

EXPLANATION

MONTREAL ALMANAC

FOR THE YEAR OF OUR LORD

1837.

BEING THE FIRST AFTER BISSEXTILE,
OR LEAP YEAR.

Calculated for the City of Montreal, being in Latitude 45°
 $31'$ North, and in Longitude $73^{\circ} 34'$ West from the
Royal Observatory at Greenwich.

Time hath a wonder working power
And changes all beneath the Sun,
Vicissitudes through every hour—
Through every moment run;
Nor fame, nor wealth, nor pride, nor force,
Can change, arrest, or speed its course.

MONTREAL.

PUBLISHED AND FOR SALE BY H. C. M'LEOD.

63, Notre Dame Street, opposite the Court-House.

AND SOLD ALSO BY OTHER BOOKSELLERS.

Price \$9 per Gross, 4s. 6d. per Dozen, and 7d. Single.

EXPLANATIONS.

As several alterations have been made in the Astronomical calculations for the present year, and the whole adapted to mean time, some explanations may not be improper.

Mean time is that shown by a well regulated clock or time piece. Apparent time is that shown by a correct sun dial. The difference between mean and apparent time is called the equation of time. The equation of time depends upon two causes. 1st. The obliquity of the Ecliptic to the Equator, which causes an inequality in the daily increments of the Sun's right ascension. 2d. The unequal motion of the Earth in its orbit, while the motion on its axis is uniform. Mean and apparent time coincide only four times in the year, viz.—on the 15th of April, the 15th of June, the 31st of August, and the 24th of December.

It has been customary to give the rising and setting of the Sun according to the apparent time, and in another column to give the equation of time. In that case it was necessary, in regulating a clock or time piece by the rising, or setting of the Sun, to apply the equation to the time of rising or setting, given in the Almarac and also the amount of refraction, which in our latitude varies from two to four minutes. But as this matter is little understood by people generally, and is often done with some trouble, no notice is usually taken of these corrections, and in their endeavours to make their time pieces agree with the Sun, they find it necessary, if they run correctly, to alter them almost every day.

In the following Calendar, the times of the Sun's rising and setting, are the times shown by a correct time piece, when the Sun is in the horizon. The column marked ☉ South contains the times by the correct time piece, when the Sun is on the Meridian, or in other words, when it is noon by the noon mark, or dial. For example, when it is noon by the sun on the 1st day of January, it should be four minutes after twelve by the clock. Again, when it is noon by the Sun on the first day of November, it should be only forty-four minutes after eleven o'clock by the clock, or time piece. The other matters are so plain as to need no explanation.

NAMES AND CHARACTERS OF THE PLANETS.

☉ The Sun.	♁ Mercury.	♃ Jupiter.
☾ The Moon.	♀ Venus.	♄ Saturn.

COMMENCEMENT OF THE SEASONS.

Spring begins	March	20th	2h. 29m. evening.
Summer begins	June	21st	11h. 43m. morning.
Autumn begins	September	23d	1h. 37m. morning.
Winter begins	December	21st	6h. 59m. evening.

ECLIPSES OF THE SUN AND MOON.

There will be five Eclipses in the year 1837, three of the Sun and two of the Moon.

I.—The first will be an eclipse of the Sun on the 5th day of April, invisible. This eclipse will be seen only from a small portion of the southern Ocean.

II.—The second will be a total eclipse of the Moon, on the 20th day of April. This eclipse will end a little before the Moon rises and will not therefore be visible in Canada.

III.—The third will be a partial eclipse of the Sun, on the 4th day of May, invisible at Montreal, ♌ at 2h. 8m. evening. This eclipse will be visible in the north-western part of North America and in the north Pacific Ocean.

IV.—The fourth will be a total eclipse of the Moon on the 13th day of October and visible as follows:

Beginning.....	4h. 36m.	} Mean time in the evening.
Moon rises.....	5 17	
Beginning of total darkness,...	5 37	
Middle of the eclipse,.....	6 23	
End of total darkness,.....	7 9	
End of the eclipse,.....	8 9	

Duration of total darkness 1h. 32m. Duration of the eclipse 3h. 33m. The Sun will be eclipsed 18½° on the north limb, or from the east side of the Moon's shadow.

V.—The fifth will be a partial and invisible eclipse of the Sun, on the 29th day of October. This eclipse will be seen from the southern extremity of South America and from most of the Southern Ocean.

31 days. **JANUARY, 1st month.** 1837.

No more the morn, with tepid rays,
 Unfolds the flow'rs of various hue;
 Noon spreads no more the genial blaze,
 Nor gentle eve distills the dew.

New Moon, 6th day, 6h. 52m. evening.
 First Quarter, 13th day, 0h. 17m. evening.
 Full Moon, 21-t day, 2h. 51m. evening.
 Last Quarter, 29th day, 1h. 36m. evening.

31 days.

MARCH, 3d month.

1837.

The North-East spends his rage; he now shut up
 Within his iron cave, th' effusive south
 Warms the wide air, and o'er the void of heaven
 Breathes the big clouds with vernal showers distent.

New Moon, 6th day, 3h. 35m. evening.
 First Quarter, 13th day, 11h. 14m. evening.
 Full Moon, 22d day, 2h. 2m. morning.
 Last Quarter, 29th day, 8h. 23m. morning.

Now o'er the rural kingdom roves
Soft Pleasure with her laughing train,
Love warbles in the vocal groves,
And vegetation plants the plain.

1837.

AUGUST, 8th month.

31 days.

How changed the scene! In blazing hight of noon
 The sun, oppress'd, is plung'd in thickest gloom.
 Still horror reigns, a dreary twilight round,
 Of struggling night and day malignant mix'd.

New Moon, 1st day, 7h. 26m. morning,
 First Quarter, 9th day, 8h. 28m. morning.
 Full Moon, 15th day, 0h. 45m. morning.
 Last Quarter, 22d day, 8h. 22m. evening.
 New Moon, 30th day, 11h. 6m. evening.

30 days. NOVEMBER, 11th month. 1837.

Then comes the father of the tempests forth,
 Wrapp'd in black glooms. First joyless rains obscure,
 Drive through the mingling skies with vapour foul;
 Dash on the mountain's brow, and shake the woods,
 That grumbling wave below.

First Quarter, 5th day, 9h. 30m. morning,
 Full Moon, 12th day, 6h. 36m. morning.
 Last Quarter, 20th day, 1h. 40m. morning.
 New Moon, 27th day, 8h. 56m. evening.

1837. DECEMBER, 12th month. 31 days.

The keenest tempests rise ; and fuming dun
From all the livid east, or piercing north,
Thick clouds ascend ; in whose capacious womb
A vapoury deluge lies, to snow congeal'd.

First Quarter, 4th day, 4h. 47m. evening.
Full Moon, 11th day, 9h. 24m. evening.
Last Quarter, 19th day, 11h. 19m. evening.
New Moon, 27th day, 9h. 39m. morning.

ADDRESS.

To the Honorable the Legislative Council of Lower Canada, in Provincial Parliament assembled.

a Lord Gosford was sworn in as Governor General, 24th August, 1835, and Gazetted in London on the 19th June, 1835.

b Several of the members holding office have received orders to resign, but we insert their names here, as the new council is not yet formed.

The Honorable the House of Assembly of Lower Canada, elected in the year 1834.

Honorable L. J. PAPINEAU, SPEAKER.
