## HERRNDORF GETS SOLID MANDATE

Herrndorf, Buntain, MacDougald. . . Herrndorf, Buntain, MacDougald. . . Herrnd. . .

### TURN OUT for TURN OVER

This term witnessed a record turn-out in the annual Student Council Election. The vote forced a complete turn-over; no person sitting on the present Council will return as an elected representative.

The move toward new personnel for Council was overwhelming. In a polling station breakdown:

	Pres.	V-Pres.		
	Hillis	Herrndorf	Buntain	Major
Comm.	18	105	63	64
sc.-Eng.	6	103	98	16
So. Hall	17	159	114	61
Law	21	78	57	44
Men's Res.	3	136	112	28
Sc.-Eng.	27	147	113	61
Arts-Nurs.	67	181	123	128
Dent.-D. Hyg.	16	71	63	25
Med.-Physio.	20	160	168	19
Ed.-Pharm.	11	83	71	18
P. Hill	1	53	48	4
<b>Total</b>	<b>207</b>	<b>1276</b>	<b>1043</b>	<b>458</b>

Margie MacDougald led the race for CUS Chairman polling 572 votes with Moors getting 437 and Bezanson receiving 360 votes.

Fortunately, throughout the campaign relations between candidates never became even slightly strained. Proof of this is the agreement between Don Moors and Margie MacDougald to co-operate in an effort to forward Margie's designs for CUS in the new term.

Possibly the same magnanimity will be shown in other races with more opponents joining forces to better next year on campus.

The high calibre of the candidates was recognized the electorate as they showed in the large turn-out.

The percentage turn-out for the camp was 67%, a long jump from the dismal 43% of last year. By sections the turn-out was:

### OUR NEW COUNCIL

Med School	285	voted 270	96%
Dentistry	72	voted 72	100%
Commerce	172	voted 144	77%
Law School	120	voted 103	85.8%
Dental Hygiene	12	voted 11	91%
Nursing	111	voted 52	46.8%
Education	93	voted 51	54.8%
Pharmacy	76	voted 47	61%
Engineering	156	voted 116	74%
Science	338	voted 169	50%
Arts	392	voted 159	40%
Pine Hill	120	voted 54	45%
Sherriff Hall	219	voted 176	80%
Men's Residence	157	voted 139	89%

The Gazette in trying to ascertain the reason for this turn-out approached the people connected with the campaigns.

Dennis (Gummy) Ashworth, campaign manager for the Herrndorf-Buntain team said, "The students are more aware of the University interests, and the University is larger. Now that \$50,000 of the students' money is spent each year, they want a say in the Council."

Michel Guite head of the Dal Publicity Department said he felt the turn-out resulted from "... the heterogeneous presidential qualifications . . . the introduction of a centralized poll system - the easing of former stringent voting qualifications (CUS cards, etc.) - the accessibility of each poll, with each responsible for the turn-out - the comprehensive publicity by both the candidates and the election committee."

Whatever the reason the turn-out was most rewarding and gave the new government a solid backing in an exciting election.

### Ready, Set, Hike...

"The constantly rising cost of providing University facilities has forced the Board of Governors of Dalhousie University to approve an increase in the fees for tuition and residence."

Thus saying, the administration hiked fees almost \$160.00 for practically everyone in residence. The increase is in two parts: An increase of \$100.00 residence fees that will effect practically all people in residence and a tuition fee raise that will be almost universal across the campus.

Under the new schedule in Arts and Science, first and second year Bachelor of Nursing, Pharmacy, Dental Hygiene and Physiotherapy fees for the year will be \$525.00. Fees in Graduate studies, sixth year Bachelor of Nursing and Post-Graduate Nursing tuition will cost \$465.00 in the Medical school fees for the first four years will be \$625. and Dental fees increase from \$585. to \$625. Residents of Shirreff Hall will in future pay \$700 for single room and board and \$650 for double room and board. At the Men's Residence increases are not quite so high but residents will still pay \$708. for a single room with board as compared to the present \$638. and for a double room with board the fee will be \$658. per session. But, for the moment the fee increase of \$60. for tuition next session stands.

# MODEL PARLIAMENT

## STUDENT COUNCIL

### I PRESUME By GUS VISMAN

The old DGDS constitution with minor modifications was ratified in its second presentation before Council. The large change is in Section IV, where the Society "shall present each spring a plan of activities for the coming year." Law Rep.-Dave Mann described it as "more flexible" than the original draft, which laid too hard and fast a rule on the events which must be presented.

The Business Manager appointed to the DGDS Executive will have to have two accounting courses to his credit. The largest revision in the Constitution, which makes the Executive (Pres., V.P. and Bus. Mgr.) appointed rather than elected, was passed without alteration from the previous reading.

#### SMU CONFERENCE

Dalhousie will send three to five delegates to the Conference on Biculturalism to be held at St. Mary's University March 7 & 8. The CUS Committee will be asked to recommend delegates; students at large are free to request delegation. Applications must be addressed to the Council Office.

"THE ROLE OF THE STUDENT IN WORLD AFFAIRS" is the focus of an annual jolly at Loyola College (Montreal for our

readers) to which Dalhousie will send no delegates this year. Our delegate last year rated the May conference poorly; ergo no free rides home for ambitious Montrealers.

Dalhousie Ring policy remains obscure. One thing was decided: no one but a student in his graduating year (receiving a degree or diploma) may purchase a ring. Councillors expressed dissatisfaction with the service given at Birks', the company which presently has the monopoly on Dal rings, and a committee may or may not be set up to investigate the matter. Maybe rings will go out of style.

Some quibbling over the seating of a Physiotherapy Rep. at Council: led to a resolution that next year's Council look into the matter and try to seat the Physios.

For Councillors not present, President Cooper and Rep. Joan Stewart will jointly hold a party at George's place, because his parents won't be home - girl friends, guy friends, are invited - and those with wives may bring them.

Rep. Hillis was quiet on the eve of his presidential battle, arriving two hours and seventeen minutes late. He didn't miss any moving drama.

Garth Burrow, Liberal . . . the Lasher.

J. Garth Burrow, leader of the Liberal Party expressed his disgust at the lack of organization in Model Parliament. He said, "This is the worst hash-up I have ever seen. No one knows when the Bills will be presented or what they are. The main aim of Model Parliament is to have a good one no matter who wins. When the leaders are kept in the dark it is impossible to plan any form of attack or speeches until Model Parliament night itself."

Terry Morley, NDP . . . the prime minister?

### THE SAME PAGEANTRY --- UNDERNEATH?

The "hash-up" may be confined to the Liberal Party since on Saturday Conservative Oland submitted his throne speech and Bill to the Gazette.

One of the main points of the throne speech was the Conservative's adamant stand against lowering the voting age.

As the Gazette deadline falls before Model Parliament we can only wonder if this will be the issue to topple the minority Conservative Government as Liberal Club members have indicated that this will be a Liberal motion.

Another large measure advocated in the Throne Speech is "a general reduction of all personal corporate income tax..."

From the Liberal Opposition will come a private member's bill to "instigate a system of national lotteries in Canada."

What plans have been made by Terry Morley and the other members of the New Democratic Party was not released.

We can only call it unfortunate that Gazette deadlines and Model Parliament are not scheduled in a more complementary fashion. However, there is one evening to go, Wednesday and for you unable to attend we shall

hope to have a complete report next week with pictures of the various members and Speaker, Professor Aitchison along with the Governor-General, President Hicks.

Barry Oland, Conservative . . . prime minister for a day?

**DRAMA**

Four vacancies exist for men (approximately six feet in height) interested in taking part in 1964-65 productions.

For auditions please contact:  
Dr. J.D. Ripley  
Room 123  
Arts Annex

Also openings for students interested in stage management, wardrobe, properties and stage carpentry.

**Spring Fashions for Men**

A Spring fashion show with a new twist --- styles for men --- will be presented in the Imperial Ballroom of the Lord Nelson Hotel, Wednesday, March 4, 8.30 P. M., under sponsorship of the Dartmouth Academy Ladies' Guild in co-operation with the Lord Nelson Shopping Arcade Merchants' Association.

The show -- "Strolling Through the Park, In Fashion" -- will include Spring fashions for men, women and children. Fashions for ladies and children will be modeled by Guild members, their daughters and friends.

Special musical entertainment and an art show, featuring portraiture, will be intermission highlights with "Springtime" favors to be distributed.

Tickets for the show can be obtained from Guild members or from stores in the Lord Nelson Hotel Shopping Arcade.

Post Election - Commentary

The people have spoken. More people have spoken this year than in the past few. The president and vice-president ticket of Peter Herrndorf and Bill Buntain won a convincing victory. It is difficult to say whether the resounding victory resulted from the platform of the winning ticket or from superior campaigning. The latter is possibly more true.

The second vote of 67% compared with 48% last year is a tribute to Karen Price, nursing representative on council, and the fine efforts of her election committee. The situation of voting polls in the residences provided for part of increase and the blanket campaigning by the winning ticket was a further influence. The medical school vote was 96%, 285 of 292 voting. We hope that part of the increase was due to increased interest by the student body as a whole in the affairs of their government, and this interest will be cultivated and stimulated by the incoming group.

The campaign, itself was a colorful one, simply from the numerable posters that blanketed the campus especially the canteen building. Some hot words flew but on the whole the candidates conducted themselves in a gentlemanly fashion.

At a quick glance the in-coming

council appears to contain many capable people, but we will not be able to judge them until they swing into action. They have about two or three weeks to prepare themselves for their up-coming task. During this time they should consider it mandatory to appear at the next 'old' council meeting sit in the audience and observe a council in action. They should consider it part of their responsibility to speak to the members of the out-going council and glean from them what-ever wisdom they can pass on.

The new council will be faced with a difficult task at their first meeting, the choosing of the many positions that call for applications from the student body. May we urge the new council to be well prepared to discuss the positions and people they will judge.

The council will also have to choose two members at large-one of whom must be a member of the out-going council. With the graduate ticket in office we feel that it is incumbent upon the council to search diligently among the under-graduate body of the university for these council members.

A note to the losers in all the elections held, please do not disappear from the scene. If you considered yourself capable to

fulfill the positions you ran for, do not abridge your responsibility to both yourself and the school and let your abilities sink into the bog of self-pity. There is a desperate need for you on this campus and there are literally hundreds of other jobs to be done, indeed without them being performed the new council will wither on the vine.

This paper has great confidence in the incoming president and we feel his experience at the University of Manitoba in the many positions he held will bring new ideas and operations to our student government.

Both platforms in the elections had some worthwhile points and the winners would do well to peruse that of the losers and gather from it some points of value.

A word of warning to the outgoing council, your job is not yet complete, do not choose the easy way out in the remainder of your term by placing any problems you could handle in the lap of the new council.

This incoming council will meet turbulent times as will all councils in the next decade, that will see a population explosion at this university. It will be theirs and our responsibility to prepare this university for this growth.

Commission on Financing

Thursday, 13th February, 1964: The Canadian Universities Foundation today announced the appointment of Vincent Bladen, Dean of the Faculty of Arts and Science at the University of Toronto, as chairman of a Commission to study the financing of higher education in Canada.

Msr. Irene Lussier, chairman of the Canadian Universities Foundation, said that the study was the first of its kind to be made in Canada. Similar studies have been undertaken in many countries of the world in recent years, most recently in the United Kingdom, where the Robbins Report is currently causing a total reconsideration of the adequacy of British higher education.

Because of the delicacy of the

constitutional position regarding higher education in Canada, no Federal government sponsored study has been considered possible. It is for this reason that the universities of Canada themselves, through their own organization, have undertaken the study. Before undertaking it, they asked for and got the approval of Provincial Departments of Education and obtained financial support from the Ford Foundation and from Canadian business and industry.

Professor Bladen is a well known economist, who only three years ago was a one man Royal Commission to investigate the automobile industry. The appointment of additional Commissioners will be announced

shortly.

The specific objectives of the Commission are to study, and report and make recommendations on the financing of the universities and colleges of Canada with particular reference to the decade ending 1975, including:-

- 1) prospective financial requirements of universities and colleges, for operation, research, physical facilities and student aid;
2) the proportion of the financial support of higher education which should be provided by tuition fees, contributions from governments, corporations, foundations and individuals, and other sources;
3) policies regarding the allocation of funds for higher education and criteria by which institutions and students should be

Letters

Dear Sir:

I am writing you on behalf of the majority of girls on this campus that I've spoken to with regard to an article in this week's 'Gazette' by Andy White. I feel that the article is overly harsh and too quick to justify the wrongs performed by the boys on the campus. Could it be that Andrew White is trying to condone his own immoral actions? It seems to me that if a boy wasn't so forward

a girl wouldn't be put in a situation where she either has to accept or refuse advances. Remember boys, she wouldn't have to make a choice, if she hadn't been put in the situation. How can you blame the boys for complaining?

We agree that some girls complaints are silly, but you shouldn't condemn us all for what a few girls have said.

Written in anger, Bronwyn Francis

The Editor, Dalhousie Gazette.

Dear Sir:

As a conservative estimate, there have been 5000 dates with Shirreff Hall girls up to the present time. Out of these 5000, Mr. White in his recent column 'The Listening Post' has shown extreme pettiness in taking a few instances and described them as 'typical'.

Absolute promptness is a virtue; but of these 5000 it is safe to say that at least 3500 of these boys have been late. At Dalhousie there is an enrollment of less than 3000. Think!!! Obviously by the number of girls who regularly date members of the Dal male population, punctuality can not be a criterion.

As far as the touchy subject of broken dates is concerned-at least the girl does give an 'offhand sorry'; while Mr. White by saying 'even if the boy calls' implies that the girl is lucky to

get an explanation. Furthermore, we find it difficult to accept that a girl would break a date with a mere 'offhand sorry'.

If Mr. White would clarify his terminology of an 'innocuous advance', perhaps we would be able to justify his 'banishment into the outer darkness'. It is impossible to generalize on a code of morals. Every girl has her own and a boy can usually tell. It is unfair for Mr. White to suggest from his description of our supposed shocked reactions, that all Hall girls are inhibited.

However, in all fairness to Mr. White, we would like to say that his comments on the NATO girl are perfectly justified but... please note the singularity of the noun.

Brigadoon

The professional reviewers have done a hatchet job on this year's DGDS production and with their trained eye have picked out many flaws in the performance. One note to be remembered is that the reviews were written on the opening night and from all reports the performances improved steadily as the week progressed.

This writer, with his untrained eye, enjoyed the play tremendously. It is a credit to the organization that they ever had a production after the chaos that reigned during the first term. Many of the people, stars, supporting cast, backstage and business

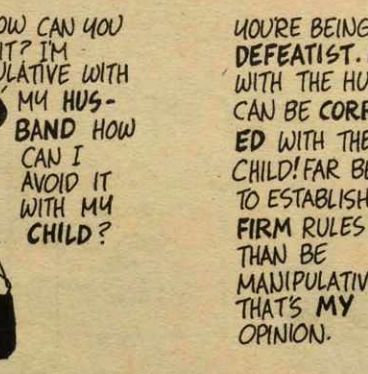

crews poured a tremendous amount of effort into the performance.

Their efforts are to be commended and we feel the student body can only have benefited by their work. It is rumoured that the society will lose more money than they budgeted for, this student feels that it was well spent. The play they performed, I, again with my untrained eye, felt was not the best possible choice. This, however, may serve as a warning to their new executive to seek professional assistance not only in producing their play but also in choosing it.

- deemed eligible to receive such aid;
4) organizations for the financing of higher education, including the roles of appropriate agencies for the distribution of funds;
5) any other matter related to

the financing of universities and colleges and university students.

The work of the Commission will begin immediately and it will be invited to report not later than September 1965.

# Are you a SINNER?

By DOUGALD CHRISTIE

Anybody who is interested in saving his soul and who tries doing anything about it will know that he is under the severe handicap of being crammed full of sin. This article is intended to assist such floundering souls in gaining some understanding of the origin of that sin. Theologians and the Bible present a confusing picture of the situation and it is difficult to sift the bare bones from the theological miscellany. However, we submit that everything may be boiled down to a few quite simple theories.

**The Experimentalist Theory**  
In the beginning the Almighty decided to perform an experiment. He created the universe as a kind of testing grounds and then placed a solitary man in one particular part of the world which was cordoned off and called the Garden of Eden. The object of the experiment, briefly put, was to see if the man could turn away from sin.

There were various stages of the experiment but Part I required only one apple, a snake, a fig leaf, a woman, and the man, Adam. The apple represented evil. As you probably know, the snake successfully presented it to Eve, and, unfortunately for us, Eve successfully presented it to Adam, the result was negative and man was capable of evil. (Whether man was actually evil or capable of evil is a point of vital significance to a theologically trained mind, but it is too complex to be further examined here) The Almighty wasn't present at the experiment (possibly because it would not have gone to completion in His proximity) so some indication or litmus paper was required to tell Him the experimental results. This was available in the form of a fig leaf, which must have been an early prototype for the bikini. In any case, the fig leaf manifested the experimental results to the Almighty and the experiment entered the second stage.

God was disgusted with the results of the first part so he kicked Adam out of the Garden of Eden

and kept an eye on developments. The Adam's family began to multiply like rabbits and things began to get out of hand; people worshipping wrong gods and sacrificing the wrong things, so he decided to flood the whole works and start again with nothing but good reliable Noah stock. This livestock science approach appeared to pre-occupy the Almighty's mind throughout the second stage; he repeatedly thinned out drastically his experimental colony (the chosen people) to try and obtain a pure strain.

After much bickering about with stone tablets, miracles, whales and other original but unsuccessful ideas He decided that a general shake down was required and the third stage of the experiment was entered. He divided Himself up into the Father, the son, and the Holy Ghost which roughly corresponded to General management, sales and maintenance.

If man were to turn away from sin it was necessary that sin be brought home to him afresh. He seemed to have forgotten his initial unforgivable failure in the apple experiment so it was arranged that he murder the sales manager. Though this didn't put an end to the sales manager (He now appears to be an invaluable assistant to the Holy Ghost in maintenance) it had a most salutary effect upon the consciences of many men who thereafter strove mightily to cast off their sin.

The eventual conclusion of the experiment will be when the Almighty personally winds it up, counts the scores of people reasonably free from sin, and we have strong evidence that He throws out or burns the duds. It shouldn't be forgotten as well as the final count up there is a similar running check made on all subjects when they die in the course of the experiment.

**CHECKER GAME**

There is an alternative theory which is somewhat similar to the first but which is being discarded

as being a little too naive — The checker game theory. The players are the Almighty and the devil and the checkers are, of course, men. The Almighty, as his name implies is quite free to sweep all the checkers off the board into his pocket, but, in the interest of good sportsmanship, he keeps playing. The devil is not thus privileged but compensates by dirty play. The game progresses exactly as outlined above only the Almighty is playing a lengthy game with the Devil instead of conducting a scientific experiment.

**OTHER THEORIES**

There are permutations and variations of the theories above which cannot be dealt with here for lack of space. Lest it be thought that the two interpretations discussed are frivolous, some mention should be made on a third theory that the Almighty created man to be a good friend. A friend is never really a good friend unless he is a slightly difficult individual — otherwise he would be very dull. For this reason the Almighty, possibly tired of the perfect agreeableness of the Holy Ghost and the angels created a difficult and sinful man.

**ADVISED READING**

If the student is really determined to get to the bottom of the sin festering within him, there is an excellent theological study of the subject from a slightly different angle written by Mark Twain on political events in heaven. His work was suppressed by his family until very recently on the grounds that he did not know what he was writing. Unfortunately there has been little further light thrown on the subject since his time. Contributions are sorely needed.

## PRIVATE AVIATION

Why  
and  
Wherefore

By TOM GAUM as told to Andy White

When I was asked "why do you fly? What do I get from this hobby which is so demanding, both of time and money. Some, go in for flying as a means of livelihood; their ambitions include commercial airlines or something similar; others, like me, do it purely for the fun of it. So that brings me back to the question; why?"

**FLYING UNIQUE**

First of all, I would like to say that flying is an experience which is truly unique. It is a sensation that cannot be had from any other form of activity. It could be described as a tremendous thrill. When you're in the air, you're above everything and everyone. This might be why air-men have always considered themselves superior to soldiers and sailors.

By "thrill" I do not mean the "kick" of the beatnik or the kickster. This is something entirely different, a sort of mastery of nature in one of her many forms. As far as I'm concerned, everything about flying has a strange attraction. Everything from the clothes I wear when I suit up for a flight, to the tools which one finds littered around the hangar gives me a sensation.

The big moment comes, of course when the plane is airborne when you know you've left the earth behind you and are actually flying, this is the minute that I really enjoy.

**SPECIAL TOUCH REQUIRED**

People often ask me whether or not it is difficult to fly; can anyone learn, they want to know. My answer to this is very simple. A certain type of person makes a good airman. Oh, yes, almost anyone can pass out but I mean really fly. To be able to "feel" the aircraft, to know what every current is doing at the crucial moment; to be able to fly a straight and level course without always having to look at the instruments - all this is real flying. I can't fly according to that definition yet myself, but I'm keeping on trying, and someday maybe I'll qualify.

other days too)? This is one problem that just does not exist in the air. You usually have all the space that you want to manoeuvre in. Not only that. The small private aircraft needs no airfield as such. A flat pasture would do the trick. A stretch of highway can also be used for landing. I myself have often flown onto and off of beaches. In Cape Breton, for instance, I know of an isolated but truly beautiful stretch of sandy beach where I have gone for picnics more than once, and I have used the beach for a landing strip.

**AN EXPENSIVE HOBBY**

Of course, there are some disadvantages. It costs a fair amount to rent a plane. As much as \$17, an hour. Also, you're dependent upon the weather to an uncomfortable degree. Then again, there are some peculiar ideas about private aviation. Most people still think of the private plane as a noisy, flimsy, dangerous thing. This is completely untrue. The Cessna 172 is quite similar to a small 4-place automobile. It has 2 semi-bucket seats in front, and an upholstered bench seat in the rear. There is also some baggage space behind that again. Another example of the utility of the light plane is the following sort of thing. A four-seater like the one I've just described, can be rented for a round trip to Montreal. This would cost each of the four passengers \$50.00 for a return fare. Of course, while in Montreal, the aircraft would have to be flown for a minimum of 2 hours /day, or the equivalent rent would have to be paid, but still, when one considers the convenience, this is quite a thing.

As I've said, Private Aviation is not the cheapest of past-times, however it is not as expensive as some people think it is. As far as the purchase of an aircraft, the usual light planes used around here sell from \$10,000 up to \$15,000 although new planes can be had for about \$5,000 up to as much as \$500,000. Used planes are somewhat cheaper; they go from anywhere around \$3,000 up to about \$300,000.

I would like to say, though, that nowhere can one have the sense of mastery and freedom that is found in the air, and if anyone really pressed me for a reason as to why I fly, this would probably be it.

However, to learn to fly, to pass the "private license" of the Canadian Govt. Department of Transport, one has to have 35 hours of instruction in the air, plus considerable time on the ground. The cost of this program is about \$500. After a successful solo, the candidate receives his private license. After a further 115 hours, he receives a commercial ticket and this permits him to fly passengers in light aircraft for hire. After that, there are instrument ratings and finally, Commercial transport.

# BRIGADOON

## A Review

By MICHEL GUITE

The purpose of D. G. D. S. is neither to amuse the Halifax public, nor to earn profits for the Student's Council; as an amateur campus organization their primary responsibility is the development of dramatic talent and of dramatic interest, within the student body.

The recent production of Brigadoon, while admirable for its success in arousing this necessary interest, failed in effectively developing available talent, and thus failed in attaining a university level of production.

### PROFESSIONALS DISAPPOINTING

Disappointing, however, was not the student cast, but rather the organization's professional element. The creations of set-designer John McLellan, rather than suggest idealized love in an eighteenth century Highland village, were apparently aimed at pure theatricalism — at the more complex undertones of death, sacrifice, and the violence of emotion: These however, merely succeeded in imposing the effect of both physical, and visual bulkiness. The impressionistic frame cottage and farmhouse served not as a complement to, but as an emphasis of the lethargic green and brown backdrops. The extreme stage depth (suggesting the need for a baffle) and unbalanced microphones disturbed the audio effect, while too many complete curtains and scene changes hampered audience contact.

The orchestra, conducted by Ken Elloway, considering their limited rehearsals, worked well with the cast. (a minor difficulty here was the drowning of dialogue in seats nearest to the pit).

### LINE PLAY ON STAGE

Most disappointing however, were the failures in Miss Genni Archibald's previously proved directorial talent. The chorus tended to crowd each other in their attempt at informal theatricalism, but merely achieved loose blocking. They generally lacked individuality and thus appeared superficial. The total impression was of a deficiency in character understanding, leading to an apparent lack of co-ordination.

A further fault occurred in the up-dated interpretative presentation of a highland death dance: While Brenda Mann is to be commended, her movements seemed directed away from and not toward the corpse of her lover.

Norman Hall, as Harry Beaton, demonstrated a concrete degree of character interpretation. With the responsibility of initiating the productions serious undertones his sword dance and chase scene were both valuable contributions. His father, Archie Beaton, (Stan Jacobson) displayed the talent of Jim Machielli and his rake-up

crew, while the three elderly Scots further including Mr. McLaren, (George Munroe) and Mr. Lundie (Peter Roy) had difficulty with their Scottish brogues, and their interpretations of "venerable Highlanders."

Costumes, designed by Sandra Marshall, indicated a lack of imagination. The similarities in design, and the predominance of one color conveyed drabness, rather than originality.

### HIRSCHFIELD STARS

Emerging as full characters were both Cheryl Hirschfeld and Zach Jacobson. The former presented an outstanding performance through her admirable portrayal of Fiona. She repeatedly regained audience contact for the whole cast, thus raising the entire dramatic level; she successfully overcame difficulties arising from an occasional reversion to self-conscious undramatic voice-tone and apparent lack of volume. Most effective was the scene of "Heather on The Hill" with Tommy (Bob Waind). His lack of character understanding and development was compensated by his success in complementing the emergence of both Fiona and Jeff.

### ZACH JACOBSON OUTSTANDING

Zach Jacobson, having previously demonstrated his ability in "Guys and Dolls" was once again well cast as Jeff and provided an amusing contrast to the carefree idealism of his new-found environment, as a very tired and very cynical Brooklyn materialist. He was most successful in his "open shed" scene, with Meg Brockie (Karen Quigley). Meg, cast in a difficult but entertaining role; as a half-gypsy, half-Scottish man-hater, showed stiffness in movement but presented a pleasing performance.

While "Brigadoon" in some respects, is a disappointment, all those concerned with the production deserve thanks for their efforts. It is sincerely hoped that the talent displayed in this year's musical will be developed and improved to contribute to a successful coming year for D. G. D. S.

## ART EXHIBIT

Dutch art and architecture will be the subject of the art film program Feb. 21 at Dalhousie University.

Presented by the Dalhousie Art Gallery, the films will be shown in room 117 of the Sir James Dunn Science Building at 8 p.m. Admission is free.

## CAMPBELL

On The

# HALL

By LIZ CAMPBELL

The residents of Shirreff Hall would question January and started February anew with a change of scenery by having 2 evening meals at the Men's residence. It seems, however, that of scenery, not of taste.

The experiment did offer some novelties to perhaps make the excursion worthwhile. Firstly, it was with glee that we ate in the company of new different faces (male!) and secondly, for those who indulge, the smoking of cigarettes with one's meal was permitted.

Another treat was added to the Friday Night meal . . . a couple of gentlemanly souls wandered about the dining room, looking horribly efficient with white towels draped on their arms as they carried trays for us feminine creatures, and escorted us to our seats. Apparently, though, 200 girls were just too much for these 2 gentlemen and so they didn't turn up again on Saturday night — at least, not in the same capacity.

But now we must turn to the pertinent facts. How do meals and service compare with that available Shirreff Hall? After Friday's "meal", the girls on the whole were ready to accept what they had at Shirreff Hall without complaint. This perhaps, could have stemmed from the fact that the lunch at Shirreff Hall had been almost exactly the same as the supper at the men's residence. Saturday night showed a slight difference in opinion — the girls were more favorably impressed. One thing that this writer particularly liked was not only the selection of fruit juices, but also the temperature — cold!

The service? The speed of service at the men's residence seems to be faster than that found at Shirreff Hall, but this might simply be explained by the fact that their operation is larger. It may as well be accepted, though, that there will always be a line for anything when a large number of people want it at the same time.

It is fairly well known that there is a fair amount of criticism of the meals in both residences, but some of it is exaggerated.

Institutional food is pretty much the same all over, and the majority of the Hall girls are just falling into a conformist rut when they always find fault, instead of searching for virtue.

In general, though, the situation at the Hall is quite good. As an example, 1:30 leaves have been granted frequently on Saturday nights, although still ONLY ON TRIAL. However, by and large, things are about what they must be in the case of a University Women's residence, and no one has any grounds at present for complaint.

## THE LISTENING POST

by ANDY WHITE

## DAL DANCES TOO EXCLUSIVE?

One of the more questionable acts of a somewhat less than brilliant student Council this year has been the introduction of a motion to limit attendance at the weekly Friday night dances to those holding C.U.S. cards, nurses, or their guests. While it is to be conceded that the admission of male outsiders could serve no useful purpose, owing to the fact that this Campus is predominantly male, the presence of more unattached girls than have been attending these dances is almost a sine qua non to the continued success of these affairs.

If students attended these dances in proportion to their enrolled numbers, things would be bad enough, there being almost 3 boys, for every girl registered here. But even this is not the case.

### HALL GIRLS ABSENT

The Typical Hall Girl so beloved of Dalhousian story and song, would rather be seen dead than attending a student dance unattended. As a result of this, the situation is more acute than it would otherwise be if the light of toleration and sociability burnt more brightly at the foot of South Street than it evidently does. Since it is obviously impossible to drive the Typical Hall Girl to attend these dances by force, and attempts at mass invitations would no doubt meet with a stony cold reaction, some other means must be relied upon to provide at least approximate parity in numbers. The efforts of the various nurses residences, welcome though these may be, are only stop gaps, and are little more than a drop in the bucket.

### DANCES LOSING PROFITS

Obviously, then, other means must be initiated or else all point for having these affairs, namely the provision of an opportunity for recreation to students of this University and the making of profits for the various societies which sponsor these affairs will, side by side, vanish.

Since anyone with a particle of brainpower will, no doubt admit that this latter would do nothing than increase the drabness of an already pitifully apathetic Campus life, obviously something needs to be done. The thing which leaps to view would be the admission of girls, of no matter what educational or vocational background, to these dances. There are many girls in this city who would be only too glad to attend and because of the situation outlined above would add much to it. But in-

stead of this, what do we find? An insane motion passed to prevent this very occurrence; something, which, by the way, places the hapless male student even more at the mercy of the Hall Girls than ever before.

### GIRLS HEAVILY OUTNUMBERED

For who in his right mind wants to attend a social function in which unattached males outnumber unescorted females by almost 6 to 1? Who wants to pay \$.75 to stand around in semi-darkness and stare at the faces of his fellows, or that of the occasional policeman all evening?

The excuse given for this action is that it was intended to accomplish three worthy ends.

### HIGH SCHOOL GIRLS IN DANGER?

There are, in their supposed order of merit, first, the imposition of a check on what was deemed to be increasingly rowdy behavior on the part of non-University types; second the "protection" of the morals of "impressionable" High School girls from the rapacious physical appetites of Dalhousie male students, and lastly, the end of making the dances "return to Dalhousie functions, rather than the local booze parlor for High School Students."

To take these claims in order, although the exclusion of non-University males is one way, admittedly an imperfect one, of reducing disorders, removing as it does, hoodlum element from the scene; however, it seems highly unlikely that High School Girls, or working girls either, are to be found among the ranks of dance-hall brawlers. Far more disconcerting to the rank and file of patrons of these dances are, undignified verbal scraps between representatives of Council and the responsible convenor of the affair itself, such as occurred between Miss Janet Young and Mr. D. Moors during the recent Sadie Hawkins Dance. Perhaps the best way to limit ungentlemanly and unseemly behavior at campus dances is to suggest to the Police that they take their duties at these dances just a little more seriously. The method chosen by Council, crippling the dances as it does, is somewhat akin to throwing the baby out with the bathwater.

The other 2 "ends" mentioned above are so closely related to the one just dealt with, and, in the case of the second in particular, are so absurd and vague that they do not deserve comment.

### COUNCIL MUST ACT

The answer, obviously is the prompt withdrawal of this resolution. Such an act, scarcely new to the present council, would help rectify an obviously absurd situation. If not, the Friday evening dances will, no doubt, follow other well-meant efforts to provide the Dalhousie student, either male or female, with some form of "on campus social activity into limbo". That these opportunities are, in many cases not appreciated, and in others, frankly abused should not enter into the matter.

"Get thee to a nunnery, go!"

**Think . . . . .**  
by *Bill Owen*

This is the last week that I go out on the limb to predict the outcomes for hockey while there is still one week left for basketball. Success never hurts but right now those wrong guesses (if that is what you call them) are cutting into my aim for an 80% mark.

**BASKETBALL**  
UNB vs Dal - It appears that the bubble has burst for the Tigers and this means trouble. However the last time these teams met the margin of victory for UNB was only 12 points. Dal should cut this down but I feel that UNB will still win unless Dal come up with another sparkling performance as they did against X, UNB 65 Dal 59.

SDU vs SMU - SMU are just about out of the running for the Maritime championship but they will have not trouble in handling SDU. SDU 47 SMU 75

Mt. A. vs St. FX. - Mount A defeated Dal after the Tigers had beaten X but do not expect the Mounties to do the same. Mt. A. 54 X 74.

SDU vs St. FX - X are once again victors. SDU usually develop into a strong team towards the end of the schedule but X are too strong. SDU 53 X 67.

**HOCKEY**

Mt. A. vs St. Thomas - Mount A surprised everyone with the win over STU before Xmas but this time the outcome is not in doubt as STU should win with more than a two goal margin. Mt. A. 2STU 5

Tech vs Dal - This should prove to be the game that the Tigers need to end the season on a winning note. It will be the last game for two big Dal stars, Buntain and MacDonald. They will be going all out to make this, their last game for the black and gold, a winning one. Dal 4 Tech 2

St. FX vs Acadia - X had trouble the last time these two met but X should be able to pull off a squeaker again this time. It looks like it may well be an overtime game. X 5 Acadia 4

SMU vs St. FX. - SMU have improved a great deal over their performances of last year but they still are not in X's class. X should be able to get a shutout with any luck at all. SMU 0 X 6

UNB vs SDU - THIS IS THE BIG GAME. This is the one that decides the maritime title. If UNB win the crown is theirs but if SDU win they still must defeat the tough St. Thomas team. At home SDU look like the team to beat. UNB 4 SDU 5

Tech vs Acadia - At home or away Tech is the team that restores confidence in the other teams as they put up very little fight. Acadia will have no trouble at all. Tech 1 Acadia 5.

UNB vs Mount A - Mount Allison looked like losers if they play in the same manner as they did against Dal. UNB already won the first meeting between these two clubs by a 6 goal margin and should win easily again. UNB 5 Mount A 3

St. Thomas vs SDU - Depending on the results of the UNB-SDU game this one could go either way. Since it is a home game for SDU they should win but if SDU has lost to UNB it will probably go the other way. St. Thomas 3 SDU 5

St. FX vs SMU - This is a no contest game and is only a repeat of the game played four days earlier. X 4 SMU 1

**DAL HOSTS JUDO**

Dr. Alan Swan Swanzey won the Nova Scotia Black Belt championship once again at Dalhousie gym on Saturday night. Dr. Swanzey, displaying something less than the form which he has shown in past appearances, beat Hogues and Latter in 2 close matches.

The series of matches, started with the white belt (novice) level, and proceeded up through yellow, orange, green, blue and brown. The lower levels were good, and very few matches went the limited time of 5 minutes, the remainder being won by clean throws in usually less than 3 minutes time.

The Orange belt level showed a departure from this standard which was reflected in the very rapid defeat of the class winner when he took on the winner of the Green belt category in the finals. Dalhousie can take pride in the performance of John Micallef, who showed fine technique in the blue belt section. On the brown belt level, Navy's Bob Whitney triumphed.

**BROOMBALL**

Last week in the Studley Arena an outnumbered, but highly spirited Dalcom team held the powerful engineers to a 2-2 tie in a hardfought broomball game. Throughout the game the engineers were continually penalized for having too many players on the ice at one time. However, the expert goaltending of Dick Isnor turned back the plumber's overpowering attempts to score in the final minutes. The referees, Sue Moir and Sue LeBrun should be commended for their efforts to keep the boys under control. Engineers star Les Alexander, he tried hard.

**ENGINEERS VERSION**

The boys from Dal-Com bit the dust once more. The Engineers scored a sparkling 3 - 2 victory in a broomball game at the rink. The money (-less) men were badly outthusted, out-shot, out-manned, out-guessed, out-swept, out-maneuvered and lets face it they were hardly in the game at all.

The Engineers scored first on a goal by an unknown freshman. The Commerce fellows managed to grab a 2 - 1 lead with a couple of lacklustre goals. Instantaneously Hal "The Rocket" Langille tied the score. Moments later a goal was scored by Dale "The Rat" Retallick, but the Commerce boys were able to sweet talk their referee out of it. The lady referees, making the rules as they went along, decided that the next goal would win. The Engineers put on their super power play and banged it in. So it does not matter which way you look at it, the Engineers won.

**LAST GAMES**

Bill Buntan, current team captain has played for five years with Dal. Probably his best season was last year when he scored twenty goals, best in the league. This year, the second year Med student, has been in a prolonged slump with only three goals to his credit. However, he has been overdue to break out and this Saturday's game against Tech could be his game.

Goaltender, George MacDonald has provided four years service in the Dalhousie cage. Recognized by everyone as one of the best netminders in the league he is enjoying a fine season this year with a 3.88 goals against average. Considering the fact that Dal is currently seventh out of nine teams in the league MacDonald should be certainly considered for all star honors.

# 6 Game Losing Skien Broken

Dalhousie hockey Tigers swept to a 6-4 victory over Acadia Axemen at Wolfville to win their first game on the road in two years. This game saw veteran Bill Buntain tally two goals and assist on two others. Goalie George MacDonald played a good game as he handled 43 shots to keep Dal in contention.

It was Rea Clarke of Acadia who scored the first goal with Dal a man short after almost five minutes had elapsed. Twenty-five seconds later, Bill Buntain swept down the ice and, unassisted, beat Harry Powell in the Acadia nets. Dal never went behind again.

### DRMAJ - MCLYMONT SCORE

Halfway through the period, Dick Drmaj found the mark while Acadia was shorthanded. Then rookie Dave McLymont, who skated hard both ways for Dal in the game, stole the puck from Acadia, faked out the defense, and scored his first of the year. With 15 seconds left in the period, Acadia again took advantage of a Dal penalty when John Warden scored to close the gap to 3-2. Terry Hennigar scored at 3:24 of the second period to tie up the game. Almost five minutes later, with Hennigar penalized, Buntain capitalized on the power play from Mercer and Drmaj to put Dal out in front 4-3.

### MERCER NETS WINNER

At 9:26 in the period, John Warden scored with Dal a man short to tie it up 4-4. Not to be outdone at this point, Graham Mercer scored a beautiful goal into a wide-open corner after Buntain passed the puck directly to him across the goal mouth. Although Acadia pressed Dal hard in the third period, the Tigers never faltered. Bill Stanish scored an all-important insurance marker to kill Acadia hopes while Dal played a man short late in the game.

On the whole, both teams played well in the face of inconsistent officiating. There were many examples of players throwing punches, or roughing and highsticking in the front of the net that

were never dealt with by the referee. It should be noted that the Axemen scored 3 goals while they had a man advantage and Dal scored 2 when the tables were turned. Despite this, Ian Oulton, and Ernie Paige played their best game of the season as defensive duo while Dick Drmaj and Bill Buntain were also instrumental in killing the eight penalties to Dal.

### DRMAJ INJURED

Late in the third period, a deflected shot hit Dick Drmaj above the right eye, to hospitalize the speedy winger. Defenseman Jerry Betik was also shaken up late in the game when he was taken into the boards but he was not injured badly and returned to the line up.

After the game, the Dal dressingroom fairly sparkled with spirit which hasn't been seen since after they tied X 3-3 late last year.

## Twin Defeats on Road

At Charlottetown on Friday Dalhousie were simply outplayed and St. Dunstons eked out 61-53 victory. For Dalhousie Dave MacDonald was high man with 22 points closely followed by George Blakney with 17. Jim seaman chipped in with 10 rebounds and generally turned in a fine defensive effort. The officiating was extremely poor, however, it was unbiased. St. Dunstons simply played well enough to beat Dal and deserved the victory.

Dalhousie played their best game of the year, according to coach Yarr, but were defeated 52-47 by Mount Allison on Saturday. Dalhousie led the Mounties by 6 points at the half and 7 at the three quarter mark, but the Mounties came on to win by five point margin.

Jack Budd played his best game of the year, scoring 16 points and was rewarded for his efforts by being chosen the most valuable

## JV's TOP TECH

Our J V Hockey Tigers continued their winning ways last Saturday afternoon by whipping Tech JV's 7 - 1. Steve MacDonald led the way for Dal by scoring 3 goals while John Napier scored 2 others and Paul Clarke and Fulten Logan picked up singles.

Tigers controlled the play all of the way with Pete Stoddard and Doug Bowan being particularly effective in killing penalties.

Goalie Bob Covert of Dal saw little action which emphasized the quality of our future varsity defencemen.

This win leaves the JV Tigers at the top of their league standings with no losses and 1 tie. Other JV teams in the league hall from SMU, Tech and Kings.

## FROM THE SPORTS DESK

By PAUL FARLEY

For the first time in two years the Dal Varsity hockey team won a road game. Against a very hungry and powerful Acadia team Dal performed as a real unit, perhaps for the first time since their first X game, and fully deserved the victory they got.

### REFEREEING ATROCIOUS

Unfortunately as in a number of past games in this league, the officiating was very poor. At several points the game threatened to get out of hand due to the laxness with which the referee handled the game. Sticks were carried high throughout the contest and there were several obvious infractions which were not called or miscalled.

The victory was a very costly one as the Tigers lost the services of speedy winger Dick Drmaj who sustained an eye injury which required hospital attention, but reports indicate that he will be O. K. Dick will be sorely missed by the Dal team as he was their leading scorer this year and netted a tally in the Acadia game before being injured.

### TEAM EFFORT

The whole team played very well, every man giving it almost everything he had. The 6 goals almost evenly split among five players with Billy Buntain sniping two. George MacDonald played another outstanding game in nets keeping the Tigers' heads above water for Dals' early first period 'blues' and eventually winding up with 43 saves.

### DEFENSE

Dal's defense performed very adequately with all four regulars; Oulton, Paige, McLymont and Betik holding up well. The only rookie among them, Dave McLymont looked very good and will undoubtedly be one of the best in the league in seasons to come. Right now he is as good a two way defenseman as any other in the MCHA. Perhaps Clarke of St. F. X. and Drover of UNB are better defensively and Hospodar of ST. Thomas more of an offensive threat with his great shot but I haven't seen any that combine the skating, shooting and general "heads up" abilities that McLymont has displayed.

### POOR FANS

Another unfortunate part of the game was the fan reaction to the Drmaj's injury. They cheered the fact that the Dal player had been injured and in general gave one a sick feeling. One particular old lady apparently a local resident, started a fight with one Dal fan after making several snide remarks at the Dal bench. The unidentified Dal gentleman handled himself with much distinction ducking several vicious swings and subduing Mrs. Liston without injury to her person or himself.

## Girls' basketball Drop 3, Win 1 in Nfld.

Dalhousie University girls' basketball team travelled to Memorial University of Newfoundland to play two exhibition games at MUN's Winter Carnival.

In the first game Dal got off to a fast start, outplaying MUN to score 17 points to their 7. However, in the second quarter Dal was only able to sink five points to Memorial's 7, leaving half-time score at 22-14. For a time it looked as though Memorial would pull ahead, but Dal, although outscored in the last half 17-16, managed to stop the rally and hold the final score to 39-30.

Stoker was high scorer with 16 points. MUN's top scorer was Linda King with 13.

At half-time in the second game things looked good, with Dal ahead by 11 points. However, Memorial staged a tremendous rally in the third quarter to narrow the score to 24-20 for Dal. The last quarter was anyone's game as the teams traded baskets for the eight minutes, but Dal was left on the short end of a 37-36 score.

Scoring for Dal was evenly divided in this game; Stoker sank 13 points, Rowan-Legg 12 and Lane 11. Game's top scorer was MUN's Templeton with 14.

Most Valuable Player award for the visiting team was given to Susan Lane.

Dal's fifth intercollegiate schedule game of the season, played against Acadia in their gym, was a sad contrast to the two well-played Newfoundland

games. Dal was outplayed and outscored throughout the game. Contributing factors may have been the small Acadia gym, loss of first-string forward Stoker and first-string guard Cathy Shaw through injuries, and fatigue from the Newfoundland trip, but the game was, with a few exceptions, very poorly played.

The final score 52-29 as Dal at no time was able to threaten Acadia's early lead, although they sank 33% of their foul shots to Acadia's 30%. The generally loose, sloppy game saw 48 fouls called, 22 against Dal and 26 against Acadia. Hagen of Acadia and Brown of Dal fouled off in the last quarter.

The Dal - New Brunswick Teachers' College game was a sad finale to the intercollegiate season. Although Dal played generally better and fought harder than during the Acadia game, it was to little effect as TC ran up a lopsided score of 79-37. First quarter score stood at 15-12 for TC; for a time in the second quarter it looked as though Dal might be able to hold down the score. However, the deadly shots of Teachers' College could not be stopped; half time score was 35-25 and three-quarter 64-34 for Teachers' College. In the last quarter Dal was able to get only 3 points to TC's 15, leaving the final score at 79-37.

High scorer for the game was Dobson of Teachers' College, with 32. Dal were led by Lane with 15.
