T HE chief development in the Russian theatre of the war yes-terday was the making of a further advance in the Carpa-thians by our eastern ally and the occupation of Jablonitza, beyond the central crest of the mountains, and in one of their most important passes. Two other points on the upper waters of the River Pruth were also reoccupied after the compelling of the enemy to retreat by strong pressure. This throwing of the Puesian lines to retreat by strong pressure. This throwing of the Russian lines forward is one outcome of the forcing of the Austrians to retreat from the Buczacz-Tarnopol salient, giving the Russians a straighter DIPLOMATS OF A line and consequently a line capable of stretching further southward. On the front of the Zlota Lipa, behind which the Austrians have reweated, the Russians are still engaged in throwing large forces across. (enemy is not announced, but the last alternative is probably the correct one. * ***

In the fighting in the Carpathians and on the Zlota Lipa River the Russians took nearly 1500 prisoners. From enemy sources it is known that they are in close contact with the Austro-Germans and that their superior weight is being steadily exerted. The resumption of their advance in the Carpathians, coming after the repulse of the Teuton offensive, undertaken about ten days or a fortnight ago for the purpose of arresting an invasion of the Hungarian plains, is calculated to draw off further forces from Galicia and Volhynia to defend. Hungary. The transference of these troops by rail involves a further additional strain on the Austro-Hungarian transport system.

1 ** * * * * Details of the engagement fought with the right flank of General Von Bothmer's retreating army at Tustoby, northwest of Monasterzyska, show that the Russians administered another telling blow to the enemy. Following the retreating enemy across the Zlota Lipa River, neaer the neck formed by the Dniester, where he had prepared trenches and barbed wire entanglements for the purpose of attempting a stand, the Russians drove him back in a five-hours' fight to a line on the western bank of the Gorojana River, four miles to the west of the Zlota Lipa. Heavy fighting continues to rage along the whole line of the Zlota Lipa, with the Russians forcing a passage at many points. On the left flank of Von Bothmer's army, General Sakharoff has made a further considerable advance in thirty hours' operations and he has cut the Tarnopol-Lembereg Railway at Zboroff, a new point, where the road crosses the Stripa River. Thus he has driven deeper the wedge between the armies of Von Bothmer and Von Boehm-Ermolli, west of Brody. Thus it is seen that the Russians are in a good position for the making of further progress towards Lemberg, and even for the winning of a decisive victory over the enemy.

* * * * * As rains continue on the Anglo-French front the soldiers have apparently been occupied in baling out their trenches and resting rather than fighting, for last night's British and French official communications agree in saying that there are no important incidents to report on the whole front. The usual artillery bombardment has been kept up at various places on the British front and the cannonade on the right bank of the Meuse has been lively. In the morning of yesterday the British general headquarters announced that some trenches temporarily won by the Germans northwest of Pozieres had been retaken. A raid was also carried out against the Germans established near the Mouquet farm and eleven prisoners were taken. On the Somme front the French dispersed a German reconnaissance party south of Belloy.

* * * * Further Austrian trenches on the Carso Plateau were captured by the Italians, according to the official communication issued at Rome yesterday. The attack was launched west of Sainte Grado and Monte Pecinka and 1419 officers and men of the enemy were made prisoners. Our ally also carried entrenchments in the hilly tract east of Gorizia and took 220 prisoners. Unofficial reports sent out from Switzerland say that the Italians are fighting in the suburbs of Tolmino and that they have reached a point east of Gorizia that is only 13 miles away from Trieste.

* * * * * It was said in the house of lords by the Marquis of Crewe yesterday, in reply to a question, that Germany has broken her pledge to the United States not to sink ships without warning and without providing for the safety of passengers and crews. Seven cases of clear violation of this promise were cited. Lord Crewe also said that the allies will make a definite declaration as to the policy that they intend to pursue in regard to the monstrous proceedings of submarines. He said the more public attention was called to these monstrous proceedings, in the meantime, the better it would be from every viewpoint. If one should judge from this intimation, one would conclude that more effective measures than those employed in the past are going to be adopted by the alltes in the future to solve the submarine problem.

The speech of Edwin Samuel Montague, minister of munitions, in The speech of Edwin Samuel Montague, minister of munitions, in house of commons yesterday discloses a marvelous development in the manufacture of munitions in the United Kingdom. As an example of British production, he cited the output of heavy howitzer shells. As many of these are turned out every four days now as were turned out all last year. A fourteen-fold increase in the production of machine guns and a sixty-fold increase in the outturn of high explosives are two among many of the great developments of British industry.

Hand-made Indian Rugs at Half Price

EATON'S DAILY STORE NEWS

From the Land of the Taj Mahal—That Great Temple Typical of the Mystical Eastern Realm Over Which Floats the British Flag—Come These Handsome Rugs. Suggesting in Every Detail of Design and Color the Spirit of Romance and Mystery for Which India is Far-famed.

NDIAN BLUE, A LOVELY CLEAR TONE NOT TOO INTENSE, predominates in several and combines in true Oriental fashion with green, red, gold and ivory. A rich green rug has a conventional border and the centre quaintly decorated with single flowers such as grow only in the imaginations of the occult East.

BLUE AND BUFF with touches of soft green seem odd as a color scheme for an Oriental rug, but these are charming in the softness of their pastel

tones and would be delightful for bedroom or boudoir for which so few high-grade rugs are suitable because of their bizarre colorings.

NAVY BLUE AS THE BACKGROUND and bright green and red in the small all-over design make a rug specially adapted for den or library. Red with dull grey-green in an odd "squared" design is another exceptionally attractive pattern.

EXCELLENT WEARING QUALITIES characterize all these East Indian rugs as is usual, in the hand-made article. The designs are distinctly different from others, for as much contrast exists between various types of the Oriental as between these and European or American styles.

The Methodist community of the Earlscourt district have decided to re-move the old portable building, which has served the Oakwood district for the past two years, to the West Fair-bank district to be placed on a site **ON BLOOR ST. VIADUCT** near the Ratepayers' Hall. The building, which is a five storey frame structure, is sixty feet by twenty feet, and capable of senting two hundred people. Student Pastor W. G. Day is in charge of this thriving section.

> ALSIKE CLOVER CROP **PROMISES BIG YIELD**

Keports from the country districts be-tween Lake Ontario and Lake Simcoe thrucout the length and breadth of the county all seem to indicate that the yield of alsike clover this year will run from four to six bushels to the acre, and in some districts as high as seven bush-els. The alsike crop is an important one thru the Counties of York and Peel, especially the former, and the success or failure of the crop means a great deal to the farming community. The price is said to be running in the neighborhood of \$8 per bushel.

WORK IS PROCEEDING SLOWLY.

The work of cutting out the concrete roadbed on Yenge street from the C.P.R. tracks to Farnham avenue is proceeding verly slowly, more than a week having been lost since the beginning of the work. The Toronto Street Railway Com-pany claim that progress on the job has been greatly delayed thru the ac-tion of the city. The roadbed is now excavated as far north as Walker av-cnue, and the rails laid a little beyond Shaitesbury averue. It is not considered likely that the cars will be running as far north as Farnham avenue in time for the exhibition in view of the delays that have taken place."

vester of a strate de construit inter out vance over that of the preceding day, No. 2 new crop being quoted at \$1.22 to 11.25. The Chicago experts in the Canadian west, whose sensational reports of rust damage were responsible for the starting of the big rise in wheat prices last week, are still interi on destroying the crop. Le Count, for instance, wires that the Saskatchewan Government report saying that there is no black rust in that pro-vince save in a small area, is not true, as the principal wheat area is rusted. Le Count adds that frost would damage 7p per cent. of the crop, and that as the harvest will be late, he is convinced that the crop will be light. Recent reports from the best posted Canadian grain authorities do not bear out Le Count's pessimistic utterances, but indicate, rather, that pessimism has already been overdone. At the present time the railways are taxed to capacity to handle the extensive shipments of grain from the 1915 crop that are now being rushed to market to clean up the old crop, About 200 cars a day, of wheat are being shipped now over the C.P.R. lines out of Alberta alone, From September 1, 1915, to the first of this month this road handled 88,832,000 bushels of wheat to be sent out of that increase of about 400 per cent. The meteorological office reports fair weather in the west, with the outlook for fair and warm in Manitoba and saskat-ohewan and generally fair with station-ary or lower temperatures in Alberta.

be made to—Canadian Headquarters, St. James Square, London, England. Steel Erectors Wanted. Battalion commanders who have any steel erectors in their units have been asked to have them report to Major Barry, the camp engineer, to assist in completing the erection of the big new water tank at the east end of the camp. A certain number of linemen and wiremen are also needed from the battalions to complete some

urgent work within the camp lines. "Soo" Battalion Arrived. The 227th (Sault Ste. Marie) Battalion, Lt.-Col. A. F. Jones commander arrived in camp this morning. It is occupying the area in the 5th Brigade, previously filled by the 124th "Pals" Battalion.

Soldiers Like Bombing. Bombing instruction is one of the most important phases of the soldiers' training here. Four new areas for bombing instruction are now being prepared. These are in addition to the bombing school already established at the northern end of the camp. The new bombing areas will each be used by two brigades. Particularly good

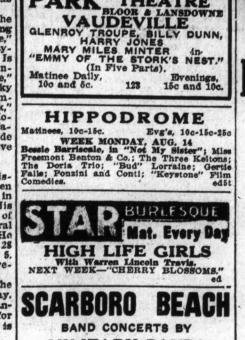

progress has been made in the work on the area just east of the railway depot. It will serve as a bombing training ground for the men of the

8th and 9th Brigades. Under direc-tion of Licut. L. Lott, bombing officer for the 8th, and Lieut. G. C. Lang-

ford, bombing officer for the 9th, first and second line trenches have been vise you. dug. There are also communicating trenches, machine gun posts and other features of the front line over

seas.

WINDSOR, Aug. 15.—Fully 800 torses are gathered here for tomorrow's cpen-ing of the second meeting of the Windsor Jockey Club.. There are a number of owners among the lot that are racing here for the first time in several years. J. C. Ferris is one of them; he is return-ing to Windsor after an absence of seven years. W. H. Fizer is also here with his stable. The program offered by the club is a

ing to Windsor after an absence of seven years. W. H. Fizer is also here with his stable. The program offered by the club is a well-balanced one. There are seven races on the card, with the Detroit and Windsor Ferry Handicap the outstanding feature. Large fields are named in all but the first race, which is a sprint for Cara-dian-brea two-year-olds. Repton was claimed after he won at fort Erie on Saturday. His new owner is W. Stormont. Privet Petal was taken out of the same race by the Kentucky horseman, G. L. Strang. Another effort will be made to solve the selling race problem, and, at the suggestion of Walter Parmer, a new rule will be adopted at this meeting, which, it is hooed, will stratifient out this matter. The following notice was posted in the secretary's office: Mi top and bottom selling races in the book will stand as they are, the winner to be claimed for the entered price plus \$200. In all other selling races, including fandicaps, the winner shall be offered for his entered price plus the first money Advance on same shall be divided 5, 30 and 20 per cent, between the sec-ond third and fourth horses.
