ST. MARTIN OF TOURS.

The Saint drew rein and raised his hand. To check the boisterous mirth,

Lest the unseemly laugh, perchance,

The old man's spirit hurt. He saw the beggar at his feet; No mantle wrapped his form; His silvery hair was tossed about, As in a recent storm.

The old man raised his eyes above, And stretched his hand for aid, But, as the soldiers laughed again, He shrank as if afraid.

Then raising once again his hand, For aid, unto the saint, His trembling voice was heard to even more than the brain itself. speak

In accents weak and faint: "I know not, sir, whom you may be; If prince in war renowned; Or if perchance in youthful years

Fair fortune, kind, you've found." "But well I know a noble heart Throbs 'neath thy plate of steel, And for an old man's want and woe, Kind sir, I know you'll feel.

"No food has touched my lips to-day, The wind is chill and cold; Around my form, against the blast No cloak have I to fold.'

The saint at once, drew forth his purse, But heaved a heavy sigh; For in its folds-search how he

would-No coin was found to lie.

"You see, my friend," he gently said, "My purse is slim and bare; In truth," he added smilingly, "We are a wanting pair."

"But though I cannot give thee gold, My cloak, with thee I'll share, To shield thy form against the storm, Methinks, will soon be here."

And, as he spoke, his sword he drew, and holding forth his cloak Before his soldiers' startled looks, He cut it with a stroke.

Then leaning from his restress steed, He threw the severed half Amidst a smothered laugh.

And as he did the graceful deed, Together met their eyes, And at the awe that seized his heart individual, right or wrong. He wondered with surprise

He waited not for words of thanks But wheeled his horse around And swept his troops with look of

scorn. Without a single sound.

And each man blushed beneath that look.

That seemed to pierce his soul; And nervously each one was seen To draw his mantle's fold.

That night, when resting from his march,

The good saint calmly slept; The beggar man he deamed he saw And o'er his troubles wept.

And then, he thought, the vision changed,

And standing in his place He saw a man of stately mien With calm and radiant face.

Within one hand, to his surprise, He saw his severed cloak, Now shining with a brilliant light; And then the vision spoke.

"My son, to-day thy Lord and God This cloak received from thee; Because it is a severed half More precious shall it be.

I came in guise to test thy love For my afflicted poor; To know if to thy charity You kept an open door.

And now I bid thee, from the ranks Of worldlings here, to flee, And bravely taking up thy cross, Come, son, and follow Me.

-Mary Grace O'Carroll

PASSIONS.

The health and consequent enjoyment of an individual, depends much upon his control of the malign passions, the most prominent of which are anger, hatred, envy, jealousy, moroseness, selfishness and avarice. When any of these get beyond the control of any person the result is disorder, demoralization and a terrible waste of energy, effecting not only the individual but the family, and often the whole neighborhood.

The mind must be diverted to some other channel. The brain is the organ of the mind, and suffers to the extent of its misuse or abuse. As the brain controls the other organs, so the other organs suffer, sometimes

Outbursts of anger disturb the heart's action. Persons have fallen dead in a rage. One of England's most famous medical men, who grew up with an uncontrollable temper, in after years knew his perilous condition, and avoided as much as possible such things as were likely to make him angry. He said: "I shall fall an easy prey to any villian who chooses to make me mad," and yet he fell dead in a rage. All such as he should learn to control their passions while young. An attack of jaundice, of indigestion, of constipation and many other troubles have followed an outburst of anger. Many a babe has suffered from the changed if not poisonous character of the mother's milk as a result of the parent's temper.

Hatred, envy and jealousy often give rise to anger with all its bad physical effects. The benign affections are also crowded, if not killed, out all together, and the features of the face rendered repulsive by the continued exercise, and consequent growth of the muscles brought into play by these passions. Remember that these muscles like all others grow by use, and vice versa.

friends of that person? One may have a sympathetic interest in a friend's occupation or in her children, or in her bridge playing, but one occasionally becomes a little wearied of a repetition, a constant recurrence to that pet subject of the innocent but short-sighted women who harps eternally upon one subject. She devotes her mind and energies to that subject to the exclusion of all others. She ponders over it, and only too readily she reverts to it so constantly that her friends at last wish themselves miles away.

A school girl is apt to be blamed because her conversation is limited to her school-her friends there and her studies and pleasures, which are shadowed by the walls of the schoolhouse. But is her mother free from blame when she herself finds a continual source of conversation in her servants and her household gods? Does it interest her friends any more to discuss the children's bright sayings, to praise her waitress' neatness and her cook's superiority, than to listen to a schoolgirl's prattle?

The society devotee is quite as apt to overdo the matter as her more domestic sister, and the woman with a profession talks "shop" entirely too much as a rule.

But she should not allow herself to dwell entirely upon one phase of life. There is plenty of interest in other people's affairs, there are gay and absorbing pictures in the vista of daily life, and every woman should watch course, by women than by men, as the latter are thrown more into the world's happenings.

A Fearful Case.

THORNHILL, Ont., Nov. 29, 1899.

For five years I had been sudering from failing sickness and my case was a talcane. Doctors did not do me a particle of good, but Pastor Koening's Nerve Tomic cured me atonce of that dreadful disease. The first bottle convince d me that it would do all you claim for it. I used to have as many as seven fits a day, would fall just where I stood and sometimes cut my face so severely that my own folks would hardly know me. I had such a headache and pains in my body that I often wished I were dead. I could not get work from anyone on account of my sickness, but now I am able to do a full day's work. My comrades that used to shun me are friends again, and I am as well as I ever was, and have only Pastor Koening's Nerve Tomic to thank for my health. I am willing to answer all enquiries or letters concerning this great remedy, and urge those similarly afflicted to try it and receive its benefits.

THE TWO TRAVELERS.

(Palmer Cox in April St. Nicholas.) In bygone times it came to pass, A tall Giraffe and a dwarfish Ass, As fellow-travelers, side by side, Were jogging through a country wide.. The Ass was much inclined to smile At his companion's awkward style; His great long legs to criticise, And at his neck express surprise; In short, to spare no cruel hit Whereby he might display his wit.

But, as they moved the region

through, The vegetation scarcer grew, Until upon the sterile ground But little else than stones were found And only on the tallest trees Grew aught that could their hunger

ease. And there, with famine worn away, The hungry Ass was forced to stay, And watch his comrade eat the fruit A dozen feet above the root. "Ah me!" he cried, "no more I'll

THE REMORSEFUL CAKES. A little boy named Thomas ate Hot buckwheat cakes for tea-A very rash proceeding, as We presently shall see.

He went to bed at eight o'clock, As all good children do, But scarce had closed his little eyes, When he most restless grew.

He flopped on this side, then on that Then keeled upon his head, And covered all at once each spot Of his wee trundle-bed.

A PRAYER TO OUR GUARDIAN ANGEL

Dear Angel sent from Heaven, My guide on earth to be; How sweet to know I have a friend-A steadfast friend-in thee! Who, though all others weary,

And coldly turn away, Will cling to me with all my faults, Wherever I may stray.

And who, when fa th is silent, And darkness like a pall Her black wing spreads above my soul, Will softly to me call: "Fear not, poor child! thine Angel Is keeping guard of thee; So 'cast thy care upon the Lord,' And trust thyself to me."

'Tis thou, too, who, when Satan Would hold before my eyes Alluring visions of this world, Will rend their frail disguise, And, pointing calmly upwards, Will breathe. "Behold the throne Wherefrom thy King is watching thee And waits to claim His own."

O dear unseen companion! I thank thee for the love With which thou hast fulfilled

Assigned thee from above; And I pray thee, lead me always By paths of grace and prayer, Till God, Himself, shall lift from thee The burden of my care. -Jennie M. Buhlinger.

AN AUTUMN SONG.

(By Emilie Poulsson.) The song birds are flying And southward are hieing, No more their glad carols we hear. The gardens are lonely-Chrysanthemums only Dare now let their beauty appear.

The insects are hiding-The farmer providing The lambkins a shelter from cold. And after October The woods will look sober Without all their crimson and gold.

The loud winds are calling, The ripe nuts are falling, The squirrel now gathers his store. The bears, homeward creeping, Will soon all be sleeping So snugly till winter is o'er.

Jack Frost will soon cover The little brooks over; The snow-clouds are up in the sky All ready for snowing; Dear Autumn is going, We bid her a loving good-bye.

UNCLE JACK'S STORY.

"Uncle Jack, please tell us a real wonderful story!" cried Hal, throwing himself down on the steps beside his uncle.

"Just a little story about a bad boy," lisped Lucy, snuggling up beside her brother.

Uncle Jack stretched himself a little lazily. "Well, I don't believe I ever knew any bad boys, but I might tell you a bad story about a good boy.

"Do." 'Yes, do," echoed Lucy.

Now Uncle Jack has told so many stories since breakfast that he had not many more ideas in his head, and so he felt a little like teasing the children. He began this way: "Well, once there was a boy named

Bommy Teggs. He lived-" "Do you mean Tommy Beggs?" asked Hal, a little timidly.

"Why, yes, to be sure, I did get that wrong! Well, this boy Tommy started out one day to go to the village. He carried a ten-quart pail of milk in one hand and a hand-saw in tne other. He went gayly along, whistling and throwing rocks at the to you. fence-posts-'

"Why Uncle Jack, did he set his milk down every time?"

"Why, yes, yes, I think he must have done that. Well, he went along, looking off at the sea, that lay all behind him-"

"Wasn't it in front of him?" asked Lucy, eagerly.

"No, I think not; I said behind him. He kept one eye on the sea behind him and one at the long lane down which he was walking.'

"But-" began Hal; and then, not himself with trying to look back at very happy. the door and at the same time keep an eye on his uncle.

"But what did he do with the saw?" asked Lucy. "And how could he hold the eggs

and come dow hand over hand?" asked Hal.

"That I don't know," said Uncle Jack, seriously. "It is strange that I cannot explain that to you. It must have been that he could see by means. of the saw that he must hand over the eggs to his pocket. On thinking it over, I guess that was it."

'Well, go on," said the children. "Well, he thought he would like to give the eggs to his mother, so he set down the milk and the saw under the tree, and sat down beside them to watch that no one stole them while he was gone; and he ran back as quickly as he could down the lane-"

"But he was under the tree!" exclaimed Lucy, who was trying to help matters all she could. "He could not run home while he was sitting there."

Uncle Jack rose up on his elbow and looked at the children in astonishment. "That is quite true," he said, thoughtfully. "He could not have done it-and-in that case it could not have happened, and thus there is no story to tell, is there?" and Uncle Jack opened the magazine he was reading, as if that were quite the only way out of the difficulty. The children waited patiently.

"Put what about the bird's nest?" questioned Hal.

"Well, if the boy could not have done what I said, he could not have climbed the tree, and in that case there was no one to bring down the eggs, and so there could not have been any one to see the eggs in the tree, and thus we see that there was no one to see the eggs there and sowell, it all seems to be very unlikely. In fact, I don't believe any of it, do you, now, on your honor?" Uncle Jack looked at them with smiling

"Let's play horse, Lucy," said Hal. "I'll be the horse," said Lucy. 'Stories are silly."

After this Uncle Jack, who was rather tired, of stories, read his magazine comfortably. - Mary Wight Saunders in Youth's Companion.

The little folks reluctantly gathered up their shovels and pails. For a whole month they had a lovely playground in the big sand pile, and now they were to lose it. Stooping forward to brush it off, Polly jerked back her hand with a cry of wonder. The spark had legs and arms and wings; it was, in fact, a little manikin that could have stood comfortably in her thimble and rested his arms on the rim.

His whole wee form quivered and glowed and sparkled, while he looked up at Polly with a roguish twist of

"What for?" stammered Polly 'For setting me free."

'Were you in that log?"

"Oh, yes, there were hundreds of us there. Most of the crowd are off -there goes one now!" he exclaimed, as an unusually large spark flew off in the rising smoke.

A WOMAN'S LIFE

There are three periods of a woman's life when she is in need of the heart strength-ening, nerve toning, blood enriching action of

MILBURN'S HEART AND NERVE PILLS

The first of these is when the young girl is entering the portals of womanhood. At this time she is very often pale, weak and nervous, and unless her health is built up and her system strengthened she may tall a prey to consumption or be a weak woman for life.

The second period is motherhood. The drain on the system is great and the ex-hausted nerve force and depleted blood require replenishing. Milburn's Heart and Nerve Pills supply the elements needed to

The third period is "change of life" and this is the period when she is most liable to heart and nerve troubles.

A tremendous change is taking place in the system, and it is at this time many chronic diseases manifest themselves. Fortify the heart and nerve system by the use of Milburn's Heart and Nerve Pills and thus tide over this dangerous period. Mrs. James King, Cornwall, Ont., writes: "1 have been troubled very much with heart trouble—the cause being to a great extent due to "change of life." I have been taking Milburn's Heart and Nerve Pills for some time, and mean to continue doing so, for I can truthfully say they are the best remedy I have ever used for building up the system. Miss Page Carter was seventeen, and already the acknowledged belle of Shelbyville. There were older, younger, handsomer, richer maids in Shelbyville society, but there was but one Page in all the world; so at least said her admirers, whose name was legion. She was tall and slight, brown-haired and fair-eyed, a combination in which lurks considerable "diablerie," and there was about her the nameless charm of which poets have sung and artists raved, from Sappho to Madame Recamier. Other women called her "stylish" and, when ill-naturedly inclined, insisted that her good looks all lay in her gowns, at which Page laughed merrily and declared it was the greatest compliment of her life.

"Anybody that's born pretty can look pretty," she said in her soft Southern accent, "but a person that can look well-and they say that I do that-in the picayune duds that Brother allows me, is a genius!" For, truth to tell, Will Page's clothes were

Then in the areas where, under these circumstances, no Catholic public elementary school can any longer exist, Catholic parents may be left ander the compulsion of the law to send their children to non-Catholic schools schools in opposition to the dictates of their conscience. The Government is thereby creating a situation of peculiar difficulty and delicacy, in which Catholies may be obliged to disregard a law which is manifestly unjust, and to obey, rather, the law of God, which no Legislature has power to abrogate or set aside.

In those schools in which it may, according to the provisions of the Bill, be possible to teach Catholic doctrine to Catholic children, no guarantee whatever is given that the teachers shall be Catholics.
