"FOSTER HOUSE" TABUSHIAC.

Miramichi Advance.

Business Meeting.

The complaints made generally by fishermen of the Chatham, all along the river, against the treatment they have of late, received from the Fishery Officers indicate that the course pursued towards them is not calculated to benefit any interest concerned.

Seizures of nets have been made for alleged illegal fishing, without the fishermen, in many cases, being aware that they were violating the law and, in most cases, under circumstances which show that the Officers have sought to further some object, or serve some purpose beyond the protection or conservation of the fisheries.

We hear of poor men, who had largely depended on the fall bass fishing to assist in providing for the necessities of their families during the coming winter, having their nets seized and kept from them. This has been done, not because of any intentional violation of the law, but owing to the fishermen being unable to make applications for licenses prior to putting their nets out, the Overseers and Wardens being located inconveniently for anything save their own interests and appearing rather to seek opportunities to entrap fishermen than to inform them of the law and assist them in keeping it.

It is against all correct theories of popular Government and public officers to act as persecutors of the people, but the Fisheries organization of this County, as at present directed, is calculated to encourage lawlessness by a policy of oppression.

It is believed, in some quarters, that after the fishing season has passed a large proportion of the nets seized will be handed back to the owners with a view of placing the latter under political obligations to the dominant party in Dominion politics. If this be true it will appear that the poor fishermen have been wantonly and undeservedly deprived of their fall fishing in order that political influence over them may be secured. Such a course would be a piece with the whole conduct of fishery affairs on the river of late years and cannot but result in disgusting everybody with such a system of management.

We are informed that it is the intention of the Department not to allow the Chatham fishermen the privilege of catching smelts the coming winter. To accomplish this end smelt-fishing is prohibited in the Miramichi off Chatham, as far down as the lower end of Middle Island. Our readers know how and by whom this has been brought about. They are familiar with the systematic misrepresentations sent to the Department concerning the slaughter of young bass by our fishermen and will not wonder that, aided by his willful instrument among us, the Inspector for the Province has been enabled to realize another of his vindictive threats against Chatham. It is not easy for our people to understand why they should be at the mercy of such malevolent rule, and it is because they are prevented from making the right appeal in such matters, and that their interests seem to be forgotten in other respects, by our Dominion rulers, that so great a number of them long for a return of the good old days before Confederation, when they could make themselves heard by the Government and no official at St. John or elsewhere, could long prevent them from receiving justice. This last prohibition is one that enlists a great sympathy for those whom it deprives of employment and food. They belong to the least thrifty class of those who engage in our winter fisheries. Living in and near the town, they accept such work as they can get to do in carrying dead or working about the ships in summer, and their income from such employments is only sufficient for current requirements. They have accustomed themselves to engage in the smelt-fishery almost as soon as work at the mills and on the ships has ceased, in order to provide themselves and families with food and keep the wolf from the door during the long winter. It is cruel and almost inhuman that through the malicious misrepresentations of persons living amongst and knowing the circumstances of these poor people, backed by the vindictive and persistent efforts of such a person as the Inspector of Fisheries at St. John, poverty and want should be intensified, and the means which a kind providence has sent to relieve the poor of some of their distress, be denied to them. A few years ago such a restriction would not have produced the misery and want it will bring during the coming winter to a good many obscure houses, for times were better. Then, the laboring classes had good employment and were receiving high wages, while others were in a better position to relieve any cases of comparative want that existed. Now, we are suffering from great depression of business, which has lessened our employment and lowered wages, involving a tenfold increase of poverty and destitution among the poor. It is, therefore, a burning shame that, at such a time, our poor should be forbidden to catch the fish which about at their very doors. The public will execrate such treatment of a helpless and deserving class, and those who have caused it to be imposed upon them.

The First Question Again.

The Sackville Transcript in the course of an article showing the bad faith kept with the people of the Maritime Provinces by the Protectionists, deals with the relative difference between the price of grain and that of flour, as showing that the duty has really, by so much, increased consumers' bread. It says:—

"But grain, not only the correctness of the price lists furnished, but also the soundness of the conclusions drawn from the premises, which these lists furnish; and what becomes of the statement so often reiterated in the East that the duty on flour would not and does not increase the cost to the consumer in the Maritime Provinces? It may be that an addition to the price paid by the inhabitants of the Lower Provinces on account of the duty does not, as we might be led to infer from the articles of the Mail, result in an addition to the cost of the necessary life to the dwellers by the sea. A vessel

takes a cargo of fish, lumber, grindstones, building stone, plaster or any other article to a United States port. If the shipper is privileged to bring back flour, he returns, freight, without being met by a hostile tariff of being bothered with looking up flour that has been passed "in bond" from Canada with certificates and affidavits, he could frequently put it down as his own flour, and save money that can be brought from Ontario.

"It should be remembered that the article, that has provoked these remarks, was written to soothe the irritation which the farmers of the West feel under the work of our tariff. Such an article would not be directed to the people of this section of the Dominion. See what a charge the Mail brings against the policy and administration of the Liberal party. It says:—

"On every hand the Canadian farmer occupies a better position to-day than when the administration of the late Reform Government, which, while pretending to befriend the agricultural interests, was really a measure of oppression, which would satisfy the demands of New Brunswick free traders, who were ever clamoring for cheap breadstuffs, even though such policy might bankrupt every Ontario agriculturist."

The true spirit of Sir John and his party is displayed in the last paragraph. Let those who remember the arguments used during the Confederation canvass by Sir Leonard Tilley and other champions of that policy, contrast them with the position they are really in to-day. They were helpless to resist what they pledged their political honor and character would never be attempted, and they have sacrificed themselves, as Liberals and representatives of the Government, to a policy of oppression, by assisting to bring about the very condition of things foretold by their opponents. Is it to be wondered at, then, that those who helped them to carry Confederation, are now prepared to reject the political deception and fraud practiced upon them?

Mr. Adams and the "Advance."

A Fredericton paper, called the Star, attempts to take a great interest in Hon. Mr. Adams and we perceive that the friend and companion of that gentleman who edits it, is not only quoted by Mr. Adams to abuse the "Advance" through its columns, but also to contribute to the columns of the "Advance" sundry threats against the editor of this paper, by name, promising terrible relations, unless we let Mr. Adams alone. Of course, such threats are as idle as the author of them is vile. In consequence of information received from an authoritative source we might, but for the threats referred to, have dealt further with the position of Mr. Adams in the Cotnam-Dumville matter, and that not to Mr. A's prejudice. Now, however, we merely say that no amount of writing, such as that emanating from the Star office, can prevent us from expressing, as occasion may require, what we think of Mr. Adams as a public man. We know him as one who has broken faith with political friends, who has treated him, one who has used his public position to further the private interest of himself and friends; who has bartered public interests to gain political support and has sullied himself dozens of times with those who were once his political friends, but who could no longer be without losing their political self-respect. At the proper time we shall press home our reasons for this position with political friends who cause his friends to threaten us, he must not be disappointed if we resent it.

THE QUEBEC GOVERNMENT OF Mr. Joly.

Mr. Joly has been defeated by six majority. Messrs. Flynn and Paquet, two of Mr. Joly's former supporters have been elected to the Government with Mr. Chaplan as Premier and Mr. Gagnon as Minister of Education.

OUR SAN FRANCISCO LETTER published this week is, as many of our readers will perceive, from Mr. W. T. Garman, late of Chatham and of the ADVANCE establishment. We assure him, notwithstanding the opinion expressed in his first paragraph, that his letters are always welcome and interesting.

SCHOOLS.—On the 1st page we commence our report of the School examinations in town, which took place last week. The record shows excellent work in quality, variety and volume—with, perhaps, a little too much of variety.

RAILROAD TRAVEL must be easy and pleasant on the Chicago and North-western, between Chicago and Denver, as shown by an article on the fourth page.

Farwell to Mr. Oakes.

We regret that the school matter that came in earlier, and our report of the storm, etc., leaves us but little space in which to refer to a very large meeting of the pupils of the schools of No. 1 District, and their parents and other citizens, which took place in the Grammar and High School room on Tuesday evening. The meeting was organized by F. E. Winslow, Esq., Trustee, being moved to the Chair, by Master Ernest McKay, seconded by Master Mayfield. The pupils alone appeared to be in the section for the purpose of the meeting, but the chairman was soon enabled to state that a presentation was to be made to Mr. and Mrs. Oakes. The pupils sang "Pulling hard against the Stream," and Master Stafford Benson stepped forward and read the following address:—

To F. E. OAKES, Esq., B. A. Principal of the H. S. School, Chatham, N. B.

We the pupils of the Chatham High and Advanced Schools, having heard of your intended departure, cannot allow you to depart from us without some token of respect and esteem as we think we hold you, not only as our teacher but as our friend.

We feel that in losing you we lose a most earnest and enthusiastic teacher. The interest which you have always manifested in our welfare has ever stimulated us in working more vigorously in the pursuit of knowledge. We hope that the seed now sown may bring forth fruit abundantly in future years. Not only in our school lessons but in the out-door amusements, which by developing our physical condition, tend also the better to fit our brain for mental training.

We beg of you to accept the accompanying articles as a feeble expression of our

regard for you, and while we congratulate you on the promotion you have so deservedly been bestowed upon we do regret that it necessitates your departure from among us.

We cannot conclude without expressing our regards for Mrs. Oakes and also our thanks to her for the kindness she has always shown us. Hoping that wherever you may be cast a kind Providence may spare you for very many years of happiness and usefulness, we now say, farewell!

Signed by: Boys: J. S. Benson, Wm. B. Snowball, E. B. Kerr, E. A. McKay, Wm. Patterson, W. A. Kerr, T. Marquis, Gray Henderson, E. E. Blair, Harry Shirreff.

Girls: B. Carmichael, E. Benson, E. B. Kerr, M. Morais, Miss Davidson, Ella Peterson, L. Winslow, J. Shirreff, Fannie Blair, A. C. G. McKay, Eliza G. Leeson, Maggie London, Bessie Crighton, Mary Davidson, Pauline Tomlinson, Minnie Morrison, Annie Pearson, Mrs. Pearson, Fannie Blair, Clara E. Strang.

In behalf of Miss Williston's pupils: Clifford Wye, R. M. Pallen, Wm. Patterson, Willie Shirreff, Mabel Murray, Herbert McCurdy, Charlie Peterson, Willie Leeson, Harry Martin, Aggie Anderson, N. Fotheringham, James Ross, John Loudon.

The Gifts accompanying the address were a silver pickle dish and a silver card receiver.

Mr. Oakes, though taken entirely by surprise, made a very happy reply, in which he said it was satisfactory to him, as a teacher, to receive a public address, but more satisfactory, after having been three years among those around him to learn that his work had been really appreciated; and still more satisfactory to him to have his pupils address him as friend, as well as teacher.

He assured them he was, and would continue to be their friend and would always feel a personal interest in their conduct and progress in the country. The unceremonious and immoral Chaplain, with the train of traitor Arnolds is a fit sequel in Topy annuals to the corrupt and ineptable DeBoucherville. With such men as the two Langeliers to support Joly in Quebec, the Seigneur of Lotbiniere will not remain long in opposition. Quebec is not now Bleu-French Quebec is now a Government of new men, with two French members, is a novelty, which, in Quebec, will "last quick."

As Charles Langelier said, it is not only a fusion, but a confusion. The schooner "Daddy" of Chatham, is a total wreck, on the South Beach. Mr. Neilson, the owner, is now in town. It was he who fell last night off the Post Office platform, and who has since, on several occasions, vented his just wrath against the "powers that be" and the conduct which leads them to neglect lighting that most public place. This says ditto to Mr. Neilson and suggests that a lamp be hung outside of the Post Office building as every man is not insured in "The Accident."

San Francisco Letter.

THE EX-ADVANCE PRESIDENT, GEORGE KEARNEY, was elected by hundreds of curious visitors every Wednesday evening. In the matter of newspaper literature we are well supplied—as to quantity—with the Alta and Chronicle in the morning, the Post and Bulletin in the evening and the Examiner in the afternoon. News Letter and the Herald weekly. These are the principal journals of the city and are sufficient, as I have said, in quantity; as to the other requisites, it would be, perhaps, presumptuous in so humble a scribe to hazard an opinion.

THE OCCASION has been given the religious press in which to point a moral and amend a life, by the death of William, late manager of Woodward's Gardens and an aeronaut, Colgrove, on Sunday last in a balloon ascent. The vehicle was a small one, and much contrived in the persons of the unfortunate adventurers, and hardly needed the assistance of a gas prevailing at that time, to ensure a disastrous finale to the ascent.

WALTER WILCOX, the boy whose parents were among the many victims in the San Francisco fire, and whose name has figured paragonically (if I may coin a word) so often, as having been sent overland by the Masonic Fraternity, has been formally taken in charge by the brethren here and a monthly allowance has been made for his support.

THE BUSINESS reaction which is said to be in existence in the East, is reproduced in a degree on this coast, in a hopeful outlook, however, that is actual business in some branches, I think, more really in a more prosperous condition than in any other part of the world. They also lost about 60 barrels of oats and a new reaper. It appears that the oats and reaper were stored in the upper part of their ice house, the door of which was forced open by drift logs. Those wrecked the place and smashed the reaper so as to place it past repair.

Messrs. J. & T. Williamson also lost their fish house on the back of Bay du Vin Island.

AN PERLEY, Esq., lost his fishing house on the island. Returning to the main land again he lost all the fences along the shore from Nubble's, or Teaserville, to Bay du Vin River—a distance of 12 miles—were swept away. The rails will be recovered again, however, the wind being on shore.

Alex. Mills, Esq., is a heavy loser, his farm being covered with sea-weed, drift wood and rubbish of all kinds. The Taylors, Carrolls, McLeods, McInnis and Gardners are all losers.

The tide rose so high under Fortville's Saw Mill, Black River, as to lift some of the gear.

The hay is swept from the Point aux Car Marais.

It is estimated that about 600 tons of hay have been lost off the islands and Mainland, the loss of which will now be obliged to sell their cattle, or kill them—a great sacrifice being involved, in any case, and we have no doubt that a purchaser for the English cattle market would find the time an opportune one to get bargains in Miramichi. The tide is 18 inches higher than ever known before.

The front road between Chatham and Black Brook was impassable for a time and the low-lying properties are damaged, in some cases to the extent of hundreds of dollars by logs and debris.

About 500,000 feet of logs belonging to J. B. Snowball, Esq., which were at the mouth of the Barthelemy river broke adrift and were drifted up on the shore and properties in the vicinity of Rock Heads, Chatham, these, however, are not a total loss.

A block which was being constructed as

of amusement to one of such a description as the "Author's Carnival" to open in Mechanics Pavilion on the 23rd. This is a carnival on a grand scale, the representations in dramatical presentations and tableaux of works of ancient and modern writers of all countries in appropriately fitted booths, by young and old in costume. It will last some nine evenings and, judging from the amount of preparation and the space given it by the press, will be a most instructive and pleasing affair. The proceeds will be divided among various charitable institutions of the city. One on a similar plan was carried out most successfully in one of the Eastern cities some years ago, successful both in the excellent phase of entertainment and its pecuniary results. Such a thing must necessarily cause a mental brightening process in regard to the best literature, the effects of which process are apt to last some time after the occasion that is called it forth, and thus serve to a very good end. Place of amusement in this city are many and as varied in the attractions they offer, and each one, when offered a bill of even fair attractions, does not play to empty benches. Despite the exceeding dullness of the day in business, many happily being brightened somewhat, the coffers of those entering to the amusement of the public are well filled with the shekels of the same when they cater wisely and well.

THE FALSHAM hero of the Sand Lots, seems lately to have submitted less to the security from which he never should have been drawn. The Chronicle no longer abuses him, the Call seems to have forgotten that "Mr. Kearney, President of the W. P. C.," is in existence, but that he is not to be trifled with by the press, or rather, allow himself to be thrust from it, is not to be hoped for. Some occasion may soon offer on which he may betray his assassin's origin as marked a degree as he did in one of his speeches previous to the arrival of Gen Grant, when he said that he and the "Voyage" would burn that gentleman in effigy on the Sand Lot on his arrival. Grant came and unlike Caesar did not even need to see in order to conquer. The reported speech denied such a storm of execrations that Denis found that his health required a period of sojourn in "the springs," subsequently he presented his card (save the mark) at the Palace, but the General declined the honor of receiving Mr. Kearney, very naturally one would say, taking into consideration the sanguinary utterance of the gentleman.

THE NEW CHRONICLE BUILDING.—A speaking emblem of journalistic enterprise has arisen in this fair city within the last few months in the new Chronicle building on the corner of Kearney and Bush streets. Its architectural appearance is not particularly striking but its fittings and appointments are regarded as of a high order of excellence and credit to its owners. In the business office is a counter of California oxen, topped with polished black walnut and with pillars and top and bottom moulding of black. If my memory serves me aright, and this is not the case, the building is furnished with similar elegance and taste. Entering through such an apartment one quite expects to find a printing house of such convenient appointments as here exists in every particular. Their presses—Hoe's with a capacity of 60,000 copies per hour—were set up by hundreds of curious visitors every Wednesday evening. In the matter of newspaper literature we are well supplied—as to quantity—with the Alta and Chronicle in the morning, the Post and Bulletin in the evening and the Examiner in the afternoon. News Letter and the Herald weekly. These are the principal journals of the city and are sufficient, as I have said, in quantity; as to the other requisites, it would be, perhaps, presumptuous in so humble a scribe to hazard an opinion.

THE OCCASION has been given the religious press in which to point a moral and amend a life, by the death of William, late manager of Woodward's Gardens and an aeronaut, Colgrove, on Sunday last in a balloon ascent. The vehicle was a small one, and much contrived in the persons of the unfortunate adventurers, and hardly needed the assistance of a gas prevailing at that time, to ensure a disastrous finale to the ascent.

WALTER WILCOX, the boy whose parents were among the many victims in the San Francisco fire, and whose name has figured paragonically (if I may coin a word) so often, as having been sent overland by the Masonic Fraternity, has been formally taken in charge by the brethren here and a monthly allowance has been made for his support.

THE BUSINESS reaction which is said to be in existence in the East, is reproduced in a degree on this coast, in a hopeful outlook, however, that is actual business in some branches, I think, more really in a more prosperous condition than in any other part of the world. They also lost about 60 barrels of oats and a new reaper. It appears that the oats and reaper were stored in the upper part of their ice house, the door of which was forced open by drift logs. Those wrecked the place and smashed the reaper so as to place it past repair.

Messrs. J. & T. Williamson also lost their fish house on the back of Bay du Vin Island.

AN PERLEY, Esq., lost his fishing house on the island. Returning to the main land again he lost all the fences along the shore from Nubble's, or Teaserville, to Bay du Vin River—a distance of 12 miles—were swept away. The rails will be recovered again, however, the wind being on shore.

Alex. Mills, Esq., is a heavy loser, his farm being covered with sea-weed, drift wood and rubbish of all kinds. The Taylors, Carrolls, McLeods, McInnis and Gardners are all losers.

The tide rose so high under Fortville's Saw Mill, Black River, as to lift some of the gear.

The hay is swept from the Point aux Car Marais.

It is estimated that about 600 tons of hay have been lost off the islands and Mainland, the loss of which will now be obliged to sell their cattle, or kill them—a great sacrifice being involved, in any case, and we have no doubt that a purchaser for the English cattle market would find the time an opportune one to get bargains in Miramichi. The tide is 18 inches higher than ever known before.

The front road between Chatham and Black Brook was impassable for a time and the low-lying properties are damaged, in some cases to the extent of hundreds of dollars by logs and debris.

About 500,000 feet of logs belonging to J. B. Snowball, Esq., which were at the mouth of the Barthelemy river broke adrift and were drifted up on the shore and properties in the vicinity of Rock Heads, Chatham, these, however, are not a total loss.

A block which was being constructed as

an addition to Mr. Snowball's wharf and in which only a small quantity of ballast had been placed was carried away and deposited on Gordon's Flats. This involves a loss of some \$75, which would have been avoided had it not been for the storm coming before sufficient ballasting was done to keep the block in position.

All the lower floors of warehouses on the river were more or less submerged. The planking of the Hon. Mr. Muirhead's wharf was torn up, as were also parts of the floors of the warehouses, but most of the goods liable to be injured were removed in time, with the exception of a few tons of salt which was washed on Gordon's Flats. This involves a loss of some \$75, which would have been avoided had it not been for the storm coming before sufficient ballasting was done to keep the block in position.

The upper bridge across John O'Bar's Creek, on the line of the Great Road, was considerably damaged, rendering it difficult and dangerous to cross. It will not require a large outlay to restore this bridge.

Bay du Vin River Bridge is completely swept away. It was one of a span, built some twenty years ago by Joseph Griffith of Newcastle, and was out of the ground leading from the wharf, and also those of Mr. Muirhead's residence and dry goods store.

The floor of the warehouse on Mr. Snowball's wharf was torn up, but the goods liable to injury were removed in time. Messrs. Gray Peavey & Co. had the planking washed off their wharf, and their warehouse flooded.

W. S. Loggie, Esq.'s cellar was flooded some two feet, but with the exertions of friends the bulk of the perishable articles was got out of harm's way, so that the damage sustained was comparatively small.

The ferry slip on this side of the river was considerably damaged, also that at Moorfield, where the launch ways and blocks were carried away and also an iron wheel.

Householders in the vicinity of the slip on this side had their firewood considerably scattered and one family had to leave their house, which was flooded.

The wharf in the rear of the Engine House was considerably damaged.

The wharf in the house belonging to Mrs. Blacklock, above that of Foundry, occupied by Mr. Fairly, had its facing washed away; the foundations were also washed from under the out-building.

The schooner Merit, owned by Mr. Allan Lewis, lying at the Canada Ballast Wharf during the storm on Wednesday, knocked against the wharf until she made a heavy leak and sank. She had a cargo consisting of provisions and dry goods from Lower Gloucester, which were all damaged.

Mr. Thos. Conaghan's house at the Ferry, Chatham Head, (opposite Newcastle) was flooded off and carried about 150 yards up towards Sargent's mill. When the tide fell the building lay with one end on a log and the other in the mud. The family had been rescued in a canoe before it was too late and have returned to the building, which is levelled up by Mr. C. who will have it back to position again.

DOUGLASS STORE. About 50 tons salt were washed out of Mr. Hutchison's store, Douglass town, and a large quantity of firewood also went adrift.

OF THE damage in Newcastle we have as full a report as we desire. Our correspondents failed to send us notes and the Advocate's report is not full. It says:—

Considerable damage to goods stored in the cellars along Castle Street, the cellars being full of water up to the beams. On the upper end of Castle street and along the river towards the wharf, the water was deep, and rafts were made of sections of the wharf and floated to and fro. The water was so high that the flooring was carried away.

MIRAMICHI.—NOVEMBER 5. SIDE AND LOWER GLOUCESTER. The tide and storm appear to have done their worst on this side of Shippagan and Miramichi, and we hear of comparatively small damages up the Bay Chaleur. Our Shippagan correspondent writes as follows under date of 1st inst.

A BARGE IN DISTRESS. I wired you on Thursday about a barge that was off the Gully in want of assistance. It was about 150 gals of coal, and was sprung her main-mast and carried away the best part of her sails. She remained at anchor till late Thursday night, and could see nothing of her on Friday morning, some of the Miramichi people tell me she passed there early Friday, going east under easy sail.

"THE CRAFTSMAN." We also picked up part of the schooner "Craftsman" of Miramichi which had capsized here at the light house. She is all broken up now and I do not think there was anything saved out of it.

SHIPWRECK POTATOES. We have had the highest tide, that I remember seeing here. The Breakwater is a good deal of damage and the dam is entirely carried away and there is not one yard of brush remaining where it once stood.

FISH AND FISHES DESTROYED. We lost two fishing boats, and our pickled fish in the stage, and damaged by the storm about 150 gals of coal-fish, besides having had all our fences carried away.

LIGHTHOUSE DAMAGED. The Light Station here was pretty badly damaged, the keeper losing all his oil and other stores, and the building now not safe for the keeper to remain in.

1000 BUSHELS POTATOES LOST. I dare say the inhabitants will lose, amongst them, 1000 lbs. potatoes. The sea covered the ground and in places they remained under water for 24 hours, so you can fancy how they looked and tasted. The Nubble's Beach is "caped" and the Lighthouse undermined.

The schooner Rover, owned by Vital Allan, Esq., was knocked off blocks on which she was being repaired and rolled over, breaking the top work and rigging. She now lies bottom up.

THE GUY SAVED by Chatham lost his schooner on Neguac Beach.

A Carquet boat, belonging to Mr. Lagere, loaded with fish and produce bound for Chatham, was totally lost on Hay Island, Neguac. The men, three in number, had all the fences along the shore in the dingie belonging to the boat, all night, and in the woods of the island.

Messrs. A. and D. Loggie's Coasting establishment, with all the contents of the buildings, is swept away.

Messrs. W. and J. Anderson's new buildings on Tabontine Beach, cook house and store, (just completed the day before the storm) together with lumber for the erection of their proposed Cannery, were all carried away.

Messrs. D. Morrison and Wm. Park's lumber, placed on Tracadie Beach for the purpose of erecting an Establishment was all swept off.

Sixty feet of Messrs. A. and D. Loggie's Lobster Cannery and their Boiler House, together with a quantity of traps, etc., are destroyed and carried off.

At Tracadie the Messrs. Young were considerable losers.

The two woodboob schooners which run in connection with the Tracadie mill, were driven ashore and though not damaged both will winter where they are. One of them cannot be got off until the ice forms heavily on the mud where she lies.

Big Tracadie Bridge is badly wrecked. Messrs. Church bridge—a 4 span one—can only be crossed by foot passengers. Two of the four ice breakers connected with it are carried away.

Little Indian Brook Bridge—about 100 feet long—is gone. This bridge was on a total loss.

At Oyster River the bridge on the post road is unimpaired, but that on the front

though it is on a by-road it is a great accommodation to travellers between Escommodo and Chatham and intermediate points. It therefore requires prompt attention. The same reasons apply in favor of the immediate restoration of the bridge at Gallivier's, which is a necessity to those who have to travel between this district and Chatham.

The upper bridge across John O'Bar's Creek, on the line of the Great Road, was considerably damaged, rendering it difficult and dangerous to cross. It will not require a large outlay to restore this bridge.

Bay du Vin River Bridge is completely swept away. It was one of a span, built some twenty years ago by Joseph Griffith of Newcastle, and was out of the ground leading from the wharf, and also those of Mr. Muirhead's residence and dry goods store.

The floor of the warehouse on Mr. Snowball's wharf was torn up, but the goods liable to injury were removed in time. Messrs. Gray Peavey & Co. had the planking washed off their wharf, and their warehouse flooded.

W. S. Loggie, Esq.'s cellar was flooded some two feet, but with the exertions of friends the bulk of the perishable articles was got out of harm's way, so that the damage sustained was comparatively small.

The ferry slip on this side of the river was considerably damaged, also that at Moorfield, where the launch ways and blocks were carried away and also an iron wheel.

Householders in the vicinity of the slip on this side had their firewood considerably scattered and one family had to leave their house, which was flooded.

The wharf in the rear of the Engine House was considerably damaged.

The wharf in the house belonging to Mrs. Blacklock, above that of Foundry, occupied by Mr. Fairly, had its facing washed away; the foundations were also washed from under the out-building.

The schooner Merit, owned by Mr. Allan Lewis, lying at the Canada Ballast Wharf during the storm on Wednesday, knocked against the wharf until she made a heavy leak and sank. She had a cargo consisting of provisions and dry goods from Lower Gloucester, which were all damaged.

road has been opened from its place and floated nearly up to that point.

At Messrs. Peter and Donald Morrison's place of business the dock house and other buildings were wrecked.

Mr. John Swallow on the lower end of Portage Island had his lobster Cannery and buildings attached, carried away.

The building on the East side of Ferguson's Quay owned by William Ferguson, Esq., is also destroyed.

The houses at Tabernacle Quay were swept away and it was at first reported that the Cooper, Mr. Savoy, was drowned, but he escaped.

The loss of Mackay was all along the shore, from the lower part of Negus up, in very great, and fences that were with reach of the tide are destroyed by the sea.

At Messrs. Peter and Donald Morrison's place of business the dock house and other buildings were wrecked.

Correspondents and others will be to patient, with us as our columns are so pressed with matter from different quarters as to shut out many favors and matters with which we would like to deal.

We hold over school matter from Newcastle, Municipal Election returns from Kent, Gloucester and Northumberland, County Court notes as well as matter on several other subjects.

THE "THREE (No) GRACES"—Advocate, Gloucester, Star.

OUR BEST WISHERS follow the happy pair, who left town for the Upper Province after the event of Thursday last.

PERSONAL.—Ligh Harrison, Esq., of the law firm, Harrison & Burbridge, Dominion Government law agents, was in town yesterday.

A GROSS ATTACK upon the Rev. Mr. Belknap of Tracadie is published in this week's Advocate. One would almost imagine that the time was May 1874, instead of Nov. 1879.

THE STRENGTH OF THE FLOOR of the Newcastle Engine House shows signs of settling. When repairs are again made they ought to be permanent.

WE are informed that there are no coals in the Engine House to keep up a fire. These ought to be supplied at once.

ACCIDENT.—On Tuesday afternoon at half past one o'clock, a son of Mr. Staples, hair dresser, aged 5 years, while on a chair in his father's shop, suddenly fell off and broke his arm between the elbow and the wrist.

THE SCH. "ANNIE," of New Carlisle, said to be about forty tons, owned by Wm. Ferguson, Esq., of Tracadie, coal laden, from Pictou to Bathurst or some other port in Gloucester, is a total wreck at Point St. Pierre.

BRIDGES.—The following bridges in Kent County have suffered more or less: St. Louis Bridge over Kouchibouguis River, about two miles above Pictou.

BRIDGE ON LEFT BANK of same river above the College, a total wreck.

BRIDGE OVER NORTH WEST (Rich.) a complete wreck—not a vestige of it being left.

KINGSTON BRIDGE, two spans and an abutment washed away—balance of bridge more or less damaged.

BRIDGE AT BROWN'S YARD, near River, destroyed.

BRIDGE AT BROWN'S YARD, near River, destroyed.

His Honor thought as the amonuses had only been served between four and five o'clock the previous evening.

Misses, Minnie Blair, H. E. Fotheringham, Irene Strang, Rosa Kelly and Sadie Gillespie.

The A and B classes were called up to the front of the school, Miss Gillespie explaining that one class was a year behind the other.

The subject selected by Mr. Winslow was "The siege of Quebec." The reading was fair and the pupils were afterwards exercised in spelling and dictation.

Heretofore the reading was "The Star" and "The Star" which was very well written and elicited general approval.

The class read the "Blossom" from the 4th Book and afterwards the "Blossom" which were then exercised in spelling both the reading and spelling were good, especially for a junior class.

A and B classes were examined in Physical Geography, one class being one year behind the other in this study.

The examination covered both the United States and the Dominion of Ireland. The answers generally were very prompt and correct, though the subject was not in the work of the term.

Stanley Murray gave a French reading entitled "Melanges" (Falsehoods) which afterwards translated and replied satisfactorily as to the meaning of verbs contained in the piece.

The female pupils sang "Under the Snow." The class C showed some very good maps of New Brunswick and Nova Scotia, drawn on their plates from memory.

These maps did the pupils much credit. A recitation entitled "The Lake and the River," was given by Miss Nellie Fotheringham and Harry Martin, which was deservedly well received.

This class was examined in grammar and analysis. The exercise was very satisfactory for a junior class.

A and B classes showed some very good maps of the United States, drawn on their plates from memory.

These maps did the pupils much credit. A recitation entitled "The Lake and the River," was given by Miss Nellie Fotheringham and Harry Martin, which was deservedly well received.

This class was examined in grammar and analysis. The exercise was very satisfactory for a junior class.

A and B classes showed some very good maps of the United States, drawn on their plates from memory.

Crinin, Esq., there were also present the Rev. Mr. Deaf, F. J. Letson, Dr. J. S. Denon, and a number of ladies.

A collection of well executed maps, some of them of considerable size, were shown to the walls, and the Teacher's table were a number of books of botanical specimens, which had been collected and preserved by the pupils.

The most prominent objects in the room were a small glass-fronted cabinet, which had been tested by the pupils, and which contained a number of shells, minerals, fossils, and objects of natural history.

This cabinet was intended as the beginning of a more extensive collection, and the work of collecting and arranging, was largely done by the pupils.

The first class called was the Canadian History. Mr. Oakes stated that this class had been occupied during the term with that period extending from the conquest of Quebec to the introduction of responsible Government in Quebec.

The Arithmetic class was called. Mr. Oakes stated that as there were three Arithmetic classes included in it, it would be advisable to let them take their class as was accordingly done.

Miss Laura Winslow gave a recitation on the "Child's Dream," very nicely.

Clifford Wye recited the poem, "How he said to Michael," very spiritedly and received applause.

The pupils sang "Will You Lift a Little Brother."

Miss Williston now examined the pupils in English History, on the period of the Plantagenets, and in Canadian History, on the discovery of America by Columbus.

The pupils were quite at home in this study. Miss Reta Kelly read an essay on "The Eye," explaining the philosophy and workings of sight, which was really very good.

Miss Edith Winslow recited the "Fisherman's Wife" with much taste.

The French class was called up, and examined in translation and the construction of sentences from the Elementary French Grammar.

Class A was examined on the construction of a verse on the blackboard, and acquitted themselves well.

Miss Williston announced that the pupil who held the largest number of "perfect tickets" for the term, which implied general proficiency and regular attendance, would be entitled to a prize of the large Kaleidoscope on a stand presented to her by the donors.

After ascertaining the number of the tickets held by different pupils, the largest number was found to be in possession of David Smith, who was adjudged the prize.

After a short recess, the class finally dwindled down to two contestants, Miss Reta Kelly and Ernest Murray, the latter of whom finally carried off the prize.

After a short recess, the class finally dwindled down to two contestants, Miss Reta Kelly and Ernest Murray, the latter of whom finally carried off the prize.

in the Courier we regretted that such strictures on the North should appear, and especially when they were credited to such an authority as Mr. Jack and notwithstanding the fact that we had a strong personal regard for him, the interests of truth and the North show render it our duty to state the matter by us imperative.

We hope that Mr. Jack can substantiate his positive general denials which we published for him last week—EDITOR ADVANCE.

SARSAQUES at Carmichael Bros.

"LIBRARIES"—Just received at the Miramichi Bookstore 200 different stories in 12c. and 6c. "Libraries." The cheapest reading ever offered here.

Libraries are all by standard authors.

Go to Carmichael Bros. for a first class article of Sarsaques, arriving three times a week, also Labrador Herring.

HERBAGE—Ten cents per dozen at Carmichael Bros.

Consumption Cured.

An old physician, retired from practice, has had placed in his hands by an East Indian missionary the formula of a simple vegetable remedy for the speedy and permanent cure for Consumption, Bronchitis, Catarrh, Asthma, and all Throat and Lung Affections, also a positive and radical cure for Nervous Debility and all nervous complaints.

After a cough or cold taken between now and Christmas frequently lasts all winter.

This is certainly the case with people who do not take the remedy.

It is a well known fact that the most common cause of the cough and cold is the influenza virus.

It is a well known fact that the most common cause of the cough and cold is the influenza virus.
