

involuntarily when a strange voice calls "Mother!" Oh! where can you go for comfort then, if you believe not the "good Shepherd" folds your lamb to His loving breast?

There is perfidy at your household hearth—there are broken vows, which you may not breathe to human ear. There is treachery repaid for trust! Childhood looks on with a sad wonder, you must go back ward and cast the mantle of oblivion over the moral deformity. Whence shall strength come, to your slender shoulders, to bear this heavy cross? How should the steady warmth's voice? Where shall all those warm affections now be gathered up, if not in Heaven?

Oh, you have no anchor! no rudder or compass! your little bark is adrift, at the mercy of every pitiless gale; the sea is dark and fearful; the billows mountain high; the sky black with darkness, if you turn from the great Pilot.—Olive Branch.

Obituary Notices.

Died, on the ninth inst., at the residence of her son, Mr. John McLeod, Carson Settlement, King's County, N. B., Mrs. Janet McLeod, a native of Scotland, aged sixty-nine years. During the past twenty-seven years, Mrs. McLeod had been a member of the Methodist Church, and by her holy walk and conversation adorned the doctrine of God her Saviour. She retained her consciousness to the last, and in her dying moments gave the cheering and blessed assurance of her preparation for a better world.—John Prince, Seaboard, June 10th, 1854.

Died, on the 28th ult., at Keirstead Mountain, N. B., Mr. Sander, aged thirty-one years. Mr. Sander had been for many years past a consistent member of the Methodist Society; and during his illness, which was both protracted and severe, he almost continually rejoiced under a sense of his Heavenly Father's presence and support, and did not cease to praise and glorify in His Holy Ghost.—John Prince, Seaboard, June 16th, 1854.

Provincial Wesleyan

THURSDAY, JUNE 29, 1854.

The price is 10 cents per copy, and 10 cents per annum in advance. The paper is published for the Proprietor by J. W. G. at No. 10, Market Street, Halifax, N. S. W. The price is 10 cents per copy, and 10 cents per annum in advance.

Nova Scotia Western District Meeting.

The brethren comprising the Nova Scotia Western District, met on Friday morning, the 22nd inst., and separated on Thursday the 28th. Unavoidable circumstances prevented us from being present at the commencement of the sittings; and as we left Yarmouth before their termination, we are dependent on others for the following District intelligence.

On Saturday, the 3rd, the young men on trial, or probation, five in number, passed a very satisfactory examination, on the subjects of their moral character, belief of our doctrines, approval of our discipline, and their general fitness for the work of the Christian Ministry. One of these, the Rev. George Tuttle, having honorably passed through the term of his probation, is recommended to be received into full connection, and will be formally ordained during the year. The others are recommended to be continued on trial. Mr. Avery, of Horton, was fully examined and is recommended to be received as a probationer for the Wesleyan Ministry.

On Sabbath the 4th inst, there was service twice in both the Wesleyan Chapel, and in the Puritan Hall in the afternoon. Besides which the Rev. Henry Pope, Jr., preached for the Rev. Mr. Christie, and the Rev. Mr. Moore for the Rev. Mr. Davis.

On Monday evening, the Auxiliary Missionary Meeting was held in the Milton Chapel. It was well attended. During the sitting of the District, a Deputation of the Wesleyan Church presented an address to the District Meeting, to which a reply was given. Both these documents appeared in the Provincial Wesleyan of the 15th inst.

The Rev. Dr. McLeod returns from the work in these Provinces, and will join one of the Conferences of the Methodist Episcopal Church in the United States. The Rev. John McMurphy goes to Charlotte Town. The Rev. James England (from Newfoundland) and the Rev. John B. Brownell (formerly a Missionary in the West Indies) are both to receive stations in this District.

An increase of Members was reported. Last year the number was 2,727, this year 2,854, showing an increase in the District, after filling up all vacancies occasioned by deaths and removals, 118 remain on trial.

The Wesleyan Academy, Mount Allison, for the past year were received from the Rev. Principal of the Institution, by the Chairman of the District, during its Session, and laid before the brethren, by whom the several Reports were listened to with a more than usual degree of attention.—Contemplating the animating tokens of advancing prosperity with which God, in His liberality and grace, continues to favour this Literary Establishment, it was unanimously Resolved—

I. That the highly satisfactory and gratifying statements embodied in the Reports just read, as illustrative of the financial position, the Literary efficiency, and the salutary moral and religious influence of the Wesleyan Academy, afford the brethren unmingled satisfaction, more especially do they receive with sentiments of devout gratitude to Almighty God, the cheering intelligence that the full attendance of Students during the year, has afforded unmistakable evidence of growing public confidence in the ability, and fidelity, with which the Institution is conducted; and the still more welcome tidings that the hearts of many of the Students have been opened to receive "the Word of Life."

II. That we consider the erection of the building for a Female Seminary, to be placed under the same Educational direction, as a particularly auspicious event; and regard, with gratitude and admiration, the munificence of those friends who have facilitated the accomplishment of an object so desirable and important; and they look forward with hope and confidence to the future history of this department of the united Institution; being fully persuaded, that as the need of such an Establishment for imparting to females a superior training, in the popular and ornamental branches of education, has been much felt by respectable parents very generally throughout this and the Sister Provinces,—so they will extensively avail themselves of the advantages which we doubt not, the Female Branch of the Sackville Academy will present.

Resolved unanimously.—That the District Meeting having learned, that the request of Brother Henry Pope to the Missionary Committee, to be allowed to retire from the itinerant work to the more circumscribed sphere of superannuated labour, has been complied with, and that a provision has been made for the loss of his more active services, in the introduction of a Brother from another District; cannot permit Brother Pope to retire, until he has made some suitable expression of regret, that any weakness or infirmity should exist, to make such retirement necessary. Brother Pope has laboured, as a zealous, efficient, and successful Missionary, in the British Colonies for about forty years, nearly thirty of which he has spent in connection with the Nova Scotia District. The brethren believe that his name will long be affectionately remembered by the friends of Religion in these Provinces, as an active, devoted, and useful minister of Christ, who has had many souls to his ministry, and many proofs of his being an instrument, in the hands of the Redeemer, of leading men to the knowledge of "the truth as it is in Jesus."

The Brethren would express their fervent desire, that his remaining days may be useful and happy, and that his zeal for the cause of his Divine Master, may in the more limited field he will now occupy, be extended pleasingly and profitably to himself; and effectively in promoting the Kingdom of Christ, to those whose interests his past life has been, he believes, zealously devoted. The Brethren in the District tender him the expression of their Christian love, and hope that he and his family may enjoy to the latest period of their earthly sojourn, every desirable blessing from the hands of a Gracious Providence, and then an abundant entrance into that rest that remaineth for the people of God.

REV. RICHARD WILLIAMS. Resolved unanimously.—That our venerable and beloved brother the Rev. Richard Williams, of the New Brunswick District, having by invitation of the Chairman, attended the present District Meeting, the brethren feel great pleasure in conveying to him the expression of their high and affectionate appreciation of his character as a Minister, who has always been distinguished by a firm and enlightened attachment to the doctrines and discipline of Methodism,—of the grateful sense of the benefit they have derived from the suggestions and counsels with which he has favoured them on various points of interest and importance, that have come under their consideration; and they beg to assure him, that the evening of his life may be happy and useful, and its end triumphant.

THANKS TO DOCTOR ROBERTS. The Ministers of the Nova Scotia Western District, in their Annual Meeting assembled at Yarmouth, N. S., unanimously resolve.—That the hearty thanks of the Brethren be presented to the Rev. Dr. Roberts, of the Methodist Episcopal Church at Baltimore, for the very kind and benevolent interest he has manifested in the erection and completion of the Methodist Church at Dartmouth, and for the very liberal donations in money and materials for the building, he has presented to the Brethren. The Brethren feel that the kind interest he has manifested in the tokens of his brotherly kindness and regard for the interests of Wesleyan Methodism in our District; and they unanimously, and with great pleasure, tender him, by this resolution, their hearty thanks for his liberality, and hope that he may long live to labour usefully in the cause of his and his beloved Lord and Master, and meet them when the journey of life is accomplished, in "the House above not made with hands Eternal in the Heavens."

THANKS TO GEORGE H. STARR, Esq. The Ministers of the Nova Scotia Western District, assembled at Yarmouth, Nova Scotia, in their annual meeting, unanimously resolve.—That the thanks of the Brethren be presented to George H. Starr, Esq. of Halifax, for the very liberal donations he has made to the funds for erecting and completing the handsome and commodious Church recently built at Dartmouth. Resolved, at the same time and place.—That the thanks of the Ministers of the District be also presented to Mr. Starr, for the liberal donation of \$30, made by him to the very important and highly interesting Wesleyan Mission lately commenced in China; and the Brethren hope that the example he has afforded of interest in Nova Scotia and elsewhere; by his friends in their grateful acknowledgments for the zeal and benevolence he has ever manifested towards the interests of Wesleyan Methodism, and hope that he may long be spared usefully to employ his talents for the promotion of the Divine glory.

RESPECTING THE EDITOR OF THE PROVINCIAL WESLEYAN. This Meeting having learned with unfeigned regret, that the Rev. Dr. A. W. McLeod, the talented Editor of the Provincial Wesleyan, has resolved to join one of the Conferences of the Wesleyan Methodist Episcopal Church of the United States—takes this mode of expressing its high satisfaction with the manner in which he, as Editor, has discharged his duties during the past year—the Meeting, however, takes exception to an article which appeared in the Pro-

vincial Wesleyan, but at the same time declares itself fully satisfied with the explanations made by Dr. McLeod upon the subject. Upon this act of separation from his brethren, the Meeting offers to the Rev. Dr. McLeod its thanks, for the able manner in which in the pulpit, as well as in the columns of the Provincial Wesleyan, he has defended the Doctrines and Agencies of our beloved Methodism, and expresses a hope, that though separated from us as the Ministers of the Nova Scotia Western District, the cordial affection, with which he has lived and laboured with the Ministers in this country, will never be interrupted by his removal from our ranks, and that in the glorious future we may again meet each other in our common Lord, we may forever praise Him who loved us and gave himself for us. Signed in behalf and by the order of the Nova Scotia Western District Meeting.

THOS. H. DAVIES, Secretary. Yarmouth, June 8th, 1854.

New York Correspondence.

NEW YORK, June 15, 1854. General Conference of Southern M. E. Church.—Bishop Soule—Dr. Taylor, of Ohio—Spirit of the members—New Bishops and their ordination—Allowance for the Brethren and their families—Fruitful and their care—Appropriation for their support—Next General Conference—General Conference of the M. E. Church, South, adjourned on the 31st ult., having assembled on the 1st day of May at Columbus, Geo. This is an important session of American Methodism, and the venerable body gave evidence of great piety, zeal, and intellect—among such men were Bishops Soule, Capers, and Paine; Mr. Wightman of S. C., Doggett and Lee, Vir. Wadsworth, Ten, Selton, Ken, the Pierces, Geo. Wines, Miss, &c.

Bishop Soule is a remarkable man for his great intellect and christian labors. Age has not lessened the venerable man of God; but his huge frame, massive brow, commanding manner and thought, stamp him with true greatness. Dr. Taylor, of China, was also present, who took his life into his hand, carrying the Bible through the threatening fleet of the "Brothers of the Sun," to Tse-ying-woo, who leads the rebels of the Chinese revolution, and is a friend to Christianity. The Southern Church has Missionary spirit—the Revs. Messrs. Boring, McMahon, and Johnson were present. The first has built up a Conference upon the shores of the Pacific—the next planted a church in the Mississippi Valley; and the last has been labouring among our North American Indians.

A precious christian spirit distinguished the Conference in its debates, as well as in the private intercourse of its members. They secured the confidence and the esteem of the whole community where they had assembled on the interests of Zion.

Among the most important acts of the General Conference were the election of new Bishops, and the establishment of a Book Concern. The Rev. George F. Pierce, John Early, and Hubbard Kavanaugh were fixed upon for this important post, and their ordination took place on the 24th of May. Bishop Andrew read the Collect and the Epistle—Bishop Capers the Gospel. George F. Pierce was presented to Bishop Soule by his father, the Rev. Wm. L. Pierce, of the Georgia Conference. Dr. Wines, of Miss, presented Mr. Early; and Dr. Stevenson, of the Louisville Conference, presented H. H. Kavanaugh. Bishop Soule then proceeded with the ordination of the new Bishops, and answered Bishop Paine following with the prayers. In the imposition of hands, Bishop Soule laid his hands on the heads of the new Bishops, and with Dr. Boring, Wines and Stevenson uniting in the solemn ceremonies.

Bishop Andrew presented the Bible, with Bishop Capers concluded the service. With these new Bishops I have had an acquaintance for years. They are most estimable men—holy in life, self-sacrificing, prayerful, zealous, and have great wisdom. Dr. Pierce is now the youngest Bishop of our entire Church. He well deserves this honour, and is one of the most brilliant pulpits orators of our land. I know of no superior. Besides elevated intellect, he is distinguished for his strong practical sense.

The Conference fixed the allowance for the support of a single man at \$150—married \$300, besides family travelling expenses; for children under seven years \$25. Over this age and under 16 \$40. These rates are too small for a proper support in our day.

Our Southern M. Church has a number of Periodicals under its care. Messrs. McFerrin, Hamilton, Green, Gardner and Evans were appointed the Book Committee. Editor of the Sunday School Books, Tracts, and General Catalogue—Dr. T. O. Summers, Ladies' Companion and Sunday S. Visitor—L. H. Huston. Quarterly Review—Dr. D. S. Doggett. Nashville Chris. Advocate—Dr. J. M. McFerrin. Richmond — Dr. L. M. Lee. Southern — E. H. Myers. Helicon — R. McAnally. St. Louis — S. Patton. New Orleans — H. N. McTeirre. Memphis — J. E. Cobb. Texas — G. C. Gillespie. California — Dr. J. Boring.

This is certainly a respectable list of denominational religious papers, and the Conference voted them \$5,000 each as capital of the funds the Southern M. Church has recently received from the Northern. A noble appropriation.—The next General Conference was fixed for May 1st, 1858, at Nashville, Ten, where the Book Concern has been located.

Bishop Paine announced the plan of Episcopal visitations for the next four years, the Journals were read, and after singing and prayer by Bishop Capers, the conference adjourned to the Parish of Boston, addressing the Rev. Dr. Corrie, who had been published, though the Bengali Bible had then been published, either the Old or New Testament; and it was not till the word of life began to be more freely circulated that its effects became visible, or that it awakened a spirit of still deeper and wider enquiry. During the last thirty years, and eleven of God's truth has been working—as all divine agencies do work—silently and effectually in the popular mind, and producing results to be had in remembrance. We might multiply instances almost without number, but one will suffice. In the year 1830, an intelligent Parsi of Bombay, addressing the Rev. Dr. Corrie, the Bengali Bible had then been published, either the Old or New Testament; and it was not till the word of life began to be more freely circulated that its effects became visible, or that it awakened a spirit of still deeper and wider enquiry. The Provincial Wesleyan.

General Intelligence.

PROVINCIAL SECRETARY'S OFFICE, Halifax, June 19, 1854.

His Excellency the Lieutenant Governor, in Council has been pleased to make the following appointments:

To be, provisionally, until the Queen's pleasure shall be signified, one of the members of the Honorable the Legislative Council in this Province.

Thomas D. Arden, Esq. of Sydney, C. B., in the place of the late Honorable Alexander Campbell.

The Honorable James M. Leach, Thomas H. Fuller, M. P. E., and Isaac L. Vassant, Esq., are to be the Commissioners for the construction of the Saint Peter's Canal, in the County of Richmond.

To be Justices of Peace for the County of York:—James Shaw, William H. Townsend, Robert Glass, and Nelson H. Brown, Esq.

For the County of Lunenburg:—Benjamin W. C. Manning, and James Widdon, Esq.

To be a Stipendiary Clerk of Council, Laffie D. Smith, M. D. David Lantz.

To be one of the Commissioners of Schools for the County of Cumberland:—The Rev. Richard Smith, in the place of the Rev. W. C. Beale, resigned to Thomas Edward Land.

The Notary Public:—Thomas B. Aikin, and Daniel Owen, Esq.

MARRIAGE ACCIDENT.—A Telegraph despatch received on Wednesday evening 21st, says that a young man named Judge DeBates and Ed. B. Sullivan, Barrister, crossing the Brass or Lake near Westchester, was upset, and one of the partners, Mr. Sullivan, was drowned.—Sun.

NEW INVENTION.—Submarine Navigation.—The great revolution of the day, the submarine navigation, is about to be put into practical operation, the company purchasing the invention having volunteered to release that harbor free of expense to the government. The secret consists in the discovery of a means whereby artificial air may be produced in sufficient quantity to enable a crew of four men to breathe for 24 hours, beneath the water for the space of 200 fathoms. A curious experiment has been already made at Montpelier, where Dr. Payson, in company with three sailors, went to the bottom in presence of hundreds of spectators, and rose at a considerable distance and climbed the port hole of a man-of-war without being perceived by the crew. Many experiments are about to be tried at the expense of the government, and a submarine fleet of small boats, each containing a crew of twenty men, is already talked of as being about to be organized for the Black Sea. It is said that no nation whatever is given, by the slightest possibility, to the approach of one of these vessels, and that the apparatus is ready made at Montpelier, where Dr. Payson, in company with three sailors, went to the bottom in presence of hundreds of spectators, and rose at a considerable distance and climbed the port hole of a man-of-war without being perceived by the crew.

It is said that no nation whatever is given, by the slightest possibility, to the approach of one of these vessels, and that the apparatus is ready made at Montpelier, where Dr. Payson, in company with three sailors, went to the bottom in presence of hundreds of spectators, and rose at a considerable distance and climbed the port hole of a man-of-war without being perceived by the crew.

Many experiments are about to be tried at the expense of the government, and a submarine fleet of small boats, each containing a crew of twenty men, is already talked of as being about to be organized for the Black Sea. It is said that no nation whatever is given, by the slightest possibility, to the approach of one of these vessels, and that the apparatus is ready made at Montpelier, where Dr. Payson, in company with three sailors, went to the bottom in presence of hundreds of spectators, and rose at a considerable distance and climbed the port hole of a man-of-war without being perceived by the crew.

Italian, and requested to speak with him.

The King of Naples, however, refused to let that officer of the British Crown communicate with the royal visitor.

An electrical telegraph apparatus, to be employed on the field of battle, for the purpose of forwarding communications of the operations of the army from one position to the other, is now nearly completed at the Royal Arsenal, Woolwich, and will shortly be despatched to the seat of war. Each station is fitted in a light four-wheeled wagon, which holds sufficient wire for a length of twelve miles.

A most remarkable attempt to strike Shanghai was made by a body of 2,000 picked Imperialist soldiers on the 20th March. These men were led to the assault by four ferocious Mandarins, three of whom were killed in the attempt to scale on the south side—the fourth fought hand to hand on the walls until he fell.

The Imperialists were compelled to retreat, leaving 20 of their number dead and many wounded, several of whom have since died, including two Mandarins in chief command.

A contemporary remark that the art of war is in great part the art of watching opportunities, as well as of using those opportunities when they occur. Admirals as eminent as Lord Collingwood have literally cruised for years before the ports of a enemy, in expectation of the critical moment of fortune and victory, and every page of the Duke of Wellington's despatches shows how impossible it is to accelerate the operations of war, especially where they reach over a large extent of territory.

American ingenuity has discovered a novel purpose to which corn can be put, viz. for stretching boots and shoes. The boot or shoe is well fitted with corn, and made secure by such tight lacing that it can escape. It is then immersed in water, during which the leather is distended by the gradual swelling of the grain. After being taken from the water, a coating of neat's-foot oil, laid on and left to dry renders the boot or shoe fit to wear.

(Corn on the toes are to go in afterwards, we suppose.)

When, at the Revolution of 1655, the French ambassador at Constantinople, by command of Louis XIV. urged the Porte to take part in the war against William III. in support of James, the Grand Vizier replied, that the Turks sympathized with the English for exercising their free judgment in such a case, as it was not uncommon in Turkish annals, that a bad sovereign should be deposed. About this period, three internal reforms commenced in Turkey, which have, since one hundred and fifty years of struggle and various fortunes, brought on the present crisis.—*Edinburgh Review.*

Several Russian diplomatists and noblemen in the Russian service are connected by marriage with English and German families. Thus the daughter of Count Woronzoff is Lady Penelope, the youngest daughter of Count Nesselrode, one of the Saxon ambassador Von Schach, and the daughter of the Turkish, and the Baroness of Meyendorff, wife of the Russian ambassador at Vienna, is actually the sister of Count Buol Von Schauenstein, the present prime minister and confidant of the youthful Emperor of Austria.

It is remarked that the tunni and fortifications in the valleys of the Mississippi and the Ohio, the mummies in the caverns of Kentucky—the mummies at Memphis—the ruined structures in Arkansas and Wisconsin—the fragments in Texas, and the wonderful and various groups of monuments in Central America and Mexico—mountains hewn into forms of terraces—pyramids surrounded by temples—gigantic idols and altars covered with elaborate sculpture—with elegant utensils for domestic and religious use—have revealed the existence, at a distant period, of a nation not polished or learned, yet endowed by the grandeur of its art and high artistic requirements.

A letter from the captain of the missionary ship John Williams, received at the London Mission-house last week, reports a visit to Eromanga, in the New Hebrides. During the stay of the vessel off the island, the very man who had been the first slave at the mission, a missionary Williams came on board. He is now a learner of Christianity. The question was put to him, why he killed the missionary? His reply was, "White man had been to his island and had slain his brother and his sister; he feared this white man would do likewise, and so he killed him." The island is now, to a great extent, reclaimed from heathenism by the labors of a Christian minister.

Richard Williams a scripture Reader, died at Cork last week, from injuries received during an assault upon him on the 29th August last. In July 1853, he was engaged as an agent of the Primitive Wesleyan Methodist Missionary Society, and was sent by the Committee to the village of Whitegate, in the county of Cork, where he with meekness and fidelity discharged his peaceful duties, seeking to extend a knowledge of the gospel in that benighted place. But the man was denounced from Sabbath to Sabbath from the altar, and a mob led by a Roman priest, fell upon him and beat him till they thought he was dead. Since then his health has been sinking, and now he is gone.

The accounts from the African Smithfield gold diggings on the Caldera River, according to the Graham's Town papers, are important, removing all doubt of the locality being highly auriferous, and forming strong ground for anticipating such discoveries will attract and fix upon it a large amount of the public regard.

The country in which the gold is chiefly found is a large open valley, about four miles square. Every day discoveries were made of nuggets of 20 to 50 grains. Specimens of gold have also been found on farms several miles above and below Smithfield. Wagon loads of it is thought that the true gold field will be found in the great mountain range that divides the new free State, formerly the Sovereignty from the Natal territory, but of which range very little comparatively is known.

A Sister of Mercy at Rome prevailed upon a couple recently married at an independent Chapel to be re-married at the parish church of Rome by the Curate of the Rev. Mr. Bennett. The maiden name of the bride was Elizabeth Plummer, her husband's name is Dimmock, in the marriage certificate issued at the church she is described as "Elizabeth Dimmock, formerly Plummer," and in the column usually filled with the word "bachelor and spinster" are the words "previously united at the Zion meeting-house." It is thought that the Curate had held a meeting, and passed a resolution declaring the re-marriage "a violation, and not an evasion, of the law of the land"—part of a system "designed to set up ecclesiastical arrogance above civil authority," and "an act deserving of the reprobation of every Englishman."

The new Spanish minister had arrived at Mexico, and had a formal reception.

A hurricane occurred in the city of Mexico on the 19th ult., doing considerable damage.

The wheat crops of Tennessee promise an abundant harvest. New wheat has already been sown near Augusta, Georgia, and is fully equal to the best Genesee. It never was ripe so early before.

A parliamentary return shows that from the year 1846 to 1853, both inclusive, there was expended in criminal prosecutions in England alone the sum of one million two hundred and one thousand, six hundred and forty-one pounds sterling.

A subscription of about £90 has been raised by the working people of England to purchase a gold watch for Capt. Ingraham, as an acknowledgment of his services.

HERD'S GOLDEN GLOSS FOR THE HAIR.

Among the many preparations for the growth of the Hair this GOLDEN GLOSS takes the lead. Three reasons will be given why it is so universally used and preferred to all others. 1st. Because it has proved the most effectual in restoring the hair to its natural color and length, and length of the hair is preserved. In that case this will be a triumph of surgery in private practice such as is seldom or never reported from the hospitals.

2d. Because the Ladies, with little discrimination, which they all possess have adopted it. Many other reasons could be given why it is a great favorite with the public, but such a number as to give it a trial. Price 2s. in a large bottle. For sale by Druggists and Stockporters everywhere.

D. TAYLOR, Esq., Boston, General Agent, Sold in Halifax by John Taylor and the principal Druggists. 251—253.

March 16, 1854. W. & A. 6m.

A Great Blessing to the Afflicted.

Dr. McLean, the inventor of the celebrated Liver Pills, used these pills for several years in his practice, before he could be induced to offer them to the public, and he has been enabled to make them known throughout the country. This learned physician felt the same repugnance that all high-minded men of science feel in entering the lists against those unscrupulous empirics who obtrude their useless nostrums upon the public, and he was upon a system of purging to sustain them. Convincing, however, of the real value of the Liver Pills, and influenced by the plain dictates of duty, the Doctor finally sacrificed his delicate feelings on the altar of public good. His great medicine has not disappointed the expectations of the medical practitioners, at one instance he was induced to furnish his medicine to his country, and every quarter do hear the most gratifying accounts of its wonderful curative effects—the East and the West, the North and the South, are alike laden with a tidings of great joy from the afflicted.

These wonderful Pills have completely conquered that scourge of America, the Liver Complaint.

Purchasers will be careful to look for DR. McLEAN'S CELEBRATED LIVER PILLS, and take none else. There are other Pills purporting to be Liver Pills, now before the public. Dr. McLEAN'S Liver Pills, also called Celebrated Vermifuge, can now be had at all respectable Drug Stores in the United States and Canada. Agents in Halifax, Wm. LANGLEY and JOHN TAYLOR.

The misery, the disappointment, the interminable expense of incurable "physic-taking," are now happily superseded by the use of Dr. McLEAN'S CELEBRATED LIVER PILLS, which, by their action on the system, removes chronic and exhausting disease, and replaces labor and pain by vigor and health. When taken it restores to the enjoyment of the most perfect health, and to all social grades and professions, and is a proof that the emotion of gratitude is more powerful than any other emotion, when we find ourselves cured of a disease which has afflicted us for years, and which has rendered our daily life a torment, and our nights a torture. It is a relief which is gratefully expressed to the praise and the cherishment, a lawyer, a merchant, a tradesman, and every other mechanic, have joined in this unanimous and unparalelled testimony, and from every quarter of the same spirit which characterizes the communication of Mr. Evans Peppercorn, who commences his letter by saying—"For many years I have been a martyr to indigestion, acidity, flatulency, constipation, and nervousness, and such a degree, that I was unable to stay alone in my room, or walk out alone, being constantly filled with unaccountable fears, and having several times attempted to commit suicide. I had the advice of three eminent physicians, and taken their prescriptions for a long time, but my ailments were not relieved. I then used your excellent Food product, I am happy to state, an immediate change for the better, and I am now, after two months' use of it, a widely different being, and am able to perform every duty of my profession, and to enjoy the most perfect health. With gratitude I subscribe myself, your obedient servant, &c. &c. EVANS PEPPERCORN." Another gentleman, who, like most others, invites Messrs Du Barry to refer to his letter, thus testifies to the efficacy of your Food product, and says, "I have been a martyr to indigestion, acidity, flatulency, constipation, and nervousness, and such a degree, that I was unable to stay alone in my room, or walk out alone, being constantly filled with unaccountable fears, and having several times attempted to commit suicide. I had the advice of three eminent physicians, and taken their prescriptions for a long time, but my ailments were not relieved. I then used your excellent Food product, I am happy to state, an immediate change for the better,

Old Memories.

Old memories! old memories! What precious things are they! How close they cling around our hearts!

How dearly cherished they! How often we will cast aside The cup of promised bliss, And gladly turn us to the past, So fraught with happiness!

Let others boast of coming joys, And tell how brightly shine Their hopes of future happiness— Let memory's joy be ours!

I would not lose the consolation Of one good action done, To weave the brightest web of bliss That fancy ever spun.

Old memories! old memories! O how they stir the lips, How oft a smile will part the lips, How oft a tear will start, A memory, faithful to her trust, Brings other scenes again, In all their true reality, Of pleasure or of pain!

O how would lose the memory Of childhood's early days! Would waste a mother's tenderness, A father's care away! A dear, dear brother's earnest love, A gentle sister's smile, The joyous friend who gladdens life, When life was early white!

O how would roll the Lethian wave Above the early youth, When earthly lights seemed all dimmed, And all ungodly truth! Nay, may, and all life's latter scenes, And its green spots, which we turn Through all our after years.

There's many a light from bygone days Introducing all its stores, provisions, etc., free of duty, and all vessels chartered by the society shall be free of light-house and anchorage charges.

Miscellaneous.

How to Cure Neuralgia.

The following, in regard to one of the greatest evils which flesh is heir to, is from a review of a work on Neuralgia, just published in London, from the pen of Dr. Downing, of the Royal College of Surgeons.

Now comes the question, How to get rid of the cruel agony? Dr. Downing tells us that we are to give an answer, which we believe to be satisfactory. In addition to the proper medical and hygienic treatment, which is carefully and ably stated in the work before us, Dr. Downing has invented an apparatus which appears to be very efficacious, and we will, therefore, allude to it in order to do justice to its own merits.

Schools in China.

One of the favorite maxims of the Chinese is, "By learning, the sons of the poor become great without learning, the sons of the great are ruined with the common tongue." The beneficial influence of this maxim is observable in the village schools, which are generally well attended, since it is natural for every father to hope that one of his children at least may distinguish himself by a superior capacity, and thus make his own fortune, as well as that of his family.

Another African Republic.

It may not be generally known that the colony planted and maintained on the West coast of Africa by the Maryland Colonization Society, though forming part of the country generally termed Liberia, is not subject to the independent Republican Government of which President Roberts is the able executive, but up to the present time has remained under the jurisdiction of the Maryland society and officers selected by it, maintaining a separate existence.

From a statement which appears in the Maryland Colonization Journal, it appears that this connection, which has been long maintained, is now about to terminate. The colonists of the region referred to some time back adopted a constitution, and expressed their desire to set up a government independent alike of the society and of the neighboring republic. In order to effect this purpose, they sent to Baltimore two commissioners, William A. Prout and William Cassell, to confer with the Maryland Colonization Society on the subject.

The commissioners have been in Baltimore on the 22d of February, the 25th anniversary of the settlement of Cape Palmas, articles of agreement were drawn up, which, if ratified within a year by the new government, will separate the colony from the society. By these articles the society cedes all its public lands to the people and government of the new state on certain conditions, in regard to the quantity of land to be granted settlers, &c.

The society is to have the privilege of introducing all its stores, provisions, etc., free of duty, and all vessels chartered by the society shall be free of light-house and anchorage charges. Recaptured vessels shall be admitted into the country if the United States Government desire to send them there. All emigrants sent out by the society shall have the same rights of citizenship as those heretofore sent out. All public property in the colony is to be ceded to the new government. The company is to be dissolved on the 25th of Feb. On their arrival, the whole matter will be referred to the colonists, and a vote taken thereupon, and the constitution, submitted to the Board of Managers, by the commissioners, will also come up for final approval and adoption, after which will follow the organization of the government of the new state.

usual practice, now, for persons of rank and wealth to engage private tutors for their children; but whether the latter are educated at home or at a public school, they must undergo the regular examinations before they are eligible to office, nor are they taught in any way differently from the boys in the village seminaries.

Other Princes have commanded victorious armies; this commander created them.

Blush, oh art! at a hero who owed thee nothing! Exit, oh nature; for thou wast this prodigy!

SCIENTIFIC FACTS.—Count Rumford, by boring a cannon without water, so heated it by the friction that he made it boil, and actually boiled a piece of beef in it.

One gallon of water in steam will raise six gallons from 56 to 211.

Four lbs. of beef loses 1 lb. by boiling, 1 lb. 5 oz. by roasting, and 1 lb. 3 oz. by baking. Four lbs. of mutton loses 1 lb. 4 oz. by boiling, 1 lb. 6 oz. by roasting, and 1 lb. 4 oz. by baking.

Lamps were used by the ancients, and candles were an invention of the middle ages. At first, wicks were made of hemp, papyrus, and the pith of rushes. Ox and tallow were used as fuel.

One pound of hydrogen consumes or fixes seven and a half pounds of oxygen, which melts 320 pounds of ice. One pound of wax, oil or tallow consumes or fixes two pounds of oxygen, which melts 184 pounds of ice.

The invisible radiations from heated bodies may be acted upon by refraction of light, but they do not pass through transparent bodies.

A volume of ice is melted by as much heat as will raise an equal bulk of water 140 degrees.

No Mother.—"She has no mother!" What a volume of sorrowful truth is comprised in that single utterance—no mother! We must go down the hard, rough path of life, and become inured to care and sorrow in their sternest forms.

BEAUTIFUL EXTRACT.—Do trees not at sunrise, when the winds blow and the birds are singing their songs, play a sweet music to our ears? When the soft whispers of the green leaves in spring on a sunny morning, who does not feel as though rainbow gleams of gladness were running through his heart?

DISTINCTIONS.—A French Abbe, traveling in a stage, was asked by a young clerk, a would-be wit and atheist, if he knew what difference there was between a priest and a negative, and upon being assured in the negative, said that the priest carried the cross on his breast, and the ass on his back. After the laughter had subsided, the Abbe asked if the clerk knew the difference between a clerk and an ass.

INSOLENCE OF MIND OR DISEASE.—It would seem as if the study of certain diseases sometimes favoured their real or imaginary development. Laennec died of phthisis, and Corvisart of disease of the heart. When the celebrated Professor Frank was preparing his lectures at Paris, on a disease of the heart, he was seized by one of the disease, and he was obliged to rest for a while. Rumor says that no less than five of the professors in one of the medical colleges have unjustly suspected their hearts. Medical students, exhausted by a winter session, are apt to be special subjects of renal disease, or disease of the heart. A young friend attended our lectures last winter, on diseases of the chest, felt an unusual knocking of his heart after ascending the long college stairs, and required several examinations to satisfy him that there was no disease.

PROPAGATION OF FINE ROSES.—It may not be known to many of our readers that the fine roses which we see in our gardens are readily propagated by means of slips. Cut from the well ripened wood, slips three or four inches in length, strip off a part of the foliage, and insert them in clean white sand, placed in pots or boxes. Keep them regularly watered, so that they may not get dry, and keep the temperature at about 60 degrees, and they will strike root very freely. Some practice covering them with a bell glass, but those of more experience do not consider this practice necessary. Ladies may also propagate any of the choice roses desired, by budding on a stock of the same name, or by grafting. It adds much to the beauty of the hardy climber, to have the main trunk variegated with branches of roses, of different shades of coloring. We strongly commend the practice to those who would thus adorn the shrubbery of their household.

A SINGULAR LADY.—The late Rev. Bela Jacobs, of Cambridge, Mass., though exceedingly kind and attractive in his manners, could not, when necessary, forcibly administer a reproof. Some young ladies at his house were one day taking of their absent female friends. As he entered the room, he heard the epithet "odd," singular," &c., applied; he asked the name of the individual who had so termed him, and she said gravely, "Yes, she is an odd young lady, she is a very odd young lady; I consider her extremely singular;" adding very impressively, "she was never heard to speak ill of an absent friend." The rebuke was not forgotten by those who heard it.

THE WHITE VAIL.—A beautiful but strange custom prevails among the Japanese, by which the bride receives a disguised serpent as a present from her friends. In our land the bride frequently receives presents of jewelry and dress, but in Japan her friends give her, on her wedding day, a long white veil. This veil is large enough to cover her from head to foot. After the ceremony is over, she carefully lays aside that veil, and, in its stead, she wears a long white shawl, which she wears until she is ready to be married. What would our friends think of having their shroud around them to partake in the dancing and other foolish revelries of a marriage in this land of puppets and salt-baths?

SYRIAN NOTIONS OF MEDICAL SKILL.—A doctor is thought nothing of here unless he can perform a violent operation. In our country an anecdote of a soldier's doctor, who acquired a great reputation at Beslan. He was much given to administering emetics, and having a very delicate patient, resorted as usual to this method of cure, leaving in the hands of the patient's brother three strong doses of emetic, which he directed should be administered at intervals of three hours. The brother, finding the first powder had no immediate effect, gave the unfortunate invalid the remaining two within five minutes. The result was violent sickness, succeeded by spasms and cramp, which in a few hours terminated fatally. Next day, the doctor was summoned to learn, on enquiry, that his patient was dead, and evinced his concern in his face. "Never mind," said the brother; "it was so fated; but, Masalla! you are a great doctor; the medicine you gave never ceased operating till the moment of my brother's death. It was a fine medicine, and if it could cure him, nothing earthly could."—Ned's Eight Year's in Syria.

A new mortar bullet, invented by M. Charnerin, has been submitted to the English Government through the command of the inventor, the inventor requesting a fair opportunity for experiment before the military authorities of that country. A Belgian military commission has made a report on the new projectile. Of its merits the report states, that the bullet requires only a fourth of the powder required for the common bullet, and will carry four times the usual distance, and that the cartridge is easily constructed by the soldier himself, under all the usual circumstances of an ordinary campaign.
