The Observer.

St. JOHN, TUESDAY, JUNE 8, 1847.

ENGLISH MAIL.—The second May mail, post steamer *Hibernia*, arrived in this city on Thursday bound passengers, including the *Captain* of 17,000, her wife, her husband, the Governor-General of British North America, at Quebec. Several members of her father's family, the late Earl of Durham, accompanied her *Ladyship*.

We submit a summary of the intelligence by the mail.

Saturday, May 13.—We have before us reports from almost every district of the country, which satisfy us that the improvement and prospect of a good harvest is almost universal. The wheat crop at present is early to speak of; but we may say that no weather could be more favourable for it than the present. The price of wheat and flour has fallen to the minimum. There exists on the part of many persons a great fear of scarcity, being impossible to estimate, with accuracy, of certainly, the stock in the hands of the farmers. As regards the continent, it was stated in the Chamber of Peers on the 18th instant, by the Minister of Commerce and Agriculture, that the prospects of the new harvest were extremely promising. The price of Belgian flour is said to promise an abundant harvest. A correspondent of a London paper says:—"I have just received the whole of the central and upper districts of the Peninsular. I can affirm that for the last twenty years never was the aspect of the country, or the operations of the farmer, in a state so promising. From Egypt we learn that the corn harvest is but up, and the midday sun has been got in, and was growing rapidly. Vicerey estimates that there will be 4,000,000 bushels of grain for exportation on July 1st, at the rise of the waters of the Nile."

LONDON CORN MARKET.—On the 4th inst., we quoted Canadian wheat flour at 40s. to 41s. per barrel, and United States wheat at 38s. to 40s. Gal. Our quotations to-day show a rise of 7s. 6d. to 8s. per quarter on the former, and 8s. 6d. to 9s. 6d. on the latter. The latest accounts from the Continental markets show that nearly scarcity prevails in several parts, and as the navigation will open up, large supplies were expected to come down the river in due time, whereby the wants of the people of those countries would not only be supplied, but numerous cargoes would be transported to these kingdoms.

LONDON CORN MARKET.—Since the sailing of the Caledonia, on the 4th inst., a general reaction has taken place in the grain markets, and prices have risen rapidly, and are now at such a figure as will place many articles of breadstuff out of the reach of the poorer classes in this country. American flour has been sold extensively at 50s. to 52s. per barrel, being 10s. more than it was worth about a fortnight ago.

The Coton trade has suffered severely from the pressure which has prevailed in monetary circles. The transactions in this article during the fortnight have been small, and prices are now considerably below our last quotations.

MONEY AND TRADE.—The past fortnight has been one of much anxiety and great trial in commercial circles. The Bank of England here and there, symptoms of an improved trade, have manifested themselves, still, generally speaking, there has been a complete stand in business. This has been caused by the high price of provisions, the scarcity of money, and the prospects of further drains upon the resources of the country, to meet the impending trials caused by the want of food in Ireland, and the scarcity of employment in the manufacturing districts.

There can be no doubt that the Bank of England is in a steadily improving position; the present amount of bullion held by the establishment is estimated, by very competent judges, to be ten millions, whilst the reserve of Bank Notes is nearly four millions.

The Manufacturing Districts.—The accounts from the manufacturing districts are of the most gloomy character, and little hope can yet be entertained of any decided or substantial improvement, at least, for some time. The money market, however, has manifested a decided recovery, and the demand for manufacturers has increased. The short-time system, as it is termed, still prevails in many of the cotton and woolen districts, so that numbers of the operatives are nearly destitute of employment, and their means of subsistence, if not cut off, very seriously curtailed. The latest intelligence from Bradford, Halifax, Huddersfield, Leeds, &c., shows a decided increase of demand for woollen and worsted goods. We trust that we have, if not entirely, at least very nearly, reached the climax of the depression which has visited the trade and commerce of this country.

MANCHESTER.—This has been one of the severest and most trying weeks experienced in Manchester for many years, and we are sorry to say that the prospects for the coming week are unentitled by a single alleviating circumstance. The embargoes on the ports may now be considered as having been a complete stand in business. This has been caused by the high price of provisions, the scarcity of money, and the prospects of further drains upon the resources of the country, to meet the impending trials caused by the want of food in Ireland, and the scarcity of employment in the manufacturing districts.

The Manufacturing Districts.—The accounts from the manufacturing districts are of the most gloomy character, and little hope can yet be entertained of any decided or substantial improvement, at least, for some time. The money market, however, has manifested a decided recovery, and the demand for manufacturers has increased. The short-time system, as it is termed, still prevails in many of the cotton and woolen districts, so that numbers of the operatives are nearly destitute of employment, and their means of subsistence, if not cut off, very seriously curtailed. The latest intelligence from Bradford, Halifax, Huddersfield, Leeds, &c., shows a decided increase of demand for woollen and worsted goods. We trust that we have, if not entirely, at least very nearly, reached the climax of the depression which has visited the trade and commerce of this country.

LIVERPOOL TIMBER MARKET.—In our last printed circular we made some observations on the embarrassments under which the trading interest were then suffering, occasioned by the Directors of the Bank of England having found it necessary to contract their accustomed amount of discounts, and by other creditors following their example in becoming more stringent than usual in their accommodations to the public. These representations, which thereby at first excited but gradually discontinued, are greater now, freely, and on easier terms. It is to be hoped that, as confidence and credit seem now being restored, the accustomed course of trade will not be long impeded. There does not appear to be any reduction during the last few weeks, in the price of Brazil—*i.e.*, 40s. per ton, and the demand for timber, though still, remains at the same level as before.

The Free Trade Association of Belgium has called a meeting of the economists of all the world, at a general congress to be held at Brussels on the 10th of September next.

A bull weighing 4 tons 13 cwt. 2 qrs. being twice the size of the famous "Tun of Lancashire," has been exhibited at the fayre of Messrs. Meers, Whitechapel, London, for the Roman Catholic Cathedral, Montreal.

The Hambrug and Rotterdam steamers have brought over to Hull during the last few weeks, on the average, from 3000 to 30000 barrels of prime kiel butter. The Emerald Isle, on the 3rd instant, landed 9000 barrels, and the Queen of Scotland, on the following day, 500.

The Gazette of Friday contains the appointment of Viscount Torrington to the government of Ceylon.

Professor Schonbein, the inventor of the gun cotton, has had the honour of Knighted confessor to the King of Sweden.

Mr. Barry, the architect, is said to have designed a forty foot high for the Wellington statue, which is to be erected in Hyde-park.

The Belgian journals state that malignant fever is very prevalent in the province of Flanders.

The amnesty in Spain is to be extended to Extremadura.

Iron and Wooden Ships.—A correspondent of the Times calls attention to the rapid breaking up of iron ships, and contracts it with building together for many vessels of the Great Britain, an iron-built ship. He considers that had the *Terror* been iron built, every iron on board would have been saved.

The launch of the steamship Great Britain from the scene of her recent disaster in Dundrum Bay, is to be attempted next spring tide.

THE TIMES.—The Times of Wednesday week contains the astonishing number of two thousand and sixty-nine advertisements. If we are not mistaken, this is the greatest amount that has ever appeared in that wonderful paper.—Edinburgh Advertiser.

On the 4th of April, one of those dreadful fires which are the curse of Turkey, broke out in Bucharest, the capital of Wallachia. It was blowing a violent Southeast wind at the time, and the inferno raged most intensely for twenty-four hours, during which time, it was said, the entire town was reduced to ashes, and in great spirits; it is to be hoped that a prolonged stay in England, now that the five weather is just commencing, will effect a complete cure.

SEIZURE OF FOOD.—The following order has been issued by the Lord Lieutenant of the Queen's Household for the Royal Navy having taken advantage of the high price of provisions and especially bread stuffs, he has been graciously pleased to command that from the date of the 2nd, *i.e.*, the 2nd of May, shall be used in her Majesty's household, and that the daily allowance of bread shall be 1lb. per head to each person dined in the place.

BEATIS OF THE EARL OF BESBORTHOROUGH.—An extraordinary Gazette was published last evening, containing the following official announcement:

"Dublin Castle, May 17th, 1847.

"Last night at the hour of eleven o'clock, died at her Majesty's Castle of Dublin, His Excellency John William, Earl of Besborough, late Lord Lieutenant General and General Governor of Ireland, to the infinite regret of all ranks of people." His Excellency the Earl of Besborough was in the 66th year of his age.

Mr. O'CONNELL.—We learn, says the Dublin Evening Post of the 17th of May, that Mr. O'Connell, the leader of the Opposition, in the 66th inst., after a fine, but somewhat tedious passage of 22 hours, and he may, perhaps, make a short stay in that city. The voyage was borne by him exceedingly well, and the accounts add, "that it has not checked the improvement already manifested, but the reverse. In fact, he is not only beyond compare better, than

when leaving England, but continues to recover rapidly."

The Lord Mayor of London gave a sumptuous dinner at the Egyptian Hall the other day to the Cabinet Ministers, the ladies, and a number of distinguished guests. The principal guest was Sir H. Smith, the hero of Acre, and the famous naval and continental hero in whose Lord John Russell spoke of the kind and sympathetic care shown by the government. Averys was twice distressed Irish in their home of need.

The Duke of Bedford, brother of the Premier, it is believed will succeed Lord Besborough in the Lord Lieutenantcy of Ireland. Lord Charnwood, Charnwood and Marpeth have also been named for the office.

CHARLES NAPIER.—It seems, has suddenly returned to host his flag at Portsmouth and to take the command of the Lisbon fleet.

THE BLITZ OF STIRLING HIGHLANDERS.—We have expressed a particular desire to the Duke of Atholl, to know what the regiment for the regiments from the Prince's estate, in the county of Stirlingshire, were originally embodied by his illustrious mother, his Grace not only agreed to afford every facility to the recruiting parties now in that county for obtaining the above quota during the ensuing summer, but has promised to present each man a sum of £2 or £2 10s. as an addition to the government pay.

HIGH-AND RELIEF FUND.—Splendid Contribution.—A splendid first class American ship, the *Morea*, Captain Read, arrived at the Broadmeadow on Monday, with a cargo of meat, hemp, bacon, &c., valued at 21,000 dollars, the contribution of the citizens of New England to the Highland Relief Fund.

HIGHLAND RELIEF FUND.—Mr. Bruce, Treasurer to the Highland Relief Fund in Glasgow, has received a remittance of £3000 from the British Association, making in all, from that society, £10,000.

£3000 has been remitted from Calcutta for the benefit of the Scottish sufferers to be followed by a further remittance.

The Duke of Argyll proposed to ship above him from his estates in the Highlands to Canada.

Typhus fever is raging to an unprecedented extent in Dundee. The deaths in the Infirmary have amounted to 150, and the mortality in the typhus hospital that devotes its efforts to them, owing to the paucity of space in three times that number.

The Earl of Elgin is to have the green ribbon and purple sash of the Order of the Garter.

The British Government has taken steps to reward Sir J. G. Jackson with his overall appointment to the North Pole.

About £2,000 have been contributed in the small island of Guernsey, towards the relief of destitution in Ireland.

Lord Hardinge, feeling for the spiritual wants of the distant part of the parish of Penshurst, in which he resides, has sent £1,000 towards building and erecting a church or chapel there.

—*Continued from page 1.*—At the meeting of the Oxford Town Council on Friday, that upwards of 300 houses are to let in that city; and a most deplorable picture was given of the general state of trade.

The Duke of Elgin is to have the green ribbon and purple sash of the Order of the Garter.

The Duke of Argyll proposed to ship above him from his estates in the Highlands to Canada.

EFFECTS OF LIVING ON ONE KIND OF FOOD.—About a dozen instances of the effects of living on one kind of food are given in the following article.

The emigrants who left Liverpool for America and Canada since the commencement of the season amount to 3000, and it is said that 3500 have left that port to proceed to Liverpool and Glasgow. It is calculated that the number in the students attending to the conductors of the emigration will be 1000.

THE IRISH COTTON FUND.—Mr. Bruce, Treasurer to the Highland Relief Fund in Glasgow, has received a remittance of £3000 from the British Association, making in all, from that society, £10,000.

£3000 has been remitted from Calcutta for the benefit of the Scottish sufferers to be followed by a further remittance.

The Duke of Argyll proposed to ship above him from his estates in the Highlands to Canada.

Typhus fever is raging to an unprecedented extent in Dundee. The deaths in the Infirmary have amounted to 150, and the mortality in the typhus hospital that devotes its efforts to them, owing to the paucity of space in three times that number.

The Earl of Elgin is to have the green ribbon and purple sash of the Order of the Garter.

The British Government has taken steps to reward Sir J. G. Jackson with his overall appointment to the North Pole.

The Duke of Argyll proposed to ship above him from his estates in the Highlands to Canada.

THE CHINESE EMPIRE.—The latest intelligence from the Chinese vessel which has been lost at sea, is that it was captured by pirates.

The Chinese vessel was captured by pirates.

The Chinese

Poetry, &c.

A TRUSTFUL BENEDICT.

When Jock and Jenny were intent on matrimony, an elderly friend addressed them in language of friendly remonstrance on their "imprudence." Jock wrote in reply:

Jenny is poor, and I am poor,
Yet we will wed, so say no more;
And should the "bairns" you mention come,
(As few that marry have some.)
No doubt but Heaven will stand our friend,
And bread well as children send.

So fares the man in farmer's land;
To live alone she finds it hard;
I've known her weary every clav;
In search of eat among the straw;
But when in quest of meat food,
She clucks among her clapping brood,

With joy I've seen that self same hen
That scratch'd for one could scratch for ten;
These are the thoughts that make me willing,
To take my girl without a shilling;
And for the self same cause, d'ye see,
Jenny's resolved to marry me.

LITTLE LADIES OR LARGE ONES?—Alice and Florence were asking whether the gentlemen prefer little ladies or large ones? "A depends upon love. If a gentleman falls in love with a large one, he does not like the little ones; and when he's in love with a little one, he does not like the large ones. Very tall men frequently marry little women. A wise ordinance," as a lady once remarked. It prevents the human race from rising too steeply; though Nature very often spontaneously corrects herself by giving very tall children to very little parents."—Notices to Correspondents.—"Family Herald."

"Ma" said a little girl to her mother, "do the men want to get married as much as the women do?" "Pah! what are you talking about?" "Why, ma, the women who come here are always talking about getting married,—the men don't do so!"

A WONDER.—A Popular Taz.—A gentleman who signs himself "One of the Friends of England," has sent in a proposal to Lord John Russell for raising a new tax, which would have the novelty of being a great relief to the suffering community, besides checking a growing evil. It is to apply the tax to the mouths of the tongues of women, and charge them so much for the pleasure of the loan of £200,000 would be paid off in less than six months. We can see but one objection, and that is, the enormous noise there will be in consequence of the endless disputes of the fare.—Punch.

NOT A NICE HOUSE.—"Mama," said a little fellow sent to his mother to draw his shoes and shins up the mahogany sideboard with a sharp nail,—"Mama, this isn't nice at all. At St. Racket's we can cut the sofa, and pull out the hair, and ride the shovel and tongs over the carpet, but here we can't get any fun at all!"

Did you ever sit down to tea where skim milk was on the table, without being asked, "Do you take cream, Sir?"

Iron, Boiler Plate, Soap, &c.

May 18, 1847.

A CURE FOR BOTH BODY AND MIND—BY DR. JAYNE'S MEDICINES.

Philadelphia, May 20th, 1847.

Dr. Jayne: Dear Sir: I feel bound to call your publickity to the extraordinary effects of your valuable Medicines.

I have suffered for several years past with Liver Complaint, and the train of diseases which follow—a complete prostration of the system—so that it was with great difficulty that I could walk about, and at last I was confined to my room, and added to my misery by seeing the disease appeared in my throat, with rheumatism in my arms, so that I could not raise my right arm to my head. In the past two weeks my hands were so weak that I could not hold a cold, moist particle for a moment, even when I held it to my nose, and I could not get a good night's sleep, and gave up all hopes of ever getting well. I had many sweets, and got little sleep also, but still did not improve. My wife, however, seemed to be leading me to INSANITY, and was unable to study or mental exercise. I could not read a small paragraph in a newspaper without great difficulty. I had great pain in my stomach, which caused it to swell so much that I was made to lie down, or even to curl, but had to be propped up in a chair.

In the course of some time my physician and I tried nearly all the remedies used in such cases, but nothing appeared to be of service.

After taking your Alternative and Pills for three weeks, there was a decided change for the better, so that when I called on you to thank you I could walk about the house.

You no hopes, however, of getting well. I still continued to take your ALTERNATIVE, and when I took the fourth tablet, with which there was a sudden change in my condition, as though I had got rid of some great burden, and I could draw my breath as usual. My nerves gradually became strong again.

It has been about four months since I commenced taking your Medicines, and I determined to test your SANATIVE PILLS, and to my surprise, the results left me, so that I could walk about the house. I continued to improve from that time. Shortly after, I was called at my store, and when I told you that I had your pills, you sent me a bottle of your ALTERNATIVE, and was soon to come and see you, and you would investigate my case, and give me a full report before I leave, as I felt it beyond the reach of human skill.

After taking your Alternative and Pills for three weeks, there was a decided change for the better, so that when I called on you to thank you I could walk about the house.

THE Subscriber wishes to return his sincere thanks to his numerous customers and the public in general, for their past favors while connected with the above Firm, and hopes by his fidelity and strict attention to business, to continue to merit their patronage. JOHN M. BRINE.

P.S.—All orders in the above line attended to with punctuality and dispatch.

JOSEPH BARDER.
Poplar, between Seventh and Eighth-st., Phila.
