CAVENDISH COAL WAREHOUSE

Business Increase in the Cape Breton Free-Trade Zone. Halifax, Christmas Eve.—The Herald today publishes a North Sydney dispatch saying: "During the year 1919, 740,000 tons of coal have been mined in Cape Breton."

Bartram has offered Bonoung \$1000 a week to travel with his circus. But Bonoung was not much of a success in his last caravan.

A crank in Chicago is said to have paid \$300 for a toll on his four-year-old daughter to catch the grippe. He might have provided a more satisfactory means for a Christmas dinner, or proved to some extent the wisdom of his Christian education.—Windsor Clarion.

Yes, and by so doing he would have made persons of the people he fed, instead of giving their honest employment, even though the employment was the making of a toy.

Just as a single lightning, what would be the state of affairs if there were ten or twenty lightning bolts striking every city street in Toronto?

For one thing there would be fewer accidents. Another, the roads would be better and the sidewalks would be smoother. We could better employ in this honoring Champlain in Quebec, and say, Governor Simons in Toronto.

Ald. Dods more than defended himself from the attack of the alderman who claimed his position on the Parks Committee. It was Ald. Dods who got the park in question for his ward, secured the appropriation, had the work performed and the park opened in two years' agitation. Surely some recognition goes with long effort.

Mr. Mowat's list of O.C.'s is made up of men of much better caliber than the men recently appointed from Ottawa, and this may prove a little less of a source of criticism if it is not in the constitutional aspect.

Well, if people can't skate this year, let it slide.

After all, considering the weather, perhaps the most appropriate Christmas present would have been an apron or a shawl or something of the kind.

James O'Sullivan, of Cronin murder fame, has the satisfaction of knowing that there would not be a great deal of work for him even if he were out of jail.

Speaking of influenza, The Toronto Globe says the Dominion Government takes the case very seriously. It might be well to inquire what its tax is on a hot foot-bath?

One of Yale's students is to be expelled for giving champagne to a bear. But it is not explained whether this is because of cruelty to the bear or on account of the waste of the wine. Perhaps it is because if the bear washes liquor it ought to do its own brain.

Suicidal at Christmas Time. The condition of Europe at this Christmas time is not particularly suggestive of "peace on earth and good will to all men." The continent war is yet staggered off, but rumors of war abroad and the prevailing state of armed peace grows intolerable. It is in the quarter the sky looks a little brighter; and the chances that Great Britain and Portugal will come to an amicable settlement soon are considered by the world.

On the Portuguese side it is suggested that a settlement on the basis of political convenience is more probable than on the basis of practical concessions by Portugal, ought to be practicable. And John Bull is known to have such a healthy regard for the balance of power that it looks as if there might be something in this line of what is coming.

Bismarck has written to Salisbury, intimating, in the most friendly way, that he is aggrieved of trouble between the two old allies would have for its chief effect that of helping the revolutionary party, who are "just waiting for the opportunity to take the red flag, not only at both Lisbon and Madrid, but also at other European capitals. There is a German motive for this, too; it may be doubted whether Europe will be able to stand a second world war, and his much-valued man of blood and iron, feel altogether as safe as they wish the world to think they are. There are dangerous men in Berlin as well as in Paris and St. Petersburg.

Within a week or two the old-fashioned European war cloud has had another element of uncertainty added to it, before affecting it. In Brazil a monarchy of considerable importance has been wrecked, and a Republic set up in its place. The revolution is likely to be interesting times. The bearing of the Brazilian revolution upon events in Europe ought to be worth watching every day.

A French marquis, it is said, goes into convulsions every time she sees her face in a mirror. This is a sad reflection on the nobility.

The will of Jeff Davis has been published, with his daughters and two friends as residuary legatees. This is grimly humorous when we read that he died \$400,000 in debt.

The London Advertiser, pleading for dual languages in schools, says: "A man who can speak both English and German in Chicago, Milwaukee and other cities, is more than a man who speaks only one language. And the same holds good in those cities where French is much spoken."

But is the sole object of the public schools of Ontario to fit pupils to become residents of Chicago and Milwaukee.

The way of the transgressor is hard, no doubt, but in such cases as that of Silcott the trouble is to find the way to get out of it.

Keely is still assuring his stockholders that his motor will move. Indeed, he says it must. "For it is founded on immutable laws of nature." But can he secure a patent on an immutable law of nature?

The Toronto Globe endorses Mr. Meredith's accounting "good sound liberal doctrine." It is the general opinion that Mr. Meredith has been advocating good, sound liberal doctrine for years.

Our friend, The Spec, has a long and learned article this morning, and says that "don't believe it can be a life-time thing."

Yes, The Times has frequently accused The Spectator of shuffling—the most difficult job of dancing.

The Hamilton Spectator is at it again, and now wants someone to find a rhyme for...

SLAVIN AND THE PELICAN

Union, which would thus, while remaining the central governing body, come to be an association of clubs and leagues, exclusively of managers, consisting only of the representatives of the clubs of the league, thus assuring all clubs that members an equal vote in the amendment and final adoption of the plan. Provision has been made for an increase in the number of members of the board managers to fifteen.

A Jockey With Two Masters. New York, Dec. 24.—Jockey Robert Woodward, now with Charles Boyle, is claimed by a Garson of the Reckless Stable as apprentice to him. Mr. Garson says he has an agreement signed by the boy's mother, and that he has a letter of the boy asking for a salary renunciation. Mr. Garson therefore will make a claim if Woodward is to touch the wire again.

Guests of the Turf. The home and turf for the afternoon at Slattery's at 2 o'clock. When Jimmy McLaughlin relinquishes the field to the Pilsbury, the noted jockey, will probably be present.

A Risk Game To-day. All those who are not members of the Association football may do so by visiting the Metropolitan Roller Ring, Shaw-street, this morning when the Toronto six will oppose a strong eleven. The kick-off is at 4 o'clock.

Spots of Sport. Owing to the miserable state of the weather the winter sports are being held at the benefit of Popp's academy last night.

International Quarantined. How the Clubs Voted for the Postponement of Payment. Secretary Augustus Roy of the Toronto Baseball Club, received an official circular from Secretary C. D. White of the International League giving the result of the vote on the proposal to put back the time for the payment of the dues.

Fire at Havana. Havana, Christmas Eve.—The Spanish Havana Gas Co. stores were burnt last night. Four thousand cubic feet of gas were destroyed. Estimated loss \$35,000.

Midnight Mass. High mass was celebrated at midnight last night at the Church of Our Lady of Lourdes. The music was superb.

Recher and Toledo Formally Admitted. Louisville, Ky., Dec. 24.—President William C. Foster of the American Association has announced that Toledo and Rochester have been admitted to the organization.

Hamilton Won't Get Battered. The Hamilton Hockey Club, does not take much stock in the story of Rochester having jumped to the American Association. Even if it has, and Toledo has, Hamilton will not be affected.

The League Declares War. New York, Dec. 24.—The long-looked-for injunction proceedings against Ward by the New York League Club were begun today, when the papers in the suit were served in turn. The complaint is made by the players and the League.

Dest from the Diamond. Roy declares that he has signed to play with the Toronto club, and will be the first baseman of the Columbus Club, a sum stated to be \$4000, to play first base for the Players' League.

Massive Installation. The massive installation of the Toronto club is the scene of a numerous and brilliant gathering last evening. The occasion being the installation of the Toronto club.

Personal Mention. Mrs. Sara McCallum, sister of A. B. McCallum, is in the city during the holidays.

Union Clubs to be Grouped Throughout the City. Philadelphia, Dec. 24.—The Board of Management of the Amateur Athletic Union of the United States has just issued a letter which will have an important bearing on the future of sports in this country.

IT CAN BE MADE SAFE

Edison Testifies on the Subject of Electric Wires in Buildings. New York, Christmas Eve.—Thomas A. Edison testified before the grand jury yesterday in their inquiry into the killing of Lincoln Clausen and incidentally into the entire subject of electric lighting in this city.

A Surprise at Clifton. A Party to One Shot Makes a Dead Heat. New York, Dec. 24.—The surprise at Clifton yesterday was a dead heat between the favorite Melodrama in the second race and winning the run-off.

Twenty-eight miles of electric light wire and 54 poles laid yesterday. There is not much diversity of opinion. The public generally approve of the activity of the mayor in forcing matters. The Sun says in reference to it: "Well, the great at night is a great protection to life and property. It is a requirement of modern civilization. But the danger from the electric wire is greater than the danger from incendiaries, burglar and robberies as proved to be the case under the existing method of conducting the electric current, the price paid would rather stumple through dimly lit ways at night under an illumination like that of mid-day, but which exposes them to the possibility of death if they happen to touch the wire again."

A CHRISTMAS EVE TRAGEDY. Thomas Macdonald Seriously Injured in a Street-Smash Now. About 10 o'clock last night an apparently reckless motorist named Thomas Macdonald came running out of the lodging house at Simcoe and Pearl-streets crying "Help" and "Murder." The neighbors were aroused and a policeman was called.

The Floor Avas. Philadelphia, Christmas Eve.—A gentleman who is very interested in the C. & W. flouring mills in the Northwest said today: "The reports of their sale to an English syndicate are true. The syndicate has agreed to buy the mills for \$2,000,000. The reports are true. The syndicate has agreed to buy the mills for \$2,000,000. The reports are true. The syndicate has agreed to buy the mills for \$2,000,000."

A Breakman Killed. Utica, N.Y., Christmas Eve.—George McCulla, a breakman on the Rome, Waterbury and Onondaga Railroad, was yesterday killed by being run over by a freight train at Lyons Falls this afternoon.

A Christmas Flood. MONTREAL, Christmas Eve.—A heavy rainstorm which has prevailed since Saturday last has caused the La Plante River to overflow its banks, doing much damage to the harbor works at Monte Video.

A Gold Reef in the Brook. A Rich Lode of Gold Struck in the Township of Galbrath. (From The Sun Express). For some time there has been considerable whispering going on in certain quarters as to a valuable discovery of gold-bearing quartz, found on a lot located by Frederick H. MacKenzie, in the township of Galbrath, about ten miles back of Rydal Bank. On Monday the matter culminated in a white heat, when a party consisting of Messrs. MacKenzie, Stobie and Touch of Salisbury, who are all well-known and successful men in the mining industry, and several other parties are prospecting, but it is too early to predict the outcome of the discovery. The quartz is of a fine quality and is exceedingly rich. Active steps are being taken to develop the mine. Six men are already at work on the property, and it is settled, both of the contending parties claim, that the mine is to be developed in a satisfactory and profitable manner.

Steamship Arrivals. Date. Name. Reported. From. Dec. 24. Servia. New York. Liverpool. Dec. 24. Servia. New York. Liverpool. Dec. 24. Servia. New York. Liverpool.

The Dead. Charles Mackay, the well-known author and journalist, died at 75. During the civil war in America he resided in New York as correspondent of the London Times.

Healthful Here. Barks, Roots and Herries are in Burdock Blood Bitters which regulate all the secretions, purify the blood and strengthen the entire system.

BUCKINGHAM, QUE., Nov. 22nd, 1883. GENTLEMEN. The pleasure in bearing witness to the excellence of St. Leon Mineral Water was a source of satisfaction to me during the late season. The water was rendered a more valuable asset to me in consequence of the fact that it was so pure and healthful. It gave me relief, but none was permanent. In fact, I had to resort to the use of St. Leon Mineral Water. The effect was most satisfactory from the start, and an hour after the first glass was taken, I felt that I was on the way to recovery. I feel that I owe much to the use of St. Leon Mineral Water.

THE QUEEN AT WINDSOR.

WHAT GUESTS AT THE CASTLE SEE AND HEAR.

Empress William's Game Bar—Parrell's Visit to Gladstone—A Skeptical Proof of the Success of Balloon's Policy—The Present Parliamentary Contest to Edmund Gosse—London's Latest Gossip.

What guests at the castle see and hear. The Queen's arrival at Windsor the papers have almost daily reported the arrival and departure of visitors to the castle. It is a mistake to suppose that the Queen's guests have any opportunity for protracted or confidential communication with Her Majesty, except in the ante-chamber, followed by the visitors arrive at the castle about 7 o'clock, retire to their respective rooms and assemble in the corridors in full dress at 8.30. The Queen presently enters in private apartments and after bowing to the company and perhaps speaking a few words to one or two friends she goes into the dining-room, followed by the guests. After dinner, during which the conversation, as a matter of course, is to the last degree rapid and commonplace, the company returns to the corridor, and then the Queen returns for a few minutes to each person in turn, and then bows to the circle and retires, after which the party proceeds in the smoking-drawing-rooms for cards or music, and the Queen ultimately find themselves in the smoking-room, which is a very comfortable apartment for the guests to assemble in.

When the Princess of Wales is at Sandringham her life is a very busy one. She attends a good deal to the guests and a great deal to the school. She is very remarkable, both as regards her management and results. She has established all kinds of technical teaching, and a very remarkable one in which brass metal work is taught as an extremely good thing, and which produces a sort of gleaming looking after them, and she gives some bits of work done by the girls to the ladies of whom she is fond. She plays a great deal and reads largely and widely, and is very well informed in many subjects.

The irritation which Gladstone is said to have felt at Parrell's cavalier treatment of the Queen's policy is the almost entire absence of the Queen's policy during the winter and winter. Not for many years has there been so much of the Queen's policy as during the winter and winter. Not for many years has there been so much of the Queen's policy as during the winter and winter.

Lord Randolph Churchill's manifesto on the subject of foreign immigration has been widely discussed. It was spoken of yesterday among his friends as likely to make a splash in the House of Commons. It has been inspired very much by Lord Dunraven, who holds advanced views on these questions, and is one of Lord Randolph's closest advisers. Lord Randolph has long intended to prove his own worth and the government will gladly grant it. He will see the entire support of the country for his disclosures are very serious.

The Grimsby's Performances. The performances of the French submarine torpedo boat Gynonide, off they are making like as good as they are reported to be should draw the attention of our own Admiralty to the subject. At a recent trial at Folkestone it is said to have been under complete control and to have travelled a distance of 1200 meters under water. If this is true the submarine is a very valuable arm of war, not so much, perhaps, against land as in cleaning a minefield and rendering submerged torpedo boats innocuous.

The Russian man-of-war which recently sailed from the Baltic, is a very interesting one. It is a magnificent machine, and is a gift from the Czar to Lord Revelstoke, and is a massive one. It was found necessary to send it by road to Membran Hall in Scotland.

MARKETS AND EXCHANGES.

REGISTER OF THE RESULTS OF LEADER'S TRANSACTIONS.

Table with columns for Market, Price, and other details. Includes sections for Stock Exchange Transactions, Money Market, and various commodity prices.

NEW COURT HOUSE.

71 feet on S. side of Queen for 71.

Manufacturers of Brown Automatic Engines from 20 to 1000 horse power.

INSPECTOR LANGRILL RESIGNS.

This is the Result of A.M. Gillespie's Motion on Monday Night. At the last meeting of the Property Committee of the City Council the case of Inspector Langrill of the eastern division was fully discussed. It was shown that a man inspector on the pay sheet until a buggy purchased for the use of the city, not for the personal convenience of the inspector, had been paid for. Mr. Langrill was not in the employ of the city at the time he was receiving the money of the corporation, and consequently it was thought advisable to suspend Langrill until the matter had been looked into. He had been guilty of nothing more serious than an information that should have been paid in the usual way, namely, by sending in the bill for the amount to the Commissioner's office. In view of this, and the fact that Langrill evidently intended to do his duty, the committee, when the matter came up, decided that a severe reprimand would be quite sufficient punishment.

Business Embarrassments. Samuel Fox, furniture dealer, South St. East, Toronto, has been declared bankrupt. The estate of T. W. Thomson and Co. are the creditors. The estate of T. W. Thomson and Co. are the creditors. The estate of T. W. Thomson and Co. are the creditors.
