British Vessel Owner Would Receive Over Million and Quarter Annually.

Canadian Press Despatch.
Ottawa, Feb. 19.—The text of the agreement between the governmen and Sir William Petersen, under the terms of which the latter agrees to establish and maintain a fleet of ten ships on the Atlantic in consideration of the annual payment of \$1,375,000 is published today.

Under the agreement, which bears the signatures of Hon. T. A. Low, minister of trade and commerce and Sir William Petersen, Sir William agrees to supply for the Canadian service a fleet of ten up-to-date new ships of the most modern type with all the latest known appliances for insuring economical, easy and cheap transportation and fitted in every respect for ocean service.

Some of these ships, it is stated are now in course of construction and all are to be approved by the British board of trade and are to have the highest classification of Lloyd's. Particulars and details of the ships are to be furnished to technical representatives of the govern nical representatives of the government for their approval.

The government agrees to pay Sir William Petersen an annual subsidy of \$1,375,000, "from the consolidated fund or other proper moneys in equal-installments at the end of each month (unless otherwise agreed upon between the contracting parties) in each year during the continuance of the agreement, the first monthly payment to become due and payable through increased production, hence its present policy of lower tayation one month after the commencement of the service." its present policy of lower taxation for raw products for basic indus-

tries." So declared Premier W. L. is agreed that the service shall commence not later than June 15. Mackenzie King at a banquet held 1925, and continue fo ra period of here last night in honor of Dr. J. that has been mutually agreed upon.

The terms of the agreement are embodied in a notice of motion under the name of the minister of trade take it that our policy will help the and commerce, asking for the approval of the house of commons.

Tomorrow is set for presentation of the motion to the house and a strenuous debate will probably develop.

Take it that our poincy will help the people as a whole and not the pockets of a few composing the big interests," he said. Other members of the federal cabinet present were: Hon. E. Lapointe, Hon. Dr. King.

Proposed Net Expenditures For Current Year Set at \$5,065.

SURVEY APPROVED

Estimates for town planning in London during 1925 show a net increase in costs of \$1,565.

At the February session of the town planning commission, estimates were adopted, showing proposed net expenditures of \$5,065 during the current year. City Engineer W. P. Near explained that an item of \$1,200 expenditure for locating "monuments" on streets might be transposed to the county planning account in the event

Fear Hardships. Resolutions passed at the recent

town planning conference here were indorsed by the commission, though some objections were raised. Ald. Harry Bottrill thought asking for building bylaws in townships would cause hardship to prospective owners of small homes. The city engineer did not believe a resolution calling for the sale of building lots by plan rather than description was infallible, and that legislation to regu-late size and frontage of building lots would be difficult to secure.

Rectory Street Building Will Make Way For New High, Trustees Think.

Demolition of the old Rectory street public school in order to make way for the new east end collegiate institute seems almost certain.

The wrecking of the building or the securing of additional property adjoining the present site is a question which will be considered first by the building committee appointed by the board in connection with the new collegiate.

Expression of opinion as to the tearing down of the school at this ime appears to be equally divided amongst the members of that committee, Chairman S. Fred Lawrason, Vice-Chairman A. Roy Cairneross, Trustees B. N. Campbell, and Wm. G. Murray, the first two being strongbuilding from the site immediately and the latter two being inclined to favor the plan of leaving the build

But, if and when the question demolishing the building comes be-fore the board, the majority of the members are likely to favor the destruction of it clear the way for the march of progress. Trustee (Rev.) Roy D. Mess and Trustee E. F. Will-mot have expressed the opinion to The Advertiser that the old school should be torn down, while Trustee Mrs. J. I. A. CHILDREN FETED AT HALL OPENING

Warner Hall Auditorium Filled With Frolickers Last

In connection with the opening of Warner hall, one of the most delightful events took place last night, when the children of the Sunday school and congregation of Cronyn Memorial church were entertained. About 300 children gathered in the church, and at 6 o'clock paraded into the auditorium of the new hall, where a delicious supper was served under the direction of Miss E. Childs. The hall was attractively decorated with balloons, and the five long tables were arranged with red and white crepe paper, candles and dainty

Following the supper, sports of all kinds were arranged for the children, everyone got a prize, with special prizes going to the winners, Ken. Smith and Miss B. THE ASTONISHING ADVENTURE OF JANE SMITH

Jane Smith was the image of her cousin, Renata Molloy, and that is where all the trouble begins in Patricia Wentworth's absorbing love story.

"The door! The door!" and the members of the inner council rushed to the screen to find-a girl, clad in a night dress, walking in her sleep. Had she heard? Should she be 'eliminated''? Such a unique, breathless tale is seldom written.

Every reader will adore Jane, a delightful person, who lived a delightful love story amid secret passages, intrigue and machinations. And every reader will be thrilled, absorbed, charmed-no one can put it down, and most will wish it had been twice as long.

BEER INTOXICATING

Dr. Wylie of Washington Is Astounded at Statements

Canadian Press Despatch.

Toronto, Feb. 18.—When interviewed on his arrival here today to address the prohibition union, Dr. Harvey W. Wylie, scientist, of Washington, said he was astounded by the words of Attorney-General Nickle in the House that the 4.4 per cent beer now proposed for Ontario was no more intoxicating than coffee. There is no comparison at all between the two, said Dr. Wylie.

He cited an experience at a drinking bout in a Berlin university in 1878, and told how German and American students got drunk on 2 per cent beer. "Who," asked he, "can say that 4.4 per cent beer is not an intoxicating beverage?"

"No one, except those who are without experience and knowledge, can say it. If I were a judge on the bench I would take judicial knowledge that 4.4 is intoxicating. There was no top-heavy star in the American league pitching department last season, and Johnson for that reason really deserves the greater credit, because he was forced to fight his way, along in a race that did not possess a man who could win four-fifths of his games with any certainty.

The result was a majority for the O. T. A., and Premier Ferguson at an early date took the opportunity of stating that he would make it his business to see that the will of the people was carried out; the voters had spoken and that was all he desired. The Free Press might do well to publish the premier's own words upon that occasion. They can be found in almost any paper of October 24, 1924. After dealing with the reasons for taking the vote, Premier Ferguson said:

"Furthermore, the government made it clear that there would be no doubt as to the course to be followed if the majority voted in favor of the Ontario temperance act. Yesterday's pronouncement shows that the majority of those voting favored the continuance of the Ontario temperance act. The government is determined to pursue a consistent course.

"The basis upon which government rests under our institutions is that the majority must prevail. Disregard of this principle breeds discontent, which must inevitably develop into serious disorder. The popular will will be recognized and accepted and the act will remain upon the statute books."

Despite all the squirming the Free Press may do, these words of G. Howard Ferguson are very plain. If the English language has any meaning left in it, he said that he would accept as final the vote of the people. If the people of a province have a reason to expect anything from the first man of the province it is that they should be able to place reliance on his word.

Corrects Report That He Assisted at Installation of Elders in New St. James' Church.

Editor of The Advertiser:

Sir,-Would you allow me to correct an item in the Monday, last week, issue of your paper? My name is mentioned among those assisting at the installation of elders in New St. James' church, and this conveys the impression that I am still identifying myself with the anti-unionist majority in New St. James'. I wish to correct this impression. I was not present at the installation. How I could assist in such case I leave handling of settlers 'n the northern to your informant. My letter of withdrawal from New St. James' was in the session's hands a week before the installation and, pending disposal of the letter, my name ought not to have appeared

in the list as published. It is a matter of no interest to the public where I stand on church union, and I have never had any desire to have my name paraded in the papers. But I do not like to be wrongly represented, and for this once I break silence. I am decidedly in favor of the union, and have been so for years. The arguments urged against it during the past months have been very strong in prejudice, very strong in misrepresentation, but amazingly weak on the real merits of the question. And the spirit behind the arguments has been often shocking. Anti-unionism may suit the asyou-were type of Christian. But our Savior's prayer, "that they all may be one," points to a nobler ideal. The spirit of Christ is a spirit of Christian unity, and real unity among His followers will ever tend to bring them together instead of keeping them apart. I stand with the the debate yesterday. Man Himself To Blame.

He Has One Chance, and That is to Line Up With Will of the Almighty,

Sir,-There never was a time in the history of the world that there was so much unrest as there is at the present time. Men everywhere are trying to find some way of adjusting life to the stress of outward things. The late great war set us all thinking. There were no supernatural He took any part in it. Prayers did not soften pain, divert bullets or bring back any boys. The boys that did not come home were prayed for just the same as the boys that did come home. This taught us that this world is governed by an immutable law called the law of cause and Women's skirts will be short. So is the effect. In order to make man the highest work of His creation He endowed him with the power of thought and then He said work out your own salvation or freedom with fear and trembling.

War is the mortal fighting the immortal, man trying to coerce God. It is social insanity, one against another. It is mortal mind defying driver is the suggestion that he may be run in divine mind. This war has taught us to look forward instead of looking backward. We are drawing away from old superstitions, dogma and Hastings council is going to have the piano abstruse theology to a better understanding of our relationship to universal mind.

If our relations to the divine mind were cut off we would have no use for reason. Dowlers Buyers Purchase Heavily

That the coming season will show a decided improvement in all classes of business throughout Canada is the opinion of Mr. J. Dowler, vice-president, and Mr. A. I. McLern directors of P. H. A. McLean, director of R. H. & J Dowler, Limited.

Both men have recently returned from an extensive buying trip, or which they met many of the best Canadian and British manufacturers.

From the reception they received, it is obvious that Canadian firms of unquestionable financial standing, who purchase for cash, such as Dowlers have done for the past 22 years, are welcomed in very market.

The optimism Mr. Dowler feels egarding future business condi tions is shown by the number of large orders placed for men's and ovs' merchandise to present and coming fall and win-

A Song Two Wanderers

Dear, when I went with you To where the town ends. Simple things that Christ loved They were our friends; Tree shade and grass blade

And meadows in flower; Sun-sparkle, dew-glisten, Star-glow and shower Cool-flowing song at night Where the river bends, And the shingle croons a tune-These were our friends.

Under us the brown earth, Ancient and strong,
The best bed for wanderers
All the night long; Over us the blue sky Ancient and dear.

The best roof to shelter all

Glad wanderers here; And racing between them there Falls and ascends. The chantey of the clean winds-These were our friends. By day on the broad road

Or on the narrow tr Angel wings shadowed us, Glimmering pale. Through the red heat of noon; the twilight of dawn Prophets led us on.

Heroes were kind to us Day after happy day; Many white Madonnas We met on our way— Farmer and longshoreman, Fisherman and wife: Brave enough for life. imple folk that Christ loved-They were our friends.

WOMEN and THE HOME DRESS By MARY MARSHALL

Dorothy Dix

Plant Early in Life the Seed of a Real Friendship With Your Daughter, Cultivate in Her Character and Good Principles.

A mother writes to me: "I have four little girls. I want to rear them afternoon. to be fine women. How shall I do it?

Well, if I had four little daughters to bring up, I should begin by winning their friendship. Not love. Virtually all girls love their mothers, but very few girls are friends with their mothers. And it is quite another thing to be on intimate terms with her.

Every mother looks forward to be ing chums with her daughters when they grow up, but few ever realize this dream. Instead, they find that their daughters are strangers with whom they are less acquainted than they are with any other women in the world, and they complain bitterly that they never know what their girls are doing. This is because they have never

made friends with their children. They never made companions of them when they were little. There ness were no jolly secrets between them, no habit of confidence established, no sure knowledge that mother would always understand, that she would always sympathize and always help.

If I were my daughters' most intimate friend, I would know that they would not go far wrong, for I would be a sort of special providence watching over them, knowing what they were thinking of doing before they did it, in time to protect them from danger.

I should teach my daughters selfcontrol. It is the girls who have never been taught to control their passions who recruit the sorrowful sisterhood of the streets. It is the girls who have never been taught to control their tempers who fill the divorce courts, and break up their homes, and orphan their children. It is the girls who have never been taught to curb their desire who ruin their husbands with their extravagance, and are a curse to the men who marry them.

I should teach my girl baby in her cradle to bite back her cries when she was hurt. I should teach her as soon as she could understand anything to do with out things she wanted without whining. I should teach her to do the thing she didn't want to do because it was her duty, and to have the grit to carry on when it took sheer nerve to do it. And when I had taught her courage and fortitude and persistence, I would know that I had given her areanons that her with which to fight the battle

I should give my daughters the best education that I could, and this would include a thorough and pracduties, for no matter what else a of America. Others who went from woman needs to know in life she is woman needs to know in life she is dead sure to need to know how to cook and sew, and to be an expert in buying butcher's meat and darning

I should see to it that my daughters were trained in some gainful occupation, by which they could support themselves if necessary. A good trade or protession is the best protection that any girl can have against making a foolish marriage, or having to endure a miserable one. The girl who can make a good salary does not have to marry for a home and a shopping ticket. The girl with a career does not have to marry to find an interest in life, and an outlet for her ambitions. The woman who can go back to her old job any day does not have to stand a brutal and tyrannical

I should tell my daughters of all the dangers that beset the pathway of a girl. I should tell them why it is wrong to let men kiss them and fondle them, and that a woman's peril is always more from within than it is from without.

If I had daughters, I would pray God to give me the wisdom of the owl and the subtlety of the serpent, and an iron hand in a velvet glove in dealing with them. For rearing a girl is one of the biggest jobs on earth. DOROTHY DIX.

And Now the Younger Girls Wea Hats That Show the Eyes and Sometimes Some of the Brow.

If the smartly dressed younger girls have their way, the next real development in the way of millinery fashions will be hats that show something of the forehead or bang in front. For several years past about the best way for a woman to look hopelessly out of fashion was to wear her hat high up on the crown of her head. Hats, like girdles and belts, were worn low.

The exact angle at which the hat was worn has been a very important matter. Lately hats have been pulled quite low at the back-the shingled head has been responsible. Though we have been wearing hats of all sorts low on the brow at the front, we have worn them considerably lower in the back-so that the ine of the crown's brim has not een a level one

PUBLIC SCHOOL FINAL TUESDAY

Big Program of Speed Events Will Follow Hockey Game.

Supervisor Gerald N. Goodman of the city playgrounds announced last night that a big program of speed events would be staged around the hockey final between Boyle Memorial and Trafalgar school teams at the arena Tuesday

This is the first time that the playgrounds work of the summer has been linked up with winter sport. Tuesday night's big affair therefore presents something unusual.

Although supervision of the hockey the playgrounds connection with the winters port, Taesday night's program should be the foundation for a revival of first of all speed skating and eventually fancy skating on the public rinks.

rinks.

The schools had been given a general idea of the events that would be placed on the first program, and as a result, the youngsters have been practicing speed skating. The rivalries developed on the playgrounds in the summer will be revived Tuesday night, although the arrangement of rinks and playgrounds are slightly different.

The program of seven events with novelty races to enliven the proceedings does not seem long, but, as there will be entries from 19 schools, most of the races will have to be run off in heats, and the bill will be sufficiently lengthy.

heats, and the bill will be sufficiently lengthy.

The hockey game will probably be the chief attraction of the evening's program, and, as a result of the wide interest manifested in the affair, 4,500 tickets—practically calling upon the full seating capacity of the rink—have been issued to the various schools, and will be for sale uptown as well.

A competent group of officials will be gathered to judge the various events.

BIG LEAGUE STUFF. Even the rumored price that Tex Rickard offered for the Hamilton team, bag and baggage, and the fact that \$5,000 is an oft-quoted price

for desirable hockey players shows the tendency of hockey. Within the last decade \$10,000 paid for a ball player caused a flurry of comment and much strain on the eyebrows. Now they pay \$50,000 the ciphers correct.

News despatches state that Leo Dandurand of Les Canadiens, and his temperamental star, Morenz, will look over the Stratford-Niagara Falls game Friday night with a view to picking out a few likely pro prospects. This isn't startling evidence that hockey scouts are appearing on the horizon for the first time, but it shows that wise managers like Dandurand are finding more time each season to personally look over the amateur crop and catalogue their impressions.

Considering that the strain of competition often breaks down the strongest of men, it is not surprising to hear that before a certain girls' "athletee" had a mild attack of hysterics. "athlete" had a mild attack of hysterics.

LOSERS SCORE FIRST

Special to The Advertiser,

Owen Sound, Feb. 18 .- Owen Sound Greys beat Kitchener 6 to 2 here tonight in the semi-finals of the junior O. H. A. Kitchener got away to a good start, playing well to score the two first goals, after which the Grevs woke up and put three across, closing the first

The second period was all Owen Sound, the Greys adding two more goals, while Kitchener failed to score, though fighting hard. The third period opened with excellent hockey, both teams winning applause from the crowded arena, the round ending with one more for the Greys, making the score, Owen Sound

The Greys were at top form, but they had to be to stop the persistent efforts of the Kitchener lads, who not only put up a stubborn resistance, but who made things interesting at times. The Greys had much the better of the play, their speed being flashy and time, and again they were right in on Klem, only to

have him make a sensational save, and it was his great work in the nets that was responsible for keeping the score down. The Green Shirts proved a hard get past the Owen Sound defence with He had all his speed, was tricky with the puck and had more shots on goal than the rest of the team put together. He scored four of the six goals, and was dangerous all the way.

Gross was the best man on the Kitchener outfit. He showed some nifty stickhandling and had to be watched continually. Groh on the opposite wing, was also good, while Schmidt, one of the subs, turned in a good game.

The line-up:

Owen Sound—Goal, Smith: defence, Calligan and Burmister; center, Sturgeon: wings, Burns and Keeling; subs, Randall and Clark,

Kitchener—Goal, Klem; defence, McKay and Kuntz; center, Bender; wings, Gross and Groh; subs, Schmidt and Heller.

ACES WIN RIGHT

Overwhelm Stratford Mogule 33--12 in Deciding Game at Y. M. C. A.

"Y" Aces sweep the Stratford Moguls off their feet with a 33 to 12 score in a crucial intermediate O. A. B. A. bat at the Y. M. C. A. last night, w gave the locals the right to meet

C. in the next round. From defence out the locals versuperior. The Moguls are noted for their strong guards, but the Aces rubbed the polish off their brilliancy with wenall lopsided, but the game itself was far from it. The Moguls clung on and fought every inch of the way, displaying a dogged spirit that alarmed the fans in spots.

The first period took on a ragged appearance. Referee Johns keeping the down on the plays, but finally the locals broke away, after milling around in front of the Stratford net, Frank Shaw Collingwood Holds Hamlets

pointer of the period from the side-iines. Score: Aces 12, Moguls 8.

In the final stanza both teams opened up. Shaw got four points, two on a basket and two on fouls. Smith tallied from outside defence. Lawrence counted on Edwards' rebound, and Shaw got in on the end of a combination. Edwards chalked up a point on Fox's foul. The remainder of the game was all Aces,

The game did not produce any spectacular hockey, Collingwood's close checking breaking up New Hamburg's usual snappy passing game. The Hamlets were below their usual form, little combination being played, they relying almost altogether on long shots and fast following in for the rebounds. Cook in the Collingwood net, was sensational in his net-minding, giving the Hamburgers little chance to slap in rebounds. The northerners were outclassed throughout, but they hung on grimly and back-checked tenaciousity. Clark and (Cox were the stars of the shipbuilders line-up, with Cook in goal saving his team from defeat. Clark carried the puck well, and in addition the content with the shipbuilders and the shipbuilders are shipbuilders.

May and June, the wheat market scored a material demand today in the early dealings. The months named are as a rule those in which demand from abroad becomes urgent. Sharply higher quotations at Liverpool today tended also to lift values here. The opening, which ranged from 36 to 24 to higher, was followed by something of a reaction, but then by fresh gains, with May up 7½ above Tuesday's low point. Chicago, Feb. 19.—Owing largely to predictions from a leading exporter that the wheat trade of the United States will be on a domestar basis during April. May and June, the wheat market scored a material demand today in the early dealings. The months named are as a rule those in which demand from abroad becomes urgent. Sharply higher quotations at Liverpool today tended also to lift values here. The opening, which ranged from 1/2 to 21/2 higher, was followed by something of a reaction, but then by fresh gains, with May up 71/2 above Tuesday's low point. Corn and oats were firmer, sympathizing with wheat. After opening 1/2 to 13/4 c advance, corn sagged somewhat and then rose higher than before. Oats started at 1/2 to 3/2 up. Later there was a slight further upturn. CHICAGO GRAIN MARKET. Reported for The Advertiser by Jones, Easton, McCallum, Royal Bank Bidg. Chicago, Feb. 19. Winnipeg, Feb. 19.-Wheat prices got \$1.971/2. Prices of other grains also

lose.

Right from the opening, the market lar dropping % at 94%. Cons. Smelter dropped % to 68. reflected a bullish tendency, an excelent class of buying coming out. Liverpool cables were from 31/2 to 43% pence higher per 100 pounds. This advance imparted a firm tone to the local market. The seaboard reported that the United Kingdom and Greece bought wheat overnight.

Canadian Press Despatch. Winnipeg, Feb. 18. - The wheat market continued to be a dull and listless affair throughout most of today's session, with the trade volume small. During the last hour, in sympathy with strength displayed in other markets, a fairly firm tone developed, with the close %c higher for May, %c higher for July and 1%c higher for October. At the high point of the day the May future touched \$1.97, and went as low as \$1.93%. The trade volume was so light that the brokers found it difficult to execute orders without springing prices one way or the other.

The seaboard reported overnight interest in wheat small, sales being estimated at 500,000 bushels in all positions. France and Italy were said to have taken small quantities of United States wheat and some rye.

AMERICA WANTS ROTORSHIP PATENT

Wonder Vessel Examined by Coastwise Chief in Scottish Harbor.

PORT IS AGOG

By JAMES B. WHARTON, pecial Correspondent of The Advertiser and the North American Newspaper Alliance,
Special Wireless to The Advertiser.

Grangemouth, Scotland, Feb. 18 .-The Firth of Forth is agog over the Buckau, the pioneer rotorship which arrived here yesterday after weathering a severe buffeting on her North Sea passage from Cuxhaven. Shipping experts from London were agog, the first in the crowds besieging the strange vessel.

C. P. Stewart, secretary of the Atlantic and Gulf Carriers' Associaing virtually all coastwise sailing vessels on the Atlantic seaboard, arrived from London today to investigate the rotorship with a view to acquiring a patent for the conversion of one of the association's sailing vessels into a rotorship. Although most of his questions regarding efficiency are unanswerable until technical experts have had opportion of the United States, representtechnical experts have had opportunity to work on the mass of data accumulated by observations during the voyage, Mr. Stewart admitted that he had already approached that the had already approached that he had already approached that the had already approached that he had alread the voyage, Mr. Stewart admitted that he had already approached Anton Flettner, designer of the rotor-

ship.
"I am not yet sufficiently convinced of the practicability of the rotor principle to make a definite offer," Mr. Stewart told me today.
"But I have a very open mind."

The Buckau plans an early voyage to Hamburg, probably with a cargo of coal. The two huge rotors, overhauled today, revealed not the slight-est damage in spite of the abnormal stress of three days of North Sea

gale. (Copyright, 1925, United States, Canada, Japan and South America, by North American Newspaper Alliance. Copyright, Great Britain, by the Manchester Guardian; Sweden by Dagene Nyfeter; Denmark by Politiken; Germany by Rudolph

Gradual Sinking of Mexico City PUREBRED COW BAGGED Is Reminder of Old Prophecies BY YOUTHFUL HUNTERS

Associated Press Despatch.
San Antonio, Texas, Feb. 18.—The old prophecies of the Aztec priests that the lakes of the city of Mexico would rise and engulf

the Spanish conquerors who profaned their temples and shattered their idols have been recalled following reports of engineers appearing in Excelsior, published in the Mexican capital that the city is slowly sinking

Settling of heavy buildings is easily seen in parts of the city, the paper says, while in other sections scientific tests show that the foundatons of buildings are steadily sinking into the sub-soil. The great cathedral of Mexico, one of the largest buildings in the world, is from one to three centimetres below its original level.

Its foundations are said to have been composed of idols from

Aztec temples, broken and mingled with the other stone.

EXPECTANT MOTHERS

Letter From Mrs. Ayars Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

"Spring Valley, Sask.—"I took the Vegetable Compound before my last confinement, when I got to feeling so hadly that I badly that I could not sleep nights my back ached so across my hips, and I could hardly do my work during the day. I never had such an easy confinement and this is my sixth baby. I read about Lydia E. Pinkham's Vegetable Compound in the 'Farmer's Telegram' and wrote you for one of your books. We have no druggist in our town, but I saw your medicine in T. Eaton's catalogue. I am a farmer's wife, so have all kinds of work to do inside and outside the house. My baby is a nice healthy girl, who weighed nine pounds at birth. I am eeling fine after putting in a large garden since baby came. (She is as good as she can be.) Yours is the best medicine for women, and I have told about it and even written to my friends about it."—Mrs. ANNIE E. AYARS, Spring Valley, Sask.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and one up the entire system so that it may work in every respect as na-ture intends. All druggists sell this dependable medicine. Give it a trial.

Don't Shirk Your Meals

If Food Distresses Due to Indigestion Stuart's Dyspepsia Tablets Will Give You a New Stomach.

Give You a New Stomach.

It is really astonishing the way one or two Stuart's Dyspepsia Tablets sweeten your sour stomach, stop gassiness, end heartburn, take off the bloat, make you feel easy, contented and ready for the next meal with a zestful appetite.

It is because these tablets give your stomach an alkaline effect. They also aid digestion. You may eat meat, beans, pie, hot bread, seasoned dishes, sausage, cheese and so on and yet these tablets not only prevent distress of indigestion but serve to stimulate stomach and intestinal secretions that enable you to get the nutritive value of what you eat.

They are the standard for dyspeptic conditions and are sold in drug stores everywhere at 60 cents a box. Try them today. They won't fail you
