MAY YET BRING ABOUT A HURRY-UP ELECTION

NEW YORK, May 6 .- (Special.)-Finance Minister Fielding of Canada is in New York and it is said by financial men he is here in connection with the floating of the bonds of the Grand Trunk Pacific Railway.

The funderwriters, Speyer & Co. and the Rothschilds, who are handling the financial end of the big enterprise, are meeting unusual obstacles in their efforts to dispose of the bonds, and not long ago a small fraction of the amount required for the construction of the railway was known to be taken up. ### MORE OF THE HOPEFUL VIEW. The general manager of one of the leading banks in Canada

said yesterday: "We are over the worst of it from a financial and business point of view in this country, and there ought from this time on. There is a lot of money coming in from Europe for the bonds of Cana-dian railways and national public works, and there is also money now coming in for mu-nicipal bonds, which will rethe municipalities and banks that have been carrying them, and in that way make money available; and there is also a better feeling in the manufacturing and wholesale lines, altho the retail trade is only buying on the closest margin at the present moment.' Another thing that he noted, and which he stated had gone some way to improving conditions in the United States, althe it didn't perhaps apply so much in Canada, is that the railways now deliver any shipments of goods almost as fast as the draft against them can get to the destination of the goods, and in that way payments are much more prompt than they were a year ago, when it took six weeks often to deliver goods at short distances.

### Toronto's So-Called Suburban Railway Service

The table below shows the only concessions made by the two big railways to suburban travel in and out of Toronto. In Montreal they give a 40-mile or farther suburban service, with commuters' tickets to every station on special suburban trains; in Toronto they give commutation tickets to a few stations, but no special suburban service—you must take the regular trains or nothing, and generally the regular trains are unreliable and not timed to suit suburban service.

The figures in the table are given for single trips, with the exception of the return trip tickets. The 10-trip ticket and commuter's tickets (55 trips, to be used in a month), are all for the one way trip. G. T. R. (Main Line West, via Guelph).

In the few places where 10-trip tickets are conceded the rate is based on a return trip for a single fare. But it is only a few places that have this privilege. Why? And some only for summer months. Why And why are commuter's tickets given to Rosebank, Oakville, and

It has been said that the driving clubs thruout the country have stimulated the light harness horse and that the matinees given by the different driving clubs have given by the different driving clubs have made the members of such clubs vie with each other as to who had the best matinee horse. Certainly the Dufferin Club have held their own and are doing all in their power to cultivate good clean racing and put the harness horse sport where it rightfully belongs.

There is nothing more invigorating nor more exciting than a ride behind a good fast harness horse and no doubt before the season ends many more members of the D.D.C. will have horses and develop them for their own, as well as the pleasure of the patrons of the sport.

These races will be finished on Friday next, and the club will put on an extra class for that day, thus ensuring a good afternoon's sport. The entries for the extra race are as follows: James Noble's Directwood, W. R. Payne's Joe Lisle, P. J. Dolan's Billie Dolan, George Snell's Jack, F. Dunn's General Bell, J.McRobb's Frince Al, A. W. New York Stocks Are Active and Higher-Traders Neglect Domestic Shares.

World Office, Wednesday Evening, May 6 Local traders show no disposition to be aroused out of their lethargy. The activity and variations on the New activity and variations on the New York market appear to have no effect upon domestic shares and traders are their efforts almost entirely to the Wall-street market. The trans actions at the local exchange to-day were about as insignificant as they were yesterday. Many of to-day's orders were for broken lots, and brokers re-port that most of these sales are for the account of small investors. The Mont-real Exchange worked itself into an-other frenzy over the Dominion Steel hares, but no one here was sufficiently venturesome as to even enquire for the stock. Brokers had several orders for the bank stocks to-day and Imperial and Dominion were bought at steady prices. Mackay common was the firm issue in the speculative department, but the volume of transactions even in this the volume of transactions even in this issue was trivial. The market closed excessively dull, with brokers paying much more attention to the New York tape than to the home market.

World Office,

Wednesday Evening, May 6.

Yesterday's transactions at the Toronto Stock Market are explained to-day as the result of the sales of investors, many of whom needed the money for other purposes. In the light of this explanation the local station resolved itself down to this, that the buyers are still the large holders and that they are convinced that prices will ultimately rule at a higher range. As the large operators have means of gauging the future better than the ordinary individual, this judgment should be accepted as the correct one until events prove it to be otherwise. Trading at today's market was without feature and pretty much along the lines of yesterday's transactions. The only favorable feature of the exchange Herbert H. Ball. was the absence of any special weakness.

Mr. Blackstock objected and he was sustained by the judge. Mr. Curry dwelt a long time on the fact that both Mrs. Davis and Mrs. Livingstone swore positively that the man they saw was troubled with a twitching around the mouth and eye and as he did so, he said: "You have had the prisoner here before you for two whole days and during that time not one twitch has been noticed." The aged mother of George Slack was on the witness stand in her son's behalf yesterday afternoon. She told Dec. 23 and went to work on Jan 1 at the Island. Then on Jan 27 he wen to work on an elevator at the Board of Trade building. The evidence of Percy Rapp corroborated this. He also remembered the fact of Slack's going home sick on the afternoon of March 20, the day of the assault, as his mother swore. Slack had gone out to a drug store to buy some bromo seltzer, went home, went to bed. He got up at 5 o'clock and ate some supper. He then read the evening papers and wrote a letter to his crother in San Francisco. He then went down the street a few doors to wisit his sister, going there in his sMppers. Slack, himself, testified that he had been paroled after serving eight years nine months and a few days of a 12-year sentence. He had to report to the local chief of police on the 23rd of each month. He had read the story of the assault in The World and ma a note in his book as to where he been and to the description of the man supposed to be gullty of the crime. He reported on March 23, as usual, and was asked where he had been. He told where and was allowed to go for the time.

"If I Should Come A-Lovering" was also encored, as it deserved, and the very seductive old French cradle song, "Petit Pied Rose," was imilarly distinguished, while Flegier's "Love Song," with cello obligato, had also to be repeated.

This was issued at Rotterdam, March 31, 1908, and reads. Dear We introduce to you herewith Mr. Olekea Lutyk, Austria (Ruthcuran), 17 years of age, whom we recommend for work on railway construc-tion. But as Mr. Flett, an enterprising druggist claimed, the evil of such may be grossly exaggerat-ed and the increased population with summer visitors would gradually right the situation. Mr. Burns, boot and shoe dealer, was broad-minded enough to see that it was a march of progress. As such this part of Ontario should not be discriminated against, and business, he felt, would adjust itself without appreciable disturbances.

Another prosperous merchant expressing almost the same idea, was J. Sutcliffe of Sutcliffe & Sons. He referred to the difference in the Osnawa merchant's trade resulting at the time that the cheap boat service was run during the summer season. While he knew that Oshawa furnished more Toronto business than any other town on the front, yet he could not say that his business was seriously affected

T. H. McMillan, the respected cashier of the glory of Oshawa's financial institutions, the Western Bank, believed that a better service was due to the town. He could not see that anyone would be injured by this march of progress. On the contrary, he foresaw better business conditions and greater growth to the place by his office before much of the day had
