LONDON, TUESDAY, JAN. 21.

THE BUSINESSMEN'S PETITION. The petition presented to the London and Port Stanley Railway Board, signed by over sixty leading manufacturers, wholesale firms, and shippers is a vindication of the action of last year's council in demanding more time to consider railway affairs.

The cry of "muzzling the people was useful for election purposes, but the aldermen are now face to face with a problem that must be solved by common sense. They cannot unload their responsibilities by rushing the question to a vote without giving the taxpayers some light and leading. The alternatives to electrification must be weighed. The views of the greater part of the industrial and mercantile community cannot be ignored. The petitioners ask for independent expert rdvice on these points:

1. As to the cost of putting the road in shape as a steam road. 2. As to the cost of electrifying the road. 3. As to the comparative cost of

operating-(a) By steam.

(b) By electricity. 4. As to the advisability of operating or having the road operated by steam or electricity, having in view the necessity of providing running rights for steam roads.

They also ask that the Michigan Central, the Pere Marquette and other companies which may wish running rights over the London and Port Stanley Railway "be given an opportunity to express their views as to what course would be best to insure effecsay that these are unreasonable de-The aldermen who tried to brush them aside when they were presented last year in a less numerously signed petition now concede that more time should be taken for deliberation.

#### SENATOR FERRIS AND MR. BECK. The Toronto Globe says, with refer-

ence to a letter it prints from Senator Ferris, of New York, complaining of Mr. Beck's lack of courtesy:

"The Globe, which has been a constant supporter of the hydro-electric project, since its inception, has no desire to magnify the incident, but Mr. Ferris' statement cannot be ignored. The discourtesy shown by Mr. Beck upon the last occasion on which the New Yorkers visited To-

is most regrettable. Mr. Beck's impatient cry of 'rot.' when Senator Ferris' statement was brought before him, is to be regretted as indicating that he is not yet aware how grossly he has offended against the laws of international courtesy." Discourtesy from Mr. Beck creates no more astonishment in London than it does at Queen's Park, Toronto. The

flobe might call up any of Mr. Beck's colleagues, from the Premier down, and That this discourtesy is natural and habitual does not excuse it, either in prime of his powers at 77. London or Toronto. Least of all is i to be excused in international relation.

ships. Mr. Beck forgets the duty he owes as a member of the Ontario Government to a committee of the Legislature of the State of New York. Mr Beck should apologize. When that is done, let the Ontario Legislature investigate thoroughly the

report of the Ferris committee. The report says: "The statements made in our report, and particularly the financial summary, are made up from sworn testimony, the witness frequently producing and putting in evidence the sworn copies of original records of the hydro-electric commission. There is no doubt but what the financial summary as well as all the other statements made in the report are absolutely cor-

There will be no quarrel with the belief that the power of Niagara Falls should be utilized to the utmost. The question is, Is that being done? Is the hydro-electric commission doing the best that can be done, or carrying on a go-as-you-please game at the expense of the municipalities? The report of the Ferris committee bears the stamp of the Legislature of the friendly, adjoining State of New York, which is as much interested as Ontario in obtaining the best results and in sharing them. If the discourtesy cannot be ignored, can the report be ignored?

The Ferris committee spent over a year investigating, and then condemned the hydro-electric commission of Ontario for reasons given. Surely the Ontario Legislature cannot ignore that report. New York and Ontario own in partnership Niagara Falls. Have as much faith as possible in the hydroelectric enterprise, and you are still are the blessings of health and free-

cal engineer. When did the Legislature "rot" not apply to such an answer with low a rate. much greater force, and call all the louder to the Ontario Legislature to have the affairs of the hydro-electric commission thoroughly examined in the light of the Ferris committee's find-

A FEMINIST CRISIS IN BRITAIN. With Home Rule out of the way for he present, and Welsh Disestablish-

ment well on its journey, the stage of the British House of Commons is cleared for the third and last of the great acts in the Government's program for the present session. This is the mangood suffrage bill, which is interesting chiefly because it brings the woman's suffrage question to the front againthis time for decisive action.

There is no provision for woman suffrage in the bill but the House is at liberty to insert one. The measure, by establishing the principle of "one man, one vote," and simplifying registration, will add about five million men to the electorate and wipe out half a million 'repeaters" who now have votes in the United Kingdom to adopt a policy property. This vast extension of the franchise would normally constitute a great and exciting issue, but it is overshadowed by the woman's cause. The woman suffragists hope their hour is would have enfranchised a million women, but it was opposed by Mr Lloyd George, Sir Edward Grey, and other friends of the movement, because its basis was not sufficiently democratic. The door has now been opened by the ling theatrical trunks. Government to complete adult suffrage, placing women on an equality with men. The Premier, himself opposed to and by this time he must be about 500 woman suffrage, has so far yielded as to offer to incorporate in the bill any amendment in women's interests that the House of Commons may choose to adopt. The amendment will then come under the new Parliament act, and as an integral part of the bill will be

cline to accept it in the meantime. It is not probable that so sweeping measure, which would enfranchise about 13,000,000 women, will secure a majority in the House of Commons but failing to carry it the women will fall back upon the second line of defence-the more moderate Dickenson

### 'Civilization at the Cross Roads

[By Special Arrangement With the Winnipeg Telegram.]

"Civilization at the Cross Roads" this is the arresting title of a book by the eminent Engfor the spring, leaped and-missed the lish historian, John Neville Fighonorary fellow of St. Catharine's College, Cambrige. The chapters in this work have symbolic titles, Armageddon, Babylon, Calvary, and Zion. They were originally delivered as lectures at Harvard University. One has to read only a few pages in these chapters to discover that Dr. Figgis is not well pleased with the present trend of civilized man. It makes him wrath to see that "the statecraft, the economics, the education, the literature, the social and family life of our day, are organized on a basis frankly secular." He groans in spirit, and more audibly in these pages, when he sees that "attacks of daily increasing virulence are made directly on those studies which do not lead to money-getting." Methinks this every constituency in which they own which would impose a heavier burden author must be a teacher of the classics "Physical science is indeed valued, but mainly because it is hoped to increase the chances of moneyresponsible party leader in the Old making." Then turning specially to Country. The question of food taxes is the people of this hemisphere he about to strike at last. The so-called United Kingdom. It is entirely their cries, "Take the western world conciliation bill rejected last session affair, with which we in Canada, and through, and what unity can you find either in religion or thought or practical ideas, except the desire for riches?"

Every English author or lecturer who comes to America lands on these shores with the prepossessed idea that "I used to be, but the real everyone on this continent is "chasing the almighty dollar." If there is one phrase from this side of the water constantly quoted by Englishmen it is this refrain: "Chasing the dollar." So Dr. Figgis came to Harvard expecting to find trees growing silver dollars and all the natives vigorously shaking the boughs. And the professors of Harvard evidently tried to make him see the silver trees, and told him at hat you married me because I was such least one fairy tale, for he remarks 'Someone said to me here the other day, 'You cannot imagine the degree to which we are materialized; every servant girl cherishes hopes of being one day a society queen." This saying is on all-fours with that other silly exaggeration to the effect that every Mr. Harry Lauder has promised his American mother expects that her wife to retire from the stage as soon as new baby boy will one day become te has saved £120,000, which sum he ex- president. But let us hear Dr. Figgis further: "Of course, the love of money is not new, but the absorption in it of 75 per cent of human ormer living who surpasses Mr. Lauder energy is, I think, new. More and more people are ill-content with a we should be surprised to find that he competence, and are snatching at the has saved so large a fortune. The means of ostentation. If he has a small boy, he would be unable to keep the appointment, have ceased their violence since four out of hundreds of contemporary more will do so while hardly aware of it." It must be admitted that America men make haste to be rich, but are they not doing so in England? And if there is more hustling here by people it is not because more people have a chance to gain the comforts of life on this continent? I have no sympathy for greed, or for ostentation, or for those who live beyond their means, but I believe that there is

We can all agree, however, with this critic of modern civilization when he points out that "At this moment there would be few wrongs in the distribution of wealth if people ceased to want more than is good for them." The greatest disturbers of economic values have not been men who have altered hurry (it's only a block away, no matthe laws, but those who have changed ter where it happens), and brings his the wants of a sufficiently large number of people to affect the markets. Even at that exciting moment when Eliza is crossing the ice I have an idea that, instead of a baby, she is really carrying a sirloin steak or an aniseed bag, dressed up in a cap and long clothes. There must be some stage secret to account for the relentless way in which those baying bloodhounds pursue her; otherwise they would be morally sure to wind up in the orchestra or the box-office or somewhere. MRS. ALICE NORTON.

After weeks of planning, preparation and correspondence, The Advertiser is now able to announce an enterprise of tremendous interest to every housewife and to every mother. It means the bringing together, on the home page of this newspaper, of the best brains and expert knowledge obtainable along all the lines of home economics. Their work will appear from day to day for many months. Some of the plans for this preat enterprise are not yet ready for detailed announcement, but a number are well in hand. The first of these, to begin tomorrow in this newspaper, is this:

MRS. ALICE P. NORTON, head of the department of home economics of the University of Chicago, writes a series of articles on her favorite topic. She holds her position now because she has worked up to it through much she says because she has LIVED IT, working out the problems of cooking and home making on very limited income. What she writes has the stamp of

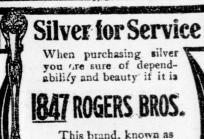

practical as well as scientific knowledge. Mrs. Norton's articles, on the culinary side, take up such topics as sugar, fruits, vegetables, soups, meats, breads, gelatine and baking powder, in a simple, plain way that gives the busy housewife both the WHY and the HOW of things. She will also write on such subjects as dirt, dusting, scrubbing,

In ll sorts of houses it is used now extensively, and its manufacture is inreasing in leaps and bounds. For breakast and for the children's meals nothing is better than a paper tablecloth. It is not ugly, and neither does it look cheap. The new paper cloth is of a very sof exture, smooth, and damasked patterned.
Paper towels are also used in many public schools. Doubtless they will soon be improved, and great popularity is certain to await them, for, in addition small cost, entire sanitation and cleanliness, can be added efficacy and pleasant feeling, and the harrassed housewife will gladly welcome such a lessenerd to her laundry worries. Similarly handkerchiefs have been very successful, and are used in many hospitals. For travelling they are especially useful.

God Joins Together. The shifty-eyed gentleman recommended to 'Gene by the landlady as a justice of the peace, who performed the functions of his office at bargain rates for all friends of hers, certainly did his duty in the present instance both reasonably and expeditionally. In less than ten migutes the present instance both reasonably and expeditiously. In less than ten minutes after 'Gene and Bella appeared in his rathole of an office, he declared them to be man and wife, and issued to the girl a certificate announcing to all whom it might concern that she, Bella Agnes Parmelee, spinster, had on May third been united in the bonds of holy wedlock to one 'Gene Thomas Page, 'longshoreman. As Bella received the paper, she lifted her face to be kissed by her husband. At that moment even Justice Barney was conscious of a slight thrill as he saw the plain face of rather an ordinary-looking girl suddenly flash beautiful. What misery to lie awake nights Alberta, at a high figure, to be placed and think of all sorts of things without being able to get the rest and tasks of the day.

This symptom of sleeplessness is one of the surest indications of an exhausted nervous system. You must have sleep or a breakdown is certain. Chase's Nerve Food feeds the feeble, wasted nerves back to health and strength. In a few days you obtain the natural, restful sleep which helps so materially in restoring vitality to the nerves and strength to the whole body.

### Remarkable Flesh Grower for Thin People

Noted Physician Reports Thirty Pounds Increase at the Rate of Two Pounds a Week.

Great interest has been aroused by the ecently published report of Dr. Pasquier he well-known authority on malnutrition who has just concluded an extensive in vestigation into the cause and cure of ex essive thinness. He found that most thi people were either very nervous or suf

fered from some form of stomach or live trouble, and that thinness was not due to lack of food or poor quality of food, for as a matter of fact, in nearly every case the a matter of fact, in nearly every case the person under observation was a very heavy eater. It was therefore apparent that thinness was due to a derangement of the nervous system controlling the of the nervous system controlling the stomach and liver, and that the only way to put on flesh was to first overcome the nervous trouble. After a number of trials he found a prescription which on the first test effected an increase of two pounds a week. By arrangement with his colleagues his prescription was then tried on thirty thin people suffering from nervousness, catarrh. stomach and liver trouble, and to the astonishment of the doctors, each case without exception began to improve in health and put on flesh. At the end of the first four weeks the nervousness and other disorders had practically entirely disappeared, and the average increase in weight was a little over two pounds a week, or eight pounds for the first four weeks. The prescription that produced these astonishing results as published in the report is very simple and produced these astonishing results as published in the report is very simple and absolutely harmless. It calls for 2 oz. Tincture of Cardamoms Compound, 2 oz. Elixir of Cailsaya, 2 oz. Fluid Saltogyn, and 2 oz. distilled water, all easily obtainable at a trifling cost from any druggist. DIRECTIONS: Ask the druggist to mix all the ingredients except the Saltogyn in an 8-oz. bottle, and give you the Saltogyn in separately. When you get home add half the Saltogyn. After taking three doses pour in the remainder of the Saltogyn and continue taking as before. Dr. Pasquier recommends that in all ordinary cases two tablespoonfuls should be taken about twenty minutes before each meal, but in cases of excessive thinness or sleeplessness a like quantity may be taken between meals or whenever extremely fatigued.

Nine-Tenths of All Stomach Trouble Sald

to Be Due to Acidity. Physician's Advice on Cause and Cure. A famous physician whose successful researches into the cause and cure of stomach and intestinal diseases have earned for him an international reputation, said in the course of a recent lecture that nearly all intestinal troubles, as ture that nearly all intestinal troubles, as well as many diseases of the vital organs, were directly traceable to a deranged condition of the stomach which in turn was due nine times out of ten to excessive acidity, commonly termed sour stomach or heartburn which not only irritated and inflormed the direct. irritated and inflamed the delicate lining of the stomach, but also set up gastritis and stomach ulcers. It is interesting to note that he condemns the use of patent medicines as well as of medical treatment for the stomach, stating that he and his colleagues have secured remarkable results by the use of ordinary bisurated magnesia, which, by neutralizing the acidity of the food, removes the source of the trouble. He contends that it is as foolish to treat the stomach itself as it would be for a man who stepped on a tack to rub linament on the foot without first removing the tack. Remove the tack and the foot will heal itself—neutralize the acid and stomach troubles will disappear. Irritating medicines and medical treatments are useless, so long as the contents of the stomach remain acid; remove the acidity, and there will be no need for medicine—the inflamed lining of the stomach will then heal itself. Sufferers from acidity, sour stomach or hearters from acidity. burn should get a small bottle of bisurated magnesia from their druggist, and take half a teaspoonful in a quarter of a glass of hot or cold water after meals, repeating in fifteen minutes, if necessary, this being the dose which the doctor has found most efficacious in all cases.

Montreal Heraid: From a semi-official source it is announced that the professional lacrosse tangle is rapidly nearing a settlement—is virtually settled, in fact, but needs ratification in certain quarters before a new six-olub league is floated.

The new league, it is stated, will comprise M. A. A. Nationals, Irish-Canadians, Toronto, Tecumseh and Cornwall.

Capitals and Shamrocks thus drop out of professional lacrosse.

The seven local councils of the Canadian Order of Chosen Friends celebrated the twenty-fifth anniversary of the formation of the order last night in the Masonic Temple on Queen's avenue, when a complimentary concert and a dance, as well as the installaion of the officers of the different

ouncils for 1913, took place. The evening's entertainment, which as enjoyed by a large number of the nembers and friends of the order, was given under the auspices of the grand executive committee, of which a large umber of members were present. Grand Representative Dr. Woods, of Mount Brydges, acted as hairman, and in a brief address congratulated the committee upon the success of the evening, which was apparent from the large number present. The program included solos by Miss Lillian lliott and Messrs. Frank and Edward Webster, as well as addresses by Past Grand Councillor E. T. Essery, Grand Representative A. R. Hazard and J. L. Montreal, Jan. 21. - The spectacle of a man's body lying in the street for an hour and ten minutes before it was removed by the morgue authorities, was witnessed yesterday afternoon by thousands of people, and at one time a band of men threatened to take upon themselves the care of the remains as a protest against hte carelessness of the authorities. The body was that of George Griggley, aged 50, Overdale avenue, who dropped dead. An ambulance was called, but when it was found that the man was dead, those in charge of it refused to take the body. The morgue was at once notified, but was unable to send a sleigh for the remains for over an hour. An enormous crowd collected and the policemen who undertook to guard the body finally removed it to a building to prevent sympathizers taking charge of it.

Among other things which they called upon the Government to do were the requirement of a physician's certificate of physical and mental health from all persons entering upon the married state; the custody of children by the mother wherever there is not good reason against it; wife-beaters to be put to work on prison fares and the profit of their labor to be handed over to their families, and equal civic and electoral

To the first of these Sir James Whitney replied at length, in saying among other things: "I think it is my duty to tell you at once, and it is my very strong opinion after a great deal of consideration, that a remedy cannot be appried in the way you suggest, and I hope you will not press any such crude idea."

City Council Will Ask Dominion Government For Power to Do This at Once.

ALD. RICHTER'S MOTION CARRIED BY ALDERMEN

By This Means the Possibility of Litigation Disappears—City Would Be Sole Owner.

The Dominion Government will be asked to foreclose the mortgage on the London and Port Stanley Railway, and give the city absolute pos-session of it. At the same time, the Legislature will be asked to give the city permission to raise money to equip and operate the road, either by steam or electricity, subject to a vote of the taxpayers. This was the result of the city council's deliberations in the question last evening.

The resolution passed at the Lonon and Port Stanley Board meeting n the morning was presented to the council, recommending that an appli cation be made to the Legislature to raise the money needed to equip and operate the line, either as an electric or a steam line. With it was the petition from over three score leading ousinessmen, asking that no action be taken until expert advice had been obtained on the question of the comparative cost of operation by steam and electricity, and also on the attitude of the M. C. R. and Pere Mar-

Ald. Rose at once moved that the petition be sent to the London and Port Stanley Board.

Difficulty in the Way. "The petition asks for expert ad-vice on certain questions," Ald. Richer pointed out. "There is a great deal of difficulty in the way. The act states that all the moneys received by the London and Port Stanley Board shall be turned over to the city. There is no provision for securing expert advice. Our hands tied in that matter. We cannot secure the information without expense, and the London and Port Stanley Board have not the money. This petition should be sent to No. 1 committee." This petition "There is some doubt as to this," opined Mayor Graham. "There are those who say that we can expend the money. We do expend certain sums for legal fees, etc., and some people think we can do so for expert advice

if we so desire."

Deal With Whole Question. "These expenditures are incident to the collection of the money," Ald. Richter pointed out. "The question of ecuring expert advice is absolutely oreign to this. Now I want to deal with the whole question. The London and Port Stanley Board had a meetng today, going through the forms according to law. But at the same time, London is in rather an unenriable position. Nominally we own e road, because of moneys advanced it and mortgages held. We are in he postion of stockholders, and virtually transact all the business, but at the same time we do not actually own the line. Our position is not very atisfactory to say the least. Grand Trunk holds 50 per cent of the shares, but their representatives no onger attend the meetings of the shareholders. There are many other shares outstanding, but the holders do not attend the meetings. The city handles the whole business in an indirect way. Seeing that we are dealing with it as if it were our own, when really it is not, would it not be better, if we did obtain actual possession of it, and put an end to the present farce of electing directors, etc. and liable at all times for an accounting. The legality of our actions might be questioned at any time, and the possibilities of a big suit are al-

We are mortgagees in possession ways before us. It would be highly preferable to put the city in a position to deal with the road as deemed fit and proper without this present trouble Foreclose the Mortgage. Ald, Richter then introduced a mo-

#### Man's Misery **Promptly Banished** [From "Man's Maladles."]

A certain sort of misery which causes a man to become abject in manner, timid, suspicious and jealous without real warrant, can be readily banished by a systematic nerve treatment which can be followed out in the privacy of home and restoration of a normal or natural condition speedily ensures.

A man feels and knows when he is not getting out of life all with such symptoms as unsteady with such symptoms as unsteady gait, weak voice, downcast eyes, cold extremities, loss of flesh, loss of self-control, lack of self-esteem, pains in the back and back part of head, shooting pains, heart palpitation, nervousness, sleeplessness, hollow eyes, sunken cheeks, colorless lips, dizzi-

ness and trembling.

The requirement to overcome these dreadful symptoms is a restoration of power and restoration of power and strength to the nervous system which has been poorly nourished or abused by thoughtless eating, drinking or social duties, perhaps superinduced by overwork. Keen, strong, sensitive nerves which carry every sensation or emotion to the brain nerves which carry every sensation or emotion to the brain centres of consciousness can and should be the possession of every living individual.
