A woman opened the door. She looked at me, and I looked at her.

"If there is any chance to see her?" My heart was torn...

"This is all there is, this one room."

"My eyes had been looking for a place of refuge, on anything else that I might be connected in—all in vain."

"What's this?" I exclaimed, making a dash for it.

"It's a coffin, was the quick response. But don't be so silly, she cried, you are turning up to the door; get in."

"I had barely time to place myself in the coffin, when she, who had been looking at me with a steady gaze, turned away and closed the door."

"Where's Dick?" "He has not come back yet," returned the woman.

"Oh, no, just Jenny, have you heard a horse go by?"

"Yes, just now. I looked thinking that you might be coming."

"But Bill Wolf must have been of a suspicious nature. I heard him keep from his house. For the life of me I could not help looking up the coffin at a lady's breath, and looking through the chinks."

"I don't tell him 'Nay,' I never said him 'Yes.' I've heard the word say, smiling, 'Oh, that's a woman's way!'"

"I do not know what love is, of which the woman spoke. I know 'tis something serious, a most important thing."

"But I know I'm very happy, just as happy as a bird in June."

"And God grant our lives be always one golden afternoon."

"Among the water lilies I didn't tell him 'Nay,' I never said him 'Yes.' I've heard the word say, smiling, 'Oh, that's a woman's way!'"

"I looked around in despair. To go out was to meet this Dick to stay in, meant discovery probably final."

"I had a minute the cap was emptied of the water, and the water dripped a half-filled with water in the cap as a cover. She had barely re-entered the house when a rattling vehicle drew up at the door, and then from the man who had been looking at me with a steady gaze, turned away and closed the door."

"What's that?" he questioned, and my heart stood still, for I knew he spoke of my retreat.

"It is Dick's coffin," she answered, "Blue Dick left it here for Dick to take over to the cemetery."

"For he told me!" He ought to be here. Are you sure?" "No, I have not got him hitting anywhere?"

"Well, all suspicion, went up to the rain barrel and shook it; there he came to the door and looked in again. Satisfied, he turned away and mounted his horse. The woman watched him go with two countenances, one that said she was glad, the other that said she was sorry."

"What shall I do?" he asked, and my heart stood still, for I knew he spoke of my retreat.

"They will be back in twenty minutes for my horse to take to the stable, and my husband also is likely to come in at any moment."

"I looked around in despair. To go out was to meet this Dick to stay in, meant discovery probably final."

The Weekly Monitor.

WEDNESDAY, OCTOBER 5, 1887.

Bridgetown Court House (?)

HIS HONOR JUDGE BISHOP, HAS WE MUST HAVE A SUITABLE BUILDING.

THE GRAND JURY RECOMMEND IT.

His Lordship in his address to the Grand Jury yesterday morning, at Annapolis, referred in the strongest terms to the very poor accommodations that the Court House of this town afforded the courts. He said that it was a disgrace to the County, and that there was not another town in the whole Province where such a disreputable condition of affairs existed. The law ordered that the court shall be held in both towns, and while that law remains, it is absolutely necessary that a suitable Court House should be provided at Bridgetown. He stated that if the Municipal Council did not give their immediate attention to the matter, the Supreme Court Judge would remove the County, as patience had ceased to be a virtue. He then recommended that the Grand Jury should express some opinion in regard to the matter, which they did to the effect that the Municipal Council should assess the County at once for the amount necessary to erect a proper building.

All the other Supreme Court Judges, who have sat here, have likewise expressed their opinions strongly in favour of the very insufficient accommodations of our Court House. Judge Ritchie has, however, put the matter into a practical shape, and we earnestly trust that His Honor will remove the County, or that the Municipal Council will take the necessary action in the matter without further delay; in fact, we can scarcely see how his body can now do otherwise, in view of what His Honor has said and the action of the Grand Jury. It is certain that the courts are to be held here, and the law provides that there shall be, in the common sense, a suitable accommodation ought to be provided. Bridgetown is the most convenient town in the County, and it is therefore right and proper that one term each of the two Courts should be held here. Furthermore, a town of this size needs a jail—it is a necessity—and if we had one here, considerable expense would be saved to the Municipality, from the necessity there at present exists of removing prisoners and from Annapolis. Now is the time for our citizens to take hold of the matter and push it forward vigorously. Don't let the opportunity slip by.

The recent embargo against Nova Scotia cattle put on by the United States Government at Washington, has caused our provincial authorities to take prompt action in the matter, and it is very probable that in short time the objectionable order will be rescinded. The disease complained of is strictly of a local nature, being confined to Pictou County alone, and no other case has been known to exist in any other part of the Province, and even in the County named only three known cases have appeared this year. The Halifax Chronicle says:—

Professor Lawson, secretary for agriculture, and Mr. Jackson, provincial veterinary surgeon, have been in Pictou County during the last two days, making enquiries as to reported contagious diseases there. It is understood that they have not been able to find the slightest trace of any contagious disease, nor of any cattle disease whatever, beyond the local affection, limited to the neighbourhood of Pictou town and familiarly known as the Pictou cattle disease, which has existed there for forty years, and is very well known from the elaborate investigations of Dr. Thayer, of the United States treasury department, and Dr. McEachern, chief inspector of the Dominion, to be entirely non-contagious, and to have no tendency to spread. It is a summer complaint of a dropical character, attacking cows apparently in the pastures and has been reduced by effective remedial measures that only three cases, all told, have been reported this year. So far as can be ascertained, the reports of any cattle disease of a contagious or suspicious character are entirely without foundation. The preparations for the Pictou exhibition are progressing rapidly, and large numbers of valuable thorough-bred cattle from different parts of the country have been entered for exhibition. If there was the slightest suspicion that any disease of a contagious character existed in the locality it is quite certain that the shrewd farmers and breeders of Pictou county, who have invested many thousands of dollars in thorough-bred animals, would not risk sending their most valuable stock to the fair, unless they expected that the exhibition will be a great success, the only drawback being the non-completion of the new railway line, which it was anticipated would have been open for traffic in time for the exhibition?—

Bishop Perry has, it appears, declined to accept the honor conferred upon him by the Episcopal Synod of this Province. The following is the nature of his refusal, and all we can say is that it is a laudable and noble act on the part of the Bishop, neither the Nova Scotia diocese, nor any other body of the British Church, want any such Bishop. In his letter to the World he commends by denying the "fourth" over once again the war of American independence, terming the patriot who rebelled Lord Howe, and the loyal forces, etc., in a sermon delivered on the 12th of August, in Westminster Abbey, on the occasion of the observance of the consecration of the first British colonial bishop? He then goes on to say:—

"You correspond, among other inaccuracies, was also in error in stating that I had accepted the bishopric of Nova Scotia, to which I was chosen, wholly without my knowledge or consent, the day preceding the delivery of the sermon in the Abbey. I never for a moment entertained the thought of accepting the invitation to Nova Scotia, and directly on receipt of information of my election called the committee of the synod to that effect. I regret exceedingly that a discourse, perfectly innocent of any word or thought foreign to an American of the American, and a life-long Democrat as well, should have been so misquoting and so ungenerously criticised. It so happens that I am, and have been for years, again and again on record in print as well as in fact, and in the United States will, ere long, enter a period of financial panic. Money is held at such a high rate of discount that merchants and manufacturers find it difficult to get sufficient money with which to carry on their business. If this be true, in the light

of the fact, the Government stands in a ridiculous position. Looked up in the treasury chests are millions upon millions of money, for which they are at their wits end to find a legitimate use, while the business men of the country cannot obtain sufficient money to liquidate their liabilities, without paying a ruinous rate of discount, still the Government persists, in its insane policy, to keep the money hoarded in the treasury, and to refuse to meet the enormous debt that has been accumulated. This debt no longer exists and yet the taxes show no signs of being diminished, and the money is being steadily poured in and restrained from circulation. The Government cannot offer to loan the money at a nominal rate of interest as this would bring it into direct and ruinous competition with the banks, and the banks, with the result that the latter would have to succumb.

The Fisheries department of the Dominion Government is doing a good work in propagating fish in the rivers and lakes of this country. An exchange says:—"During the past season upwards of 20,000 fish of every variety taken from the various Government hatcheries have been given to the fishery officers are engaged robbing the parent fish of their spawn. This is done by going on various portions of the Dominion, the salmon being obtained in the West Highlands, River, and other streams. The great lakes are being gradually restocked with white fish, the American Government co-operating in the work. Various kinds of trout, as well as pickerel and bass are also propagated by the Fisheries department. The Federal Lobster Commission has concluded its labors."

The American cup will not go back over the water this year. The recent race, by the ladies of the locality, was a success in every way. The tables were spread in the new hall, now under the name of the Dominion Brass Band, and the course of the race was watched with all manner of good things, which the large number of spectators, and the presence of the Dominion Brass Band was present and added much to the enjoyment of the occasion. The following barriers are present: G. W. Harrington, Q. C.; W. McColly, Q. C.; and W. Bligny. The first race for trial in Chesley, assigned, by P. Bennett, Nov. 10, on Chesley race track, with Ritchie and Ritchie for pit. Owen and McCoy for defeat.

The Tea-Meeting held at Brookings last week, by the ladies of the locality, was a success in every way. The tables were spread in the new hall, now under the name of the Dominion Brass Band, and the course of the race was watched with all manner of good things, which the large number of spectators, and the presence of the Dominion Brass Band was present and added much to the enjoyment of the occasion. The following barriers are present: G. W. Harrington, Q. C.; W. McColly, Q. C.; and W. Bligny. The first race for trial in Chesley, assigned, by P. Bennett, Nov. 10, on Chesley race track, with Ritchie and Ritchie for pit. Owen and McCoy for defeat.

The source of the dense smoke that enveloped the country last week was the most curious one that has been reported. It was a fire in the Upper Province, which proceeded from the burning of a large quantity of the Dominion Brass Band, which was present and added much to the enjoyment of the occasion. The following barriers are present: G. W. Harrington, Q. C.; W. McColly, Q. C.; and W. Bligny. The first race for trial in Chesley, assigned, by P. Bennett, Nov. 10, on Chesley race track, with Ritchie and Ritchie for pit. Owen and McCoy for defeat.

Local and Other Matter.

Digby is to have a French page with Mr. Landry as editor.

Elaborate Patterns in Tapestry, Union and Wool Carpets, at Randolph's.

Sobr. A. M. Holt, Covert, cleared for St. John yesterday.

About 6000 feet of water pipes have been laid to date. The reservoir is about completed.

Fresh Pork at Samuel Fitz-Randolph's Provision Store, Thursday and Friday.

Mrs. Hamilton has sold her residence to Mrs. Call, of Boston, a sister of Mrs. Edmund Best, of this town.

Mr. Geo. Sands, formerly of this town, now of Montreal, N. B., is visiting relatives in this town.

The Yarmouth arrived at Boston in 17 hours, and full of passengers. This is a short sea voyage and has been so apparently to the comfort of the passengers.

Messrs. Woodbury of Halifax, have purchased 40 acres of cranberry bog near Kingsport Station and intend to raise cranberries on an extensive scale. Five acres will be ready for next spring.

Our Oxidized Bar and Hair Pins are warranted articles; and, judging from the number already disposed of, we have struck the right pattern, as well as the right price.

Our subscribers can greatly aid us by calling the attention of their neighbors to the offer we make to new subscribers in another column.

Mr. Wm. Banks, of Port Louis, whose barn and stock were destroyed by fire a short time ago, informs us that he is unable to obtain his insurance upon the same.

The Reserve Kettles and other useful household articles, now offered in the Payson Store, by McCormick & Bath, are merited; with a ready sale. An inspection is invited.

A new manufacturing company has been formed at Lawrenceton and commenced operations, buying out the John A. Brown company.

A Good Year.—From 10 Greenstein trees, set out 17 years ago, Grand D. More, of New York, has received 90 barrels of shipping apples this season.

Don't forget the offer to new subscribers in another column. For 20 cents we will send the Monitor to you every year. Try the Monitor for this year.

Mr. Geo. Ruffin has sold his French stallion, Duke de Chartres, to Mr. Alex. Cochrane, of Newport, Hants Co., for \$1500. Mr. Ruffin has written to the States for another horse of the same breed.

Rev. R. A. Heath, curate of the parish of Annapolis, has been appointed rector of Ship Harbor, N. S. Mr. Heath is an excellent preacher and much liked in the community, which will regret his departure.

The corner property, known as Banker's Hotel, Bridgetown, will be sold at Public Auction, on Saturday, Oct. 8th, at 2 o'clock p. m. Inquire of J. G. B. Parter, Dr. F. Primrose, Possession 1st May, 1888.

BRIDGETOWN CENTRAL.—The Bridgetown Cemetery Committee have decided to expend quite a large amount of money in beautifying and laying out walks, etc., in the cemetery. Mr. Calvin Raymond has the work in charge and will undoubtedly make a thorough and complete job of it. We will have something more to say in the matter shortly.

Advices from New York quote "Hard" Oct advanced 20 per cent. per ton, on 1st October, and prospect of a further advance immediately. The cargo rate on the New York to New York route, New York to New York, was 100 cents, and the cargo rate on the New York to New York route, New York to New York, was 100 cents.

A Montreal traveller, for a boat and shoe firm, named Peter Mullary, died in Halifax last week from the effects of a drunken spree. He was found very sick in an upper Water Street, and taken to the hospital, where he died shortly after. His wife accompanied him to Halifax but he left her at the hotel, and she never saw him after until she saw him dying at the hospital. She was almost crazed with grief.

A band of gypsies have been in the town during the last day or two.

J. W. Beckwith's large stock of Boots and Shoes have arrived. An inspection will convince that quality and value cannot be excelled.

Hon. Mr. McLain, post master of Canada, has resigned his seat for Colchester, on account of libelous charges. Sir Charles Tupper, against whom a suit was also pending, has resigned without notice.

T. G. Bishop will pay the highest market prices for any amount of Good Butter, Eggs, etc.

The eastern part of the Province has been warmer lately, and agrees with a general forecast made to us recently by Dr. Samuel Primrose, of Lawrenceton, who said that when the sun "crossed the line," we should find a marked change in the direction of the wind and in the atmosphere.

T. G. Bishop is opening a large stock of Fancy and Staple Goods this week at very low prices.

Mr. Richard Bay, of Granville, showed us on Monday last some of the largest cucumbers he has ever seen. They were 18 and 17 inches long respectively, and the largest weighed 1 1/2 lbs.

To arrive at Annapolis, per sch. Isaac Burpee, from New York, a cargo of Hard Coal, nut and soft size. This S. Yarmouth.

Court met at Annapolis yesterday morning, Judge Ritchie presiding. In addition to the usual cases, the following barristers are present: G. W. Harrington, Q. C.; W. McColly, Q. C.; and W. Bligny.

The first race for trial in Chesley, assigned, by P. Bennett, Nov. 10, on Chesley race track, with Ritchie and Ritchie for pit. Owen and McCoy for defeat.

The Tea-Meeting held at Brookings last week, by the ladies of the locality, was a success in every way. The tables were spread in the new hall, now under the name of the Dominion Brass Band, and the course of the race was watched with all manner of good things, which the large number of spectators, and the presence of the Dominion Brass Band was present and added much to the enjoyment of the occasion.

The source of the dense smoke that enveloped the country last week was the most curious one that has been reported. It was a fire in the Upper Province, which proceeded from the burning of a large quantity of the Dominion Brass Band, which was present and added much to the enjoyment of the occasion.

The claim for lost damages, made by Mr. Charles Ritchie, of Annapolis, from the water commissioners of this town, was referred to arbitration, as it could not be settled satisfactorily by all parties concerned in any other way.

Mr. David Bath was chosen by Mr. Ritchie as the arbitrator in the above case, and these two selected Mr. T. G. Bishop, of Yarmouth, to act as umpire. They met last week and regarded Mr. Marshall the sum of \$1000.

Orders to New Subscribers.—As an inducement to new subscribers, we will offer the Monitor from now until the end of the year, at the rate of 10 cents per copy, in advance. Friends of the Monitor can greatly help us by calling the attention of their neighbors to the offer we make to new subscribers in another column.

An incident in the States can help us materially by sending us names of their friends who they might think would subscribe for the year, and pay cash in advance.

An incident in the States can help us materially by sending us names of their friends who they might think would subscribe for the year, and pay cash in advance.

The source of the dense smoke that enveloped the country last week was the most curious one that has been reported. It was a fire in the Upper Province, which proceeded from the burning of a large quantity of the Dominion Brass Band, which was present and added much to the enjoyment of the occasion.

KINGS AND HANTS EXHIBITION.

We have been furnished the following notes in regard to the exhibition: On Tuesday, at 2 o'clock p. m., His Honor, the Lieut. Governor, formally opened the Exhibition, and was accompanied by the Hon. Mr. Ritchie, who was escorted to the Band stand by the Warden of the Municipality, Dr. Gossip, and the Executive Committee. The Warden made a short address and then introduced the Lieut. Governor, who made a short and appropriate speech, congratulating the members of the Executive Committee upon their zeal in getting up the exhibition. Great good had been done by the Provincial Exhibition, and he was glad to see the Kings and Hants Exhibition recently held in London. Said that Windsor was his native place, and that he always had a feeling of pride in the place of his nativity and an interest in its welfare. He closed his address by saying that he took great pleasure in declaring the exhibition open, and hoped it would be a success.

There was the largest and finest exhibition of horses ever shown in the Province, and our visitors were more than delighted to see the Percheron horse, Duke de Chartres, exhibited by Mr. Ritchie, post master of Annapolis, which he obtained some price. While, of course, it is not courteous to question the judgment of the judges, we may think the Duke should have taken first prize. Mr. Ritchie took first prize on the Percheron colt "Success," bred by Nichols, out of Dolly. There was a fair show of horses of all kinds. In fact, there were 637 horses of all breeds, representing the different parts of the Province, and one by Annapolis, (W. McNeil, of Melvern, who also took first prize on the Percheron colt "Success," bred by Nichols, out of Dolly. There was a fair show of horses of all kinds. In fact, there were 637 horses of all breeds, representing the different parts of the Province, and one by Annapolis, (W. McNeil, of Melvern, who also took first prize on the Percheron colt "Success," bred by Nichols, out of Dolly. There was a fair show of horses of all kinds. General News.

—Potter's Lintment, for sale at Falmouth.

—The Seavey's East India Lintment.

—Ottawa, Sept. 15.—Upwards of thirty millions of young fish of every variety have been taken from the Dominion hatcheries and sent to the various parts of the Dominion during the past season.

—I have taken, within the past year, several bottles of Ayer's Sarsaparilla, and find it decidedly adapted to the needs of an impoverished system. I am convinced that this preparation, as a blood purifier, is unequalled.

—C. O. Dana, Pastor of Congregational church, Andover, Mass.

—Congressional Casualties.—New York, Sept. 30.—The figures for the third quarter of 1887, reported by E. O. Dunn & Co., and J. Russell & Co., number 1938 in the United States, and 308 in Canada, as against 1932 in the United States for the third quarter of 1886, and 288 in Canada. An increase is reported in liabilities in the United States of \$79,024,856, as against \$77,227,830 for the same quarter of last year, and in Canada \$2,990,550, as against \$1,911,213 last year.

—The Panama Congress.—Washington, Sept. 30.—The president has invited William H. Putnam, of Michigan, and President James B. Angell, of Michigan, to meet with the secretary of state in negotiating with Great Britain for a settlement of the Canadian fisheries dispute. Both have accepted. Putnam has been United States agent for the last two years in connection with the fisheries dispute. Angell has been one of the commissioners by whom the latest treaty with China was negotiated.

—Incident on a Sea Steamer.—The *Meredith Industrial News* says that the steamer *Mermaid* of a sea voyage is now being exhibited at Falmouth, Portland harbor, by W. H. Ordway. His assistant was captured on the banks of Newfoundland on Oct. 11th, 1886, by Capt. F. P. Barnard, of the schooner *Hattie F. Walker*, Halifax. His length was 47 feet, 7 inches, and his weight 900 lbs. His mouth contains a fine set of teeth, and on the upper jaw are two fangs, each 13 inches long. The flesh back of his head are thicker on each side, and the end of each is formed like a scimitar, being flat and 8 inches wide at the end.

—Halifax Market.—The following quotations are dated Sept. 28th, and are furnished by Messrs. Mumford Bros., Agents, 25, Battery, Halifax, N. S.: Butter, choice dairy, 19 to 20; butter in boxes, per lb., 18 to 19; eggs per doz., 17; lard and bacon, per lb., 8 to 9; beef, quarters, 8 to 9; hog, dressed, per lb., 7 to 8; mutton, per lb., 6 to 7; corn, 5 to 6; wheat, per lb., 4 to 5; flour, 25 to 30; potatoes, 10 to 12; apples, 10 to 12; dried apples, per lb., 5 to 6; turkeys, 10 to 12; geese, 10 to 12; chickens, 10 to 12.

—A Sea Bury.—The *Halifax* reports, St. John's, Nfld., that a sea bury, Margaret Blackbird, was a little over 4 years old, she weighed 140 lbs., her length was 40 inches in circumference, her shoulders measure all around 40 inches, the girth of her chest 18 inches, neck 14 inches. She is healthy, lively, and quite proportioned, features pleasing, head and face large and well shaped, the color of her skin is a rich brown. She should be a poor fisherman from White Bay, a fisherman, not over 150 pounds, and the mother is under the middle size. They have another baby 7 months old, who is even larger and fatter. In preparation to lose, she has Margaret. The latter was one of twins; the other died. The parents are content.

—The marvelous cheapness of electric lighting under conditions where water power can be obtained without much expense is shown by the annual report of the Bates Cotton mill in Lewiston. The incandescent electric lights are remarkably well adapted to the use of the weaver, for whose work the known oil lamp cannot be used at all. In the Bates mill are 468 incandescent lamps, two-thirds of which run all day while the rest of them run a large portion of the day. After charging 10 per cent. for depreciation of apparatus at the dynamo the total expense of using these lights, including taxes, etc., was only \$25.24 per month, or between 5 and 6 cents a month for each lamp. Of course the expense of the power is not reckoned here, because the Bates mill supplies the power from its own wheels.

—Terrible Shooting Accident.—St. John, Nfld.—News reached the city to-day of a terrible shooting accident at St. John's, Nfld., which a prominent sportsman, Alex. Hodge, lost his life. On Saturday morning, accompanied by his nine-year-old son, he went shooting. When a mile from his home he rested his gun on a log, and reached for some gum on a tree. As he did so, the gun fell, and he was unable to reach the gun, he caught the trigger and came out of his hand. He rose and fell several times, till he felt the terrible boy, whose hair had been slipped by the discharge of the piece, and fell by his mother. The boy lost his way and was two hours reaching home and was unable to guide the neighbors to his father. His means were heard by a neighbor and who saw a terrible shot when they reached him. For yards around the ground was torn up, and his engine would have been hurled in his body. He was borne home, where he died immediately.

—An electrician of New York at present a visitor in the French Capital—recounts the strange story of a creature, Frenchman this system for putting condemned criminals to death, which are, he says, being studied in his own country, and one of which, he believes, will shortly be selected for carrying out the death sentence. The first consists of a copper bandage placed round the criminal's head in such a manner that a magnetic pole presses closely on the nose of the neck. The patient stands on a large pile of planks, his hands being tied behind his back. A second pole is attached to the spine of the criminal, and at the right moment the signal is given, the discharge takes place, death being instantaneous. M. Babcock has invented a more comfortable plan, his notion being to place the condemned man in an easy chair, with his feet on the end of the *fauteuil*, and his feet touching the zinc platform. A stop job pressed, the electric current strikes the man by his two elbows and by his feet, and in half a second all is over. A third system has been devised by another electrician which differs in no material way from the first mentioned, and certain American legislators are, it appears, carefully examining the three with the object of deciding in favor of that which will ensure the quickest and most painless death.

—Electrical News.

—LONT is that cold of yours this on. You think it is a light thing. But it may kill later. Or into pneumonia. Or consumption.

—Cancer is disgusting. Pneumonia is dangerous. Consumption is death itself. The breathing apparatus must be kept healthy and clear of all obstructions and offensive matter. Otherwise there is trouble ahead.

—All the diseases of these parts, head, nose, throat, lungs, chest and lungs, can be delicately and entirely cured by the use of Roche's German Syrup. If you don't know this already, thousands and thousands of people can tell you. They have been cured by it, and know how it is, themselves. Bottle only 75 cents. Ask any druggist.

—W. A. Dinwiddie, the millionaire banker of New York, has had his wife's features carved in a marble pipe and his own in another. The work has been done very artistically. Each pipe cost \$10,000.

—Many of the worst attacks of cholera morosa, enteric dysentery, and other conditions, are caused by the use of impure water. The most effective and prompt means must be used to combat their dire effects. Dr. Fowler's Great Peppermint Cure is the remedy. Keep this hand for emergency. It never fails to cure or relieve.

—For sale at Falmouth.

Literary Notices.

—We have received from Messrs. Rand, McNally & Co., of Chicago and New York, a very handy indexed map of Nova Scotia, New Brunswick and Prince Edward Island, showing the railroads and express companies doing business over each. It is most convenient for reference, as the location of towns, islands, lakes, rivers, ponds, hills, etc., can be easily and quickly ascertained. Price only 25 cents. It ships will permit of its being carried in the pocket.

—The American edition of the *London Illustrated News* is published a \$4 per year in advance. It is published weekly in New York where published in London. At \$4 per year it is the cheapest and most interesting periodical extant. Those who wish to obtain specimens can do so by remitting 10 cents to the address of the *London Illustrated News*, 257, Strand, London, W. C.

—In the fore-front of the October *Wide Awake* is tale of adventure, shipwreck, smuggling and piracy, the hero being a boy full of Robbin Hood, Crusoe—a real boy—so be says—and the boy is Maurice Thompson who writes for the *Wide Awake*.

—Charles Egbert Crockett's story comes to an end, and Little Nell's "Jerry" begins in the August number.

—The *Canfield Bear Story* is very short, but the waste is; and the bear goes away!

—A series of papers telling how banking is done take the banker to Europe in search of railway capital.

—The President of Wellesley College late day resigned, who though a Miss still undividedly has been one of the most efficient of college presidents, is the subject of a biographical sketch with a portrait.

—In contrast with the great success of the *Sports and Games of Animals* by C. F. Holder.

—He has been enough to justify every reader's interest in the *London Illustrated News*, Boston, for a specimen copy of *Wide Awake*.

—The *Carver's son* by Mr. Crockett, the *October* *Carver's son*, an engraving of the portrait of Harris Beecher Snow, engraved by T. Johnson from a photograph by Mrs. L. Allen, entitled "Mrs. Snow's Uncle Tom's Home in Kentucky."

—The paper in the series on "English Cathedralism" in this month devoted to the cathedral which is called by Mrs. Brewster, the greatest queen of the firm lands.

Correspondence.

—We do not hold ourselves responsible for the opinions of our correspondents.

(For the Monitor.)

—I was considerably amused on perusing the letter to the *Monitor*, signed "The Editor." The writer must have been in the stomach if we judge by the accompanying attempts he has made at criticism. His style suggests cholera infantum. Before the letter was sent to the printer, Mr. Moore, he had better go to Boston and get a bottle of Mrs. Winslow's Soothing Syrup for Children.

—I cannot think there is a man in the country who has done more for the cause of the Commercial Union in "Q's" letter. When a man attempts to attack another in the press, he should be prepared with arguments and facts and not try to outwrestle or defeat opponents by misrepresentation and a sorry attempt at ridicule. About the funniest part of the letter is that "Q" says he does not know what Commercial Union is, and yet he has written a leading article in the *Monitor* (no thanks) to it.

—"Q" says "I'm not prepared to wait for all, but Commercial Union." Now let me tell him that we do not wait, we wait until we have a boy full of Robbin Hood, Crusoe—a real boy—so be says—and the boy is Maurice Thompson who writes for the *Wide Awake*.

—Charles Egbert Crockett's story comes to an end, and Little Nell's "Jerry" begins in the August number.

The Liability of Railroad Companies.

A common carrier of passengers, with their baggage, assumes as to the passengers two distinct degrees of responsibility: as to their persons and as to their baggage. Before the introduction of railroads the passenger by land traveled almost exclusively by stage-coach, the Supreme Court of Massachusetts laid down a general rule: "That carriers of passengers for hire are bound to use the most care and diligence in the providing of safe, sufficient and suitable coaches, horses, and coaches, in order to prevent those injuries which human care and foresight can guard against." Since railroads have come to be the principal means of travel in Europe and America, and at a rate of speed never dreamed of when stage-coaches were so universal in use, the courts both in England and the United States have given the general rule a broader and more stringent application. Some years ago an accident happened to a train through the breaking of an axle and a number of passengers were injured. Suit was brought against the railroad company for damages. The company showed that the axle was made by a manufacturer of axles, and that the axle was carefully examined by an agent of the company, both with respect to its material and its workmanship, and that it was found to be perfectly good. The company was held liable for the damages. The court said that the railroad company was responsible for the safety of its passengers, and that it was bound to use the most care and diligence in the providing of safe, sufficient and suitable coaches, horses, and coaches, in order to prevent those injuries which human care and foresight can guard against. The court said that the railroad company was liable for the damages, and that it was bound to use the most care and diligence in the providing of safe, sufficient and suitable coaches, horses, and coaches, in order to prevent those injuries which human care and foresight can guard against.

—The Seavey's East India Lintment.

—We are informed that a dog belonging to Smith Lintime, who works on Mr. Charles Baggie's farm, Paradise, caught a fox and killed him one day last week. Smith was in the pasture looking for the fox when he came suddenly upon Baggie and his dog caught him before he could make off.

—A SEVERE ATTACK.—I never felt better in my life than I have since taking Burdock Blood Bitters. I had a severe attack; I could not get up for several days, and was unable to work. One bottle cured me." John M. Richards, St. Tam, Ont. For all bilious troubles use B. B.

Miscellaneous.

Mr. and Mrs. Blomson and Wife. A FETTERED WHO CURE I HAD BEEN PRESCRIBING WOOLLEN UNDERWEAR.

The biggest practical joke that has long been perpetrated on the public for a long time was that carried out by two dandies who worked the northern country as South and detached in the west.

The bride has an enormous white veil, has her hair mangled (over), has a dress of an out-of-date black and white check, has a 222 star of the same material on her breast, and also of the same pattern upon each side of her head, and the groom wears another of identical build and dimensions upon his breast.

At the hotel the presumably blushing bride was persuaded to register their names, which she did without registering her gaudy veil or removing her white cotton gloves, the inscription being as follows: "Mr. and Mrs. Blomson and wife, Oct. 5, 1887."

At the hotel the presumably blushing bride was persuaded to register their names, which she did without registering her gaudy veil or removing her white cotton gloves, the inscription being as follows: "Mr. and Mrs. Blomson and wife, Oct. 5, 1887."

Your Children

Are constantly exposed to danger from Croup, Whooping Cough, Croup, and disease peculiar to the throat and lungs. For such ailments, Ayer's Cherry Cough Cure, promptly administered, affords speedy relief and cure.

As a remedy for Whooping Cough, with which many of our children were afflicted, we used, during the past winter, with much satisfaction, Ayer's Cherry Cough Cure. For this affection, we consider the preparation the most efficacious of all the medicines which have come to our notice.

My children have been peculiarly subject to attacks of Croup, and I failed to find any effective remedy until I commenced administering Ayer's Cherry Cough Cure. This preparation relieves the difficulty of breathing and invariably cures the complacent cough attacks.

I have used Ayer's Cherry Cough Cure in my family for many years, and have found it to be a most reliable remedy for Whooping Cough. This medicine always allays irritation, prevents inflammation from extending to the lungs, and cures the disease in its early stages.

I find no medicine so effective, for Croup, Whooping Cough, and all the ailments of the throat and lungs, as Ayer's Cherry Cough Cure. It was the means of saving the lives of my children, and I can truly say, with a good conscience, that it has saved many a life.

Ayer's Cherry Cough Cure, Prepared by Dr. J.C. Ayer & Co., Lowell, Mass. Sold by all Druggists. Price 25 cents per bottle.

Another Large Importation of English Worsteded, TWEEDS, English WORSTEDS, Just received at the BRIDGE TOWN STORE.

The American Tailor, W. D. SHEEHAN, HAS opened an establishment next door to the American Office, and is prepared to do all the latest styles and as good as any.
