## Old Tea Drinkers Appreciate Bueribon

They have tried many other kinds which made great claims, but found that none of them had the Strength or delightful Richness and Fragrance of Blue Ribbon Tea.

Besides, no other tea has the fine rich Flavor which has made Blue Ribbon Tea so popular all over the West.

People using it for the first time should remember that Blue Ribbon Tea is much Stronger and Richer than other teas, and should put less in the pot.

Flavor and Economy
I have been induced to try other teas by samples given, but although the by samples given, but although the
price was sometimes more, I cannot conscientiously say that any other tea we have tried is equal to Blue Ribbon either in flavor or economy, as this re quires but little tea to produce a teapotful of medium size. I have often strongly recommended Blue Ribbon Tea to my friends, for I think it cannot be excelled.

All Like It Very Much.
We have been using Blue Ribbon Tea for about 8 or 9 years, first at home and now I'm married I use it in my own home. We all like it very much Mrs. Frank C-, Pincher Creek, Alta

## Enjoys Good Tea.

I have used the Blue Ribbon Tea for years and recommend it always to my friends as being the best tea I can get in Canada, and being English, I well enjoy a cup of good tea

Back to Blue Ribbon.
I think one mostly tires in a short time using the same tea, but it is not so with Blue Ribbon. I have used it over 9 years now and will not use any other. Sometimes the storekeepers have talked me into trying another tea, but I have always been thankful when it was used, so as to go back to Blue Rihbon. A number of friends who have tried it at my house have taken to using it themselves.

## A Voyage on an Ice-Floe.

## By DR. WILFRED T. GRENFELL, C.M.G.

[Dr. Grenfell may be described as the "Good Angel of Labrador," having for years devoted himself to ministering to the hardy toilers who live in that grim land of gnow, ice and fog. In the enthralling story he describes how, while on an errand of mercy, he and his dog-team got adrift in the open sea on a tiny cake of ice ; how he killed
three of the dogs to provide himself with warm clothing; how he made a flagstaff out of their bones ; and how he was finally rescued when hope was well-nigh dead.]

There was obviously no time to be lost, so, having packed up the necessary instruments, dressings, and
drugs, and fitted out the sleigh with drugs, and fitted out the sleigh with my best dogs, 1 eft at once, the mesteam.
Late in April there is always a risk of getting wet through on the ice, so that I was prepared with a spare out fit, which included, besides a change

During the night the wind shifted to the north-east. This brought in fog and rain, softened the snow, and made traveling very bad, besides sending
a heavy sea into the bay. Our drive a heavy sea into the bay. Our drive

over forty miles-the first ten miles across a wide arm of the sea, on salt-
water ice.
In order not to be separated to long from my friends, I sent them thead two hours before me, appointing a rendezvous at a log shanty we
had built in the woods for a half-way house. There is no one living along all that lengthy coast-line, and so, in food, and drugs at the hut.

keep on what we call the "ballicaters,"

sible to get off. As soon as I topped the first hill outside the village I could see that half a mile out it was all clear water.
An island which lies off about three miles in the bay had preserved a bridge of ice, however, and by crossing a few cracks I managed to reach this island, The arm of the bay beyond this point is only about four
nites straight across. This would lring me to a rocky promontory and would save some miles on the round As far as the eye could see the ice seemed good, though it was very tough. Obviously it had been smashed up by the sea, and packed in again ty the strong wind from the northeast, but I judged it had been frozen solid together again.
all went well till I was stretch, and all went well till I was about a quar-
ter of a mile from the landing point. Then the wind suddenly fell, and I noticed I was travelling over loose "sish" ice, almost of the consistency of porridge; by stabbing down, I could drive my whip-handle clean through tiny fragments made by large pans

dogs, however, were hopelessly bogged in the slushy ice and water.
Gradually I hauled myself along the leader's line towards the pan, till he suddenly turned round and slipped out of his harness. It was impossible to make any progress through the "sish" lessly, thinking it would be soon over, and wondering if anyone would ever know how the tragedy happened. Suddenly. I saw the trace of another big dog, who had himself tallen through ust before he reached the pan. Along this I hauled myself, using the animal as a bow anchor, but much bothered by the other dogs, one of which, in shoulders, pressing me farther down shoulders, pressing me farther down
in the ice. Presently, however, I passed my living anchor, and soon, with the dogs around me, I lay on the little piece of ice. I had to help the dogs on to it, though they were able to work their way to me through the

lane of water that I had made. We were safe for the moment, yet it was obvious that we must be drowned beore long if we remained on this little fragment, so, taking off my moccasins, coat, gloves, and cap, and evcrything that 1 could spare, 1 tied my knife and moccasins separately on the backs of the dogs. My only hope o life seemed to be to get ashore a long drift before me, i might have saved, in the same way as I saved my knife, a small bag of food. The moccassins, made of tanned sealskin came right up to my thigh, and, as they were filled with water, I thought they accounted for my being able to make no progress.
Taking the long traces from all the dogs but the two lightest, I gave them the full length of the lines, tied the near ends around my own wris ahead. Nothing would induce them to move, however, and though I threw them off the pan two or three timey; they always struggled back on to it. After a tough fight I was able to haul myself by the long traces on to this new pan. I had taken care this time to tie the harnesses, to which I was
holding, under the dogs' bellies, so holding, under the dogs' bellies, s
that they could not slip them off. Bu the pan I was now on was still not enough to bear us, and so this exhausting process had to be repeated immediately to avoid sinking with
I now realized, much to my dismay, that though we had been working tovards the land, we had been losing
ground all the time, for the off-shore ground all the time, for the off-shore
wind had now driven us a hundred wind had now driven us a hundred yards further out. The widening gap
was full of pounded ice, which rose to the surface as the pressure lessened. Through this no man could possibly make his way.
I was now resting on a floe about en feet by twenty, which, when I all, but simply snow covered "slob," frozen into a mass, and which I feared would soon break up in the general urmoil and heavy sea, which was con off-shore before the wind
At first we drifted in the direction of a rocky point on which a heavy surf was breaking, and I made up my
mind, if there was clear water in the mind, to try to swim for the land, But suddenly we struck a rock, a large piece broke off the already small pan, and what was left swung around in the backwash and went right off to sea. a saw thick.
There was nothing now for it but to hope for rescue. Alas! there was no possibility of being seen by human yo one lives around this big bay. Unwinding the sealskin traces from my waist, around which I had them coiled to keep the dogs from eating them I made a slip-knot and passed
it over the first dog's nead, tied it around my foot close to his neck, threw him on his back, and stabbed him to the heart. Poor beast! I loved him like a friend, but we could not all
hope to live. In fact, at that time I had no hope that any of us would, but it seemed better to die fighting. In the same way I sacrificed two more large dogs receiving a couple
of bites in the process, though I fully of bites in the process, though I fully
expected that the pan would break up expected that the pan would break up

that freezing wind, and, anyhow, it was nearly dark.
Unfortunately, the coves along the

quarter of a century was broken. The inead of each house, raging greatly, - "No colloguin' wid the to his clan The "colloguin'" had ceased. The
two wives might sigh and shake their
heads over the back fence, might even uhisper that "this couldn't last long" but the habit of obedience was strong Moreover, the quarrel was augmented rapidly. Mr. Dwyer was reported to have called Mr. Casey's courage, and
that of all his house, into question at a neighboring resort of refreshment and conversation. Mr. Casey, so the cbliging intermediary informed Mr. Dwyer, had met the criticism with a The whole neighborhood became divided. Jim Dwyer took to feeling himself a hero in every truth, though the idea had been far enough from him in the first flush of his half pat adopted what he considered a heroic swagger in consequence. John Casey, on the other hand-a good, steady, hardworking youth, with no deep-seat$\epsilon$ d prejudices against the bearing of arms when that might be necessary-
soon found himself cherishing opinions of the most contemptuous sort toward "fire-eaters" and "jingoes." When Jim Dwyer, from the State camp, used to make occasional descents upon his home, the Casey house
next door was darkened. When hi regiment was ordered South, and all Locust Street affectionately decided the go to the station to see him off, the Caseys invited relatives to a merry making. When poor Mrs. Dwyer, her pillow that night, and praying in coherantly for her boy, heard the piano in the next house jingling with he loudest, most joyous tunes, she decided that after all her husband had
been right. They lacked not Eatriotism, but every good feeling, these Caseys! Locust street was divided with the Locust street was divided with the
families. The attendance at St Ann's fell off woefully when Michae from the parish church, polluted, he said, by the devotion of the bloodThirsty Dwyers, to St. Stephen's. There were days when the fierce old man, reading the papers, half longed
to have his hatred of the whole affair justified by the death of the foolish boy whom lust of battle had lured from the path of every-day duty. But when he found himself thinking this self and said: "The saints forgive me!" his sleeve, his hollow cheek tanned by the Southern sun, even the part of Lo the Dwyers turned out to give him greeting. Only the Casey house put out no welcoming banner, sounded no jubiant note of praise. Ella Casey, to be sure, looked through a chink in the binds in her mother's room and
thought Jim marvellously improved But Ella was just beginning to read Shakespeare's plays at school, and was dipping privately into "Romeo and There was another feminine fancy to whom the return of Sergeant

sullen hatred replaced the old blazing of wrath. The Caseys began to talk
of moving, Mr. Casey with a sombre sense of wreaking a revenge on an nappreciative neighbornood. Mrs. ther place could 'be so alien to as this one, now that she had no siserly friend across the fence. The Dwyers, to whom the intention wa "The sooner he goes the better, the coward!" said Mr. Dwyer. "I don't think I feel so bad to be ad friends with Mary Casey," said Mrs, Dwyer, if I didn't see her every Johhny was walking bome from Mollie Husted's late one night, rerolving these things and others in his mind. Across the aroma of the lilacs another odor grew, more strong, more
stifling, Johnny sniffed at it for a moment. It was smoke

He ran around the narrow space between the two houses. From the Dwyers he thought he could perceive a blur of He ran to their front door and began pounding upon' it, forgetful, for

He put in his hand through the opening, unlocked the door, and dashed in, a gust of air with him. The smouldering fire leaped into life at this new
fuel. He rushed up the stairs. No voices answered his shouts. The upper rooms were filled with smoke. The Dwyers were sleeping a suffocated sleep.
How they
How they were aroused with water the stairs by Johnny and his father before the arrival of the engines summoned at Mrs. Casey's command by another neighbor; how the Casey

lack-these are matters of Locust Street history. How Mr. Casey and Mr . Dwyer were able to find all their dlesome busybodies that have nothin' better to do than to run from one honest man to another wid lies," is not so widely known among the neighbors. But that the Caseys came back to St. Ann's, gave up the thought of moving, and were entirely modest about the hero in their own ranks, is joyfully witnessed by an entire community.
The grateful Dwyers consider that the finest proof of Michael Casey's rouchsafed the word was what he said when it was discovered that Jim Dwyer had thrown a careless match "It's wood-box that night.

even when it's all in the family. He's even when
her cousin, is he not?"
"Yes, Gertrude's second cousin, or cousin twice removed, or something
like that," answered Edith, who was supposed to be particularly well in1ormed on the subject of the bishop

## II.

On the morning after Mrs. Rutland's dinner, Mrs. Eldredge sat in tracting her delicate brows, a smile half, amused, half whimsical, on her pretty lips. She was looking up at a tall, well built young man who stood in iront of the fire. He might have ty, or almost any intermediate age His chin and mouth were a bit too f.rm, pernaps, but their strength was relieved by the glinting lights in his "I don't see how you can do it Sam, Mrs. Eldredge was saying. "Now, Jack, say no, once and for all and finally." It was Mrs. Eldredge who issued this command. "It would "They don't need to know who I am . Just give me a horse, and tell them that I am a friend of yours from Texas. That would be straight, and "I don't see-" began Jack. The run had been unusually long, and the guests would all be late; but that fact redge's equanimity.

All day long she had been picturing ould ensue when she presented her guests, as Bishop presented to $\operatorname{man}^{2}$ who had been riding with them all day. She blamed herself for it,
for she felt quite sure that if remained firm Sam would not have
same that if shat gone; but she had known so well what the ride would be to him, how much he would enjoy it, that it had not seemed possible to resist his appeal.
She had just come from the telephone, where she had been listening to a disjointed series of remarks from Edith Maybury. Her own share in the conversation had consisted of exclamations and smothered groans. "So the bishop didn't come, after all! Have you heard where he is? Or when ho is coming? Well, my dear, you don't know what you missed by waiting at home for him. It was the jol-
liest day I've ever seen. Tommy of course, was in great form, but Pinky's cowboy was the whole show in himself. I can't hear you at all. What did you say? You haven't seen he? Oh, well, he'll tell you all about it. You won't hear anything else at dinner. Pinky put him up, on Diablo, too, and the brute hasn't been out since he broke little Pete's arm, has or I'll never be there, and the others will tell you first. Good-by, dear, for half, an hour. I'il not be longer, and don't let the others talk much until I come, will you?! What had Sam done to earn that nickname? Something gruesome, of course. Jimmy Hayes became a favorite in the ranger camp. He had an endless store of good nature, and a mild, per-
ennial quality of good humor that is well adapted to camp life. He was never without his horned frog. In the bosom of his shirt during rides, on his knee or shoulder in camp, under his blankets at night, the ugly lit-
tle beast never left him. Jimmy was a humoris

metiods of warfare. Therefore, the methods of warfare. Therefore, the
rangers speculated apart and solemn rangers speculated apart and solemn-
!y as to how he would stand fire. For lot it be known, the honor and pride of each ranger company is the iadivid-
ual bravery of its members.
For two months the border was quiet. The rangers lolled, listless, in camp. And then-bringing joy to the
rusting guardians of the frontier Sebastiano Saldar, an eminent Mexican desperado and cattle-thief, crossed
the Rio Grande with his gang and began to lay waste the Texas side Hayes would soon have the Jimmy ity to show his mettle. The rangers patrolled with alacrity, but Saldar's men were mounted like Lochinvar, and were hard to catch.
One evening, about sundown, the rangers halted for supper after a long
ride. Their horses stood, panting,
ither with their saddles on. The men were
frying bacon and boiling coffee. SudCienly, out of the brush, Sebastiano Saldar and his gang dashed upon them
with blazing six-shooters and high-
voiced yells. It was a neat surprise. The rangers swore in annoyed tones,
and got their Winchesters busy; but
the attack was only a spectacular dash of the purest Mexican type. Af-
ter the florid demonstration the raidter the florid demonstration the raiders galloped away, yelling, down the
river. The rangers mounted and pursued; but in less than two miles the figged ponies labored so that Lieutenant Manning gave orders to abandon the chase and return to camp.
Then it was discovered that Jimmy Then it was discovered that Jimmy
Hayes was missing. Someone remembered having seen him run for his pony when the attack began, but nc
one had set eyes on him since. Mornone had set eyes on him since. Morn-
ing came, but no Jimmy. They searched the country around, on the theory that he had been killed or wounded, but without success. Then they fol-
lowed after Saidar's gang, but it seemed to have disappeared. Manning concluded that the wily Mexican hat recrossed the river after his thedepredations from him were reported.
This gave the rangers time to nurse
a soreness they had. As has been soreness they had. As has been said, the pride and honor of a com-
pany is the individual bravery of its members. And now they believed that Jimmy Hayes had turned coward at
the whizz of Mexican bullets. There the whizz of Mexican bullets. There
was no other deduction. Buck Davis pointed out that not a shot was fired een ruar's gang after Jimmy was was no nning for his horse. Thee shot. No, he had fled from his first fight, and afterwards he would not re-

## A Problem of Behaviour.

 Last month the following problem was presented:Mr. Pitt, a rising and conceited young author, is lunching with the Blacks. Pitt is seated between Mrs. Black and her seventeen year old
daughter, Gertrude. Mrs. Black says, "I have just been reading your new novel, 'The Dew, and I think it charming, positively charming." Gertrude pricks up her ears and says, "Why, mother, you can't mean that; you were only saying this morning that you thought The Dew' most dreadfully dull.
A prize was offered for the best answer for Mrs. Black.
The prize has been awarded to J. G. Ashto
"Yes, I did say so, but I have since changed my mind. On reading the novel through, I found that it was
most delightful. What I considered to be a tedious recital was but a necessary introduction.
Here are some other answers: "True Gertrude! But it was only a comparison. I meant that the book was dull compared with the writer of freshness to the flowers," "Really, Gertrude, how could you have misunderstood us. Mr. Pitt, "Why Gertrude, how could you have so misunderstood me? I meant that it was dull in the morning because one could not ,get outside for the dew on the grass,"

## The War Scare

The more one considers the matter the more he is convinced that the recent war scare was the best thing for the Empire that could hav dream of false security, and it has evoked a feel ing of national pride which has prompted ever one of the units of empire to offer its wealth an its men for the denfence of the flag. It is no small thing that the Empire should feel its unity a a time like this and it is just as great a thing united people.
Whatever may be the result of the deliberations of our own Government with the Home Office, every Canadian will insist on one thing that we do our full share at a time like this. It

## The Philosopher.

## Canada's Future.

If you study the history of Canada you will see that our system of responsible government grew up in defiance of the predictions of some
wise and patriotic statesmen, who were wrong in wise and patriotic statesmen, who were wrong in
their prophecies because they had in their minds certain fixed forms of government and could not conceive of the development of new forms. "Canada must either be a separate nation," they said, "or a dependent colony, ruled from London.
A self-governing colony is a thing we call A self-governing colony is a thing we call an
anomaly which we do not understand. But that yery thing which to them was inconceivable and, therefore, in their belief, impossible, kept on growing, and is the form of government under which
we live today. And talk of separation we live today. And talk of separation from the people. The Canadians living today who would sever the ties of British connection are not sufficient in number to form a corporal's guard; it is very much to be doubted, indeed, if there is even one, so that not even the corporal could be found,
to say nothing of the corporal's guard, to stan against British connection. The sentiment of Imperial loyalty is constantly growing stronger and stronger, from Halifax to Victoria; and from its growth goes discussion of the ultimate form
which the Imperial organization is destined to assume. When ial organization is destined to today in a relation with Great Britain which sixty years ago statesmen found it difficult to conceive, may we not be justified in harboring the thought that the British Empire may, sixty
years hence, take a form which we cannot conceive today? One thing every true Canadian be lieves steadfastly is that whatever the organization of the Empire will be, Canada will play a useful and honorable part in the affairs not on'y
of the Empire but of the world.

## Big Plans That Must Wait

The spirit is willing, but the financial problems involved are too huge to tackle just yet. This expresses the situation in which both Canada and their big waterways projects. The surveys for the Ottawa and Georgian Bay canal have proceeded so far as to show that that project could
be realized at a cost of about $\$ 125,000,000$. But be realized at a cost of about $\$ 125,000,000$. But
the Dominion has so much on its hands in the construction of the National Transcontinental
cailway that it would be maise railway that it would be unwise to assume further
burdens. Exactly the same condition confronts the United States in regard to the project to construct a fourteen foot channel from Chicago to the Gulf of Mexico. The cost of constructing the Federal Government at Washington, like and Federal Government at Ottawa, is carrying on a great undertaking-the Panama Canal-which will take all its available resources for some year
to come. Both the Georgian Bay waterway to come. Both the Georgian Bay waterway and
the waterway from Chicago to the Gulf of Mexthe waterway from Chicago to the Gulf of Mexeach of these projects is in the category of things which do not demand imperative haste. The prospect is that Canada will make a start upon the States begins constructing its new route to the
Gulf. Gulf.

Selecting Immigrants.
From the president of the Australian Immigra-
tion League the London News publishes a proest against the immigration policy of this country. Canada, in that protest, is accused of "self gration and carefully rejecting those who will be immediately useful in developing the resources of that Dominion." While it may be quite natural that some of the British nations overseas rom Great Britain should thus complain becaus ${ }^{2}$ emigration and to reject undesirables, it is not a policy for which the Dominion can justly be censured. The only ground upon which the immigration policy of this country can be based so
as not to be open to just censure is the principle as not to be open to just censure is the principle
of barring out. all undesirable immigrants, the principle, that is to say, of exclusion of all immi grants unfitted in any way, no matter what coun try they come from, for becoming useful ard pa-
triotic Canadian ci izens and doing their part in helping to advance the country's development
and build up the country's welfare, moral and material. This policy may have its selfish side, it is true. The immigrants we desire are those Great Britain would prefer to keep. And the
same feeling prevails in Australia. We all want the best. But is it not the only right and proper and solve its own problems? The position taken by this country acts as a corrective to the delu-
sion that social problems can be solved by shift-

Ing the unfortunates from one place to another True it is that there is ample room in the large
areas awaiting settlement in this country for those who are massed in wretchedness in crowded centres of population across the sea. But thos people are not fitted to go upon the land; and this Dominion must, in framing its policy, giv harst place to the vital interests of its own wel are. We must exclude those whose coming towns. Already we have our own problems. No country has discovered the secret of perpetua youth; every new country is ever becoming older and as it becemes older it has the old problems operation our immigration policy carrying into other governmental policies can delay the resul of old-world methods and systems and so im prove our chances of avoiding them, But bad evt eve where the ssil is richest and nature's g fts are

## Political "Saw Offs."

In October last a new Dominion Parliament was elected. The Dominion election law proof a member of Parliament upset by the courts must be instituted within thirty days of his elec general elections last ithired interval after the against sime sixty odd successful proceeding were instituted. . During the past month it wa not ounced that they have all been abandomed. Not one of them is to come to trial, or ever be heard of again. And yet when the suits were sixty odd gentlemen from whose names it was proposed to wipe away the letters "M.P" had been guilty of having violated the law of the and and had subjected himself to the maximun aginary personage, the man from Mars favite im agisitor to our Dominion at that time, in been o study our system of government, he no doubt
would have found it remarkable that the protests would have found it remarkable that the protests
were equally divided between the two political parties, the number of protests against successful candidates of one party balancing the number of protests against successful candidates (f the other party, Let us suppose that the Mar tian visitor, who is always represented as pos-
sessed of extraordinary keenness of mind and, of of course, an absolute lack of knowledge of the ways of the inhabitants of this planet, had gone back to Mars at the close of last year, and returned to this earth, for another visit to this
Canada of ours, during the past month. How Canada of ours, during the past month. How
he would be surprised at the abandonment of all these election protests! "What, then," he would ask, in his guileless desire for, information, "was the meaning of the protests?" It would have to
be explained to him that the suits for unseating be explained to him that the suits for unseating
the sixty odd members of Parliament were en tered simply to provide the wherewithal for bartering between the two political parties. He would have to write down in his note book the
term "saw off," and he would have to secure an term "saw off," and he would have to secure an
elucidation of that important political institution, so that he could explain its workings to his after his return to his own planet, he could explain that immediately after the general elections in Canada last October both parties threatened
wholesale protests, in the established regular wholesale protests, in the established regular
way. Then, as the time limit drew near, meet ings of the party managers in the different pro-
vinces were held. In some provines, Nova Scotia, it was agreed that there would be no protests on either side In some, as in On-
tario, most of the intended protests were cut ario, most of the intended protests were cut
out, enough being entered on each side to balance those entered on the other side. In Manitoba and Quebec, where the majorities were dethen, some seven months later, they were all, by mutual consent between the party manager ,
abandoned. It would be interesting to disinterested comments which the Martian gentleman would have to offer upon this pro-
cedure in Canadian politics.

A Brilliant Project
Much of the stuff that masquerades in the
newspapers and magazines under the guise of newspapers and magazines under the guise of
science is the veriest tommy-rot. Here is Pro-
fessor Pickering has about his plan to make a huge mirror, at a cost of $\$ 10,000$, and signal with it to Mars. At After much discussion of the absurd Pickering pro-
ject, along comes a practical man who knows all
about heliographing about heliographing, and makes the Professor
look silly by explainin r to him that his $\$ 10,000$ mirror would not signal any better than an or-
flect a single image of the sun, and that is all the biggest mirror that can be made can do. The practical man recommends that the $\operatorname{Pr}$ fessor buy up a lot of shaving glasses, or, better still, get a lot of fragments from a looking
glass factory, and then get some thousands of people to get together, each with a piece of looking glass, and have them all flash signals at Mars togther, the Professor directing them
where to paint their flashes. In this way where to puint their flashes. In this way he
suggests-but whether he is speaning sarcastically or not, who knows?-that possibly a suff aly or not, who knows?--that possibly a suffi
ciently brilliant combined flash might be se cured to reach the neighboring nlanet, But suppose it could. What then? If there are in
telligent beings on Mars, how would the Pro telligent beings on Mars, how would the Pro-
fessor know that they had received his message? It is easy, of course, thus to dispose of the pro jects of signalling to Mars by declaring them futile projects. But what appeals to the imegina tion is the thought of the possibility of a signa
reaching Mars and some answering reaching Mars and some answering signal being
made. It is inconceivable how anything further could be accomplished than merely that. But merely that would be a stupendous thing. And that is why the imagination of generation after generation of human beings will dwell on the
question of the possibility of such a thing being
achieved

## Wasted Lives.

Members of two of the families in the United world as standing for piled up millions of dollars have during the past month been figuring in the newspapers scandalously. One has been suing
for divorce from his wife, a former actress, the evidence has set forth the sort of life led ty such people; the other has been disclosed under
the searchlight of publicity the searchlight of publicity as a purposeless
spendthrift, in whom conscience and moral principle have become deadened. There are re spectable members of these families, who are
not to be envied in the humiliation which not to be envied in the humiliation which is
thus being brought upon them. To say nothing laid bare to public viw, what of the senselessness of the slavery to mere dress that has been disclosed?, The wife referred to from whom her husband has sought divoree deof the ultra-wealthy set with whom she lives must don an entirely new outfit at least three times a day, and sometimes five or six times. Chiefly, it would seem, their time is devoted to

Woman and the Vote
In speaking of the attitude of the Interna-
tional Council of Women-whose once every five years, was the meeting, held last month at Toronto-in regard to woman suffrage, the Countess of Aberdeen said that the Council stood for woman suffrage in-all coun-
tries where there is manhood suffrage, and try adverse to it." The fact of the matter is that the one great serious obstacle to the woman suffrage movement is not the opposition of
men, but the indifference or distaste of women. If in any country the majority of the women sex and were determined to have it, they would

## The Young Man and His Problem.

## AUM,

There is one true, genuine, and vnfailing sourre of popularity and that is unselfishness. No man has
ever yet persuaded men that he was living a life unself love without winning a place in the hearts and affections of humanity. The human heart is keen to detect love. The world loves the lover. An English clergyman makes the following remark

- When Dr. Matheson was obliged to have a col eague-successor, his colleague used to say that the Doctor persistently retired to the rear and pushed him to the front. This family-affectionateness will extend to every branch of the family. It is wonder-
ful to see how one family can absorb many. When ful to see how one family can absorb many. When I have a piece of personal news, I have to
about a dozen letters to get the family told."

## Creeds and Neecs.

Every man has his own theory about the universe -his own theclogy and his own creed. And in the main we are pretty much agreed about most things. Our d fferences are superficial-occasioned by birth, environment and geographical location. The one Thing wheart qualities appeal to all men. Speaking of the work of Gipsy Smith the Interior says:"Five thousand professions of conversion were noted, and all grades of society from lowest to highcst were inc'uded in the list. In the police court
before a Christian judge a man appeared to confess the theft of a gold watch. Being asked why he thus put himself in the way of going to the penitentiary, he man replied that he had found Jesus at the Gipsy Smith meeting and he could not do otherwise than make confession. The judge, deeply affected, adopted the words of Christ and said to the man: Go and sen no more."- whis .
which everybody believes in.

## Receiving "A Call"

The voice of the people is not always the voic of God. Sometimes the people are mistaken. A poor preacher with two good sermons will very

Bismark slept on an iron bedstead, plain, simple
and unadorned. He had carried it about with him and unadornce. He had carried it about with him during many a military campaign and he liked it.
It suited the proportions of his body. In the days of his glory, success and fame he still clung to his
old iron bedstead. Gen. Grant said that in the days of his military expeditions his luggage consist of two things-a night shirt and a tooth brush The man of genius needs little. An English I

## - Married People.

The best foundation for a happy married life bu:t out of the materials which enter into a per-
fect friendship an ideal friendship. Agreemen is the one thing necessary. Agreement in taste, de-
sires, ambitions and purposes Folks. ires, ambitions and purposes. Folks who quarrel before they are married will probably have their
differences after they have established a home differences after they have established a home. In
a chapter on "Society and Solitude" I found these
words: "If Shelley hat not disliked general society as he did, the originality of his own living and thinking mediocre people, who, of course, are always in of majority, would have silently but surely operated to the destruction of that unequalled and personal
delicacy of imarinaticn to which we owe what is inimitable in his feztry. In the last, year of his ife, he said to Tre awny of Mary, his second wife, whe can't bear scl.tede, nor I society the quick
coupled with the dead." Woman's Influence
The mightiest thing in the world is a woman's infuence. I am not prepared to dispute a woman's
rig'it to vote. Why an ignorant man is granted a right to vote. Why an ignorant man is granted a but of one th.:ng I am sure you cannot place too
binh an estimate on the influence of a woman. Sam'l. P. Jones once said:
"A pastor in one of the cities in our Conference
told me this. Said "he: "Just after I told me this. Said the: "Just after I was stationed
at this place I married one of my Christian yong men to a worldly-minded, un-Christian girl; and a few days after that I married one of my "Christian girls to a worldly-minded, wicked man." Some-
times this is a mistake as long as eternity. "But," times this is a mistake as long as eternity. "But,"
said he, "before six months thad passed away the Christian girl had brought her worldly husband to Christ, and he thad joined the church; before another six months had passed the gay and g:ddlv girl had taken her husband out of the church an
he was going arm in arm with her to hell."

## "The Land of Make Believe.

Let us let the little children have the legends and
Let them keep the glad illusions of the years that are the best
Let them know the joyous fancies of the mystic fairyland,
And the wonderful enchantments only they can For the years
sigh, and softly coming to them when they'll That they left the realm of childhood in the Land of Make Believe.

In the Land of Make Believe there is a vine that And Jack goes up and down it-we have seen path that leads us to the hush a winding path And a-many times we've trod it with the quain Red Ridinghood;
There's a frowning cliff surrounded by a castle glum and grim
old Bluebeard lurks within it-you know how we peered at him

In the Land of Make Believe we used to ramble up and down the Piper in the streets of the playing of
And we saw the fairy mother make the horses When and prance
When we rode with Cinderella to the palace for the dance;
And of evenings, you remember, how we saw
And we knew it was the Sandman, come to shut each blinking eye.

All the others-how we loved them! How they used to come and play
Till at last they sent a message that they'd come no more one day,
or they had to leave us lonely with our broken dreams and toys
e they stand behind in childhood with the Let us let the children ha
come when they have them, ere the years That they ever found the highway from the Land of Make Believe

## The Story Hour.

Happy the child and mother who journey to gether to the land of Make-Believe. I can see them now-a mother in the rocker and a little to hear of the wonderful things in the world of May-be. I can see them again, seated beside the fire, enjoying the tales so old and yat so newtales that make them magnify the present joys and forget the present sorrows, and cause them to live in the long ago or in the long hereafter And yet again I can see them seated beside an open book-perhaps the Book of Books-and a voice, not always swcet indeed, but ever sweet mothers should love to read and which all children have a right to hear. Believe me, it is under such circumstances as this that heart is bound to heart Without this communion there is not developed that filial piety which is the beginning of all true worship. Without it, a dwelling
though ever so fine, cannot become a home.

## How to Tell a Story

The telling of a story is not difficult. The story teller who knows the main facts has
simply to arrange them in order in her own simply to arrange them in order in her own
mind and then begin to talk in a natural manner. Any one who has difficulty should get Miss Bryant's , little book on "How to Tell Stories to Children. It not only gives the fullest infor-
mation but has a fine collection of stories as well. The teaching of a nursery rhyme is' so simple that no instruction is required. The counting of the fingers and the toes to "This littlle pig goes to market" brings its own reward, The story of "Tom, Tom, the piper's son," has al-
ways an attentive hearing, while "Little Boways ${ }^{\text {an }}$ attentive hearing, while "Little Bo-

search for the missing flock.
And it is just as easy to tell of Cinderella, and of Little Red Ridinghood and Goldiie Locks and is that voice, face, hands and whole body be used in the telling.
Nor is it less easy to tell one of the old Bible
stories. With very little children it is well to tell these first in simple language. Afterwards they may be read in the words of the Book. before reading it to her little ones:

## The Promised Son.

(Genesis XV., 7-17; XVII, 1-8, 15-22; XXI,5-8; XXII, 1-19.) introduction.
Do you remember what promise God made to
Abraham when He brought him to the land of Abraham when He brought him to the land of Canaan? Can you repeat the very words? What
did we say Abraham expected from God? A did we say Abraham expected from God? A
child, of course. Do you remember how Eve child, of course. Do you remember how Eve
looked for a child who would destroy the enemy and bring a blessing to the world? So Abraham was hoping for a child who would bring the blessing. I am sure that he often talked with Sarah about the child God was going to give them, but oh, how long it seemed! The years went by and there was no child. Abraham grew
to be as old as your grandfather and Sarahe as to be as old as your grandfather and Sarahi as
old as your grandmother, but still no child. old as your grandmother, but still no child.
Wouldn't you think they would begin to fear Wouldn't you think they would begin to fear
God was forgetting them? But Abraham still believed God, and that God was pleased with believ.
him.

## presentation.

One day when Abraham was nearly one hundred years old, God came to him and made him
the promise again. And I think God must have the promise again. And I think God must have
loved him more than ever, for we read that loved him more than ever, for we read that
Abraham still loved God. Hear the very words. Abraham still loved God. Hear the very words. (Chap. XV. 5-6). So you see there is one thing poople believe and trust in Him. I wonder how your father would like it if youl didn't believe what he said! Of course he wouldn't like it. Neither does God like it when people do not believe Him. Sometimes He keeps waitingt and waiting just to see how much they really trust Him. That is just how it was with Abraham. Well, one day when Abraham was one hundred years old, and Sarah was ninety years old, est, sweetest smiling little boy He was the dearat once what to call him. They named him Laughter, or in the language of that time Isaim Do you know any boys by that name? What did you say the name meant? I am sure there was a good deal of laughter, too. How Sarah must have laughed! How Abraham must have laughed! How all the neighbors must have come in to laugh over grandma's baby! But I thinking of God's promise-"In thee shall all nations of the earth be blessed." thee shall all Do you not suppose that Abraham and Sarah He wasn't a spoiled boy, either. He carefully? obedient and I am sure Abraham must have loved him all the more for it.
And now we come to the strangest part of the
story. One day Abraham heard a voice call story. One day Abraham heard a voice call out "Abraham!"" Yes," he answered. "Here I am." could God want from him now? And what
come more could God from hive him?
Do you remember what Cain and Abel offere tn God? Do you remember how Noah thanked God and gave him the best he had? Now Abraham used to do the same thing. He used to
take his best oxen and his best sheep and put them on a pile of stone and burn them befor God. And God was pleased when He saw IIe So when Abrah said "Abraham, I want you to offer I am," God Isaac. I want you to put him, instead of one of the oxen, on the altar of stone.",
How do you think Abraham felt now? hink how long he had waited for Isaac. Think how much he loved him. Surely God couldn't
mean it? And if Isaac were taken away how mean it? And if Isaac were taken away how
could the world be blessed? But God told Abraham whe to go, and just what to do. And Abraham still trusted God. So early in the morning he waked Isaac, and got the wood for the fire all ready, to be offered. And Isaac talked and chatted by the way just as he always did. All at once he
stopped and said "Oh, father, you have forgoten something. Here is the wood and the fire, but where is the lamb? How did you forget the lamb?" Then poor old Abraham must howe
wept as he answered "My son, God will provide
believed God. Then they came to the place where the altar was built. Isaac helped him to get the stones in place, and to lay the wood on hem. Then he said, "Now, where is the lamb?" said, "Isaac, my dear son Isaac, you are to be taid lamb today." So he bound Isaac's hands and Eeet and laid him on the wood. Then he too's the knife and lifted it to kill his son. But just then he heard God's voice saying, "Abraham! Abraham!" So immediately he turned and said, "Yes, Lord, here I am!" Then God said, "Abraham! I love you more than you can understand 'because you have been willing to give your only
son to me. Now loose him and let him behind you in the bushes and you will see Look behind you in the bushes and you will see a lamb
caught in the thorns. Let Isaac go and take the lamb for an offering."
Then how glad was Abraham in his heart How he must have hugged his boy. How he must have felt as he told the whole story to Sarah, and how she must have wept with joy to see her boy back safe. But sweeter than any-
thing must have been the words of Gid after it thing must have been the words of Gnd after it was all., over. "In thy seed shall all nations be

## What to Wear and When to Wear it.

 The June brides will
all be disposed of by the time this
number reaches the hands of the "Monthly" readers and I am quite sure the thrifty girl who in September will have many of her in September will have many of her rreparations well underway already.
For her special benefit I sought an interview the other day with the men and women who are busy on lines for
wear next fall and though actual garments are rather undetermined as yet, there are a number of little lhings that point to what the styles
will be and it is quite possible now to get hints for underwear and such
One idea specially noted was in the matter of petticoats. By September a thing of the past and taffeta will again reign supreme among silk skirts. The most popular petticoat, however, will be the silk moire with
wool moire for common wear. These si!k moires come in the loveliest shacie and are very durable and almost as light as silk. It is a much better plan to buy the material by the yard, and make the skirts yourself. It is quite easy to get a well fitting pattern and you can make the founce part as hain or as elaborate as you please. The material for three skirts will not skirt would cost and so frequently the eady-made skirts have been scorched in the pressing and cut, or the style 11 which they are gathered and frilled makes them tend to cut.
It is quite simple to stitch three or four casings in the very bottom of our flounce and run the cord in to purnose, by the way a ball of the twine used in stores for tying heavy dry goods parcels is as good a thing as you can get.
for fall as they have been this summer, that is round the hips, but there is a very decided expansion of the
flounce. This is to accommodate the new skirts, which as I mentioned last month, which as I mentioned last bottom, for the fall, while the sheath effect is still maintained higher up. Some of the sheer materials will be fifteen yards round the bottom and it will take some fulness underneath to hold this in proper place.
For the girl who is inclined stoutness and prominent hips there is new wrinkle in underskirts for fall skirt fitting like a glove and coming to just above the knee and completed with a very full flounce of taffeta or silk moire. I cannot say how these skirts may wear, personally I would be a little afraid of their getting out of shape, but the first effect is decidedly good for the woman or girl who wants to reduce her hips. is still the leader but for the girl who makes her own and intends to indulge in a pretty skirt or two, let me say that old rose and wine shades will be the leaders for the fall.
The September bride in the counry, who wishes to make up some pretty white skirts for her outfit, should get some city friend to watch
the stores for her, for bargains in lace and embroiderv. Lace which is both pretty and durable has been selling for three cents per yard recently and insertion to match at the same price. This lace combined with lawn, in the manner I described in detail for the June brides, will certainly make an exceedingly pretty skirt at very modcoming fall season the lingerie petticoat will be much more in evidence under even expensive party gowns than has been the case for some years and for this reason the September
lride should see to it that she has a
good supply. Fine embroidery, while not superseding lace, on these garments is certainly more in evidence
than it has been for some years.

## Separate Coats

 would suggest that she does not put too much money into it, but buy one at a more reasonable price and in addition have a separate coat, for the separate coat will be very popular for fall. These garments are decided on well ahead and one ofthe leading houses tells me that the the leading houses tells me that the
fall coat will be 54 inches long, and closer in the lines than last year and that much of the trimming, in the form of straps, etc., will be low on the hips to give the long waisted effect. Many of the collars will be in The form of the Dutch collar and while many will be of the same material as the coat a number of moire
and satin collars will be seen. and satin collars will be seen. Just cpinion about the leading colors, but all agree that self shades will be popular. As these coats are intended to be worn with different colored gowns, the more inconspicuous the shade the better.
Where collars are of a different material to the coat they will frequently be of black.

Suits
Although the exact fachion in suits for what vague there are a few points to emember. The three piece suit will the separate coats, are longer and there is a decided return to heavier material and more tweeds will be shown than has been the case for sc veral seasons. The tendency in
Eastern Canada to wear suits all
winter, with large stoles and muffs, is no doubt partly responsible for th heavier materials, but so far as the Canadian West is concerned I think I may venture to say that the fur coat and the fur-lined coat yill continue to hold sway. One of the leaders of fall
suits will be the extensive use of jet buttons. The sleeves of coats will be çuite small.

## Net Waist

The September bride may reckon a net. her outfit with the corm two ameng that they will be not only pretty 21 useful but the correct thing. The new simples are out for fall, that is for early fall, but I would suggest to the girl who hopes to wear her net waists right through the winter that she beware of the long tucked sleeve which is
shown on nearly all the early mode's. The styles for the later fall, which are now under way, all indicate small but decided puffs on the sleeves both at the elbow and the wrist, but particularly at the elbow. Net waists may be of black, white, or ivory and it is a splendid idea to have one the color of your suit, as this gives greater variety to your outfit, at compara-
tively small expense, the colored nets being shown at very prices

These quaint and rather unmusical verses came to me the other day in it not the metre would find an echo in the heart of every mother in the West. The struggle of trying to make ditions of a new country, has rather lad the effect of pulling material things into prominence wholly out o proportion to their true value and both the boy and the girl crop hav cases I know it could not be helped but in others the desire to possess "just another quarter section" has been allowed to interfere with the parents seeming to forget that while for many years at least it will be possible to get more land by paying a little higher price for it, there is only a few years in which it is possible
for a boy or girl to acquire an education, no matter what the price paid cation,
for it.

Of course this is to be merely porary arrangement until such time as the Provincial Government provides money for the erection of large per manent buildings for the women. The Board are of the opinion that if this

## EATON'S FOR EVERY NECESSITY FOR FARM AND HOME

In the buying of every article we keep uppermost in our mind the needs and the wishes of the people of Western Canada. "The greatest good to the greatest number" was the motto adopted by our Company in its infancy, and it still holds good now that we have attained our present magnitude. Every article is bought just right and sold at a reasonable profit, every advantage being given the purchaser.

## The Eaton Baking Cabinet

A baking cabinet is a positive necessity in every kitchen, and the Eaton cabinet is the very best one we have seen. It is made specially for us and can be procured through no other source. It is a model of compactness, utility and saving of labor. inaking day Table, shelve number of steps all in one piece of furniture, with receptacles for holding all spices, baking utensils, and baking material.

The dimensions are -70 inches high, 27 inches deep, 40 inches wide. The upper part is fitted with sugar bin, four drawers, and enclosed glass door cup board. The lower case has one large size flour bin, two cutlery drawers, one deep cupboard, one large sliding baking board, one sliding cutting board, as well as two large drawers at the side. Every inch of space is used to the best advantage.

This is positively the finest kitchen cabinet to be bought for anything like this price. The enormous number we buy accounts for the remarkable value we are able to offer.

## Metallic Ceilings and Walls.

Metallic is far superior to wall paper or any other wall covering. Every spring or summer the torn and discolored paper has to be replaced-a dirty, disagreeable job. Metallic Ceilings and Walls do away with this labor and expense. They are sanitary, artistic and fireproof. No dust or falling bits of plaster-a nuisance with plastered ceilings. They can be had in hundreds of pretty embossed designs suitable for any room and will last a lifetime.

If you will send us measurements we will be pleased to give you suggestions and a complete estimate of costs.

Eastlake Shingles-A Weatherproof Roof

Drink Habit Among Women hile every phase of the temper nee question has a vitality and an mportance that demands the most serious thought, conscientious discusone phase which goes to the heart of very God-fearing, country-loving man or woman, and that is the drink abit among American women. In August, 1900, in my report to the without any thought of sensationalism or of criticism, I cited the testi-
mony of authorities on the subjectlienists, physicians, scientists, and those having charge of inebriate in-titutions-because I thought that their evidence would carry greater
weight than could mine. The press of the country took the question up, and for awhile excitement ran high. metropolitan press resulted in an abolute verification of the truthfulness of the statements made in my report,
which was further corroborated by Which was further corroborated by
additional testimony from eminent physicians and well known clergymen wo were interviewed on the quesfion at issue. furore seemed to cenihe greatest furore seemed to cen-
re around Dr. Cyrus Edson's statement regarding drinking among society women, and interviews with
many woman members of the social class bristled with indignation or ran for the custom, but no society woman whose position was secure and free from blame allowed herself to be inerviewed on the subject.
There are society women who are leaders in all that is pure, lofty, reanthropic, at whose door no such others. What was said concerning the drink habit, whiskey-teas, punchfames with highballs, gin fizzes and word true, and as we go down the social ladder we find that similar customs prevail, in quantity if not in One of the greatest neurotic special ists of the century said, "If you would in your nurseries." I would go further, and say, begin before the conmay not inherit the direct taste for alcohol, yet it is true that a weak, al tendencies, will be the child of any mother who poisons her character by
Jrinking egg-noggs, cocktails, brandy or beer, while she is forming the char new being God has given her. In almost every walk of life young Women are surrounded by such con-
ditions. The wonder is that more of

Alcoholism and Tuberculosis.
Dr. Knopf, of New York, in his writes as follows: Now, one more word concerning alcoholism or drunk conoss. There is no doubt that a greatest enemy of the welfare of the nation, the most frequent destroye of family happiness, the ruination mind, body and soul, and certainly the most active co-operator of the deadly tubercle bacillus or germ of tubercuires to combat alcoholism re carly childhood the dangers from perance and its fearful should be taught. Effect of Weather Upon Man's Destinies.

## By Robert Michens.

I remember a bluff Eriton-probably belonging to what is vagucly calied the good old stock, me once when ${ }_{3}$ d expressed regre
sistence of rain in England,
mean to say you are affected by the weather! I should be ashamed if the weather had any influence over me. No doubt he was right. No doubt we
should rise superior to weather and should rise superior to weather and
everything else that strives to dominat us in this occasionally contrary world but the effort is difficult, to some almost impossible.
impossible.
Most people, I think, are affected by the weather. Some like bad weather just as some 1 ke bad company. I know a man who has toad-like propensities. He loves to crawl oat in a good soaking
mist, to feel the damp all round him, to mist, to feel in moisture, to breathe a flabby revel in moisture, to him good. It sends up his sp.rits. He can crack a joke in a dry, too. But he is an exceptional per son. Rain induces sadness in the average man. If it goes on long it makes him think that brief life is here our portion," that man is born to sorrow as
the sparks fly upward; that we are but the sparks fy upward; that we are but
shadows in a world of shacows; that shadows in a world of shacows, today and gone tomorrow, and so forth. Truisms all, which we manage to forget in fine weather, when no phantoms in goloshes meet our eyes and if we make a false st
tain to be into a puddle.
Those who are not accustomed to rain are frightened by it. I once saw an Arab rained upon or the first time. He have his passage paid from the country-Sicily-in which the dread phenomenon occurred He had been conveyed from the Sahara, I think, by an European, whose servant he was, and he evidently thought his master was behaving abominably to him in permitting him to get

The Instinct of Industry in Animals
A recent and interesting contribufion to the sum of popuinr knowledge of animal instinct is M. Frederic Hous
say's work on "The Industries of An's work on "The Industries of porary Science Series" by Mr. Walter cott. It is an ingenious attempt to
bring man and animals into line on the bring man and animals into line on the
cmmon ground of their provision b common ground of their provision by
industry of the necessities of life. The arts of collecting provisions, storing managing flocks and capturing slaves are quite as well understood by anima: and insects as by man in the earlie stages of his civilization, and show curious analogy in their developmen
in the case of the more backward among human communities. Ants of the same species both have, and have not, learnt to keep cattle. which had a flock of "cows" which they milked daily. But he also discovered a nest of the same species which had no flocks. These he presented with some of the aphides used by instantly at ing rela killed, and ate them, behaving in acked, klly the same improvident man ner as a tribe of Australian "black fellows" when presented with a floc of sheep. A little-known and strikin instance of foresight and industry ex hibited by a bird is that of the Califor nian woodpecker. Like others of its
kind, this bird is an insect-eater. Yet kind, this bird is an insect-eater. Ye
in view of the approach of winter, it in view of the approach of a wholly different character, and arranges th with as much care as an epicure migh devote to the storage of his wine in cellar. In the summer, the woodpecke

the acorn is exactly fitted, and is ready to be split by the strong beak of th climbing woodpecker, though too tigh or other birds. A relation of this woodpecker inhabits the driest parts of Mexico, where during the droughts it must To prevent this it selects the hollos stem of a species of aloe, the bore or

## GRAND TRUNK SHOP SITE

## A hive of industry

Haney Quilan \& Robertson are busy at work on their $\$ 869.000$ contract, which has to be completed by the spring of 1910. The J. D. McArthur Co. has the round house well under way, a branch line is being built to the gravel pits at Birds Hill for ballast for the yards. John Vopni, the contractor for the large station will begin work this month, and tenders are being called for the balance of the shops, that are estimated to cost another half-a-million dollars.

These shops and yards when completed will be among the finest in North America and the number of men employed will mean that the new town of Transcona will soon have a population of 10 to 15 thousand people; and in our opinion offers better inducements to investors than any other town along the line of the Grand Trunk Railway.

## Get in Line With Prosperity

By making a small investment here now, and the growth of this new town will mean something to you; will contribute largely to your prosperity; will put money in your pocket, that you don't have to work hard to earn. Because increase in population means increase in Real Estate Values.

We can sell you some of this choice property at $\$ 175$ and $\$ 200$ per lot with a small payment down, you to pay the balance, monthly, quarterly, half-yearly or yearly, at your option. Write us at once for full particulars.

## Woman and the Home.

## Co-operation.

The mother and the teacher are
simply living on opposite sides hedge, and it is necessary for some one to push aside the branches and reveal them to each other, and they
will clasp hands and live will clasp hands and live happy for
ever after. Each has taken her ever after. Each has taken her ma-
terial from nature, and has rendered account to it; but they have not rendered account, one to the other. The magnitude of the work of each has
sunk the worker. The difference sunk the worker. The difference be-
tween the mother and the teacher began far back in girlhood days, when one was compelled or permitted to stop all intellectual training at sixteen, or possibly seventeen, because
she did not have to teach, going to marry and become the mother of children. The teacher, on
the other hand the other hand, pursued her way through four or five years more of
mental unfolding, of broadening cul-
ture of full mental unfolding, of broadening cul-
ture, of full, free, expansive life, and
in the exercis in the exercise of her profession has continued to develop by reflex in-
fluence from the world of letters and fluence from the world of letters and
of life in which she lives. Each, then, or differentiy trained, has magnified
so me means of her own training and
minimized that of the other. The mother has not asked, or expected or
admitted the need of the material admitted the need of the material aid of the teacher in the training of her
children, and, therefore, many a conscientious, earnest teacher, who has interpreted her profession to mean
man-making or woman-making, who man-making or woman-making, who
has slaved for her brain children, who
has has lived for them, has all but died
for them in the cause of their perfect equipment for sucessful living, when the supreme moment came, when the
crucial decision was to be made as to crucial decision was to be made as to
the final destiny of the boy or girl, family council, her suggestions resent ed or ignored, her pleadings of no
avail. She has to stand helpless, while the mother asserts her right to guide
or to ruin her children if she pleases -and as she pleases. Thus it comes to been busy teaching laws which the mother at home has been busy violat-
ing. If we are to have co-operation the mother must accomnany her
child not only to, but through the schoolroom door. She must under
stand the aims of the teacher stand the aims of the teacher, the
principles of mental and moral de
velopment for pursuing certain methods, and fo making certain prohibitrons. Such
knowledge comes not by instinct, but
by intelligent and educated insight And so there can be no co-operations abandomed and the encounter becomes
hamd to hand: until the teacher be-
comes as individualistic in her meth-
als as the mother is individualistic
in her interests. There will be no cooperation between mother and teach-
er till there is unity of aim, till the teacher ceases to scorn the utilitarian
phase of culture, and the mother ceases to demand it alone as the end of culture.

## Hugging the Baby

Some years ago a physician wrote a pamphlet entitled, "Emotional Prodigality," in which he enumerated
the ills of mind and body likely to iollow the demonstrative affection bestowed on babies, and entreated a calm repression of the mother's love
and father's joy where the infant was and father's joy where the infant was concerned. tor has been repeated and emphasized, until today, in some homes, it is as bad form to hug or kiss a baby as it is to smash the china.
A mother full of the new theory forbids anyone to speak to her baby,
much less to play with him. mother explained to a witty friend that she wished her son to be "a perfect animal".
"That is all very well, my dear lady," replied the friend: "but you are at
present contriving for him to become a perfect vegetable!"
Somewhere between the over-excitement of an emotional devotion and se over-repression of such pseudo-
science there lies the happy middle ground of loving welcome for the newcomers to the world. They will find them find it warm soon enough. Let One who watches and tender at first knows where the great painters found their ,models for "Madonna and
 word or gesture-these one sees in lovely living pictures all over sunny Perhaps the nervous American mothers may learn from the languorthey must preserve the any rate, fashion of hugging the baby!

The Mulitplication of Toys.
Among toys, as among men, long-
evity depends not only on individual constitution, but partly on circum stance and treatment. Toys last longbut in some families than in others comes a time when father sighs as he examines the wreck of the things It is a pleasent charity which collfrom the families of the well-t-do, and redistributes them among the poor and not the least interesting of the this work is the care and skill with yhich the repairs are sometimes mad It is, of course, a truism to speak of the enormous multiplication of toys which has taken place within comparait, and few seem to find it anything more than a question as to whether it is not an injury rather than a bene-
fit to a child. Where in other day he had one or two toys at a time, he now has a dozen. The result is that supreme place in his affections which how they," are made and "what make is a loss in concentration and in knowledge. In the case of the elaborat
mechanical toys, there is also, per haps, a loss of imagination. Why is
it that the mute old rag doll is pre-
ferred to the beautiful wax doll that eries so pitifully when pressed to do
it? than the old one of encouraging the
hingen to make that

Eggless Cake.
One cupful of sugar, one cupft:1 of milk, two cupfuls of flour, five tablespoonfuls of lard, or butter, two teaspoonfuls of baking powder sifted in the flour, and one tablespoonfl: , ing water. Proceed as wit
recipes, flavoring to taste.

## Cornflour Cheese.

Is a very economical and tasty recipe. First grate the cheese you wish to use, and then boil slowly in sufficient milk to dissolve it. In the meantime, for smoothly a teaspoonful of cornflour with a little cold milk. Then add to the
boiling milk and cheese, and cook all boiling milk and cheese, and cook all together, while stirring, for ten minutes. Season to taste with cayenne pepper,
made mustard, and salt, and serve on hot buttered toast.

## A Plain Pudding

Mix together half a pound of pastry four and six ounces of ground rice one ounce of white sugar, adding a
good pinch of ground ginger. Mix with half a pint of milk in which an egg is beaten. Bake for one hour and a quarter in a greased pie-dish, turn
out, cut in two, spread thickly with preserve, and put together like a sandpreser

## Stewel Green Peas

Take a pint of peas, one lettuce, one onion, two ounces of butter, pepper and
salt to taste, half a teaspoonful salt to taste, half a teaspoonful of
powdered sugar. After the peas are shelled cut the onions and lettuce into slices; put all into a stewpan with the
butter, pepper, and salt, and only a tablespoonful of water. Stew the whole very gently for about an hour, then add the sugar, and serve. In this manner the nutrition of the peas is preserved.

Baked Cream Custard.
Beat together four eggs, four table-
spoonfuls of granulated sugar, and four spoonfuls of granulated sugar, and four tablespoonfuls of unfermented grape juice; add half a gallon of rich cream;
pour into custard cups and set them pour into custard cups and set them

## The Burbank Principle

In. 1886 Luther Burbank came California, bringing ten potatoes, reyears to J. J. H. Gregory back in
Massachusetts to sell his "sport" from Massachusetts to sell his "sport" from
he early Rose. He was one he early Rose. He was one among
many who were trying to imarove the run-down "spud" all of them used the common plan of starting with the
seed. In 1880 Mr. Burbank gave the Rural Press an account of his experithe principle back of his later suc cesses. Probably he has never given s clear a definition through the following statement in his lexter The the Press, with extracts from a magazine article by Prof. E. J. Wickson, burbank's explanation.
A few remarks in regard to the means which led to the production of
the Burbank potato may be of interest to some of your readers. Having
saved a very small and insignificant fruit a very small and insignificant
fruit of the Early Rose potato (a variety which rarely produces seed) I prepared a piece of new ground the fall before planting by thoroughly
mixing with it the greatest abundance mixing with it the greatest abundance
of every element which the potato requires. The next spring the ground was thoroughly spaded several times, so as to get it into a perfectly loose,
light bed. On this the seed was sown ight bed. On this the seed was sown,
the plants were carefully cultivated and often were carefully curtivated with plaster and guano, which kept away insects and stimulated the growth.
"There is a law of nature governing
the production of seed and bud the production of seed and bud sports,
which has up to the present time eluded the grasp of the most acute
observers, which, if once known, will lead to the most brilliant successes in
the production of new and valuable varieties in the vegetable world.
"I must conclude from what I have learned from a somewhat extended study of the subject, that if we wish
to perpetuate any variety or species
true to the original type, we must seto perpetuate any variety or species
true to the original type, we must se-
lect the largest and best seeds lect the largest and best seeds
which have the greatest vitality; but
if we wish to produce new forms or "sports," we must select the most im perfect seeds which have hardily
spark of vitality, and by carefully nursing these into life we obtain a new form which may take on a vigo in a certain useful direction never seen in that species before. I hav
not time now to elaborate this sub be true in all cases." LUTHER BURBANK Santa Rosa, Cal.

## Another Infringer Nailed. SHARPLES SEPARATOR CO, JOHN DEERE PLOW CO. and DEERE \& WEBBER CO. Sued for Infringement of DE LAVAL DISC Cream Separator Patents

For the information and caution of all whom it may concern announcement is made that the DE LAVAL SEPARA TOR CO. has brought suit in the UNITED STATES CIRCUIT COURT against the SHARPLES SEPARATOR CO. for infringement of LETTERS PATENT No. 743,428 by the manufacture and sale of cream separators containing DISC bowl construction covered by the claims of said letters patent.

And that similar suits have been or will be filed as quickly as possible against the JOHN DEERE PLOW CO. and the DEERE \& WEBBER CO., who are jobbing such infringing SHARPLES separators to dealers in the Western States.
Attention is pertinently called in this connection to the recent hypocritical advertising tirade of the SHARPLES concern against DISC separators. We have known for some time that they were, getting ready to bring out a DISC machine and thus moving up in line with more modern DE LAVAL imitators and would-be competitors. We have but now, however, been able to obtain one of these new DISC machines and the necessary evidence of infringement. The facts speak for themselves and require no further comment.
In addition to the above suits the DE LAVAL COMPANY now has infringement suits pending against the STANDARD, IOWA, PEERLESS and CLEVELAND Separator Companies and the Wm. Galloway Co., all covering the manufac ture or sale of INFRINGING DISC SEPARATORS, which infringement applies equally to machines being made by different ones of these manufacturers and sold under their own and various other names by several "mail order" and other concerns, as well as to EVERY USER of any such infringing separator bought of ANY of these parties.
To avoid any possible misunderstanding and dispel the pretense of some of these concerns that their machines are simi lar to the DE LAVAL it is proper that we should add that none of the patents sued upon involve the DE LAVAL "SPLIT-WING" FEEDING DEVICE or its combination with the IMPROVED DISC construction utilized in the up to-date DE LAVAL separators and that none of the machines is in any degree equal in efficiency, all-around practicability and durability to the IMPROVED DE LAVAL machines of to-day.
We have for years patiently stood the appropriation would-be competitors of abandoned, discarded or patent pired DE LAVAL inventions and types of separator struction, but have now determined to put a stop to the more brazen utilization of LIVE patents.
There are STILL OTHER infringers of DE LAVAL patents who will be held accountable in due course.

Dryness Without Dust.-It is as essential that poultry houses should be free from dampness as that they should
be free fromi drafts. To insure during the winters of our coast climet they must have tight board floors weil set up from the ground. With a dirt floor, even where the drainage is good the dampness will strike through durhe our long rains, and the water will holes. The expense of making a dirt floor to exclude dampness and burrow ing marauders would be much more

As soon as it has a grain and grass stomach, it should receive all the grass it wants, or good, bright clover and
timothy hay.
These feeds should be balanced with a carbonaceous feed. The best and cheapest for the
old and over is cornmeal
In milk, nature provides a balanced ration, but in running it through the separator, or removing the cream in any other way, the fat is removed. This must be supplied and the carbohydrates of corn , prove an excellent surbstitate
The milk should be as sweet as possible when fed and about the temperature of the cow, or about 100 degrees. It may then be balanced with shelled corn and fed in a clean trough
Many farmers, of course, shake theit heads and bring out the old saw:
"When creameries come in, good calves go out," but it is none the less true that hundreds and thousands of farmers have shown themselves fully capable of developing a calf raised on skim-
med milk that cannot be distinguished med milk that cannot be distinguished
in the feed lot from the calf that has run with the cow and been fed in nature's way.
The mistakes farmers make in raising skimmed-milk calves, are feeding sour another, feeding irregularly and sour another, $\begin{aligned} & \text { feeding without a balance. Growing Fine Tomatoes.
Tomatocs require good, rich soil,
stleth as should be found in all gardens. They should be grown from plants that have been developed in the hotbed and
graduailly hardened. Care should be taken to protect them from frost. Set
the plants out three feet each way and cultivate as you would corn. Alongstake about five feet high and three tomato plant is five As soon as the take a cloth or soft twine and tie the orttom of the plant loosely to the stake the plant off all side branches. As every six inches or so, tying tighter ats it nears the top. The side shoots
should be pinched off. This insures a rigorous stalk with fine fruit. It will
require only a few stalks handled this way to supply an average family.

## The Shoes Which Were Danced to

 Pieces.There was once a king who had twelve daughters, every one of them slept together in one room, where their beds all stood in a row, and in the evening as soon as they were gone to sleep the king shut the door and bolted it. One' morning when he op-
ened the door as usual he perceived that their shoes were danced to pieces, and nobody could tell how it happen-
The king therefore caused it to be proclaimed that whoever could dis-
cover where they danced in the night should receive one of them to wife and become king at his death; but whoever should attempt to do it, and lose his life. In In a short time a prince came and He was well received, and at night led to a room which adjoined the bedchamber of the princesses. There he
was to watch whither they went, and in order that they might not slip out secretly their room door was left open for him to see. But the prince soon found that and when he awoke he found that they had all been dancing
as usual, for their shoes stood there with holes in the soles.

## Where Christie's Biscuits come from-

## The cleanest factory in Canada

THE Christie, Brown biscuit factory is in keeping with
the international reputation of the firm. Visitors the.international reputation of the firm. Visitors know just why Christie's biscuits are the best baked-and hundreds visit the big factory every season.

The Christie, Brown people stake their reputation on cleanliness and quality. The raw product is the purest and best money can buy, and every ounce of it is carefully analyzed before it can enter the bake rooms. Every device and machine-making for the perfection of the product-is used in the big factory. The bright and cheerful employes, all arrayed in spotlessly white uniforms laundried on the premises, speak volumes for the sanitary conditions under which they work. You just buy Christie's Biscuits once and you'll know why your neighbors call them "so good." The best grocers keep them and they cost no more.

## Teddy's Princess

 There was once a little boy whose the ones he liked the best were about brave knights who rescued beautiful ladies from castles of wicked old By and by this little boy began to want to be a knight himself and to play that he really was. Sometimes heborrowed one of his sister's dolls, and borrowed one of his sister's dolls, and made believe sle was a princess in dis-
tress. The nursery table, turned uptress. The nursery table, turned up-
side-down, was the enchanted castle, and Joey, the Newfoundland dog, made quite a lively dragon, when he was not the terrible magician him-
self. This was delightful; and Teddy spent hours riding his fiery hobbv-
herse through the dangerous paths leading to the up-turned aalle, and restimes a day. But Teddy:s mother thought he stay-

Oxydonor is a little instrument, invented by Doctor Sanche, that has the power of creating in the human body a strong affinity for Oxygen. Oxygen is Nature's great purifier and life-giver and this surplus in blood and tissues immediately attacks whitever disease may exist, and so long as no vital organ is destroyed, it quickly restores health and vigor. Write at once for our free illustrated booklet that tells about the Oxydonor and its
wonderful cures.

are known to exist in this country by thousands because freed from pain and suffering by Lydia E. Pinkham's Vegetable Compound.

Could such a record be made without actual and superior merit? Read what this woman says, and realize that the results secured in her case could not have been made except by a very good medicine. Winnipe, Man. - "Eleven years ago I went to the Victoria
Hospitail, Montreal, suffering with agrowth in the uterus. The doctors said it was a tumor, and could not be removed, as it would cause instant death. They found that other organs were affected and said I could not live more than six months in the in the paper and commenced taking Lydia y. Pinkhams Sege. table Compound. I took it constantly for two years, and still take it at times, and both my husband and myself claim that it was the means of. saving my life. I highly recommend it to
suffering women."-Mis. Orilla Bradiey, 284 Johnson Ave., Winnipeg, Manitoba.

Science in surgery and electricity has advanced much in the past 30 years, but the treatment of disease by the old fashioned roots and herbs method has never been improved upon. The fact that this leader of them all-Lydia E. Pinkham's Vegetable Compound - is to-day the largest seller of any similar medicine in the world, is proof positive of its value and superiority, for with all our enterprise and advertising we could not keep fooling the people for 30 years. Merit and merit alone is what has made Lydia E. Pinkham's Vegetable Compound the standard medicine for treating diseases peculiar to women.
For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for herself who will not try this famous medicine. Made exclusively from roots and
has thousands of cures to its credit.
