The Matches of the Military Rifle League

WILL BE LIKE LAST YEAR'S

An Effort Will Be Made, However, to Discard the Old Snider.

Handsome Certificates for Marksmen Are to be Printed—British American Bank Note Co. Gets the Job—Is a Palliation for Taking Away the Dominion Note Contract?—The Prizes Will Be Sterling Silver—Falling off in Revenue—General News From Ottawa.

Ottawa, Feb. 7.—(Special.)—The executive of the Canadian Military Rifle League has decided that owing to the uncertainty as to what arm will be adopted at Blaisy this year, and the delay in the general issue in Canada of the new Lee-Enfield rifle, the league will hold its matches on very much the same lines as last year. If possible, however, the Snider will be dropped.

A certificate for marksmen has been approved and adopted. It will be a very handsome thing, quite a work of art, in fact, and will be issued in two classes. That of first-class marksmen will be of the greatest difficulty to obtain. The second class, while less difficult, will be by no means easy of capturing. It is a steel engraving, printed by the British American Bank Note Company and will be given in addition to the issue of badges. Its issue will be authorized by the Deputy Minister of Militia and Defence, and will probably be signed by the Minister and the Major-General commanding.

SEVEN MONTHS' ACCOUNTS.

Customs, Feb. 7.—(Special.)—A man, giving his name as Ryan, called at the office of the Dominion Police on Friday morning and hired a team of horses and double sleigh to go on a nine-mile trip in Derby, and saying he would be back early in the afternoon. He did not come back, and all day yesterday the police and Mr. Owens were out together trying to get track of him.

FOR CYCLE RACING ADVANCEMENT

Basic State National Track Association Formed and the Big 7. Divided Up Into Districts.

New York, Feb. 7.—The National Cycle Track Association was formally organized here last night. The association elects E. C. Hodges of Boston president, and E. C. Hodges of Boston secretary, and E. D. Baker (Manhattan) secretary and, J. M. Rice (Springfield) secretary.

The objects of the association set forth in the constitution, are "The improvement of cycle tracks, the advancement of racing methods of conducting race meets." The by-laws provide for the creation of four racing districts, as follows:

District No. 1, to be known as the Eastern District, comprising the States of New England, Pennsylvania, Delaware, Maryland and District of Columbia.

District No. 2, to be known as the Central District, comprising the States of Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa, Minnesota, Kansas, Nebraska, the Dakotas.

District No. 3, to be known as the Southern District, comprising the States of North Carolina, Virginia, West Virginia, Kentucky, Tennessee, South Carolina, Mississippi, Arkansas, Texas and Florida.

District No. 4, to be known as the Western District, comprising the States of California, Oregon, Nevada, South Dakota, North Dakota, Montana, Idaho, Wyoming, Utah, Arizona, New Mexico, Colorado, Oklahoma, Missouri, Nebraska, Kansas, Oklahoma, Texas and Florida.

Article 3, sections 2 and 3, provide that each district shall arrange its national circuit meetings. Amateur prizes will be given at these meetings, and the proceeds of the same to be used for the benefit of the association.

Section 3 further provides that no bonus shall be given to any rider, trainer, manufacturer or dealer, and that nothing shall be done which would tend to injure the public interest.

The track owners of those controlling tracks at night and the annual dues are put into the hands of the trustees.

The trustees are: E. C. Hodges, president; E. D. Baker, secretary; J. M. Rice, secretary; and E. C. Hodges, secretary.

The annual meeting of the association was held at the Hotel Hamilton, New York, on Feb. 7, 1897.

New Interest at Every Turn.

While this is an every day the same sort of a place we don't stand still with the years. Active preparation for spring means more than merely collecting new goods, and the changes being made in the basement show better than anything else the development of the business. We insist on doing better and better continually. Almost no one stops to think how persistently we enlarge and improve, never stopping to figure expense when it comes to strengthening the organization.

With new goods coming and winter goods going, new attractions added and new facilities planned, the interest is incessant. No matter what the weather may be outside there's always plenty of cheer and enthusiasm in here. Even if they don't want to buy, shoppers are just as welcome, and salespeople are always ready to show goods.

Attractions such as these share the interest with furniture. You can't possibly make any mistake paying these prices:

A CRIME AGAINST THE PEOPLE.
 No matter what the decision of the Government may be on the application of the Cataract Construction Company for an extension of time to begin operations for the development of electric power at Niagara Falls, one thing is certain: the company is not going to stop. It is the monopoly of Ontario is concerned it would be fortunate indeed if the company did decide to withdraw. We should then regain possession of a franchise whose value is so great that it cannot be defined at the present moment. The Province of Ontario, by its statement before the Iron and Steel Institute of Great Britain in 1877: "The forces of the principal or Canadian falls is estimated at 16,800,000 horse-power. In other words, all the coal raised throughout the world would not suffice to produce the amount of power that continually runs to waste at this great falls." At the very time when science is demonstrating to us how this power can be utilized, not only at the point where it is being developed, but at long distances therefrom, the Province of Ontario is not only all its rights for a mere song.

The sale of this great repository of energy is a crime against the people. Who owns it now?

Not the Province of Ontario, not even Canadians. It is in the possession of a people whose Government has declared war to the knife on Canadian enterprise and industry. The franchise was acquired by the American company to develop American, not Canadian industries. They have already purchased a right to way from Chippewa to Port Erie, showing that Buffalo is the point they have in view for the distribution of the power developed on this side of the river.

What does Ontario receive for this great natural resource, the possibilities of which we cannot now comprehend? The magnificent sum of \$25,000 a year, to be increased later on to \$35,000.

It costs more than this to furnish the coal for pumping Toronto's water supply!

For this paltry sum the Cataract Construction Company has obtained the right to develop an amount of power that would supply the requirements of all Toronto for light and power, and of twenty-five cities as large as Toronto in addition!

The crime that has been committed against the people is so evident to-day as it will be ten years hence. Then shall we see everywhere about us the evidences of the greatest monopoly of the century. Col. Shaw argues on behalf of the Cataract Company that the long-distance transmission of electricity is an experiment. We deny it. The Electrical World of two weeks ago gives a table of some recent long-distance installations. Among them are two in Utah, where the power is carried 40 miles; one at Fresno, Cal., of 35 miles; another at Sacramento, of 30 miles. The transmission of Niagara Falls power to Buffalo is no experiment. One of the biggest battles ever held in Buffalo was recently given to celebrate the success of the project. The transmission of electricity for 40 or 50 miles is not an experiment, but a fact.

We may reasonably anticipate that within ten years electricity will displace steam on many of the railways; that it will be commercially profitable to transmit it one or two hundred miles from centers of production to the points of consumption. It is reasonable to suppose that within ten years Niagara Falls power will operate all the railway trains within a radius of 100 miles of it; that it will furnish light and power to Hamilton, London, Brantford, Toronto and scores of other cities, towns and villages.

In ten years from now, when the possibilities of the long-distance transmission of electricity have been more fully realized, then will the crime be proven that the Government has committed against the people of this province.

Niagara Falls should be regarded in the same light as a great coal mine, only the former is more valuable. It is inexhaustible. Its store of energy is practically limitless.

Why should this great treasure be squandered for the benefit of a few? It is no reason why it should not be adopted in Canada. The shortage in the Postoffice Department is attributed by the Postmaster-General to the carrying of newspapers and periodicals free through the mails. This branch of the service is soon to be made self-supporting, and the reason for following the example of the United States in adopting a two cent rate will then no longer exist. The Postmaster-General of the United States in his last report stated that the two cent rate had proved such a success in that country that he was prepared to recommend a reduction to one cent as soon as the department was relieved of the burden of carrying newspapers for nothing, a practice which prevails on the other side as well as in Canada. We trust that the various economies Hon. Mr. Mulock is putting in force in the department will include a similar reform, a two cent rate on letters between different postoffices and a one cent rate on local letters. The last recommendation in favor of the two cent rate was passed by a convention of the business men of Montreal and the Territories, recently held in Winnipeg.

on its development as a public benefit, and not as a private monopoly. The policy that the Government should have adopted in the first place was not to give the privilege of the development of power as the demand for it arose from time to time. Why should we grant an exclusive right to a single company for 100 years? The exclusion of others means monopoly. The same company owns an exclusive franchise on both sides of the river. The Government has been a party to the elimination of the competitive element in the sale of all the electricity available at the Falls. Why grant an exclusive right to a company that uses ten thousand horse-power yet them have it at a moderate rate, but don't give them every horse-power we possess. If they want and can use twenty thousand horse-power let them have it, but don't give them a monopoly of it. It is the monopoly of Ontario that the Cataract Company is after more than the power.

Whether the company is compelled to go on at once with the work of developing power, or is granted a year or two's delay, is of little consequence, compared with the original blunder of our parting with the franchise. The best we can do now is to insist on the deal being carried out according to the terms of the agreement. We trust the Government will not allow itself to be misled by the suggestion that the company is not going to stop. In the event of their not doing so they must be compelled to go on at once and develop power on the Canadian side of the river. The Cataract Company of the United States is a capital invested on the American side. A company of that magnitude surely does not need to ask for favors. There must be no extension of the terms of the franchise.

Scarlett Fever Raging in the Vicinity of Forest Hill—The School Closed—W. Fitzpatrick's Death.

The Township of Scarboro Liberal-Conservative Association holds its annual convention for the election of officers at Woodburn at 2 o'clock this afternoon. Mr. J. H. O'Connell, of the Court House, will preside. The following are the officers: President, W. D. O'Connell; Vice-President, William Stratton; Treasurer, J. H. O'Connell; Secretary, J. H. O'Connell; and Warden, J. H. O'Connell.

The first hockey match of the season at Newmarket will take place on Wednesday afternoon at 2 o'clock between Newmarket and Bradford.

Donald Ego of Virginia has received the following name for registration: "Oberlin College." The name was registered by the Registrar but has not yet been approved.

Charles McMichael was re-elected as chairman of the Markham High School. The regular meetings of the Board will be held on the first Friday in every month. Neil McDonald of Scarborough was about to be elected to the Board when he was disqualified by the Registrar because he had not paid his taxes regularly, although he had been elected to the office.

The Markham Economist objects to the allowance to county councilors of 10 cents per mile for traveling expenses. The actual cost is half the amount. The Economist says that the Legislature has no right to allow such a large sum for the expense of the county councilors.

Mr. G. M. Vandenberg of Richmond Hill, who started the proceedings to unseat Messrs. Reesor and Hall in the County Council, was inserted in the defendants' plea his taxes regularly, although he had been elected to the office.

TESLA ON WATER POWERS.

In view of the discussion that is now going on in regard to the development of Niagara Falls power on the Canadian side of the river, some remarks of Nikola Tesla, made at the recent banquet held in Buffalo to celebrate the completion of the project, are of interest. Mr. Tesla believes that water falls constitute the most valuable of all our sources of energy. He hopes that Toronto and Hamilton will soon follow Buffalo's lead in the utilization of Niagara Falls power. The greatest electrician in America does not look upon the long-distance transmission of electricity as an experiment. In the light of Mr. Tesla's remarks the sale of the Niagara Falls franchise for \$25,000 a year seems to be a great mistake. We quote from the paper which he delivered at the Buffalo banquet:

"Having examined for a long time the possibilities of the development I refer to, namely, that of the operation of a hydroelectric power plant, I find that even under the theoretically best conditions, the cost of the power cannot be equal to the cost of the power produced by the mechanical energy of running water into electrical energy and the transmission of the same. The cost of the mechanical energy of running water into electrical energy and the transmission of the same is so great that it is not possible to get power from the sun sufficient for all our wants, and this recognition is the basis of the hydroelectric power. The future importance of the water power, not so much because of its great abundance, but because of its great value, but chiefly because of its bearing upon our safety and welfare. It is a fact that the water power is a great blessing to the world. It is a fact that the water power is a great blessing to the world. It is a fact that the water power is a great blessing to the world.

Weston.

Weston, Feb. 6.—(Special)—The agreement for the extension of the Toronto Suburban Electric Railway to the west side of the river is likely to be formulated in the near future. The Toronto Suburban Electric Railway, which is now under construction, will be extended to the west side of the river, making a total length of 15 miles. The extension will be made in two stages, the first stage being the extension to the west side of the river, and the second stage being the extension to the west side of the river. The extension will be made in two stages, the first stage being the extension to the west side of the river, and the second stage being the extension to the west side of the river.

A TWO CENT LETTER RATE.

Every city in Canada favors the reduction of the postage on letters to two cents. The Great Britain and the United States. There is no reason why it should not be adopted in Canada. The shortage in the Postoffice Department is attributed by the Postmaster-General to the carrying of newspapers and periodicals free through the mails. This branch of the service is soon to be made self-supporting, and the reason for following the example of the United States in adopting a two cent rate will then no longer exist. The Postmaster-General of the United States in his last report stated that the two cent rate had proved such a success in that country that he was prepared to recommend a reduction to one cent as soon as the department was relieved of the burden of carrying newspapers for nothing, a practice which prevails on the other side as well as in Canada. We trust that the various economies Hon. Mr. Mulock is putting in force in the department will include a similar reform, a two cent rate on letters between different postoffices and a one cent rate on local letters. The last recommendation in favor of the two cent rate was passed by a convention of the business men of Montreal and the Territories, recently held in Winnipeg.

REFER IT TO A COMMISSION.

York and Simcoe County Councils and the Council of the City of Toronto have passed resolutions requesting the Dominion Government to appoint a

commission to investigate the feasibility of the proposed Georgian Bay Ship Canal. We understand the same matter will shortly be presented to the Board of Trade for their consideration. The Board ought to pass a resolution endorsing the appointment of a commission. Such a commission ought to be able to give the public an unbiased opinion on this vexed problem. An official declaration of the feasibility or impracticability of the scheme would be welcome.

AMERICANS ARE RICK ABOUT IT

Their Attention Drawn to Ontario's Gold Fields.

NEW YORK WORLD'S VIEW

About the Valuable Folger Claim on Sawbill Lake.

It is the Richest Strike Made in Many Years—How the Folger Bros. Sent James Hammond on a Prospecting Tour in 1885—A Rich Reef Found—A Town Plot Staked Out on Lake Wabigoon in the Manitowish Region—A Smelter for Sudbury—Apathy of The Mail and Empire in Regard to the Sudbury District.

Americans are gradually turning their attention to the gold fields of Ontario, and glowing articles on our mineral resources from time to time appearing in the United States press.

In the new gold fields of the great Canadian Northwest a discovery has been made which promises to be the richest strike made in many years. If this find continues to pan out as well as at present indicated, its present owners will be rich beyond the dreams of avarice, their bonanza strike will be heralded the world over and a rush which will eclipse the California gold fever of '49 will begin with the coming of spring.

The success of a development company depends much on its management, but large capital is absolutely necessary to deal with the properties we have now under contract.

road is to have its terminus there, and a tug is to ply on the lake.

Mayor Cochrane received a telegram Tuesday from Toronto, signed by Mr. Rinaldo McConnell, asking what bonus the town would give for a customs smelter with the McDunnell process.

The apathy displayed by The Mail and Empire with regard to the resources of and mining operations in the Sudbury district is remarkable.

Editor World: Great care should be taken at the forthcoming meeting at Toronto in the coming summer that the mining interests of the whole of the Dominion should be placed impartially before the British Association, and with that view many—not a few only—good, practical mining proposals and brokers should be placed on the committee.

A Country Editor Kicks.

A rumor is current that gold has been discovered in the Don Valley near Toronto. It has been proved generally known for some time that there is an over supply of gold around newspaper offices, but we have our doubt about gold being found near a city where there are so many cheap daily and weekly newspapers. We think all the precious metals in that section must be exhausted long ago by the publishers' vain attempts at giving the people papers for a price that costs to produce them, to the detriment of the proprietors of country weeklies who cannot make the advertisers pay for the subscribers' reading.

PLENITY OF "SHINPLASTERS"

Assistant Receiver-General Creighton Says They Can Be Had at Any Time and in Any Quantity.

As the question of whether "shin-plasters" can readily be got for making remittances of small sums is one that interests everybody, a representative of The World called on the Assistant Receiver-General to ascertain the facts as to their circulation. He said that the original issue of 25 cent fractional notes, usually called "shin-plasters," was an outcome of what older merchants will vividly recollect as the "silver nuisance" in Canada. Brokers and others made large sums by importing immense quantities of the "silver nuisance" into Canada, driving out not only Canadian coin, but also to a large extent the smaller metal coin in circulation in Canada, driving out not only Canadian coin, but also to a large extent the smaller metal coin in circulation in Canada, driving out not only Canadian coin, but also to a large extent the smaller metal coin in circulation in Canada.

The statement attributed to an Ottawa banker that Government only issues them in amounts of \$50 is absurd, said Mr. Creighton. The office of the Assistant Receiver-General at Montreal, Toronto, Halifax, St. John, Charlottetown, Winnipeg, and Vancouver are the places from which Government notes and coins of every denomination are issued to the banks and are ready to supply the public in any amount, even to a single 25 cent shin-plaster, if necessary. The great bulk of our business is necessarily with the banks, but our office is for the accommodation of the public, and we are ready to supply the public in any amount, even to a single 25 cent shin-plaster, if necessary.
