ARTILLERY AGAIN HOLDS ENEMY WEST Italian Hydro-Aeroplanes Effectively Bombard Durazzo

ENEMY AGAIN

Fighting Resumed With Assistance of Heavy Artillery.

FRESH DIVISION USED

Bombardment is Unusually Heavy, Says the French Official Report.

LONDON. May 6 .- Heavy fighting has been resumed in the Verdun re gion, with the Germans again on the offensive west of the Meuse. They have brought up a fresh division and apparently made a new concentration of heavy artillery. Instead of attacking Dead Man Hill, around which the battle has raged recently, they are now directing their attention to the scmewhat higher eminence, known as Hill 304, to the southwest towards Avocourt, on the French left flank.

The afternoon bulletin of the Paris war office admits that an unusually violent bombardment compelled the French to evacuate part of their trenches on the northern slope of the hill. It declares, however, that German efforts to advance were checked by the fire of the French artillery, and that the fresh troops the Gersuffered heavy losses.

Attacks by the Germans north and northwest of Hill 304 were pushed so close to the French defences that the bayonet had to be used to repel the assaults

bayonet had to be used to repel the assaults.

Testerday's reports indicating the destruction of three zeppelins are followed today by a despatch from Dutch sources announcing that the zeppelin L-9 had been sighted flying low across the North Sea, apparently badly crippled.

Executions of participants in the Irish rebellion are being continued, the eighth man to suffer the death penalty being Major John McBride, who fought thru the Boer war against the British and afterwards married Maud Gonne, widely known in connection with the Irish home rule agitation.

has protested to the British and French governments against their action in seizing Norwegian mails. Similar protests have been made by the United States to Holland.

Four Italian Aeroplanes Make a Successful Raid

Albanian Seaport of Durazzo Bombarded and All Machines Returned Safely.

ROME, May 6.—Via Paris May 6, 5.12 p.m.—Four Italian hydro-aeroplanes yesterday effectively bombarded the Albanian seaport of Durazzo, says an official statement issued here

caped Death at Imperial Oil Building

GREAT STONE FELL

SATURDAY MORNING

Crashed Into Timekeeper's Box From Seventh Storey -Cause Unknown.

A loud crash at 11.40 on Saturday a Grand Trunk freight train, bound for Belleville, ran into a split rail at the foot of Keele street, Saturday afterthink of Flanders, and wonder if one of range of the city.

The noise resulted from the fall of a five-ton cornice stone from the seventh storey of the Imperial Oil Company's new building at the corner of Church and Court streets. When the hoisting engineer was ready to swing the boom to place the stone in position, the derrick gave way, and the stone dropped practically 100 feet to the sidewalk. The hydro wires were snapped and the stone tore thru the timekeeper's shanty erected on the platform above the sidewalk. The shanty was of one-inch material, while the planking of the platform that was erected to protect pedestrians from falling material, was of two-inch planks. Thru this the falling block tore its way as the the shanty and platform were merely the paper cover

of a circus hoop.

Buried in Sidewalk. On reaching the sidewalk it buried itself at least 18 inches at the lower corner. The sidewalk is of concrete and now is cracked for several feet around the fallen stone. A small coil of half-inch wire cable was caught in the corner of the stone and carried from the floor of the shanty and now lies partly buried in the sidewalk. Several people, including two of the Royal Canadian Dragoons, had very narrow escapes from instant death. The timekeeper was working in the shanty when the stone crashed thru the northern portion. The two soldiers N the Verdun region the French repulsed on Monday four powerNote Verdun region the French repulsed on Monday four powerNote Verdun region the French repulsed on Monday four powerStone buried itself within a couple of Courtmartial to Condemn ful German assaults which were launched against their positions feet of them. Evidence Recorded As soon as a rebel falls into the hands of the authorities his identity is established and the evidence is recorded of the charge on which he is taken. The reports of the officers and soldiers connected with the capture are written down. The prisoner is placed in confinement; then a preliminary inquiry is held and lawyers draw up the

Public Owned Railways Coming.

Public opinion in Canada is being forced to believe in public owned railways. Members of parliament and newspapers that not long ago thought of anything but private company owned railways as a revolt against natural law. Even if there were state owned roads in Europe Canada was the last place to look for them! Besides—and this always came in by insinuation—Canadians were such a poor lot that they never could come up to such a responsibility! Fortune had designed them to be taken care of in this respect by the railway promoter, the politician and "the interests" associated in the exploitation of the people! The public advocate of public ownership was slated as a crank; and party handy-men in parliament representing both sides conspired how they could jockey the question out, of the house, heap ridicule on the crank's views, and slug him with abuse on every occasion. in fact there was a "trained band" made up of workers on both sides to tin-can the public ownership crank whenever he

All now is changed. The papers and the politicians are getting into the public ownership wagon. But more significant than this change is the fact of the absolute failure of private ownership: its wastefulness, its cost, its disregard of the idea that a pubtic franchise involved a public service its construction largely by public grants

and its control and management by private interests, its lack of efficiency in many respects; also how poor a part private owned lines played compared with a state system in times of war, in times like these.

But with so swift a conversion in the minds of the politicians and the press it may be as well for the public to keep an open eye. To delay the day of acquirement is not

helping on the movement. The only way to get public ownership is to get it. And you get it by paying for it, by taking over liabilities, by assuming the responsibilities. There is no easy road to it, but there may be a psychological moment. Even with these handicaps it is the only salvation. Mere talk of it, postponing the day, is trifling at the most serious situation in our history. The time is today, and the place at Ottawa. Adam Beck's psychological moment to clean up at Toronto is also now. Does he see it?

FRENCHMAN CRITICIZES

Says Training Received By Canadian Troops is No Good.

OTTAWA, May 6 .- The house of commons is sitting for the first time on a Saturday this afternoon. Sir Robert Borden's bill granting a war credit for \$250,000,000 passed second reading without division, and the house then went into committee of supply on the estimates of the department of

militia and defence. On the second reading of the bill to provide \$250,000,000 for military and naval defence M. Lanctot (La Prairie Napierville), speaking in French, protested at what he termed the scandalous and disastrous policy of the government in connection with war expenditures. He quoted the famous speech of Sir Thomas Shaughnessy young men were being taken out of Canada. England, he said, was not doing its share in the we: and the government was keeping thousands of soldiers in Canada who were of no use at all. Little France, he said, was hold-ing 400 miles of trenches to England's fifty. In this statement he was cor-rected by Hon. Mr. Casgrain, who pointed out that England had 100 miles of trenches.

of trenches.
Continuing, the speaker said that the war expenditure in March of 25 million was simply astounding. The was expenditures this year he estimated would be \$300,000,000 and the newspapers all over the country were de-ceiving the people as to the real state

"I am scandalized," he said, "when I see so many men in khaki lolling about the streets of Ottawa, when everybody knows that the training these men re-

ceive in Canada is absolutely worth-Not five per cent, of the people in his constituency, he said, were in favor of this policy. If any member of the house would move for a reduction of the \$250,000,000 vote to \$100,000,000, he would be in favor of it.

There was no reply from the government benches and the bill was given a

PRESENT COLORS

TO GRENADIERS

ment benches and the bill was given a second reading.

When in supply the house took up the trade and commerce supplementary estimates. Sir George Foster explained that an item of \$150,000 for the extension and development of Canadian trade was to cover the expenses of a commission. The idea was to systematize and introduce scientific principles into Canadian industry. The commission would, Sir George said. Monday. Sir Wilfrid Laurier expressed his ap-

proval of the move. The next thing he wanted to see done was an improvement in technical education. One thing followed the other he thought, Sir Wilfrid pointed out that Germany now led the nations in the application of chemistry to industry,

The house adjourned at 6 o'clock to sit again Monday.

The premier announced that the G.T.P. and C.N.R. Railway loans will be taken up Monday.

CANADIANS AT LIPPER LODGE REGAIN HEALTH

RED CROSS IS ACTIVE

Helping to Put Buildings Proper Condition for Comfort of Wounded.

LONDON, May 6 .- Nature in the country is sweet in all her moods. So says an enthusiastic admirer of nature, whose writings find much favor. her much more agreeable than on a showery afternoon in April, in Bushey Park. We would prefer a walk under the famous chestnuts, for example, "towards the lovely close of a warm summer's day," than a tramp thru the grass with the rain beating in our face one minute and the sun shining mockingly upon us the next, which were the conditions when quite lately we had the privilege of visiting the almost completed King's Canadian Red Cross Convalescent Home at Upper

Cross Convalescent Home at Upper Lodge.

There is promise of comfort within, tho, when we reach the front door. The sounds of a piano, and strident voices joining in a chorus comes to us. While we await the answering of our ring we look around us and note that the rank vegetation which for years had cumbered the ground of the tenantless mansion before the Canadians took possession of it in Denalty of the commandant of the tenantless mansion before the Canadians took possession of it in Denalty of the commandant of the tenantless mansion before the Canadians took possession of it in Denalty of the commandant of the tenantless mansion before the Canadians took possession of it in Denalty of the canadians took possession of it in Denalty of the tenantless mansion before the Canadian hospital at Lemnos, is commandant at Upper Lodge Mary reached the Lodge she denalty of the fourney afoot. When Queen Mary reached the Lodge sired at once to be shown where certain pletures she had sent had been hung. We may assume that her denalty of the provided the canadian hospital at Lodge. Mrs. Casgrain is with him as nursing sixter. Other members of the sired at once to be shown where certain burners and the rest of the journey afoot. When Queen Mary reached the Lodge sired at once to be shown where certain pletures she had sent had been hung. We may assume that her denalters were expressed in a less "specious" manner than that which we associate with the days of Queen Bess. Other than the rest of the journey afoot. When Queen Mary reached the Lodge she denalters with the rest of the journey afoot. When Queen Mary reached the Lodge she denalters with the rest of the journey afoot. When Queen Mary reached the Lodge she denalters with the rest of the journey afoot. The part of the pour long that the pour lon

cember has now been almost entirely cleared away. There are also signs that the flower beds have received attention from the new occupants of the house. Window sashes and door frames have been endowed with white paint, and the line of iron piping across the park indicates that the necessity for a completely new system. Splendid Spot Where Men of the Maple Leaf Recuperate.

Maple Leaf Recuperate.

Cessity for a completely new system of sanitation has not been lost sight of. His Majesty's office of works are responsible for the repainting and the re-draining, we understand, but nearly all the other labor which is causing the content of the Upper Lodge once more to assume something of its former trimness has been supplied by the Canadian soldiers, many of them deprived of an arm or a leg, who have gone there to be nursed back to a measure of their former

> Besides the strains of the piano a vigorous hammering is heard. The builders are at work putting up light, but solid outbuildings of ashestos. In less than a month Upper Lodge will have its own theatre, billiard hall, recreation room, all built and furnished by the Canadian Red Cross. The Red Cross is doing by Upper Lodge as handsomely as it has done by Clivedon and in its time it has had occupants and other places. When the additions differing are finished there will be room for ways.

three hundred patients.

We encounter what we may call the advance guard of the three hundred when we enter the house. There are about seventy patients at present. All great park where, this summer, of them belong to the Canadian forces. Upper Lodge, unlike other institutions controlled by the Canadian medical service, is to be used solely for the soldiers of the Dominion. The King has lent the house specially for their use.

Col. Casgrain in Charge.

NO FINANCIAL LOSS TO BELGIAN RELIEF

Sinking of Steamers Will Not Result So Seriously as Was Expected.

MONTRAL, May 6.—The loss of the Hendon Hall and the Fridland, reported a few days ago, will not result so seriously for the Belgian Re-lief Commission as thousands of contributors feared. It is reported today from the offices of the Belgian Relief Committee of Canada, 59 St. Peter street, Montreal, that the cargoes were fully insured, so that the commission will be able almost immediately to purchase supplies with the insurance to replace those lost.

It was also learned that no Cana

dian supplies were on either of the vessels, which cleared from Portland, Maine. Had there been, however, the Canadian fund would have been fully reimbursed, for every shipment made is insured to the fullest extent. So no contributor need have any fears or reaching the hungry Belgians.

The worst feature of the loss of the Hendon Hall and the Fridland is that the delay is getting the food to Belgium is sure to cause increased suffering nd perhaps actual starva-tion for some. For millions of Belgian women, children, and old men are liv-ing literally from hand to mouth, depending each day on the pitifully meagre rations which the Belgian Relief Commission is able to hand out to the steadily lengthening bread lines.

MARRIED BEFORE SHOT.

DUBLIN, Friday, May 5, via London, May 6.—Joseph Plunkett, one of the leaders in the rebellion, was married

ful organization, tho, is worth a ra-mark. On the ground floor there is a

large room set apart as a dormitory for men who have lost a leg. Upper Lodge was not built yesterday, and

does not possess a passenger elevator. The mounting of the staircase would be a heavy task for any poor fellow

who makes up with a crutch for the leg he left behind in Flanders, so patients at Bushey in such unhappy plight will bless the consideration

which gives them a sleeping-place on the ground floor. Another notable feature about the arrangements is the generous provision of shower-baths. Nothing of the "pull the string and there comes a trickle" about these, but a building divided into cubicles, when

a building divided into cubicles, where

a dozen mer, eager for a douche may

differing one from another in many

get it at one time.

Twelve Cents

Single Loaf 6 Cents

Double Loaf 12 Cents

Every penny you save these days can be used for a good purpose. Whole dollars may be saved on the bread item alone by studying the value of the bread offered for sale. There are two sizes of loaves permitted by law-a so-called "fancy" loaf, very small, weighing only 12 ounces, just one-half the weight of regular bread-and the "standard" loaf, weighing three pounds in the "double" size and a pound and a half in the "single" size, respectively, four times and two times the size of the "fancy" loaf. One must realize the difference in value between paying 5 cents for a 12-ounce loaf, when for 6 cents one can get a full 24-ounce loaf. Three pounds—a full size loaf -of "fancy" bread would cost 20 cents. You see the economy of buying Lawrence's "full standard" size for 12 cents at once.

Lawrence makes only one size—the legal or "standard" size, full pound and a half, or 24-ounce single loaf, and full 3-pound or 48-ounce double loaf. The illustration above is a reduced photograph of a "double loaf" of Lawrence's Home-Made. When you buy Lawrence's Bread there is no chance of your being deceived as to what you are getting, because there is only the one size—the "standard" size, approved and recommended by the Government. It is the loaf of value, and is the only size which gives the purchaser real worth for the price. Every housewife who has scales should weigh her bread daily. She will find the Lawrence loaves go the full measure of three pounds for 12 cents every time. There is no better bargain anywhere than buying Lawrence's Bread, 17 tickets for one dollar. Your telephone will pay for itself if you use it to order Lawrence's Bread.

Lawrence's Bread

"Quality"-that is the word we work by. We buy the best flour and the best of everything else. We have the best head baker in Canada, and we give him strict orders to make the best bread he can. The fact that Lawrence can sell bread 2 cents a loaf lower than other bakers is merely

a matter of business management and an ability to save needless expense in organization, and put the difference into the QUALITY of the bread. Any person who has been a consistent user of Lawrence's Bread will tell you they never were so well satisfied before they became patrons of ours. It's the QUALITY that makes customers and holds them.

Vernon, N.Y. ne young Preston Trinity Church,

Mt. Vernon

The art of keeping cheerful in the home during the hot Summer days is largely a matter of one's surroundings. The results of our study to make summer home life and leisure more pleasant for you is found in a wonderful assortment of porch, piazza and lawn furnishings which we have brought together in our store. Rugs in nice harmonizing colorings, pretty shades; wicker chairs, rockers, settees and tables; others in maple, oak, old hickory, etc. Swings for the lawn and everything else for outdoor comfort. And, as told you a few days ago, there is no good reason for putting off having these things and getting every moment of the

invigorating outdoor life. Summer is all too short to waste it. Here is a Host of Special Priced Things for Monday to Help You to an Early Decision:---

Reed Tea Waggon, fumed finish, three wood trays, rubber tire ball-bearing cas-

TIDY RACE IN NATIONAL BRAVES AFTER DODGERS

Cutshaw's Homer Won for Brooklyn---Braves' Slugging Saved Rudolph---Joe Bush Twirled Grand Ball for Lowly Athletics---Saturday in Majors.

Special to The Toronto World. FORBES FIELD, Pittsburg, Pa., May 6.-Chicago defeated Pittsburg here today by a score of 2 to 1, errors playing an active part in the score. Pittsburg scored first in the fourth innings on singles by Wagner and Knabe and an error by Yerkes. Chicago tied the score in the fifth on Knabe's error, Schultze's single and an out at first. Chicago scored the winning run in the eighth innings on Flack's pass, Williams' single and an out at first, which Adams played badly, throwing to first instead of to the plate.

BRAVES CHASING DODGERS.

NEW YORK, May 6.—The Braves defeated the Giants at the Polo Grounds today by a score of 7-6 in one of the heaviest hitting games of the season. Rudolph pitched the entire game for the Braves, but only the slugging of his team mates pulled him thru. The Giants scored five runs off him in the first innings. The Braves landed on Tesreau in the second innings and he was chased. Perritt finished the game for the Giants and the Braves found him for two tallies, which enabled them to pull out a victory. Maranville's nitting featured the game.

CUTSHAW'S HOMER WON.

BROOKLYN, N. Y., May 6.—Cutshaw's home run over the right field wall won the game for Brooklyn in the eleventh inning here today. Cutshaw was the first man up, and hit the first ball pitched. Brooklyn tied the score in the sev-

EXHIBITION BASEBALL.

BASIL'S GOOD WORK, PHILADELPHIA, May 6.—Joe Bush had the goods today, and he let Washington down with four hits, the Athletics trimming the Griffmen 4—1. Harper pitched good ball for Washington, but he was yanked for Ayre in the seventh. Washington's lone tally came in the ninth session. Griffith was ejected from the grounds by the umpire and sat in the grand stand.

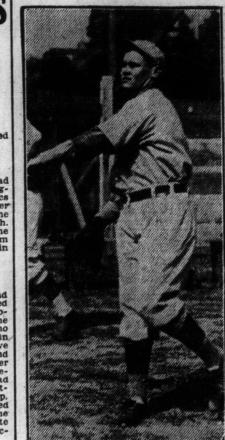

BAKER WAS A STAR.

BAKER WAS A STAR.

BOSTON, May 6.—A fine stop and throw by Frank Baker nipped a Red Sox rally in the ninth innings and today's game at Fenway Park went to the Yankees by a score of 5-4. Foster, who started the game for Boston, was not in form. Three hits and a wild pitch gave New York two runs in the second and three hits and a base on balls netter three more in the fifth. Pennock relieved Foster after the damage had been done. New York used three pitchers, Markle, Shawkey and Cullop. Two doubles and a single put the Red Sox within striking distance in the ninth, but Baker got Barry at the plate on a brilliant play and Cullop caught McNally off second for the third out.

COMISKEY PARK, Chicago, May 6.-Cleveland took first place in the Ameri-

BAKER A WONDER SAYS N. LAJOIE

FHILADELPHIA, May 6 .-Napoleon Lajoie, the Athletics' second baseman, who is serving his twenty-first year in the big leagues, is one player who is convinced that Home Run Baker has not gone back. And Larry's opinion must be taken at par value.
"When the Athletics were

playing a recent series at the Polo Grounds," remarked the big Frenchman, "in the second of the two games we succeeded in playing before Jupiter Pluvius interfered. Bill Donovan assigned a youngster by the name of Markle to the mound. We were behind one run when the ninth opened. Walsh got a pass to open the inning, Strunk and Oldring fanned, and that put it up to me. Markle finally served up one to my liking and I pasted it right on the nose. The ball sped along the third base line. It seemed like a sure two bagger and a tie game. Baker, how-ever, upset all calculations by knocking down the smash and throwing me out at first. It was one of the hardest hits of my career. Gosh, after that don't tell me that Frank Baker has gone back!"

BURNS WANTS DARCY FIFTEEN INNINGS BEATING FOR BIRMINGHAM'S LEAFS Will Over - Guarantee for

2. Humiliation, 105 (Ball), \$8.90, \$5.70.
3. Borax, 106 (Ward), \$7.70.
Time 1.15. Task, Springmas, Paymaster, Mamie K., Chesterton, Broomsedge, Aprisa and Tactless also ran.

LEAFS AT PROVIDENCE

Pitcher "Lefty" McTigue, who was probably the most effective worker on the Toronto club's staff last season, will join the Leafs at Providence on Monday. McTigue has been with the Detroit club all spring, but has had little chance to show his ability. He was used twice after games were hopelessly lost and acquitted himself well. Tho Jennings is loaded up with pitchers of the southpaw persuasion, he was loath to release the lanky twirler, and it was only when President McCaffery explained that his team was handlcapped badly by lack of pitching strength that he consented to ship him to Toronto.

SUNDERLAND DEFEATED

In a Section A T. & D. League game at Lappin avenue Uister defeated Sunderland by 3-1. Sunderland were handicapped by only having nine men, but put up a good game. The score at half time was 2-0 in favor of Uister. The best for the winners were Burdett. Cardy, J. Davidson, and the brothers Forsythe, while Wenthorne, Mead, Brooks and Fidlers were good for Sunderland. The teams:

Uister—Williams, Burdett, Purdy, G. Davidson, Cardy, Adgey, W. Forsythe, J. Davidson, Cardy, Adgey, W. Forsythe, Beld. Sunderland Albion—Wenthorne, Mead Parrott, Brookes, Taylor, Hunt, H. Fidler, Griffiths, E. Fidler.

Referee, W. S. Murchis.

McTIGUE WILL JOIN

Hal Chase is Burning Up Majors With His Hitting

Has Best Batting Average and Leads the Basestealers-Cobb is Coming Along,

CHICAGO, May 6.-Hal Chase, former star in the American and Federal Leagues, is leading the batters and base-stealers of the National, according to averages published here today and including games of last Wednesday. Chase's batting percentage is .458 and is helping to

of last Wednesday. Chase's batting percentage is .458 and is helping to keep Cincinnati in front in team hitting with an average of .279, and his stolen bases number six. Cincinnati has four other batters doing better than .800. The ten leading batters of the National are: Chase, Cl.cinnati, .458; Daubert, Brooklyn, .422; McKeney, Cincinnati, .400; Pittsburg, .875; Hinchman, Pittsburg, .370; Yerkes, Chicago, .859; Rariden, New York, .353; Mollwitz, Cincinnati, .350.

In the American League, Ty Cobb is rapidly moving to the front, ranking just behind Speaker. Detroit batters are well to the front with Dubuc leading at .444, and the Tigers are leading in club hitting with .264. The ten leading batters are: Dubuc, Detroit, .444; Henry, Washington, .409; Cicotte, Chicago, .400; Burns, Detroit, .375; H. Coveleskie, Detroit, .364; Speaker, Cleveland, .355; Cobb, Detroit, .347; Shanks, Washington, .345; Smith, Cleveland, .342; Sisler, St. Louis, .333.

Baltimore leads the International League in club batting with .335. Players who are batting at a .400 clip are: Clemens, Richmond, .625; Ritter, Baltimore, .462; Hendrix, Richmond, .458; Kopf, Baltimore, .468; Jackson, Buffalo, .455; Schrier, Newark, .455; Callahan, Newark, .437; Shean, Providence, .437; Twombly, Baltimore, .428; Banston, Richmond, .421; Tutwiller, Providence, .400.

Lex agton Results

LEXINGTON, May 6.—The races here oday resulted as follows:
FIRST RACE—Selling, four-year-olds ip, six furlongs: day resulted as follows: 1. Hawthorn, 105 (Cooper), \$5.40, \$4.70, 2. Anna Kruter, 114 (Hunt), \$6.40, \$5. 3. Tillotson, 106 (Marco), \$19.90.

Time, 1.13 3-5. Malobar, Stout Heart, Jex, Originator, Cash on Delivery also SECOND RACE—Purse, 2-year-old midens, 4½ furlongs:

1. Nettle Walcutt, 112 (Garner), \$15.50, 5.50, \$4.10.

i5.50, \$6.10. 2. Howdy Howdy, 112 (Andress), \$5.50 4.20. 3. Commauretta, 105 (Hunt), \$4.70. Time—1.47. Brookfield, Miss Fannie, l'easureville, U Steppa and Hard Ball also

Bethlehem Captures Yankee Soccer Cup

PAWTUCKET, R.I., May 6.—The Bethlehem. Pa., team to-day defeated the Fall River Rovers by 1 goal to 0 in the final tie for the United States soccer football championship.

BICYCLE CIRCUIT LATEST VENTURE

NEW YORK, May 6.—A circuit of bicycle tracks in nearby cities is the probable result of the new organization of professional riders. The scheme has been attempted before and has been only partially successful because the promoters, who had a strangle hold on bloycle racing, kept all the real "cards" for their own track and sent indifferent riders to fill the other enare in control of the situation and a new order of things is in prospect. Gredna, Lawson, Goullet, Cameron, and the balance of the star racers, will operate with the new pear-shaped board track at Washington Park, Brooklyn, as the base of the circuit. Another track is contemplated for the Bronx with two or three Connecticut cities, one up state in New York, and probably Boston and Philadelphia, to make up a compact league.

Twirls for Leafs in Opener at Grayville --- Trout Suba bing at Third Base Until Birmingham Explains Why Martin Was Fired.

(Special to The Sunday World). PROVIDENCE, R.I., May 6 .- After rainy night and a showery forenoon the clouds broke enough soon after noon to permit the opening game between the Leafs and the Grays. The grounds were very soggy when the game was called. and bleachers and stands were in a soak ed condition, all resulting in keeping the crowd down to 4000. Manager Shean sent in Billiard and Yelle for the battery work, while Manager Birmingham de-pended on McQuillan and Kelly. The day is warm enough, but threatens rain any minute

ongs;
1. Golden Batam, 103 (Buxton), \$12.70, 44.80, \$3.20.
2. Manokin, 116 (Taplin), \$3.40, \$2.90.
3. Cherry Belle, 92 (Forehand), \$3.50.
Time .56. Yellow Saily won, but was issualified. Lady Mo II., Radiant, Flower, Bendlet, Henobala, Ray Ennis, aucile F. and Yellow Saily also ran.
SECOND RACE—Steeplechase;
1. Battery, 136 (Haynes), \$21.70, \$10.20, \$5.50.

Second Innings.

Toronto—Graham walked and took second on a passed ball. Blackburne sacrificed, Billiard to Onslow. Layden beat out a hit. Trout hit to Brainard, who threw to Yelle for an out on Graham. Kelly popped to Fabrique. No runs. One hit. No errors.

Providence—Tutweiler fanned. Brainard skied to Birmingham. Fabrique walked and died stealing, Kelly to Truesdale. No runs. No hits. No errors.

Third Innings.

Toronto—McQuillan doubled. Truesdale sacrificed to Onslow unassisted. Birmingham singled, scoring McQuillan. Brackett drew a pass. A wild pitch according to the providence—Tunners. Graham walked. Blackburn beat out a hit to Billiard. scoring Birmingham. Brackett overrant third and died, Billiard to Brainard. Layden singled. Trout walked, forcing in Graham. Schultz replaced Billiard. Kell flied to Powell. Three runs. Four hits. No errors.

Graham. Schultz replaced Billiard, Kell flied to Powell. Three runs. Four hits. No errors.

Providence—Yelle and Schultz walked. Rehg popped to Trout. Powell fanned. Shean flied to Blackburne. No runs. No hits. No errors.

Fourth Innings.

Toronto—McQuillen whisfed. Truesdale popped to Brainard. Birmingham doubled. Brackett drew a pass. Graham singled, and Birmingham was caught at the plate, Tutweller to Yelle. No runs. Two hits. No errors.

Providence—Onslow rolled out, Blackburne to Graham. Brainard walked. Fabrique singled. Yelle flied to Brackett. No runs. One hit. No errors.

Toronto—Blackburne skied to Powell. Layden fanned. Trout singled. and was forced by Kelly. Fabrique to Shean. No runs. One hit. No errors.

Providence—Schultz singled. Rehg doubled. Powell singled, scoring Schultz, but Rehg was caught off third, Brackett, to Trout to Kelly. Powell stole third Shean walked. Onslow flied to Brackett, who threw to Kelly for a double play on Powell. One run. Three hits. No errors.

Toronto—McQuillan doubled. Truesdale sacrificed. Schultz to Onslow. Birmings.

Toronto—McQuillan doubled. Truesdale sacrificed. Schultz to Onslow. Birmingsham fouled to Yelle. Brackett was hit Graham walked. Blackburne died. Schultz to Onslow. No runs. One hit. No errors.

Providence—Tutweiler and Brainard. also ran.

FIFTH RACE—Three-year-olds and up, one mile and 40 yards:

1. Counterpart, 109 (Anderson), \$66.40, \$20.40, \$7.10.

2. Linbrook, 104 (Forehand), \$3.60, \$3.00

Graham walked. Blackburne died. Schultz to Onslow. No runs. One hit. No errors.

Providence—Tutweiler and Brainard walked. Fabrique forced Tutweiler, MeQuillan to Trout. Eayrs batted for Yelle, and walked. Thompson replaced McQuillan. Schultz filed to Birmingham and Brainard scored. Rehg tripled. scoring Fabrique and Eayrs. Powell singled. scoring Rehg. Powell stole second. Shean rolled out. Trout to Graham, Four runs. Two hits. No errors.

Seventh Innings.

Toronto—Onslow threw out Layden to Schultz. Trout singled. Kelly singled. Thompson singled. scoring Trout. Truesfold filed to Pabrique, Birmingham singled scoring Kelly. Thompson was caught at third, Powell to Brainard. Two runs. Four hits. No errors.

Providence—Onslow out. Thompson was caught at third, Powell to Brainard. Two fraham. Tutweiler out same way. Brainard singled and Fabrique also hit safely. Thompson went to the bench and Manning, a right hander, succeeded him on the rubber. A double steal was started and Kelly threw high to Trussdale and Brainard tallied, but Fabrique was caught between the bases. One run. Two hits. No errors.

Eighth innings.

Toronto—Brackett was caught at third, agariner replaced Schultz. Graham singled and Brackett was caught at third, vanced Graham. Blackburne singled. Scoring Graham. Layden popped to Onelow. Blackburne stole second. Trout fanned. One run. Two hits. No errors.

McBride and Other Dyment Horses Make Journey From Barrie Safely.

The Dyment horses arrived in Toronto on Saturday, and if weather permits they will be given a tryout at the Woodbine on Sunday moining. Under the careful cye of the trainer, George Walker, the candidates for the different Woodbine stakes will be rounded into shape, and the prospects for the great Canadian stable look good.

Mr. Walker is handicapped in the training by the scarcity of experienced lightweight boys. Many of the old faces are missing. Like true Canadians they have entered another game, and are this year after a "King's Plate" that will mean the downfall of the Huns.

The old horses give promise of performing much better this year than last, and any province-bred will have to step some to keep the lead.

The Dyment horses now stabled at the Woodbine are:

Moss Fox, blk.h., 5, by Red Fox II.—Bella Hamburg.

BASEBALL'S NEW LAUGH-MAKER PUTS ALL OTHERS IN SHADE

Carl Sawyer Makes the Fans Howl With Glee When He Opens Up on the Sideline s-Frightened Them First.

Arlie Latham, Charlie Faust, Nick Altrock and Germany Schaefer, formerly regarded as premier laugh getters in baseball, has faded before the brilliance of the Washington club's jester, Carl Sawyer, Sawyer, a second base. man, first stepped into the limelight at the Polo Grounds on the Yankees' opening day, and he has followed the hit he made on that occasion with a series of rollicking performances that has set the fans in all the Eastern

has set the fans in all the Eastern American League cities talking about him.

Sawyer's debut in the role of a clown came as a surprise to the fans, and his antics at first alarmed them, as they were sure he had injured himself. In the seventh inning with Sawyer coaching on third, the Senators put two runs over the plate, at which Sawyer cut loose. Leaping into the air, he alighted on his head, and it seemed that his neck must surely be broken. While the crowd gasped, he repeated the tumble, and the fans, seeing that he was unhurt, shouted with glee.

seeing that he was unhurt, shouted with glee.

The concher's stunts halted the game temporarily, as the players laughed as heartly as the fans, and Umpire Consolly thought for a moment of ordering him from the side-lines, so that the game might continue in its usual course. On second thought, Connolly probably figured that he would incur the wrath of the fans if

NEW YORK, May 6.—The fame of Arlie Latham, Charlie Faust, Nick Altrock and Germany Schaefer, formerly regarded as premier laugh getters in baseball, has faded before the Brilliance of the Washington club's jester, Carl Sawyer, Sawyer, a second baseman, first stepped into the limelight at the Polo Grounds on the Yankees' he swished furiously back and forth, he cantered about, braying loudly, and stopping frequently to lash out with his legs, for all the world like a muly whom someone was beating. This was alternated by savage bites at his integration of the same of the same

envy.

Grabbing one of the musician's caps, he donned it and paraded around the field as a drum major does his baton, he tossed it in the air, catching it as it came down, and giving a very com-mendable impersonation.

Sawyer is from Des Moines, Iowa, and was signed by the Washington club as a utility second baseman.

KING'S DERBY CANDIDATE AT ENNISCLARE FARMS

The thorobred stallion Anmer, selected by Lord Marcus Beresford from the royal stud at the request of His Majesty King George V., is now quartered at Ennisciare Farms, Oakville, as a sire to improve the thorobred breed and encourage a remount type of horse breeding in Canada.

Animer, it will be remembered, was King George's Derby candidate in 1913, and was running well when he was thrown by a suffragette running out on the course and snatching at this bridle, the fall narrowly being fatal to his jockey, Herbert Jones. The suffragette died from injuries sustained on the following day.

Being a winner at a mile and a quarter in the Hastings Plate, second in the substance, standing over 16 hands, and with a total of 40 points, in the after-The Stirk Pattern was declared winner.

ANMER, KING'S GIFT TO CANADA

Payne Stakes, and third in the Newmarket St. Leger and Royal Stakes, makes gracious and timely the action of the Kng, in his gift to Canada of a horse of such superb breeding, one that will meet with considerable aphare of many races, including the action on the part of the breeders that will meet with considerable appreciation on the part of the breeders and farmers, particularly at a time when the Canadian Thorobred Horse Society are endeavoring to encourage the breeding of a type of horse sired by thorobred horses that will be suitable for remounts. The action of the thorobred society in whose charge Analysis of the same state of the same society in whose charge Analysis of the same society and Manchester Cup; a full brother to Persimmon and Diamond Jubilee, both of which won the Derby and St. Leger for King Ed. ward VII. Diamond Jubilee was sold to go to the Argentine Republic, at the end of his racing care for \$150.—\$150. thorobred society, in whose charge An- 000, where he has achieved great sucmer has been placed, by distributing the revenue derived from the stud cess as a sire. Guinea Hen, Anmer's dam, was also dam of Brakespear, fees in premiums at agricultural shows Pintadeau and Jungle Cock, and traces

for classes of horses and colts suitable to become remounts is a commendable one.

Fintadead and Jungle Cock, and traces on her dam's side to Maid of Mashametric and the suitable to become remounts is a commendable one. In England so depleted have become the numerous hunting studs by the Poll.

WHO BLAMES HIM?

DESPITE HIS "GLASS JAW" FRED FULTON GIVES PROMISE

Referee Goaded Reich on to Stay in New York Bout-Fulton Has Great Left Hand and Recovers Fast - Is Not a Slugger.

By Igoe. NEW YORK, May 6 .- Fred Fulton made good in his first New York fight by making Al Reich practically quit. Indeed. Reich would have stopped fighting entirely had not Bill Brown, the referee, goaded him on to the ninth round. Then Brown, disgusted at

Reich's show of the white feather, stopped the bout himself.

Fulton's debut was an impressive one. He displayed the greatest leftnand seen in years, Fossibly no heavy-weight has ever had a taster one. He gladed Reich into a state of woods.

The Giants may take a brace but latter one to many take a brace but latter one to many take a brace but latter one to many take a brace but latter one to supervisors to qualify in this course.

The first supervised playground was opened in Toronto as the result of the latter of woods. ness, and the blows must have had considerable force, judging from the bruised appearance of Al's face when

was all over. There is everything to be hoped for in this fellow Furten. With careful toaching he will develop into a great aghter. To those at the ringside it was evident that Fulton hasn't the strongest jaw in the universe. Each time Reich landed, Fulton's knees sagged, and it did seem that he would go down for a count. He may have the glass jaw affliction, mind you, but he recovers like a flash. That was one of the good points about him that this fight brought out. He is not a hitter. despite all the twaddle that has been sent out about him. He had Reich be-fuddled and helpless, yet he didn't at-

tempt to cross him with a right-hand Fulton claims that this is his star asset. Perhaps he was fighting a careful bout under strict orders from his corner. Reich is a dangerous man to gamble rights with. Fulton had been told

that, no doubt. As it was, there was little sense of his using any but his left hand, since that weapon was enough to sudue the Odnois.

what would Fulton's char's be with Frank Moran? Can Fu, survive after the big blond whit whim on the jowls? One thing: Train, Moran is one of the game ten in the ring, and he hits for keeps when he does hit Fulton will find that out to does hit. Fulton will find that out to his sorrow, tho it must be said that Fulton's marvelous left hand is going to bother Moran not a little. Frank is a mark for a left jab as a rule, tho he says he delights in fighting men who depend on their lefts alone, Moran's aim in the ring is to take a dozen jabs in order to get in one solid "Mary Ann' as he calls his right-hand punch. It is a question right now whether he can score on Fulton. The lanky Rochester giant has a fairly good defense, is as sprightly as a lightweight on his pins and in all, a fighter to be reckoned with. If he can "take it," F red Fulton is there.

Golfers the land over are pleased to see Fred Herreshoff's name in the news columns again. For a time Herreshoff's life was despaired of. He was under the care of specialists for a time, and gradually his health returned. That he is still a great golfer was proved when he returned a card
of \$1 during the qualifying round of
the spring tournament at Lakewood,
N. J. He was but one stroke behing Sidney Sharwood, the gold medalist. Herreshoff has changed so in appearance that few would recognize a. Once portly and happy-go-lucky his illness has worn him down until he is but a shadow of himself. It is to be hoped that this summer's skirm-ishes on the different links will make

Herroshoff the terror of old.

The giants are up to their old game, that of collar digging. Off to a bad start they are tunneling deeper and deeper each day. Game after game has been dropped until the owners of the team are desperate. On the other hand, the Yanks are playing brilliantly, with a great opportunity to garner all of the Giant rooters.

Baseball fans are a fickle lot at best They want to be with the winner especially when it's the home team. A shake-up in the Giant camp is inevitable. Indeed, there is a rumor about that McGraw may be asked to let a younger and a snappier man take hold of the remnants of the once great ag-gregation. McGraw, it is said, has lost his grip on the men, and doesn't loom up as "the greatest manager in base-

ball" now. It's easy to say "greatest" when the team under you is going great guns.

TORONTO PLAYGROUNDS

Indoor Play Ceases and Fresh Air Will Be Taken Advantage of.

ELEVEN WILL OPERATE

Ability of Supervisors to "Keep the Kettle Boiling," Demines the Success.

By Harry H. Johnson. The city supervised playgrounds of the Toronto Parks' Department are now preparing to emerge from their winter quarters and commence their summer work. During the winter indoor work has been carried on in four permanent centres, and temporary quarters have been used in four other districts, while skating rinks were provided during the skating season in many other parts of the city.

In the winter work lack of quarters has been a great handicap, but in spite of this greater work than ever was accomplished. Two school buildings and the old St. Andrews' Market were used, each several afternoons and evenings a week, and many boys and girls had the advantages of supervised

This year the parks' department will operate eleven playgrounds thruout the city, but on account of the scar-city of funds there will be no attempt made to open new playgrounds. Like everything else, the war has affected this work, and thirteen of the supervisors are now playing the game with the overseas forces.

The success of a playground is de-

termined not by its size and equipment so much as by the ability of its supervisors. These people require special training to fit them for their work, and for this purpose the city has been pro-vided special courses since 1913. The theoretical part of the work is handled by the University of Toronto Social Service Department. Last year this part of the work alone embraced some fifteen lectures. In addition to this, a course in First Aid is required, and practical work in story telling, folk dancing, singing, various games and industrial work in raffia, sewing and so forth had to be obtained at the Mc-Cormick Centre.

This course has resulted in a vast

McGraw has bent every effort to make his team as formidable as of old, improvement in the work accomplished during the summer. Previous to this but the pep isn't there.

Larry Doyle has slumped frightfully course, which is one of the fruits of the supervisorship of S. H. Armstrong, in his batting. He has been Mc-Graw's mainstay for many years. His supervisors were unable to get the nemighty blud geon has returned the Giants winners time after time. cessary training. Now, however, not only are the city playgrounds staffed by qualified men and women, but the Kauff is running true to form. He is lambasting the ball all over the lot.

The Giants may take a brace, but when—oh when, oh when? The Cubs are pounding the front line entrenchments, and they'll take some hiding before they are swayed keen advocate of playgrounds, and succeeded in placing the Old St. Andrews' Square on Adelaide street at the disposal of the association. It was fenced in, apparatus installed, and supervisors placed in charge.

Until 1913 there were playgrounds to obtain the co-operation of the board of education, but after consideration, they decided to maintain their school playgrounds strictly under their own control.

After locking the constant of the systems. Efforts were made to obtain the co-operation of the board of education, but after consideration, they decided to maintain their school playgrounds strictly under their own control. from their determination to win the pennant. The team that beats them out will have to be a ball team. fenced in, apparatus installed, and su-pervisors placed in charge.

So successful was the work of the first season that at the end of the sum-management and planning did not The professor was given a banner to carry in the suffrage parade, but in spite of the entreaties of the marshal he refused to open it, but marched the entire distance with the pennant furled. When he reached home his wife accosted him with:

"John, why on earth didn't you unfurly your banner?" mer of 1907 the maintenance of the

In 1910 the association received a

Scotland Western Mills @ A Message from the President

S a result of this great world war many Canadian firms in the clothing business are having difficulty in securing reliable fabrics. In order to supply the trade, inferior qualities are common. 'Cheap' dye stuffs aud "shoddy" fillings are being used extensively, and the market flooded with a class of fabrics of questionable value. Practically all of these inferior grade woolens will fade. From the day I opened my first store in this city up to the present, I have maintained and insisted upon a high standard of quality, both in the fabrics, linings and findings that enter into garments sent out by any of my chain of twentysix stores. Owing to purchases "direct from the mills," the difficulty experienced by other firms at this time is obviated, and I can conscientiously guarantee the fabrics sold in any of my entire chain of stores. This has always been my policy. I have never allowed fabrics of doubtful value in any of the Scotland Woo en Mills Stores. The continued increase in my busi-

ness and constant demand for new branches in other places assures me that this policy of giving personal supervision to every transaction and meritorious value for honest dollars is fully appreciated by the public. Cordially yours,

254 Yonge Street Open Evenings Till 9 o'Clock

NEW YORK, May 6.—Battling Levinsky, who has had, recently, another skirmish with Jack Dillon, says he means to take a leaf out of Benny Leonad's book and dayslen. he means to take a leaf out of Benny Leonard's book and develop a real wallop, instead of being merely a clever tapper. When Leonard started he was one of the most harmless boxers in the ring, altho very clever. Now he is rated as the most dangerous of the lightweights. When Leonard was merely a boxer he made but scant promerely a boxer he made but scant progress. Now, that he can hit he is the best card in his division. Levinsky says that what Leonard did he can do, and that henceforth he is going to be a knockerout.

Beyond a doubt if Levinsky could

Levinsky has everything that a great heavyweight needs Even his lack of weight could not keep him down if he could hit, but without a wallop he is merely a rather tiresome second rater.

Levinsky has that rare combination, intelligence and toughness. As a rule the hrainy type of boxer cannot stand punishment, but Levinsky is as tough as Joe Grim, albeit as careful as Iremarkable endurance, and is wise enough to take the best care of his condition, so that he is always in smear.

shape. Levinsky is well aware of the fact that his weakness is lack of hitting ability, but that he will be able to overcome the fault is unlikely, no matter how anxious he may be. Instances where a clever, but light hitting boxer found a punch after several years ser-vice are extrapely. vice are extremely rare. There have been plenty of heavy hitters who lost their wallop as they learned to box cleverly, but with the exception of Leonard it is hard to think of a case of a clever boxer who developed a real punch without sacrificing his speed punch without sacrificing his speed and skill.

Beyond a doubt if Levinsky could deliver a C. O. D. wallop he would be as popular in the heavyweight division as Leonard is in the lightweight ranks, and his carning power would rival that of Jess Willard. Except in the mafter of size and hitting ability

What does a bevel gear The Ford owner saves \$12 that the other fellow has to pay for one

\$16.00—Average cost of the bevel gear of cars priced around \$1000 and less. \$ 4.00 Cost of Ford bevel gear.

\$12.00—This stays in the Ford owner's pocket book.

Other Ford spare parts are just as low priced in proportion—the 26 most called for parts altogether cost only \$8.04.

And less than a dollar a year as a total expense for spare parts is not at all an uncommon experience of Ford owners.

HUGHIE JENNINGS SAYS BENNY KAUFF IS A STAR

Now That He Is Subject to Proper Discipline He Will Shine—Natural Top-Notch Hitter, Is Hughie's Way of

DETROIT, Mich., May 6.—Hugh Jennings has voiced an interesting opinion concerning Bunny Kauff. It is that Benny will be a better ball player in the National League than he was in the Federal. Jennings bases his opinion this way:

"Kauff will be a better ball player ander McGraw than he was in the Federals, because he will be more subject to discipline. No ball player can do himself justice unless he is accountable to a manager he respects.

"Tiscipline was almost a forgotten word in the Federal circuit. The players, having nothing in the way of a pennant and a world's series to play for, did not care particularly what happened. Many of them played simply because they were under contract to do so. Such a thing as getting in condition and remaining that way was practically unknown to many of them.

"A ball player like Kauff showed excellent judgment in going after things in a fashion of his own, and remaining with the game despite what fellow players were doing. But the surroundings were bound to have their effect, and Kauff, now that he is with a team that has a pennant in view, can be depended to work at his best thruthe stretch of a season's schedule.

"I believe him to be a natural 300 hitter. He is a good ball player—make no mistake about that! And he will throw off a lot of the critics who are

Continued From Page 1.

can League today by beating the White Sox 4 to 1. This situation furnished one of the biggest surprises of the season. The Indians outplayed the Sox today in every angle. Chicago never had a chance to win. In the second Cleveland scored on a double by Smith, a sacrifice fly by Gandil and a long fly from Howard. Morton singled in the third and tallied on Graney's double. Graney counted on an error and Smith's sacrifice fly. andil's sacrifice and Wamby's Schalk and Felsch singled in the for the Sox's only tally.

condition, so that he is always in great suppliers and EATONS

Clerks Won T. and D. Game at Victoria College Grounds on Saturday Afternoon.

Lancashire and Eatons met yesterday in a T. & D. League game at Victoria College grounds. This was the Eatonias initial bow in soccer this season, and they had the services of several of the 52nd Battalion. Joe McCracken, the Sim Bros., Lieuts. McIntosh and Mawson turned out for the last time prior to leaving for overseas. to leaving for overseas.

Refree Sid Banks lined the team up as

Refree Sid Banks lined the team up as follows:
Lancashire—Bycroft, Williams, Dobson, Robinson, Griffiths, Davidson, Young, Harlick, Wilson, Hughes, Brown. Eatons—McCleary, Harrison, Mawson, Wulfen, W. Sim, Brookes, McIntosh, G. Sim, J. McCrackey, Barrett, Sheppard. Refree, S. Banks.

Eatons kicked off and at once assumed the aggresive, only to be repulsed by Dobson, who put his forwards in action. Eaton forced a corner, which proved abortive. Williams, nuskicking in an endeavor to intercept a pass from the right, gave Joe McCracken an opportunity and he making no mistake to put the leather into the net.

Eatons forced two corners, from the second of which Joe McCracken headed thru his second goal. The whistle blew for the interval shortly after.

On resuming, even play was the order for a time. Harrison tripped Harlick in the dreaded area and Lancs were awarded a penalty, from which they, however, failed to score, McClary bringing off a marvelous save. After this the play was all in favor of Eatons, the Red Rose boys falling all to pieces, despite the efforts of Capt. Dobson and R. Robinson to reduce the lead. Barrett scored No. 2 for Eatons then. Joe McCracken scored two more. Harry McIntosh finished the scoring by running thru on his own and scoring by running thru on his own and scoring No. 6. For the greater part of the game the Lancashire boys, who are a young team, played well, and with more practice will develop into a nice team.

NINETY-SECOND HAVE NO CAUSE TO WORRY

Emphatically Deny That Battalion Will Go Under Strength When Time Comes.

Emphatic denial was given Saturday by the officers of the 92nd Highland Battalion to the rumor that when leaving for overseas it would be ob-liged to go under strength. Such, they claim, is absolutely not the cese. The battalien has been overstrength in-stead of under, and, allowing for the members who may unfortunately have members who may unfortunately have to remain thru sickness, full strength will exist when the order comes to

FIFTY PER CENT. WHEAT IN MANITOBA IS SOWN

All Expected To Be Seeded By End of Next Week Says Official.

WINNIPEG, May 6. That 50 per winnifeg, May 6.—That 50 per cent, of the wheat to be sown this year in the province is already in the ground under exceptionally fine conditions is the statement made today by Minister of Agriculture Winkler The minister expects all wheat will be seeded by the end of next week except in the low-lying districts.

HOOSIER SPEEDWAY **ENTERS THREE CARS**

Will Try for Big Prizes a Sheepshead Bay Race in New York.

INDIANAPOLIS, May 6 .- T. E. Meyers, general manager of the Indianapolis Motor Speedway, announces dianapolis Motor Speedway, announces that he has made entry for three cars in the Sheepshead Bay speedway race in New York City, May 13. These cars are the property of the Indianapolis Speedway Team Company and the Prest-o-Lite Racing Team Company. One is a Peugeot to be driven by John Aitken. The other two are Maxwell Aitken. The other two are Maxwell cars riding under the banner of the

cars riding under the banner of the Prest-o-Lite racing team. The latter two cars to be driven by Pete Henderson and Eddie Rickenbacher.

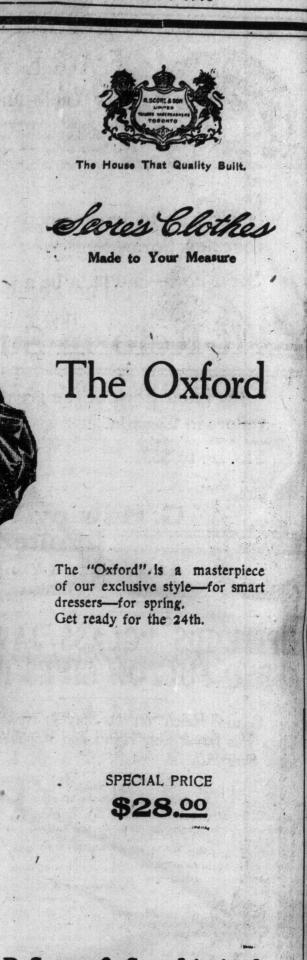

This announcement contains considerable interest to speed fans and will be welcome news to the New Yorkers, but this announcement the even greater significance. It has been to be a seven greater significance. Yorkers, but this announcement has even greater significance. It is a forerunner of what many believe will be a general practice soon, namely, that the ten speedways now in America will have teams of cars and will enter them in each others races. The more enthusiastic believers in this scheme predict a day when the Indianapolis team will race the team from Chicago, New York or some other city for the world's series champion speedway race that will culminate the racing season. Practically all of the cars that are to compete in New York, May 13, will be shipped immediately to Indianapolis to prepare for the sixth annual few cans." apolis to prepare for the sixth annual International Sweepstakes Race on

WATCH FRENCH FLEET DESTROY A ZEPPELIN

PARIS, May 6.—A Havas despatch from Saloniki says the entire population of the town witnessed the destruction yesterday morning of the German zeppelin which was shot down by the French flect in the harbor. The despatch says the airship was one of the newest and largest type known as super-zeppelins.

MISS CAVELL'S EXAMPLE

Great War Drama Will be Presented By Women at Gayety This Week.

SOUL STIRRING EVENTS

Exhibition is in Behalf of Irish Canadian Battalion's Field Kitchen Fund.

The Gayety Theatre this week is going to be the scene of a daily commemoration of the noblest and finest example of female bravery which has stirred the empire since the wap started. It will be the presentation of "The Martyrdom of Nurse Cavell" for the benefit of Ligut.-Col. Lennox's 20sth Irish-Canadian Battalion, under the direction of Mrs. Ambrose J. Small. The production is an Australian photo-play, based on the historical facts surrounding the trial and execution of Edith M. Cavell, the heroic Red Cross nurse who gave up her life for assisting English, French and Belgian soldiers to escape from Brussels and became the victim of one of the worst acts of brutality and ruthlessness known in the history of the world.

Whe nthe story opens the world is at war and Nurse Cavell is an angel of mercy to the maimed and battered soldiers in the Brussels hospital. She receives an invitation to the wedding of Georges Renard, a Belgian lieutenant, and Yvonne Loudet, both dear friends of hers, and while at the house meets Herr Cries, a German military spy, posing as a medical student.

Trouble ensues between Cries and Renard and the former, vowing vengeance, prepares his plan for the betrayal of the city's defences to the oncoming German horde. After the capture and occupation of the city he launches his attack. Rehard is sentenced to death as a Belgian student is sentenced to death as a Belgian spy, but succeeds in escaping in a German uniform. He goes to Nurse Cavell for assistance, and Cries, following on his tracks, obtains information that incriminates the woman for aiding the escape of Renard and his wife.

How flendishly he sets to work to entrap the fleeing couple; his denouncement of Nurse Cavell and the ignomination of sarting or shrinking. I have seen death so often it is not fearful or strange to me."

Nurse Cavell's last message to humanity as she faced the firing party of Hun murderers is one typical of the nobility of the woman who was martyred to save the unfortunate men and women in death-stricken Belgi

GREEK COMEDY GIVEN TO AID THE SOLDIERS

"Pygmalion and Galatea," an unusually pretty and amusing Greek comedy, was presented at the Margaret Eaton School by the Queen's Canadian Hospital Aides.

The cast consisted of the same club members as when the play was given several weeks ago in West Toronto, and all showed considerable dramatic talent as well as excellent training. Miss Edna McDonald, a diamond medalist in elecution, made a perfect Galatea, her fair beauty and sweet girlishness being eminently suited to

Throw Away Your Eye-Glasses!

A Free Prescription

You Can Have Filled and Use at Home

Do you wear glasses? Are you a victim of eye-strain or other oye-weak-nesses? If so, you will be glad to know that there is real hope for you, Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses, and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen' days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time, and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in ¼ glass of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start, and inflammation will quickly disappear. If your eyes are bothering you even a little, take steps to save them now, before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time. The Valmas Drug Co. of Toronto will fill the above prescription by mail, if your druggist cannot.

The Farmers' Dairy Leads Again---Another Drop in the Price of Milk

The Farmers' Dairy was the first to bring the best dairy farmers in Ontario into direct touch with the consumers of the city of Toronto. The Farmers' Dairy built for themselves the finest dairy in America—equipped this shining temple of sun-bathed spotlessness with the most up-to-date machinery that could be bought. I For years they have been supplying Toronto families with milk that is pure, sweet, wholesome-safe milk. I And now the Farmers' Dairy again takes the lead-we have lowered the price. You can buy this better milk at

Take it in hand at once! Drive it out of your system before it ruins your health—your happiness—your very life's welfare itself!

Don't be blind to its dangers, because it works so quietly. Catarrh wrecks more lives than we realize. Are you making that common, dangerous mistake of thinking Catarrh a trifling ailment? Are you fooling yourself with the idea it's only a stubborn, obstinate head-cold that in time will "cure itself"?

Don't deceive yourself any longer.
Catarrh can't cure itself. While you heedlessly neglect it, you're fast becoming a hawking, spitting, foul-breathed nuisance—an object of disgust to everyone you meet. Worse still—Catarrh may get down to your lungs. Once Catarrh settles on the lungs it's no longer Catarrh—it's Consumption. Consumption comes from neglected Catarrh, and over two million people die every year from Consumption.

#### **WAS ON LUSITANIA** SUNK A YEAR AGO

Mrs. Armory of Toronto Has Four Sons With the First Contingent.

MARVELOUS ESCAPE

After Being in Water Four Hours Was Rescued By Boat Hook.

One who was four hours in the sea following the destruction of the Lusitania, and who was rescued in a miraculous way, has submitted the following verses. It is Mrs. Phoebo Amory of Toronto. She was on her way to visit her four sons who went to the front with the first contingent. The boys have been in the fighting since the first, and are still at it.

When they heard of the sinking of the steamer they applied for and were granted leave from the trenches. They

ould hardly believe their mother had been saved and were overcome with joy when she reached England.
The photograph shows Mr. Amory wearing the life preserver.

Death of the Lusitania.

Lest We Forget.

C. Lusitania, empress of the sea,
Art thou dead and buried in the deep'
With all thy freight of human souls,
Victims of the Huns' most hellish darts Come nations: rise, avenge this hide-Avenge, the cries of English hope,

Come nations: rouse and crush This hideous foe, this vampire of the the position of assistant passenger But just a beast of prey respecting nothing,
Laying waste the glorious work of cen-

#### The Medical Officer of Health Writes:

"Please convey to your board my congratulations upon the success of their hospital since it was established . . , you have my hearty sympathy."

Imperial Order Daughters of the Empire, Municipal Chapter of Toronto, Mrs. R. S. Wilson, writes—"One could not but help realize the very urgent and great neces-sity for a women's hospital on a large scale... May I assure you of our interest and sympathy in the work. The Methodist Union of

Toronto, Miss Gawley, of Fred Victor Home, writes "It is with pleasure we re-commend the Women's College Hospital as a much-needed institution in To-

Dr. Bruce Smith "It is time that a city the

size of Toronto had a Women's Hospital . . . although I would much rather see you begin with a new

Rev. Dr. A. S. Grant, Supt. Board Missions, Presbyterian Church in Canada, writes— "I argure you the work that is being carried on by your board is meeting a great need in this city, and ought to have the hearty support of the citizens."

Alexandria Industrial School, Miss Brooking, writes
-- "To anyone working with, or for young girls, the Wo-men's College Hospital is such a necessity that it would be a real calamity to have its expansion retarded."

# We Speak for Poor Women Who Suffer in Silence

It's a pretty lusty youngster that New Hospital at Rusholme Road—only ten months old and its little cot isn't nearly big enough to hold it! What's to be done about it? Why, what else would Toronto do than to pitch right in and give the Women's College Hospital the accommodation it so richly deserves?

Meanwhile, let us take a look at its "Family Tree," and understand what a precious treasure it is to poor women who suffer their ills in silence. Their name must be legion in this great city—in all Canada. For, be it known that there is but one hospital in the whole Dominion where poor women may be attended by physicians of their own sex.

### More Room Must be Provided at the Women's College Hospital

Let no one think that the pressure upon the Women's College Hospital is transitory. Would that it were so! The unselfish women who built it, because the ever-growing need compelled action, have been at this noble work for years. It was in 1910 that the dispensary at 18 Seaton Street, Toronto, was established, following years of helpful work for suffering poor women. For the year ending Oct. 31, 1913, there were no less than 2,859 consultations at the little dispensary. Next year there were 3,672-an increase of 818, or 20 per cent. For the year ending December 31st, 1915, there were no less than 4,015 consultations.

Some Imperative

Needs

The \$120,000 asked for

will be just enough to

with 60 beds, of which 30

### WAR SUMMARY

THE WEEK'S EVENTS REVIEWED BY W. H. STEWART.

(Continued from Page 1).

destroyed off the western coast of Norway on Wednesday. next morning a zeppelin, which raided Saloniki, was brought down by the fire of allied warships in the harbor and all the crew perished. A British cruiser, which was hovering off the coast of Schleswig, also brought down a zeppelin.

It was announced by the British official press bureau on Monsages were sent out to the rebel leaders in other parts of Ireland by the Dublin board ordering them to give up their arms to the authorities. Among those captured by the military were Pearce, the leader of the insurrection, Thomas J. Clarke, S. MacDiarmid, Thomas McDonagh, Joseph Plunkett and E. Ceannt. Pearce, and three others were tried by court martial in the tower of London and markets. day that the Dublin rebels had unconditionally surrendered. Mesothers were tried by court martial in the tower of London and were Best Army in World shot as traitors. Four of his dupes were given sentences of three years' imprisonment. One thousand prisoners were taken to England and interned for the rest of the war. By middle of the week all Ireland was pretty well pacified.

In Asia Minor, the Russians have been continuing their campaign south of Bitlis and they are advancing on Diarbekr, fighting seven divisions that were sent to engagements with Turkish rear guards. West of Erzerum they have made some progress, both on Erzinjan and Baiburt. In the direction of the dire made some progress, both on Erzinjan and Baiburt. In the direction of Bagdad in Mesopotamia, they defeated a Turkish division and captured part of its artillery and many caissons. In lower Mesopotamia, Lieut.-Gen. Sir Percy Lake arranged with Halil Bey, the Turkish commander, for an exchange of the sick and wounded of the garrison of Kut-el-Amara, which surrendered on Saturday for an equivalent number of Turks held prisoners. A British force at Bushire, Persia, left the town and attacked and dispersed a body of hostile troops who were entrenched nearby. In essential respects the situation of lower Mesopotamia remains unchanged.

In western Russia, the Russians have been continuing their offensive on Svetziany Junction, with varying fortunes, but gaining ground on the whole. They sustained some heavy German attacks in the lake region southwest of Dvinsk and the Germans made a

in the lake region southwest of Dvinsk and the Germans made a owing to the discovery of graft on the part of the army contractors. Some little headway at first, but they were later held up by the stout Russian resistance. The Germans have been keeping up a pretty heavy bombardmnt of the Ikskull bridgehead.

part of the army contractors. Some of the French generals at the start were moreover incompetent. The army which was posted on the right of the British army at Mons was defeated, and ran to the rear in rapid flight, leading some by the hundred. In their

Washington demanding an immediate cessation of submarine warfare against the commerce of the allies and says that as a concession, orders have been issued to submarine crews to sink no vessel without warning unless it resists or attempts to run away. The safety of German promises made in the past year and it is not a submisof German promises made in the past year and it is not a submission to President Wilson.

The British steamer Clan Macfadyen had an encounter with two German submarines in the Bay of Biscay and probably sank one of them. One enemy's submersible opened fire at a distance of fifty yards and the vessel immediately answered with its big gun by plumping several shots into the attacker. It disappeared. The Bri- ization figures ran into 4,000,000. 15 tish navy also announced that it had sunk a submarine this week. This news was given out because the Germans knew of the destruction of of men under arms. But the army was their craft.

Some of its reservists were dressed in

The French officially announced that in April they had brought down in fighting no fewer than 31 German aeroplanes and that they Flanking Movement Fails had only lost six of their own machines.

The British Government has brought in a general conscription measure and it has passed its second reading in the house of commons. A motion to reject it was defeated, the vote being 36 to

In East Africa, General Smuts has been held up by the coming of the rainy season, making military operations extremenly difficult, if not impossible.

170th Battalion Brass Band

GATES OPEN 2 O'CLOCK

The military events of the week have | the government is not really to blame, tact by quite a number of people whom his methods displease. The premier is conciliatory in manner and likes to compromise, and this does not suit a great many men who believe that more rough-shod methods are required of a

premier during war.

For instance, some persons are apprehensive that conscription has been over-long delayed. Eut the real truth is not known outside of the cabinet. But Kitchener as secretary of state for war, is a very strong man, and he is not the person to stand rebuffs. He and the military authorities could easily upset the government. It is probable that like any other man of common sense he would make wants known in sufficient time to permit the usual debate and education of public opinion that is deemed neces-sary before any radical departure is made by the government.

front, and that they have inside in. Fopular Education formation that no person else has. If As an example of popular "educa-

tion" the periodical agitations that take place in certain newspapers may have their origin in official inspiration. For instance, when it was decided to make cotton contraband of war, it was preceded by a considerable propagand. This had its effect in neutral countries, which were impressed with the fact that the people were behind the government. The declaration of contraband was forthwith made and nothing very much has come of various neutral protests.

Adoption of conscription by the United Kingdom marks an important change in her military policy, and a departure from the policy of her statesmen in the past. The frequently urged to adopt universal service, and send large armies to the continent iary forces, marked more by superior quality than by number. When the present war began, it had

Prof. Morgan, who made an investigation of the German conduct towards civilians and captured soldiers in Belgium and northern France, and is exceedingly well versed in modern war, having made a scientific study of it, says in a recent issue of Land and Water, that after studying the full re-

duties with great zeal, promotion was extremely slow, for they all hung on to their positions. The result was that there were many captains of 40 to 50. These men were too old as a rule for the effective performance of their duties.

In the matter of equipment, the best that Joffre could do when the war broke out was to put into the field about 1,200,000 men, altho the mobilitation. grafters had not permeated the army, he could have outdoubled that number the old style of red trousers, that pre-sented excellent targets for the enemy

When it was seen that the German army was firmly entrenched on the Aisne, the French began flanking movements in order to try to compethe Germans to retreat. It was de cided to send the British army round by the Pass of Calais. But in the trans-portation of that force of seven divisions, or about 150,000 men, endless delays occurred on the French railway system, and it took the French three weeks to haul part of that force miles to the Lys and the Yser. The Germans were also well informed of what the French were doing by means of their spies, which were not

This slowness of troop movements naturally worked on the nerves of the naturally worked and doubtless and that shrappel will also break said that shrappel will also break and that shrappel will also break

the Yser before he encountered the German army under the kaiser, and fought the three weeks' battle known as the battle of Ypres. This battle ended by exhaustion on both sides, and ended by exhaustion on both sides are ended by exhaustion on both sides, and ended by exhaustion on both sides are ended by exhaustion of the ended by exhaustion

Kitchener Keeps up Program In the meantime Kitchener set about building up a large army. He said at the beginning of the war that he would gradually increase the British forces gradually increase the British would have until in six months Britain would have pound is dreadfully de 30 divisions in the field. That is, he Surrender at Kut would add 23 new divisions to the original strength of seven in that time. Twenty-one months of war have Twenty-one months of war have leapsed and Mr. Asquith said in the men, 3000 British and 6000 Indians, at

battle of Ypres the lines have extending marked on a large scale map, ed in the past year for over 300 miles, from the North Sea to the Swiss fron-tier. There is to all intents and purposes an impasse. No turning move-ment can be made. The operations, therefore, have consisted of wearing down the enemy at considerable expense to ourselves. The fighting and the result of the war, therefore, more and more depends on numbers of men according to the military critic of The available for the war. The side which Fortnightly Review, consisted of six throws in the last fresh reserve wins to eight Turkish divisions. The British Liberte, "the number of sons of genthe war. Conscription is intended to had two divisions, and perhaps three erals killed in battle holds a very con-

ensure that Great Britain uses her whole man power in this terrific war. Reserve From Britain

It was intended by the allies that Britain should furnish the reserve of men for the final and deciding stage of the war. Whether that stage is being reached or not, or whether the war will drag on for many months to come remains known only to the few. Some people have said that the offi-cial view of the war was unduly sanguine at times, and that it therefore has misled the people. That is not what is intended. A wave of hopefulness sent out by a cabinet minister has a certain effect on the enemy. He cannot disregard it. For instance, cersend large armics to the continent during the Napoleonic wars. Pitt and his successors, always consistently refused to do so. Their policy was the waging of a long maritime war with co-operation with their allies by auxiliary forces, marked more by superior in the expectation that the Italians would start in to finish the war. But would start in to finish the war. But the Italians made only feints at taking the offensive. But this manoeuvre served its purpose. It compelled the Austrians to keep all their forces available under arms during the winter, and they were unable to send a part of them home for a rest. This ensures that the bulk of the Austrian troops will go into the coming campaign tired out instead of fresh.

Opinion of Critics

Critics in the United States have also found fault with certain an-nouncements by the British Govern-ment as revealing useful information to the enemy. These announcements may convey information to the enemy, but it is a question of whether it is useful. This is an illustration. A British cabinet minister announced in an off-hand way that the British ordnance factories were experimenting with a gun that would out-class the big German 16½-inch sun. Now, such an announcement, if taken at its face value, would impel the Germans to concentrate their energies on the manufacture of the big guns to the neglect of the smaller ones.

The result of such a policy is seen at Verdun. If reports of visitors to that area are credible, the French relied mainly on their three-inch field guns for the defence of the fortress. They also had a certain number of long-range 6-inch guns to outshoot the German guns, and to put the German batteries out of action. The military correspondent of the Outlook, who has confidential sources of information, and is on terms of personal friendship with some French generals, says that the French relied mainly on their three-inch guns in their offensive against the Germans in the Champagne last September. These pieces levelled the first line defences of the Grmans pretty thoroly. But they were weak on range and did not do much damage to the second German line of defence. This has called into being a long-range six-inch gun which can do the work

work. The use of heavier shells for these operations is akin to the use of a sledge hammer to drive a nail when an ordinary hammer would suffice.

The Outlook correspondent also says that the big 15 and 16-inch guns that

the British and French are manufac-turing are being made for the purpose of battering down the armored cupola forts of Metz and Cologne, Strassbours, and Dusseldorff, and Mannheim. It is not intended to use them against

If small and comparatively small guns are useful against trenches, and do their work as effectively as the large gun, the economy in their use is obvious. A 16½-inch siege gun fires a shell of probably a ton. A six-inch gun fires a shell of 100 pounds. A four and a-half inch gun fires a shell of 45 pounds, and a three-inch gun fires a shell of 18 pounds: Thus, for one 161/2-inch shell weigh-

ing a ton you can provide 20 six-inch shells, 44 four and a-half inch shells, and 111 three-inch shells.

Smaller Guns Were Effective

shots to the German heavy gun's one, smaller gun you can fire that many means of their spies, which were all discovered, and during the same time they were able to move men clear the number of projectiles discharged and not by their weight. Of course, transhes, certain lewelling British high command, and doubtless strong representations were made to the French generals in regard to the slowness of their dispositions. slowness of their dispositions.

Sir John French had intended to get round to Antwerp and to seize and hold the line of the Belgian coast from Holland to Ypres, and to cut the Germans off from the North Sea, But the line house of the calibre with the cost of producing 16½-inch guns as the cube of the calibre. That is, about 26 six-inch guns can be provided for one 16½-inch. So if the Germans off from the North Sea, But the line house of the producing 16½-inch guns as the cube of the calibre with the line of the calibre with the cost of producing 16½-inch guns as the cube of the calibre. That is, about 26 six-inch guns can be provided to set the cube of the calibre. mans off from the North Sea. But the dilatory advance by rail only enabled can with the same cost and effort him to set round as far as Ypres and bring 26,000 six-inch guns to bear to ended by exhaustion on both sides, and if either side could have had a fresh division to throw into the field at the end it would have won a great victory, as Lloyd George has just said in the British House of Commons.

British nave also been experimenting with new and more powerful explosmarshes which are impassable at the present time. The relieving army will doubtless be reinforced, and it will proceed to attack the Turks as soon as the war began that a way had been the climate improves and the earth found to utilize these explosives. It is conceivable that an explosive could be found twenty times as powerful as the

The enforced surrender of Gen.

house of commons this week that the Kut-el-Amara, came as a shock to active British army now numbered 86 the British Empire. As a strategic divisions. That is, that Kitchener has event it is of minor importance. One of our high General Bailloud has been similarly Khalil Pasha is the Turkish commander, and he is the only commander commanders has supplied me with a mander, and he is the only commander ilst of these worthy sons of eminent of the fathers, which, however, is far from the distinction of capturing any army complete, and to which there will be "Each of the following enjoys" the

of British. German officers have been added many a name, I fear. My inextremely unfortunate in Turkey. formant himself has been cruelly bename inscribed in the heroic records They have suffered severe defeats at the hands of the Russians, not only this year, but the year before. The success of a real Turk at this time "General de Castelnau has lost three Corvisart, de Lestrac, de Lestrapis,"

Campaign as Whole

But looking at the campaign as a whole in this theatre, it will be seen that what the British and Russians are endeavoring to do is to clear the Turks out of Mesopotamia, and to open up a line of supply for Russia by way of the Persian Gulf. It is probable that if they succeed after due course, they will link up Bagdad with Tifilis by a light railway and transfer supplies from river boats to railway

In the meantime the Russians are marking time with their campaign west of Erzerum. They are probably engaged in the formation of a fresh army at the seaport of Trebizond for their advance into Asia Minor.

The Russian column which is operating east of Bagdad has obtained a victory over a Turkish division, and captured most of its artillery. A great many prisoners were also taken. The Russians are said to be less than 100 miles from Bagdad.

Russian Advance

This means that with the same weight of high explosives with the On the road to Diarbekr a Turkish effort to stop the advance of the Russians was immediately checked by an impetuous charge of Cossacks. The Turks were overthrown and fled west-ward. In this region there has been much massacring of Armenians, and the Russians in retaliation are putting a great many Kurds to the sword. The blood of the Armenians cries to heaven

from the ground for vengeance. Earl Kitchener in the house of lords paid a high tribute to Gen. Townshend. He had organized his defences with such exceeding skill that his lines were impenetrable to attack. He only sucumbed to starvation. The relieving force had failed to get thru owing to the floods in this level country. These prevented turning movements inland, and condemned the army of Gen. Gorringe to attack the Turks on an im-

possibly narrow front.
It may be said in passins, that the points of attack were contracted to a narrow strip two miles wide on each side of the river. Beyond these were

becomes dry.
The expedition to Mesopotamia was undertaken by the Indian Government existing groups of explosives. The French, however, have been using melinite in their shells, and this compound is dreadfully destructive.

Surrender at Kut

undertaken by the indian Government at the beginning of the war with Turkey. Many victories have been won, and the affair at Kut-el-Amara is the only reverse that has been suffered. The Anglo-Indian army there has cleared a wide tract of country. Kutel-Amara is 250 miles up the river from the Persian Gulf, or nearly as far as Toronto is from Montreal. It was only about two months ago that the operations were taken over by British general staff under Sir William Robertson. As the winter had set in in a tropical country, it was too late to relieve Kut-el-Amara, altho many at-

A Little Bit from Every Purse Will Provide for Belgium's **Hungry Millions** 

"Oh, I'm sick and tired of hearing about the poor, starving Belgians! Why do the papers keep harping away on that same old subject?"

"Because the Belgians are still hungry, I suppose. By the way, have you given much to the Belgian Relief Fund?"

"Well, I can't say I have given anything yet. But then there are so many demands on one's purse these

Isn't that usually the way? Those who have followed the impulses of humanity and have given what they could to the Belgians are the ones who are always interested, who sympathize with their sufferings and are willing to keep on helping.

Those who profess to be "fed up" on Belgian Relief talk are the ones who, at every appeal, have stifled their generous impulses, and are feeling more uncomfortable about it every time.

Belgium's need is growing greater every day as one family after another exhausts its little hoard of money and becomes entirely dependent on the Belgian Relief Fund for daily bread-for life itself. Already these number nearly three millions.

More is needed than the continued help of those who have been giving right along! The big gifts of the rich and well-to-do by no means meet the demands! What the Fund needs - what these Belgian women and children must have or face stark starvation—is the additional help of hundreds and thousands who have not yet contributed!

In the hands of the marvellously efficient Belgian Relief Commission, Seven Cents a Day, or even less, will provide food for one needy woman, child or old man.

Can you afford to give that much? Can you, knowing the need, refuse it?

Whatever you feel you can give, send your subscription weekly, monthly, or in one lump sum, to Local or Provincial Committees, or

ions for the Canadian Northern and

report that the Quebec and Saguena

was to be acquired by the governmen of greater importance was the speech of Hon, Rt. Rogers on Thursday

night, foreshadowing the nationaliza-tion of all the railways in Canada. To We find it necessary, on account

of war conditions, in view of the heavy responsibilities involved, to

cep those railways from default-

ing; and in view of the heavy as-

sistance which has been granted in the past, we have been obliged to place in the stimates a further item of \$150,000 to provide for an

inquiry into the general railway system of Canada to consider the

advisability of the nationalization of those two railways in particular, and probably of other railways

in the Dominion as well. This is an important undertaking, and the

items in the estimates represent simply temorary assistance that this parliament would be obliged

to give were we to take over those two railways today, and until we have made a thoro investigation into general railway system, we do not have made to the system.

net know whether that might or might not be the best course to pursue. With a national system of

railways in Canada, we in the prairie provinces of the west would

have reason to hope that this government would recognize the importance of that great territory,

and that it would secure the con-struction of the additional branch

lines so necessary for its development, and to make profitable the great transcontinental railways that are already in operation.

We acted in the manner in which we did, giving a direct and

temporary loan, in order to maintain the conditions that exist to-day, believing that it would not be

desirable at the present time to allow any default to take place. especially when we have in view

the wider idea of bringing about the nationalization of the rail-

All this I will send you yussoel TELY FREE in a plain, sealed backage at once.

leans at all, to the side of the gov-

of \$15,000.

The effect upon the public was. I think, unfortunate. Poor people who are really denying themselves to help in contraversal and the contract of the commission had been in contraversal form. Its present his case for him. The judge, he knows, will try to do what is right, but none the less he desires an advocate. If the inquiry before the commission had been in contraversal form like the on with the war stood aghast at a been in controversial form, like the ordinary law suit, the Liberals would have got whatever benefit a person gets from telling his story first. As it is the defendants have engrossed the stage and poor Mr. Kyte has been

It is idle to say that no one is prosecuting and no one defending, but that the judges on the bench assisted by a near-judge at the bar are searching for the truth. Charges have been made and the Shells Committee and the minister of militia are on trial. They are entitled to their day in court but so is Mr. Kyte. An old adage says that every dog has his day but some cynic in this con-nection has observed that there are not enough days to go round. Mr. Kyte is plaintiff but he is handicapped by aving his case presented for him the defendants attorney. That attorney is fair-minded, honest and anxious to get at the truth, but his role is that of

a judge and not that of an advocate. It seems to me that the fairer way concerned, the general has a good would have been to have allowed the defence, nor can he be suspected of Liberals to conduct their own case in condeavoring to evade responsibility. Their own way. The government, if it Col. Carnegie says he takes upon desired to be magnanimous, might have nimself the entire blame for any voted them money to hire counsel. Perblunder made in flxing the price for mitting them to nominate one of the graze fuses, and there is where the commission and the public will have created an anomalous situation. created an anomalous situation.
Alessrs. Hellmuth and Johnston could not pull in double harness if one was The fact that the price for these to be crown attorney and the other graze fuses was double what it ought Judge. The advocate must necessarily to have been may beget ouspicion and present one side and Mr. Johnston is by temperament an advocate. The pub-iic looked for him to assume the role of a prosecutor but, as a matter of fact, permitted to take an Itiative. Theoretically, he and Mr. Hellmuth were one, but it must be admitted that the order of reference constitut-

the government was of a restricted him applying to parliament for relief.

I ventured to say a week ago the character and the Liberals wanted a hide-open investigation. They hoped in some way to get over or under the fence in which they had been enclosed by the order-in-council. Mr. Johnston made the attempt, and for looking the control of the legal point involved in the controversy. They have certainly proved beyond all doubt that the Shells Committee was appointed by the minister of militia. We wow know that the appointments were his failure he is not to blame, nor are now know that the appointments were in militia orders and published in The They said to him in effect that Canadian Gazette, it is amusing to wanted a wide-open investiga-Gen, he must appeal to parliament. quence were expended in the house of The appeal was made, not by Mr. Johnston, however, but by Mr. F. B. Controversy beyond all dispute was to turn up the files of The Canada Ga

This legal victory comes too late That was the government that the members of the Shells Committee are officials of the British Government. On Friday of nounced that the Dominion Governparticular and a good deal of old transactions of the Shells Committee except as the agent of the British Government. He justified the Meredith Duff Commission solely upon the ground that Sir Sam Hughes had been indicted by inspections.

true that Mr. Kyte has not been permitted to put in his own case. The proceedings so far have been in the nature of an examination for dismade in Canada. It also appears quite dain that the graze fuses for the Shells Committee paid \$4.00 should have been purchased for \$2.00 apiece. The Russell Motor Company had grievance, but there is something to be said on the other side. Quite possibly General Hughes felt justified in asking the Shells Committee not to give "Some years ago I was a heavy the savage attack made upon latter by

#### DECIDE TO HOLD **BIG HORSE PARADE**

July Event Promises to Be Larger Than That of Previous Years.

#### SOLDIERS PARTICIPATE

Ask Gen. Logie for Permission-Col. Noel Marshall Again President.

The fourteenth annual horse parade and show will be held this year on Saturday, July 1, according to a decision reached at the annual meeting of the Toronto Open Air Horse Parade Association, Limited, in the King Edward Hotel last night.

This year's event, however, will be larger than that of previous years in that the co-operation of the military.

This year's event, however, will be larger than that of previous years in that the co-operation of the military organizations will be obtained if possible, and efforts in other ways will be made to achieve a greater success. The executive committee will confer with Gen. Logic relative to the participation of soldiers in the parade.

In connection with the plan to hold a military review at the same time, it was secided to eliminate the awarding of special medal prizes. The money heretofore spent for the medals will be used to buy colors which will be distributed to three battalions which are in Toronto on July 1. This plan, however, will not affect the custom of giving a one-dollar bill to each driver who appears in the parade.

Unanimous Vote.

The action to hold the event this year was not taken before considerable discussion of its advisability had been made, but at the conclusion of the arguments and suggestions, an unanimous favorable vote was recorded.

It is pure, Canadian, different to the ordinary in flavor, and a healthy beverage for thirsty spring and summer months.

#### ASSESSMENT INCREASE SHOWN IN WARD SEVEN

Exemptions Total Almost Two Million and a Half-Larger Population.

Ward seven assessment figures for 1917 were announced yesterday by the assessment commissioner. They are the first to be struck off, and give a total increase in the assessment of \$160,072 over 1916. The most striking feature is an increase of \$875,681 in the exemptions. This year the exemptions total \$2,497,508, against a total of \$1,621,827 for 1916. This is accounted for to some extent by the inclusion of \$777,060, which is liable for the provincial war tax, for which the ward was not assessed last year.

for which the ward was not assessed last year.

Five properties which, by special statute, enjoy exemption will have to pay a war tax on the total assessment as if these exemptions did not exist. They are—Gunns, Limited, National Dir. Agency, Limited, Swift Canadian Company, Harris Abbatoir and the Kennedy Estate. The tax totals \$787,000, but the city reaps no benefit, as it goes to the government.

city reaps no benefit, as it goes to the government.

The Kennedy property on West Bloor street has a fixed assessment of \$500 an acre. Were it assessed today it would be \$3,500 an acre. Apart from the war exemptions the increase in the exemptions amounts to \$98,621, due mostly to the erection of some school buildings.

There was an increase of 531 in the population in spite of the number that had gone from this part of the city to the front. Land values have decreased

#### FREE TO ASTHMA SUFFERERS

A New Home Cure That Anyone Can Use Without Discomfort or Loss of Time. Without Discomfort or Loss of Time.

#### MURRAY-KAY, LIMITED.

#### Lovely is Miladi in a Silken Suit, And Varied are the Models Ready for Her Choosing

The silk suit, in all its glossy, rustling loveliness, comes as the natural result of the revival of frills. furbelows and all the delightsome rippling lines that go to form the graceful silhouette of Spring, 1916. And there seems to be no end to the variety that is shown in the models in silk that reach us every few days. Each new suit seems to have some charming touch of individuality. And as for the prices at which these latest arrivals are marked, they are really exceedingly moderate.

AT \$35.00 there's a very good-looking SUIT OF BLACK TAF-FETA, with loose box coat stitched round lower edge, cape collar and cuffs in white silk.

AT \$39.50 there's a beautiful SUIT OF SOFT TAUPE TAFFETA, the smart coat lined with white silk, belted at the waist by three cords, the collar finished at the back with a fold of green velvet and row of silk-covered buttons. The skirt is full, additional width being given at each side by "wings" of silk.

Hot Water Bottles, the \$2.00 Guaranteed Kind, at 50c

There are only a hundred of them, so we must limit the sale to not more than one to a customer. We think the bargain such a remarkably good one that we're making a special window display of these Guaranteed Hot Water  Vegetable Silk Hose, 25c Regularly 50c, Monday, 25c

These Vegetable Silk Stockings are perfect from toe up. All sizes are available. Yet they are marked for Monday at exactly half price. It's a sale you mustn't miss. Women's Vegetable Silk Stockings, black only, good weight, with garter spliced tops, and spliced heels and toes of cotton. Regular price 50c a pair. On sale Monday, per 25c

(Only two pairs to a customer. No phemail orders.)

#### A Half-Price Sale of White Repp It's the Regular 25c Quality, Monday, 12½c

This is the regular 25c quality of one of the most popular cotton fabrics. White Repp is an ideal material for summer suits, separate skirts, middies, and children's dresses. The sale will be limited to not more than 15 yards to each customer.

MONDAY, we shall place on sale in our Wash Goods Section, FIVE HUNDRED YARDS FINE WHITE REPP. 36 in. wide. A very fine, good-wearing quality. The regular price 25c a yard. Half price, Monday, per yard.... 12½c

These Steamer Trunks \$1.95 Reg. \$6.00 Each, Monday \$1.95

A good, strong, neatly made Trunk for \$1.95— That will be your reward if you come bright and early to our Trunk Section, Monday morn-ing. The number is limited; every trunk is a regular \$6.00 value; not more than one trunk to a customer; description as follows: Steamer Trunks, 34 in., 36 in. and 40 in. sizes, fibroid covered, neat square edges, valance clamps and knees, heavy brassed corners and clamps, tray with covered till \$1.95 Regularly \$6.00, Monday, each ....\$1.95 (No phone or mail orders.)

New\$1.50&\$1.75 Corsets 95c These are Corsets that sell regularly at \$1.50 and \$1.75. They are new models, in styles for different figures, but because we have them in sizes 20, 22, 24, 25, 26, 28 and 80 only, we've decided to clear them at away below the ordinary prices. In some cases there are only two or three pairs of a size, so don't be late if you want to share in this unusually good offer:

New Corset Models the previous street are only the corset Models.

New Corset Models, the regular prices \$1.50 and \$1.76, Monday per 95c

#### If You Have House Decorating in View See Our Wallpapers, the Prices From 15c to \$10.00 a Roll

Truly magnificent is the collection of New Spring Wall Papers that you will find in the House-Decorating Section of the Kay Store, the prices. per roll, ranging from 15c to \$10.00, with in-between prices galore.

For years, MURRAY-KAY WALL PAPERS have been distinguished by the excellent taste shown in their selection, this being equally true of both low-priced and higher grade papers.

Our buyers are men of acknowledged taste and wide experience, and we make it our special endeavor to choose only such designs as will lend themselves to the proper rounding out of some scheme of decoration. We are very particular, also, as to the class of decorators we employ for doing their part in the successful whole. Indeed, we have no hesitation in guaranteeing complete satisfaction on any contract entrusted to our House-Decorating Department.

We have also an excellent staff of workers for exterior decorating, the best of materials and skilled labor combining to give the most admirable results. If you are thinking of doing over either the whole house, or only a part of it, you are cordially invited to visit our House Decorating Department.

Large Amount of Money Raised for Patriotic and Other Purposes.

The third annual meeting of the Unionville branch of the East York Women's Institute was held at the home of the president, Mrs. G. A. M. Davison, yesterday afternoon, with a large attendance. The report of the treasurer, Mrs. R. A. Stiver, showed a large amount of money raised during the year for patriotic and other purposes. The institute has done splen-ipe shakspere is being honored daily, the latest dinner cards are especially attractive, both to those who enterally attracti

SUNDAY MORNING

Heavy Demands Have Been Made Upon This Popular Regiment.

SUPPLYING MANY MEN

Splendid Opportunity Being Offered Those Unable to Go Overseas.

The Queen's Own Rifles of Canada is starting a strong drive on Monday to bring the two home service battalons up to full strength, including the branches required to thoroly equip a

To do this it requires 1200 new men. by Fruit-a-tives, Limited, Ottawa. bers. The regiment has always been one of the most popular in Toronto and thruout the whole Dominion. It is

probably the best-known regiment of the overseas dominions. Up to date the regiment has sent over 8000 officers, non-commissioned officers and men overseas. Over 600 members have left for the overseas service since the direct of the year, thereby decreasing the ranks by approximately 150 men per month.

The home service battalions are

constant source of supply to the over-seas forces and in addition acts as a reserve for home defence. It is believreserve for home defence. It is believed that for every thousand men Canada has at the front she should have two thousand in training in England and two thousand men in reserve in Canada for home defence purposes. The need for home service is next in importance to overseas service and the home battalions of all regiments are supply denots for the overseas batare supply depots for the overseas bat-talions.

Fine Opportunity.

The men whom the Queen's Own ask to apply are—men who have applied for overseas service but have been rejected, but who are suitable for home service; men who will or can go overseas later on and wish to receive a preparatory course of training now, and men who grapes and services of training now, and men who cannot go overseas at all, but are willing and desirous of serving their country at home. Ex-members of the Queen's Own are par-ticularly desired, and a cordial invi-tation is extended to them to rejoin their old regiment at this time. There is a great difference in the requirements demanded for home service and that for overseas. A great many of the men who have failed to pass the overseas requirements are eit. they are asked not to be down-heart-ed or feel that they cannot help at this time. The home service offers a splen-did opportunity for these men to ren-

AN ENTHRALLING STORY

Tense, Tragic Photo Play Reveals Greatest of Patriotic Lessons for All Canada.

Twice daily all this week "The Battie Cry of Peace" will be presented at Massephelir opportunity for these men to render no little service time, and it is expected a great miny men will grasp their opportunity.

The Queen's Own history is a brillant one that extends back to 1857 and their deeds speak from the pages of the records of the Fenina ruid. Northwest rebellion. South African campaign and the present war. It is a battailon that every man, from the officer commending down to the newsest recruit, has reason to be proud of. Drining this short recruiting campaign to bring the two battailons up to strength it is fully expected that the many men who are, for various reason, anable to go overseas, will be on the cartain they can in the ranks of this splendid regiment.

PROSECUTE PHYSICIANS

FAILING IN THEIR DUTY

The registrar-general has instructed the various division registrars through the province to supply him with a monthly list of physicians in default will be prospected. In this city and in other municipalities, physicians have been found to be notorlously lax in complying with the law regarding the notification of births, and the registrar-general is determined to put a stop to it.

Apply a little Blue-jay plaster.

That brings a wonderful wax in touch with the corn, and protects it.

This wax was invented by

those who are fighting the battles of the empire, are saving our womankind in Canada. It will be good for women and for girls to realize what sort of an enemy it is that our boys are contending against on the blood-drenched fields of France and Flanders,—yes, and to realize, too, how little womanly a thing it is for any woman to seek to hold back any man from playing a man's part on the great world's stage, which is set in Europe today.

world's stage, which is set in Europe today.

The photo play is tense and tragic, but
it is frankly propagandist, too. It is
the propaganda of the clarion call. It
is the propaganda of the fiery torch.
It is the propaganda of women's screams
for help, hurtling thru the darkness—a
darkness that may be felt. It is not
the least of the merits of "The Battle
Cry of Peace," that it touches us all,
if we have any manliness or any womanliness in our make-up, to finer and higher issues. It takes us out of our sarrow, selfish selves, It teaches us, with
cogent force, the compelling lesson that
"It is not all of life to live."

Nor all of death to die."

It stirs us to of fine frenzy, and finally
to a desire, little less than a craving,
for definite, determined and decisive action. "If you wish peace, prepare for
war." That is the moral, that is the
lesson, of "The Battle Cry of Peace."

#### BIG RECRUITING RALLY ON RUNNYMEDE ROAD

Number of Recruits Responded to Appeals of Speakers.

Runnymede ratepayers held a grand Runnymede ratepayers held a grand open-air recruiting rally last evening at the corner of Runnymede road and St. John's road, which surpassed any meetings yet held in this section of the city. A huge bonfire and lively music brought hundreds of people from the surrounding section, and a good list of sperkers made the meeting a marked success. The meeting was held expressly for the benefit of the 220th Battalion.

Dr. Chas. Sheard delivered a stirring address, and was corded an ovation. He spoke highly of the valor of the Canadian soldiers, who were making a new nation. nation.
Other speakers were: Col. Brown,
Magistrate Kingsford, Pte. Gibbons and
Sergt. Meredith. Enoch Ward was
chairman. Several men elisted at the
conclusion of the meeting.

# The Second or More Purchases of Tires---That's Where Dunlop Triumphs

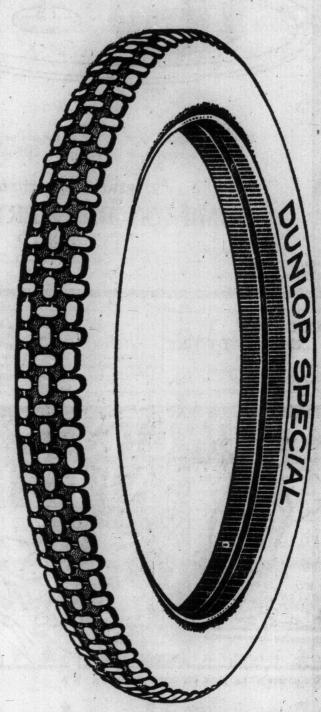

Often the new car owner is really not buying tires as the result of his own opinion and experience until he comes into the market to replace one or more of the tires originally found on his car, and that is just where the buyer comes face to face with "Dunlop Traction Tread" or "Dunlop Special." Dunlop Tires have no friends other

than those quality has made, and the repetition of that quality has retained. That is why when you come to consider the "second, third, and thereafter" purchases, Dunlop Tires are in the greatest evidence. . . . . .

When you see that countless number of cars, large and small, equipped with either "Tractions" or "Specials," remember each and every one of those motorists bought those tires on merit---not because he did not have a measure of satisfaction with his original equipment, but because something told him he would not settle the tire question definitely until he got "Dunlop Traction Tread" or "Dunlop Special."

What is good for the "second, third, and thereafter" choices is necessarily good for the first choice. If, when purchasing a new car, you show an unalterable preference for Dunlop Tires, you will find that you can get them, no matter what tire equipment is on the car at the time.

When any opposition is shown to giv-ing you Dunlop Tires you can at once distrust the argument, because the salesmanship which does not seek to please, surely cannot be regarded as seeking to satisfy.

Expect That Agreement With Will Be Completed Soon. City "The question of city water for Thousands of Dollars Damage Caused to Mills, Bridges and Culverts.

The flooding out of the Kettleby dam and mills a day or two ago, at an estimated loss of \$12,000 makes the spring freshets of this year all over the country the most disastrous in a decade and in removing freckles and giving a clear, beautiful complexion that it is sold by any druggist under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and renove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles wait the signature of the city to complete the contract. With the exception of the eastern part of the double strength othine: it is this that is sold on the money-back guarantee. ARMORIES IN EARLSCOURT.

The Dominion Government thru W. F. Maclean, M.P. for South York, will be asked to establish armories in the Earlscourt district, according to a resolution Roberts avenue.

#### HOW FAT FOLKS MAY BECOME THIN

By Elizabeth Thomas.

Perhaps you are suddenly becoming stout, or it may be that you have been putting on weight for years. In either case the cause is the same—lack of oxygen-carrying power of the blood. This trouble occurs in adults of both sexes and all ages, but it may be overcome very easily and without any of the privations that most people imagine accessary to reduce their weight.

Simply go to your druggist and get some oil of orliene capsules. Take one after each meal and one before going to bed. Weigh yourself so as to know just how fast you are losing weight. Wonderful results have been accomplished by this recipe, but be sure to get the sensition oil of orliene in capsule form. It is sold only in original scaled packages. Any large druggist can supply you, or a large size box will be sent on receipt of \$1.00. Address D. J. Little Drug Ce. By Elizabeth Thomas.

Saturday's Market on the Toronto Stock Exchange Closed With Good Undertone.

The Toronte Steek Market developed further strength on Saturday, largely because of the improvement on Wall street, Cement was the active Issue, with a two point advance to 64%. Nova Scotia Steel continued to show decided strength, selling at a new high of 113%. The other listed stocks were quietly firm, in the unlisted issues the mines were the only feature, with a smart advance in McIntyre to a new high level of 117%. Sentiment in the week-end was confident, and, parring accidents, stocks will be stronger next week.

#### Chiropractic Science.

#### Growing Disbelief in Drugs

FIFTY M!LLION PEOPLE in Canada and United States disbelieve the drug and germ theory, and say so.

THEY KNOW Chiropractic science is a friend of mankind; it will harm no one if utilized through the truly competent Chiropractor who adheres to true Chiropractic principles, as taught at the Palmer Fountainhead School.

#### Opinions of Doctors

THE WORLD is undergoing a great change, and we are in possession of written statements by well-known and highly recognized authorities in therapeutics, who have repudiated drugs absolutely, and turned to Chiropractic methods, as the long-looked-for system for disease.

PREVENTION, as well as a truly ccientific conclusion dealing with primary cause of disease, leaving effects to Nature's response.

THE PUBLIC AT LARGE have grown restless with repeated failures of stimulative medicines and surgical removal of diseased tissues and organs; and have turned in vain from pillar to post for a better way from disease.

SKEPTICISM IS NATURAL, when such time-honored theories have failed to

#### time-honored theories have failed to relieve them of suffering and premature death. Chiropractic Versus Insanity

NSANITY IS ON THE INCREASE with nervous diseases, but Chiropractic spinal adjustments have restored many to health and to their homes, after years of asylum incarceration and medical failure.

#### Appendix Necessary Organ

THE INTELLIGENCE which fashioned the human body made it perfect, and every organ and gland has its function to perform.

IF THE APPENDIX IS INFLAMED or enlarged the Chriopractor knows the cause, and can adjust it, leaving the person in full possession of that necessary gland which secretes lubrication for part of large intestines. The samples to tonsils and membranes in nose and throat.

#### Experience Teaches

THE MAN who writes this message knows by experience, after fifteen years of sickness and seven fruitless operations on nose and throat, finally finding health and normal breathing after spinal adjustments (only) at the hands of a true graduate Palmer Chiropractor.

NO MEDICINES GIVEN.

SURGICAL OPERATIONS UNNECESSARY.

ELECTRICAL TREATMENTS AND MASSAGE ARE POOR SUBSTITUTES FOR PERSONAL EXERCISE.

CHIROPRACTIC ADJUSTMENTS REMOVE THE CAUSE—NATURE RESTORES HEALTH.

#### Chiropractors.

ALL CHIROPRACTORS GET RESULTS respective abilities, training and efficiency.

ONE GREAT NEED is the proper training and after the proper training and trai efficiency.

ONE GREAT NEED is the proper training, which can only be obtained after having taken a full resident course in the best chiropractic school.

NOT A CORRESPONDENCE COURSE.

ANOTHER GREAT NEED is the ability to properly adjust the cause after a correct analysis of the spine.

BUT THE GREATEST of all needs is the absolutely correct analysis of the spine, for only by this will you get the best results in chiropractic.

THE USUAL WAY to get this analysis is by hand palpation. But there are some conditions of the spine that are not detectable by this method.

BUT WITH THE USE OF THE X-RAY there is absolutely no condition that cannot be seen.

THEREFORE, why not use the X-Ray to get this proper start, which may save you a lot of time and expense.

FREE SPINOGRAPH X-Ray Picture to new patients. new patients.

#### SCIENCE MAKES CRIME A THING TO BE FEARED

Guilty Persons Brought Face to Face With Undeniable Evidence.

A HELP TO THE POLICE

Latter Would Often be Powerless Were it Not for the Scientist.

BY W. B. THOMPSON. LONDON, April 29 .- "Without the scientist the police would be powerless to bring home to the guilty persons the majority of murders," a Scotland Yard man remarked to me the other day, when discussing the latest London tragedy; and he then proceeded to give some instances of the manner in which the laboratory has brought men to the gallows. The day is rapidly disappearing when the hardened criminal can sprinkle his clothes with the blood of a chicken, or some domestic animal, to hide the dark some domestic animal, to hide the dark spots that might betray him as a murderer. If the hairs of his head are numbered, so are the infinitely small corpuscles that course thru his veins. The blood test is, perhaps, the most important phase of the laboratory work. When clothing is brought in for examination, the spots are scrutinized under a small hand-lens. Then a physiological salt solution is made with the specimen, a portion of this being examined under a microscope. Then, by the usual chemical tests for blood, the presence or absence of blood is determined. Should blood be found, then resort is made to biological methods to determine the kind of blood. It makes little difference how old the stains are. In one instance the prestains are. In one instance the pre-sence of blood was detected and its nature determined with a specimen known to be eighteen years old.

From an Old Book In a quaint old volume, entitled "The English Housewife," published three centuries ago, there occurs the following bit of advice which will probably bring a smile to the housewife of today: "It resteth now that I proceed unto Cockerie itself, which is the dressing and ordering of meats in good and wholesome manner, to which, when our housewife shall address herself, she shall well understand that these qualities must ever accompany it. First, she must be cleanly both in body and garments; she must have a quick eye, a curious nose, a sharp taste and ready care. She must not be butter-fingered, sweet-toothed, nor faint hearted; for the first will let everything fall, the second will consume what it should increase, and the last will lose time with too much niceness."

Set. Major Clayton and Quartermaster Sgt. Crews of No. 2 Company Canadian Army Service Corps Training Depot, C.E.F., at the Exhibition. Sgt. Major A. Clayton has served with the C.A.S.C. Home Service since the formation of that branch of the service was organized in Toronto, transferring from the 10th Royal Grenadiers and served with the 3rd Canadian Mounted Rifles in the South African War having over 21 years continuous service. Sgt. Major Clayton and Quartermaster Sgt. Crews were both bricklayers in Toronto.

#### RED MILL PRESENTS CHAPLIN'S 'CARMEN' BURLESQUE THIS WEEK

Big Laughing Feature Has Been Secured by Enterprising Management of Yonge Street House-Tremendous Crowds Will Have One More Chance to See Him.

The last feature picture Charley | street, opposite Eaton's, has secured Chaplin produced before he left the should play to bumper houses every Essanay Company was a burlesque on "Carmen," and his admirers in Toron-"Carmen," and his admirers in Toronto—and they are legion—who have seen
it are a unit in saying that it is one
of the funniest photo-dramas ever
staged. The inimitable Charley as
Darn Hosiery is excruciatingly funny
in his make-up as a gallant knight,
and his antics as he makes love to
Carmen, and his side-splitting duel with
his rival for her affections, are a
scream from start to finish. His suicide at the end, when he attempts to
stab himself with a knife which curls
up as he presses it against his breast. up as he presses it against his breast, is alone worth going to see.

The Red Mill Theatre on Yongo

That Pavlowa is the leading dancing cademy in Canada is an undisputed

fact, since its beginning, and to find this a correct assertion, it is only necessary to visit there some evening people who patronize it. There is probably no better conducted academy in North America than Pavlowa, and the management spare no efforts in mak-ing it a place where Toronto's best peo-ple can go and enjoy an evening's

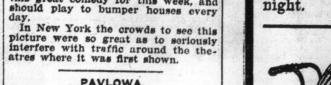

Pavlowa. After spending the early part of the evening in motoring, they eventually turn to the Cowan avenue eventually turn to the dances. Their academy and enjoy a few dances. Their cars are carefully looked after in the rear of the academy by attendants, and this they greatly appreciate.

Now that the evenings are soon to

become warm, the management are in-stalling, this week, several huge elec-tric fans, which are to drop from the ceiling to the dancing floor, and theso, in addition to the many fans distributed thruout the building, will make it the "coolest spot in Toronto."

For those wishing to learn the modern dances in a short time and a thoro

Nothing too Good. Where could one discover in the an rale of la mode "bathing suits" to match these latest extravagances of the French designer! Nothing is too she be a swimmer or just a charming "beacher." In fact, the beacher's togs are so altogether lovely, the "real sport" might be forgiven if now and again she tossed aside her jersey twopiece and Annette cap and stepped in-

The silk shore costumes, as the bath. ing frock is sometimes known, is a delightful affair indeed. Fashioned on the very latest approved lines, and of the very newest silks in the very best of colors, these lovely little crea tions show all the care for detail and thought of design which characterize their sister-models, whose chief difference lies in the length of skirt and sieeves. The vogue of distended hip widths, snug bodices, wide-away collars, buttons, belts, bows, and bunchy ruffles, is exploited in a host of fascinating stylse almost bewildering in number and originality.

Pussy Willow Silk. Frocks of pussy willow silk or the new khaki kool are made with swaggar capes to match, while smart lajerze ostumes display trimmings of taffetas nd slik braid combinations of two hades of silk are also very effective. At least the saucy little mermaid to the left would have it so. Her frock of black taffeta has a reed run in at the hips and abbreviates to show black bloomers gathered into navy blue beribboned bands. Her very normal waistline is encircled with a length of the navy fied into a flat little bow, and her scalloped bodice, sleeves, and high flaring collar are also bound in the contrasting silk. Then, of course, her bathing hose are navy silk, and her bathing shoes are black satin, and the colors once more unite in the freaky little cap with its swinging loops. Somewhere, not far away, a patient admirer

good for the modern mermaid, whether | Two pretty bathing frocks that obey Dame Fashion, and "don't go

A trio of up-to-the-minute costumes for the modern mermaid.

Two-Piece Swimming Suits Win Popularity, Too, and Are Universally Adopted by Realistic Mermaids Who Sport in the Salty Depths This Summer.

"minding" her Japanese parasol, which comes into favor whonever the hour on the sands is contemplated. The dainty little miss in the five fluffy frills would certainly cause Father Neptune to beam with pride. Her stylish collar, her peplumed bodice, and round little hat are fashioned enirely of apple green taffeta, and she, ioo, favors a bow in the centre of her celt. Her skirt ruffles are very full and very pretty, this time modestly concealing frilly bloomers but quite evealing apple green hose.

In the Deep Blue Sea. Turning to the one who plays "in" the deep blue sea, rather than at its glistening edges, one is just as pleasantly impressed with the aspect of her trim costume, for, add to the qualifications of style and charm, that of practicability, and you have a picture winsome indeed. Generally speaking, the enthusiastic swimmer chooses 'two-piecer." Freedom of movement must be enjoyed, and can only be had when a lightweight suit of slender, easy proportions is worn. La jerze or wool jersey are most often chosen by the 1916 summer girl, who only adds to her charm by donning one of numerous sports costumes. The central figure in the group of three, appears in a typical suit ready for her ride on the waves. The suit is a wool jersey in a lovely green and own leather mixture, prettily med with bands of bright green. The nickers are perfectly plain and fash-ioned on slim, straight lines. The the knee, and displays three bands of the trimming. Very pretty is the "V" shaped neck, and there is a tiny sleeve entension, narrowing off towards the shoulder, where the tunic is fastened with two green buttons. A bright green satin rubber diving cap is worn, trimmed with black. The shoes are black and green striped satin and, of course, are left to bask in the sanshine on the platform behind the diving board. The "land" mermaid to the left is wearing a bewitching little frock of black taffeta exploiting the new and remarkable vogue of the crepe de chine collar. White buttons, in groups of three, are on the blouse, and white braid chases up and down the van-dyked points of the skirt. Black satin

The other little maid is wearing ess extreme swimming costume choes complete her costume.

Accessories Next. played. If a purple and white khakicool bathing costume is worn, one may expect to see a handsome beach wrap n the same combination. A parasol will be somewhere close by, and the fair devotee will bind her tresses in a stunning turban. Perhaps instead of in ail-enveloping wrap, she will feature a dainty white rubber shawl and mortar board cap, with fringes and tassels of black striped rubber. Or again, her whole outfit may be an amazing modern conception in black and white rubber, with turban, scarf, and shoulder drapery most unusual. Often and often a halo of rubber is carried about and just pulled on over the smart brimless cap, when Miss Mer-

#### RARE EMBROIDERIES **GRACE NEW COLLARS**

Fashions Which Short Time Ago Were Tentative Proposals Now Accepted Designs.

#### TINTED CHIFFON USED

reasures Kept From Days Gone by Are Now Being Called Into Play.

LONDON, England .- Fashions which few weeks ago were more or less tentative proposals as to what might or might not eventually be worn have gradually crystallized into definitely accepted designs, and it is increasingly evident how quiet and moderate

these are, both in outline and tone. The first early models, launched by the great couturiers, are not really intended to be taken quite seriously, the the coming mode is there to be seen by the discerning. All the apparent exaggeration merely serves to educate and prepare the eye, so that, when the real models appear, they are acthe real models appear, they are accepted without demur, even when involving such a decisive change of silhouette as has happened this season. With this moderation, perhaps because of it, there has never been greater opportunity for the expression of self than at present, and this is achieved in warious ways. For instance, white muslin is no longer seen on any of the new models, but brightly toned chirfon, in the form of wide flat collars, with an inner one of old embroidered lawn, half rolled over to frame the face, has quite superseded the too popular white of last year. These lawn collars, which may be worn large or quite small, with the high upstanding one of delicately tinted chiffon, call into use those treasures of tine embroidery kept from days gone by either beautifully embroidered tiny caps, or the larger form of exquisite head drapery worn by our forebears when hardly grown up! Either of these, deftly handled and with their terms. deftly handled and with their tones of old parchment combined with some shade of chiffon, such as iris mauve or lichen green, are hardly to be surpassed for giving distinction to an otherwise severe some company. grown up! Either of these otherwise severe serge gown.

A soft variant of the highwayman's collar, made in closely kilted chiffon in pale beige or eeru and quite deeply turned over on the shoulders is also being used to brighten serge frocks. being used to brighten serge frocks, and is further adorned with delicate entredeux and oversewn edges, either in black or some bright color. The loose high collar of the same fabric as the gcwn or coat gives scope for one's own taste. Should the garment be a wrap coat, coarse wool-work in blue, or prune, or guard's red, looks well for

or prune, or guard's red, looks well for lining the collar itself, a darker tone being used for the revers, or the corners in front. If for a costume coat, there are many ways in which the collar can be made the distinctive feature. For a certain bleu corbeau, one of these high collars might be lined with balest lemon yellow, having a faintly discernable pattern; round the edge it would be embroidered in bright marine blue cross-stitch, lightly touched with black, with a conventional design each of the front corners and a tiny tab coming out from one edge and fastening over to the opposite side, also embroidered with a small edition of the same design; thus, where the collar was worn closed, only the embroidered tab would be seen, repeated, if liked, on the sleeves; and, when open, the corners softly turned down with the yellow, would give quite a different

There are a great many ways of lining these collars; among others, furniture tapestry is used, which is seen in most lovely tones, with some of the outlines touched in with tarnished silver; or a printed linen of the furniture kind, veiled with chiffon, is also very good. Yet another way is to make the collar of black of tennis, golf or polo. A tiny motif in contrasting colors is invariable in in serge or garbardine, and line it with genuine old Broderie Anglaise, which is rather thick in texture, outlining the pattern here and there with gold and black threads, which seems to bring out the vellum tint of the broderie.
The collar could be edged with narrow Japanese gold soutache.

effect.

Leather and kid roses one part, used at the rate of about four ounces to the square yard, will one part, and sypsum, one part, used smart hat intended for immediate produce good, compact, well flavored at the rate of six pounds per square wear.

#### Handkerchief Points.

THE handkerchief-pointed skirt is not new, but it is surprising to see the number of frocks which ere still using this graceful method of concentrating fulness. So many evening dresses of tulle have the skirt picoted into over-lapping handkerchief points. Taffeta frocks do the same thing. The handkerchief collar is another inspiration from the homely and necessary "cambric" square. It is merely a square of silk or net or linfront. Fichus of lace or net are foldtwo points in the back are sometimes of net and so generous in size as to form almost the entire bodice. Another frock of flowered silk makes use of the handkerchief idea for the sleeves. but open for three or four inches above the wrist. A picoted square of organdie is slit right thru the middle

# GARDENING AND POULTRY RAISING FOR AMATEURS

#### PLANTING THE HERBACEOUS BORDER A MOST DELIGHTFUL GARDENING TASK

Question of What Varieties to Select and the Proper Location for This Permanent Institution, Discussed at Some Length for the Ama-

BY RACHEL R. TODD, M.D. NE of the most delightful, not to say fascinating, of the garden tasks that we have to deal with is the planning and planting of the herbaceous border. Since it is destined to be a permanent institution in your grounds you must spare neither pains, time or money in the preparation of it, and the reward you will reap will be never-ending.

There are two suitable locations for this border. The bed may be dug on the sunny side of a walll, fence or hedge—never, by the way, on the north side—in which case you will have but one side to work from. Again, if your grounds are large enough to accompand to a compand a part of the world. The first small leaves of the plants you have to pull out to thin the rows.

Radishes, to grow quickly and well, must be two inches apart in the rows.

Lettuce seed I sow very thin, then grounds are large enough to accompand the plants you have to pull out to thin the plants you have to pull out to thin the plants you have to pull out to thin the rows. one side to work from. Again, if your grounds are large enough to accommodate an open border, that is open on both sides, you may run it down the whole length of the garden, and when this to possible your possible when this to possible your possible. modate an open border, that is open on both sides, you may run it down the whole length of the garden, and when this is possible your perennials will get the benefit of sun and air all the live-long day.

The disposition of the various plants twelve inches if it is head lettuce.

will depend to a very great extent on the location chosen. Where a wall or hedge forms the background, the tallest perennials must naturally be placed farthest back, and the rest of the bed nicely graded so that the lowthe bed nicely graded so that the low-est growing perennials range along the front edge. In this way no one bush and the rows of lettuce run cast and

will hide another from view.
The selection of the tallest plants is not at all difficult, nor is the choosing of the lower growing ones. But the great mass of plants that range from three to five feet in height, and from among which you must choose those to be planted in the middle portions of the bed, are the ones that will cause you a little careful thinking before you are able to decide just where to best place them. One of the beauties of a border of perennials, is the fact that all the plants may be well seen

Some Tall Perennials.

Among the tallest of our herbaceous ants are, the Larkspurs, the Hollyrepetual Sunflower, the Yuccas, the casily and quickly gathered; it is will repay you a thousendfold. and one or two others not so well known. These perennials all run from six to ten feet high, probably the Hol-lyhock and the Eremurus topping the list. Hollyhock needs some small sup-port when the flower-stalks begin to bend over with the weight of the blossoms, especially where they are the double sorts. Eremurus is really a not more then three feet tall, at the most, but the flower stalk may shoot up to ten feet. It needs no support Larkspurs vary in height from six to ten feet according to the robustness and age of the root. Helian thus is known, more or less favorably to everyone, and individual taste must decide as to whether or not it takes its place among the aristocrats. Boconia, while not the least his like a poppy, is lovely in leaf and but has a spreading suckerlike root that you will need to keep

Perennials Four to Six Feet.

Now we come to the great company of medium tall plants. It is a large healthy and floriferous one, and will afford anyone, no matter how ordinary or how bizzare be their taste, ade quate opportunities for a wide choice. Perhaps I had better name them according to their general coloring, since this is important. I cannot possibly attempt here anything more than a very general hint about them. Later on we will speak of several in separate talks about those not very well

Among the reds, ranging all thru crimson, carmine, cardinal, geranium, ruby, on to those that touch the magenta, are dozens of the most gorgeous that the mind can think of. And all ifferent in bush, bloom, and hue.

Perhaps the tallest of these are the pea-like flowers being very luxuriant. different in bush, bloom, and hue,

### About the Vegetable Garden

cutting it until it is killed by the frost. After which catastrophe you will have two or three meals of the spinach sowed in September, which will not be

Now for Peas.

And now for peas, which when grown in your own garden are fit for the gods.

I prefer the old tall wrinkled pea.

body or others extra carly firsts," can be planted much earlier, and will give a crop two or even three weeks before wrinkled peas, but they are not the delicious, swet peas of our dreams.

and I for one am content to let the novice brag of having had peas weeks before mine are any more than pods, for I know the kind he probably had.

Do Plant Parsley.

Dwarf varieties are particularly recommended for small gardens, but the the rows can be planted closer together than the tall varieties I have

found that you must have twice as many feet of row to get the same number of pods. Then, foo, they must have richer and more mellow soil than the tall peas. I know of only one ad-

vantage-they do not have to be

vegetable to grow, and what a joy it is to have it always green and fresh

And do plant a nice little row

BY LOUISE STONE HUBBARD OW fast we will have to work to catch up with nature. She has certainly rushed during this last week. Suddenly we are in the midst of summer and hardly a seed sowed—first to plant our lettuce, radishes and onions, for the small vegetables, and peas and spinach for the long rows.

If you are lucky enough to have cold frame of course your small vege-tables are planted and not only up but if you have planted onion sets, your onions are giving promise of being

ed in September, which will not be injured until the frost is very severe. There is on the market a New Zealand spinach, very delicious.

It will actually do as the catalor says it will—bear all summer without going to seed, which is the great disadvantage of real spinach, but the leaves are small and grow at the ends of stems or branches and, of course, if you cut off the branch it ceases to bear for a while.

However, the plant recuperates quicily and sends out other branches which you can cut off again in a couple of weeks, so if you are very fond of spinach and have room to grow it do try the New Zealand. ready to eat soon.
Your radishes are quite sizeable plants, and soon you will rejoice in a meal of the most delicious lettuce in the world. The first small leaves of

I prefer the old tall wrinkled pea Champion of England, because it is prolific and is the sweetest pea I have ever tasted. For a family of six three plantings of fifty feet each will give you many a delicious meal. Make your plantings a week apart, and for the first planting, which should be made at once, soak the seed in water over night before planting. That gives them a few days' start.

The smooth varieties of peas, "somebody or others extra carly firsts." can

Grow Lettuce Fast. Lettuce has to be grown fast to h at its best, so I always plant it in trenches, six inches wide and six in-

On the south side of each row drive stout stakes, and on hot, dry days I lay a twelve-inch board against the stakes so that the lettuce is in the shade. In July and August these boards remain up all the time. Such lettuce never has a chance to wilt. I use Grand Rapids, a loose leaf let

tuce, very quick growing and less apt to wilt or go to seed than any other I have tried. For head lettuce I succeed with Iceberg.
One planting of spinach, about fifty feet, will give you four or five excelthat their blossoms harmonize with lent meals about the first of June, other blooms, or foil properly against the bushes behind them. In no case until the first of September, when I should injudicious crowding be in-dulged in. would plant another fifty where some vegetable has finished bearing.

Nearly Good As Spinach.

Fifty feet of Swiss chard planted rext week will be ready to use the first of July. It is almost as good as

flowers. Their blossoms are large composite, forming great compact balls

top of the slenderest of stems, and the

introduction.

two Lychnis plants, known as the Maltese Cross, and the Scarlet Maltese Cross. They are sometimes called the Lightening plant, and again the Lamp toward bronze and maroon. I have already mentioned oriental poppy, and the Helianthus. The Rudbeckias are gorgeous with their large daisy-like flowers brown centred, some single and some double varieties. Evening primrose is golden yellow, the petals like the finest French chiffon velvet, while as a bouquet flower, Golden wave runs it a close second. Coreopsis lanceolata should be grown in thick clumps, their delicate blossoms foiling well against the green of the Iris.

Odd Colored Perennials. The Pentestmons are perennials that should be in every border. The blossoms are thick and range from pinks to purples, yellows, and lavenders. The Anemones, both spring, and autumn varieties will produce almost any col or but true blue. Cosmos is a valubouquet plant, and old Sweet Rocket is invaluable. Dictamus and Digitalis and Gallardia all must have a place in the border. And put in plenty of daisies, and some of the Sediums Lilies.

I have not yet mentioned the lilies, leaving these to the last, since strictly speaking, they are bulbous, and not perennials. Tiger should be planted in clumps, and near Larkspur The Lemon lilies foil well near the Lupines. The Madonnas. with their incomparable snow, may take any place in the border. Lilium eral years, and its huge clumps of red orange cannot be equaled by any herpaccous plant. The orange Day Lilies, and the Funkias require plenty of room for their spreading roots.

Paeonies. The Pacony is such an immense perennial as to root and blossom that it needs a special spot in the border Plant it where nothing will interfere with its roots. This plant does not bloom well until its roots have become well settled, and have attained a good which often takes four or five years, Later on, we shall speak more

fully about this wonderful plant.

Little Low Perennials. All the Pinks, the Spurges, and Stone crops, the Violets, the Iberis, and hundreds of others come here. I can't begin even to mention them all

#### Colored Foliage Shrubs.

The following shrubs have beautifully colored foliage thruout the summer: Corchorus japonica aurea and argentea variegata, Eleganus augustofolia and longipes, Hippophae, rhamnoides, Rosa rubifolia, Solix regalis and rosmarinifolia, Spiraea opulifolia aurea, Symphoricarpus vulgaris variegatus, tamarix, Weigelia nana and

eboldi variegata. The following shrubs have beautifully colored foliage in the autumn: Amelanchier vulgaris, berberis, cornus, Enonymus alatus and europaenus Mohonia aquiafolia, malus, maples and

He is happiest who hath power To gather wisdom from a flower And wake his heart in every hour 

Look after the dahlia tubers and see that they are not kept too dry at this season. If the bulbs are shrivelling up too much sprinkle them with water, not enough to cause them to rot. Watch them and keep in good condition until planting time,

### **PROGRESS** OF POULTRY CULTURE

TH rapid strides the poultry in dustry is approaching d-scientific level as a result of educaional effort.

to keep pace with the progress in the hen industry one would need a special system of arithmetic. This is also true of general agriculture, and since poultry is the mortgage lifting ally of honest effort it is fitting that both should have been speeded up coincidentally.

Today the growing of greater crops, while enriching the soil, does not differ in effect with breeding for more eggs while taking profit from the egg yield of the moment.

The poorest producing land can be

short season.

What has been done to increase egg production is but the forerunner of what will be done. The achievements n poultry culture in the last five years will be doubly achieved in the five years coming. It is a long way from 70 eggs per year to 200, and yet it re-quired only one year of demonstration to prove that 256 eggs were possible; another year proved that 282 could be the result! This yield may never be the plants from getting too crowded. equaled again; it may be outdone at These plants are useful for certain

sires and granddams before them, reared artificially and never knew the tender care and guiding cluck of a de-

voted mother.

In these inert mechanical devices for hatching chickens lies the solution of paying off the farm mortgage, to pin money getting, to the necessities of life, and to its pleasures. Incubators are much more profitable investments than government bonds,

or the fall of a nation, and are quite as certain to make returns as we reckon taxes or go to sleep,

# PLEASURE TO MANY

Transplanting Them From Their Natural Surroundings and Caring for Them.

AN INTERESTING STUDY

Few of the More Easily Cultivated Ones Recommended to Amateurs.

HAVE derived so much pleasure in transferring many of our native wild flowers from their natural unts to the perennial garden and cultivating them there that I wish to call the attention of your readers to a few of the more easily cultivated ones, in the hope that others may profit by

my experience.
First of all, there is a small plantation of Hepatica triloba (liverwort) that was brought in from the woods In this latitude this is the first of our wild flowers to bloom in the spring. Mine can hardly wait for the

snow to go ere they thrust their dainty flowers of porcelain blue, pink and white up thru the dingy, rusty leaves of last year's growth to greet the early spring.

Last autumn these same plants were

Back of the hepaticas, in the deeper shade of the shrubs, there is a small group of the shrubbery yellow violet, V. pubesceus. This variety is very little known to the amateur and is certainly worthy of a closer acquaintance. It is rather uncommon, but may be found here and there in the doop woods, where it luxuriates in rich, moist leaf mould; it is easily transplanted and when once established takes care of track

How many know what a thing of delight the ordinary "common violet" becomes after it has been cultivated a

Two years ago I transplanted a dozen or more small clumps from the lawn to the shrubbery border, setting the plants a foot apart in a borde and the following May they were one continuous mass of bloom, the admiration of all who saw them; there were hundreds of great flowers of deep blue borne on long stoms, each flower penciled with an almost blue black.

These violets may be found anywhere and everywhere and will represent the story of the story where and everywhere and will represent the story of the story where and everywhere and will represent the story of the story where and everywhere and will represent the story of the story

To the average "grown up" the word boneset" recalls the tea of our childhood that has left a bad taste in ou memories as well as our mouths. mehow or other a plant straggle into my garden of its own accord, and in due time presented me with some beautiful white ageratumlike flowers that were borne on tall stems three of four feet long. This proved to be an Eupatorium ageratoides, a species of boneset. It blooms in September and is a decided acquisition to the cu

in continuous bloom from Labor Day to November and were a source of unexpected delight.

This variety should not be corfounded with the common "d toothed violet," which is not a vio at all, but a filly. The plant in que tion has a sturdy upright stem, bro heart shaped leaves and bears a bea tiful yellow flower that is delicate penciled in violet blue, making it a very attractive and unique addition to the hardy border: it should be paratively new section of roses is that of the "Irish Single Varieties." They are very free flowering, beautiful in the bud stages, and most attractive in their colors. The flowers are much larger than all other classes of single that the penciled in the property is should be placed in heavy shade.

These violets may be found anywhere and everywhere and will repay, a hundred fold, the labor of digging and transplanting them. Care should be taken to keep them in check as they spread rampantly.

Then there is the queen of all the native violets, the "Bird's Foot" (V. pedata), with its dainty foliage and pansylike blossom of exquisite blue marked with white. This variety is equally "t home on the cold, bleak slope of some rocky hill or in the sheltered nooks of some sunny pasture. It is very easily transplanted and will do well in most any location. To the average "grown up" the word

flowers of the fall, and is worthy more general cultivation. Then there is the little known "Oswego Tea" (Mowaida) with its rather curiously shaped blossoms of crimson scarlet that render it very effective for a background. It blooms in July and August. It should be kept in check as it has a very bad habit of crowding everything else out of the

In transplanting wild flowers it better to dig them up with as much of a ball of earth as possible and also to take home a quantity of the native soil in which to set them out; the afternoon of a warm, cloudy day is us good a time as any to take them up.
When transplanted they should b treated as ordinary seedlings are, care being taken to place them in locations appropriate to their natural likings.—G.S.O.

A cup of good tea is the best natural stimulant for body or brain. The soldier in the trenches, the worker in the fields and woods drinks it in great quantities. The brain-worker in the cities finds grateful comfort in its use. Physicians the world over recommend it.

Japan Tea is preferred to all others because of its unequaled delicacy and its full-flavored strength.

teeth of the first set are hardened. It

is evident that no tissue or structure

grows properly unless it receives pro-

grows properly unless it receives proper nourishment, so that the mother's diet and digestion has much to do with the natural development of the baby's teeth. Generally the teeth make their actual appearance thru the gums when the child is six months old. Their appearance is simply a matter of growth, and as such, teething should take place without serious physical disturbances.

For some reason, however, there is

without serious physical disturbances.

For some reason, however, there is often difficulty in teething. In order that the teeth may emerge, it is not only necessary that the overlaying tissue of gum be absorbed, but little bony cases in which the teeth are developed have to be worked that

developed have to be worked thru. This, with the resistance, some-times, of a thickened, swollen gum,

results in a backward pressure upon that part of the tooth that is still soft, the result is nervous irritation.

I have told you all this seemingly echnical information that you may

understand something of the process of development of a tooth and also that you may know that "drooling" is

s sign of this nervous irritation ipsi

mentioned. Some of the nerves supply the salivary glands, and when
they are irritated the glands expel
their juices more freely.

Sometimes the action of the glands

is retarded, and in this case the mouth becomes dry and hot, eruptions appear upon the face and ulcers on the tongue and the inside of the

mouth. The child is fretful and wakeful and has digestive disturb-ances. The child is suffering be-cause in some way nature has been interfered with and dental complica-

tions have arisen. While proper food and correct care of the mouth from infancy will usually keep.

#### THE CARE AND FEEDING WHAT THEY SAY TO THE CHILDREN

"Little Boys Who Lie Will Lose Their Tongues," the Cook Told Lawrence, Thereby Filling His Young Soul With Terror and Dismay and Leaving a Difficulty for Mother to Straighten

'Is that true, what Martha said? Therefore keep the first teeth clean and free from anything that may lead

NE of the serious problems of the mother who has become conand free from anything that may lead to decay.

It is better to use absorbent cotton at first instead of a brash; but as soon as possible substitute a soft brush and use it daily. After the control of the mother who has become conscious of the need to do something more with her children than is conventionally expected, is to reconcile her principles and theories of child training by the treth, great care should be taken to remove all such particles by using a silk thread. Never forget that the child's gum and all its bony structure are still not firmly formed and very susceptible to pressure.

If the beginning of decay is dis-

Lumley's, she was shocked at the free-dom of speech that the children seemed to enjoy at home. They spoke their views at the table, and they told of the incidents of which they were reminded, just as the older folks did, and Miss Patience felt constrained to remark that she had been brought up with the idea that "little children should be seen but not heard." This was slightly dis-concerting to the children, but it would silencer. The mother, altho she had made up her mind long before what the policy of the home would be with regard to children being heard, asked the children to withhold their talk, and with the result of the author with the result. during the rest of the aunt's visit they

of the extra number, the molar on each side, just back of the milk teeth. As this first of the molars does not displace another tooth, it is often in the child's mouth for some time before the mother is aware that a permanent tooth has arrived. It is this tooth that is very often found decayed, and if it must be removed it is a serious loss, since its business is to grind up the food. The mother can easily tell by counting, when these new teeth begin to come and once they are in the mouth they should be kept clean and protected from decay. were seen more than they were heard After the first family meal, the mo-ther made an attempt to find out how far "set" Aunt Patience was; and de-cided that it would not be worth while to argue her own point of view. But by her continuel courtesy to the aunt, she showed the children the necessity of conceding gracefully to the old lady's prejudices without in any way accept-ing her ideas or standards in place of their own. We have learned the value of freedom of speech, even for children; but we must learn also, and have

the children learn, that on occasion a certain restraint upon that freedom is more becoming than a lack of deference to others.

In this case the children felt that

their mother's sympathies were with them; and altho they were being sublued more than was customary id not resent this. Sometimes, however, people say hings that have a more serious import and as "little pitchers have long ears." we often feel that we must cither

guard them against what others say, or be ever on our guard to counterac the objectionable sayings. Little Law. rence, in common with other children of his age-namely, three years and a bit more-frequently made statements that were not in strict accord with objective reality. The new cook affected to be shocked by his "lics," and one day said to him, "Little boys who lie will lose their tongues." As Lawrenco had his share of imagination, he at once pictured to himself the horrible fate of the untruthful; and his conscience began to trouble him about any lies of which he might have been guilty before he knew what a terrible thing might befall. At last he came to his mother with his worries. "Is that true what Morthe said that if I tall a lie I what Martha said, that if I tell a lie I

will lost my tongue?"

However undesirable lying is, the

fear of the devil is even more so, and

mother proceeded to instruct her son in folk pschology. "What Martha meant," she said, "is not that you, would lose your tongue, but that if you keep on saying lies, people will stop believing you, and then, no matter what you say, it will be just the same as not saying it. You will be able to speak, but it will do you no good." Lawrence was greatly impressed. After a few moments of silence he After a few moments of silence he without disparagement of those who said, "Mother, it's like the story of the hold what may be to us "queer" views.

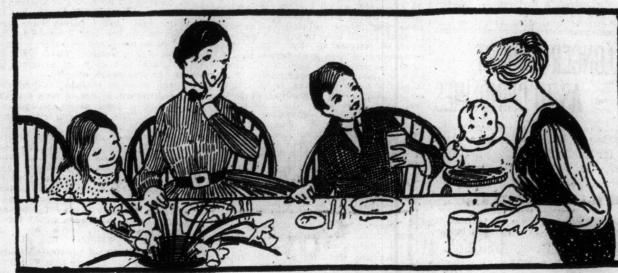

'Little boys who lie will lose their tongues."

So many people are foolish, and so many are ignorant and superstitious. And however much we should like to silence them, they will continue to say things that we do not wish to have our children hear. But we may be sure that the foolish and superstitious things that foolish and ignorant people say are put forth in perfectly good faith. I'or the sake of the children we must meet those sayings on the basis of their good intentions, and extract from them what little residue of truth may still remain in them. It is superstition that tells a child that it is "unlucky to pass under a ladder," but it is good sense to explain to the child that the ill luck is a matter of adverse proba-bilities—that it is practically imprudent. We must learn that the doc trines and maxims which we reject are not to be dismissed with a sneer; for than the unsound doctrine.

We must teach the child to search constantly for sounder doctrine, but

received before.

"Aunt Patience.

. . was shocked at the freedom of speech the children seemed to enjoy.'

### A NEW WAY TO MAKE BABIES GROW FAST

thirtieth months come the last teeth of this set, the four back double teeth. By the time the child is two and a half years old he has the twenty teeth comprising the milk set. The proper conception of the value of their teeth, it must be because the mothers are regular supervision in regard to this important part of the child's personal care. If children are to grow up with proper conception of the value of their connected solely with the educaand activities of girls. Makers of Pine Soaps and Perfumes

Cooking and the other household arts are generally thought of as some mistake, however, and the cooking. There was some mistake, however, and the cooking get of proposed expenses, in addition ing teacher appeared at the door of the classroom and inquired for her missing pupils. When they saw her, the entire class, with a shout, rose as one man and ran to the cooking room. I say 'as a man' advisedly, as half of the class were men in the making. 'Chemistry isn't in it when it comes to

When the board of education of Chicase established manual training and houshold arts in the lower grades, they reported: "For lack of materials and reported: "For lack of materials and tools, we put the boys to work at sewing, and they were as delighted as the girls, doing it well and gladly."

"A class of boys had a regular period once a week in the kitchen. One week it fell upon a holiday. They begged to be allowed to come for their lesson.

The holiday had no charms for them as ports of various school principals, showing the lively interest of young boys in constructive household activicompared with a lesson in cooking." "A class in the fifth grade of a pracwe are teaching girls the business me-

curate accounts, files, and even a bud-get of proposed expenses, in addition to banking and wise buying, is it not quite as important that boys should be intelligent about the essential duties of the home and be able to undertake them, if necessary? The accumula-tion of dust and dishes, the unmade beds and general chaos which many a woman finds upon returning from a trip, having left the home to the care of her husband, is well known. Over against this comes the story of a hosa colonel in the army. It so happened that she was, as he knew, without servant, and, when she went to her guest's room to take care of it, she found it in perfect order, the bed made by an evidently skilled hand. When she asked him where he had learned to make a bed so beautifully, he responded that he had been taught to do it at military school. Surely the home ought to provide better training than the The home should mean quite as military academy, when it comes to the much to men as to women, and, since domestic knowledge which will make a man a helpmeet and not a burden

#### THE SMILING FACE CLUB DIRECTED BY C. A. MACPHIE

I PROMISE TO DO MY VERY BEST TO MAKE THIS SAD WORLD BRIGHTER.

I wish to thank my Smilers for the many names they got for our club, and sent in. The prize was won by Miss Meryle Evans, 45 Ray street, Hamilton, and she will receive it as soon as possible. I hope you will all go on try-ing, still, to get all the names you can because we want our club to be the very largest in the world. You will,

Dear Smilers: Do you remember about poor Foxy, Fatty and Finley; the three men (nice men too), who were cast away on a desert island? I told you, in my last story, how they rowed away on a whale, they had tamed, and how Finley got grumpy in mid-ocean, and how he dropped his oar, and how the whale began to spin when Fatty began to pull, and, finally how they found it as much as ever they could do to hold on at all.

There I had to leave them two weeks

ago (I thought it would be only week, but circumstances interfered) week, but circumstances interfered), and now we take up the story again. Well, as I said, the whale began to spin, and they found they had all they could do to hold on at all. Round and round and round they went, sending the water foaming and splashing in great waves above their heads, till their tame wild-cat, which had been perched on the whale's head, lost its foothold and, flying thru the air it landed on the crest of a high wave fully one hundred feet away. Foxy, Fatty and Finley did not notice the occurrence, at the moment, and no wonder, but when the whale began gradually to subside, or cease whirling, gradually to subside, or cease whirling they were horrified to see their pet far away and swimming as if his very life depended on it, which was not fair

wrong.

"How strange!" cried Foxy, "he is swimming away, not towards us; if we only had your oar now, Finley, we might be able to do something," but just at that moment the oar floated against Fatty's foot, and making a great effort he managed to grasp and pull it up.
"Come back, come back, Flanigan!

"Come back, rlanigan;" cried Foxy, calling their pet by name, "we have got the oar," but the creature paid no heed, swimming on as fast as it could; in fact just as if it wanted to get away from them.

"Well, that is queer" said. Finley, folding his hands one across the other critical of the oar.

this world," said Finiey, as he loaded his hands again, one across the other, on top of the oar, and gazed sadly out over the wide expanse of water.

Nearer and nearer they came, till Foxy, standing up as well as he could, avaigned: "The place looks families:

this world," said Finley, as he folded

Foxy, standing up as well as he could, exclaimed: "The place looks familiar; it must be New York!"

"No," cried Fatty, "it certainly looks more like Toronto to me!"

"You are both wrong," said Finley, as he unfolded his hands and gave a long last pull at the oar, "WE ARE BACK ON OUR ISLAND ONCE MORE." And it does seem heart-breaking to write on this page, it certainly does, but Finley was right, and they were—yes—BACK ON THEIR ISLAND ONCE MORE.

Flanigan jumped up upon the beach and shook the water off, and seemed as pleased as Punch to be back again—but, alas, for our poor heroes—their smiles were gone; that is to tay Foxy; and Fatty's were (Finley never had much of a one), and to see his face

much of a one), and to see his face now, well, I cannot describe it on this page; no not on THIS page, no indeed, They tied their tame whale to a pole, driven into the water for that purpose, then just as they were slowly, and with bent heads, wading in towards the beach an exclamation was heard from Foxy: "What is this, what is this?" cried he, and bending down he picked a floating, tightly corked bottle from the water. "Something to

he picked a floating, tightly corked bottle from the water. "Something to drink?" asked Fatty.

"Pull the cork out," said Finley and Foxy, following Finley's advice, pulled the cork and found attached to it, by a piece of string, a folded bit of paper.

"What is it?" cried Fatty, and Foxy not answering, but with a hop skip and jump, cried: "Come on boys, let us be glad we were not drowned; things are never so bad but they might be worse!"

"What is wrong with him?" cried Fatty. "The waves have gone to his head," answered Finley.

Foxy paid no attention to them but ran on ahead made a fire in the stove, hung their coats up to dry, helped. Fatty get something to eat, and generally made himself so cheerful that it gradually had its effect on the other two, till even Finley had to SMILE, when Foxy said to their tame wild-cat: "Well, Flanigan, old Sport, I suppose YOU thought it was Ireland."

That night, when they were getting ready for bed, and were joking (yes, joking and laughing too), Foxy said: "Now boys, I'll show you what was in the bottle" and unfolding a wet piece of paper, guess what they saw? Wiy, a tiny little clipping cut from a page of The Toronto Sunday World. I

"we have got the oar," but the creature paid no heed, swimming on as fast as it could; in fact just as if it wanted to get away from them.

"Well, that is queer" said Finley, folding his hands one across the other on top of the oar.

"I should think he would be hungry by now," said Fatty.

"Let us follow it and see where it is making for," said Foxy.

"The animal swam on, and on, and they rowed as fast as they could go after it, till, by and bye, their hearts kindled with hope, for not very far ahead, land began to appear.

"I knew my idea would work out right!" cried Foxy.

"I wonder if they'll give us our meals without any money," cried Fatty,

"Don't be too sure of anything in

#### LETTERS, STORIES AND POEMS FROM OUR SMALL READERS

become a big and strong child?

Do you want the child, when grown up, to be tall and powerfully built?

If so, you will be interested in a new and remarkable discovery on which Dr. Ernest Scott and Dr. J. F. Lyman, professors of phsiological chemistry in the Ohio State University, are work-

The discovery has to do with a substance which, fed to babies, stimulates and accelerates their growth in a sur-Other scientists—among them Dr. Harvey W. Wiley—have been working on it, the they have not fed the stuff to infants. Dr. Wiley describes it as an "organic compound of phosphorus"—more definitely speaking, a fat in which phosphorus has replaced part of the hydrogen. Egg-yolks are extraordinarily rich in it.
All materials that go to make body growth are originally in solution in the blood, from which they are deposited to form bones and muscle-tissue. The substance here described stimulates this action apparently, and thereby causes the baby to grow faster in it, presumably for the same reason.

se a mild alkaline mouth wash a light.
Let the gospel of the toothbrush be a part of the daily life, so that the children may understand the value of

and develop a stronger physique.

For obvious reasons, experiments

with it were at first restricted to the

lower animals. It was found that very small quantities of it, fed every few hours to guinea-pigs and rabbits, made them grow 60 per cent. faster—the animals used in the experiments being taken in every case from the same litters and substituted on the same litters and substituted on the same litters and substituted on the same of the same o ters and substituted on the same rations, except that some were dosed with the growth-stimulating substance and others were not. Every two days they were weighed. Hypodermic injec Hypodermic injections of the stuff, much diluted in sterilized water, were tried, and with like result; but the ef-

fect of it thus administered was not so pronounced. On the whole, the conclusion drawn is that it is better to give the substance by the mouth.
Young chicks grew much faster
when fed with it! so likewise did tad-Pupples to which it was given in regular doses not only grew much more rapidly than untreated pups of the same litters, but they were strong-

cr, more lively and playful, had thicker and silkier hair, and seemed more intelligent.

It is thought that nature puts a lot

In all likelihood an animal deprived of it entirely would die. If provided with much less than a fair allowance of it, the animal would be a dwarf.

From this substance, it appears, is mainly derived the phosphorus that helps to nourish the brain, nerves, and

the growth of the embryo plant being thereby stimulated.

other tissues of the body. If this discovery had relation only to

velopment during that period can be accelerated, its size at maturity will be proportionately greater.

The only known means whereby the growth-making substance can be obtained is to separate it out from the materials, such as egg-yolks, with which it is found combined in nature.

Eventually, doubtless, the process will be simplified, and the stuff will become cheaper. It may be put on the market at a moderate price, so that ordinary folks can afford to buy it and feed it to their children. But in the meantime it may be had by anybody readily enough, in the form of eggs and cereals.

Platinum Settings in Demand

Platinum dress accessories promise to be much used this summer. Gate tops of platinum have superseded gold ones on bead bags and the bags of lace and silk to be worn with the picturesquely full frocks. The 1850 costume positively demands a bag. In old days it was a reticule, of black silk or lace, home-made and finished with a tassel; but nowadays the bag is a daintily fragile affair, with its platinum clasp, its brocaded and beaded surface, and its pretty fittings.

Cucumbers require well decayed sta ble manure in the hills and if sulphat of potash can be mixed with it at the rate of a pound to the bushel excellent cucumbers will result. Another sea son the war may be over and potash be available again.

If you, my sister, are unhappy because of ith health, and feel unit for household duties, social pleasures, or daily employment, write and tell me just how you suffer, and ack for my free ten days trial of a home treatment suited to your needs; with references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by its use. I want to tell you all about this successful method of home treatment for yourself, my reader, or your daughter, your sister, or your mother. I want to tell you how to cuite yourself, my reader, or your daughter, your sister, or your mother. I want to tell you how to cuite yourself, my reader, or your mother. I want to tell you how to cuite yourself, my reader, or your mother. I want to tell you how to cuite yourself, my reader, or your mother. I want to tell you how to cuite yourself, my reader, or your mother. I want to tell you how to cive yourself, my reader, or your mother. I want to tell you how to cive yourself if one paint in the lead, back, or bowels, and from any occtor; and thousands have proved there is hope even for the hopeless in my method of home treatment. If you suffer from pain in the lead, back, or bowels, feeling of weight and dragging down sensations, falling or displacement of internal organs, bladder irritation with frequent arination, obstinate constitutions, and the suffering of weight and dragging down sensations, falling or displacement of internal organs, bladder irritation with frequent arination, obstinate provisions, property, bladder in the land of the hope and the surgeon's tell property of the paint of the hope and the hope and the paint of the hope and the hope

**CONCERNING OUR** 

CHILDREN

By ELINOR MURRAY.

LOVE AND SELFISHNESS.

it is again: That very moment when the wee one cuddles down beside his mother, after his rough usage at the

sniff and the answering smile them together for all time.

Then from day to day she watches, until his first smile shows to the world his recognition and dawning love.

It doesn't seem possible that some of the men and women we meet could ever have been like our babies. Something went wrong to change their baby love into grown-up selfish.

The child's earliest manifestations of

love should be directed towards service. A little one's manner and words of love—and remember children are

all loving—are only outward signs of that higher love which means self-

forgetfulness in serving others.

Begin your training by asking the little child, when in a caresssing, lov-

ing mood to do you some slight service. Just enough action to cause him to make an effort to do something for you, will transform the surface love

The next important point is to train

Early and constant endeavor to at

into serving love.

#### HOW MUCH FOR HOUSECLEANING?

Expense and Labor May be Reduced by Intelligent Selection of a Few Real Labor Savers, Devotion to Soap and Water, Which so Often is Neglected and the Avoidance of Weekly or Semi-Annual Upheavals.

"It is alf wrong," she said. "Don't think of showing it to John as it is. In the first place, you haven't the right proportions," and she quoted bewildering tables of percentages gathered from economics textbooks. "And besides you haven't all your items included.

"You have no item for the care and cleaning of your house."

Jane blinked. "Why—why, that would come under miscellanies."

Marie shook her head. "It would do nothing of the sort. Your limited knowledge of facts impels me to advise you to undertake a course in housekeeping before you marry John. And one of the first things that you will learn," and she poked her finger at "rent"—

"Well?" asked lane.

"Cleaning preparations while for herself at with a little effort make for herself at a very great decrease of cost.

Household ammonia is sold for about 20 or 12 cents a bottle. But this bottle like of varying size and varying size ngt or get it of the varying size and varying size nguttength for ammonia. This eliminates, too, the old method of having a thoro cleaning from attic two quarts of assured strength. This was tested in a laboratory, and it was found that one pays at the rate of ammonia, scrubbing, polishing, window washing and all the rest of it. Then no one set of muscles will get tired and the mind will not weary with doing one process for two great a period. Thus the work will be moderately easy every day in the served of the calendar. Wash day should the proposition of the sort of making it clean. Have a spring house cleaning four or five days. The control of making it a very great decrease of cost.

Household ammonia is sold for about 7:0

"Well?" asked Jane. one-quarter to one-half as much as they spend on rent on the cleaning and incidental repairing of their

In the light of these devastating statements Jane was won ever to a belief in housekeeping, a science.

Jane, of course, knew very little about the care of a home. But Miss Sarah McLeed finds a fair uniformity of ignorance in the engaged and young married girls whom she is leading married girls whom she is leading along the paths of knowledge. She brightens their way with seeming to startling facts, such as the one pertaining to the huge cost of cleaning a

own work she should put a valuation on her labor. If her husband earns \$1800 a year the combined income is \$1800 plus the value of the work she

fect is most pleasing. Reproductions

are now so very perfect that no one

need fear to buy them; of course col-

ectors and those smitten with the

ntique bug (and it is a deadly one)

o on still hunts until they find what

necessary to complete any desired

period they are intreested in. This re-

quires more time and money than most

of us have, so let me tell you about a

very charming Louis XVI. bedroom. Whether that lamented French mon-

arch would recognize the style as be-longing to his day and age we will not

question, but enjoy the results as being delightfully pleasing.

The walls were done in pale French

gray, a silk fiber paper, the same effect may be produced (almost) by just

the right shade of calcimine and it will be much cheaper. The small fire-

place was done in a shade of deeper gray tiles with an enamel painted mantel, as was all the woodwork—two

coats of plain paint and one of enamel—that is the least paint one can use

and get any kind of a satisfactory job.

Furniture Very Pale Gray.

The furniture, with cane insets, was
the very palest tint of gray and the

large rug was a deep wistaria, almost a royal purple velour; then the over-draperies were of purplish lavender with a hint of pink in it; a sun-fast

fabric was used with under curtains of a fine figured French filet net quite a deep ivory in tint. The canc-backed

chair for use at the triple-mirrored dressing table had a cushion of purple and deep ivory silk, and all the toilet

articles were in purple celluloid mark-ed with gold monograms. Bed spreads

were drawn up over the pillow and were of squares of filet net put together with wide bands of insertion Over the mantel there was an oval

mirror framed in dull silver, suspended

JANE paused, pencil poised aloft, and looked happily at the list she had just made out. "Marie," she called, "come here. Wait a minute," she added carefully and then allowed her lace to assume an air of complete satisfaction.

"Marie, there will be \$3 left over every month."

"What will you do with it?" asked Marie, and then examined the paper, scientific and superior.

"It is all wrong," she said. "Don't think of showing it to John as it is. In the first place, you haven't the right proportions," and she quoted bewilder-ing the said and superior and she quoted bewilder-ing the said and she quoted bewilder-ing the said and so the large. Certainly each articles for household cleaning, need not be large. Certainly each articles for household cleaning it is it is this very inexpensiveness of the individual articles that makes for extravagance and that makes the average housewife expend far too much money for cleaning. This does not mean that she keeps her home too clean. That laurel rests with the Dutch. But she spends money for cleaning preparations which she might with a little effort make for herself at a very great decrease of cost.

Household ammonia is sold for about 10 or 12 cents a bottle. But this bottle

ive. A solution of washing soda will clean pipes just as effectively. It will take away odors and grease, and if one flushes the pipes afterward with hot drudgery is perceptibly lessened. water there will be no injury to them from the soda. Soda solution is less expensive than commercial preparations with fanciful names. Many housewives imagine that the more they pay for an article the better it is, But pay for an article the better it is. But more often than not they are mistaken. The cheapest, the most effective and the most neglected of articles is plain soap and water. The June brides are taught, first of all, the varied uses of this too often forgotten source of cleanliness. Hardwood floors, unless they have been waxed, should be cleaned with soapsuds and lukewarm the average housekeeper. water to remove the grease, and then should be dried off at once to prevent staining. Doors that are in constant

without sauce.

Vacuum cleaners, whether electric or not, clean a room as no other process merely to allow it to settle again has long been known. But it is well to be certain that a labor saving device does save labor and is not merely an article which can be used once or twice a year and must then be taken care of

inother, after his rough usage at the hands of doctor or nurse, he sniffs, just as a little animal would, and knows his own. And mother looks down at the wee, wrinkled, not-heautiful face, and perhaps it is innate love, perhaps it is relief, at all events, it is motherhood that makes her smile, one that the little being understands. The sniff and the answering smile bind the remaining 360-odd days.

System is the greatest labor savins device. "Eliminate the spring cleaning," says Miss MacLeod. "It is a torture for the cleaner and the house-holds. Keep your house clean instead of making it clean. Have a spring From then on, the love instinct grows steadily, and manifests itself in a hundred ways. What mother, feeling the warm, soft grasp of the baby hands, the caressing touch of the baby face, the suddlesome sweetness of the back of his neck can believe that this child may grow into the cold-hearted, selfish man or woman, careless of mother, forgetful of her devotion?

It doesn't seem possible that some

Cleanliness in a house is noticeable only thru the lack of it. One never stops to observe that a room is clean. Thus, cleaning in one respect is love's \$1800 a year the combined income is \$1800 plus the value of the work she does in cleaning, sowing and cooking," railings should be washed carefully and meagrely before polishing. **NEW LINING MATERIAL** 

All the Accessories of the New

Styles Are Being Brought

Up-to-date.

There is no longer any doubt that

to those who follow even at a distance the footsteps of fashion, the adoption

of chinolines is more or less a matter of

weeks. Already the full skirts of the

dresses are having to be held out by

some crisp lining net, and panniers

that hold their shape, are coming

nearer and nearer with every lot of

new models sent out by the designers.

It was a pretty era in woman's

dress-that of 1830. Its bouffant

lines gradually became modified dur-

ing the thirty years from then unta

1860, but all that time there was some

form of scaffolding used in every gown

-something that puffed it here, or

stiffened it there, or hooped it in an-

other place. And, when the leg o'

mutton sleeve appeared, and the

shoulder cap with its underpinning of

canvas, it began to look as if simple.

natural lines that followed the figure

without artificial support would never

return. They did come back, however, for a pleasant decade or two; but again the turn of the fashion wheel is bringing around the distended garment

hat demanded a stiffened support.

Women who remember the time

when dresses were lined with canvas or chamois fibre will recall the diffi-culties experienced when these ma-

erials were crushed or dampened. Grasscloth and buckram stiffenings caved in here and there, or cracked so

that they showed thru the lighter ma-

terials stretched over them. With the revival of these bouffant styles, how-

ever, modern ingenuity has foreseen just this trouble, and is ready with

modern improvements over the unsat-

New Lining Material.

isfactory linings of other years.

tain this characteristic will aid the mother very much in training for obedience. It is only after selfishness has crept into the love that the child becomes hard to discipline. A great educator says: "All work all exercises, which awaken the active

all exercises, which awaken the active powers which form the capacity for rendering loving service to fellow-creatures, will help to lay the groundwork of religion in the child. The awakening of love goes before that of faith; he who does not love, cannot believe. Loving self-surrender to what is higher then conselves to the Mich.

Lat the Children Help.

Never refuse your child's offer to help. Even if it really hinders you, let the little one be of service. It is love that prompts the desire to help, and love turned away nourishes selfishness; and proffered help refused to idleness. leads to idlenesss.

If you are working at something that you cannot let the child help with, find some other little service that he can perform. It is not difficult to turn a child's natural activity into helpful other many a step if he is trained to

He can put his toys in place after his games, he can pick up things, and lift and carry and straighten up a room in surprising fashion. But it is strange how little he will do unless strange now carefully taught.

There are so many, many, many things that the mother has to do for the little ones, and the big ones too, that if she trains them early to be lovingly helpful she is doing herself very good turn, as well as training the children in the way they should go.

Happiness. We all desire happiness. We yearn for it; we strive for it, and we read books about it. And yet it is within the reach of all of us if we would only learn to make much of little. Any child teaches us the secret of happiness in his power of "make believe" in menufacturing show here believe." in manufacturing sheer happiness ou of a few spools on a string, a sand pile, a handful of paper dolls, or six tin soldiers. Think of the sheer happiness soldiers. Think of the sheer happiness that a puppy gets from a flung stick, and the joy of a kitten in a dangling string! Some of us require diverse and expensive means of making fun. But the really happy woman is she who can find pleasure in watching a plant grow or a bird building its nest, in looking at a sunset, in viewing as much of this great round world as can be seen on a trolly car excursion or much of this great round world as can be seen on a trolly car excursion, or in listening to the music made by the stumbling fingers of her little daughter learning to play the piano. The trouble is we do not value the little things; we do not place the emphasis on the right thing. We hunger for the big things because in them we think that happiness lies. And when we get them we realize that the biggest things, after all, are the little things,

Canadisn Associated Press.

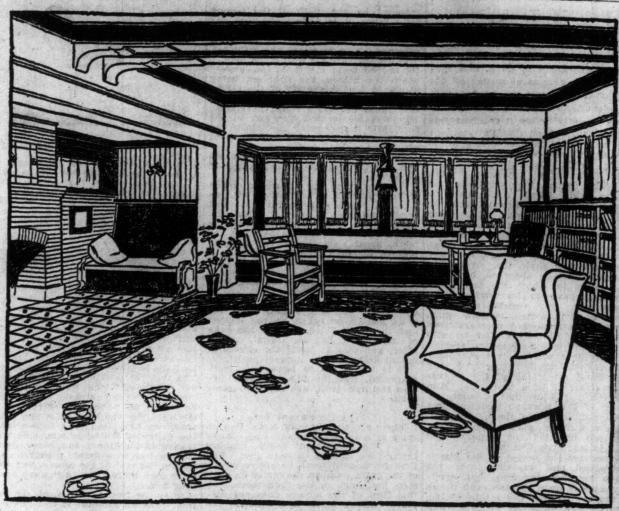

LONDON, May 6.—In one of the loveliest parts of Kent, and so far unstrafed by the zepps, stands the hoyhood home of General Wolfe, called Quebec House in memory of one of the financial provest exploits ever choose. inest and bravest exploits ever chronicled in any history.

Westerham, the little town which

Westerham, the little town which may be said to serve as a background for this mansion, is full of delightful associations of the lad, while the old,

#### Combine Your Living Room and Library

Madame Maison Tells How to Make Two Rooms Out of One for the Home Too Small to House Them Both With Comfort.

Madame Maison's Design for a Living Room library.

BY MADAME MAISON. NY houses are not large enough to have a separate room for the library and the average family has not sufficient books to warrant such a room, so a combination livingroom and library is a very happy one when well arranged.

An open shelf or series of shelves is friendly way to house books, but in a dirty, dusty town unless some one will see to the dusting. I would advise closed cases or a set of section cases

there will be casement windows over shelf that extends on either side of the

fireplace.
Plain walls are the best for pictures and the best for this room, which must

shall by cloak in which his lifeless body was borne off the field of battle is still tenderly preserved in the armory of the Tower of London.

It might justly be said that this beautiful historic mansion in Westerham, with its glorious associations and peaceful surroundings, is no fit place for a quarrel. Nevertheless, as has already been intimated by cable there is trouble brewing if Mrs. Learmont of Montreal, widow of J. B Lear-mont, who bought the house some mont, who bought the house some years back, persists in her desire that the women who are now making use of two of the upper rooms as a war hospital supply depot should give up their work, or at any rate give up carrying it on in Quebec House.

Apparently, Mrs. Learmont is of opinion such work interferes with the value of Quebec House as a show place. On the other hand visitors with an "open mind" assert that the interior is even more attractive than before, and that the sight of these white-robed women busily engaged making band-ages and other surgical supplies for Canadian wounded must appear to the highest sentiments not only in the hearts of visitors from the Dominion, but from every other part of the British empire.

Doing Splendid Work.

dertaking on the most sanitary and scientific lines, and under the direct supervision of the war office, all their inished supplies going to the Ontario Government Hospital at Orpington. The room in which the surgical branch does its work is a study in white, the walls, floors, tables, chairs and "tools" being spotless; the work-ers themselves most immaculate in white overalls and headdress, while here and there conspicuous notices give constant warning of the necessity for absolute cleanliness. Westerham branch started with a small nucleus fund, and is kept up by voluntary assistance from the members and a few friends of the guild. sufficient to buy the necessary ma-

Mrs. Le Mesurier, wife of the vicar of Westerham, is head of the organization. There is a singular appro-priateness in her connection with this work at Quebec House, as the vicar is a direct descendant of Lieut, Arthur Browne, who bore the colors at the battle of Quebec and carried Wolfe off the field, while the fact that Wolfe was born at the vicarage in a dear little room overlooking one of the most attractive gardens in Wester ham adds another link.

terials to work with.

She is assisted in the organization by Mrs. Asser, wife of Gen. Asser, who, with her mother and little daughter, live in a beautiful home adjoining Quebec House. Wolfe as a lad played about in their garden. There is an old inn at Westerham, the George and Dragon, at which Wolfe is said to have frequently dined, and so in later years the custom of hav ing a dinner there on the anniversary of his birthday, January 2nd, has been established. The last one was held in the winter before the war

"WANTED LADY TEACHER, North-way House, Hudson Bay Trading Post. Apply to Teachers' Agency, Room 43, Hartman Building." Doris was given to making up her mind quickly. It took her a very short time to find hersel! in the presence of a pleasant rotund gentleman, to whom she explained her errand. Terms were soon arranged, and Doris agreed to leave for Northway House the following wack.

Our scene shifts to the Mission a Our scene shifts to the Mission at Northway House. A bright cold night, a roaring fire in a big room, lighted by the cheerful blaze from the open door of the stove, a large oil lamp on the heavy table, covered with a red cloth, made for a picture of cosy home com-

Beside the stove the Rev. John Scott in loose jacket and slippers mended a snowshoo and talked all the time. Mrs. Scott, a happy faced, cheery little woman, was seated at the table knitting. She answered her husband at random, as between the rows of her work, she watched the big handsome sed-faced man, who occupied the chair on the opposite side of the stove.

Jack Umberton he was called. He was the factor's right hand man at the Post. But no one knew if that was his name, nor from whence he had drifted into the Post some nine

had dared to question him, a certain air of sadness, coupled with his unmistabable aristocratic aloof-ness, while never offensive, had kept

Mrs. Scott had been the only one to whom he was less reticent, but even she had learned nothing of his ante-cedents. And, indeed, she had not striven to do so, it had been enough for her that Jack was only "a boy grown older," and needed mothering. grown older," and needed mothering.

The Indian maid, entering the room with a package, caused a diversion.

Mr. Scott-eagerly seized the package and unwrapping it found therein two or three business letters and a paper or two from the Port, and one letter. or two from the Port, and one letter,

opened it, and reading it quickly, exclaimed: "Listen Mary, Thompson has at last found us a teacher. He says, "Miss Dorothy will arrive at Port Chester on the sixteenth." Mrs. Scott Chester on the sixteenth." Mrs. Scott was at once delighted and excited, and womanlike began to speculate as to what the new teacher would be like.

On the following day, Mr. Scott sought out the factor to arrange for the bringing of Miss Doherty from Port Chester. Some one would have to meet the boat at the Port, and the remainder of the distance, forty miles, would have to be covered by dog-team.

would have to be covered by dog-team. The factor was in despair. All his teams and men were absent, and would not return for many days. What could they do? True, Mr. Scott had his own team, but he himself was unable to drive owing to an accident. Which had caused him a badly sprained ankle, the week before.

Tom Longfeather. Mr. Scott's Indian, was trustworthy, and reliable, but it was unthinkable that a young girl and a stranger should make the journey from the Port to the Mission with only an Indian. "There is Jack."

Jack merely closed his lips in a hard, firm line. He bade Tom take the sled to the shelter of some evergreens, and turned backward along the trail. Doris called after him "Come back, come back, I do not need the rug." But Jack's head was not turned.

The time seemed interminable to the waiting girl, until Jack returned with the missing robe, and their journey was resumed.

A blizzard of snew and sleet row oblige the Scott's, and with Tom Long-feather left for the Port.

Poor Doris had been so unfortunate as to have for her traveling companions on the boat a number of rough navvies, and several loud-voiced women who were coming up to the Port
as waitresses in one of the saloons
there; and the trip had been stormy.
So, altogether, the girl was nervous,
tired and lonely, and when met at the
wharf by Tom Longfeather, who was

cannot.

the young lady's wrath had fallen, when she learned it was only possible for her to take a suitcase on the sled. The remainder of her luggage would have to be left at the Fort until sent

"Missie very mad, Missie very mad," half whispered Tom, as he found Jack in the hall of the saloon. in the hall of the saloon.

Jack swearing slightly under his breath at the idicay of women in general, and this one in particular, stroje out into the yard where Doris stood guard over her trunk, while he boy held the dogs.

"Get into the sled Miss Doherty, your trunk connet be taken." Jack's tones

trunk connot be taken." Jack's tones would have frozen an icicle.

Doris wheeled, gray eyes met brown eyes, and shapped fire, "Then I shal not go," and she turned towards the house.

"I am to tell Mr. Scott you are returning to Winnipeg?" again the icy tones, more icy if possible, fell on her

Poor Doris! The almost empty purse finshed into her mind. If she threw over this position, what was she to do? She had not enough money to take her even as far as Winnipeg. She hated to give in, but—"Very well." She returned and made her way to the sled, her head held high. Jack's face was

utterly expressionless.

Jack allowed Tom to tuck the robes around Doris, but here she was mistress. Speaking sharply to Tom, she threw off the last robe declaring she did not wish to be a mummy. Jack, realizing the waste of time, snatched the robe and with no gentle hand strapped it securely around the angry girl. He bade Tom take his place beside the dogs, while he himself gave the sied a vigorous push at the rear. For several hours the steady pace kept up, and many miles were covered. From time to time, Jack scanned the sky eastward, as if the heavy dark-ness there alarmed him, and he dreaded a storm, for they were still far from

Presently the trail wound along the side of a high hill, with a deep gully below the path. Here, the sled stopped, and Tom at Jack's bidding climbed to the top of the hill to obtain a beter view of the threatened storm.

Jack himself went to the leading dog. which was a new one with an ugly

Away Goes The Rug. While he was busied there, Doris still angry and mitinous, surreptitiously unbuckled the strap which fastened the fur rug around her, and uncerimoniously tossed it over into the gully. She settled herself back murinuring: "I am too hot for anything!"

Jack started the team off on a gallop as Tom began to descend, and at least five miles had been traversed before Jack returned to the rear of the sled, and there discovered the absence of

was resumed.

A blizzard of snow and sleet now

made keeping on the trail almost impossible, but the dogs plodded bravely on.

Doris was conscious that Jack covered her head and face with a heavy muffler, but she was too numbed to

thank him. It was nearly midnight when they reached the Mission. The barking of the dogs brought Mr. and Mrs. Scott to the door to welcome the weary travellers. Jack unstrapped the robes

Doris soon found herself very happy in her new work. She made friends of the trappers, of the Indians, and the Mounted Police, who sometimes strayed in. Mrs. Scott she loved as a mother, and Mr. Scott as a father. She loved all at the post. "No," she hated Jack

Except for his hand to his cap if she happened to meet him, he had not spoken to her since bringing her to the Mission. Always he avoided her if possible.

Doris was angry-and she would not acknowledge it to herself-hurt. After a spell of soft weather came a period of hard freezing, and Big River became an ideal skating ground. Everyone who had skates donned them. All the men were ready to assist Doris who was only a beginner.

An Intruder Comes.
Among the men who had lately come to the Post was Big Sam, a drunken, rough bully. He had been compelled to keep straight however since coming to the Post.

An expert skater, he had attached

himself to Doris, who rather resented his attentions until Jack Umberton, skating past the couple, had given them an annoyed, surprised look then turned away with disgust. Doris went hot then cold. "What business was it of his with whom she skated?" To show her indifference she encouraged Big Sam, who at once took advantage, and one short afternoon as the dusk was beginning to fall, he led Doris to a secluded part of the river. Doris besged him to turn, but Sam laughed, "Not until you have given me a kiss, little one." Doris screamed as the brute bent his head over her.

Jack had watched the little play, and following the two, had arrived in time to give Sam a stinging cuff on the side of the head, which sent him over on his back. Before he could rise Jack was skating back to the little landing with

Doris held tightly by hand and arm. She was winking hard to keep back the tears. In silence Jack removed her skates, then as she stood up he handed them to her saying, "Big Sam has a wife and four children in Port Chester."

Then turned and skated off. Doris found her way to her room unobserved, threw herself on her bed in a passion of angry tears, that she had so humiliated herself in his eyes

He inquired for Jack Umberton, and after interviewing that gentleman they left for Port Chester together, but not until the stranger had told the Factor, that his erstwhile trapper was John Um-berton, Duke of Wenter, and heir to many estates.

Jack had bidden Mrs. Scott farewelt.

but had taken care to do this while Doris was at school. For which she was thankful. So she said to herself. But a lonely little girl that night opened up her trunk and drew forth a faded woolen muffler and stifled her sobs in its folds.

Nine months passed away and found Doris still at the Mission a happy and cheerful home. But suddenly sprrow fell even there. A message was brought that Mrs. Scott's mother was dying and wished to see her daughter

At last Doris realized she had given

her heart unasked to this cold.

Mr. Scott would have to go with his striken wife, Doris bravely assured them she would take charge of the But as supplies were low it would

be necessary for her to go to Port Chester with them to make the purchases and return at once, that the Mission might not be left alone, So once more Doris found herself at Port Chester with Tom Longfeather, after seeing Mr. and Mrs. Scott board the boat for Winnipeg.

Quickly the purchases were made, the sled was loaded and everything

ready for the return journey.

But poor Tom fell while walking down the slippery steps of the saloon and on examination his leg was found to be badly broken. It would be impos-sible for him to return to the mission for some time.

Doris was walking nervously up and down the hall of the saloon, trying to upon the sleep, where he lay for a modecide whether to attempt the return upon with closed eyes, so death-like and there discovered the absence of attempt the return the rus.

In the meantime the wind had changed to a gale blowing the particles of snow in their faces, and the wiftul of snow in their faces, and the wiftul ment with closed eyes, so death-like that Doris' heart stood still.

But be rallied and said, "Now, what spoke behind her, "Can I help you, are we going to do?" Doris promptly answered, "About thirty yards from loose, and then—"

She turned quickly, it was John Umberton. He added, "I have heard of Tom's accident, and Mr. and Mrs. Scott's journey. Shall I take the team to the Fost for you?"

Doris had recovered herself by this time, and was able to answer him without faltering. "If you are going to the Post, Mr. Umberton, I shall be Yery grateful as I do not like to the team. A crow helps to straighten work.

wery grateful, as I do not like to hire one of the men here." "I am going to the Post," he answered.

Soon they were on the old trail. Driving a dog team does not afford much time for conversation, so many miles passed without a word below the post of the po

Doris was angry with herself for the a fly, the first locomotive had a grassjoy in her heart. And she felt her cheeks get hot as the trail led past the gully where she had thrown off the

cuit to follow and Jack had been so long unaccustomed to such arduous evercise, that taking advantage of a ciump of evergreens on the top of a steep hill, he halted the dogs.

He walked to the rear saying, "I think I shall take this hill on the back of the sled. Then added, "I do not like your leader, Miss Doherty, he is an ugly brute." Doris answered, "Yes, we had a great deal of trouble with him coming out. Lack started the him coming out. Jack started the team, then leaped lightly to the sled. Suddenly the leading dog turned on the one behind him, the other dogs gave a start forward, the jerk broke the straps, the sled was going at a tremnedous rate down the hill. Before Jack could jump he was hurled against a tree, the sled overturned, and

Slowly Doris managed to extricate herself from the robes and rugs which had saved her from injury. She looked around and discovered Jack at the foot | thing." of the tree, apparently lifeless, a slow to the snow.

Frantically Doris knelt beside him: called him to speak. He was dead, she was sure. Rising to her feet, she shouted with all her strength. But silence answered her.

Then, throwing herself beside him again, she endeavored to stanch the wound with a plentiful application of snow. Searching in his clothing, she found a flask, which she applied to his lips. Soon he showed signs of re-

and pulled it over close to the injured man, who now looked around be-wildered. "Why, where are the dogs?"

under him.

But by much pushing and pulling and with much pain, he managed to get upon the sled, where he lay for a mo-

Notwithstanding his expostulations the managed to carry out her intentions. And after about an hour's hard work the sled was under shelter.

There was plenty of wood, and a stove in the hut, so it was not long before Doris had a fire going.

Tendany she washed the cut in

Tenderly she washed the cut in John's head, and tried to make him as comfortable as possible. He watched her wistfully. Then he spoke: "I have not been much use to you, little girl. It would have been better for you to have hired a man at the Port."

Doris shook her head. "No, suppose this had happened with one of those men? I should have been frightened to death."

death. John smiled, "Then, if you are frightened of me, sit down on the sled beside me. I want to tell you some-

It was a different John Umberton than Doris had ever known who was

than Doris had ever known who was speaking.

With her hand resting in his, he told her of his love for her, born in the saloon yard that first memorable moment that they had looked into each other's eyes. It was that love which had brought him from the rank and wealth in his far off home land to this lend of snow and ice.

land of snow and ice.

He had tried in vain to forget her to believing that she had no feeling for re- him, but something had forced him turning consciousness. Then Doris brought the robes and placed them around him.

With much labor she righted the sled and pulled it over close to the injured by the first that day, the glad light which for a moment had shone in her eyes had told him the truth. him the truth. A very happy John and Doris were

wildered. "Why, where are the dogs?" was his first question. Doris explained.

John Was Helpless.

John endeavored to rise, but even with the aid of Doris' arm he found it impossible. His leg had been twisted under him.

A very happy John and Doris were found by the men from the post the next morning. The dogs had found their way home, and startled the inmates of the post, who had at once set out to search for the missing sled. When Mr. and Mrs. Scott returned with the happy news that Mrs. Scott's mother had recovered, they found a

#### A DEFT WAY OF HANDLING GRAPEFRUIT

E VERY housewife should learn the easiest way to secure neat sections of orange or grapefruit Even with the greatest care, sections tions of orange or graperruit pulp, free from the encasement of delicate white skin. It is important to select thin-skinned fruit and to have it cold, thus insuring firmness of the pulp, which facilitates the work. A small, narrow-bladed vegetable knife luncheon, a glass cup filled with orange and a strong fork are the only imple-

howl or soup plate while cutting, so that all the juice will be saved. Pare the fruit deep enough to go thru the peel and also the white fiber. At each stroke of the knife, the pulp must be exposed to view. The re-

sult will be that a ball of pulp will be left on the fork, the sections of the fruit separated by the thin white skin. Still holding the peeled fruit on the fork, insert the thin blade of the knife at each side of each section and carefully loosen each from the centre or

Have Little Effect.

seemed to have been kept in England

Feverolles are splendid winter layers of large tinted brown eggs and climatic changes seem to have little effect

5 to 7 pounds for females. They are full breasted, and the dressed carcass is a good seller because of this feature.

While these fowls are good foragers, they are not naturally wild, and are therefore easily adaptable to free range on large farms or they will do well in confinement.

Faverolles are bred in several colors, salmon, ermine, black and white. The salmon, ermine, black and white. The later has been introduced to Ameritian. Let it cool. Flour the board,

When a leather handbag has become rubbed at the edges and gray all over, altho the lining is still good, do not throw it away but paint it with a specially prepared liquid, which is intended for freshening straw hats, but works equally well on leather. When tried recently on a handsome but badly worn bag of smooth leather, it restored it to shiny newness; the new coat is not sticky, does not stain the hands, and does not spot when da pe-ened. The liquid comes in black, navy blue, red, brown, violet, sage green, burnt straw, cadet blue, yellow, lavender, cerise and uncolored.

Baked Shad.

Clean, wipe, and dry a shad weigh-ing about four pounds. Melt two tablespoons of butter, add one cup of bread-crumbs, a quarter of a pound of mushcrimbs, a quarter of a pound of mushrooms, two tablespoons of chopped
parsley, two tablespoons of chopped
chives, one well-beaten egg, salt and
pepper. Stuff the fish with this forcemeat, then lay it in a greased pan, put
thin strips of salt pork over it, and
bake in a hot oven for 40 minutes. Lay
the fish on a hot platter. Pour one cup
of cream into the baking pan, add a of cream into the baking pan, add a teaspoon of cornstarch, and stir until it boils. Serve with the shad.

Potato Cakes.

Peel about two pounds of potatoes, and boil in salted water. Drain off the water and mash the potatoes; quickly add some butter, the yolks of three or four eggs (or two whole eggs), a lit-tle sugar (and a little milk if not too little balls of the mixture, turn and flatten them on the floured board, place them on buttered sheet and bake powdered sugar sprinkled over them.

Statistics show an appalling increase, every year, in operations performed upon women for some derangement of the feminine organism.

It is perfectly true that some of these troubles may reach a stage where an operation is necessary—but it is also true that many women have escaped the necessity for an operation by removing the trouble with

Lydia E. Pinkham's Vegetable Compound

even after an operation has been advised as the only means of recovery.

These Three Letters Prove That Statement.

Tennille, Ga.—"I want to tell you how much I have been benefited by Lydia E. Pinkham's Vegetable Compound. About eight years ago I got in such a low state of health I was unable to keep house for three in the family. I had dull, tired, dizzy feelings, cold feet and family. I had dull, tired, dizzy feelings, cold feet and hands nearly all the time and could scarcely sleep at all. The doctor said that I had ulceration and without an operation I would always be an invalid, but I told him I wanted to wait awhile. Our druggist advised my husband to have me try Lydia E. Pinkham's Vegetable Compound, and it has entirely cured me. Now I keep house for seven and work in the garden some, too. I am so thankful I got this medicine. I feel as though it saved my life and have recommended it to others with benefit."—Mrs. W. E. LINDSEY, R.R. 3, Tennille, Ga.

Des Moines, Iowa.—"Four years ago I was very sick and my life was nearly spent. The doctors stated that I would never get well without an operation and that without it I would not live one year. My husband objected to any operation and got me some of Lydia E. Pinkham's Vegetable Compound. I took it and commenced to get better and am now well, am stout and able to do my own housework. I can recommend the Vegetable Compound to any woman who is sick and run down as a wonderful strength and health restorer. My husband says I would have been in my grave ere this if it had not been for your Vegetable Compound."—Mrs. BLANCHE JEFFERSON, 703 Lyon St., Des Moines, Iowa.

Bellevue, Pa.—"I suffered more than tongue can tell with terrible bearing down pains and inflammation. I tried several doctors and they all told me the same story, that I never could get well without an operation and I just dreaded the thought of that. I also tried a good many other medicines that were recommended to me and none of them helped me until a friend advised me to give Lydia E. Pinkham's Vegetable Compound a trial. The first bottle helped, I kept taking it and now I don't know what it is to be sick any more and I am picking up in weight. I am 20 years old and weigh 145 pounds. It will be the greatest pleasure to me if I can have the opportunity to recommend it to any other suffering woman."—Miss IRENE FROELICHER, 1928 Manhattan St., North Side, Bellevue, Pa.

The strongest and most trustworthy letters come from women who have escaped this terrible ordeal by the timely use of Lydia E.Pinkham's Vegetable Compound. Unless an operation is necessary at once, try this famous old remedy first. It can do no harm and in many cases it has been a blessing. The Lydia E. Pinkham Medicine Co., Lynn, Mass.

#### LONE TREE CROSSING ROMANCE IN WHICH SOCIETY GIRL SHONE

Larry raised the boy and carried
him gently inside to the couch, which
Clare pulled before the fire.

They relieved him of his wet coat and shocs, administered brandy and applied friction to his hands and feet. A paroxysm of coughing followed and Larry gently raised the sick boy in his

fact that the adjoining ranch was managed by Aaron Broont, otherwise Bull Aaron, a man of very unsavory reputation, between whose men and those of Three Pines there was almost constant friction.

On one occasion Tall Ted had given the burly Bull a very sound thrashing for some piece of dirty work. For

Painfully he hesitated between the words. Sitting up suddenly, he almost screamed, "The local, the local, my God, our boys, the men and women from Canfrer, and Ted, Ted, I tried to get to the crossing! I lost my way!"
He sank back moaning pitifully.

the crossing?" she asked. Goldle panted, "About 11. It is 10 now." Clare sispered, "Lone Tree Crossing is two Hurriedly she ran to the closet be side the fireplace, searched rapidly, then found and donned riding boots, then found and donned riding boots, heavy coat, cap and gloves. Larry meanwhile had attired himself like-wise. Now he lifted from the wall a brace of revolvers. Clare bent over

Goldie. "Listen." she said. "You must stay where you are, Larry, and I will save the local, God helping us." Goldic smiled feebly, "God will help you," he Outside the door Larry blurted out, "Shure, Miss Clare, there isn't a horse on the ranch" Clare's lips went white,

but bravely she answered, mind. Larry, we will walk." The driving rain retarded their progress, but steadily they plodded on. Near the crossing they waited and listened, but no sound met their ears. Larry whispered, "I don't think the Larry whispered, "I don't think the rascals would hang around, Miss; they'd likely go away off, for fear they might get killed themselves."

With an electric "Jimmy" the two scarched the tracks on both sides of the crossing. Their search was finally rewarded by the finding of several sticks of dynamite lying close together and leading to a large box, hidden under some brush at the side of the track. A single stick of the deadly explosive struck by the train would

explosive struck by the train would have exploded the others and shattered Notwithstanding the bitter wind and the rain, Clare and Larry worked until every stick of dynamite had been removed and deposited far from the track. Clare's hands were numb as they concluded their search, and Lar-

ry declared he was near to being "We will just wait for the local, Larsaid Clare, their task completed. It must be nearly 11 now. We can

stop her with our-"
"Hands Up, You!" "Hands up you!" Clare whirled to find herself looking into the blue bar. tel of an automatic. Even as she azed she saw another man strike blow on the head that sent m to the ground. 'Interfere with our plans, will we?"

maried the man with the revolver. Bring that rope. We'll teach New Yorkers a lesson, Hen." Clare, frozen with horror, had not so much as uttered a word. But now, as the man with the rope laid his hand on her arm, she was galvanized to ac-tion. With an unexpected leap she struck the hand holding the revolver, sending the weapon clattering on the loadbed, and with the speed of a deer she sprang into the darkness and feel days the tracks to read the speed of the speed o fed down the tracks towards Canfrer. With imprecations loud and deep the

Choking, gasping, she stag-

#### CURRENT COMMENT ON WOMEN'S WORK

AG-DAYS seem to have proven who recruits in the cause of Empire. their efficiency if we may judge by their frequency, and as women are the principal organizers and collectors on these occcasions, it may be taken for granted that they are acknowledged to be the most successful possible in obtaining funds. It is perhaps a psychological problem to determine why women can get more returns from their appeals for monetary by their frequency, and as woturns from their appeals for monetary assistance for any cause than men but that they do is without question but that they do is without question. Some time ago a big scheme in connection with church affairs wanted strong financial support, and it was judged opportune to send out men of standing and business acumen to do their best in the way of a house to house canvas. The men went out in pairs. They made calls and exerted themselves in the way of persuasion, but alas, their return was almost neglibut alas, their return was almost negli-gible, in fact it would have paid them better to sign a cheque for the amount received and have remained in their msiness houses and carried on their ordinary work. That this was a campaign in which only moderate amounts were expected, may account for the lick of response. It may be we are in the habit of expecting men to do the big financial ventures, and women to confine themselves to the lesser trans-actions, so when men took a chance at somthing which seemed below their usual calibra they failed. Tag-days are occcasions when even the smallest amount is acceptable, and the community generally do not scruple to put into the be-ribboned box of the fair suppliant the small coin which they would hesitate to hand out to the man of affairs accustomed only to deal with figures that terminate with a certain

umber of ciphers. Kitchener 'Fag-Day will have gone into history before this page is read. The aim of its organizers was to collect \$34,000 to distribute at the rate of \$2000 each, among the battalions re-cruiting in Toronto. The amount in bulk may perhaps seem large, but when one considers that ten or twelve thousand dollars over and above what is supplied by the government is re-quired for the equipment of every battallon, it is easy to see that the amount will be far short of doing anyamount will be far short of deing anything wonderful in the way of provision for those for whom the money is intended. Tag-days lately have been frequent, it is true, but they should never be cause for grumble, because no financial appeal, however great, or how often repeated is eqivalent to an appeal to give up life if necessary and, this is what every man appears to

A moment later she was gathered up in a pair of strong arms, and a voice she recognized as Ted Travers, was murmuring "Clare! Clare! My darling. How came you here?" Frantically he called: "Your flack, Jack, quick,

Clare had not fainted, she heard every word, and her heart thrilled. She lay in Ted's arms foor the pure plea-sure of it. But a good dose of ranch

sure of it. But a good dose of ranch whiskey made her struggle and choke, then she remembered Larry.

Quick! Lone Tree Crossing.

"Quick, quick, Ted! Lone Tree Crossing, Larry! Larry!" she cried wildly. Without waiting for explanations Ted lifted her on the car, and they started. As they approached the spot where she had seen Larry! knocked. where she had seen Larry knocked down. Clare whispered "Keep your revolvers ready."

They found Larry sitting up, dazed,

they found Larry sitting up, danced but recovering; the two ruffans had disappeared. Explanations followed. Ted learned that even a New York girl can rise to the occasion. They waited until the local had passed the crossing, then Larry and Jack replaced the hand-car and went on to Lettwater. Ted and Clare turned toward the ranch. "Tell me," begged Clare, "how t was you were coming back to Canfrer when you had said good-bye to everyone but me?" Ted smiled at the reproachful tone. "I came back to eatch one last glimpse of you,"

catch one last glimpse of you," he said, "because to me you are the dearest girl in the world." He put his arms around her and drew her close to him. "Dear girl," he whispered, "I wanted the memory of your sweet face to carry with me to the trenches." "Ted," she whispered back, "you—you can have it—and more." And Ted, man like, took more.

When they arrived at the ranch they When they arrived at the ranch the found Mr. Mayhew sitting comfortably before the fire, and Goldie smiling on his pillow. All Mr. Mayhew "I knew when Clare and Larry started out together there'd me a mix-up of some kind, and they'd come out on They always do you know.

for this young Hersules, here," botion-ing to Goldie, "I have adopted him and am going to take him to Europe-with me, providing you young folks allow us to go along," looking whimsically at Clare. Clare blushed. "But I am not going to Europe, father."

"Oh, you are going to let your husband go alone, then," laughed father. Ted stepped forward and took Clare

in his arms. "No she's not, we'll all go together," he said. That night all Lettwater must have marched to Three Pines and, cheer after cheer was given for Clare and Larry saved many people much sorrow. Next day the sherrif's men visited Bull Aaron's ranch, but it was con deserted; Bull never returned.

HOT SUMMER SUNS, With consequent tan, sunburn, freckles, etc., will soon be here. Have a jar of PRINCESS

COMPLEXION PURIFIER handy. It cures the worst cases of tan, surburn, freckles, black heads, red nose, eczema, ivy poisoning, eruptions, etc. PRICE \$1.50, PREPAID.

Our free Booklet C is of interest to every woman. It tells of the care of the skin, scalp and hair, and how we remove Superfluous Hair, Moles, Warts, etc. WRITE FOR IT TODAY OR CALL Kiscott Institute, Ltd.

61H College Street, Toronto.

for the purpose of organizing the tagday campaign, has grown from small beginnings in the down-town district then a passing thru the different phases of a dispensary and clinic in a couple of rooms tendered by a mission house, an establishment in the basement of the Women's Medical College, and on to present attractive quarters. Now conditions have reached the point where development on a much larger scale than any yet at supplies expectally to these vertices. ed the point where development on a much larger scale than any yet attempted must be done, or the object of the hospital will be immeasurably curtailed. The more the existence of the Women's Hospital becomes known the more is the increase in the demand for its services. Where a few dozens presented themselves in days gone in the demand that the services in days gone the war. Employers who have found out that women can do their work as efficiently as when men did it, and who can get that work done by women at a much lower figure than when it was done by men, will have in the majority ens presented themselves in days gone by, the applicants for women's mediby, the applicants for women's meu-cal service and attention mount up into the hundreds and to answer these appeals modern science and equipment must be on hand. Women doctors and nurses, while they may be personally efficient are hampered considerably, and sometimes to such a degree that their knowledge is of no value, when they have been such as the considerable of the considerable their knowledge is of no value, when they have no means of putting it into practice. Tag-Day is to supply the wants in this respect. The amount required is \$125,000—this perhaps seems big, but an economist could prove that the returns will be an asset to the city generally, and to the women in particular, that will not only equal the principal, but will bring with it a balance more than equal the very best rate of interest.

There is still another tag day in prospect, and somehow this is particularly appealing. It serves, too, as a balance, for in the first instance that of Kitchener Day, the returns were for the men. In the next—that for the hospital—benefits so to women. Now in our third appeal we hear the cry of the children, for Queen Alexandra Rose Day is in aid of the little ones of the land, for children under fourteen years of age who are in the hospitals and institutions of the city. As come in the leafy luxurious month June, when generous nature sets the example for large giving by happy hands, and with smiling countenance Rose Day was inaugurated by the Imperial Daughters of the Empire, and its organization, and carrying out will be under the supervision of the Municipal Chapter of Toronto.

dance of the workers have already been published, and if adhered to will be of great assistance to all concerned. The city will be divided into districts, over each of which a captain will have command. In each district there will be five chaperons who will each be responsible for an automobile and five sellers, and selling is to be confined to the area allotted to each. A sub-committee of two from the committee of one captain, and five chaperons will be appointed to have full charge of the roses in her division, and each chaperon is to have an equal quantity with that of her fellow-workers. Then as to the receipts. Two of the chaperons will act as treasurers and take charge of the thirty boxes in their division, is keeping a copy of the number of every box and the name of the one who receives it. The contents will be counting the contain a high percentage of water (80 per cent.) they also contain 10.6 per cent. of protein and the spins and worsteds. Many checks, eswhich a captain will have treasurers at whatever headquarters may be decided upon. The convener of the committee in charge is Mrs. Angus MacMurchy, 67 Chestnut Park road, who is the official treasurer of the Municipal Chapter. The officers generally are already working on the ampaign; they are Mrs. A. E. Gooderham, president I.O.D.E.; Mrs. R. S. Wilson, regent of the Municipal Chap-ter; Vice-Presidents Mrs. E. F. B. Johnston and Mrs. Arthur Peuchen; Secretary, Miss Elizabeth Dixon; Treasurer, Mrs. Angus MacMurchy; Assistant Secretary, Miss Flora Campbell Macdonaid; organizing sec-retary, pro tem, Mrs. John Bruce; Standard Bearer, Miss Marietta Good-

erham. Mrs. A. W. Macdougald, organizer for the I.O.D.E. in the Province of Quebec, and well known in Toronto, where her interesting addresses to various chaphave been very much enjoyed, has just been honored with the presentation of life membership in the order by her fellow workers in Montreal. This honor brings with it a place on the council board of the National Chapter of which Mrs. Macdougald is already standard bearer.

In the above connection, Toronto Daughters of the Empire are happy to give recognition to the work of their give recognition to the work of their compatriots in Montreal. During the past twelve months the twenty-one primary chapters that have representation on the Municipal Chapter of the beautiful city guarded by the Royal Mount, raised the sum of \$24,887. They also handled 10,000 pounds of wool, sent 17,000 pairs of socks to the trenches, and thru the medium of trenches, and thru the medium of various knitting organizations, gathered 14,000 articles for field comforts, shipping in all 387 cases of supplies. This resume of work well done in the patriotic cause bears out the state-ments made by Mrs. Macdougald some months ago, when in an address given months ago, when in an address given the Sir Henry Pellatt Chapter, she described the enthusiastic haste with which the women of Quebec answered the call for assistance. With the same generous response that has marked the brave women of La Belle France, The women of Quebec set about enquiry as to how they could assist, and offerings of yarn, socks and other enquiry as to how they could assist, and offerings of yarn, socks and other supplies at once began to pour in on the shipping centres, from even far distant hamlets of the country. The specific reports from Montreal are the messengers and indicators of what is being done by large numbers of women in many parts of Canada's oldest province. province.

The Kinston Whig comments editorially on a situation that has arisen amongst the teaching profession in Toamongst the teaching protession in To-ronto, owing to the war. Referring to the enlistment of a number of the men of the teaching staff who donned the khari, because they desired to do so, satisfied of course that their employers were willing to keep their places for them until they returned

from the war. "Now," continues the commentator, "the trustees have a new difficulty on their hands. The female teachers who took the places of the men who have gone to the front, or are in notive military training, demand the same pay as the men.

Why not? There is an acute aspect to this question, and it is asserting itself in an insistent way. It is the work that is being paid for, not the sentiment either for or against women. The woman teacher sometimes fails because she cannot physically enforce the discipline that is required. Discipline aside, her teaching is quite as good as that of any man. Then, why should one's pay not be as good, especially when one is filling the place of the absentee, and performing his duties satisfactorily?" So far for our contemporary. But there is a point to the contemporary. But there is a point pay for equal work, a point that has before been commented upon in this before been commented upon in this before been commented upon in this service. before been commented upon in this column, and that is that if women really intrnd to be honest in their attitude of taking men's positions merely as temporary, holding to be relinquished when the men come back when done by men, will have in the majority of instances a great unraveling of the coats of conscience before they will feel themselves called upon to dismiss the underpaid but efficient worker, merely to keep the supposedly patriotic promise to guarantee which there was not even the contracting "scrap"

#### Do You Buy Food er Waste?

HOUSEHOLD HELPS, BY ISOBEL BRANDS

1.1 per cent. of fat—more than any other shelifish.

The least percentage of waste is found in dried, corned and canned meats, where the full pound that we pay for is edible. In sausages, too, there is only 3.3 per cent. that is paid for which is waste. HY, chicken is very wholesome food, and the market price isn't very high these days, so I'm buying it a great deal," said a young eper who prides herself on her shrewd marketing ability.

EURALGIA IS alcoholic liquids, and the consump-For emaciated persons rich cream, butter, emulsions of non-alcoholized cod-liver oils, and carlsbad or epsom nonchalantly by many to mean alto mean aleverything the headache phoid fever to poisoning and lisease. Usually, ver, neuralgia is of typhoid fever to od poisoning and hip disease. Usually. however, neuralgia is severest paroxysms of pain.
Sometimes neuralgia is traceable to such poisions as phosphorus in match factories, lead in plumbing works, and arsenic in dye and wallpaper indus-

ache or head pain. irsenic in dye and wallpaper industries. In such cases a change of occupation is the remedy.

Remedies for Relief.

"Neuralgias" should never be treated with any drug or "dope," which gives the immediate relief that alcohol, morphine, opium. cocaine and some "fine" (?) headache cures do. Baths, hot drinks which cause considerable perspiration, and the external use of soothing ointments or counter irritants have more value in the long run than these "dopes" which make the sufferer feel so good yet work ultimate havoc.

Electricity correctly applied with the positive pole upon the throbbing nerve and the other wire of the battery anywhere else at times works wonders. The ultra-violet rays and sparks from friction batteries also help.

Massage is of benefit, and no one will dispute the service rendered by the fresh air and the sunlight. malady of the facial nerve which is scientifically and properly termed "trifacial neuralsia." This is, let it be plain, a very violent inflammation of the cen-tral station just beneath the brain, from which the nerves of the face, eyelids and forehead arise. True "tri-

eyends and forenead arise. True "tri-facial neuralgia" often lasts for a score of years. Its cure today is brought about by destroying or am-putating the bunch of tiny flannel cake-like structures—about the size of the head of a pin—either with injections of alcohol or the use of the knife Some Common Causes.

Neuralgias of the lesser sort, dignified by just as mischievous and tor-

pains, are happily not so per

Among the swarm of causes for the aggravating pains which pass under the name of "neuralgia," after all the well known distempers have been eliminated, are loss of sleep, poor blood, defective nutrition, undue use of

pecially in the velours, are to be seen. Black-and-white checks a trifle larger than the small ones of former years show a colored stripe running into four or five-inch squares. A suit of this kind is frequently bound with white or black braid.

Liberal use of braid is a feature of spring suits. One tailor goes so far as to simulate broad stripes on a kilted skirt of a lemon-colored worsted suit by means of a wide woolen hercules braid. The same braid forms the cuffs and stole collar.

A separate panel, which buttons shield-like over the front to a plaincut suit of tan velour, runs into a belt and sash ends at the back, tying at a low waist line. The skirt of this suit is hiked up on one side and held in place by three smocked pearl buttons and buttonholes.

Suit skirts in many instances are surprisingly narrow. This is not to be taken as a sign of the return of narta frocks and tulle evening are waxing wider still. The narrow skirt is of course more in keeping with the tailored idea, but many suit skirts show box pleats, or side pleats, or shirring or organ risk pleats, or side pleats, or shirring or organ risk pleats. shirring, or organ-pipe folds all con-centrated on the hips. The front and back of the skirts are more or less

Unusually bright colors are seen for suits, especially for the more severe sports variety. Lemon, chartreuse, bright tan and all sorts of rose colors are popular.

Fringe on the tucks of a dark blue gabardine suit is a pleasing innovation,

Luther Burbank, that kindly man who has created so many new flowers and fruits, has been quite seriously ill at his California home. He is reported to be improving, and all horti-culturists will be anxious to hear of his complete recovery that his impor-tant work may not be interrupted.

### Hair Loss Due to Dandruff

English walnuts ..... Pecans Aimonds

To Prevent the Hair From Falling Out and Fill it Full of Life, Snap and Beauty, the Germ that Causes Dandruff Must be Destroyed.

That dandruff is of microbic origin and hence a highly contagious disease is now pretty thoroughly established by science. If the hair is dry, brittle, lifeless, or it may even be excessively oily, look out for dandruff. In the final stages of the disease the scalp is hot, feverish and itches and the hair comes out. This loss of hair may be slight at first but should nevertheless be regarded with the utmost apprehension. Newbro's Herpicide

GOING! HERPICIDE WILL SAVE IT

GONEIII TOO LATE FOR HERPIGIDE

CHECKS-DANDRUFF-ACCUMULATION The first application will convince the most skeptical that NEWBRO'S HERPICIDE is the best remedy for the scalp that can be found. Many other preparations claim to be like Herpicide, but why not get the original and genuine? It costs no more and you are sure of results. The freedom of the scalp from dandruff and the increased life, lustre and luxuriance of the hair will testify to the merits of NEWBRO'S HERPICIDE. Begin the use of Herpicide now and see how quickly your friends will notice and remark upon the improved appearance of your hair. Nothing will improve one's looks more or do it more

quickly than the intelligent use of this trime-tried scalp prophylactic-NEWBRO'S HERPICIDE. The odor is exquisite and it stops itching of the scalp almost instantly.

Sixth Episode "The Spotted Warning"

E NOCH GOLDEN had never formed the habit of taking others into his confidence. And when events came into his life which seemed to leave him more and more dependent on his immediate associates he betrayed an occasional tendency to focus his nebulous resentment against that situation on the exasperatingly imperturbable figure of David Manley.

"Young man," he said, fixing his sec-

"Young man," he said, fixing his secretary with a steely eye, "I came to this section twenty long years ago, and nothing is going to change it. That woman was sent from my home and she will never enter it again."

Manley, looking down at the note still held in his hand, thought of the troubled and tear-stained face of the troubled and tear-stained face of the

troubled and tear-stained face of the girl who had so recently clung to his arm and asked him to plead her cause. And the memory of Margory Golden brought fresh courage to him.

"But this woman who was once your own wife is only asking for a glimpse of her own daughter again. Surely that is asking little enough!"

"And I repeat that I won't allow it. I have saved my daughter from the

And I repeat that I will take with a larger that I have saved my daughter from the dangers that woman's wrong surrounded her with. I have saved her from—"
"Have you?" interrupted Manley, deliberately meeting the older man's

stands. "Jules Legar."
"And what do you intend to do?"

motioned her into it. She sat watching her father as he took up the letter "What is the Spotted Warning?" he

The girl, with her troubled eyes

"It is a warning of death," was the girl's quietly enunciated reply. Manley could detect the tremor that sped thru her body. "And it means that you have been hearing from Legar

"It is a warning that comes to the person who is about to die. It is a message of warning, spotted black. It is the last word they send. And

her father, however, her eyes were "I'm going to send you out to your Aunt Agatha's on Long Island!" was her curt response as he swung about to his secretary. "And while Margory's getting her things together, Manley, you send Train, the chauf-

Manley, promptly crossing to the door, was startled to find the figure of the new footman standing close beside it as it was swung open.

The minutes later, when Manley re-

lying on his desk. At the centre of this paper stood a large black blot.
"It's the Spotted Warning." said Golden, his heavy face furrowed with

more intently at the ceiling directly above the point where the paper lay on the desktop. A momentary look of satisfaction fitted across his face as Golden turned to him with a crisp command to precede Margory to Cedarton and there to explain both the reasons for her visit and the precautions to be averaged during

tions to be exercised during that visit. "And as for you, Train," continued the grim-eyed old millionaire, turn-ing to his chauffeur, "I want you to take my daughter out to Cedarton as quickly as your car and the speed laws will let you carry her. There are special reasons for this, remem-ber! And from the moment you leave this house don't let anything

or anybody stop you!" Thirty minutes later Margory Golden, surrounded by her bags, sat back in the swaying automobile, puzzled in the tide of events. And as mile by mile swam by beneath the hurrying wheels the keen-eyed man in the driving seat found a load lifted from his own shoulders.

Yet at the next turn in the road his light-heartedness suddenly departed from that keen-eyed driver. For as he took his turn and speeded up along a dustless stretch of open highway, he saw a figure run out to the middle of the road. It was not the fact. of the road. It was not the fact that this figure stood directly, in his path that most disturbed him. It was the discovery, as he drew down on it, that this figure worse a valley hand of cloth discovery, as he drew down on it, that this figure wore a yellow band of cloth across the eyes, with a moonshaped apron falling almost to the end of the nose, that brought the redoubtable Train's heart suddenly up in his mouth. But even while that figure remained stubbornly and directly in his path, motioning for him to stop, he remembered his orders. Instead of sluckening his speed in fact he in-

the demands them!"

"The what, ma'am?" asked Train, fably soothing in the quiet going and the desk top. Manley took it read it.

"The what, ma'am?" asked Train, fably soothing in the quiet going and coming of that quiet-eyed woman, between the desk top. Manley took it overy need now of watching the road. She did not answer him at the ment, for she was staring back, try-ing to catch a second glimpse of the stranger in his strangely-fashioned domino. But he had already disap-

peared from sight.

She was startled by a quick cry of warning bursting from that driver's gory. Nothing had come to him since throat. Staring ahead, she saw that still another effort was being made to lision and the even more startling news "And what do you intend to do?" intercept them. This time it was a maked Manley, still staring down at loan with a red flag. What that flag stood for, waved so authorized as this strange note.

"Do you suppose," retorted Golden, with a slightly tremulous finger already on the bell, "that I'm going to empty my safe to every blackleg who besides about a catchword that her doubts, however, where not shared by Train, for the car was again humming with its suddenly accompany to the control of the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was a supposed to the car was again humming with its suddenly accompany to the car was a supposed to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again humming with its suddenly accompany to the car was again. bandles about a catchword that belongs to little Italy?"

As Margory quietly stepped into the room Golden stared at her for a moment and then sank back in his chair. Manley at the same time place

"Stop?" mocked the driver, as he raced on. "I'm going to stop for no-thing this side of hell!"

Yet that valiant boast was little pride so often preluding mortal disaster. For, bearing down on them along that lonely stretch of roadway they could already see a second car. The point about this car that worried Train was that it was not approachout vermiculated drunkenly from one Margory, as she leaned forward, puz-Margory, as she leaned forward, puzzing over these strange movements, realized that peril was involved in passing a vehicle so uncertain of its course. At the same time, too, she could hear from far behind her the prolonged and warning cry of an auto horn, wailing, disturbingly thru the

horn, wailing disturbingly thru the quiet air of the late afternoon. There was a crash of metal and glass, a rending of honey-comb radiators and coppered fenders. Human bodies erupted from seats, rolled invertebrate on the dusty road, lay stunned and motionless in the clouded afternoon sunlight. Among the first to sit up and stare dazedly about was Margory Golden, with road dust ground into her sunny hair, with the shoulder of her motor coat torn com-

turned to his daughter.

Calabrian brigand d out I'm going to send you

the court of the last ditch."

'Until farce is dout I'm going to send you and staining his whip-cord uniform. this Calabrian brigand farce is played out I'm going to send you into the country. I'm going to send you where you'll be well guarded and well out of harm's way. And I guess the sooner you get out there the better!"

"But where are you sending me?"

"But where are you sending me?"

"But where are you sending me?"

"sked the girl. Instead of watching. asked the girl. Instead of watching and stared down at her. And the moment she saw that pallid yet triumphant face she knew that it was Legar. She knew that he was confronting her, that he was slowly but determinedly making his way towards her. And she knew that in another moment

she would have been their prisoner

again had not a sudden and unlooked-for interruption taken place. strong hand as it caught at her while the roadster swept by, the equally sudden pain thru her bruised body as she was swung safely up into the seat of the onward swerving car. She remembered, too, the arm close about her as she lay back, weak and panting as they danced and speeded on along that lonely road. She remembered turning in their a stone gate, winding a trouble deeper than he was willing that lonely road. She remembered that lonely road. She remembered turning in thru a stone gate, winding the continuous continuous gravel driveway, Manley, after staring at the strangely spotted sheet, stared even salow. She remembered, as the mask-

The Spotted Warning means death, and it has never failed-not once!" explained Margory,

ed man at her side helped her in thru an ivory-white door, turning dazedly to him and asking who he was. And she remembered the smile that showed just beneath the fringe of the yellow domino as he shook his head and the sense of deprivation that swept thru her as she found herself once more alone. Then from the same door thru which the laughing mask had stepped, she remembered, she had seen a quiet-eyed woman come out.

And there had been something inef-

en and throbbing body on the ivory

The Tower of Destiny.

Enoch Golden, anxious and wornout, sat waiting for some further word as to the fate of his daughter Marof the girl's mysterious disappearance. Unwilling as Golden was to surrender to despair, he felt more and more that Legar, and Legar alone, was responsible for this latest catastrophe Still again he hoarsely demanded long distance, and still again he called for his sister's house at Cedarton. That quiet-voiced sister, for years all

but a stranger to her grim and gran-ite-willed brother, told him for the third time that they had as yet no news of Margory.

These words brought small consolatioon to Golden. And he would have caught even less consolation from a talk taking place at almost the

talk toking place at almost the same moment over the servants' telephone below stairs. Part of that guarded conversation was carried on by Wrench, the new footman, and much of it had to do with the very situation so disturbing the aged millionaire in the 100m above. For it was Legar explaining that a masked stranger at the last moment had snatched the girl from their hands and had apparently carried her off to some hiding place of his own. This was followed by the command to deliver still another message to Enoch Golden, with the final warning that every wire leading into the Golden, house must be cut as soon as possible. The new footman, in obedience to these orders, quietly traced out the telephone circuits to the basement and there severed the wires with a pair of soissors purloined for the purpose from Mile. Celestine's workbag. Then, watching his chance, he carefully penned a note, wording it as Legar had duly instructed him to do. Then he returned to the neighborhood of the library door, with his ferretlike alertness masked under his customary interest.

of Margory was not to be imperiled for a mere scrap of yellowed paper.

He rose heavily from his chair and crossed to the vault. From this vault he took the map, the time-yellowed square of manila about which so many of the sorrows and troubles of all his life seemed to revolve. Then calling for his nat and coat and ordering a car, he tremblingly made ready for his midnight visit of capitulation to the Central Tower Building.

While these events were taking place.

Any retort the older man was about to utter remained unspoken, for at that moment a soft-treading footman entered the room and crossed to the darons allegare where eyes, with a moonshaped which a salver of mail in his hand, Manley, looking up, eyed that servant resentfully, and with a touch of suspicion. This intruder, he pronaptis surmised, was a new figure in the household retinue.

"Be so good as to knock when you offer the so good as to knock when you offer the so good, sir," answered the new footman, scarcely raising his eyes.

"H'h!" Golden scoffed, looking up to the letter which he had just opened. "Since you're so ready to asic favors, here's another friend to asic favors, vou see he demands them!"

Any retort the older man was about to the infigure wore a yellow band of cloth at monthshaped, where membered, she had only the this figure wore a yellow band of cloth at monthshaped, she remembered, she had ocross the eyes, with a monnshaped the even whith a monthshaped the eyed, woman come out, at quiet-eyed woman com

abouts and had expressed his intention of tricking the chart out of its present owner's hands.

Ten 'minutes of frantic efforts at a telephone booth in the nearby village, however, convinced Manley of the impossibility of getting in touch with Golden by wire. Every effort to reach the house by that means proved fruitless. And time was precious.

was precious.

Manley's first thought, in his dilemma, was to commandeer some nearby car. Yet nothing but a racer, he remembered as he snatched out his watch, could get him to the Central Tower Building in time, and racers, he bitterly remembered, did not grow on bushes.

His next thought, however, took him tearing down the village street like a madman. For the name of "Cedarton" had brought into his mind yet another name, the name of "Bobby Evart." And Bobby Evart, had his workshop and hangar on the southerly outskirts of that village. He had been an early volunteer for the federal air scouts, and at San Diego had twice broken his own altitude record, established at Pensacola, and was now immured in the mysterious task of fashioning a stabilizer for monoplanes—a stabilizer, Manley remembered, which was receiving sympathetic attention from certain navy officials in Washington. And the intrepid Bobby, he also remembered, seemed the one person who could still save the day for him.

Instead of finding this same intrepid Bobby poring over him prints of stabi-

med an onte, wording it as Legar had duly instructed him to do. Then he returned to the neighborhood of the library door, with his ferretilke alertness masked under his customary interesting ansked under his customary interesting and the whole cornice line is strung with an interest of the discovered the telephone wires to be dead and went storming thruis misace of deter that Wrench realized his chance had come. Slipping into the deserted library on the pretext of adjusting the rugs, he stopped before the rosewood natable, hesitated a moment, and then jiffed the heavily chased lid of Goldens; cigar case and dropped the note inside. A moment later he had left the room, in mobal and coment later he had left the room, in mobal and the wisdom of Wrench's movement. For Enoch Golden, striding restlessly back into his library, sank with a sigh of weariness into the armchair beside the rosewood table. For a moint ment or two he stared abstractly and unfolded it. The continuation of the heavily chased lid of silver. His fingers, instead of coming in contact with a perfecto corseted in gold, hustled against a sheet of paper. Automatically, he picked it up and unfolded it. Written on that mysterious sheet he tound the following:

To fight me furner in this is useless. To fight me furner in this is useless. To fight me furner in this is useless. It will soon be worse than useless. It wil

the Margory,

of the control of the

it had become the emblem and pennon of a desperate cause.

And Manley, as he climbed with Legar's stalwart emissary, fought for it. Nor was his opponent one to be despised. The two men fought along the crest o' that midnight tower as two mountain lions might fight along the brink of an Andean precipice. They fought with gasps and grunts, with strange guttural sounds, with teeth bared and face distrated by him to the blows that were given and taken, unconscious of the fact that the very paper for which they were righting had already fallen to the cupola floor, and from there had been blown by the north wind to the farthermost edge of the cornice circling the stone corumn supports.

Golden himself was already reaching for that paper when Legar's confederate caught sight of it, broke from Manley's grasp and dove bodily for where it lay. Manley, a second later, followed him. There, half astride the balustrade of coppered wood painted to look like marble, the fight was renewed.

Then a second breath of night breeze, sighing thru the tower top, carried the paper slowly along the cornice edge. It was Legar's man who saw as it moved. He wrenched away; twisted about and caught at it as it fell. But already he was too late. It lifted with the wind, drifted and eddied slowly about in the

moonlight and floated swayingly down into the darker canyon of Broadway, where it was soon lost to sight.

But neither Manley nor his enemy saw that descent, for Legar's man as he lurched suddenly forward, threw all his weight on the outstanding copper cornice, painted white to look like marble. And it was a cornice made only for ornamentation, and not for support. For its fast, tenings surrendered to the strain of that suddenly imposed weight and the buckling segment of copper swayed outward as the desperately clinging fingers clutched at its edges.

Manley, hanging to the balustrade with one arm, reached out to grasp that buckling strip of metal to which a helpless man was hanging sheer over space. He diught at it, even as Golden caught at his straining shoulders to hold him steady. But a law, stronger than the will of man, seemed to suck the metal slowly, inevitably, out of the clutch of his tired fingers. Then the last fastenings, gave, the strained and twisted sheet-metal tore slowly away, and the black shadow of a man fell like a plummet to the iron and stone of Broadway, 300 feet below.

#### **HOW A SMALL SUBURBAN GARDEN** WAS MADE PROFITABLE PROPOSITION

City-Bred Mechanic Who Kn ew Nothing About the Work Met With Considerable Su ccess by Keeping Steadily at

wilderness, but as my wife was elated with the purchase their comments did not feaze me. The following spring we started to build a two family house on the north lot. The plot runs east and

mer and during the fall thirty rose bushes, six peonies, twelve hardy thlox, some iris and a few larkspur and foxglove were planted. In the spring two dozen blackberry bushes and some rhubarb were set out to-gether, with two slips of the English gooseberry received from a neighbor and a few dahlia roots. The following year six grape vines, four varieties, were planted, which produce plenty of

I have planted and tried many other hardy plants and shrubs with some success, but now I specialize on the rose, peony, phlox and iris. They require little care and produce an abunflowers last as long when cut. At presents of the prices by seedsmen. No plant flowers with less care and trouble, and few flowers last as long when cut. At presents of the prices dance of flowers. Some of the small ent prices gardeners having the room fruits need constant attention in early | will do well to make large plantings of spring; the gooseberry is attacked by a gladioli,

WENTY-TWO years ago last fall I secured two yacant lots. Some of my friends called the place a legency, but on my wife my secured two watch is kept the bushes will be eaten up. Hellebore to which a little flour legency and the secured two watch is kept the bushes will be eaten up. watch is kept the bushes will be eaten up. Hellebore to which a little flour has been added is the remedy. Apply it with a tin shaker in early morning. The grape needs plenty of nourishment, and to supply this I keep a large sheet iron pot filled with water into which I put the bones from the kitchen table and apply this at the base of the vines once a week. The blackberry re-

To guard against these dangers, and others space does not permit describing, nearly every village and almost every house is guarded by a "ju-ju." Our illustration shows a typical domestic "ju-ju." Its composition is most mysterious. The ritos in setting it up are even more strange. While the natives understand every part of the rites, they are really incomprehensible to white men. "Faith" is indeed necessary for "ju-ju."

Nitrate of soda and sulphate of ammonia are the two nitrogenous manures most generally used. With these on hand for use most other fertilizers may be dispensed with, particularly now when potash cannot be obtained.

Gladioli are offered at very low

PURITY is the first consideration in the brewing of O'Keefe's famous beers. Only best barley malt, choicest hops, and filtered water are used. No other ingredients enter O'Keefe's Beers.

They are the best in Canada

Dublin in Ruins a Sorrow to Tourists

Dublin in ruins will be a sorrow to thousands of tourists. There are few cities where so pleasant a holiday can be spent. During the court season, Dublin is the most fashionable of metropolises, and there are traditions about the drawing-rooms and balls, which do

not give way to London itself. In the century before the last, the entree at Dublin was even more envied than at London, and for style and beauty there was nothing finer in Europe. These things passed away to some extent with the act of union, when a mush-room aristocracy was built up, but "the ould gentry," as they are known in the country, are still jealous of their prerogatives, altho poverty and the Land Acts have shorn them of their ancient glories. Dublin had an artistic reputation in those days, also, which made it necessary for the opera, the play, the poem, the dancer, the debutantes of whatever art, to pass the critical standards of the Dublin wits before they could be regarded as a success. It was in Dublin that Handel produced his oratorio, "The Messiah," and perhaps no better testimony could be had to the value of Dublin taste. The old Theatre Royal, which was burned down thirty or forty years ago, had the biggest stage in Europe with the exception of La Scala. Immense spectacles were put on in the old house. Stories are told, for example, of a production of "I'Etoile du Nord" in which, on the stage at one time were four military bands, as well as the regular orchestra, while hundreds of actors and singers found plenty of room. Dublin was planned on a large scale. The Phoenix Park is an immense and beautiful area. Sackville street is the widest street in Europe unless Unter den Linden is broader. Its two cathedrals, Trinity College, the great museums and other points of interest make it attractive to students. Best of all, for visitors, there are many charming watering places near at hand, while races and sports of all kinds are always going on. For quieter people the country around, the Dublin hills, the Wickiow scenery, present the most exquisite charm, and in summer the weather is generally delightful, and the rainfall about the lowest in Ireland.

These are the days when the careful amateur gardener goes to the store and buys himself a spade several sizes too large, a rake ditto ditto, an unnecessary shovel, a ditto hoe, and any other tools that he may need to dis-

How the Amateur Gardener Goes to Work

cover are unnecessary in a two by four backyard plot. A good spade is the most necessary tool, and every man must suit himself. Digging comes to have a certain fascination after the first stages of calculation have been passed as to how many yards can be dug for how many blisters. The women folk admire the man hugely who can raise callouses on his paims and dig for half an hour without quitting. After a spade, a handy rake is essential. After these, a trowel and a three pronged fork, with a handle about a foot long, are all that non-professional people need to put in the seeds and the weeds and the vegetable and the other marvellous things that find lodgment in a two by four garden plot. But with these an immense amount of glorious entertainment can be had. The wise man does not plant many seeds; just enough to give himself the pleasure of seeing them come up. He goes to the market and buys a few boxes of bloomy things and they better than anything he ever sows. His pet plants will be ruthlessly cut down morning after morning when he comes out to look at them, by some secret enemy that creeps and crawls by night, and curls itself up in a loathsome looking ringlet during the day an inch or two under the ground. He will spend hours wreaking his vengeance on these unclean beasts. When he gets tired of these delights he may go in, after a season or two, for a perennial garden or a bulb garden. It can all be arranged in one spell, and then year after year, for all a lifetime, there is nothing to do but watch the beautiful things come up, each in due time in their season, with no need for care but to prune a little, or keep away the weeds, and clean up the waste of autumn. Henry Kingsley writes a charming paper on a bulb garden that never ceases flowering

Canada the Country of the Twentieth Century

"Canada the Country of the Twentieth Century," is the attractive title of a new description of the Dominion by Watson Griffin, issued by authority of Sir George Foster, minister of trade and finance. Not since 1898, perhaps, when the handbook was pre-

pared for the visit of the British Association, has anything so complete and authentic been published. Mr. Griffin is a deft and well informed writer and he manages to acquit himself so as to be interesting, as well as informative. After a general introduction a section is given to each of the provinces, or groups of provinces, including the northwest and the Yukon, and separate chapters are devoted to the great lakes and canals. to the fisheries, to the water powers, to the manufactures of Canada, to the forest products and woods, and to the farm produce and food. The whole volume is copiously illustrated, and maps of the provinces are supplied and a large map of the Dominion, and the 265 pages are handsomely bound. The book must not, however, be regarded as a traveler's handbook. It will serve for this, but primarily it will appeal to the manufacturer, the investor, the settler, the man on business bent. As a geography book for grown-ups, it perfectly fills the bill.

A professor at the University of Toronto has been practising the principle of "dog eat dog," with what he describes as surprising effects. He cut up dogs and fed them to dogs, and the dogs that were fed were not cut up Another Professor? at all. This may sound involved in English

Would This Professor Eat

ears but it is classical American. The dogs that ate dog flourished on the diet, and thrived so well that anybody who wishes to raise dogs will have to raise more to feed the dogs that are to be raised. The professor explains that the protein in a dog is more agreeable or wholesome or nutritive to another dog than any other sort of protein, and therefore dogs, fed on dog meat thrive best with those proteins which are identical with their own protein. Up to this point, it is probable that no one will be greatly disturbed over the discovery, but when the further application of the principle is considered it will be seen that there are possible developments which may call for protest. The professor deduced from his experiments that it was a mistake for a man to eat vegetables because he could not get protein from them identical with his own. There might be exceptions to this in the case of cabbages, say for some people, or prunes for others, but the deduction is unavoidable that if a man is set on getting identical proteins he would have to follow the example of the dogs and eat his own kind. Should the professor develop a desire for longevity and exceptional hygienic conditions, he may wish to devour another professor every now and then to keep himself in condition. The other professors will keep a watchful eye on any gentleman with a craving for professorial protein and will be careful not to be left alone with him in his laboratory.

Dad with a sigh.

Pre-Season Green Goods.

UNT Lucy tells me that she well remembers the less and juiceless and packed solid with seeds. than that, she says the vines had a rank and uninviting smell that made some folks sick. Today the tomato is next door to the seedless class and it is full of rich juices and "meat." The botanist, the 'hy-bridist, he scientist, the crank, the dreamer, hath worked this amazing miracle! If we could only find out who it was conceived the idea of making the rank love apples of the mid-nineteenth century a delicious and

Now if someone would turn his attention to that homely old "first inhabitant," the pink and piquant rhubarb, there would be something doing. Whoever makes it possible for us to pluck a stalk of rhubarb and eat is like a "stick" of candy, or a banana without

Why can't people wait for the real thing? There there was a wide margin for possi- shrinking from evil, it will never for-

like Jonah did an' he'll falter at the stoopenduous task before him an' he will actilly look about him fer a rassle with a quail on toast when all the time our good old fashioned sensible, level headed stomachs are hollering for tripe and onions. We buy new potatoes at fifty cents a quart when the old ones at the same money per peck are far more palatable and

Now let us sample these imported strawberries. Um-m-n-n! Brace up—this is no time for tears. Talk about rhubarb! This strawberry is a delusion and a ness and sensibility, again contraold rhubarh!

in triumph the girls will get up strawberry festivals for them. Each hero will be given a dipperful of what they call strawberries and cream! Let us call a spade a spade and shame the devil. Strawberries. Curds! Aunt Lucy's Holstein were to eat a quart of these imported strawberries they would sour the lacteal fluid in her udder and we could only get the curds by performing a surgical operation on the poor inoffensive

Let us hang up a prize for the man who puts rhubarb into the same class as the tomato and the banana and generations yet unborn will rise up and call

"There's pippins and cheese to come!"

The Bearers of Tales to Tell,

NE thing that has impressed most of us in reading letters and personal experiences at the front, is the modesty of the writers. One feels that "But, Pa!" contended Ma Sevenpiper, counting her to tell of the "Pride, pomp and circumstance of glor- of dignity, but her straight draper-"the church hasn't missionaries to spare fer lous war," but they are shy of being mistaken for braggarts—anyway, the true soldier doesn't talk, he of classic case and uprightness."

In years to come we will have to depend on a certain lingualism, don't ye. That's not what's wrong with type of soldier, who was never near a battle and who Quebec. That's not what's makin' her sore an' was never a hundred yards outside of Canada in his froachoous. Fer over a gineration this pious an' life, to tell us all about it and he will describe his ac-Chrischin province he's been sendin' hundreds uv mis- tions, his emotions and his feelings at Mons, Festubert,

Zulus, Chinese, Hottentots, Mohawks, Cannabulis an' of these people really don't deserve the name. Liars length, in a deep, rather harsh voice,

pertinence an' cheek an' they resent it an they im talk in a butter, castal way of the sights relief fer ther felin's in' the langwitch question. Now, he saw in Ottoway, Frisco and Li'l ol' Noo Yawk. He are in witches' garments! Why do you not keep to your white? Why do you not keep to your white? Why I have only space for one more explosions, but I have only space for one more explosions. Ma, if we'd withdrawn our preachers from Quebec, may have a flask with him filled with a transparent Jordan, or Jacob's well.

As a matter of fact, Clate, was no further away than the lumber camps where he was assistant cook and "Pa," said Ma Sevenpiper, "you had order sort over wood butcher. He got that water out of the Desjardin's Canal or the Humber on his way home. After a time Clate will come to believe his own

yarns. He is passing thru the pupa state. The objectionable and greasy larva in a mud hole develops sooner or later, into the brilliant and classy dragon fly. So it is with Clate—he ceases to be a liar and first tomatoes. She says they were no great shakes. They were hard balls, practically pulp- to lick all creation. They got to believe that they becomes a fictionist. I have met enough old veterans really were there. As a matter of fact, they were at home, bravely plowing for buckwheat on that historic June day!

And that is the reason that when we die we are not permitted to return on any consideration whatever. The Lord, He knows us all right, all right. If we were allowed to return we would sit around telling cock and bull stories about Paradise, which would put the Land of Pure Delight in the same class as Kowgash, edible fruit, he would have a niche or a tablet in our Cobalt, Porcupine, Bullocks Corners, Medicine Hat, et al. Worse than that, we might run the place down and declare that it's no place at all for white men, just as thousands of returned travelers have said the same about Canada.

"Ferdinand Mendez Pinto was but a type of thee thou liar of the first magnitude!"

CRUSTS AND CRUMBS By Albert Ernest Stafford

secret teaching on cosmogenesis and anthropogenesis, "alone of all the books known to the world explains and correlates all the facts of the universe as far as they are known to mankind. I say this," states Mr. Scott, "after an almost continuous thid of The Secret Position of the secret part of th study of The Secret Doctrine for twenty years, as well as some of the greatest books of the world. And mine is not a solitary opinion. Thousands of the brightest minds of the age have declared that The Secret Doctrine alone of all the books of the world is a synthetic and harmonious blending of all human knowledge." Some time ago I came across the novel, "Affinities," by Mrs. Campbell Praed, in which there is given an account of Madam Blavatsky under the name of Madame study of The Secret Doctrine for

"Her reply seemed partly to amuse, partly to please, the strange woman. She put out her thin, bird-like claw, upon its forefinger a ring engraved with Oriental characters, and patted holy."

WHITE LOTUS DAY is celebrated on May 8 every year since 1891 in memory of Helena Petrovna Blavatsky, whose death occurred on that date. Her claim to the attention of posterity is her production of "The Secret, Doctrine," "The Voice of the Silence" and other books. These are derived from and founded upon the Archaic Records which have been kept since writing was introduced to the "Fourth Race" of man at the beginning of the Miocene period eight million years ago, when there existed on the continent of Atlantis the greatest civilization the world has seen. In the words of my old friend, Mr. William Scott, now of Point Loma Homestead, it cannot be denied that "The Secret Doctrine," which contains an outline of the secret teaching on cosmogenesis and anthropogenesis, "alone of all the books known to the world explains

#### WHEN OLD HIGH WHEEL WAS MASTER OF ROAD

Some Interesting Facts Concerning Pioneer Bicycle Days and Some of the Pionee rs Who Today Recall With a Smile the Vogue of Thirty Years Ago.

BY EUNICE GUNN RAMSAY.

electric cars and motorcycles the reign of the old-fashioned highwheel bicycle, with its extraordinary rainly shape, seems curiously remote. It is over 30 years ago since the first bloycle was ridden in Canada, and it is in interesting fact that the pioneer of these first bloycles was also the first man, in Toronto at least, to own a motorcycle, which he helped to contruct, and later the first owner of an automobile. The very first bloycle to tippear in Canada was ridden by a Totonto man, Dr. Doolittle, who then fived in Aylmer. It was a home-made machine, made by his father, with iron wheels, a backbone constructed of a terms which save a which were capable of great speed.

The club runs were also popular features, hundreds used to line up on evenings through the summer for a spin thru the city, which was another favorite route, even the the old cedar block pavement, with its treacherous of these around-town wheeling parades. The machines were often decorated in the evenings with Chinese landary. see of gas pipe, a piece of wood for saddle, and two wooden blocks for lals. On this marvellous piece of chanism young Doolittle rode 50 miles, and so great was his excitement to try the trip that he got up at one h.m., and by sunrise had completed three-fourths of his journey from Ayl-

mer to Strathroy, but the doctor re-calls today that it took practically the rest of the day to make the last quarter from St. Thomas on, and he was so stiff for many days afterwards that a standing position was preferred to anything approaching a seat. This journey of 50 miles took nineteen hours to accomplish.
Young Doolittle's second attempt a a bicycle construction was made the following year, when a musket barrel was utilized for the backbone, and rubber tires replaced the iron rims. In

that year, 1876, the first bicycles had been imported from England to Philadelphia, and a picture of one on exhibition there, was shown in The Scientific American; from this picture he made his second machine, which was a thing of beauty compared with the former one, and the hard rubber tires were considered the last possible improvement. The weight of this machine, it is interesting to note, was forty-eight pounds, while the imported machines weighed from sixty to seventy pounds. A little before this, and a few months after his visit to Strathroy on the famous iron wheel, young Doolittle was invited to pay a teacher had constructed a machine of wood, and wished to compare notes. He went up, and the two tried each other's machines, and ran a friendly race. The young fellow was T. C. Robinette, of Toronto.

Harry Goulding was the pioneer cyclist of Toronto. Two Bicycle Clubs,

Two famous bicycle clubs were in existence in those days, representing all the young athletes of the town. The Toronto Bicycle Club and the Wanderers, together represented a very large membership, and there was much good-natured rivalry between them. The social feature, too, of those oldtime clubs was very strong, and the good feeling and close fellowship which existed between all members has left the pleasantest memories among those who are living today. Those were the days of really good sport and camaraderie. In the event of a wheel-man coming into Toronto from any outside place, every member of the were such a novelty, that people were rider dropped exhausted.

N THESE DAYS of motor cars, centre of the city out east to King ston road. Members would meet each morning in Queen's Park for this "spin." The old-time bicycle meet was wheel bicycle, with its extraordinary a popular affair that attracted hundreds to the old Rosedale lacrosse wheel depth of 48 to 54 inches, and undreds to the old Rosedale lacrosse grounds, and some wonderful racing gainly shape, seems curiously remote. was done on the "big-and-little"

#### ROD AND LINE ENTHUSIASTS WILL HIKE TO SHADY NOOKS

Some Have Already Had a Turn at Trout and Are Eager for More, While Others Have Paraphernalia in Shape for Summer Vacation, or Perchance an Odd Week-End

BY HARRY H. JOHNSON.

ISHING or Angling? Which do you follow? Are you a devotee rod, and the line that has to be wrapped eround your finger several times before you can show its fineness to your ordinary friend? If so these few remarks will appeal to you, not at all or even worse, as common. The fact romains, however, that the vast majority of those who spend their days off, or even their vacations in a piscatorial pleasure merely "go fishing," and get just as much pleasure and more fish. Despite the many articles on "Dry Fly rishing," and "wast when dry.

The line too, is carefully examined, and if there are signs of wear or dry rown, and other cities previous to lust Monday, put their trust not in the expensive lure that one sees in the sporting goods window and named in the catallogs with such enticing names, but in the dynamic words, and the lines with such enticing names, but in the dynamic words, and the catallogs with such enticing names, in the crawfish.

Throut Ontario, May-day opens the trout fishing season. The old rule of thumb that is passed down from father to son among followers of the, rod, is that trout may be caught only in the months whose names spell without the letter R.

Long before this date, however, you may find the enthusiastic wearing a happy shile and old togs, going over his tackle words have a devoted the feel of a rod in his hand, and what thrillist is ends up the nerves of his arm. Often he may be seen in the

will impatiently wait the time for de-parture to his favorite streams or ponds. Unless you are an intimate friend of his, do not ask him where lie goes, with any hope of getting exact information. He wil make a broad gesture with his arm and say he goes down East, or up North, or will put you aside with a general direction that will merely leave room for conjecture.

Out and Away.

Last Saturday and Sunday the different trains leaving Toronto took many of these followiers of the speckled beauties away from the humdrum life of the cities, while scores left at all times and by every road in motors, some even going along the lake to the mouths of different streams by launch.

-Boys Who Would Otherwise be Allowed to Roam at Will, Taken in Charge.

GREAT REWARD FOR WORK

Numbers of Those Guided in Past Are Fighting for Empire in France.

BY EUNICE GUNN RAMSAY. OES this 'Big Brother' idea work?" said one of the men interested in social reform, "Isn't it rather too much to expect of even stances that a man will pledge him-(self to look after a mischevious boy indefinitely? It seems splendid in theory, but does it work?"

This question was in turn put to a prominent member of the Big Brother movement, and his reply was: "Big ideals always need big hearts and minds to carry them out. We endeavor to get those men as 'Big Brothers' who will faithfully keep to their pledges, and a glance at a few of the results will tell how far our aim is

Undoubtedly this is a work which calls for volunteers who are spiritually minded, inspired with high ideals, and

some spirit of self-sacrifice.

During the past two years over 1400 children have received care and attention thru the Big Brother movetention thru the Big Brother move-ment; judicial advice and financial aid has been given where necessary, and in many instances positions found for the boys. In fact, with regard to the finding of situations, quite an em-ployment bureau is carried on thru the agency of the various Big Brothers, and the suitable placing of boys forms quite a feature of the extension work

commenced this year.
Creating public opinion regarding all reforms that affect boy life, recommending improvements in laws with regard to children, and the formation of healthy camps, and instructive classes are all splendid branches of the work done by this organization.

Not all little brothers are court cases; there are many who have never cases; there are many who have never been inside the juvenile court, but who need a little guidance and assistance.

Again, there are the boys who have been caught in some small offence against the law, such as breaking a window, climbing into forbidden ground, or one of the various boyish tricks which you did when a boy (only Most of the good trout streams and ponds in the neighborhood of the city are now either in the hands of the different fishing clubs, or else permission must be gained from the owners of the land thru which they run, and toll paid on the catch. This toll runs upwagd from twenty-five cents a pound.

Those who have the privilege of fishing in these restricted waters are Continued on Page 12.

Tricks which you did when a boy (only you were never found out): But for the boy who has been found out, and the boy who is not there is the same need of a helping hand, and how often the most mischievous and irrepressible boys turn out to be brave and noble men.

Many of the court cases helped reveal most pathetic circumstances. A boy of 14, charged with stealing, was Continued on Page 12.

WITH the summer season fast approaching, the thoughts of jaded city dwellers fondly turn to bungalows, stretches of blue lake water, and all the idle delights of August resorts. Muskoka hotel companies are already issuing their most seductive invitations, and tearing down. Practice is Abhorred. Protests have mounted up for years against the practice of some Toronto citizens, whereby family cats were turned loose upon the Island at the season's end. It may be expected that similar agitations will originate in the porth seductive invitations, and tearing down the barricades from windows and doors. A few hardy Toronto citizens

similar agitations will originate in the north.

The other evening the writer was remarking on the marked decline in the number of partridges to be found in the Muskoka district. It is not many years since they were so numerous and so docile that an observer stationed beneath a tree could count, a half dozen on the limb above. "Blame it on the cats," said one who leaves early in May-for the summer cottage. "If you could see the droves of them that come out of the woods you would marvel that any living thing could survive."

People who are fortunate enough to possess permanent holdings in this continental recreation district, were wont until recently to rejoice in the

wont until recently to rejoice in the absence of the rat. Such a creature had never been known. The good days have passed, however, as far as Lake Joseph is concerned.

One day a disreputable old tag moored at one of the docks, and stayed overnight. A few days later a rat was seen, and after that a whole family connection seemed well established. The rodent now is an all year visitor. No doubt his presence makes the tourist feel much more at home. proved menacing.

It would perhaps be well to state that these creatures do not belong to the regular genus known as wild cat. They are really domestic pussies which have been abandoned, and have returned to the untrammelled life of the forest. Hotel-keepers in the district embracing the Muskoka Lakes tell of avenous bands of them swarming about the settlements in the spring, and yowling ceaselessly thru the long rainy nights.

The Northern environment seems to promote a growth and ferocity in these creatures, or else they are descended from a hardier Berserkian type. A good lady of Toronto knew that one was making her cottage the object of special attention, and was considerably troubled about it, being alone with a femily of youngstars. Finally, she about the settlements in the spring, and yowling ceaselessly thru the long rainy nights.

It is a very simple matter to trace this condition of affairs to its source, and little credit is reflected on a great percentage of those who annually maintain summer cottages. An incident that was personally observed will go a long way towards explaining affairs. Those who are familiar with lakes Rosseau and Joseph will remember the narrow cut thru which the vessel passes at Port Sandfield. Last fall when the Kenozha was coming down on the last trip of the schedule, a well-dressed woman appeared on the upper deck carrying a lasket. A moment later a cat was observed hurtling thru the air. The poor creature landed in the midst of a strub, scrumbled out and raced frantically into the woods. Thus madame bade farewell to her family pot.

Multiply this instance eight or ten times, and an idea may readily be gained of the origin of the marauding swamps.

#### "Believe Me, Xantippe"—This is The Funny Hold-Up Scene With Just a Few of The Sprightly Lines

Dolly and George in "Believe Me, Xantippe," to be presented by the Robi ns Players at the Alexandra next week.

Not the least interesting of the many elements of appeal possessed by Fred Ballard's widely heralded comedy success, "Believe Mc, Xantippe," which the Robins' Players are presenting at the Alexandra Theatre next week, following its successful run at the 39th Street Theatre, New York is the sprightly and witten. New York, is the sprightly and witty dialogue of the play, a few specimens m which are given here: MacFarsland: "Where are my shirt

WEEK OF MAY 8

Matinee Daily REAL BURLESQUE

thing and feel that you can win in any undertaking, that's what they call a "Hunch."
We're giving you the inside dope this week, all right, when we spill the chatter that the Radium Girls' Burlesque will sure cross the burlesque wire far in the lead of any up, so you want to have a little coin down when they go to the post waiting for the word. It's a cinch that when they speed away you'll watch them lead all the way. That's the kind of speeders you like to look at, and you'll find plenty of real winners on the card. The Star's the one place in this burg that gives you the best in burlesque, so if you want to keep up with the times just slide in this week. Always something doing at the Star. dertaking, that's what they call a "Hunch."

RADIUM GIRLS

"Preparedness" is the real topic of the day, so dust in "prepared" to see a regular cluster of beauts who look the part from lid to taps. Joe Freed is the noisemaker with this company, and he can come through with the salve stuff. Mae McCrea, the stately leading doil, is some peacherine, and Erma Windsor has a figure that compares with Venus, and Davida Hawthorne is a miss wno is a mighty choice looking baby. The Chorus bunch is so classy that they put in the shade a lot of other organizations, and their fetchy attire will show you some of the advance styles—the kind of gowns you only see in your dreams. Gus Arnold, Arthur Angel and Jim Peck form a trio of fun merchants with all staple goods, and those who like to give the glances to real dolls will find the Radium Girls the smoothest in the burlesque gume.

As an extra attraction the management have secured those Toronto boys, "THE SAXAPHONE FOUR," a quarte te of clever instrumentalists.

THE ONLY BURLESQUE SHOW IN TOWN

NEXT WEEK -- JOLLY CIRLS -- NEXT WEEK \*\*\*\*\*\*\*\*\*\*\* 'Radium Girls'

In the Radium Girls burlesque company, which opens a week's engage-ment in Toronto at the Star Theatre Monday afternoon, there are five Canadians playing headline parts. Erma Windsor, the winsome soubret, is a Canadian girl and was born in Montreal. The Saxa Four, who have a finished instrumental act, are all residents of Toronto, and a very interestng feature is that they are making their first stage appearance at this popular burlesque house next week. Those who have attended recruiting meetings in the different parts of the city have no doubt heard the wonderful musical act of this clever quartet.

Thirty attractive-looking blonds and brunets round out the gingery chorus of Radium Girls. Without a doubt this chorus is one of the best singing and hose who have attended recruiting

They play all kinds of instruments and their act lasts for fully twenty minutes. At the close of their engagement, a week's, next Saturday night, the Saxa Four will leave for New York City, where they are booked to go out on a lengthy vaudeville

Mae McCrea, the big girl with the big voice, is said to be one of the best burlesque prima donnas that played on the Independent wheel last season. Those two irresistible "blues drivers," Joe Freed and Arthur Angel, round out the fun brigade. They, ac-cording to advance notices, have many new and funny eccentric ways that should appeal to the most cynical

The Saxafour, added attraction with "The Radium Girls," Star Theatre.

# "BATTLE CRY OF PEACE" IS REAL WAR ON SCREEN

Spectacular Preparedness Film Is at Massey Hall This Week for Limited Engagement.

THRILLS BY THE YARD

Stern, Crushing Indictment of Those Who Cannot See the Necessity of Being Ready.

The tremendous photoplay spectacle 'The Battle Cry of Peace," has created the profoundest of sensations on ies, are doing likewise. two continents-in Great Britain, as well as in the United States. It will be presented at Massey Hall twice daily only, all next week. War is the me of "The Battle Cry of Peace." The picture shows a war not at wire less and cable range, but well with-in the corporate limits of New York.

There are thrills by the yard, hor-rors slowly drawn out inch by inch, and not a few feet of good comedy. The achievements of the camera are remarkable. The company which was employed in making "The Battle Cry of Peace" must have left a devastated region behind it like Belgium in the path of the Germans. A train is wrecked merely to point a passing argument for the hero, and building after building goes down under heavy gunfire or bombs from the sky.

Enormous crowds are employed in the scenes of panic, and big masses of troops pictured as they charge in the face of shrapnel. There is also a large scale naval battle and some decidedly interesting views showing the manocuvring of submarines.

The announcement of the beginning of hostilities is made in a sensational newspaper, and one is inclined to doubt the authenticity of the report until a shell comes in the window of Harmony Hall, and breaks up a peace bombs, too. Down go houses, sheds, bridges, and all in the face of the devastating fire. The guns of the har-bor forts are shown in action, but they are outranged by the fleet of the enemy, and the army of "Emanon" lands in New York,
With the foe come the horrors.

drama, and Mr. Vandergriff, the peace advocate, are shot. Harrison subsequently recovers in miraculous fashion only to die of a bayonet thrust. Virginia Vandergriff shoot the enemy spy, and in the most hor-rible scene of all. Mrs. Vandergriff kills her two daughters to save them eral scenes of tremendous intensity, and of appealing and almost appalling power. But if the success of the campaign for preparation rests upon scaring people into a realization of the needs for defences, we can stand any amount of power and intensity. Pre-paration may keep our horrors on the screen. For the the warning is primarily directed to the United States, yet it has its lesson, too, for other countries, including our own. In this tense, tremendous, and thrilling drama there is the sternest and most persons or peoples—who cannot, or will not, see the handwriting on the

#### Forbes-Robertson's Farewell

After forty years on the stage, I have said my farewell. Thirty years ago I came to America—with your beautiful and adored actress, Mary Anderson. I have since visited ospitable country many times and am happy to count among my closest friends many of your people. My wife, Gertrude Elliott, who is not retiring from the stage, but may, I hope, have the honor of playing before you again, was one of your countrywomen. Why, then, should I not feel deeply indebted to America, when you have given me both encouragement in the pursuit of ideals and aid of a practical nature? It is with a feeling of a very real sadness appy to count among my is with a feeling of a very real sadness that today I leave your shores, never to return again as an actor, but I feel that the time has come for me to step aside. The younger generation is knocking at the door, and I am happy to feel sympathy for these young men and women, on both sides of the ocean, who stand on the threshold of their careers. Theirs will be a great work, a great opportunity, for a new era of achievement is about to dawn for the stage. Better plays, better acting, and better producing mark the theatre of today than at any time in the past. I am very happy to see a closer bond constantly growing between the English-speaking races, and it is fitting that the theatre should help to make stronger this relationship. At the present time, when the Shakspere Tercentenary is in the mids of the public, we can the more rejoice in our mutual ownership of this greatest of all dra-matists and poets. My message to the public is to believe in the best, and to give encouragement to ability wherever it is shown, but of this I feel certain, for you possess that ready sympathy and appreciation which is as delightful as it is perhaps rare, I am proud to have given my life to the stage, and the little I have been able to contribute to its advancement gives me great happiness to think of as I bid farewell forever to a calling that is

both great and noble. Tho I shall never again appear before you as an actor, I would rather say, not farewell, but "Good-bye and God bless you!"—Johnston Forbes-April 29, 1916.

dancing troupes ever assembled on a burlesque stege. Almost any one of the chorus can step out in front of the lights and lead the remainder of the company in any of the songs and marches. The costumes are many and are of the latest stage creations There are two carloads of scenic effects with this production, that is for beyond the average burlesque.

#### Stock Stars Will Be Seen in "Meadowbrook Lane" at Shea's

Noel Travers and Irene Douglas Present a New Playlet by Edgar Allen Woolf—They're in Vaudeville After Graduating From Repertoire Engage-

Between vaudeville and moving pictures, the legitimate stage is having a hard time of it. Its ranks are being depleted and not only are the stars finding new firmaments but the backbone of the theatre, the supporting companies, are doing likewise. Two players, who, until this season have figured prominently on the legitimate stage, have just formed a vaude-

mate stage, have just formed a vaude-ville combination that is proving ex-ceedingly successful. These players are Noel Travers and Irene Douglas, who are seen at Shea's Theatre this week in a play by Edgar Allan Woolf, called "Meadowbrook Lane." Both Mr. Trav-ers and Miss Douglas are stock stars of prominence. They have played with some parts of this moving picture perhaps lack supreme artistry. But that is the way of the way, as it is the way of life.

"The Battle Cry of Peace" is frankly a propaganda play for preparation, and as such it is always earnest, always persistent, and at times tensely eloquent. The central theme of the necessity of armament is always in mind.

There are thrills by the yard, horpore slowly drawn out inch by inch.

rene Douglas, who appears at Shea's Theatre next week in a charming

of many prominent people. More than £3000 (\$15,000) was realized for the Red Cross Fund.

King George summoned F. R. Benson, the actor-manager, to the royal box and knighted him in the costume of Caesar. The King used a sword procured from among the properties of the theatre in conferring the knighthood in the historic playhouse.

The incident was dramatic. Upon the actor being summoned before His Majesty, the King made him a knight by striking him on the shoulder with the theatrical sword.

Fuller Mellish, heretofore rather a socks, tobacco, cigarets, cigars; in bare legs and wears a nightshirt. And fact anything that would tend to cheer he used to play Shakesperean roles.

Play Bills

Alexandra "Believe Me, Xantippe"

For the second week of their engagement at the Alexandra Theatre, the Robins Players will present, for the first time on any stage in this city, the uproariously funny comedy, "Believe Me, Xantippe," by Fred Ballard, author of this season's triumph, "Young America." "Be ieve Me, Xantippe," is the favorite stang phrase of George Mac-Farland, a New Yorker, who is weathy and young. He makes a bet with his friend, George Sole, chief of the New York Detective Bureau, and another friend, Thornson Brown, a young law-yet. He agrees to forfeit \$30,000 if he cannot keep out of the hands of the police for one year. If he can, he wins the same amount. MacFarland forges a cheque so that his friends may have an excuse for turning the police loose on him. Among other things, when sending out his photograph and description to the police all over the country, the detective calls attention to the fact that the favorite slang expression of the forger is "Believe Me, Xantippe." One of these circulars reaches Buck Kamman, sheriff of a country in Colorado. Buck's daughter, Dolly, at the beginning of the second act—which is 11 months after the first-insists on staying up in the cabin on the mountain 20 miles from the town, in order to kill a deer the next day. Father tells her that "Simp" Galloway, alias Scar-face, is in the neighborhood, and he advises her to shoot any stranger who gets fresh, and not to ask questions, "I'll attend to that at the inquest," he concludes. Daughter walks down the road with father, and enter MacFarland, alias Maginnis. When Dolly returns he is trying to blow up a fire in order to cook a badger he has shot, and which he calls a squirrel. In explaining to her how he is after a horseback ride, he uses his favorite slang ex-pression, and the lady promptly makes him prisoner at the point of her gun. She makes him go to bed, and while she is getting ready to do some cooking, there appears Simp Galloway, who shortly afterwards has his gun taken away and is thrashed by the prisoner. Whereupon the young woman takes them both down the mountain to father's jail, and is made deputy sheriff as a reward. Then the New York police are notified to come after Maginnis and pay a reward of \$5000.

De Wolf Hopper will be a vaudeville During the time which clapses between the advent of the detective motion picture contract will expire in and the lawyer, the new deputy shariff August, and the comedian will immedifalls in love with her prisoner. When ately begin a tour of the Orpheum she learns the story she alds him to circuit. He will offer a numerous mostart for Arizona, in which journey he molog anent his motion picture experiences and the talk will be called "Mishaps in the Movies."

# Little Mary Wins The World's Popularity Prize

#### GRACE CUNARD PROVED STRONGEST OF CONTENDERS RIGHT UP TO FINISH

Ella Hall Holds Third Place, While F. X. Bushman Leads the Male Section-Full-Page Picture of Little Mary Will Apear in Next Week's Sunday World.

Toronto's own Mary Pickford has won the Toronto World's Motion Picture Popularity Contest by a majority of 778 votes.
On Wednesday last Grace Cunard led by over 300 votes, which recorded the count up to last Saturday night at 11 p.m.

From that time until Wednesday noon, The Toronto World Office was simply deluged with coupons, the majority of which were for the two At 12 o'clock on Wednesday, the contest was declared closed and hundreds which came in late had to be rejected according to the rule.

The work of counting the vast heaps and bundles of coupons began on Wednesday night at 8 o'clock and kept a staff of ten people busily engaged until 2.30 Thursday morning. Both Miss Pickford and Miss Cunard received more than ten thousand

votes each in the final period of voting. In view of the enormous advantage which Miss Pickford enjoyed by being a native of Toronto, Grace Cunard's total of within 778 of that scored by Little Mary is nothing short of remarkable.

Miss Cunard's popularity was a tremendous surprise to everyone.

Quite as many letters urging consideration for her were received by The

World as those upholding Little Mary's claim for the honor. Before the contest started. Miss Cunard was comparatively little talked of in a public way and no one ever dreamed that she would prove such a strong con-The other noteworthy feature of the final standing given below is the

rise of Ella Hall, who assumes third place.

The leadership of the male contingent goes to Mr. Bushman. The result of the contest designates Mary Pickford as the most popular motion picture star in the estimation of Canadian fans. A full-page portrait of her will appear on the front page of next week's Illustrated Section of The Sunday World. Miss Pickford will also become the recipient of The Toronto World's Gold Medal in recognition of the honor she

#### CONSTANCE COLLIER STAR IN CODE OF MARCIA GRAY

Race," With Victor Moore and Anita King.

HERE are many forms of moral honor, and every woman has her own individual code of ethics to govvarious situations. "The Code of Marcia Gray," the basis of the Oliver Morosco photoplay of that name to be shown at His Majesty's Theatre on Thursday, Friday and Saturday, will win ard. ready sympathy. Suddenly deprived of her life of refinement and luxury by the cowardice of her husband at a crucial moment, she finds but one solace—Orlando Castle—her former sweetheart and friend of her husband. Marcia's code met a great and unexpected test—not from the usual triangle of two men and a woman—but in what makes one of the strong, human moments in a charming production. The wonderful personality of Constance Collier as Marcia Graymakes her part one of universal appeal.

ROUNDED on many incidents which took place when Anita King crossed the continent by automobile alone, being the first person, man or woman, to accomplish this feat, "The Race," a photoplay, will be presented at His Majesty's Theatre on Monday, Tuesday Majesty's Theatre on Monday, Tuesday and Wednesday, Victor Moore, famous for his "Chimmie Fadden" characterizations, is the star of this picture, and Anita King will be featured in the cast. With a Nation," the Pathe, Balboa, and Eximple Majesty's Theatre on Monday, Tuesday that he is not seen on the screen enough. At this time, in different parts of the world, he is being shown on the screen in the "Mary Page" serial, "The Birth of the presentation of this picture Anital Market Market Pathe, Balboa, and Berthall Cannot complain that he is not seen on the screen on the the presentation of this picture Anita King joins the ranks of Lasky stars. Last autumn she started alone from San Francisco in an automobile carrying a message from the mayor of that city to the mayor of New York, stopping on her way across the country and spreading the gospel of clean pictures for clean people. "The Race" is full of daring incidents, hair-raising episodes, and thrilling moments.

FALL OF A NATION.

Thomas Dixon, who wrote "The Birth of a Nation," produced by D. W. Griffith, arrived in New York yesterday with the complete production of his new offering, "The Fall of a Nation," a sequel to the former work.

#### FILMS MORE POWERFUL THAN BOOKS OR STAGE

His Majesty's Also Presents "The Veteran Director Says Story Interest in Pictures Will

Colin Campbell, the veteran Selig director, and the man responsible for "The Spoilers" and other big pictures, gave utterance to a great truth the other day in discussing the evolution of motion pictures towards a stand-

"What is it?" was the question put to him.

"Toward telling a big story well," he answered. "That is something the public never has tired of, and never will. It is putting life before us and we love life. Pictures tell a story more vividly, more compactly, with the characters more naturally assembled, with the situations more accurately proportioned and with the dramatic proportioned and with the dramatic points driven home more powerfully than either a book or the stage. There is no trouble about the future of pic-tures and the past needn't bother us, if we are willing to forget a good deal of it."

in the Mary Page" senal, "The Birth of a Nation." the Pathe, Balboa, and Reliance-Majestic features and in a number of Biograph revivals.

Clifford Bruce, the distinguished dramatic star and former Torontonian, has been engaged by the Popular Plays and Players and will make his debut on the Metro program in "Hearts Aflame."

Jack Pickford is the proud owner of a new Hupmobile that was ordered and practically designed by himself. Jack intends using his new possession in a forthcoming feature.

Mary Fuller, Universal star, has just completed the five-recler "Thrown to the Lions," and is now at work on a film version of "The Huntress" from the novel of Vera Hunter.

### TORONTO GIRL TELLS REAL STORY OF LITTLE MARY'S TORONTO DAYS

Intimate Reminiscences of Mary Pickford's Home Life in This City-How the Pickford Family Lived in Their Toronto Home-Mary and Her Mother.

So much has already been written about Mary Pickford that it is a very difficult task to avoid repetition. Therefore some of this narrative will be lamiliar to many people, but much of it, 1 am sure, has never been printed before. Mary's name was Gladys Smith. She was born on the 8th of April, 23 years ago, at 211 University avenue. Her father, John C. Smith, ran a buffet on a lake boat. Her mother was, before her marriage, a Miss Charlotte Hennessy and quite well-known in Toronto for her beauty and for cleverness with her needle.

beauty and for cleverness with her needle.

The Smiths lived on St. Vincent street for a while, where I believe Lotta was born. Then they moved to 81 Walton street, which was the birthplace of Jack, the youngest member of the famous Pickfords. The last-named place is but a shack now, but in those days it was a nice little cottage and was surrounded by (now the ward) a respectable, clean and pretty residential district. The Smith's cottage had a picket fence in front, enclosing two lifac trees, one on either side of the path. The place was always kept clean and tidy, and tho small, was homelike and comfortable. They were not well to do, but what they lacked in money they had twice over in love and happiness and beautiful children.

Their next home was at 17 Walton street, where Mr. Smith died, and then for a while they lived on Queen street. Each summer they spent at Lewiston, so Mr. Smith could spend Sunday with them.

The Smiths were tenants of ours and

Each summer they spent at Lewiston, so Mr. Smith could spend Sunday with them.

The Smiths were tenants of ours and friends. When little Jack was born my mother wrapped him in a blanket and took him to be weighed. And we children played together. I much preferred to go for a ride with Jack in his baby carriage than to ride in state in my own.

When Mr. Smith died, Mrs. Smith, with three small children and no means, pluckily set to work to make a home for them. Mary was a sweet little children ill well the expression that brings tears unbidden to our eyes when we see her now on the screen. Her first part on the stage was Little Eva, and a wistful little expression that brings tears unbidden to our eyes when we see her now on the screen. Her first part on the stage was Little Eva, and a wistful little suppression that brings tears unbidden to our eyes when we see her now on the screen. Her first part on the stage was Little Eva, and a wistful little suppression that brings tears unbidden to our eyes when we see her now on the screen. Her first part on the stage was Little Eva, and a wistful little suppression that brings tears unbidden to our eyes when we see her now on the screen. Her first part on the stage was Little Eva, and a wistful little suppression that or over to her, for Mary was an apt pupit and didn't require long to make her letter her lines by repeating them over and over to her, for Mary was an apt pupit and didn't require long to make her letter her lines by sewing and fancy needlework. Mary says that she used to like to sit on the upturned box cover of her mother's wildest dreams have come true, for her longed for "house with twenty rooms," while not a reality, is with her income an easily obtained possession.

When an opportunity offered itself Mrs, Smith and the children all went on the sum of the s

while not a reality, is with her income an easily obtained possession.

When an opportunity offered itself Mrs. Smith and the children all went on the stage and left the city with Chauncey Alcott. The subsequent career of Mary Pickford is well known. It is simply a story of a mother's love and work for her children, and their rise step by step to fame and fortune. The way was often rough and hard; sometimes the wolf was at the door, but the little family persevered and won. After Mary's long run as Betty Warren in "The Warrens of Virginia," she was without a position, and it is both sad and amusing to hear her tell of the day she applied for a position with her first moving picture concern. She had to get the position or else walk many miles home, as she

hadn't any money for car fare. She got a place as an extra and received her salary then—a ten-dollar bill—which was sweeter to her that day than many a thousand now.

The Pickfords, each one of them, owe a wonderful lot to their dear sweet-faced

The Pickfords, each one of them, owe a wonderful lot to their dear sweet-faced little mother. To know Mrs. Pickford is to love her—just a frank, motherly lady like her daughters and her son, unspoiled simplicity itself.

And Mary also owes her life to her mother. When Mary was small she had black diphtheria. The doctor left the house, saying he could do no more for the child. Mary began to choke, and Mrs. Pickford in desperation thrust her hand down the child's throat and tore out a mass of matter and blood. Mary was instently relieved by this daring act of her mother's and she was soon better again.

act of her mother's and she was soon better again.

Mary was just the opposite of her sister. She was fair and slender and quiet. Lotta was dark and stout, and a regular tomboy. Mary was always in white, a sweet, dainty little fairy, and Lotta, well she wore big checked "Mother Hubbard" dresses, and I guess it was a task to keep her tidy. When they came to visit us Lotta would sit and play with the baby (me), while Mary would watch us both with a motherly eye from her dignified place on a chair with her small white hands clasped in her lap. She was a little queen always.

When I read of Lotta's daring deeds on the screen I recall a deed of long ago that almost brought her a different kind of applause. The corner grocer man had a large keg of oysters outside his store. They were just fresh in, and so the keg was full. Well, Lotta dumped it, keg and all, and what a mess, oysters spread all over the dirty wooden sidewalk. When the grocer came out, red with anger. Lotta was half a block away, and still going as fast as her sturdy young legs would carry her. And she didn't venture within sight of that grocer for many a day.

Dancer of Alluring, Sinister

A feature of quite exceptional strength will form the headliner at the Strand Theatre for the first half of this week. This, "A Price for Folly," a powerful drama, with exceptional settings, and with Edith Storay in the part of a ballet dancer of alluring, but sinister, charm. The story is briefly as follows: M. Jean de Segni, scion of a noble house, the son of a mother who idolizes him, becomes infatuated with a dancer, Mile. Dorothea Jardeau, and lavishes gifts upon her until his fortune is swept away. Stunned by the news of the loss of his money, Jean lapses into a state of coma and the story follows as a dream.

The news of Jean's loss becomes public and he is berated by Dorotheafor bringing her name into a scandal and is cast aside by the dancer for M. Henri Langdon, a wealthy clubman, who has been Jean's rival for her favor. The Duke de Segni, who has been cognizant of his son's indiscretions, has kept his wife in ignorance of the wild life led by her boy. Jean's actions has preyed upon the duke's mind until, tearful of his ability to keep the disagreeable news longer from her, and realizing he has but a short time to live, directs a dagger thru his wife's heart during a last fond embrace. The coormity of the deed overcomes him and he falls unconscious on the dead body of his wife. Jean, returning home from his last revel with the dancer, discovers his parents, his mother dead and his father with but a few hours to live. Horrified at the sight, he un-

ace and shun him. One day, while t the club, Jean chances to overhear Langdon expressing his views of murder to several club members, and as his remarks are derogatory to Jean's honor, a challenge follows. As the outcome of the duel Jean is mortally wounded, and, dying, realizes that his folly killed his parents. Summoning Langdon, he confesses he was the direct cause of his parents' death and absolves his antagonist from any comabsolves his antagonist from any com-plicity in his own. Jean is carried from the field of honor, dead, while Lang-don returns to his liaison with Doro-

LOEW'S GETS THE FIRST RELEASE

#### "A PRICE FOR FOLLY" IS A. STEWART AND E. **WILLIAMS AT STRAND**

Stars in "My Lady's "Slipper.

Elaborate costumes and settings of unusual beauty are to be seen in the photo-play forming the feature at the Strand Theatre for the latter half of the week, "My Lady's Slipper," in which Anita Stewart and Earle Willams portray the principal roles under the direction of Ralph Ince. It is the story of the Louis XVI, period and the producing company went to consider. producing company went to considerable expense to create the atmosphere of those times. The costumes and characters are authentic of that period.

discovers his parents, his mother dead and his father with but a few hours to live. Horrified at the sight, he unconsciously picks up the dagger his father used, and is seen by the butler, looking down at his parents, with the knife in his hand. The butler calls the gendarmes, who accuse him of the murder. Before he is led away the duke regains consciousness and confesses. While Jean is set free, his former friends think his father shouldered the blame to save his son from further disgrace and shun him. One day, while

Dorothea invites him to call on her. About to answer in the affirmative, he turns and sees a look of expectant longing on the face of his mother. All desire to continue his love affair with attention of his father and mother, and as he comes to a full realization that the agony he has recently gone thru was mental, the 'phone rings and the continue his love affair with the dancer vanishes and he refuses the invitation, as a welcoming smile of relief and gladness spreads over the features of his parents at the reclamation of their son.

ture critics, who are one in declaring

Idith Storey Is Seen as Ballet Mid-Week Bill Features Popular

"My Lady's Slipper" was written by Cyrus Townsend Brady and is one of the most interesting of the many suc-cessful novels from his pen. Support-ing Miss Stewart and Mr. Williams in the cast are such well known players as Joseph Kilgour, Harry Northrup, William Shea, Julia Swayne Gordon, George O'Dornell, George Stevens and others.

The scenes of "My Lady's Slipper" are laid in and near Paris during the time of Marie Antoinette. The story time of Marie Antoinette. The story tells of Francis Burnham an American mayal officer who escapes from a British convict ship to make his way to Paris to see Berjamin Franklin, the United States minister. While walking outside of the city's limits he rescues a beautiful girl from highwaymen, and falls in love with her. Playing cards at a gambling resort Burnham becomes indebted to the Marquis de Tremignon, who covets the Countess de Villars, and forces the American to steal from her boudoir some article of wearing apparel. Burnham discovers that the countess is the

"My Lady's Slipper" is the first costume play in which Anita Stewart has ever appeared. Both she and Mr. Williams wear their silks, satins and laces in graceful manner and their appearance in this production will further endear them to the motion picture public.

in the title role, does some of her finest emotional work. The question involved is a big one and the plot provides a solution for it that you may or may not agree with, but you will want certainly to see it.

For the latter half of the week the latest episode of "The Strange Case of Mary Page" (Chapter IV.) will be the featured attraction.

DORIC

The Doric Theatre for this week will show for Monday and Tuesday Betty As an added attraction, the second of Nansen and Edward Jose in "A Wothe big comedy successes, "The Misman's Resurrection," based on Count haps of Musty Suffer," is presented for Tolstoi's well known novel. This picture is conceded to be a triumph for the Danish actress. Her acting, with devil railroad feature, "A Mile a the impressive power of the drama, render the photoplay magnificent.

"The Lure of Heart's Desire," with management of the Globe have pulled Edmund Breese in the title role, is the Scenario writers got busy on a plot.

Scenario writers got busy on a plot.

Scenario writers got busy on a plot.

#### **SOCIETY OF AUTO ENGINEERS TO** STANDARDIZE ECONOMY TESTS

At a Meeting of the Standards Committee of the S. A. E., Rules Were Draughted to G overn Fuel Economy Contests and Demonstrations-Acceleration as Well as Milage Tests Included.

ras, thru its standards committee, taken a hand in fuel economy demonstrations. At a meeting recently held at Buffalo, rules were drafted governing fuel economy demonstrations, in order that some standard form of test could be arrived at, making it possible to compare a test conducted in Chica-go with one in New Orleans, New York, Atlanta or Minneapolis. Complete de-tails of the test have not yet been drafted, but will be at the next meet-

rarted, but will be at the next meeting of the research division, which has the work in charge.

It was decided that only rigid tests would be of any value, and that these should include acceleration, as well as mileage. It was the consensus that these tests should be conducted on speedways, as conditions vary less than on roads.

It is not fair to allow just one speed

It is not fair to allow just one speed to be chosen, as that would allow the carbureter to be adjusted for that par-ticular speed. The following schedule is suggested:

Distance. H.M.
... 10 0.40
... 10 0.40
... 10 0.30 15 ......... 0.24 0.20 0.15 0.12 \*\*\*\*\*\*\*\*\*\*\*\*\*\* \*\*\*\*\*\*\*\*\*\*\*\*\*\*

must be entered on the test form, tosofter with the consumption figures,
this being to guard against the use of
unusually weak mixture.

There are many other restrictions.

In the past, everything has been nicely cut and dried prior to the annual election and the affairs of the national organization have been

One of the most striking examples of rapid evolution in automobile acessories and boat top merchandizing is that of Cutten and Foster. Six years ago, Lionel F. Cutten and Anthony F. Foster founded the business that bears their name. In those six brief years, enterprise, initiative, integrity and an aggressively progressive merchandizing policy has won for the partnership of a Dominion wide well regulated by the men on the in-side who have swung things pretty well in their own way.

There is an existing rumor that the

and that a number of the state associations in the organization will send full delegations to Washington to make things lively at this annual gathering.

Every automobile club—and 675 clubs located in all parts of the United States, are members of the A. A.—appoints one delegate for each 400 members, thus bringing together a gathering of hundreds of the leading men in the motor car field of America.

The development of opposition to the collitical ring which has controlled the political ring which has controlled the cility has been installed to maintain national association in the past will the jealously guarded service reputa-

tion of the firm. The sales staff has been augmented to take care of the increased volume of business. The proprietors extend a hearty invitation to their friends to come and inspect their new premises

#### STUDEBAKER CORPORATION.

Acting on the theory that many a gallon of gasoline is wasted by the average automobile owner in the course of a year, the Studebaker Cornoration recently carried on a number of tests in all sections of the country

of tests in all sections of the country among their owners.

The result of these tests, just made known, have resulted in greatly increased mileage in many cases. Averages of sixteen to eighteen miles per gallon have been secured from the four-cylinder models, while the sixcylinder cars, have produced fifteen miles per gallon uniformly.

In actual operation, the Studebaker

in actual operation, the Studebaker plan works like this: An expert calling on an owner who is not getting maximum mileage, first disconnects the regular gasoline supply and attaches an auxiliary tank containing one galion. The owner then takes the wheel and drives a few miles the expert et ion. The owner then takes the wheel and drives a few miles, the expert at his side making mental notes all the while. At the end of the trip the amount of gasoline used is measured. The expert then relieves the owner in command. Before starting out he command the carburetor and any other

adjusts the carburetor and any other features of mechanism that need adjusting in order to secure greatest possible economy in operation. The

#### U. S. Federal Trade Commission To Probe "Gas" Situation

Exhaustive Investigation Bein g Held to Determine to What Extent the Increased Price of Crude is Responsible for the High Cost of Gasoline.

HE recent gasoline report of the Fed- | eral Trade Commission to Congress was merely a premilinary one. fact, it was but an outline the aim and magnitude of the investigation into the high price of gasoline. One of the subjects to be looked into fully, it is stated by the commission, is as to the amount of profits of the chief oil companies since gasoline began to shoot upward. The steps now using taken by the commission in the undertaking to get at the bottom of the oil situation are given as follows:

Crude oil production is being studied, and the most accurate information available concerning quantity of production, storage and prices is being gathered and compiled. Every important refinery in the United States has been asked to report the kind and quantity of oil used, the prices paid and the stocks of crude held at various times during the year 1915. Many of the tables already submitted, altho tentative in that they are not complete, show such reports from month to month.

Refineries making more than 95 per cent. of the total production of the country are reporting to the commission the following facts concerning their gasoline business for the year 1915:

Quantity purchased, quantity produced, investigation into the high price of

expert then drives the car and drives

t properly, explaining the owner's faults to him all the while.

quantity sold, and quantity in stock prices received free on board refinery and at tank-wagon stations.

A force of accountants is now in the field collecting data concerning intercompany sales of gasoline, and these data are being supplemented by a careful examination of the accounts of certain representative refiners to ascertain the exact cost of refining different kinds of crude oil to produce gasoline, kerosene, lubricating oil and fuel oil.

Freight rates and marketing costs are being ascertained and checked by comparison with tariffs filed with the Interstate Commerce Commission.

Data on the production and price of kerosene, lubricants and fuel oil are being gathered to determine if the increase in the price of gasoline has been out of normal proportion to the price of crude oil.

Refiners and jobbers have reported the location of tank stations and the quantity of gasoline sold, and date of price changes in every town of more than 2,500 population.

Capitalization, earnings, dividends and the price of stocks during the year 1915 of the chief refiners are being collected, and further information along these lines will be gathered to aid in judging whether the high prices prevailing have been necessary to maintain the normal rate of profit.

faults to him all the while.
Reports show in most cases that the owner did not have his carburetor adjusted to best advantage. In other cases he might have had a tendency to leave the motor running while away from his car for a considerable length of time. In still other instances his fault might be in speeding up the motor and "riding" the clutch when a shift of gears would have been the logical and economical method. Spark plugs may be dirty or the motor may have been otherwise left neglected.

"Automobile owners have been accustomed to low-priced gasoline so long that they have become careless and wasteful," says R. T. Hodgins, general sales manager of the Studebaker Corporation. "We can learn a lesson in gasoline economy from motorists in foreign countries where they pay 65 cents to a dollar a gallon for gas in some places, and as a consequence they guard zealously against extravagances in running their cars." Reservations have been made to date for 422 S. A. E. members and friends for the summer cruise June 12-16. There are included in these reserva-tions for 93 women. Treasurer W. H. Conant of the 1916 meetings committee reports daily increasing receipts, and it is now certan that the total accommodation of 560 on the Noronic will be taken by June 1, if not earlier.

will be taken by June 1, if not earlier. At the present rate the ship will be sold out before June 1.

Chairnian George W. Dunham had a full meeting of his 1916 meetings committee Saturday, and concluded plans for the cruise. For the benefit of those who want a day's fishing in Georgian Bay a complete outfit of fishing tackle will be carried on the Noronic for sale to members. The boat will stop at Sarnia, Ont., on the re-Woven or knitted coats are new this season and are designed to be worn over the linen sports suits. They are three-quarters length, semi-fitting in front and double breasted, the fulness in the back being held in by a half belt. One striking example of this coat is of green and white stripes, intersected with a hairline yellow stripe; the collar, cuffs and half belt are of green broadcloth. White pearly buttons are used on the front of the coat. will stop at Sarnia, Ont., on the return trip, Friday, June 16, for the convenience of those wanting to catch eastern trains at that point. This also applies to Grand Trunk trains west.

### Because Goodyear Tires are Made in Canada

To buy Tires that are made in Canada—at "Made in Canada" prices—and yet to have the advantages of world-wide tests, world-wide investigations, world-wide experience. That is what Goodyear enables you to do. The very internationalism of Goodyear entails the ever-to-be-maintained quality demanded by world-wide reputation. Yet because Goodyear Tires ARE made in Canada you pay no more for the advice and experience of all the great Goodyear corporations.

#### An International Preference for Goodyears

In the United States, by actual count, Goodyear Tires are pre-ferred above all others. This in competition with over two hun-dred other brands, many of which sell at lower prices. Some of these lower-priced brands are offered you in Canada at equal or higher prices than Goodyears. Yet in their home market—where they are sold below Goodyear prices—they do not attain leadership.

#### First Cost As Low-Last Cost Far Lower-

The Goodyear factories at Bowmanville, Ontario, stand between you and high "imported" prices. As a result you can buy Goodyear Tires at prices as low as any good tires—and much lower than many. But in addition Goodyears give longer service and so cost very much less in the end.

Compare the two tables of prices given here. They show clearly the immediate and actual saving to you because Goodyears are Made in Canada. At these lower prices you can obtain Goodyear Tires at any time from Goodyear Service Stations everywhere.

#### REDUCE FUEL COST BY **ELIMINATING WASTE**

Authority Describes Various Leaks of Explosive Mixture Due to Fault Connections of Intake Manifold, Worn Value Stems, Carbon Pitte d Valve Heads and Seats. "Frozen" and Worn Pisto n Rings, Oval Cylinders and Leaky Gasoline Feed Pipe Connections — These Cost Money and Are Readily Av oided or Cured.

"In these days when the cost of easoline is an item to be considered it behooves the owner of an automoble to eliminate fuel waste," says H. C. Brokaw, principal of the West Side Y. M. C. A. Automobile School, who describes ways in which losses often

trouble," says Mr. Brokaw, "is with the intake manifold which has to do with from the carburetor to the several cylinders. A leak at the carbureto side would prevent drawing into the manifold a sufficient supply of the mixture, so that the cylinders would be scantily supplied—perhaps one or more not at all supplied. Likewise Air more not at all supplied. Likewise air would be drawn into the manifold thru the leak, and this would thin the mixture coming from the carburetor. As the mixture in the cylinders would be thin it, would not compress properly, the firing pressure would be poor, the mixture would fire badly or not at all, and the power would be lessened.

"The natural thing to do when the mis-firing is noticed is to open the spray or needle valve, admitting more gaseline to the carburetor and making a higher consumption with no gain in power. The proper thing to do is to look fr a leak in the intake.

"If the leak be on the cylinder side of the manifold, it might be at one or all of the cylinders. The result would be the same as in the case just cited, a poor supply of the mixture, or some of the cylinders might be properly supplied and work properly, while the others would be short of the mixture and might not fire at all. The loss might be sufficient to affect seriously the power and lessen the speed of the

Leaky Manifolds "The manifold ought not to become "The manifold ought not to become loosened in ordinary use of the car. There have been cases where vibration has done it, but the usual trouble is where the manifold had been removed for some purpose and improperly replaced. Copper and asbestos gaskets are ordinarily used, and these may be dented or jammed out of shape so that the joint is not tight, or there might have been no shellac handy, or the bolts may not have been tight enough. Whatever the reason, the leak makes a weak mixture, and the first thought of chauffeur or garage man is to increase chauffeur or garage man is to increase the gasoline at the spray nozzle of the the gasoline at the spray nozzle of the carburetor, to make the mixture the right proportion to fire. On account of the mixture being made up in the inlet manifold, instead of the carburetor, the work is not efficiently done and gasoline is wasted and the expense increased.

"One of the most common causes of

### Attainment

TO build a motor car of light weight, attractive appearance and low operating cost; to equip it with every device for comfort and convenience; throughout to instill a value and character that we could be proud to endorse with our name and reputation; and to offer such a motor car at a price made possible only by scientific manufacturing and a great volume of business.

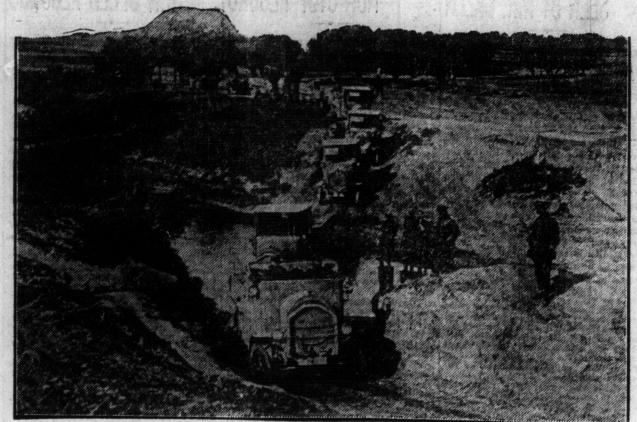

This ideal, conceived almost thirteen years ago, has been the guiding influence in the destiny of our institution. Its soundness is established by our success and the great good will earned by the Maxwell car.

MAXWELL MOTOR CARS are sold in Toronto by our representative Motor Agencies Limited 205 Victoria St. Phone Adelaide 2731

gas loss is from leaky supply pipes. Where there is a solid pipe from tank to carburetor the only leak, necessarily, barring a break or perforation of the pipe, would be at the connection with tank or carburetor. Vibration might cause the joints to loosen, tho if they are put together properly with shellar, soan, or some equivalent and shellac, soap, or some equivalent, and are thoroly tightened there ought not to be any loosening. It is needless, but how often we see a car dripping gaso-line at a considerable loss. It is also dangerous, for a stray flame or spark Overland Betters Best Previous

may ignite the gas.
"While speaking of leaking gasoline I am reminded of another leak of the same nature which is quite as expensive, and that is of lubricating oil. If you do not believe it to be prevalent or serious in extent you have only to watch places where automobiles frequently stand along the curb and notice the pools of oil on the pavement. These come from leaky crank cases, transmission gear cases, real axle gear cases or from a faulty distributor. In most cases it is only a matter of tight-ening a few bolts or connections oc-casionally; but with oil at present prices it is a matter serious enough to e taken into account.

#### Worn Valve Stems

"Another leak which needs to be cor ected frequently is at the valves. So much has been written about the care of valves that it would seem superrlous to refer to it, but regrinding and proper care pay big dividends in efficiency and should be on the regular program. There is a leak at the valve, however, seldom mentioned, the quite as serious as the others, which is due as serious as the others, which is due to worn valve stems. The valve stems should work snugly in the guides, but they wear a good deal, particularly when an engine cannot be throttled down close. The wobbling of the valve stem tilts the valve head just enough to permit a little gas to go thru, lessening compression and power. If it be the intake valve it will let in air above the intake valve it will let in air above the carburetor, and this must impair the mixture, making it necessary to furnish a much larger supply of mix-

ture for the cylinders.
"I am trying to make it plain that wherever there is a leak between the carburetor and the cylinder it lets in air and thing the mixture so that it is necessary to supply more gasoline to get a mixture that will fire, and this where but in the carburetor is less ef-

"The burned gases pass out thru the exhaust valve side and in doing so often deposit small pieces of carbon, which keep the valve from seating properly and let perfectly good mixture escape. If not cleaned often the heat and constant tapping of the valve against the seat will hammer the car-bon fast to the valve or seat as tho it had been fused there. Carbon must be scraped off frequently and as often as

#### Cylinders Worn Oval

"Piston rings which are not pinned often work around until the slots are in line and the mixture will blow thru. If the rings will not stay in place, a pin should be put in the ring groove on the piston to prevent it from working around. Naturally the rings must be kept free from carbon or gum from the oil or they will 'freeze' to the pis-ton and leak mixture.

"In the older cars the cylinder may be worn oval so that the piston and its rings do not fit. When the cylinder is oval the piston will not pump in the gas properly and when the explosion occurs a good deal of the burned gas will be forced down into the crank case. One of the products of the com-bustion is water, which is exhausted in the form of vapor. When it gets into the crank case and condenses, forming water, it collects under the oil if the latter be of good grade. In cleaning out and replacing the oil, if water is found, it always indicates a tendency to oval in the cylinder. This is caused by the thrust of the connecting rod being against one side of he up stroke and against the other on

the down stroke. "If you have such a condition and water is condensed in the cylinder, and you find that the latter is mixed with the oil, in a sort of emulsion, it is because your oil is of low grade. Better try another kind. Of course, the only thing to do with an oval cylinder is to have it rebored or reground to true.

#### Care Reduces Upkeep

"With everything else right there may be a loss of gasoline by reason of poor adjustment of the carburetor. The adjustment should be such as to make the mixture as lean as possible and have it fire readily, and to have the float not too high. One sure indication that the mixture is too rich is when black smoke is given off. Black smoke always indicates excess gasoline-burning money. It is not to be confused with gray smoke, from excess

"If the automobile owner will watch these points he need not give especial worry to the price of gasoline. A little care and good judgment will eliminate

#### U.S. Automobile Men Unite In Move for Preparedness

In Conjunction With Railroa d Officials They Will Co-Operate With Government in Determining Best Transportation Plans--Leading Orga nizations of Industry Proffer Assistance-- A Census of T rucks.

HE members of the Society of Automobile Engineers, thru its council, signified some time ago its readiness to assist the federal government by co-operating with it to develop a millitary transport. The S. A. E. represents the mechanical organization and inventive genius of the American automobile business, and has developed its standardization work to a point of efficiency which has received international recognition in engineering practice.

The board of directors of the National Automobile Chamber of Commerce has authorized its executive to meet the millitary authorities at every point in the development of systems for motor transport service. The N.A.C.C. has already on file complete and accurate information concerning the manufacture and shipment of motor vehicles, together with records of dealers' organizations and upto-date lists of truck and pleasure car owners in all sections of the country.

The American Automobile Association, HE members of the Society of Auto-

The American Automobile Association, with organizations in practically every state, is the national body of owners of pleasure cars, and thru it it will be possible to co-ordinate the various volunteer movements which are being inaugurated in various sections of the United States.

The American Railway Association committee was formed some time ago to co-operate with the war department in transportation arrangements looking to the national defence.

land dealers in Perth,
On the road the car had to tackie all sorts of road conditions. The greater portion of the journey was over wet sand, with occasional turnings out into the bush for fallen trees, wool teams, rocks and scrub, while occasional bush fires were also encountered.

Altho elapsed time was 6 hours and 32 minutes, an average speed at 36.4 miles per hour, actual running time was but 6 hours and 11 minutes, a speed of 38... miles per hour. The excellence of this performance can only be appreciated by motorists who know the Australian roads. Thru loose, sandy patches the car was sometimes forced at a speed of 40 miles per hour. In places a speed of 65 miles was attained.

I and dealers in Perth,

No effort was made to spare the car to spect the real through and trying inner Corps of the army.

It is appreciated, of course, that modern mobilization systems are, in view of the great war, subject to relatively quick changes. No nation abroad has given up animal transportation entirely in war. New regulations of this government are being tried out in Mexico at this time. In mobilization regulations of this government are to get thru, but on being inspected after the rough and trying ourse, it is appreciated, of course, that modern mobilization systems are, in view of the great war, subject to relatively quick changes. No nation abroad has given up animal transportation entirely in war. New regulations of this government are being tried out in Mexico at this time. In mobilization regulations of the great war, subject to relatively quick changes. No nation abroad after the rough and humpb patches the car was sometimes forced at a speed of 40 miles per hour. In places a speed of 65 miles was attained. Spoon drains and humpbacks were

The automobile industry will appoint representatives to work on a national system to be developed in detail. Ways and means must be had to form units of procurable machines and material. The automobile industry will in the last analysis have to supply the men to man the trucks, as well as the trucks themselves. The number of trucks needed would depend on the length of haul rather than the number of men or the amount of supplies to be hauled. It is estimated that there is nearly a thirty per cent, saving operating trucks thirty miles a day as compared with horse haulage.

The good roads authorities are hopeful that, with the existing methods of state aid in forty different states, and the proposed federal aid, there will be in a short time four or five roads across the United States in an east and west direction, and the same number north and south.

There is good assurance that an adequate military transportation system will be established and maintained in this country, inasmuch as the government officials and the civilian authorities are working sincerely to this end.

#### Three Years Ago

(From The Cleveland Plaindealer.) Just three years ago a good many Clevelanders were agking each other, "What do you know about this new Chandler car that's going to be built here?" And most folks didn't that the wholest year serious.

Meanwhile the automobile trade the country over was smiling up its sleeve at the "folly" of men who thought a high-grade six could be built to sell for less than \$2000.

Three years ago the sixth day of April, the first spadeful of dirt was turned on the site out on E. 181st street.

Three years ago!

Three years ago!
And today the Chandler car is known wherever there are roads the world around. Today the first dozen leaders of the Chandler car ranks with the first dozen leaders of the entire industry. Today nearly a thousand mechanics find constant employment in the big Chandler plant, while thousands more in other Cleveland plants are helping to make or machine Chandler parts and materials.

CLEVELAND is—and has a CLEVELAND is—and has a right to be—proud of the Chandler car.

Pioneer Bicycle Days and Some of the Pioneers Who Followed the Sport.

Continued From Page 1.

ciation was a very famous one of these. Many an old-timer will recall the annual meets and lively discus-sions which took place, all of which seem very far removed from these

days.

Many of the cycling feats at which young Torontonians got quite expert, would be considered extremely risky and acrobatical today, when one pictures the height and structure of these machines, for instance, the favorite machines, for instance, the favorite way to coast down hill was to put legs over hands across the handlebars; a position that would at first seem most insecure in case of a spill, but it was really the most sensible, once an even balance had been gained; for should the machine tip, the rider would be sure of being precipitated, if not upon his feet, at least right end up.

Cost About \$150 Each.

Lloyd Harris, now M.P. for Brant-

ford, rode the highest wheel, a 60inch. Great pride was taken in the
appearance of these first machines,
They were groomed and polished each
day, the earliest imported ones being
nickel-plated, and cost about \$150
to buy. There is still one of these old bicycles in possession of a Toronto man, P. H. MoBride, an "Appollo," made by Singer, of Coventry, Ensland. Mr. MoBride purchased this machine in 1890. It is still in good preservation today, and he would not part with it. It is interesting to know that it was ridden as recently as last year, a much treasured possession which formed a link with the good old sporting days. On this machine Mr. McBride covered 1400 miles of travel thru Europe, visiting France, Switzerland, Strasberg and parts of England. The story of this tour, which was taken with several other members of the Toronto Cycling Club, was published in booklet form, entitled "A Summer's Cycling Tour."

It would hardly be suspected today that such men as Harry Goulding, Charles Hailey, Dr. Riggs, A. F. Webster, Dr. Geo. H. Orr, Frank Yeigh, James Lawson, P. H. McBride, Harry Ryrie, and Hal B. Donley, of The Simcoe Reformer, were once enthusiastic devotees of the big wheel, and worshipped as madly at its shrine as the veriest school boy of today at the shrine of the ball.

There were generally several beginthat it was ridden as recently as last

the shrine of the ball.

There were generally several beginners amons the crowd, and one or two whose mission seemed to be making work for the whipper-in, by toppling over the handle bars every half mile or so. One prominent business man of today confesses that the only part for which he was famed in the old cycling club was the spread-eagle act. cycling club was the spread-eagle act, when he would shoot over the handle

A Long Journey Then.
In the very first days a run of 50 miles to Newcastle to visit the home of A. Howard Chandler was regarded as a very great enterprise, but later the more ambitious ones, including A. F. Webster, H. Chandler, and Harry Ryrie, ventured on a wheeling tour thru Europe in connection with the Montreal Bioycle Club. This, barring such a miner mishap as the breaking of one machine in Paris, turned out very successfully, the party going thru France and down the Rhine into Ger-France and down the Rhine into Germany, as well as some parts of England and Scotland. The bicycles for this tour were ordered in London, England, and were therefore quite new for each rider. A. F. Webster has still a copy of a short account of this tour, published by The Globe in 1886. The annual club excursion was another outstanding event of the year of a social nature. On this occasion a a social nature. On this occasion a steamer load forsook the wheel for the day, in order to cross the lake, accompanied by their lady friends. This was the one time when ladies were includthe one time when ladies were included in the club outings, for as yet in those days of the now archaic high wheel the most radical and venturesome of dames had not essayed to enter the lists on such a fragile and risky-looking means of locomotion. It was for long an exclusively male, and therefore, somewhat selfish pastime, but many of the best known citizezns of today prominent in the commercial of today prominent in the commercial and civic life of Toronto had their fling on, and occasionally also, as some would tell you, from a high wheel, back in the days of 1888.

#### ANOTHER RECORD.

LONDON. May 6.—The honor of being the youngest soldier in the British army is claimed for Reuben Ginsberg, who, after a year's work as despatch rider at the front, has just celebrated his "religious majority" at the Ramsgate Synagogue, at the age of thirteen,

### CARS NOW BOUGHT ON Dogs! Dogs!! CONSERVATIVE BASIS All About Airedales

Accounted for by Mr. Pattison, Studebaker Distributor.

Now that automobiles have come to be regarded as a staple article, like real estate, furniture, machinery and other things involving a large unit of expenditure, the Canadian public, quite naturally, weighs automobile worth to a greater extent than formerly, and chooses cars on the basis of the in-vestment. Intsead of relying upon first hand impressions, motor car buyers consider the dollar for dollar value, and choose accordingly.

"This policy of careful buying on the part of the public has had its effect in producing record sales of Studbaker cars," says Mr. Pattison, dis-tributor of Studbaker motor cars, "Studbaker automobiles have always been built with an appeal to conserva-tive buyers uppermost in consideration. We appreciate, of course, that there have been and undoubtedly will be a certain element of buyers who seek oddities, either in appearance or in mechanical features. But this element is in a diminishing minority. The great majority of motor cars buyers look at their automobile purchase from a conservative standpoint

"It was not so many years ago when the public figured automobile value on the basis of price alone. They took for granted that the higher the price the better must be the value. Those were the days before quantity production came into vosue, and with it the introduction of increased efficiency methods in the manufacture and distribution of cars. tribution of cars.

"This conservatism which is guiding the public in choosing cars has brought the standing of the manufacturer prominently into the foreground, Buyers now investigate the stability of the producer as well as the product before placing an order."

fore placing an order.
"In the April 3rd issue of 'Motor World," an automobile publication, a whole page was devoted to telling where it is possible to get parts for orphan cars, meaning those the builders of which have gone out of business. Examples such as these have made the stability of the manufacturer of increasing importance. Automobile buyers do business with companies which are in the automobile business to stay.

"The biggest reason for the unpre-cedented demand for Studbaker cars thruout Canada, aside from the quality of the cars themesives, is the stability of the cars themesives, is the stability of the builders, the fact that they have been in business for more than 64 years, and their reputation for always having given exceptional value for the money. And, of course, in naming reasons, it should always be mentioned prominently that Studebaker cars are made in Canada, the product of the great factories in Walkerville. of the great factories in Walkerville.

Most interesting dog book in existence. Profusely 11. lustrated, showing cuts of all the leading specimens of the Airedale dog, besides pictures from life of these dogs doing all kinds of useful work, both at home and in the hunting fields. While the book deals principally with the Airedale, the advice on training, rearing, feeding, treating, etc., is just as applicable to other similar breeds, and no dog owner should be without a copy. The book contains 150 pages of solid facts. Price, \$1.50 in cloth and \$1.00 in paper.

## A Tire, Time and Temper Saver

A tire inflated by hand is usually under-inflated.

In the first place you get tired and are out of wind; you strain your back doing it; and just let it go at that before your tire is properly or completely inflated.

Consequently your tire does not get enough air. As a result its life is short. Then you get sore and blame the tire manufacturers instead of yourself

A Stewart Tire Pump remedies this.

Your savings on tires alone will more than pay for your Stewart Tire Pump in a few months.

Its gauge indicates the correct pressure right to the dot.

All you have to do is to connect the pump hose to the tire valve then your automobile engine and your Stewart do the work while you look on; no work; no dirt; no bother.

Isn't such a convenience, time saver, tire saver and temper saver worth nany times its cost?

The Stewart Tire Pump is only \$16-complete.

You cannot afford to be without one!

For the sake of your comfort, convenience, economy and safety be sure that the next car you buy is equipped with Stewart Speedometer; Stewart Vacuum System; Stewart Warning Signal and Stewart Tire Pump. They should cost you nothing extra and are the surest sign of a car's real quality

No car is better than its accessories

ricating system of an automobile motor would effect the separation of the sediment in the oil, but such filters rapidly clog unless given attention and cleaning. In the hands of inexperienced operators any filters interposed in the lubricating system of a motor might lead to under-lubrication and injury of the motor parts.

Metal dust results from the abrasion of parts which come into moving contact. No machine was ever built in which there is no wear, consequently in automobile motors an amount will occur directly proportional to the efficiency of lubrication, and metal sediment will always be present in the used oil. It is obvious that the presence of hard metallic particles in the lubricating oil will appreciably increase the rate of wear.

In new motors, formation of metallic sediment proceeds rapidly during the process of "running in." To obviate possible injury, the crankcase of new motors should be drained and thoroly rinsed out with kerosene at the end of the first hundred miles of running. Part of the small percentage of metal sediment which accumulates in the oil is sufficiently fine to remain in permanent suspension so long as the oil is in motion, unless provision is made for its separation.

Road Dust and Sand in Air

As we all-know, for the operation of internal combustion motors a continuous stream of air passes thru the carbureter into the cylinders. Were this air dustless at all times, no sand or road dust would be found in the carbon deposit above the piston or in the oil within the crankcase. Such a condition of air purity is exceptional.

The quantity of dust in the air is affected by many things, such as wind, weather, character of roadbed, etc. When a motor car is driven over the average road, especially in dry weather, or in the wake of other vehicles, the air which is drawn thru the carbureter is highly charged with finely divided sand or earth particles. This sand is carried in the charge at high vehicles in the oil covering the cylinder surfaces and contributes to the friction load of the motor.

It is possible that part of this dust works its way from the cylinder walls into the crank-case. The pulsation of the chaimers cars.

MEDIUM FOR CAR ADS.

In the 2400 r.p.m. Six-30 Chalmers, and the results are phenomenal. The combination of advertising and quality, backed by service and agreessive salesmanship, has already put more than 10,000 of these cars in the hands of owners. The owners are joining the company is building 22,000 more Six-30s, all of which are practically sold today in the demand which has been created.

"Money makes the mare go" is the old saying. Hugh Chalmers has changed it to "Advertising makes the cars go" so firm is Mr. Chalmers in the charge at high velocity into the cylinder are sold the results are phenomenal. The combination of advertising and the charge and specially sold that the crankcase. The average results are phenomenal. The combination of advertising and the charge and the crankcase. The owners are joining the owners are joining the owners are joining the newspapers in advertising and the cars Go."

"Money makes the mare go" is the old saying. Hugh Chalmers in the carbureter is highly charged with finely divided sand or each proving the proving the proving the proving the results

air within the crank-case may also cause the entrance of dust by way of the breather pipe. The danger of scored cylinders and bearings is much greater with sand than with metal dust.

From the foregoing it is apparent that some positive means of separating all sediment which becomes mixed with the lubricating oil in circulation would be highly desirable from the viewpoint of both manufacturers and users. In very few modern automobile motors has sufficient provision been made for natural sedimentation. The location of most circulating pumps is such as to offer comparatively easy entrance of the sediment into the pumps, and thence to the bearings. It would be difficult to assign any definite figure to the rate of wear and resultant maintenance cost.,

Research work on motors in the laboratory, and a few careful tests of automobile motors on the road, have proved beyond doubt that a separation of all injurious sediment from the lubricating oil in circulation more than trebles the possible mileage between complete motor overhauls.

vertising:

"The local newspaper is the now medium. It is the solar plexus blow which hits at the door of each home in each dealer's town. And that means sales now. The national weekly and magazine is necessary, but the timely blow is delivered by the daily paper in each sales district. As a proof of our absolute faith in this fact we are using 1600 newspapers thruout the country several times each month in the campaign we are now waging."

In a recent talk to a board of commerce Mr. Chalmers' said:

"Advertising increases my sales so that I simply cannot afford to do without it. The only man who can't advertise is the one with so much business he can't handle it; or the man with so little business it isn't worth while. Our secret of advertising is as simple as A B C. Be honest, be sealble and be persistent."

Backing up this interest-creating adertising, the Chalmers' company is upholding its standard of "quality first" in the 3400 r.p.m. Six-30 Chalmers, and the results are phenomenal. The combination of advertising and quality, backed by service and aggressive salesmanship, has already put more them 10,000 of these cars in the hands of owners. The owners are joining the newspapers in advertising and the company is building 22,000 more Six-30s, all of which are practically sold today in the demand which has been created.

## RECOMMEND HEAVY TRUCK FOR U.S. ARMY

THE special committee appointed to report on the recent expedition of the reserve corps of the Metor Truck Club in which five-ton trucks alone were used recommends:

In connection with the recent and continuing purchase of motor trucks by the war department, we advocate the purchase for immediate use of one or two fleets of five to six-ton motor trucks to be displayed for service in Mexico, where an immediate, official and adequate try-out can be obtained, and their comparative adaptability for army service, as against that of the one-and-one-half to two-ton trucks can be discovered, and conclusions, based upon actual experience, obtained under typical service conditions.

We believe this recommendation should be adopted for the following reasons:

should be adopted for the following reasons:

First, because it would be necessary in time of pressing need, for the war department to make use of practically every truck available for commercial service, and as the five and six-ton trucks would represent a large percentage of such trucks, their adaptability and limitations should be discovered in advance and actual experience should be sought to determine ways and means for the most effective use when called upon; and,

Second, because it is the belief of the committee from the Motor Truck Club of America that the possibilities of the five to six-ton motor trucks have not been fully developed by the U. S. War Department, either by theory or use, and that the obstacles to their use are greatly overestimated.

## **DETROIT'S'BIG ASSET** AS MOTOR INDUSTRY

Bureau of Census of N.A.C.C. Statistics Show Importance of In-

A special report of the automobile industry of Detroit furnished by the director of the Bureau of Census to the National Automobile Chamber of Commerce gives figures showing how this industry stands with relation to all the manufacturing industries of the city. There were 120 establishments manufacturing automobiles and motor trucks, bedies and parts in Detroit at the end of 1914 These represented an investment of \$32,561,000 capital out of a total investment of \$295,171,000. They employed 37,641 persons out of 120,977 engaged in all manufactures and wages out of a total of \$95,158,000, or a little more than one-third.

Automobiles and parts to a value of 6765,585,000 were produced in the year, equal to forty per cent, of the \$402,-684,000 value of all manufactures. The busiest production season was in late winter and spring, when the sendoustry paid for materials \$101,253.

1000 out of \$223,527,000 paid by all manufacturing trades, or forty-five per sent, and added \$62,329,000 to the

went for wages, as against twenty per cent for salaries, while in all other manufacturing trades only sixty-eight per cent. of the total was paid to mechanics and other laborers.

Value of the year's automobile product was very nearly double the capital invested, while in all other manufacturing trades it amounted to only twelve and a half per cent, more than the investment.

Announcement is just made that the

weak a mixture, the motor will be kept running. Immediately adjust the jet opening until priming is no longer ne-cessary. When the motor is warm, close throttle and retard spark about

THE CARBURETER.

To OBTAIN energy from gasoline for use in the motor, it is necessary to convert it into a vapor, and then mix it with a large volume of air before it can be exploded in the cylinder. The device used for performing these two functions of vaporization and mixing is called a carbureter or vaporizer. Air which is impregnated with fuelvapor is said to be carburetted, hence the name generally adopted. The carbureter consists of two separate parts, a float chamber and a mixing chamber. The float chamber communicates with the tank thru a pipe called the gasoline

THE CARBURTER.

TO OPTAIN onery from guesline occasive to convert it in the control of the contr

mixed with a part of the auxiliary air. On the suction stroke the whole mixing chamber and inlet pipe are filled with a column of air and vapor moving toward the cylinder; on the compression stroke the column is stationary, but thinning out in the centre, while on the firing stroke the centre of the column is moving in the convente direction, tois moving in the opposite direction, to-ward the jet. On the exhaust stroke, there is nothing but a thin lining of mixture in the inlet pipe. As one stroke of an ordinary single cylinder motor takes about 1-16 of a second, there is an alternate surging of the mixture as described, but so rapid as

to be almost immeasurable.

Adjusting the Carbureter.

The following general rules for adjusting the carbureter will suffice for the majority of instruments in use to-

Put the machine on the stand, give about one-quarter opening to the jet needle-valve, partially open the throttle, and pedal. If the motor will not start, cover the auxiliary air inlet, give more jet opening and try again.
If the motor starts immediately but
dies down, depress the float by means
of the tickler and if the cause is too

well, now, for Mr. Porter to claim that the never made any such statement as the above, and that he doesn't even know who put same in The Sunday World. Nevertheless, it was there, and Mr. Porter, so far as I am aware, never

Continue the road trial until the mixture is the best obtainable for both low and high speeds, adjusting the carbureter by means of the air-valve spring (or auxiliary air device) and jet opening until the proper color and tone of the exhaust is obtained. Lock the adjustments when satisfactory and let them alone unless atmospheric conditions change. Mr. Porter, so far as I am aware, never took the trouble to contradict it.

It now looks to me as if Mr. Porter were trying to get from under by coming back at me with a double-barreled quadruple-expansion-come-to-Toronto \$250-a-side challenge which has absolutely no bearing on the original proposition: Can a Reading-Standard pull a Matchless?

This "double shuffle" stuff may do yery well in political manoeuvering. conditions change. When these changes occur, make the adjustments with the

turn. On most machines, a road adjustment once made will be nearly correct for running on the stand and for very well in political manoeuvering, but it won't be allowed to obscure the

starting off.

When the opening between the jet and the mixing chamber is too small, the motor will either not start or will day World of April 23, stands. As for any other proposition covering fast and slow hill climbs, biggest loads, etc. run only at very low speeds. The usual method of regulating the opening is by a needle-valve whose point fits into the mouth of the jet. This needle-valve has a knob at its upper part which is marked with figures, the larger figures indicating the greater amount of opening. In many carbureters, the throttle lifts the needle-valve away from the mouth of the jet as the throttle is opened. To rectify too small an opening proceed as in the preceding paragraphs, turning the knol-toward the higher figures, or to the left. run only at very low speeds. The involving several different makes of machines (a la Porter), this will have to be taken up with the secretary of the Hamilton Motorcycle Club, Mr. Clayton Davis.

Respectfully, J. J. Cutter. P.S.-In case Mr. Porter desires to come across for my original proposi-tion, I may say that the Reading-Standard's "unknown American Standard's "unknown American brother" will be a three-speed Excelsior; or if same is not to his fancy we may possibly fix him up with an Indian or a Harley-Davidson. J. J. C. Where the jet opening is too large, proceed to reduce it, turning the knob toward the zero, or to the right. The

C. M. A. ACTIVITIES.

Because several motorcycle accidents have occurred in the City of Toronto during the past few weeks, President F. A. O. Johnston, of the Canada Motorcyclists' Association, has issued an official request to all motorcylists to observe all caution and judgment in the operation of motorcycle on the streets of all cities and on th

country roads.

President Johnston points out tha riders should so conduct themselves that the many benefits derived thru the use of a machine will not be offset be a bad and undeserved reputation fo speed and danger. He has also asked riders to remember that, for their own personal safety, they should avoid recklessness. The motorcycle boosters

swear that motorcycling is the most health-giving and pleasing pastime in the world, yet some riders have an inclination to operate machines in a manner that is dangerous to both themselves and pedestrians, thus bringing the sport into a certain amount of disfavor. Evidences of reckless riding also work a hardship on all motorcyclists, declares President Johnston, because members of parliament, police officials and other authorities are less inclined to provide legal benefits for motor riders when they become aware of unfortunate incidents.

"Please do not spoil the good name

"Please do not spoil the good name of motorcycling by reckless riding,"
President Johnston tells all riders.
Another foe of motorcycling is the
"open muffler boob" who delights to
hear his motor roar. This man is selfish to the extreme, and he, too, is en-couraging the law makers to place more restrictions upon the use of the

The action of the Canadian Customs Department in making arrangements for free entry of motorcycles belong-ing to foreign tourists for periods not exceeding ten days has done a great deal to offset the rumors in the States that visitors are not wanted in Can-ada, and that tourists are likely to be ada, and that tourists are likely to be conscripted. Announcement of the change to be made in the Canadian customs regulations has been published in many American papers, and credit is given the Canada Motor-cyclists' Association for the concession.

Further steps have been taken by C.M.A. officials for the holding of the proposed motorcycle relay rides in Ontario this summer under military auspices, Letters asking for the names of riders who would participate in a military despatch ride from Ottawa to Niagara have been sent out. These names should be forwarded to the C.M.A. headquarters at 106 Adelaide street west, Toronto. Details such as the experiences of riders, makes of machines used and other particulars should be sent with the names to the should be sent with the names to the

The C.M.A. has also received the names of several more motorcyclists who will take part in various race who will take part in various race meets around the country this summer. Those who are in a position to know declare that many riders of outside points are preparing to take up the racing game, and that many new faces will be seen on the tracks this year. The C.M.A. intends to encourage the holding of races for returned war veterans.

T. M. C. News.

A special meeting of the 1916 club members was held in the clubrooms, Wednesday night, when a large committee was formed with instructions to interview old members, and if possible get them back into the club as soon as possible. It is hoped that every member will get busy and make things hum for the next month.

Uxbridge for 24th May.

The first club run of the season will be held on Wednesday, May 24, to Uxbridge, when the boys will have the opportunity of visiting one of the best spring fairs in Canada, held annualy at Uxbridge on May the 24th.

all T. M. C. members and their friends will come along.

The boys will leave the clubrooms early Wednesday morning, and go by the way of Markham, which will mean good roads a!l the wsy. The pace will not be over 20 miles per hour, and the riders will all stick together. Those who wish to stay over night will find good accommodation at the Mansion House. The rest of the boys coming home the same day will leave Uxbridge about mid-night. The Mansion House will be the club's official headquarters. Everybody welcome.

Midnight Sons. who is the prominent club member who with his friend was having a joy ride along College street at 4 a.m. the other morning. The owner of a new machine always has lots of friends ("how about it little fellow?")

Henderson as a Racing Machine.
The four-cylinder Henderson which is becoming so popular as a top-notch pleasure mount, is also coming to the fore as a racing machine. In a recent contest in Buenos Aires, Argentina, Antonio Selmo, on a Henderson, won the 100 kilometer race, in 73 minutes, 16.3-5 seconds, and easily outclassed all the other twelve entrants, mounted on several of the most popular speed buses of American and English manu-facture. He completed the entire dis-tance without a stop.

Excelsiors for Chicago Police.

Motorcycle dealers of Chicago have
cen on tenderhooks for some time licen on tenderhooks for some time over the proposed purchase of 150 motorcycles for the Chicago police de-partment. It was admitted that the Excelsior probably had the inside track ine to the fact that only Excelsiors have ever been used by the Chicago police and that they now have in the various branches of the police department nearly 200 of those machines. The contract was awarded the Excelsion

ompany.

The first motorcycles purchased by he Chicago police department were excelsior single cylinder belt drive machines purchased in the latter part of 1998.

### "Fatigue of Steel" in Motor Trucks That Are Overloaded

Sustained Overstrain Due to Overloading, Tells on Ma- Boys Who Would Otherwise Be chines Just as it Does on Teams of Horses-Overstressing Inevitably Eventuates in B reak-Down.

days of usefulness should be ended.

"Exactly the same change as that which takes place in the tissues of the horse takes place in the steel of the motor truck frame. True, the fatigue of steel is much slower than that of flesh tissues, but it is there just the same. The frame of a motor truck is designed as a beam to carry a certain specified load, just as a girder of a railroad bridge is designed to carry a certain number of locomotives and trains of coaches. The molecules of the steel forming the beams in each case move in relation to one another when loads are applied. Of course, you cannot see the movements of these molecules with the naked eye, but science has proved that they do move. When the loads applied are not greater than those for which the beams were designed, the molecules tend to move back to their original positions after the loads are greater than those for which the beams were designed, these molecules cannot return to their original positions, and the "When the steel of the springs has nearly reached its elastic limit, the latter are not as capable of absorbing the shocks as when in their original condition, so that springs which have been continually overloaded cannot cushion the driving mechanism to the same degree as was intended by the designer. The shocks which are not absorbed by the springs are taken up by other structural members of the chassis which are subject to the same fatigue as is the frame. The front axle and the rear axles of either the shaft or chain-driven types are called upon to absorb some of the shocks originally intended to be taken up by the springs. This results in the fatigue, overstressing, and eventual breakage of those parts.

"The overloading of the frame and er tran those for which the beams were designed, these molecules cannot return to their original positions, and the beam assumes a set or bend and does not return to its original position after the load has been removed. The steel in this case is said to have reached its elastic limit, or that load at which the hear will not return to the second

## These Facts Fix Saxon Six Supremacy

1. Excepting the SAXON no other Motor Car on the Canadian Market selling for less than \$1,600 has a Continental Motor. There are other cars, however, selling from \$1,600 up to \$2,500, which do have Continental Motors.

(Note:—The Continental Motor Mfg. Co., of Detroit are the world's largest makers of motors for automobiles. Continental Motors are used only in the higher grade cars.) The SAXON SIX is the lowest-priced Motor Car on the Canadian Market using complete TIMKEN equipment.

The next competitive car, using the same TIMKEN equipment as the SAXON will cost you \$365 more than the SAXON. The SAXON SIX has TIMKEN AXLES, front and rear—TIMKEN ADJUSTABLE ROLLER BEARINGS—and TIMKEN GEARS in the transmission and differential.

And this same TIMKEN equipment is used in practically every other car selling from \$1,800 (Note: -TIMKEN says-"In TIMKEN products there is only one grade of material, and

54% of the 1916 Motor Cars are equipped with the Silent HELICAL BEVEL GEAR on the Rear Axle. The use of the old-style Straight Bevel Gear has decreased 39 per cent. in the last year. The SAXON SIX is equipped with the SILENT HELICAL BEVEL GEAR.

4. 55% of the 1916 Motor Cars use the DISC TIPE OF CLUTCH.

THE SAXON SIX is equipped with the DISC TYPE OF CLUTCH.

And more than 10 other Reasons proving SAXON SIX supremacy.

The Result of This High-Grade Saxon Value In February, 1914, the first SAXON Motor Car was built and shipped,

Today—after a period of little more than two years—the Saxon Motor Car Company stands among the first 10 largest producers of Automobiles in America, and there are 200 licensed Automobile Manufacturers in America.

More than 40,000 satisfied owners are driving SAXON Motor Cars — More than 35,000 SAXONS will be shipped during 1916. Now, come and examine, and drive, and satisfy yourself that no other Motor Car in the 1916 field offers you equal value at the price of the SAXON SIX.

ness shown by the heads of the places which are thrown open to them. Later test papers will be given to show which lads have taken the most intelligent interest in the various manufactures; this will stimulate and keep alive their interest.

There is a proposal on foot to organize an advertising campaign on behalf of this movement in the very near future. Premises will be secured on Yonge street, and literature distributed showing the work done. Such an exhibition should prove of great assistance in bringing this splendid work more before the public, for while the exception of office expenses, and salary of a secretary, there are necessarily many other drains upon the resources of the movement by the giving of financial aid, etc., in needy cases.

At this time, when the war is taking the speckled in the week these men wandered back to town to their coluttered desks, and, save for the friends who ieccived a few samples of the speckled spoil that fell to their rods, they received the condemnation that the "truth was not in them." Of course it is always the biggest and the most aggressive that get away. How would they have time to grow so big if they were not made with the special attility to get away from all the men who vainly seek them?

The speckled brook trout is the very gamest of all game fish the lakes and streams of our province provide. Only the small-mouthed black bass can compete with them for gameness and as bass fishing does not commence until June 15, the speckled trout at present the tree of back to town to their cluttered desks, and, save for the friends who ieccived a few samples of the speckled spoil that fell to their rods, they received a few samples of the speckled spoil that fell to their rods, they received a few samples of the speckled spoil that fell to their rods, they received a few samples of the speckled spoil that fell to their rods, they received a few samples of the speckled spoil that fell to their rods, they received a few samples of the speckled spoil that fell to their rods, th sources of the movement by the giving of financial aid, etc., in needy cases. At this time, when the war is taking such terrible toil of the best of our young manhood, a work of this kind, which aims at the solving of all the boy life which comes its way is of value to the state, and to the empire at large beyond estimation.

at large beyond estimation.

The words of Sir Robert Baden Powell on this war, and its relation to the life of our empire, are fittingly put into leaflet form by the organizers of the B. B. movement. . . "War kills off the best of a nation's manhood: therefore extra care must be exercised to save every youth (not for his own sake, but for the sake of the

"We have to economize our human material. Each individual must be made (1) healthy and strong, (2) en-dowed with character for becoming a

## ENTHUSIASTS READY WITH ROD AND LINE

Opening of Fishing Season Finds Many Torontonians Out for a Day at Trout.

Continued From Page 1.

not in a hurry to get to the fishing grounds before 7 o'clock or later on the morning of the opening day. Thruout the province, however, are thousands of keen fishermen who do

thousands of keen fishermen who do not possess the open sesame to these streams and many near the cities are able to get at least one good day's sport out of the open streams. These enthusiasts are up long before daylight on the opening day and dawn reveals dozens of them on each of the unrestricted streams stricted streams. Even small streams, creeks that can

be stepped across at their widest point, will yield several trout of legal size to the man who first drops his line with wriggling lure in their little pools and eddies. During the spring floods large trout often escape from the larger ponds and streams and the retiring loods large these heautles within the ponds and streams and the felling floods leave these beauties within the confines of the little streamlets. In this way the persevering fisher will often get the surprise of his life by trying one of these, almost rills, that many others have thought worthless as a trout possibility.

trout possibility.

The northern part of the province still has many streams that are unrestricted and almost unvisited by the vast multitude of trout fishers. These streams are a regular paradise to the men who are able to take the necessary time and put up with the slightly colder weather in order to follow their meandering lengths and test their quiet meandering lengths and test their quiet waters for the handsome speckled

As the older streams become more barren of fish these waters will become better known and the picturesque scenery and the greater catch will more than repay the pioneer who leaves the nearer streams.

Dull Day is Best.

This year Mayday dawned auspletously for fishermen. While the children and the May Queen desire a bright and springlike day with lots of sunshine, it takes a dull day to make the finny tribe pay more than passing attention to the lure that hides the hook. This year brought an ideal day for the great brotherhood of the disciples of Walton and from the various haunts, reports were received carry in the day reports were received carly in the da that fishing was more than good. The

There are upwards of 40,000 motor cars in Ontario alone. Only four countries in the world, the United States, Great Britain, France and Germany, have more cars than are owned in Ontario. in Ontario. ent has the first place. Later on per-haps one may hear many arguments between the trout and bass fisher on this subject.

The motor car production of the United States for 1916 will exceed 1,-200,000.

ARY MORLEY'S plano recital at Toronto Conservatory of Music last Wednesday evening attracted a very large and fashionable lience, among whom were a numper of our leading professional musiians. She played the Bach-Busoni Chromatic Fantasie with a fine sense of style; the Delibes Passepied with great charm and rhythmic appeal, while in the intricate Glazounow Valse he brilliancy of her technic was abundantly evident. The Chopin Ballade in F minor, op. 52, and Barcarolle, op. 60, were played with warm poetic intuition and with a freshness that made them seem new, and the Brahms quintet, in which she was supported by the Toronto String Quartet, served to demonstrate her special gifts as an ensemble player. Miss Morley's outstanding merits as a planiste strike one as being those of real musicianship, a gift for genuine expression and a fine, sympathetic touch, a combination of qualities that results most happily in such a program as she chose for this particular evening. The recital was in aid of the Belgian Children's Fund, conducted by Mrs. Agar Adamson, and was under the patronage of the lieutenant-

holm, Ross Morley, Betty Burten, Elsie Green, Mike Sanson, Elva Stevenson, Marcia Bradfield, Josephine Hodgson, Hilda Young, Honor Soanes, Eleanor Kingsford and Dorothy McQuillan, Songs from Liza Lehmann's "Alice" Cycle were sung by Esther Cassels, Betty Burton, Helen Cassels and Dor-Songs from Liza Lehmann's "Alice" Cycle were sung by Esther Cassels, Betty Burton, Helen Cassels and Dorothy Kingsford, who also sang the "Moon Maiden's Song" in "The Pierrot of the Minute" The Pierrot of the Minute "The Pierrot of the Minute" The Pierrot of the Minute "The Pierrot of the Minute" The Pierrot of the Minute "The Pierrot of the Minute" The Pierrot of the Minute "The Pierrot of the Minute" The Pierrot of the Minute "The Pierrot of the M ning Wheel Scene" from "Faust," with the grace and ease of a professional; the Nelles Clendenan's contributions were "Ecstasy," Rummel, and "Hear Ye Israel," Mendelssohn; Laura Ellis Concert Fund and for St. Luke's Organ Israel," Mendelssohn; Laura Elli gave "Bird of the Wilderness," Horse man, and "La Fafoletta," Torry; Mrs. Alice Woodcroft, "The Star," Rogers, and "Con Vien Partir," Donizetti; Mons. Morel, an excellent baritone, ON A LONG SENTENCE logue from "Pagliacci." # TORONTO SYMPHONY

Welsman Mobilizes His Forces and Gives an Excellent Program.

The size of the audience that attended the symphony concert at Mas-sey Hall on Thursday evening, April 27, is proof positive that Toronto wants to hear orchestral music played by its own orchestra. This should provide the necessary incentive to those who have the wherewithal, to make the reorganization permanent, so that next season, even the the war continues, Toronto will have a series of orches-tral concerts that will help to diver the mind, occasionally, at any rate, into less sombre channels. Every one was agreeably surprised to find that such a large orchestra could be assembled, as it was thought that only a very small remnant of the former orchestra remained in town. However, means of organization were set in mo-tion and the result was a thoroly satisfying concert by nearly as large a body of players as formerly. The tone produced thruout was particularly warm and mellow, the beautiful qualty of the strings and wood-wind never being marred in the least degree by the brass, the latter section displaying unusual taste and discretion in the use of their instruments. Mr. Welsman included in his program the overture to "The Merry Wives of Window." Ni to "The Merry Wives of Windsor," Ni-colai; the "Pathetic" symphony, Tsch-alkowsky, 2nd and 3rd movements; the "Peer Gynt" Suite, Grieg; the 1812 Overture, Tschaikowsky, and the wellknown concerto in B flat minor, by the same composer, with Ernest Seitz at the piano. Mr. Welsman, during the at the plano. Mr. Welsman, during the two seasons that have elapsed since the orchestra disbanded, has lost none of his skill as a conductor, and, with very few rehearsals, was able to give a concert of such artistic qualities as to whet the appetite and awaken stronger desire for a continuance next season. Then, too, Mr. Seitz gave gaining praise at several important ample proof that it is not always neconcerts. order to give a fine concert. His play-

cises most admirable control, hor which Mr. George has appeared he has histrionic gifts lend to her singing that rare charm which bespeaks the true been re-engaged, among them being the being them being the being th Chicago, Ottawa, Owen Sound, Brantanship will undoubtedly serve to make ford, and the smaller towns of Tweed ittend. She will be assisted by says that no artist brought to that says that no artist brought to that city has received a more complimentary. O. Forsyth, and Charles F. Allison tary verdict than Arthur George of Toronto. Possessed of a superb voice, trained to a high degree, his rendering of the Prolog from "Pagliacci" excellent and deserved the encore, for which he sang the appropriate song, 'Knitting." He also sang a trio of numbers of lighter calibre, but just as pleasing, as was also his final offering Rolling Down to Rio," which showed his voice in a different style with equal success."

ing of the concerto was brilliant, his

masterly technic enabling him to give

it a powerful performance.

The seating capacity of Foresters' Hall was taxed a few evenings ago when Vera Ings and Florence MacKay, students of Edouard Hesselberg, the Russian pianist and pedagog, an ensemble recital. The self-reliane and composure of the two young debu companiments by Mr. Hesselberg at the second piano. The performance re-vealed well developed technic, plenty of dash and vigor, at times almost masculine strength, while the cantabile parts proved that much attentio and been given to that important p of piano playing. The novelties of the evening were Beethoven's serenade in seven parts, Scenes de Ballet, Del Va de Paz: Somerville's Variation Sy oniques: Hesselberg's own brilli duo arrangement for two pianos Rachmaninoff's Military Prelude in Minor, everything except the Web Concertstuck in F Minor, and Mendelssohn Concerto in D Minor ing played in their entirety. Taken a whole, it was an ambitious progra exceedingly well rendered, and w creditable alike to master and stude The singing of Mary Manzer adde pleasing variety. She was in voice and very happy in her selection including among them Hesselberg's "Vient Carina" and "Reminiscence," and responded to a hearty demand fo an encore by singing "Eventide." the same composer. The recital w given by the Hesselberg Studio in a of the Canadian Red Cross, and under the patronage of Lady Hendri Mrs. Victor Cawthra, Mrs. Timoth Eaton, Mrs. W. J. Elliott, Mrs. Bridle

the cause of her extraordinary influence over men.

## FISHERMEN, YOUNG AND OLD, IN KHAKI AND MUFTI, CATCHING .--?

Winchester Bridge, Don River, one of Toronto's famous fishing resorts.

Look at the crowd.

Mascalonge and the implements of his capture

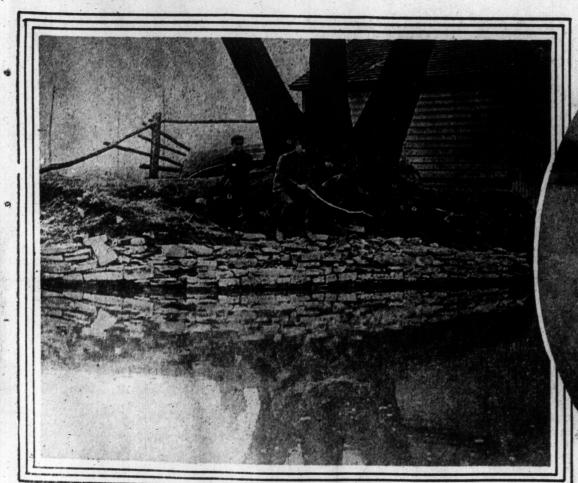

Fishermen are the greatest optimists in the world. Think of the optimism this man should have at forty.

It's the sociability and not the fish they catch that keeps this Saturday afternoon crowd in good temper.

For sixty-five years this fisherman has done this every spring with more or less success. This time it was in Mimico Creek.

This man caught a fish but it got away and has been growing ever since.

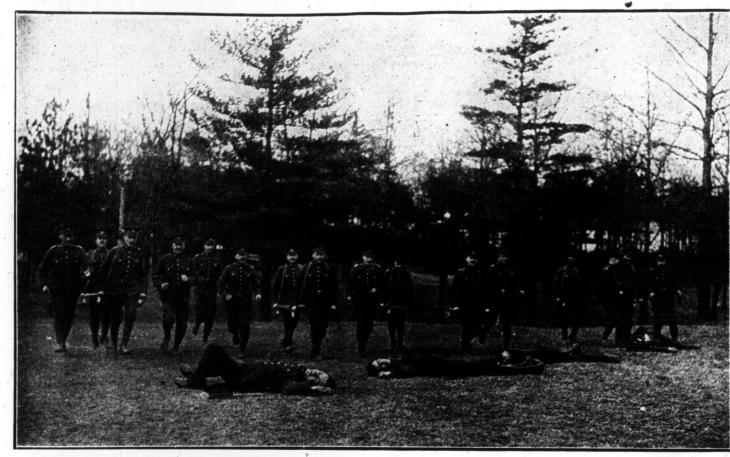

Fifteen fish and fourteen mouths to feed.

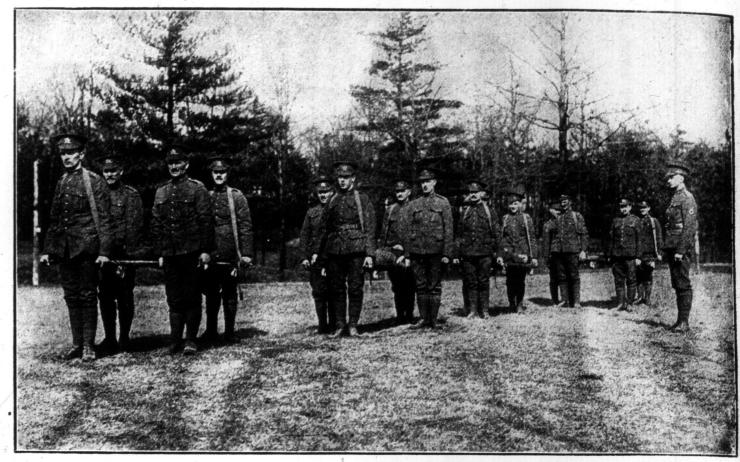

Look, Watch 'em wiggle. Gee, ain't those some minnows?

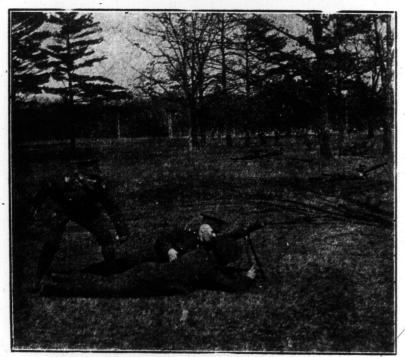

## 123rd BATTALION MACHINE GUN SECTION MANOEUVRES IN HIGH PARK

The stretcher bearers dodge shells to pick up the wounded.

The wounded are carefully carried to the dressing station.

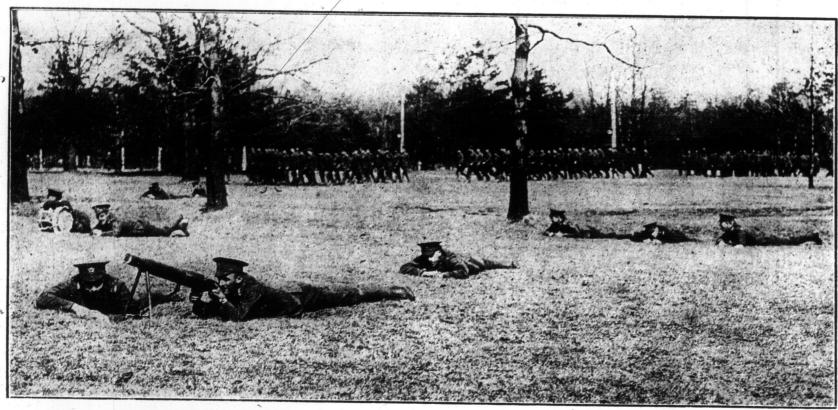

Setting up a gun at short notice ready for an attack.

Having put the enemy to flight, t he whole section advances with its guns.

This field telephone keeps headquarters posted on develop-ments.

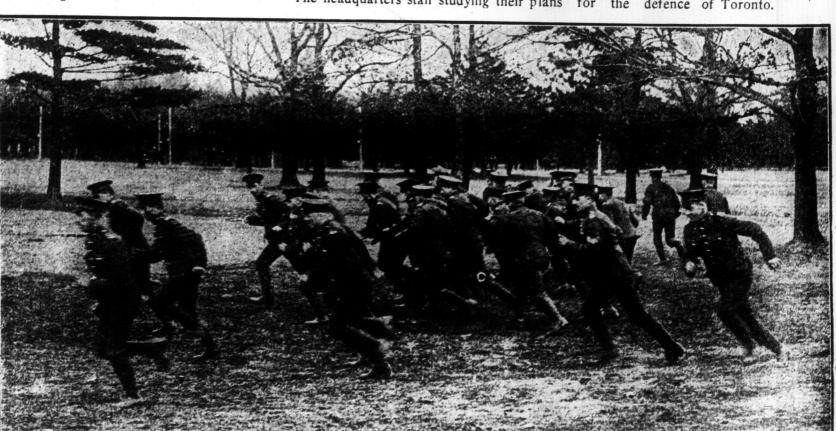

Supporting an infantry advance across a piece of open country, one of the uses of the machine gun.

The headquarters staff studying their plans for the defence of Toronto.

Taking cover in a natural trench and waiting for an enemy attack.

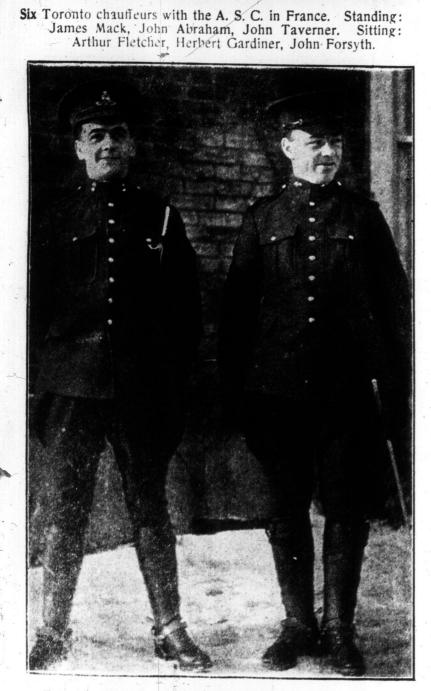

"Taking Post." At a given signal the men rush for their guns and prepare to either attack or repel the enemy.

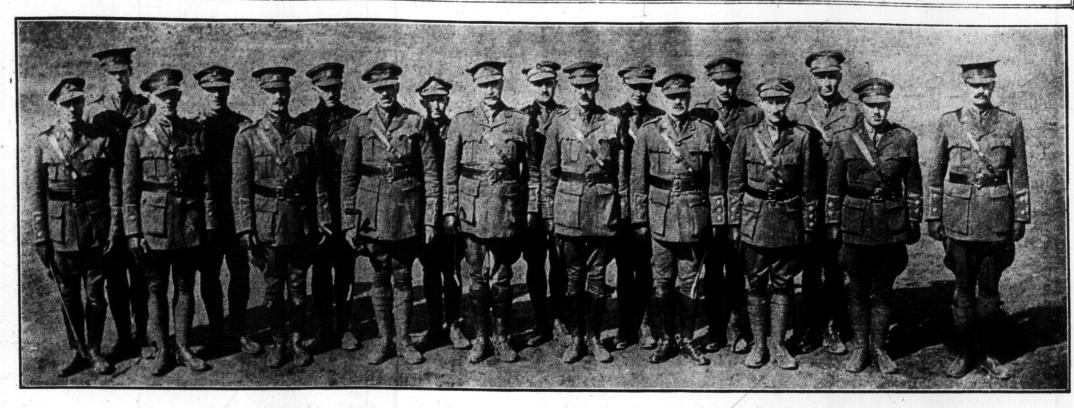

## UNITS AND INDIVIDUALS WHO ARE "DOING THEIR BIT"

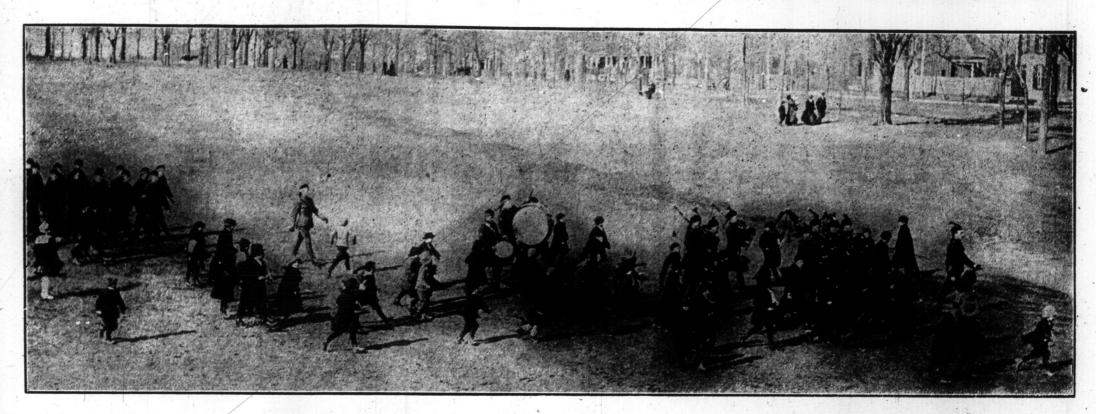

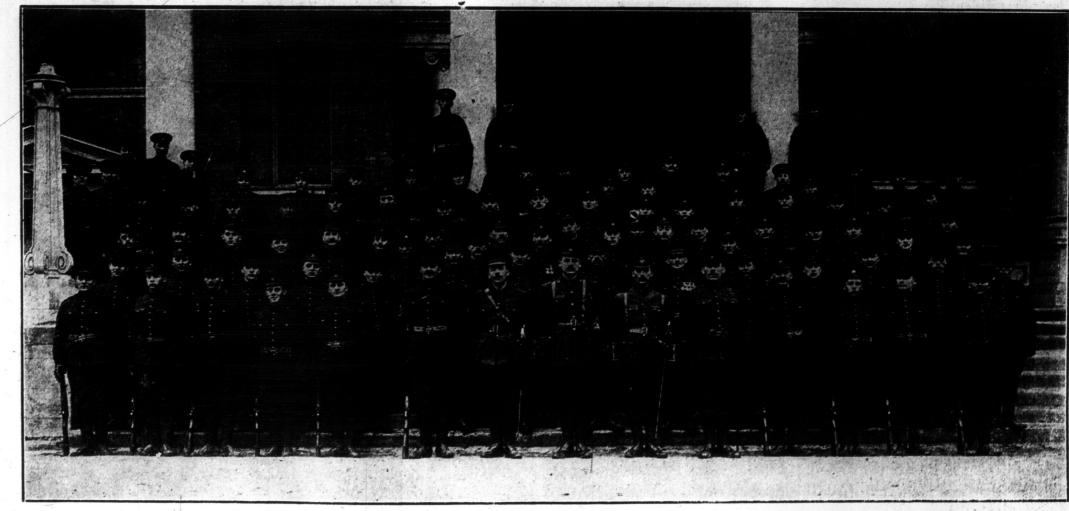

Gunners Herbert and Harold McClelland of Scarboro, with 34th Battery, C. F. A., in England.

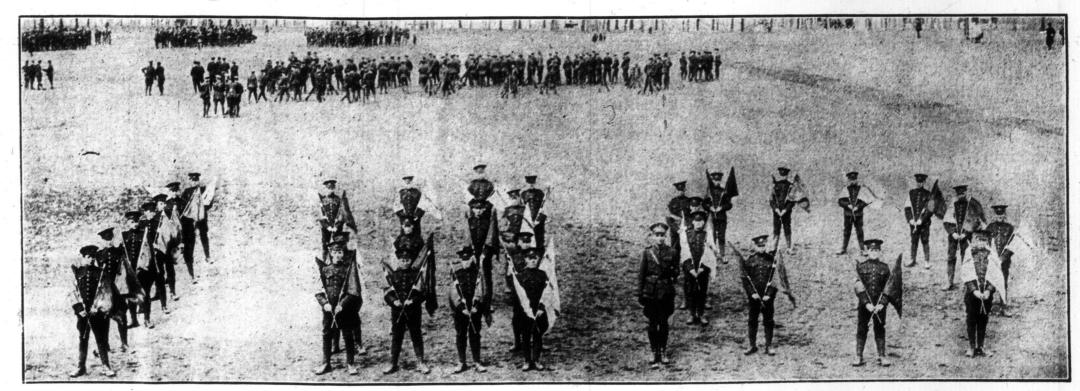

Major Huggans and some of the officers of the 120th Battalion, in Victoria Park, Hamilton.

With the traditional enchantment of the Pied Piper, the pipers of the 173rd are followed by a curious crowd of kiddles thru Hamilton's streets.

"E" Company of the 20th Battalion, which has recently suffered heavily, altho covering itself with glory at St. Eloi.

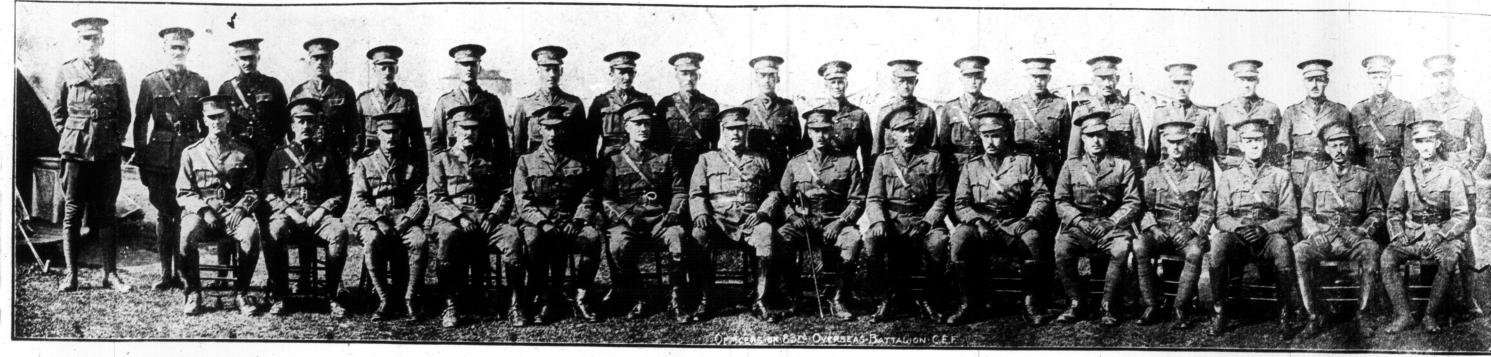

Signaliers of the 120th Hamilton Battalion, in charge of Lieut. Irwin.

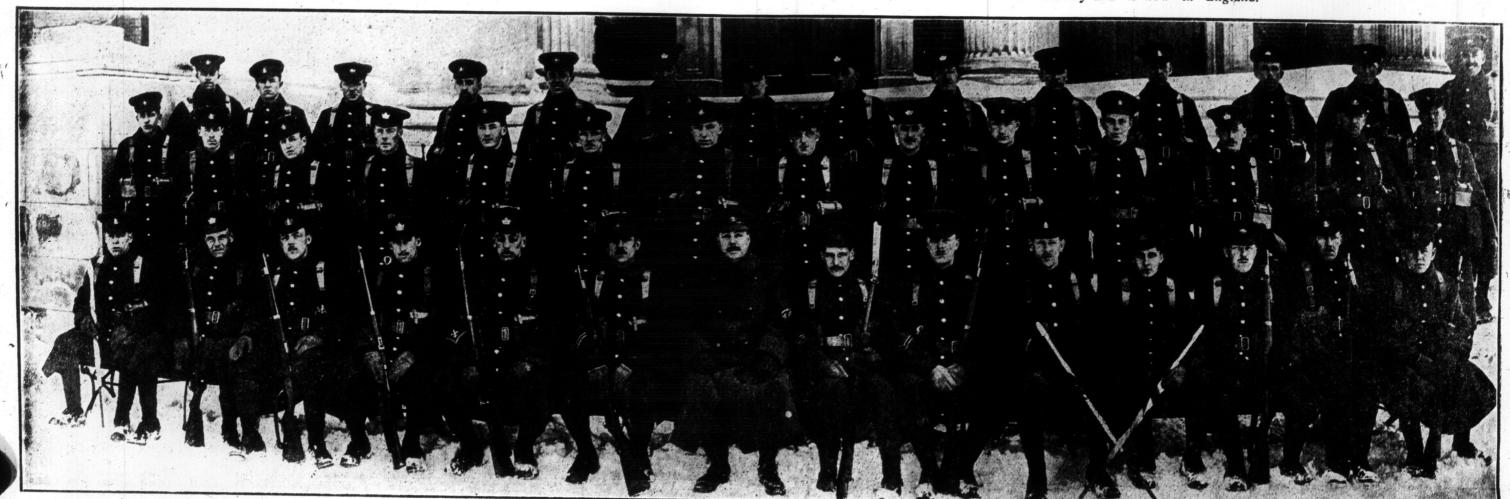

## o- -o- CANADIAN SOLDIERS NOW TRAINING IN ENGLAND

0~

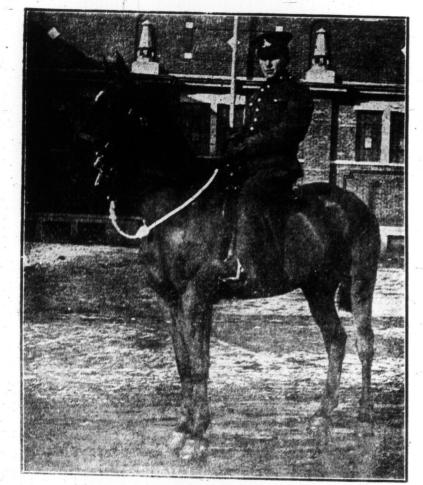

-C

Lieut.-Col. Reginald Pellatt, with the officers of the 83rd Battalion, which left Toronto recently and is now in England.

Number 10 Platoon of the 74th Battalion, now in England, taken while at Exhibition Camp.

Driver E. E. Reeves, Davenport avenue, with 31st Battery, C. F. A., in England.

Prisoners of war, formerly at Sennelagen, Germany. Pte. J. Fellowes, bottom row, centre.

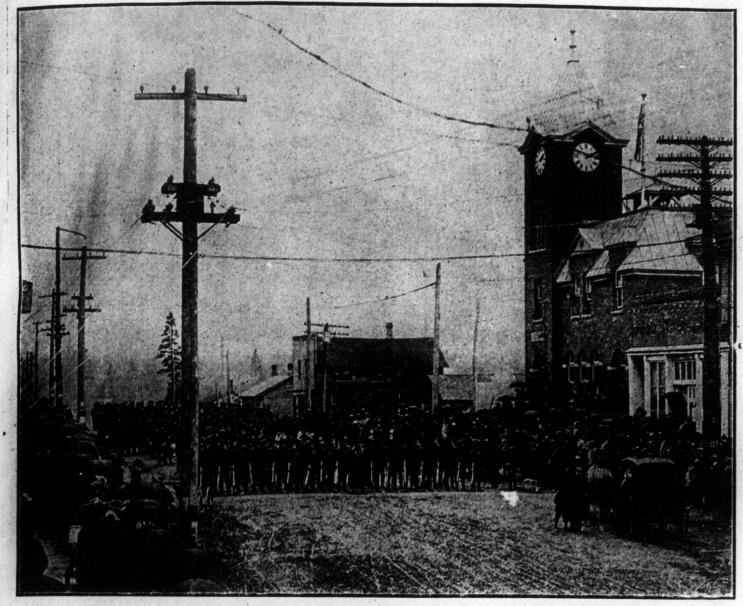

Four sturdy sons of Mr. William Mathison of Havelock, Ont: W. J. Mathison, Belleville; George A. and H. T. of Claydon, Sask., and Archie Mathison of Havelock in khaki, attached to the 93rd O.S. Batt., now stationed at Havelock.

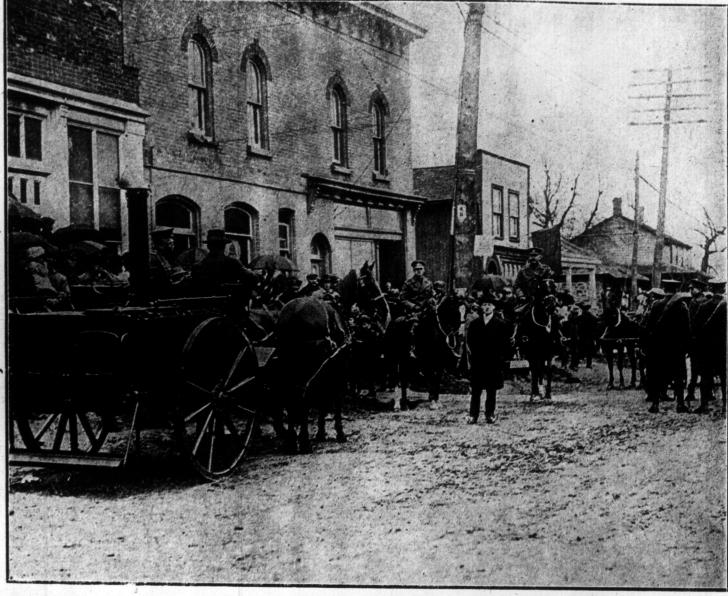

The 45th Battery, C. F. A., now at Bramshott Camp, England, photographed at Kingston, while at the Royal Military College.

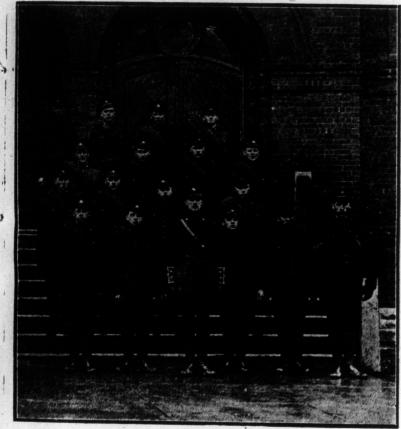

# LIEUT.-COL. SAM SHARPE, M.P., WITH HIS 116th BATTALION AT UXBRIDGE

The whole of Uxbridge turned out in the rain to watch the presentation of a field kitchen to the 116th, by Mr. N. R. Beal, of Uxbridge.

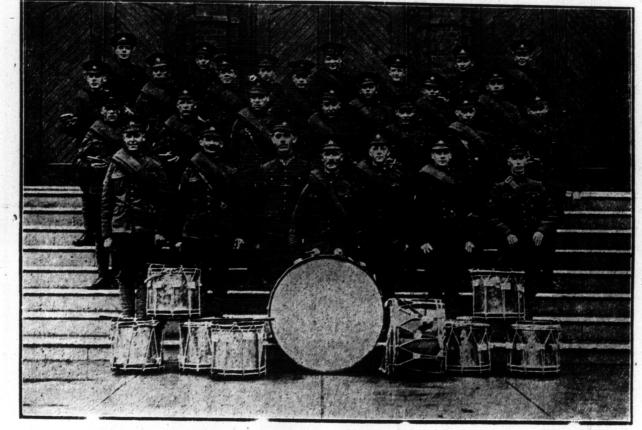

Donor and recipients viewing the new field kitchen Colonel Sam Sharpe on horseback immediately behind Mr. Beal, standing.

N.C.O. class of the 116th, in charge of Lieut. R. N. Cockburne.

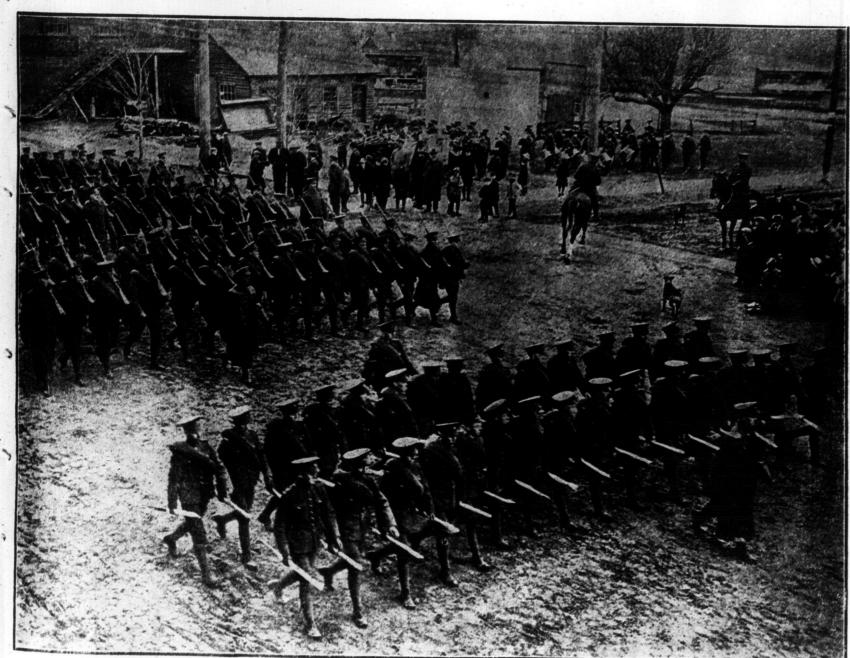

W. J. Mathison, thie Mathison stationed

Bugle Major Templeman and the Bugle Band of the 116th Battalion.

The scouts of the 116th Battalion, in charge of Lieut.
J. W. Lester.

Marching past their O. C. in the rain. Colonel Sam Sharpe, taking the salute of the 116th at Uxbridge.

Lieut.-Col. Sam Sharpe, M.P., officer commanding the 116th Battalion, and some of his officers stationed at Uxbridge.

## AN EASTER FLOWER SHOW

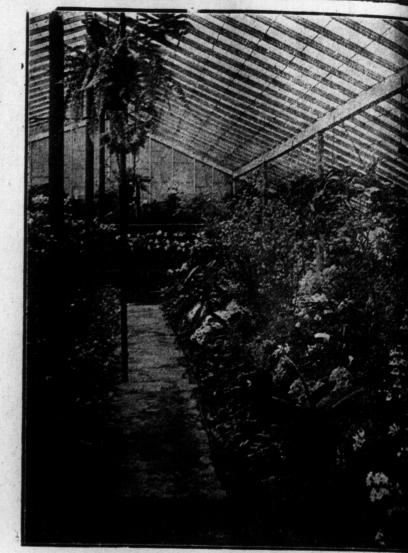

## MOVING THE WEST'S HUGE CROP

This huge bank of Easter lilies could not have been more imposing.

A fine variety of blooms and green in one corner of the greenhouse at Allan Gardens.

A mass of flowers and foliage that made the fancier's heart joyful.
