VOL. 7.

ST. GEORGE. N. B., FRIDAY, NOVEMBER 3, 1911

THE NEW Church Hymn Book for sale at the "Greeting's Office" in several Qualities and Styles.

Dr. Pierce's Favorite Prescription

It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and which

are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under oath.

get it. Don't take a substitute of unknown composition for this medicine of known composition. No counterfeit is as good as the genuine and the druggist

Sponge Fishing.

From October until July the spong ing season in the Bahamas is in ful swing. There are several thousand men and boys engaged in the fishery, each schooner carrying a crew of from five to seven. The sponges are found all over the banks, which vary

in depth from two to four fathoms. Arrived on the ground, the small boats, of which each schooner carries two or three, put off, manned each by two men, one of them sculls while hook, lies extended over the bow and examines the bottom through a sponge glass or bucket with a glass bottom. Laying this upon the surface, he sees everything below as clear as if no wat-

The Sea of Galilee.

No sheet of water in the world has such historic and sacred associations as the Sea of Galilee, in northern Palestine, says The London Sphere. Today it is easy reached, rail from Haifa. Passengers leave the train at Semakh, at the southern extremity of the lake, from whence ferry boa's run to Tiberias, some four miles distant, the largest and most important town upon these waters. It is a crowded city, inhabited mostly by Jews. Here Up-to-date Preacher Reaches may be seen the remains of the great Roman city, while on the hill above stood the palace of Herod.

From the hills surrounding Tiberias one can look down upon the Sea of Galilee, a vast blue lake, pear shaped in design, thirteen miles in length and some six miles in width, sparkling in the sun shine and hemmed about by a vast ring of green hills. The waters of the lake abound now, as in the New Testament times, with a variety of excellent fish, some of them being a species only found in the tropics. Two methods are resorted to for catching, from boats and by hand nets operated from the shore.

The boats are decidedly primitive, beboasting of a single sail. They leave at sunset returning at dawn with their catches, taken of course in large nets.

Then along the shore one may see in the early morning or late afternoon the fishermen who work by themselves. These men possess a circular net of fine twine, small in the mesh and weighted

with pieces of lead around its edge. To the centre of the net a long cord is fastened. The fishermen holds the net the new wharf which they have erected over his left arm and wades waist deep on the site of the old DeWolfe wharf. into the water as the waves roll on to the The wharf and warehouse are now com beach. The Cats of Manxland.

Alice Jean Cleator. "You see, there's one place in the world, at least, where the small boy does not often have the fun of pulling the cats tail," laughed one of the Islanders in the little fifteen by thirty mile Isle of Man in the Irish Sea.

We were watching some Manx kittens frolicking and tumbling about on the ever seen a Manx cat try to run around a corner? You see, it hasn't even the apology for a tail. The tail acts as a rudder with the ordinary cat in any such performance as that and steers it safely. in fascinating legends. A Manx cat will seldom try this 'scunt' instinct telling it that it's an almost impossible feat; but occassionally such a thing happens, and it usually ends in a

ludicrous tumble. The longer I stayed in the Island, the more I saw of these charming little pets One sees them everywhere, sometimes jumping like rabbits from the gorse and and fushia hedges, leisurely walking the streets of the little fishing towns, or stretched lazily in the sun outside the tiny white washed cottages, or in the beautiul gardens of the more pretentious

sing a charming home almost buried n a glory of rose and fuchia bushes. This group comprised a fierce looking black cat with a full length tail, a half breed Manx cat with half a tail, a full breed cat with no tail and a long tailed smoke colored cat from the Shetland Isles. The latter are at present very

popular in the Isle of Man. The Manx cat has a smaller head, long

er hind legs and shorter body than the ordinary cat. They run and jump much like rabbits, and have a fox's queer way of looking at you as if reading your

"I believe there are as many Manx cats in Cleveland Ohio, or San Francisco as in the Island," said one of the Islanders to me. Large numbers have been brought to those cities." Many are also brought to England as gifts. Half a crown is often charged for these pets and sometimes a much higher price. The cat shows of the Island present a fine show-

Long ago, when the Isle of Man was ruled by the Cambrian princes, the value St. Stephen, = = N. B. of a cat was set by law. One of the old Manx laws reads as follows: "The price of a kitten before it can see is a penny. After it can see and before it catches a nouse, two pence; and after it catches a nouse, four pence.

We are also told that if the kitten proved not perfect in sight or hearing, or if dull of claws, the seller must forfeit to the buyer one third of its value.

In Pierre Loti's "Book of Pity and of Death" we are told of the supreme trustfulness which a cat places in one it Manx cat. It is more suspicious than other cats, but once it becomes attached to a person its whole heart is given unreservedly. The Isle of Man, like all ountries with an ancient history, abounds

which is distinctive and graceful to look upon-of a style and quality that carries the "air."

Semi-ready Top-Coats in this season's mode possess both good design and correct, careful tailoring.
