PREFACE.

In presenting to the patrons this their first issue of the St. John's, Harbor Grace and Carbonear Directory, the publishers wish to say that every attention has been given in collecting the necessary information to insure a complete and reliable work. They hope that those criticising it will bear in mind the many difficulties they had to contend with, owing to the insufficient numbering of the streets and that a great many of them have not even been named. The St. John's portion of the work contains 10,400 names, being double that of the last issue. In conclusion, they wish to thank all who assisted the canvassers, and especially wish to thank the business and professional people for the liberal patronage accorded the work.

ST. JOHN'S.

The commercial metropolis of the island, is situated on the eastern shore of the Peninsula of Avalon, 60 miles north of Cape Race, in latitude 47° 33′ 33″ N., and 52° 44′ 10 of west longitude. It is 10° 52' east of Halifax, and stands on the most eastern portion of the American land, Cape Spear, five miles south of St. John's, alone projecting a little further towards the Old World. It is 1,000 miles nearer England than New York, and but 1,640 miles from the coast of Ireland. There is no more striking or picturesque view than that presented on the approach to the harbor. At the entrance called The Narrows, the hills rise abruptly on each side to the height of about 600 feet. On the top of one side, called Signal Hill, stands the block house for signalling vessels, on the summit of the other side stands Fort Amherst Lighthouse; at the foot of this and along the shore is situated the vats for the manufacture of seal and cod Most of the merchants have premises and wharves at this side for the transhipment of articles of export, here is also situated the Dry Dock, 600 feet in length, and 83 feet in breadth, and 26 feet in depth, capable of admitting the largest steamer afloat. Vessels of the largest tonnage can enter the harbor at all periods of the tide, the rise of which does not exceed four feet. The harbor is one mile long, and nearly a half a mile in breadth, the entrance through The Narrows being about 1,400 feet. The city is built on the northern side of the harbor, on a sloping hill, the principal street running parallel with the harbor. Water street, where nearly all the heavy business is done, presents a substantial appearance, the houses being of stone and brick. The upper portion of the business houses are occupied by the proprietors in winter; in the summer they reside in the country. Stores, warehouses and wharves project from behind those on the south side to the water. Within the past year, since the management of local affairs has passed from the Government to a City Council many improvements have been made and the sanitary condition of the city is receiving careful attention. There is a plentiful supply of excellent water, brought from Windsor Lake, 5 miles distant and 500 feet above the level of the sea. Among the public buildings the following are the most important: Government House, erected in 1828, cost £30,000; Colonial Buildings, erected in 1847, cost \$100,000; the Athenaeum, containing a library of 6,000 volumes, and a hall capable of seating 1,000 people, completed in 1877, cost \$58,000; the Post Office, St. Patrick's Hall, Methodist College and

ATLANTIC HOTEL.

the Atlantic Hotel, which was opened in May, 1885, and cost about \$70,000. It is a handsome building, the apartments being airy, cheerful and splendidly furnished, capable of accommodating 70 guests. All modern improvements have been introduced and careful provision is made for the comfort and accommodation of visitors and guests. It contains dining-hall, gentlemen's and ladies' parlors, private parlors with rooms en suite, billiard and smoking rooms, lavatories, baths and general convenience on each floor. It is now under an entirely new management, and nothing will be spared to bring it on a par with Canadian and American Hotels. A first-class chef has been specially engaged from London to superintend

English and Roman Catholic cathedrals, St. Thomas and St. Mary's

(C of E), St. Patrick's (RC), four Methodist churches, St. Andrew's Presbyterian, (there is a new one under erection,) and the Congregational church. There are several manufacturing establishments here, three foundries, one stove factory, one nail factory, three machine shops, two boot and shoe factories, three furniture factories, two tobacco factories, three biscuit factories and one factory for the manufacture of cables, ropes.etc., in addition to which are the seal and cod oil factories on the south side. There are two banks besides the Government Savings Bank. There is a Public Hospital, Penitentiary and Lunatic Asylum. The Newfoundland railway runs from here to Harbor Grace, a distance of 84½ miles. Telegraph, the Anglo-American Telegraph Co. Population, about 28,000.

Fire Brick Oven cooking stoves.

We have much Pleasure in introducing to the House-keepers of Newfoundland this newly-patented improvement in the construction of Cooking Stoves, which, from the many advantages gained after much thought, labor and expense, places its good qualities foremost among those of the many coal-burning stoves of the day.

1.—We claim for it that the introduction of Fire Brick, as an oven, secures perfect baking.

2.—That the heat will be uniforminall parts of the oven.

 That less fuel will be required for all purposes, baking or cooking.

 That no more fuel will be necessary during the process of baking than what is required in ordinary boiling or cooking.

5.—That the heat of the oven will be retained a much longer time, even should fire go down.

6.—That material, being of good thickness, will last longer, and be more easily replaced if worn out.

The operation of this stove is perfect, and is guaranteed to be both a quick and even baker; more so than either wrought or cast iron oven stoves or ranges of ordinary construction, either elevated or otherwise.

It is well known to all housekeepers what the advantages of Fire Brick Ovens are, in the working of bakers' ovens, of very large size. This stove combines them all in the more compact form suitable for small families.

This stove has been got up to supply a long-felt want, and will effectually meet the assertion that is often heard, that cast iron ovens give a peculiar taste to meat cooked in them. As these advantages are appreciated by house-keepers they will be adapted in the near future to other stoves, of a larger capacity, suitable for large families, hotels, etc., etc.

OUR TERMS.

All property placed in our hands verbally or otherwise, is understood to be subject to the following rules and rates, from which there will be no deviation, except it be put to writing at the time of placing the property on our list:

- 1.—We look for commission always to the seller.
- 2.—Owners must set the prices at which they will sell, on which, if obtained, our commission will be based. We shall, in no case, undertake to get our pay by asking any advance on such prices.
- 3.—Property once placed on our list, will be considered on sale at the price stated, until withdrawn in writing.
- 4.—Information obtained from or through our office, directly or indirectly, entitles us to our commission.
- 5.—Commission is due and payable upon the contract, sale or exchange of property.
- 6.—Rates of commission, 5 per cent., advertising, and all out-of-pocket expenses

LUNATIC ASYLUM.

All communications relative to Patients in the Lunatic Asylum should be addressed to the Attending Physician.

Attending Physician.

All Patients seeking admission to the Asylum should be brought to the office of the Attending Physician, No. 1 Cathedral Hill, between the hours of 8 and 10 in the forenoon, 2 and 3 in the afternoon, and 7 and 8 in the evening that the admission papers may be examined, and the Head Attendant at the Asylum advised by telephone to make arrangements for such Patient.

No Patient will be admitted unless provided with the Form of Admission supplied by the Board of Works, signed by a Physician, and approved of by the Chairman Board of Works.

Physicians are particularly requested to see that all answers are properly given by relatives, certifying to the insanity, and that all possible information relative to the Patient's personal and family history is furnished. Any neglect may necessiate a further medical examination here.

HARBOR GRACE DIRECTORY.

ALD 337

HARBOR GRACE.—The second town of commercial importance in the Island, is situated on the north side of Conception Bay. The harbor is about five miles long and has two light-houses; the Harbor Beacon being a double light, one being placed above the other. Harbor Grace Island Light, which shows the entrance to the harbor, is a revolving light, showing alternately two white and one red lights. Harbor Grace has a large fishing trade, the curing of which, and the manufacture of seal and cod oil, are the principal industries. Messrs. J Munn & Co, who may be classed as the largest merchants on the Island, have added to their already large fish trade the packing of boneless cod, and are now erecting a factory for the manufacture of glue, so as to use up the bone and skin. There are no public buildings to speak about. Unfortunately, about a year ago the pride of Newfoundlanders, "Harbor Grace (R C) Cathedral," was burnt to the ground. The interior decorations were on a grand scale, and, it is said, were not equalled by any other church in the colonies. It is, however, now being rapidly rebuilt under the personal supervision of the Bishop. Distance by rail from St. John's, 86 miles. Telegraph, Anglo-American Telegraph Co. Mail daily. Population, 7,000.
