Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- ☐ Coloured covers / Couverture de couleur
- ☐ Covers damaged / Couverture endommagée
- ☐ Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- ☐ Cover title missing / Le titre de couverture manque
- ☐ Coloured maps / Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- ☐ Bound with other material / Relié avec d'autres documents
- ☐ Only edition available / Seule édition disponible
- ☐ Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- ☐ Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- ☐ Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☐ Coloured pages / Pages de couleur
- ☐ Pages damaged / Pages endommagées
- ☐ Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- ☒ Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- ☐ Pages detached / Pages détachées
- ☒ Showthrough / Transparence
- ☐ Quality of print varies / Qualité inégale de l'impression
- ☐ Includes supplementary material / Comprend du matériel supplémentaire
- ☐ Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- ☐ Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

**This item is filmed at the reduction ratio checked below /
Ce document est filmé au taux de réduction indiqué ci-dessous.**

A horizontal number line with 15 equal segments. The top of the line is labeled with values: 10x, 14x, 18x, 22x, 26x, and 30x. The bottom of the line is labeled with values: 12x, 16x, 20x, 24x, 28x, and 32x. A checkmark (✓) is placed above the 7th segment from the left, which corresponds to the 22x mark.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "À SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

3 THE FINANCIAL
SITUATION

OF THE

Province of British
Columbia

AS SHOWN IN THE

BUDGET SPEECH

OF 1915

VICTORIA, B. C.

Library of Parliament

4/ *with title* **AN OUTLOOK OF PROMISE**

Despite War Conditions, British Columbia is Still to the Fore

ANALYSIS OF THE FINANCIAL POSITION AND GENERAL CONDITIONS OF THE PROVINCE

(Colonist Verbatim Report of Budget Speech Delivered February 26th, 1915)

The Hon. Price Ellison, Minister of Finance, delivered the Budget Speech in the Legislature last evening. He said:

"Mr. Speaker:—This is the fifth occasion upon which I have had the privilege of presenting the annual financial statement of the Province. I would be pleased if I could address this House in other circumstances than those by which we are surrounded, as the result of a terrible war. The hostilities in Europe and elsewhere have changed the entire financial aspect of the world, and British Columbia has been far from free from their effects. On former occasions I and my predecessors have been able to hold up the bright side of the shield. This year, while it is not a dark side, I cannot talk about expanding revenues or substantial increases in production, which have been the record for the past ten years; but, of course, this is not a condition in which British Columbia is in any way peculiar. It is one common to all the Provinces, to Canada, and to all the Dominions of the Empire. The whole of the world, more or less, has been drawn into financial and industrial depression, and we have only one duty to perform, and that is, as expressed by His Honor, to face the situation with fortitude. I am an old British Columbian, and in my own experience we have passed through a number of depressions, when no war at all affected the situation, quite as serious as this, and each time we came up smiling and prosperous.

"Without further preliminary, I shall proceed to the consideration of the Public Accounts for the fiscal year ending March

31st, 1914; and in that respect there is a very good showing to make. The estimated revenue for that year was \$10,326,085, and the actual revenue was \$10,398,381. The estimated expenditure was \$17,838,266, and the actual expenditure was \$15,762,912. So that you see our estimates were closely lived up to. To some extent the reduction in actual expenditure was due to unexpended appropriations, but to a considerable degree to the exercise of various economies.

"Considering the various items of expenditure, civil service salaries were less by \$83,000, owing to some of the votes not being used. Administration of Justice (salaries) was slightly under the estimate, but the cost of administration of justice itself was increased by nearly \$400,000. This was due to the protracted strikes on the Island of Vancouver and the subsequent rioting, which it was necessary to take in hand by special police and calling out the Militia. Legislation kept below the estimates by \$4,000; the Mental Hospital by \$24,000; Fisheries, \$5,000; Education by over \$34,000; Transport, \$52,000; Revenue Service, over \$25,000; Works and Buildings, \$381,000; Roads, Streets, Bridges, etc., over \$640,000; subsidies nearly \$36,000; miscellaneous over \$600,000. Under the head of miscellaneous we saved \$214,000 in the Lands Branch, \$80,000 in surveys, \$50,000 in railway subsidies, \$11,000 in forest protection, \$11,000 on Royal Commissions, \$11,000 on Provincial Board of Health, \$34,000 on advertising, \$23,000 in agricultural associations, \$16,000 in outside services, \$9,000 in fruit exhibitions, \$2,000 in women's institutes, \$10,000 on immigration, \$15,000 in miscellaneous not detailed. Appropriations not expended were \$400,000 for the Second Narrows Bridge, \$286,572 for Songhees Reserve, and \$500,000 for University Buildings.

ITEMS IN REVENUE

"Taking now the revenue, the items in which there was a decrease from estimates were: Land sales by nearly \$800,000; water fees, about \$38,000; free miners' certificates, \$20,400; mining receipts (general), \$8,000; registration of joint stock companies, \$35,600; personal property tax, over \$13,000; wild land tax, \$90,600; royalty and tax on coal, \$57,400; printing office, \$30,000; interest, \$108,000; log-scaling fees, \$4,625.

"The items in which there was a decrease, such as land sales, free miners' certificates, registration of joint stock companies, wild land tax, and printing office, indicate a lessening in speculative tendencies. A decrease of royalty tax on coal is accounted for by strike conditions.

"The principal items which show a substantial increase in revenue over the estimates are: Timber licenses, \$34,500; timber royalty licenses, \$144,000; timber and logging licenses, \$22,500; game licenses, \$98,000; fines and fees of court, \$15,000; succession duties, \$49,000; tax on Crown granted mineral claims, \$5,000; Chinese restriction tax, \$780,000; boiler inspection fees, \$6,250; fishing and cannery licenses, \$7,000; Fines Act, \$9,000; motor traffic fees, \$48,500; miscellaneous, \$105,400.

"The increases in the main are most satisfactory, and show substantial development. The large unexpected increase in returns from game licenses illustrate what an important asset to the Province our game is when properly conserved. The large returns from timber revenues is due not so much, perhaps, in that particular year, to increase in the lumber industry as to closer collection of revenue through the vigilance of the Forestry Department. The returns from the Fines and Motor Traffic Acts are very gratifying. Succession duties, law stamps, registry fees, probate fees and Chinese restriction tax are sources of revenue which are more or less accidental and vary from year to year. In each case the increase has been substantial.

THE ESTIMATES

"Coming now to the Estimates for the fiscal year 1915-'16: These have been framed, having in view the conditions which exist and which necessitate economies in various directions. We anticipate, as a result of war conditions, a reduction in revenue which amounts, in round numbers, to \$3,000,000. Such a situation means that we must cut our coat according to our cloth.

"Fixed revenues and fixed expenditures remain practically the same as heretofore.

"In regard to revenue, land sales have been reduced from \$1,500,000 in 1914-'15, to \$950,000; land revenue from \$250,000 to \$150,000; timber licenses from \$1,825,000 to \$1,300,000; timber leases from \$80,000 to \$75,000; timber royalties from \$480,000 to \$400,000; timber sales, \$110,000 to \$45,000; water rentals, \$60,000 to \$30,000; water records, \$40,000 to \$20,000; real property tax, \$470,000 to \$400,000; personal property tax, \$230,000 to \$200,000; land taxes, \$850,000 to \$500,000; income tax from \$350,000 to \$300,000; mineral tax, \$150,000 to \$100,000; coal and coke taxes, \$200,000 to \$100,000; game licenses, \$100,000 to \$80,000; marriage licenses, \$30,000 to \$15,000; fishery and cannery licenses, \$31,000 to \$30,000; joint stock company fees, \$100,000 to \$45,000; motor traffic fees, \$90,000 to \$80,000; boiler inspection and examination fees, \$30,000 to

\$23,000; moving picture fees, \$27,000 to \$18,000; free miners' certificates, \$80,000 to \$50,000; mining receipts (general), \$110,000 to \$50,000; fines and fees of court, \$60,000 to \$40,000; succession duties, \$250,000 to \$200,000; registry fees, \$650,000 to \$335,000; printing office, \$60,000 to \$35,000.

"The estimates which remain unchanged are: Taxes on unworked Crown granted mineral claims, \$40,000; trade to \$335,000; printing office, \$60,000 to fees, \$50,000.

"The items under which increases are expected are: Licenses, taxes and fees under the Fire Insurance Act, \$60,000 to \$70,000; law stamps, \$70,000 to \$82,700; interest on deposits, \$50,000 to \$75,000; mental hospital, \$35,000 to \$36,500; traffic tolls, New Westminster Bridge, \$24,000 to \$25,000; miscellaneous receipts, \$50,000 to \$65,000.

"It is unnecessary to go into minute explanation of the reasons for the changes from the Estimates of 1914-'15 to those of 1915-'16, because they suggest in themselves the explanation and are more or less based upon the revenues which have been received by the Treasury since the beginning of the war on August 4 of last year. The most material change is the omission from the Estimates of revenue of the item of Chinese Restriction Act, which hereafter will not figure in our accounts.

NECESSARY EXPENDITURES

"In reference to expenditure, it is not possible, on account of certain fixed charges, to reduce it to an amount which would balance the receipts and at the same time provide for the proper administration of the public service.

"Under the head of Public Debt, owing to new loans, \$541,737 has been increased to \$1,152,376.

"Civil Government salaries have been reduced from \$1,744,375 to \$1,709,146. Under this head, the Government has reduced the staff to what might be termed an efficient working minimum.

"In the Administration of Justice (salaries), \$65,790 has been increased to \$68,100, due to certain necessary increases in the staff.

"Legislation necessarily remains about the same.

"Public Institutions (maintenance) has been increased from \$448,426 to \$467,426, increase due to necessary increases in the staff, etc., and to some extent, to war conditions.

"Hospitals and charities have been reduced from \$587,700 to \$374,100. The reduction here is due to the non-necessity of building more hospitals. The expenditure for the administration

of justice other than salaries is an item which is more or less uncontrollable, but there is a reduction here from \$441,400 to \$378,000.

"In education, the demands of which continue to increase, notwithstanding war conditions, the estimate has been increased from \$1,470,696 to \$1,594,600.

"In the item of transport there is a reduction from \$133,000 to \$83,000, due, to a considerable extent, to considerations of economy and also to the fact that some of the expense is provided for in the appropriations for various departments.

"The most substantial decrease is in the matter of works and buildings, in which the estimate of \$2,319,500 is reduced to \$455,700. The explanation of this is that during the last few years a large amount of money has been expended in providing for necessary buildings, the necessity for which will decrease from now on until the population has been very substantially augmented.

"In roads, streets and bridges we have made no material reduction. When I say no material reduction I mean that the reduction amounts to about \$400,000 from \$2,861,000 last year. The necessity for supplying facilities for communication, owing to railway construction and settlement, still continues. And there is also the consideration that, so far as possible, the Government is desirous of affording as much employment as possible to the people of the Province.

"Subsidies to steamboats, ferries and bridges have been reduced from \$96,075 to \$73,815

"\$400,000 has been included in the vote for public works for the construction of the Second Narrows Bridge. This expenditure is contingent upon a suitable arrangement being entered into for the construction of that important undertaking.

"Miscellaneous expenditure has been reduced from \$2,852,490 to \$2,128,752. The items which largely compose 'miscellaneous' are surveys, which have been reduced from \$570,000 to \$100,000; Songhees Reserve, \$340,000 to \$200,000; Immigration, \$60,000 to \$25,000; Water Rights Branch, \$192,000 to \$83,500; temporary assistance, \$42,000 to \$25,000; agriculture, \$300,000 to \$229,000.

"Two hundred and fifty thousand dollars is being appropriated on account of the Dominion Trust Company, to be immediately available on account of the bonds furnished by that Company. Supplementaries have been placed at \$779,000.

"It will be seen that there is a reduction of \$4,000,000 in the expenditure as between the last fiscal year and this.

PUBLIC DEBT

"The net debt of the Province is \$20,748,146. The sinking fund amounts to \$2,563,428. When we consider the assets of the Province and the large sums in arrears on account of land sales, which, with accrued interest and taxes, amount to approximately \$15,000,000, this liability is very small, especially as compared with the other Western Provinces which do not possess land, timber and mineral resources, and with our own municipal indebtedness, which amounts to \$93,400,000. Of course, we may not be able to collect all the arrears, and it has been suggested that the Government has been neglectful of its duty in not pressing for payment, but in the present circumstances it has been considered unwise to further depress the general situation by demanding payment or forfeiture while the war is on. There is a very good prospect of a large amount of these arrears being paid after the war is over, and it is probable that the Government may be able to devise a scheme by which these lands will become productive at an early date. When we consider our large natural assets, practically all in the control of the Government, \$20,750,000 is a very small debt indeed. Since Confederation we have made fourteen separate loans, and you may be surprised to know that the total of our borrowings has been less than \$25,000,000. Of course, there was a time recently when the Government could have paid off its debt, if that had been a convenient course to pursue, with the actual cash in hand, but the large revenues which accrued as the result of the active policy of the Government have been devoted to works of development which places the Province in a position to immediately reap the benefits to flow from the Panama Canal and the expansion to follow upon the close of the war. As it is, with the cash in hand, \$6,500,000, we are in a very sound financial position. If we were not at war we could borrow heavily, but it is incumbent upon the Government at the present time, and for some time to come, to carefully husband our available resources so that at no time during or after it the credit of British Columbia may be at all impaired. For this reason the Government has largely curtailed its usual expenditures, and, following the example of other Governments affected, decided not to embark during the present year upon any new schemes of development or put into effect any new policy. As the Prime Minister has put it, it is a period during which we must mark time and await the results of the war.

AGRICULTURAL PRODUCTION

"As the question of agricultural production has been very much discussed of late, I have taken particular pains to have the Department, through its statistical branch, go very carefully into the details of production and imports, and I hold in my hand a very complete statement of everything under the several heads covering the past three years. In fact, we have been able with a fair measure of success, at least so far as the available information will permit, to extend the comparison as far back as 1894. Through increased facilities the Department has been able to get additional information as to the production of several recent years, which was not formerly included, and which somewhat increases the totals. These relate principally to production on Indian Reserves and in the Peace River district. In this connection, I wish to say there was some criticism of the figures of production of the Agricultural Department in reply to a statement of the Premier in a review of the year's progress in the newspapers. It was pointed out that on page 359 of the report of the Royal Commission of Agriculture the production for 1913 is given at \$38,124,819, which, instead of showing an increase of \$3,500,000 in 1914, as stated by the Premier, was actually about \$10,000,000 less, as compared with the figures for 1914 given by Sir Richard. In order that there may be no mistake about it, the \$38,000,000 odd in question is not the value of the production of the year 1913, nor does it purport to be. It is the value of agricultural products as a whole, including live stock, ascertained at the time the valuation was made, and refers to that year. The actual increased production for that year, including the increase in the value of live stock, was about \$3,600,000. As a matter of fact, the Premier understated rather than overstated the increase of production. I wish to dwell upon this matter, because through such misleading criticisms an impression is being created that the Province is not producing as it should and is really in the decline. Whatever may be the splendid possibilities of the future, in the past we have done well, and we are now doing well. An increase of \$3,600,000 in one year in a Province like British Columbia is a good showing. I think it is a remarkable showing. In fifteen important products there has been an average percentage of increase of over seven hundred per cent. since 1894, and in only three have there been decreases, and that of an average of 28 per cent. The most important of these is been marketed, and that is due to the breaking up of the large cattle ranges of the Interior and the shifting of a large portion of the source of supply to the Middle West. There

are other items, like fruit and vegetables, nursery stock and milk, in which there is no basis of comparison, but which have assumed a very large volume of production. We must, of course, go on doing well, very much better; but it is unfair and untrue to say agricultural production has not been very satisfactory. It is true that the volume of imports is very large, and has been increasing, but I must point out, as I did on former occasions, that in twelve years subsequent to 1901 the population increased over three times. Among these imports, too, there are many items which in certain seasons will always be imported and will always be considerable in bulk. Now, in regard to imports as shown by customs returns, I want to say that they decreased in value in 1914 over 1913 27.21 per cent. This is gratifying as being largely in the right direction. An effort has been made to discredit the value of the agricultural statistics, and it may be contended that they do not represent actual conditions. It was difficult a few years ago to arrive at absolutely accurate returns, but with increased facilities, I can assure this House that they are as reliable as any such statistics can be, and the methods employed are those employed by other agricultural bureaus of statistics. The greatest care has been taken and the most diligent efforts have been made to secure accuracy.

HOME PRODUCTION

"Home production has increased over 1913, in round figures, \$3,600,000. In live stock there was an increase of about \$2,000,000. The greatest increase occurred under the head of dairy cattle, and there is a steady demand at high prices for milch cows. In dairy produce the increase was \$419,600 over 1913, or 16 per cent. Beef and pork marketed shows 62 per cent. since 1913. Poultry increased by about 20 per cent. The war has created an extra demand for horses suitable for cavalry mounts.

"Although the total fruit crop was far in excess of that of 1913—nearly 40 per cent. more—the lower prices showed a decreased value of about 9½ per cent. Vegetables show an increase of over 11 per cent. The production of honey is increasing very rapidly, and this is a most gratifying feature. Hay, fodder, corn and grains all show large increases. These have almost a direct relation to the development of live stock and dairy production.

"It is estimated that the output of jam and canning factories has increased about two hundred per cent. We see, therefore, with two or three exceptions, there has been substantial increase all along the line. Despite war conditions, prices have not increased. On the other hand, they have declined in some instances.

EXPORTS

Since the imports, especially from Dominion points, appear so large, I may state that it is difficult to show just what percentage of these imports are for home consumption. As the result of interviewing certain dealers in the Province, it is estimated that about 13 per cent. of these exports shown in the Customs official return are produced in the Province. This would make our exports to Dominion and foreign points approximately \$2,000,000, which could well be credited against our interprovincial and foreign trade.

The statement of Canadian exports passing outward through British Columbia ports during the calendar year December 31st, 1914, show the amount to have been \$4,501,288, or a total of about \$6,000,000 of local and outside imports. As stated previously, \$2,000,000 of the exports would, approximately, represent British Columbia production.

TIMBER AND FORESTRY

"In spite of the unprecedented conditions created by the war, the total production of our forest industries was valued at no less

than \$28,500,000. The shingle business was brisk for the greater portion of the year; while the activity in the pulp and paper market has been most encouraging, the only difficulty encountered by British Columbia mills being the shortage in available shipping. The total cut of the Province may be estimated at $1\frac{1}{4}$ billion feet, which is a somewhat surprising figure in view of existing conditions. The permission granted by the Government to loggers to export the accumulations of logs that our mills were temporarily unable to utilize, did a great deal to relieve the conditions on the Coast.

"It is a noteworthy fact that the present revenue has not suffered to the extent that might have been expected. Collections for the twelve months ending December 1 last, amounted to \$2,157,018.

"The fire season was one of the worst on record, and expenditure was far heavier than usual, though, even so, it was less than a quarter of the amount the Northwestern States were compelled to devote to fire fighting. The damage done to standing timber and property was comparatively small, a result that is to be attributed to the excellent organization of the Forest Service.

"During the past two years the Government has made a careful study of the lumber industry of the Province, in order that any action taken to promote this industry might be based on full knowledge of conditions. This study, up to the present, has consisted of a review of the sources of supply upon which the timber importing countries of the world depend. In the course of this review information has been received which has already led to the placing of foreign orders in British Columbia. Advantage has been taken of the co-operation offered by the Dominion Department of Trade and Commerce to place exhibits of British Columbia timber in the chief foreign importing centres. The field for export expansion is great; the entering of this field by the lumber industry, and the Government in co-operation will undoubtedly lead to an important expansion of the industry.

"We can scarcely over-estimate the importance of the timber industry to British Columbia. On a very recent occasion in this House the Premier said that the time was not far distant when the revenue derived from this industry would be sufficient to carry on the entire civil business of the country. During a previous session I expressed a similar opinion, and referred to our enormous resources in pulp wood alone. Our timber is growing faster than it is being cut; and if all of what in the past has been classed as

'merchandise' were taken away, we would still be able to supply the world. The relations of the Government to the holders of timber, fortunately, is one of partnership, the interests of both being to conserve and perpetuate this great industry.

MINING AFFECTED

"In general, mining has been more adversely affected by the war than any other industry. With the exception of placer gold, which will this year be found to have produced about the normal amount, all the other metals will show a decreased production. The reason for this is that the base metals—copper and lead—which form the greater part of our mineral output, are exported, chiefly to Europe, and as these metals are contraband of war, the export has been greatly reduced. The United States also produces these metals in excess of home consumption, so we find no relief there. As to the precious metals—gold and silver—some 75 per cent. of the former, and practically all the latter metal, are found, in British Columbia, in connection with one of the base metals mentioned, and cannot be mined separately; hence the precious metals are affected through the curtailment of output of the base metals. Similarly with the output of the collieries in the Upper Country—they are largely dependent for a market on the base metal mines and smelters; so much is this so that, roughly, the output from these collieries will not be much greater than 71 per cent. of what it was last year. On Vancouver Island the collieries are not dependent on metal mining, and here they will show a greater production. These conditions are not permanent nor inherent to the mining industry, for the first six months of the year showed a greater production than for a similar period of 1913, and the promise was that 1914 would possibly witness a record-breaking mineral production. The Provincial Mineralogist supplies the following, a rough estimate of the 1914 production, as compared with the production of 1913:

	Production 1913	(Estimated) 1914	P. C. Dec.
Gold	\$ 6,137,490	\$ 5,628,126	91.70
Metalliferous	11,563,348	9,758,730	86.36
Coal	7,481,190	6,374,578	85.21
Coke	1,716,270	1,427,586	80.32
Building materials, etc.	3,398,100	3,000,000	88.28
	<hr/> \$30,296,398	<hr/> \$26,189,020	

"The average market prices of all the metals for the year 1914 were much lower than in 1913, and this fact alone accounts for \$1,250,000 of the decrease shown above.

"It is very gratifying to know that, despite the unfortunate conditions of the year 1914, the dividends of mining companies amounted to about \$1,700,000, or only \$700,000 less than in 1913, which was a banner year, but still \$475,000 greater than they were in 1912.

FISHERIES PROSPEROUS

"The fisheries of the Province for the fiscal year, which will end March 31 next, will show an appreciable increase in value over those of the preceding twelvemonth. With the suspension and interference with fishing in the North Sea, a great demand for British Columbia halibut and salt fish has sprung up, with the result that heavy shipments of fish in ice has developed. A gratifying feature of the fisheries during the last few months have been the heavy shipments from Prince Rupert destined for Great Britain and the East. In January alone twenty-seven carloads were forwarded to these points, already justifying the prophesies made by the Government as to the importance which this northerly centre was bound to develop in connection with the fisheries. It is estimated that the total value of the product of British Columbia for the year ending March 31, 1915, will equal or exceed \$15,000,000. The chief constituent is, of course, the canned salmon, which totalled in value nearly \$9,500,000. While the pack of sockeye fell below that of the preceding year, a 'big year' on the Fraser, large catches of the other varieties were made and canned. Owing to the demand for canned food of all kinds due to conditions in Europe, a market for all varieties of salmon has developed. Reference should be made to the Provincial contribution of salmon to the Imperial Government. This took the form of canned 'pinks.' Many tributes to the value and quality of these have since been received, not the least of which was conveyed in the information just recently received, that the War Office had requested that 10,000 cases of these 'pinks' be placed at its disposal for Army rations. Cannerymen of the Province confidently expect that a greatly increased market for pink salmon will be developed in Great Britain as a result.

IMMIGRATION FIGURES

"A most important factor of the situation in British Columbia for the past few years has been the large immigration. During

the fiscal year ending March 31, 1914, the Dominion Government returns show that there were 37,608 settlers came to British Columbia, which does not, of course, include those coming from sister Provinces, showing a decrease of 20,360 over the preceding similar period; but even with this drop from 1912-'13, which was high water mark in Provincial immigration, British Columbia only falls short of Manitoba by 4,032, Saskatchewan by 3,391, and Alberta by 6,133. In the fiscal years of 1910-'11, 1911-'12 and 1912-'13 this Province had a substantial lead over all the Western Provinces. For the nine months of last year there were 1,014 British, 3,250 United States, and 3,174 immigrants from other countries. There are several causes for the falling off in immigration, and they affect practically the whole of Canada. There are the world-wide recession of good times and the war, and in British Columbia it was to some extent due to restrictive regulations being put in force to protect the labor market. While in the urban centres there has been a falling off in population, in many of the rural districts, and particularly close to the new lines of railway, there has been a substantial increase. Settlers from the Prairie Provinces still come in steadily, and we may look to those as a constant source of supply in the future as well as in the past. The floating population, largely through the completion of so much railway work, has fallen off very materially. During the fiscal year of 1913-'14, there were only 132 Japanese arrived. The Hindu population has been much reduced. There were 1,140 Chinese immigrants who paid head tax in 1914-'15, and 5,248 in 1913-'14. It is confidently felt that the close of the war and when conditions have been readjusted, the volume of immigration will be greatly increased.

TRADE AND GENERAL OUTLOOK

"Industries, outside of those already referred to, and trade in a general way, have been affected by war conditions. There has been a diminution in the volume of business done. Speculative activities have entirely ceased. Nevertheless, the record is not a bad one, and would be considered very good indeed a few years ago. In fact, the entire value of production in 1914 would be considered satisfactory in normal times for any previous year. In external trade, the volume of exports and imports for the last fiscal year amounted to \$90,783,230, as against \$92,523,922 for 1912-'13, and \$69,428,000 for 1911-'12. I have not the figures for the full nine months since March of last year, but, so far as returns are available, despite the war, they are keeping well up. As might

be expected, the clearing-house returns, into which real estate and land transactions, etc., entered largely, show a considerable drop. For 1914, the total was \$561,000,000, as against over \$813,000,000 in 1913, and nearly \$828,000,000 in 1912. Building, likewise, reflects the depressed and troublesome times. For seven cities of British Columbia the returns show value of buildings erected in 1914 to be \$8,110,000, as against \$17,000,000 in 1913. But even these, in present circumstances, are gratifying. We look to see the war over during the present year. When the war is over, and financial conditions are readjusted, we look, also, to see a return to an era of striking increase in the volume of business from year to year which have marked the past ten years. One result of the present war and the present depression will be that speculation in real estate and land, which was a factor in bringing about this situation, and over-expenditure on the part of the people generally in public and private capacities, will for some time, at least, be eliminated. I look to see business conducted on more economic and economical lines. I look to see us productive on a very large scale, with industries and commerce which will develop naturally from the resources and geographical situation of the Province. When the war is over, we shall be in a position to fully take advantage of the new situation. We have spent millions in making roads and other public improvements. When the railways under construction are completed, nearly 5,000 miles will have been added to the mileage of the Province within ten years, at a cost of about \$250,000,000. The Panama Canal is open and doing business. With all these wonderful facilities at their hand, it will be their own fault if the people of the Province do not go ahead and prosper as they have never prospered before."
