Miramichi Advance. CHATHAM, N. B., APRIL 4, 1895. Preachers and Politicians. Rev. W. W. Brewer, a Methodist minister stationed in Moncton, and who, evidently, has a desire to attain to notoriety through sensational methods, took advantage of the public mind being recently directed towards politics to attract attention to himself. He is, evidently, not very well acquainted, personally, with men in public life, or at least with those prominent and influential, but he does not appear to have prevented him from dealing with public men as a whole, and leading up all kinds of "Brewerian" ideas in the manner of a man who stands at the sacred desk and preaches the gospel. (Such language might be defined as "liberal" language.) Yet how grossly untrue, how egregiously unjust it would be to the most noble of all vocations.

defended in a technical way by the claim that there are a few men in some parishes who are understood to have been guilty of public or private theft, or perhaps of perjury or some other offence of a criminal character. The fact that these men have not been convicted does not, in any way, lessen the offence. It may even be contended that men who have been convicted in the Legislature have become convicted. But there are men in the penitentiaries who were once preachers. Mr. Brewer's own church has convicted of "official" conduct preachers who once stood at high as he does. Justice in this province has found clergymen guilty of penitentiary terms. Officers of the holy calling have confessed their criminality and repented their offence. Shall we, then, say that "the profession shall be held with men as half a guilty as men" who stand at the sacred desk and preach the gospel? (Such language might be defined as "liberal" language.) Yet how grossly untrue, how egregiously unjust it would be to the most noble of all vocations.

Worldly. It is a pitying to read in the World that the nomination of candidates made for elections that were expected, but did not come off, still hold good. According to the World's belated view, then, the failure of the main condition, viz., that there was to be a general election, has nothing to do with the nomination. It is a pitying to read in the World that the nomination of candidates made for elections that were expected, but did not come off, still hold good. According to the World's belated view, then, the failure of the main condition, viz., that there was to be a general election, has nothing to do with the nomination. It is a pitying to read in the World that the nomination of candidates made for elections that were expected, but did not come off, still hold good. According to the World's belated view, then, the failure of the main condition, viz., that there was to be a general election, has nothing to do with the nomination.

Chatham Public Building. Another word in the matter of the Dominion public building in Chatham is recorded by the Chatham government organ as follows: Mr. McCordock, of the Public Works Department, has been appointed to the position of Inspector of Buildings in Chatham. He is better acquainted with such work as fitting up post office boxes than the dreg inspector, and must be of use to the Dominion Department, and that will enable the latter to hang over the construction of the Chatham building as it has done. The whole matter is unbusinesslike and unprofitable. It is a pitying to read in the World that the nomination of candidates made for elections that were expected, but did not come off, still hold good. According to the World's belated view, then, the failure of the main condition, viz., that there was to be a general election, has nothing to do with the nomination.

Advances Scientific Miscellany. Jamaica is pointed out as the land of ferns, its species numbering between 400 and 500. About 4,000,000,000 potatoes of date, Dr. Aitkin estimates, are added to the air by every puff of a cigarette smoker. An important discovery by M. Piatet, an Austrian engineer, is that sea-water may be freed from salt and rendered potable by forcing through a tree-trunk. Results of a German inquiry prove that overhead wires tend to reduce the violence of thunderstorms and lessen the danger from lightning. Cases of damage from lightning are reported from the time of the war in places without telephone systems as in those having them. Piatet's discovery that liquids may be artificially aged by cold is about to be applied commercially in a proposed frigorific laboratory in Paris. The liquor is gradually cooled to 300° C below zero, then gradually brought again to the ordinary temperature. Since Homer's time vast falls of organic particles, as well as of meteoric dust, have been known at various times and places. It is proved that the dust which is carried and set some of the most important of the organic matter may have largely come from space, and that showers of still-living germs may explain the sudden appearance and rapid spread of many epidemics.

Ontario Crows Land. The Ontario Crows Land has been reported from trials of a new steam-turbine material called "Crownite." The substance consists of fine metal shavings, ranging from mere powder to coarse sand, which have been piled to form a hard mass—but without producing brittleness. The material is subjected to sand-blast requiring no change of machinery for sawing granite and other stone, and is said to be capable of doing the work of diamond sand at a tenth of the expense. It is also effectively used in sand-blast apparatus, and in place of diamond drills for boring an engine. A ton of it has been found to equal 300 tons of sand for sawing and polishing. It does its work by crushing grinding past or over which it rolls, and it does not—like sand, emery or corundum—become partially imbedded in the blade or rubber. A great reduction of cost and driving force, as well as in wear and tear, is claimed. In the literature accessible, Maitland last year reported 505 cases of second attacks of small-pox, and 9 of third attacks; 29 of second attacks of scarlet fever; and 4 of third; 30 of second attacks of measles, and 1 of third; and 202 of second attacks of typhoid fever, and 5 of third; and 29 of second attacks of cholera, and 3 of third. Only 3 cases of third attacks—1 of typhoid fever and 2 of cholera—were discovered. Sorenberg in a recent paper to the Biological Society of Washington, noted that while the protection afforded by a single attack of small-pox is in a considerable number of infectious diseases generally permanent, it is in other diseases more or less temporary, and it varies not only with the disease but with the individual; the family, and the race. In some diseases, such as pneumonia, influenza, and certain cholera, it is difficult to determine from clinical experience whether a first attack exerts any protection, but experiments on the lower animals make it probable that a certain degree of immunity is afforded in all infectious diseases of this kind. In the malaria fever, which is due to a parasite of a different class, a first attack, on the contrary, predisposes to a subsequent one. The principal factor in the production of acquired immunity is now believed to be the introduction into the blood of the organism of a certain amount of the toxic products of the particular pathogenic organism to be resisted, or destroyed, the germ itself. Our knowledge of the antitoxins—which do not as a rule have a germicidal action, and otherwise differ from the toxins, to which natural immunity is due—has been greatly advanced since the discovery that the blood of an animal immune from anthrax contains some substance neutralizing the anthrax bacillus, and that the pathogenic power of virulent bacilli of diphtheria is retained may be similarly neutralized by the blood of an animal immune from these diseases. It is also proven in 1887, and confirmed in 1894, that animals may acquire a certain immunity from small-pox.

Manitoba - The School Question. Winnipeg, March 25.—No amendment was offered by the Opposition this afternoon in the Legislature on the school question, and after Lieutenant-Governor Schellin had given his usual address, the Premier's House adjourned till May 9, when Premier Greenway will announce the Government's reply to the remedial order from Ottawa. Members of the Opposition have been having a good deal of conversation with the Premier, and it is believed that the Premier will announce the Government's reply to the remedial order from Ottawa. Members of the Opposition have been having a good deal of conversation with the Premier, and it is believed that the Premier will announce the Government's reply to the remedial order from Ottawa. OLD WARWICK CASTLE. SCENE OF THE MOST BRILLIANT BALLS OF THE CENTURY.

Each XV Coloured—Electric Lights and Two Thousand Watt Candles—The Countess of Warwick in Follies and Society—Her Governmental Views.

It would be hard to say that the Warwick Castle balls were the most brilliant of the century in England. Writing for the time of Louis XV. and Louis XVI. and not only was the aristocracy anxious to attend in the dress of that period, but even the maidens of New York's Venetian orchestra, who supplied the dance music, were Louis XV. costumes.

Countess of Warwick. The Countess of Warwick received her guests in the centre state drawing-room, adjoining the ballroom, situated at Marie Antoinette, wearing the Warwick family diamonds round her neck as a support only, a necklace of pearls, and a pair of earrings on her white shoulders and a diamond bracelet on her left wrist.

Established 1866. Dunlap Bros. & Co., AMHERST, N. S. DUNLAP COOKE & CO. MERCHANT TAILORS, AMHERST, N. S.

Dunlap, McKim & Downs, WALLACE, N. S. DUNLAP, COOKE & CO. AMHERST, N. S. This firm carries one of the finest selections of Cloths including all the different makes suitable for the trade. Their cutters and tailors are of proven employment and their work is of the highest quality. All inspection of the samples will convince you that the prices are reasonable and fair.

THE GREAT SOUTH AMERICAN NERVINE TONIC AND Stomach and Liver Cure

The Most Astonishing Medical Discovery of the Last One Hundred Years. It is Pleasant to the Taste as the Sweetest Nectar. It is Safe and Harmless as the Purest Milk.

This wonderful Nervine Tonic has only recently been introduced into this country by the proprietors and manufacturers of the Great South American Nervine Tonic, and its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the general public. This medicine has completely solved the problem of the cure of indigestion, dyspepsia, and diseases of the general nervous system. It is also of the greatest value in the cure of all forms of falling health from whatever cause. It performs this by the great nerve tonic qualities which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compares with this wonderfully valuable Nervine Tonic as a builder and strengthener of the life forces of the human body, and as a great renewer of a broken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on this continent. It is a marvelous cure for nervousness of females of all ages. Ladies who are approaching the critical period known as change of life, should not fail to use this great Nervine Tonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use half dozen bottles of the remedy each year.

IT IS A GREAT REMEDY FOR THE CURE OF Nervousness, Nervous Headache, Sick Headache, Female Weakness, Nervous Chills, Paralysis, Nervous Paroxysms and Nervous Choking, Hot Flashes, Palpitation of the Heart, Mental Depression, Sleeplessness, St. Vitus's Dance, Nervousness of Females, Consumption of Old Age, Catarrh of the Lungs, Bronchitis and Chronic Cough, Liver Complaint, Chronic Diarrhoea, Delicate and Scrofulous Children.

Broken Constitution, Debility of Old Age, Indigestion and Dyspepsia, Heartburn and Sour Stomach, Weight and Tenderness in Stomach, Loss of Appetite, Nervousness of Old Age, Catarrh of the Lungs, Bronchitis and Chronic Cough, Liver Complaint, Chronic Diarrhoea, Delicate and Scrofulous Children, Summer Complaint of Infants.

NERVOUS DISEASES. As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest children and the most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, general debility of the system, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become flaccid and disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous derangement.

REVEREND FATHERS, OF BROWNSVILLE, IND., says: "I had been in a distressed condition for three years from Nervousness, Weakness of the Stomach, Dyspepsia, and Indigestion, with my health was gone. I had been doctoring nearly every remedy, but I bought one bottle of South American Nervine, which does me more good than any \$50 worth of doctoring I ever did to my life. I would advise every one to use this Nervine Tonic." A. H. MARKER, BROWN'SVILLE, MONTGOMERY CO., INDIANA.

A SWORN CURE FOR ST. VITUS' DANCE OR CHOREA. CRAWFORDSVILLE, IND., June 22, 1887.

My daughter, eleven years old, was severely affected with St. Vitus' Dance, or Chorea. She gave her three and one-half bottles of South American Nervine and she is completely restored. I believe it will cure every case of St. Vitus' Dance. I have kept it in my family for two years, and am sure it is the greatest remedy in the world for Indigestion and Dyspepsia, and for all forms of Nervous Disorders and Falling Health, from whatever cause. JOHN T. MYER, Montgomery County, Ind.

INDIGESTION AND DYSPEPSIA. The Great South American Nervine Tonic

Which we now offer, is the only absolutely unfailing remedy ever discovered for the cure of Indigestion, Dyspepsia, and the vast train of symptoms and horrors which are the result of disease and debility of the human stomach. No person can afford to pass by this jewel of incalculable value who is afflicted by disease of the stomach, because the experience and testimony of many go to prove that this is the only and only great cure in the world for this universal destroyer. There is no case of unmanageable disease of the stomach which can resist the wonderful curative powers of the South American Nervine Tonic.

HANLEY R. HALL, of Watertown, Ind., says: "I owe my life to the Great South American Nervine Tonic. I had been in bed for five months from the effects of an exhausted stomach, Indigestion, Nervous Prostration, and general debility. I was completely unable to get up, and my health was gone. I bought one bottle of South American Nervine, which does me more good than any \$50 worth of doctoring I ever did to my life. I would advise every one to use this Nervine Tonic." A. H. MARKER, BROWN'SVILLE, MONTGOMERY CO., INDIANA.

Large 16 ounce Bottle, \$1.00. EVERY BOTTLE WARRANTED. SOLD BY DR. J. PALLEN & SON CHATHAM, N. B.
