under any of the existing department has no statutory authority to make concessions to individuals of any mining rights pertaining to such tile

A citation is made by the commissioner to the case of Shively vs. Boalby decided by the United States supreme court, in which it was held that the United States upon acquiring a terri tory, whether by cession from one of the states, or by treaty with a foreign country or by discovery and settlement takes the title and the dominion of lands below high water mark of tide waters for the benefit of the whole peo ple in trust for future states, to be created out of the territory, by general laws, to dispose of lands below high water mark, of tide waters in a terri tory, but unless in case of some inter national duty or public exigency, has left the administration and disposition of the sovereign rights in such waters and lands to the control of the states respectively when admitted into the Union.

CIVIL WAR.

Victoria, Jan. 3 - News was received by the Aorangi of a bloody civil war that had been raging among the natives of Kiriwina, New Guinea, In the fighting the boss chief was defended and to my knowledge. cleven villages were capturetd and de stroyed with great slaughter.

Rev. S. B. Fellows, a Methodist missionary, who is stationed at Kiriwina, in a letter detailing his experi ence on the strife given islands, said: ot gold in them, why is it not reason-"Last month while I was getting ready able to think that somewhere on the to attente the Dobu synod, I received rich creeks of the country there should news of fighting at the other end of the be ledges of quartz of the same char island. For some years there has been acter as that which is found in the nug teacher, had risen up in arms against same.

search for the teacher, but he fortus my opinion that the gravel on the nately was absent. They killed his benches was made by the same action of pigs and fowls and stole his goods. His the water and by the same stream as house and garden were demolished. In the wash that is in the creek, and that torious natives burned down Namakala's village with the famous yam house in the creeks. I will admit that there is the center of it-the largest native was left to show were Omarakana stood. What wounded natives could be found were at once speared to death.

CUSTOMS SCANDAL.

Havana, Jan. 2.-An immense sens :tions was caused in Havana this after noon by the arrest of ten appraisers of the custom house staff on a charge of being in collusion with many Havana merchants to swindle the government out of large sums. It is asserted that weeks at least, and probably for a longer time, and it is believed that thousands of dollars have been cor ruptly diverted.

The swindle was accomplished by classification of articles under which valuable goods went into cheap crasses. Many merchants are likely to be arrested within the uext few days.

WORK OF THE NAVY. Washington, Jan. 2. -Admiral Wat son today cabled the navy department from Manila as follows:

"Manila, Jan. 2 -The gunboats Concord, Ackley commanding, and Cam panga, Leigh commanding, on the 18th of persons and incorporated mining inst., with two companies of infantry. captured Rombion. John James, sea man, was wounded in the knee, the only casualty in the navy. The Newark's nattalion landed from the Callao, has occupied Camplona, on the north coast of Luzon. Burwell, of the Wheeling,

co-operating with Gen. Young in like service, landed a battalion, which as laws of the United States, and that the doing ex ellent work daily in north and west Luzon."

CANADIAN TIMBER.

Chicago, Jan. 2. - The Ontario gov ernment had a sale of 398,000 square miles of timber limits in the districts of Algoma, Nipssing and Rainy river nere today.

It was attended by all the leading American lumbermen in Michigan, who bought freely, notwithstanding the face that the terms of sale prohibited export of saw logs, the expectation being that the scarcity of lumber and increased demand in the United States would necessitate a larger demand for manufactured stuff from Canada. The prices of limits showed a good advance.

> William Toltz on Quartz. Eldorado Creek, Jav. 18, 1900.

Editor Nugget: I beg leave to differ with some of the quartz theory advocates in so far as that there has never been ledges found in different parts of the country which carry more or less prospects. I will admit that the ledges that produced the gold which is in our rich creeks have not been found

But if the buffy hillsides along the Yukon river and other places where the formation comes to view have ledges which contain gold, and the gulches in the vicinity of such ledges have colors widespread discontent at the rapacious gets, and these ledges containing gold greed of the head chief, Enamakala, in of the same character as that found in plies of the people. It was evident to of the country is hidden from view by me, when I heard the news, that the earth on the surface? It will take time crisis had at last come, the natives of and possibly a great deal of work to the northwest, who are as yet without a find them, but they are here, just the

Enamakala, and after a desperate strug- Ever since I first came to the country gle, in which scores were killed on i, '97, I have been prospecting and either side, they drove him from his watching the working and de elopments village, Omarakana. He fled to the of the country with a view to forming jungle and escaped. As soon as they an idea of where the gold came from; found themselves in possession of Ena- and from what I have seen of the coun-

makala's village, the victors made eager try and the gold that is in at, it is accordance with native custom the vic the gold on the henches came from the By Those Who Suffered Loss by same ledges as did the gold that is in some difference in the appearance of building in the country. Not a stick that on the benches from that in the The New Dominion Building Comcreeks, being that it is on high, dry ground and is cleaner and brighter; but that on the benches assays practically the same as that in the crecks. The gold on Eldorado's benches is very coarse and there is great quantities of Dawson experienced the conflagr tion nuggets the same as in the creek; while on Bonanza, above the Forks, the largst and best buildings on her princigold is fine and that in the benches compares with that in the creek very fire, it was freely predicted that the unacarly the same as Eldorado's benches fortunate property hol ers would refuse do with that creek, and in Bonanza, to erect new structures. The fulfillment the fraud has been practiced for two below the Forks, the two golds are gen- of such predictions seemed probable, erally mixed and have moved down the for conditions and cicrumstances were stream together, which proves beyond different from those which had existed a doubt that it has come down the at the time of other fires. The late streams from above, and has not been disaster occurred in the middle of an carried here by an ocean or a glacier exceedingly cold winter; and new passing across the country from the northwest and moving the gold up Bonanza, as some think. It would be impossible for any such action to move the two golds along together, mixed as for their investments. Then again they are, until it would get to the thousands of people will go to Nome Forks and then separate the fine and richer grade and run it up Bonanza and the coarse up Eldorado and not get any of the pieces in the w.ong stream.

The gold in the creeks is conclusive evidence that it is from no other source than quartz ledges which are tapped somewhere by the stream in which it is found, and is not from bencues of quartz scattered through the general mica formation of the country as others advocate; for as much bedrock as there has been drifted and taken up and as many bunches and stringers of quartz as have been found by this deflung, there has never been a single bunch found in the country jet that had the least sign

of gold in.

The quartz that is in connection with the gold is of a different character from tho e stringers of bull quartz that are found ail over the country Judging from the quartz that is in the nuggets, it appears to have been cracked all to pieces from some cause of nature, mak ing the edge a perfect masi of small pieces of quart, there being cracks and crevices running all through it in every arrection, and the gold seems to have been meited and run in and through the revices and left them yellow mineral; and the largest nuggets lave come from where the largest crevices were, and the largest pieces of turs quartz that have been found is where the gold is inassive enough to enclose the pieces of quartz and keep them from crumbling apart and the seams between those grains in a nugget are gold fined wherever there was space enough between them for the meiten mineral to get in. The quartz in some nuggets is so cracked up and loose in places that one can pick it all out one thousands on the improvements of the grain at a time with the point of a

Nuggets taken from the farthest point up the creek where gold is found is very rough and jagged, having flat sides, square corners and needie points on them and as new and bright as it been any quartz found in the country they had just been broken from the yet that contains gold, for there have rock, which shows plainly that it has not moved far from where it originated. A little further down the stream the pieces be in to show some wear, and free gold and some of them give good the further down one goes the more plainly it shows the effect of travel; and nuggets taken from the lower part of the creek are battered around and the rock in them is worn round where it is solid enough to stick together. But a great many of the pieces through wear and rough trave. have become di o lodged and gone, leaving the impression in the gold where they came out; while on the upper part the rock it is clean broken and shows little or no wear, and under the same management there is more quartz in the nuggets on the upper part toan on the lower.

The reason there has never been any of those ledges found is because there has never been any bedrock drifting Canadian Bank of Commerce, is done in the part of the country where they are and the bedrock is so covered up on the surface that it crops out to view no place, and to sink hotes in this levying heavy tribute on the tood sup- the creeks, even if the bedrock in most country to look for a ledge is almost a eseless undertaking, for a man might sink a hole and starke bedrock within two feet of a ledge and then not know that it was there. But some day some one will accidentally drop on to one of will erect a two story building which them when he is not looking for it, and has been leased for theatrical purpose then is when the Klondike will have W. S. Puillips has almost complete then is when the Klondike will have W. S. Phillips has almost completed its gold excitement. Just imagine what the construction of a small building, the rock would look ike where all of which he will occupy before the end of those nuggets came from, a ledge of the week.

Many Deceiving Blind Sloughs Lead Off From River.

Mail Superintendent J. B. Wingati Tells of the Hardships of Nome Route-Only Native Dogs Fit for the Long Journey.

(From Thursday's Daily) Mr. J B Wingate, superintendent, of United States mails on the lower river, is in the city, having arrived with the mail carrier from Tanana Tuesday even 11.g. Mr. Wingate is in charge of the route clear down to St. Michael, the government contract calling for one mail per month during the winter season from that place to Circle City, and for two mails per month tron Circle this way. Seven men, each witl hardy teams of native dogs, are em ployed in the carrier's service, and being in close touch with his men, Mr Wingate is in position to speak intelligently as to the condition of the trail the whole distance from Dawson to the coast, including both the entire river route to St. Michael as well as by the Nulato or Kaltag cutoff.

In conversation at the Daily Nugget office last Light, Mr. Wingate gave it as his opinion that not one-fourth of the people who started for Nome and it." who will start previous to the opening of navigation will reach their destina tion over the ice. In some places he says the trail is good and in others it is very bad. From Dawson to Circle the trail is very bad, there being muci open water and considerable rough ice; from Circle to Fort Yukon, a distance of 80 miles, the trail is good but ve.ydangerous, the ice being thin and rotten; from Fort Yuken to Fort Hamlin the trail is always had owing to con stant high winds and drifted snow This is practically a snows noe trail an i any attempts to travel it otherwise are fraught with great hardships Fron Fort Hamlin on down the river to Kaltag where the Nome cutoff leaves it the trait is gool and travel over it is easy the river trail from Kaltag on to St. Michaels is also good.

Wingate says that the people who are so anxious to get off on the trip over the ice to Nome have no idea of the magnitude of the undertaking. He says that very few outside dogs ever make the entire trip down the river owing to its great severity. None but huskies and malanates can stand the journey. the cold wind and fine drifting snow not appearing to defeat them as readily as the others. On the Kaltag cutoff, Kaltag being 35 miles below Nulato, Mr. Wingate says is a hard route for dogs, owing to the snow which is very deeply drifted in some places and very scant in others. Where the snow, is deep good time can be made on snow shoes, but where it is scant the surface of the ground is a continuation of nigger heads which render travel to dog

teams very laborious. As to provisions, Mr. Wingate says there is no scarcity at the various posts, and that they are for sale much lower than Dawson prices. Bacon has never been known to be above 40 cents per pound, with other things in proportion. Of the many persons met by Wingate on his long journey up the river from Fort Hamlin he is of the opinion that but fortunate enough to receive one have a ery few of them will ever teach Nome jolly time ahead of them. er the ice; and unless they camp for

Wingate is the bearer of sad news orchestra.

regarding the Chris Betsch party, comosed of Betsch and his wife and two men which left here early in December with two sleds and a dozen dogs. When Wingate reached Fort Yukon on the 2d of January, the Betsch party had passed Have Evidently Wandered through that place a week or ten days before, or on about Christmas day. Yet Wingate neither met nor heard any thing of tiem on the river below Fort Book Kept at Board of Trade Rooms Yukon. The only explanation of the disappearance of the party form the river is that they must have led off into one of the many blind sloughs which branch off from the river and many of the Board of Trade last night those which run tor as much as 40 or 50 miles hefore terminating at "no place," but where there would be no exit except by back tracking. From a point on the river just beyond Fort Yukon one of up. these sloughs leads off to a place called Fish Camp, a distance of 35 miles from the river where there is an Indian village, and as the trail from Fort Yukon an ordinance compelling owners of up this slough is plainer and straighter than the one on the river, which by the way, makes a short turn at that point on the outside, stairways widened and and leads almost south again for a few other changes made that would serve to miles, it would be a very natural mistake on the part of the Betsch party to case of panic from fire or other cause. take the well traveled Indian trail and not discover their mistake for days. Besides this blind slough leading off from Fort Vukon, Wingate says there ire many others and to the person trav cling against a fierce wind which is pelting his tace with snow that cuts like a knife, it is simply a guess with trangers on, the river whether they are following the right trail or not.

Mr. Wingate does not think that any thing serious has happened to the Betsch party further than that they have wandered from the t ail and will probbly be delayed for many days on account of the very natural mistake. But us advice to people contemplating the journey over the ice is "Don't you do

Course of Lectures.

There was quite a large gatherin g las evening at the rooms of the Yukon The sophical Club. The Theosophical orinciples were discussed by Dr. Burry r.d Mr. Theodore Solomons. Afterwards by request Mr. Henry Cowley (BA.), gave a short lecture on the numan body under the title of Pathoogy, or that branch dealing with pain nd disease and their cures. The subisct will be continued at the next meet ng, when Mr. Cowley will announce he date of the first of his contemplated eries of lectures on scientific and other nhjects.

A Peculiar Case.

Joseph Williams, a deaf mute, was picked up on Front street by the police few nights ago just in time to save im from death by freezing. Besides eing very cold Williams was also very irank. When taken to the guard ouse and thawed out, Williams' silence was much wondered at, but his committee at the regular meeting of when sufficiently soper to write he nade signs indicating his desire for pencil and paper which enabled him to xplain his condition. Besides being leaf and dumb, Williams is also conidered a little short on "head batast," and such being the case, he will e held at the guard house until his rother who is out on one of the creeks an arrive to take care of him. When isked in writing his name and age, the unfortunate, man scribbled in answer 'Joseph Williams, 32 old years ago" An effort was made to learn the source from whence he got his whisky, but it was not sccessful.

All Persons Requested to Record Their Names.

Streets Should Be Named, Not

At a regular meeting of the trustees of present were: President Fulda, Messrs. Stauf, Tozier, Yeamans and Secretary Clayton. The minutes of the previous meeting were read and passed

Secretary Clayton reported having communicated with the Yukon council, urging upon that body the necessity of places of amusement to so construct their houses as to cause doors to open give easy exit from such buildings in

The committee on mails and mail service reported having prepared and mailed to the postamster generals at Ot tawa and Washington letters setting forth the needs and requirements of Dawson during the months in which navigation is closed, during which time the exist ing contracts for transporting mail mater to and from Dawson and Skigway are for first-class mail matter only The letters to the heads of the two departments were transmitted through Deputy U. S. Consul Adams and Governor Ogilvie, respectively.

Secretary Clayton reported that the sanitation committee had on last Saturlay looked over the situation regarding the dumping of garbage, but had made no report regarding it.

Leroy Tozier thought it would be well to suggest to the Yukon council that streets be named instead of num h red, so as to avoid confusing streets and avenues as is the case where they ire designated by numbers.

On the joint suggestion of Mess's Tozier and Yemans it was decided to prepare and keep in the Board of Trade ooms a public register for the names of the residents of Dawson and especially for the benefit of those who leave the city for either up or down the river. those leaving the city to register the date of their departure as a matter of record in case accident should befall them on the trip. Secretary Clayton was instructed to provide the register at

The matter of a summer trail around Klondike City bluff on the Klondike river leading to the Bonanza road was discussed; no definite action was taken

Mr. Tozier of the mining committee, promised the long expected report of the full board next Wednes lay night. There being no other business the

meeting adjourned. Mushing to Dawson.

Since the weather has begun to get colder travel has increased wonderfully, travelers by the score are already begin ning to be seen on the trails bound both inward and outward, says the Ben nett Sun of December 16th. The wind and cold weather has at last compelled the dauntless Captain Armstrong, of the little steamer Alpha, to tie his hoat up and give the ice a chance. On Tuesday the Alpha was to take a scow of about 10 tons of freight and 30 pas sengers to Cariboo, and was all ready to start at about 4:30 o'clock in the after birth and the event is to be celebrated noon, but the strong northern wind was in the McDonald hall tonight with a too much for the steamer. The passensocial dance that proimses to do high gers accommodated themselves very honor to the national bard. As the hall comfortably on the scow during the is small there were only a limited num night, and as the wind kept up its ber of invitations issued and all those furious gale, they all "mushed" back to town the following noon.

One of the first to come on the ice The program includes 19 selected this year was Oliver Lawson, who made m will experience great suffering off hetween the hours of 9 p. in and 1 having left Dawson on the 28th of a. me, to the sweet strains of Bray's November. Mr. Lawson is of the opinion that a good bicycle rider can make

the trip when the trail is well beaten in

four or five days.

Business in all lines of trade has received a very marked impetus during the past ten days; especially is this true of the hotel business The lobbies of the principal houses are filled with inbound travelers.

Superior Court.

In the superior court today the case of Pruden vs. the A. E. Co. is on trial before a jury, being the first jury trial in the district since before the holidays vacation. A number of unimportant cases have been disposed of within the past few days.

Police Court.

In Major Perry's court this morning Harrison King, the second hand dealer who was placed in an unfavorable light in the same court yesterday by the testimony of three boys, to the effect that they had repeatedly sold him stolen goods, and who was arrested yesterday on the charge of receiving stolen goods, was released on \$1000 bail until Saturday morning at 10 o'clock. The bond this morning was but a continuation of one given yesterday evening on which King was then released from jail. New parties were before the court this morning laying caim to property stolen from them and found in King's store. He has retained counsel and will endeavor to put himself in a more favorable light. before the court and community than that in which he now stands.

Foster Power was up on the charge of cruelly and unnecessarity beating a dog." He approached the desk with a careless swagger, toying a stick in his right hand, "Lay that stick down, said the court. "Lay that stick down," repeated the court constable. Down went the stick and when the judge, after reading the charge, asked him to plead, Power said: "How hard can a fellow beat a dog without being guilty?" Major Perry courteously informed him that it was not a time for details, but time to either plead guilty or not guilty. Powers chose the latter and his trial began but was continued until this afternoon on account of the non-appearance of E. B. Consion, who had seen the chastizing of the dog. The result of the trial will be anxiously looked for as there is a unanimity of feeling in Dawson that many dog drivers are entirely too ready with whips, clubs and anything else that happens to be in reach.

Some of the creditors holding judgments against J. H. Sutton, the extheatrical manager, were present with the complaint that no money had yet been forthcoming. The court ordered that certain goods of Sutton's which have been seized be advertised and sold and that the money be applied, so far as it will go, to payment on the judg-

The Hotel McDonald Dance.

Elaborate preparations are being made commemorate Bobby Burns' day by those who are managing the function to be held tonight at Hotel McDonald, Various colored electric light globes are being attached to the lectrical apparatus, and heautiful decorations are being arranged. The dance will be held in the large dining room and at midnight a sumptuous repast will be served to invited guests.

The affair promises to be exceedingly

good and entertaining. As soon as the weather moderates, the essees and proprietors of the Hotel McDonald, Messrs. Tom Chisholm and Harry T. Edwards, contemplate the construction of an addition to their hos-

(From Friday's Daily.)

special to the Daily London News from is suspended and a feeling of depression Ladysmith recounts the facts concerning the bloodiest struggle that has occurred at that point since the siege by the Boer forces began. On the night of the 20th inst the entire surrounding forces attacked the city en force, the attack being preceded by a heavy cannonade. The attack was met by the most desperate resistance on the part of the British defending forces, the attacking army being time and again driven back at the point of the bayonet.

The Boers, with reckless courage, threw themselves onto the British bay onets but were unable to force the lines and after continuing the desperate struggle a period of eight hours withdrew from the attack, leaving 3000 men killed. The total list of casualties has not as yet come in but there is an enormous list of wounded and missing.

FIRED INTO EACH OTHER.

London, via Skagway, Jan. 26.-A most sensational report has reached here to the effect that two British regiments of Gen. Buller's command at- 19. The sum of \$100,000 was given by tacked each other in the night time, the city of Philadelphia to secure the each being under the impression that the other was an attacking force of convention to the highest bidder will Boers. A heavy infantry fire was poured from each regiment into the other, followed by a bayonet charge. The report states that a large number of men were killed and a large number wounded before the terrible mistake had been discovered.

TROOPS ARRIVING.

Capetown, via Skagway, Jan. 26. -Reinforcements to the Butish troops ship loads. As rapidly as the various contingents arrive they are sent to the front. Enormous quantities of stores have been sent on and every preparation is now complete for a general advance upon the Boers from all sides. Gen. Roberts is hailed as the one man who can retrieve the disasters that have overtaken British arms thus far in the war,

TEN FEET OF SNOW.

Skagway, Jan. 26. - The heaviest snow storm that ever was known to occur in this town occurred here during the past three days. Today snow stands in the streets of Skagway to a depth of 10 feet. Many buildings which were hastily constructed have been crushed

in and great damage to goods stored in London, via Skagway, Jan. 26.-A them has resulted. Business generally exists in the town.

THINK THEY ARE DROWNED.

Skagway, Jan 26 .- The opinion now prevails here that the Clayson party was not murd-red but was lost by reason of falling through the ice, and precedents for such occurrences even later in the winter than the time at which this party left Dawson are cited No word has been received from Will Clayson since he left for the interior.

WILL NOT REBUILD.

Skagway, Jan. 26.—The loss resulting amount to not less than \$10,000. By prompt action on the part of the fire department the fire was confined to the dead on the field. The British loss hotel and was not allowed to spread mounts to 14 officers and 800 soldiers beyond it. The hotel will not be re built.

REPUBLICAN CONVENTION.

Washington, D. C., via Skagway, Jan. 26.—The national Republican committee has called the national Republican convention to meet in the city of Philadelphia on Tuesday, June conv ntion. The decision to sell the react strongly on President McKinley, according to the opinion of many prominent Republican politicians.

JAPS AGAINST RUSSIA.

Victoria, via Skagway, Jan. 26.-An authentic report has come from Yokas hama to the effect that extensive preparations have been made by the Japanese government for a war with Russia, Japan is increasing the effctiveness now in the field are arriving daily by of her army to the utmost of her ability.

A Fable.

Que time two Highland clans did have a falling out about some trivial matter and when one clan would build strife continue for many years among the Highland clans.

there been a drinking fountain of peace located in that Highland country the two clans would have met there, emptied a few bottles of the fruit of the vine and the angel of peace would have spread her white wings over the clans of the "canny."-Selah.

The Town Is in Control of Officers Elected by Citizens.

the Ruby Sands-Opinion of J. L. Davidson, Civil Engineer.

There has been so much told of Cape Nome and its wonderful richness that anything which is written now is likely to appear redundant. Neverthe tess, there are hundreds of people to whom the story will never grow old, unless perhaps it be nine months hence when they return to Dawson disap pointed and disheartened. Notwithstanding, however, the ill-fortune of; many who will stampede to the new fields, the fact will be, as it is now, that Nome is extravagantly rich in gold, and offers the greatest opportun/ it es ever known to the poor prospector. Accustomed as the residents of the

Yukon are to the rapid development of new countries, yet few who have not visited the Alaskan camp realize the wonderful growth which that new district has had.

Nome is a town two miles long and one mile wide. The city was surveyed and platted into lots last summer, and & charter was drafted and adopted. There are enough buildings in the new city to from the fire in the Hotel Brannick will shelter 4000 people, and 24 of these

structures are two stories or more. In fact, Nome is a much better looking town in every respect than was Dawson in the spring of 1897. Speculators who depth of eighteen inches to three feet. go to Nome next May or June with a big tent and a few barrels of whisky sands in this manner: Long ago, when expecting to make a fortune in the saloon business, will be as badly disappointed as they would be were they to bring their outfit into Dawson, for there are as many well arranged liquor housein the new town as there are anywhere in Alaska or the Yukon territory. Stores of every description are estab lished and are doing a brisk and remunerative trade. Provisions are about as scarce and prices about as high as they were in Dawson last winter. Before the majority of the stameders reach the beach next summer an electric light system, a telephone system and an electric railway system will be in operation. Franchises-not exclusive ones-were granted for these enterprises last fall by the municipal council The railway has surface privileges over a right of way extending to the creek mines and along the beach. A company has been tormed to pipe water into the town from la ge springs in the nills. Work on a sewerage system will be inaugurated before the warm weather commences. Two newspapers are published, and each enjoy a profitable circulation.

There is a complete set of municipal officers, including a police magistrate and police force who regulate the city affairs. A United States commissioner a church the other class would build a interprets the federal statutues, and has church and hold services on the same nis decrees executed by a U. S. deputy day and hour as did their unfriendly marshal who, in cases of emergency, neighbors, and thus did discension and may call to his assistance the company of troops stationed in the vicinity of the town. The only difficulty ever ex-Moral-This fable teaches that had perienced was that relating to the val idity of powers of attorney, and at the May session of the U. S. supreme court at Washington, D. C., this vexing question will be finally determined in a test case, which has been tried in the lower courts, and which is now on the preemptory calender of the highest tribu

As every one knows the principal occurred.

creeks are Snow, Invil, Snake, Glacier Dexter and Buster. The output of Snow creek for three months last year in estimated to have been \$400,000. Nug. gets worth as much as \$150 each have been found on this stream. Anvil wie the banner creek of the district last season. Bedrock is reached at a depth of only four feet. One of the best claims which was worked during the past summer, yierded \$115,000. The owners of No. 8 realized \$200,000 from their cleanup. Charles D. Lane pur chased three claims on this tributary, and paid for them the sum of \$165,000. Nuggets are frequently found on Anvil. and one was uncovered which is worth

The beach diggings were discovered by J. W. Logan, a newspaper me from San Francisco. He and the acquaintances realized about \$7000 in a tew weeks and left the country. No one knows the extent of the beach diggings, The beach proper is from 100 to 300 feet in width and has been worked in diffe ent places for 20 miles of its length As a conservative estimate, it is safe say that 2500 people were engaged rocking and panning gold from t sand last summer between the mouths of Snake river and Cripple creek.

Next season it is expected that r lirt will be found in what is known as the "tundra," which extends from the erminus of the beach to the mountains.

Speaking of this portion of the Nome country, Mr. J. L. Davidson, a well informed civil engineer said :

"The 'tundra,' which in some places is three and one-half to four miles wide, is continually frozen. It is covered with a thick moss which prevents it from thawing out in summer, This tundra contains gold; indeed, it is the supply of the beach gold, according to my theory. I removed some of the noss on the turdra and the dirt on top issayed \$7 to the ton. I assayed sand taken from off the top of the beach in pandfulls, for a distance of six miles, and it averaged \$9 33.

"This is just from the top, rememher. The 'pay streak' extends from "I account for the gold in the heach mighty glacier was slowly movi lown, it formed the tundra as a lateral moraine. This tundra contained gold in abundance and the erosive action of the waves on the tundra washed out the gold, along with other materials, and it ook its place along the margin of the ocean on the beach."

The freight capacity and passend accommodations of boats running to Nome will be taxed to the utmost when navigation opens. Before the middle of summer the transportation companies will have solved the difficulty experienced last year in landing cargoes. I is proposed to unload on large lighters or barges, which can be taken sufficiently far toward the shore in high tide as to enable wagons 'to reach them at low tide.

Thousands will risk the chance tor fortune in Nome next spring some will die after they reach there, many will succeed, and the rest will fail.

Pause to Consider.

The description of the trail Nomewards, as given by J. B. Wingate and published in the Daily Nugget of yes terday, is causing many people serious study as to whether they will attempt the trip over the ice or await the opening of navigation. It has also had the effect of causing those who are determined to undertake the journey at all hazards to more carefully condsider the matter of outfitting properly in the way of the warmest clothing that can be had. Several orders for blankets and robes previously given were duplicated

Weather Report.

Last night the thermometer at the government barracks registered 53.6 degrees below zero.

At 9 o'clock this norning the needle pointed to 51 degrees below, since which time no material variation has

Which Disabled Him.

Condition-May Lose His Arm.

From Saturday's Daily.

A particularly sad accident occurred at the lower fire hall during the recent fire. Mat A. Probst, one of the stokers, careful and workmanlike manner, to blame, suffered a severe fracture of his right arm, about two inches above the elbow. The unfortunate man was taken imme diately to the Good Samaritan hospital, where his shattered limb was set.

Mr. Probst came to the territory a year ago last summer, and during the tour months immediately prior to the accident he had been employed in the fire department. His wages for the first two months were \$150 per month and for the rest of the time he drew \$200 per month. He is 53 years of age, and has a wife and family at Daptgate, North Dakota, who rely entirely upon

him for support. Since the 10th of January, Probst has been an inmate of the hospital. The treatment and care is \$5 per day. At present, the condition of Probst is piti able; he is absolutely destitute of money, and his arm is gradually growing worse. The chances are exceedingly probable that amputation will be necessary in order to avoid blood poisoning. The unfortunate man is not only suffering the keenest physical pain, but the mental anguish occasioned by the thought of his wife and family render

him delirious at times. Immediately upon the occurrence of the accident, the salary of Probst was stopped. Besides the loss of wages, he is compelled to pay hospital bills for the treatment of an injury which he received in the execution of his duty and which cannot be attributed in any way to his negligence.

Since the fire, the commissioners have met in session, but this matter was not discussed.

Realizing the circumstances of the accident, and the condition of Probst, the chief of the department, Mr Stewart, has actively interested himself in the matter. He has started a subscription for the relief of the unfortunate man, and has subscribed the sum day, the commissioner presiding. of \$25. The paper will be passed among the boys of the department, and then circulated among the business

Some prominent men are confident that the commissioners will reinstate to the legal adviser. Probst on the pay roll and allow him full salary for January. Such action would insure him sufficient money to pay his hospital bill. It is contended by others that the board should defray commissioners; ordered to be paid. his medical expenses and continue his salary until he recovers sufficiently to report for duty.

A Narrow Escape.

Frank Ott, night point man for Gates & Wilcoxon on claim 18 below on Hunker, had a narrow escape from death Tuesday morning. Ott had been in the shatt looking after the points all night and at 5 c'clok in the morning gave the usual signal to the engineer above to hoist him to the surface. Ott came up in the big bucket, and on coming to the surface endeavored to reach out and grasp the curbing of the shaft to aid him in stepping out of the bucket. As ence from the customs department, askthe boom was swinging the bucket ing for the refund of two fines imposed backwards and forwards, Ott made sev- for violation of the customs act amount eral attempts to grasp the curbing ing to \$50 each. without success, in the meantime standing up in the bucket and holding in one hand a lighted lantern. From his peep hole in the engine room the engineer saw the swinging of the lantern, which, being the usual signal McLennan, Matheson and Green inthat a landing from the bucket had quiring if the council would entertain a been made, he released the brake and proposition for a water supply to Daw turned to his engine. A moment later son.

he noticed the drum revolving radially and at once applied the brake. It was too late; the bucket containing Ott had shot down the 60 foot shaft to the bot-tom. A second man was speedily Immediately After the Accident lowered into the shaft where Ott was found apparently dead. He was again hoisted to the surface and, after two hours, regained consciousness. Thurs-Probst, Injured During the day evening he was brought to this city and is being cared for at his cabin by but suffers greatly from some supposed internal injury. It will be a long time before he is fully recovered. No blame is attached to the engineer in charge at the time. It was an unfortunate acciwhile attending to his business in a dent for which no one was practically

> Questions and Answers. The Nugget is in receipt of the fol

lowing letter of inquiry:

Dominion Creek, Jan. 24, 1900. Editor of Daily Klondike Nugget, Dawson, Y. T.:

Dear sir—To satisfy a chronic, arbitrary gang of kickers, please let us know (a) if there is at present, or if there ever was a U. S. mint in Denver,

(b) How many mints are there in the United States at present?
(c) Please decided the following bet made between two of the boys. A bets B one ounce of gold dust that the U. S,

government prints a \$50 postage stamp.
B bets that a ten-cent stamp is the largest issued. Yours truly,
PATRONS OF THE NUGGET.

Answers.-(a) On February 20th, 1895, an act passed congress establishing a mint for the coinage of gold and silver at Denver. Since the summer of 1895 or that of 1896, a mint has been established at Denver, and it is still

(b) Five mints in the United States, which are located in the following cities: Philadelphia, New Orleans, San Francisco, Carson, and Denver.

(c) A wins. The United States government issues \$50 postage stamps, and for that matter \$100 postage stamps.

CHISHOLM'S SALOON

TOM CHISHOLM . . .

Suffered By Henry Abraham and Fritz Black.

Three Days - Black's Feet Severely Frozen.

From Saturday's Daily.

the city of the terrible hardships suffered by Henry Abraham and Fritz dicate, which, by taking the entire Black at White river.

Mr. Abraham is a member of the firm office in Dawson and who own and ever, the greatest interest centered operate a saw mill at the mouth of around the diamon! market in Kimber-White river. On Sunday, January 14th-a out two weeks ago-Mr. Ahra ham left Dawson with six men. The party traveled up the river with a team and sled, which was loaded with 2600 pounds of tools and provisions. Their destination was the saw mill at White river, and the men, among whom was Fritz Black, were hired to do logging work. With the exception of one of the horses falling through the ice and being rescued, there were no difficulties encountered on the trip from Dawson, which was accomplished in four days.

On the following Saturday-a week ago today-Abraham and Black left the saw mill camp with the team and sled. They intended to go about two miles up White river in order to secure some hay for the horses. No provisions nor blankets were taken, for the men expected to return in time for dinner. Soon after they had departed a terrible blizzard arose. At noon neither Abraham nor Black had returned to camp, and the five who were there became auxious for the safety of their com panions. Nothing was done, however, during the afternoon. About 6 o'clock in the evening Black returned to camp. He had suffered severely from the frost and both feet were so badly trozen that it is doubtful if he will be able to avoid amoutation. When able to recount his misfortunes, Black told how his companion and himself had been caught in the storm and had lost their reckoning; that he had left Abraham and the team in order to look for the trail, and after searching a little while he was unable to find his way back to either Abraham or the outfit; that he had wandered aimlessly around, and by mere chance had succeeded in returning to the camp. One man was left in charge of Blick, and the remaining four went out to rescue their employer. They searched in vain, and becoming exhausted the party returned to camp at 4 o'clock Sunday morning. Three hours later two of the men started again. They continued the search all day, but could discover no trace of the lost man, In the evening, the other two men resumed the work of attempted rescue, but to no avail. Monday morning they returned to camp weary and disappointed. The two who had' searched the previous day left camp determined to continue the search, but their efforts were unavailing. When they returned with their story of unsuccess little nope for the rescue of Abraham was entertained.

In the meantime the storm had raged with unabated fury; but Mouday even ing the wind subsided to some extent and the sky cleared.

While the party in camp were eating supper the door of the cabin opened and Abraham staggered into the room. Strange to say, he was not seriously frozen, though for three days and two dike. He is overdue in Dawson about nights he had been driving aimlessly 10 days, and his triends are expressing around, and had not once experienced the fear that he has met with some the comfort of a shelter, or fire, or of accident. The cold weather which has anything to eat. He had survived the severest blizzard of the season. His their anxiety. team hardly showed the effects of the deprivations which it had experienced,

Yesterday Abraham telegraphed to his partner in Dawson, Herry Behrens, for a dog team and basket sled, in which it is proposed to convey Black from the loss by fire if generally used. The A.E. to is offering to the public at a price very little in excess of the ordinary in

White river to one of the local hospitals here. This morning the outfit tarted up the river.

Kimberley Diamonds.

The trade which has felt the most direct result of the hostilities in South Africa is the diamond industry, With the Jaegersfontein and the Bloemfontein mines-within the territory of the The Former Lost in a Blizzard for Orange Free State-idle, and Kimberly, the diamond centre of the world, invested by the Boers, the diamond supply is for the present shut off. The glory and importance of the old dia-Last night reports were received in mond market in Kimberly departed with the formation of the diamond synproduct of the mines, removed the first sale of the rough gems from Kimberley of Behrens & Abraham, who have an to London. Prior to that time, howley. There the different mines had their offices, where their product was sold. There, also, the great diamond houses of the world had their offices, and buyers and sellers met in open competition. The offices were just back of the mines. Sometimes they were built upon the walls between two adjoining claims. It these were not strong enough, the offices were erected back of them, boards being laid across open spaces. In the early days the offices frequently consisted of four poles covered with canvas, and the miner's stock of diamonds was at night buried in a hole in the ground. Later, however, buildings of corrugated iron were erected and safes installled for protection.

Arctic Brotherhood.

It was a tired and weary goat that was left at 12:30 o'clock this morning when Camp Dawson No. 4, Arctic Brotherhood adjourned, Four new members, Messrs. Thomas Bruce, A. A. Bass, Theodore Snow and Frank A. Barnes ate icicles at the alter of Boreas and became full-fledged Arctics. After the initiations the camp resolved itself into social session and for an hour or more an interesting experience meeting, interspersed with story and song, was
