NAMED THE BLACK SHEEP

With the alleged political frailties of Sir John Macdonald as a pretext, The Globe mildly lectures the Laurier government. The Globe declares that Sir John's career would have been less chequered if his most powerful friends had refused to stand by him when he was wrong.

ADVICE, NOT WELCOME

The Ontario government does not seem to be grateful for the most kindly intimations that it should swear off and try to lead a better life. Two weeks have passed since the Globe suggested that it should scrap the combination and cease drifting, but the ship is still in charge of the same crew.

ONTARIO FARMERS AND SHEEP

Also the number of sheep and lambs that have come upon the Toronto market this fall has been much larger than previous years, the prices paid by our shippers and slaughterers have compared favorably with the prices obtained by the farmers in the United States.

WILLIAM AND SID THOMAS
WINNIPEG HAS STIRRED UP
THE C.P.R.

Great Northern's "Bullet Service" to Winnipeg has stirred up the C.P.R.

New York, Nov. 22.—James J. Hill denies that his co-operation with the Canadian Northern is intended to put on such a service as this as soon as the Canadian Northern was ready. It is purely and simply a traffic matter, and will not be a "bullet" service in any way. Mr. Hill says he is not looking for a fight.

"Canadian Pacific people, on the contrary, say that if Mr. Hill is not looking for a fight he is certainly in a fair way to get one. They take the ground that Mr. Hill is now, and always has been, the aggressor. They say that ever since the Canadian Pacific bought the Soo line, both the Great Northern and Northern Pacific have done everything they possibly could to make the purchase valueless, or at any rate, to minimize its value to the Canadian Pacific. They say that they have stood for a long time in the way of Hill officials, and that they have stood in with good grace. They admit that there have been reprisals at times, but say that the reprisals were not by any means what they might have been.

The remarkable politeness displayed by both sides at headquarters does not make much of an impression on the road men at large, who recognize the fact that when rival railroads become polite, there is likely to be a serious concern that there will be no until the heaviest part of the grain traffic is over. While all roads are doing their best to get the business, there will be no incentive whatever to anything like hostile tactics on either side. In fact, hostility would lose money to all parties. It is during the bad winter months that trouble is likely to break out, and it is the opinion of one northwestern official that it is just as likely as not to be precipitated by Canadian Pacific rates on non-perishable freight during the winter. During these months the road will have more idle equipment on its hands than ever before for the simple reason that its equipment has been tremendously increased during the past twelve months. It is the opinion of the official mentioned that the road is almost certain to put in winter rates this year, and that line some of Mr. Hill's tonnage. If this happens there is pretty certain to be war.

RUSSIA EXPECTS WAR IN SPRING.

Indications Point to Clash With Japanese Forces Then.

Victoria, Nov. 22.—Peter Mirsk, guarantee engineer of a Copenhagen shipbuilding firm, on board the Russian cruiser Boyard, returned from Port Arthur this morning, and says: "The war is not expected this winter, it is extremely probably in fact, looking to the spring." He told a number of incidents at Port Arthur when the Russians expected a momentary outbreak, and told of cruises made with the Russian fleet to Corea on alarms being given of a reported Russian fleet in the Yesso and other places. The Boyard was ordered to Corea in October because of a reported Russian fleet in the Yesso and other places. The report was unfounded. He was present at the recent naval manoeuvres in the Bay of Peking, which he said were carried out as the state of war existed. After telling of preparations being made to bring the Russian strength, both naval and military, to its highest scope in the spring, he said that the Russians expect war then.

VISITED FORT GARRY.

Winnipeg, Nov. 21.—The Earl of Dunsdown visited Fort Garry today, where he was entertained at lunch by the Commandant of the Hudson Bay Company. "The stone fort" was built in 1831. More than one military commander, who later achieved high distinction, has passed the gates or been in residence there, including Lord Wolseley, late Commander-in-Chief of the British Army; Major-General Sir Wm. Buller, in chief command in South Africa previous to the war; General Crofton, in command of first red coats seen west of the Great Lakes; and now Lord Dunsdown.

CAROLAN LEAGUE'S FIRST MEMBER.

Burdock Blood Bitters

BUILT UP THE SYSTEM AND ADDED TEN POUNDS IN WEIGHT.

Mr. Ed. J. Harris, Newbridge, Ont., was in poor health, but has been restored to full health and vigor. Here is what he writes: "Last spring I was in a very critical condition, my system was all run down. I felt drowsy and miserable, and thought I would surely die if I did not get something to build me up. After reading one of your almanacs I decided to try Burdock Blood Bitters, and before I had taken two bottles I had gained ten pounds in weight, and am now in perfect health, and I can certainly recommend Burdock Blood Bitters to build up the system."

INFERNAL MACHINE IN MINE.

Exploded by Means of Revolver and Two Were Killed.

Cripple Creek, Colo., Nov. 21.—Charles McCormack, superintendent, and Melvin H. Beck, a miner, were killed shortly before noon to-day by an explosion in the Vindicator mine, caused by an infernal machine. Four hundred milliammen have been placed on guard around the company's properties. Superintendent McCormack and Miner Beck were descending into the mine when the explosion occurred. The infernal machine was a portable one, and was used for the purpose of blowing up the mine. The explosion was caused by an infernal machine containing many pounds of dynamite, placed in the sixth level, which was set off in a manner that the revolver was fixed in the shaft pointed directly toward the infernal machine. The trigger of the revolver was attached to a string, which was thrown across the shaft in such a manner that the revolver would explode, the bullet striking the infernal machine. Pieces of this revolver have been recovered.

SEND-OFF FOR KING EDWARD

King Edward Saw Him Off at the Station—Ceremony Marked Departure.

London, Nov. 21.—Much ceremonial attended the departure to-day from Windsor of King Victor Emmanuel and Queen Helena of Italy. The crowds gave the visitors a most cordial send-off. As the train was moving away from the station, King Edward stepped forward, stretched out both hands and clasped the hands of King Victor Emmanuel, who leaned out of the window. The band then played the Italian national hymn and King Edward returned the salute. The train was out of sight. Royal salutes from the warships greeted the Italian and Queen's arrival at Portsmouth. Their Majesties immediately embarked on the royal yacht Victoria and Albert, which was waiting at the harbor for Cherbourg, France, amid the strains of "Auld Lang Syne" and a final salute of 21 guns.

As the royal yacht was leaving Portsmouth harbor, a message from King Victor Emmanuel to King Edward was shouted shoreward, but it was inaudible. The yacht was obliged to despatch a torpedo boat to the Victoria and Albert to catch the yacht and bring the message.

THEY ACTUALLY DO THE WORK.

Food Eaten is Worthless Unless Digestion is Good.

Food eaten into the stomach which, from the nature of the food or the condition of the stomach, is not properly digested is worse than no food at all. This is a true statement as far as it goes, and a great many people are compelled to suffer with themselves that because they eat, they must be given less work; in other words, they must starve. The remedy is to be found in the business man who is unable to do his own work to cut down his business, and to starve himself as it is to starve himself to relieve his stomach. The sensible business man should help and help himself by using Stuart's Dyspepsia Tablets actually do the work as a great portion of digestive work that commonly fed and denied with those of the digestive fluids and secretions of the stomach and they simply take up the grind and carry on the work just the same as a good, strong, healthy stomach would do it.

On this account Stuart's Dyspepsia Tablets are perfectly natural in their action and effects. They do not cause any unnatural or violent disturbance in the stomach or bowels. They themselves digest the food and supply the system with all the nourishment contained in what is eaten and carry out Nature's plans for the sustenance and maintenance of the body.

How much more sensible is this method than that employed by many sufferers from weak stomachs. By this means body and brain get all the food, nutritious food, and the system is properly nourished and equipped to carry on his work and perform his duties. He does not starve himself or employ some new fangled medicine, but he gets the nourishment that Nature intended to supply to the brain as well as the body.

Stuart's Dyspepsia Tablets, by relieving the stomach of its work, enable it to recuperate and regain its normal health and strength. Nature resumes the process of repair.

Stuart's Dyspepsia Tablets are for box, and they are the one article that the druggist does not try to sell something in place of that "just as good" their unqualified merit and success at the universal demand. They have placed them within the reach of every one.

MINE EXPLOSION KILLS 10.

Bodies Were Terribly Burned—Gas Was Ignited.

Connellsville, Pa., Nov. 21.—"Hill Farm Mine," the ill-fated, to-night added ten more victims to its black record. At 6:30 o'clock a terrific explosion rent the interior of the mine, and 19 miners, who were working in the vicinity, were thrown in all directions. Only nine succeeded in reaching the pit mouth alive. The other ten were found lying in all shapes horribly mangled. The explosion occurred in the "Hill Farm Mine," which joins the "Hill Farm Mine." It is believed by mining experts that the fire which has been raging in the "Hill Farm Mine" since the disaster of 1880 broke through the walls of the Hill Farm Mine, and the Ferguson mine, and caused the explosion. The explosion killed ten men and was completely blown out. The flames shot thru almost every room in the mine.

The fire broke out in an unknown manner in the snow-covered barracks, and caused the destruction of the military quarters, which were completely blown out. The flames shot thru almost every room in the mine.

The Newmarket Disaster.

Although two men lost their lives and several more were injured in the boiler explosion in United Factories' plant, at Newmarket, last Wednesday, the accident was not nearly so serious as at first supposed. The damage was limited to the boiler, and the main buildings and machinery, owing to their substantial construction, being injured but slightly. DEBILITY IN THE COURTS

Saturday Review: Lord Alverstone has been the climax of his powers of enunciating commonplaces in his address at the Law Courts to the Lord's Chamberlain. It is not necessary to explain the disappointment he arouses in the public mind. Certainly it was well known that he will always keep clear of any topics which are not of a stock kind, and that he is never likely to contribute much that is useful to a discussion where he might arouse any unpleasant feelings.

Mr. Higgins strongly urged council to close at once with this offer in view of the fact that the Canada Poultry Co. is empowered and liable to withdraw this tender, nothing in the contract forbidding such a course. The engineer estimates that the total cost of reconstruction will amount to \$12,000. Much of the material will be available and in this way the cost will be kept within the appropriation. James Hopkins, one of the most widely known of the residents of York Township, died on Saturday at his residence, Roshampton-avenue, Eglington. Deceased was for many years associated with the county as road commissioner, on Yonge-street, and when the Town of North Toronto was incorporated he was appointed to a like position in the town. He leaves a family of four sons and six daughters and a wife. Deceased was recognized as a staunch Tory, and was a prominent member of the Orange order, as well as being associated with the Masons, Workmen and Sons of England.

SUNDAY CONCERT DREW CROWD.

First of Series, Proceeds to Go to Charitable Objects.
Whether it is that the public believe in giving to charity, or whether they delight in harmless amusement on Sunday evening, some other good reason, the Princess Theatre was packed and jammed to its full capacity, both seating and standing. The Irish Canadian Band have every one who is not seated and standing at the splendid reception given them upon their first public appearance, and before the concert was over the manager, Mr. Quinn, was not far from being assured that he and his clever organization will become popular and successful. The brilliant program was executed in such a manner that every concert-goer received deserved success. In all probability there will be more of these concerts given during the season. The proceeds have been sent to the Children's Shelter.

NEVER CALL FOR MONEY.

London, Nov. 22.—Even in these hard times there are instances of money going begging. At a company meeting last week it was announced that twelve shareholders to whom dividends were due had disappeared and could not be found, although extensively advertised for. Consequently, the chairman, the sum of \$1600 would have to be paid back to England, to go toward building a battleship or to relieve the taxpayer. On the authority of an agent for a registration company it may be stated that there is sufficient money in the hands of the twelve shareholders in London to construct and equip two battleships. One company in the city has between thirty and forty shareholders. A dividend warrant is sent every half year to the last address of each shareholder. If it is regularly returned thru the dead letter office, superscribed "unknown," it will be sent to the company.

NOTES FROM ANYWHERE.

Within 10 years Russia has acquired new territory which in area is larger than the United States. The European country in which there is the largest number of marriages of men under the age of 21 is Bohemia. The hottest place on earth is Rehrum, on the island in the Persian Gulf, which has a mean annual temperature of 99 degrees. According to the latest figures of the annual expenditure of the Turkish government has of recent years been for armaments of \$100,000,000.

DEBILITY IN THE COURTS.

Saturday Review: Lord Alverstone has been the climax of his powers of enunciating commonplaces in his address at the Law Courts to the Lord's Chamberlain. It is not necessary to explain the disappointment he arouses in the public mind. Certainly it was well known that he will always keep clear of any topics which are not of a stock kind, and that he is never likely to contribute much that is useful to a discussion where he might arouse any unpleasant feelings.

THE GREAT WHITE MOTHER.

London, Nov. 22.—The presence of many representatives of the people of whom she had devoted her life, the body of Mrs. Harriet Maxwell Constable, "The Great White Mother" of the Six Nations of the great Iroquois confederacy.

Famous Composer's Sad Death.

Philadelphia, Nov. 22.—Died of pneumonia from the members of his family, Hart P. Danks, the noted author of "Silver Threads Among the Gold" and other famous songs, died alone and practically friendless in a furnished room at the Racquet-club early yesterday morning. He composed in all of about one thousand pieces, all of a rather serious nature. His reputation as a composer, however, was based more especially upon his choir music.

Girls May Sit Down.

Paris, Nov. 22.—The law obliging shopkeepers to supply a sufficient number of chairs for shop girls to sit on, during three years ago, was becoming a dead letter. The French Correctional Chamber this week imposed seven lines of five francs (\$1) each on a shopkeeper for not having complied with the requirements of the law, which shop girls having been found unprovided with chairs in his establishment.

LONDON RIVAL OF LORENZ.

Burgeon Who Reduces Hip Dislocation in a Few Seconds.
London, Nov. 22.—There is now in London a rival of Dr. Lorenz, the famous Vienna surgeon whose name is associated with bloodless surgery, in the person of Dr. Raby, a native of Guernsey. Dr. Raby contends that numbers of hip disease cases are really nothing more than hip dislocation, which causes the leg to wither and the muscles to become dry and that the natural oil which ought to feed the leg forms abscesses. He admits that when there are diseased bones he can do nothing. His method is to reset a dislocated bone after softening the tissues and ligaments around the affected part. Dr. Raby, in contrast with Prof. Lorenz, who occupies half an hour in his operation, does the work in from three to five seconds. Instead of making the patient lie from 6 to 12 months in a plaster cast, as Lorenz's method, Dr. Raby promises them that they will be able to walk in 48 hours. He performed an operation yesterday upon a youth of 18, who when he was 13 years of age was put into the hospital for six months on account of his disease. Since then he has walked on crutches. His leg was four inches shorter than the right one, and he had to be prepared for an operation by Dr. Raby by applying poultices of olive oil and mustard to the hip. The operation was performed yesterday in 3 1/2 seconds and the result was that the leg immediately became 2 1/2 inches longer and the patient will be able to walk by Sunday, according to Dr. Raby's partial observation. Dr. Raby says he has dealt successfully with 15 similar cases. Thirteen have failed, but in each case since the case proved to be genuine hip disease.

INTEREST IN ST. PIERRE.

Annexation With U.S. Finds Much Favor There.
St. John's, N.F., Nov. 22.—(A.P.)—U. S. Senator Lodge's recent declaration respecting St. Pierre and Miquelon becoming part of the American Republic has excited great interest in St. Pierre. That colony has had the worst fishery season in its history, trade there is depressed, and the outlook is gloomy. The people are ready to welcome any settlement of the fishery dispute that immediately ensures prosperity, and the feeling in favor of annexation with the United States finds much favor.

Newfoundland Merchant Talks.

There is little talk of confederation in Newfoundland, according to H. S. Outerbridge, of St. John's, who is a King Edward guest. He is a large jobber of general merchandise. "There is little talk of confederation today," he observed to The World. "The people recall how costly their efforts were received formerly on this subject, and now they are indifferent." "Yes, the fishing product has fallen off some twenty-five per cent. this year as compared with last year's catch. Still, last year the business was much in excess of previous years. However, the failure of the Norway fisheries this season has really increased the price of the Newfoundland catch so that the commercial value exceeded former years. Altogether, prosperity is very marked with us."

6-Year-Old Shoots 2-Year-Old.

New Haven, Conn., Nov. 22.—While left in charge of his father's candy store today, Carl Marney, aged 6 years, in some manner obtained possession of a revolver and shot Tony Casco, 2 years old, in the head, inflicting a wound, which, it is thought, will prove fatal.

MORE FUNDS URGENTLY NEEDED.

To Properly Carry on Good Work of National Sanitarium Association.
The reports presented at the sixth annual meeting of the trustees of the National Sanitarium Association on Saturday showed that the patients at the residence at the College Sanitarium have ranged latterly from 65 to 60 per week, and accommodation is being made for 65. The patients treated in the free hospital during the year totalled 163, or since its opening in 1902, 622. The patients came from the wage-earning classes, representing 57 occupations, including painters, baggagemen, bakers, barbers, book makers, blacksmiths, brass finishers, bricklayers, carpenters, electricians, cigar makers, coal heavers, beer makers, lumbermen, machine operators, piano tuners, printers, salesmen, seamstresses, steamfitters, trackmen, teachers, telegraph operators, and wood machinists. Of these 57 occupations, 22 are those who paid in part the average received was \$4 cents a day. They included the following: Prince Edward Island and the Northwest Territories. The financial report of the branch in the Northwest Territories, and from patients and municipalities, and from the government grant, left a deficit of \$13,535.31, but approximately had brought in \$10,375.90.

The secretary's report said that this proved the report of a year ago that less than \$20,000 would be subscribed this year to fully provide for it. During the past year the deficit of funds necessary the closing of several wards. There is also a large bank overdraft deficit. An effort is being made to interest individuals to provide each \$300 a year to endow 25 beds. While only those in the hospital are admitted, the rule has frequently been departed from in response to pitiful appeals.

A committee was appointed to deal with a plan to establish a nurses' training school in connection with the institution. A laundry plant is being installed for the needs of the institution. The press was thanked for assistance rendered the cause. Sir Wm. Meredith presided, and others present were Hon. G. W. Ross, W. J. Gage, Hugh Blain, J. J. Crabbe, Dr. N. A. Powell, Fred Reper, Dr. J. H. Elliott, and Secretary J. S. Robertson.

RULES FOR LONG LIFE.

Cincinnati, Ohio, Nov. 22.—Operations were suspended at the American Book Company yesterday while the officials and employes presented their compliments and congratulations to William W. Innes, who retired as the active manager after sixty years' continuous service. Asked for the rules he had followed, which he believed had tended to lengthen his life and usefulness, he said: "I never drank any whiskey. I was regular in my habits. I gave up tobacco on the advice of my physician. 'Early to bed and early to rise' is one of the best to work by. The Bible will bring success and a sense of contentment."

Price of Oil Goes Up.

Vienna, Nov. 22.—Much indignation is expressed here over the steadily increasing price of oil. Since the formation of the Austro-Hungarian Petroleum Cartel prices have been advanced 50 per cent with the prospect that they will go still higher as soon as the present stock becomes exhausted.

Prof. Schmidt's Jewels.

Oakville, Nov. 22.—Prof. Schmidt has just received encouraging news from his lawyer, Mr. Wilkins, regarding his valuable collection of precious stones which were wrongfully seized by the customs authorities at Detroit last May. He expects to have everything returned to him some time during the present week.

Norway.

Rev. A. G. E. Westcott preached in St. John's Church at the evening service tonight. The services were conducted by Rev. W. L. Innes, who has resigned from that position to accept a similar one at Port Moresby, British New Guinea.

A street lamp should be placed at Woodbine-street and Centre York-street. This is the locality where the orange was committed two weeks ago, because it was the only one in the street which was not broken. Some were from Norway on Saturday night, and were from the same locality. The orange was impressed upon them and the work will be done at once.

Why do it again and again?"
