

NO. 121

FIREWORKS &

FLAGS —

Killed

Trinidad, Colo., May 21.—Seven miners, including Superintendent Alexander Jacobs, were burned or suffocated Sunday night at the Engleville mine, at Engleville, Col.

The bodies were recovered yesterday. The men went to work Sunday night, and when the fire broke out on Monday morning an investigation was started. It was discovered that fire, which broke out in the mine a year ago, suddenly spread and swept across the incline tunnel preventing the men from reaching the outside.

The point where the flames crossed the tunnel is three miles from the opening, and it was necessary to dig a temporary tunnel around to reach the dead bodies.

JAPS' VISIT PAYS.
Orders Amounting to \$12,000,000 Placed With U. S. Firms.
New York, May 31.—Simultaneous with the presence of Gen. Kuropki in New York city, came the announcement that the Tokio Government placed this country's machinery through New York City agencies, \$12,000,000 in orders for equipment for the South Manchuria Railway.
The line, which traverses 1,500 miles of sparsely settled territory, is to be completed in the next two years, which will be record-breaking time.
To ensure quick delivery, Japan has bought 50,000 tons of rails at \$24 Carnegie mills for \$22.50 a ton, and placed an order for 13,000 tons was placed at \$24.
Other orders have been placed at \$24.

rush the rails to the Japanese. The car concern has received an order for 1,000 freight trucks. The bodies of the cars will be built in Dalny.

Over \$2,000,000 has been spent for American locomotives, of which 2 have been sold for the South Manchuria Line. From Delany to Mukden

the traveler will ride in American cars, pulled by Yankee locomotives over United States Steel Trust rails.

Fire Works Exploded
Newton, Mass., May 21.—One person was killed and four others injured by the explosion of a fire work at a celebration here.

factory of Masten and Wells at New
ton upper falls yesterday.

BALLOT SWITCHING AND GOVERNMENT DREDGING.

Dredging contracts for the coming season have been given out, the old favorites receiving their share. Among these is the Merton Dredging Company, which operated at Goderich last year. Mr. Bennett brought out an interesting circumstance in the committee of Supply relating to this concern. He was informed by the Minister that W. L. Horton, who figured as a contractor, was the Merton Dredge Company. Mr. Horton was identified by Mr. Bennett, M. P., as the gentleman described by Pritchett in the course of his evidence of ballot switching operation in West Huron. Pritchett spoke of Horton acting as cashier in connection with this campaign.

Discussing election frauds on April 16th in the House of Commons, the leader of the Opposition read a solemn declaration made by James Farr, of Goderich, regarding this same election. Farr swore that he had been appointed deputy returning officer for Goderich in the West Huron by-election and that W. L. Horton twice asked him to resign in favor of one James Yates. Farr concluded that this was because he was supposed to be unable to "manipulate the false ballots." Farr was sure he could do the trick and refused to resign. Whereupon Horton took him to a hotel and introduced him to a man whom he called Garrett, but who turned out to be Pritchett, and to O'Gorman, now awaiting trial for the London election steal. Horton and O'Gorman left Farr with Pritchett, who gave him a course of lessons in ballot switching, watched him practise the art, handed him thirteen ballots previously initiated, and then left him to work the thing out, which he did by switching the whole thirteen.

GREATEST FEMALE STRENGTH-KNOWN ON EARTH.

Thousands of women are wan, pallid, run down and dispirited. What they need is that nourishing tonic Ferrozone. Soon they regain their laughing eyes, bright cheeks and rosy cheeks. Ferrozone does this and more, as Mrs. L. F. Anderson, Whitby, Ont., testifies. "My daughter was very much run down and had considerable trouble at times. Often I was at a loss to know what to do. I was advised to give her Ferrozone, and I did so. Ferrozone cleared up all the trouble, made my daughter healthy and well. I consider it a medicine every woman should use regularly if she wants to feel her best." Rebuild with Ferrozone. It is the King of all cures. Price 50c. per box at all dealers.

THE LATE EDWIN H. NORTON

Mr. Norton, who died at his home at Kent Bridge on Saturday, May 11, 1907, was born in Westminister on December 29, 1842. His mother married Mr. E. C. Rolls, a druggist at Louisville in this county in 1844. In 1854 Mr. Rolls and family moved to the present farm one mile north of Kent Bridge and in the Township of Camden. Mr. Norton attended the Public schools of the district and was a reader of the medical works of the father. On December 25, 1862, he married Emily Ingram, who died May 22, 1880, leaving four sons: Alvin, of Wabash; Harry and Leslie, of Detroit; and Philip, who is now dead. On December 29, 1880, he married Maggie Ross, the daughter of Mr. and Mrs. Wm. Ross, of Camden. Mr. Norton leaves in this family Mrs. Fred. Smith, of Chatham, Ontario, who works the farm; John, of California; Ida, Edie and Grace at home. He has been a deputy returning officer in Camden for 28 years, a Public school trustee for over a quarter of a century, and an active member of the Methodist church for over 30 years. He was very energetic and pushing and his noble heart and to the betterment of social, school and church life. He had accumulated much property and had given several fine farms to his sons. He had completed a beautiful brick house, which he has occupied since Christmas last. He was a Liberal Conservative in politics.

The funeral service was conducted by Rev. Mr. McKelvie, the pastor, assisted by Rev. Mr. Pickard, of Kent Bridge, and Mr. Peters, of Northwood, in the Methodist church. When the cortege of a mile of following friends arrived in rugs from the house where a short service was held, the church was found packed with waiting friends. The remains were laid to rest in the Shaw cemetery.

Mr. Norton was fencing on his farm three weeks since and received a small but deep cut on the ankle. No one thought of its being serious at first, but blood poison set in. He suffered much, but his leg was amputated below the knee a few days before he died and this eased him very much.

ADELAIDE ST. PAVEMENT TO THE FORE ONCE MORE

Chas. Baxter Presents Petition—The Grocers' complaint—Special Meeting Thursday—Council will strike rate in two weeks.

Last night's Council meeting was a record breaker for length, and if the expressed intentions of the aldermen can be relied upon, the record will not be broken again this year. It was Ald. Potter's night. He was there with all his forces to fight out the electric light question, and he made a noble stand.

Before this question came up, however, the Council found time to dispose of a few other important questions, as a sort of preliminary to Ald. Potter's display of figures and eloquence.

ADELAIDE ST. BRIDGE.

A communication was received from the city engineer, commanding the Adelaide street bridge over McGregor Creek. He said in his letter to the Council that the beams were rotten, the joists were rotten, and in fact the whole bridge was rotten. He recommended that the bridge be closed at once, as it was unsafe for traffic. He also recommended that some of the structure be torn down, to ascertain if it were practicable to repair it, and if not, a new bridge will have to be built. From the examinations he had made, he was of the opinion that the structure could be repaired, so that it would be good for two or three years, at a cost of probably \$300.

Ald. Benson was of the opinion that if the bridge could be repaired, this should be done. If it were decided to build a new bridge, it would have to go to the ratepayers, and this would necessitate the closing up of the bridge for some time, probably all summer. He moved that the engineer be empowered to tear down the bridge, as much as was necessary, and report back to the Council what was the most practicable thing to do.

Mayor Stone said that he had plans for the erection of a new structure which he thought ought to be considered along with the question of repairing.

Under the head of new business, the matter came up again, when Ald. Benson again made his motion. The Mayor again expressed the opinion that the committee should look over the plans from the Western Bridge Construction and Equipment Company, which he presented. This company had settled in Chatham, and he thought they should be patronized.

Ald. Benson thought that this would not be wise. If the city wanted plans for a new bridge they should get the city engineer to draw up the plans and then let the different firms tender upon them.

Ald. Westman seconded this motion. He thought that if a new bridge were decided upon, that every firm in the city who handled bridges should be given a chance to tender. He did not think that the city was in a position to spend \$6,000 for a new bridge, and he understood that that figure had been mentioned in connection with the proposed new structure.

Engineer Jones said that in tearing down the bridge, they would still leave the bridge open for foot passengers.

The Mayor said that the \$6,000 had been mentioned for a complete, up-to-date bridge, but he was sure that the Western Bridge Construction and Equipment Company could put up a good enough bridge for \$2,000, which would last the city for thirty or forty years.

Ald. Stevens thought it was not fair to even consider the plans as presented by this company. It was not fair to the other people in the city who take contracts for the erection of bridges.

Ald. Kerr moved that the matter be left to the Board of Works, with power to strengthen the old bridge, providing it did not cost more than \$400. He did not think that the city could afford to pay \$6,000 for a new bridge this year. He had confidence in the ability of the Board of Works.

This motion was seconded and carried.

This Surplus of Over a Million and a Half

—\$1,552,364.26—the 1906 surplus of The Mutual Life of Canada, on Government Standard of Valuation—or \$1,203,378.58 on Company's Valuation Standard (an increase on the latter, for the year, of \$251,377.46)—proves that The Mutual Life enjoys, to an extraordinary degree, the full confidence of the people.

The gains in every department are far beyond our expectations—and the steady gains of preceding years had made those expectations reasonably high.

Write the Head Office, Waterloo, Ont., for particulars.

Natural Life OF CANADA

Ald. Stevens provided considerable amusement for the aldermen by presenting several accounts, ranging from 15 cents to \$3.00 in favor of Oldershaw. The accounts were all for sand, cement, etc. Ald. Stevens had so much practice in presenting accounts for Oldershaw that when the next account comes in he will almost be able to read it off with his eyes closed. They were all correct, however, and therefore passed.

Ald. Kerr read a letter from the Turner Novelty Manufacturing Co., in which they quoted \$10 each as the price for lawn swings in lots of two, and if more were ordered they would reduce the price to \$9. The communication was received. The Parks Committee could not see their way clear to recommend the purchase of these swings for the parks.

An account for steam heat for the Police Station, for the past month, amounted to \$14.50. This was considered high, and the account was referred.

Several accounts were presented and passed.

ADELAIDE ST. PAVEMENT.

A petition which had been circulated on Murray St., by Chas. Baxter, was received. The petitioners asked that the bitulithic pavement which was passed at the last meeting of the Council, be dropped. There were several names on the petition. They did not want a pavement.

The Mayor did not favor the opening up of this question. It had been decided by a unanimous vote of the Council to put down a pavement. This ought to settle the matter. It would require a two-thirds vote of the Council to open the matter up again. He did not think it was possible to satisfy all of the people in anything, and as far as petitions are concerned, it was an easy task to get signatures to any kind of a petition. He looked upon the matter as finally closed.

Ald. Potter (who presented the petition) hardly knew what to do under the circumstances. There are people on this petition who do not want the pavement. Many of these signed for the pavement, and the Council acted upon the last petition. I advocated quick dealing with these petitions last year, and I feel the same yet. We should give Mr. Baxter a chance to address the Council.

The Mayor—You are establishing a new rule if you consider this matter again. We will give Mr. Baxter a chance to speak, however, then ask Mr. Baxter if he would mind waiting until the hour for new business came around.

Mr. Baxter—How long?

The Mayor—About half an hour.

Mr. Baxter—I guess that will be all right.

Under the head of new business, Mr. Baxter did address the Council. He said that when he came up to the meeting he had no idea that he would be called upon to address the Council. At the last meeting Mr. Will Foreman had said that there was only one man on the street objecting to the pavement. The petition would show how many there were opposing it. He thought that the Auto Works and the T. H. Taylor Company should not be considered in the matter at all. Mrs. Jas. Milner was on the other pavement, and James Milner, her husband, was on his. He thought that if there was to be a new pavement, there should be a new bridge over the creek at Adelaide street.

THE MATTER DROPPED.

When he got through with his speech, the Council went on with other business, and either the press of business was too strong, or the Council were all of the opinion that the matter should remain closed, for neither Mr. Baxter, his speech, nor his petition, were heard of again for the rest of the evening.

THIRD ST. BRIDGE APPROACH.

A tender was received from Blight & Fielder for the pavement on the north approach to the Third street bridge. They offered to do the work provided the city provide the brick, for \$135 per square yard, 12 cents per lineal foot for the curb and gutter to raise the sidewalk for 15 cents a lineal foot, and to provide and install anchor rods for \$6 each.

Ald. Benson—The Engineer provided us with an estimate of the probable cost and this tender comes within it. I move that the tender be accepted, and that the work be proceeded with at once.

Ald. Westman called attention to the fact that only one tender had been received. He thought that the work should have been advertised, and tenders received from all firms in the city who do this work. He believed that the other contractors should be given an opportunity to figure on this work even if they did not take advantage of the opportunity.

The Mayor—There is not a firm in the city who did not know that this work was going to be done.

Ald. Westman—The principle is wrong. I have nothing against Blight & Fielder, but the other firms should have been given an opportunity to tender. If other firms do not tender, the city might find it profitable to do the work themselves.

Of Course Bu-Ju Will Cure You.

If you are suffering agonies with Rheumatism, Sciatica or Neuralgia—if the Kidneys are so affected that you have pains through the hips and in the small of the back—don't hesitate a moment in spending 50c for a large box of Bu-Ju, the Gentle Kidney Pill. You will get such relief from the first few doses that nothing could persuade you to discontinue until cured. Bu-Ju not only saves you endless suffering—it completely removes every trace of Rheumatism and Kidney Trouble. If your druggist will not supply you with Bu-Ju, send retail price to The Cladin Chemical Co., Limited, Windsor, Ont. 58

too long, and the sooner the work is done the better.

The motion to go on with the work was carried.

PAVEMENT CONDEMNED.

The committee composed of N. H. Ruthven, John McCortie and Archie Park, which was appointed to examine the pavement on King street, west from the Power House to the asphalt block pavement, reported that this piece of block pavement is in very bad condition, and should be replaced at once.

J. E. Martin wrote to the Council and asked them to send a man to tell him where the line was between his property and the city property. The matter was left with the Board of Works. Mr. Martin's fence is on city property, but he is willing to move it as soon as he finds out where to move it.

GROCCERS' COMPLAINT.

A communication was received from the Grocers' section of the Retail Merchants' Association asking that the market be thrown open for the grocers, and that steps be taken to enforce the pedlars' by-law and the transient traders' by-law. The grocers wanted a meeting of the Board of Works, Mr. Martin's fence is on city property, but he is willing to move it as soon as he finds out where to move it.

The matter was referred to the Property committee to report.

The Mayor said he was heartily in accord with the transient traders' part of the resolution. This was the only city difficulty in getting a proper enforcement of the transient trader law.

SPECIAL MEETING THURSDAY.

Mr. Reid, of the Colonial Engine Company, sent word to the Council that he would be willing to meet them to discuss the matter of the purchase of his engine for the Waterworks Department, mention of which was made in The Planet some time ago. A special meeting of the Council was called on Thursday to deal with the matter, and to hear Mr. Reid. The Board of Works reported in favor of granolithic walks on West street, Kent street, and the east side of the market. These were all passed.

CEMETERY IMPROVEMENT.

Ald. Kerr, for the Parks and Cemetery committee, reported that the committee had visited the cemetery, and had investigated the complaints and had a caretaker, in reference to the new house. They recommended that a porous tile drain be placed in the basement of the house, as the cellar is filled with water. There is a good sewer, but there is not the proper fall, and the water does not get away. They recommended no action. They recommended that a new wire fence be placed along the creek road, where it was badly needed, and that the old fence be removed in repairing the rest of the cemetery. They recommended that the boulevard leading to the cemetery be placed in proper shape. The committee is at present considering the building of a drain along the road to carry off the water, and make the road passable in wet seasons. They also recommended that Miss Allie McCrea be given permission to cut down a tree in one of the lots. The last recommendation was that the city grant a free plot to Mr. Parker, who lost a fourth child within the last few weeks. The case is one of the saddest that this city has seen for some time, and the expense on Mr. Parker is quite heavy.

The report was adopted.

The Mayor announced that the Health Officer intended to have the Parker house burned down.

GAS FOR PARK AVENUE.

Under the head of inquiries, Ald. Bullis asked if the Gas Company were going to extend their mains past the Grand Trunk. He thought the people on Park avenue should be provided with gas. The connections would now be convenient—left to Property committee.

Ald. Westman asked if the chairman of the Board of Works was going to get after the gravel which was due from the Pere Marquette. Ald. Benson replied that he had done nothing yet, but he intended to get after it at once. The Pere Marquette has, according to an agreement with the city, to provide Chatham with 50 carloads of gravel each year. They owe the city now for two years.

THE RATE NEXT MEETING.

Ald. Austin asked the chairmen of the different committees to strike their estimates as soon as possible, so that the Finance committee could determine the rate of taxation for the current year. It is expected that the rate will be struck at the next meeting of the Council.

At this point Ald. Potter arose with his electric light statistics, and all other business was declared off.

IF WATER NEVER FROZE.

There Would Be Several Startling Changes in the World.

The whole economy of nature would undergo a startling change if water never froze. The world's climates would be revolutionized. The icebound polar seas would cease to exercise their chilling influences, and consequently the currents of the ocean might either cease or be turned aside in different directions.

Thus the Gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold noticed in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power and a commercial nation might alter the whole world of commerce.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coast of Newfoundland and Iceland would result in a much warmer climate in those islands, where now the crops often fail.

Ice, too, plays an important part in the economy of nature. Thus, if water never froze, snow, hail and hoarfrost would cease. The loosening of soils and the disintegration of rocks by the frost and many other now vital effects would be lost—in short, the absence of ice would be on the one hand an incalculable disaster, on the other hand a great boon.—London Globe.

Straight character cannot come out of crooked living.

The Cough of Consumption

Your doctor will tell you that fresh air and good food are the real cures for consumption. But often the cough is very hard. Hence, we suggest that you ask your doctor about Ayer's Cherry Pectoral. We publish the formulae of all our preparations. Lowell, Mass.

These 800 Acres Were The First Claims Staked In The Rich Larder Lake Field

Last summer, before any staking had been done in the Larder Lake region, our experts located TWENTY gold-bearing claims, amounting to eight hundred acres, two miles north of Wilson's Bay of Larder Lake. (You can have a map of the property for the asking.) On some of the claims there are wide reefs that assay from \$7.50 to \$18 a ton. We have assay on file that show as much as \$1,800 a ton. There is no richer property in the country—and Larder Lake is as RICH AS THE FAMOUS RAND OF South Africa. All our holdings are in ONE BLOCK, which means economy in working the claims. The ore on these properties is FREE-MILLING.—We have our own water-power on the property. We have an abundance of wood and water—every item that counts in the economical operation of gold mines. Our expenses will be far lower, and our assays are higher than those of mines which have paid seventy million in dividends—and our ore will grade far better. We have nothing to hide, nothing to lie about. We ask you to learn the simple facts, and we are ready to put them before you and to prove to you that

Empire Larder Lake Gold Mining Company, Limited

FACTS ABOUT BUTTER.

How This Delicious Substance is Produced From Milk.

Butter is a delightful, almost indispensable, substance, without which bread and some other things would lose their attractiveness. For most of us, but not one person in a hundred can tell exactly what it is and how it is produced from milk.

Here is the whole thing briefly told: Butter is the fatty part of milk. It consists of minute globules covered with albumen. When the milk is allowed to stand for about twenty-four hours, these globules rise to the top, and form what we call cream.

Once upon a time, we don't know exactly at what epoch, a camel was carrying milk in bottles made of skin. When the caravan or procession or whatever it was halted for a rest and a lunch, it was found that the milk had turned partly to butter, though that is not the name they gave to the mass. The man or men that made this discovery were able even in that early age of the world to put two and two together and make four.

The plain English of this is that the discoverers of this new substance or commodity concluded that it was formed by the jolting given to the milk by the camel's gait, and that is the origin of our modern churning process.

To make butter, therefore, we take the cream that forms on the top of the milk, put it into a churn and shake and agitate it until the albumen that covers the globules of fat is broken. When the albumen breaks, the fatty globules come together as one mass, and that is butter!—Chicago News.

The Blind Man's Wand.

This is another way of playing blind man's bluff and is thought by many to be an improvement on that game.

The player who is blindfolded stands in the center of the room with a long paper wand, which can be made of a newspaper folded up lengthways and tied at each end with string. The other players then join hands and stand around him in a circle.

Some one then plays a merry tune on the piano, and the players dance round and round the blind man, until suddenly the music stops. The blind man then takes the opportunity of lowering his wand upon one of the circle, and the player upon whom it has fallen has to take hold of it.

The blind man then makes a noise, such as, for instance, the barking of a dog, a street cry, or anything he thinks will cause the player he has caught to betray himself, as the captive must imitate whatever noise the blind man likes to make.

Should the blind man detect who holds the stick, the one who is caught has to be blind man. If not, the game goes on until he succeeds.

Riddles.

Why is a bee like a spectator? Because it is a beeholder (beholder). Why are blind persons compassionate? Because they feel for other persons.

When does a lady think her husband a Hercules? When fond of his club. Why are young ladies bad grammarians? Because so few can decline matrimony.

Which are the two most disagreeable letters if you get too much of them? K. N. (cayenne).

Why Flowers Are Colored.

The beautiful colorings and perfumes of the various flowers have more object than prettiness, as the existence of the plant itself depends upon them. The colors and perfumes attract the various insects best fitted to bring about the cross fertilization of the plant.

The Birthday Cake.

What does it take to make the birthday cake? "Sugar and spice and everything nice" And snow white frosting as smooth as ice And little pink candles all round the edge! Oh, who wouldn't like a generous wedge Of the wonderful birthday cake?

How many candles all eight Must stand on the cake to make it right. To make it a regular birthday cake? Two of pink and two of blue And one little shining white one, too. Right on the beautiful tip top Of the wonderful birthday cake!

When does it take to eat this cake? Father and mother and Grandma Gray And Bobbie and Rosie and Eleanor May And the dear little girl next door, And a piece for teacher in basket small And a piece for Nephew—I think that's all Who eat the birthday cake?

There's a little gold ring inside the cake, And, strange to say, it is Eleanor May Who wins the piece with its golden prize. For Eleanor May is five today. And the birthday cake with its little surprise Was made and trimmed by Grandmother Gray—The beautiful birthday cake!

CURB SICK HEADACHE.

See Fac-Simile Wrapper Below.

The deputy wage manager at the Theatre Royal, Dublin, at one time was a little man named Linders, who had a strange dislike of the ladies of the ballet and treated them rather harshly. He wore a wig, but the fact was not generally known. On one occasion, however, an enraged coryphe seized him by the hair, and off came the wig, exposing a shiny expanse of cranium. He at once dashed off to complain to Mrs. Harris, the manager's wife, but the good lady could only gasp in stupefied tones, "Good gracious, Mr. Linders, why, you are bald!" To which Linders instantly replied: "No, madam, no. My hair became loose with horror!"

What Do They Cure?

The above question is often asked concerning Dr. Pierce's two leading medicines, "Golden Medical Discovery" and "Favorite Prescription." The answer is that "Golden Medical Discovery" is a most potent alterative or blood-purifier, and tonic or invigorator, and acts especially favorably in a curative way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, stomach, bowels and bladder, curing a large per cent. of catarrhal cases whether the disease affects the nasal passages, the throat, larynx, bronchial tubes, stomach (as catarrhal dyspepsia), bowels (as mucous colitis), or the uterus or other pelvic organs. Even in the chronic or ulcerative stages of these ailments it is often successful in effecting a cure.

"The Favorite Prescription" is advised for the treatment of all diseases—those of the female system, such as catarrh of the uterus, leucorrhoea, irregular menstruation, etc.—it is a powerful yet gently acting invigorating tonic and nerve. For weak worn-out, over-worked women—no matter what has caused the trouble—this Favorite Prescription "will be found most effective in building up the strength, regulating the womanly functions, relieving pain and inducing a healthy, vigorous condition of the whole system."

A book of particulars wraps each bottle giving the formulae of both medicines and extracts of the roots of native American medicinal forest plants. They are both sold by dealers in medicine. You can't afford to accept as a substitute for one of these medicines of known composition, any secret nostrum.

Dr. Pierce's Peppermint, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels.

The Utilitarian Age.

The more picturesque the country the more inevitable it appears to be that its beauty must be menaced and in most instances eventually much impaired by the erection of a hideous line of telephone posts, with their relentless reminder that we live in an age in which the beautiful has constantly to be sacrificed to the useful.

Cured her Father's Drunkenness by a Simple Remedy.

Saves her father from a drunkard's grave. Free sample of Samaria Testicles Prescription checks his drinking and leads to a complete cure.

"It seemed hopeless to keep father from drinking, and we all felt the disgrace. When things were at their worst a friend advised me to try Samaria's. I saw that you offered a free sample treatment and that the remedy was tasteless and could be given secretly. I determined to try it, and have been glad every day since. The full treatment, which I gave him in his tea, cured him, and I am pleased to say he never touches whiskey now. How glad I am that I have saved my father's life! I think that's all I can say for Samaria's."

Free Package and pamphlet giving full and price sent in plain sealed envelope. Correspondence secretly confidential. Address: F. R. SAMARIA, REMEDY CO., 17 Jordan Chambers, Jordan St., Toronto, Canada.

Agood intention clothes itself with power. When passion is on the throne reason is out of doors. When the outlook is not good, try the uplook.

WORLD-FULL OF ROGUES

BERNARD SHAW'S SEVERE CRITICISM OF THE IDLE RICH.

His Sermon on Socialism—Paralysis From Lead-Poisoning—"We Are All Rascals"—"Drink Evil Among Poor"—Any Atrocity to Gain Money—Chicago Meat Horrors—Poverty Breeds Crime.

Mr. George Bernard Shaw preached a sermon on socialism recently in Caxton Hall to an audience composed of many of the elite of the west end. His text was, "Poisoning the proletariat," and the address was delivered under the auspices of the Christian Social Union, London branch, who are engaged in a crusade against the lead-glass industry. Mr. Shaw wanted to know if his audience really cared whether the plate off which he ate dinner had or had not given the poor wretch who made it paralysis from lead poisoning. If they did care they were getting on.

"The great majority of industrial people are rascals," he went on. "We are all more or less rascals—(laughter)—even you good people who have what you facetiously call 'independent means.' A great deal of the profit which you enjoy is made in a rascally way, those profits which I see in so many beautiful hats and costumes before me to-day."

Severe Bob For Beezer.

Mr. Shaw said he had heard of a family in London living on 21s. a week, and wondered how they did it. He later found they lived on 14s. a week, for the father required 7s. a week for drink. "I would like some of the richer members of this audience," said Mr. Shaw, "to say how much a week they spend on drink. The wine for the family would probably come to more than 7s. a week."

If a family spent a guinea a week on liquors, then on the basis of the treatment that the misery of the poor was wholly due to drink, a family five times poorer than that family should spend five guineas a week. The fact was that the very people who talked most about the drink evil among the poor, and who attributed their impoverished condition to that cause alone, spent out of all proportion more on drink than any laboring man.

Commit Any Atrocity.

Vice and virtue, he said, tended to get distributed very much according to the view point of the person—the rich thought vice the peculiar attribute of poverty and virtue of the well-to-do.

"Provided you don't ask us to be poor, we'll exercise every known or possible virtue, but we must have money—to get it we'll commit any atrocity—(laughter)—we'll turn helpless people out of their homes in the dead of winter, tear the sick from their beds and evict them in the roadside snow, but we must have money or we can't be virtuous."

"Then, again," went on Mr. Shaw, "there are other ways of getting this kind of money—by making human beings work at deadly trades in the dead of winter, tear the sick from their beds and evict them in the roadside snow, but we must have money or we can't be virtuous."

We were throwing away about 800 millions a year on extravagances of every sort, much of it, that was so badly wanted at home, being spent abroad. There must be a better distribution of wealth, for it was the poverty of men who made them helpless and led to sweating, misery and crime.

Turning to a consideration of "the life of pleasure" lived by idle rich, Mr. Shaw said that he was now in a position to live that life; he possessed all the material concomitants, but he would infinitely rather sweep a crossing. (Laughter.) He thanked heaven he had strength of mind enough, sanity enough, to despise that life which riches could enable him to live, and he pitied, not envied, those who lived the life of luxury and so-called pleasure.

Referring to the Chicago meat horrors, Mr. Shaw said it was most curious to observe that not one note of concern was uttered or printed about the poor wretches who tinned the meat; it was all for the consumer, and about the beef itself.

"Your own interests will yet force you to do what my words will never persuade you to do," was Mr. Shaw's parting shot.

Chinamen In Australia.

A traveler in northern Queensland, Mr. Hanford, a Melbourne lawyer, brings a story of a hitherto unknown colony of Chinamen in the country near the Gulf of Carpentaria. The news, which has been confirmed, came as a shock to the advocates of a "White Australia."

The Chinamen, who are said to number thousands, are, it appears, camping on arable river flats, and are growing vast quantities of opium, which is now a prohibited article in the Commonwealth, except for medicinal purposes. Presumably a market for the drug is found among the rich Chinese storekeepers of the north.

The interlopers have made their way to Australia by way of the East Indian Islands, and the Commonwealth Government is now being called upon to turn them out.

Another Kipling Yarn.

Among the amusing stories told about Kipling is one of a young woman admirer who after years of waiting at last met the man of the "Plain Tales."

"You," she cried, staring at the author. "You, you are Rudyard Kipling!"

Naturally Kipling felt embarrassed. "Yes," he murmured modestly. "The lady continued to marvel."

"But I thought you were—oh, how shall I say it?—something quite, quite different!"

"Oh, I am," Kipling hastened to tell her in a very confidential tone. "I am, madam. Only, you see, this is my day off."—Book News.

If you were a grocer—and you had recommended St. George's to your customers—and they had tried it—and had come back to tell you that it was BETTER than you said it was—

—now, wouldn't you smile?"

"That's the way I feel about

St. George's Baking Powder

"Use St. George's—and smile on baking days."

"If you write The National Drug & Chemical Co. of Canada Limited, Montreal—they will send you, FREE, a handsome cook book, brimful of excellent recipes."

The Great Dipper. The seven stars in the constellation known as the "great dipper" are, say the scientists, seven magnificent suns probably very much larger than our own and glowing with intense lustre. Their massive globes whirl through space with inconceivable velocity. Five of the stars are receding from us at the rate of seventeen miles a second, and the other two are travelling in an opposite direction. Thirty-six thousand years from now the seven stars of the "dipper" will have dissolved partnership, and its appearance will have entirely changed.

The Salvage Reads "MENZIE LINE" TORONTO

The name on every roll, is our guarantee of quality and correct design—and your protection against inferior papers.

"Menzie Line" Toronto when buying WALL PAPERS

WE SELL "MENZIE LINE" WALL PAPERS ASK TO SEE THEM

Was Married Himself. "Have you congratulated James yet?" "What for?" "He is going to get married." "Do you take me for a hypocrite?"

Living In Hope. "He seems to have more friends than any one." "Yes; he has borrowed money from nearly every one in town."

Ought! The drummer pi since with a strang "Going to the lec the drummer. "Yes, I thought I "hear it is pres "It's rotten." "Ever heard it?" "No; I deliver it."

The Ideal Beverage

ASK FOR Labatt's (LONDON) A PALE ALE, palatable, full of the virtues of malt and hops, and in sparkling condition, is the ideal beverage. Now when chemists announce its purity, and judges its merit, one need look no further.

It's The Tone That Proves the Quality Of A Piano

In outward appearance one make of piano may resemble another very closely. The real difference lies in the tone, which is concealed within the case.

It's the tone every time that proves the quality of a piano. Run your fingers over the keyboard of a "Nordheimer" and just listen to the superb tone. No doubt about the quality of the "Nordheimer" piano with such a tone as it possesses.

Those who know the real value of tone-quality naturally select the "Nordheimer"—the unrivalled Canadian piano. Will you not come in and play over a selection and judge the quality of the "Nordheimer" tone from what your own ear tells you?

Our Mr. R. V. Carter will visit Chatham frequently in our interests, and will be pleased to furnish you with any information you may desire. Correspondence addressed to him, in care of the Garner House, will receive careful attention.

"NORDHEIMER" Limited, London.

DEVELOPING AND FINISHING PHOTOS FOR AMATEURS

We have every facility for turning out your photos quickly and well. Developing done every day except Sunday. Prints are turned out in two days.

The Austin Men's Store

WE'RE SPLENDIDLY READY FOR THE
HOLIDAY TRADE

There is variety enough in the store's showing of fine clothes for men to satisfy the most critical man. It's a big assortment of the best things to wear, possible to find anywhere where Canada's best makers and the **Noted Progress Brand** are represented.

To say that we are every-day selling and pleasing professional men, merchants and even salesmen in other stores, amongst them many men with a reputation for being always dressed, is just quoting actual facts. But they are facts that prove beyond all doubt that this is the store for smart clothes.

Swell Progress Brand Spring Suits

From the Progress Brand makers and three other Canadian makers of High-grade Clothing come these swaggy spring suits, cut in distinctive models, they are of the latest style and have patterns, combined with making the finishing of the suits.

The prices are certainly reasonable—\$12, 14.00, 16.00, 18.00 to 20.00.

PROBABILITIES.

NOSE WAS BROKEN
IN A SERIOUS ACCIDENT

Toronto, May 21.—11 a. m.—Winds falling to light and becoming variable. The day was cloudy with occasional showers of rain. The temperature was in the 50s.

HOLMES—On May 21, 1907, Harry Holmes, 30 years of age, was driving a motor car on the highway between Toronto and Niagara Falls. The car was travelling at a high rate of speed when it struck a large tree. The driver was thrown from the car and his head struck the ground. He was killed instantly.

UP IN A BALLOON.

Princess Describes the Pleasures of Trip Through the Air.

Princess Di Teano, in The Strand Magazine, has an interesting article, illustrated with bird's-eye view pictures of town and country, on the pleasures of ballooning.

"My most exciting trip (she says) was one accompanied by a certain amount of risk. We started from St. Cloud, Paris, in half a gale, M. Jacques Faure as aeronaut in charge, the other two passengers besides myself being Mrs. Assheton Harbord and Lord Royston. We chose six in the evening as the time of departure, our intention being to travel all night and land in Germany some time in the morning. Darkness came on very quickly, being greatly increased by the heavy rain-clouds that surrounded us on all sides. The wind became stronger and stronger, veering round to a regular southwesterly gale. The prospect was scarcely pleasing, and the next hours were somewhat critical ones. We could not tell whether we were already out of France, but the compass indicated that we were being driven towards the north. The night was intensely black, and our skilled aeronaut judged that we were traveling at the tremendous rate of a hundred kilometres—about 63 miles—an hour. Every now and then we dashed into some thick clouds that enveloped us like a fog for a few moments. The only sounds we could hear were the wind roaring in the trees beneath us and the patter of the rain on the balloon. Personally we were in the greatest possible comfort. There was not the slightest apparent motion, not a breeze fanned our faces, for, of course, we were traveling with the wind. The rain, however, overhead kept the rain from us nicely. Under these circumstances we dined with a very good appetite, the only drawback being that, as ballast was running short and a descent in such a hurricane not to be desired, we were obliged to hastily throw overboard the remainder of our dinner and our provisions for the morning meal. Every now and then we passed over a conglomeration of lights that denoted the presence of some small town or village, but no answer came to our shouts of 'Ou sommes-nous?' and the gale whirled us on into the night.

"Eventually the voyagers descended in the 'softest of ploughed fields,' and we scrambled out in a veritable quagmire. The sea was a hundred yards off, and we had landed on the coast of Holland, near a small village not far from Dordrecht, having accomplished the journey from Paris in four hours and a half.

"I think that rain is the greatest enemy to ballooning, and it is really hopeless to struggle against a heavy downpour. The rain increases the weight of the balloon to an enormous extent and is for ever forcing her downwards."

Humor of the Unexpected.

One of the penalties that a humorist has to pay for his popularity and success is that he is made an unwilling sponsor to stories either dreadfully old or cruelly unhumorous. When I see or hear a particularly good story, I watch with considerable interest and amusement to see who it will be successfully ascribed to. The other day I came across a dear old story fathered on Mr. W. W. Jacobs. It appears he has said that it is chiefly their surprises that makes his stories so funny. To illustrate what he meant, he told the story of a lawyer defending a man accused of housebreaking, who spoke like this: "Your Honor, I submit that my client did not break into the house at all. He found the kitchen window open, and merely inserted his right arm and removed a few trifling articles. Now, gentlemen, my client's arm is not himself, and I feel to see how you can punish the whole individual for an offence committed only by one of his limbs."

"That argument," said the judge, "is very well put. Following it logically, I sentence the defendant's arm to one year's imprisonment. He can accompany it or not, as he chooses."

The defendant smiled, and with his lawyer's assistance unscrewed his cork arm, and leaving it in the dock, he walked out.

An Ancient Egyptian Grave.

The American archaeologist who discovered in 1905 and was the first to enter the tomb of the father and mother of Queen Heio of Egypt, has, says Youth's Companion, lately announced that he has found the tomb of the queen herself. The first tomb remarkable for the fact that it had not been opened since it was first sealed in the fifteenth century before Christ. The tomb of Queen Heio had been tampered with. The queen was the mother of Amenhotep IV., who tried to introduce into Egypt the exclusive worship of the sun. He is known as the "heretic king." Attempts had been made to erase his mother's name from every article in the tomb bearing it, with the purpose, it is conjectured, of dishonoring the woman who was charged with responsibility for the temporary abandonment of the old religion by the royal house. None of the gold or precious stones were disturbed. Among the golden ornaments found by the archaeologist is the queenly crown. It represents a royal vulture holding a signet-ring in each talon, with the wings extended to the rear to encircle the head.

KIDNEY DISEASE COMES ON QUIETLY

Perhaps no other organs work harder than the kidneys to preserve the general health of the body and most people are troubled with some form of Kidney Complaint, but do not suspect it. It may have been in the system for some time. There may have been backaches, swelling of the feet and ankles, disturbances of the urinary organs, such as, brick dust deposit in the urine, highly colored, scanty or cloudy urine, bladder pains, frequent or suppressed urination, burning sensation when urinating, etc.

Do not neglect any of these symptoms, for, if neglected they will eventually lead to Bright's Disease, Dropsy and Diabetes.

On the first sign of anything wrong

Doan's Kidney Pills
SHOULD BE TAKEN.

They go to the seat of trouble, strengthen the kidneys and help them to filter the blood properly and flush off all the impurities which cause kidney trouble. Mr. Thomas Fatty, Mass., Ont., writes: "After I arrived in Canada from New Zealand, a couple of weeks ago, I suffered very much from kidney trouble. I tried several remedies, but they did me no good. Finally my back became so lame I could scarcely work. I was advised to try Doan's Kidney Pills and after taking them I felt like a new man."

Price 50 cents per box or 3 boxes for \$1.25, at all dealers or mailed direct on receipt of price by The Doan Kidney Pill Co., Toronto, Ont.

Merely Obliging.

Magistrate—You gave this young woman such a hit on the face that she can't see out of her eyes. What have you to say for yourself? Accused—Well, she often told me she didn't want to see me any more.

Grief hallows hearts even while it ages heads.—Bailey.

HAD THIRTY-TWO BOILS AT ONE TIME

Two Bottles of Burdock Blood Bitters Cured Him.

Imperfect organic action makes bad blood, so, too, bad blood, in turn, makes imperfect action of every bodily organ. If the blood becomes impure, poisoned or contaminated in any way from constipation, biliousness or any other cause, some especially weak organ must soon become diseased thereby, or the whole system may suffer in consequence.

Pimples, boils, blotches, ulcers, festering sores, abscesses, tumors, rashes or some serious and perhaps incurable blood disease may result. There is no medicine on the market to-day to equal the old and well-known remedy,

BURDOCK BLOOD BITTERS

for all cases of bad blood.

Mr. Ernest B. Tupper, Round Hill, N.S., says: "I think Burdock Blood Bitters a great medicine for boils. I had them so bad I could not work. I had thirty-two on my back at one time. I used only two bottles of B.B.B. and they completely cured me. I cannot recommend it too highly." Price \$1.00 per bottle or 6 bottles for \$5.00.

The world is good or bad just as you feel disposed to make it.

THREE MENU HINTS.

Good Things Easily Made-to Eat and Drink.

Here is a good recipe for fruit punch, the quantity being for twelve persons. You can multiply it, using a lemon for each person: Juice of twelve lemons and six oranges, one pint unfermented grape juice, three bananas-sliced, one pint can of pineapple or fresh pineapple cut in dice, one quart bottle of maraschino cherries. Sweeten and thin with water to taste. Serve in punch bowl with solid block of ice in center. Love Cake.—Mix two and a half level teaspoonfuls of baking powder

FRUIT PUNCH.

and sift, cream one and a half cupfuls of powdered sugar, then add half a cupful of sweet milk and the flour; fold in the stiffly beaten whites of two eggs the last thing and add one teaspoonful of violet extract; bake in loaf three-fourths of an hour; when cold cover with white icing flavored with violet. With a cord crease around the sides of the cake to represent the bars of music and add small red candy hearts to represent the notes, or these can be cut from candied cherries. A row on top of tiny icing rosettes are pressed through a tube, and several crystallized violets are bunched in the center of top, with crystallized mint leaves radiating from these. A row of hearts completes the cake.

Crullers.—The essential difference between a cruller and a doughnut lies in the absence of all shortening—the dough resembling a sponge cake mixture and the cutting or shaping with the knife only. Good, rich, sweet

LOVE CAKE.

cream is used, taking one tablespoonful to each well beaten egg; also one tablespoonful of granulated sugar to an egg, adding a small half teaspoonful of soda (dissolved), a little grated nutmeg and salt. Mix very tender with flour; roll thin as cookies, cutting off small oblong pieces and then cutting each piece part way with knife into two or three slashes. Fry very carefully to keep the color of a lady finger.

How to Keep Slim.

"A special movement I give to reduce the hips," says a gymnasium teacher, "is to raise the right and left leg alternately on a line with the waist, repeating the movement about twenty times with each leg."

"It seems simple enough, but the average woman wants to stop when she has done the movement about five times."

Another exercise which will help to reduce the size of the hips and waist is to bend slowly at the waist line, arms hanging, until the tips of the fingers touch the floor. Then, after straightening the body again, place the hands upon the chest, throw them up to a perpendicular and outward on a straight line with the shoulders, then down. The bending movement, keeping the legs stiff, is excellent for the back."

Cultivate the Sympathetic Voice.

How few there are who realize the great importance of the tone of voice! We say words meant to be sympathetic and kind, but we say them with our lips only. Our heart is not in them; therefore their mission is lost.

Every one at some time or other has experienced the truth of the words of that well known saying, "It's not the things she says, but the nasty way she says them."

Are we all as careful as we should be how we speak to those around us? The poorest girl may make herself universally beloved by the heartiest way she utters her congratulations and condolences. Her "Good morning" may put fresh heart and good hope into the one greeted because the "good" is meant.

Manners at Home.

If parents have one set of manners for the home and another for the outside world, the children will copy those they see in daily use.

There must be no selfishness at home if one does not want the boy or girl to grow up selfish. The foundation of the best manners is a good heart, of course, and a kindly feeling toward every one. Without this they are but artificial and will not stand the test of the buffeting of the world and all its opposing forces.

Firelight Photographs.

A photographer in London is taking portraits in a new way. He poses his subjects sitting by the fire and reproduces the scene with all the cozy glow of a drawing room in autumn before the electric lights are switched on.

The photographs are costly, but a bill of something like \$30 a dozen does not dismay the woman who admires originality and has a long purse or unlimited credit.
