JAMES POOLE
Fire, Life, Accident and Plate Glass Insurance Agent, representing the greatest fire insurance companies of the world and the leading mutual fire insurance companies of Ontario. Office at residence, first door south of the Presbyterian church, Glencoe.

Did it ever occur to you that nearly all fireproof buildings are heavily insured?

Don't Submit to Asthma.—If you suffer without hope of breaking the chains which bind you, do not put off another day the purchase of Dr. J. D. Kellogg's Asthma Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

DISTRICT AND GENERAL

Premier Drury will assume power on Nov. 14.

A few cars of anthracite coal were received at Alvinston last week and sold at \$15 a ton.

The next big event in this section will be the Elgin Winter Fair at West Lorne on Nov. 18 to 21.

In Racine, Wis., you buy a ticket for one dollar and ride the street cars as much as you wish for a week.

Only 3,000 Canadian soldiers are left in England and the majority of these will sail for home this month.

A few mild cases of diphtheria were reported in West Lorne last week. The victims have all recovered.

President Wilson has set aside Thursday, November 27, as Thanksgiving Day in the United States.

The death occurred at her home in Strathroy last week of Nancy McGugan, wife of T. W. Atkinson, town clerk.

A number of cases of smallpox are reported from the township of Dunwich. All the cases are under quarantine.

London is afraid of a diphtheria epidemic, nine cases being reported, of which four children under 11 years have died.

The Christian Guardian says the new Premier of Ontario is a Methodist. Rowell, Hearst, Dewar, Drury—all Methodists!

The marriage took place in Detroit on Wednesday, October 25th, of Miss Iva Reader of Alvinston to George Lightfoot of Brooke.

Every eight persons on the Pacific slope in the United States has an automobile. The day of the legless human race may not be so distant.

A sudden slump of eight cents in the price of cured and uncured ham agreeably surprised Quebec housewives Wednesday morning. This sudden

decline is due to the order of the Government. Bacon has also suffered a decline of about six to eight cents per pound.

Stag Island has been purchased by the Oddfellows of Corunna and preparations will commence next spring to make the island a popular summer resort.

Apples are a very scarce article in this district this year. Those who have them for sale are asking \$9 per barrel for No. 1, and \$6 for No. 2 varieties.—Alvinston Free Press.

A Harwich farmer has laid a complaint, alleging that on Saturday when he went to water three of his horses he found that the initials U. F. O. had been painted on the horses' hips.

One trembles to think of what is going to happen at Ottawa when the Farmer M. P.'s find themselves paying 20 cents apiece at the Chateau for the potatoes which they sold for \$1.25 a bushel.

Two thousand members of the Independent Order of Oddfellows of Ontario are expected in London next June when a convention will be held in addition to the annual meeting of the grand lodge.

The "Cash and Carry" system is being tried out in Petrolia, apparently with good success. A few months ago the system was derided as being impractical but now it is said to be increasing rapidly in favor.

G. A. Brown of Leamington, probably the largest individual grower of tobacco in Canada, will this year realize about \$100,000 from his crop. His largest acreage was in Virginia Bright leaf, which brought \$85,000. The balance was Burley.

Number one well of the Petrol Oil and Gas Company, Toronto, at the farm of Charles Bagnall, Dover township, was shot Friday evening at 7 o'clock, as a result of which the countryside for three-quarters of a mile

was drenched in oil. Several experts were present and witnessed the most successful shoot ever made in Canada.

Wearied of the starched collar, the raw edge, the climbing tie and big laundry bills, demobilized British army officers are seconding the efforts of fashion makers to revive the Byronic bare throat and open shirt. "Our stiff-necked linen is to be consigned to the rag bag," writes one. The new fashion has the unqualified support of the medical specialists. They point to the bravery of the sailor man as example of what the décolleté shirt does for one.

Prior to leaving Goderich for Edmonton last week E. Sexsmith was presented with a purse of gold and an address by the peace celebration committee, in the presence of a representative body of prominent citizens. He was chairman of the feature committee of the peace celebration held there July 19th and it was through his efforts and ability that it was the most successful day ever held in Goderich.

While only a resident of the town a few years, Mr. Sexsmith was very popular in musical and social circles.

MOSA VETERAN HONORED

On Thursday evening, Oct. 23, a number of the friends and neighbors of Mr. and Mrs. Duncan Campbell, Mosa, assembled at their home to welcome their son, Capt. A. D. Campbell, who had recently returned after three and a half years' active service overseas. During the evening Capt. Campbell was presented with a handsome purse, and a service medal from Mosa township. Following the presentation was an interesting program of songs and speeches. Rev. D. Robertson presiding, after which the ladies served lunch.

PEACE CONCERT

A splendid concert in commemoration of the signing of the armistice one year ago was held in the town hall on Tuesday evening under the direction of the Soldiers' Aid Commission of Glencoe.

Outstanding features were choruses, "The Maple Leaf" and "O, Canada," by the high school girls, trained by Prof. Gordon; a scarf drill and a Japanese drill by the high school girls, under the direction of the teachers; solos by Mrs. Randolph McRae of New York and Mr. Charlton of Detroit; and violin selections by Prof. Gordon of Strathroy, besides an array of excellent local talent in readings, addresses, songs and piano selections.

Interesting motion pictures of the Prince's itinerary in Canada and of Canadian industries were shown by representatives of the Victory Loan publicity organization, and highly pleasing to the citizens of Glencoe particularly was the presentation of the Prince of Wales honor flag with crest. This was made by Mr. Barrett, county organizer, and was graciously received and acknowledged by Messrs. Poole and Hagerty, the local canvassers, and by Reeve Wright, on behalf of the town.

Mr. Lethbridge, our newly elected representative to the Legislature, ably filled the chair. There was an overflow audience and the proceeds totaled \$115.75.

WEST MIDDLESEX RETURNS

The referendum returns for West Middlesex are as follows:—

	Yes	No	Majority
Question 1	729	5,353	4,624
Question 2	783	5,299	4,516
Question 3	758	5,324	4,566
Question 4	1,162	4,920	3,758

Pay for Victory Bonds.

BUY BONDS, SAYS DRURY

E. C. Drury, Premier-designate, says: "The purchase of Victory Bonds is not only a patriotic duty, but an investment opportunity of most unusual merit. The bonds constitute the best and safest investment in Canada. I unqualifiedly commend the Victory Loan to the farmers of Ontario, and hope all classes will unite in this patriotic endeavor to make the loan an overwhelming success."

OPERA HOUSE, TONIGHT

Marion Ballou Fisk, of international repute as a gifted cartoonist and monologist, will give the third of a series of Chautauqua entertainments in Glencoe Thursday evening, Nov. 13, under the auspices of the I. O. O. F. Speaking of her recent appearance in Lindsay the Daily Warbler of that town says: "Mrs. Fisk gave a talented entertainment of cartoon drawings, talks, etc., and the variety of her drawings kept the audience in good humor throughout. It was a real treat, and as such, greatly appreciated and enjoyed."

Seating plan at Lumley's drug store. Prices—50c, 35c, 25c.

ARMISTICE DAY OBSERVED

In response to the proclamation of His Majesty King George, the first anniversary of the signing of the peace armistice was observed in Glencoe on Tuesday, when at 11 o'clock the flags at the public buildings were unfurled, the town bell was rung and two minutes were spent by the citizens in silent meditation on the great victory of the allies and in grateful remembrance of the brave ones who fell in its achievement.

Pay for Victory Bonds.

Fond parents dream of a bright future for their children.

They dream of the literary and musical education they are going to give their daughter, and of the high position she will take in her sphere of womanhood.

They dream of the education they are going to give their son and vision him some day as a clergyman, a famous lawyer, an eminent physician, a prominent financier, or a captain of industry.

But to make these dreams come true

Buy Victory Bonds For Your Children

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.

—or even partly true—requires foresight, planning and money.

To provide the money what plan so wise as to buy Victory Bonds for each child?

Thousands of parents bought Victory Bonds for their children in 1917 and 1918.

Surely you will be among the thousands of loving parents who will buy Victory Bonds for their children—this year?

Victory Bonds may be bought on instalments at such easy terms that every parent who so wishes may buy

HIS ROYAL HIGHNESS DELIVERS STIRRING MESSAGE TO PEOPLE OF CANADA

Heir-Apparent Appreciates Canada's Welcome to Him as King's Representative—What the Throne Stands For—Plea For Imperial Unity.

The Prince of Wales addressed 3,000 men assembled in Massey Hall, Toronto, on the occasion of his farewell visit to Ontario's capital. It was a memorable and historic occasion, for it was probably the first time in the annals of the Empire that an Heir to the Throne discussed at a public meeting the duty and functions of the Crown and the relationship of the Sovereign to the people. The tact and wisdom with which the Prince handled his subject, his breadth of vision and his rare personal charm, once again deepened the bond between himself and the people of the Dominion.

His Royal Highness spoke as follows: "Since I was last in Toronto I have been right across the continent to Vancouver Island and back again, which enables me to look better on Canada as a whole, and I think I can best express myself in military terms. The Western Provinces are like the outposts of the nation held by most gallant and enterprising outpost troops, who are continually pushing forward into the no man's land of the great Northwest. Ontario in the East is still the main body of the nation and the main line of resistance, and I congratulate you on the way in which your fine position is organized.

"I was much impressed by all I saw in the West and was attracted by the young and free spirit which I found there, and realized what a great future and development lies before it. Now for the last three weeks I have been back in the East, traveling in southern and western Ontario, and I have seen the country round the shores of your great lake, which was the scene of the fighting a century ago which saved British North America for the Empire, and was thrilled to think of the splendid fight which your ancestors of those days put up, and if it was anything like the way Ontario men fought in the great war it must have been pretty good. (Loud applause.) I have also been much impressed by the orderly and active look of the whole country, which bears a strong resemblance to English countryside, and is such a great contrast to the West. Knowing that Ontario was practically entirely virgin land only a century ago, I am full of admiration of what three or four enterprising and vigorous generations can achieve.

"But these last three weeks have enabled me to realize that the notion that the East is purely the industrial part of Canada as opposed to the West, which is the agricultural part, is wrong, and I know now that the agricultural produce of Ontario is the largest in the whole Dominion, and that your agricultural activity is as important as your industrial activity. This impressed me, because it makes me feel that Ontario comprises all the problems of the Dominion, and must, by the way in which it deals with its own problems, exercise in some respects a decisive influence upon the whole destinies of Canada.

"And I am particularly interested in the agricultural side of Ontario, because I have become a farmer in a small way myself, and have bought a ranch in Southern Alberta, where I hope to start in very soon and ultimately make good. As you know,

farmers in the West think themselves a very important section of the community, and I see that the farmers have recently been asserting themselves in Ontario, too, but let me assure you that I intend to be a very simple sort of farmer, who will not go in for politics of try to upset your ideas in any way. (Applause.) But, as a brother-farmer, I should like to pay a tribute to the farmers of Ontario, who have always been a very wholesome, respectable and energetic section of the community. I know they will always remember to think of the wider interests of the nation as well as of their own. It takes all kinds of interests to make a great nation, and Canada cannot afford to be one-sided. I hope, therefore, that Ontario will set the lead by showing that all classes may pursue their own legitimate interests without forgetting the welfare of the Dominion and of the Empire as a whole.

"The welfare of the whole Empire is, after all, the big question for all of us, and it has taken a new shape since the war. Because of their whole-hearted participation in the great struggle, the Dominions have entered the partnership of nations by becoming signatories of the Peace Treaties and members of the assembly in the League of Nations. The old idea of an Empire handed down from the traditions of Greece and Rome was that of a mother country surrounded by daughter States, which owed allegiance to that mother country. But the British Empire has long left that obsolete idea behind, and appears before us in a very different and far grander form. It appears before us as a single State, composed of many nations of different origins and different languages, which give their allegiance not to a mother country, but to a great common system of life and government.

"The British Dominions are, therefore, no longer colonies; they are sister nations of the great British nation. They played a part in the war fully proportionate to their size, and their international importance will steadily increase. Yet they all desire to remain within the Empire, whose unity is shown by common allegiance to the King. That is the reason why, if I may be personal for a moment, I do not regard myself as belonging primarily to Great Britain, and only in a lesser way to Canada and the other Dominions. On the contrary, I regard myself as belonging to Great Britain and to Canada in exactly the same way. This also means that when I go down to the United States next week I shall regard myself as going there not only as an Englishman and as a Britisher, but also as a Canadian. (Loud applause.)

"But, of course, this change of view which the Empire puts a new and very difficult kind of responsibility upon all of us Britishers. The war has shown that our free British nations can combine without loss of freedom as a single unit in vigorous defense of their common interests and ideals. The unity of the Empire in the war was the feature least expected by our enemies, and most effective in bringing victory and saving the liberties of the world. But now that the war is over they have still got to keep up that standard of patriotism and unity which we showed ourselves

capable during that long struggle. Unity and co-operation are just as necessary now in peace times as during the war. We must not lose touch with each other or we shall lose all that we have won during the last five years by our common action and effort against the enemy.

"I have only one more thing to say, gentlemen, and I ask you to again forgive me taking of myself. I need not tell you how deeply I have been touched by the wonderful welcomes which have been given me in every city, town and hamlet which I have visited in the great Dominion. These welcomes have been quite overwhelming, and I can never be sufficiently grateful to Canadians for the warm and friendly reception which I have received, nor can I ever forget it.

"But, gentlemen, I am not conceited enough to accept this welcome as in any way personal to myself, and realize that they have been given me as the King's representative coming to Canada as the heir to the Throne. My first visit to the great Dominion has made me realize more fully than ever what a great privilege and what a great responsibility all that confers upon me, and I value these welcomes all the more highly because they have come from the Canadian nation as a whole, from all sections of the community, whatever their race, whatever their party, whatever their education. I ask myself, what does that mean? It means that the Throne stands for an heritage of common aims and ideals, shared equally by all sections, all parties or all nations within the Empire. But despite this, there is a common sentiment which is shared not only by all nations within the Empire, but also by all political parties within each nation. We all know this because it was this common sentiment which made Britishers stand together in the great war, and I realize that this same sentiment has been expressed in the wonderful welcomes given me in Canada as heir to the Throne.

"I am afraid, gentlemen, that I have departed from my reserve and have talked about myself a good deal. But I wanted to tell you, as the largest audience I have been privileged to address in Canada, what I feel about my position and the responsibility which it entails. So I must again say how very grateful I am to you for your kind invitations and grateful to you for giving me this opportunity of addressing you. I can only assure you that I will come back as soon as possible and always endeavor to live up to my great responsibilities and try to be worthy of your trust." (Prolonged applause.)

POLICE OFFICER SHOT BY BURGLAR

Constable in Toronto Found With Two Bullets Above Heart.

A despatch from Toronto says:—In a local condition, with a bullet close to his heart and another in his abdomen, Police Constable William Milton of Dundas Street Station was found lying in a lane at the rear of 368 Yonge street early Friday morning by pedestrians who had failed to catch night cars and were making their way homeward on foot.

Constable Milton, whose home is at 38 Moscov avenue, was covering the lanes at the rear of Yonge street, and presumably caught burglars in the act of entering a store when he was fired upon.

Saves Soldier's Life and Gets Medal

New Shoreham, Sussex, Nov. 9.—A "land girl," Miss Peggy Fisher, yesterday was married to a young ex-soldier named Marshall, whose life she had saved.

Marshall fell down in a cow shed, and was being gored by a bull, when Miss Fisher rushed up, and by kicking the bull of the nose with her heavy hooped farm boots drove the animal away.

For her gallantry she was awarded the Distinguished Service Bar, the Victoria Cross of the Land Army. The brigade yesterday was drawn to church in a farm cart by twelve land girls in uniform.

British Air Mail to Europe's Cities

A despatch from London says:—The British Postoffice on Monday began an air mail service between London, Paris, Italy, Spain and Switzerland. Correspondence will be carried at half a crown per ounce.

RID UNITED STATES OF ANARCHISTS

Deportation Proceedings Instituted in Various Cities.

Washington, Nov. 10.—Deportation proceedings have been instituted in a number of cities to rid the country of the violent radicals caught in the nationwide raids which have been in progress since Friday, Attorney-General Palmer announced to-night.

Instructions have gone to all Department of Justice agents, the Attorney-General said, to permit no delay in instituting formal hearing preliminary to the actual deportation. Assurances have been received from other Government departments having to do with deportations that action would be taken to expedite the cases.

In the meantime the clean-up of the country will continue, Mr. Palmer announced to-night that there must be no "let-up." The total number actually held on deportation warrants had reached 301 to-night, while from some cities in which radical leaders were picked up reports had not reached the department.

Efforts of the department representatives, it was said, are being directed more particularly at the Union of Russian Workers. This organization, branded by the Attorney-General as the most dangerous anarchist group in the country, was said to have wide ramifications with the department agents still uncovering new evidences of its activities.

U. S. WILL ENFORCE COURT MANDATE

The Attorney-General Gives Solemn Warning to Coal Strikers.

Washington, Nov. 10.—Solemn warning was given the United Mine Workers of America to-night by Attorney-General Palmer that resolutions of conventions and orders of officers of organizations are not above the law.

Formal and final declaration of the Government's policy on dealing with the coal strike was announced by the Attorney-General while officers of the miners' organization at Indianapolis were struggling with the question how to answer the court's blunt and peremptory command to rescind the strike order.

Describing the strike as a plain violation of a Federal statute, Mr. Palmer, speaking with full authority of the Government, announced that all the power of the United States would be exerted to enforce the mandate of the court.

Although no reference was made in the Attorney-General's statement to the pronouncement of organized labor, supporting the miners and demanding withdrawal of injunction proceedings, it was evident that Mr. Palmer had that document in mind, and official Washington accepted his declaration to mean that the refusal of the miners to cancel their strike order would mean a fight to the bitter end.

PRINCE ENTERS THE UNITED STATES

Receives His First Welcome to Republic at Rouse's Point.

Rouse's Point, N.Y., Nov. 10.—The Prince of Wales entered the United States to-night and received his first welcome to the Republic at this little out-of-the-way New York town.

Officially he was greeted by Secretary of State Lansing with a beamed staff of admirals and generals in attendance, and the famous band of the 63rd United States Infantry, which played "God Save the King." Unofficially, he received a far more boisterous welcome from the 2,000 inhabitants of Rouse's Point who had waited patiently for hours in the bleak north wind to cheer the nation's guest.

Just before the train pulled out on its long run to Washington a man darted out of the crowd and shouted, "Will you give me the honor of shaking hands with you? I'm a Canadian, wounded and gassed at Vimy."

The Prince leaned over the rail and shook him heartily by the hand, and the train was off.

If you have a number of brood mares some of them should be rearing foals, and fall colts can be handled conveniently on a good many farms.

Grain and Live Stock

Breadstuffs.

JELICOE ON TOUR OF DOMINION

Admiral Reaches Victoria in Course of Journey Around Empire.

Victoria, B.C., Nov. 9.—With uniformed marines drawn up at attention and with the band playing stirring march music, the battle-cruiser New Zealand glided into Esquimalt Harbor at 2.30 o'clock Saturday afternoon, beginning Admiral Viscount Jellicoe's Canadian lap of his Empire tour. At 5.30 Lord and Lady Jellicoe went ashore, and met Lieut.-Governor and Lady Bernard, with whom they drove to Government House for tea.

COMMONS PASSES AMENDMENTS TO CANADA TEMPERANCE ACT

Dominion to Hold Referendum If Any Province Requests That Importation of Liquor Into That Province Be Prohibited.

Ottawa, Oct. 9.—The outstanding results of Saturday's sitting of the House of Commons were the passage of the Government's two bills dealing with the subject of prohibition and the acceptance of the Senate's amendments to the bill authorizing the Government to acquire control of the Grand Trunk Railway system. The more important of the two prohibition measures, that to amend the Canada Temperance Act, was not reached until the evening, and was the last item of business discussed. It excited a rather lively debate, and was amended in some respects before it was read a third time. The bill in its original form provided machinery whereby a province might prevent the manufacture of liquor within its territory, and importation from other provinces. The legislation provided that a Provincial Legislature, by resolution, might petition the Dominion

for a plebiscite upon one or both of the questions, whether or not manufacture of liquor within the province should be prohibited, and whether or not importation of liquor into the province should be forbidden. Within three months from the receipt of the petition by the Secretary of State, the Dominion Government was to submit the question or questions to the people and the view of the majority of the voters, at the plebiscite, was to rule.

On Saturday the provision for a plebiscite on the question of manufacture was deleted as unnecessary. It was understood clearly that manufacture for export was not to be prohibited, and that the other temperance bill which was passed during the sitting, that to amend the Doherty Act, forbids manufacture of liquor when it is known that it will be used in violation of the law of the province in which it is manufactured.

Honey—Extracted clover, 5-lb. tins, 25 to 26c; 10-lb. tins, 24 1/2 to 25c; 60-lb. tins, 24c; buckwheat, 60-lb. tins, 18 to 20c; comb, 16-oz., \$4.50 to \$5.00; 10-oz., \$3.50 to \$4.00 dozen.

Maple products—Syrup, per imperial gal., \$3.15; per 5 imperial gals., \$3.00; sugar, lb., 27 to 28c.

Provisions—Wholesale.

Smoked meats—Hams, medium, 36 to 38c; do, heavy, 31 to 32c; cooked, 49 to 51c; rolls, 30 to 31c; breakfast bacon, 42 to 46c; backs, plain, 47 to 48c; boneless, 49 to 52c.

Cured meats—Long clear bacon, 31 to 32c; clear bellies, 30 to 31c. Lard—Pure tierces, 23 to 24c; tubs, 30 to 30 1/2c; pails, 20 1/2 to 20 3/4c; prints, 31 to 31 1/2c. Compound tierces, 28 1/2 to 29c; tubs, 25 to 28 1/2c; pails, 28 1/2 to 28 3/4c; prints, 29 1/2 to 29c.

Montreal Markets.

Montreal, Nov. 11.—Oats, extra No. 1 feed, 90c. Flour, new standard grade, \$11 to \$11.10. Rolled oats, bag, 50 lbs., \$4.50 to \$4.55. Bran, \$4.50. Shorts, \$5.00. The Transcript

THURSDAY, NOVEMBER 13, 1919

CANADA'S FINE RATING

At the present time Canada's rating on the New York money market stands higher than that of any foreign nation; and it is possible for her to obtain funds on that market on more favorable terms than any other country. The reason for this, as any financier will vouch, is Canada's increased production and the prosperity she has enjoyed by the sale of her surplus products at favorable prices in Great Britain and Europe. This vast system of marketing was effected through credits for which Victory Loan subscriptions provide the working capital. If for instance the public should turn an indifferent ear to the Victory Bond salesmen now at work, our prosperity and credit would be impaired, our production dwindle and everyone would feel the menace of poverty. There is good reason to hope that Canadians are awake to their responsibility and opportunity.

The allusion to Canada's high rating on Wall St. brings up another phase of the loan question. While Canada can borrow abroad on more favorable terms than any other nation, it is not desirable that she should do so, for that would take large sums out of the country in annual interest payments. It would help build up the prosperity of the United States at our expense. It is much more expedient that Canadians should themselves be the lenders, and that the interest should stay in the pockets of her own people. It is profitable for Wall St. to loan money to Canada; it is equally profitable for Canadians to loan money to their country.

OUR IMMIGRATION NEXT YEAR

It is reported in London, England, that in 1920 Canada will witness the greatest tide of British immigration that it ever saw. At the Canadian offices in London during the past month (September) no less than 10,000 enquiries were received, including almost every vocation from a retired admiral with a pension of \$2,500 a year to the common laborer. One surprising feature is the amount of money generally possessed by these prospective emigrants. One man, with a wife and four children, has enough money to take them to the prairie provinces and a like sum in reserve. The Imperial Government is offering free transportation to all ex-soldiers and their dependents if they wish to settle in the colonies. And if this is true of Britain what about European countries? And in addition we shall probably have a very large immigration from the United States.

Internally and Externally it is Good. The crowning property of Dr. Thomas' Eucalyptic Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

CANADIAN OIL PRODUCTION

The Oil City, Pa. Derrick says:—Official figures of Canadian crude oil production for the first six months of 1919 indicate that the year's production from the Ontario fields will prove somewhat better than had been anticipated, though still considerably short of the figures for 1918, which was the best year in nearly a decade. The Mosa shallow field in Middlesex county, with a production of 108,988 bbls., provided over one-third of the 1918 production for Ontario. Indeed, outside Mosa, the older pools would, in the aggregate, probably show a slight advance for the six months. For the first half of 1919 the Mosa pool shows a 40 per cent. decline from the same period of 1918. In the second half of the year the decline will, it is expected, be even more marked. The Petrolia-Enniskillen pool, which last year yielded the lead to Mosa, has again come to the front in Ontario production, with a fair increase over the 1918 output. Increases are shown in the pools in Sarnia township, Plympton and Oil Springs. On the other hand, Bothwell and Tilbury both show a decline. The Dundas, Onondaga and Thamesville pools have a merely nominal production.

The decline in Mosa is primarily due to the failure to bring in new wells, which is the result of a comparative cessation in drilling operations. The Carman interests have been comparatively inactive till quite recently, and a few months ago drilling was, except for one or two outfits, reported practically at a standstill. There has been a little more activity recently. In addition to this, the old wells show a lessened production; though, after settling down to a small individual production, they may, as in the case of Lambton and Bothwell fields, maintain that diminished production for a good many years.

DONATION ACKNOWLEDGED

Glencoe Red Cross Society recently forwarded a donation of \$25 to the Queen Alexandra Sanatorium, London, and the secretary, Miss Mollie Tait, is in receipt of the following acknowledgment from the honorary treasurer:—

I wish to thank you for the donation of \$25 made by the ladies of Glencoe Red Cross Society. The money is being applied towards the payment of labor required for the making of a lawn bowling alley for the military patients at the Sanatorium. The patients, as you will realize, are not able to take any exercise which would involve any strain on their system, and it has been found that bowling meets the requirements very well. A new bowling alley has just been completed for the benefit of the men and it is felt will afford them much pleasure. I think that your members may properly feel that their contribution is in a real way contributing to the pleasure of the patients at the Sanatorium. Let me assure you that the interest which your organization is taking in the institution is very greatly appreciated.

Wedding invitations printed in the latest style and with neatness and despatch at The Transcript office.

THE VICTORY LOAN

The small investor is allowing the larger interests to gobble up most of the Victory Loan. If the bonds are good for the rich man, they are even better for the man of moderate means. Business opportunities are open to men of large means for the employment of profitable of spare capital. The average man must accept bank interest as a rule. Victory bonds are a special opportunity for the average man.

Large investors in Victory bonds are liable to taxation thereupon, while the ordinary investor does not come within the range of the tax collector because his total income is insufficient for this purpose. Yet large investors find the Victory bonds a good thing to acquire.

One of the features of the campaign is the very material way in which financial institutions and men of large affluence are increasing their investments in Victory bonds. What is the reason? Do they foresee the day when money will be cheaper, and the investments of this sound character rarer? If so, why does the man with a few hundreds hesitate to take his share and thereby assure to himself a comfortable return upon his money for fifteen years to come?

MOSA COUNCIL

A meeting of the Mosa council was held at Newbury on Oct. 13. Members all present. The minutes of the last meeting were read and approved. Moved by C. S. Morrison, seconded by F. J. James, that Wm. W. Johnston be paid \$40 in settlement of claim for damage to traction engine owing to defective culvert over Hagerty creek opposite lot 18, con. 4. Carried.

Moved by A. Gardiner, seconded by F. J. James, that the following accounts be paid:—

A. P. Ferguson \$2, Hugh H. McLaughlin \$2, Alfred Quick \$2, for services as fence viewers; Municipal World, \$1.89, for blank forms; John A. Leitch, \$4, Elias F. Reycraft, \$4, selecting jurors; C. C. McNaughton, \$6, for selecting jurors and making returns to clerk of peace; Dan Patterson \$4, John Mitchell \$4, Archie McCready \$4, for services as fence viewers; Robert McAlpine, \$1, for services as sheep valuator; C. S. Morrison, \$10, for constructing culvert cover on Hagerty creek opposite lot 18, con. 3-4. Carried.

Moved by F. J. James, seconded by I. Waterworth, that the by-law to provide for the construction of the Kelly drain be provisionally adopted, and that the date for holding a court of revision on the assessments in said by-law be November 15th, at town hall, Glencoe, at 11 o'clock in forenoon.

The council adjourned to meet at Glencoe on Nov. 15 at 10 a. m.

C. C. McNaughton, Clerk.

Miller's Worm Powders are sweet and palatable to children, who show no hesitation in taking them. They will certainly bring all worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

APPIN CHURCH ANNIVERSARY

Appin, Nov. 12.—Anniversary services held in the Methodist church on Sunday were a great success. Large crowds were in attendance both morning and evening. Rev. A. E. Jones of Blenheim gave appealing sermons which were much appreciated. The choir, which was assisted by Mr. Henry, Mr. Young, Chas. Hardwell, Mrs. Den, Laughton, Mr. McAlpine and Alf. Bardwell, rendered excellent music. A thank-offering amounted to \$143. Monday evening, although the weather was very unfavorable, a good crowd came to enjoy the good things provided for the annual tea meeting. The program was excellent. The Glencoe male quartette delighted the audience by their selections both grave and gay. Mrs. Turner and Ray Young were heard with much pleasure in their solo numbers. Miss Corinne Ross and Miss Pearl George and Miss Muriel Precious were much appreciated in readings and instrumental duets. Our own little entertainers, Olive Black and Earl Edwards, received for the rich man, they are even better for the man of moderate means. So much of the good things to eat was left, another tea was given Tuesday evening. Everyone who came enjoyed an informal time and a good program.

This, the twenty-second anniversary, will be remembered as a perfect success. Proceeds of tea meetings, \$95.

PROGRAM ELGIN WINTER FAIR

West Lorne, Nov. 18 to 21

Tuesday, Nov. 18.—Placing of exhibits from 10 a. m. to 4 p. m. Judging starts at 4 p. m. Public not admitted. Wednesday, Nov. 19.—School Children's Day. Buildings open to public at 1 p. m. Children's exercises from 2 to 6 p. m. Address by J. A. Dowdell of Essex. 8 p. m., practical demonstrations in judging poultry, corn and wheat by the show judges. Address by Prof. Geo. E. Day, Sec. Short-horn Breeders' Association. Thursday, Nov. 20.—Buildings open to the public from 10 a. m. to 10 p. m. 2 p. m., practical demonstrations in judging beef cattle by expert from Department of Agriculture. 8 p. m., addresses by Dr. Geo. Creelman, President Ontario Agricultural College; Hon. F. G. Macdunn, P. G. Cameron, M. L. A., and others. General admission to buildings, 25c. Membership tickets (entitling holder to admission at times) for if purchased on or before Nov. 18th.

Blank oil leases for sale at The Transcript office.

Alas! wipe the mud off your shoes before kicking a gentleman.

A WESTERN LETTER

Writing to The Transcript from Edmonton, Alberta, on October 6, Arthur A. Currie has this to say:—

I have been residing in Edmonton the last year. Was here fourteen years ago, and the changes in the city I am sure are much greater than what the changes would be at Glencoe. Fortunes have been made and fortunes lost here in that time. Some have become millionaires, and I know of others reported to be worth over a million who have lost all. I myself have had my ups and downs, yet am still plodding along.

Edmonton district is much favored with this year's crop. Threshing now is almost completed, with good yield and grade of grain, frost having held off much longer than in previous years.

I am real well now after recovery from a second attack of the flu, which was very bad here last winter. There are a few cases of it broken out again. I had a grand garden this year; it would astonish an eastern eye. With best regards to yourself and readers around Glencoe, etc.

RENEWAL TIME

November and December are the months in which most people renew their newspaper subscriptions for the coming year. You will save money and bother by handing in your renewals at The Transcript office. Clubbing rates in effect for a short time only:

Transcript and Globe.....\$5.25
Transcript and Mail and Empire.....5.25
Transcript and Free Press.....5.25
Transcript and Advertiser.....5.25
Transcript and Family Herald and Weekly Star.....2.75

Get your renewals in early; rates may advance after Jan. 1. Call or address Transcript Office only.

Prince of Wales Souvenir

The beautiful portrait of the Prince of Wales presented by The Family Herald and Weekly Star of Montreal is in great demand. It is certainly a souvenir that is worth while securing and retaining. The portrait is 16 x 22 inches, and is the best that has been seen. The Family Herald and Weekly Star always does the right thing at the right time, and the people of Canada owe a debt of gratitude to that great paper for providing this beautiful souvenir of the Prince's visit to this country. The portrait is in demand for this purpose. Yet large investors find the Victory bonds a good thing to acquire.

The Family Herald is indeed Canada's greatest family and farm paper and should be in every home. \$1.25 pays a full year's subscription including the portrait of the Prince of Wales.

Wedding cake boxes at The Transcript office.

SCHOOL REPORTS

S. S. No. 12, Mosa

Report for September and October. * Means absent for one or more subjects:

Sr. IV.—Sara Mitchell 89, Wm. A. Quick 82.

Sr. I.—Orville Towers, Lloyd Munro, Bruce Moore.

Primer.—Martin Walker, Ernest Moore, Dennis Giles.

Edna I. Patterson, Teacher.

WAS PIONEER OF NAPIER

The death occurred in Napier on Oct. 27 of Christina McLean, widow of the late James Gordon Sutherland of Napier, in her eighty-second year. Mrs. Sutherland was born in the township of London, and went with her husband to Napier in 1857. The country was new and they purchased the mill site from Capt. Johnston. In the following year they tore down the old mill and constructed fine buildings, which served for many years as a flour and woolen mill. Their enterprise enjoyed prosperity from the first. In 1889 Mr. Sutherland died, and she with her family carried on the business for a number of years.

SUFFERED DAY AND NIGHT

The Tortures of Dyspepsia Relieved By "Fruit-a-lives"

LETTER FROM D'OR, C. B.

"I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try 'Fruit-a-lives'. In a week, the Constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

ROSS LIMITED MANUFACTURERS Established 1888 LONDON - - - ONT.

Stint—sacrifice—save—for Victory Bonds. All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Tested 250,000 Miles Three-Point Suspension Springs Greatest Improvement Since Pneumatic Tires

OVERLAND 4 has been tested as no car has ever been tested before. 250,000 miles of mountain trails, desert sand, heat, cold, mud and dust, demonstrated the quality of every part of the car long before we began manufacturing.

This remarkable test showed conclusively that Three-Point Suspension Springs, exclusive with Overland, are the greatest improvement in riding comfort since the introduction of pneumatic tires.

Diagonal attachment of the Three-Point Springs at both ends of a 130-inch Springbase gives the road steadiness of the heavy car of long wheelbase. Equipment is complete from Auto-Lite Starting and Lighting System to Demountable Rims. The longer you ride in this car the better you will like it. Come and see this car. Ask for Booklet. Overland 4 Touring, \$1195; Roadster, \$1195; Coupe, \$1845; Sedan, \$1995. Prices f. o. b. Toronto, War Tax included, subject to change without notice.

Wm. McCallum - Dealer - Glencoe Willys-Overland, Limited, Toronto, Canada

If Your "Victory Bonds" Were Burnt or Stolen

They might prove a total loss. So with Stock Certificates Promissory Notes and other Negotiable Securities. Do not leave Valuable Papers at home or at the office, where there is always danger of fire or theft. Keep them in a Safety Deposit Box in the vaults of this Bank. The highest measure of security and protection against loss is afforded, at a small annual rental.

The Bowels Must Act Healthily.—In most ailments the first care of the medical man is to see that the bowels are open and fully performing their functions. Paroselle's Vegetable Pills are so compounded that certain ingredients in them act on the bowels solely and they are the very best medicine available to produce healthy action of the bowels. Indeed, there is no other specific so serviceable in keeping the digestive organs in healthful action.

PERSONAL AND SOCIAL

—Mr. and Mrs. Thomas Dykes purpose going to Florida for the winter.

—Mr. and Mrs. Harry Prizer of Rochester, N. Y., are visiting at J. D. Smith's.

—Dr. Weekes of London visited his sister, Mrs. Fred Aldred, on Sunday afternoon.

—Mrs. Suttler is spending a couple of weeks with her daughter, Mrs. Rayner, at Grimsby.

—Rev. C. H. P. Owen has been elected president of the Ministerial Association of Dutton.

—Mrs. Kerr and Miss Kerr of Bothwell are guests at the home of Mr. and Mrs. Fred Aldred.

—Mr. and Mrs. Harry Crow of Kent Bridge spent Sunday with Mr. Crow's sister, Mrs. Colin Leitch.

—Mrs. W. A. Currie has returned home from a visit to her parents, Mr. and Mrs. Ward, in Texas.

—Misses Mary Aldred and Bessie Smith of London spent the week-end with the former's parents, Mr. and Mrs. Fred Aldred.

—Mrs. Lou Hyttenraich and son Craig of Windsor spent a few days this week with Mrs. Hyttenraich's parents, Mr. and Mrs. W. G. Craig.

—Herman Archer, recently returned from serving with the overseas troops, is making a visit at the home of his mother, Mrs. Edward Archer, Glencoe.

—Misses Florence Mitchell and Kathleen Huston and J. D. Mitchell and Charlie Squire of Windsor spent the week-end with friends in and around Glencoe.

—Miss Stella Smith has resigned her office position with the Dominion Sugar Company, Chatham, and will spend the winter at her home in Glencoe, owing to the illness of her mother.

—Miss Cleo Sutton of Alma College, St. Thomas, accompanied by Miss Gilbert of Yarmouth Centre and Cameron and Miss Gretta Sutton of Talbotville, spent Sunday at the home of her parents, Mr. and Mrs. W. S. Sutton, North Glencoe.

—Mrs. R. M. McPherson received on Wednesday afternoon for the first time since coming to Glencoe, and her callers were greatly impressed with the charming personality of their hostess and the graceful manner in which they were received. The dining-room was artistically decorated in yellow 'mums' and the living-room in roses and 'mums', while the table appointments and gowns blended in a pretty harmony. Miss Alma McPherson of Kincardine and Mrs. J. N. Currie received with Mrs. McPherson.

—Mrs. Dickson ushered the ladies to the dining-room. Mrs. Davidson poured tea. Mrs. (Dorothy) Mrs. W. B. Wortman of London and Miss Ethel Copeland served, and Miss Margaret Dickson opened the door. During the afternoon Mrs. Wortman sang several very pleasing selections.

SPECIAL NOTICES

Fresh fish arriving daily at George's grocery.

Several young pigs for sale.—A. M. Leitch, Mosa.

For sale—box stove, takes 32-inch wood. Price \$4.—Transcript office.

Chopping Tuesday, Thursday and Saturday.—W. R. Stephenson, Appin.

Choice celery for packing, at the gardens on Saturdays.—David Squire.

Alex. McAlpine & Son, 15, con. 2, Mosa, lying south of the Grand Trunk Railway, from Colin McCallum of London.

Someone said the other night that there would be four candidates for next year's reeveship of Glencoe. Are the emoluments of the office so attractive as all that?

Dan Treastain and Tom Henderson attended a couple of large thoroughbred stock sales at London and St. Thomas last week and purchased several fine young heifers.

A county convention of the United Farmers of Middlesex will be held in London on Tuesday, Nov. 25, to receive reports and to elect a director for the county for the year 1920.

The third of a series of Chautauqua entertainments under the auspices of the Daughters of the Empire will be given tonight at the Glencoe open house. An exceptionally interesting evening is promised.

Calvin Hodgins of Wanstead attended the London and St. Thomas horse sales, and at the latter purchased the roan, Lady J., at \$605, and Lusterite at \$280. Returning with D. Treastain, he bought the latter's first prize roan, Lady B., of Marr brood.

Addressing the Montreal Canadian Club Saturday, Peter McArthur said E. C. Drury had told him that of the forty-five Farmers elected, not one had approached him to ask for a Cabinet position, something, said Mr. McArthur, most unique in political history.

Municipal clerks have been notified by the Provincial Department that a new system of registering births, marriages and deaths will be inaugurated at the beginning of the New Year.

The Strathroy Dispatch says:—Prof. Howard Gordon was in charge of the children's choir which greeted the Prince of Wales at Glencoe. Prof. Gordon's grandparents were tenants on the Balmoral estate of the late Queen Victoria, and on learning the fact, the Prince honored him with a handshake and a brief conversation.

Rev. James Malcolm, minister of the Presbyterian charges at Newbury and Wardsville, has accepted a call from Hornby and Omagh, in Toronto Presbytery. On Sunday Rev. G. S. Lloyd of Glencoe preached at Newbury and Wardsville and cited the congregations in the matter of the call.

Mr. Malcolm conducted the morning service in Glencoe.

At a meeting of London Presbytery in St. Thomas last week Rev. W. G. Rose of Delaware and Rev. G. M. Childley brought in a motion for a survey of the whole Presbytery, in an effort to strengthen weak charges by co-operation with the Methodist church.

Many felt that this method was not practicable at present on account of the time, expense and difficulties in the way, but Mr. Rose's motion was carried.

The most obstinate corns and warts fail to resist Holloway's Corn Cure. Try it.

The Daughters of the Empire will serve lunch every Saturday from 3 to 10, beginning with Saturday, Nov. 15. The regular meetings will be the 1st and 3rd Tuesday afternoons.

I have taken the agency for the Gray-Dort automobile, also the Chalmers, along with the Overland and Willys-Knight, that with the service I have always given ought to satisfy all customers.—Wm. McCallum.

Horses for sale.—one mare five years old, with colt by side 5½ months old; one gelding rising three years old; one filly rising two years old; one aged driver, quiet, not afraid of autos.

Also set of pump tools for making wooden pumps.—Edgar Munson, lot 17, con. 4, Ekfrid.

The annual meeting of The Gore Farmers' Club will be held on Monday, Nov. 17th, at 8 p.m. sharp. It is urgently requested that all fees be paid as promptly as possible in order that the books at the head offices may be in shape to audit. A good program is being prepared by the committee in charge.

Glencoe over the top.—Glencoe's objective of \$70,000 for the Victory Loan was exceeded by over 25 per cent. up to Tuesday night, when \$90,000 had been subscribed.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of Glencoe, Appin, Newbury and Wardsville, and at the office of the Post Office Inspector, London.

CHAS. E. H. FISHER,
Post Office Inspector.
London, 24th October, 1919.

Auction Sale
Under Mortgage

At Bees' Hotel in the Village of Melbourne, on Saturday, the 28th day of November, 1919, at 2 o'clock p.m., there will be offered for sale at public auction, parts of lots 3 and 4 in the 5th concession south of Longwoods Road in the Township of Ekfrid, and fully described in deed registered No. 7350, containing 164 acres more or less, which was owned by the late John Annett, subject to a life interest of his mother, Mrs. Nancy C. Annett, with brick house and two frame barns.

Terms—10 per cent. on day of sale, balance in 30 days thereafter, with interest at 7 per cent. per annum on unpaid principal.

Apply to The London Loan and Savings Company, London, Ontario, or to L. L. McTaggart, Auctioneer, Appin.

WHAT FARMERS THINK
The farmer's grievance is economic. He sees the skyscrapers and the marble palaces which his business rears in the cities, and is doubtful whether the cost to the country is not greater than the service. He has been urged to produce and he wonders whether all the bustling activities of the cities are productive, or whether many are not parasitical, sustained by the labor of others. He thinks there has been an overgrowth of cities at the expense of the rural districts.—Toronto Star.

The success of the Victory Loan is necessary to combine prosperity with peace.

Fat Turkeys Make Fat Pocketbooks.

Turkeys that are fat when marketed bring the best prices and, if the fattening is done in a systematic way, generally the largest profits.

Different methods are employed in fattening turkeys. The majority of growers prefer to feed two-year-old corn. This is given them from November 1 up to killing time.

Some breeders get more satisfaction from feeding one-third oats with two-thirds corn, and occasionally a meal of cornmeal mush. It is claimed that white-fleshed corn will fatten turkeys more readily and that the flesh will be of finer quality than when yellow corn is fed.

Turkeys must have liberty even while fattening, but given regularly two meals a day they will not be inclined to roam. If they are confined they will lose appetite.

The market demand is for medium-sized carcasses that are plump and fat. Very large turkeys do not sell so quickly. After the holidays birds weighing from eight to ten pounds sell best.

Only well-fattened stock should be slaughtered; there is no profit in marketing poor stuff. Food must be withheld for twenty-four hours prior to killing, so that the crop and entrails will be empty, thus lessening the danger of spoiling. Hens sell best in market.

When killing, tie the feet together and hang the fowl on a pole. Cut the throat and, after thorough bleeding, dry-pick the feathers. Let those of the head and wings remain. As soon as dressed plunge the carcass into hot water, and then into cold, to give the skin a fresher look.

Another method, one generally adopted by the English and Continental poultrymen, is by dislocation of the neck. The legs of the bird are grasped in the left hand, the back of the bird being upward and the crown of the head in the hollow of the hand. The legs of the bird are held against the left hip, and the head against the right thigh or knee. In this position the head is "strongly stretched and at the same time bent suddenly backward so as to dislocate the neck near its junction with the head. The bird is instantly killed, and plucking the feathers must be done at once.

Still another method is to hang the bird up by the legs, cross the wings to prevent struggling, and give a sharp blow on the back of the head with a stout piece of wood, which renders the bird insensible. Then insert the knife in the roof of the mouth, so as to pierce the brain, cutting it along the entire length. Let the bird hang by the legs for a few minutes to allow the blood to drain out. Plucking the feathers must be begun at once while the body is still warm. Feathers should be left on the neck about three inches from the head, and a few feathers on the tail and tips of wings; and care must be taken not to break the skin while plucking. Twist the wings on the back of the bird. As soon as the feathers are removed, the carcass should be hung up by the feet to cool—never hang by the head, for the

blood should be drained toward the head and become coagulated there.

Some poultrymen lay the birds on their breasts on a setting board, pressing the rump square, letting the heads hang down until the body is set, after which the birds will retain their plump shape.

Cleanliness in marketing is a very important factor. The feet and legs of the birds should be cleaned of all dirt. Any dirt or blood that may be on the heads should be removed. It is a good plan to tie up the legs of dressed birds, and if they are to be displayed in a shop, the head of each had best be pushed up under one wing.

Before being packed in cases the carcasses should be thoroughly cooled—not frozen. Pack in each case only birds of nearly the same weight, graded to within two pounds. In no case should any bird be lighter than the lightest weight nor heavier than the heaviest weight marked on the package. Pack cocks and hens in separate cases.

Wrap each bird in paper, but never use printed paper for this purpose. The head of each bird should be wrapped with a quantity of this paper to absorb the blood. Spread a small quantity of wood pulp or dry clean straw in the bottom of the case. Put paper on the bottom and top of the birds to keep them clean. Mark the cases plainly at both ends.

The Fall Calf.

I have found it rather more difficult to make a calf do well when it was born in the fall. For one thing it is colder usually than it is in spring, and this condition keeps on growing more so as we get into winter. The reason for this slower growth in cool or cold weather is that calves, like all young creatures, need to be kept warm. The baby is just the same war. Keep it warm and it thrives better. Warmth aids growth in the calf.

For that reason I try to have a warm and comfortable place for the calf that comes in the fall and is to be raised. A few days after the calf is born I like to take it away from the mother cow, and if I could I would put it so far away from the stable where cows are kept that the cow could not hear it when it bawls. Nothing is worse for a calf than to be within hearing of the calls of his calf. But not always is it possible to remove the calf so far. The next best thing is to care for the calf so well that it will not bawl much, and the cries it does make, if well fed, are not apt to trouble the mother.

Then, too, a dry place is necessary to comfort, and comfort is the one thing a calf ought to have to do well. The straw given the calf should be changed every day. The calf soon weans up a good deal of straw if it is placed where it can. Straw that has been used this way may be placed in the drop back of the cows and go out with the manure. It is good for little else. By shaking out the straw that has been under the calf and drying it we can save some of it for another time. Straw is so valuable in these days that we must waste as little as possible.

When the calf is weaned to the fall calf, and that is to furnish it as much green feed as we can. Grass cut from the after-feed may be used as long as the frost stays off. After that we have found it best to go to feeding hay. A nice lock of well-cured hay, clover or timothy, is one of the best things for a calf. Not only does it tend to make the calf grow, but it has a good effect in preventing bowel troubles. The juice from the hay is a good tonic.

To go with the hay, we need some grain. Especially if timothy hay is fed there should be some kind of a laxative grain given. I like wheat bran or mixed feed as well as anything I ever tried. The bran makes muscle and at the same time keeps the bowels regular.

It is not time wasted to brush off the calf regularly every day. It always seemed to me a well-groomed calf would grow faster than one that was rough and dust-covered all the time. It might not be thought that a calf's hide would get very much clogged with dust and scabs, but if you have not groomed your calf for a week or two, just part the hair and look closely, and you will see that the pores of the skin are badly clogged, and when that happens the calf cannot grow as fast nor assimilate its food as it otherwise would. A clean skin saves feed, for the calf uses to better advantage what is given it.

All the time we try to remember that we are dealing with a cow of to-morrow.

Don't Make a Garage of Your Barn.

Automobiles, gas engines and tractors should be kept in isolated buildings as far from the barn as possible. The number of automobiles owned by the farmers is steadily increasing and the fire hazard on the farm is increased accordingly.

It is an extremely dangerous thing to keep an auto or run a gasoline engine in the barn. Why should you take the chance of losing your season's raising of cattle, horses, machinery and your own back-fire or gasoline explosion. "Safety First."

Poultry

The hen that lays must be in the best of condition, strong and vigorous. Her eyes must be bright and clear, of a prominent "shoe-button" appearance; the comb and wattles large and red; the bill short to medium in size; the distance between the bill and eye narrow; the head of good size.

The body of a laying hen must be well set, with good back capacity (which really is egg-bell capacity); broad bodies, with ribs wide spread, afford plenty of room for egg and digestive organs. The body should be solid; the birds should not be loose jointed, but compactly built. The legs should set wide apart. The entire body should be neat and of the feminine order. There must be no physical defects nor deformities.

Heavy layers are up first in the morning, jumping from their roosts at the break of day, and going back only after it has become so dark that they are unable to pick up a bit of grain that might be hidden in the scratching litter.

The heaviest layers are also the heaviest eaters and drinkers. Their appetites and thirsts never seem to leave them, and their activity aids in digesting all the food they consume. The heavy layers can readily be picked by examining the crops' while the fowls are on the roost at night—a method that has considerable merit.

Good layers are late molters, but a late molter with yellow in her earlobes in October is not a good layer; the earlobes should be white. Since the laying season ends when molting has well started, no great risks will be taken by marketing the early molters when more room is needed.

There is more activity and nervousness in a good layer than there is in a mediocre one, and yet they are more easily handled. In using trapsnets I have found my heaviest layers to be my tamest birds, and they always seem contented and happy. They show more friendliness, yet they are elusive, but entirely unlike the poor layers which are shy and scary, and which will yell like Indians upon being caught.

McDairy

All feeders with horns should be dehorned before they are put on full feed.

"Dehorning" makes feeders more easily and safely handled and each animal has a better chance at the feeding trough. Also, dehorning avoids the bruised condition of the flesh and torn hides caused by cattle going either in the feed lots and in transit to markets, as well as excessive shrinkage in transit.

The most common method of dehorning is to saw the horns off. There are saws specially designed for the work.

Dehorning clippers are also used.

Cement Walks on the Farm

"You haven't very good walks out here in the country," I remarked to my country cousin, gingerly picking my way through the muddy barnyard as I accompanied him while he was doing his chores.

"No—not very good," he replied, smiling over the thought that I should expect to find walks on his farm.

And why not? Can any one think of one good reason why farm buildings should not be connected with walks? Why should there not be walks—cement walks preferably—from the house to the wood shed, to the chicken coop, to the hog pen, to the granary, etc. Thousands of trips between these places are made every year, dozens in a single day.

During the inspection of some hundreds of farms the writer has not yet seen a complete system of cement walks—or any other kind of walks—on a farm. As a rule the only walk extends from the front door of the house to the road, or from the side door to the driveway.

Every farmer understands how to mix cement and how to build things of it. The watering tank, the short driveway leading into the barn, the basement floor of the barn and the hog feeding pen all bear evidence of his familiarity with cement. Why, then, is nearly every farmer willing to plow

through the mud of the back yard and the barnyard during the spring and fall months of the year? On the heavier clay farms the mud is in evidence during every heavy shower of rain.

Considering the walks entirely from an economic standpoint, a good system of cement walks will pay. They are a labor saver. Even with all labor-saving devices much material must be carried. It requires no argument to prove that it is much easier to carry anything when one can travel on a good walk instead of plowing through the mud. Suppose the animals do walk on the one leading through the barnyard? If built correctly that will not injure the walk and a little care will keep it clean. And because it may not be practical to build walks everywhere is no reason why the walks should not be built in the most traveled paths between the buildings. Besides, the walks add to the attractiveness of the farm—make it a better-looking place—and give it an up-to-date appearance.

Plan a system of cement walks between your buildings. The cost of a few loads of gravel, the cement and your labor will be paid for many times during the coming years. The woman folk will certainly bless you, and you will wonder how you got along without them, once you become accustomed to their handiwork.—C. H. S.

especially where a large number of cattle are to be deborned and where they are deborned before the horn becomes hard and brittle. The chief objection to deborned with the clippers is that thin or hard horns are sometimes crushed or splintered, resulting in a wound that heals slowly. This objection is partly overcome by using clippers that are constructed with V-shaped blades which, when pressed together, bring four cutting edges against the horn.

The best time to deborn is in late fall and early winter, or during the cool weather of spring. If the weather is cool there is very little danger of wounds becoming infested with screw worms. However, it is best to apply some fly repellent, such as pine tar or one of the coal-tar products to wounds.

Pure Bred Sheep.

Any sheep raiser who purchases a pure bred registered ram of any recognized breed recorded in the Canadian National Live Stock Records or eligible for such registration for use in his own flock, and who has not previously used a pure bred registered ram shall be entitled to the annual premium of \$500 for two consecutive years provided he will comply with the regulations specified in Pamphlet No. 19 "Information Concerning the Policy Regarding Pure Bred Rams," issued by the Live Stock Branch, Ottawa.

This pamphlet will be sent free upon application to the Publications Branch, Department of Agriculture, Ottawa. It has been decided that the best way to prove the value of pure bred rams is to help every sheep raiser, who has not previously used a pure bred ram, to use his own flock for demonstrating the value of this practice. Therefore the Dominion Department of Agriculture will grant to bona fide applicants who comply with the above-mentioned regulations a sum of \$500 annually, for two years, for each pure bred registered ram. No individual sheep raiser shall be permitted to receive premiums for more than four rams. Regular forms to be used in making applications under this policy are to be found in the back of Pamphlet No. 19.

Save the Old Sacks.

Old sacks, lying around get to be something of a nuisance. If stored in the right place the time may come when they are real handy.

Ripped apart and shaken out well, they make good blankets to throw over the cows at milking time. They may be sewed together so that they will come far enough to protect the legs.

An old sack is a good thing to wipe off the horses with when they come in all wet and chilly. Get clear down to the fetlocks and up as far as the tips of the ears. Be careful when working round the ears. Some horses do not like it at all.

I have thrown an old sack over my shoulders when going from the barn to the house in a storm. Better to keep an old sack at the barn for that purpose, however.

If you ever get stuck in the mud with the auto, just put a few old sacks in front of the hind wheels. Usually the machine will walk right out over these. Some people carry a few old sacks under the seat just for use when caught in the mud. They take up little space and serve a good purpose.

In threshing time if we run short of grain sacks, the old bags come in handy. There is a temptation to fill them too full, however.

An Inexpensive Mash Hopper.

A self-feeder for pens that costs practically nothing, never clogs up, and never wastes feed is somewhat of a boon, according to my experience. It consists merely of a light wooden box about four inches deep suspended four or five inches from the floor, and a piece of one-inch mesh poultry netting cut to fit loosely into it. This wire is to be put on top of the feed. It settles down as the feed is consumed, and effectively prevents any from being thrown out. If a piece of heavier wire is bound in around the edge, this added weight will keep the piece of poultry netting in place even when the box is nearly full. The idea of having the whole thing suspended is to keep the hens out of the box, which it does.

These feeders are so inexpensive that there is no excuse for not using enough of them to feed even the most timid hens access to feed at all times, thus doing away with one of the chief causes of lowered egg yield in large flocks.

Concrete Floors Return Cost.

By increasing the value of manure produced, concrete floors for feeding stalls will return their cost in about one year. The extra crop returns from manure kept on concrete floors is due to the soluble plant food saved.

The cost of concreting floors generally amounts to about \$5 an animal in the ordinary feeding-stable, and the saving in manure is equal to this amount of every 1,000 pounds in live weight of steers or cattle fed for the year, as compared with animals fed on earth floors.

Concrete floors also make it easier to provide sanitary places for animals.

The stitching gave way in one of the straps of the harness. If we had not had a hand riveter, with a good assortment of rivets on hand, we would have been compelled to make a trip to the shop. As it was, five minutes fixed the strap and business went on all right.

The Value of Good Cooking.

Nothing sweetens life, assures good temper, dissipates disease and preserves health so much as good substantial food, enticingly prepared and wholesomely cooked. Yet how many homes there are in which this belief is not held!

In these topsy-turvy times of ours, when many men are doing women's work and many women men's work, I was not surprised the other evening, at an industrial exhibit, to see a man cooking and serving a meal in demonstrating a small electrical stove. Indeed, it delighted me to see such highly developed culinary skill in a mere man.

For, although cooking is the job of the woman in a home, there are many bachelors, without a mother or other woman relative to help them, who could with impunity learn to cook and cook well, instead of depending upon a restaurant for their meals, or perhaps a delicatessen store.

The person who appreciates the value of good cooking, has fewer ills than his neighbor who does not.

Questions and Answers.

My daughter, 10 years of age, had influenza and now her lungs are affected. Our doctor ordered her to a mountain farm. After two months

there, she became so homesick that I had to bring her home. She was failing fast and came back a nervous wreck. At home she seemed to improve at first, but she has constant fits of coughing and spits up blood. Is there a cure? This state has been trailing on, now, for six months.

Answer.—Your letter exhibits a sad aspect of that most pathetic of all diseases—tuberculosis. How often homesickness, and like emotions, retard the cure! In such a case as your daughter's, it is just as well that she should have left the sanatorium, no matter how excellent that institution undoubtedly was. The well-managed sanatorium is by far the best place for the tuberculosis cure; but if there is so debilitating an emotion as homesickness in evidence, the home was a better place. Your daughter at any rate acquired the methods and habits essential to the successful treatment, and these should be most faithfully practiced at home. All the sanatoria in existence could accommodate only five per cent. of the tuberculosis sufferers in the world, and many of the rest do get well if they are obedient to their physicians and do nothing else in life than "to labor to get well." Information regarding the management of this disease in the home, is being mailed you.

Fertilizing New Clover Seeding.

It is not so very common to fertilize new clover seedling, but the results obtained seem to indicate that this is an excellent plan to use. At first thought this may seem to be an unnecessary practice because clover is planted almost as much for the purpose of fertilizing the soil, principally by gathering nitrogen, as it is to obtain hay.

There are three good reasons for fertilizing: First, a light covering of manure greatly helps to prevent the young seedling from being killed out by frost. To a great extent it prevents the ground from heaving. Second, a comparison of the roots of fertilized clover not fertilized shows that the nodules on the fertilized seedling are from eight to ten times as large as the nodules on the unfertilized seedling.

Third, a much larger crop of hay is insured, not only because a good stand of seedling is obtained, but because the young plants have a supply of plant food. Clover, like all other plants, should have plant food.

The manure should be applied lightly in the fall or early winter following the spring seeding.

A small wire hair brush will free the carpet sweeper brush of hair, lint, threads and string.

Onions should be stored in a cool, dry and airy place. A close, damp and warm atmosphere will make the onions soft, excite them into growth and cause them to rot.

Removes Spavin Without Blemish

If an otherwise good horse develops spavin, avoid harsh treatments and irritants. The remedy is to fill the old reliable

DR. A. C. DANIEL'S ABSORBENT BLISTER

This is not a caustic. It cures all sorts of swellings such as spavins, curbs, splints, callosities, etc. It is a remedy that is simple, natural and effective. You can apply this remedy any number of times without leaving any scars or white marks. Try it and be convinced.

Remedy For Moss in Pasture Lands.

A good coating of ground limestone, or of slaked lime, will fix the moss. It comes in on our land, and lime will sweeten the soil. It may be well, also to sow some grass seed early in fall, harrowing the land if possible to cover the seed. Some white clover and also some white sweet clover seed might be added in the spring. If sown when the ground is lightly frozen the seed will cover itself. Timothy, red top (reclaimed seed) and June grass are the seeds to sow in the fall.

SELF-HELP.

In this period of envy and discontent, when a day is deemed uneventful when it does not show a riot, strike, lynching or bombing; when in the eyes of the discontented it is criminal to own anything and treacherous to be peaceful and law-abiding; when industry and thrift are regarded as old-fashioned and idleness and shiftlessness are at a premium, it is well for every person threatened with the prevailing type of industrial influenza or incultured with "I Won't-Work-I-am" to pause, think and take a serious survey of himself or herself.

Persons who complain the most and kick the hardest about "social and industrial injustices" and the "collapse of civilization" can never have looked in a mirror or felt of their own pulses. In nine cases out of ten the fault lies not in the times, but in the kickers themselves.

The present may be called a "crutch" age, when too many persons are leaning on "neighbors" and "brothers" and "sisters." Men who all their lives have been bolstered up by others seldom are good for anything when a crisis comes—and the nation now is in a crisis. Individuals who have been industrial learners all their mature lives are looking still for something to lean upon. Failing to find it, they "damn" the system and join the procession of Reels. They are "again the government" whatever it may be.

Our social and industrial organization needs no radical treatment; it does need a strong dose of old-fashioned "self-help." If every workman and every workwoman, every toiler and every producer, every individual who contributes anything to the sum total of each day's national growth and wealth would stop growing, get busy and take a table-spoon of "self-help" night and morning, a national miracle would be wrought in thirty days, perhaps less.

The greatest fortunes ever accumulated were the fruits of endeavor, with no capital to begin with but industry and ambition. These men have won most who have relied on themselves.

A man's best friends are his ten fingers," said Robert Collier, who with his wife, came to America in the steerage. Ninety per cent. of what is called genius is persistent industry. It is said that Bryant wrote "Thanatopsis" one hundred times. Gibbon wrote twenty years on his "History of the Roman Empire." Haydn once was an errand boy and a bootblack, yet he composed the contralto "The Creation" and was courted by princes and dined by kings and queens.

It is not necessary, however, to search the past for inspirations. Andrew Carnegie began his business career as a hunch boy at the age of twelve. He had no "crutch" but himself; he gave no thought to strikes, an eight-hour day or collective bargaining. The only "crutch" he had was marked "self-help," and many times he looked at it each day. He not only accumulated a vast fortune, which he distributed for the benefit of his fellow-men, but furnished indisputable proof to all who are prompted to desert, throw up their job and throw down their tools that opportunity is everywhere.

There is plenty of room without fees for membership in the best organization on earth—the Self-Help League.

Why Some Chimneys Won't Draw.

Building a chimney by extending the flue downward to the floor or into the cellar, makes a place for the accumulation of soot, ashes, etc., so as to save the expense of cleaning the flue; then the cold air below the pipe hole chills the entire column of air in the chimney; it is, therefore, heavy and impedes the ascent of the smoke. The remedy is either to fill the flue with cement to six inches below the pipe hole, or cut off the flue with a sheet iron plate, the plate to be covered with several inches of cement, so as to make it airtight.

The chimney of the kitchen may be much lower than the main part of the house. The wind blowing over the house falls like water over a dam, sometimes almost perpendicularly on the top of the chimney, thus it beats down the smoke contained therein. The remedy is to build the chimney higher, or add a smokestack to equal the height of the main building.

A building or a large tree may be near to and higher than the top of the chimney, so that the wind passing over it would blow down the chimney.

A new or green chimney will never have a perfect draft. It will not draw perfectly until it is thoroughly dry.

In building chimneys care should be exercised to avoid dropping mortar on the inside, which sometimes causes serious trouble by stopping the air course. A heavy weight may be let down by a rope and worked against the inside of the flue to force an opening.

Remedy For Moss in Pasture Lands.

A good coating of ground limestone, or of slaked lime, will fix the moss. It comes in on our land, and lime will sweeten the soil. It may be well, also to sow some grass seed early in fall, harrowing the land if possible to cover the seed. Some white clover and also some white sweet clover seed might be added in the spring. If sown when the ground is lightly frozen the seed will cover itself. Timothy, red top (reclaimed seed) and June grass are the seeds to sow in the fall.

YOUR BODY ITS OWN DOCTOR

HOW BLOOD MOBILIZES ITS DEFENCE.

When Attacked by Disease the Body Begins to Manufacture a Cure.

Every soldier, sailor, and ex-serviceman is familiar with the operation of inoculation. But what really is this process of inoculation which is attended by such magical results?

The dictionary tells us that inoculation is the communication of a disease by the insertion of infectious matter into the system. To a certain extent this is true, the newest method of preventive medicine being founded on the sound principle of setting a thief to catch a thief.

But the essential principle of inoculation as understood today is the raising of the resisting powers of the blood against disease germs.

It must be borne in mind that the healthy blood of a perfectly fit human being is of the nature of an all powerful and living germicide, competent to deal with and finally destroy the germs of any disease that may have invaded it. Microbes, though invisible to the naked eye, are constantly about us. We can no more escape their pressing attentions than we can dodge the presence of the atmosphere.

Our blood, then, while healthy, maintains a constant vigil on the ever-threatening microscopic army awaiting a chance to invade our bodies. The moment a few disease germs manage to effect an entry, be it through the lungs or swallowed with food or drink, or implanted by a sting, a pin-prick, a rusty nail, etc., or any other wound, the wonderful intelligence department of the body signals the news through the nervous system to headquarters.

Mobilization of all the complex defensive forces of the blood takes place at once. The white cells of the blood mass in their millions at the point of danger, giving the invaders an exceedingly warm reception. These white cells are the effective fighting units of the defensive force, the better known red cells forming the transport and commissariat service. Their particular job is to fall upon, gobble up, and entirely digest and annihilate the enemy individually and collectively, and this they do effectively, so long as the number is equal to the task.

Why You Should Take Exercise.
The white cells are, however, enormously helped in their fight by the use of a special kind of "munition" analogous to poison gas, used in a liquid form as a spray, to which the most malignant of enemy germs must finally succumb. This antitoxin (or counter-poison) is always produced automatically by healthy blood immediately it is attacked by disease germs.

When attacked by disease, the body at once begins to manufacture, and cure itself by its own medicine. That is why every infective disease, if it does not kill the patient, automatically comes to an end. Were it not a fact that every infective disease stimulates the production in the body of its own antidote, which finally kills the original disease, there is no particular reason why measles, or mumps, or influenza, or any other catching "complaint" should not continue for years. The modern treatment of tuberculosis by the injection or inoculation of tuberculin is founded on this principle of arousing the blood to the formation of the necessary antidote, which in course of time, provided the conditions are favorable, puts an end to the original disease—tubercular consumption.

Auto-inoculation or self-inoculation may also be produced in consumptives by a system of graduated exercises, which rouse the resisting powers of the body by raising what is called by scientists the "opposite index" of the blood. This opposite index is a measure of the rapidity with which the white cells eat any given germ in the blood. The name is formed from the Greek word "opson," which means a sauce, or seasoning, or anything that makes the morsel more tempting. These sauces are manufactured and used by the blood to make the disease germs so tempting to the white blood-cells that the former devour them with a relish that makes them greedy for more!

Exercises graduated according to the condition of the tubercular patient also act curatively by greatly improving the appetite, with resulting stimulation of digestion, absorption, and distribution throughout the system of food elements.

It was a Wonderful Watch.
"Like a lift, sir?" said the countryman, civilly, as he overtook a foot-worn traveler on the dusty road. As they jogged along they chattered about all sorts of things. Presently the old chap pulled out a watch of the turnip variety. "Can 'ee tell me the toime, sir?" he asked.

"Certainly. It is 3 o'clock," replied the other, as he watched the driver set his watch at twelve. Then he stopped him. "I said three o'clock, not twelve," he added.

"Oh, that be all right, sir!" said the carter, as he slipped his timepiece into his pocket. "He'll soon make that egg. Her be a wonderful goer!"

GENERAL DEBILITY FOLLOWING INFLUENZA

Strength Can Only Be Regained by Enriching the Blood.

Following a wide spread epidemic of influenza, general debility is on the increase, and its effects may be noticed in the worn listless appearance of so many of the men and women you meet. Influenza always leaves behind it impaired vitality, and with the modern conditions of life that use up nerve force so rapidly, general debility becomes one of the most common maladies. The symptoms of debility vary, but weakness is always present. There is poor digestion, languor, weak, aching back, wakefulness at night, often distressing headaches and a feeling of fatigue. These symptoms indicate impure and impoverished blood. It is significant of nearly every attack of influenza that it is followed by anaemia and debility.

For all such run-down conditions, new blood is the most reliable cure. Sufferers should, at once begin to make thin blood rich and red with Dr. Williams' Pink Pills. Under a fair treatment with this medicine they will realize more and more the health-restoring influence of good rich blood, and how this new blood brings a feeling of new strength and increased vitality. Proof is given in the case of Mrs. G. Robertson, Wingham, Ont.

"When the Spanish influenza spread over our town I happened to be one of the first attacked, and the attack was a very severe one, and worse still, the after effects of the trouble left me in continuous misery. I had severe pains in my side, felt low-spirited, and with no ambition whatever. My head ached almost continually, my eyes felt heavy, and pimples broke out on my face. I was advised to try Dr. Williams' Pink Pills, and after taking them for a time I felt like my old self, able to do my housework, and feeling well and strong. I can strongly recommend Dr. Williams' Pink Pills for the serious after-effects of influenza as I am sure they will restore all sufferers to good health."

You can get these Pills through any dealer in medicine or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

At times it is proper to be thankful that you are not as other men are; for instance, when you live in a good farming community, and the "other men" are hived in the cities.

Three Fashionable Models

A Well-Balanced Cereal

That is what Grape-Nuts food is called, because it supplies the vital mineral elements so often lacking in other foods.

Grape-Nuts

provides all the goodness of wheat and barley. It's easily digested and has a wonderfully likable flavor.

"There's a Reason for Grape-Nuts" At all Grocers.

World Shortage in Gems.

The jewelry trade is expecting a dearth of precious stones, says a London despatch. That is attributable to two main causes. The output fell during the war and a new demand has been created by the redistribution of money brought about by war. The demand for diamonds is expected to be catered to. With regard to diamonds the de Beers interests and a London syndicate of some half dozen firms, control what represents from 95 to 98 per cent of the world's output.

A few diamonds come from Brazil, British Guiana, India, Borneo and the Congo, but not enough to effect the market.

The output from the South African mines has not been up to pre-war level in recent years. Distribution has proceeded on the rationing principle, varied by the syndicate according to circumstances. Thus Antwerp has been allotted a good share to assist in the rehabilitation of the Belgian diamond-cutting industry. There are also developing markets in India and Japan, to which consideration has to be given.

It is estimated, however, that America still absorbs her pre-war proportion of diamonds, which was three-fourths of the total output. There is always a superabundance of money for those costly luxuries in the United States. Many more high grade stones could be sold there if only they could be obtained, notwithstanding that prices are now something like three times those of 1914 for certain qualities.

No manufacturer whose business is ordinarily dependent on diamonds can keep his factory going on the supplies now available and their energies are being diverted as far as may be into other channels.

A certain number of old diamonds cut by past generations of craftsmen are being put on the market to relieve the shortage. They are not greatly sought-after by the trade, however, because the progress of art and the changes of fashion put so many of them hopelessly out of date. They are generally "square and lumpy," whereas the present day style aims at a perfectly rounded effect. Old stones do not pay to recut for general commerce on account of the wastage and the high rates to which this class of labor has advanced.

The human body is subject to some 2,400 diseases, but normally a person is liable to seventeen, and physicians say probably will experience only half a dozen.

Canada has one mile of railway for every 224 persons.

Minard's Liniment Cures Gargat in Cows.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

Greetings to Prince of Wales.

A welcome to our soldier prince Upon Canadian soil!

Our vast Dominion greetings sends, May nought his visit spoil: Propitious were the winds which brought

His vessels o'er the sea; Hearty the homage waiting him: From hearts of loyalty!

Now Peace unfolds her pinions fair Upon the world once more; And all our soldiers homeward speed Back from the scenes of war. In Canada for whom they fought They're glad the prince to see; Comrade-in-arms on Flanders Fields They'd pledge him fealty!

Hurrah! How's This

Cincinnati authority says corns dry up and lift out with fingers.

Hospital records show that every time you cut a corn you invite lockjaw or blood poison, which is needless, says a Cincinnati authority, who tells you that a quarter ounce of a drug called freestone obtained at 10¢ the cost from the drug store but is sufficient to rid one's feet of every hard or soft corn or callus. You simply apply a few drops of freestone on a tender, aching corn and soreness is instantly relieved. Shortly the entire corn can be lifted out, the root and all, without pain. This drug is sticky but dries at once and is claimed to just shrivel up any corn without inflaming or even irritating the surrounding tissue or skin. If your wife wears high heels she will be glad to know of this.

Lost His Bet.

It was the commercial-room, and the conversation had turned on the topic of the powers of endurance shown by men of the past and present. During a lull in the conversation one young commercial said:

"Any man, if he has the will-power, can endure pain or fatigue; I know I can."

Silence for a moment, and an "old man of the reed" replied:

"I'll bet you a dollar you can't hold your foot—boots on—in a bucket of hot water as long as I can!"

The bet was taken, and two buckets of hot water were brought in, and a kettle of boiling water to raise the temperature to the point of endurance. The young one's face began to pale; but the other called for more boiling water.

"What the deuce is your leg made of, sir?" yelled the former, suddenly taking his foot from the bucket.

"Cork, sir—cork!" was the cool answer, and the other man felt that he had indeed lost.

MONEY ORDERS.

Send a Dominion Express Money Order. They are payable everywhere.

Vissecting the Frog.

The frog is the vivisectionist's favorite victim, not because his structure is at all human-like (though he is built somewhat like a man), but for the reason that he will endure being chopped up to a remarkable extent and still retain life. If his brain be removed he can get along without it, swallowing whatever is put into his mouth and otherwise behaving much as usual, though in automatic fashion. If the lungs are cut out he will survive for a long time because he can breathe through his skin. The corpulence of his blood being remarkably large, that fluid serves admirably for the instruction of the seeker after medical knowledge.

"With consistency a great soul has simply nothing to do. He may as well concern himself with his shadow on the wall."—Emerson.

"Give us courage and gaiety and the quiet mind. Spare us to our friends, often us to our enemies. Bless us, if it may be, in all our innocent endeavors."—Robert Louis Stevenson.

BITS OF HUMOR FROM HERE & THERE

Poor Teacher!
"Now, Johnny," said the teacher after much explaining against the use of "ain't," "why shouldn't we say 'ain't'?" "Because, ma'am," said Johnny, "there ain't no such word as 'ain't.'"

A Boomerang.
"Bertie," said his mother, sorrowfully, "every time you are naughty I get another gray hair."
"My word!" replied Bertie; "you must have been a terror. Look at Grandpa!"

No Time For Argument.
Old Salt: "Yes, sir, I fell over the side of the ship, and a shark 'e came along and grabbed me by the leg."
Visitor: "Good gracious! And what did you do?"
Old Salt: "Let 'im 'ave the leg, of course. I never argues with sharks."

The Resemblance.
"I am afraid," said the let-him-down-easy editor, "that I do not see my way to printing your poetry in my periodical. You see, it's not quite the style of thing we want, though it is undoubtedly remarkable—very remarkable. Do you know, young man, that there are some points about your writings that resemble Milton?"
"Do you, think so?" cried the delighted poet. "What are they?"
"Your stops," replied the editor. "Indeed, you employ almost the same punctuation-marks!"

Minard's Liniment Co., Limited.
Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the every day ills and accidents of life I consider it has no equal. I would not start on a voyage without it if it cost a dollar a bottle.

Schr. "Storke," St. Andre, Kamou-raska.

The Good Old Days.
In looking back along the years How beautiful the past appears! How much we praise "the good old days!"

We see them through the mellow haze Of "used-to-be"; and memory, Beyond a doubt, has tricky ways. We quite forget the pain and woe And sorrow that we used to know. All ills were born this very morn. The rose of memory has no thorn. Alas, to-day the world is gray And all the breezes sigh forlorn!

H.R.H. the Prince of Wales was given a beautiful costume by the Stony Cree Indians at Banff. The costume is made of snow-white deer-skin trimmed with ermine and embroidered in colored beads (royal blue predominated) by the most skilled women of the tribe. The work occupied six weeks.

For circulars and addresses: "Cuticura," Dept. H, Boston, U.S.A.

ISSUE No. 46—19.

GUARD THE CHILDREN FROM AUTUMN COLDS

The Fall is the most severe season of the year for colds—one day is warm, the next is wet and cold and unless the mother is on her guard the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose will prevent colds or if it does come on suddenly the prompt use of the Tablets will quickly relieve it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

World's Lightest Wood.
The lightest wood, in weight, that is known, is "Balau." Cork is three times as heavy as this wood. It can easily be indented with the finger nail. It is treated with paraffin and used in making floats of life preservers and in constructing life rafts.

Minard's Liniment Cures Distemper.
Clean legs and a clean skin on a horse will save many bushels of grain.

A statue in bronze of Queen Victoria is being shipped from England to the city in Canada which bears the Queen's name, where it will be placed on a lofty pedestal plainly visible to passengers on incoming ocean ships. The statue weighs two and one-half tons. It will pass through the Panama Canal and up the Pacific Coast on its forty-day journey to Victoria.

FOGGY?

If Bilious, Constipated or Headachy take "Cascarets."

To-morrow the sun will shine for you. Everything will seem clear, rosy and bright. Your system is filled with liver and bowel poison which keeps your skin sallow, your stomach upset, your head foggy and aching. Your meals are turning into poison, gases and acids. You cannot feel right. Don't stay bilious or constipated. Feel splendid always by taking Cascarets occasionally. They act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh pills. They cost so little too—Cascarets work while you sleep.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Headache, Neuralgia, Toothache, Earache, and Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all. Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin, the genuine Aspirin prescribed by physicians for over nineteen years. Now made in Canada. Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. There is only one Aspirin—Bayer. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocaceticacid of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Ask Your Druggist For Dr. Miles' Calendar For 1920

IT is FREE and the best large-figure Calendar published. It gives the weather forecast for each day in the year, also time of Sunrise and Sunset and phases of the Moon: "An exceptionally complete and useful Calendar!" That's what everybody says. The edition is limited. It is therefore very important that you call early so that you will be sure to get this splendid free Calendar at the beginning of the year.

Just go to your druggist, tell him your name and address, and that you want Dr. Miles 1920 Calendar. He will do the rest—FREE.

The Transcript.

THURSDAY, NOVEMBER 13, 1919

NEWBURY

Mr. and Mrs. J. E. Burgess of Dresden and Mr. and Mrs. Eddie Leech and family of Dutton spent Sunday at E. Leech's.

Mrs. Fisher, district president of the Women's Institute, addressed the meeting in the town hall on Wednesday. There was a good attendance. Lunch was served at the close of a very interesting meeting.

Mrs. O. Pransley returned home on Sunday after spending some time at her parents' home.

W. O. Kraft and wife spent Thursday in London.

Mr. and Mrs. R. J. Haggith are spending some time in Windsor.

Dr. J. P. McVicar and Mrs. McVicar were in London on Monday last attending the funeral of the doctor's brother, the late Neil McVicar.

Rev. James Malcolm has had a call from Hornsby. Rev. Mr. Lloyd of Glencoe preached in Knox church on Sunday citing the call. The community in general join with the congregation in wishing that Mr. Malcolm will remain with us.

There was no school in the senior room on Monday owing to Miss Chasey being called to West Lorne by the death of her grandfather.

Alvia Burr has taken a position in the Merchants Bank here.

Mrs. Dixon and granddaughter Mary Gray of Shetland are visiting Michigan friends.

Lorne Heatherington of Walkerville spent the week-end at Wm. J. Armstrong's.

Ernest Johnston of Windsor spent the week-end at the Commercial House.

Miss Ella Jeffrey has gone to Windsor for a month's visit.

Elmer Connelly and wife spent the week-end at Coatsworth.

SHIELDS SIDING

The Ferguson's Crossing Needle Club met this week at the home of Mrs. D. H. McLachlin.

Mrs. Angus Campbell visited recently at the home of her parents, Mr. and Mrs. Neil Leitch.

Mrs. McKinley, Brooke, and Mrs. Vosorough, Alvinston, spent Sunday with their aunt, Mrs. Nancy Ferguson.

John F. McTavish is in New Ontario on his hunting trip. Mrs. McTavish accompanied him as far as Toronto to spend some time with her daughter, Mrs. McLeish.

Mrs. H. A. McPine is in New York. Miss McDougall and Miss Grey of South Dakota spent the week-end at Archie Purcell's.

The U. F. O. shipped a car of hogs and lambs from Shields Siding. They expect to make a larger shipment in the near future.

Malcolm McVicar is erecting a new drive-shed.

John A. McLean has gone north on a deer-hunt.

The annual meeting of the Winnigdale club of the U. F. O. will be held in the schoolhouse on Friday evening, Nov. 14th.

Miss Mary E. Ward spent the week-end at her home in London.

CRINAN

Rev. Dougald Currie spent a few days here recently.

The Carman Oil Company has commenced to drill for oil on the Schellhauf place, con. A.

Colley Bros. have purchased the farm of the late Duncan McCallum on con. 2.

EKFRID STATION

On Monday evening, Nov. 3, a large crowd of friends and neighbors gathered at the home of Mr. and Mrs. Samuel McLean in honor of their daughter, Margaret, prior to her approaching marriage. A splendid program of songs, speeches, violin and instrumental selections was introduced by D. A. Campbell. A complimentary address was then read by Mrs. D. J. McLean and the presentation of a handsome cabinet of silver was made by Miss Alma McCallum. After partaking of a dainty lunch and expressing heartfelt good wishes, the guests dispersed, having spent a very enjoyable time.

ELMSVILLE

Miss Jennie McVicar of St. Thomas spent the week-end with her father and brothers here.

Mr. and Mrs. Gee spent Sunday with friends in Zone.

Miss Violet Plaine of Glencoe spent Sunday at her home here.

Add Ekfrid Station
Misses Evelyn and Mabel Booth of Detroit visited at W. P. Cornell's recently.

Miss Annie McCallum has secured a position in Walkerville.

A party was given last Monday evening at the home of James Tiffin in honor of a relative of theirs, a returned soldier, and his bride.

Services will be held in S. S. No. 4 Sunday evening, Nov. 16.

Keith Black has secured a position in London.

APPIN

The Appin W. I. had an interesting meeting in the Orange Hall Thursday afternoon. A very nice quilt was put up and quilted by the members while the regular business of the institute was carried on by the president and secretary. Among other things it was decided to have a social evening for the members themselves in the near future. The institute still has a few made-up shirts and some yarn, which can be had at a reasonable price.

J. Harry Campbell of Toronto visited his sister, Mrs. J. S. Macraut, for a few days.

Mrs. Dewett of Detroit is visiting at the home of Dan McIntyre, jr.

Neil Galbraith is hustling his garage through to completion these fine days.

Mrs. Harry Brown of Gleichen, Alberta, is visiting relatives and friends here.

Richard Pettit has beautified his house with a coat of paint, and also the post office.

Paint up is the order of the day. A carload of coal arrived here Tuesday evening. More coal is expected.

Miss Jeanette Lotan is recovering from an attack of throat trouble.

Now for the box social at Bethel next Friday evening.

Rev. Mr. Elder of Melbourne preached very acceptably in the Presbyterian church here last Sunday. Mr. McCulloch exchanging pulpits with him.

Mr. Mullins is improving in health slowly.

MOSA

The Church of Christ, Mosca, acknowledged the receipt of \$27.65, contributed by the Ferguson's Crossing Needle Club for missions.

Inspector Johnston's prizes awarded in the township of Mosca for teaching physical culture were won as follows: Miss McEachren, No. 2, 1st prize; Miss Pack, No. 9, 2nd prize; Miss Ward, No. 12, 3rd prize. Much credit is due these teachers, as it was their first year's experience.

Dr. A. D. Campbell has returned to Montreal after spending a couple of weeks at his home here.

WOODGREEN

Mrs. Geo. Wheeler and Mrs. Major Grover have returned home after visiting friends in Detroit.

Dan Watterworth, James Moore and Jesse Lumley were home over Sunday from Chatham.

H. Jackson of Windsor is spending a few days at Woodgreen.

Real estate is booming in this locality. The tax collector is around again.

"When is a sidewalk not a sidewalk?" was the riddle propounded to Magistrate Graydon in London one day last week, when one citizen charged another with violating a city ordinance by riding his bicycle on the sidewalk. The defence was that the walk in question was not a sidewalk, but a cinder path. After listening to the evidence the court came to the conclusion that a cinder path could not be considered a sidewalk, and dismissed the case, although he warned defendant that it would be better for him to walk on the walk if he found it impossible to ride on the road.

WARDSVILLE

The death occurred last week of the infant child of Mr. and Mrs. Dracey. Much sympathy is felt for them, as they had just moved here.

Mrs. John Bilton returned home from London last week.

Mrs. J. Mulligan is visiting her daughter, Mrs. C. Sheppard, at Detroit.

Mr. Gales and family of Pattersonville attended the funeral of Mr. Dracey's infant son last week.

Mrs. O'Neale and daughter Jessie of Beamsville are visiting Frank McGregor.

The body of F. Henderson, an old resident, was brought to the home-stead here for burial last week.

A Sunday School and Epworth League Institute was held in the Methodist church last Tuesday afternoon. Addresses were given by Rev. Dr. Brown of Morpeth, Rev. Mr. Jones of Blenheim, Rev. Mr. Penrose of West Lorne, Rev. Mr. McAllister of Ridgeway and Mrs. (Rev.) Husser of Wardsville.

Mrs. Jackson returned home Saturday after spending some time at West Lorne.

Wardsville, Nov. 5.—Albert Gale, the infant son of Mr. and Mrs. Henry Dracey of this village, passed away yesterday. Mr. and Mrs. Dracey arrived only a few days ago from South Dakota. They are making their home with Mrs. Purdy, Mr. Dracey's sister.

The quarterly official board of the Methodist church Monday afternoon appointed Frank Fry to attend the district meeting in Dutton Friday, Nov. 14, with A. G. Linden as alternate. The salary of their pastor, Rev. Dr. Husser, was fixed at \$1,350 for the year. H. Brimmon, H. Gaudner, A. J. McGregor, J. A. McIntyre, Isaac Waterworth, Henry Willick, Earl Tunks, A. J. Linden, Frank Fry and Isaac Saylor were appointed captains to look after the five departments in the Wardsville and Cashmere churches respectively for the national campaign.

Mrs. R. McLean leaves for New York on Tuesday to spend the winter there with her daughters.

The Wardsville and Mosca branch of the Women's Institute met at the home of Miss Ward. Mrs. Fisher of Glen Oak, district organizer, was present, and gave a splendid address on school lunches and child welfare work. Mrs. D. L. Purcell, delegate to the W. I. convention at London, gave a very interesting report telling of the discussions and also of the fine entertainments tendered there by the city people. Mrs. (Rev.) Murphy sang a solo.

CASHMERE

Elmer Tunks of Wallaceburg is spending a few days at his home here. Ross Willick is on the sick-list.

We are sorry to hear that Mrs. John McIntyre, sr., is confined to her bed with inflammatory rheumatism. Nurse Amelia Willick of Bothwell is attending her.

Wm. Matheson, who has been holding revival meetings in Wardsville for the past four weeks, will be in our church from Monday until Friday night.

Mrs. Hugh Taylor is confined to her bed with nervous breakdown.

Mr. and Mrs. Asa Webster and son Fraser of Dutton spent Sunday with friends in this vicinity.

Miss Beattie Willick of Bothwell is spending a few days with her brothers here.

CAIRO

Mr. and Mrs. D. M. Smith of Detroit were visitors here last week. On Tuesday they returned to their home.

Mrs. Hill and children of Highgate called at the home of Mr. and Mrs. J. A. Wehlann on the 5th inst.

Mrs. Gertrude Savage of Detroit spent Sunday at the home of Mr. and Mrs. Ed. Arnold.

A case of using threatening language preferred by John Watson against Joseph Miller, owner of south half west half lot con. 6, was tried in the town hall on Monday before G. A. Annett, J. P., resulting in Mr. Miller being bound over to keep the peace—and paying the costs.

C. J. Watson's disposal of his 300-acre farm last week to J. Downie of Aldborough for \$20,000.

Don't kick a man today because he is down. You may be down tomorrow. Don't be angry if your poem is returned with the editor's regrets. Preserve the manuscript and read it over ten years later. Then you will rejoice that it was thus.

ASSURE RELIEF FOR THE WORST HEADACHE
\$1.50 PER BOX
TEMPLETON'S 177 HERRING KING ST. W. TORONTO

Humanity has lacked a practical rheumatic relief for years. For years it has been yearly at hot springs, electric baths and hospitals to obtain relief, yet better results are achieved right home by using T.C.'s "the common sense treatment." Just compare cost of results with any other treatment and you will be convinced. Ask your druggist or write us for our new booklet; it is interesting and costs you nothing (Templeton, 177 King W., Toronto). We mail anywhere on receipt \$1.00.

Sole Agent for Glencoe, H. I. Johnston, Phm. B. Druggist, Optician and Stationer.

RUSSO KNOCKS OUT H. C. L.

Considering present-day values, these prices look ridiculous. Russo will continue to sell every pair of shoes, from the top shelf down, at prices that will bring peace and solace to every man, woman and child. Here is the most willful destruction of prices and profits that ever happened in Glencoe.

Yes, good people, it's true you might as well come direct here and save the time and trouble of shopping elsewhere.

LISTEN---We don't ask you to come and be talked into buying our shoes. You come, we promise to be as silent as an Egyptian mummy. We'll let the shoes, their styles, their values do the talking. That's surely a fair test. Put us to it, for there you make friends with the B. C. O. S. (Big Clearing Out Sale) and we make a customer for life. Tons of shoes massed to sell, and all at a price.

This sale will continue at knock-down prices until the entire stock is sold.

RUSSO - MODERN SHOE STORE - GLENGOE

The Best Values
Shown This Season in
Seal Plush Coats
at **\$55.00**
EXACTLY LIKE SKETCH

This sale is of added importance because of the great scarcity of seal plush of the grade presented in these garments. Shown in 36-inch models with deep shawl collar, cuffs and seven-inch border of Taupé Coney fur. Fancy silk lined and is warmly interlined.
