The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol — (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, piates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibiiothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exempiaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'iliustration, soit par le second plat, seion le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'iliustration et en terminant par la dernière page qui comporte une teile empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, seion le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, pianches, tabieaux, etc., peuvent ètre filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

INTRODUCTORY NOTE

"Study of Canadian Banks," giving a concise history, largely from the point of view of the investor in Bank shares, of Canadian banking during the ten-year period 1896-1905, including a calculation of the average returns yielded upon such investments, a transcript of the main items in the returns to the Dominion Government made by all the Banks, and a statement showing totals, under principal headings, of Canadian Bank figures at the end of each of the ten years, with percentages of increases. In mailing these circulars it was intimated that we had prepared separate analyses of the position of each Bank, and would, on request, send copies of such as might be of special interest.

The reception given this attempt to familiarize investors with the real position and growth of Canadian Banks has lead to our incorporating in permanent form, convenient for reference, similar and additional material covering the ten-year period 1897 to 1906, including a separate analysis of the record of each of the Banks.

It is hoped that the following pages will be found to contain practically all the information useful to an investor in Bank shares that may be procured from the returns to the Government. Probably the only essential item not included is an estimate of the character and efficiency of the directors and officers of the Banks, individually. We venture only so far as to give the opinion that the average in these respects is high.

Correspondence as to Bank or other securities will be welcomed, and receive prompt attention.

A. E. AMES & CO., LIMITED

CANADIAN BANKS, 1897-1906.

HOW SHARES ARE HELD

STUDY of Canadian Banks is full of interest. The increasing demand for Bank shares has caused an average gradual appreciation in prices during the past ten years, and bids fair to carry them higher as the development of the Dominion expands the business and profits of these institutions. Besides the natural demand for shares from Canadian investors in every section of the Dominion, a striking increase in purchases has come from Great Britain and the United States. This outside buying will, no doubt, develop steadily as the positions of the Banks become more generally known. There are, however, several thousands of such holders now in the share lists of the Canadian Banks.

NUMBER OF BANKS

At the close of 1897 there were 38 chartered Banks doing business in Canada. Since then four failed, with total liabilities under \$25,000,000, seven were absorbed by other institutions, and eight began business. The only failures since 1899 were the Bank of Yarmouth in 1905, its liabilities having been only \$302,021, and in October, 1906, the Ontario Bank, with a paid up capital of \$1,500,000, reserve fund of \$700,000, and upwards of \$15,000,000 of liabilities; so that at the close of 1906 the number was 35. Of these, one has a paid up capital of \$14,400,000, one of \$10,000,000, one of \$6,000,000, eleven of \$3,000,000 to \$5,000,000, four of \$2,000,000 to \$3,000,000, five of \$1,000,000 to \$2,000,000, and twelve of under \$1,000,000. Of the latter, five are new banks, which have not fully rounded off their organization. These 35 institutions do business at over 1,700 branches, scattered throughout the Dominion, each branch being under the direction of the head office.

The failure of the Ontario Bank last year is attributed to the personal misconduct of the General Manager and absence of adequate inspection of the head office. The failure has had the effect of tightening up the lines in other banks where there was any laxity in this latter respect, and otherwise, and it is felt that the condition of Canadian banking as a whole is sound.

INCREASES OF CAPITAL

The following tables show clearly the position of the banks at the end of 1906 and the growth of business during the past ten years. The banks have steadily provided additional capital to meet the demands for accommodation. These increases have been made in great part by pro rata issues to old shareholders of new stock at a premium over the par value, this premium being the percentage the reserve fund bore to the paid up capital at the time of issue, which is the maximum rate of issue permitted by the Bank Act. The proportion of reserve fund to paid up capital has a adily increased. In 1897 it stood at 44.17 per cent. By 1906 paid up capital had increased 53.33 per cent. and reserves to 72.51 per cent. of the increased capital.

TABLES OF GROWTH

Careful scrutiny of each column of the tables given will, it is hoped, be well worth while, and no effort is made to recapitulate here except as to points that do not appear in form.

The growth in banking and in the general business of the country is illustrated by the totals of bank figures at the beginning and at the end of the ten-year period, as follows:

		1897	1906
Capital	. \$		\$ 95 509 015
Rest	Ĭ	27,515,999	69,258,007
Circulation		37,995,123	78,416,780
Deposits		229,389,055	69,517,537
Assets		360,133,088	54,192,546

LIQUID POSITION

The total liabilities to the public on December 31st, 1906, after adjusting London balances and notes and cheques of other Canadian banks (practically cross entries), were \$743,356,459. Against these the banks held:

SpecieLegals (Dominion Government Cir-	
culation) Due by banks in foreign countries Foreign call loans	44,266,154 15,512,627
	\$142,489,687

It will be seen that the immediately available assets were 19.17 per cent. of the liabilities. Foreign call loans are included in this category, as they are practically all in New York on high grade marketable securities. Greatly added strength of position arises from the fact that of the liabilities \$398,756,182 are deposits payable after notice, and that the banks have Canadian call loans of \$57,511,747, and own bonds and share securities to the extent of \$72,368,600, a portion of which is lodged with London bankers as security for credits, which may be drawn upon reasonably.

YIELD TO INVESTORS

. It will be seen in the tables that while the average rate per cent. earned on capital has shown a steady increase, the Directors of the various institutions have been conservative in making distributions to shareholders. Average earnings show an increase from 10.81 per cent. to 14.71 per cent., while average dividends paid increased only from 8.10 per cent. to 8.65 per cent.

The average rate of net earnings of 15 banks having shares listed in 1897, was 10.81 per cent.; the average price of the shares of these 15 that year was 175 per cent., so that the average net earnings in 1897 were 6.17 per cent. upon the average market price.

The average rate of net earnings of 22 banks, including the above 15, in 1905, was 14.71 per cent.; the average price of these shares in 1906 was 195 per cent., so that the average net earnings in 1906 were 7.54 per cent. upon the average market price.

The average price of shares of banks whose shares are regularly listed increased 20 points from 175 to 195 during the ten years, or an average of 2 points each year, being 1.14 per cent. increase annually upon the price of 175 at the beginning of the term. The interest return on the investment in these shares decreased .18 per cent., having been 4.62 in 1897 and 4.44 in 1906, the average for the full term having been slightly over $4\frac{1}{2}$ per cent.

A holder of stock at the average price of 175 at the end of 1896 would have received, therefore, an annual return of 4½ per cent. in dividends and 1.14 per cent. in appreciation of values. In other words, a purchaser at the end of 1896 at the then average price of 175, selling out at the end of 1906 at the average price of 195 would have received 5.64 per cent. on his money for the ten years. In addition to this handsome return, there would have been, with many banks, large profits from issues of new stock to the old shareholders from time to time, at prices lower than the current market value. Profits from this source have made the real average return to the investor total, say 8 per cent. per annum during the ten years.

SHAREHOLDERS' LIABILITY

In the case of a failed bank, should the assets not realize enough to meet all liabilities, shareholders are liable pro rata to pay the deficiency, their limit of such liability, however, being an amount equal to the par value of their holdings.

of ad

> An issue of \$400,000 of Capital was made to shareholders of the Peoples Bank of Halifax in 1904, when that Bank was purchased. An increase, offered pro rata to Bank of Montreal shareholders, was made:—

> In 1903—1 share in 6 @ 170—market price, 262
> A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 15.33% in 1903, an average of 1.46% for the ten years and six months.

To sum up, an investment made in 1897 in Bank of Montreal stock at 249, the current price, and sold out in 1906 at 256, the current price, would have returned the investor his principal intact and 4.87% per annum interest, made up as follows:—Average dividend return on original purchase price, 4.01%; return on purchase price from average annual increase in selling price of shares, .26%; average return from sales of allotment of new stock, .60%.

THE DIRECTORS AND OFFICERS OF THE BANK ARE:

The dividend rate has been raised to 8% for the current year.

An investment in Merchants Bank stock made in 1897 at 178, the current price, and retained until 1906, would have given the investor an average return of 4.07% per annum without cellateral profits either from "rights" on new stock, or increase in market value of the shares. Ordinarily the next ten years, with successful management, should show these collateral advantages, the volume of the business of the Bank as compared with its capital being now in much better proportion from the shareholders' point of view.

Increases in Capital, issued pro rata to old shareholders, were made as follows:

June, 1900—2 shares in 3 @ 200—market price, 233 Aug., 1902—1 share "5 @ 200—" 242

A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 11% in 1900 and 4.20% in 1902, an average of 1.43% for the

ten years and eight months.

To sum up, an investment made in 1897 in Dominion Bank stock at 244, the current price, and sold out in 1906 at 272, the current price, would have returned the investor his principal intact and 6.11% per annum interest, made up as follows:—Average dividend return on original purchase price, 4.50%; return on purchase price from average annual increase in selling price of shares 1.03%; average return from sales of allotment of new stock, .58%. Of course an investor who held his investment prior to 1896, took up his subsequent allotments and still has them and his original holding, has received a somewhat greater advantage through the present market price being greater than the average at which his allotments would have been sold.

An issue of \$1,000,000 new stock at 210 is announced to be made about the 15th February in proportion of one new share for three old shares.

Quarterly dividends are now being paid at the rate of 10% per annum.

At the end of 1902 there was sold to new shareholders \$500,000 of new stock at \$250 per share. The increases in Capital, offered pro rata to shareholders, were made as follows:

1899-1 share in 3 @ 175-market price, 175 1903 - 15 @ 200-1906 - 3" 10 @ 210— 234

A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 2.40% in 1903, and 7.20% in 1906, an average of .96% for

the ten years.

To sum up, an investment made in 1897 in Merchants Bank of Halifax stock at 170, the current price, and sold out as Royal Bank of Canada stock in 1906 at 234, the current price, would have returned the investor his principal intact and 8.79% per annum interest, made up as follows:-Average dividend return on original purchase price, 4.44%; return on purchase price from average annual increase in selling price of shares, 3.76%; average return from sales of allotment of new stock, .56%. course, an investor who held his investment prior to 1897, took up his subsequent allotments and still has them and his original holding, has received a somewhat greater advantage, through the present market price being greater than the average at which his allotments would have been sold.

At the Annual Meeting, held recently, it was decided to increase the authorized Capital from \$4,000,000 to \$10,000,000, of which \$1,000,000 will probably be issued very shortly.

		***************************************	148%

During the ten years the total amount transferred to the Reserve Fund was \$3,650,000, of which \$2,204,903 was from premiums on new capital and \$1,445,097 from earnings.

The total written off against Bank Premises Account was \$327,129, the fund standing at the end of December, 1906, at

The Bank had at the end of December last, 64 branches.

Rate of Earning Percentage of divd. on market price of Average price of Shares (Calen-dar Rate Rate of divd. paid Earning on Year market Capital price of stock stock year) 26.05 106.66 11.59 % 14.59 16.59 % 1897 208 115. 122.81 1898 11.36 23.86 217 225 1899 12.56 12.10 12.14 25.14 18.40 1900 130. 23.66 23.14 9 232 224 16.99 7.58 4.01 1901 140. 9 18.79 8.06 3.90 233 241 1902 150: 12.31 22.26 91 21.51 8.46 7.53 254 273 3.74 251 1903 1904 12.20 21.48 20.73 25.31 155. 20.58 10 257 3.66 160. 168. 11.95 20.07 10 7.54 3.76 262 266 1905 13.97 10] 11[21.65 8.01 270 270 3.88 1906 175. 15.84 28.50 23.80 8.32 3.93 277 286

Dividend rate now 12 % per annum.

Increases in capital, offered pro rata to old shareholders, were made as follows:

1898 to 1901—(approximately) 1 share in 3 @ 218

—market price, say 220. 1905—(approximately) 1 share in 4 @ 261.60

-market price, say 270.

The foregoing shows only a slight profit during the period from allotment of new stock, a conspicuous policy of this Bank having so far been to pay low dividends and build up a large Reserve Fund. The market value of the shares has heretofore adhered rather more closely to the book value than with many other Banks.

To sum up, an investment made in 1900 in Bank of Nova Scotia stock at 224, the current price, and sold out in 1906 at 286, the current price, would have returned the investor his principal intact and 8.36% per annum interest (omitting the slight profit from allotment of new shares), made up as follows:— Average dividend return on original purchase price of shares 4.41%, and return on purchase price from average annual increase in selling price of shares, 3.95%. Of course, an investor who held his investment prior to 1898, took up his subsequent allotments and still has them and his original holding, has received a somewhat greater advantage, through the present market price being greater than the average at which his allotments would have been sold.

THE DIRECTORS AND OFFICERS OF THE BANK ARE: JOHN Y. PAYZANT, President. CHARLES ARCHIBALD, Vice-Pres. R. L. Borden. G. S. CAMPBELL. J. WALTER ALLISON. H. C. McLeod. HECTOR McINNES.

During the ten years the total amount transferred to the Reserve Fund was \$1,500,000, of which \$825,000 was from premiums on new Capital and \$675,000 from earnings.

The total written off against Bank Premises Account was \$356,190, the fund standing at the end of September, 1906, at \$400,000.

The Bank had at the end of December, 1906, 60 branches.

Rate Capital % 26.95 25.97 % **%**. % % 1807 1898 1899 1900 1901 1902 1903 176 75. 81.25 889 12.96 179 182 9.26 10.73 24.13 14.49 13.50 7.35 197 83.13 28.53 25.50 184 187 191 196 7.14 7.11 189 86. 90. 9.96 14.15 4 · 52 4 · 24 199 212 23.54 26.32 27.78 9.49 14.05 6.62 95.25 16.77 15.42 13.31 8.18 4.39 1904 1905 1906 205 100. 10.11 7.44 5.83 4.34 201 201 207 100. 100. 10.68 25.15 10 4.38 228 9.99 23.29

Increases in Capital, offered pro rata to old shareholders, were made as follows:

1899—1 share in 4 @ 175—market price, 195 1902—1 " 5 @ 190— " " 200

A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 5% in 1899 and 2% in 1903, an average of .87% for the eight years.

To sum up, an investment made in 1899 in Molsons Bank stock at 197, the current price, and sold out in 1906 at 217, the current price, would have returned the investor his principal intact and 6.32% per annum interest, made up as follows:—Average dividend return on original purchase price, 4.63%; return from average annual increase over purchase price in selling price of shares, 1.27%; average return from sales of allotment of new stock, .42%. Of course, an investor who held his investment prior to 1898, took up his subsequent allotments and still has them and his original holding, has received a somewhat greater advantage, through the present market price being greater than the average at which his allotments would have been sold.

At the Annual Meeting of the shareholders held in October, 1906, an issue of \$500,000 new Capital at 200 was authorized.

THE DIRECTORS AND OFFICERS OF THE BANK ARE:

Increases in Capital, offered pro rata to old shareholders, were made as follows:

1899—3 shares in 7 @ 110—market price, 115 1901—1 share "2 @ 110—" "110 1903—1 "3 @ 130—" "139 1906—2 shares " 3 @ 140— 146

A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 2.14% in 1899; 3% in 1903, and 4% in 1906—an average of

.95% for the nine years and seven months.

To sum up, an investment made in 1898 in Traders Bank stock at 106, the current price, and sold out in 1906 at 140, the current price, would have returned the investor his principal intact and 10.52% per annum interest, made up as follows:-Average dividend return on original purchase price, 6.28%; return on purchase price from average annual increase in selling price of shares 3.35%; average return from sales of allotment of new stock .89%. Of course, an investor who held his shares prior to 1898, took up his subsequent allotments and still has them and his original holding, has received a somewhat greater advantage, through the present market price being greater than the average at which his allotments would have been sold.

When the balance of the issue of \$2,000,000 new Capital Stock has been fully paid the Bank's paid-up Capital will amount

to \$5,000,000.

Increases in Capital offered pro rata to old shareholders were made as follows:--

In 1900-1 share in 3 @ 140--market price, say 155.

In 1903-1 share in 4 @ 150-market price, say 170.

1905-1 share in 5 @ 160-market price, say 163.

A shareholder taking his allotment of new shares and selling it at the market price at the time of issue would, therefore, have received from this source profits on the par value of his holding of 5% in 1900, 5% in 1903 and .60% in 1905, an average of

1.00% for the ten years and six months.

To sum up, an investment made in 1897 in Eastern Townships Bank stock at 134, the current price, and sold out in 1906 at 163, the current price, would have returned the investor his principal intact and 8.69% per annum interest, made up as follows:-Average dividend return on original purchase price, 5.89%; return on purchase price from average annual increase in selling price of shares, 2.06%; average return from sales of allotment of new stock, .74%.

1905	40.	8.60	39.97	61	11.32	9.13	5.24	142	124
	42.	8.14	35.95	7	10.46	7.74	5.18	145	135
1906	46.	8.56	35.15	7	11.80	8.31	4.93	148	142

An investment made in 1901 in Quebec Bank stock at 115, the current price, and sold out in 1906 at 142, the current price, would have returned the investor his principal intact and 9.49% per annum interest, made up as follows:—Average dividend return on original purchase price, 5.58%, and return on purchase price from average annual increase in selling price of shares, 3.91%.

The direction of this Bank has evidently been contented with its doing little more than holding its own, the total assets having been almost exactly the same at the end of the Bank's year in 1904 as at the end of their year in 1901; though there was an increase of \$1,201,686 in assets during the year ended May 15th, 1905, and an increase of \$637,224 during the year ended May 15th, 1906. The future value of the shares of investors depends largely upon the vigor and ability of the Bank's direction.

UNITED EMPIRE BANK OF CANADA

ANALYSIS OF POSITION

E. & O.E.

Note.—This Bank commenced business on the 1st day of August, 1906, and the following figures are taken from the Bank's report for five months ending December 31st, 1906, the end of the Bank's fiscal year.

Year	Capital	Profit and Loss Balance	Circu- lation	Deposits	Total Liabilities to the Public	Assets	Prop. of Capital and Rest to Liabilities
1906	\$ 434,982]	Br. 884.88	\$ 346,885	\$ 574,725	\$ 921,609		

The Bank's Authorized Capital is \$5,000,000, of which \$1,000,000. is being issued at par. The amount subscribed at the end of the year was \$579,600, and the amount paid up as

The Capital having been issued at par, organization expenses, which are necessarily heavy at the commencement of a Bank's career, had to be met from profits. For this reason Profit and Loss Account shows a debit balance at the end of the year of \$884.88, while "Preliminary Expenses" carried forward in the Balance Sheet were \$8,388.

At the time of the Annual Meeting on January 16th, 1907, the Bank had three branches, and arrangements had been made to open a few other branches at an early date.

^{*} Capital \$700,000 and Reserve \$40,000 in 1897.

In connection with the above it is to be borne in mind that ten years ago the volume of business of some of the Banks was small as compared with their Capitals. These Banks have since reached proportions of Total Assets to Capital and Rest much more favorable for earnings, and more likely—at all events from this point of view—to suggest greater profits from issues of new Capital during the coming than during the past decade.
