SAD TRAGEDY IN SISTER PROVINCE

Fire at Mouth of Strathcona Mine Causes Six Deaths—Coroner's Jury Finds Plenty of Room for Censure

Strathcona, Alta., June 9.—The worst tragedy in the history of northern Alberta occurred here shortly before midnight last night. Today six bodies lie in Strathcona morgue as the result of a mine horror in which the entire night gang of the Walters Mine were the victims.

Four of the bodies were scarcely recognizable, both heads and legs being burned off. Two more were burned beyond recognition, the fifth dead as the result of suffocation, and the sixth passed away this afternoon as the result of his dreadful injuries.

The cause of the tragedy was a fire which originated in the engine house and spread to the mouth of the mine and shut off all exits. The fire alarm sounded about eleven o'clock last night for a blaze in the structures at the mine mouth directly across from Edmonton. The report was that there were six men shut up in the flames and the crowd watched the burning buildings from the hill above eagerly looking for the appearance of the imprisoned men.

There was no watchman in charge, but the engineer who stops in the shank near the mine was the first to get the alarm, having been awakened by the roar of escaping steam from the engine. He immediately informed Foreman J. R. Lamb, who hastened, partly dressed, from his home near the mine. With a heroism that will earn him a place on the roll of fame, he three times in succession tried to descend the cage shaft, 100 feet deep, but twice had to return for air, and the third time was stopped by the cage sticking fifty feet down. Then he went to the air shaft and succeeded in communicating with the men working below on the night shift. One started up by his direction, but could not make the ascent. He then tried himself and reached the top, falling a few feet away among the flames. Willing firemen rescued him and he was taken to the hospital in dreadful pain, being burned practically to a crisp. Every thing possible was done to relieve his sufferings, but he died today at three o'clock.

When the fire, which could not be reached by the city waterworks system burned itself out about midnight other miners went down the shaft, and found four bodies at the bottom, and a fifth about thirty yards away all dead. The fifth who was an old miner was suffocated by smoke. It is thought all would have been

REBUKE TO GOVERNMENT

Council of District 9 R. 2 is Prepared to Resign if Supplementary Revenue Act Cannot be Worked Except Through Councilors

Pense, June 8.—The regular meeting of district council 9-R-2 was held today. There were present R. Roe, chairman, J. McAllister, A. McRae, J. R. Symons and W. A. Forbes.

The motions adopted were that J. McAllister be given full authority to have the road from the corner of section 20-17-22 to Pense put into the best repair and engage teams on the best terms possible.

That the chairman, J. McAllister, A. McRae and W. A. Forbes be a deputation on June 10, to see Deputy Commissioner Robinson re bridges in T. 18-21 and two in 17-21 also the road at Grand Coulee.

That this council district 9-R-2, W. 2 having discussed the Supplementary Revenue Act consider that it adds unnecessarily to the duties of our secretary-treasurer without due remuneration.

The assessment notices for the district were issued some three months ago and many receipts already given. The Council as a whole, apart from the obnoxious distinction made in the act between town people and farmers and ranchers, decline to act as part of the education department, being elected councilors under the Local Improvement Ordinance to at-

TWO ACRES FOR 90 CENTS

Motor Tractor makes Practical Test in Regina Soil—Will Cut Four Acres of Grain per Hour

Yesterday afternoon the Universal Motor Tractor was again operating at Regina jail farm, and ploughed two acres in one hour at a cost of 90 cents for oil. One of the great features of this motor is its power combined with its lightness, which enables it to do discing and harrowing in one operation, and also to haul three reapers or three binders at once, and cut four acres per hour. No steam engine on the market is capable of doing this. Not only can the farmer do all his breaking and ploughing at 60 per cent less than the present cost without the Universal Motor Tractor, but he can harvest his crop, haul it to market or the elevator, or run his corn stripper, pump his water, cut his wood, and in fact do all the haulage and stationary work at a cost that he should be able to pay for his motor out of its earnings within the first

WHISKEY AND LONG LIFE

Paddy Nolan says that if Whiskey is Fatal McLeod Would be Depopulated

McLeod, Alta., June 10.—The McLeod trial was concluded Saturday evening when the jury after twenty minutes deliberation found the accused not guilty. A good part of the day was occupied with the testimony of Dr. Charlton, of Regina, who had analysed the stomach and other organs of the deceased. The defence did not call any witnesses.

P. J. Nolan in summing up for the accused, drew the attention of the jury to the quantity of Scotch whiskey which Dr. Charlton had described as a fatal dose. If this expert testimony were at all in accordance with the facts as verified by experience, McLeod, said Mr. Nolan, would long ago have been deprived of some of her best and oldest citizens.

Justice Harvey's charge was made entirely without leaving the chair and the jury lost very little time in arriving at a conclusion.

Censure All Round

Strathcona, June 11.—Coroner Hoskisson's inquest on the victims of Saturday's fatality took place yesterday. The jury brought in the following verdict after 2 hours and 45 minutes deliberation:

"That we do upon oath say that the said Joseph Hardy came to his death by asphyxiation at the Strathcona Coal Co.'s fire on Saturday night, June 8th, by inhalation of smoke and gas caused by said fire, the origin of said fire unknown;

2. We censure the Strathcona Coal Co. for not sinking another shaft in compliance with clause 10 B, chapter 25, regulating operations of coal mines in the province of Alberta, we also censure the provincial inspector in this case for not insisting on the construction of aforesaid shaft;

3. We also suggest and recommend to the provincial government of Alberta that in all mines where a number of men are employed underground an outside watchman should be employed;

4. We regret that the city council were dilatory in responding to the request of the fire chief for a hose wagon and necessary equipment, made to them some time ago.

PUTTING IT UP TO GOVERNMENT

Methodists Decide to give Mr. Lamont a Chance to Implement his Promise of Local Option—Hotel Men will Resist

The Methodist conference turned down the report of the temperance and morality committee in so far as the plebiscite was concerned. The ministers think that the promise of Attorney General Lamont to Dr. Chowar was sufficient when he promised that the temperance people would be given a chance to have local option. The conference took the government at its word and will await action of Mr. Lamont before proceeding further themselves with the temperance movement. It is expected that at the next session this question will come up and yards government will submit a definite policy. The hotel men are organizing for the fight which the temperance people foreshadow and they expect the temperance advocates to make the first local option test in some remote rural district. There is no to an issue both parties will fight, doubt that when the question comes strenuously. The liquor men say they have no sympathy for the law breakers in their business, and they do not oppose close government restriction and inspection.

It is doubtful whether the government will favor local option at the coming session, as the sentiment of the house can hardly be depended upon to sustain anything approaching prohibition.

DEATH OF MRS ALEX. ROSS

Popular Wife of one of Regina's Well-known Lawyers Passes Away During Child Birth

The death of Mrs. Alex. Ross which occurred at her home here this morning came as a severe shock. Mrs. Ross had not been well for a few days and during confinement this morning both mother and child passed away.

This sad affliction is a hard blow to Mr. Ross for whom the deepest sympathy is expressed.

Deceased was very popular in the city and was an active member of Knox church.

HUGH PEAT APPOINTED

Regina Has at Last Been Given a Correspondent for the Labor Gazette—Mr. Knowles Notifies Mr. Peat

After a united effort on the part of the Board of Trade and the Trades and Labor Council, a Regina correspondent has been appointed for the Labor Gazette, issued by the Department of Labour at Ottawa. Today Hugh Peat, foreman of the mechanical department of The West, Secretary of the Regina Trades and Labor Council, and editor Saskatchewan Labor's Realm, received notice from W. E. Knowles, M.P. of his appointment as correspondent of the Labor Gazette for Regina, and advising him that he will receive official notice in due time.

Mr. Peat is a very capable man and his appointment was recommended by the Trades and Labor Council.

GRAIN CONVENTION VERY SUCCESSFUL

Exchange Delegates Withdraw, but Railway Men Remain and Assist Object of Gathering— Reciprocal Demurrage to be Submitted to Railway Commission

Winnipeg, June 7.—The big conference of grain men that has been in session for the past few days at the legislative chamber dissolved last night after a most interesting series of meetings, during which the whole situation regarding the grain trade was thoroughly viewed from a farmers' standpoint and this was supplemented by the attitude of the railroads towards the grain trade, which by representatives of the C.N.R. and C.P.R. corporations who appeared as delegates to the conference and who stayed in to the close and were most cordially thanked for doing so in marked contrast to the grain exchange delegation which withdrew after sitting half a day in the conference and then earned for themselves the hearty execration of the farmers, a due which was fully accorded to the exchange men, upon every possible occasion, the sentiment of the conference on this point being clearly demonstrated when a delegate wished to hold out the olive branch of invitation to return and this was met with instant and sharp disapproval by the conference.

The Court Decision
Another incident which occurred in this connection was that of Mr. Scallion's speech in which he referred in caustic terms to the recent trial of the grain case, which the speaker referred to as something not worthy of the consideration usually accorded such exercise of judicial function and as a phase of a case not at all finished in its appearance before the courts of Manitoba.

This open rupture of long strained relations between the farmers and the grain exchange was the only sensational feature of the conference which was otherwise a good tempered and analytical body which, however, sat all too short a time for the thorough threshing out of the many important questions that were placed before it. Declaring strongly for government ownership of public utilities such as elevators, railroads, and as one speaker put it, of all public utilities that are likely to become monopolies the conference laid down its attitude toward the management of the grain trade in clear, forcible terms and indicated its disposition to stay with the job of getting all or some of the things aimed at, by appointing a standing legislative committee to look after all proposed legislation to, or affecting the traffic in grain.

Afternoon Sitting
When the grain conference was resumed at 2.30, G. H. Shaw of the C.N.R., moved a resolution which D. E. Stewart seconded, that the minister of trade and commerce be requested to arrange for the publication by and under the authority of the warehouse commission, of a weekly bulletin or market report showing the market price of grain and farm produce in the markets of Liverpool, London, Paris, Hamburg, New York, Chicago, Minneapolis, Duluth, Port Arthur, Fort William and Winnipeg, said market report to show, as reported by the publications received from abroad each week, the prices, and immediately preceding the publication of said publication of the bulletin; all the established freight rates on grain and farm products from grain shipping stations in Manitoba, Saskatchewan and Alberta to Lake Superior ports, viz, Fort William, Port Arthur and Duluth, and all rail to the North Atlantic seaboard, with the chartered rates on bulk grain from Lake Superior ports to Georgian Bay, Lakes Huron, Erie, Ontario and River St. Lawrence ports during the season of upper lake navigation, and approximate cost of ocean carriage from all North Atlantic ports including the river St. Lawrence to British and European and continental ports.

Said bulletin to also contain the tariff and conditions of grain storage in the interior and terminal elevators and such other matters relating to the market and transportation of grain and farm produce as in the judgment of the commission should be published for the information of the public.
The bulletin to be kept on file with the commissioner, for public inspection, and to be furnished by mail to all persons who shall order the same and pay the price of \$1 per annum.
The commissioner shall also keep on file for public inspection, publications of recognised commercial standing showing the market price of grain and farm products in the markets named in this resolution.
This resolution was adopted after a delegate had been assured that the bulletin would be printed in Winnipeg.

Urged to Acquire Elevators
Moved by Mr. Millar of Boissevain, and seconded by Reeve Couthard, of Riverside:

Cures Spavin
The world wide success of Kendall's Spavin Cure has been proven because this remedy can cure Spavin, Bone Spavin, Curb, Splint, Ringbone, Bony Growths, Swellings and Lameness.
MEAFORD, Ont., May 22 '06.
"I used Kendall's Spavin Cure on a dog Spavin, which cured it completely."
Price \$1-50 for 50¢. Accept no substitute. The great book—realize on the same—free from dealers or
Dr. R. J. KERRALL, 68, Esplanade Falls, Vermont, U.S.A.

"Resolved, that this conference for the reason advanced in the clause on government ownership of storage facilities in the circular issued by the Manitoba grain growers' association and appended hereto, that this conference urgently request the Dominion government to acquire and operate a complete system of storage elevators throughout the province along the lines suggested in the clause referred to above and that the provincial government request such modifications of the grain and inspection acts and such co-operation of the Dominion government as will make the system capable of yielding the most benefit possible to the producer."

Mr. Millar urged the necessity of taking over the elevators as a more satisfactory manner of doing business than the present one. While the elevators were doing a certain amount of good to the farmer he was of the opinion that the provincial government could do much better, he did not imagine there could be a much worse system than the present private ownership of elevators. He objected that their cars were often sidetracked on their way to the lake front and such accidents should not occur. He was quite willing to trust the government. Before discussing the question further the chairman asked if representatives of the bankers, railway companies and others were present. Mr. Peters, (C.P.R.) said Mr. Whyte could not be present, he was unwell. Mr. Shaw and Mr. Sutherland represented the C.N.R. No representatives attended the debate from the bankers. A resolution having been presented by Mr. Henders, urging on the government of the Dominion the acquisition and operation of terminal elevators the debate proceeded.

D. D. McArthur, Lauder, associated himself with the mover and second. Mr. Peters for the C.P.R. said he would be glad to support any movement which would enable the farmers to deal with more grain. There were already three elevators in Winnipeg which were terminal elevators under the act. The wheat when warehoused in such an elevator had a government certificate, which was as good as money in the bank to the owner. If greater storage facilities could be provided nearer the point of shipment which would enable transportation companies to get double the use of their equipment during the season of navigation, it must be an advantage to the producer, and the question was, how was it to be worked. If such accommodation were provided by the government, the railways would favor it, as tending to relieve the congestion from which, not only Canadian, but American roads suffered. In reply to R. McKenzie, who asked whether the extra cost of storage would be paid by the railway company or charged as freight, Mr. Peters said that the storage at country elevators would be saved and the cost would not be more than at present. There would be a charge of one cent a hundred pounds for unloading and loading which was paid now in the three elevators in Winnipeg, owned by private firms. That would be more than repaid by the better facilities that the producer would have. The banks refused to recognise the railway shipping receipt, but the warehouse receipt was worth its full value at the bank.

Not in Accord
Mr. Shaw regretted that his views on the subject were not in accord with those expressed by his friend Mr. Peters. It was his opinion that the terminal elevators or the provision for storage in the interior would not correct the difficulty of the car supply in the shipping of grain to eastern ports, in addition to which there is a terminal expense, a delay of the car in the terminal, the expense of storage and also the shrinkage that occurs every day the grain is handled. For these reasons it was his opinion that the grain should be moved directly from the primary market to the lake front or beyond to its destination. He had been intimately connected with the transportation question in Manitoba for upwards of 28 years and had something to do with the preparation of the Manitoba Grain Act which in the present restrictive methods works as far as car distribution is concerned, greatly and directly against the carrier and the producer of grain in this country. Before the passage of this act which permitted the distribution of cars they were able to dispose of their equipment as to get the best results. Under the present circumstances they found their equipment tied up at wayside stations for twenty to seventy-two hours without being able to use it. He believed if the convention were to bring in some resolution which would remedy that difficulty they would go a long way to meet the transportation of grain in that country. The present act had been drawn something after the Minnesota Warehouse act, and they knew that the acts across the border were observed rather than in Canada they observed the law.

In regard to the public ownership of terminal elevators he doubted in the of advantage to American lines to have their terminal elevators at Duluth and Superior that it would tend to the advantage of the producer or Canadian carrier to have terminal elevators under government

Greem Baking Powder
Pure, Healthful, Dependable

Known everywhere and guaranteed a strictly cream of tartar baking powder; no alum—no ammonia—no phosphatic acid.

Low-priced powders and those which do not give the cream of tartar guarantee are made from alum.

Of what use to give 25 ounces of baking powder for 25 cents if 8 of those ounces are alum?

STUDY THE LABEL

ownership. He submitted a resolution of which the following is a part and ultimately withdrew it. "That whereas the special interest of the grain growers and the general interest of all residents of the west demand a free movement of grain to the terminal elevators at the lake front to eastern and foreign markets before the close of lake navigation, and with the object of testing the assertions of operating officials of railroads that a much larger proportion of the crop could be moved to the lake front if the distribution of cars for grain shipment is left to their discretion, it was the opinion of the meeting, that the railway companies be given an opportunity to prove their assertion."

Demurrage
The question of reciprocal demurrage was reverted to on motion of Mr. Malcolm as the matter was tabled in order that the railroad representatives might have the opportunity to present their side of the question more fully an opportunity which had not been accepted by the railroad men.
As to this Mr. Peters said that he was disappointed in some hope he had for the fuller presentation of the matter from a railroad point of view but he might say that there seemed to him to be two very good reasons for not taking such action as is furnished by the resolution, one is that the enactment of such a law as the resolution proposes will not correct the existing evil, because it is the plain interest of the railways to do the very things which are sought to be made obligatory and penalised by the resolution. The other reason is that the railroad commission is the only body that can enact such a law and the speaker understood that such matter is to be presented to that body on its trip west.

A delegate took exception to Mr. Peter's objection of the first part saying that the farmer who does not load his car promptly should be equally applicable to the railroads in such cases. Mr. Peters replied by saying that the cases were different in that the farmer is accommodated or benefited, by his ability to load a car at his leisure, whereas the farmer who does not load his car promptly is injured by delays which take place on the railway's side of the matter.
It was proposed that the resolution be allowed to rest until such time as the railroad men can take up the matter on one side and the grain growers on the other, but this course was strongly objected to by a number of delegates. Mr. McArthur said it would not do to go back home without taking some action upon this important matter.
Mr. Malcolm also said that the convention should deal with the question and not leave it to the executive of the grain growers association.

Reeve Pool of Archie, made a telling speech in which he said that the conference is highly responsible to a large body of people and he suggested that an adjournment be made till after supper at which time the matter could be taken up and disposed of.
Mr. Shaw said he might not be able to pour oil on the troubled waters.

but he wished to say that the resolution advocating reciprocal demurrage has nothing reciprocal, but one in which it is sought to penalise the railroads for the shortage of cars which is something which at present cannot be helped. Mr. Shaw suggested that a committee be appointed to appear before the railway commission and present the views of the meeting on reciprocal demurrage.
Mr. Peters again spoke on the question, and as a final disposition of the matter, Mr. Moran moved that the meeting declare in favor of reciprocal demurrage with the object of improving transportation facilities. The amendment was adopted. It was suggested that the motion might also be adopted together with the amendment, and in order that the possibility of such a course might be declared, the motion was also put before the meeting and defeated.

Mr. Pool of Archie rose to move the appointment of a standing committee as follows: "Resolved that C. Stinson, of Wallace; C. Pool of Archie, Alex. Ennis of Brenda; Jno. Allan of Odanah, together with the directors of the Manitoba Grain Growers' Association, to be a standing legislative committee to present the resolutions passed at this conference to their respective governments, and also to watch the legislature of Manitoba and the house of commons at Ottawa, to give effect to any or all of the said resolutions, and also to the railway commission."

Mr. Pool eloquently to the resolution which was originally presented by him without his own name, but which was amended by adding Reeve Pool's name at the suggestion of Mr. Moran, and heartily endorsed by the convention.
This was the last of the formal business of the convention, votes of thanks to the chairman, secretary, the government, railroad and press, and being responded to by pleasant speeches by the recipients of these marks of favor or their representatives with the exception of the government which was not represented by any of its officials at the time of closing, which was further marked by the public singing and singing, "God Save the King."

HE BLEW HER UP
A Turkish sailing vessel laden with contraband ammunition and bound for Tripoli, was blown up in the vicinity of Port Searziss. Her entire crew as well as eighty fishermen who were alongside at the time were drowned. The local authorities saw that she was about to take advantage of the absence of the guards and blow her up. They thereupon ordered out the fishermen's boats. Twenty-four of these boats surrounded the vessel, when a terrible explosion occurred. It is believed that the captain blew up his vessel in order to avoid capture. The majority of the fishing boats went down with the vessel. The explosion was heard sixty miles.

Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for piles and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-capped glass jars 50 cents. Sold by the Regina Pharmacy Stores.

BOARD AFTER THE C.N.R. Order Issued Respecting Equipment of System—Will Take Till November to Move Last Crop

The following order has been issued by the board of railway commissioners regarding the railway service in the west, as result of the report of A. F. Dillinger, who was directed to make an enquiry into certain matters connected with the Canadian Northern railway on the representation of the shippers and jobbers' union. The order recites order 2844, dated April 12, containing directions to Mr. Dillinger and continues: 'And whereas the said A. F. Dillinger has reported to the board that the Canadian Northern is absolutely without facilities for operating one half of its mileage at the present time; that its locomotive and car shops at Winnipeg are entirely inadequate to take care of the locomotives and cars which in the ordinary course are required to be overhauled at least once a year, these shops being practically the same as those that were taken over from the Northern Pacific railway a number of years ago, with the addition of some up to date machinery, and a building that will take in about five passenger cars for general repairs; that on all well regulated railways in the west locomotives undergo repairs at least once a year, whilst the transportation commission on the Canadian Northern during the past twelve months have not permitted the usual overhauling of engines, with the result that they are unable to perform the work expected of them; that at the present time the Canadian Northern railway has 168 engines of all sizes to operate three thousand miles of railway, and that 23 of those engines are undergoing repairs; that the company has on its lines a total of 11,103 cars of which 4,095 are foreign cars the remainder being their own; that for 30 days preceding this report, the Canadian Northern railway had moved on an average thirty thousand bushels of wheat a day and that at this rate it will take the company until Nov. 1907, to move out the balance of the crop on its lines; that the secret of the whole thing is lack of motive power and facilities for taking care of the motive power they have got, and that the company should have at least twice the power it has to operate its existing lines in any kind of a satisfactory manner; and whereas, it is in the public interests that the Canadian Northern should as speedily as possible procure and place on its lines the additional locomotives and other rolling stock, appliances, facilities and equipment necessary for enabling it to receive, carry and deliver without delay, and with due diligence, all traffic offered for carriage on its lines; now, therefore, in pursuance of the power conferred on it by section 60 of the railway act, and all other powers possessed by the board in that respect; the board orders that J. Hardwell, chief traffic officer of the board, be and is hereby appointed and directed to make inquiry and report to the board to the board what new locomotives and other rolling stock, appliances and equipment in addition to those now possessed by it, the Canadian Northern has ordered for use on its lines of railway and when the same are expected to be ready for use on such lines; what facilities for repairing and keeping in proper order and condition its locomotives and rolling stock, appliances and equipment, in addition to the facilities for such purposes now possessed by the Canadian Northern railway Co. is now supplying and can be reasonably be expected to supply, and have ready for use within six months of the date of this order, obtain and place upon its lines for further use further locomotives and rolling stock, appliances and equipment for receiving, carrying and delivering traffic beyond those now possessed and now ordered by the said company; and the board does further order that the said J. Hardwell report from time to time to the board upon any of the matters aforesaid, as he may think desirable, or as he may be directed by the board.'

Free, for Catarrh, just to prove merit, a trial size box of Dr. Shoop's Catarrh Remedy. Let me send it now. It is a snow white creamy, healing antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc. it gives instant and lasting relief, to catarrh of nose and throat. Make the free test and see for yourself what this preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50c. Sold by the Regina Pharmacy Stores.

SKELETON FOUND Stoughton, Sask., June 7.—A mystery as at last solved. The remains of Duncan McNabb who disappeared from Stoughton about twenty-two months ago were found upon the Stoughton trail in the Moose Mountain. The clothes, hat and shoes, with watch and chain were easily recognised by those who knew him well. The remains were found by George Moreyson, McNabb was well known in and around Stoughton, and owned a quarter section. Moreyson was looking for a stray cow when he came across the skeleton.

ASK FOR MINARD'S AND TAKE NO OTHER. A big bull buffalo at the National Park east of Edmonton made a break for liberty a few days ago charged the sixteen foot wire fence, which went down before him and he reached the hills and up to the present time has evaded capture.

BLACKSMITH SUICIDES. The citizens of Napinka, Man. were shocked on learning John Despreve, a local blacksmith had committed suicide by hanging in his own shop. He has resided in Napinka for five years. No one knows why he committed the rash act. He leaves a crippled wife and two children.

EDMONTON TO GULF Two Men Start To-day in Boat Down Saskatchewan To Atlantic Edmonton, June 10.—On Wednesday, two young men who are now taking a trial spin on the Saskatchewan, will leave Edmonton for a journey by water of between three and four thousand miles. Their craft throughout the trip will be a sixteen foot row boat. Each arrived in Edmonton but recently, B. Hoerschen coming here from the States and G. W. Sparkle from England. They will follow the Saskatchewan down to Lake Winnipeg, visit some of the Icelandic settlements on that body of water, go up the Red river to Winnipeg, cross the International boundary to a point where a ten mile passage is necessary to reach the

Mississippi and then down the 'father of waters' to New Orleans. The journey will be made in leisurely fashion, the object of the travellers not being the winning of a bet or the attaining of notoriety, but the securing of material for literary work. It is expected that it will be anywhere between six and nine months before they reach the Gulf of Mexico.

Winnipeg Exhibition The prize list of the Winnipeg Exhibition, July 13.20, is a book not only more comprehensive in its arrangement, but is practical evidence, in the new classes and additional prizes medals and awards offered, that the expectation for the greatest exhibition in the history of the association is being anticipated. A glance through the pages indicates the scope of the exhibition, and the purpose of making the show this year the most attractive to exhibitors and those especially interested in the material branches of the great fair. Copies of the prize list may be obtained by addressing A. V. Bell, Manager, Winnipeg.

HASLAM ON PROSPECTS Well Known Business Man Makes Long Trip and Says Nothing Can be Better Stoughton, June 7.—J. H. Haslam arrived here this morning after a drive of one hundred and fifty miles from the main line at Belle Plaine to Hobbins on the Soo line and across country to this point. He reports after a careful investigation, that there is a larger acreage in wheat than last year and the grain is progressing very favorably. This comprises one of the best wheat districts on the American continent. Weather conditions could not be better and with warm weather and occasional showers June conditions will be as good as any for the last five years. The farmers are in good spirits and expect a bumper crop. Farmers who are not seeding are busy breaking and the high prices of wheat is stimulating everyone to their very best efforts. The next few days will see the wheat well covering the ground. Mr. Haslam expects a large number of settlers and landseekers this season.

EX-MEMBER DROPS DEAD Rosthern, Sask., June 10.—Chas. Fisher, ex-M.L.A., for Batoche, and former Indian agent at Snake Plains reserve, dropped dead at his home in Duck Lake from heart failure. He received the junior bachelor of arts degree in St. John's college, Winnipeg. He leaves behind a wife and five small children.

Additional Locals The board of trade will meet tomorrow evening in the council chambers. A. L. and P. F. Gordon, who have been confined to their home for some time having been down with diphtheria, are now able to be back to business. The marriage takes place this afternoon at three o'clock of Miss Margaret I. Beatty to Mr. Andrew Thomson. The wedding takes place at the residence of the bride's sister, Mrs. Jas. Grassick, Lorne street. The Saskatoon Phoenix has issued a very creditable crop edition giving the crop areas for 1906-7 in the various parts of central and north Saskatchewan. The report shows quite an increase in the wheat area this year.

In the High School Trustee election Messrs McAra, Balfour, Laird, Embury and Duncan were elected. The money by-laws carried, but the Grey Nun's Hospital bylaw did not receive the two-thirds vote, although it had a good majority.

BOISE, IDAHO, June 9.—The cross-examination of Orchard, the confessed slayer of eighteen persons, will likely continue all day Monday and part of Tuesday and it is likely that he will be on the stand all this week. The state will put the witness through a direct questioning after the defence is through and then will come the re-cross examination. The defence will try to prove that Orchard was the hiring of a mine owner at the same time that he alleges he was in the employ of the federation of miners and committed the many crimes confessed to. Witnesses will be called from half a dozen different states to deny the story told by Orchard. Ever since Orchard first took the stand the court room has been crowded at every session, and hundreds have been turned away. During the cross-examination on Saturday, he related the details of the murder of Detective Gregory and also of Gov. Peabody. He told of firing three shots at Gregory, the first two apparently not taking effect. Witness said that he was not a salaried officer of the union to kill people, but he drew money whenever he needed it. He said that he had no fixed schedule of crimes. Witness was retelling the story of the burning of Neville's saloon at Carlson by Neville and himself when the court adjourned, one hundred of which he journeyed. Neville collected \$500 in gave to Orchard.

Piles get quick and certain relief from Dr. Shoop's Maric Ointment. Please note it is made alone for piles and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-tipped glass jars 50c. Sold by the Regina Pharmacy Stores.

Minard's Liniment for sale everywhere. A BREAK FOR LIBERTY A big bull buffalo at the National Park east of Edmonton made a break for liberty a few days ago charged the sixteen foot wire fence, which went down before him and he reached the hills and up to the present time has evaded capture.

DR. LEO GATEZ GONE. Dr. Gatez, the founder of Red Deer Alta., died a few days ago. He was a pioneer and took a deep interest in all affairs pertaining to the west. He was a Conservative candidate in the provincial election in that province. Mayor Gatez of Red Deer is a son of the deceased.

Rheumatism I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten the distorted limbs of chronic cripples, nor turn bony growths back to flesh again. This is impossible. But I can now surely kill the pains and poison of this deplorable disease. In Germany—a Chemist in the City of Darmstadt—I found the last ingredient which Dr. Shoop's Rheumatic Remedy was made of. I perfected a dependable prescription. Without that last ingredient, I successfully treated many, many cases of Rheumatism; but now, at last, I understand the cause of this terrible disease. Those said like granular wastes, found in Rheumatic blood, seem to dissolve and pass away under the action of this remedy as freely as does sugar when added to any water. And then, when dissolved, these poisonous wastes freely pass from the system, and the cause of Rheumatism is gone forever. There is now no real need—no actual cause to suffer longer with such dreadful disease. We sell, and in confidence recommend, our help.

THE TEST CASE

It is apparent from the comment of the Free Press on the contention of the Catholics in this province with regard to secondary education that they have not grasped the point involved, for they say:

A test case in this regard will be an entirely different matter, of course, from the test of the constitutionality of the Saskatchewan Act, which Mr. Haultain talked of. It will simply be a test of the validity of the secondary school legislation, that is, whether or not it violates the Saskatchewan Act.

A test case respecting the legality of the secondary educational act would be only one feature of the school question as it is today and one that has developed out of the school clause of the Saskatchewan Act, which according to the provisions of the North-West School Ordinance cannot be administered as proposed, for under the Territorial law there is provision for Catholic high schools, and it is apparent from the plain provisions of the North-West School Ordinance that if the Saskatchewan Act is good law the Catholics have a right to separate high schools, but if the autonomy act is unconstitutional then the secondary educational act of last session is good law. Of course without the point regarding the high schools being raised at all, the act to supplement the revenues of the crown levies a tax of one cent an acre on Catholics and Protestants alike for school purposes and this is ultra vires of the legislature if the Saskatchewan act is constitutional. These are points aside from the main point which Mr. Haultain has always raised, but of course they all arise from the same cause.

RECIPROCAL DEMURRAGE

The question of reciprocal demurrage has had a prominent place in the discussion at all recent gatherings called for the purpose of considering the grain industry, and we believe that an advanced step was reached when the Winnipeg convention a few days ago decided to have the matter properly brought before the railway commission at their next sitting in the west.

It looks well for the future interests of the shipper when the farmer and such representative men as Mr. Peters of the C.P.R., and Mr. Shaw of the C.N.R. gather with them to discuss matters of transportation, and while there is a great deal to be said in favor of the demand for reciprocal demurrage the point raised regarding the lack of rolling stock perhaps should be considered as affecting the working out of the demurrage principle. If, however, after the matter has been taken up by the railway commission some pressure is not brought to bear on the railway companies to supply cars when demanded, then the farmers will not rest satisfied until the reciprocal demurrage principle is recognized.

Railway statistics in the United States show that there is a great deal in the argument of Mr. Peters when he says that the railways would be acting against their own interests not to move loaded cars as rapidly as possible, for we find

some facts on this point in a very able article written by C. S. Sims, assistant to the president of the Erie Railway Co., for the "American." Mr. Sims says that a constant effort is being made to reduce the non-productive mileage, and to reduce the time a car is not moving.

Other facts stated, however, favor reciprocal demurrage argument, for Mr. Sims says that the greater part of the time a car is not moving, or is actually earning money only about a quarter of the year, and the average life of a car is between fifteen and twenty years. He attributes the lack of earning power of a car to many reasons, among which are, over loading, standing under load, poor equipment, and inadequate track and yard facilities.

The freight earnings on all the roads in the United States in 1905 were 69.4 per cent. of the total earnings of the roads. The average car earned \$795 and moved 8,302 miles, or 22.7 miles daily. The average car carried 739 tons. There were in that year an average of 8.1 cars to the mile of track.

Such statistics as these will have to be produced as evidence before the railway commission in connection with the reciprocal demurrage arguments, and the figures such as the above pertaining to Canadian railways will throw a great deal of light on the transportation question.

OBNOXIOUS DISTINCTION

Elsewhere we publish a minute of the regular meeting of District Council 9-R-2 in which a resolution appears criticising severely the supplementary revenue act passed by the legislature during last session. Time and again the feature very appropriately named the "obnoxious distinction" made between the cities and towns and the farmers and ranchers, has been brought to the attention of our readers, and an added grievance to the local improvement councillors is the fact that through them the school taxes have to be collected without remuneration being given. The councillors think that to collect this tax is outside their jurisdiction, and the imposition is such an injustice to their fellow farmers that they resent the position they are placed in as tax gatherers by an unscrupulous government which has resorted to direct taxation and then authorize the local improvement councillors to do their dirty work.

The stand taken by the council of L.I. 9-R-2 District is an ultimatum, "Unless the Supplementary Revenue Act can be administered without interfering with the work of the local improvement act, this council is prepared to resign."

These objections to the provisions referred to in the supplementary revenue act are general throughout the province.

JACK FROST CAN'T WIN

If ever there was in unassisted Nature a forced growth, we have it at the present time. The earth is like a hotbed and the reaching upward of the wheat is almost discernable. The frequent light showers and the warm sunshine are ideal conditions for a late sown crop and the wheat is thus making wonderful headway. If the farmers controlled the weather they could not have agreed on a finer weather program.

Some say that anticipating less rain in June they have sowed a half bushel more per acre, so that the crop would ripen quicker, and while a little more difficult to harvest would ensure a good yield. The present conditions indicate a heavy crop of straw and later maturity, while the yield probabilities have increased about twenty per cent. This apprehension, however, about a later harvest is only a conjecture, but it goes to show that the farmers' minds are hardly less restless than the growing wheat itself. Yet it is not doubt, but mere speculation.

The new comer wonders, and the old timer prophesies, and inspires the former with confidence, for the latter has lived through the days when only

faith in the future kept him in the country.

Looking at the crops at present, however, and betting on the race between the frost and the wheat, the latter is selling favorite, and from their places at the quarter, Jack Frost can't win.

LEST WE FORGET

The Montreal Star recently conclude a lengthy article on the dilapidated monument in Victoria square in that city, by saying:

While the good Queen Victoria lived and for some years after her demise, the monument was regularly decorated on the anniversary of her natal day, with a beautiful wreath of flowers. Very strange to say and it was remarked by many that on Friday, Victoria Day, the statue was destitute of a single flower, even the daughters of the Empire and the Army and Navy veterans, let alone the officers and men of the militia and the mayor and councillors forgot on this important day to place a few flowers on the pedestal. There were plenty of plants in bloom in the city greenhouses for the purpose. It brings to mind the "rite saying" "how soon we are forgotten."

In the absence of other subjects the Canadian Clubs in the west have been discussing the use of the American flag in our theatres, but now our national clubs out here may very properly take precautions against such a reproach to the west regarding the observance of Victoria Day, as the above quotation is to the residents of Montreal.

EDITORIAL NOTES

The Presbyterian general assembly at Montreal approved of the employment of women in the work of the church, and a committee will report on a definite scheme at the next meeting of the assembly. It was pointed out by Judge Forbes that the Protestants have no institutions like that of the "Good Shepherd" maintained by the Catholic church. The first institution of this kind was founded in 1838 and today there are 150 houses in which upwards of four thousand sisters devote themselves to the care of fallen women and they have assisted some twenty thousand in the struggle of life. The Presbyterian church in deciding on this step has shown a proper grasp of the social problem, for too long have the Protestant churches ignored their duty in this respect and "passed by on the other side."

PRESS COMMENTS

The row that might have been expected at the Grain Conference was not long delayed, after the delegates got down to business.

During the morning session, yesterday, the grain exchange representatives threatened to withdraw, if a certain resolution were presented. At the afternoon session these representatives did withdraw when another resolution to which they objected was adopted.

No one should be surprised by this action. The Tribune was informed some time ago that the exchange contemplated taking it. According to the Tribune's informant, the advisability of ignoring the conference and sending no delegates was first discussed. It was decided, however, so the story goes, that this would antagonize the general public, and would therefore be unwise. Delegates were therefore appointed to attend, but it is claimed that at the time they were appointed it was understood that they should withdraw in protest, if they should be overruled.

Whether this story be correct or not is of little importance—the interesting fact is that the representatives have acted as men who had no agreed would act.

By their speeches they gave the impression that they attended the conference ready to discuss the questions fairly and squarely and prepared to give and take—yet, as soon as they got down to business, it became obvious that they were prepared only to take.

Every resolution presented they regarded as a reflection on their integrity, an insult that it was difficult or impossible to endure. They were willing to concede nothing, while professing to believe that "great good" was to be expected from the conference. It is to be supposed that the "great good" they expected was to be the unqualified and unanimous endorsing of the grain combine by the delegates. Disappointed in this high expectation, they indignantly withdrew from such

High Standards. The high standard of workmanship demanded by the makers of the New Scale Williams Piano have attracted to them the very best of skilled labor. Every workman in their large factory at Oshawa is an artist in his particular line, and the pride they all take in the product of their united labor, "The New Williams" is one of its best guarantees of excellence.

McClary's Local Agents PEART BROS. HARDWARE CO., Local Agents

an unreasonable and unappreciative assembly. It is no doubt thought that this will embarrass the conference. As a matter of fact, it should have no such effect. It has all along been known that the exchange is satisfied with itself and it is determined to oppose all suggestions of reforms. The presence or absence of its representatives at the conference, can not, therefore, be regarded as a misfortune. The farmers the severs and the other representatives of the people of this province know what is needed to put the grain business of Manitoba on a healthy and fair basis. The resolutions presented by them will be endorsed by ninety-five per cent of the public. Whatever those resolutions may be, they would be opposed by the grain exchange. Its opposition, may therefore be taken as entered in all cases—and the resolutions carried over it. It might be thought that the exchange would suspect that the unanimous demands made by men representing all the interests of the rural municipalities of Manitoba have something behind them—in other words, that the need for reform real-

Local and General

The C.M.R.'s held a drill under Inspector Church on Saturday evening.

W. Reid of Milestone was in the city Saturday visiting his son J. Addison Reid.

Mr. B. F. Baker, of the local staff of the Dominion Express Co., left last night for Nottawa, Ont., and will return in a month with his bride.

At a special meeting held in St. Mary's Church on Sunday last a vote of confidence in Aid Kramer was passed. This was in connection with his attitude on the hospital bylaw.

The executors of the Massey estate have offered a donation of five thousand dollars toward the Regina Y.M.C.A. If the sum of \$25,000 is raised from other sources within the year.

Andrew Mahoney of Disley was found not guilty in the supreme court here yesterday on the charge of having received the carcase of a cow knowing the same to have been stolen.

Mrs. A. Nelson, near Arcoia, drank carbolic acid in mistake for medicine and before medical aid could reach her died. She was only twenty years old and was married about a year. Deceased was a Norwegian.

Principal Blacklock of the Victoria school and Miss Bethune have resigned from the staff. Mr. Blacklock will take a position in the educational department as chief clerk and Miss Bethune will be married shortly.

The uniforms for the C.M.R. have arrived. The colors are the same as the R.N.W.M.P., blue breeches and red tunics. The force had another drill yesterday under Capt. Carman. Mr. and Mrs. T. Dickie of Souris, Man., are in the city the guest of Mr. and Mrs. A. B. Cook.

Mrs. T. B. Patton won the prize offered by the Young-Thomson Soap Co. for a name for a washing powder. The name chosen will not be disclosed until the manufactured article is placed on the market.

The Zenner Disinfectant Co. have decided to establish a distributing house for the province in this city. Mrs. E. W. Harding, of Cornwall street was called east owing to the death of her mother.

T. Garry, M.L.A., for Yorkton, recently lost two bars by fire. Through some mistake Uncle Tom's Cabin and the Liberal banquet were billed for the same evening in the rink, but the plantation scene was finally fixed for the day previous.

Moosomin has formed a 5,000 club. The June number of The Canadian Investor, contains among other articles an interesting review on the "Outlook in Saskatchewan," by A. B. Cook, of this city. The number contains also nearly two pages on "Regina's New Hotels."

The Greenock (Scotland) Herald in commenting upon the recent special edition of the Leader, recalls the fact that James Brown, who for long acted as organist in St. Paul's church, is a Greenockian. The same paper referring to the statement in The West that the question of Regina's water supply was solved twenty years ago by Mr. Dan Macalister, M.L.C.E., says that the "Mr. Macalister in question is Greenock's own and Mr. Brown are half brothers. It will thus be seen," concludes the Herald, "that at least two Greenockians have had a say in the rapid rise of the Queen City of the Plains."

Dr. Frank Whitmore, who is in the city from Regina, speaks very hopefully of the Saskatchewan capital. Building is brisk and the residents look to see legislative city have a five-figure population shortly. He says the streets are kept in better condition than in Winnipeg, and he commented on the unsatisfactory state of Main street. It has not yet been decided by the local government where the new university will be established, but among buildings going up are the New Dominion post office and a land titles office.—Winnipeg Tribune.

The assessment roll for 1907 is now completed and is open for inspection at the city hall.

R. Sweet who has been out on his farm at Strassburg, drove over to Regina Sunday. He was accompanied by his daughter, Mrs. E. L. Eddy.

Contractor Mackenzie who has the C.N.R. construction and improvement contract on the north line, was in the city this week.

There will shortly be ten banks in Regina and the bank managers are discussing the advisability of establishing a clearing house.

H. Sheach who has been conducting a butcher business on Dewdney St. has moved into his new premises on the corner of Albert and Dewdney.

Vincent H. Smith, R. Roe and Hy. Enson of Balgonie are in the city. Messrs. Enson and Roe are witnesses in the Curry case now before the courts.

MISS EDNA SUTHERLAND

Miss Edna Sutherland, Canada's premier entertainer, will appear in the city hall, Regina, on Wednesday next 19th inst.

Respecting this artiste and her work, Principal Patrick of Manitoba college says:

"It gives me much pleasure to state from intimate personal knowledge, that Miss Edna Sutherland is a reader of exceptional ability, especially distinguished by the skill with which she interprets character and situations. She holds a foremost place in her profession, and her services are in much request and are highly appreciated. Her distinction led to her appointment as teacher of reading and voice culture to the students of theology in Manitoba college." Rev. Father Drummond, principal of St. Boniface college, says:

"Miss Sutherland's achievement was truly wonderful. We confess that having carefully studied the text of 'Everyman' we wondered how she would impersonate the seventeen characters of the play. But she overcame the difficulty admirably by a change of voice and manner—and what a marvelous voice and enunciation she has! The voice all pure vocality. Its penetrating quality being especially noticeable in the first far-off plaint of good deeds, which reached the farthest corners of the hall, and the acute attention of the audience always marked, passed into the stillness of a deathbed."

His Grace the Archbishop of St. Boniface was in the city on Thursday last and went over the Soo Line before returning home.

W. E. Weeler, who has been suffering from poor health is leaving for Vancouver where he will reside. He was a member of St. Paul's choir.

R. F. Shrader of Bethune, charged with theft from the Independent Lumber Co. pleaded guilty before Judge Newlands yesterday and will be sentenced on the 14th inst.

\$7.50 Very special values. Single or double breasted styles of Men's sturdy suits in imported and domestic tweeds. Neatly cut, well made, well lined, etc. These come in light and dark patterns, black and grey mixtures, on sale, \$7.50.

Rex Flintkote Roofing

Endorsed by Fire Insurance Companies

All the large experiment stations established by the Fire Insurance Companies have made very careful tests of the fire resisting quality of Rex Flintkote Roofing and endorse it as one of the most satisfactory fire resisting roofings made. In other words, by putting Rex Flintkote Roofing on your buildings, you are practically putting a fire insurance policy on that building as well as your others.

Flint Coating

The flint coating is a very valuable feature of Rex Flintkote Roofing. The enormous pressure used makes it a part of the roofing itself, giving it a flexible surface on a perfectly pliable non-conducting base. Although the roofing is laid on the roof with the flint side down, the flint is a valuable addition for many reasons. The flint coating absolutely prevents the roofing from sticking together in the roll in shipment, assists materially in the insulating quality of the roofing and forms a minute air space between the roofing and the roof boards, and keeps the roofing from adhering to the sheathing, adding greatly to its resisting qualities against summer's heat and winter's cold. The circulation of air between the roofing and the sheathing allows the dampness in the roof boards to dry out naturally and prevents dry rot.
