The copy filmed here has been reproduced thanks to the generosity of:

University of Windsor

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

University of Windsor

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

STATE OF NEW-YORK.

D. S. B. O'Callaghan's Respects

No. 47.

Albany June 1845.

IN SENATE,

February 26, 1845.

COMMUNICATION

From the Governor, transmitting the final report of the Agent appointed "to procure and transcribe documents in Europe, relative to the Colonial History of this State."

EXECUTIVE CHAMBER, }
Albany, 21 Feb., 1845. }

TO THE LEGISLATURE.

Herewith I have the honor to transmit the final report of the Agent of the State, appointed in pursuance of the provisions of the act of the 2d May, 1839, "to procure and transcribe Documents in Europe, relative to the Colonial History of this State." The report presents a brief, but very clear history of the progress of the agency, of the difficulties encountered, and of the general results accomplished, and will be read with the interest belonging to the subject.

My pressing engagements have not allowed me time to make myself acquainted with the documents which the agent has secured, or with the expenditures which have been incurred, beyond the statements of the report now transmitted; and I cannot, therefore, speak of the degree of success realized from the establishment of the agency, or of the economy which has characterized the expenditure of the moneys appropriated.

[Senate, No. 47.]

1

(4t. & 475 for dis.)

172589

It will be seen, from the closing paragraphs of the report, that the agent is in advance, to meet the expenses which have been incurred, over and above his own compensation, for the last portion of the period of his service. His account is not submitted to me, but will of course, I presume, be ready for presentation to the Legislature, when ever its action in the matter shall require it.

The schedules of documents accompanying the report, I have not found it possible to command the time even to read, although the transmission of the report has been delayed, for some days, in the hope that so much leisure might be found. Any further delay would only abridge the time which will be allowed to the Legislature to make these examinations, and to take the necessary action to bring the agency to a final close, and the accounts of the agent to a settlement and liquidation. Hence, the report, and accompanying papers, are transmitted without the information which enables me to make any recommendation, or even suggestions, as to the legislation called for, or the appropriations required.

REPORT

Of J. Romeyn Brodhead.

To His Excellency, SILAS WRIGHT,
Governor of the State of New-York.

SIR—I have now the honor to lay before you a final report of my proceedings as Agent of the State of New-York, under the act entitled “An act to appoint an agent to procure and transcribe documents in Europe relative to the Colonial History of this State,” passed May 2, 1839; and of the results of my researches in the Archives of Holland, England and France.

Before, however, detailing these proceedings, it may not be out of place to refer briefly to the circumstances which led to the passage of the act of the Legislature, by which the enterprise now brought to a conclusion was sanctioned.

This agency is the result of the antiquarian spirit that has lately gained so much ground in our country. That spirit, growing and freshening with the advance of years, has been greatly strengthened and fostered by the exertions of the *New-York Historical Society*, an institution which it is but faint praise to say, has more than fulfilled the high hopes entertained of its future value and influence, by its projectors, in the year 1804. Exerting itself laudably in times of difficulty—struggling with adversity, and braving obstacles—its important objects gradually became appreciated by the public; and in the year 1814 a memorial, drawn up by the late Governor De Witt Clinton, then vice-president of the society, stating in a clear and masterly manner the objects of the institution, was presented to the Legis-

lature, and was so favorably received as to induce the grant of twelve thousand dollars in aid of the funds of the society. Its library to this day remains a noble monument of the munificence of the State, and of the liberality of individuals.

In this memorial, the prescient mind of Clinton suggested, in effect, the measure which it was left to after days to see carried into execution. Referring to the gaps and deficiencies in our own existing records, the papers of the Dutch West India Company and the archives of the then Government of the Netherlands were pointed out, as the sources whence materials for the Dutch portion of our history were to be obtained; and the records of the Plantation Office, (Board of Trade,) in London, and the library of the British Museum, were also alluded to, as affording an important and inestimable fund of information respecting the period of our subjection to the crown of Great Britain. The public offices in Canada, it was also suggested, might contain much of interest to our historians. But circumstances for a long time prevented any direct effort being made by the society, to obtain the favorable consideration of the subject by the Legislature; and it was not until the year 1838, that any formal steps were taken in the matter. In the month of April of that year, upon the motion of Mr. George Folsom, a memorial was prepared and presented to the Legislature, urging the importance of an investigation of European archives, for the purpose of procuring those materials for the illustration of our history, which our own State records could not furnish; and praying the State to undertake, for the benefit of the people, an enterprise the society of their own means were unable to carry into execution. This memorial, however, was presented so near to the close of the session, as to render it expedient to postpone further efforts till the next year; when, the subject having been clearly and forcibly introduced by a message from the Governor, and its importance urged upon the members of the Legislature, by the zealous and unwearied attention of Mr. John L. Stephens, the late Mr. William L. Stone, and others, an act was passed, with great unanimity on the 2d May, 1839, authorizing the appointment of an agent "to visit England, Holland, and France, for the purpose of procuring, if possible, the originals, and if not, copies of all such documents and papers in the archives and offices of those governments, relating to, or in any way affecting the colonial or other histo-

ry of this State, as he may deem important to illustrate that history;" and directing that the documents, when procured, be deposited in the office of the Secretary of State, at Albany, subject to the use of the State Historical Society.

Under this act, I had the honor to receive a commission as agent, on the 20th of January, 1841. By the general instructions, in which the views of the Executive in relation to the duties of my mission, were subsequently communicated to me, I was advised to proceed first, to Holland, and ascertain what documents required my attention there; and then to England, and to France. The inspection of the state papers of foreign governments, it is well known, is not a mere matter of course, but is considered a privilege of a high order; and is granted in most cases, only upon applications backed by high personal or official influence. I accordingly had an interview with the Secretary of State of the United States, for the purpose of procuring specific instructions to the American ministers at London, Paris, and the Hague, in favor of my agency; but he having declined giving them at that time, I embarked for Europe on the 1st of May, 1841.

On my arrival at London, on my way to Holland, I had several interviews with Mr. Stevenson, then American minister at the court of St. James; and communicated to him very fully, the objects of my mission. Mr. Stevenson, though uninstructed by the General Government on this point, interested himself at once, very warmly, in the subject; and advised an application forthwith, to Her Majesty's government, for permission to the agent to make selections and transcripts of documents in the British archives relative to our colonial and other history. A note was accordingly addressed to the Marquis of Normanby, on the 22d May, 1841, explaining the objects of the State in making the application, and requesting that the necessary facilities might be afforded me for accomplishing, with as little delay as possible, the purpose of my mission to England. This note was referred by the Marquis of Normanby, to Lord Palmerston, Principal Secretary of State for Foreign Affairs; and on the 20th July following an answer was returned to Mr. Stevenson, that Lord Palmerston felt some difficulty in acceding to my application; *but that if I would send to him a list of any particular documents I*

wished to obtain, his lordship would have them examined by some competent person, and if no objection should be found to their being communicated, they should be copied for my use, on the usual terms, at my expense.

Upon the receipt of this answer to my application, Mr. Stevenson immediately replied, explaining that *no particular documents* were asked for by the agent of New-York ; that the object of the State was to have its colonial history written from authentic documents, many of which were presumed to be in the State Paper Office, but whose particular character could not be known, and that they could not, therefore, be described ; that the limitations and restrictions imposed in former cases, were of course expected to be observed in the present, and that the agent would, in fact, consider himself subject to the control and pleasure of the department.

It was hoped that on a review of the subject, Her Majesty's Government would have looked more auspiciously upon the application, and that, so far from perceiving in it any thing objectionable, would rather have viewed the objects of the State as of a purely literary, and altogether praiseworthy character ; and, as such, commending themselves to the favorable and liberal consideration of an enlightened government. But the then ministry went out of office without having altered or modified their decision, which—considering the impossibility of my pointing out the particular documents, I might wish to have transcribed, without having the opportunity of learning even the date of one of them—amounted, in fact, to a refusal of the application of the State. While referring to this subject, I cannot omit availing myself of the occasion to acknowledge the warm and ready interest Mr. Stevenson took in the objects of the agency, and the personal obligations I feel for the courtesies he extended to the agent.

Meantime, pursuant to my instructions, and to Mr. Stevenson's advice, I had proceeded to Holland, with a view of investigating the archives of that country, for documents relating to our early colonial history ; intending, upon the termination of my researches in the Netherlands, to return to London, and avail myself of the expected liberality of the British Government. Immediately on my arrival at the Hague, I opened the business of my mission to Mr. Bleecker, then the *chargé d'affaires* of the United States near the King of the Nether-

lands. The well known interest of this gentleman in the cause of historical research, induced him to enter at once, cordially into the views of the State; and I gladly and gratefully embrace this opportunity to renew the expression of my thanks for those valuable counsels, and friendly efforts to further the objects of my appointment, which he was always ready to give, and anxious to make.

In order to obtain the necessary facilities for investigating the archives of the Netherlands, an application was addressed by Mr. Bleecker, on my behalf, to the Baron Verstolk de Soelen, Minister of Foreign Affairs. Upon my presentation to the King, a few days afterwards, His Majesty received me in the kindest manner, expressing much pleasure with the objects of my mission, and a warm interest in its successful accomplishment. The general direction of the Royal Archives being entrusted to the Minister of the Interior, the application was promptly referred to the Baron Schimmelpennick, the head of that department; and an interview was accordingly had with His Excellency, who at once informed me that he would give directions to the officer in charge of the archives, to afford me all facilities for the purpose of fully carrying out the objects of my commission, and which had been directed by the King himself, to be as liberal in their extent as the exigencies of the service would allow.

The Government Records at the Hague, are placed under the supervision of an "Archivarius," at present Yonkheer J. C. de Jonge, a gentleman of great intelligence and urbanity, and from whom I received numerous marks of kindness and courtesy, which I am happy to acknowledge. M. de Jonge, on my presenting myself at the archives, pointed out the various depositories in which the documents presumed to relate to the subject of my research were contained; and gave directions that every book and paper, known or supposed to contain information affecting our colonial history, be submitted, without reserve, to my inspection, and every arrangement made that could facilitate my labors.

The archives of the Netherlands, it is believed, constitute one of the richest depositories of historical information, to be found in Europe; commencing with the period of the Union of Utrecht, in 1579, and extending down to the French Revolution. They are contained in an immense suite of apartments in the old palace of the Binnenhof;

and the documents are, in general, very well arranged, though not all equally well preserved. The greater part are contained in parchment-bound volumes, in most instances paged and indexed for convenient reference. They consist, chiefly, of minutes of the proceedings of the States General, at their ordinary and secret meetings, kept by their *Greffiers*, or clerks; in which are entered, in detail, the resolutions of that body, on all matters coming before them. These registers commence with the year 1579, and are preserved in an unbroken series, from that date. The diplomatic correspondence of the Government, as well as copies of general letters, and also the instructions and commissions issued from time to time, are preserved in several separate series of books. The original papers and memorials received by the States General from time to time, are arranged on *Liasses*, or files, or are tied up in bundles, which are deposited in the *Secrete*, and *Loket*, Kas. These papers have suffered much more from the effects of time and exposure, than those in the bound volumes.

It was necessary that careful and laborious researches should be made in all these different repositories. Aided by the accurate knowledge and long experience of Mr. J. A. de Zwaan, the "Commiss Chartermeester" at the Royal Archives,—and whose enthusiastic and untiring co-operation I am proud to acknowledge, contributed in an essential degree to the success of the research,—I was unremittingly occupied during several months, in a toilsome investigation, in the course of which upwards of four hundred volumes and bundles of papers were carefully examined. Many of the documents were worm-eaten and decayed; and the circumstance that most of them were written in the perverse and obscure characters common in the seventeenth century, increased not a little, the difficulty of the research.

The results of my investigations in the archives at the Hague, however, strengthened the impression I had previously entertained, that though a great and valuable amount of information, on points either entirely novel, or at best but imperfectly known in our history, was there contained, the records of the Dutch West India Company, which had the supervision and direction of the colony of New Netherland, were the grand magazine in which I might hope to find those more particular details of voyages, discoveries, emigrations, settlements and personal narratives, which would be of the highest interest to the descendants of the early settlers, as well as to the his-

torian of New-York. Relying on the information which had been given me at the Hague, that these records, commencing with the period of the organization of the company in 1621, were preserved complete at Amsterdam; an order was accordingly obtained from the minister of the colonies, directing the keeper of the old East and West-India Company's papers at Amsterdam, to afford me every facility for examining the documents in his custody. The Archives of the city of Amsterdam were also presumed to contain important information relative to the colony of "Nieuw-Amstel," which the city undertook to manage in the year 1656; and a letter in my behalf was in consequence addressed by the Minister of the Interior to the Burgomaster. In further prosecution of my duty, I accordingly visited Amsterdam.

But on applying at the West India House, I was, to my infinite surprise and mortification, informed by Mr. de Munnick, the keeper, that all the books, documents and papers of every kind, belonging to the old East and West India Companies, of a date prior to 1700, had been sold at public auction, in the year 1821, by order of the Government of the Netherlands. That nothing should be left undone, however, I instituted a thorough search among the remaining papers, in the hope that something, however small, might have escaped the operation of the order. But I regret to say, that this examination was attended with no favorable result; and I reluctantly abandoned the cherished hope that the archives of the West India Company would have proved a rich mine of historical wealth to our State. Examinations were also made in the papers of the East India Company, in the hope that something might be ascertained relative to Hudson's voyage of discovery, which was made in their service. The only trace found of that voyage, is a memorandum in one of the "ship books," which accidentally escaped sale, stating that the yagt HALVE-MAAN, of forty lasts (eighty tons) burthen, had been sent "towards the north," in 1608. Unwilling, however, to abandon all hope of recovering a portion, at least, of the records which had been sold, I caused advertisements to be inserted in the most widely circulated journals of the country, requesting any person who might have in his possession any documents relating to the history of the colony of New-Netherland, to have the goodness to communicate with the (then) consul of the United States, at Amsterdam, Mr. J. W. Van den Broek.

(Senate, No. 47.)

The kind attentions and friendly exertions of this gentlemen, to further the objects of my visit to Amsterdam, have imposed on me an obligation which I would do great injustice to my feelings if I did not take this opportunity to acknowledge. It was subsequently ascertained that a portion of the records sold at Amsterdam, was in the possession of the original buyer, a person residing at the Hague. I purchased permission of him to make an examination of this portion, which was accordingly effected. Nothing, however, relating to our history was found; and the mortifying conviction is now forced upon us, that the papers of the West India Company relating to New-Netherland,—which, until the year 1821, were easily attainable by the State, and whose destruction has left such a chasm in the original materials for the illustration of our annals,—are now irrecoverably lost!

The application to the authorities of the city of Amsterdam, for permission to examine their archives, was at once acceded to, in the most courteous manner, and prompt arrangements were made to facilitate my investigation of the records in the Stad-Huys. Quite a number of interesting documents, relating to the city colony on the South River, were found, and copied.

Examinations were also made of the valuable collections of manuscripts and pamphlets in the royal library at the Hague; and the most courteous attention was shown by the estimable librarian, Mr. J. W. Holtrop.

The result of my researches in the various repositories in the Netherlands just referred to, is the procurement of sixteen volumes of transcripts, containing upwards of four thousand pages. As a full and accurate catalogue of the documents transcribed, is appended to this report, it is unnecessary to give any particular analysis of their character here. I will only remark that they commence with the year 1614, and extend down, in a tolerably complete series, to 1678, consisting chiefly of memorials and papers presented to the States General, respecting New-Netherland, and the proceedings of that body in relation to the various matters from time to time brought before them, affecting the colony and its inhabitants. The act of the Legislature directed me to procure, if possible, the *originals*, and if not, *copies* of all documents illustrating our history. I applied for the originals, but the regulations of office did not allow a compliance

with my request ; copies were therefore made of the papers selected. Not the slightest difficulty, however, occurred in obtaining these, and not a single objection was made to my having any document transcribed I wished. The most unbounded liberality was evinced on every occasion, by the government of that country to which we trace, with such affectionate veneration, the foundation of our State, and the most friendly and gratifying interest was always exhibited by the gentlemen connected with the different departments of the administration, with whom the business of my mission from time to time brought me into communication.

The investigations in the archives of the Netherlands being now terminated, I returned to London in December, 1841, to prosecute the duties of my mission. A new ministry, with the Earl of Aberdeen as principal Secretary of State for Foreign Affairs, had come into power, and Mr. Stevenson had been succeeded by Mr. Everett as Minister of the United States, near Her Britannic Majesty. At the request of the Governor, and justly appreciating the importance to the Union, as well as to the State of New-York, of the objects contemplated by the State, in sending an agent to Europe, the President of the United States had instructed Mr. Everett to apply to the British Government for such facilities as might be necessary for the successful prosecution of my proposed researches in England.

Directly on his arrival at London, I had an interview with Mr. Everett, and acquainted him fully with the objects of my mission, and with the previous steps that had been taken. It need scarcely be said that the views of the State were at once warmly and zealously entered into, by the distinguished gentleman who represents our country in England, and whose friendly and valuable counsels have laid me under obligations I shall always be proud to acknowledge ; or that it was fortunate for the cause of literature and historical investigation, that the Earl of Aberdeen was Foreign Secretary of Great Britain, when the agent of this state made a renewed attempt to obtain permission from Her Majesty's government to execute the duties of his mission. No time was lost ; and on the 23d December, 1841, Mr. Everett addressed a note to Lord Aberdeen, recapitulating the steps Mr. Stevenson had taken with the late ministry, and expressing a hope that the requisite facilities for the attainment of the objects of my mission would now be afforded by the Government of Great Britain ;

for which it is claimed that it has "never permitted itself to be surpassed by any other, in the countenance which it has at all times extended to every judicious effort for the promotion of useful knowledge." Some time subsequently, Lord Aberdeen having suggested that though it might not be possible for me to furnish a specific list of the historical documents desired, yet, that a general statement of their nature must be practicable, and would facilitate a decision on the pending application, I prepared a statement of the kind proposed, and as specific as the nature of the case admitted; which Mr. Everett transmitted to his Lordship, in a note dated 14th February, 1842, in which the purely literary character and objects of my commission were again urged, and the hope expressed that the synopsis I had prepared would remove whatever hesitation may have existed in reference to a compliance with my request.

It is unnecessary to detail the various difficulties that were encountered, and the many delays that occurred, before the desired permission was obtained. At length, on the 6th of April, 1842, I commenced my labors in "Her Majesty's State Paper Office." An order was sent by Lord Aberdeen to the keeper of the state papers, allowing me to inspect the documents in the Office relative to the Province of New-York; with the understanding that my examinations were to be made in the presence of an officer of the establishment, and that I was merely, in the first instance, to indicate, by slips of paper, the documents I might wish to transcribe, and not to transcribe, or make extracts of any of them, until the papers so indicated, should have been examined and allowed, on the part of Lord Aberdeen.

This order was interpreted by the keeper of the state papers, with such strictness, as to cause me serious embarrassment and inconvenience. I was not allowed to make the slightest note or memorandum even of the date of a document; which, under the circumstances—the mass of papers to be gone over, being so large—was desirable, and even necessary, in order to avoid the risk of marking duplicates, and the embarrassment of depending on memory alone. This, and other points—one of which was a permission to employ copyists of my own selection, by whom the transcripts could have been made at a much less expense than that incurred by the charges of the regular clerks of the office—formed the subject of a subsequent note of Mr. Everett to Lord Aberdeen. His Lordship prompt-

ly replied, giving me the further permission desired, respecting the making memoranda, &c.; but declining to accede to the request that I might be allowed to employ a private copyist. I was obliged, in consequence, to pay to the clerks of the office, 4d. sterling, for every folio of 72 words, that they transcribed.

“Her Majesty’s State Paper Office,” in London, is strictly a part of the sovereign’s own private library—an appendage to the Secretary of State’s Office. Being entirely a government establishment, it is not considered as on the same footing as the manuscript department of the British Museum, or other institutions of a like character. No person is allowed to visit the Office, for the purpose of consulting documents, until an order for the purpose has been obtained from one of the Secretaries of State, who alone have the right of granting the privilege. This order usually specifies the series of papers to which the visitor is to have access; and its directions are strictly and scrupulously followed by the keeper. This Office is the depository of all papers and despatches that pass through the offices of the Secretaries of State, which are there arranged under the superintendence of a keeper, deputy keeper, and other officials; and the accurate and perfect manner in which this is done, reflects the highest credit on the gentlemen to whom the Government entrusts this important duty. The building in which these papers are contained, was erected in the year 1830, in St. James’ Park, near the Government offices; and is, in every respect, well adapted to its purposes. In addition to the papers from the offices of the Secretaries of State, (among which is to be found a very voluminous correspondence with the governors and military commanders in America,) the State Paper Office now contains the whole of the records of the “Board of Trade,” down to its dissolution, in the year 1782; which were transferred to it by order of Government, in March, 1842. Upwards of two thousand large folio volumes, relating chiefly to the American Colonies, were thus added, in one mass, to this invaluable repository of historical wealth.

The general supervision and management of the British Plantations in America and elsewhere, was entrusted by King Charles II., by royal commission, dated 1 December, 1660, to a standing council, who were instructed to correspond with the several governors, &c.,

and in general to dispose of all matters relating to the good government and improvement of the colonies. Subsequent commissions were from time to time issued to various individuals, substantially of the same tenor, constituting them a Council for foreign plantations, for the time being. On the 21st of December, 1674, the king revoked the commission for the existing council, and directed their books and papers to be delivered to the clerk of the Privy Council. By order in council, dated 12 March, 1675, King Charles II. referred whatever matters had been under the cognizance of the late Council of trade and foreign plantations, to a committee of the Privy Council, consisting of the Lord Treasurer, the Lord Privy Seal, and others, and directed them to meet once a week, and report their proceedings to the King in council, from time to time. During the reign of King James II., the affairs of the Plantations continued to be managed by a similar committee of Privy Council; and upon the accession of this monarch, (6 February, 1685,) the Province of New-York having devolved to the crown, it was placed under the supervision of this committee. Upon the accession of King William III., in February, 1689, a committee of the Privy Council continued to manage the affairs of the plantations, until their growing importance suggested the necessity of a separate and distinct department of government, for their direction.

The year 1696 is the era of the permanent organization of what is familiarly known to our historians as the "Board of Trade." On the 15th May, in that year, King William III., by royal commission, constituted and appointed the great officers of state, for the time being, and certain other persons, "Commissioners during the royal pleasure, for promoting the trade of the kingdom, and for inspecting and improving the plantations in America, and elsewhere." This board was empowered and required to examine into the general condition of the trade of England, and of foreign parts, and to make representations to the king thereupon; to take into their custody all records and papers belonging to the Plantation Office; to inquire into the condition of the plantations; to examine into the instructions of the Governors, &c., and represent their conduct to the King; to present the names of proper persons for governors and secretaries, &c., in the colonies, to the King in council; to examine into and consider the acts passed in the colonies; to hear complaints, and make representa-

tions thereupon, &c. ; and with power to send for persons and papers. The Board of Trade and Plantations, as thus organized, was continued through the succeeding reigns, by royal commissions, until its final dissolution, by act of Parliament, in July, 1782.

The records of the Board of Trade were kept with much care and system. Their proceedings on all subjects brought before them were accurately entered in a series of large folio journals, commencing with 1696, and extending down to 1782 ; and which, including the records of the proceedings of the Committee of Privy Council, between 1675 and 1696, numbers about 130 volumes.

The documents relating to the affairs of each Province and Colony, were regularly and separately preserved in two series of books ; the one styled " Entries," in which were recorded all the letters and representations of the Board in reference to its concerns ; and the other, entitled " Papers," in which all the original documents received at Whitehall were carefully bound up. There are 123 large volumes of " Entries" and " Papers," relating to the Province of New-York, in the Board of Trade series ; commencing with 1664, and extending to 1782 ; in which are included the documents relating to the proprietary government under the Duke of York, which were transferred to the Committee for Foreign Plantations, &c., upon the devolution of the province to the crown, on the accession of King James II. Documents of general concern to all the Provinces and Colonies, were recorded and preserved in a separate series of books amounting to sixty, entitled " Plantations General."

The records of the State Paper Office properly, are not nearly so perfect, especially in the earlier periods, as those of the Board of Trade. It was only in matters of great secrecy and concern that the provincial governors were required to correspond directly with the Secretaries of State ; and it is probably in consequence of this, that there are only six volumes of New-York records from the Secretary's Office, between 1696 and 1752. These volumes are composed, chiefly, of letters from the Governors to the Secretaries, which are, in many instances, almost literal copies of those sent to the Lords of Trade. There are very few letters from the Secretaries to the Governors during this period. There are no Secretary of States' records whatever,

relating to New-York, between 1752 and 1762 ; but after this year, and down to 1781, the correspondence is full and voluminous ; that relating to this Province alone, filling nineteen large folio volumes, and comprising, as well, the letters of the Secretaries to the Governors. Besides the several series relating to the different Provinces, there is a set of volumes numbering eighteen, entitled "Plantations General," in which the general correspondence of the Secretaries with the Colonies, and with the Superintendents of Indian affairs, &c., between 1760 and 1781, is preserved.

In addition to the volumes above mentioned, amounting in all to 356, a series of books, sixty-two in number, entitled "Trade Papers," embracing a miscellaneous collection of documents relating to trade, and foreign plantations, from 1542 to 1761, was submitted to my inspection, agreeably to the terms of the Secretary of State's order. In the course of my researches I ascertained that there were other sets of books and papers, in which documents relating to our history were contained, but which my order, as it stood, did not allow me to examine. I was consequently obliged to apply to Lord Aberdeen for further permissions, which were granted ; and nearly a hundred other volumes and bundles of papers were submitted to my inspection.

Thus upwards of five hundred volumes and bundles of papers were thoroughly and carefully examined in the State Paper Office. Each document desired for transcription was indicated by a slip of paper, and subsequently re-examined by a gentleman connected with the Foreign Office, under Lord Aberdeen's direction. Such of them only, as were not objected to, were copied. The copies were made by the regular clerks of the Office, on the terms above stated ; and in every instance the orthography of the originals was scrupulously followed. In making my selections, the greatest care and caution was necessary in order to avoid marking duplicates of papers, which are very numerous ; and the immense number of the documents themselves, and the unexpectedly high charge for transcribing, were also causes of considerable embarrassment. I cannot close this reference to my researches in the State Paper Office, without bearing testimony to the excellent and orderly arrangement of every part of the establishment ; and I would be greatly wanting to my feelings if I were to omit an expression of my admiration of the politeness and attention of Messrs.

Charles Lechmere, and Robert Lemor, the deputy keeper, and chief clerk. To the latter gentleman particularly, I feel under great obligations, not only for his personal courtesies to myself, but for the ready and zealous interest he manifested in the success of the undertaking I was charged by the State to execute.

Presuming that the office of the Privy Council might contain information relative to the subject of my research, I addressed a note to Mr. Greville, one of the clerks in ordinary, requesting permission to examine its earlier records. A prompt and most courteous answer was returned, complying with my request; and I examined the registers under the care of the librarian of the archives, Mr. Henry Reeve, to whose kindness I am much indebted for the facilities he afforded me. Very few documents, however, were found relating to our colonial history. There are no separate papers whatever, in the Privy Council Office, of a date prior to 1700; but the registers of its proceedings are preserved complete from the time of Queen Elizabeth.

The library of the British Museum, already a magnificent monument of the public spirit of the nation, is daily becoming more and more worthy the admiration of the world. The collection of printed books and pamphlets, whose number, though not accurately known, certainly exceeds 300,000 volumes, is one of the most perfect in existence; and there are nearly 40,000 volumes of manuscripts. The arrangements for the examination of these literary treasures are very convenient; and though, in such a metropolis as London, some regulations are necessary to exclude improper persons, those regulations are so easy to be complied with, that the library may be said to be, in effect, open to the public. Through the kind and polite attention of Sir Henry Ellis, the principal librarian, I had every facility afforded me for examining the various printed and manuscript collections, and quite a number of transcripts were made of papers bearing upon our history. While speaking of this noble institution, I may be permitted to remark that no where else was I more strongly convinced of the indispensable necessity to the investigator, of accurate catalogues, both for printed books and for manuscripts. There is now in course of preparation a systematic alphabetical catalogue of the printed works, of such comprehensiveness, that the letter "A," alone, occupies about twenty large folio volumes. Notwithstanding the active

and skilful exertions of the learned and competent gentlemen who are engaged in this important work, it will be many years before it can be completed. The manuscripts are already catalogued, and their examination thus rendered perfectly easy. The Harleian, the Lansdowne, and the Cottonian collections, by means of their accurate catalogues, which were published some years ago by Government, are almost as well known to literary men on this side of the ocean, as to those in Europe; and each addition to the manuscript department, as it is received, is at once catalogued, and thus rendered accessible.

The Archbishopal Library at Lambeth, has also afforded us some interesting historical materials. My application to the Archbishop of Canterbury, for permission to make researches in the library, was promptly and cheerfully complied with; and it gives me great satisfaction to have this opportunity of acknowledging the very marked liberality of the venerable prelate, at the head of the English Church, as well as the urbanity and friendly interest displayed by His Grace's librarian, the Rev. S. R. Maitland, in making every arrangement for my convenient examination of the documents in his custody.

From the various Repositories in London to which reference has just been made, I procured nearly seventeen thousand pages of transcripts of documents relating to our history, which fill forty-seven volumes. A complete and accurate catalogue of the "London Documents," is appended to this report; by means of which, the character of each paper can be at once ascertained; and any particular analysis of the series, at present, is thus rendered unnecessary. It commences with 1614, and ends with 1782; comprising the official correspondence of the Governors of New-York, from its surrender by the Dutch in 1664, to the end of the Revolution; as well as various documents of interest, received from private hands. In making my selections, the greatest care was taken, to avoid procuring papers known to be already in the Secretary of State's Office, at Albany. I was unable to find any trace of the original books of records of the Indian Commissioners, which are supposed to have been removed from this State during the revolutionary war; but copies have been made of all Sir William Johnson's official letters to the British Government, which remain in the State Paper Office, as well as of the greater part of the proceedings respecting Indian affairs, which were from time to time sent to London.

It will perhaps be noticed that previous to 1674, there are no despatches or communications from the Duke of York or his secretary, to his officers in New-York; and but few from them, to His Royal Highness. The first Entry Book, or Record of Letters from the Duke, commences with 1674; and from that period they are tolerably well preserved. There are several deficiencies in the series of letters from Governor Nicholls; and very few of Governor Lovelace's communications were found. There does not seem to have been any file of Governor Andros' letters to the Duke, or Sir John Worden, handed to the Committee for Trade and Plantations, when the affairs of the Province came under its supervision, upon the devolution of New-York to the crown, on the accession of King James II.; but after that date the records are much more perfect. After the final organization of the Board of Trade, by King William III., in 1696, the New-York papers are full and complete.

The policy of France in regard to her Canadian Possessions—the establishment of her military positions on our frontiers—and her negotiations with the Indian tribes on our borders, and within the very limits of our territory itself, are directly and intimately connected with our Colonial History; and her long struggle to maintain her influence in the northern portion of our continent, affected, in no small degree, the condition, disposition and purposes of the People of New-York. It was with a view of obtaining authentic historical materials illustrating these points, that an examination of the archives of the French Government was made a part of my duty.

Having made some progress in my researches in London, and commenced the transcription of documents there, I wrote to General Cass, then minister of the United States at Paris, explaining the objects of the State, and requesting his intervention with the French Government, for the purpose of procuring me permission to examine its archives, for papers relating to Canada and New-York. A simple statement of my object, was all that was necessary to awaken the warmest interest of that eminent gentleman; and he forthwith applied on my behalf, to Admiral Baron Duperré, then Minister of the Marine and the Colonies, for permission to examine the papers relating to Canada in the Bureaus of his Department. An answer was promptly returned, authorizing me to make the researches I wished, without limitation; and adding, that "all the facilities he can desire, will be

accorded" to the Agent. I will only remark, in passing, that this liberality did not prove to be mere formal phrase.

In further prosecution of the duties of my mission, I accordingly went to Paris in June, 1842, and commenced my examinations in the archives of the Marine and the Colonies. The general management of the French dependencies in America, having been, from an early period, entrusted to this department, its archives are very rich in matters relating to their history. They consist chiefly of instructions of the French Government to its agents in America, letters and despatches to the King and his Ministers, and original papers from the Colonial authorities to the home Government; correspondence with the neighboring English Colonies; reports of interviews with the Indian tribes; plans of campaigns, and details of battles and skirmishes, &c. &c.

The documents relating to Canada and New-York are contained in two several divisions. The one is a series of bound volumes, commencing with the year 1663, and ending, very abruptly, with 1737. It comprises about 70 volumes, and contains the despatches and commissions of the King and his Ministers to the Governors and other functionaries in the French colonies. It is greatly to be regretted that the volumes subsequent to 1737, appear to be missing. The other, and by far the most fertile repository, is a series of upwards of an hundred enormous "cartons" or port-folios, each larger than two ordinary folio volumes, and in which, at the time of my examination, were placed loosely, and without chronological order, or even the least attempt at arrangement, a mass of original documents relating to Canada, from 1630, to the Treaty of Paris, 10th February, 1763. The state of deplorable confusion in which I found the contents of these cartons, can scarcely be conceived by any one who has not made personal investigations; and it must be very evident, that it was embarrassing in no small degree. It not only very greatly increased the labor of the research, but it was found that in many instances, papers of presumed importance, were missing from the mass. It is hoped however, that under the superintendence of the present competent and intelligent chief of the Archives, M. Davezac, these valuable papers, whose present confusion, (one of the results, perhaps, of the revolutionary fury of 1793,) exhibits such a striking contrast to the

system and order that generally prevails in the French Government Bureaus, will soon be arranged in a manner consistent with their high importance and worthy the dignity of the nation. Several months were occupied in a careful and toilsome investigation of these documents ; and such as were found to relate to our history were selected and transcribed.

Knowing, however, that the archives of the Department of the Marine and the Colonies, was not the only source from whence to obtain information, an application was addressed to the Minister of War, Marshal Soult, Duke of Dalmatia, which was promptly answered by a letter stating that orders had been given for my admission to the Depôt and Archives of the War Department, "for the purpose of examining and copying all the documents relative to the operations of the French, in Canada, until the period of the Treaty of Paris, in 1763." This frank and liberal order, so characteristic of the gallant soldier who presides over the Council of Ministers, was very handsomely carried into effect by General Baron Pelet, the Director-General of the Archives of the Department ; to whose obliging and polite attention I am very greatly indebted for the facilities he afforded me for examining the documents in his custody. The Archives of the Department of War present a very gratifying contrast in respect to arrangement, to those of the Marine and the Colonies. The papers are chronologically arranged in bound volumes, and their examination was as agreeable and pleasant, as that of the cartons of the Marine was laborious and annoying. The documents selected and transcribed, relate chiefly to the period between 1755, and the treaty of Paris ; and comprise the correspondence of the military commanders in America, with the French Government.

An application was also made for permission to examine the Archives of the Department of Foreign Affairs, for papers relating to the history of Canada, and the intercourse between that Colony and the Province of New-York ; but M. Guizot, in his reply to Gen. Cass' note, thus expressed himself : "I would be very happy to comply with your request, if my Department possessed any documents relative to this Colony ; but the Ministry of the Marine, to which you have already applied, is the only one which can furnish you with in-

formation on this subject, Canada having always been under its supervision, and never having had any relations with my Department."

Researches were also made in the collections in the Royal Library at Paris; a most full and unqualified permission for which purpose, was granted by M. Villemain, the Minister of Public Instruction, and every facility afforded by the gentlemen in charge of this magnificent institution.

My investigations in the several Repositories at Paris, just alluded to, occupied me several months, and resulted in the procurement of seventeen volumes of transcripts, containing upwards of six thousand pages. A full and accurate catalogue of the "Paris Documents," in which every paper, its date, and a reference to its page, is indicated, being also appended to this report, renders any particular reference to their contents, unnecessary in this place. They commence with 1631, and extend to 1763; including selections of the correspondence of the Governors of Canada with the authorities in France, respecting Indian affairs, the relations with this Province, &c.; as well as the despatches of the military commanders, during the romantic and exciting period in our history, of the "French War."

As at the Hague, and in London, the regulations of the offices at Paris did not allow me to execute that part of the law establishing the agency, requiring the procurement, if possible, of original documents. Transcripts were made, therefore, of the papers selected; and the orthography of the originals was followed as accurately as possible. In closing this reference to my researches at Paris, I cannot forbear the remark, that the proverbial reputation of the French Government, in regard to all matters connected with scientific and literary investigation, was amply sustained in the courtesies that were extended to the agent of this State; and that the historical treasures which were found in its Archives, are only equaled by the prompt and generous liberality with which they were thrown open to my inspection. That much of the good feeling exhibited, was owing to the high standing of our Minister at the French Court, is unquestionable; and I feel it a duty, not less incumbent than grateful, again to acknowledge the marked kindness of General Cass, and the personal and zealous exertions he never failed making, to render my visit to Paris most advantageous to the State.

The researches in the French Archives being completed, I returned to London, and was some time occupied in further investigations, and in making preparations for my return to America. The documents transcribed at Paris and in London were carefully packed, insured, and shipped for New-York; and my arrangements having been completed, I embarked for home, on the 7th July, 1844.

From this detail of proceedings, it will be perceived that the execution of my mission was attended with considerable embarrassment. This occurred chiefly in London, where the regulations of office were much more stringent than at the Hague, or in Paris. In both these latter places, there was no difficulty experienced, either in obtaining access to the Archives, or in procuring transcripts at reasonable rates. The price paid for copies, was about eleven cents for each page. In London, however, as before stated, my application for permission to employ a private copyist having failed, I was obliged to pay to the regular clerks in the State Paper Office, 4d. sterling for every folio of seventy-two words, or about twenty-five cents for an ordinary page transcribed. This circumstance, and the unexpectedly large number of volumes to be examined, caused me much embarrassment. It became desirable to limit my selections as much as possible, in order to keep the expenses within the amount of the funds appropriated for the agency; while at the same time my duty did not allow me to pass by a single document coming under my observation, "important" to illustrate our history. I have before stated, that in the course of my investigations in the State Paper Office, I ascertained that there were other series of books and papers than those the terms of my original permission allowed me to inspect, containing information respecting our history; and that a subsequent order from Lord Aberdeen, gave me the liberty to examine a large number of additional volumes. I am far from affirming however, that every thing in relation to our history in the British archives, has been obtained; though I think it may safely be said that the greater and more valuable portion of the materials there preserved, has been secured. Had sufficient funds been placed at my disposal, I should have pursued my researches, until every thing accessible had been obtained; and should especially have endeavored to procure copies of the correspondence of the British military commanders in America, from the surrender of Canada, to the end of the American revolution.

The selection of documents was a point necessarily left to the discretion of the agent, and in the execution of this important duty, I adopted for my rule a principle which cannot be better expressed than in the words of the Editors of the "Clarendon State Papers," who say in their preface—"In so large a collection, there occurred, as might well be expected, some papers of a private nature, others of no consequence to the public. To separate these from the rest, was a point left to the discretion of the Editors, by the Trustees of the late Lord Hyde. Such, therefore, as appeared to them in either of these lights, are rejected from publication. They have used their best judgment, and the utmost caution, in acquitting themselves of this trust ; and if there are still any given which may appear to some to be scarce worthy of publication, they desire it may be considered that men's ideas of such matters are often very different, and that any particular paper, which upon being perused apart from the rest, may seem of too little consequence to merit the public notice, would yet have been very improperly suppressed, either because it may be connected with, and tend to illustrate a more interesting paper, or on account of some other circumstance which may not immediately occur to the reader."

Immediately on my arrival in New-York, in August last, I waited on Governor Bouck, and acquainted him with the results of my mission. As the transcripts made in London and in Paris were unarranged, and as it was essential to their usefulness that they should be disposed in accurate chronological order, bound into volumes, and carefully indexed, before being deposited in the Secretary of State's Office, the Governor thought it best that I should occupy myself with this duty, and report fully to the Executive upon its completion. I have, accordingly, been diligently engaged in the execution of this work, since August last.

The transcripts were all separately made, and in such a manner that they could be afterwards arranged in proper order. This was necessarily the case, as the originals were not all contained in one particular set of books or papers, but were scattered through many and various series. The documents copied at the Hague, and in Amsterdam, were all arranged and indexed by myself, during leisure evening hours, while in London, in the winter and spring of 1843 ; and were bound and sent to Albany in the summer of that year. The "Holland Documents" occupy, as before stated, sixteen volumes, and have been

for more than a year in the Secretary of State's office. In arranging the "London Documents," great care was necessary, in order to avoid the apparent confusion of dates, caused by the use of the Old Style, which pervaded in England till the year 1752. It is believed, however, that this point has been carefully guarded, and that the plan I adopted, viz: the use of the *Historical* year, (which commenced on the 1st of January,) instead of the *Legal* year, (which commenced on the 25th March,) and of the *Old Style*, until 1752, when the act of Parliament took effect, will be found to have been judicious, and to meet the approbation of the investigator. The "Paris Documents" are arranged according to the *New Style*, which was adopted in France in 1582.

The calendars to the "Holland," "London" and "Paris" Documents, appended to this report have been prepared with much care, and it is hoped will be found useful. They indicate the number of each document in the volume, its general scope and character, its date, and its page; and thus, persons at a distance will be enabled to ascertain at once, the contents and the bearing of each paper in the whole series of eighty volumes of European Transcripts.

By the act of the 2d May, 1839, establishing the agency, the sum of four thousand dollars was appropriated towards defraying its expenses. On the 11th of April, 1842, a further sum of three thousand dollars was appropriated by law, for its prosecution; and on the 13th of April 1843, a further sum of five thousand dollars was appropriated by the Legislature. These several appropriations, amounting to twelve thousand dollars, have been drawn from the treasury and entirely exhausted in defraying the expenses of my mission; accurate accounts for which have been rendered to the Comptroller. I will only add, that I have advanced from my own private means, a considerable amount in addition, which has been applied to defraying the expenses of transportation, insurance, binding, and other incidentals, connected with the arranging and cataloguing of the documents; in which duty, as before stated, I have been constantly occupied since the month of August last.

I have endeavored to lay before your Excellency, as full and as concise a report as possible, of the execution of the duties of the agency I had the honor to have entrusted to me by the Government

[Senate, No. 47.]

4

172589

of my State. The whole question of this agency, and of its results, is now before my fellow-citizens, and to their judgment it is cheerfully submitted. Under any circumstances, and in any event, and however unworthy the instrument selected to execute her high commission, it must ever be a source of proud reflection, that the State of New-York—not less faithful now, in her time of power and greatness, to her honor and to her fame, than in her day of difficulty and oppression to the principles she then so fearlessly asserted—has been among the foremost of the confederation to vindicate her self-respect to the world, by rescuing from obscurity and long neglect, the scattered memorials of her colonial existence, to place them side by side the records of her independent progress.

I have the honor to be, Sir,

Very respectfully,

Your Excellency's obedient servant.

J. ROMEYN BRODHEAD.

CALENDAR,
TO THE
HOLLAND DOCUMENTS,
IN THE
OFFICE OF THE SECRETARY OF STATE
AT ALBANY;
TRANSCRIBED FROM THE ORIGINALS IN THE
ROYAL ARCHIVES AT THE HAGUE,
AND IN THE
ARCHIVES OF THE CITY OF AMSTERDAM,

Under and by virtue of an act of the Legislature of the State of New-York, entitled "An act to appoint an Agent to procure and transcribe Documents in Europe relative to the Colonial History of this State," passed May 2, 1839.

By JOHN ROMEYN BRODHEAD,

AGENT UNDER SAID ACT, &c.

NOTE.—The documents in Volumes 1 to 14 inclusive, were copied from the originals in the ROYAL ARCHIVES AT THE HAGUE. Those in volumes 15 and 16, were copied from the originals in the ARCHIVES OF THE CITY OF AMSTERDAM. The documents in the first 14 volumes, are arranged in reference to the date of their reception by the States-General, and the action had upon them in that body.

There are no documents in the Archives of the DUTCH WEST INDIA COMPANY AT AMSTERDAM, of an earlier date than the year 1700. All the books and papers of that Company, of the seventeenth century, were sold by public auction in the year 1820, by order of the Government of the Netherlands.

*. * ☞ As early as 1575, the year was reckoned in the Netherlands, as commencing on the 1st of January. The Gregorian, or *New Style*, was adopted in 1582, by the Provinces of Holland, Brabant, Flanders, Artois and Hainault; but Guilderland, Zutphen, Utrecht, Friesland, Groningen and Overysse, continued to use the old calendar till 1700. The dates of the documents in the following volumes are, almost invariably, according to the *New Style*, which seems to have been used by the States-General from and after its adoption by the Province of Holland.

AND IN THE

LIBRARY OF THE ARCHBISHOP OF CANTERBURY,

AT LAMBETH, IN LONDON.

Under and by virtue of an act of the Legislature of the State of New-York, entitled "An act to appoint an Agent to procure and transcribe Documents in Europe relative to the Colonial History of this State," passed May 2, 1839.

By JOHN ROMEYN BRODHEAD,

AGENT UNDER SAID ACT, &c.

NOTE—The Documents in the following volumes, have been arranged, as nearly as may be, according to strictly chronological order ; and without any regard to the various original Repositories whence they were procured. In some instances, papers were found having no dates marked upon them. They have been placed, however, according to their periods, as nearly as these could be ascertained, by internal, or other evidence. Enclosures have always been placed next after the letter or document transmitting them.

•• Much confusion has existed in English History, owing to their being two modes of computing dates. For a long time, the *Historical* year was reckoned from the first day of January ; while the *Civil, Ecclesiastical, and Legal* year, began in the 14th century, to be commenced on the 25th day of March. In consequence of this difference, and to avoid mistakes, it was usual to add the date of the *Historical* to that of the *Legal* year, when referring to any date between the first of January and the twenty-fifth of March.

The *Julian, or Old Style*, and the practice of commencing the *Legal* year on the twenty-fifth of March, subsisted in England until the 24th George II., 1751, when an act of Parliament passed, entitled, " An act for regulating the commencement of the year, and for correcting the Calendar now in use." By this act, it was directed that " the supputation according to which the year of Our Lord began on the twenty-fifth day of March, shall not be used after the last day of December, 1751," and that the first day of January next following, should be reckoned as the first day of the year 1752. It was also further directed that the day next following the second of September, 1752, should be reckoned as the fourteenth day of September, omitting the eleven intermediate nominal days of the common calendar. All public and private proceedings, since 1752, have consequently been dated according to the *New Style*.

§ In the following volumes, the Documents have been arranged according to the *Historical*, and not the *Legal* year ; and according to the *Old Style*, until the year 1752, when the act of Parliament took effect. J. R. B.

TRANSCRIBED FROM THE ORIGINALS IN THE
ARCHIVES OF THE "MINISTÈRE DE LA MARINE ET DES COLONIES,"
OF THE
"MINISTÈRE DE LA GUERRE,"
AND IN THE
"BIBLIOTHÈQUE DU ROI,"

AT PARIS:

Under and by virtue of an act of the Legislature of the State of New-York, entitled "An act to appoint an Agent to procure and transcribe Documents in Europe relative to the Colonial History of this State," passed May 2, 1839.

By JOHN ROMEYN BRODHEAD,

AGENT UNDER SAID ACT, &c.

NOTE.—The dates of the Documents in the following volumes, are, almost invariably, according to the *New Style*.

The various usage in France, respecting the computation of dates, was finally settled by the edict of Charles IX., in January, 1563, and by the edict dated at Roussillon, in Dauphiny, on the 4th of August following; by which, the 1st of January was fixed upon as the commencement of the year.

The *Gregorian*, or *New Style*, was adopted in France, on the 20th of December, 1582; the 10th of which month being called the 20th, pursuant to letters patent of Henry III., dated on the 3d of November preceding.

J. R. B.
