REDUCED RATES OF PREMIUM-HALF CREDIT RATES OF PREMIUM. CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary Ruropean Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much dower. Rates of Premium than those of any other Assurance Company t anaecting business is Canada.

The Directors have also resolved to extend to British: North: America, the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly appropried, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by see or land, to other parts of North America without affecting their Interest in their respective Policies.

The ice bridge was completely broken up under the force of the waves, acted on by the wind, and the entire mass moved off down the stream. The telegraph wire, only last week with great labor carried from the Citadel to Point Levi, was assigned in two at the middle. It is intended now to carry the line up to Carouge, and there carry the wire across under water.

The following sensible observations on the Clargy Reserve question, are from the Brockville Statemen, Mr. Gewan's paper;—

Two questions will arise out of this Despatch; lit. Shall the recents of these Reserves be held speed for religious purposes? 2nd. Shall they be devoted to purposes at education?

The Loury Canadians are in favor of the first proposal, well knowing that if these Reserves are taken away, the immense possessions of their own Church must apseality follow; the Church seems to court their opposition? The Upper Canadians—that is, all the Radicals, and a considerable portion of others—will favor their being devoted to purposes of general education. We go for maintaining them for religious purposes, and if such sessiots as the Church are kicked overboard, and the issue put fairly before the country, if such nestots as the Church are kicked over-board, and the issue put fairly before the country, we have no doubt as to the result. All Christian Bodies, Roman Catholic as well as Protestant, are in favor of religious education; and if a fair and equitable division should be made, according to numbers, such Church can support its own Min-isters, or educate its own people, or otherwise apply its proportion, as may best suit their own principles and their own wishes.

resting account of a new discovery in Photo aphy, made by a gentleman named Hill, residing n the State of New York; Mr. Hill is a Clergyman, obliged to retire from active duties by reason of ill-health, and has amused himself with experi ments in this beautiful art to occupy his time. The discovery is a truly wonderful one, for it is neither more nor less than the transfer of the actual colors of nature to the prepared plate. We quote the following passages from a short treatise which he has published:—

" My wife and myself alone," says he, "know the process, and not a scrap or item shall ever be communicated until I am made perfectly sure of a suitable compensation." All that he has divulged is, that the mystery is dependent on a new and "singular compound" which he, one day, anexpectedly, found to be the grand areanum, of which he had been in quest. Of this he gives the following account:—

"The compound above referred to it to me, the interesting of the interes unicated until I am made perfectly sure

"The compound above referred to is to me a nondescript, though I have made the acience of chemistry my study for years. That it is a new substance, or combination of substances, I am positive; and this is all I know concerning it. It is simply and easily produced, but not by any law stated in the large number of chemical works with which I am familiar. Doubtless, however, a correct and thorough analysis will determine its nature."

Mr. Hill had forty-five specimens of the Hillotype, of the character of which some idea may be formed iom his description, which we quote, as follows:

" 1. A view, containing a red house, green grass and foliage, the wood color of the trees, several cows of different shades of red and brindle, colored garments on a clothes-line, blue sky and the faint blue of the atmosphere, intervening between the camera and the distant mountains, very delicately spread over the picture as it by the hands of fairs artist.

fairy artist.

"2. A sunset scene, in which the play of colors upon the clouds is impressed with a truthfuluesa and gorgeous beauty which I cannot describe.

"3. Several portraits, in which I have the true complexion of the skin, the rosy cheeks and lips. blue and hazel eyes, auburn, brown, and sandy hair, and every color of the drapery. Changeable silk is given in all its fine blendings of colors, and delicate richness of hues. I not only not red. able silk is given in all its ane blendings of colors, and delicate richness of hues. I not only get red. blue, orange, violet, &c., but their various tints. The whole impression, including the lights and shades, is far more brilliant, round, and mellow. than the most superb daguerrean image I have ever seen.

He adds:—
"I have a most exquisite type of my little girl,
(one year old,) taken in the act of crying, the plate
not having been exposed a full second. At the
same time, my light required fifteen seconds for a
daguerrotype. This picture has caught the expression perfectly, both of the eye and whole face.
On one cheek is seen a bright tear drop, and the
color showing through it much deeper than the
surrounding parts; which latter, I suppose, is
owing to the refractive action of the fluid."

A Jury was sworn in, speaking the French

Monday; after the Service the prisoner came to my house; he asked me if I would have the goods of my daughter to pay for the Service, and the remainder to get prayers said; witness did not accept of them, but asked but time to consider; prisoner came again in the evening, and I told him that if my wife was dead I should not send to my father-in-law to my father-in him that if my wife was dead t should not send to my father in-law to pay for the Service; my daughter was 22 years old; he did not stay at my house that evening, but went away immediately; he did not speak of the manner of his wife's death; my wife sometimes apoke to him of it, but he never made any speculatious as to the manner the deceased came to her death; prisoner was arrested on Tuesday evening; I was asked to make a deposition at home, I can't say if on Monday evening or Tuesday; I had suspicious, and was not suprised at being asked to do so; I went to look at the well of Louis Martin on the form of Jean Martin, after I had seen the body in the house and became suspicious; (a hollow in the house and became suspicious; (a hollow trunk of a tree of about 23 feet high and 3 feet

trunk of a tree of about 22 feet high and 3 feet in diameter, was here shewn; a piece of this trunk, forming the arc of a circle, two feet in length, was broken away; this surrounded the well; the witness stated that about a frot ot it was broken away, when it was used as a guard to the well, which was formed from a natural spring, a little deepened.) A piece of wood they put in the well reached the bottom; it was about 3 feet deep; I do not think an ordinary sized person could have fallen in the well; my suspicious augmented from the facts before narrated.

Cross Examined:—I did not notice prisoner's dress when I met him with Francois Valleneuve,

On Tuesday, the 15th August, I asked the deceas-On Tuesday, the 15th August, I asked the deceased if she would come and mind my house while I went away; she said yes, and we went out. We came back on the morrow, the 16th, half an hour before sunset, and I went to Mr. Lauzon's, and asked the little girl if she would fetch my key from Jean Maitin's. She returned, and said the key was not there, and nobody in. I went home, and found the door open, and the well bucket and found the door open, and the well bucket and found the door open, and the well bucket and found the second at the deceased was found in the well, witness was in company with the prison r lying on a buff of a group of is and a transfer of a group of is and a group of is and a transfer of a group of is and key was not there, and nobody in. I went home, and found the door open, and the well bucket taken away. I took a little saucepan to get some water, and found the deceased in the well. I was too much astonished to notice particularly her position, but she had her head on one side, and her straw bonnet before her in the well. the witness pointed out the position of the head in the hollow trunk.) The face of the deceased was before me, and it was daylight; her head was under water; the water was clear, and I saw her face through the water; I ran towards the prisace through the water; I ran towards the latsoner's house, and cried out, "Come, John, your
wife Julienne is drowned in the well." The
father immediately threw down his scythe, to ran
to the well. The prisoner and his lather went
there immediately. I went home, and saw no
more; I was too much susprised. The prisoner
was afterwards brought to my house, and appeared like a dead person; he stayed about threecontrol of the burn he deanly some water. I did quarters of an hour; he drank some water; I did not take any particular notice of him; my hus-band gave him water to make him come back to himself; the prisoner had never treated. himself; the prisoner had never treated his wife badly; she had twice seen them spit in each other's faces, but it appeared to be in play; the deceased was a woman of good temper, and the

This sentence is constantly in the mouth of every person, is order to explain certain complaints. Those who
use it offen, we think have but a fami idea of its precise
meaning. We will offer an explanation, which we be
lieve to the opinion of a majority of the most learned
physicians. A person, for instance, has been quer exerting any particular net of muscles-of the throat, from violein appraising—of the loins, by too much stooping or bending, or these or shy other part of the body: these parts or
muscles are, consequently, weakened and relaxed, and
become a fair prey for any disease. The person who has
been thus acting ascidentally or otherwise, expores him
self to the cold air, the perspiration immediately coases,
and the blood, which had been but just now erculating
rapidly throughout the surface of the body, is repelled inwardly, and is sure to settle in those parts which have
heen reviously wearied and relaxed. Here, then, we
have an accumulation of blood, a congestion, which gives
rise to all the pain said etilitiess attendant upon such complaint. When this takes place in the throat, we have

RADWAY'S READY RELIEF,
Taken Internally and applied Externally.
Its first action, when freely applied, is to binut the acute sousibilities of the nerves, and almost instantly relieves the pair; its steenidary action is to excite perspiration, and redden the parts over which it is applied almost to a glow, thereby determining the blood from the injured parts to the surface. In these chaes, the READY RE-LIEF should be applied freely, at the same time rutbing the parts with a piece of flaunel, and it will be found in every case to give immediate aid permanent relief.

Please read the following statement from John Bucknam, Esq., of Dixmont, Me. 2—

Masses, Carrie & Perkins,—For two years mast I have been entirely prostrated with the Rheumantism; both of my kinese were swelled to twice their original suze—a large bauch came out of my breast bone, appearing like a part of the bone thrown out. Another bone was thrown out of my wrist, In short, I endured the most exerciciating pains for nearly three years. I obtained the best madical attendance the country afforded, and tried a great number of medicines and prescriptions, without the least number of medicines and prescriptions, without the least being to the Cramp, and Pain Killer, prepared by Messes, Carsis & Persins, of Banger. Soon after taking it I found if could get some reat uights, and the pain became less violent. I have continued to take it and apply it externally, until I have used eight boyles. I took much larger quantation than was recommended.—The swelling has all gone down, both in my limbs and breast, and I am entirely reletived from pain. I have been able to do a good day's wask at any time for the list three months, for a man of my age. No description of my case can essay the transmission! I have also used it for choic and pain in the stomach, and al ways found intraediate relief.

PLANTAGENET WATER.

Among the objects of attraction at the late Industrial Fair, the celebrated Plantagenet Water held a conspicu ons position, and its exhibition was attended, we learn, with the most favorable results. The demand at the Depot for this health-nighting draught was accorporated in the was with great difficulty strangers and visitors to the city coult be supplied. The celebrity of these Mineral Springs has been 60 thoroughly and satisfactorily established that testimony of the most valuable character seems daily accumulating. The highly respectable certificates given in our paper of to-day will, thousable, increase their reputation, and add to their value throughout the Province. The testimony of the medical gentlemen is certainly highly favorable to the character and quality of these Sprugs—Drs. Nelson and Gibb placing them above all other Mineral waters on this Contuent:

"I believe I was one of the first Practitioners of this city who recommended the use of the Plantageaut Spring Water, and succ that time I have prescribed it to a very large number of my patients with invariable advantage."

"Two members of any family, of feebly and delicate constitutious, have derived marked benefit from the use of the Water. One had nearly lost all power in the right PLANTAGENET WATER.

"Two members of my issuing, or teeply and refracte constitutions, have derived marked benefit from the use of the Wetter. One had nearly lost all power in the right arm, the result of a severe and protracted natack of Rheumanisma; the other was excessively debilitated from derangement of the digestive and alimentary organs.

"The administration of the Water is altended with the happiest result in constitution, arising (four sedentary habits, and in aged persons.

"In bearthurn, morning sickness, and the other complaints to which women are subject under certain circumstances, it acts mixed agreeably and effectually, but in these deratigements, as well as where there is over action of the kidneys and bowels, it should be taken in amalier quantities at a time, but more frequently.

TAKING COLD.

This sentence is constantly in the mouth of every person, in order to explain certain complaints. Those who use it often, we think, have but a familifea of its precise meaning. We will offer an explaintion, which we believe to be the opinion of a majority of the most learned physicians. A person, for instance, has been over exerting any particular set of muscles—of the thord, from violent apraking—of the toins, by too much stooping or bending, or those or any other part of the body: these parts or muscles are, consequently, weakened and relaxed, and become a fair proy for any disease. The person who has been thus acting sectlemally or otherwise, exposes him self to the noted att, the perspiration, immediately ceases, and the Blood, which had been but just now exculsing applied in the pain and stiffices attendant upon such complicit. When this takes place in the throat, we have an accumulation of blood, a congestion, which gives rise to all the pain and stiffices attendant upon such complaint. When this takes place in the throat, we have that in the shoulder-blade, side, and other parts.

RADWAY'S READY RELIEF,

Taken Internally and applied Externally.

Its first action, when freely applied, is to built the acute sousthilities of the nerves, and almost instandy relieves the point; In wescondary nexton is to excite perspiration, and redden the parts over which it is applied almost to a glow, thereby determining the blood from the injuried parts to the surface. In these chaes, the READY RELIEF should be applied freely, at the same time rubbing the parts with a piece of flaunet, and it will be found in every class to give immediate and permanent relief.

N.M.—If convenient, a piece of flaunet saturated with the RELIEF, and tiled or primet around the parts, does good service.

A BAD COUGH CURED IN TEN MINUTE.

Mr. Rigdon, of Brooklyn, the edebrated Church Said Organ-Player, on the night of the 19th of Duenn was attacked with a severe fit of coughing—so, that congled from 9 o'clock until 12 o'clock, P. M., without three minutes intermission. One of the Clerks of Radwitz Cough and the coughing are supported by the coughing at the coughing and party him a ten-apounful of the Relief internally, and bathed in three meets undertail the rade suspensible apiece. why & Co., was steeps in the sear some get which a tea-spoonful of the Relief internality, and bathed his throat neck, and chest a he also saturated a pice of samele with the Relief, and laid it over his chest. In a few seconds the coughing ceased, he could expectorate freely, and raised with perfect case a great quantity of phigan. The Relief instantly soothed the intrinsity of the shroat and reference as great quantity of the shroat and reference as free and copious perspiration of the throat and cleest; and in ten minutes he was entirely free from puis, and sank hits a sound and pleasant sheep. In the morning he was free from hobreness and cough, and has not been troubled since. Levery individual who is troubled with a cough, sore throat, influence, or hoursences, pursue the same plan, and we will warrant them a specify care.

Another bone was thrown out of my wrist, In short, I endured the most exeruciating pains for nearly three years. I obtained the best medical attendance the country afforded, and tried a great number of medicines and prescriptions, without the least benefit or alleviation, when I had the good fortune to prover a bother of Cramp and Pain Killer, prepared by Messra, Curis & Persins, of Banger. Soon after taking it I found I could get aone read nights, and the pain became less violent. I have continued to take it and apply it externally, until I have used eight bottles. I took much larger quantities than was recommended.—The swelling has all good down, forth in my limbs and breust, and I am entirely releived from pain. I have been able to do a good day's work at any time for the last three motifis, for a man of my age. PLANTAGENET WATER.

Among the objects of attraction at the jate Industrial Fair, the celebrated Plantagenet Water held a conspicu one position, and its exhibition was attended, we learn, with the most favorable results. The demand at the Depot for this health-nipiting drasight from a convent that it was with great difficulty strangers and visitors to the city could be supplied. The celebrity of these Minoral Springs has been 60 thoroughly and satisfactorily established that testimoup of the 'most valuable character seems daily accumulating. The highly respectable certificates given in our paper of to-day will, dipossible, faterease, their reputation, and add to their value throughout the Province. The testimony of the medical gentlemen is certainly highly favorable to the character and quality of these Sprugs.—Drs. Nelson and 616-6 phocing them above all other Mineral waters on this Containent:—

"I believe I was one of the first Practitioners of this city who recommended the use of the Plantagenet Spring Water, and since that time I have prescribed it to a very large number of my patients with invariable davantage."
