THE EDITOR OF THE "HERALD"

## Willing Captives

—ARE—  
Made Happy Daily, at the

### Tailoring Establishment.

THE united testimony of our delighted customers serve our purpose in advertising our Handsome Suits, which, to see, is to be facilitated, but to wear is to be intoxicated with pleasure and delight at the comfort experienced—fitting everywhere—binding nowhere. This high standard has only been attained through years of unceasing toil, but now our well-earned laurels are happily appreciated by a long suffering public. Come and be made happy likewise.

### McLeod & McKenzie.

IT IS  
**A FACT.**  
In the Face of Dull Times  
We find it necessary to increase our premises. In order to do this we have rented the large Basement underneath the premises of Mr. H. Hazard, which we have fitted up as a Jobbing Department. Physicians and Country Dealers will find that we mean business, and will deal better with them than any other house in the trade.

### REDDIN BROS.,

Cameron Block, Opp. Post Office.  
Charlotte Town, June 1, 1892

### PERKINS & STERNS.

New Millinery and Mantles.

neighboring cities. When, previous to his European tour, he visited nearly every city between Bangor and San Francisco, he gave a thousand concerts before his return. Last season before he started out on his tour, he called his men together and urged them to elect one of their members who should succeed him as their leader. He told that the suggestion was not entirely because of his desire to have his name perpetuated, but that he foresaw that unless this was done an accident might happen which would deprive the band of its leader with no arrangement to continue the employment of its members.

Mr. Gilmore was very proud, and justly so, of the literary ability of his only child, Miss Minnie, who has written and published a number of poems. Whatever she wrote in verse he wrote music for. Her latest work is a beautiful story called "A Son of Beau," which was published a few months ago, and which she dedicated to her father and mother, little thinking that she was so soon to bid a last farewell to that father.

### General News.

United States farm mortgages amount to \$15,380,975,000.  
There are \$1,490,000,000 in gold in circulation throughout the world.  
General Carl Muller, the last surviving German officer who took part in the battle of Waterloo, died recently in Hanover. He was 99 years old.  
More than a third of the gold produced throughout the world in the year 1891 was mined in the United States.  
Only citizens who are able to read and write have the power to vote in Bolivia and several other South American republics.  
The railway of the Andes, between the Argentine Republic and Chile, has been so far completed that the steamship companies in Europe are selling through tickets from Southampton and Liverpool to Valparaiso by this route.  
In 1891, 1,168 persons were killed on railways in the British Isles, according to the report of the British board of trade. Of these only 139 were passengers, and more than 400 were persons neither passengers nor employees.  
One of the most significant curios in New York is a copper globe in the Lenox library. It is only four and a half inches in diameter, but it is believed to be the earliest globe to lay down the new discoveries by Columbus.

France recently celebrated the first anniversary of the founding of the first republic. The streets of the capital fairly swarmed with patriotic Parisians, and as they thronged in the public places the many were knocked down and trampled to death.  
Two hundred and fifty cars of wheat for Montreal pass Port Arthur daily from the Northwest.  
The united Catholic societies of New York paraded on the night of the 11th, as part of the Columbian celebration there. There were 25,000 Catholics in line.  
The grand jury brought in true bills against Count Mercier and Ernest Facon. Judge Bosc administered a severe reprimand to Mercier for articles in favor of Mercier which appeared in that paper the evening previous, and which his honor declared to be unbecomingly under the circumstances, and a gross attempt to unduly interfere with the administration of justice. He threatened to take measures to prevent its repetition if such was attempted.  
The council of the Dublin chamber of commerce proposed to present an address to Lord Houghton, the new lord lieutenant of Ireland, but the vicerey refused to accept it, as it was stated that in the opinion of the council the union existing between Ireland and Great Britain ought to be maintained.  
Mr. Morley's eriction commission will have a balanced representation of landlords and tenants, two delegates for each interest, with four Irish lawyers headed by a judge.  
Mr. Stead, editor of the Review of Reviews, has received copies of the death bed confession of Harry Wilson in North Africa, declaring that he (Wilson) with a woman whose name is not given, placed arsenic in medicine administered to the late Mr. Maybrick whose wife is now in prison serving a life sentence for his murder. Mr. Stead denounces the travesty of justice which causes Mrs. Maybrick to languish in a prison, and makes a strong appeal for her release.  
E. A. Macdonald, of Toronto, an officer in the Canadian militia, who has been recently preaching annexation in Boston, has had his name removed from the list of officers of the entire militia of Canada, by order of Hon. Mr. Bowell, Minister of Militia.  
The grand jury has returned true bills against the members of the Homestead advisory committee charged with treason. True bills were returned against H. C. Frick, John G. A. Leishman, F. T. Lovejoy, Henry Curry, Superintendent Potter, Otho Childs, Nevins McCounell, (all Carnegie officials), Henry and Fred. Pinkerton, Capt. Cooper, Fred. Primer and other Pinkerton detectives charged with murder and conspiracy.

Don't commit suicide on account of your "incurable" blood disease. The sensible thing for you to do is to take Ayer's Sarsaparilla. It has cured many cases of this kind, and it will cure yours, if you try it, and it will not fail. The price is 25 cents, and it is sold by all druggists throughout the land, at twenty-five cents, or will be sent by mail on receipt of price. **June 11, 1892**

### Blondin's Feat.

NIAGARA FALLS, Oct. 12.—Clifford Calverly, aged 22, a galvanizing iron worker, of Clarkburg, Ont., but more recently of Toronto, crossed the Niagara River to-day on a three-quarter inch cable which was 900 feet long. His time in crossing was only six minutes, 8 seconds. The best previous time being the late photographer Dixon's which was twelve minutes, thirty seconds. Calverly fairly ran over the wire with the exception of the middle portion, which, owing to oscillation, had to be traversed more cautiously. The wire was 250 feet above the terrible rapids. At each end of the wire he performed marvellous and daring tricks, sitting, lying, dancing and running backwards on the wire and hanging to it with his toes. His daring and skill exceed those of all its predecessors and stamp him as the greatest tight-rope performer in the world. He never walked a rope till four months ago.

### Few Catholic Suitcases.

The vile calumny of the anti-Catholic press, that the cause of the rarity of Irish suicides is owing to the fact that the Irish "consider abolition from a priest's confessional preparation for death, which they can have if they kill other, but not if they kill themselves," is sufficiently disproved by the history of the persecutions in Ireland, during three hundred years of persecution by England, death was preferable to life for the Catholic in Ireland, and yet one case of suicide is recorded. It is monstrous to hear the editors of the protestant press speak of "abolition," of which they know absolutely nothing, and of Irish Catholics, whom they hate with hatred that has its roots in the worst pits of hell. They do the work of their master, and every subject which they touch savors of the atmosphere in which he dwells. He is an eternal murderer, for they bring death on the souls of their readers by inciting them to hatred of their fellow citizens.

### A Very Lonely Man.

He sat at his door at noonday;  
He was lonely, glad, and sad;  
The flies were buzzing about him,  
Led by a blue-winged gnat.  
Not a customer darkened his parlor;  
Not a sign of business was there;  
But the flies kept on their buzzing  
About the old man's hair.  
At last, in misery he shouted:  
"Great Scott! I'm covered with flies!"  
And the sphynx that toyed with his whiskers said:  
"WEE DON'T YOU ADVERTISE?"  
A London dispatch says at least 20,000,000 quarters of wheat must be imported to meet home consumption during the next twelve months. Very poor prices are being realized for home grown wheat, as the quality is exceptionally bad.  
The Thirtieth company of the army service corps, organized at Portsmouth, as a protest against the unnecessary drills, last Wednesday night, cut the harness belonging to their horses, rendering them worthless. So says a London dispatch.  
"TAN HERRING"—All persons who have used Herring's Pills, prepared by A. S. Johnson, and they make "the best family medicine," are they mild, safe and certain. They are sold by all druggists throughout the land, at twenty-five cents, or will be sent by mail on receipt of price. **June 11, 1892**

THE HERALD

WEDNESDAY, OCTOBER 19, 1905

PRICE OF THE PAPER

The Newfoundland carried one of the largest freight loads to date on Saturday last. She had fourteen hundred bags of potatoes and five hundred barrels of cypress. She made the return trip in two hours and a half.

The net debt of the Dominion has decreased nearly \$1,000,000 during the first quarter of the present fiscal year. This fact is made more impressive notwithstanding the increase of expenditures on capital account amounting to \$300,000, as compared with the corresponding quarter of last year.

This increase is principally due to the mercantile manner in which the South Sea. Marine canal is being pushed forward.

Monday's Ottawa advice inform us that Thomas Mayne Daly, M. P. for Ontario, has been sworn in as a member of the Privy Council and appointed Minister of the Interior, vice Hon. Mr. Dawson who retired to his estate. Mr. Daly is a young man and a clever lawyer. He lives at Brandon. He returns at once to his constituency for re-election. It is not likely he will be opposed.

Saturday last was nomination day in New Brunswick, and on next Saturday a general Provincial election takes place. The Government of Mr. Blair, which has been in power for several terms is now an active party lines. Mr. Blair himself is a member of several committees in Dominion politics. The question under discussion during the election campaign is, of course the administration of the Provincial finances, taxation and the appointment of official printers to Mr. Blair, are now members of the Government. It is likely that, so far as political lines are concerned, matters are much muddled. Every party is hopeful of victory, and every constituency except one will be contested.

The produce market was well supplied yesterday and buying was brisk. There were more potatoes in town than in any one day for a long time. The highest price paid was twenty-five cents for all kinds, except Dakota reds, which brought twenty cents a bushel. The weight of some was also large and not many of the fall crops are bushels. The highest price paid for pork was six cents a pound. These are fair prices and such as would enable sellers to meet their bills, if they would not be tempted to spend too much for dry goods which, in many cases, are not needed but may be induced to buy on account of the slaughter sales going on in some of our business establishments. Of course business men have a perfect right to conduct their business to suit themselves; at the same time the coming of the fall season may be inopportune times to commit a selling effort as much as it has a tendency to interfere with the trade of others than those who offer such inducements. It is moreover, likely to be unwise for the sake of the season, and those having reasonable hopes of collecting their bills may suffer.

As will be seen elsewhere in this day's Herald, the celebration of the 400th anniversary of the discovery of America, as well as of the discovery in general, have not allowed the wide-spread celebration which has marked the four hundredth anniversary of the landing of Columbus on American soil, to pass by without participating therein. Never, perhaps, has such a large number of people been manifested in the celebration of a great event. Italy, where the great navigator first saw the light; Spain, under whose flag he triumphed; where he was imprisoned; where he died in poverty and neglect, have done homage to his memory. But, as was most fitting, the greatest enthusiasm has been reached in America, and the millions who, in this country, have participated in these commemorative services, furnish the best evidence of the results to be attained by the celebration of the great event. Other besides Columbus held the theory that beyond the western ocean, islands or a continent existed. Not to the intrepid Genoese navigator be the honor of having first discovered the continent which was so long a mystery to the world, but to the possibility of discovery. Of the difficulties he had to encounter in his undertaking we need not here speak. His first sight of America must have been to Columbus a moment of indescribable gladness; it was the realization of long deferred hopes; it was at the same time one of the most tremendous events since the dawn of the Christian era. It was the opening of a new world for the saving of the truth of Christianity, and looking back at this discovery of time, how glorious have been the results. Such, however, as the richness of public opinion; and so great is man's ingenuity to man, that Columbus, after having the highest gold mine, and the highest rank in the new world conferred upon him by the sovereignty of Spain, was carried back to prison, was forgotten by the country he served so well, and allowed to die in poverty. Out of the millions this country was beginning to draw from the present time had given, he was not allowed to rest for centuries. One day, the national conditions arose, he was regarded as a great discoverer, and monuments were erected to his memory. But his greatest and most lasting monument is that which had been founded in his native land and which has been established as a national day in America. The result of all monuments is the great American Continent, the home of a hundred million people, the freest, the most advanced and the most advanced on the face of the earth.

At the same time, the celebration of the 400th anniversary of the discovery of America, as well as of the discovery in general, have not allowed the wide-spread celebration which has marked the four hundredth anniversary of the landing of Columbus on American soil, to pass by without participating therein. Of the difficulties he had to encounter in his undertaking we need not here speak. His first sight of America must have been to Columbus a moment of indescribable gladness; it was the realization of long deferred hopes; it was at the same time one of the most tremendous events since the dawn of the Christian era. It was the opening of a new world for the saving of the truth of Christianity, and looking back at this discovery of time, how glorious have been the results. Such, however, as the richness of public opinion; and so great is man's ingenuity to man, that Columbus, after having the highest gold mine, and the highest rank in the new world conferred upon him by the sovereignty of Spain, was carried back to prison, was forgotten by the country he served so well, and allowed to die in poverty. Out of the millions this country was beginning to draw from the present time had given, he was not allowed to rest for centuries. One day, the national conditions arose, he was regarded as a great discoverer, and monuments were erected to his memory. But his greatest and most lasting monument is that which had been founded in his native land and which has been established as a national day in America. The result of all monuments is the great American Continent, the home of a hundred million people, the freest, the most advanced and the most advanced on the face of the earth.

At the same time, the celebration of the 400th anniversary of the discovery of America, as well as of the discovery in general, have not allowed the wide-spread celebration which has marked the four hundredth anniversary of the landing of Columbus on American soil, to pass by without participating therein. Never, perhaps, has such a large number of people been manifested in the celebration of a great event. Italy, where the great navigator first saw the light; Spain, under whose flag he triumphed; where he was imprisoned; where he died in poverty and neglect, have done homage to his memory. But, as was most fitting, the greatest enthusiasm has been reached in America, and the millions who, in this country, have participated in these commemorative services, furnish the best evidence of the results to be attained by the celebration of the great event. Other besides Columbus held the theory that beyond the western ocean, islands or a continent existed. Not to the intrepid Genoese navigator be the honor of having first discovered the continent which was so long a mystery to the world, but to the possibility of discovery. Of the difficulties he had to encounter in his undertaking we need not here speak. His first sight of America must have been to Columbus a moment of indescribable gladness; it was the realization of long deferred hopes; it was at the same time one of the most tremendous events since the dawn of the Christian era. ON THE RAIL.

CONFESSING THE SELKIRKS

After leaving Donald, B. C., the railway crosses the Columbia river, to the base of the Selkirk range. In a little while a point is reached where the Rockies and Selkirk range meet together and force the river through a deep, narrow gorge, high above which the railway clings to the mountain slopes. A short distance farther on the road enters the Selkirk through the gate of the Beaver River. Beyond here the mountains rise again to the level of the Columbia, and the passage is so narrow that a felled tree makes a footpath over the top. The line now crosses to the right bank of the Beaver where it is notched into the mountain side and commences the ascent of the Selkirk at the rate of one hundred and sixteen feet to the mile. On the left, the river winds through the narrow and densely wooded valley, and now appears as a silver thread a thousand feet below.

The grandest of mountain scenery is now entered upon. The railway clings to the mountain-side on the right and continues rising higher and higher. On the left, the deep valley, which gradually grows narrower, rises a line of huge promontories, their sides densely covered with giant fir and cedar trees, and their peaks now and then, as they appear above the timber line, enveloped in snow. Down among the trees can frequently be seen chains of fleecy clouds hovering around the mountain sides. Numerous rills and cascades come plunging and foaming down through narrow gorges, over the rocky cliffs. Across these roaring torrents bridges are built, some of them very high. The greatest of these is at Stoney Creek, over a noisy rill that dashes down a ravine 295 feet below the rails. This is said to be one of the loftiest railway bridges in the world. When the road reaches the first of the great difficulties were experienced here from snow-slides. To overcome these, about fifty snow-sheds have been constructed, some of which must be nearly a mile in length. They are so strongly built as to withstand nearly any avalanche.

The pass now narrows into a ravine between two giant peaks whose summits are shrouded in mist beyond the clouds and seem to pierce the very zenith. That on the left is Mount Macdonald, rising almost vertically above the railway line to a height of a mile and a quarter. No trees, no verdure clothe the heights of this stupendous mountain. In sheer rock, bare and cold. Directly opposite, almost as high, stands Hermit Mount, to whose base the railway clings. There can be very little doubt that, at some time, these two majestic mountains were united, and that some great convulsion of nature split them asunder, leaving a pass so narrow that there is barely room for the railway. Certainly, the climax of mountain scenery is reached here.

For a few miles the road passes between two lines of snow-clad peaks, where, above or right beneath the summits, are a number of rugged peaks, apparently so near that their shiny green fissures are plainly visible. The summit of the Selkirk is now reached. The altitude at this point is four thousand three hundred feet. Now for the descent of the western slopes.

Leaving the summit, the line turns to the left, following the slope of the snow peaks, of which Sir Donald is the chief. On the right is the deep valley of the Illiciwit river, which winds its devious course westward among the hoary-headed mountain ranges. Presently the train draws up in front of the Glacier House, a station and hotel, within a short distance of the great glacier, a vast plateau of gleaming ice, reaching out in all directions. On the left Sir Donald, a naked and abrupt pyramid, rises to the height of more than a mile and a half above the railway. Around this stately monarch are two or three other towering peaks, second in height only to itself. Continuing the descent from the Glacier House around the base of the mountain, the railway can be traced far below for miles away as it seeks the bottom of the valley by a series of extraordinary curves, doubling upon itself again and again. This is known as the Loop, where the line crosses a rocky leading down from the Ross Peak Glacier, then doubles back to the right for a mile or more, then back again to the left, and finally shoots down the valley parallel with its former course. Looking back you can see two long peaks, one above the other, cut by the railway into the mountain slope. In this famous loop the line traverses seven miles in curves to advance one mile, and crosses the Illiciwit river by three bridges quite close to one another, in a straight line. The train dashes along close to the river, which in many places is forced through narrow gorges. The most remarkable of these is Albert Canyon, where the river, nearly three hundred feet below the railway, is pressed into a boiling foam scarcely 30 feet wide.

The train stops here for a brief moment to enable the passengers to look into the boiling cauldron. Two little stations, which take the train from a lower double summit near by, is passed and the

western base of the Selkirk is soon approached. Just before entering into the level country a valley again narrows into a gorge not more than ten feet wide, with almost vertical rocky walls. Through this chasm the river and railway dispute the passage. Coming out into a comparatively level and forest covered space, the Rockies and Selkirk range meet together and force the river through a deep, narrow gorge, high above which the railway clings to the mountain slopes. A short distance farther on the road enters the Selkirk through the gate of the Beaver River. Beyond here the mountains rise again to the level of the Columbia, and the passage is so narrow that a felled tree makes a footpath over the top. The line now crosses to the right bank of the Beaver where it is notched into the mountain side and commences the ascent of the Selkirk at the rate of one hundred and sixteen feet to the mile. On the left, the river winds through the narrow and densely wooded valley, and now appears as a silver thread a thousand feet below.

SCIENCE SERVICES IN HONOR OF CHRISTOPHER COLUMBUS

THE FOUR HUNDRETH ANNIVERSARY OF THE DISCOVERY OF AMERICA, BY CHRISTOPHER COLUMBUS, WAS COMMEMORATED IN ST. DUNSTON'S CATHEDRAL, ON SUNDAY LAST, BY A SOLEMN PONTIFICAL MASS OF SANCTA TRINITATE. HIS LORDSHIP, BISHOP DONALD WAS CELEBRATING AND WAS ASSISTED BY REV. DR. MORRISON, Rector of St. Dunstan's College, as arch priest; Rev. Fathers Reid and Hogan as deacon and sub-deacon, and Father McAnulty as Master of ceremonies. The sermon de circumstantia was preached by Rev. Dr. Morrison. The Rev. preacher commenced by pointing out how the Church patronizes and encourages every scientific and literary pursuit, and presents to us, as models for imitation, those of her children who spend their lives for the advancement of mankind and the amelioration of human misery. This year the western world was celebrating the four hundredth anniversary of the discovery by Christopher Columbus of the New World. Therefore fitting that the Church should pay her tribute to the genius of the man whom God employed in the accomplishment of this great work. In the secrets of God's Providence Christopher Columbus was raised up to open a new world for the spread of the Gospel. The preacher then enumerated the many trials and rebuffs endured by Columbus while endeavoring to bring his project to a successful issue. Under all these adverse circumstances he proved himself to be a man of strong faith and unusual pluck. He endured his ill fortune with the greatest patience, and never despaired of accomplishing the great work upon which he had set his mind and heart.

For eighteen years the great navigator went from country to country and endeavored to prove to the people and their rulers that he had discovered a new world, and that the light of the Gospel. But his project was treated as that of a visionary. He was jeered and laughed at; but his faith never failed him, and finally his reward came. Having been exposed to all manner of ridicule and humiliation, he took himself to the Monastery of La Rabida, and there in prayer and meditation he commended his undertaking to God, and at length a gleam of hope dawned upon him. The example of faith and piety and Christian patience which Columbus presented to the attention of Father Pare, Prior of the Monastery, who, fired with holy zeal to participate in the work of redeeming to the yoke of the cross, the new world which Columbus assured him must exist, devoted his energies towards obtaining for the great navigator the necessary means for the carrying out of his great work.

King John II of Portugal, and Ferdinand of Spain were applied to for assistance; but in vain, at length "Isabella the Catholic" was induced to aid the project, and she nobly replied: "I undertake the expedition in my own name, and as my own crown of Castile and will pledge my jewels to raise the necessary funds." Thus was Christopher Columbus, through the generosity of this noble Catholic woman, at length enabled to carry into execution one of the greatest projects of the world.

On the 3rd of August 1492 Columbus' fleet consisting of three small vessels, sailed from Palos. The vessel which he himself commanded was called the "Santa Maria." The great navigator and his companions prepared for the voyage by prayer and meditation, and with a firm faith in God, and they weighed anchor and they received the blessing of Father Pare. During the voyage Columbus had much to contend with on the part of his companions, who became discouraged and discontented; but he overcame them and he persevered to the end. On the 12th of September was rewarded by the discovery of land. This proved to be an island, which he called San Salvador.

The preacher next pointed out how honest of purpose and sincerity and perseverance are sure to lead to their reward. In the success of Columbus we had a noble example. His great faith, his piety and his perseverance in his resolve to discover a world, where souls were awaiting the light of civilization and truths of the Gospel, could not fail of their reward.

The discovery manifested to the world the power of the words Columbus in after years by those who had benefited most by his discoveries was next referred to. In conclusion the preacher showed how appropriate it was that the Church should institute this festival in thanksgiving to the Holy Trinity for what Columbus had done by the discovery of a land where so many millions were now enjoying the blessings of Christianity.

At the conclusion of Mass the Bishop intoned the Te Deum, which was taken up by the choir, and the grand old hymn of St. Augustine and St. Ambrose intoned through the church. The high altar was nicely decorated and the choir did justice to their part of the service.

A rain, sleet and wind storm began at Denver, Col., on Tuesday night. The storm was very violent and the city was completely deluged. The water was so high that it was necessary to leave the city in a hurry and the streets were filled with mud. The storm was very violent and the city was completely deluged. THE WEEK'S DIARY

THE SOUTH AUSTRALIAN MINISTRY has resigned in consequence of the financial proposals of the House of Assembly.

An explosion of gas occurred at the Stirling colliery, Stirling, Pa., Thursday last. The explosion was very violent, and the streets were filled with people, and the air was filled with the sound of music.

The French-Canadian journals have been reporting the accuracy of the census of the Province of Ontario, and an agitation is now made to have the tables showing the nationalities suppressed before the census is published.

The stream of immigration from Washington, Nebraska and other North-Western States to the Province of Ontario is quite unprecedented and thousands of acres are being taken up every day. The Province is being illuminated with their own homes.

The Canadian heavy armor from the United States, which was sold to the Province of Ontario, is now being used for the purpose of the Province of Ontario.

A Calcutta despatch says that trouble has broken out again with the Chins in the Province of Ontario. The trouble is said to be of a serious nature, and the Province of Ontario is being illuminated with their own homes.

The government of British Columbia has some time since assigned the Province of Ontario to the Province of Ontario, and the Province of Ontario is being illuminated with their own homes.

A package of chocolate received by the family of John Clark, 28 Howard Street, Toronto, and reported to be a gift from the Province of Ontario, is now being used for the purpose of the Province of Ontario.

An official report on the impurities of Toronto's water shows that the impurities are of a serious nature, and the Province of Ontario is being illuminated with their own homes.

At the annual meeting of the Pullman Palace Car Company Thursday last, the Province of Ontario was represented by a delegate, and the Province of Ontario is being illuminated with their own homes.

The schooner Sea Lion arrived at Victoria, B. C., Thursday last, and the Province of Ontario is being illuminated with their own homes.

Operator Meier was taking a short nap in the Santa Fe depot, at Wilkes-Barre, Pa., Wednesday night when he was awakened by a loud explosion. The explosion was very violent, and the streets were filled with people, and the air was filled with the sound of music.

The explosion was very violent, and the streets were filled with people, and the air was filled with the sound of music. The explosion was very violent, and the streets were filled with people, and the air was filled with the sound of music.
