A SHARP electrical storm passed over this section on Friday evening, but the damage done was not very great. A chimney on T. Fortune's house was demolished and the electric current passed through a bedroom, doing some damage to the walls and furniture. In the north the storm was more violent, and four valuable steers belonging to Carl Smith were instantly killed.

Fancy china and brass goods just arrived at Howden's, containing many pieces suitable in size and price for wedding gifts.—THE HOWDEN EST.

ALL the old landmarks are gradually disappearing. A gang of workmen have been busy this week removing the old livery stable and barn formerly owned by W. D. Cameron, and made short work of the job. The main part of the building was placed there in 1874 and was brought from the 4th line corner where it was built and used for many years by the Presbyterian congregation as a place of worship.

A LETTER received from Mr. Herb. Willoughby, of the firm of Hastings & Willoughby, Regina, Sask., enclosing his subscription for 1914 and 1915, says: "The Watford colony are holding their own. Business with us very satisfactory. Outlook for 1913 crops at the present time never better." We are glad to hear that these old Watford boys are doing well. When a man pays his newspaper subscription a couple of years ahead of time it is prima facie evidence that he is not dodging creditors.

A MANUFACTURER's stock of shirts \$1. and \$1.25 goods for 79c.—SWIFTS' July Sale.

"THE WESTMINSTER" for July is interesting. There are two features in this interesting number which are worthy of notice. One is the opening instalment of "White Man's Canyon," a story by a new Canadian novelist, Bryan Grant. It will be remembered "The Westminster" was fortunate enough to "discover" Ralph Connor and Marian Keith, and there is reason to think that in Bryan Grant it has made another find. The second feature is the first of a series of articles entitled "Parliament, Press and People," by William Mackenzie. Mr. Mackenzie was a member of the press gallery at Ottawa for thirty years, and has an unexcelled knowledge of public men and affairs. His reminiscences, which will run through the remainder of the year, will be found unusually interesting. The Westminster has always been an interesting publication, and is especially so to people in this section on account of the able manner in which it is edited by Rev. Robt. Haddow, a former Watford pastor.

WE have our import order of glass to hand and are prepared to fill all orders on builders' hardware at lowest prices. Eavetroughing and plumbing on short notice.—THE N. B. HOWDEN EST.

BLACK and blue worsted suitings direct from the looms. Suits made to order in city style.—SWIFTS' Tailoring Department.

A Watford lady lost a brooch two years ago, and advertised the loss in the Guide-Advocate, and the ad. caused the restoration of the brooch within an hour of the paper coming out. She has again lost it and we would like to keep up our reputation. Will the finder please leave it at The Guide-Advocate.

THE following pupils of the Watford High School obtained the required standing on the subjects of the lower school examination to entitle them to lower school certificates:—L. B. Harper, E. Hick, E. D. Hicks, C. F. Luckham, C. D. Matthews, E. McCormick, J. McKercher, M. A. McManus, L. McPhedran, R. Brown.

ACCOUNTS of the ordination of priests and deacons by Archbishop Matheson, of Rupert's Land, held in St. John's cathedral, Winnipeg, are to hand. The ordination was held on the first Sunday in June and among those raised to the dignity of priest was Rev. J. A. Shirley, son of Mr. and Mrs. John Shirley, of Watford.

BALANCE of ladies spring coats at 25 per cent. discount.—A. BROWN & CO.

THE Watford Voters' List for 1913 is printed and was posted for the inspection of ratepayers on July 10th. Examine it and see that your name appears correctly. From it we glean that the total number of voters is 446. Of these 420 are qualified to vote at Municipal Elections and 296 at Elections to the Legislative Assembly. One hundred and forty-three are qualified to serve as jurors.

THE new Livestock Department at the Canadian National Exhibition will give splendid accommodation for the fine animals for which the Big Fair is noted. It also adds a finish to the appearance of the grounds more than anything else has done. The Exhibition City, with its \$2,500,000 worth of buildings, its paved streets and its lighting plant of 40,000 lamps, has no rival on the American continent.

SAMPLE Suits in sizes 35 to 40. You save \$3.00 to \$4.00 on every suit.—SWIFTS' July Sale.

THE Saturday night shoppers who leave that duty until the closing hour and then make a rush for the stores, should show some consideration, more especially at this time of the year, for the clerks who have been on duty for probably fourteen hours. It is beginning to be accepted that there is now no longer any valid reason for putting off your shopping until late in the evening. The custom is a bad prelude to the proper observance of Sunday. Shop early. It will be more satisfactory both to the buyer and the merchant.

CHOP STUFF.

Thamesford village is oiling all its streets and there is an end to the dust there.

Mrs. Cooke, Sr., and Mrs. Cooke, Jr., are the guests of Mr. and Mrs. H. C. Orme, Cathart St., Hamilton, Ont.

A large boat with about 100 passengers ran aground Tuesday night near Thos. Sherridan's farm, in Plympton. Tugs were required to pull it off.

The Maunse, Petrolca, was enlivened on Monday afternoon, June 30th, by the visit of Mr. James S. Rainsberry and Mrs. Agnes Taylor, of Ennis-killen, who were quietly united in marriage by Dr. McKercher. The young people are to make their home on the sixth line, Ennis-killen. They have multitudes of friends who wish them happiness and prosperity.

Growers of onions in the Ridgeway district are experiencing much trouble from a small worm which operates in the bottom of the onion and soon destroys it. They breed very fast, and as soon as one onion is killed they move to another. How to fight the worm is a problem, and as many onions are grown there, a big loss will result.

Glencoe, July 4.—George McBain, a well-known resident of Strathburn, was killed at his farm near that village on Friday morning in a fall from a load of hay. One foot caught on the trip rope of the fork and he fell, striking his head on the wagon tongue and breaking his neck. The late Mr. McBain was 60 years of age and had lived at Strathburn for many years. His wife and one little girl survive him.

"G" Company, of Stratroy, of the 26th Regiment, under command of Capt. F. W. Robinson, was the winner of the cup donated by the Princess Mary Chapter of the Daughters of the Empire, Stratroy, for the company in the 26th having the most efficiency marks during the recent military camp at London. The cup has to be won three times in succession before any company can keep it.

Leamington farmers are shipping early tomatoes this year. During the early part of the month of June it was feared that the late frosts and continued cold weather would put the crop back for several weeks. A change in the weather, however, came in time to advance the crop past all expectations, and tomatoes picked from the fields were shipped on the 21st of June this year, fully two weeks ahead of last year.

 WATFORD, JULY 11, 1913.

Naming the Farm

In the older settled parts of Ontario the custom is coming into general use of naming the farms. It is a good idea. As the Guelph Mercury says, an appropriate name for a farm has more significance and sounds better than the bare fact that "Mr. So-and-so" lives on lot 3, con. 4." Many farmers are using stationery with the name of the farm on it and sometimes a picture of the place. This is good business. It conveys impressions of a man established in a substantial way. It conveys the idea of a property or an estate, with a responsible owner.

When a wholesale fruit or vegetable firm in Toronto or Montreal or Hamilton or London receives a letter from John Smith, Elmroot, Ont., asking if they are open to accept, three days a week, shipments of fruits or vegetables and what they will pay for this, that or the other, boxed or crated, in such a way, does anybody suppose that it makes no difference how the enquiry is worded, shaped and framed?

Take the old way. John Smith, of lot 3, concession 4, near Elmroot P. O., writes his enquiry with a lead pencil on a post card, and awaits the answer. He writes like a settler on a subdivision of the original survey, where nothing worth mentioning has happened since the lines were struck.

Take the new way. John Smith, of Beechwood Farm, Elmroot, Ont., sends a typewritten letter, typed by his daughter, on a letter head bearing a picture of a farm house, surrounded by beeches.

It is true enough that business is business, and perhaps if the wholesaler had time to go out and see for himself he might be well satisfied with lot 3, concession 4, as with Beechwood Farm, but he hasn't time to go and see, and there is nothing in the pencilled scrawl on the postal card to touch his imagination, but on the pictured letterhead from Beechwood Farm, there is that which arrests and ensures attention.

No underling would think of disposing of it without consulting the head of the firm. The head of the firm is usually a very sentimental person who makes money in the city, always promising himself that one of these days he will go to the country and really live. That picture gets him. The letter head gets him. He aspires one day to own a Beechwood farm and with two hundred of his own acres under his feet be a free man at last.

Between the old way and the new way the new way wins every time. The farmer should have a name for his farm. He should have printed letterheads and if his wife has a good house, or if he has a good barn, the photo of it should be on his letter head. This costs about one per cent. of what it is worth.

Dr. Morse's Indian Root Pills

exactly meet the need which so often arises in every family for a medicine to open up and regulate the bowels. Not only are they effective in all cases of Constipation, but they help greatly in breaking up a Cold or La Grippe by cleaning out the system and purifying the blood. In the same way they relieve or cure Biliousness, Indigestion, Sick Headaches, Rheumatism and other common ailments. In the latest issue of the words Dr. Morse's Indian Root Pills are a Household Remedy.

NOTE AND COMMENT.

You can tell a man's character by the company he keeps and his heart by listening to his opinions about good people. When a fellow has no use for a straight man you will find that it is because he is knock-kneed morally; when you hear him sneer at virtue or benevolence you can put it down that he is a betrayer of innocence, or a close-fisted, low-browed hater of his own kind. "He that is upright in the way is an abomination to the wicked." There is no hatred so bitter and lasting as evil against good. Birds of a feather flock together, not because of the feathers, but of what is underneath. Hawks and doves, lions and lambs, thieves and honest men do not sort, and the strange thing is that the hatred is all on the side of the oppressor. When you find yourself carping at the righteous take a look within.

The provincial Board of Health is waging insistent warfare on the fly. With the coming of the tourist season and the exodus to summer resorts, hundredweights of circulars warning people of the dangerous consequences following the ignoring of these pests are being issued. By co-operation with health authorities in every provincial municipality an attempt is being made to educate society in general out of their indifference. "Every year flies kill more people in Ontario than are killed by murders, lightning, storms, cyclones, mad dogs, poisonous reptiles, angry bulls and other vicious animals combined," states Dr. J. W. S. McCullough, Chief Health Officer. He points out that the germs of all intestinal diseases, including typhoid fever, dysentery, tuberculosis and smallpox, are carried daily about careless households by the fly. A man's flies are those of his own household and neighborhood, it is pointed out, and their existence about a home may be taken as an index to the sanitary conditions of the surroundings. Suggestions are given as to the most feasible way of clearing a neighborhood of the plague, and designs of traps and classes of poisons recommended. The menace of malaria and similar diseases to the summer tourist, who is now preparing for the summer outing, is made the subject of another pamphlet which is being distributed in large numbers. The treatment suggested is the disposing of all stagnant water within easy distance of a house and efficient screening of rooms. First aid remedies for bitten persons are also given. The tenor of the entire warning is for watchfulness to prevent malarial contraction after bites and to provide unusual precaution for children.

The Caterpillar Plague

The tent caterpillars have done the largest proportion of the damage that they will do this season. That damage has been enormous. Although some millions of them have been destroyed in and around Montreal, and by the more enlightened farmers everywhere throughout Eastern Canada, the effect on this silent host of invaders has really been infinitesimal. This is attested by the fact that localities in which it was thought all the caterpillars had been exterminated are now invaded again by thousands of caterpillars from outside. When these animals have attained their full growth they set out on their travels to see the world. Their curiosity is insatiable. They will climb to the roofs of houses and to the tops of telegraph poles, they will traverse dusty roads, perform wonderful feats of acrobatics by means of silken threads, scale mountains, descend valleys, and even at-

tempt, not always with non-success, to cross rivers. As a result of all this activity, they select some cosy and sheltered spot in a tree, wall, or house, to spin a cocoon. From that cocoon later on will appear a moth, and that moth's prime business in life will be to deposit eggs for a new crop of caterpillars next spring. The battle with this plague is, therefore, by no means over. While it is difficult to kill any appreciable portion of the caterpillars now that they have started out on their travels, many of their cocoons may be located later on and destroyed. Unless some effective measures are taken the damage next spring will be far greater than now. As it is whole wooded areas of the countryside have been devastated, and so serious is the loss that in some French-Canadian communities special prayers have been offered up in the churches for deliverance from the plague. There is a theory that the multiplication of the caterpillars results in an automatic multiplication of the parasites which kill them, and that, therefore, a year when caterpillars are plentiful is always followed by a year when hardly any appear. That this is a fallacy is shown by the present year's experience. The caterpillars were present in large numbers last year. "Examine any cocoon you like," said the entomologist, "and you will find the chrysalis dead, killed by a parasite." Superficial examination showed that their contention was to some extent true. But that it was incorrect is shown by the crop of caterpillars this year. Possibly another year of numerous caterpillars has so increased the growth of parasites that they will have the victory next year. In the meantime we cannot afford to neglect the destruction of cocoons on the chance that nature will so favor us.

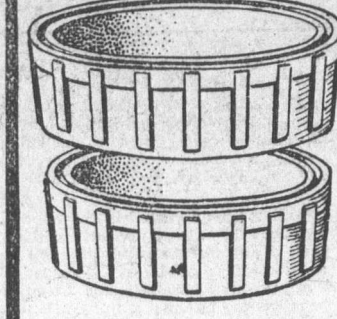

P. E. Island and the Auto

Prince Edward Island, which has always banned the motor car, reconsidered its action and at the same time introduced a new feature into Canadian government methods. The reconsideration was left to the people to decide by a plebiscite taken during the annual district school meetings. The man who drives a horse, the pedestrian who walks the country roads, and the family who live by the side of a dusty road that is a thoroughfare will rejoice with the men responsible for the upkeep of the roads of the island that the auto car has been prohibited. It is a modern engine for the destruction of road-beds. It makes life on an ill-kept country road, that is much frequented, unendurable when the wind blows from the road to the house. The people in rejecting it have also prevented a most common mode of modern extravagance. They will not have to vie with each other as to which owns the largest, most powerful or most finely appointed car, but will have the money to put into productive use. The only ones to suffer will be the hotelkeepers, who might, had auto cars been admitted, had a greater amount of tourist traffic. It does not seem impossible that they could secure this increase, however, by advertising that theirs was the only place to go to get away from a modern mode of progress that many persist in disliking.

To Avoid Lightning

Every year quite a large number are killed by lightning because they did not know what to do in a thunderstorm. First of all, it is safer to be indoors than out. Most people get killed when out in the open. If you are caught in a thunder storm then don't be afraid of sheltering under a tree just because you heard it is dangerous. It is dangerous to shelter under a solitary tree because lightning likes to strike the highest point, and a solitary tree is the highest point as a rule for some distance around. But you are pretty safe if you

What This Sectional Fire-pot Means to You

The "Sunshine" has a straight-sided semi-steel firepot, extra heavily ribbed and made in two sections. The two sections allow for contraction and expansion—which prevents cracking. The heavy ribs and semi-steel give extra strength and added radiating surface. Ashes cannot adhere to the straight sides which assures an all-over clear fire. This means the greatest heat from the fuel consumed.

These are some of the advantages of the Sunshine Furnace. Our agent will be pleased to show you others, or write for booklet.

shelter in a wood. A tree in a wood is seldom struck. Certain trees are more dangerous than others. If you have a choice between an oak tree and a beech tree, then take the beech tree all the time. A far greater number of oak trees are struck than beech trees. Elm trees are nearly as dangerous as oak trees.

Avoid big crowds and collections of animals. For some reason—probably the warmth that rises from their bodies—crowds of animals and persons are liable to be struck by lightning.

Novel Forestry Exhibits

In connection with the Canadian Forestry Association Convention in Winnipeg, on the 7th, 8th and 9th of July, there will be interesting exhibits of Forest woods and forest insects, which will enable the people of the prairies to see at once the quality of the various kinds of timber growing in the province and the pests which are most destructive to them. Experts have been engaged in research and collection with the object of making the form of these exhibits as interesting as possible to the general public.

It is expected that there will be a number of other features in connection with the convention which will give it a distinctly unique interest to all those attending. There are assurances from a large number of forestry experts and officials, both in Canada and the United States, that they will be in attendance, and it is assured that the convention will be one of the best in the history of the Association.

Mr. Lawler, the Secretary of the Association, reports that the recent advances in ideas of wise use of the forest resource are very noticeable in the West at the present time, and that it is not unlikely, considering the demands which are being made on all sides for further scientific management, and in view of the importance of the questions to be considered at the Winnipeg Convention, that considerable progress should be the direct outcome of the present activities.

Listen to this, will you, please. "No person ever was hypnotized into committing a crime or a wrong that might reflect discredit on their character or family." This statement is made by Dr. John D. Quackenbos, eminent New York authority on hypnotism, said to be the most eminent eminence of his kind in the United States. Well, if the dictum of Dr. Quackenbos settles it, away goes Trilby, a lot of other fine chunks out of novels and tales, many a whimpered but clever excuse for crime and shame, and lots more ideals we've been kowtowing to for lo, this quite a while back. The novelists will miss the hypnotism ingredient in their plots, the girls who run away with the old lad with the hypnotic eye will need a new excuse—unsettling these sudden discoveries of the scientists sometimes are.

CANADA Portland CEMENT

SOME men ask for so many bags of "cement"—
 Others, more careful, say they want "Portland Cement"—
 But the man who does the best work insists upon getting "Canada" Portland Cement—

And he looks to see that every bag bears this label

Write the Canada Cement Information Bureau, Montreal, for a free copy of "What the Farmer Can Do With Concrete."

There is a Canada Cement dealer in your neighborhood. If you do not know him, write for his name.

Slight Error.
 Recently a laborer went up to a foreman who was superintending some building operations at the docks. "What's your name?" inquired the foreman at last, having decided to take the man on. "Albert Simson, sir," replied the latter. "Very well, Simson. First job, bring those iron plates and that crane over here!" "Excuse me, sir," interrupted the navy, respectfully touching his cap, "I said my name was Simson, not Samson!"—Answers.

Two Modern Valentines.
 The tailor sent his bill to Smith. Whose statement had run overtime, and underneath his "Please remit" the tailor wrote this little rime: "As sure as the vine Grows round the stump I'll sue you if You don't, you chump!"
 Smith laid the bill upon a pile That loomed above him mountain high; Then, with a rather weary smile, He penned the tailor this reply: "Roses are red, Violets are blue; I'm now bankrupt, So go and sue." —Judge.

Matrimony.
 Bachelors who have made up their minds to stay that way and believe that they can get away with it may do well to listen to the old lady from Wisconsin. She summed it up this way in speaking to a despondent young girl who thought she was doomed to a single life: "My dear, if it is intended that you should get married you will do it even if you live in a churn."—Popular Magazine.

Deception.
 Alas for these deceptive thaws That tempt the sap into the trees, A-counterfeiting springtime's laws, And leave it overnight to freeze!
 A cruel frost has nipt the buds, And woeful want mankind bedides. Weep, ye who buy and sell the duds, There'll be a famine in June brides! —Chicago News.

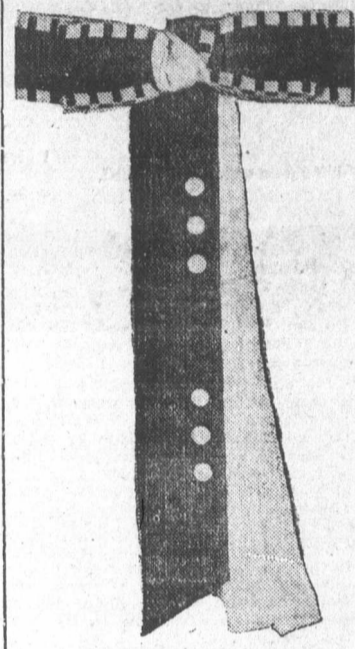

A PLEASANT PURGATIVE.—Parmele's Vegetable Pills are so compounded as to operate on both the stomach and the bowels, so that they act along the whole alimentary and excretory passage. They are not drastic in their work, but mildly purgative, and the pleasure of taking them is only equalled by the gratifying effect they produce. Compounded only of vegetable substances the cumulative quantities of which were fully tested, they afford relief without chance of injury.

A small house on south half lot 7, con. 4, Mosa, owned and occupied by John Forbes, an aged man living alone, was burned Friday night shortly after twelve o'clock. Lightning struck a tree near by and glancing set fire to a woodpile which in turn set fire to the house. Gillies brothers, neighbors, saw the fire and ran over and awakened Forbes, who was sound asleep. They managed to save a few of the contents. No insurance.

CHIFFON CORSET COVER.

A New Underblouse Made From Two Thicknesses of Thin Fabric.
 After women were inured to the idea that a transparent blouse called for a thin and fancy corset cover they began to look about to see what fabric could be used to the best advantage. They tried silk, but it was not satisfactory, as it gave too definite an impression of what it was beneath the blouse and looked like lining.
 It was in this search that some one stumbled on fish pink chiffon cloth as an admirable fabric, which is almost

NATTY LITTLE NECK BOW.

as cobwebby as chiffon itself, but has better wearing qualities, for it is woven out of stronger thread.

When it was made up in a simple manner it had no character. It did not really conceal the white chemise beneath, and it did not give any definite color to the blouse above. Flowered ribbon was used in small bows or as a band run through long buttonholes that were placed around the figure, but this idea proved too colorful and did not look especially well under all kinds of blouses.

Then came the inrush of those fancy little roses which the great masses of women do not yet know how to use and which the majority think belong only to picture frames and bureau ornaments, but they were found speedily satisfactory as an ornament to this pink chiffon corset cover, and at present this is the accepted idea.

This underblouse is made from two thicknesses of material in order that it may not be too transparent, for we must draw the line somewhere, and it is gathered into a scanty frill of thin white lace. Over the shoulders go half inch straps of pink satin ribbon which end in front in flat rosettes made of three roses with green leaves.

The natty little neck bow illustrated forms an attractive finish for a blouse waist. It is made of small lengths of black velvet and satin ribbon, one end trimmed with small white pearl buttons.

News to Him.

SORES FLEE BEFORE IT.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil, which acts like magic. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

A \$100,000.00 Canning Company has been formed in Glencoe, and for the present year the Hamilton-Lewitt factory has been equipped for handling tomatoes and apples. Plans and specifications for a large \$40,000.00 will be prepared at an early date.

This year the Lambton Packing Co. has under contract 580 acres of pease, 750 acres of corn and about 150 acres of tomatoes. The largest grower of tomatoes will be Mr. A. C. Edward, who has ten acres planted. The company hopes shortly to begin canning pease.

BROOKE

George Kidd, Fairlight, Sask., is spending a few weeks with relatives here.

John Zavitz had his right foot painfully injured while assisting in the raising of a barn for his cousin, Norman Zavitz, near Inwood, one day recently.

The following account of the sad fatality that befel George Watson, is taken from the Kinderley, Sask., Clarion:—

A sad fatality occurred last Sunday morning at 8 a.m., six miles west of Alsask, when George Watson, a fireman on the C. N. R. was instantly killed.

The engine was backing up when seven box cars and the engine left the track. The engineer warned Watson to hold fast to the engine, but he jumped and rolled down the embankment. He was just in the act of climbing up when the tender turned turtle, pinning Mr. Watson under.

It is reported that death was instantaneous. An inquest was held over the body at Alsask, where Coroner Clemens performed a post mortem examination, the jury bringing in a verdict of accidental death. Mr. Watson was well and favorably known around Kinderley, and his many friends were affected when they heard of his sad end. His body was shipped to Watford, Ont., for burial, leaving Alsask on Tuesday morning.

Park Reunion

The Deseret (Utah) News gives an account of the Park family reunion at Provo at which 125 descendants of John and Louise Smith Park were present. The report says:—After dinner a program was rendered consisting of remarks from the senior members of the family, reminiscent of the past experi-

ence of their parents. Their journey was traced from Watford, by the aid of photos of the old village streets of Watford, one of which is still called Mormon lane. Down this street three of the Park brothers drove their ox teams in 1846, enroute for Winter Quarters, camping on to Utah with the pioneers in 1849.

Suggestions.

Women suffering from any form of female ills are invited to communicate promptly with the woman's private correspondence department of the Lydia E. Pinkham Medicine Co., Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence. A woman can freely talk of her private illness to a woman; thus has been established a confidential correspondence which has extended over many years and which has never been broken. Never have they published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which they have to draw from, it is more than possible that they possess the very knowledge needed in your case. Nothing is asked in return except your good will, and their advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Toronto.

Toronto, July 8.—The receipts at the Union stockyards to-day were 135 loads, with 2,381 cattle, 123 calves, 877 hogs and 858 sheep and lambs.

Trade picked up a little at the Union stockyards to-day, business assuming fairly large proportions. Prices for good to choice handy butcher cattle for the local trade held steady around \$6.50 to \$6.85. Choice fat cows were steady from \$4.50 to \$5.75, but only a very few at the latter figure.

The stocker trade is very dull and drab, except for anything choice. Lambs are firm. Sheep dull. Calves steady. Hogs were steady 10-day, 10c to 15c higher than the prices quoted by the packers yesterday to their country buyers. Selects, \$9.25, fed and watered, and \$8.90 to \$9, f.o.b.

Lambton Farms Wanted

A fourth list of farms for sale in Lambton County will be published by the Lambton Publicity Association early in August. Farms that appeared on the last list will re-appear in the forthcoming list if request be sent the secretary before Aug. 5th and present price of farm stated. These lists will have wide circulation at Canadian National Exposition, Toronto, and other places of concourse.

Those who have farms for sale will please send a full description, the price and post office address of owner to the undersigned, in order that parties intending to purchase may be brought into personal touch with those who have land to sell.

There will be no charge or commission of any kind, and the parties furnishing description are not bound in any way. Give details as to situation, acreage, roads, improvements, soil, distance from churches, schools, towns, railways, tele-

phone service, etc., etc., that would be of interest to prospective purchasers at a distance. When sale of farm takes place please notify secretary so that it may be struck off the list. Parties offering large farms, suitable for fruit growing, would do well to offer them in lots of 15 to 50 acres. The Publicity Association exists for the purpose of advertising Lambton County and for no other purpose. It consists largely of the members of the County Council and the expense of the advertising is paid by the county.

The information is wanted for the purpose of placing a list of farms in the hands of those who wish to buy and who have written to the Secretary in answer to general advertisements and descriptions of Lambton which have been published in various newspapers in Canada, the United States and Great Britain.

The description may be sent by mail to R. Stirrett, Petrolia, Secretary of the Association, not later than Tuesday, August 5th, 1913.

JUVENILE HEROISM.

The Brave Mexican Cadets at the Defense of Chapultepec.

Many incidents in the Mexican war are still recounted to fire the hearts of Mexicans. One of these occurred during the defense of Chapultepec, a defense that was as gallant as was the attack. In this attack forty-eight Mexican cadets, among others, lost their lives. The story is a stirring one.

For many years the celebrated castle of Chapultepec, where Montezuma held his barbaric court in the surrounding groves of cypresses, where during nearly three centuries lived the successive viceroys of Spain and where Maximilian made his imperial home, has been the West Point of Mexico.

When General Scott had taken the place by storm and General Bravo had surrendered, a Mexican cadet only fifteen years of age, seeing the flag of his country in peril, with his comrades being already slain, climbed the flag-staff, tore the banner from its place, wound it around his body and slid down, intending to plunge over the precipice in order to save the colors from falling into the hands of the enemy.

That act of heroism being frustrated, the brave boy, with the banner still wrapped around him, fought until he was cut in pieces. Forty-eight of these schoolboys, ranging in age from fourteen to twenty years, lie buried in one grave at the foot of the hill. Year by year the cadets of Chapultepec strew flowers upon this sepulcher.—Harper's Weekly.

EARLY WORLD RECORDS.

Fossil Animals and Plants Constitute the Geologist's Key.

The work of the United States geological survey in paleontology—the study of fossil remains of animals and plants that lived ages ago—has a practical bearing on some of the very practical economic problems of today.

The descriptive paleontological reports are often treated as "pure science," yet instructive, striking or tedious as may be these delineations of the groups of animal or plant life which lived on the globe in some particular epoch there is not one of these papers describing the fauna or flora of a formation that does not prove sooner or later to possess practical value and to be essential to geology in its constantly increasing refinement of study and results.

Without paleontology the geologic classification of formations, their correlation and the determination of their mutual relations would be impossible. In fact, real and symmetrical progress in geology is impossible without corresponding interrelated development and refinement of its handmaid paleontology. The study of the economic geology of any region of complicated structure is blind and inconsequent unless the time relations of the strata concerned are known. These relations are indicated by the fossils which the strata contain.—Annual Report Director United States Geological Survey.

Cornish Place Names.

Cornish place names are remarkable for the number of obscure Celtic saints they commemorate, such as St. Tudy, St. Cuby, St. Uuy, St. Enodoc, St. Brisc and St. Finbarrow.

A story is told of a Cornish candidate for ordination who, when asked by the examining chaplain where he was born, replied, "At St. Eval," giving the local pronunciation, "Sandeval." "Good heavens!" exclaimed the chaplain, "I know they have some strange saints in Cornwall, but I should never have imagined they would canonize him!"

There are three other Cornish villages whose names it would be hard to match for singularity—Brumbla, London Apprentice and Drunkards All—London Globe.

Flea-Beetles and Their Control

The Division of Entomological of the Experimental Farms Branch of the Dominion Department of Agriculture, Ottawa, has recently issued Entomological Circular, No. 2, by Mr. Arthur Gibson, Chief Assistant Entomologist, on "Flea-Beetles and Their Control."

The Flea-Beetles are an important group of insects which attack the foliage of many plants. They are particularly destructive to the leaves of several kinds of vegetable crops, such as turnips, potatoes, tomatoes, radishes, etc. The chief injury is effected in spring and early summer when the plants are visited by large numbers of beetles. Numerous small holes are eaten into and through the leaves, in fact, some of the species completely defoliate certain plants. Owing to their jumping habit, these insects were given the popular name of flea-

beetles. In size they range from one-twentieth to one-quarter of an inch. In Canada there are five species which are of considerable economic importance, and these are discussed and figured. In addition, descriptions are given of eight other species which occasionally appear in destructive numbers. A chapter on "Methods of Control" gives full particulars as to remedies which have been found most successful in the control of these insects.

Copies of this publication may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they do not interfere with work as have those, Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

THE WESTERN FAIR September 5th to 13th

The management of the Western Ontario's great and popular Exhibition are leaving nothing undone in order that success may crown their efforts this year. It was thought that Exhibitors would appreciate more prize money and \$2,000 in cash was added to last year's list. In addition to this several Live Stock Associations are giving liberal grants. This should make the list very attractive for Live Stock Exhibitors. Independent of the prize money altogether, the fact remains that the London Exhibition is in the centre of Western Ontario, and surrounded by the best farming country in the Province, thus always assuring a large number of buyers for first class stock of all kinds. Live Stock breeders will do well to note this, for Western Fair Exhibitors always report good sales. Provision will be made this year for better accommodation for judging the Live Stock, as the management are anxious for the comfort and convenience of both Exhibitors and visitors.

Prize lists, entry forms and all information will be forwarded on application to the Secretary, A. M. Hunt, Room 302 Dominion Savings Building, London, Ontario.

Wasted Time.

"Well, what did you do when the problem came up?"
"Wasted time. Went out and asked the advice of seventeen friends."
"What did you get?"
"Seventeen different solutions."
"And then?"
"Then I took the advice of an eighteenth friend and won out."
"And who was your eighteenth friend?"
"Myself."—Cleveland Plain Dealer.

The Canadian Boundary.

The boundary between British and republican America is unmarked by anything in the nature of a wall or a fence. In traveling from Montreal to New York the train suddenly slows down and stops in the midst of green fields. It is then boarded by United States revenue officers, who want to know whether you have "anything to declare." That is how you know that you have reached the international boundary line.—London Chronicle.

Broken.

"Bjinks has broken his engagement with Miss Hansum, he says."
"Why did he break it?"
"She decided she wouldn't marry him, and he said he wouldn't be engaged to any girl who wouldn't marry him."
—New York Mail.

Successful Dairying

There are such excellent concrete examples now and again outcropping of men who prove that it pays to take up cow testing, that their records of success make stimulating reading for dairy farmers all over the Dominion.

Here is a good sample of what one man at Cedar Hall, Que., in the Gaspé peninsula, accomplished by carefully watching his fairly good cows and feeding them better. The first year his eight cows gave him 33,511 pounds of milk, an average of 4,188 pounds at a feed cost of \$32.50, netting a total profit of \$76.82, an average of \$9.60 profit per cow. Two of the best cows in the herd the first year were lost accidentally, two heifers made up the herd to eight again; a pure bred sire is kept.

The next year his eight cows gave him 41,408 pounds of milk, an average of 5,176 pounds, or 1,000 pounds of an increase per cow. The feed cost \$4.12 more per cow, but the total profit was \$177.29, or an average of \$22.16 per cow. This is an increase of one hundred and thirty per cent in the profit. It pays to give additional feed if the cows kept are of the type to make use of it profitably.

The forcible realities are these: the gross income from milk increased by \$133.43 from the same number of cows, the profit far more than doubled, and the owner has received every encouragement to try for still better results. That is where a trial cow testing trip generally lands the herd owner.

Happy Marriages

Are the result of knowing the laws of health and nature. All the knowledge a young man or woman, wife or daughter should have, is contained in the People's Medical Adviser by R. V. Pierce, M. D. This big Home Doctor Book containing 1008 pages with engravings and colored plates, and bound in cloth, (nearly 700,000 copies formerly sold for \$1.50 each), is sent FREE to any one sending 31 one-cent stamps to prepay cost of wrapping and postage. There are no conditions to this offer and the reader must not associate this book with the advertising pamphlets prepared by quacks throughout the country. Address, 662 Washington St., Buffalo, N. MAKES BREATHING EASY. The constriction of the air passage and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Farmers' Institute Work

THE WORK IN EAST LAMBTON

The report of the Farmers' Institute for 1912 contains the following article on the work in East Lambton, written by E. F. Augustine, the late secretary:—

I might state that when I took in hand the secretaryship for East Lambton, some two years ago, our district stood sixteenth in the list for membership, while the attendance at the twelve points of meeting held last year was 2,797, and the number of papers and addresses given was 83.

I have been asked to tell at this conference how this gratifying success has been attained. To put the whole subject in an epitome, I would say it has been accomplished by a splendid co-operation of labor and forethoughtfulness of the officers of our local Institute, and the Superintendent of the Institute Branch, Toronto. Working hand in hand we have shown the agricultural class of East Lambton that the Farmers' Institute is not a dead Government institution, but a real live issue, touching every phase of their every day labors, and demonstrating by practical and plain addresses and actual demonstrations in orchard and farm operations the latest and most up-to-date research in scientific agriculture simplified for the comprehension of the every-day farmer.

Our institute has during the last two years made many a call upon the Department at Toronto for the very best talent in special lines of work that the Department could supply, and our call has always been nobly responded to by our superintendent and his staff, and the farmers of East Lambton have shown their appreciation of our combined efforts by swelling our membership list to its gratifying proportions.

This system of securing the very best agricultural and horticultural talent procurable, has been very expensive to the treasury of our local Institute, so that we have had a small surplus at the close of the Institute year, and, in fact, the officers have sometimes remitted a portion of their legitimate salary to bring out the balance on the right side of the ledger: still, we think it is better to have all the money applied for the real benefit of the members of our organization, than to have a large surplus lying idle in the treasury.

Two more important factors of our success I must touch upon before closing. One of these is the cordial co-operation of the Women's Institute of East Lambton. With the sympathy and assistance of the ladies and a short programme of the best musical talent procurable, our evening meetings have been an unqualified success.

The other factor is the hearty co-operation of our District Representatives, whose efforts have ever been to make agriculture in the county of Lambton by every means in their power take the place among scientific professions that it deserves. Working along these lines, the Department, the Institute, and the District Representatives have planned a co-operation program for the coming season's work, which, we feel assured, will be of special benefit to the farming community of our county.

Summing up then: Hard labor, thoughtful planning, and trustful co-operation of the Farmers' Institute, the Women's Institute, the District Representative, and the Department at Toronto, have combined in building up the prestige of the Institute, and the welfare of the agricultural class in Lambton, the county of awakened progressiveness and magnificent promise.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any one of these troubles may prove deadly if not promptly treated. During the summer the mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep the baby healthy. The Tablets are sold by medicine dealers or at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Home Rule Passes Its Third Reading

London, July 7.—In the House of Commons to-night the motion of Andrew Bonar Law, the Opposition leader, to reject the home rule bill was defeated by a vote of 352 to 243. The bill then passed the third reading without division.

There is an unusual amount of sweet clover on roadsides, in fence rows and almost everywhere this year. The councils of the different municipalities ought to make some effort to see that none of it is allowed to go to seed, as it is getting to be an eyesore and a nuisance. Those who do cut it on their own premises do not like to see it get to seed over the fence on their neighbor's place. The council should accept the responsibility implied in the Act and appoint inspectors to enforce the law in regard to sweet clover, thistles and burdocks.

"Father grows younger every day." And his new photograph taken twenty years ago, made him look so serious and old-fashioned—not a bit like he really is.

We wouldn't part with it of course. But isn't it splendid to have a picture of him as we know him—just as he looks to-day.

And father says that he's glad he gave in and had it made—that having your picture taken is far from an unpleasant experience nowadays.
