There is nothing like ASTHMA-

BRIDGETOWN, N. S.

The Rev. C. F. WELLS, of Villa Ridge, Ill., says: "Your trial bottle of Asthmalene received in good condition. I cannot tell you how thankful I feel for the good derived from it. I was a slave, chained with putrid sore throat and Asthma for ten years. I despaired of ever being cured. I saw your advertisement for the cure of this dreadful and tomenting disease, Asthma, and thought you had overspoken yourselves, but resolved to give it a trial. To my astonishment the trial acted like a charm. Send me a full size bottle."

Rev. DR. MORRIS WECHSLER, Rabbi of the Cong. Bnai Israel. New York, Jan. 3rd, 1901.

DR. TAFT BROS'. MEDICINE CO.,
GENTLEMEN.—Your Asthmalene is an excellent remedy for Asthma and Hay Fever, and its composition alleviates all troubles which combine with Asthma. Its success is astonishing and wonderful, After having it carefully analyzed, we can tate that ASTHMALENE contains no opium, morphine, chloroform or ether.

REV. DR. MORRIS WECHSLER.

DR. TAFT BROS. MEDICINE Co.

GENTLEMEN,—I write this testimonial from a sense of duty, having tested the wonderful effect of your ASTHMALENE for the cure of Asthma. My wife has been sflicted
with spasmodic asthma for the past 12 years. Having exhausted my own skill as well as
many others, I chanced to see your sign apon your windows on 130th street, New York, I
at once obtained a bottle of Asthmalene. My wife commenced taking it about the first of
at once obtained a bottle of Asthmalene. After using one bottle her Asthma
November. I very soon noticed a radical improvement. After using one bottle her Asthma
has disappeared and she is entirely free from all symptoms. I feel that I can consistently
recommend the medicine to all who are afflicted with this distressing disease.
Yours respectfully,
O. D. PHELPS, M. D.

DR. TAFT BROS. MEDICINE CO.

GENTLEMEN,—I was troubled with Asthama for 22 years. I have tried numerous remedies, but they have all failed. I ram across your advertisement and started with a trial bottle. I found relief at one. I have since purchased your full sized bottle, and I am ever grateful. I have family of four children, and for six years was unable to work. I am now in the best of health and am doing business every day. This testimony you can sake such use of fax you see fit.

—Below is a copy of a note received by a teacher in a small country school.

When a child is absent on account of illness in the house the rule is to refuse to take the child back until the doctor gives a certificate that there is no danger of contagion.

A teacher sent a little boy home to get one of these certificates, because she learned a doctor had been visiting a patient in the house. The child went home and returned at two o'clock in the afternoon with a note that read as follows:

"Teacher:—Georgie's mother got no catching illness. She's got a girl.

Very respectfully Very respectfully Her Aunt."

In the same school a teacher received the following
"Miss----Please let Willie home at three o'clock. I am taking him out for a little pleasure to see his grandfather's grave.

Mrs. R.

How fast does one wink? Thanks to the scientific investigations of a German photographer, this important question is settled. The whole operation lasts about four-tenths of a second. The downward movement of the eyelid occupies from seventy-five to ninety thousandths of a second. At the end of the descent the lid rests for a period which varies with different fittent to seventeen.

ent persons from fifteen to seventeen hundredths, and the ascending move-ment took seventeen-hundredths. As quick as winking, therefore, means about four-tenths of a second. -It is freely rumored that reports -It is freely rumored that reports furnished to the British government as one of the many results of a thorough exploration of the hitherto unknown districts of the Transvaal by mobile British columns in pursuit of Botha and DeWet, show that quite a number of new auriferous ranges have been discovered.

THE SIZE OF LOCOMOTIVES.

Thirty years ago the average locomotive used on western mountain railroads weighed not more than twelve and a half tons. Now locomotives are being called into requisition there which weigh seven or eight times as much. The Northern Pacific has just received from the makers an inety-nine ton compound four cylinder locomotive. So modern locomotives are not only immensely larger than any known a quarter of a century ago, but quite recently also multiple expansion cylinders are being called in them, a device heretofore almost exclusively confined to stationary and marine engines.

TO BREAK UP A COLD. All you require is a glass of hot water a little sugar and thirty drops of Polson's Nerviline. Take it real hot and in the morning you will wake up without a cold. When depressed or tired, try Nerviline; it will tone you up better than stimulants. Nerviline wards off all sickness and keeps people well. Large bottles 25c.

## THE BOY IN BUSINESS.

In the course of an article 'The Canadian Boy in Business,' M. McCormack advises the boy to go for six months or a year to a first-class bus 'At such an institution he will acquire a good, plain, rapid handwriting suitable to the requirements of business, a thorough knowledge of commercial arithmetic, the ability to business, a thorough knowledge of commercial arithmetic, the ability to compose and write a neat, correct, business letter, a good knowledge of bookkeeping in theory and practice, and of the various papers and forms used in business transactions. To these he may add such a knowledge of the principles of commercial law as will enable him to transact business safely. He should also acquire a thorough mastery of shorthand and typewriting and such a knowledge of French or German as will often be helpful to him in the transaction of business. He will also acquire methods of doing things, and a measure of self-confidence which will be of great and permanent advantage to him in his future career. In the absence of influential friends, too, the diploma or testimonial of a first-class business college constitutes an effective introduction to the managers and presidents of large commercial and financial concerns.

WEDNESDAY, JAN. 29TH, 1902

In a retrospect on the public affairs of the town, for the civic year that is now closing, even the most careless observer must be impressed with the perceptible evidence that a progressive spirit is steadily shaping Bridgetown into an ideal business and residential community. That great bodies move slowly is an axiom applicable of course to the progress of every town, and in the perfection of the many important services it is well that no undue haste be attempted. As the passing year is sensibly marked with improvements so a similar record may be traced between the mile stones that number the years of our corporate life.

Five years ago the conditions of so-

vastly different from those prevailing today. Then the disorder incidental to the untrammelled inserties of a certain class was in frequent evidence, now there is no town in the province where better order is maintained than here. In the enjoyment of present advantages we are apt to lorget that things were not always so. The atreets and sidewalks are still far from porfect, but they are an hundred per cent, better than they were five years ago, and, after patching has effected a passable condution for all seasons, we may reasonably expect a more permanent work to be instituted. The lighting system has been increased to an all night service and the advantage of the extra hours has been when the service of the condition of the lighting system has been increased to an all night service and the advantage of the extra hours has been when the service of the condition are superior to the ordinary robe. We trust that a proper interest in the efficiency of the department will be maintained, and that no time will be maintained, and that no time will the efficiency of the department will be maintained, and that no time will be fost in increasing its efective service by a proper system of fire alarms. Concrete street crossings add much to the comfort of pedestrians and in this respect an example is furnished that many more pretentious towns would do well to follow. New basiness blocks have replaced some unsightly old buildings in the principal business quarter and plate glass fronts have been substituted for the old ten by twelve, or twenty by thirty panes that let the light of a day gone by illuminate the interior of the business premises. Increased railway facilities and a new school house have been bargained for th the fast express train service of school house have been bargained for, and a resume of the incidents of progress will show that the model town is being shaped more rapidly than we are perhaps aware of. A great good feature of the progression is that up to date it has all been accomplished without any increase in the burden of taxation sustained under the county government. That we are better off today because of the adoption of the Town's Incorporation Act no one will

Why this has been sidefracked and the right of has been sidefracked and the right of way given to matters no more deserving of attention is somewhat incomprehensible. The unsanitary condition of some of our side streets in the low lying portion of the town is well known to every citizen. The locality to which we refer is one through which nine-tenths of our school children must pass on their way to and from school. The question of our children's health was largely responsible for the decision that a new children's health was largely respon-sible for the decision that a new school house is a necessity. The faul-ty sewerage which is such a menace to their health, as well as to that of the neighborhood itself, with equal urgen-cy demands remedial measures. If for financial reasons it is deemed inadvis-able to introduce an extensive system of sewerage this year, the evil in ques-tion should be remedied, in the dis-trict referred to at least, by the con-struction of a short extension which can be added to as occasion and cir-cumstances may permit.

A town, like men, can make money by spending it. It is wise sometimes to lay out money for the purpose of building up a community, and thereby adding to the value of its property, as well as the prosperity and comfort of the people whomake up its population."

A new Yorkins me autenaded the Paramers' Act Amery and the Parame There is a good deal of talk going on among our farmers here in regard to holding a county exhibition in Annapolis county each year. Why don't our council or county representatives see what the many agricultural societies would like along this line and if thought best by the majority try to give the farmers a chance to show what they can do with the farm. Most of us cannot go to Halifax as time, expense, etc. will not permit but in our own county we all could go and all make an exhibit of some product. Think it over farmers and let us hear from you.

The members of the Baptist church here presented Rev. Archibald with a very handsome and expensive coon coat, on Monday evening last, for which the gonial parson thanks them all most heartily.

Rev. Archibald goes to Bridgewater today for a week's trip.

All farmers, as well as anyone else should call at M. D. Balcom's today, tomorrow, or Friday and see his fine herd of swine. They will be sent to the Halifax market Saturday. Mr. Balcom can téach our farmers some lessons in this line.

tween the two powers, it might be settled by arbitration.

The Newfoundlanders have been protesting from year to year against the renewal of the modus vivendi and complain bitterly of French interference with the Treaty Shore. They very properly maintain that these conditions should not be permitted to continue and also that the French islands are the homes of smugglers who take advantage of their situation to practice their illegal trade.

The question of the modus vivendi came up in the French Chamber of Deputies last week but nothing was apparently done. It is believed that the whole affair is in statu quo and that neither government has taken any definite 'step in the matter. In the meantime the Newfoundlanders are becoming indignant with the inaction

FIRST ELECTION AT DAWSON.

Toronto, Jan. 20-Dawson's firs Toronto, Jan. 20—Dawson's first election as an incorporate town took place yesterday. The issue was an elective council, mayor and councillors y a commission of three citizens appointed by Commissioner Ross running the town under him. The heaviest taxpayers favored the latter, as they consider it more economical. The body of the people demanded self-government. Interest was keen and the campaign active. The result was 687 British votes cast, with 79 majority for an elective council. The temperature was fifty below during the voting.

Does your horse "feel his oats"? What a difference between the grain-fed and the grass-fed horse! The first strong and full of ginger, the second flabby, weak and tired out before he begins. The feeding makes the difference. Children are not alike either. One is rosy, bright-eyed, full of life and laughter, another is pale, weak and dull. The feed-

Sickly children need special feeding. They don't "feel their oats". Scott's Emulsion adds just the right richness to their diet. It is like grain to the horse. The child gets new appetite and strong digestion. Scott's Emulsion is more than food. It is a strong medicine. It rouses up dull children, puts new flesh on thin ones and red blood into pale ones. It makes children grow.

THE DISGUSTED HENS. IN

Now that the Christmas work is completed and safely in the possession of its destined owners, the devotee of fancy work is sighing for more worlds to conquer. She cannot do better than turn her attention to sofa pillows for the coming summer. Everyone knows that the end of the season of outdoor life sees piazza and hammock cushions in a state of decrepitude that quite unfits them for use the next summer, so new covers are always in order.

A handsome cushion may be made of denim, with an applique of cretonne flowers. The new floral cretonnes are charming for the purpose, as the flowers are so beautifully printed that they seem as if painted. Indeed the designs are painted by the most skilful flower artists, whose work is faithfully copied. One cushion recently seen was of the finest quality of denim, dark blue in color, with red roses and green leaves cut from cretonne and arranged in a garland in the middle of the ground. The shading of the roses was so perfect that no needlework was required except around the edges where they were buttonholes stitched to the denim with black linen floss.

One would be surprised to find how one would be surprised to find how one work is faithed to the denim with black linen floss.

One would be surprised to find how one woll a highly offended manner.

A clever and effective cushion cover may be made of a bright sateen, red, yellow, blue or green, with large meshed "wash blonde" net, in which tiny bows of baby ribbon or French knots are tied at regular distances, over it. The appearance is not unlike that of a certain kind of Oriental silk much liked for such purposes.

rest, 10 minutes respite on a couch means physical and mental salvation. A comfortable, convenient sofa is a positive means of grace. There isn't a doubt that the need of a nap is often mistaken for a longing to die.

"In nearly every reception or living room, of course, there is an article of furniture that answers to the name of sofa, but it is not worth the space it covers or the time taken to keep it in order, so far as real comfort is concerned. The raison d'etre of the two armed, velvet tufted vard-and-a-quarter sofa continues to be as much of a mystery to me as the domestic economist's motive in purchasing those limber-legged, carpet faced 45 degree lounges one sees 'marked down' in front of cheap furniture houses. To make a home truly homelike, give me the broad low, hospitable couch, whose very presence is an invitation, a benediction and delight."

makes itself felt. Dampness is the worst foe that the piano has. It should not stand, therefore, near an open window, and it should not be pushed close against the wall. The keys, when they need to be-cleaned, should be rubbed with a soft muslin cloth which has been dampened with alcohol. Soft silk, such as an old silk handkerchief, makes the best sort of duster for use about the piano.

While making a record of it he was in doubt as to the correct spelling of the family name given to him and asked the man how he wrote "Indeed and I don't write it at all," was the reply.
"I just want to know," said Father Boyle, "whether the name is "Mc-Grath' or Magrath—whether the second part of it is spelled with a big 'G' or a little 'g.'"
