I.C.R. DETECTIVE HERE SEEKING INFORMATION

Regarding the Sale of Junk to Henry Garson, Which Will Likely Call for a Thorough Investigation by the Management

Detective Tingley, of the I. C. R. was in the city a few days ago investigating an alleged serious irregularity in the shipment of some material from the I. C. R. to Harry Garson, a Jewish junk dealer of this city.

The irregularity is supposed to have been in the weight of the goods sold to Mr. Garson. It is claimed that one of the I. C. R. officials at Moncton, had been rather easy on the weights. A reporter from the Star visited Mr. Garson in reference to the matter. Mr. Garson said that so far as he was concerned there was no irregularity in the weight of the goods. He stated that the weight was given out by the I. C. R. officials.

During the years of 1906 and 1907, Mr. Garson says his dealings with the I. C. R. have amounted to \$34,000. In 1906 he bought 600 tons of car wheels from the railway. Last week he purchased a shipment of scrap brass from the railway for which he paid \$17,724.

These car wheels were awarded by tender and about a year ago Mr. Garson tendered for a quantity offered by said tender, was also submitted by the Rhodes Curry Co., of Amherst, but Mr. Garson's tender being the highest, was accepted. Mr. Garson later disposed of part of this shipment to the Rhodes Curry Co. and the remainder to a firm in Montreal. When asked concerning this Mr. Garson said that he was able to dispose of the iron to the Rhodes Curry Co. because of the rapid advances in the price of the material from the time he purchased it to the time he sold it to the Amherst firm.

Mr. Garson said he did not have any conversation with Detective Tingley when that official was in the city about the matter.

An inquiry at the general manager's office in Moncton this morning the Star was informed that no information could be given about the matter at present.

It is probable that an investigation into the whole affair will be held shortly.

HAVE LOCATED THE LOST EARTHQUAKE

NEW YORK, Sept. 11.—The earthquake reported to have occurred in the Columbia Islands on Sept. 1 and 2 is believed to be the "lost earthquake" recorded early in the month on the seismograph at Washington, in England and at Ottawa. The Washington experts state that it occurred about 6,000 miles from Washington, and from the data which the instrument furnished believed that it was in the region of Alaska.

BANK CHANGES.

Several changes are soon to take place in the Bank of New Brunswick. A new branch is being opened on the first of October in Halifax. This will be placed under the management of Mr. L. Robertson at present inspector of branches for the New Brunswick Bank.

Another change which will interest a large number in this city is the promotion of William Jardine, at present accountant in the head office in this city to the management of the Fredericton branch to supersede Mr. Lee, at present manager in Fredericton, who will return to the bank in St. John. Mr. Jardine has been in this city for nearly two years and during that time has made a host of friends who will join in congratulating him on his well merited promotion, but will deeply regret his departure from the city. In athletic circles Mr. Jardine has become especially popular, having since he arrived in St. John taken a keen interest in various sports. Last fall he played half-back on the Marathon football team, and during the winter he played centre on the Bankers' hockey team in the city league. In these different games he has earned the well deserved reputation of being a thorough sport and white player through. The promotion goes into effect in about six weeks.

NEW ZEALAND NOW RANKS AS DOMINION

LONDON, Sept. 11.—A Royal proclamation has been issued by which New Zealand is advanced to the position of a colony and will hereafter be known as "The Dominion of New Zealand" sharing with Canada this coveted title.

AMERICAN LABOR WHOLLY RESPONSIBLE

For the Anti-Asiatic Riots in Vancouver

Says the London Times—The Outbreak Arranged to Let Japan Know the Feeling on the Coast.

LONDON, Sept. 11.—The Times in an editorial article this morning says it is convinced that there is now full and were actually organized by American ample confirmation for the belief that the anti-Oriental riots in Vancouver labor amongst the men whose intrigues brought San Francisco under the domination of Ruff and Schmitt. Continuing the paper says it believes this shameful riot upon British soil was gotten up by officials of American labor organizations for the purpose of conveying to M. Ishii, the distinguished member of the commercial department of the Japanese Foreign Office who is now in Vancouver, the feeling of the labor element of the Pacific coast.

Accounting for the race prejudice evidenced in such disturbances the paper says: "The plain truth is that on account of his thrift and industry quite as much as on account of low wages for which he is famous, Asiatic is detested as a dangerous competitor on the labor markets which the laborers want to keep a monopoly in white hands."

TOKIO, Sept. 11.—The publication of extended accounts showing the trouble at Vancouver, B. C., has not developed any further criticism by the press. The public accepts the outbreak as the action of irresponsibles, who may be punished.

HAS FOUND THE RUINS OF ANCIENT CITIES

Columbia Professor Returns From Ecuador and Reports Very Interesting Discoveries.

NEW YORK, Sept. 11.—The Times today says: M. H. Saville, professor of ethnology at Columbia University, returned from a trip to Ecuador on the steamship Panama and said that he had discovered the ruins of cities near the coast which contained many evidences of a race hitherto unknown to present day scientists.

The professor's researches extended along the Pacific about fifty miles to the north and about the same distance to the south of the equator. Somewhere between those points and to a distance about 100 miles inland, he found evidence of a city of antiquity. The city, he said, had streets lined with houses of adobe construction. Though the dwellings had been made of light material, a sort of palmetto or thatch, they had been constructed very densely with a view to withstand the shocks of the frequent earthquakes of the region and were intact.

In them were found utensils for cooking and other domestic purposes made of pottery and wood and the like. Professor Saville said he believed the city had contained 3,000 or more people 500 hundred years ago. In his opinion the race was one of the highest civilization known in America previous to the coming of Columbus.

SUICIDED AFTER HE HAD COMMITTED MURDER

CHICAGO, Ill., Sept. 10.—Edward J. Hildebrandt, a painter, thirty years of age, committed suicide by shooting himself through the head today when about to be arrested for the murder of Mrs. Maude Westfield, at whose home he was a boarder. Mrs. Westfield was found shot to death in her bed early this morning. Suspicion was first directed to Hildebrandt. The husband of the murdered woman, Herman Westfield, who is employed at night as a printer, when he returned from work found the body of his wife with a bullet wound in the head.

The police traced Hildebrandt to a resort through letters found in his trunk. They believe that they found the motive for the murder in the letters written to Mrs. Westfield from Hamilton, Ontario, by a man who signed himself as "The" Studebaker and which are thought to have aroused Hildebrandt's jealousy.

PRICES OF LIVING GREATLY REDUCED

Food Supplies are Away Up, Says U. S. Report
Cost Over Fifteen Per Cent More Than They Did Ten Years Ago—Wages Also Much Better.

WASHINGTON, Sept. 10.—How the cost of living in this country has increased since the year 1896 is shown in a summary of the report of the Bureau of Labor sent to the printer Monday. The average price of food and other necessities in 1906, when compared with the average prices for the preceding year, which, in February, 1906, were only 64 per cent, grew steadily higher throughout the year, the price in December, 1906, being 61 per cent, above that of the preceding December. The price in December, 1906, was 45 per cent, higher than the average for the year 1896, which year showed a higher average than any other year during the 17 years, 1890 to 1906, covered by the investigation of the Bureau of Labor.

The increase in prices in 1906 over 1905 applied, in unequal degree, to 25 of the 30 articles included in the investigation. The articles which showed the greatest advance in prices are—Lard, 8.8 per cent; evaporated apples, 11 per cent; fresh pork, 8.8 per cent; bacon, 8.4 per cent; ham, 7.3 per cent; while the advance in fresh fish and margarine exceeded 5 per cent. The only articles which showed any material decrease are flour and sugar.

BETTER ADVANCES MOST.
The articles which showed the most marked advance in prices in December, 1906 over December, 1905, are butter, 15 per cent; lard, 13.3 per cent; fresh pork, 12.2 per cent; dry or pickled pork, 11.8 per cent; bacon, 11.1 per cent; and ham, 8.8 per cent. The only articles which showed any marked decline in prices in December, 1906, from the price in December, 1905, are potatoes, 5.8 per cent, and flour, 4.8 per cent.

The Bureau of Labor balances this with statistics showing that wages in manufacturing and mechanical industries have kept a little ahead of the advance. The inquiry, however, has been confined to wage earners—that is, what is generally known as the "labor vote." No account is taken to show the condition of salaried men, clerks, salesmen, bookkeepers and typewriters.

In the principal industries of the country average wages an hour in 1906 were 45 per cent, higher than in 1905, the regular hours of labor a week were 0.8 per cent, lower, and the number of employees in the establishments investigated were seven per cent, greater. The average full time weekly earnings for each employe in 1906 were 2.9 per cent, greater than in 1905. There were shorter hours.

In the manufacturing of iron and steel, the average wages per hour in 1906 were 11.3 per cent, higher than in 1905. In the manufacture of electrical apparatus and supplies the increase was 10.1 per cent. In street and sewer work done by contract the increase was 4.7 per cent. In iron and steel, December 1906 showed an increase of 10.1 per cent, in the manufacture of cigars 8.4 per cent.

INCREASE IN WAGES.
In the manufacture of bar iron the increase in the wages an hour was 6.9 per cent, and in the building trades 6.1 per cent. Briefly stated, two industries showed an increase in hourly wages of more than 10 per cent, 7 industries an increase of more than 5 per cent, but less than ten per cent, and 11 industries an increase of less than 5 per cent. In one industry—paper and wood pulp—there was a decrease of 1.1 per cent. In the industries as a whole, weighted according to importance, the increase in hourly wages was 4.5 per cent.

The retail price of food weighted according to consumption in representative workmen's families, were 2.9 per cent, higher in 1906 than in 1905. The advance in wages an hour from 1905 to 1906 was greater than the advance in the retail price of food, the purchasing power of an hour's wages, as measured by food, was greater in 1906 than in the preceding year.

In 1906 the purchasing power of an hour's wages as expended for food was 1.4 per cent, greater than in 1905, and the purchasing power of a full week's wages was one per cent, greater in 1906 than in 1905, or, in other words, an hour's wages in 1906 in the manufacturing and mechanical industries of the United States would purchase 1.4 per cent, more food than an hour's wages in 1905 and a full week's wages in 1906 would purchase one per cent, more food than a full week's wages in 1905.

As compared with the average for the ten year period 1890 to 1899, the average wages an hour in 1906, were 34.2 per cent, higher, the number of employees in the establishments investigated were 42.9 per cent, greater and the average hours of labor a week were 34.2 per cent, higher. The average earnings for each employe a full week in 1906 were 18.5 per cent, higher than the average earnings a full week in the ten years 1890 to 1899.

The retail price of the principal articles of food, weighted according to family consumption of the various articles, was 15.7 per cent, higher in 1906 than

THE LUSITANIA PROMISES TO BREAK ALL RECORDS

AGED RESIDENT OF
ALBERT CO. SUICIDES

Robert Mulligan Blew Out His Brains

With a Shot Gun—Was Aged and Ill—Had Formerly Been a Very Well Known Citizen.

Robert Mulligan, for many years a resident of New Hunter, Albert Co., committed suicide yesterday by blowing his brains out with a shot gun. The unfortunate man who was about 80 years of age had been a parish charge for some years and was living in the home of Jeremiah Tingley, at the Ridge, a few miles from Water-side. He had been in declining health for some time having been afflicted with paralysis of the tongue which practically prevented him from talking and almost from eating, so that recently he has become very despondent, having it is understood, expressed the idea that his death would be a good thing for himself and those about him. It was not thought, however, that he would carry out any act of self-destruction, and the terrible deed yesterday caused a shock throughout the community. He evidently planned the matter very carefully. He took his gun down in the field where he lived, and having attached a cord to the trigger, fired the gun with his foot, the weapon being pointed at his head. The charge entered near one ear, blowing out the lower part of the cranium and part of the brain. The report of the gun was heard by Elizabeth Fullerton, who was working near by, and who rushed to the scene to find the old man dead with the gun beside him.

Dr. F. C. Murray, corner at Albert was at once summoned and after viewing the body decided that an inquest was unnecessary as it was a clear case of suicide.

Mr. Mulligan was a native of Ireland and a strong Orangeman, and a man of more than ordinary intelligence being particularly well versed in the history of Orangemen and well informed on current topics. He has been a resident of Albert county for fifty years.

ONLY ONE STYLE OF BAPTISM ACCEPTED

Baptists of Ontario Believe in Immersion and Cannot Change Their Ideas.

TORONTO, Sept. 11.—The Baptists decline to unite with the churches which are at present in Canada negotiating with a view to union and which invited them to enter into conference with them. They find "fatal impediment" in the practice of infant baptism also in the adoption of another mode than immersion. They desire to avoid all alliance with secular authorities, they will not identify themselves with creeds which have any tendency to establish a human standard over the scriptures, and they recognize no claim to ecclesiastical succession. Such is the substance of the reply presented yesterday afternoon to the joint committee on church union of Presbyterians, Methodists and Congregationalists by the committee of the Baptist convention of Ontario and Quebec on church union.

PERSONAL

Miss Frances Hazen, daughter of J. D. Hazen, M. P. E., left last evening for Toronto where she will attend Havelock Ladies' College.

J. E. Palmer, B. A., of Hampstead, Queens Co., left last evening for Montreal to resume his studies in medicine at McGill.

Percy McAvity, son of S. McAvity, left for Toronto last evening to resume his studies.

Dr. Pugsley came in from Ottawa on the Montreal express this morning. Fred Goodspeed, C. E., left for St. Martins by the noon train.

R. W. McLellan and Wm. McLellan, of Fredericton, were in the city this morning.

RUNYAN GETS SEVEN YEARS

NEW YORK, Sept. 11.—Charles B. Runyan, paying teller of the Windsor Trust Company, who confessed to stealing \$100,000 of the company's funds, was sentenced today by Judge Whitman in the court of general sessions to serve seven years in Sing Sing prison.

In 1899. Compared with the average for the same ten years period, the purchasing power of an hour's wages in 1906, as measured by food, was 7.3 per cent, greater, and a full week's wages 2.4 per cent, greater. The increase in the purchasing power of a full week's wages being less than the increase in the purchasing power of hourly wages because of the reduction in the hours of labor.

Was Reported by Cape Race, 225 Miles to the South East, at 5.20 a. m.—Her Average Speed Has Been 23 1-2 Knots per Hour.

CAPE RACE, N. F., Sept. 11.—The Cunard liner steamer Lusitania, whose maiden voyage across the Atlantic is expected to eclipse all ocean records, came in touch, through the wireless telegraph, with the American Continent early today. At 5.20 o'clock this morning a message received from the steamer saying that the vessel was 225 miles south east of Cape Race at that hour.

NEW YORK, Sept. 11.—The indicated position of the Lusitania is about 1,125 miles from Sandy Hook, so that if the big steamer can maintain the rate of 25 knots with which she is credited, she will reach the entrance to the port of New York about 1 a. m. Friday morning, which would make the time for the voyage about four days and 13 hours, more than 12 hours better than the record trip between Queenstown and New York of 5 days, 4 hours, and 13 minutes, held by the Cunarder Lusitania.

Such time, if made, would also wrest the best Atlantic record from the Germans, now held by the Hamburg-American steamer Deutschland.

When heard from this morning, the Lusitania had travelled about 1,655 miles from Queenstown and New York in approximately 79 hours. This would make her average speed up to that point a trifle better than 25 1/2 knots per hour. It is known that fog materially interfered with the speed of the Lusitania for many hours after she left Queenstown, her speed being at times reduced to 20 knots, so she must have steamed much faster than 25 1/2 knots to secure that average.

The run from Cape Race down the coast is generally made at top speed as conditions are favorable, and the Lusitania will be hailed as Queen of the Seas when she reaches port early Friday.

IN THE KINGS COUNTY CIRCUIT COURT TODAY

Bay Shore Lumber Co., Case Resumed—Evidence Given as to the Bush Fire and Means of Fighting

HAMPTON, N. B., Sept. 11.—In the Kings Circuit Court the Bay Shore Lumber Company suit against Thomas Brown was resumed at 10 o'clock this morning. The first witness examined was Robert Manning who resides at Scholes Dam, and who testified to fighting the fire from Monday morning till Friday and more or less for the full week until it was under control. He described the nature of the soil and the way in which the fire ran through breaking out again and again, and its progress until extinguished by himself and a gang of men working with him. Robert Connolly, manager of the Company's affairs, and a lumberman of over thirty years' experience, and in charge of the property at issue, since 1898, testified to the extent and character of the fire as seen by himself of the negroes employed to extinguish it, and the amount of damage resulting, apart from his own time and labor, and an illness of two weeks as the outcome of his exertions. The cost of putting out the fire was \$50, of repairing the dam \$250, and the value of the lumber about \$25. He also told of a conversation with Mr. Brown in which the latter told him he lighted a fire while fishing on Sunday, but had put it out, and was very sorry for the damage done. His evidence concluded the plaintiff's case, and Mr. Fowler raised the objection that there was no proof of the incorporation of the company and no proof of their holding a license for 1906 or 1907, the law requiring that the license must be renewed every year, to which Mr. White replied. The argument was in progress at adjournment for luncheon.

NOVELIST'S HUSBAND CHARGED WITH GAMBLING

NEW YORK, Sept. 11.—Dr. Charles Freeman, husband of Mary E. Wilkins, the novelist, has been arrested in his home town of Metuchen, N. J., on the charge of aiding and abetting a gambling game.

Dr. Freeman, it appears, was a candidate for the Republican nomination for mayor. It is charged that he had a citizen of the town in a game of craps against two negroes. He objected being it is alleged, to having the negroes to vote for him. The proceedings were held yesterday and Dr. Freeman was not only hopelessly beaten but his arrest on the gambling charge occurred. Dr. Freeman denies that he was present at the game, and does not take his arrest seriously. He was held in \$500 bail for the action of the grand jury.

The Bank of New Brunswick is to open a branch on Hollis street in Halifax.

NOBODY'S LITTLE GIRL. Sung by Mr. Brown.

I LONG TO SEE HER ONCE AGAIN. Sung by Miss Felix.

Views of Lower Canadian Society. Small parts of the home Men, Women and Children at 5c.

BAND. Queen's Rollaway. Every Night. We would advise beginners to learn in the afternoons if possible.

AT THE HAPPY HOUR. Formerly St. Andrew's Bank Bill for Mon, Tues, Wedn, of this week.

Both Loved The Same Man. A strong, melodramatic picture.

I Never Forgot The Girl (Comic). Not even an "auto" could kill him.

A French Military Prison. Showing the punishment given military prisoners.

2 ILLUSTRATED SONGS: YESTERDAY-Sung by Harry B. Le Roy. WHY DON'T THEY PLAY WITH ME-Sung by Le Domino Rouge.

5c-ADMISSION-5c. Open from 1 to 6 and 7 to 10.30.

Grand Carnival. FIRST OF SEASON. Victoria Roller Rink. WEDNESDAY, SEPT. 11th.

\$20-In Prizes-\$20. 55 Best Costume, Lady. 55 Best Costume, Gentleman. \$10 Best Combination, 8 or more.

SPECIAL NEW AND GAYETY MUSIC BY THE BAND. Admission 25c. Skates supplied FREE. DESHLER AND DONOHUE DRAW.

BOSTON, Sept. 10.-Dave Deshler of Cambridge and Young Donohue of Roxbury went the ten rounds in an interesting boxing bout at the Winnimmet Club, Chelsea, tonight.

FOUR

for whoever wanted to enter. These denominations were given an invitation. They send regrets. It doesn't matter, the party will go on just the same.

Liberal ward workers are called to meet tomorrow evening. Organization is always to be desired, and while at the present time there is no indication of a strenuous conflict still committees must be in readiness, and have their work thoroughly laid out. All should endeavor to attend these meetings, and complete arrangements.

Ca'leton County is finding that Scott Act evidence bought from spotters is not always reliable. A man who can sink so low as to become a spy for money, can also manufacture evidence as required.

WHAT YOUR STRIVING DOES FOR OTHERS. If all the end of this continuous striving were simply to attain, How poor would seem the planning and contriving. The endless urging and the hurried driving Of body, heart and brain!

But ever, in the wake of true achievement, There shines this glowing trail: Some other soul will be spurred on, conceiving New strength and hope, in its own power believing. Because thou didst not fail.

Not thine alone the glory — nor the sorrow, If thou dost miss the goal; Undreamed-of lives, in many a far tomorrow, From thee their weakness or their force shall borrow — On, on, ambitious soul!

IN THE HAY MOW. The horses stamp and champ their oats Down in the stall below, And through the open hay-mow door The swallows come and go.

The sun is very bright outside; The men shout far away; And in the mow the children climb And play among the hay.

—Katharine Pyle, in Harper's Bazaar.

THE OTHER GIRL. How fair you looked that night in May, When you and music held me sway; To claim you for a twirl; And when, the dancing done, I told To willing ears the story old, Your soft reply was "Yes," and I forgot the other girl.

In lustrous silk and filmy veil You stood before the altar rail, A bride as sweet as one could meet, Or womanhood the peer; But as we turned to face the aisle, A shadow crossed your winning smile, And, in a gaze in plainest view, I saw the other girl.

Dear Rose, you are a charming wife! For ten glad years you've made my life A happy lot, and I would not Change places with an earl; Yet sometimes, when you put and crown, Or wear an unbecoming gown, My thoughts fly back along Time's track To greet the other girl.

OUT TO SEA. A dusky cloud upon the summer sky, The faint, far promise of the storm to be, That grows and gathers strength as hours go by, Far out to sea.

Upon the distant shoals a spray of white, That leaps and dances as the breakers roar, And nearer, sea-gulls wheeling in their flight Towards the shore.

A bark that glides before the awakening breeze Where fows the channel deep across the bar, As though there lay no terror in the seas That stretch afar.

A troubled sunset. Evening, misty grey, The fog bell ringing out upon the coast, A storm that sweeps the waves upon its way — A reckless host.

A golden sunrise, laughing at the morn, A gull, bound seaward, skimming gaily past, A few drift-logs upon the billows borne — A floating mast.

DESERTED. The homestead, sole upon the hill, Looked down upon fields below; Old-fashioned posies wreathed its sill, Cinnamon, rose and daffodil, With market-rod a-row.

When sunset on its windows fell, A gleaming scarlet flame, With jingle, jangle of the bell, Homeward the cattle came.

Then golden heard and nutbrown head Ran down the meadow lane, To meet their father as he led The cows from pasture where they fed.

Back to the barn again, The lads knew these kind creatures well, And called them all by name, When jingle, jangle went the bell, And home the cattle came.

Deserted on the lonely hill The house seems dumb and blind; The sunset flame upon it still, The garden plot none cares to till, Blooms for the sun and wind, The little lads are men, and dwell Far from their boyhood's home, Where jingle, jangle with the bell No more the cattle come.

USE OF THE RARE METAL TANTALUM

Two Years Ago This Discovery Was Scarcely Known Outside Few Laboratories.

Some Remarkable Experiments Made to Demonstrate the Extreme Hardness of the Mineral.

Tantalum is a rare metal which has attracted universal attention during the last two years, before which it was scarcely known outside of some scientific laboratories. It was discovered and investigated in 1802 by a Swedish chemist named Exelberg, who, on account of the tantalizing difficulties experienced in extracting the metal from its ores, called it "tantalum."

Only two years ago, says the Engineering Magazine, it was decided by German scientists that what the discoverer thought to be tantalum was an alloy of it and a carbide. More tantalizing efforts were then necessary to produce the metal in its perfectly pure state.

This being achieved, tantalum immediately became of such importance that it is now revolutionizing at least one large industry, that of the manufacture of incandescent lamps for electric lights.

The so-called tantalum lamp is an incandescent electric lamp with a filament made of a very fine tantalum wire instead of a carbon filament, as in the ordinary incandescent bulbs. The most salient features of the tantalum lamp are that while the filament is so arranged as to have a total length of about two feet without materially increasing the size of the lamp, but half of the amount of current is needed to produce a light of the same intensity as that of an ordinary lamp with a carbon filament, and the light is so much brighter and whiter and the life of such lamp is at the same time increased so considerably that in view of all these advantages it would be more economical to pay \$1 for a tantalum lamp than to get the old carbon lamps for nothing.

Although the attempt has been made to use tantalum as a hardening agent, the mechanical difficulties in alloying tantalum with steel have been so great that other applications come into prominence first. Tantalum is one of the hardest substances known, and its use for scientific instruments, where precision stands always second to accuracy and durability, will doubtless be developed much sooner, inasmuch as tantalum so resists the corrosive influence of acids and alkaline solution in a very remarkable degree.

One of the most striking experiments to demonstrate the hardness of tantalum was that for the purpose of boring a hole through a sheet of pure tantalum metal. A diamond drill bore was used, revolving incessantly for three days and making five thousand revolutions a minute. The result showed a depression of less than 2.02 in the metal, while the diamond had become entirely dull and smooth.

Another group of rare minerals which is of the utmost importance in the illuminating industry contains the elements thorium, cerium, yttrium, zirconium and some others. These minerals, on account of the physical character, are generally known under the name of "rare earths."

Monazite, occurring in the form of sand, is the only commercially developed source of the metal thorium, which since its discovery in 1828 until about a decade ago belonged to that class of rare metals whose existence was of consequence rather in the higher range of chemical speculations than for industrial uses, but the invention of the gas burner mantle shifted it at once from this class of substance into that of products indispensable to our everyday needs.

The discovery of the illuminating power of thorium and its combination with other chemical compositions, especially a nitrate of cerium, which is likewise extracted from monazite sand, has practically been the salvation of gas as an illuminant in competition with other lighting methods.

Zirconium, the chief constituent of the mineral zircon, and yttrium, principally derived from gadolinite, furnish the main substance of the glow of the Nernst lamp, in which there exists more learned treatises than on any other lamp, but which has not come into general use.

Constable Joseph McIver paid a visit to Sussex, N. B., this week and arrested John Brown of that place. Brown was formerly a resident of Fraserville, Cumberland Co., and sold a lot of land to a party in that portion of the country to which he could not give a title. He was arrested by Constable McIver and brought to Amherst. His trial took place yesterday afternoon and he was remanded until Friday, the 13th inst. George M. Fowler, M. P. for Kings County, appeared for the defendant—Amherst News.

Store Closes at 9 p. m. Wednesday, Sept. 11, 1907.

Ladies' Laced Walking Boots. We have just received a fine line of Ladies' Laced Dress Boots, At prices from \$2.25 to \$4.00. We have a very choice line of goods at \$2.25 per pair.

Percy J. Steel, Foot-Finisher, 519-521 Main St., A.C. SUCCESSOR TO MR. WM. YOUNG.

CANCER IN HOUSES.

Startling Theory Advanced by Paris Physician.

Observation Seems to Prove That in House Where Cancer Has Caused Death Disease Frequently Breaks Out Again.

NEW YORK, Sept. 10.—The Sun has received the following cable despatch from Paris:—The sanitary authorities of Paris have reached the conclusion that houses can be infected with cancer, and that rooms which patients have inhabited will convey the disease long after the victims are dead. Observation seems to prove that in houses where a death from cancer has appeared the disease often breaks out again when occupied by other families. This fact has so often been noted that now a census has been taken to see about houses where cancer patients died during the last six months of 1906.

There are 1,062 houses on the list which will be watched to see if the new residents become affected with the disease. Already in twelve of the houses there have been two successive cases.

Dr. Armand reports that in a village of only 400 inhabitants here were in the space of seven years there were five deaths from cancer, all in different families. Dr. Lambert mentions a farm-house at Gany where eight families lived at various times. Each family developed one or two cases of the disease.

The question as to whether cancer is hereditary is not to be attributed to the same cause. Interesting results are expected from the observation which is now going on.

Dr. Fillassier makes report of a house where during thirty years there were five deaths from cancer, all in different families. Dr. Lambert mentions a farm-house at Gany where eight families lived at various times. Each family developed one or two cases of the disease.

The question as to whether cancer is hereditary is not to be attributed to the same cause. Interesting results are expected from the observation which is now going on.

Exclusive Jewelry, Etc.

In new goods, and an endless variety from which to choose Remembrances.

FERGUSON & PAGE, Diamond Dealers & Jewelers, 41 King Street.

It's All Over—They Have Come We Are Here With The Goods. Beets, Carrots, Celery, Lettuce, Turnips, Tomatoes, Blueberries, Cabbage, Corned Beef, Lamb, Pears, Apples, Groceries.

CHARLES A. CLARK, Phone 803, 73-77 Sydney St.

PLUM BROWN BREAD. McKiel's Excellent Quality. Ask for it Tomorrow Afternoon and Evening, to eat with your Pork and Beans. At all Grocers, and at McKiel's Own Stores, on Main St., Wall St. and Metcalf St.

WOOD—When you are Wood—Hard, Soft or Kindling—call up 468. City Fuel Co., City Road.

STILL IN BUSINESS. We deliver dry, heavy Soft Wood and kindling cut in stove lengths, at \$1.00 per Load. McNAMARA BROS., Chelvey St. Phone 733.

GENT AND GEMMAN. This slang word seems to have come in at first as a mere written contraction. I have found the word laygens in law reports of the seventeenth century, particularly those of Popham and Davis. In Sir John Northcote's "Note Book," Dec. 2, 1640, Lord Gray is described as saying of one Hallford or Holford "that he is no gent; that in memory of divers he kept hogs." The cognate word gemman can be traced about a century earlier—London Notes and Queries.

FOOT WORRIES are unknown to those who use Regal Foot Powder. It keeps the feet cool, prevents chafing, checks excessive perspiration, makes the skin of the feet firm and healthy.

25c. a Box. Sold Only by E. CLINTON BROWN, DRUGGIST, Cor. Union and Waterloo Sts.

Genuine Imported BAY RUM, In original bottles, —AT THE— Royal Pharmacy, King Street.

Dr. C. Sydney Emerson, DENTIST, 34 Wellington Row. Office hours from 9 a. m. to 12 m. and from 2 p. m. to 5 p. m. Phone 113.

5 LB. BAG GRITS 5 LB. BAG GRITZ 5 LB. BAG GRITS FOR 25 CENTS

Scenic Route. Between Millidgeville, Summersville, Kennebecas Island and Baywater. Steamer Margie Miller leaves Millidgeville daily (except Sunday and Saturday) at 9 a. m., 2:30 and 5:30 p. m. Returning from Baywater at 7 and 10 a. m., and 4:15 p. m. Sunday leaves Millidgeville at 9 and 10:30 a. m., and 2:30 and 5:15 p. m. Returning at 8:45 and 11:15 a. m. and 4:30 and 6 p. m. Saturday—Leaves Millidgeville at 7:45 and 9 a. m. and 3, 4 and 6 p. m. Returning at 6, 7:30 and 10 a. m. and 4:45 and 6:45 p. m. JOHN McGOULDRIK, Agent.

73 Dock St., St. John, N. B.
The Cash Clothing Store.
Open Evenings.

WINNERS IN THE
FIELD OF BRAINS

Anglo-Saxon and German Run a Dead Heat
For the Biggest of Heads.

"An average diminution of three inches has occurred in the national brain during the last half century."

This startling announcement, says Pearson's Weekly, was made by Sir James Barr, president of Liverpool University, at the recent Public Health Congress in the Isle of Man. A celebrated lecturer, however, has come to the rescue with the statement that a diminution of three inches in the British's cranium would mean a decrease of no fewer than twenty-four sizes in his hats! This, of course, is absurd.

Hats are measured by eighths of an inch, and as a matter of fact the prevailing sizes of today—6-7, 7 and 7-1/8—were the prevailing sizes at least forty years ago.

So much for the "box." Coming to the brains themselves, it is interesting and instructive to compare the varying brain weights of the nations of the world. From the subjoined table it will be noted that Mr. Sandy MacPherson, our canny neighbor from the border, heads the van, while the representative of the happy Vaterland just beats John Bull by a short head for second place, and the bland and childlike Eskimo brings up the rear.

It may be stated that the average weight of the human brain is 49-1/2 ounces for men and 44 ounces for women.

"A big brain box does not mean brain power. It is the precise composition, not the size of the brain, that tells. While many eminent statesmen have had very big brain boxes, so have many lunatics."

Seasickness
Positively Cured

A Wonderful, Harmless Cure For All Forms of Sea and Car Sickness.

For Sale at Drug Stores. Money Refunded If Not Perfectly Satisfactory.

A remarkable cure has been discovered for all forms of seasickness, car sickness, dizziness, and all nausea caused by motion, which has positively never failed.

I didn't. I did.

Take Mothersill's Seasick Remedy that positively never fails.

To prove that this remedy is harmless and that it can never produce any bad after effects, an analysis was made by Milton L. Hersey, M. Sc., Chemist for the City of Montreal, and Analyst of the Province of Quebec; I hereby certify that I have personally analyzed a sample of "Mothersill's Seasick Remedy," purchased by me in the open market in the City of Montreal, and my tests have failed to detect the presence of opium, morphine, cocaine, or any other alkaloid or chloral whatever. A party of 600 delegates to the International Sunday School Association Convention that went to Rome, Italy, had a supply of this remedy on hand, and not a single delegate was affected with seasickness. This discovery at last disposes of the prejudice so many people have entertained against the use of medicines as a preventive for seasickness. Mothersill's Seasick Remedy is sold in 50c and \$1.00 boxes at drugists. If your druggist has not got it in stock, send us the money, and we will send you the remedy, all charges prepaid. Send your name and address today to the Mothersill Remedy Co., 123 Cleveland Bldg., Detroit, Mich., for interesting information and testimonials from many who have used this wonderful remedy. Mothersill's Seasick Remedy for sale in St. John by A. Chipman Smith, G. A. Moore, and Royal Hotel Pharmacy.

ORIENTALS ARMING IN VANCOUVER CITY; ANOTHER OUTRAGE

Rifles and Ammunition Imported by Chinese—Attempt to Burn Japanese Mission School—Orientals Threaten Industrial Strike All Through British Columbia—Jap Officials Demand Protection.

VANCOUVER, B. C., Sept. 10.—Last midnight saw the arrival of a dozen Orientals, chiefly Chinese, for carrying loaded revolvers. This was followed by the discovery of a suspicious seven foot case shipped here from Westminister to prominent Chinese merchants. The case contained thirty rifles and five thousand rounds of ammunition. It is now in the custody of the police. The third midnight feature was the sensational discovery of oil soaked waste in the corner of the Japanese mission school house. This brought out the fire brigade, and thousands of curious people with Consul Morikawa appearing at the close and demanding more protection. Then he autographed the case and sending a lengthy cable of the day's events to Tokio.

With every Oriental quarter guarded by mounted police and a hundred special constables in plain clothes scattered throughout the city, quiet reigns in Vancouver tonight. The promised parade of Japanese was abandoned when Consul Morikawa at a mass meeting of his countrymen this afternoon discouraged the proposal which would not be permitted by the police.

OTTAWA, Sept. 10.—The following telegram was received this morning by Japanese Consul General Nossu from Consul Morikawa at Vancouver:

TWENTY I.C.R. MEN HAVE BEEN RETIRED

Thos. Prince, Engineer, Alex. Fraser, Blacksmith, and E. L. Perkins, Store-keeper, St. John, Among Number.

OTTAWA, Sept. 10.—Twenty employees of the Intercolonial and the Prince Edward Railways have been retired from service and given the benefit of the annuity allowance under the provisions of the act passed at the last session of parliament. These are the first retirements under the act which went into force last spring. A good deal of time has been required for the organization of the board, a part of which had to be elected by the employees of the government railroads. It is probable that from the present, for some little time numerous retirements will be announced, as there have been a good many applications for the benefit of the act from old employees of the road. The board will deal with them as fast as possible.

In the first batch of retirements there are thirteen Moncton men: David White, car inspector; William Sleeth, moulder; Enoch Price, laborer; John Fogarty, machinist; James F. Sayre, foreman machinist; Thomas Hogan, watchman; William Glover, engine cleaner; Marcellin LeBlanc, laborer; Samuel Thibodeau, carpenter; Dumas Perry, machinist; Samuel Hamilton, carpenter; Douglas Nicol, carpenter; John E. Goodrup, blacksmith. There are three St. John men, Alexander Fraser, blacksmith; Thomas W. Prince, engine driver, and E. L. Perkins, store-keeper. Others retired are Archibald McKelvie, car inspector; Summerfield Patrick Aime, section foreman; Waverly, N. S.; James Christal, section foreman; Harcourt, and Mrs. Eliza Frisp, car cleaner, Halifax.

KNOX STIFF HATS

The "KNOX DERBY" for Fall is one of the most dressy shapes to be found. It has a medium high crown with quite a narrow rolled brim, and is taking the eye of good dressers the world over.

This hat is known for its durability and style, and wearers of it are always satisfied. It is made from a fine quality of felt, finished with excellent sweat leather and ribbon bands. The style is always exclusive and one becoming to most men.

\$5.00 Each.

MYSTERIOUS MILFORD BURGLARIES SOLVED BY BOY'S CONFESSION

Robert Moore, Aged 15, Who Has Served a Term in Reformatory, Arrested Yesterday by Policeman Lawson—Implicated Robert Smith and George Green in His Confession—Smith Also Arrested, but Green Could Not Be Found.

During the past fortnight there has been considerable excitement and no little uneasiness among the people of Milford on account of a series of mysterious robberies, the perpetrators of which apparently left no clue and continued to plier in a way that was distinctly disquieting to the residents of that quiet section. Those who live in the more isolated sections have been on the watch continually.

It was a considerable relief to the anxious ones when Officer Lawson, who had been quietly working on the case, yesterday afternoon arrested Edward Moore, a fifteen year old boy. This lad has already been found guilty of theft, having been sentenced to the Reformatory for a short time and upon stolen some shoes from Francis & Vaughan. Moore confessed and implicated Robert Smith, single, and aged twenty-five years. Smith, when arrested, admitted having assisted in the Foley robbery, but denied having been in any of the others. Moore also said that George Green was one of the burglars, but Green could not be found.

Two weeks ago a man named Foley, who is employed at one of the mills and who lives alone, was absent from his home for a short time and upon his return, found that a portion of his fortnight's pay, namely \$12.50, had been stolen. The thieves had left no signs of the robbery, for some days, was an unsolved mystery.

AMUSEMENTS

Carnival at Vio, Tonight.

Everything is in readiness for the big carnival at the Victoria rink tonight. Skates are being reserved in large numbers and a big crowd is assured. The carnival tonight is different from any previously held here, as all may skate after presentation of prizes, which will be finished after eight o'clock. Skates will be furnished free while they last.

New Show at Nickel Today.

Today at the Nickel a brand new show will be presented. The pictures are of unusual merit as follows: The Sea Wolf, a thrilling picture-tale of a desperate old pirate who abused his crew, smashed the beacon light and other villainous deeds, finally meeting a just reward; A Double-Barrelled Suicide, something new in the light comedy line of pictures; Lifboat manoeuvres, showing the alacrity with which trained crews save life on an ocean liner; and The Book Agent, a very amusing series of adventure. Besides these two thousand feet of interesting film there will be a dozen slides picturing local places under a heavy blanket of snow, new songs by Mr. Brown and Miss Felix and popular catchy music by the new orchestra.

Happy Half Hour.

Today is the last chance to see the present programme at The Happy Half Hour. The pictures are: A French Military Prison, Both Loved the Same Man, and I Never Forget the Wife, the latter very funny. Two illustrated songs, Why Don't They Play With Me? sung by Le Domino Rouge, and I'm a Soldier, sung by Harry B. LeRoy, complete a very attractive programme.

Queen's Rollaway.

One of the old-time crowds of skaters and spectators was present at the Queen's Rollaway last evening, the occasion being the always popular "ladies' night." Those who have been predicting that roller skating had died out, would have soon acknowledged that their predictions were wrong had they been present last evening. Hand again tonight and every night.

"When Greeks joined Greeks, then was the tug of war," was written by Nathaniel Lee.

EIGHTEEN MONTHS FOR FOOLING MEN

HAMILTON, Sept. 10.—John Holmes, one of a gang of crap-shooters, who brutally assaulted Constable May on Sunday, was arrested today charged with aggravated assault on a police officer. May is still confined to his bed as a result of the assault.

William Blood, who represented himself as the agent for a big lumber company and after engaging a number of men to work in the lumber camps and securing fifty cents each for a week, was sentenced by the magistrate this morning to eighteen months in central prison. It transpired that Blood had signed the name of T. P. Best, secretary of the local Y. M. C. A., to a certificate of character which he showed to applicants for jobs as evidence that he was all right.

CANNED GOODS WILL BE HIGH THIS YEAR

TORONTO, Sept. 10.—The wholesale grocers of Toronto state that the outlook for the pack of canned goods is gloomy. Earlier small fruits are very small crop, and prices are 30 to 35 per cent. above what they were a year ago. The vegetable crop is smaller than last year and prices are 32 per cent. in advance.

CASE AGAINST SUN INSURANCE COMPANY

Dr. A. O. Earle last evening for Newcastle, where he will be associated with L. P. D. Tilley of Tilley & McInerney, attorneys for the Sun insurance office, in the conduct of a suit brought against the Sun company by Mrs. A. Curtis of Newcastle. M. G. Teed, K. C., is counsel with E. A. Fry of Moncton for Mrs. Curtis. Mr. Justice McLeod is the presiding judge. Mrs. Curtis carried on a millinery business in a small store owned by her. She insured the building and stock with the Sun insurance office for \$2,000. Some months after the insurance was effected the property and stock were burned. Mrs. Curtis put in a claim for the insurance. The company refused to pay it over on the ground that the stock insured was not in a small store, but that it was through the negligence of the company that the claim was not filed in time, that the stock was not reduced as alleged, and that at the time of the insurance being effected the property was fully of the value of \$2,000. Solar zones are being extraordinarily brilliant and impressive.

POLAR NIGHT NOT DULL, BUT DREARY

Day, Which is Summer, is Endurable, But the Winter Darkness is Heart Breaking.

During a polar winter the average thickness of ice on the ocean where no storms or strong tides interfere reaches six feet or more. There is really no warm season. Even during the warm summer days, says the Science Monthly, snow falls frequently. Clear spells are relatively warm, but especially in the Antarctic, fogs and clouds are frequent, while winds bring low temperatures. Nevertheless the summer near the margins of the Arctic zone is described in the Journal of Geography as having clear, crisp, pure air, free from dust and with little precipitation. The monotony and darkness of the polar night are decreased a good deal by the long twilight due to the high degree of refraction at low temperatures. The sun actually appears and disappears some days before and after the times which are geometrically set for the change. Light from moon and stars and from the aurora also relieves the darkness. Optical phenomena of great variety, beauty and complexity are common. Solar and lunar halos and coronas and stock and moon arcs are seen. Auroras seem to be less common and less brilliant in the Antarctic than in the Arctic. Sunset and sunrise colors are more brilliant. Solar zones are described as being extraordinarily brilliant and impressive.

WEDDINGS

OLTON-NEAL. Cards have been received in St. John announcing the marriage in Boston of George Arthur Olton, formerly of this city, and Miss Mabel Darbness Neal, daughter of Mrs. Louise E. Neal. The happy event took place on the 8th instant and Mr. and Mrs. Olton sailed the next day from Quebec on the steamship Empress of India, for a wedding trip to England and the continent. Mr. Olton is a son of George H. Olton of the railway mail service, and is now leaving St. John several years ago has won for himself a place in service of the Illinois Central railroad, which he now represents in Boston. When in St. John he was in the employ of Major Grant and was prominent in amateur athletics, making many friends who will be interested in the announcement of his marriage. Mr. and Mrs. Olton will be at home at 161 Bromfield Road, Somerville, Mass., after November 1.

NEW MODUS VIVENDI A SHAMEFUL SACRIFICE, SAYS PREMIER BOND

Newfoundland's Prime Minister Declares Fisheries Agreement a Disgrace to British Diplomacy—His Government Will Resist it by Every Constitutional Means in Its Power.

ST. JOHN'S, N. B., Sept. 10.—In a statement published in the form of an interview here today, Sir Robert Bond, premier of Newfoundland, declared that the modus vivendi recently agreed upon by the British and American governments is "a disgrace to British diplomacy and a shameful sacrifice of the interests of the people of the colony."

A FINAL ARGUMENT.

By MRS. NEISH.

"What a pity you can't come with me, Gwen. I did so want to go to Homburg. I would with pleasure, but I really can't"—and my cousin, Gwen Randall, looked deprecatingly across at me. "To tell the truth, Nell, my plans are rather unsettled just now."

"He is up in town, but I'm expecting him home today. It is very strange, but he wired to the housekeeper instead of to me. I have sent her away, as there were far too many servants here, and so of course I opened the wire. It only said: "Coming home Thursday—prepare east rooms."

"I have really never thought about it," said Norma. "I had a note from him saying he was coming one day last week, and he would bring with him a final argument, but it is hopeless to argue, because my views are not to be changed."

"I don't think so," said Gwen. "I should be a delightful stepmother—although, of course, I shouldn't stand any nonsense. If there was any trouble, I should send her back to school or let her live with her aunt. But why shouldn't we get on?"

WOODSTOCK SCOTT ACT SPY CHARGED WITH PERJURY SAID TO HAVE SKIPPED—CASES HE ENTERED ARE DISMISSED

WOODSTOCK, N. B., Sept. 10.—In the police court today several Scott Act cases were adjourned for next week. It will be remembered that information was laid against S. Perkins, Gilbert Gibson and Charles Bell of Bath, William Staten of Foreston, Winslow Dyer and Asa Bell, on the strength of evidence given by the inspector by one Robert N. Belyea, a self-confessed American spy, who, according to his own story, was to receive \$15 from the inspector for each conviction secured on this charge.

BAPTISTS OF ONTARIO AND QUEBEC NOT FAVORABLE TO UNION WITH OTHER CHURCHES—NOR ANGLICANS

TORONTO, Ont., Sept. 10.—The fourth conference of the joint committee on church union, representing the Presbyterian, Methodist and Congregational churches, held their final meeting for the year this afternoon in the Metropolitan Church. The session was called for the purpose of hearing statements requested from Anglican and Baptist churches, as to their views regarding church union.

BURGLARS IN ROYAL BANK AT CHIPAWA

Got Twenty-Five Dollars, but Were Alarmed and Had to Leave in a Hurry.

NIAGARA FALLS, Ont., Sept. 10.—The Royal Bank branch at Chipawa was attacked by burglars early this morning. The men dropped an electric arc light on the street, breaking it, and then forced an outer door. One stayed outside as guard while two went in. The outer door of the safe was blown open and about \$25 secured. Burglars then prepared to blow the inner safe, which contained \$2,500, but were disturbed and fled, driving into the village bank door open and raised.

ANOTHER KISHENEV MASSACRE

BRAILA, Roumania, Sept. 10.—News has reached here of another serious and atrocious anti-Jewish outbreak at Kishenev. It is estimated that no less than eighty Jews lost their lives in encounters with the infuriated populace. The outbreak occurred yesterday. The Jewish quarter at Kishenev was attacked by organized bands of ruffians, who looted houses and shops and ruthlessly killed or wounded all those who attempted to defend their property.

LOCAL NEWS.

Arthur Love, Wm. Daley, Charles Gamble and Ambrose Swen, coachmen, have been reported by the I. C. R. police for breaking the depot rules.

Hum Ye and Hum Wow have been reported by the police for working in the city without a license.

The regular weekly tea of the St. John Tennis Club, will be held tomorrow afternoon. The cup presentation will take place.

The officers and members of York L. O. L. No. 3, will pay a social visit to Gideon L. O. L. No. 7, on Thursday evening next at their hall on Germain Street.

In the probate court this morning letters of administration were granted in the estate of John Donovan to his widow, Harriet M. Donovan. The estate consists of \$1,000 personally, Elias Alward, K. C. proctor.

The steamer Lady Eileen which was reported as being ashore in Gaspe basin on Sunday last was floated without any difficulty at the next tide, with no damage done, and very slight loss of time.

The tennis tea will be held on Friday instead of Wednesday this week. The winners of the tournament will be presented with their cups. Hugh McLean, Jr., received the president's cup, Miss J. Trueman and L. W. Barker receiving the trophies for the mixed doubles.

Two Hebrews engaged in a row outside the Carleton street synagogue yesterday, and the police were called to restore peace. Morris Shaffir, a pedlar, had been arrested by J. Meyer for a debt of \$124. The debtor arrived home yesterday after a business trip and was arrested shortly after his arrival. Mrs. Shaffir was arrested at the arrest of her husband, and proceeding to the synagogue unbranded Meyer for causing it. Mrs. Shaffir used manual suns on Meyer who suffered somewhat. The fight soon became a partisan row and the forces were having a interesting engagement until the presence of Police Officer Belyea, whose presence soon stilled any further outbursts of passion.

TAYLOR—TITUS.

A wedding which is creating much interest because of the popularity of the young couple, takes place in Trinity at four o'clock this afternoon, when Miss Marie Titus, daughter of F. R. Titus, will be united in marriage to Fred G. H. Taylor, of the Union Bank of Halifax and now stationed in Halifax. The bride who will enter the church on the arm of her father, will be beautifully gowned in an exquisite bridal dress of white Irish poplin trimmed with Boston lace and cream broadcloth, with a lace hat trimmed with silk roses. She will carry a bouquet of white roses.

Miss Titus will be attended by her sisters, Miss Emma Titus, as bridesmaid, and Miss Edna Titus, as maid of honor. The bridesmaid will wear Dresden silk muslin over pale blue silk, with black picture hat. She will carry a shower bouquet of sweet peas. The maid of honor will be dressed in Dresden silk muslin over pale green silk, with black picture hat. The bride will be given away by her father. The groom will be supported by his brother Arthur Taylor.

The ushers are E. S. Ritchie, Alexander Little, James McMuray and Carter Titus, brother of the bride. The bridal party will enter the church, which has been beautifully decorated with plants and many cut flowers, to the hymn "The Voice That Breathed Of Eden," and will leave to the strains of Mendelssohn's wedding march played by Prof. Ford.

The groom's present to the bride is a beautiful pearl and diamond pendant and to the bridesmaids pearl rings.

Mrs. Titus, mother of the bride, will wear lavender silk with flower hat, and bride's little sister, Miss Mildred Titus, will wear white dotted muslin and white hat with yellow plumes.

Mrs. Taylor, the groom's mother's costume is of black broadcloth silk with white trimmings and black and white hat. The groom's sister, Miss Mabel Taylor will wear cream peau du sole and cream felt hat.

The ceremony will be performed by Rev. Mr. Armstrong of Trinity, assisted by Rev. E. Revington Jones, of Mission church. At the conclusion of the ceremony an informal reception will be held at the bride's father's home on Mecklenburg street.

The newly married couple will leave by the Boston train for Philadelphia and other American cities after which they will spend ten days in this city before taking up their residence in Halifax.

POLICE COURT

Four drunks were fined the usual amount in the police court this morning.

One drunk worked ten days on the chain gang, was out only a few days, and being rearrested, he begged for a chance. He was told that as he had not given himself a chance he could spend 20 days on the gang this time as a lesson. Another drunk was remanded to jail for a time to sober up and was told that he should be ashamed of himself as he had a brother in jail at the time. The magistrate said it is a wonder that a fortnight could not pass without the name of the family being called out in the court. As the prisoner was conducted to jail his brother was brought out and sent to work.

"COMMITTEE'S ACTION IS UNPARDONABLE"

Says Commodore Stewart on the Yachting Decision.

Advises Those Who Believe "Mona" Should Have Beveridge Cup to Get Expert Opinions by the Bashel

Commodore Stewart, officer of the Chatham World, whose pronouncements upon yachting controversies carry a great deal of weight, enlarges upon his decision given through the World a few days ago on the finding of the committee in this city re the Beveridge cup race, won by the sloop Canada of the R. K. Y. C. fleet, but protested by John Frodsham's Mona, which was disqualified for "technically fouling the mark boat."

The commodore says in a letter to a friend: "The committee's action is unpardonable and shows how necessary it is that a court of appeal be established for sport. I have a pretty wide grip of yachting literature and some experience, and I do not think technical foul of mark boat was ever heard of before. A mark boat is not movable but anchored, and must be fouled in reality or not fouled at all."

"The fact that a man on board chose to haul in on his cable proves nothing except that he acted the fool, tried to favor a friend or wanted to disqualify a yacht. Whether a boat was headed straight for the mark or not has nothing whatever to do with it. A boat may change her course any second. The decision of the committee is the result of inexperience and ought to be reversed."

"Those interested in this matter ought to get opinions from yachting experts by the bush on the whole question, without regard to the evidence of the Mona's crew whether or not the act of the man on the mark boat (admitting that he believed the boat would run into him) disqualified the boat for 'technically fouling' the mark."

"It is unfortunate for sport that such decisions are possible. A committee once refused to grant my request for re-measurement at the close of a race, although I charged that the other boat had taken on ballast after the previous measurement, and gave the other fellow the nurse, 360, that did not belong to him under the rules."

This rather complete criticism of the R. K. Y. C. committee's findings in the now famous yachting argument will doubtless be interesting to local lovers of the white-winged pastime.

BIG GAME SEASON WILL OPEN ON MONDAY

A Change in the Act Which Permits Non-Residents to Hunt Deer on Payment of a Small Fee.

The hunting season opens on Monday next and already many sportsmen have gone into camp to be in readiness for the first day's sport. Parties of Americans are gathering daily in Fredericton and other starting points. The season this year promises to be even more successful than last year. The act has been amended so that non-residents can procure licenses to shoot deer or birds without being taxed as high as those desiring to hunt for moose. The license for deer is ten dollars, and the holder of such a license is permitted to hunt exclusively for deer. The same applies to the license for birds. The license for moose remains unchanged at fifty dollars for non-residents.

Moose and deer are reported very plentiful throughout the big game district. About 6000 license forms have been sent out from the Government office divided as follows:

Residents.....	700
Non-residents.....	480
Guides.....	300
Camp help.....	240
Spectators.....	400

The financial results of the past ten years show the rapid increase in the receipts for big game hunting in the province:

1897.....	\$ 1,993.00
1898.....	4,711.82
1899.....	5,349.68
1900.....	8,298.05
1901.....	8,711.29
1902.....	10,855.85
1903.....	16,150.55
1904.....	18,216.33
1905.....	20,488.81
1906.....	27,633.19

LIQUOR STORE CLOSED BY THE SHERIFF'S ORDER

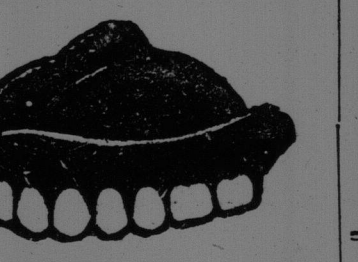

McCarthy's Place on Dock Street in the Hands of Creditors

The doors of the wholesale and retail store on No. 3 and 10 Dock street were closed yesterday and locks put on by order of Sheriff Ritchie. Mr. McCarthy, the proprietor, left for the west some few weeks ago and it is said that his establishment is heavily in debt, and the placing of locks on the doors by constables is the result of action taken by the persons to whom the Dock street merchant is most heavily indebted. Some time ago Mr. McCarthy was before the courts on the charge of infringing on the House of Commons whisky label, when he sold 24 packages with a label very similar to the House of Commons and called it "House of Senate."

CASE AGAINST GRAND UNION HOTEL DISMISSED

In the police court this morning the charge against the Grand Union Hotel for selling liquor during prohibited hours was dismissed. E. S. Ritchie, who acted for Mr. McQuade, asked for a dismissal on the ground that there has been no evidence of violation. Geo. A. Henderson, for the prosecution, informed the court that one witness, Lavigne, was in Boston and others could not be located, and he admitted that there was not enough evidence to convict. The magistrate accordingly dismissed the case.

Mrs. Tiltonson had a narrow escape from serious injury last evening while enjoying a ride in her automobile. Mrs. Tiltonson was sitting in the auto at the door of the General Public Hospital. She started the machine rather suddenly and lost control of it. She was thrown out but was not injured to any extent. The auto kept going over the embankment and was smashed. Mrs. Tiltonson was driven to her home in a cab.

Teeth Extracted Without Pain, 15c.

We make the best \$5.00 set of teeth in this city.

We make the best \$5.00 gold crown in this city.

SALE OF RUGS AND SQUARES

Thursday, in The Carpet Department

PRICES CUT LOW, VALUES DOUBLED

OUR SALE OF FURNITURE COVERINGS WAS A BIG SUCCESS, because we offered our bargains just at a time when house folks felt the need of such goods. This clearance of over a hundred items of floor coverings will probably be just as sprightly for the same excellent reason.

Axminsters, Wools, Hemps, Brussels, Unions, Etc., Etc.

Some Japanese and Indian Rugs

in the Excellent Collection

Few Samples of Tapestry and Brussels Carpets for Earliest Callers.

CLEARANCE COMMENCES TOMORROW

GFRMAIN STREET
