NO. 29

TOWN COUNCIL MEETS

Invitation of Annapolis Board of Trade to Send Delegation to Conference on Municipal Matters Accepted—New Members Added to Fire Company—Fire Department to be Supplied with Use of Horse.

The regular monthly meeting of the Town Council of the town of Bridgetown was held in the council chamber on Monday evening, the 2nd day of December at 7.30 o'clock with Mayor Harlow in the chair and councillors present as follows:—

A. B. MacKenzie; J. K. Craig; S. F. Pratt; J. W. Salter and W. E. Reed.

Ordered that the following bills be paid:—

Jas. Goldsmith for putting glass in engine house, \$0.38; J. H. Longmire & Sons, coal for crusher, etc., \$61.29; Percy Burns, work on hydrants and street scraper, \$13.08; W. E. Connell, labor at crusher, \$0.50; A. L. Anderson, with scow plough on streets, \$2.40; A. S. Williams, stone for crusher, \$25.00; Bridgetown Foundry Co., water acct., \$36.47.

Resolved that the acct. of Gto. Gill board for prisoners, etc., for \$3.45, be paid when revised by the clerk.

A letter from F. W. Micklewright requesting the council to improve the street crossings at the junction of the town during the muddy season was read by the clerk and upon motion referred to the chairman of the street committee.

A petition from the residents of Water and Middle Streets asking for a street light at the corner of said streets was read by the Mayor, and upon motion referred to the light committee.

A communication from F. C. Whitman, President of the Annapolis Royal

Board of Trade, was read by the clerk requesting the council to appoint three delegates to meet at the town of Annapolis Royal, sometime during the present month, with delegates from the town of Middleton to discuss Municipal matters. A resolution was passed appointing the Mayor, the Town Clerk and Councillor MacKenzie such delegates, and Councillor Craig as a substitute delegate.

The following resolution was passed: "Resolved, that whereas the citizens of the town by a largely signed requisition have requested our member for the Federal Parliament, A. L. Davidson, M. P., to use his influence with the Government to procure for the town a grant for a public building at the present session.

"Therefore resolved that we, the town council of the town of Bridgetown do hereby fully endorse the said request and also urge upon our member Mr. Davidson to secure, if possible, the appropriation asked for."

S. E. Pratt, W. E. Connell and Ernest Marshall were appointed members of the Board of Trade, the place of three members who have left town.

The chief of the fire department was requested to at once make suitable arrangements to have a horse ready to attach to the hose reel in case of any alarm of fire in the town.

The purchase of a pair of rubber boots for the company was ordered.

Minutes read and approved and council adjourned.

GREAT SALE OF BOOKS.

New York, Nov. 23.—The greatest auction sale of books in the world ever known came to an end here last night with the last of the offerings from the library of the late Robert Hoe. The sale began over a year and a half ago, and divided into four sections, fell but little short of the \$2,000,000, which it was estimated that the famous library would bring. The total when the last book was disposed of tonight was \$1,922,060.60.

GENERAL-MANAGER

BARCLAY ILL

The Yarmouth Times regrets to learn that W. B. Barclay, general manager of the Halifax & Southwestern Railway, is very ill and that not the slightest hope is held out for his recovery. Mr. Barclay left a week or two ago for California, but his condition is so serious that his physicians have expressed the opinion that the trip cannot possibly prolong his life.

Resort to War Would Be a Horror

Declares Winston Churchill, Regarding Strong Feeling Existing Between Russia and Austria.

London, Nov. 28.—In a speech at a banquet given in his honor here tonight Winston Spencer Churchill, First Lord of the Admiralty said that while a strong feeling naturally existed between Russia and Austria over the Balkan question a resort to war by them would be a horror utterly disproportionate to any cause existing, or any compensation that might be achieved.

BULWARK OF PEACE.

Christian civilization, continued Mr. Churchill, looks across the tangles of diplomacy to the Sovereigns of those august Empires, and asks whether kinship might not in these modern democratic days win for itself new lustre, and proclaim to the multitudes of enfranchised toilers in whose hands power is being increasingly reposed, the fact that the monarchy is the bulwark of European peace.

TRUST ONE ANOTHER.

A great gulf, Mr. Churchill said, separated the affairs of Russia and Austria from those of the other European powers, and they had only to pursue the policy of trusting one another which they had been pursuing, and nothing could drive them from the path of sanity and honor. A general war might plunge Europe almost into the desolation of the middle ages. The only epithet history could write upon such a catastrophe, Mr. Churchill declared, would be this, "that a whole generation of men went mad and tore themselves to pieces."

Body Found At Chebogue Point

(Yarmouth Herald) On Wednesday forenoon as Mr. Kenneth Golden, son of Mr. Edward Golden, of Chebogue Point, was gunning along the beach at that place he discovered the dead body of a man lying about high water mark on the rocks. He at once notified his father, who went to the beach and removed the body to a place of safety, and telephoned Coroner Fuller, who went to the spot and enquired of a jury.

The man was about forty-five years of age, was nearly six feet tall and weighed about two hundred pounds. His skull was bare down to the neck, so that no description of his features could be had. Two of his jaw teeth had been filled with gold, and he was probably of a light complexion. He had on a fine new blue serge suit. On the buttons of his pants was the firm name of "A. Shuman & Co., Boston." The suspenders were of American make and had the name "President" on the buckles. He wore a sporting leather belt around his waist. One laced shoe was on his right foot. A growth of sea moss was upon his clothing, showing that he had been in the water for some months. There were no bruises on the body below the neck. The necktie and collar were gone. His underclothing was gray woolen of light weight.

A verdict was rendered in accordance with the facts. Undertaker VanHorne took charge of the body, prepared it for burial and brought it to town.

Empty Power Boat Drifted Ashore

NO TRACE FOUND OF THE MISSING DIGBY FISHERMEN

Digby, Dec. 2.—The boat in which Gerald Burns and Frank Sypher were fishing during last Thursday's storm, was found on the Bay of Fundy shore one half mile west of Mink Cove yesterday morning by Charles O'Neil of that village. The boat was somewhat damaged, but the engine was in good condition.

Nothing has been heard of the occupants. It is thought they were washed overboard by the tremendous seas and drowned. They might have perished however, landing in the surf.

NOVA SCOTIA APPLES

Co-operative Farmers

(London Daily Telegraph, Nov. 16th.)

There are still in our midst some venerable folk who remember the days when apples were scarce in the winter. A few home-grown specimens were carefully put away in the fruit-room, and used with ever-increasing economy as the season advanced. But even with the greatest parsimony they could not be made to last from one year to another, and at length there came the time when apples were not only out of season, but unobtainable. Such a state of affairs nowadays is altogether unthinkable. Apples are always with us, and the public do not stop to consider such barriers as the seasons, which in regard to supplies may be said not to exist.

Evidently the British have earned a reputation as lovers of the apple, otherwise the growers in the great producing districts would not study so carefully the conditions that rule our markets. Canada, America and the Australian Continent cultivate apples on an enormous scale, and it is quite obvious all have the same objective—the British demand. Production is ever on the increase, and to judge by the present state of affairs it will be necessary "before long for the entire populace to eat large quantities of apples daily if the fruit is to be consumed."

New districts develop with astounding rapidity. At first they send a few sample boxes of apples by way of experiment, to try the carrying quality of the fruit, and to see what kind of a reception it meets with on this side. Of course, a new fruitarian venture on a small scale is always successful, and the prices are realised, and let and besold, next year the fresh district consigns its thousands of packages to the ever-open market. Even with strict adherence to the old and familiar saying, "An apple a day," modern shipments would tax the powers of the most vigorous pomaceous appetites. ANNAPOLIS VALLEY.

In the midst of so many modern ventures it seems a pity to ignore the older ones, especially when they are still useful and add the same objects as of yore. With a continuous stream of novelties people are apt to let us forget the work of some of the best contributors to our comforts. Thus it has been with Nova Scotia, a region to which all British fruit lovers owe a debt of gratitude. California, Oregon and Washington have monopolised the attention of those who chronicle matters connected with apple supplies. Even in this weekly column it is four years since the Colony has received any but passing notice, and it is, indeed, time to make amends.

Whilst other places have been going ahead it must not be assumed Nova Scotia has stood still. The infectious habit of "hustling" spreads rapidly on the other side of the Atlantic, and the Nova Scotians have all the while been improving the cultivation, grading, packing and marketing of apples. Mr. J. N. Chute, the representative in England of the United Fruit Companies of Nova Scotia, reports great progress in all directions since the formation of the first co-operative association of the first co-operative association founded at Berwick in 1907. Before dilating upon the headway that has been made, it is as well to state that the famous apple-growing district of Nova Scotia is known as the Annapolis Valley, which is a continuation of the valleys of Annapolis, Cornwallis, Gasperau, and Windsor. This territory, about one hundred miles long, varies in breadth from six to ten miles, and is very favourably situated between the North and South Mountains, two parallel ranges that afford excellent shelter to the fruit trees.

"THE OLD ORDER CHANGETH." Although apples have been grown in that part of the world for close upon two centuries, the commercial part of the enterprise is comparatively modern. Thirty-two years ago there was great rejoicing because the exports had exceeded 41,000 barrels. Last year the yield

(Continued on Page 8.)

Bad Storm in Digby

TWO YOUNG MEN OF SANDY COVE, DIGBY CO., CAUGHT WHILE FISHING FROM MOTOR BOAT.

Digby, N.S., Nov. 29.—This vicinity was swept by one of the worst northeast storms ever known hereabouts, last night, and it is feared that two young men, "Gold" Burns and Frank Sypher of Sandy Cove, have been drowned. They were fishing yesterday afternoon in the Bay of Fundy, in a small gasoline boat and were seen by other fishermen to leave for home about four o'clock, but as far as could be learned never reached the shore. It is thought that their engine stopped and that the boat foundered. No small boat could live last night in the awful sea which prevailed.

The former was a son of Capt. William and Mrs. Clark Burns and the latter a son of Mrs. Geo. Sypher a widow, who resides at Sandy Cove. Both young men were highly esteemed by all who knew them. They were about seventeen years of age.

The Digby schooners Loran B. Snow, Capt. Ansel Snow and Albert J. Lutz, Capt. John Apt, were both out in the storm. The Lutz passed in by the Bay View Life Saving Station, about ten o'clock this morning, having weathered the gale O. K. The Loran B. is in charge of very competent marines, and it is thought she will be all right.

On shores, trees, flagpoles, telephone poles were broken. The streets quite badly blocked with snow.

To Make Toronto Moral

Toronto has been suffering recently from a publicity procured by inquiry which has been more real than imaginary. Public demonstrations that were well calculated to rouse the public commissioners were held with good effect. A new organization has just been formed to help to make the city clean—morally clean. "If each man swept before his door the city would be clean." Since each man does not do this, some men must sweep for other men. The Christian Men's Federation proposes to do some sweeping in Toronto. It is composed of representatives from the young men's Societies and brotherhoods of the various churches, the Y.M.C.A. and the Commercial Travelers' Association of Canada. The Honorary President of the Federation is Rev. Principal O'Meara of Wycliff Anglican College and the working force on the Executive Committee are men of prominence in their several churches. When the young men take up a work like this, morality and religion get a lift and in Toronto, as in other cities and towns of Canada, there is need for helping the right.

Would Like King to Come to Canada For Celebration

Quebec, Nov. 29.—With the object of inducing the province of Quebec to join with Ontario and the other provinces to fittingly celebrate the peace centenary between Great Britain and the United States, a delegation of public men from Ontario arrived in Quebec yesterday to confer with Premier Gouin.

It is announced that it is desired to prevail upon King George to come to Canada to preside over the celebration.

CHARLES HYDE WAS FOUND GUILTY.

Former City Chamberlain of New York Convicted of Bribery.

New York, Nov. 28.—Charles H. Hyde, former City Chamberlain, a native of Truro, N.S., was found guilty tonight of bribery in connection with the performance of his duties as a city official.

Hyde was accused in the words of State's counsel to the jury, of using "the power and the pressure of his official position, unlawfully to induce" Joseph G. Robin, head of the now defunct Northern Bank, to cause the bank to loan the tottering Carnegie Trust Company \$130,000.

PROPOSED PUBLIC BUILDING

Movement on the Part of the Town Council to Secure the Long-Promised Public Building for Bridgetown—Largely Signed Petition Forwarded to A. L. Davidson, M. P. Urging Immediate Action.

The following petition, to be presented to A. L. Davidson, Esq., M. P., for Annapolis County, which has received the unanimous endorsement of the Town Council and the Bridgetown Board of Trade, and the signatures of upwards of 150 of the leading townsmen, will, the MONITOR trusts, meet with favorable consideration at the hands of the Federal Government:—

TO A. L. DAVIDSON, M. P. FOR ANNAPOLIS COUNTY, OTTAWA

SIR:—

We the undersigned residents of the Town of Bridgetown, in the County of Annapolis, do hereby request you as our representative in the Federal Parliament at Ottawa to use your utmost endeavor and influence with the present Government to secure for our Town, out of the estimates for the present financial year, a suitable appropriation for a public building to be erected here.

We beg to inform you, and no doubt you are already aware, that the town of Bridgetown has never had a public building of any kind or description, and never received any appropriation from the Federal Government for any purpose.

The buildings in which the Post Office and the Customs House are now located are owned by private citizens, and are not suited for the purposes, and are not in keeping with the growth of the Town.

We submit that the Town of Bridgetown, situated in the far-famed Annapolis Valley, with its growing population and number of thriving industries is entitled to the appropriation asked for.

Trusting that you will give this matter your most earnest attention We remain,

D. G. HARLOW, Mayor.

(Here follow the signatures.)

The Mayor has had the petition in hand, and is using every endeavor to make the appropriation asked for a success.

A number of desirable sites have been suggested, should the government accede to the request. It is the Mayor's intention, in event of the scheme materializing, to call a public meeting of the citizens to vote upon the question of a site. This would be a fair way to dispose of a vexed question, and doubtless the choice of the meeting would be unbiased and impartial.

Basket Social

The "Basket Social" given in the vestry of the Methodist church last Monday evening for the benefit of the Riverside Cemetery Fund was fairly well attended, although a driving rain and very muddy roads kept away a good many who would have been present. The ladies who provided the baskets took a great deal of pains not only with the interior but the exterior, some of them being very beautifully decorated and a number of them bringing a very neat figure at auction. The auctioneer was Mr. Harding, president of the Greenwood Cemetery of St. John, N. B., assisted by Dr. Armstrong. The pleasure of the evening was greatly added to by the music of the Bridgetown Orchestra. The ladies of the committee desire to express their thanks to the trustees of Providence Methodist church for the use of the vestry. The sum of \$35 was added to the improvement fund of Riverside Cemetery.

Heavy Snowstorm

On Thursday afternoon about 2.30 the sky became heavily darkened, and the first flakes of what proved to be a heavy snowstorm, began to fall. By four o'clock the fall was very heavy, being accompanied by a high wind, and soon Bridgetown and the surrounding country were in the throes of almost a blizzard. As night came on the wind increased in velocity, and at 9.30 o'clock it was blowing at the rate of 40 to 50 miles an hour. Drifts began to form in various quarters, and walking was very irksome, only a hardy few caring to venture forth in the teeth of the storm. About midnight it had exhausted itself, and this was followed by a keen cutting wind, which gave a certain solidity to the snow.

The storm was general over the province. Near Cole Harbor, the roof of a barn was blown completely off, although within the barn there were some cattle and other stock, none were injured.

Meals!

LOTS of home baked bread, cake and pastry are always welcome. But baking is not always an easy job. Perhaps we can help you. Here is a truth backed by honest proof.

Help:

Regal Flour readily yields the best quality and the utmost quantity of bread per barrel of any flour in the world. Makes light, white loaves. And such meltingly flaky pastry.

Proof:

Try Regal once. If it is not just as good as we have promised, your dealer will return your money. We then have to pay him back. So unless you like Regal we lose completely. Isn't it fair to expect that Regal will mean easier, nicer meals?

Trees into Paper.

In a recent number of a leading English periodical there appeared a very interesting article of "Man versus Nature." It pointed out that the slow laborious processes of nature were, one by one, superseded. In enumerating the marvels that were wrought through synthetic chemistry it mentioned the fact that man transformed trees into paper, and educated the world.

It should be our pride, says the Halifax Recorder—the proud boast of Halifax—that the first known experiment whereby was successfully achieved the transforming of trees into paper was the work of a farmer who "lived, moved and had his being" not very many miles from the old Dutch church. George Mullane, in his "footprints around Bedford Basin," has recalled this very important circumstance—a fact of historic interest that should not be allowed to be buried up. Indeed the invention has been of such transcendent value to the whole human family that the little village, within the sound of the Sackville river, in which the inventor pursued his quiet but persevering researches into the secrets of nature, and achieved so remarkable a result is, at least, worthy of a memorial tablet—so unmistakably descriptive that "he who runs may read."

To-day, from among the many worrysome features that attend the issuing of a news paper, the anxiety of the publisher as to where to obtain his supply of paper has entirely disappeared. If he has the wherewithal to purchase his supply the storerooms of the manufacturer are always at his command. A far different state of things existed before it was discovered that the trees of the forest, which were within sight of his office, could be transformed into paper. The wealth of the Rothschilds would scarcely suffice to monopolize the slender paper stock in the days of the civil war in the United States.

Twenty years before the rebellion over the border Charles Fenerty, of Windsor road, wrote a letter to the Acadian Recorder, under his own signature, announcing the success of his experiments in fabricating paper out of wood, and accompanied his communication with a sample of the paper, so produced, for the inspection of the public. Halifax was unresponsive, feeling satisfied, doubtless, that paper made of any other material than old rags could not possibly be of any value. Man has for some time imitated the precious stones which nature has produced by gigantic force in upheaval. The article has always been viewed as being of too spurious a character to be worth attention. Recently it has been demonstrated that the only difference is that the artificial product is more perfect than the real.

Three or four years later—in 1848—a Dr. Oschatz, in Paris, announced that he had discovered a method of producing paper from wood. But there was already in existence documentary evidence demonstrative of the priority of Mr. Fenerty's discovery to that of Dr. Oschatz. One of the Halifax newspapers of the period dwelt on this point, claiming that from the paucity of means at his command no one had ever been better entitled to the merit of invention than Mr. Fenerty, and in the spirit of fair play the editor added: surely patriotism alone ought to move some influential person to exert themselves in rescuing the claims of a young Nova Scotian to such merit from oblivion. "A prophet hath honor save in his own country."

When you have a bilious attack give Chamberlain's Tablets a trial. For sale by druggists and dealers.

The Horrors of War

SOLDIERS DRINK WATER IN WHICH DEAD HORSES LIE BY DOZENS

A Neue Freie Presse correspondent, telegraphing via Constanza says:—

"I have ridden around all the positions in the Turkish centre near Hademkeui. I have witnessed scenes of misery such as I have never seen before.

"We saw the carcasses of horses lying by the dozen in muddy streams, and soldiers passing by, tortured with burning thirst, drank the water in which the bodies were lying.

"Yesterday troops from Asia, were landed at San Stefano and are now marching to the front. They are already taking scores of cholera patients, while sufferers who have come from the front to Makrikeui infect every place where they stop.

"The nearer one gets to Hademkeui the more frequent do corpses become. Along the roads outside the village and on the bridge dying men stretch despairing hands towards us. From the railway station a train starts in which is Ali Riza Pasha, artillery commander at the Tchatalja lines, who is sick with cholera.

"Dead and dying lie in the trenches and along the roads. Officers of the general staff inform us that on Sunday, November 10, there were 500 cases, 100 of which were fatal. To-day there are already 5,000 cases.

"This is the end. In the forts there were at first only fifteen deaths and an attempt was made to localize the outbreak, but the trucks with the chloride of lime came too late. They should have been sent at least a fortnight earlier, and then the epidemic could have been prevented. Now all the springs are exhausted, and the people are drinking stagnant water.

"All the patients have been herded into a camp surrounded by barbed wire. Around the camp are sentries with fixed bayonets. All this, however, is to no purpose, as on the other side of the inclosure thousands of persons are groaning with pain. Their cries rend the air. With faces emaciated by suffering they wander about the streets and in the gardens and fields.

"We go in search of our horses which we left behind here ten days ago. Dying men are in the stalls, and they cry for mercy when they are disturbed. Many of them curse us in the madness of their pain.

"Here we find our horses, and we must certainly give high praise to the honesty of the Turks. Except some small baggage, nothing is missing.

"On our return we see officers disinfecting themselves and giving advice to the men. The latter however, continue to drink water which is infected by corpses. They are either fatalists or maddened by thirst. The population is in flight.

"The Tchatalja line is a girder of steel formed by 1,200 guns. The troops arriving from Asia Minor are only a strategic reserve. If the cholera does not attack the men in the forts the resistance can easily last for weeks.

We wish to call your attention to the fact that most infectious diseases such as whooping cough, diphtheria and scarlet fever are contracted when the child has a cold. Chamberlain's Cough Remedy will quickly cure a cold and greatly lessen the danger of contracting these diseases. This remedy is famous for its cures of colds. It contains no opium or other narcotics and may be given to a child with implicit confidence. Sold by druggists and dealers.

For beaugard eggs make 1 cupful of white sauce and boil hard 4 eggs. Cut the whites of the eggs into small pieces, add to the white sauce, season well, pour over thin slices of buttered toast. Rub the yoke through a sieve and sprinkle over the creamed eggs.

Minard's Lincture Cures Colds, etc.

ROYAL PURPLE Stock & Poultry Specifics

FREE We will send absolutely free, for the asking, postpaid, one of our large 64-page booklets (with insert), on the common diseases of stock and poultry. Tells how to feed all kinds of heavy and light horses, colts and mares, milch cows, calves and fattening steers, also how to keep and feed poultry so that they will lay as well in winter as in summer. It contains 800 recommendations from all over Canada, from people who have used our goods. No farmer should be without it.

You can fatten cattle and hogs in a month's less time by using our Royal Purple Stock Specific than you could possibly do without it, thereby saving a month's feed and labor and the cost to you will not be more than \$1.50 for six pigs or \$1.00 for one steer. It will keep your horses in show condition with ordinary feed. If you have a poor, miserable-looking animal on your place try it on this one first and see the marvellous result which will be obtained. Our Stock Specific will increase the milk flow three to five lbs. per cow per day, while being fed in the stable. A 50c package will last a cow or horse 70 days.

ROYAL PURPLE POULTRY SPECIFIC will make your hens lay just as well in the winter as in the summer, and will keep them free from disease. These goods are pure and unadulterated. We do not use any cheap filler to make a large package, entirely different from any on the market at the present time.

Royal Purple Stock Specific, 50c package; four 50c packages, in an air-tight tin, for \$1.50. Royal Purple Poultry Specific, 25c and 50c packages, and \$1.50 air-tight tins that hold four 50c packages. Royal Purple Lice Killer, 25c and 50c tins; 50c by mail. Royal Purple Gall Cure, 25c and 50c tins; 50c by mail. Royal Purple Sweat Lincture, 50c bottle; 60c by mail. Royal Purple Cough Cure, 50c tin; 60c by mail. Royal Purple Disinfectant, 25c and 50c tins. Royal Purple Roup Cure, 25c tins; 30c by mail. Royal Purple Worm Powder, 25c tins; 30c by mail.

Manufactured only by The W. A. Jenkins Mfg. Co., London, Canada

"Royal Purple Supplies and Booklets may be obtained from J. E. Lloyd & Son, Bridgetown."

London's Chief Shot by Cabmen.

LONDON, Nov. 27.—Sir Edward Richard Henry, chief commissioner of the London Metropolitan police, was shot and seriously wounded tonight by a man who had an alleged grievance against him. Sir Edward was alighting from a motor car at his residence in Kensington on his return from the Scotland Yard, when a man rushed from the opposite side of the street and shot at him three times with a revolver.

The commissioner's chauffeur, who is an ex-policeman, grappled with the assailant and overpowered him.

It turned out that the man whose name is Bowes, had a month ago applied at Scotland Yard for a taxicab license which was refused. Subsequently he wrote to the commissioner, pleading for a reconsideration, but without avail. For this reason he nursed a grudge against Sir Edward and lay in wait for him. The commissioner had retained consciousness, but is suffering great pain. The attending physicians pronounce the wound serious but they hope for Sir Edward's recovery.

YOU TAKE NO RISK

Our reputation and money is Back of This Offer

We pay for all the medicine used during the trial, if our remedy fails to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. Could anything be more fair for you? Is there any reason why you should hesitate to try our claims to actual test?

The most scientific, common-sense treatment is Rexall Orderlies, which are eaten like candy. They are very pronounced, gentle and pleasant in action, and particularly agreeable in every way. They do not cause diarrhoea, nausea, flatulence griping or any inconvenience whatever. Rexall Orderlies are particularly good for children, aged and delicate persons.

We urge you to try Rexall Orderlies at our risk. Two sizes, 10c. and 25c. Remember, you can get Rexall Remedies in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

Sir Wilfrid Laurier will be seventy-one on Nov. 20th and is making five speeches a day in his own voice. Yet in his youth he was so frail that he was refused insurance. "Teddy" Roosevelt in his youth was sent West because of weak lungs. After he had been shot recently the doctors who treated him said that he had a wonderful constitution. It often happens that persons who are forced to take care of their health out-live those who are born with good constitutions and let their health take care of itself.

The Value of Human Life

An ancient writer asked the question, "How much is a man better than a sheep?" and he asked it in such a way as to suggest that the matter was not open to discussion. There was no common denominator to which the two could be compared. But Dr. Harvey Wiley declares that it is better to be an ox than a man in the United States, and that fat hogs are treated better than women. He gives instances. "A man," he says, "may have small-pox and travel in a Pullman car, yet no one thinks the Pullman should be fumigated each time it is used. But in the case of the transfer of cattle every precaution is used to prevent the spread of contagious disease."

He gives an instance in which it was better to be a fat hog than a woman or a child with consumption. This special case happened in one of the states of the Middle West. A woman with a child was stricken with tuberculosis. She applied to the state for assistance, but was told that there was no appropriation to cover her case. In despair she applied to Washington for assistance. She received the same sort of answer. In the same town there was a farmer who had a fat hog that was attacked by cholera. He wired the authorities at Washington about it, sending the message collect. In an hour he received a reply. It read, "Keep your hog alive for twenty-four hours and our men will be there." The next day three men from the Department of Agriculture arrived. They treated the hog and the animal recovered. The fat hog fared better than the woman.

Dr. Wiley adds that he will run for president when the people of the country learn to put the welfare of the individual before their greed for the almighty dollar. Of these conditions Dr. Wiley will have much time to furnish his armor and perfect his arguments before he is offered the nomination for high office in any of our modern states. In all our countries men are often held cheaper than animals, and limbs are maimed through needless risks. Every twelve weeks of last year there were more violent deaths in the United States than the Union army suffered in the twelve bloodiest battles of the civil war. In six years more than half a million have been killed by accident or violence, and the number of nonfatal accidents was much larger. Most of these could be prevented by the introduction of safety devices, and the evils of the unpreventable ones could be mitigated by the introduction of a satisfactory system of insurance. We are still pagans in this matter, and every one of the millions of men and women, dead or idle, who should be living and working, is a sacrifice to the heathenish gods. Every one of these unuttered men and women should be producing wealth in which we should be sharers. They might be defenders with us of the common rights, and working out the common weal.

Our society has not yet succeeded in establishing a social life where hunger and cold, intemperance and poverty, slavery and crime, premature old age and unnecessary mortality, have been banished. It is full of confusion which often leaves the individual conscious only of his separateness, engaged in a struggle which, so far as he sees, has no more relation to justice and the common good than a dog fight. Conflict, of some sort, is the life of society and progress emerges from a struggle in which each individual, class or institution seeks to realize its own idea of good. The cessation of this struggle would be death, but perhaps the most urgent need of the present time is a clearer consciousness of what may be called the rules of

Shiloh The family remedy for Coughs and Colds. Shiloh costs so little and does so much!

NA-DRU-CO LAXATIVES Women's commonest ailment—the root of so much of their ill-health—promptly yields to the gentle but certain action of Na-Dru-Co Laxatives. 25c. a box at your druggist's. NATIONAL DRUG AND CHEMICAL CO. OF CANADA, LIMITED. 161

the game. In the lack of clear notions of right and duty, what should be an orderly progress degenerates into a scuffle, in which low forms of power tend to prevail and the worst passions predominate. The highest political economy teachers that all are cut short when one is cut short, and that human life is of the highest value. This would be a somewhat reversal of the ideas that at present seem to prevail.—St. John Telegraph

FOR FALLING HAIR

You Run No Risk When You Use This Remedy.

We promise you that, if your hair is falling out and you have not let it go too far, you can repair the damage already done by using Rexall "93" Hair Tonic with persistency and regularity, for a reasonable length of time. It is a scientific, cleansing, antiseptic, germicidal preparation, that destroys microbes stimulates good circulation around the hair roots, promotes hair nourishment, removes dandruff and act to restore hair health. It is as pleasant to use as pure water, and is delicately perfumed. It is a real toilet necessity.

We want you to try Rexall "93" Hair Tonic with our promise that it will cost you nothing unless you are perfectly satisfied with its use. It comes in two sizes, prices, 50c. and \$1.00. Remember, you can obtain Rexall Remedies in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

Parcels Post

The Postmaster-General, Hon. L. P. Pelletier, is considering the question of following the lead of the United States, of Great Britain and of other European countries in regard to the parcel post system. With the increase in density of population and the inauguration of rural mail delivery, it is believed that conditions in Canada will soon be ripe for a considerable extension of the present very limited parcel post arrangements of the Postoffice Department. The United States Postal Department will inaugurate on Jan. 1st next, a parcel post system with a limit weight of eleven pounds, and special rates for dairy and farm products for urban consumption. Mr. Pelletier will probably send officials of the department to the States during the coming winter to investigate the working out of the new system, with a view to adopting it at least in a part of Canada.

The Profits on Apples

A Winnipeg man recently purchased a barrel of Ontario apples and paid \$3.25 for it. On opening it he found a note from the grower of the fruit which read: "I got seventy cents for this barrel of apples, what did you pay for it?" This furnishes a good illustration of the division of the profits between the producer and ultimate retailer. First the producer got his seventy cents, then the apple buyer had to make his profit, the wholesale jobber added something for his, the railway charged for transporting the apples, the wholesale fruit man in Winnipeg made a profit before he sold it to the retailer, and the retail merchant added his delivery charges to his profit and charged the ultimate consumer \$5.25. Co-operation in packing and marketing should enable the farmer to get a higher price for his produce without calling on the consumer to pay more.

Biliousness

is certainly one of the most disagreeable ailments which flesh is heir to. Coated tongue—bitter taste in the mouth—nausea—dizziness—these combine to make life a burden. The cause is a disordered liver—the cure Dr. Morse's Indian Root Pills. They go straight to the root of the trouble, put the liver right, cleanse the stomach and bowels, clear the tongue and take away the bitter taste from the mouth. At the first sign of biliousness take

"Black Prince" Hose for boys are worth trying. They make less work for the mother.

EXPERT WATCH REPAIRING From my books I learn that out of 1000 watches repaired in my establishment last year there were less than 5 per cent. of these returned for adjustment. This is a fact worth remembering when your watch needs attention. My jewelry and clock repairs give excellent satisfaction.

ROSS A. BISHOP Lockett Block.

Minard's Lincture cures Coughs.

"YOU'LL SUFFER ALL YOUR LIFE"

That's what the Doctor told him

"Fruit-a-tives Cured Him"

CHESTERVILLE, ONT., Jan. 25th 1911
 "For over twenty years, I have been troubled with Kidney Disease, and the doctors told me they could do me no good, and that I would be a sufferer for the rest of my life."
 I doctored with different medical men and tried many advertised remedies, but none of them suited my case.
 Nearly a year ago, I tried "Fruit-a-tives". I have been using this fruit medicine nearly all the time since, and am glad to say that I am cured.
 I give "Fruit-a-tives" the credit of doing what the doctors said was impossible.
 I am now seventy-six years old, and in first class health."

GEO. W. BARKLEY.

In all the world, there is no other remedy that has cured so many cases of so-called "incurable" kidney disease, as "Fruit-a-tives".
 This famous fruit medicine acts directly on the kidneys—beating and strengthening them—and ridding the system of the waste matter that poisons the blood. 50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

The C. P. R. and Truro

(Truro Sun)

It is pretty safe to predict that Truro in the next five or six years will be a much more important and busier railway centre than it is today.

No person need be surprised if by that time two continental roads, or the traffic of two continental railways, pass through it and from the sea, and in addition to that, two, at least, branch roads will touch here.

It is officially announced that the standard of the D. A. R., including the Midland, is to be brought up to the standard of efficiency of the C. P. R.

And it can also be pretty safely assured that that big corporation will not end its railway operations in Nova Scotia at that.

The big road and its tributaries go after business, therefore you can mark it down that the company will build the North Colchester railway, and thus get into touch with E. E. Island. Indeed Sir Thomas Shaughnessy, the president of the C. P. R. has already stated that in time they would get around to the building of that road.

In respect of railway accommodation, Truro must plan with an eye to the future, just as Halifax is planning for the future.

In matters of railway, Truro is indisputably the "Hub" of the province, and in that the bulk of her future success lies.

SENSIBLE GIFT GIVING.

Stop thoughtless giving. It is a waste of money, and no one thanks you. Far better an appropriate trifle than a costly present for which the recipient has no use.

MONEY

If money made the birds sing any sweeter.

Or made the skies a brighter, better blue;

If money made a summer's day complete

Or added to the sunset's gorgeous view;

If money made a meadow more entrancing.

A shady lane a better place to stroll;

If gold could add one bit to my romancing.

On money then I'd try to feed my soul.

If money made my true friends any truer;

If money could keep sorrow from the door;

If it could make her blue eyes any bluer,

Each day I'd rise to fight for more and more.

If money made my babies fond caresses

Sweeter to me, I'd spurn all play and rest.

Face dangers grim and dare all dire distresses,

For money then I'd sacrifice my best.

But since my joys are fixed and everlasting,

Since woods and trees can never greater be;

And since a stream, where idly I am casting,

Delights the rich no more than it does me,

I sing my little song and wander gayly,

Content with what I reap along the way;

Life's richest pleasures I may gather daily,

I do not need much money to be gay.

I need not bind my soul with any fetter,

Or wait for joy till I have wealth untold;

My baby's kiss would not seem any better,

Though I possessed a hoard of yellow gold.

The ones I love could not be any dearer,

No happier could be my hours of play.

And money could not bring me one step nearer

Life's real joys—for they are mine today.

A Des Moines man had an attack of muscular rheumatism in his shoulder.

A friend advised him to go to Hot Springs. That meant an expense of \$150.00 or more. He sought for a quicker and cheaper way to cure it and found it in Chamberlain's Liniment. Three days after the first application of this liniment he was well. For sale by druggists and dealers.

Don't let your Christmas go by without giving some sort of present to a child. The excuse that you know no children will not suffice. You can know plenty of them between now and the day of days.

WHY KEEP ON COUGHING?

Here is a Remedy That Will Stop It

Do you realize the danger in a neglected cough?

Then why don't you get rid of it? Yes, you can shake it off, even though it has stuck to you for a long time, if you go about it right.

Keep out in the fresh air as much as you can, build up your strength with plenty of wholesome food, and take Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne.

This reliable household remedy has broken up thousands of hacking, persistent coughs, which were just as troublesome as yours, and what it has done for so many others it will do for you.

Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne contains absolutely no harmful drugs, and so can be given safely to children, as well as adults.

Your physician or druggist can confirm this statement, for we are ready to send them on request a complete list of all the ingredients.

Put up in 25c. and 50c. bottles for the National Drug and Chemical Co. of Canada, Limited.

The Presbyterian Witness reports that the City Council of Halifax are taking prompt and active measures for the suppression of houses of ill-fame in this City. A large delegation from the Moral Reform Association waited upon the council last week, and were accorded a sympathetic hearing. The situation which has led to this campaign against vice was forcibly set before the council by the president of the Moral Reform Association, Rev. C. W. Vernon, Rev. John McInnis, and Rev. Fr. Foley. The council is now pledged to an attitude of uncompromising hostility towards those evil resorts, and the police have been instructed to close every one of them. The publicity given to conditions in the "red light" district of Halifax has been largely instrumental in arousing public sentiment to the point of demanding immediate action. Halifax is probably no worse than many cities in Canada in the matter of morality. We believe conditions here are not so bad as in some of the larger cities of the Dominion. Nevertheless, there was crying need for reform, and it is to the credit of the City Council that they have taken such prompt action in response to the representations made to them by the clergymen and other prominent citizens.

CHRISTMASY TRIFLES.

Make Somebody Happy by Giving Her a Reticule.

Every Christmas needleworker this year is making a reticule for somebody. There is a craze at present for these graceful bags, and styles range from simple affairs of linen for use with next summer's frocks to the most elaborate bags of satin and gold lace, to be carried with opera and theater costumes. Such a bag, if it is to be successful must be fashioned with the very best of materials, and a really handsome bag of this sort may easily cost \$4 or \$5 for the materials alone, though the finished models in the shops, especially the imported models, are tremendously expensive. The handsomest reticules are made of heavy, soft satin, lined with gold or metallic net and ornamented with the tiny ribbon flowers which may be bought all ready to apply. Simpler bags of satin, embroidered with silk or chenille and braided with gold or silver cord, are very effective also, and most dainty theater bags may be made of Dresden ribbon, lined with soft, heavy satin in a delicate pastel tint. The large reticule is always perfectly flat in shape and is usually in envelope style, with one side buttoning over the other at the top. A thin strip of wadding should be inserted inside the lining across the top of such a reticule.

Quaint Effects in Pincushions. A charmingly quaint little pincushion and one that can easily be made by the girl who can handle a needle, is the Browale cushion. Hunt up one of your long neglected friends, the ping pong ball, and with water-colors paint a weird looking face upon it. Then take a piece of saten the color you wish to dress Browale in and cut it five inches long by three inches wide. Sew this tightly at each end to form ears that stand away from the head and gather the rest up behind to make the little baldheaded cap, then paint in a little fringe of hair to peep

out underneath the cap, which will improve the looks of Browale.

A small, tight body is made out of a ball of raw cotton. This is so covered with saten to match the cap and sewed down fast in the back. Arms and legs are made by covering wide ribbon wire with pale pink satin ribbons. These are attached to the cotton body before the dress is put on, and they can be bent into any funny posture you wish. It is cunning to have Mr. Browale look as if he were sitting down in crossleg fashion like a tiny tailor.

In his two hands he holds a bow of narrow ribbon with a long loop attached. This serves to hang the little fellow up with if you wish to have him sit at the side of your dressing table. No one wants to stick cold steel into this dear little fellow, so at his back you sew fast a long narrow cushion in which you may run all the pins and needles you wish without marring the quiet looks of your little friend.

The doll cushion illustrated is a charming trifle made of ribbon and cream satin touched up with water-colors.

A Utility Square. If you have a friend who lives in a boarding house she will appreciate the gift of a utility square.

This is simply a fifty-four inch square of china silk, cretonne, silk-line, linen or any soft material that will take little room in a suitcase and which is used to throw over a chair on which underclothing has been put to air when it is necessary to open the door to admit a bellboy, maid or any stranger who may knock.

The edges of the square are either finished with a plain hem, hemstitched or fringed. Fringed edges are most graceful. If plain material is chosen a flower or some attractive conventional design is embroidered in each corner.

EXPERIMENTAL FARM

Cleaner.—It is learned that the Dominion government agents have completed the purchase of the property owned by W. W. Boyce on the Wilsey road, a short distance below Fredericton. This property, which comprises about 110 acres, will be used in connection with the experimental farm for New Brunswick, which is being established here. This purchase practically completes the land required for the new farm, about 460 acres in all. The price paid for the Boyce property is said to be in the vicinity of \$4,000.

Henry Ward Beecher was once called upon to visit a family all of whom were ill. The good sister said: "Brother Beecher, I suppose it is the will of Him who knoweth best." Sarcely were the words uttered ere she met with the just reproof from her pastor: "It's no such thing, it's that stinking cabbage in your cellar."

PROPRIETOR AND PUBLISHER

WEDNESDAY, DECEMBER 4, 1912.

—An article of especial interest was that concerning the Vermont Industrial School published in the last issue of the MONITOR-SENTINEL, of interest not only because it deals with an important humane movement but also because the successful management of the institution described is the work of a Nova Scotian, a former Annapolis County boy, well-known to many of the readers of this journal.

Nova Scotia, and every other Province in the Dominion should have at least one home for neglected children conducted along the lines described in the article referred to.

It is a splendid work to turn the waste products of humanity into useful and productive citizens. A homeless child may not necessarily be a child without shelter. A sheltering roof does not constitute a home, and many a child not deprived of the shelter of the family roof may yet be infinitely in need of protection and guidance.

The educative forces, combining protection with instruction, should be brought to bear upon every child in every community.

In many cases it is necessary to take children out of so-called homes and put them into suitable institutions. In any case good government, instruction, and a sheltering care should be the privilege of every child, and the laws of each province should be framed to provide such care for needy children.

Our Provincial industrial school, while useful in its way, does not meet the need because it does not take the child before it has become a wrong-doer and has reached a state of development perhaps too late to check.

CONSTANTINOPLE, Dec. 2.—The signing of the protocol of armistice takes place to-day.

It will thus apply not merely to Tchatalja and Adrianople, but to all Turkey in Europe.

The armistice will last as long as the preliminary negotiations for peace continue.

It is stipulated that the position of the belligerents shall remain exactly as at the time of signature.

Up to the present there have been no pour parlers on the subject of the terms of peace. Therefore statements with reference to the fate of Adrianople and the demarcation of new frontiers are unfounded.

A SAD AFFAIR!

Freecott Anthony, inspector under the Nova Scotia Temperance Act, held a "boose" spilling party at the city watchhouse Wednesday. Over a thousand dollars worth of liquor was emptied into the sewer.—Sydney Post.
It was far from a "sad affair" for the woman whose husband was a slave to intoxicants. Her heart said "God speed you, Mr. Inspector. In this spilling business."—Tyro News, Nov. 12.

CORRESPONDENCE.

To the Editor of the Monitor—

In the Monitor-Sentinel, in your first issue of this year, amongst other items suggested that Bridgetown should possess a new station in place of that at present in use at the D.A.R. The time has arrived in which the Council and the Board of Trade, supplemented by a large petition of the leading people in the town, should approach the C.P.R. authorities and ask them if they cannot see their way to grant this more than necessary boon to the town, inasmuch as the station at present is totally inadequate to the town's requirements, and for the further convenience of travellers to have the necessary facilities in the way of a waiting room and toilet room.

The Board of Trade should take up the matter in the most insistent manner, and being supported by the Council and the townsfolk, we believe the representations would have the desired effect.

Trusting the respective authorities will take action in the matter.

TOWNSMAN.

You will find that druggists everywhere speak well of Chamberlain's Cough Remedy. They know from long experience in the sale of it that in cases of coughs and colds it can "always" be depended upon, and that it is pleasant and safe to take. For sale by druggists and dealers.

Dog Sent to France

Some Months Ago Finds His Way Back to Halifax.

Halifax Recorder—Many remarkable stories are told of the sagacity of dogs, but none surpass that which has recently happened in connection with a bull dog belonging to W. H. Wetherby, the Hollis street broker. He is a harmless animal, but most playful, and liable to get his owner in a peck of trouble. Some six months ago Mr. Wetherby sent the dog to George Frecker, of St. Pierre, formerly of Halifax; the latter was delighted with him, but one day a child was missing, and was found in the mountains, where the dog had playfully led him; on another occasion a couple of men were walking down the street, one of them with his hat in his hand behind his back, when the dog jumped for the hat and ran away with it; another day some Americans had gone ashore from a motor boat and on their return found the dog in full possession and had to send for Mr. Frecker to have him removed. These were but few of the instances which happened, and Mr. Frecker wrote Mr. Wetherby that he had to give the dog to a sea captain, who had taken him to France. This was some months ago, and was the last Mr. Wetherby expected to see of him, but the other day he was informed that the animal was in the vicinity of his residence, and he was later brought to him in a lanky condition and is now in his possession. But Mr. Wetherby is naturally puzzled to know how the dog shipped from St. Pierre to France has found his way back to Halifax. The supposition is that the dog may have come back from France to St. Pierre on a vessel and then got aboard another for Halifax, but as to how he really did get here is a mystery.

COACH ACCIDENT AT PORT MAITLAND

A passenger on the wrecked coach from Port Maitland to Yarmouth last Wednesday afternoon says that the driver, Mr. Doucetta, was in no way to blame. He states the facts as follows:—"Just a short distance south of Doctor Simmond's house at Darling's Lake the wicket bolt broke, also the reins, and left the driver helpless, the horses bolted through a wire fence and over a steep bank, upsetting the coach and leaving us buried in trunks, valises, etc. Fortunately a few bruises and a few buttons torn off was all the damage. The horses were badly cut and torn by the fence but the plucky driver mounted the best one and hurried back to Port Maitland and within an hour Hustler Porter was on hand with another team and we reached Yarmouth in good season."

MOVING PICTURE REGULATIONS.

New Brunswick has adopted regulations for the control of the moving picture business, and has appointed a board of censors for the province for moving pictures. Children under fifteen years of age at night shows and under ten years of age at matinees are not allowed to attend unless accompanied by adults. Under the new regulations after January 1st next only films bearing the stamp of approval of the board of censors can be shown in the province. All operators of moving picture machines must undergo examinations and take out licenses at \$2 each. The license fee for film exchanges is \$200; for exhibitors in St. John, Fredericton and Moncton, \$100; and in towns and villages, \$50 annually.

BEAR RIVER, N. S.

NEW SENATORS APPOINTED.

Well Known Representative Men from Nova Scotia—One Appointed for Prince Edward Island.

Ottawa, Nov. 19.—Six gentlemen have been called by His Royal Highness to the senate, all to fill vacancies in the representation of the Maritime Provinces. Five will represent Nova Scotia and one Prince Edward Island. The five from Nova Scotia are: Hon. Nathaniel Curry, Amherst, N. S.; Hon. W. B. Ross, K. C., Middleton, N.S.; Hon. Wm. Dennis, Halifax, N. S.; Hon. E. L. Girroir, Antigonish, N.S.; Hon. Wm. McKay, Reserve Mines, N.S. The new senator from Prince Edward Island is Hon. P. C. Murphy, of Tignish.

Business men today are beginning to watch their employees. They see where their young men spend their leisure and how. If they are found to be leading a vicious life they are discharged. These employers know that such a life takes away energy and ambition, and causes mental and moral degeneration.

It is a good thing occasionally to pull ourselves up with a sharp turn, and ask ourselves what it really is that we are striving for. Is it social success? Is it a good time, or interesting experiences, or perfection in some line of work, or the power to make other people happy, or keep them well? What is it that seems most important to you? What are you living for? And is there anything else which is worth letting lose ourselves on any of them. But only by keeping to the one which will take us where we want to go can we progress and arrive at our destination.—Agnes Edwards in Boston Herald.

The Ladies of Bridgetown May Now Have Beautiful Hair—All First-Class Druggists Sell SALVIA and Guarantee it to Grow Hair, or Refund Your Money.

Your druggist is backed up by the manufacturers of SALVIA, the great Hair Grower. It is guaranteed to grow hair.

SALVIA destroys dandruff in ten days.

The roots of the hair are so nourished and fed that a new crop of hair springs up, to the amazement and delight of the user. The hair is made soft and fluffy. Like all American preparations SALVIA is faintly perfumed. It is hard to find an actress who does not use SALVIA continually.

Ladies of society and influence use no other.
SALVIA is a non-sticky preparation, and is the ladies' favorite. A large generous bottle, 50c.

- 3 Calves
- 1 Mare
- Also a few Potatoes and Turnips.

TERMS:—Six months' notes with approved security.

HARRY J. STARRATT
West Paradise, Nov. 25.

THE PRICE OF BUTTER.

The Digby county farmers who did not sign the agreement to advance the price of butter to 30c. per pound, will no doubt continue to do a rushing business at 25c. the entire year, even during that portion of the season when the price drops to 18c. and 20c. in various parts of New Brunswick and through the Annapolis Valley.—Courier.

The Christmas Number of SCRIBNER'S MAGAZINE (December) contains short fiction of unusual quality, an abundance of illustration by artists such as Wyeth and Victor Anderson, whose pictures are reproduced in color, and several non-fiction articles of general interest.

Price Collier's second paper on "Germany and the Germans from an American Point of View," deals with "Political Parties and the Press." There are four thousand daily papers in Germany, but "neither the press as a whole nor the journalists, with a few exceptions, exert the influence in either society or politics of the press in America and England."

Mr. Collier's analysis of the reasons for this leads to a careful presentation of public life in Germany, and gives an insight into the diverse political parties, with particular attention to the position of the Socialists. All this is expressed in the pungent and graphic manner which makes everything that he writes extremely good reading.

DISPLAY COLLECTION OF FRUIT.

W. A. Woodworth has just completed a collection of fruit of all kinds for the Local Government. This is preserved in formaldehyde and other preservatives in large glass stoppered jars, and present a splendid appearance the fruits retaining their natural color and shape. There are three of each kind, about one hundred and fifty bottles altogether. We understand that one bottle of each goes to the immigration building in Halifax, one to the immigration building in England, and the others to be used by lecturers in England. This should result in settlers of good class to the Annapolis Valley.—W. Chronicle.

BRIDGETOWN SHORTHAND SCHOOL
A Class for the teaching of Shorthand will be held on MONDAY and THURSDAY Evenings (7:30 p.m. to 9:30 p.m.) in the MONITOR HALL, Commencing Monday, Oct. 21. TERMS:—25 Cents per Lesson. N.B.—A Typewriting Class will commence at an early date. F. W. MICKLEWRIGHT, Principal.

LOCAL AND SPECIAL.

It is reported that a fox farm is to be established in Paradise.

Mass will be held at St. Alphonse's Church on Dec. 8th at 11 a. m. and vesper at 3 p. m.

Incorporation was defeated by six votes in Mahone Bay. In two previous votes it was defeated by seven and three respectively.

A new scraper, manufactured for the town by Mr. Percy Burns, has been used on Queen and Granville streets with good effect during the week.

The vacant plot of land north of the St. James' Hotel, which has been surrounded with a hoarding, is, the MONITOR understands, to be devoted to the use of a rink during the winter season.

A heavy rain on Monday night carried off nearly the last remnant of the snow, which had made travelling difficult and unpleasant for several days, sleighing being practicable only on Friday.

At the meeting of railway conductors at Truro on Saturday, Hans Mosher was chosen as representative of the Nova Scotia railway conductors at the meeting of the fraternity in Detroit next May.

The origin of the fire in Mr. Michie's barn is still a mystery, the little girl who carried the lamp into the barn stating that no match was struck and no possibility of fire occurred while she was there.

Messrs Longmire & Sons on Friday removed from their old store in Granville Street to their new block in Queen Street. Considering the large amount of goods to be removed, it was certainly done in what may be considered record time.

It is just as well to remind the juvenile portion of the community not to venture upon ice covering deep waters too soon. Skating is a very fascinating pastime, but it, like other sports, carries sorrow too often into many a home. Boys particularly are too venturesome in this respect.

The majority of the hydrants which have been undergoing repairs, under the supervision of the superintendent of streets, Mr. Gill, are now in good working order, and fit for their proper usage. Two or three are awaiting new parts, and in one case a new hydrant in place of the old one.

Bernard Spurr, one of the progressive farmers of West Paradise, has sold his farm, known as The Pines, to an English gentleman. It is stated Mr. Spurr will leave the province, but the MONITOR hopes he may decide to remain in the home-land, as there is plenty of room here for all our enterprising farmers.

During the past week the approaches to the D. A. Railway station have been very much improved. During wet weather between the station and the rails on the south side the ground has been a veritable swamp, and to remedy this state of affairs, about 30 carloads of gravel have been spread all over the grounds.

An accident occurred at Wentworth Thursday last. The engine when coming out of the plaster quarry left the rails and turned over. The train was in charge of Cond. A. Nichols with driver Roof and Ira Ritchie fireman. Mr. Mosher, of Wentworth, was badly hurt, but the others very fortunately escaped any serious injury.

Owing to complaints by householders as to driving upon the sidewalks with teams and sleighs since the snowfall on Thursday, the custodian of the peace has secured the names of the delinquents and a warning has been given that it must be stopped as the same is illegal. All who break the law in the future in this respect will be prosecuted.

Physical culture, so much in the forefront at the present time, but which has been neglected somewhat in Bridgetown the last year or two, is likely to come into existence once again early in the new year. Providing twenty pupils can be secured, Mr. Gill, the town policeman, and one of the most expert instructors in the Dominion, will organize and instruct a class in this form of physical improvement.

Considerable alterations are being made in Moses & Young's store, Granville Street. The whole building is being raised four or six inches, and a large plate glass front window will be installed. The large elm tree growing in front of the building and close to the door, the roots of which has caused the floor in the front of the store to rise a few inches, is being cut down, this being necessary for the sake of the building.

The Graham evaporator will not be opened here this year. E. O. Wood, manager of the Graham evaporators, who was in Middleton on Thursday, informs the Outlook that although there are lots of apples offering, yet so glutted is the market for evaporated stock that all Graham evaporators are being closed down. Nor is there any demand for cider apples this year as last in Ontario, the apple factories there being closed some time ago.

PERSONAL.

Mr. A. Whitman has returned from the West.

E. T. Nelly has moved from Brooklyn to Middleton.

Mr. Freeman Pitch of Clarence, is visiting the Winter Fair at Amherst.

Harry Abbott, of Vancouver, is in town, having arrived on Monday of this week.

Miss Mary Jost left on Saturday to visit her brother, Rev. Roland Jost, at Yarmouth.

Sydney R. Fay, of Saskatoon, will arrive home next week to spend Xmas with his parents.

Mr. E. A. Cranton, who supervised the construction of the aboitean bridge in Granville Street, left for Truro on Saturday afternoon.

Mr. Little, the new manager of the Royal Bank is to arrive here from Springhill on the 19th inst. The local branch is now in charge of Mr. M. H. Curl.

Arthur T. Morse, of Paradise, has received an appointment to the Fruit Inspectors' department, Halifax, and left to take up his duties next Saturday.

Mr. Hal Hoyt, who has been at Kentville for a few months, has returned to Bridgetown, and is filling the office of accountant in the local branch of the Royal Bank.

Mrs. A. Cameron, who has been West during the summer months, has returned. While West he visited, amongst other places, Edmonton, Calgary, Moose Jaw and Medicine Hat. He means to go to West again.

Mr. G. E. Hart, who has been managing the Hart Clothing Store, has gone to New Brunswick to resume his former position on the staff of the C. P. R. Mr. Max Young is his successor in the clothing store.

Mrs. Dunn of Middleton, who has been with Mrs. R. A. Crowe for the past six months, has gone to her home at Middleton for a month's vacation. Miss Myrtle Howe of Middleton, is at present staying with Mrs. Crowe.

LOCAL AND SPECIAL.

The local association of the Feeble-minded Organization will meet next Wednesday evening, in the Methodist vestry, to formulate a program for the ensuing season.

Mr. Aitkins, an English mining engineer, whom Mayor Harlow met recently at Moncton, has been in Bridgetown for a few days. He is interested in an English farming scheme, and with a view of purchasing suitable farm land for his purpose, was persuaded by Mayor Harlow to take a look at some Clarence farms. Mr. Aitkins did not find the individual farms large enough to suit his aims, but he has taken an option on a block of farms, viz: F. & H. Marshall's, Freeman Corbitt's, A. Rumsey's, E. V. Goldsmith's, and Wm. Spurr's. While welcoming the English capitalists the MONITOR trusts that the progressive and esteemed farmers mentioned above will not remove from this locality, in case the deal should materialize.

The new bridge at the aboitean had a very severe test as to its stability on Tuesday morning. The preceding evening a thaw had set in quite early, and this was followed by a very heavy rain-storm, the consequence being that the melting snow augmented by the rain, filled the meadow to the north of the bridge, and the waters came down in a torrent to the culvert. Unfortunately the strength of the stream was too great for the loose land adjoining the sides of the concrete culvert, the result being that the waters forced their way east and west of the culvert concrete and washed a portion of the ground away. The effect upon the surface is particularly noticeable upon the north-west corner of the sidewalk adjoining the concrete square, where a hole was in evidence. To the east of the square there also appears a slight subsidence of the land but both have been filled up. The waters rose so high that they penetrated the tannery department of McKenzie, Crowe & Co. and stopped all work in the beam-house until the waters had subsided.

Mr. Henry P. Goodwin Married.

The MONITOR has pleasure in announcing the marriage of Mr. Henry Pooley Goodwin to Miss Mary Karmahan, which took place at Los Angeles, Cal., on the 21st of August. Owing to a miscarriage of the letter, which was returned from the postal department, Ottawa, last week, the announcement was delayed in reaching the MONITOR office. Mr. Goodwin is a son of the late G. H. Arnold Goodwin, and many friends of the family will be interested in the happy event.

CARD OF THANKS.

Mr. and Mrs. Louis Michie desire to express their thanks to the Bridgetown firemen, whose prompt service resulted in saving their barn from total destruction and loss.

The Aboitean Bridge

The end of last week saw the completion of the much-needed new bridge across the aboitean. The two short concrete walls at the sides, which are 2 feet 9 inches high, make quite a pleasing feature to the bridge, and with the widening on the south side to the extent of 8 feet, a much needed improvement is the result. The wood casing over the whole of the concrete under the bridge will not be removed until April next year. During the past month or six weeks Mr. A. L. Anderson has had under construction two small culverts to the west of the town's limits, and most substantial structures they are. Stone and concrete form the walls, while across the gulleys flat stone are laid. Considerable work is also being done in the same direction to the east of the town, where pipes are being laid, covered with soil, instead of the planking as heretofore.

Grand Central Closed

For the first time almost in the history of the town the hostelry now known as the Grand Central is closed to the travelling public. The original hotel on that site was known as Miller's Hotel and was opened upwards of a century ago. If any of the MONITOR's readers know the approximate date or could give any details as to the history of the hostelry the MONITOR would be pleased to publish the statement. No successor to the late manager, Mr. C. S. Silver, is yet apparent.

CHRISTMAS GIFTS FOR HIS HIGHNESS

Presents the Mere Man Will Find Attractive and Useful.

The man who travels will appreciate a handmade set for his satchel, including a shaving pad, tie holder, collar, bag and a handkerchief case. Make them of linen art crash with an original design stenciled on the covers.

For the shaving pad cut two pieces of cardboard 4 by 7 inches, make two round holes in one side of each one-half inch from the edge. Cover the cards with the linen and on one side of each apply the stencil design. Another cardboard seven inches long and one inch wide is covered with linen. This is placed lengthwise of the edge of the two larger pieces and the edges whipped over and over with strong linen thread.

Now you have the covering for the thin sheets of paper. White tissue or manilla paper is cut into sheets to fit inside the covering. Round holes are made in them corresponding to those in the covers and narrow ribbon is run through each hole, brought over the back and tied in a flat bow.

The tie holder is made much in the same way as the shaving case. Two pieces of cardboard are cut fourteen inches long and six inches wide, covered with linen stenciled and joined at one edge, so it will open like a book. The ties are folded and laid flat inside the cover.

Make the handkerchief case of linen folded like an envelope. When finished it is six inches square. The linen is padded with a layer of cotton wadding and lined with pink or blue china silk. It is put together perfectly flat, caught together with embroidery silk after it is folded over, and the flap is held in place with a small glove clasp.

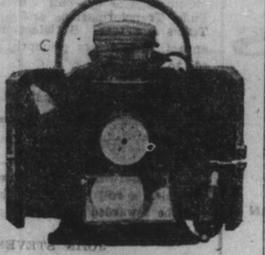

The set or any one of the articles would make an appropriate holiday gift, would cost little and will be very easily made.

The Luminous Clock.
When in doubt about purchasing a really useful Christmas gift for a man why not consider one of the new luminous clocks that are on the market this year?

The clock pictured is of this description and makes a most covetable possession.

What the College Man Will Like.
Sofa pillows are gifts that always touch the heart of the college man, but these same cushions must be of the right kind to make a hit with his majesty. The ideal pillow, if intended to take any wear at all should be filled with feathers, not with cotton waste. Somebody may have to spend the night sleeping on that pillow. It should be of material that will neither fray nor fade. Soft velvet, leather and a heavy silk in plain colors are ideal. If it bears any embroidery let it be well toward the edges or in the corners. Use no tinsel—tinsel scratches. If cords are used it must be seen that they are sewed—nay, riveted on—in the strongest possible fashion. Thereafter will the giver be in receipt of many blessings.

A Musical Suggestion.
Steins are not new suggestions for Christmas gifts, but a musical tankard that plays the good old convivial tune of "For He's a Jolly Good Fellow"

EXECUTOR'S NOTICE

POSITIVELY THE LARGEST SALE IN CANADA

THE HOME

TO KEEP SEWING MACHINE IN ORDER.

In order to bring about the best results it is not only necessary to know how to run a sewing machine, but also to know how to take care of it. Not only will better stitching be done by a machine kept in good condition, but the labor will be lessened also, so the few minutes given now and again overlooking the machine will be time saved.

When the machine runs hard the operator knows without being told that oiling is necessary, but more often than not the trouble is caused by the accumulation of lint caught into the feed. When this is so the oiling does not wholly help matters.

Both the slides and the feed plate should be removed (one small screw usually secures all three parts) and the machine turned back so one can see well underneath.

A soft cloth folded around a common wire hairpin can be used to remove all the bits of lint and dust gathered there.

When a machine has been out of use, the oil is apt to become gummy. Very often this prevents the parts of the machine from moving at all. Dust and dirt clog in the same way.

What is needed is a good going over every part of the machine with kerosene, using plenty of the fluid. This will cut the congealed oil. After applying the kerosene the machine should be run quickly for a few minutes, afterwards wiping away all the kerosene in sight. It is now time for the oiling. Machine oil is not actually necessary. Any pure oil at hand will answer the purpose in an emergency.

Every woman who owns a machine knows that oil must be dropped into all holes, also on the treadle and large wheel. Neither does any operator need to be told to wipe the machine entirely free from oil before sewing with it.

Should, however, one be so unfortunate as to get a grease spot from the machine on the material it can be removed by immediately covering the place with French chalk. If this is not at hand talcum may be substituted. Oil-stained white goods should be laid in cold water.

When the thread breaks first look to the tension. If it seems too tight, loos-

en. Then if the thread still breaks carefully examine the parts guarding the thread. Quite often the breaking is caused by a sharp edge raveling the thread, so that when it reaches the needle the thread is knotted and it will not pass through the eye, but breaks instead. A small file will make the sharp edge smooth.

When the machine refuses to "feed" a strip of paper passed along the seam and underneath it will usually start things going. The paper is usually pulled away afterwards.

As a paper of machine needles lasts a long time they are apt to become rusty. In this case prevention is better than cure, so soak the pocket, paper and all in machine oil, and they will keep free from rust for any length of time.

The point of the machine needle becomes blunt if it strikes the feed plate, and this usually happens to the last in the packet.

Should one live far from a store an old needle can be made like new by sharpening it on emery paper or any implement in the house used for sharpening. A blunt needle will make the work pull.

Pure air imparts life to every cell and fibre of the body. It makes the blood circulate rapidly and sweeps ahead of it the sluggish particles and slight poisons that gather in our bodies.

This in itself causes an appetite—and, better still, produces the vitality to take care of the food and keep one from suffering from indigestion. Those who take the fresh air in great quantities and keep the blood going vigorously are not subject to half the minor ailments that bother and disturb those who lead sedentary lives.

The man or woman who must work all day in an office or in a house would do better to walk at least part of the way to and from home than to take the street cars, usually crowded, at the time indoor workers are going home. Frequently one feels too tired to enjoy the prospect of a walk, but this feeling will often wear off after one has been breathing the fresh air a little while.

Of course there are two sides to the question, and it is not advisable to use up the balance of one's energies by a long walk after a day's work. Keeping in mind the need for fresh air and a certain amount of exercise one can work out the intelligent "happy medium."

CHRISTMAS GIFTS FROM CARDS.

The picture postcard is sometimes regarded as a bit of a nuisance, and it has certainly become too common to be valued, but there are postcards and postcards, and some are really artistic enough to be worthy of a place in the Christmas gift making.

A set of postcard blotters makes an unpretentious but useful gift for a man.

From the regulation size sheet of blotting paper, which comes in a variety of colors, the red or green, however, being preferable for Christmas usages, you can cut twelve blotters four inches wide by nine and one-half inches long. Paste a card about a quarter of an inch from one end, and if desired, one leaf from a small calendar in the remaining space. Tie with scarlet or green ribbon through holes punched in one end or the middle of one side.

There is an interesting variety of calendars that may be made with the aid of the postcard; hobby calendars, art gallery calendars, travel calendars, child-like calendars, and calendars of cheer up philosophy, served a la carte.

For the person who is fond of cats you can find photographs of pussy cats in all walks of feline life. For the new mother, select cards that show toddlers in all phases of infantile charm and mischief. These, if colored by hand and mounted on white or pale blue and pink boards, make the daintiest possible calendars for the bedroom. For the art lover, mount the reproductions of famous portraits by Gainsborough, Reynolds, and others. For the nature lover select views of wooded paths and water scenes.

Six inches wide by nine inches long is a good size to make the leaves of these calendars, which may be cut from water color paper, thin cardboard, or any art paper suitable for the purpose.

Each leaf may have pasted at the bottom beneath the postcard small calendars for one, two or three months, according to the number of leaves you wish to make. These leaves are tied together at the top with a bow of narrow ribbon or cord. Very attractive are those made from brown paper, each leaf having one of the author cards in brown tones pasted in the centre of it, and brown raffia used for the tying at the top.

Should one live far from a store an old needle can be made like new by sharpening it on emery paper or any implement in the house used for sharpening. A blunt needle will make the work pull.

THEIR CHRISTMAS PRESENTS.

I.
Little Penelope Socrates.
A Boston maid of four,
Wide opened her eyes on Christmas morn
And looked the landscape o'er.

"What is't inflates my bas de bleu?"
She asked, with dignity.
"Tis lissen in the original.
Oh, joy beyond degree!"

II.
Miss May Cadwallader Rittenhouse
Of Philadelphia town
Awoke as much as they ever do down
And watched the snow come down.

"Well, I'm glad that Christmas has come
again."
You might have heard her say.
"For my family is one year older now
Than it was last Christmas day."

III.
It was Christmas in giddy Gotham.
And Miss Irene de Jones
Awoke at noon and yawned and yawned
And stretched her languid bones.

"Well, I'm sorry that it's Christmas.
Papa at home will stay.
For 'change is closed and he won't make
A single cent all day."

IV.
Oh, windily dawned the Christmas
In the city by the lake!
And Miss Arabel Wabash Breezy
Was instantly awake.

"Ah, what's that in my stocking?
Well, in two jiffs I'll know!"
And she drew forth a grand piano
From away down in the toe.

—Boston Courier.

BE WHAT MOTHER THINKS YOU ARE.

While walking down a crowded city
street the other day,
I heard a little urchin to a comrade turn
and say,
"Say Jimmie, lemme tell youse I'd be
happy as a clam
if I only wur de feller dat his mudder
t'inks I am."

"She t'inks I am a wonder an' she knows
her little lad'
"Could never mix wit' nothin' dat was
ugly, mean or bad.
"Oh, lots o' times I sit and t'ink how
nice 't would be, gee whiz!
"If a feller wur de feller dat his mudder
t'inks he is!"

My friend, be yours a life of toil or un-
diluted joy,
You still can learn a lesson from this
small, unlettered boy.
Don't aim to be an earthly saint, with
eyes fixed on a star:
Just try to be the fellow that your mother
thinks you are.

Joker's Corner.

MUFFLED KNOCKS

"Verena, bring Uncle Elijah another napkin. He has tucked that one under his chin."

"I was only joking when I said you had been calling on the maniere Mr Pimminis. I can see that you have not."

"It's awfully good of you to stay so long this evening, Mr. Spooner, suffering as you must be from those tight shoes"

"How much trouble it is to look after boys. I don't wonder, Mrs. Chuckley, that you seldom have time to wash Bobby's face."

"Clarence, dear, are you starting a beard, or have you merely forgotten to shave?"

WAS HE LAZY?

A lawsuit was recently in full swing, and during its progress a witness was cross-examined as to the habits and character of the defendant.

"Has Mr. M—— a reputation for being abnormally lazy?" asked counsel briskly.

"Well, sir, it's this way——"
"Will you kindly answer the question asked?" struck in the irascible lawyer.

"Well, sir, I was going to say it's this way. I don't want to do the gentleman in question any injustice. And I won't go so far as to say, sir, that he's lazy exactly; but if it required any voluntary work on his part to digest his food—— why, he'd die from lack of nourishment, ir——"

PAT WAS READY

An Irishman passed a shop where a notice was displayed saying that everything was sold by the yard. Thinking to play a joke on the shopman, he entered and asked for a yard of milk.

The shopman, not in the least taken back, dipped his finger in a bowl of milk and drew a line a yard long on the counter.

Pat, not wishing to be caught in his own trap, asked the price.

"Sixpence," said the shopman.
"All right, sor. Roll it up: I'll take it."

Jack—When I asked Ethel if she would be mine she fell on my breast and sobbed just like a little child, but finally she put her arms around my neck and—
Maud—Oh, yes; I know all about that. I rehearsed it with her.

Judge—You are charged with breaking a chair over this man's head.

Prisoner—I didn't mean to break the chair, your worship.

Canada Affected by Balkan's War

The world is becoming so small, that the effects of events across the ocean are reaching us quickly here in Canada. In one Ontario town, Bulgarian laborers, who heard their Country's call and answered it, went to the banks and drew out nearly half a million dollars of the sums they had deposited there. Similar drains have been made in other centres of the country upon the vaults of banking houses. Railway contractors have been compelled to suspend work in new sections of the west and north because of the departure of these foreign-born laborers. City sewer-builders also have been embarrassed in the same way. The day is coming when we shall see that it is true of all the world, that if one member suffer, all the other members suffer with it. "War is a game, which, were their subjects wise, kings would not play at." Thank God! the people are coming to see the horrible results of this wholesale butchery called war.

Our school is progressing finely under the skillful management of Miss Lilla Noglir of East Inglisville.

There are some here who were interested in the Exhibition at Bridgetown who are anxious to learn what has become of the prize list.

MINARD'S LINIMENT CO., Ltd.

Gentlemen.—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of la grippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,
W. A. HUTCHINSON.

Instances of the careless use of fire-arms are reported from time to time, and recently there have been some narrow escapes from serious accidents in the vicinity of Moncton, but one of the most alarming cases is reported from Stevens mountain.

One day this week while the pupils in the school there were engaged at their work, they were startled by a crash and the falling of glass. Examination of the windows showed that a bullet from a hunter's rifle had gone through the window of the school house, nearly hitting one of the pupils, a little girl. The bullet, it is said, went close by her head.—Moncton Transcript.

COLD SORES AND ULCERS ARE HEALED BY ZAM-BUK

Cold sores, chapped hands, ulcers, and winter eczema are common troubles just now, and for all these Zam-Buk will be found the surest and quickest remedy. Sometimes cold sores arise from chilblains on the toes of fingers, and in the former case, where the colored socks are worn, there is a danger of blood-poisoning from the dye. Zam-Buk being so powerfully antiseptic removes the danger as soon as applied and quickly heals.

Mr. W. J. Halliday, of Ash Grove, Ont., says: "I had my little finger frozen, and it cracked at the first joint, causing a bad sore, which discharged freely and would not heal. The pain was very bad, and the whole of my hand became swollen and in bad shape."

"A friend advised me to try Zam-Buk, and I soon found that Zam-Buk was altogether different to any preparation I had ever tried. In a very short time it healed the sore."

Miss Lillie May, of Stoney Creek, Ont., says: "A few weeks since, several nasty, disfiguring cold sores suddenly broke out on my lips, which became much swollen. Seeing my condition, a friend advised me to try Zam-Buk and leave all other preparations aside. This I did, and was much pleased, after a few applications of this balm, to see every sore healed."

Zam-Buk will also be found a sure cure for eczema, blood-poison, ringworm, inflamed patches, babies' eruptions and chapped places, cuts, burns, bruises, and skin injuries generally. All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, upon receipt of price. Refuse harmful imitations and substitutes.

Use also Zam-Buk Soap, 25c. tablet. Best for baby's tender skin.

Nova Scotia Apples

(Continued from Page 1.)
all but reached 2,000,000 barrels. Quantities, of course, cannot be regulated closely. Nature still being triumphant over the best efforts of man, but the conduct of the industry can and has been improved in most marked manner during the past ten years, more especially since the co-operative system has gained ground. At one time anything that had grown on a tree was considered good enough to ship to England, provided the best fruit was always on the top layer. It is easy to understand that such ill-considered practices do not rank even as clever rogues, the fraud being palpable and easily discovered.

Very soon it was realized that for the Nova Scotian apple industry to be prosperous the work must be conducted on straight forward and honest lines. In other words, the top layer of fruit shall be a fair indication of the entire contents of the barrel, and not a mere decoy for the unwary and inexperienced purchaser the result that genuine packing took A Fruit Marks Act was passed, with the place of false and careless methods, and confidence in the Colonial fruit was quickly established. That was the first move in the right direction, and many more have followed since a large number of growers have joined forces. The association known as the United Fruit Companies handles about half the entire output of Nova Scotian orchards, and has done more than legislation to improve the lot of the grower, and, incidentally, to satisfy the consumer.

STORAGE AND CO-OPERATION.
Belonging to the association are frost-proof warehouses for storing the fruit during the cold season—10 degrees below zero not being an uncommon occurrence in those parts. In former days farmers who were not possessed of sufficient means to build these warehouses (at a cost of about \$3,000 each) were compelled to sell their fruit to local speculators, astute gentlemen, who took special care to leave an ample margin of profit for themselves, even assuming the market to be unfavourable in England. To do away with the necessary middleman there arose the twenty-nine associations now merged way, must not be confused with the into the one company, which, by the United Fruit Company of Boston, that vast and wealthy organization which provides Europe with bananas and Jamaica oranges.

London is the chief market for Nova Scotian apples, and for many years it has fallen to the lot of the Colony to provide cheap and good varieties for the middle-classes and the poor of the capital. It has been said of the port that they do not make new friends. Well, in regard to apple supplies they want no better friend than Nova Scotia, especially since the co-operative system of marketing has been worked with such good effect. Growers send their fruit loosely packed to one of the association's depots. Upon arrival it is standardized and sorted into "ones," "twos," and "threes"—the chief grades used to designate the size and quality of the fruit. There are also "fancy" and "extra fancy" apples for specially fine lots. Fruit deemed unsuitable for shipment is set aside; the rejected ones being described as "culs." Growers receive no credit, financial or otherwise, for any apples sent to the packing house which are ranked among the unworthy.

FAVOURABLE CONDITIONS.
Apple warehouses in Nova Scotia are visited by Government inspectors but the standard of work required by those who examine on behalf of the company is higher than that insisted upon by the officials of the law. So universal is the confidence in the work of the co-operative body that fully 30,000 barrels of apples were sold this season before the fruit had been gathered. It was guaranteed to be in accordance with packing, and that was sufficient. In the company's rules of grading and all the important centres there are foremen and expert packers who watch carefully the entire process of preparing fruit for shipment. Orchard requisites, which include spraying materials, are provided, and the fruit is tended in every possible way. Every grower is compelled to subscribe at least \$100 capital sum to his local association.

Many are the advantages over other apple-growing districts claimed by Nova Scotia. Farmers are enabled not only to produce, but also to despatch more cheaply than in America. Land costs about one-fifth of the money demanded in the Western and North-Western States of America; and a farm labourer will work for 5s. to 6s. a day, as opposed to 8s paid in the United States. Furthermore, the apple-growing dis-

All In Your Favor This Xmas.

A Chance to get the Most for Your Money.

Sat. 7, Mon. 9, Tues. 10.

Our stock of Christmas Goods is now opened, we have the finest lines we have ever shown in Toys, Xmas Tree Decorations, Fancy China and other Xmas novelties. Come and be convinced.

If you want Calendars, Passe-partout Pictures, Mounted Pictures and Pictures for colouring, we can suit you.

Finest Xmas and New Year Post Cards 5 for 5 cents.

tricts of Nova Scotia are conveniently situated, being within one hundred miles of the shipping port. Some American centres are 3,000 miles distant. Being comparatively close to England, the apples are carried at an ordinary rate of freight, as against the enhanced charges incurred on fruit conveyed in specially constructed cool chambers. The freight from port to port is usually 3s 6d a barrel, and the cost of a barrel and packing amounts to 1s 8d; so that, despite all advantages, the fruit has to bear a fair share of expense before the grower gets any return for his produce.

Only apples technically described as "clean" are shipped in the first two grades; that is to say, the fruit must be free from blemish or spots. Unfortunately these disfigurements sometimes develop on the voyage, especially in the case of an early variety, the Gravenstein. This year the crop is estimated to provide about 1,000,000 barrels, the equivalent of 3,000,000 English bushels of apples, of which a large proportion will be Liveston Pippins, Blenheim's, Spitzenbergs, Baldwins and Greenings. Of fine, handsome Kings there are not many. Prices range from moderate to low, for, although the crop in Nova Scotia is much smaller than that of last year, there are on the market enormous quantities of apples from other parts of the world, thus lowering the value all round.

It may safely be said that the community of Nova Scotian apple growers is a prosperous one. Every season, of course, not entirely successful. Nor is it interrupted success to be expected in regard to crops in any part of the world; but by taking the average results of fat and lean years, there is not much reason to complain at the generosity of Nature in the Annapolis Valley, the "land of Evangeline."

Rev. and Mrs. J. B. Merrill, who have had charge of the Masonic Home at Windsor since its opening, have resigned. The resignations have been accepted, to take effect April 1st next, or sooner at their convenience.

Don't decide to abstain from giving just because you cannot afford expensive presents. The thoughtfulness of your gift, the interest you take in those to whom you give, are the principal things. The intrinsic value of your gift counts very little.

BOLD PROJECT TO FLY ACROSS THE ATLANTIC

London, Nov. 21.—Following a flight which Claude Graham White yesterday took with Otto Kahn, as a passenger, the aviator today gave out the particulars as to his plans to fly across the Atlantic. He said he has completed plans for a machine 1000 horse power and four engines and six propellers. He also said he had expected to journey from land to land in something between twenty and thirty hours. The machine being built so as to remain in the air thirty hours.

MASSACRE OF TURKS BY BULGARIANS

Constantinople, Dec. 1.—Travellers from Belgrade describe the massacre of Moslems by Bulgarians when they entered that town, which is reported to be typical of what is happening throughout Macedonia.

The first Bulgarians to enter were an irregular band of not more than one hundred and thirty. A shot was fired from the Mosque, which was flying a white flag; whereupon the Bulgarians demolished the Mosque by bombing and looting the Turkish quarter and massacred five hundred persons. More than one hundred bodies were counted in the streets, some of which were those of Christians.

THE OUNCE OF PREVENTION

(Hartford Times.)
A thirteen-year-old youngster died of tetanus in Brooklyn. He stepped on a rusty nail, covered the wound with adhesive plaster and went about his play while the dread disease developed. This moves a physician to call attention to the fact that the tetanus germ can develop only where the air is excluded, and that had the wound been washed with an antiseptic and kept open the boy would have, in all probability, escaped. How many lives have ended in agony because this simple little fact was not known.

If you are troubled with chronic constipation, the mild and gentle effect of Chamberlain's Tablets makes them especially suited to your case. For sale by druggists and dealer.
