EDITORIAL NOTES.

THE INHERITANCE OF EMPIRE.

Natal Advertiser: The Empire, most of all, was bequeathed by men who had no mass votes behind them to uphold their hands when weariness overtook them. It was bought by the blood of men working sometimes in twos and threes, sometimes working single-handed, without thought of hope of reward or understanding. It was won by great souled creatures who put self and aith and race foremost, and who mostly died before their dreams were half accomplished. It was hammered out of the rock, hewn into rough shape, and then chiselled into imperfect form by tollers who steadfastly believed those who came after them would not only cherish but complete the inheritance passed on to them. A democracy born yesterday finds itself in possession of estates won, planted and cultivated by centuries of sacrifice. And what is that democracy going to do with them? Is it going to worry about them at all? Or is it going merely to think how it can fatten on the capital assets, till the world estates over which the flag flies are drained dry or dissipated away like a profligate's patrimony?

TYPHOON.

Springfield Republican: From the Japanese point of view the present issue is grave enough to justify Ambassador Hanibara's warning to our Government despite the technical error in phrasing which made it susceptible of being interpreted as a threat. That the hard-boiled treatment by Congress of so delicate a matter has contributed to the turmoil in the Far East is obvious, and this result is the more unfortunate because collaboration between the United States and Japan is essential to the fruition of American policies in that part of the world and is a logical next step after the abrogation of the Anglo-Japanese Treaty. The Japanese Government still declares itself in favor of co-operation with the United States, but this is obviously made far more difficult by the intense bitterness of Japanese feeling which has needlessly been provoked.

THE GOLDEN ROAD.

Chicago Tribune: Though it is natural for each of us to want as much as any one else has, the way to more for each of us is the way to more for all of us; that is, to increased production of wealth. Measures of forced equalization which check production may bring us nearer to equality, but it will be an equality on a much lower plane than we can all attain if the processes of production are stimulated and the store of total wealth enlarged. We must constantly work for equity in the reward of all human effort. But equality is not equity, nor can it sustain progress. A fair and therefore a wide distribution of wealth is an ideal we ought all to strive to bring about. But the production of wealth is of far greater importance to progress and the welfare of the mass of mankind than any re-arrangement of its distribution. It is in denying or ignoring this basic truth that the radical is in effect the worst of reactionaries.

"HELPLESS FEMALES"

London Daily News: Professor Winifred Cullis hurled a large sized bomb into the midst of the National Council of Women when she admitted that even now, when the emancipation of women in this country is a well accomplished fact, she finds it necessary on occasions to "pose as a helpless female." To suppose that, with the vote, co-educational education and her new spirit of self-reliance and personal independence, Eve has thrown off entirely all the ingenious wiles not peculiar to her sex is to imagine a vain thing. After all, it should be remembered that men, who have asserted an authoritative independence since the beginning of time, have always made use of the subsidiary advantages of their sex virtues and weaknesses to maintain their dubious ascendancy. Women will assuredly continue to do the same, though probably with greater cunning and a wiser caution. If the "helpless female" idea is now completely abandoned, how is one to explain the astounding popularity of novels of the Sheik-in-the-Desert type, unless by the assumption that only men read them?

SOCIETY AND SELF-PRESERVATION.

London Daily Chronicle: It is not the function of the scientist, as scientist, or the soldier, as soldier, either to make peace or to make war. The function of the soldier is to be prepared to fight; that of the scientific inventor is to invent. It is the duty of society, and of all individuals in their social capacity, to make peace and provide the conditions for it. But if society is bent on war, or if part of society compels another part to protect itself by war, then the soldier must fight as hard as he can, and the inventor must invent weapons as destructive as possible. Society cannot escape responsibility for its own deeds by blaming scientists.

AIR COMMUNICATIONS.

Detroit Free Press: The importance of an air army in the British Imperial defence system is obvious, for fast planes, starting from London, could reach the outskirts of India in less than twenty-four hours, the distance from the British capital to the westernmost borderland of India being approximately that between New York and San Francisco. The fact that Lieutenant Maughan brings Pernambuco, Brazil, now a seven days' sea voyage from New York, potentially within two-four hours from the American metropolis by air. It means that mail, loaded on a plane in London at dawn, can be delivered in the innermost jungleland of Africa before the day is out.

AMERICA ASLEEP, AUSTRALIA AWAKE.

Adelaide Chronicle: One of the reasons assigned for the reluctance of the Americans to involve themselves in "foreign entanglements" is their consciousness of how little they know about world affairs. . . . The Americans, in their self-absorption, may plead the obligations devolving on the countries that are. As Australians form part of an Empire that may be said to constitute the backbone of the League, they cannot afford to live, like the inhabitants of the Trans-Pacific Lotusland.

PRINCE AND PIONEER.

Philadelphia Ledger: The Prince of Wales, whose comings and goings are popularly followed in America, says he will visit his Alberta ranch in the fall. He finds there a chance to forget brides and thrones; he can plant potatoes and pitch hay beneath the pleasing fiction of his incognito like any hired man on the pay-roll. And evidently he intends to continue committing overseas till his roving commission expires and he is compelled reluctantly to don the regalia of monarchy. In that day one can imagine how he will head the call of the wild and long to shed the pomp and circumstance wherewith royal rank has invested him for the green wheat sprouting from black loam and the trail of the sturdy cattle roaming his hill ranges.

SPEECH AND SLANG.

London Morning Post: It is unfortunately true that Gresham's Law applies to speech not less than to coinage—the bad currency tends to drive the good out of circulation. Instead of the example of the better educated and trained prevailing with the others, it is the other way about, and what is at first, with them no more than facetious imitation, grows into a settled habit. The present age dislikes formality of all things else. It has discarded the frock-coat and the top-hat, and feels in refuge in the lounge-suit and the trolley; but it is possible to be informal without being slovenly. Our English tongue is worth some effort to preserve it in the honorable estate—to keep it from sinking into dilapidation, with its fences broken and its pastures untended.

Here and There

Although it is only 18 years ago that Alberta became a province, its population has increased fourfold, while the grain yield has increased twentyfold. Even at the present low prices, the total agricultural products of Alberta in 1923 were worth \$223,000,000.

Reports concerning the apple crop in the Annapolis Valley show that the entire crop, including the estimated local consumption, was 1,216,000 barrels. It is reported that 70,000 apple trees and 3,000 plum trees will be set out in the valley this spring.

The railways of Canada up to the end of last April earned \$6,000,000 more than they did for the corresponding period in 1923. This favorable result is due entirely to the fact that the people have been doing more business. All authorities are agreed that such a condition means growing trade.

Nearly 68,000 bushels of high class seed were handled at the Alberta government seed-cleaning plant during the past season. A total of 22,523 bushels of Manitoba wheat seed was handled, 3,160 bushels of rye wheat, 23,078 bushels of Victory oats, 17,962 bushels of Banner oats, and 684 bushels of Bark's Barley.

Three prizes for angling at the bungalow camps on French River, Nipigon River, and the Lake of the Woods, have been offered by the Canadian Pacific Railway. The trophies are silver replicas of the bass and the trout, and a wonderful reproduction of the head of a fighting muskellonge.

Among the speeches to address the great convention of the Associated Advertising Clubs of the World at London, England, to be held July 14-17, will be E. W. Beatty, J.C., Chairman and President of the Canadian Pacific Railway. Mr. Beatty will speak on July 17, and has chosen as his theme "Building an Empire with Advertising."

Canada's national wealth in 1921 was \$22,195,000,000, according to a report just issued by the Dominion Bureau of Statistics. In the tabulation, agricultural wealth comes first with \$7,982,871,126, nearly 36 per cent of the total and about 60 per cent of the non-mineral wealth. The Western provinces lead, the Yukon topping the list with \$4,058. The first in absolute wealth was Ontario, which is credited with \$2,828,000,000, or thirty-three per cent of the Dominion total.

Shipping in and out of the port of Vancouver, B.C., for the calendar year 1923, showed an increase in all departments, according to the annual report of the Board of Harbor Commissioners. Over 1,000,000 worth of goods were exported, an increase of 200,000,000 over the value of the 1922 exports, while the imports totalled \$224,000,000, an increase of \$13,000,000 over the 1922 figures. Vessels numbering 19,605, representing a total of 8,271,583 net tons, entered and left the port in 1923, an increase over 1922 of 2,800 ships and 702,250 tons.

A party of 200 Canadian Weekly Newspaper Editors and their wives sailed for Europe on the 11th aboard the Canadian Pacific steamship "Melita." The party will visit the battle-fields of France and Belgium, seeing most important points in those countries, including Brussels and Paris and will be received by King Albert. Later, they will tour England and Scotland and are to be presented to the King and Queen at Buckingham Palace on Dominion Day. Returning on the Canadian Pacific steamship "Montserrat," they will visit Belfast where Sir Robert Baird, head of the Belfast Telegraph, will entertain them. They dock at Quebec on August 4th.

THE CHARGE OF THE LIGHT (HEADED) BRIGADE.

The Toronto Globe published the following "with apologies to Tennyson, Longfellow, Shakespeare, Billy Sunday, Mackenzie King and all the other notable poets in our class."

Bobbed hair to the right of us,
Bobbed hair to the left of us,
Bobbed hair behind us,
Tresses assundered.
Some with a heavy crop,
Some with a light crop,
Into the barber shop,
Walked the six hundred.

Women of high degree,
Women of past fifty-three,
Determined that they shall be,
One of the six hundred,
Girls not yet out of 'teens,
Girls who that age have seen,
Joined the bobbed hundreds.

Women of every class,
Mother, daughter, little lass,
Sweetheart, sister, join the mass,
Of the bobbed hair throng.
Clerk, stenographer, hello girl,
Everyone caught in the whirl,
No longer wear their hair long.

Some with bangs, and some without,
Some are shingled round about,
Some in curls, and some in doubt,
In case they may have blundered,
Some of them do look real swell,
Some of them do look like well,
It's sometimes just not well to tell,
How looks the bobbed six hundred.

For Soke Feet—Minard's Liniment.

FREED OF RHEUMATISM BY FRUIT TREATMENT.

"Be good enough to publish for the information of Rheumatism sufferers how 'Fruit-a-tives' relieved my Rheumatism which had at least five years' standing.
"The trouble was in my right hip and shoulder, the pain almost unendurable. This kept up until I started to take 'Fruit-a-tives'. After a continuous treatment for about six months, I am now in first-class condition. This, I attribute to my persistent use of 'Fruit-a-tives'.
"This is the letter which Mr. James Dobson of Bronte, Ont., wrote after trying the wonderful Fruit Treatment—'Fruit-a-tives'—which consists of intensified fruit juices combined with tonic.
"If you suffer with Rheumatism, 'Fruit-a-tives' will make you well and keep you well.
"25c. and 50c. a box—at dealers or sent by 'Fruit-a-tives' Limited, Ottawa, Ont."

KIPLING'S MEMORIAL VERSE.

The town of Sault Ste. Marie, Ontario, erected a beautiful memorial to the 350 men from the town who lost their lives in the World War. The citizens asked Rudyard Kipling to write the inscription. He complied and sent the following verse, which is inscribed on the monument:
From little towns in a far land we came,
To save our honor and a world aflame;
By little towns, in a far land, we sleep,
And trust those things we won to you to keep.

519 FOR "C" STUDENT.

Graville Ferry—Those successful in obtaining "C" certificates in the recent Provincial examinations were Frances Bent, Frances Hardy, Gladys Gilliat and Albert Baltzer from here and Lucy Armstrong, of Stoney Beach. Frances Bent made 519 on seven subjects, her highest mark being 100 and her lowest 60.

Save Your Hair!

Rub the scalp with Minard's. It removes dandruff and stops the hair from falling out.

Here and There

For the first time in Ontario, an attempt will be made this spring to organize a voluntary egg pool. Arrangements for the undertaking have been completed by the United Farmers Co-operative Company, and it is hoped to control absolutely the egg market in the province.

During the year 1923, 3,380 tourist automobiles entered the province of Nova Scotia, the Land of Evangeline, according to the annual report of the Nova Scotia Tourist Commission. Altogether 63,000 tourists visited the province and distributed a sum estimated at \$6,000,000.

A picked detachment of an officer and ten men of the Royal Canadian Mounted Police recently crossed the Atlantic on the Canadian Pacific liner Melita. Their duty will be to guard the Canadian exhibits at the British Empire Exhibition. The Exhibition and buildings cost about \$200,000,000.

A chain of factories stretching across Canada will be established by the Dominion Tar and Paper Company, sponsored by English interests. This was announced by the Earl of Dunsmore, V.C., and Sir Harold Bolton after a recent visit to Canada. Sites have already been secured in Montreal, Winnipeg, Vancouver and Toronto.

Canada's trade balance is being steadily maintained, for, according to the February returns, just issued, the imports for that month, which totalled \$62,123,822, showed a decrease of \$3,172,814, from the same month last year, while the reports for February this year, totalling \$67,746,543, showed an increase of \$9,612,822.

Hon. George H. Henry, Ontario minister of public works and highways, has announced a change in the method of financing the planting of trees along public highways. Instead of sending out its own workmen, he says, the Government has a scheme whereby farmers planting trees in front of their own property will be bonus so much per tree for planting.

Over \$1,000 has been paid by the Province of New Brunswick in wild cat bounties since the commencement of the present fiscal year. Already approximately 400 claims for the \$2 for each animal have been handled by the chief game warden's branch of the Department of Lands and Forests, as compared with the 51 claims made in 1923, following the bounty offer passed by the legislature in that year.

The splendid success attained by irrigators in Alberta is evidenced by the last financial statement of the Taber Irrigation District. The report reveals a total surplus collectable or on hand of \$80,000, of which \$7,000 is on deposit in the bank. Operations have been so satisfactory that negotiations have been entered into with the Canadian Pacific Railway to set up a sinking fund of \$3,000,000 to relegate bonds of the district held by the railway. In this way it is hoped that the district will be cleared of debt in a few years.

The Canadian Pacific Railway announces that it will resume its winter cruises in 1925, one round the world and the other to the Mediterranean. The 22,000-ton Empress of France has been selected for the former cruise, which will last four months and will completely encircle the globe. She will start from New York on January 27th. The ship has been recently converted into an oil-burner and entirely renovated. The Empress of Scotland, 42,500 tons, will make the Mediterranean cruise, lasting four months and including all points of interest on that sea.

The Trans-Canada Limited, the crack daily train of the Canadian Pacific between Montreal and Vancouver, and the longest distance and fastest long-distance express in the world, will resume service May 18th at both ends of the route. The running time between Montreal and Vancouver, formerly 92 hours, has been cut by two hours and the running time between Toronto and Vancouver, formerly 85 hours and 50 minutes, by one hour and 15 minutes. These cuts will benefit those going to Europe and the Orient.

MAIL ROBBERY.
Registered Matter From Maritimes Stolen by Montreal Bandits.

Montreal—Detectives are still scouring this city and district for clues that will give them the key to the identity of the three masked bandits who held up a postal service wagon and looted it of one bag containing registered mail in the heart of the financial section here. The recovery of the empty mail sack and of the automobile that was either used to perform the robbery or later to make a getaway, and an attempt to learn the exact contents of the mail bag took up most of the detectives time. It was found impossible to ascertain the exact value of the contents of the bag as some of the 13 packages it contained came from the Maritime Province and were for western destinations. There were however two packages of money from Montreal and these contained each \$3,000 and were consigned to branches of a local bank in the west. While no exact total could be reached it was estimated that the money alone would reach the sum of \$20,000.

Brown had just been introduced to a man who stuttered, "Did you ever attend a school for stammering?" he asked. "No," replied the other; "I just picked it up."
"The greatest man is he who does not lose his child's heart."

NEW BANKRUPTCY DISTRICT FORMED

Yamouth.—Due to a recent and much needed change in the administration of the Bankruptcy Act a new bankruptcy district, consisting of Yamouth, Shelburne and Digby counties has been created, and Charles S. Pelton of Yamouth has been recently appointed Official Receiver for this district, the appointment to go into effect will be a great convenience as heretofore it has been necessary to send bankruptcy assignments to Halifax and the first meeting of the creditors has also had to be held in that city.

THE REAL PAYMASTER.

By Robson Black, Manager Canadian Forestry Association.

Forests are jobs. They mean trade. Logs are the raw material, not of lumber or paper, but of pay cheques. It is an incidental matter that the forest gives us telegraph poles. It is a very important matter that the forest gives us 120,000 workmen, supporting a half million of Canadian dependents, and distributing 500 million dollars to maintain Canadian prosperity. Conservation would never bother itself with trees if trees were not the substance of human employment. The Forest Protectionist would not sweat a drop for a square mile of Spruce if he did not know that some vast industry, a thriving town and a thousand contented homes are tied to Spruce trees by an inseparable bond.

We Canadians set 6,000 forest fires a year and nine-tenths of them through human recklessness, but those beacon lights of prodigality mean nothing if they do not tell us that we have put the torch to the livelihood of thousands of men; we have signed an unrenounceable note for our children and our grand-children to pay. Let it be laid down as an ugly and undisturbable fact that in the present situation with forest demand jammed hard against dwindling forest supply, every forest fire must be paid for. Every mile of Spruce or Pine or Fir given to the annual bonfire will have to be bought back by the next generation in higher costs of lumber and paper, in forfeited industries, in dwindling public revenues, and a sacrifice of population.

DIVORCE IN RUSSIA.

Soviet Russia offers far more advantages to persons seeking easy and quick divorces than perhaps any other place in the world. Under a new decree a divorce can be obtained within five minutes and a certificate provided both parties agree to the dissolution of the marriage ties. If, however, one party objects to dissolution, the case must be referred to the courts, which will decide the question on its merits. Misconduct does not constitute a valid reason for the annulment of marital ties, but desertion, religious superstition, excessive religious piety, incompatibility of temperament and divergence in political views are held to be sufficient causes. No Russian may obtain a divorce and remarry more than three times within one year. In consequence of the flexibility of the Soviet code covering domestic relations, divorces in the Moscow district increased by forty-five per cent, during the first six months of 1924, as compared with 1923. In many cases applicants for divorces were married only from three days to three months. In other cases couples divorced had been married from four to forty years. Religious superstition was one of the most frequent causes given in applications for divorce. The ease with which a divorce can be obtained contrasts strikingly with the difficulties which beset those who sought separation during the Czarist days, when divorce was almost impossible on account of the opposition of the Church and the severity of the imperial statutes. In those days it required from three to six years to get the annulment of a marriage.

BEEF SCRAP VERSUS SKIM MILK FOR HENS.

(Experimental Farms Note.)

It is an accepted fact that hens must have some form of animal protein in their feeding ration and this is usually supplied by beef scrap. Two years ago an experiment was started at the Experimental Farm, Nappan, N. S., to determine the relative values of beef scrap and skim milk when added to the laying ration. Two pens were made up of ten birds each, as uniform in breeding, age and type as it was possible to select. The rations fed to each pen were alike and constant except that Pen 1 received beef scrap and Pen 2 skim milk. The results obtained show the possibilities there are of realizing good value for skim milk by feeding more of it to the hen. The average production from the ten birds receiving beef scrap for the two six-months feeding periods (Nov. 1st to April 30th each year) was 615.6 eggs at a feed cost of \$13.75 or 26.8 cents per dozen, leaving a profit over feed cost of 97.2 cents per bird. In Pen 2 the ten birds receiving skim milk over the same period had an average production of 699.5 eggs at a feed cost of \$12.70 or 21.5 cents a dozen leaving a profit over feed cost of \$1.49 per bird.

By taking the average of two years it was found that 598.7 pounds skim milk valued at 20 cents per hundred and thus costing \$120 gave greater returns than 39 pounds beef scrap at a market price of \$7.24 per hundred thus costing \$2.82. If as believed at the Experimental Farm, the increase in production from the pens receiving skim milk can be attributed to the value of skim milk as a food for laying hens, it would only be fair to state that the farmer had received slightly better than one dollar per hundredweight for his skim milk when he marketed it through his eggs.

As this feeding test has only been carried on for two years it does not permit our drawing definite conclusions yet. However, the results to date would lead one to believe that a part of the skim milk available on the farm can be very profitably marketed through the egg and would seem to be a more profitable proposition than paying \$7 per hundred for beef scrap in order to supply the amount of protein so essential for profitable egg production.

W. W. BAIRD, Superintendent Experimental Farm, Nappan, Nova Scotia

TEN NEW MIKADO ENGINES FOR C. N. R. ATLANTIC REGION.

Moncton Times: Mr. C. A. Stewart, the well known C. N. R. locomotive engineer of this city, has been appointed Service Engineer of the Franklin Supply Co., on the C. N. R. Atlantic Region, with headquarters here.

Mr. Stewart's duties will be to instruct and demonstrate to the C. N. R. locomotive men the methods of operating the new Booster device designed for assisting heavy trains out of yards and over heavy grades. This automatic device, which is attached to the trailer of the locomotive, gives the engine some 11,000 lbs more draw-bar pull and will do away with the use of assisting engines required at times to push the heavy trains out of yards and over grades, it will also do away with the doubling of trains on heavy grades.

The first of the new engines to which the Booster device is attached reached Moncton this week. There are four of them and they are of the latest type of Mikado Superheater equipped with feed water heater, automatic stroker and other modern devices. They are termed the 2-8-2 class, have four driving wheels and are numbered 3570, 2571, 3572, and 3573. The engines were built by the Montreal Locomotive Works and are the first arrivals of a consignment of ten which were ordered by the C.N.R. for use on the Atlantic region out of Moncton. The second consignment of four in number are also on the way east from Montreal and are expected here in a day or two.

One of the new Mikados made a trip to Truro with a special freight on Wednesday and returned with the Fast Freight from east yesterday. The engine showed up well on the trial trip, making a good run each way.

OFFICIAL PLEAS FOR UNITY AMONG RETAIL MERCHANTS.

Dominion Secretary Says 200,000 Retailers Representing More Wealth Than Any Other Class.

Amherst, N. S.—Between twenty and thirty merchants are assembled at the Eighth Annual Convention of the Nova Scotia Branch of Retail Merchants which opened Wednesday afternoon in the Parish Hall at two o'clock. Merchants are here from all parts of the Province and will continue their sessions today and tomorrow. Important business relating to the welfare of the organization will be taken up along with the routine affairs, as well as reports from the Auditors, Secretary-Treasurer and other officials.

A banquet will be held on Wednesday night at the Terrace Hotel, A. J. 19-32

REID, OF SHUBENACADIE, PRESIDENT OF THE NOVA SCOTIA BRANCH, R. M. A.

Reid, of Shubenacadie, President of the Nova Scotia Branch, R. M. A., opened the meeting this afternoon and after a brief welcome to the delegates, called upon Mayor C. C. Black for an address. Mayor Black, in behalf of the town and citizens of Amherst, extended a cordial welcome to the visitors, at the same time making reference to conditions in Amherst, and stating that while times had been dull, the town was not dead, and was prepared for a comeback in the industrial world at the first opportunity. The President of the Amherst Board of Trade also gave a short address.

E. M. Trowen, Dominion Secretary of Ottawa, spoke at some length upon the fine work that was being carried on by the Retail Merchants' Association. Mr. Trowen expressed the opinion that more efforts should be made by the Association to develop the towns and villages, rather than the cities.

Mr. Trowen said the Retail Merchants of Canada, 200,000 in number, represent more capital and wealth than any other class of people. He made a strong plea for unity.

WILL FACE CHARGE OF MANSLAUGHTER

Lumberman Held Responsible For Death Due To Unprotected Machinery.

Amherst—Sanford MacKell, lumber operator at Fenwick, came before Magistrate C. E. Casey Thursday afternoon on a charge of manslaughter in connection with the death of William Reid, of Fenwick.

The late Mr. Reid was not an employee of the accused but was associated with another lumberman in hauling logs from a brow to MacKell's mill and also in clearing away the edgings and saw dust from the main saw edger and trimmer. In the course of his work, Reid had occasion to step over a hand-made pulley which operated a saw dust carrier. Small bolts protruded from this unprotected pulley and one of the bolts caught in Reid's trousers' leg. Before the mill could be stopped Reid had been whirled in the shafting. His leg was broken and crushed and he died after an operation at Highland View Hospital.

The charge against MacKell is being laid on the authority of Attorney General O'Hearn, according to Phillip Ring, factory inspector for Nova Scotia, who has been investigating the matter. This is one of the first cases of the kind to be tried in the Dominion. Mr. Ring, in his tours of inspection, has been preaching "Safety First" in no uncertain manner and has informed mill operators and others.

ZANE GREY SEKS DEEP SEA FISHING

Noted Novelist And Party to Spend a Month at Liverpool.

Liverpool.—Zane Grey, the noted novelist arrived Thursday accompanied by his son, Roman, his brother, R. C. Grey, and a party of friends, Mr. and Mrs. J. R. Smith, Phoenix, Arizona, and Miss M. K. Smith, of New York. He will remain for a month making his headquarters in this town and fishing from the Liverpool harbor. The party is at the Hotel Mersey.

Mr. Grey was preceded by his speed motor boat which was shipped from Florida; it is a 27-foot open boat with motor capable of doing 20 miles an hour. His Captain, Sid Bourlier and engineer, Robert King, arrived yesterday. Another boat has been engaged, a cabin cruiser 40 feet long. It will be managed by Captain Parker Pentz, with Joseph Wentzell, also of this town, as engineer.

Fishing began on Aug. 1st, tuna, halibut and swordfish being sought.

MAIL CONTRACT

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday the 5th September, for the conveyance of His Majesty's Mails, six times per week over the

BRIDGETOWN NO. 3 R.M. ROUTE, under a proposed contract for a period not exceeding four years dating from the 1st January next.

Printed notices containing further information as to conditions of proposed contract may be seen and blank forms of Tender may be obtained at the Post Office of Bridgetown, and at the office of the undersigned, District Superintendent's Office.

Halifax, 23rd July, 1924.

W. E. MAC LELLAN, District Superintendent Postal Service.

FIVE ROSES FLOUR for Breads-Cakes-Puddings-Pastries

FOR SALE BY B. N. MESSINGER

"Subscribe to the Monitor"

Bears, Baboons, Bees, Bicycles and Bullion.

Above, five chickens are a regular line, and, (right) bears are also cared for at times. Left, this parrot was in the hands of the Dominion Express Company over a 2,500 mile journey. On the truck behind it is a shipment of bees. Inset is a case of putting the cart under the horse for shipment. Below, baby chicks are handled by Dominion daily. There arrived in Toronto recently, after travelling thousands of miles by rail, a stud pony. Jim, of whatever his name was, had a compartment to himself, a crate of the latest description. He arrived in the best of condition, after being fed and watered en route by the messengers of the Dominion Express Company.

Unusual shipments like this, however, are "all in the day's work" for the express companies. They will take a treasured jewel or a pet elephant with equal pleasure. If you want to ship home the money to pay off the mortgage on the old farm, or send father a couple of cows to keep up his milk shipments, the express companies will look after it for you. Strange consignments pass through the Express Company's doors, and sometimes strange sounds issue from inanimate-looking packing cases. Take the case of the bear cub used at the recent Rotarian Convention in Toronto. The Dominion Express Company was called on to handle this bear for transportation to Auckland, New Zealand. Two or three times daily between Toronto and Vancouver this husky specimen of the "boo hoo" tribe was fed biscuits and milk. At Vancouver he was fed and taken care of until such time as the boat for Australia departed, and arrangements were made to see that the same attention was given until the bear reached its destination. They say that the poor little bear cried when the time came for it to leave the hands of the express company, so well had it been treated.

In case of live animals travelling in the company's cars no excuses are accepted for failure to give them attention. Officials tell a story, in fact, of a messenger some years ago who, in his anxiety to escape a call to the carpet for failure to make correct reports, carefully noted "Fed and watered O.K." on a way-bill covering one crated bicycle. Animals somewhat more lifelike than the subject of the expressman's mistake do often travel, however. For instance, 20,661 pet dogs went travelling in care of the Dominion Express Company last year. There are not many kinds of beast, wild or domesticated, that haven't come in the company's experi-

THE DELICATE GIRL
 What Mothers Should Do as Their Daughters Approach Womanhood
 If growing girls are to become well-developed, healthy women, their health must be carefully guarded. Mothers should not ignore their unsettled moods or the various troubles that tell of approaching womanhood. It is an important time of life. Where pallor, headache, backache or other signs of anaemia are evident you must provide the sufferer with the surest means of making new blood.
 Remember, pale bloodless girls need plenty of nourishment, plenty of sleep, and regular open-air exercise. But to save the bloodless sufferer she must have new blood—new bounding meets the case so well as Dr. Williams' Pink Pills. These pills increase the supply of new, red blood; they stimulate the appetite and relieve the weary back and limbs; thus they restore health and charm, and bring to anaemic girls the rosy cheeks and bright eyes of strong, happy girlhood.
 You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.
MELVERN SQUARE
 We extend a cordial welcome to Mr. and Mrs. DeForrest McNeil who have lately moved here and are occupying the S. McNeil house on Pleasant St. Mr. Carrol McNeil was in Halifax last week attending the carnival.
 Mrs. Spurgeon Cox was successful in winning the fifty dollar prize in the Outlook contest.
 Mrs. Mary Phinney, of Waltham, Mass., is the guest of Mr. and Mrs. Miner Sprowl.
 A number from here attended the reception of Mr. and Mrs. W. Spurr, held at the home of Mr. and Mrs. E. E. Powers, Middleton last Wednesday evening.
 Mr. and Mrs. C. C. Chute spent last week in Margaretsville at the home of Mr. and Mrs. W. Plumb.
 Mr. and Mrs. Miner Sprowl and Percy went to Albany on Sunday to visit Mr. Elvin Oakes who is seriously ill.
 Mrs. Ella Goucher and Mrs. Mary Phinney were recent visitors of Miss Lalia Hudgins, of North Kingston.
 Messrs. W. C. Spurr, Fred Baker, H. Bustin, Earl Palmer attended the N. S. Rifle Association meet at Bedford last week.

GIRLS' LEG CUT OFF BY MOWING MACHINE
 Truro—Grace Fisher of Londonderry, aged twelve years, had her left leg cut off just above the ankle by a mowing machine knife at Upper North River on Wednesday. The large bone in her right leg was also cut off, but the small bone was not cut and it was said this evening that it was hoped to save the right leg. She is a patient at the Colchester hospital. She and her mother were visiting at the home of Theodore Upham. One of the men had shown her a hen's nest in the grass and she was looking at this as the mowing machine came along. She evidently did not realize on which side of the machine the cutter was.

REUNION OF LAING FAMILY
 There was a near union of the Laing family, at the home of Mr. and Mrs. Chester Laing, senr., Lockport, on Sunday, all the family being present except Miss Anna, of Boston, who was unable to be home. Among those present were: Mr. and Mrs. Lindsey Symmons, Capt. and Mrs. George Benham, Misses Josephine and Winifred, and Donald, of Lockport; Mr. and Mrs. Earl Lewis and son, of Bridgetown; Mrs. Jackson and three children, of Boston; Mr. and Mrs. James I. Smith, of Puerto Rico; and Chester, jr., of Kentville, who was accompanied by his friends, Messrs. Moore and Redden, of Kentville. Mrs. Lewis was accompanied by her friend Miss Mildred Gardner, and Mr. A. R. Bishop, of Bridgetown.

OBITUARY

Samuel FitzRandolph

The death of Mr. Samuel FitzRandolph took place on Thursday last at the Victoria General Hospital where he had gone for treatment several weeks ago.
 Mr. FitzRandolph was the last surviving member of his family and was a son of Edward and Sarah FitzRandolph and a grand son of the Hon. Joseph FitzRandolph all of whom lived on the place formerly known as the Belle Farm at Carleton Corner. The deceased was a cousin of Mrs. E. C. Young Bridgetown, and of Robert and Allen FitzRandolph of Fredericton, N. B. He has also one sister formerly Mrs. Chas. H. Harvey, of Dartmouth who predeceased him number of years ago. The funeral services were conducted by Rev. Canon Underwood. The pall bearers were Messrs Frank Fowler, G. O. Thies, Abner Williams and Samuel Pratt.

INTERESTING REPORT ON MARITIME UNITED YOUNG PEOPLES CONFERENCE

Stirring Sermons by Rev. L. A. Corbett Social and Personal Items

In the absence of Rev. W. S. Smith, Rev. I. W. Corbett, former pastor of the Paradise Baptist Church supplied the pulpit on Sunday morning, preaching from the text Gal. 6:2-5 "Bear ye one another's burdens. Mr. Corbett made plain the influence of environment good and bad and suggested the effect of such environment on the social and moral problems of the day. A strong appeal was made to the listening congregation to be and become the kind of citizens that exercise a positive influence to the end that present existing evils which are fast becoming great outstanding national evils may be brought under proper control. By so doing we shall be exercising the privileges of good citizenship, making our social and moral life safer for the coming generations: thus "bearing one another's burdens and so fulfilling the law of Christ."

Rev. I. W. Corbett and Mrs. Corbett, of Fredericton, N. B., are spending a part of their vacation with their friends here.

Rev. Walter Solandt, of Granby, Conn., will supply the pulpit here on August 17th, (next Sunday).

The B. Y. P. U. service of last Sunday evening offered a special treat in the form of a report from the First Maritime United Young People's Conference held at Wolfville recently. Miss Leola Banks whose report is the only one given so far brought to the society here in her bright realistic manner much of not only the subject matter of the addresses but also many suggestive improvements for growth and development. That the Conference had a definite spiritual value also was clearly brought out in Miss Bank's report. At the close of the above address Rev. Walter Solandt spoke for a short time on Young People's work as he is familiar with it in Connecticut where he is the Christian Endeavor, Vice President of the N. W. section of Hartford, Conn.

Miss Margaret Trimmer and Mr. Murray Elliott returned home Wednesday Aug. 6th, from Truro where they attended the Summer School of Rural Science.

Mr. Leon J. Iversen, Lunenburg was a recent guest at the home of Mr. and Mrs. Nathan Banks.

Rev. W. J. Wright, Mrs. Wright and family of Parrsboro visited at the home of Mr. and Mrs. G. Covert lately while on their way to Boston.

Mr. and Mrs. J. M. Mollison, of Cambridge, Mass., are spending a vacation with Mrs. Mollison's parents, Mr. and Mrs. Chas. Covert.

Miss Julia Woodbury, of Roxbury, Mass., is a guest at the home of Mr. and Mrs. C. Covert.

Miss Helen Corbett is the guest of Miss Leola Banks.

Miss Leola Banks visited recently in Morrilton at the home of her brother, Mr. Floyd Banks.

The Woman's Missionary Society of Dalhousie extended an invitation to the Paradise Society to meet with them August 24th and enjoy a mid-summer "get together" as on former occasions.

Mrs. Vernon C. Morse accompanied by Miss Sarah Elliott spent a few days recently in Kentville and Wolfville.

Mr. and Mrs. H. W. Longley and family motored to Yarmouth lately where they visited friends.

A number from here have been attending an opportunity afforded the Camp Meeting at Berwick.

Rev. and Mrs. Walter Solandt accompanied by Mr. and Mrs. Viets, of

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any one of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

REWARD OFFERED

For Information Respecting Forest Fire.

The undersigned is authorized to offer and hereby offers a reward of One Hundred Dollars (\$100.00) to the person or persons who furnish evidence leading to the trial and conviction, under the provisions of the Forests and Game Act or of the Criminal Code of Canada, of any person or persons responsible for the setting or starting of a forest fire which burned near the Thorne Block at the head of the Paradise Lakes in the County of Annapolis on or about the sixth day of June, 1924.

Four Reasons Why YOU Should Purchase A Farm in the Annapolis Valley.

- 1.—Because the Annapolis Valley is the best and most dependable Country in which to farm.
- 2.—Because the basic source of Man's subsistence is the farm. It is the most honorable business on earth. It means health, wealth, happiness and contentment.
- 3.—Because milk from your cows and eggs from your poultry, will give you a daily cash income the year round. Apples, small fruits, berries, garden truck, grains, hogs and sheep will build you a big bank account.
- 4.—Because Lloyd's Service will find the farm you want, where you want it, at the price you want to pay.

CO-OP TO PUSH SEED POTATOES.

W. V. Longley, Kiltson County Agent, Agrees to Head New Department.

Co-operative marketing is to give Minnesota seed potatoes the national recognition to which they are entitled. This was assured last week when directors of the Minnesota Potato Growers Exchange authorized the creation of a seed department and employed W. V. Longley as its director.

Mr. Longley has been Agricultural Agent in Kiltson county for nine years and has been responsible for establishing that section as one of the foremost seed potato counties in United States.

Mr. Longley will have charge of all the seed producing and marketing operations of the new co-op. Plans call for an extensive advertising campaign, especially in the South, where farmers find Minnesota seed potatoes unusually well suited for their purposes, being hardy and heavy yielders.

The Exchange's campaign to increase the amount of home storage in Minnesota is making rapid headway, according to word from the St. Paul office. All agricultural papers, the Extension Service of the College of Agriculture and the state department of Agriculture are behind the project. It will be the first purpose of the campaign to show farmers how they may obtain satisfactory home storage at no cost to themselves, because of the Exchange's recent decision to pay members for keeping their potatoes at home and to allow shrinkage on stocks in storage.

This regulation will give a farmer storing 3,000 bushels of potatoes what amounts to a bonus of \$2.00 enough to pay for a permanent root cellar.

The above refers to a former resident of this County who is making good in Minnesota. (Ed. Monitor)

NORTH WILLIAMSTON.

A very pleasant evening was spent at the home of Mr. and Mrs. O. D. White on July 30th. The occasion being a miscellaneous shower for their son and bride, Mr. and Mrs. Peter White.

A large number of friends were present. The evening was spent very pleasantly in music, games and pleasant conversation. A dainty luncheon was served by the ladies.

THEY TELL THEIR NEIGHBORS

Women Tell Each Other How They Were Helped by Lydia E. Pinkham's Vegetable Compound

Woodbridge, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for female troubles. I would have headaches, backaches, pains between my shoulders and under my shoulder-blades and dragging down feelings on each side. I was sometimes unable to do my work and felt very badly. My mother-in-law told me about the Vegetable Compound and I got some right away. It has done me more good than any other medicine I ever took and I recommend it to my neighbors. You are quite welcome to use this letter as a testimonial if you think it will help some poor sufferer."—Mrs. EDGAR SIMMONS, R. R. 2, Woodbridge, Ont.

In nearly every neighborhood in every town and city in this country there are women who have been helped by Lydia E. Pinkham's Vegetable Compound in the treatment of ailments peculiar to their sex, and they take pleasure in passing the good word along to other women. Therefore, if you are troubled in this way, why not give Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

Mr. and Mrs. White received many handsome and useful gifts.

Mrs. C. S. Bothamley of West Paradise visited her parents, Mr. and Mrs. T. E. Sharp during the past week.

Recent guests at the home of Mr. and Mrs. W. E. Hilsley during the week were Mrs. Kate Brown, Melrose, Mass., Mr. and Mrs. Oliver DeLancey, Lawrenceville, Mr. Uniacke DeLancey, Berwick, and Mr. Longley, Middleton.

Mr. Robert Kelly, Sussex, N. B., was a guest of his uncle, R. L. Moore on the 2nd.

Miss Gladys Durling of Granville, is spending a few weeks with Mrs. Fred Charlton.

A. C. Stevenson spent the 5th with his cousin, R. L. Moore, Mrs. O. D. White and daughter, Mrs. Charles Alexander were also guests at the same home.

Listen for wedding bells in the near future.

EDUCATING THE NEW CANADIAN.

The phenomenal increase in the volume of immigration now reaching our shores presents a subject of immense importance to the thinking people of Canada.

Immigration is generally recognized as one of 'our special problems' but not everyone realizes that, by immigration, Canada is building up a new national life. In a normal family, each child may be regarded as a 'problem'; but when the family is increased also by adoption, an entirely new group of 'problems' is introduced into the family circle. The immigrant is an adopted citizen, and brings with him among his 'effects,' a trunk full of new national responsibilities.

Social workers are perhaps, a little inclined to view immigration by its failures rather than by its triumphs. The individual of British or Anglo-Saxon stock, who 'makes good,' is promptly and easily absorbed into the fabric of Canadian life; contributes to the taxes; casts an intelligent vote; and requires no 'specialized' treatment. The social workers are hardily aware of his arrival. The immigrant who drifts into their purview is likely to be the one who has some physical or intellectual handicap.

Possibly only that of a foreign language which places him at a disadvantage in competition with those who can speak and read English; but more often the failure of the immigrant to 'make good' is connected with some physical defect, through which he becomes a public charge or a unit in the statistics of correctional or remedial institutions. Unfortunately there are no statistics of the immigrants who succeed and become 'our leading citizens,' so that the record of immigration, as found in the reports of social work, is apt to be somewhat pessimistic in its outlook.

It is therefore peculiarly interesting to find in the proceedings of the Convention of the Social Service Council of Canada just published a suggestion for the welfare of the immigrant which involves the setting up of no new, specialized machinery for Canadianization, but simply a more profitable use of our existing system of education.

The suggestion is so simple that, at first sight it may appear unimportant; merely a recommendation that the Federal Government should make provision for ascertaining, as far as possible, the educational standing of immigrants and should turn over this information to the Provincial governments in order that it may be made available for use by the Departments of Education and Health in each province.

When the final destination happens to be a city or town with a highly organized system of education and public health, the problem of assimilation is likely to be dealt with by those more or less expert with it; but our immigration policy is aimed at peopling the remote districts of the country where the local representation of the systems of health and education is often not so competent to deal with the reception of the foreign immigrant. In such conditions much might be done were the Provincial authorities informed of the arrival of a group of immigrants who were not likely to fit quickly and naturally into existing local circumstances. Information as to educational standing might be, in a very real sense, the 'key man' to open the way to assimilation.

No doubt, there will be opposition to such a proposal. 'Immigration is a Federal matter,' is a statement frequently made and partially true, but since the British North America Act explicitly defines the scope of provincial immigration, this statement should not preclude co-operation between the federal and provincial governments.

"There is no such information provided in the ships' manifests with regard to immigrants" is an objection which is only to be reckoned as final by those (and they are not few) who appear to think that the manifests now contain 'all things necessary to the salvation' of the immigrant, and that there is something sacrilegious in suggesting that they be changed.

The possession of such information would not only bring the immigrant to the notice of the departments of health and education, as represented by the public health nurse and the teacher, but also within the sphere of the churches and other voluntary social agencies with which, to an increasing extent, the more alert governmental departments are co-operating. The Social Service Council of Canada.

KARSDALE.

Dr. P. H. Sturgis and wife of New York are occupying their summer home here.

Harry L. Thorne came from Boston on Saturday and is spending his vacation with his parents, Mr. and Mrs. James H. Thorne.

Mrs. J. W. Peck and daughter Pearl of Lynn, Mass., are visiting her parents, Mr. and Mrs. Wallace Covert senior.

Miss Muriel Armstrong of Liverpool, N. S., is visiting her cousin Mrs. E. H. Porter, this week.

HARRY GRANFIELD GIVES TANLAC FULL CREDIT

"My health has undergone such a wonderful improvement that I must say Tanlac is an unusual medicine and tonic," states Harry Granfield, 153 Haverty St., Toronto, Ont.

"For two years past I have been troubled with indigestion to such an extent that I felt unfit for anything. My nerves became all undone and my sleep was unsteady. My energy had about all left me and I would tire out easily.

"Since taking Tanlac I have a wonderful appetite and my stomach never

troubles me any more. My sleep is sound and restful and I get up mornings with renewed energy and really feel like active work for the first time in two years. I am strong for Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 Million Bottles Sold.

TANLAC VEGETABLE PILLS, for constipation, are recommended by the manufacturers and distributors of Tanlac.

Here and There

It is announced that vigorous efforts will be made by the Government of Manitoba to effect the actual settlement of 224,000 acres of vacant provincial land now under the administration of the Crown.

For the week ended June 21st traffic earnings of the Canadian Pacific Railway amounted to \$3,301,000, as compared with \$3,159,000 for the corresponding period of 1923. This is an increase of \$142,000 or 4.4 per cent.

Reports from the Rouyn gold fields of Quebec continue to indicate a great future for that territory. Development is proceeding apace and the English capital now flowing into Canada in search of good investments is interesting itself in this area.

Three carloads of seed grain are being shipped weekly from the provincial seed cleaning and marketing plant at Edmonton, Alta. About 50,000 bushels of seed grain have been handled by the plant since last fall and 20,000 bushels more will be handled before the year's seeding is completed.

The International Paper Company intends to add two new machines to their plant in Three Rivers, Que., so as to increase their production from 300 to 450 tons daily. Another project is also under consideration, viz., to build a plant in Batiscan instead of enlarging the Three Rivers one.

Out of every dollar the Company earns, the sum of 81 cents is spent by the Canadian Pacific Railway in the home markets of Canada for wages, materials, supplies, taxes and insurance, figures recently issued show. In 1923 the total earnings of this great corporation were \$16,837,859, and every community in Canada directly benefited by the expenditure of 81 per cent. of this huge amount in the home market.

The 1924 cut of the East Kootenay (B.C.) forestry district gives promise of running to a grand total of 150,000,000 feet. There is a particularly brisk business in poles of longer lengths and in railway ties, and a cut of some 1,000,000 sawn ties and the usual quantity of the heavy variety is looked for. Sixteen sawmills are now in operation and indications are that there will probably be thirty going before the season closes.

Canada now takes third place, and second place among British possessions, of the gold-producing areas of the world. The total gold production of the world for 1922—the latest year for which returns are available—was 15,440,000 fine ounces, of which the Transvaal produced 7,020,110, or 45.5 per cent. The United States came second, with 2,363,075 ounces, or 15.3 per cent, and Canada followed, with 1,263,264 ounces, or 8.2 per cent.

June 18th was the anniversary of the running of the first Imperial Limited, the Canadian Pacific Railway's famous transcontinental. This was not the Company's first transcontinental, as trains began regular service between Montreal and Vancouver as far back as 1886, but for several years it was the crack Canadian Pacific express. To-day the premier place is held by the Trans-Canada Limited, the fastest long-distance express in the world, which makes the run in 90 hours, or 10 hours less than the time of the original Imperial Limited.

A VALUABLE HEIRLOOM.

Mr. Norris Margeson, Kentville, has a valuable heirloom which has been handed down for generations. It is a flax-wheel which was brought to Nova Scotia by his great-grandfather and grandmother Wilson when they came to this province to settle. His great-grandmother carried this wheel on horseback from Falmouth to Paradise, supporting it with one arm while she held a baby in the other. This will give an idea of the endurance and resourcefulness of our forefathers. This wheel has been much prized and is in excellent condition. His late sister, Mrs. Gates, had often spun flax on it and had it worn into table cloths.—Western Chronicle.

True goodness is like the glow-worm in this, that it shines most when no eyes are upon it.

Recognized authority on household problems pertaining to the selection, preparation and serving of food for all occasions.

Director of the Maple Leaf Club and author of a remarkable Course on Cookery Arts and Kitchen Management.

FREE

A WONDERFUL COURSE TO INTRODUCE A WONDERFUL FLOUR

You will like Maple Leaf Flour. It makes light, wholesome bread, flaky biscuits and truly delicious cakes and pastries.

You get the same uniform results with Maple Leaf Flour every time you bake. It carries a definite guarantee of uniform quality—every bag contains the highest grade of flour made from carefully selected Canadian hard wheat, milled by modern methods and checked by expert chemists at every stage of the milling process.

To introduce this high-grade flour to housewives, we offer for a limited time a course on Cookery Arts and Kitchen Management—containing all the essentials of a college course in Domestic Science—consisting of 20 lessons—sent you by mail. Every user of

MAPLE LEAF FLOUR

FOR BREAD, CAKE & PASTRY

is eligible for membership in the Maple Leaf Club and can enroll at no cost whatever for the Free Course, of 20 lessons. Membership in the Maple Leaf Club includes the privilege of writing Anna Lee Scott on any problem relating to the serving of special dishes for special occasions, or on any household subject.

HOW TO ENROLL

Coupons will be found enclosed in every bag of Maple Leaf Flour. (24 lb. bag—1 coupon, 49 lb. bag—2 coupons, 98 lb. bag—4 coupons). Send only four coupons addressed to the Maple Leaf Club, Maple Leaf Milling Co., Limited, Toronto, Ontario, and you will be enrolled without one cent of expense as a member of the Maple Leaf Club and receive the first four lessons in the course. Other lessons will be sent in four monthly installments—four lessons each month.

POULTRY MITES AND LICE. (Experimental Farms Note). One of the greatest hot-weather problems on the poultry farm is the control of external parasites. Of all such pests that trouble poultry in Canada that Red Mite is by far the most troublesome. These are not red in colour as the name would lead one to suppose, but grey, and it is only when they become gorged with blood that they appear red. They are not usually found on the fowl during the day but in the cracks and crevices on the poultry house where they breed rapidly. The young re-eatly cast their skins during development, and these casts appear on the roosts and at the side of the cracks as a white powder. This is often the first indication of the presence of the mites. At night when the birds are roosting the pests will swarm over them piercing their skins with needle like jaws and sucking the blood. The results in a stoppage of egg-laying or in greatly reduced production. Do not wait until you know mites are present. At the Dominion Experimental Farms the roosts and adjacent parts are painted or soaked every week or so throughout the warm weather with a solution of one of the coal tar disinfectants or a special paint made by diluting, either one of the coal tar disinfectants or crude carbolic, one part, to four or five parts of coal oil or fuel oil.

When the mites are known to be present a thorough house cleaning is in order. Remove all droppings and old nesting material, scrape and sweep out every particle of dirt and burn it. Sweep down the walls and with the aid of a spray pump saturate every crack in the house and the fixtures with a good strong disinfectant solution.

The control of lice is much easier, for while there are a number of different species, the same methods of control are satisfactory for all. The natural method of control is the dust bath; more effective if a little flowers of sulphur be added. However, there are always some birds in a flock that will not use the bath, so it is safest if lice are noticed, to treat each bird individually. At the Central Experimental Farm blue ointment is used, a little being rubbed beneath the wings and below the vent, to kill the lice and any that may hatch.

For setting hens, depend on the dust and sulphur rubbed into the plumage, as the ointment will not only kill the lice but the germs in the eggs as well.

GEORGE ROBERTSON, Assistant Dominion Poultry Husbandman.

NORTH WILLIAMSTON. Among the recent guests at the home of Mr. and Mrs. O. D. White's were Mrs. Fred C. Rogers and daughter of Waverly, Mass.

Mr. and Mrs. Peter White and Mrs. Charles Alexander and daughter Bernice are also guests at the same home. We are pleased to report that Mrs. W. H. Bezanson underwent a very successful operation at the V. G. Hospital on the 22nd.

Mrs. A. P. Stevenson and little daughter Eleanor, were recent guests of her aunt, Mrs. Arthur Wheelock of Clarence.

Mrs. R. L. Moore and daughter, Marion are visiting her sister, Mrs. Reid of Truro.

Messrs George and Everett White have returned home from the States. Mr. and Mrs. Sam Bent and Stanley Charlton have returned home from Intervale, N. H.

Mrs. Z. Gates has returned to her home at Beach Meadows, Queens Co. A very pleasant evening was spent at the home of Mr. and Mrs. W. M. Whitman's on the 22nd, the occasion being their son Levi's birthday. A dainty treat was served at a late hour.

Miss Muriel Dunn is spending a few weeks at the home of Mr. and Mrs. Berry, Paradise.

Mrs. O. D. White and Mrs. D. M. Charlton and daughter Margery were guests of Mrs. W. E. Illsley's on the 24th.

Mr. and Mrs. W. A. Bent, Mrs. Wm. Shaw and son and A. C. Stevenson, motored to Berwick on the 24th and were guests of Mr. and Mrs. Z. Seamon.

Here and There. The total elevator capacity of Port Arthur and Fort William will reach 95,000,000 bushels by September of this year. By the end of 1924 the elevator capacity is expected to reach seventy millions.

Immigration returns of the Canadian Government for the first five months of the present year show a one hundred per cent increase in immigration from the British Isles over the figures for the same period of last year.

The 1923 apple crop of the Okanagan Valley will amount to 4,620 cars according to the estimate of W. T. Hunter, district horticulturist. This is an increase of 20 per cent over last year and a record for Kootenay and boundary districts will approximate 580,000 boxes.

A new high record of production was established by the Canadian mills during May, an increase of nearly 10,000 tons over the month of April and 15,750 over May of 1923. The total production in May was 4,084 tons, the highest in the history of the Canadian industry.

Following the opening of the Banff-Windermere Motor Highway, Lieutenant Governor Nichol and British Columbia and Randolph Bruce were honored by the Kootenay Indians who made them an honorary chief and chief of their tribe respectively. The Indian celebrations were held at Windermere in the beautiful Windermere Valley.

Several new air stations are to be opened in Ontario and Quebec in the near future for the purpose of extending the forest area to be patrolled by airplanes. A base is to be established at Ramsey Lake near Sudbury, and from this point all Ontario work will radiate; operations being carried on at Orient Bay, Remi Lake and at least two other substations not yet announced.

If the Canadian pre-war exports of flour are considered as 100, the Dominion's average export total between 1921 and 1923 can be considered as 207. Comparatively, pre-war exports of the United States being rated at 100, its present export is at the rate of 147. This indicates that Canada has more than doubled her export trade in flour since the war. Statistics have increased its trade by 47 per cent. Before the war Canada exported 3,532,000 barrels, while at present her exports average 5,185,000 barrels a year.—"Journal of Commerce."

Mr. Georges Delrue, one of the most important personages of France arrived in Montreal by the S.S. "Minnedosa" to take up residence in the United States. Georges is two and a half years old and has spent most of his life with his grand parents in Tourcoin, a small town on the border line between Belgium and France. The journey from the old homeland, via Antwerp, Georges made alone but never out of sight of the practical eyes of the officials and servants of the company.

Major General Lord Lovett, a passenger on the Canadian Pacific liner "Montcalm," and delegate to the British Empire Forestry Conference, Ottawa, said in connection with his observations into Canadian forestry methods and applied science, "England has but a small forest area in comparison to Canada, nevertheless, her forests were depleted two-thirds to meet the emergencies of the War, and now we are determined to recover this loss by practical reforestation. We have been working at this for the last three years and expect to make a completion of our work in another year."

CITIZENS OF QUEBEC TO VISIT NOVA SCOTIA. More than 150 representative citizens of the Province of Quebec, says a Montreal despatch, will make a tour of Nova Brunswick and Nova Scotia, including the Land of Evangeline and the Acadian districts, in the middle of August. The tour which has been organized by the French-Canadian newspaper L'Evour, will be in charge of the editor, Henri Bourassa, leader of the Nationalist Party.

The party is to leave Montreal on the night of August 17th and the trip over the Canadian National Railways will be in a de luxe special train. The itinerary includes visits to Moncton, Edmundston, Grand Pre, Annapolis Royal, Church Point and Yarmouth. Arrangements are being completed for official receptions to the visitors at these various points, particularly at Grand Pre, where the visit will coincide with the celebration of the L'Assomption festival on August 19th.

OF INTEREST TO AUTOMOBILISTS. The variation in the efficiency of the brakes when on a long trip is due to several things, but the condition of the brake lining is perhaps the most important. Sometimes the brake lining will become polished, in which case the brakes will not be very efficient. In other instances the lining may be "roughened up", in which case the brakes will suddenly begin to be more effective. Generally speaking the dragging of the brakes or long application of them down long grades will cause the lining to become polished, whereas a few sudden applications of the brakes will rough up the linings. Road dust and water will alter these conditions.

Compare these prices with your receipts from other markets. Further prices will be published weekly covering the sales of last season's crop of apples; for the information of shippers.

That an engine will sometimes heat up on a hill for lack of oil, depending largely upon the position of the pump, the type of oiling system and the condition of the oil? The pressure on the bearings during a pull uphill makes greater demands upon the oiling system, and if the bearings do not receive the proper amount of oil they will heat up, and perhaps stop the engine.

That the flickering of the oil pressure gauge when descending a steep hill is simply due to oil in the crankcase flowing away from the oil pump in cases where it is located at the rear of the engine? There is no particular danger if the pressure is affected in this way, since the engine is usually under its own power in descending such hills, and therefore, does not need a constant high pressure of oil to its bearings.

To clean spark plugs, soak them in a mixture of alcohol and kerosene overnight. Then in the morning the carbon can be wiped off with a clean rag. Because of the highly glazed surface of the plugs, emery cloth or sand paper should never be used. When the glazed surface becomes roughened, the plug quickly fouls and stops firing.

The Canary Islands share Ireland's good fortune in having no snakes.

RODE BULL MOOSE. New Jersey Clergyman Is Successful in New Brunswick. Fredericton.—Rev. Dr. Thomas Travis, Presbyterian clergyman, of Montclair, N. J., who left here on Monday for Cain's River, with the avowed intention of riding a bull moose for the movies, has succeeded in completing his purpose, according to word which has reached here.

The moose-riding stunt was successfully carried out in Grand Lake, where the flies have been chasing the monarchs of the forest to the lake for shelter. A large moose was called up and driven into the waters of the lake where, by the aid of boatmen the clergyman managed to mount the animal for a camera demonstration.

Rev. Dr. Travis, accompanied by his wife and daughter, Miss Mary Travis, will spend some time in the vicinity of Grand Lake and Cain's River on a vacation outing.

NEW ENGLAND APPLE CROP REPORT. From the statisticians office, Wakefield, Mass., we take the following in reference to apple crop reports:

"According to reports from the farmers conditions up to July 1st were much more favorable to apples than average and 13 per cent. better than last year for New England as a whole. In per cent. of a normal outlook July 7st, the figures are:— Maine 88, New Hampshire 88, Vermont 87, Mass 82, Rhode Island 84, Connecticut 82, New England 85.2, earlier varieties are reported better than later ones, Baldwin and McIntosh are mostly a moderate crop.

The United States crop of barrelled apples promises July 1st to be 13 per cent. above last year and 28 per cent. above average. But box apples show a 12 per cent. decrease from last year and 12 per cent. below average. For the entire crop the July outlook is for a production 93.9 per cent. of last year and 109.1 per cent. of the 5 years average. The crop is yet subject to several unmeasured influences which may alter the present outlook very much.

The forecast for New York State gives nearly 2 million barrels more than last year; Virginia one million, while Michigan is short about a half million and Washington short about three million barrels.

"My husband gave up fishing when he joined the church." "But fishing is sinful." "No, but lying is."

The New Summer Tea Recipe. Here's a refreshing and novel way to serve tea. Fine for lawn parties, for motoring and picnic parties as well. Put some Rakwana Golden Orange Pekoe in cold water. Do not heat—let it steep for several hours. Serve cold with a dash of lemon. Delicious! Different! "First for Thirst." Rakwana Golden Orange Pekoe. THE BEST OF THE BEST BLEND.

LOCK UP ALL YOUR COWS WITH ONE LEVER! GILSON BARN EQUIPMENT. Let me show you the newest ideas in barn equipment. The Gilson people of Guelph have started making Barn Equipment! And believe me, they've got out some revolutionary ideas! Their Steel Stalls and Automatic Stanchions are the nearest outfit I've ever seen. Strong, sturdy, clean. Make a dairy barn look as efficient as a modern factory. You can look up any number of cows from two to fifty by simply throwing one lever! Release 'em just the same way—all together. I'd like to show you what comfort, cleanliness and convenience is built into these stalls. In addition, I'd like to show you pictures, too, of some real bull and calf pens. Gilson's have a wonderful water system. Makes a lot of difference to the amount of milk you get if cows can get water when they want it—at the right temperature. Let me tell you about their gravity or automatic, sanitary Water Bowls. And to get that mean job of sole cleaning down to its easiest form the Gilson Self-Dumping Litter Cart! A marvel. Raised Ad lowered with ease. A clean, quiet way of handling manure. A very necessary job. Let me show you some mighty interesting pictures. Before you quit your barn it will pay you to see me.
