The copy filmed here has been reproduced thanks to the generosity of:

Morisset Library
University of Ottawa

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque Morisset
Université d'Ottawa

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

1884-15

WHAT FARMERS SAY
OF THEIR
PERSONAL EXPERIENCE
IN THE
CANADIAN NORTH-WEST.

The object of this pamphlet is to place before the public an array of facts, in as clear and concise a manner as possible, to demonstrate the great advantages possessed by the Canadian North-West for intending settlers and capitalists.

When a man contemplates seeking a new home in a strange country, he is, in most cases, induced to do so from a desire to better his condition, or, if he has a family, to provide for the future welfare of those dependent upon him; it therefore becomes a serious matter for him to decide upon the most suitable place to which to move, and he ought to weigh well all the disadvantages, as well as the advantages of a new country, ere he commits himself to the grave responsibility of making a selection in its favour.

He will more than probably be furnished with numerous books and pamphlets, setting forth the superiority of certain new lands over others. He will read glowing accounts of their beauties, resources and advantages, and will more than likely be charmed by the pen pictures presented before his mind, as he reads the well-depicted scenes of comfort and happiness in the far-off land. He must, however, while reading these glowing descriptions, remember that they are frequently written by men employed for the purpose of advertising the countries described, and disposing of the lands; who have, therefore, endeavoured to place everything in the brightest colours before their readers. The writers, moreover, are seldom

men of practical experience, and although gifted with skill in writing, are not the best judges of what is the most suitable for a farmer. Pamphleteers, moreover, who are employed to write up lands, are too apt to be unscrupulous in their efforts to please the men who engage them, and too often either misstate matters or conceal defects, so as to entice immigrants, hoping thereby to gain a few out of their many dupes.

We are prompted to give this warning to intending emigrants because we know that Great Britain and Europe are inundated at the present time with pamphlets, which in too many cases are not reliable.

The purpose of the present work is to endeavour to give as clear and straightforward a description of the advantages of the Canadian North-West as possible, and to support the same by the statements of farmers who have settled in the country, who know from experience of what they speak, and who can have no object in trying to deceive others.

One naturally desires first to obtain a general outline of a country ere he proceeds to examine into its details; and for this reason we will give a short sketch of the Canadian North-West as it is to-day.

Lying north of the 49th parallel of north latitude is an immense area of fertile land which for many years was regarded as only fit for the trapper and hunter, but which now is known as a country teeming with richness, and possessing a soil and climate peculiarly adapted to the successful cultivation of grain, and raising of stock.

This valuable tract of country, which commences at Red River and extends westward to the Rocky Mountains, a distance of nearly one thousand miles, containing as nearly as can be estimated between two and three millions of square miles of as fine land as can be found anywhere in the world, is the portion of the Canadian North-West to which we purpose confining our remarks.

The entrance to this great country is through the Province of Manitoba, which within the last few years has become well settled by a very superior class of farmers.

The "fertile belt" is principally prairie land, some of it being level, while other portions are rolling, or undulating, with clumps of wood, and lines of forest here and there.

It abounds with lakes, lakelets and running streams, in the neighbourhood of which the scenery in many parts has been described as rivalling the finest park scenery in England.

Throughout this splendid country the Canadian Pacific Railway has already been completed from Lake Superior to the Rocky Mountains, thus opening it for settlement, and placing its farmers in direct communication with the Eastern markets. From this time, therefore, immigrants in the North-West will not be obliged to go very far in advance of the railway, but should they desire to do so for the purpose of choosing fine locations, every care will be taken to guide and assist them in their journey, a fact which we will more clearly demonstrate later on.

Professor Macdonald, who during the past year has carefully explored a large portion of the country in the Souris and Qu'Appelle districts, has stated that there are fifty million acres of land in that locality, not only fertile but also presenting a most inviting field for immigration. Many parts are described as "rolling prairie with good clay soil," level plain with dark rich loam, and clumps of woods, and lakes and streams are said to abound.

The land in Manitoba has frequently been described as very rich, a black loam from 2 to 4 feet deep; and now we find the country lying north of the Assiniboine as being of similar character. In a north-easterly direction the country is very fertile, often exceedingly beautiful, interspersed with forests and clumps of wood, and in some spots with marshes covered with luxuriant and nutritious grasses, the prairie abounding in lakelets or ponds, with wild fowl very plentiful. Westward of the Assiniboine the same description of fertile country, interspersed with woods and abundantly watered by ponds and streams, extends a hundred and thirty miles to and beyond the great and little Touchwood Hills.

Professor Hind, in speaking of the country in the neighbourhood of the Touchwood Hills, says:—"We reached the summit plateau, and then passed through a very beautiful undulating country, diversified by many

"picturesque lakes and aspen groves, possessing land of the best quality and covered with most luxuriant herbage. From a small hill I counted forty-seven lakes, and so rich and abundant is the vegetation that the horses remain in the open glades all winter, and always find plenty of forage to keep them in good condition."

A fine country, dotted with innumerable lakes, annually replenished by summer rains, extends from Touchwood Hills due East to Riding Mountains, a distance of upwards of two hundred miles. North of the Touchwood Hills, the fertile plateau, with an increasing proportion of forest in its northern and western parts, extends from the Duck Mountains westward to the Saskatchewan, two hundred and twenty miles; and beyond, up the valley of the North Branch, four hundred miles further

The north and south branches of the River Saskatchewan have their sources in the Rocky Mountains, and at a distance of five hundred and fifty miles eastward they meet at what is called "the Forks." The North Branch diverges, starting from the base of the Rocky Mountains, North-eastward, and the South Branch, or Bow River, South-eastward, till at two hundred and fifty miles due eastward, they attain a distance of about three hundred miles from each other.

The total length of the Saskatchewan, taking the North Branch from the Rocky Mountains to Lake Winnipeg, is a thousand and fifty-four and a-half miles. From "the Forks," where the two branches meet, the country to the South-eastward is mixed woodland and prairie, the soil with slight exceptions being a rich black mould. On the slopes of the valleys the grass is long and luxuriant, affording fine pasturage, and the general aspect of the country is gently undulating and highly favourable for agriculture, the soil being deep and uniformly rich, rivalling the low prairies of Red River and Assiniboine.

This tract of country extends South-easterly through the wooded region of Root River to the Assiniboine, opposite the mouth of the Souris, a distance of three hundred and twenty miles of fertile prairie, interspersed with woodlands. The Root River rises about sixty miles South-west from "the Forks," and runs parallel with the Saskatchewan, about thirty to forty miles South, a distance of over two hundred miles.

It has been estimated that there are three million or more acres of land of the first quality lying between the Root and Saskatchewan rivers.

For about a hundred miles in a direct line South-westward of "the Forks" of the Saskatchewan, the country is described as having a rich soil with abundant woods, in clumps and groves; but after passing that distance it gradually assumes the character of treeless prairie. At a distance of about two hundred and fifty miles from "the Forks" on the South Branch, the elbow is reached, and although the country from the latter point to the base of the Rocky Mountains, especially to the southward, has been described as of inferior character, there are large exceptions to be found --The Cypress Hills for instance, which are described by Palliser as covered with fine timber, abounding in excellent grass and well watered.

Along the base of the Rocky Mountains northward to where the Athabasca takes its rise, the country is partially wooded, and has innumerable clumps of poplar and willow. Fine streams run through numerous beautiful valleys, which are covered with a most luxuriant growth of vetches and nutritious grasses. There are fine prairie bottoms and others covered with scrub and willow, and in some parts there is an abundance of woods of spruce, poplar and aspen, sufficient to afford shelter for cattle in winter. In winter the eastern slopes of the Rocky Mountains are less encumbered with snow than much of the prairie country, and the grasses are of a finer and more nutritious nature than those found on the plains, and this, combined with the clumps and ridges of wood, the numerous valleys and clear running streams, makes this part of the Canadian North-West peculiarly fitted for the raising of immense herds of cattle.

The North Branch, for five hundred and twenty miles up from "the Forks," and the Battle River which enters the Saskatchewan about a hundred and seventy miles above the junction of the North and South branches for about four hundred and fifty miles, traverse a rich prairie country, more or less interspersed with woods.

This immense area of country may be termed the garden of the North-West, and at one part has a breadth of one

hundred and fifty miles, at another a hundred, and in other parts from sixty to seventy miles.

It commences at "the Forks" of the Saskatchewan, and follows the North Branch until within about two hundred and eighty miles from the Rocky Mountains, when it ceases, and a thick, wooded country commences. It follows the Battle River, which drains a large part of the country between the North and South Branches, and then takes the course of the Red Deer River to the South, until merged in the fertile region in the vicinity of the South Branch.

The climate of this great fertile country is decidedly milder than that of Red River, and the character more uniform than any other portion of the North-West.

Taking a northerly direction along the Athabasca River for over one hundred and fifty miles, we have evidence of a country of varied character, possessing woods of birch, aspen, pine and poplar, and a soil of rich black mould. The total length of the Athabasca is nine hundred miles, but until more fully explored it is difficult to say how much of this vast region is fit for settlement.

The climate along the greatest portion of the route to Lake Athabasca is very pleasant, the Spring being about as early as in the Province of Quebec. In the Athabasca district and along the Pembina River, one of its tributaries, great fields of coal have been discovered, only waiting to be developed. In some parts these immense beds of coal are to be seen eight feet thick along the banks of the stream. There is now no doubt of the existence of an almost inexhaustible supply of coal in the Athabasca district; and, in addition, gold has also been discovered, with every indication of large deposits.

From explorations already made, however, coal has been found in several localities in closer proximity to the line of the Canadian Pacific than Athabasca. For upwards of two hundred miles along the Saskatchewan country above Edmonton, and a little below, coal prevails with little interruption, and is to be seen in beds of considerable thickness on the river banks. In the Souris country, lignite coal exists in large quantities.

True coal is found over a very large extent of territory east of the Rocky Mountains. If a line is drawn on the International boundary for about two hundred miles from the Rocky Mountains, and extended due north a thousand miles, the whole of that immense territory will be found to be a coal field. The supply of coal fuel, therefore, in the Canadian North-West, is practically illimitable.

We now come to the Peace River district, which has become noted already for its delightful climate, the fertility of its soil, and its abundance of nutritious grasses. The land is very rich and interspersed with wood and prairie; the scenery is beautiful; and the fact that the wild animals of the plains thrive better there than anywhere else in the North-West, proves without a doubt that it is destined to become a great stock-raising country. Rough estimates have been made of the area of land, with soil suited to agriculture; but until the whole district has been thoroughly explored it is impossible to say how much there really is in the Peace River country. Over 50,000,000 acres, however, have been already pronounced of the very best quality of soil.

A cause of the exceptionally favourable climate of the Peace River district and also of the Saskatchewan, is to be found in the prevalence of warm westerly winds from the Pacific; and in addition to the favourable climatic conditions indicated by the thermometer, the length of the day in summer in the higher northern latitudes, favours the rapid and vigorous growth of vegetation, and takes the place to a certain extent of heat in this respect.

Our space necessarily prevents us from giving more than a passing glimpse of the vast fertile fields of the Canadian North-West, as a full and complete description of them would fill volumes; but it will be only a few years ere they will be better known, when, teeming with happy and contented people, they will be pouring forth the golden grain by means of the numerous railways at present projected for speedy construction. The Canadian Pacific Railway, as already stated, is completed as far as the Rocky Mountains. The length of branches and main line, will be 3,018 miles. The whole of this great work will be completed within

two years, that is, before the close of 1886. On the Western Division, the gap to be completed to make through connection to the Pacific Ocean is less than 300 miles, and the gap to be completed in the Lake Superior section is 480 miles. A line of steel steamers from Lake Huron to Thunder Bay, on Lake Superior, will complete the through connection between the western prairies and the old provinces during the present summer (1884). The Canadian Pacific Railway will constitute an independent Trunk line from ocean to ocean across the continent, of the greatest importance to the trade between the East and the West. The estimated time that will be taken by the express trains on this railway, from Montreal via Winnipeg to the Pacific Ocean is 90 hours. Millions of acres of fine land are already thrown open for settlement in close proximity to the Railway, which now brings the new settlers in communication with the Eastern grain markets.

Besides the Canadian Pacific Railway, many other lines are projected, and some others built. Among which may be mentioned the South-western, running from Winnipeg south-westerly, about 120 miles to Manitoba City, near the Pembina Mountains. Hudson's Bay is to be connected with Winnipeg by rail and water communication. Charters for no less than four great lines to tap the Peace River district have been already granted; and the Saskatchewan and Assiniboine Rivers are to have a numerous fleet of steamers navigating their waters.

It is quite evident, moreover, that the rapid completion of the Canadian Pacific Railway will induce the immediate construction of branch lines, tapping the fertile plains in every direction.

The climate of the fertile belt which we have described is in the highest degree healthy and suitable for the productions of the grasses, the cereals, and the stock raising of the Temperate Zones. It is, above all things, the wheat growing region of the Continent of America, having sufficient area to be the granary of the world. It is expected that it will become, during the next ten years, the great wheat exporting portion of the Continent of North America. The climate of this region, in summer, is warm, in winter, decidedly cold; but this cold is not felt to be more unpleasant than that of the older provinces of Canada, and parts of the Eastern United States. It is found, moreover, as the

Rocky Mountains are approached, in the neighbourhood of Fort McLeod, that, although the altitude is greater, the temperature in winter is less severe, being modified by warm winds which find their way from the Pacific Ocean. There is sufficient rain-fall over the whole of this region to produce luxuriant herbage, and the crops of the temperate zones to which we have referred.

The gateway to the Canadian North-West Territory is the Province of Manitoba. Manitoba has a regular form of representative Government, consisting of a Legislative Assembly of 24 members, with the administrative functions vested in a Lieut.-Governor and Council of five Cabinet Ministers. The local Ministers are responsible to the Legislative Assembly, holding office subject to its confidence. The Province is divided into 26 Municipalities, each having its properly organized Council, one of whose principal duties is to see that the roads and bridges within the district are kept in a thorough state of repair. Law and order and protection to life and property are thoroughly looked after, efficient police forces and a numerous staff of constables and law officers being employed for this purpose under the control of an Attorney-General, and with a Chief Justice and two Judges to administer the law. Educational interests on the separate school system are very carefully attended to, there being as many as 102 Protestant schools, with an attendance of over 5,000 children, and 27 Catholic schools with over 2,500 children. An university and three large colleges are also established, besides which there are well-conducted ladies' schools, and several private educational establishments. The principal business centre in Manitoba is the City of Winnipeg, situated at the junction of the Red and Assiniboine Rivers, which has a population to-day of over 20,000 souls, while in 1870 it only counted 215. Winnipeg is well laid out and has wide, handsome streets and broad sidewalks throughout, lined on each side with elegant brick and wooden buildings. It can boast of whole blocks of splendid stores, with plate-glass windows—some of its private residences cost as much as \$50,000, and it has amongst other public buildings a fine City Hall, Custom House, Post Office and Land Office, all of which are built of brick—in fact the manufacture of brick is now so extensively carried on in the neighbourhood of the city that it is taking altogether the place of wood

for building purposes. Handsome churches adorn the city, as also splendid Parliament Buildings and a Governor's residence. It has two large daily newspapers, club houses, very select in their membership, numerous handsome cabs, and almost every feature peculiar to older cities. Over a dozen steamers, some of them of large size, ply to and from the levee; and already six daily passenger railway trains leave the city for different points. Its situation as a railway centre is already assured, and there is no doubt that in a few years Winnipeg will become a very large and prosperous city. Manitoba has also several large and flourishing towns within its limits, amongst which may be mentioned Emerson and West Lynn, on the International Boundary line; Morris, on the Red River; Selkirk, in the vicinity of Lake Winnipeg; Portage-la-Prairie, about 60 miles above Winnipeg, on the Assiniboine; and further West, Gladstone, Brandon, Rapid City, Minnedosa and Odanah.

Having thus briefly sketched the general outline of the country to which we invite the attention of intending settlers and capitalists, we will now proceed to details.

The system of survey adopted by the Dominion Government for the Canadian North-West is as follows:—The whole country is divided into townships containing 36 sections of one mile square, or 640 acres in each section, together with road allowance of one chain and fifty links, or 116 feet in width between all townships and sections.

The sections are numbered as shown by the following diagram:—

N

	31	32	33	34	35	36	
	30	29	28	27	26	25	
	19	20	21	22	23	24	
W	18	17	16	15	14	13	E
	7	8	9	10	11	12	
	6	5	4	3	2	1	
							S

The townships are numbered in regular order northerly from the International Boundary line or 49th Parallel of latitude, and lie in ranges numbered East and West from a certain Meridian line, drawn northerly from the said 49th parallel, from a point ten miles or thereabouts westerly from Pembina.

By this system a settler can take a map of the country, of which there are always copies in the land office, and find out at once the location of the spot where he desires to settle, and guided by the knowledge of the number of township and section, he can find out the survey stakes, and locate his land without any trouble.

In order however to assist the new comer still more, the Dominion Government have a staff of regularly organized Land Guides whose duty it is amongst other things to assist immigrants to settle on farms.

There is one piece of advice which we desire to tender those leaving their homes to take up lands in the North-West,—do not encumber yourselves with a lot of useless luggage. Above all things do not bring your old furniture. All you require is simply your clothing, and the less luggage you have the better it will be for you in every respect. Sell your old things before you start, and come to the country free to travel anywhere without being tied down by a lumbering lot of useless articles which more than likely you will find unsuitable for your new home. You can buy everything you require on your arrival in the North-West, and will find it much cheaper to do so than to pay freight on old half worn out articles. Besides, you need only purchase, at first, just such articles as are absolutely necessary, until you are fairly established on your farm. It is, moreover, far better to purchase your agricultural implements on your arrival in the North-West, as you will find them especially adapted for the work before you. Now let intending settlers note the advantage of coming to a country where every protection is offered them on their arrival, instead of, as unfortunately too often happens, being left a prey to every sharper that comes. One of the first ques-

tions asked by intending settlers is in regard to the terms on which they can procure lands in the new country, and on this point we refer our readers to the official information published by the Dominion Government. We may, however, state here that in order to find out choice locations, the Land Guides are furnished with all the necessary information for the benefit of settlers, and in addition to this, Land offices have been established, where the lands can be entered and thus secured, as soon as the location has been decided upon by the immigrant or purchaser.

The following is a list of Dominion Land agencies in Manitoba and the North-West Territory: -

<i>Agency.</i>	<i>Where situate.</i>	<i>Name of Agent.</i>
WINNIPEG	Winnipeg, M.	A. H. Witcher.
DUFFERIN	Nelson, M.	W. H. Stevenson.
TURTLE MOUNTAIN	Deloraine, M.	} Jas. A. Hays, (Acting).
SOURIS	Brandon, M.	E. C. Smith.
LITTLE SASKATCHEWAN..	Odanah, M.	A. E. Fisher.
BIRTLE	Birtle, M.	W. G. Pentland.
QU'APPELLE.	Regina, N.W.T.	J. McD. Gordon.
PRINCE ALBERT	{ Prince Albert, N.W.T.	} Geo. Duck.
CALGARY	Calgary.	W. H. Hilliard.

Other offices it is expected, will be opened during the coming season to keep pace with settlement, but this fact can be easily ascertained on enquiry at the Head Office of the Land Department in Winnipeg; or at the Immigration offices at Winnipeg or Emerson. In addition to this, the settler can obtain the necessary information from the Land or the Immigration offices as to desirable locations open for settlement, so that he need not set out on his travels to the North-West without having some definite idea of where he will find a desirable spot on which to settle.

We will now proceed to give some of the peculiar features of this great country. In the first place, the climate is very favourable to the raising of grain and root crops. The spring commences early in April, and the weather, with very little exception, continues fine and dry till the latter part of May. From that time till the end of June it is generally wet, but July, August and September, with the exception of occasional thunder showers, are generally beautiful months, the weather being warm and pleasant. Winter commences in November, sometimes in the early part of the month, sometimes later, and lasts until March. The cold, although severe at times, is not so much felt as in the more southern and eastern parts of the continent, owing to the extreme dryness of the atmosphere, and, in fact, it is a common thing for settlers to describe the winter months in the North-West as the most enjoyable part of the year. It is the season of recreation for the farmer, when amusement, conviviality and merriment are carried on between neighbours, and when the money comes in from the sale of their produce.

Seeding commences in April, and owing to the fact that the surface of the earth becomes dry and loose almost immediately after the disappearance of the snow, it is advisable for farmers to begin sowing as early as possible. The warm rays of the sun overhead, with the gradual melting of the frost in the earth below the seed, cause a degree of moisture which is extremely beneficial to the rapid growth of the crops. The harvest is in August, and the root crops are pulled at the latter end of September and in the month of October.

At this stage we would like to call attention to the fact that people paying flying visits to the North-West, are too apt to go away and report erroneous impressions in regard to the country. They spend a few weeks in it, and according to that short experience they report, either for or against its character. This is unfair, because in every country there are exceptional seasons, as for instance the Fall of 1880, in the North-West, which was a most unusual one, having been wet and disagreeable. The summer and fall of 1883 were also phenomenally exceptional over the whole continent of North America and unfavourable for agricultural and horticultural operations, but probably less so in Manitoba than in other portions of the continent. But the writer of these pages having lived thirteen years in the country, can vouch for and is ready to substantiate what he says at any time, that the general weather in the North-West, from July to October, is dry, warm and pleasant, with the exception as already stated of occasional showers, which are more beneficial than otherwise for the growth of the crops.

As already stated, however, the object we have in view at present is to present unimpeachable evidence in support of what we write in regard to the North-West. For this reason the following named farmers who have settled in the country, who know from experience that what they say is the truth, have come forward of their own free will to endorse the many advantages it possesses for settlers; and they can be written to at any time in order that the truth of the statements contained in these pages may be verified:—

John Fraser.....	Kildonan.		

One of the most desirable features in a country is to have a healthy climate. What matters to a man to have untold wealth and prosperity presented before him, if in order to enjoy them he has to jeopardise his own life and the lives of his family. He will rather go to a poorer country and enjoy good health. The North-West, however, is particularly favourable in this respect. Epidemics are not prevalent as in other countries, nor are there any diseases peculiar to the country. In Spring the weather is uniformly pleasant, the Summer warm with cool refreshing nights, and the Winter owing to the dryness of the atmosphere is particularly healthy and bracing.

In support of the healthfulness of the climate we give the following evidence:—

TESTIMONY RESPECTING THE CLIMATE.

Hayward & Swain.....	Morris.....	We have never had any sickness.
Geo. Cadman.....	High Bluff	We have had very little sickness.
W. Jackson.....	High Bluff.....	We have found the climate very healthy.
A. Gillespie.....	Greenwood.....	We have found the climate very healthy.
Wm. Eagles.....	Stonewall	The climate is healthy; we have not had much sickness.
J. S. Higginson.....	Oakland.....	There has not been a case of sickness in my family for 6 years.
Jno. Sutherland.....	Kildonan East.....	The climate is exceedingly healthy.
Allan Bell.....	Portage-La-Prairie..	We have enjoyed excellent health.
Jas. Straton.....	Nelsonville.....	I moved here for my family's health, and it has been good.
Robt. E. Mitchell..	Cook's Creek.....	I have found the climate very healthy.
Wm. Moss.....	High Bluff.....	We have found the climate tolerably healthy.
Mathew Owens.....	High Bluff.....	Generally speaking the climate is healthy.
James Stewart.....	Meadow Lea.....	My family has been healthy since I came here.
Jno. Ferguson	High Bluff.....	I consider Manitoba very healthy; no ague known.
James Airth.....	Stonewall.....	The climate is healthy; have had no sickness.
E. W. Johnston.....	Springfield.....	The climate is fairly healthy.
Robt. Fisher	Cook's Creek.....	The climate is very healthy; have had no sickness.
J. W. Adshead.....	St. Charles.....	The climate is very healthy.
Robt. Black	Bird's Hill.....	The climate is very healthy.
Wm. Corbitt	Springfield	My family has been in excellent health.
J. G. Ruit.....	Cook's Creek.....	I find the climate healthy.
G. V. Fitzgerald	Ridgeville.....	The climate is very healthy.
Geo. Taylor	Poplar Point.....	This is a healthy country.
W. Griesson.....	Meadow Lea.....	The climate is very healthy and my family have good health.
Isaac Casson	Emerson.....	I have found the climate very healthy.
Fred. T. Bradley.....	Emerson.....	None of my family have suffered from climatic, but nearly all from hereditary disease.
Jno. Brydon.....	Portage-La-Prairie..	The climate is very healthy, no sickness of any account having occurred.
Alex. McDonald.....	Stonewall	The climate is very healthy.
Jas. Fleming.....	West Lynne.....	The climate is very healthy; had no sickness.
Arthur J. Moore.....	Nelsonville.....	The climate is very healthy; have had no sickness.
Benj. J. Chubb.....	Nelsonville.....	The climate is very healthy; have had no sickness.
Simon Ballantyne...	West Lynne.....	We have had perfect health since coming here.
Jno. Geddis	Kildonan.....	The climate is very healthy.
Wm. Green.....	St. Agathe.....	The climate is very healthy.
A. McDonald.....	Gladstone.....	The climate is very healthy.
Jno. Kelley.....	Morris.....	The climate is very healthy; we have had no sickness.
Dugald Gillespie....	Plympton.....	The climate is very healthy.
R. Adams.....	High Bluff.....	The climate is very healthy; not much sickness.

TESTIMONY RESPECTING THE CLIMATE.—Continued.

Alex. P. Stevenson...	Nelsonville.....	Have had no sickness for seven years.
C. Empson.....	West Lynne	The climate is healthy.
J. Appleyard.....	Stonewall	The climate is healthy; my family have not suffered from sickness.
J. D. Stewart.....	Cook's Creek	The climate is healthy; my family have not suffered from sickness.
Ed. Scott.....	Portage-La-Prairie..	We have had scarcely any sickness.
Jno. Smith.....	Westbourne	The climate is healthy; we have not had much sickness.
D. F. Knight.....	Ridgeville	The climate is healthy; we have had no sickness.
P. Ferguson.....	Gladstone.....	My family have been very healthy.
Chas. Logan.....	Portage-La-Prairie ..	The climate is very healthy.
Man. Wilton.....	High Bluff	The climate is very healthy.
Jonathan Troop.....	Portage-La-Prairie..	The climate is healthy, but hard on consumptive patients.
Andrew Dawson.....	Headingly	The climate is very healthy; there is no sickness at all.
Geo. A. Perrin.....	Ridgeville.....	The climate is very healthy; there is no sickness at all.
Jno. Beggs.....	Morris.....	I have had good health since I have been here.
A. D. Codenhead.....	Scratching River ...	The climate is very healthy.
Adam Nelson, jr.....	Nelsonville	The climate is very healthy.
A. J. Hinker.....	Green Ridge.....	We have had excellent health.
Rev. Thos. Scott.....	Westbourne	The country is decidedly good for repairing health.
P. H. Brown.....	Poplar Point.....	The climate is healthy if properly clothed.
Geo. A. Tucker.....	Portage-La-Prairie ..	The climate is healthy; had but little sickness.
A. B. Becksted.....	Emerson.....	I have no sickness, and gained 25 lbs. in weight.
A. C. Harvey.....	Poplar Point.....	The climate is healthy and free from any sickness.
Geo. C. Hall.....	Portage La-Prairie ..	I find the climate healthy and have had no sickness.
D. G. Lowe	St. Agathe.....	The climate is exceedingly healthy.
A. J. Nugent.....	West Lynne	My family has frequently suffered from colds.
W. B. Hall.....	Headingly	The climate is healthy.
Phillip McKay.....	Portage-La-Prairie ..	The climate is healthy; I have suffered no sickness; it is hard on consumptives.
Geo. Turner.....	Lower Fort.....	The climate is the healthiest in America.
J. E. Maley.....	Morris	My family have not suffered from sickness.
A. Hepburn.....	Emerson.....	The climate is healthy.
C. Begg.....	Stone Fort.....	I have had a remarkably healthy experience of 47 years.
Jno. Hall.....	St. Anne, Pt. DuC... ..	We have found the climate very healthy.
Angus Paleon.....	Kildonan.....	The climate is healthy.
Geo. Tidsbury	High Bluff.....	I find the climate healthy here; have had no disease from change of climate.
Thos. B. Robinson..	Rockwood.....	I cannot complain of the climate in any way.
Neil Henderson.....	Cook's Creek.....	The climate is very healthy.
W. H. Ellison.....	Scratching River....	The climate is very healthy.
Thos. Sigroux.....	Portage-La-Prairie ..	The climate is very healthy.

TESTIMONY RESPECTING THE CLIMATE.—Continued.

Jas. Munro.....	Kildonan.....	The climate is very healthy.
J. S. Vidal.....	Headingly.....	The climate is very healthy; no sickness
Jno. Taylor.....	Headingly.....	The climate is very healthy; very little sickness in our family.
Thos. Dobsell.....	High Bluff.....	The climate is very healthy; my family have had measles.
Benjamin Haitley...	St. Charles.....	The climate is very healthy, my only sickness being rheumatism.
Andrew Nelson.....	Stonewall.....	I have not suffered from sickness; the climate is healthy.
James Mathewson...	Emerson.....	I have not suffered from sickness; the climate is healthy.
J. J. Edwards.....	Poplar Point.....	I was unhealthy when I left Ontario, but now am well and hearty.
Robt. Sutherland....	Portage-La-Prairie..	The climate is healthy.
G. Staenged.....	Poplar Point.....	Sickness does not prevail much.
R. A. Pesky.....	St. Agathe.....	The climate is healthy.
Wm. Hill.....	Woodlands.....	The climate is healthy; there is no sickness.
W. A. Mann.....	Birds' Hill.....	The climate is quite healthy; few exceptions.
Neil McLeod.....	Victoria.....	The climate is quite healthy; only colds.
F. B. Allan.....	Stonewall.....	The climate is very healthy; there is no sickness.
Jas. Davidson.....	High Bluff.....	I have had some sickness caused by drinking bad water.
Henry Hodyson.....	Springfield.....	The climate is very healthy.
Jno. Raser.....	Kildonan.....	The climate is very healthy.
Alex. Adams.....	Clearspring.....	The climate is very healthy.
Rev. Ed. Rochford...	Poplar Point.....	We are healthier than in London.
Rev. Rich. Young....	Lisgar.....	The climate is on the whole healthy.
J. S. P. Costey.....	Ridgeville.....	The climate is very healthy; no sickness.
Jno. Currie.....	Victoria.....	The climate is extremely healthy.
Michael Elison.....	Nelsonville.....	The climate is extremely healthy.
W. Aylmer.....	St. Leon.....	The climate is very healthy; my children are well.
Jos. Dodds.....	Sunnyside.....	The climate is very healthy; my family has never been sick.
Jno. Hourie.....	St. Anne.....	The climate is extremely healthy.
Julius Galbraith....	Nelsonville.....	The climate is healthy; my family has had no sickness for five years.
Chas. Stewart.....	Meadow Lea.....	The climate is healthy.
Louis Diensing.....	Emerson.....	The climate is healthy; only suffer from rheumatism.
E. M. Maley.....	Morris.....	My family have not suffered from sickness.
W. A. Farmer.....	Headingly.....	The climate is healthy; there has been a doctor in the house but once in 10 years.
Robt. Bell.....	Rockwood.....	The climate is very healthy; had no serious sickness.
Jno. George.....	Nelsonville.....	The climate is very healthy.
A. McPherson.....	Emerson.....	The climate is healthy.
H. C. Graham.....	Stonewall.....	The climate is healthy have had no sickness.
Geo. Jenkins.....	St. Agathe.....	I have had no sickness.
Jas. Bedford.....	Emerson.....	The climate is extremely healthy.
Geo. Ferris.....	St. Agathe.....	I have had no sickness.

TESTIMONY RESPECTING THE CLIMATE.—Continued

Edwin Burnelt.....	Nelsonville.....	I like the climate and have had no sickness.
S. J. Parsons.....	Springfield.....	I find the climate healthy.
D. McDougall.....	Meadow Lea.....	I consider the climate healthy; have had no sickness.
J. D. McEwan.....	Meadow Lea.....	I consider the climate healthy; have had no sickness.
J. Wimster.....	High Bluff.....	My family have had excellent health; been here nine years.
Jas Stewart.....	High Bluff.....	I have found the climate exceedingly healthy.
K. N. C. Hall.....	Scratching River.....	The climate is very healthy.
Benj. Bruce.....	Poplar Point.....	No sickness of any account has occurred.
Wm. Start.....	Assiniboine.....	The climate is very healthy; my family have not suffered from sickness.
Henry West.....	Clear Springs.....	I have found the climate very healthy.
D. Chalmers.....	St. Anne, Point Du c.....	The climate is extremely healthy.
Jas. Sinclair.....	Greenwood.....	The climate is healthy.
D. R. McDowell.....	Cook's Creek.....	My family have had no sickness; no need for a doctor.
B. S. Jackson.....	St. Agathe.....	I have found the climate very healthy.
B. H. Palmer.....	Cook's Creek.....	The climate is healthy.
Robert Morgan.....	Headingly.....	The climate is healthy.
Mathew Ferris.....	Burnside.....	We have been very healthy since we came here.
J. W. Carleton.....	Clear Springs.....	I have had very little sickness.
Matthew Owens.....	High Bluff.....	Generally speaking the climate is healthy.
Nelson Brown.....	High Bluff.....	The climate is very favourable.
R. P. Bradley.....	St. Pie.....	The climate is healthy.
Jno. McKinnon.....	Portage-La-Prairie.....	I have found the climate very healthy.
Jas. King J. McKin- no n.....	Portage-La-Prairie.....	I have found the climate fairly healthy.
S. Stewart.....	Meadow Lea.....	So far I have found the climate very healthy.

There is a theory that the great fertility of the land in the North-West is due generally to three causes,—first, the droppings of birds and animals on the plains; second, the ashes left by the annual prairie fires, and third, the constant accumulation of decayed vegetable matter. When it is considered that great herds of buffalo and other game roamed for generations over the prairies; that wild fowl even to this day are plentiful, and that prairie fires have raged in the past, every year for many generations in the North-West, there seems to be some reason for this theory.

Whatever may have been the cause of the extreme richness of the land, however, there is one feature which is of great importance, and that is the depth of good soil in the prairie country. It has been frequently stated that the

depth of black loam in the North-West will range from one to four feet, and in some instances even deeper; but the statement has been received with a good deal of doubt. We propose producing testimony on this point, however, which cannot be gainsaid; but before doing so we will give an analysis of a sample of soil from the Canadian North-West, which, although published already on several occasions, may not have attracted the attention of some of our readers.

The analysis was made by Dr. Macadam at the Analytical Laboratory, Surgeon's Hall, Edinburgh, in 1876, and is as follows:—

Moisture	21.364
Organic matter containing nitrogen, equal to ammonia, 23c.....	11.223
Saline matter,—	
Phosphates	0.472
Carbonate of Lime.....	1.763
Carbonate of Magnesia.....	0.937
Alkaline Salts.....	1.273
Oxide of Iron	3.115
	7.560
Silicious matter,—	
Sand and Silica.....	51.721
Ammonia	8.132
	59.853
	100.000

The large proportion of Silica in the above analysis indicates that the soil is particularly well adapted to the growth of wheat. The black loam or mould thus pronounced so rich, rests on a tenacious clay for a depth of from one to four feet, and in some places the clay is as deep as ninety feet, as will be seen by the following testimony:—

FARMERS' TESTIMONY RESPECTING THE SOIL.

Benj. Hartley.....	St. Charles.....	Depth of black loam, from 16 to 20 inches.
Jno. Delworth.....	High Bluff.....	Depth of black loam, from 18 to 24 inches.
Hayward and Son....	Morris.....	Depth of black loam, about 3 feet.
Geo. Cadman.....	High Bluff.....	Depth of black loam, about 15 inches.
W. Jackson.....	High Bluff.....	Depth of black loam, about 18 inches.
A. Gillespie.....	Greenwood.....	My farm is chiefly bush land; the soil is good
Wm. Eades.....	Stonewall.....	Depth of black loam, 4 feet.
J. C. Higginson.....	Oakland.....	Depth of black loam, 2 feet.
J. Sutherland.....	Kildonan East.....	Depth of black loam, from 3 to 10 feet.
Allan Fell.....	Portage-La-Prairie..	Depth of black loam, from 18 in. to 2 feet.
Jas. Sturton.....	Nelsonville.....	Depth of black loam, from 18 in. to 3 feet.
R. E. Mitchell.....	Cook's Creek.....	Depth of black loam, from 1 in. to 3 feet.
Wm. Moss.....	High Bluff.....	Depth of black loam, about 2 feet.
Matthew Owens.....	High Bluff.....	Depth of black loam, about 2 feet.
Jas. Stewart.....	Meadow Lea.....	Depth of black loam, from 1 to 3 feet.
Jno. Ferguson.....	High Bluff.....	Depth of black loam, about 2ft. clay sub-soil
Jas. Airth.....	Stonewall.....	Depth of black loam, 18 inches.
E. W. Johnstone.....	Springfield.....	Depth of black loam, from 3 to 5 feet.
Robt. Fisher.....	Cook's Creek.....	Depth of black loam, 1 foot.
J. W. Adshead.....	St. Charles.....	Depth of black loam, about 2 feet.
Robt. Black.....	Birds' Hill.....	Depth of black loam, from 2 to 3 feet.
Wm. Corbitt.....	Springfield.....	The black clay is from 1 to 3 feet.
J. G. Rent.....	Cook's Creek.....	Depth of black loam, from 2 to 3 feet.
G. V. Fitzgerald.....	Bigville.....	Depth of black loam, about 18 inches.
Geo. Taylor.....	Poplar Point.....	Depth of black loam, 18 inches.
W. Grierson.....	Meadow Lea.....	Depth of black loam, from 12 to 18 inches.
Isaac Cason.....	Emerson.....	Depth of black loam, 1 foot.
F. T. Bradley.....	Emerson.....	Depth of black loam, about 2 feet.
Jno. Bryden.....	Portage-La-Prairie..	Depth of black loam, from 10 in. to 2 feet.
Alex. McDonald.....	Stonewall.....	Depth of black loam, 3 feet.
Jas. Fleming.....	West Lynne.....	Depth of black loam, 18 in. to 4 feet.
A. J. Moore.....	Nelsonville.....	Depth of black loam, about 3 feet.
B. J. Chubb.....	Nelsonville.....	Depth of black loam, from 12 to 20 inches.
S. Ballantyne.....	West Lynne.....	Depth of black loam, 6 inches.
J. Geddes.....	Kildonan.....	Depth of black loam, from 3 to 5 feet.
Wm. Greene.....	St. Agathe.....	Depth of black loam, 2½ feet.
A. McDonald.....	Gladstone.....	Depth of black loam, from 1 to 4 feet.
Jno. Kelley.....	Morris.....	Depth of black loam, from 1½ to 4 feet.
D. Gillespie.....	Plympton.....	Depth of black loam, about 4 feet.
Robert Adams.....	High Bluff.....	Depth of black loam, 3 feet.
Alex. P. Stevenson..	Nelsonville.....	Depth of black loam, 1½ feet.
C. Empson.....	Whynne.....	Depth of black loam, 18 inches.
J. Appleyard.....	Stonewall.....	Depth of black loam, 18 inches.
J. D. Stewart.....	Cook's Creek.....	Depth of black loam, about 2 feet.
Ed. Scott.....	Portage-La-Prairie..	Depth of black loam, from 1 to 4 feet.
Jno. Smith.....	Westbourne.....	Depth of black loam, from 2 to 4 feet.
D. F. Knight.....	Ridgeville.....	Depth of black loam, from 1 to 5 feet.
— Ferguson.....	Gladstone.....	Depth of black loam, from 3 to 4 feet.
Chas. Logan.....	Portage-La-Prairie..	Depth of black loam, from 2 to 3 feet.
Max. Wilton.....	High Bluff.....	Depth of black loam, from 2 to 2½ feet.
And. Dawson.....	Headingly.....	Depth of black loam, from 2 to 3 feet; have found it 6 feet.
Geo. A. Perrin.....	Ridgeville.....	Depth of black loam, from 12 to 18 inches.
Jno. Begg.....	Morris.....	I have dug deep cellar without coming to the bottom of the vegetable matter.
A Westover.....	Morris.....	Black loam, 2 to 3 feet; clay sub-soil, 90ft.

FARMERS' TESTIMONY RESPECTING THE SOIL.—Continued.

A. D. Cadenhead.....	Scratching River.....	I have dug 12 feet without reaching the bottom of the clay loam.
Adam Nelson.....	Nelsonville.....	Depth of black loam, 18 inches.
A. J. Hinker.....	Green Ridge.....	Depth of black loam, from 2 to 4 feet.
Rev. Thos. Cook.....	Westbourne.....	Depth of black loam, about 1 foot.
Francis Ogletree.....	Portage-La-Prairie..	Depth of black loam, from 18 in. to 2 feet.
Thos. Hy. Brown.....	Poplar Point.....	Depth of black loam, from 18 in. to 2 feet.
Geo. A. Tucker.....	Portage-La Prairie..	Depth of black loam, from 12 to 18 inches.
A. V. Becksted.....	Emerson.....	Depth of black loam, from 3 to 4 feet.
A. C. Harvey.....	Poplar Point.....	Depth of black loam, from 18 in. to 2 feet.
G. C. Hall.....	Portage-La-Prairie..	Depth of black loam, from 2 to 3 feet.
P. McKay.....	Portage-La-Prairie..	Depth of black loam, from 3 to 4 feet.
D. G. Lowe.....	St. Agathe.....	Depth of black loam, from 3 to 4 feet.
A. J. Nugent.....	West Lynne.....	Depth of black loam, from 4 to 5 feet.
W. B. Hall.....	Headingley.....	Depth of black loam, from 6 to 15 inches.
Geo. Turner.....	Lower Fort.....	Depth of loam, from 1 to 1½ feet
J. G. Maley.....	Morris.....	Depth of black loam, from 2 to 2½ feet.
Andrew Hepburn.....	Emerson.....	Depth of black loam, 3 feet.
Chas. Begg.....	Lower Fort.....	Depth of black loam, from 6 in. to 3 feet.
Jno. Hall.....	St. Anne Pt. Duchene	Depth of black loam, from 3 to 4 feet.
Angus Polson.....	Kildonan.....	Depth of black loam, from 1½ to 2 feet.
Jas. Owens.....	St. Anne, Pt. Duchene	Depth of black loam, from 1 foot to 1½.
Gardner Granby.....	High Bluff.....	Depth of black loam, from 1½ to 2 feet.
Jas. Fullerton.....	Cook's Creek.....	Depth of black loam, 20 inches.
Alex. Polson, jr.....	Kildonan.....	Depth of black loam, from 1 to 2 feet.
Geo. Tidsbury.....	High Bluff.....	Depth of black loam, from 10 in. to 3 feet.
F. B. Robinson.....	Rockwood.....	Depth of black loam, from 8 in. to 2 feet.
Neil Henderson.....	Cook's Creek.....	Depth of black loam, from 1 foot to 2½.
T. H. Gillison.....	Scratching River.....	Depth of black loam, 14 inches.
Thos. Ligson.....	Portage-La-Prairie..	Depth of black loam, 18 inches.
J. Munroe.....	Kildonan.....	Depth of black loam, about 3 feet.
Jas. T. Vidal.....	Headingley.....	Depth of black loam, from 12 to 18 inches.
Jno Taylor.....	Headingley.....	Depth of black loam, about 6 inches.
Thos. Dazall.....	High Bluff.....	Depth of black loam, from 3 to 4 feet.
Andrew Nelson.....	Stonewall.....	Depth of black loam, from 1 to 3 feet.
Jas. Mathewson.....	Emerson.....	Depth of black loam, from 2 to 7 feet.
J. J. Edwards.....	Poplar Point.....	Depth of black loam, from 2 to 3 feet.
Robt. Sutherland.....	Portage-La-Prairie..	Depth of black loam, about 1½ feet
Gilbert Stanger.....	Poplar Point.....	Depth of black loam, about 13 inches.
R. A. Sbesky.....	St. Agathe.....	Depth of black loam, about 2 feet.
Wm. Hill.....	Woodlands.....	Depth of black loam, from 12 to 18 inches.
Wm. Allan Mann.....	Birds' Hill.....	Depth of black loam, from 1 to 2 feet.
Neil McLeod.....	Victoria.....	Depth of black loam, about 18 inches.
F. B. Allan.....	Stonewall.....	Depth of black loam, about 1 foot.
Jas. Davidson.....	High Bluff.....	Depth of black loam, 1 foot.
Henry Hodgson.....	Springfield.....	Depth of black loam, 4 feet.
Jno. Fraser.....	Kildonan.....	Depth of black loam, from 1 to 6 feet.
Alex. Adams.....	Clear Springs.....	Depth of black loam, 5 feet.
Ed. Rochford, Rev.....	Poplar Point.....	Depth of black loam, 5 or 6 feet.
J. S. P. Casley.....	Ridgeville.....	Depth of black loam, from 1 to 3 feet.
Jno. Currie.....	Victoria.....	Depth of black loam, 15 inches.
M. Ellison.....	Nelsonville.....	My farm is chiefly black clay.
W. Alymer.....	St. Leon.....	Depth of black loam, 18 inches.
Jos. Dodds.....	Sunnyside.....	Depth of black loam, from 18 inches to 2 feet.
Jno. Hourie.....	St. Anne.....	Depth of black loam, from 2 to 8 feet.

FARMERS' TESTIMONY RESPECTING THE SOIL — *Continued.*

Jno. A. Lee	High Bluff	Depth of black loam, about 2 feet.
J. F. Galbraith.....	Nelsonville	Depth of black loam, from 1 to 3 feet.
Chs. Stewart.....	Meadow Lea.....	Depth of black loam, 18 inches.
Louis Densing	Emerson.....	Depth of black loam, from 3 to 5 feet.
E. M. Maley.....	Morris.....	Depth of black loam, from 12 to 30 inches.
W. A. Farmer.....	Headingly	Depth of black loam, about 1 foot.
Robt. Ball.....	Rockwood	Depth of black loam, from 2 to 3 feet.
Jno. George.....	Nelsonville	Depth of black loam, about 2 feet.
A. McPherson	Emerson	Depth of black loam, about 3 feet.
H. G. Graham	Stonewall	Depth of black loam, from 18 inches to 2 feet.
Geo. Jenkins.....	St. Agathe.....	Depth of black loam, from 12 to 18 inches.
Jas. Bedford.....	Emerson	I have never got to the bottom of the black loam.
Geo. Ferris.....	St. Agathe	Depth of black loam, from 3 to 4 feet.
E. Burnell.....	Nelsonville.....	Depth of black loam, from 2 to 4 feet.
S. J. Parsons.....	Springfield	Depth of black loam, about 1 foot.
D. McDougall	Meadow Lea.....	Depth of black loam, from 10 to 15 inches.
J. D. McEwan.....	Meadow Lea.....	Depth of black loam, 14 inches.
Jas. Whitmer.....	High Bluff.....	Depth of black loam, from 1½ to 3 feet.
James Stewart.....	High Bluff.....	Depth of black loam, from 15 to 24 inches.
K. H. C. Hall.....	Scratching River.....	Depth of black loam, 6 to 15 inches.
Robt. Bell.....	Burnside.....	Depth of black loam, from 10 to 18 inches.
Benj. Bruce	Poplar Point.....	Depth of black loam, about 2½ feet.
Wm. Start	Assiniboine.....	Depth of black loam, 2 feet.
Henry West.....	Clear Springs.....	Depth of black loam, 8 to 12 inches.
David Chalan.....	St. Anne Pt. D. C.....	Depth of black loam, about 2 feet.
J. Sinclair.....	Greenwood.....	Depth of black loam, from 12 to 18 inches.
D. R. McDowell.....	Cook's Creek.....	Depth of black loam, from 12 to 24 inches.
R. S. Jackson	St. Agathe.....	Depth of black loam, 4 feet.
R. H. Palmer.....	Cook's Creek.....	Depth of black loam, from 2 to 4 feet.
R. Morgan.....	Headingly.....	Depth of black loam, one foot.
M. Ferris.....	Burnside.....	Depth of black loam, about 2 feet.
Jno. H. Carelton.....	Clear Springs.....	Depth of black loam, 2 feet.
M. Owens.....	High Bluff.....	Depth of black loam, about 2 feet.
N. Brown	High Bluff	Depth of black loam, about 2 feet.
R. P. Bradley	St. Pie	Depth of black loam, from 2 to 2½ feet.
Jno. McKinnon.....	Portage-La-Prairie.....	Depth of black loam, about 18 inches.
Jas King J. McKin- non.....	Oberon.....	Depth of black loam, from 18 to 24 inches.
Jas. Stewart.....	Meadow Lea.....	Depth of black loam, from 1 to 3 feet.

Each of the above has stated the depth of the black loam as found in his particular neighborhood so that an average of 2 to 4 feet is correct.

It has frequently been stated that the farmers in the North-West do not use manure on the land, but this is not the case in every instance. There appears to be a diversity of opinion on the subject, as will be seen by the following statements made by the farmers themselves. While in many cases it may be unnecessary and even injurious

to the crops of grain to manure the land, in others it may be advisable, owing to the land being not quite so rich, but there is one instance in the Parish of Kildonan, where a field has yielded wheat for fifty consecutive years, without a particle of manure ever having been placed on the land. The following opinion of Farmers on the subject may be interesting as well as instructive to settlers, coming to the country :—

FARMERS' TESTIMONY RESPECTING MANURE.

Jno. Dilworth.....	High Bluff.....	I manured some land last fall and it has done well.
Hayward & Co.....	Morris.....	We have not yet used manure.
Geo. Cadman.....	High Bluff.....	I have used some manure to get it out of the way.
W. Jackson.....	High Bluff.....	I have not yet used manure.
A. Gillespie.....	Greenwood.....	I use all the manure I have.
Wm. Egles.....	Stonewall.....	I do not use manure.
S. C. Higginson.....	Oakland.....	I never use manure.
J. Sutherland.....	Kildonan East.....	I use very little manure.
Allan Bell.....	Portage-La-Prairie..	I have not used much manure yet.
Jas. Stuto.....	Nelsonville.....	I have not yet used manure, but shall use what I have on the farm.
Robt. E. Mitchell....	Cook's Creek.....	I have used manure in some cases, and found it helped the land.
Matthew Owens.....	High Bluff.....	The land has no need of manure.
Jas. Stewart.....	Meadow Lea.....	I have only manured land for vegetables.
Jno. Ferguson.....	High Bluff.....	My land does not require manure, but it should be saved.
Jas. Airth.....	Stonewall.....	I put manure on the land to get it out of the way.
E. W. Johnston.....	Springfield.....	I have not yet used manure.
R. Fisher.....	Cook's Creek.....	I use manure when I have time to put it out.
W J Adshhead.....	St. Charles.....	I use manure on my farm.
Robt. Black.....	Bird's Hill.....	I have used manure to get it out of the way.
Wm. Corbett.....	Springfield.....	I use manure to some extent.
J G. Rent ..	Cook's Creek.....	I use manure and the crops are better.
G. V. Fitzgerald.....	Ridgeville.....	I do not use manure.
Geo. Taylor.....	Poplar Point.....	I do not use manure; there is no use for it.
W. Grierson.....	Meadow Lea.....	I have not yet used manure.
J. Casson.....	Emerson.....	I have not yet used manure, but intend doing so.
F. J. Bradley.....	Emerson.....	I use manure for smudges.
Jno. Brydon.....	Portage-La-Prairie..	I have not yet used manure.
Alex. McDonald.....	Stonewall.....	I have not yet used manure.
Jas. Fleming.....	West Lynne.....	Manure is not required; it makes crops run to straw.
A. J. Moore.....	Nelsonville.....	I never use manure.
Jno. Kelly.....	Morris.....	I do not use manure.
D. Gillespie.....	Plympton.....	I do not use manure.
Robt. Adams.....	High Bluff.....	I have never used manure, but think it will do well.

FARMERS' TESTIMONY RESPECTING MANURE.—*Cont.'ued.*

Alex. J. Stevenson...	Nelsonville	I do not use manure.
Benj. J. Chubb	Nelsonville	I never use manure.
S. Ballantyne.....	West Lynne.....	I have not used manure, but think it good for gardens.
Jno. Geddes	Kildonan	I only use manure for root crops.
Wm. Green.....	St. Agathe.....	I do not use manure, but think it good to retain moisture.
A. McDonald	Gladstone.....	I do not use manure.
C. Empson.....	West Lynne.....	Manure does good.
J. Appleyard	Stonewall.....	I use manure and find it improves the crops.
J. D. Stewart	Cook's Creek.....	I use manure on my farm.
Ed. Scott	Portage-La-Prairie..	I do not use manure, I burn the straw.
Jno. Smith	Westbourn.....	I use manure on my farm.
D. F. Knight.....	Emerson.....	I do not use manure at present.
Peter Ferguson.....	Gladstone	I use manure and find it beneficial.
Chas. Logan	Portage-La-Prairie..	I only use a little for the garden.
Max. Wilton.....	High Bluff	I do not use manure.
Jno. Troop.....	Portage-La-Prairie..	I have put a little manure on one field.
Andrew Dawson.....	Headingly	I only use manure for the garden.
G. A. Perin.....	Ridgeville	I do not use manure.
Jno. Beggs	Morris	Manure can be used to advantage.
A. D. Calenhead.....	Scratching River....	I have not yet used manure.
Adam Nelson	Nelsonville	I have not yet used manure.
A. J. Hinker.....	Green Ridge	I use manure on the poorer places.
Rev. Thos. Cook.....	Westbourn.....	We use manure if necessary, but seldom done.
Francis Ogletres.....	Portage-La-Prairie	I use manure when I can find time to get it out.
Thos. Hy. Brown....	Poplar Point.....	I do not use manure.
Geo. A. Tucker.....	Portage-La-Prairie..	I do not use manure.
A. V. Beckstead.....	Emerson	The ground is rich enough without manure.
A. C. Harvey	Poplar Point.....	I have never used manure.
Geo. C. Hall.....	Portage-La-Prairie..	I have never used manure.
D. G. Lowe	St. Agathe.....	I do not use manure. It breeds weeds.
A. J. Wright.....	West Lynne.....	I use manure on my farm.
W. B. Hall	Headingly	I use all the manure I have.
Philip McKay.....	Portage-La-Prairie..	I used manure on wheat land with good results.
Geo. Turner	Lower Fort	I use manure in the garden with good results.
J. E. Maley.....	Morris.....	I do not use manure.
Andrew Hepburn....	Emerson.....	I do not use manure.
Chas. Begg.....	Lower Fort	I have used manure for the last 20 years.
Jno. Hall.....	St. Anne.....	I have tried manure and it has done very well.
Angus Polson.....	Kildonan	I use very little manure.
Geo. Tidsbury	High Bluff.....	I spread manure on the fields every fall.
T. B. Robinson.....	Rockwood	I have not yet used manure.
Neil Henderson	Cook's Creek.....	There is no necessity for using manure.
T. H. Ellison	Scratching River....	Manure improves the soil.
Thos. Sigrous	Portage-La-Prairie..	I have used all my manure with good results.
Jas. Munroe	Kildonan	I do not use manure, but it does good.
Jas. Vidal.....	Headingly	Manure is very productive of weeds, and makes the grain rank; should be used little.

FARMERS' TESTIMONY RESPECTING MANURE.- *Continued.*

Jno. Taylor.....	Headingly.....	I use manure on my farm.
Thos. Dasell.....	High Bluff.....	I never use manure, the land is strong enough without it.
And. Nelson.....	Stonewall.....	I never use manure, the land is strong enough without it.
Jas. Mathewson.....	Emerson.....	Manure is not necessary.
J. J. Edwards.....	Poplar Point.....	Manure is not necessary and will not be for sometime.
R. Sutherland.....	Portage-La-Prairie..	I have never used manure.
Gilbert Stranger.....	Poplar Point.....	I do not use manure.
Robt. A. Tesky.....	St. Agathe.....	I do not use manure, but believe it good for land.
Wm. Hill.....	Woodlands.....	I use all the manure I can get.
Wm. A. Mann.....	Birds' Hill.....	I do not use manure.
Neil McLeod.....	Victoria.....	I have not yet used manure.
F. B. Allan.....	Stonewall.....	I do not use manure.
J. Davidson.....	High Bluff.....	I do not use manure.
Henry Hodgson.....	Springfield.....	I do not use manure.
Jno. Fraser.....	Kildonan.....	I use manure on my farm.
Alex Adams.....	Clear Springs.....	I use all the manure I have.
Rev. Ed. Rochford.....	Poplar Point.....	I do not use manure yet, it is not needed.

Wood for building and fencing purposes is a matter of great importance in a prairie country, and in this respect the Canadian North-West is peculiarly favoured.

Although there are sections where wood is scarce, as a general rule there is a well regulated supply throughout the country. As we have already stated the plains abound with wood in clumps; and in other parts there are tracts of forest so evenly interspersed that farmers can generally obtain a good wood lot in close proximity to their prairie farms, besides which the numerous rivers are invariably lined with wood on each bank.

Settlers coming to the country will bear this in mind and ask for the particulars to enable them to locate not only a good wood lot, but also one suitable for tree planting. The Immigration Agents or Land Guides will give them the necessary information to enable them to make a proper selection. Elder, Oak, Elm, Maple, hard and soft, and Basswood may be planted, and will grow successfully, but Cotton Wood, Poplar and Willow will grow very rapidly, and for ordinary purposes on a farm they are most useful. The following descriptions of woods are found in the Canadian North-West: Oak, White and Red Cedar, Birch, Poplar, Spruce, White Ash, Cotton Wood, Tamarack, Cherry, White

Willow, Balsam, Ash, Maple, Pine, Elm, and Box Elder, the latter being very valuable, as it is coming into use extensively, for the purpose of wood engraving. In order, however, to show that wood is not scarce we publish the following testimony on the subject:—

TESTIMONY OF SETTLERS RESPECTING WOOD AND FUEL.

Benj. Hartley.....	St. Charles.....	We have no difficulty in obtaining stove wood. We use wire for fencing as it is cheaper.
Jno. Dilworth.....	High Bluff.....	I get all within a quarter of a mile.
Hayward, D. S.....	Moir's.....	We have enough for present use.
Geo. Cadnam.....	High Bluff.....	We have plenty of timber five miles away.
W. Jackson.....	High Bluff.....	We have no difficulty whatever in obtaining wood.
A. Gillespie.....	Greenwood.....	There is plenty on the farm.
Wm. Eagles.....	Stonewall.....	I have no difficulty in obtaining wood.
S. C. Higginson.....	Oakland.....	I can get plenty of wood and fencing but have a long way to draw it.
Jno. Sutherland.....	Kildonan.....	No difficulty whatever in obtaining wood.
James Stirton.....	Nelsonville.....	I am within easy distance of Poplar.
R. E. Mitchell.....	Cook's Creek.....	Good oak timber close at hand.
Wm. Moss.....	High Bluff.....	No difficulty in obtaining wood.
Matthew Owens.....	High Bluff.....	I live about 5 miles from my wood lot but experience no difficulty in obtaining it.
Jas. Stewart.....	Meadow Lea.....	I have plenty of wood handy.
Jno. Ferguson.....	High Bluff.....	I have 100 acres of good wood on my farm.
Jas. Airth.....	Stonewall.....	There is plenty of wood for all purposes on my farm.
E. W. Johnston.....	Springfield.....	I have not much difficulty in obtaining wood, considering I have no wood lot.
Robt Fisher.....	Cook's Creek.....	I have no difficulty in obtaining wood.
J. W. Adshead.....	St. Charles.....	I raft firewood and building timber, but have rails on my lot.
R. P. Black.....	Birds' Hill.....	Wood is not very easily obtained, but I have never been cold for the want of it.
Wm. Corbett.....	Springfield.....	I have no difficulty in obtaining wood.
J. G. Reut.....	Cook's Creek.....	I have any amount of wood within half a mile of my farm.
G. V. Fitzgerald.....	Ridgeville.....	I have no difficulty in obtaining wood.
Geo. Taylor.....	Poplar Point.....	Wood can be got but not very conveniently.
Wm. Grierson.....	Meadow Lea.....	I have no difficulty in obtaining wood.
Isaac Casson.....	Green Ridge.....	I have no difficulty in obtaining wood.
F. T. Bradley.....	Emerson.....	I reside upon the prairie and have no wood, but have no difficulty in procuring it.
Jno. Brydon.....	Prairie Lea.....	There is plenty of good poplar at a distance of about 7 miles.
A. McDonald.....	Stonewall.....	I have no difficulty in obtaining wood.
Jas. Fleming.....	W. Lynne.....	I have plenty of firewood, but building timber is scarce.
A. J. Moore.....	Nelsonville.....	I have fifty acres of good oak wood.
A. McDonald.....	Gladstone.....	I have no difficulty in obtaining wood.
Jno. Kelley.....	Morris.....	I have plenty of wood.
D. Gillespie.....	Plympton.....	I have no difficulty in obtaining wood.

TESTIMONY OF SETTLERS RESPECTING WOOD AND FUEL.—Continued.

Robt. Adams.....	High Bluff.....	I have plenty of wood on my lot both for building and firewood.
A. P. Stevenson	Nelsonville	I have 100 acres of wood.
C. Empson.....	Whyne	I have 50 acres of bush. I use wire fencing.
J. Appleyard	Stonewall	I have plenty of stove wood and building, &c.
J. D. Stewart	Cook's Creek.....	I have no difficulty as I am on a wood lot.
E. Scott.....	Portage-La-Prairie..	I have had no trouble in getting wood.
Jno. Smith.....	Westbourn.....	Half of my lot is timber: poplar, oak, ash, elm, &c.
D. F. Knight.....	Ridgeville	We have plenty of stove wood, but little for fencing.
P. Ferguson.....	Gladstone	Wood is plentiful.
C. Logan	Portage-La-Prairie..	I have no difficulty at present in obtaining wood except for building.
M. Wilson.....	High Bluff.....	I have plenty of wood three miles off.
J. Troop.....	Portage La-Prairie..	Have had no difficulty as yet.
Rich. Young	South Lisgar	There is plenty of wood in the vicinity.
J. S. P. Cosley.....	Ridgeville	I have plenty of wood on my half section.
J. Currie	Victoria	I have no difficulty in obtaining wood.
M. Ellison.....	Nelsonville.....	I have plenty of timber on my farm.
W. Aymer.....	St. Leon.....	I have any quantity of poplar or oak.
Jno. Hourn	St. Anne.....	Building and other timber is near my place.
Jno. A. Lee.....	High Bluff.....	Have no trouble in getting wood, although it is on the opposite side of the river.
J. Galbraith	Nelsonville	We have no trouble in getting wood.
Chas Stewart	Meadow Lea.....	We go nine miles for our wood.
L. Densting.....	Emerson	I have no difficulty in getting wood.
W. A. Farmer.....	H adingly	Firewood is fairly abundant, building and fencing timber scarce, wire used for fencing.
R. Bell.....	Rockwood	I have plenty of fence and firewood. Building timber is scarce.
Jno. George.. ..	Nelsonville	I have a considerable amount of timber on my farm.
A. McPherson.....	Emerson.....	I have not much difficulty in getting wood as mine is a river lot.
H. C. Graham	Stonewall	I have wood and rails on my farm and a wood lot 5 miles distant.
G orge Jenkins.....	St. Agathe.....	I have plenty of wood.
James Bedford	Emerson.....	I have no difficulty in getting wood.
Geo. Ferris.....	St. Agathe.....	We fence with wire, we have had no scarcity of wood as yet, and we expect coal shortly.
E. Burnell.....	Nelsonville	I have a 20 acre wood lot 4½ miles away.
S. J. P. J. sons.....	Springfield.....	I have some difficulty in getting wood, as I have to haul about 15 miles.
D. Mc'Dougald	Meadow Lea.....	I have no difficulty in getting wood.
J. McEwan.....	Meadow Lea	There is an abundance of wood 3 miles away.
Jas. Winsten.....	High Bluff.....	I have not much difficulty in getting it.
Jas. Stewart.....	High Bluff.....	There is plenty of timber at a reasonable distance from here.
H. H. C. Hall.....	Scratching River....	I have had no difficulty in getting wood up to present time, fencing is scarce.

TESTIMONY OF SETTLERS RESPECTING WOOD AND FUEL.—Continued.

R. Bell.....	Burnside.....	Have had no difficulty up to the present time. I am trying wire fencing.
B. Bruce.....	Poplar Point.....	I have no difficulty in getting wood.
Wm. Stort.....	Assiniboine.....	There is plenty of wood at 60 cts. per cord
Henry West.....	Clear Springs.....	I have no difficulty in getting wood.
David Chalner.....	St. Anne, Pt. D. C..	There is abundance of timber near.
Jas. Sinclair.....	Greenwood.....	I have no difficulty in getting wood.
D. R. McDonall.....	Cook's Creek.....	I have 50 acres of bush.
R. H. Palmer.....	Cook's Creek.....	I have plenty of wood.
Robt. Morgan.....	Headingly.....	I have plenty of wood.
M. Ferris.....	Burnside.....	Building timber scarce, plenty yet for rails and firewood.
J. W. Carlton.....	Clear Springs.....	Plenty of wood for all purposes.
W. Owens.....	High Bluff.....	I live five miles from my wood lot, but experience no difficulty.
R. Brown.....	High Bluff.....	I have a river lot and nearly 100 acres of hardwood.
R. P. Bradley.....	St. Pie.....	We have very little trouble in getting wood, there is plenty on Red River.
J. McKinnon.....	Portage-La-Prairie..	I have abundance of poplar wood.
J. King.....	Oberon.....	I have no difficulty in getting wood.
Jas. Stewart.....	Meadow Lea.....	I have no difficulty in getting wood.
A. Dawson.....	Headingly.....	I have never had any difficulty in obtaining wood.
J. Beggs.....	Morris.....	I have had no difficulty in obtaining wood thus far.
A. D. Cadenhead....	Scratching River....	I have had no difficulty as yet in obtaining wood.
A. Nelson, sr.....	Nelsonville.....	I have wood lots within three miles.
A. J. Henker.....	Green Bridge.....	I have had no difficulty whatever in getting all the wood I want.
Thos. Cook.....	Westbourne.....	Wood is scarce.
J. Ogletree.....	Portage-La-Prairie..	No difficulty in obtaining wood.
G. A. Tucker.....	Portage-La-Prairie..	I have little difficulty in obtaining wood.
A. V. Becksted.....	Emerson.....	In some places wood is scarce, in others plentiful.
J. C. Hall.....	Portage-La-Prairie..	I have enough wood for present use on my claim.
D. G. Lowe.....	St. Agathe.....	Wood is scarce and has to be hauled from a distance.
A. J. Nugent.....	W. Lynne.....	I have not much difficulty in obtaining wood.
W. B. Hall.....	Headingly.....	I have no difficulty in obtaining wood.
Philip McKay.....	Portage-La-Prairie..	I have no difficulty whatever in obtaining wood.
Geo. Turner.....	Lower Fort.....	A good supply of wood for fire and fencing, but not much for building purposes.
Chas. Begg.....	Lower Fort.....	I have plenty of fencing and firewood, building logs are few.
John Hall.....	St. Anne.....	I have plenty of wood for all purposes.
Angus Polson.....	Kildonan.....	I have to draw wood ten miles, but do not consider it too far.
Jas. Owens.....	St. Anne, Pt. D. C..	I have been in the country 21 years, and had no difficulty in getting wood.
G. Granby.....	High Bluff.....	We can get plenty of wood at a distance from three to five miles.

TESTIMONY OF SETTLERS RESPECTING WOOD AND FUEL.—Continued.

Jas. Fullerton.....	Cook's Creek.....	I have no difficulty in obtaining wood.
A. Polson, jr.....	Kildonan	I have no difficulty in obtaining wood.
G. Tidsbury.....	High Bluff.....	I have no difficulty in obtaining wood, I haul it from Assiniboine five miles distant.
T. J. Robinson.....	Rockwood	I have no difficulty in obtaining wood, I have some on my farm and more five miles distant.
Mat. Henderson	Cook's Creek	I have no difficulty in obtaining wood.
T. Sigsons.....	Portage-La Prairie..	I have plenty of firewood, other timber is scarce.
Jas. Munroe.....	Kildonan	I have no difficulty in obtaining wood.
John Taylor.....	Headingley	We raft down our wood and rails about 20 miles.
Thos. Dalsell	High Bluff.....	We have plenty of timber for all purposes.
A. Nelson.....	Stonewall.....	I have no difficulty in getting wood.
J. Mathewson	Emerson.....	I have no difficulty in getting wood.
J. J. Edwards.....	Poplar Point.....	I have no difficulty, there is plenty of wood within three or four miles.
B. Sutherland	Portage La-Prairie..	I have no difficulty in getting wood.
G. Stanger.....	Poplar Point.....	I have to draw wood about five or six miles.
W. Hill	Woodlands.....	I have no difficulty in getting wood.
W. A. Mann	Birds' Hill.....	I have wood in abundance.
Neil McLeod.....	Victoria.....	I have no difficulty in getting wood.
F. B. Allan	Stonewall.....	Wood for building is scarce.
Jas. Davidson	High Bluff.....	I have no difficulty in getting wood.
H. Hodgson.....	Springfield.....	I have no difficulty in getting wood, and do not anticipate any.
John Racer	Kildonan	I have no difficulty in getting wood. Wire makes a good substitute for rails.
A. Adams.....	Clear Springs.....	We have an unlimited supply of wood.
Rev. E. Rochford.....	Poplar Point.....	We have no difficulty in getting wood.

From the above it will be seen that on the whole there is not much difficulty in obtaining sufficient wood for the purposes of the farm.

A supply of good water is an indispensable necessity to the farmer, not only for household purposes, but also for stock. The Canadian North-West has not only numerous rivers and creeks, but also a very large number of lakes and lakelets throughout the whole country, and it has now been ascertained definitely that good water can be obtained almost anywhere throughout the territory by means of wells. Professor Macoun, who has explored the greater portion of the North-West, declares that in a large portion of the Territory he has travelled over, good water can be had by digging a little depth. The following statements of farmers will give some idea of the means used by settlers for obtaining a supply of water :

TESTIMONY OF SETTLERS RESPECTING WATER SUPPLY.

B. Hartley	St. Charles	I have a clear water spring.
Jno. Dilworth.....	High Bluff.....	There is a good supply of water by digging twelve feet.
Hayward & S... ..	Morris... ..	Our farms front on the Red River.
Geo. Cadman.....	High Bluff.....	A good supply of water by digging sixteen feet.
W. Jackson.....	High Bluff.....	A good supply of water by digging twelve feet
A. Gillespie	Greenwood.....	I have sunk 2 wells 22 feet deep, and have plenty of water.
Wm. Eagles.....	Stonewall.....	By drilling the rock we obtained good water.
S. C. Higginson	Oakland.....	I get the very best of water by digging seven feet.
Jno. Sutherland.....	Kildonan, E.....	Well and river water is abundant at all seasons.
Allan Bell	Portage-La-Prairie..	Excellent water can be obtained by digging 14 feet.
Jas. Stirton.....	Nelsonville	A spring creek runs through my land—at 15 feet water is good.
R. E. Mitchell	Cook's Creek.....	The water supply is good, I dug to the depth of 14 feet.
Wm. Moss.....	High Bluff.....	I have a never-failing supply of water at a depth of 14 feet.
M. Owens.....	High Bluff.....	I have found good water at a depth of ten feet.
James Stewart	Meadow Lea.....	I have found good water at the depth of sixteen feet.
Jas. Ferguson.....	High Bluff.....	I have found good water at a depth of twelve feet, and have a lake for the cattle.
Jas. Airth.....	Stonewall.....	I have a good supply of water, after digging and blasting twenty-four feet.
E. W. Johnston.....	Springfield.....	I have good surface water standing six or eight feet deep, and spring water 25 feet deep
R. Fisher	Cook's Creek.....	By digging I obtained a supply of good water.
J. W. Adshead.....	St. Charles.....	The river water is good and there are springs on the creek.
R. Black.....	Bird's Hill.....	I have a good well and running water nearly all the summer.
W. Corbett.....	Springfield	I have a good supply of water.
J. G. Rent	Cook's Creek	I can get plenty of water by digging.
G. V. Fitzgerald	Ridgville	I have several wells of spring water.
G. Taylor	Poplar Point.....	Good water can be had at a depth of ten feet.
Walter Grierson.....	Meadow Lea.....	Good water can be had at a depth of seventeen feet.
Jas. Casson	Emerson.....	Good water can be had from a well.
F. T. Bradley	Emerson.....	An abundance of water from a well.
J. Brydon.....	Portage-La-Prairie..	An abundance of water at a depth of ten feet.
A. McDonald	Stonewall.....	An abundance of water from well at depth of 20 feet
Jas. Fleming	West Lynne.....	I get water from Red River and from a well.

TESTIMONY OF SETTLERS RESPECTING WATER SUPPLY.— *Continued.*

A. J. Moore	Nelsonville..	Good water can be had from wells fourteen feet deep.
B. J. Chubb.....	Nelsonville.....	Water for stock in a ravine, and for household purposes from eight to twelve feet.
S. Ballantyne.....	West Lynne	Good water can be got at from a depth of ten to fifteen feet.
J. Geddes	Kildonan.....	Good water can be got from the river.
Wm. Green	St. Agathe.....	Water from river is not extra good, but what I get from a well is good.
A. McDonald.....	Gladstone.....	Abundance of water in wells; excellent water in ravines.
John Kelly.....	Morris	There is plenty of water in the river.
D. Gillespie	Plympton.....	There is plenty of water on my farm.
R. Adams	High Bluff.....	I have plenty of good water in my well.
A. P. Stevenson	Nelsonville.....	A creek runs through my farm.
J. Appleyard.....	Stonewall.....	I can get plenty of water at 20 feet.
Edward Scott.....	Portage-La-Prairie..	I have good water in a well seven feet deep.
John Smith	Westbourne.....	The White-Mud River runs through the farm.
D. F. Knight.....	Ridgeville.....	Plenty of good water can be got from ten to fifteen feet.
P. Ferguson.....	Gladstone.....	I obtain good water from a running stream.
C. Logan	Portage-La-Prairie..	I obtain good water at a depth of fifteen feet.
Max Wilson.....	High Bluff.....	I obtain good water at a depth of nine feet.
John Troop.....	Portage-La-Prairie..	I obtain good water at a depth of 10 feet.
And. Dawson.....	Headingley.....	The Assiniboine River passes within 50 yards of my door.
G. A. Ferris.....	Ridgeville.....	Good water can be obtained by digging.
John Beggs.....	Morris.....	The river supplies me with abundance of good water.
A. D. Cadenhead.....	Scratching River....	I get drinking water from a well; the River Marais gives good water for the cattle.
A. Nelson, Sr.....	Nelsonville.....	I get very good drinking water from a well 14 feet deep.
A. J. Hunker	Green Ridge.....	I get very good drinking water from a well 12 feet deep.
R. J. Cook	Westbourne	I have good water and plenty of it.
F. Ogletree.....	Portage-La-Prairie..	I can get plenty of good water by digging 16 feet. Cattle are supplied from river.
T. H. Graham.....	Poplar Point	My farm is on an arm of the Long Lake.
Geo. A. Tucker.....	Portage-La-Prairie..	My water is good, I have to dig from 12 to 13 feet.
A. V. Beckstead.....	Emerson.....	I have good water from a well 18 feet deep.
A. C. Harvey	Poplar Point	A good supply of water can be had from 20 to 40 feet.
J. C. Hall.....	Portage-La-Prairie..	I get good water from a running spring creek.
D. P. Lowe	St. Agathe.....	I get good tasting water from Red River, but it is muddy.
A. J. Nugent.....	West Lynne	I have a good well with a gravel bottom.
W. B. Hall.....	Headingley	I live on the Assiniboine which contains good water, but I always keep ice.

TESTIMONY OF SETTLERS RESPECTING WATER SUPPLY.—Continued.

Philip McKay.....	Portage-La-Prairie..	I have a good supply of water from a well 14 feet deep.
Geo. Turner.....	Lower Fort.....	I can obtain a good supply of water from the river and there are good springs.
And. Hepburn	Emerson.....	I get water from the river and well.
Chas. Begg.....	Stone Fort.....	River water is mostly used, there are some springs, and a few wells of good water.
Jno. Hall.....	St. Anne, Pt. D. C..	I have a well of good water at a depth of 20 feet.
Angus Polson	Kildonan	I have a good supply of water by boring 24 feet.
James Owen.....	St. Anne, Pt. D. C..	I have a good stream of running water at my door.
G. Granby.....	High Bluff.....	Good water can be got at a depth of 12 feet.
Jas. Fullerton.....	Cook's Creek.....	Good water can be got from a well.
A. Polson.....	Kildonan	Good water can be got from a well thirty feet deep.
Geo. Tidsbury.....	High Bluff.....	Good water can be got at the depth of 14 feet from a well, but no springs.
T. B. Robinson.....	Rockwood	My water is obtained from wells, one of which is obtained through sinking into limestone.
Neil Henderson	Cook's Creek	The well water is fairly good and plentiful.
Thos. Sigsons	Portage-La-Prairie	I get good water by digging 12 feet.
Jas. Munroe.....	Kildonan	Good water can be obtained by digging wells.
Jas. Vidal.....	Headingly	The water of the Assiniboine River is good.
Jno. Taylor	Headingly	The River Assiniboine is in front of the farm.
Thos. Dalzell.....	High Bluff.....	Splendid water can be got at a depth of from 12 to 14 feet.
Amb. Wilson.....	Stonewall.....	Splendid water can be got from a depth of from 16 to 20 feet.
W. Mathewson.....	Emerson	I have a good supply of spring water.
J. J. Edwards.....	Poplar Point.....	A creek runs through my farm with a depth of three or four feet of water.
R. Sutherland.....	Portage-La-Prairie	We get plenty of good water from 12 to 15 feet deep.
G. Stranger.....	Poplar Point.....	We get plenty of good water at a depth of 12 feet.
R. A. Teskey	St. Agathe.....	I get my supply from the Red River.
Wm. Hill	Woodlands.....	I have good spring water at a depth of eight feet.
W. A. Mann	Birds' Hill.....	I have two never failing springs on my farm.
Neil McLeod.....	Victoria.....	I have a well of good water at a depth of 16 feet.
F. B. Ailan	Stonewall.....	A good supply of water is obtained by drilling 25 feet in the rock.
Jas. Davidson.....	High Bluff.....	Water can be got at a depth of 12 feet.
Hy. Hudson.....	Springfield..	Water can be got at a depth from 32 to 40 feet deep.
John Fraser	Kildonan	Water can be got from a depth of 72 feet deep.

TESTIMONY OF SETTLERS RESPECTING WATER SUPPLY.—Continued.

A. Adams.....	Clear Springs.....	Water can be got at a depth of 16 feet.
Rev. D. Rochford ...	Poplar Point.....	Water can be got at a depth of 15 feet.
Rev. Mr. Young.....	South Lisgar.....	We get our water from the river.
J. S. P. Cosley.....	Ridgeville.....	Water can be got at a depth from 10 to 15 feet.
John Currie	Victoria.....	Water can be got from wells.
M. Ellison.....	Nelsonville.....	We can get water at six feet deep.
A. Aylmer.....	St. Leon.....	Water can be got from a depth of 10 feet.
Jon. Dodda.....	Sunny Side.....	I have a good supply of well water.
John Hourie.....	St. Anns.....	The water is very good; can be obtained by digging a well.
John A. Lee.....	High Bluff.....	Good water can be obtained at a depth of 10 feet.
J. F. Galbraith.....	Nelsonville.....	I have three wells at a depth of five feet, nine feet and eleven feet.
Charles Stewart.....	Meadow Lea.....	Good water can be got at a depth of 23 feet.
L. Dionising.....	Emerson.....	I have a good well at 20 feet deep, the water is pure, clear and sweet.
W. H. Farmer.....	Headingly.....	We use river water.
R. Bell.....	Rockwood.....	We dug 17 feet, struck upon rock; the water is plentiful and good.
John George.....	Nelsonville.....	Good water can be got in any season by digging five feet.
A. McPherson.....	Emerson.....	We use the water from Red River.
H. C. Graham.....	Stonewall.....	Our water is obtained by digging to the rock, and then drilling.
Geo. Jenkins.....	St. Agathe.....	There is good water in the river.
Jas. Bedford.....	Emerson.....	We have a well and use the Red River water.
Geo. Ferris.....	St. Agathe.....	A coulee runs through my farm and the Red River in front of it.
F. Burnell.....	Nelsonville.....	I have a well of good water 12 feet deep; also a spring for winter and summer.
D. McDougald.....	Meadow Lea.....	I have plenty of good water from a well 16 feet deep.
Jas. D. McEwan.....	Meadow Lea.....	I have plenty of good water from a well 17 feet deep.
Jas. Whinster.....	High Bluff.....	I have plenty of good water from a well 12 to 14 feet deep.
Jas. Stewart.....	High Bluff.....	I have plenty of water from a well 10 to 12 feet deep.
H. H. C. Hall.....	Scratching River.....	I get fairly good water from the creek.
R. Bell.....	Burnside.....	Rat creek runs through my farm; good water can be got at a depth of 12 feet.
Edw. Bruce.....	Poplar Point.....	I have a good well.
Win. Start.....	Assiniboine.....	I have a good well 16 feet deep.
D. Chalmers.....	St. Anne, Pt. D. C.....	Excellent water can be got at a depth of 16 feet.
Jas. Sinclair.....	Greenwood.....	A good supply of water can be got by digging.
D. R. McDowell.....	Cook's Creek.....	A good supply of water can be got by digging from 7 to 12 feet.
R. S. Jackson.....	St. Agathe.....	Good water can be got from the river and a spring.
R. H. Palmer.....	Cook's Creek.....	There is good water on my farm in a spring 10 feet deep.

TESTIMONY OF SETTLERS RESPECTING WATER SUPPLY.— *Continued.*

Robt. M ^{of} an.....	Headingley	Very good water can be obtained very easily.
Matthew Ferris.....	Burnside.....	Very good water at 8 feet.
John W. Carleton.....	Clear Springs.....	I have a good spring within 50 rods of my house.
M. Owens.....	High Bluff.....	Good water can be got at 10 feet.
Nelson Brown.....	High Bluff.....	Good water can be got at 12 feet.
R. P. Bradly.....	St. Pie.....	Good water can be got at 10 feet.
John McKinnon	Portage La P.....	We have a creek of good spring water.
Jas. King	Oberon	Water can be got at a depth of 20 feet.
Jas. Stewart.....	Meadow Lea.....	Good water can be got by digging 16 feet

The Prairie hay of the Canadian North-West has already become famous and its nutritious qualities are acknowledged on all sides. In fact stock-raising will, in the near future rival the production of grain in the fertile belt. The Eastern base of the Rocky Mountains, and the Peace River District, especially, will become great fields for graziers to carry on an immense business in cattle, the wild grass in those localities being even of better quality than that found on the plains. There are between forty and fifty different varieties of grasses, sedges and legumes in the North Western prairies.

The first point a farmer would note about them is the abundance of the foliage of nearly all the species. While the grasses of Eastern Canada are nearly all culm or stem, having most of them, only one, two or three leaves, most of the North Western grasses have ten or twenty leaves. Of course this is an extremely valuable feature in grass, as the leaves are more easily digested than the culms.

The culms are exceedingly fine in the prairie grass, and this again would strike a farmer as indicating a good quality of grass. Add to this that there are in some species such an abundance of seeds, as to make the fodder partake of the nature of a feed of grain, and it will be seen that the tales about the readiness with which stock will fatten on prairie hay are not overdrawn. It may be interesting to enumerate a few of the grasses found in the North-West—the brown top or cedar grass is one of the most valuable kinds and has fine stem with abundant foliage, and there are several species of red top very nutritious.

The pea grass, a kind of vetch, affords good pasturage for stock in winter, and then there is the beaver hay, much superior to the grass of the same name, found in Eastern Canada. The Scotch grass is a favourite hay in the North-West, and the Upland hay found on the prairie is of very fine quality

Then there are the following grasses: bone, blue, buffalo, blue joint, sedge hay, colony hay, June grass, bush and wheat grass, as well as numerous other varieties, the greater portion of them being nutritious, and some of them very beautiful in appearance.

The luxuriance of the prairie grasses in the North-West, is a sure indication of the great fertility of the soil, and in order to show the abundance of hay, possessed by the settlers, we append the following evidence on the subject, from resident farmers:

TESTIMONY OF SETTLERS RESPECTING GRASSES AND HAY

E. Hartley	St. Charles.....	Hay is very plentiful, we shall have about 150 tons for sale almost equal to timothy.
J. Dilworth	High Bluff	Wild hay is a little scarce here, but timothy does well.
Hayward & S.....	Morris	There is plenty of hay of the best quality.
W. Jackson.....	High Bluff.....	There is plenty of hay of good quality, and we can grow all the timothy we want.
A. Gillespie.....	Greenwood	There is plenty of hay of good quality, and near at hand.
Jas. Sturton	Nelsonville.....	I have a 20 acre hay meadow, which will yield from 4 to 5 tons per acre.
W. E. Mitchell.....	Cook's Creek.....	There is a large quantity of hay of very good quality.
Wm. Moss.....	High Bluff	Hay is quite near and of good quality.
Jas. Owens	High Bluff.....	There is plenty of hay on the High Prairie, and the quality is good.
Jas. Stewart.....	Meadow Lea.....	There is plenty of hay of the very best quality.
Jno. Ferguson	High Bluff.....	I have 50 acres of good hay land which grows grass of first quality.
Jas. Airth	Stonewall	I have thousands of tons of the best hay as good as timothy.
E. W. Johnston	Springfield.....	Hay is in abundance and of splendid quality.
J. W. Adshead.....	St. Charles	I have hay in any quantity.
R. Black.....	Bird's Hill	I have hay of best quality in abundance.
Wm. Corbett.....	Springfield	Hay is in abundance and of good quality.
G. V. Fitzgerald.....	Ridgeville.....	There is any amount of good hay.
G. Taylor.....	Poplar Point.....	There is wild hay of the very best quality.
W. Grierson	Meadow Lea.....	I have hay in abundance and of good quality.

TESTIMONY OF SETTLERS RESPECTING GRASSES AND HAY.—Continued.

Jno. Brydon.....	Portage-La-Prairie..	I have plenty of good hay two miles distant.
A. McDonald.....	Stonewall.....	I have plenty of good hay close by in a swamp meadow.
A. J. Moore.....	Nelsonville.....	I have plenty of good hay and have cut 50 tons this year.
B. J. Chubb.....	Nelsonville.....	I have abundance of hay and of first class quality.
Simon Ballantyne....	West Lynne.....	All farms here have hay for their own use and to spare
Robt. Adams.....	High Bluff.....	There is plenty of hay on my farm.
A. P. Stevenson.....	Nelsonville.....	Hay is in abundance and of good quality.
C. Empson.....	W. Lynne.....	We have plenty of wild hay and timothy.
J. Appleyard.....	Stonewall.....	We have plenty of hay, it is of good quality.
Ed. Scott.....	Portage-La-Prairie..	Hay is plentiful, cattle and horses do well on it.
Jno. Smith.....	Westbourne.....	I have abundance of hay of different kinds.
P. Ferguson.....	Gladstone.....	Hay is plentiful and of good quality.
Chas Logan.....	Portage-La-Prairie..	I have had plenty of good hay.
Max. Wilton.....	High Bluff.....	There is plenty of hay of best quality on my land.
And. Dawson.....	Headingly.....	I have abundance of good hay at a distance of one mile.
G. A. Perrin.....	Ridgeville.....	Hay is in abundance and very good.
A. D. Cadenhead.....	Scratching River.....	Hay is good and abundant.
A. Nelson, jr.....	Nelsonville.....	I obtain all the hay I require on my farm.
A. J. Hinker.....	Greenridge.....	There is any amount of hay and that of the very best.
Rev. Thos. Cook.....	Westbourne.....	There is any amount of good hay.
F. Ogletree.....	Portage-La-Prairie..	There is plenty of good hay within three miles, and timothy can be grown.
Thos. H. Brown.....	Poplar Point.....	There is abundance of hay of good quality.
A. V. Beckstead.....	Emerson.....	Any where on the prairie there is good hay.
A. C. Harvey.....	Poplar Point.....	There is abundance of hay of good quality on my property.
G. C. Hall.....	Portage-La-Prairie..	There is abundance of good hay.
D. P. Lowe.....	St. Agathe.....	Thousands of tons of hay.
W. B. Hall.....	Headingly.....	I can get any quantity of good hay.
Philip McKay.....	Portage-La-Prairie..	Hay is plentiful, and almost equal in quality to cultivated hay.
G. Turner.....	Lower Fort.....	Hay is in abundance and of good quality.
Jno. Hall.....	St. Anne, Pt. D. C..	There is plenty of hay of good quality.
Angus Polson.....	Kildonan.....	Hay is in abundance and of good quality.
G. Granby.....	High Bluff.....	Timothy can be raised and wild hay is to be found near.
Jas. Fullerton.....	Cook's Creek.....	There is hay of the very best quality, principally ravine hay.
Geo. Tidsbury.....	High Bluff.....	Hay has been plentiful and of the very best quality.
Alex. Polson, jr.....	Kildonan.....	Hay is in abundance and of good quality.
T. B. Robinson.....	Rockwood.....	Hay is in abundance and of good quality.
T. H. Alleson.....	St. Agathe.....	There is plenty of good hay.
Jas. Munroe.....	Kildonan.....	Hay is in abundance and of good quality.
And. Nelson.....	Stonewall.....	Hay is in abundance and of good quality.

TESTIMONY OF SETTLERS RESPECTING GRASSES AND HAY.—Continued.

Jas. Mathewson.....	Emerson.....	There is plenty of the best hay.
J. J. Edwards.....	Poplar Point.....	There is plenty of splendid hay to be got at present.
Robt. Sutherland.....	Portage-La-Prairie...	Hay is in abundance of the best quality.
Robt. A. Teskey	St. Agathe.....	Any amount of good hay can be obtained in this vicinity.
Wm. Hill.....	Woodlands.....	The hay is of splendid quality and in any quantity.
Wm. A. Mann.....	Bird's Hill.....	I have more hay of good quality than I can cut.
West McLeod.....	Victoria	Hay is good in quality and quantity.
F. B. Allan.....	Stonewall	I had abundance of hay this year.
James Davidson.....	High Bluff	There is plenty of hay and of the best quality.
John Fraser	Kildonan.....	In ordinary seasons, hay is plentiful and of good quality.
Alex. Adams.....	Clear Springs.....	There is plenty of hay of good quality.
E. Rochford.....	Poplar Point.....	There is plenty of excellent hay for all the winter.
J. S. P. Cosby	Ridgeville	The yield of hay is at times larger than is required.
John Currie.....	Victoria	Hay is in abundance and of good quality.
W. Ellison.....	Nelsonville	The hay is very good and plentiful on the farm.
W. Aylmer.....	St. Leon.....	Hay is in abundance and of good quality.
John A. Lee.....	High Bluff.....	I have plenty of hay; could cut 50 tons on my farm.
J. J. Galbraith.....	Nelsonville	Have obtained good hay at a distance of from 1 to 3 miles.
Chas. Stewart.....	Meadow Lea.....	Hay is in abundance and of splendid quality.
Louis Diensing.....	Emerson.....	Hay is plentiful and very good.
E. M. Maley.....	Morris.....	Hay is in abundance and of good quality.
W. A. Farmer.....	Headingly.....	There is more wild hay than is required; some farmers grow timothy.
Robert Bell.....	Rockwood.....	Hay is in abundance and of good quality.
George Jenkins.....	St. Agathe.....	There is plenty of good hay.
James Bedford.....	Emerson	Hay is in abundance and of good quality.
George Ferris.....	St. Agathe.....	Hay is plentiful and of excellent quality.
E. Burnell.....	Nelsonville	Hay is rather scarce but of good quality.
S. J. Parsons.....	Springfield	Hay is in abundance and of good quality.
D. McDougall.....	Meadow Lea.....	There is any amount of prairie hay of best quality.
J. D. McEwan.....	Meadow Lea	Hay is in abundance and of the best quality.
James Wimster.....	High Bluff.....	During late wet we have had abundance of hay here.
James Stewart	High Bluff.....	Hay is in abundance and of the best quality.
R. H. C. Hall.....	Scratching River.....	Hay is plentiful and very good.
Robert Bell.....	Burnside.....	We can get good hay close to us.
B. Bruce.....	Poplar Point.....	I can get all the hay I require, and that of the best kind.
Wm. Start.....	Assiniboine.....	Hay is in abundance and of good quality.
D. Chalmers.....	St. Anne, Pt. D. C..	Hay is in abundance and said to be equal to timothy for cattle.

TESTIMONY OF SETTLERS RESPECTING GRASSES AND HAY.—Continued.

Jos. Sinclair.....	Greenwood.....	Hay is in abundance and of good quality.
D. R. McDowell.....	Cook's Creek.....	There is any quantity of the best hay.
R. G. Jackson.....	St. Agathe.....	Hay is in abundance and of good quality.
Robert Morgan.....	Headingly.....	Hay is very good and easily obtained.
M. Ferris	Burnside	Hay is plentiful and of good quality.
Matthew Owens.....	High Bluff.....	There is plenty of hay on the High Prairie and the quality is good.
R. P. Bradley.....	St. Pie.....	There is plenty of hay close at hand, and of superior quality
John McKinnon.....	Portage-La-Prairie...	There is abundance of hay and the quality is good.
James King.....	Oberon	Hay is a little scarce, but of good quality.
James Stewart.....	Meadow Lea.....	Hay is in abundance and of good quality.

While dealing with the question of stock raising, it may be well to refer to the effect produced on cattle by the cold during the winter months; it has been found by experience that the winters of the Canadian North-West, owing to the dryness of the atmosphere, are really less trying to cattle than in more southern latitudes.

It is a well known fact that the old settlers were in the habit of leaving their horses out all the winter, on the prairie to feed on the grass, which they uncovered by digging away the snow with their fore feet.

Cattle and horses ought to be properly stabled, especially during the night, and if this is done, and the feeding properly attended to, they will thrive well. In support of this we give a few out of the many testimonies which we have received on the subject.

TESTIMONY OF SETTLERS RESPECTING COLD ON CATTLE.

Benj. Hartley.....	St. Charles.....	Animals do not suffer so much here as in England.
A. Gillespie.....	Greenwood	Animals do well here in winter.
S. C. Higginson	Oakland	The winters are dry; animals do not suffer from cold.
John Sutherland	Kildonan, E	The winter is less severe on animals than in more southern latitudes.
Adam Bell.....	Portage-La-Prairie	Animals turn out well in the spring.
James Sturton.....	Nelsonville.....	Climate being dryer, animals stand cold better than in Ontario.
John Ferguson.....	High Bluff	If cattle are well cared for, they thrive, as the climate is dry.
E. W. Johnston.....	Springfield	The winter is not severer than in Ontario.
S. Ballantyne	West Lynne.....	Although last winter was exceptionally cold, cattle wintered well.

TESTIMONY OF SETTLERS RESPECTING COLD ON CATTLE. *Continued.*

John Beggs.....	Morris	I have known young cattle to winter at the straw pile
Angus Polson	Kildonan	The winter is not severe on animals; native ponies winter out.
Thos. Sigsons.....	Portage-La-Prairie..	The winters being dry and frosty, they are favorable to cattle; they eat their food well.
Thos. Dalzell....	High Bluff.....	The winter is not so hard on cattle here as in Ontario, as there is no rain or sleet to freeze on them.
W. A. Mann.....	Bird's Hill.....	Cattle do better here in a cold steady winter than a changeable one.
John Fraser.....	Kildonan	The winter, though cold, is uniform, and therefore not unfavourable to animals.
W. A. Farmer.....	Headingly	The winter is not severe on animals; they are remarkably healthy.
H. C. Graham.....	Stonewall.....	The dryness of the atmosphere neutralizes the cold.
James Stewart.....	High Bluff.....	Stock will be as fat in the spring as in Ontario and Quebec.
D. Chalmers.....	St. Anne Pt. D. C....	The winter is less severe on animals here than in Ontario.
Matthew Ferris..	Burnside	The winter not much severer here on animals than in Ontario.
J. W. Carelton	Clear Springs	Animals thrive well in the cold season.
M. Owens.....	High Bluff.....	The winters here are less severe on cattle than in Ontario.
Nelson Brown.....	High Bluff	The winters here have about the same effects on animals as in Ontario.
John McKinnon.....	Portage-La-Prairie..	Cattle thrive well in winter if properly fed.
James Stewart.....	Meadow Lea.....	Young cattle grow all the winter when warmly stabled and fed on wild hay.

It may also be interesting for intending settlers to know how the farmers of the North-West winter their cattle, and for this reason, we give a few instances :

TESTIMONY OF SETTLERS RESPECTING WINTERING OF CATTLE.

W. Jackson.....	High Bluff.....	I stable my cattle at night and let them run in the yard during the day.
S. C. Higginson.....	Oakland.....	I winter my cattle in much the same way as in Ontario.
Jno. Ferguson..	High Bluff.....	I house my cattle and feed them on hay, and they are in good condition in the spring.
Robt Fisher	Cook's Creek.....	I house the cattle warmly and feed them on hay with an occasional feed of salt.
A. J. Moore.....	Nelsonville	I feed the cattle on wild hay and turn the steers and young stock loose in the straw stacks.

TESTIMONY OF SETTLERS RESPECTING WINTERING OF CATTLE.—
Continued.

Jno. Geddes.....	Kildonan	Cows are kept in the stable and other cattle fed in the yard on hay and straw and stabled at night.
A. McDonald.....	Gladstone.....	I stable cows and working cattle and the young stock run loose around the straw stacks.
A. P. Stevenson.....	Nelsonville.....	The cows are stabled and the young cattle run out all the winter.
Francis Ogletree.....	Portage-La-Prairie ..	I stable my cows and allow my young cattle to run around the straw stacks.
Gardner Granby.....	High 'Bluff.....	I feed my cattle on wild hay and turn them out to the straw stacks in the day time.
And. Nelson.....	Stonewall	I stable my cattle and feed them on prairie hay.
Wm. Hill	Woodlands.....	I stable my cattle, my native ponies are out.
Robt. Bell.....	Rockwood.....	I stable my cattle in a flat roof log building with straw on the top.
Jno. George.....	Nelsonville	I feed my cattle on hay, turnips or grain are required if straw is used.
A. McPherson	Emerson.....	I keep my cattle stabled, from December to the end of March.
Robt. Bell.....	Burnside.....	We stable our cows and oxen and let the young cattle run out in sheds
Robt. Morgan	Headingly	I keep my cattle in stables during the winter.
Matthew Ferris.....	Burnside.....	I keep the cows and calves in stables, the rest run around the straw stacks most of the winter.
Jno. W. Carleton.....	Clear Springs.....	I keep my cattle in warm stables, giving them plenty of hay and water.
Nelson Brown.....	High Bluff.....	I feed my cattle in a yard on native hay and stable them.

The story of summer frosts in the North Western territory, has long since been exploded. Of course, in this respect there are occasional exceptions, as in other countries, but any farmer can make himself perfectly secure from loss, by taking care to sow his seed as early as possible in the spring.

The dryness of the air to a great degree tends to prevent summer frosts, of a nature to injure crops. We would refer our readers to any of the settlers whose names and address, we have already given to prove that no damage of any importance has been suffered from this cause.

The Canadian North-West is specially favored in freedom from storms, and while we hear of hurricanes devastating

whole districts in other portions of the American continent, such things are almost unknown north of the 49th parallel of latitude.

There has not been a case of crops having been destroyed by storms in this country for many years, and in winter we do not have the severe snow storms so frequently experienced to the south of us.

The country is certainly blessed in this respect, and although the cold is sometimes intense, the weather is generally calm and clear when it is so.

Another blessing so far enjoyed by the farmers of the North Western territory of Canada is the freedom from blight, worms or insects, which in other parts of the continent have been so destructive to crops

Potatoes and other roots and vegetables, as will be seen by the following statement, yield splendid crops, and the quality first class: One property of the potatoes grown in this country is that the largest sized specimen is invariably found to be mealy to the very core. Their prolific yield is certainly remarkable. "Early rose" and "Snow-flakes" have so far been the favourite varieties with our farmers, some of the specimens weighing as high as 5 and 6 pounds to the potato.

The great advantage possessed by prairie over wooded country is the ease with which it can be turned to agricultural purposes. The land has only to be broken to yield a fair crop, and the second year it is in good condition. This, when compared with the toil of years required to clear a wood farm, is of no small consequence to a new settler.

Recently, it has been discovered by successful experiments, that seeds sown on the prairie grass and then ploughed lightly, will yield good crops the same season. This is a most important discovery, as it shows that an immigrant arriving on his claim in the spring can begin to realize a return from his labours almost as quickly as if the land had already been cultivated and improved. The following is an account of the experiments made in this respect, and they will be found worthy the consideration of every farmer contemplating the "breaking" of new lands.

An experiment in raising grain on fresh sod has been tried in the vicinity of Big Stone Lake for the past two

seasons with such marked success, that it is worthy of extensive trials. We are not informed who the first experimenter was, but at any rate, in the vicinity of Big Stone City, there are farmers so confident of success that they have put in considerable quantities of small grain in the fresh sod the past season, and in every case, so far as we could learn, with the most beneficial result. The novelty of the operation is that the grain is first sown on the prairie grass, and then the "breaking" is done. A not very heavy sod is turned, and the grain buried quickly finds its way through. In a few weeks the sod is as rotten as need be, and can be kicked to pieces easily with the foot. Now for an illustration.—Mr. Daly, near Big Stone City, in the vicinity of Big Stone Lake, sowed 10 acres of oats in this way last year:—He put two bushels and a peck to the acre, and broke his land. Last fall, from ten acres he harvested 420 bushels of oats which were worth sufficient to pay for the breaking, and leave him some seventy-five dollars besides. This year he sowed 75 acres in this way with equally good success, the yield, according to estimate, as he had not threshed when we were there, not being less than 1000 bushels on the piece. Another gentleman near him, sowed buckwheat in the latter part of May in the same way, and has every promise of a magnificent crop. Another tried corn, dropping a few kernels in every fourth furrow. Wheat has not been tried, but will be another year. It has been found that grain can be sowed on the prairie early and the sod rotted as readily as if sowed in June, as the growing crop shades it, and but little grass starts. This is a valuable discovery and will be worth much to new beginners who, thus far, with the exception of potatoes, have not expected anything before the second year. It will be of value also to larger farmers who are obliged to go to a heavy outlay each year for breaking, for the oat crop not only pays for the labor, but leaves a good margin besides. It is an experiment certainly worth a trial.

The immigrant settling in a new country, will understand the value of this discovery, which will enable him to realize sufficient for his expenses the first year, and perhaps will enable him to place a sum of money aside for future use. The new settler when he arrives in the

country ought to locate his farm with as little delay as possible; and then set to work, to break as much land as possible, for the ensuing year's seeding. If he should be in time to sow on the sod, as already described, by all means let him do so, but if not he should break as much as possible for cultivation the following year. He and his family can very well camp out in tents during the summer, and in the fall there will be plenty of time to erect a warm house and stables for the winter. There appears to be a diversity of opinion amongst farmers, as to the best kind of seed to sow the second season, and therefore for the information of immigrants, we give the following as the experience of actual settlers in the North-West:

TESTIMONY OF SETTLERS RESPECTING CROPS.

Benj. Hartley.....	St. Charles.....	A fair crop can be obtained the second summer, oats or barley should be sown.
J. Dilworth jr.....	High Bluff.....	A fine crop can be obtained the next year after breaking, wheat or oats should be sown.
F. F. Bradley.....	Emerson.....	A crop can be obtained the first season, but I would recommend no seeding of any kind till the following spring.
Alex. McDonald.....	Stonewall.....	I have raised 60 bushels per acre of oats on breaking done in June, and sown early the following spring.
Jas. Fleming.....	West Lynne..	Break in June and sow wheat or oats the following spring.
Salmon Ballantyne..	West Lynne.....	Good oats can be grown on early spring breaking.
D. F. Knight.....	Emerson.....	Oats do well on the sod, after the second plowing any kind of grass may be sown.
Peter Ferguson.....	Gladstone.....	A fair crop can be obtained the following spring, sow any kind of grain.
Max. Wilton.....	High Bluff.....	Break the land in June and turn it back in the fall.
Andrew Dawson.....	Headingly.....	A man can break in the spring and have a good crop of wheat or oats the same year.
Arthur D. Cadenhead..	Scratching River.....	Oats may be sown on the breaking, wheat the second year.
F. Ogletree.....	Portage-La-Prairie..	Break from first of June to the 15th of July, sow wheat following spring.
F. H. Brown.....	Poplar Point.....	Land broken 1st June and to 15th July would give a good crop of wheat the next year.
A. C. Harvey.....	Poplar Point.....	I have only had potatoes on first breaking.
Geo. C. Hall.....	Portage-La-Prairie	A fair crop may be obtained the first year; after breaking, sow oats first.

TESTIMONY OF SETTLERS RESPECTING CROPS.—*Continued.*

J. E. Maley.....	Morris.....	Half a crop may be obtained the first year of wheat and oats.
Angus Polson.....	Kildonan	A fair crop of oats can be got on the breaking.
Neil Henderson.....	Cook's Creek.....	The land plowed in the spring and sown with oats will average 30 bushels per acre.
T. H. Ellison.....	Scratching River	A fair crop of oats can be obtained from the first plowing, wheat from the second plowing.
Thos. Sigsons.....	Portage-La-Prairie..	Land broken in June is fit for a crop of oats the following season.
Jas. Vidal.....	Headingly	A fair crop of wheat may be obtained the following year.
Jno. Taylor.....	Headingly	A fair crop of wheat or any other grain may be obtained the summer after breaking.
F. B. Allan.....	Stonewall.....	I have grown good wheat the first year after breaking.
Jas. Davidson.....	High Bluff.....	A fair crop may be obtained the year after breaking, sow Fife wheat.
W. Aylmer.....	St. Leon.....	Land should be broken shallow and turned back deep, sow wheat, oats and barley.
Jno. Hourie.....	St. Anne.....	Oats do best on first breaking, wheat on the second.
W. A. Farmer.....	Headingly	Wheat may be sown the following spring, land broken in June.
R. Bell.....	Rockwood	I have grown wheat and oats on the first breaking.
Jno. George.....	Nelsonville	Some years oats can be raised on breaking, a very good crop, but a better crop assured the second year.
Geo. Ferris.....	St. Agathe.. ..	I have raised 125 bush. to the acre of oats sown on first breaking.
Wm. Start.....	Assiniboine	I have a good crop on this year's breaking.
Henry West.....	Clear Springs.. ..	Land should be broken in June and sown with wheat next spring.

The question has frequently been raised as to whether fall wheat can be grown in the Canada North-West, and from experiments made, it is doubtful if it can be cultivated successfully. The slight depth of snow on the prairie is against the culture of this description of grain, although a great many farmers here are of opinion that it can be grown.

The following are a few of the statements *pro* and *con* of farmers who have made experiments in this respect :

TESTIMONY OF SETTLERS RESPECTING GROWTH OF FALL
WHEAT.

R. P. Bradley.....	St. Pie	I sowed a little last fall and it looks well.
Robt. Bell.....	Burnside	I have tried a little fall wheat and it did well.
Jno. W. Lee	High Bluff.....	Wheat when sown late in a shady place will do well.
Rev. T. Cook.....	Westbourne	A heavy crop will be the result of wheat sown in the fall.
Fred. T. Bradley.....	Emerson	I have tried fall wheat, but cannot recommend its culture.
Wm. Corbett.....	Springfield.....	I have tried fall wheat but it was a failure.
Jno. Fraser.....	Kildonan	I have tried fall wheat but without success, the autumn is too dry as a rule.
D. Chalmers.....	St. Anne, Pt. D. C...	Have seen good fall wheat raised by my neighbours.
A. V. Beckstead.....	Emerson.....	Fall wheat is killed in winter as there is not enough snow to cover the ground.

In addition to the above statements, we have the opinion of twenty-two farmers living in the country, that fall wheat can be grown successfully, and some seven others who are of a contrary belief, while over one hundred state that they never gave it a trial. That fall wheat has been grown in the Canadian North-West is a fact, but whether it will be ever extensively cultivated remains to be proved. So long, however, as farmers can get from 30 to 40 bushels of spring wheat per acre, there is not much likelihood that they will give much attention to fall sowing.

The practicability of raising corn in the Canadian North-West has also been discussed and a variety of opinions offered on the subject.

There is no doubt this country is essentially wheat producing, but the following statements prove conclusively that corn can also be grown successfully :

TESTIMONY OF SETTLERS RESPECTING GROWTH OF INDIAN
CORN.

J. Dilworth.....	High Bluff.....	I have raised corn successfully.
John Sutherland.....	Kildonan	I have yellow (or small) corn for the last forty years.
Allan Bell.....	Portage-La-Prairie...	I have raised corn successfully.
Wm. Moss.....	High Bluff.....	Corn does very well.
R. Black.....	Bird's Hill.....	I have raised corn successfully.
E. W. Johnson.....	Springfield.....	Corn that I have raised does well.
Wm. Corbett.....	Springfield.....	I have successfully raised corn every year I have been here.

TESTIMONY OF SETTLERS RESPECTING GROWTH OF INDIAN
CORN.—Continued.

Geo. Taylor	Poplar Point.....	Corn grows well.
J. Cassan.....	Emerson.....	I have raised corn successfully.
J. Brydon.....	Portage-La-Prairie..	I have raised a small variety of corn.
J. Fleming.....	West Lynne.....	I have never tried corn, but my neighbours have raised good corn.
B. J. Chubb.....	Nelsonville	I have raised corn successfully.
D. Gillespie.....	Plympton	I have raised corn successfully.
P. Ferguson.....	Gladstone	I have raised corn with marked success.
G. A. Perrin.....	Ridgeville	I have raised corn successfully.
J. Beggs.....	Morris.....	I am raising corn this season; it is a real success.
A. J. Hinker.....	Greenridge	I have raised corn that will give 40 bushels to the acre.
Rev. J. Cook.....	Westbourne.....	I have raised corn successfully.
D. J. Lowe.....	St Agathe.....	I have raised excellent corn.
W. B. Hall.....	Headingley	I have raised corn successfully.
Alex. Polson.....	Kildonan	I have raised corn successfully.
T. J. Robinson.....	Rockwood	I have raised corn successfully for the house, and large crops sown broadcast for feed.
Neil Henderson	Cook's Creek.....	I have raised corn successfully.
T. H. Ellison	Scratching River....	Corn grows fast, some years averaging fourteen inches.
Jas. Munroe	Kildonan	I have raised corn successfully.
T. Dalzell.....	High Bluff.....	I have never raised any corn, but have seen it successfully done.
J. J. Edwards.....	Poplar Point.....	I have raised corn successfully.
Neil McLeod.....	Victoria	I have raised corn successfully.
Jno. Fraser.....	Kildonan	I have raised corn successfully.
Rev. E. Rochford..	Poplar Point.....	Good corn is successfully raised.
J. Currie	Victoria	I have raised corn successfully.
D. McDougald.....	Meadow Lea.....	Corn does very well.
Benj. Bruce.....	Poplar Point.....	I have raised very good corn.
Wm. Start.....	Assiniboine	I have raised corn successfully.
D. Chalmer	St. Ant e, Pt. D. C..	I have raised very good corn.
D. R. McDowell.....	Cook's Creek.....	I have raised corn successfully.
Robt. Morgan	Headingley	Corn grows well.

It has been admitted by competent judges that the wheat grown in the North-West is of the finest quality, and as we will presently show the yield is much greater than in any other part of America. This is of the greatest importance to the farmer especially when taken in connection with the fact that there is always a ready market for his produce at fair prices.

There is another point, however, which makes this country a very desirable one for agriculturists, and it is this. While the wheat producing belt of country in this continent is narrowing gradually year by year and the

limit extending more and more northward, the Canadian North-West or account of its great depth of good rich soil, is likely to become in the near future the principal granary in North America. We have already shown the extreme richness and durability of the soil, and in addition to this the climate is peculiarly favourable for the cultivation of wheat, owing to the dryness of ripening and harvesting seasons.

Mr. J. W. Taylor, American Consul at Winnipeg, is the authority for the following statement—that three-fourths of the great wheat producing belt of the continent lie north of the international boundary and within the Canadian North-West.

In regard to the quality of the wheat, we cannot do better than to quote the following from the *Pioneer Press*, of Saint Paul, Minnesota, certainly a most disinterested authority. It says in its issue of November 8, 1880 :

"It seems to be a settled fact that the further north wheat is grown, up to a certain limit, the better it is.

* * * * *

"The future great wheat region of the world will undoubtedly be in the rich and far famed valley of the Saskatchewan, where this grain grows to perfection, not only in quality, but in every other particular.

"The berry obtains an amber color, rounds out into a fullness it does not attain here, and is rich in gluten, the life sustaining principle of flour. * * * *

"Some two or three years ago, samples were procured from several parts of the province of Manitoba for trial. The best of this was placed in the hands of some of our leading wheat-growers for cultivation. One variety of Scotch Fife yielded the first year at the rate of 37 bushels to the acre, of a hard amber color, which the wheat inspector for the Millers' Association at Minneapolis, pronounced the finest specimen he had seen since he had been connected with the association.

"Straw stood up stiff and strong, some of it being over five feet high, the heads were long, while the color of the growing grain was superb."

There have been various statements made in regard to the average yield of wheat per acre in the Canadian North West, by some it has been placed at 40, others at 30 and some at 25 bushels.

We have, however, received returns from over one hundred farmers in the country for the last four years, and this will give our readers a very good insight of what the general yield is. Where the average is below 20 bushels, it must be remembered that the cause is generally newly broken land, or some misfortune to the crop.

The following returns are given by some of the most respectable farmers in the North-West, and may, therefore, be looked upon as reliable :

TESTIMONY OF FARMERS AS TO THE YIELD OF WHEAT PER ACRE.

1877. 1878. 1879. 1880.

per acre. per acre. per acre. per acre.

Average yield according to

the above..... 26½ 26½ 26½ 29½

Taking 26 bushels of wheat to the acre, as the average yield of the Canadian North-West, which experience tells us is a low calculation, we will now compare it with that of some of the American States :

Canadian North-West.....	26	Bush.	per	acre.
Minnesota.....	17	"	"	"
Massachusetts.....	16	"	"	"
Pennsylvania.....	15	"	"	"
Wisconsin.....	13	"	"	"
Iowa.....	10	"	"	"
Ohio.....	10	"	"	"
Illinois.....	8	"	"	"

These facts show the great superiority of the Canadian North-West as a wheat growing country. The weight of the wheat grown is also something remarkable, especially when compared with that of other countries. Taking the heaviest samples of each country we find :

Canadian North-West.....	66	lbs.	per	bush.
Minnesota.....	65	"	"	"
Ohio.....	60	"	"	"
Pennsylvania.....	60	"	"	"
Illinois.....	58	"	"	"

The oats grown in the Canadian North-West are very superior in quality, being plump and heavy, and the yield per acre is simply enormous, when compared with other countries. As high as seventy bushels per acre is no uncommon thing, as will be seen by the following returns, and in some cases even one hundred bushels have been realized.

For newly broken ground, we are of the opinion that oats will be found the most remunerative crop, and there is always a ready home market for all that can be raised.

TESTIMONY OF SETTLERS ON YIELD OF OATS PER ACRE.

1877. 1878. 1879. 1880.
per acre. per acre. per acre. per acre.

Average yield according to
the above..... 59 $\frac{1}{2}$ 59 $\frac{1}{2}$ 58 57 $\frac{1}{2}$

The comparison between the Canadian North-West and some of the American States as respects the yield of oats, is as follows:

Canadian North-West	say	average	57	bush	per	acre.
Minnesota	"	"	37	"	"	
Iowa	"	"	28	"	"	
Ohio	"	"	23	"	"	

Barley is grown very successfully as will be shown by the following table. The quality of the grain is excellent as a rule, its colour fine, and brewers pronounce it second to none for malting purposes.

Average yield according to the above..... 1877. 1878. 1879. 1880. per acre. per acre. per acre. per acre. 40½ 68 37½ 41

The following comparative statement tells its own tale

Canadian North-West say..... 40 bush per acre.
 Minnesota..... 25 " " "
 Iowa..... 22 " " "
 Wisconsin..... 20 " " "
 Ohio..... 19 " " "
 Indiana..... 19 " " "
 Illinois..... 17 " " "

We have only a few returns to show in Peas, still sufficient to indicate that good crops can be obtained.

	1877. per acre.	1878. per acre.	1879. per acre.	1880. per acre.
Average yield according to the above.....	32	34	32½	38½

There is not much Rye grown in the North-West as yet, but the experience of Mr Beckstead, as given below, proves that it can be grown to advantage.

NAME.	ADDRESS.	Yield	Yield	Yield	Yield	Average weight per bushel.
		per acre 1877.	per acre 1878.	per acre 1879.	per acre 1880.	
A. V. Beckstead...	Emerson.....	30	30	40	40	60

The Canadian North-West is peculiarly adapted to the growth of Potatoes. As will be seen by the following instances, the yield is enormous and the quality is well known to be very superior. Some specimens weighed as high as 4½ pounds each, and one peculiarity is that they are generally mealy to the very core.

The favourable climate and the rich soil of this country tend to make the potato a profitable crop even during the first season, immediately after breaking, by turning the sod over on the seed. The following evidence, however, will show how successfully this product can be raised:

Average yield according to above.....	304	308	302	318.

In roots and vegetables we produce the following evidence of what has been done by a few of our farmers:

W. H. J. Swain, of Morris,

Has produced 800 to 1000 bushels of turnips to the acre, and 60 bushels of beans have also been raised by him per acre.

- S. C. Higginson, of Oakland,**
Has produced cabbages weighing $17\frac{1}{2}$ lbs. each.
- Allan Bell, of Portage-La-Prairie,**
Has had cabbages 45 inches around, and turnips weighing 25 pounds each.
- Thos. B. Patterson,**
Has realized 40 tons of turnips to the acre, some of them weighing as much as 20 pounds each.
- Robt. E. Mitchell, of Cook's Creek,**
Raised a squash of six weeks' growth, measuring } 5 feet
6 inches around the centre.
- Wm. Moss, of High Bluff,**
Has produced carrots weighing 11 pounds each, and turnips measuring 36 inches in circumference.
- James Airth, of Stonewall,**
States that the common weight of turnips is twelve pounds each, and some of them have gone as high as thirty-two and a half pounds.
- Isaac Casson, of Green Ridge,**
Has raised 270 bushels of onions to the acre.
- John Geddes, of Kildonan,**
States that he has raised 300 bushels of carrots and 800 bushels of turnips per acre.
- John Kelly, of Morris,**
Has produced from 800 to 1000 bushels of turnips to the acre.
- Joshua Appleyard, of Stonewall,**
Also states his crop of turnips to have been 1000 bushels per acre, the common weight being 12 lbs. each.
- Ed. Scott, of Portage-La-Prairie,**
Raised 400 bushels of turnips from half an acre of land.
- W. H. J. Swain, of Morris,**
Had citrons weighing 18 pounds each.
- Francis Ogletree, of Portage-La-Prairie,**
Produced onions measuring $4\frac{1}{4}$ inches through the centre.
- A. V. Beckstead, of Emerson,**
Gives his experience as follows:—

Mangel Wurzel weighing 27 lbs each.

Beet " 23 "

Cabbages " 49 "

Onions each 1½ pounds in weight.

W. B. Hall, of Headingly,

Has raised carrots 3 inches in diameter, beets weighing 20 pounds each, and gives the weight of his turnips generally at 12 pounds each.

Philip McKay, of Portage-La-Prairie,

Took 200 bushels of turnips from one-quarter of an acre of land, some of them weighing 25 pounds each. He has produced carrots 4 inches in diameter and 14 inches long, has had cabbages measuring 26 inches in diameter solid head and four feet with the leaves on. His onions have measured 16 inches in circumference, and cauliflower heads 19 inches in diameter.

Jas. Lawrie and Bro., of Morris,

Have produced turnips 30 inches in circumference, onions 14 inches and melons 30 inches. He had one squash which measured about the same size as an ordinary flour barrel.

James Owens, of Point Du Chêne,

Had turnips 30 pounds each, onions 14 inches around, and cucumbers 18 inches long.

Neil Henderson, of Cook's Creek,

Has raised 1,000 bushels of turnips to the acre, carrots 5 inches in diameter and 18 inches long, while his onions have frequently measured 5 inches through.

Jas. Bedford, of Emerson,

Has raised 1,000 bushels of turnips to the acre.

It must be remembered, however, that none of the farmers mentioned above used any special cultivation to produce the results we have described, and out of nearly 200 reports which we have received from settlers concerning the growth of roots and vegetables in the Canadian North-West, not one has been unfavourable.

As yet the culture of fruit and apples in the North-West is in its infancy, but as will be seen hereafter by the statements of a number of farmers, there is no doubt that certain varieties can be grown successfully. An abundance however

of the following wild fruits exists, such as strawberries, raspberries, whortleberries, cranberries, plums, black and red currants, blueberries and grapes, so that there is no scarcity in this respect for the settler, and he will find the flavour of the wild fruit of the North-West most delicious. In fact, strangers, when tasting our strawberries and raspberries for the first time invariably pronounce them superior to the cultivated varieties. Doubts have existed as to whether apples can be grown, with any great degree of success in the North-West, but lately the attention of nursery-men in the East has been attracted to this country and several successful efforts have been made to introduce a variety of plants into the country. There is no reason why apple trees should not be raised in this country if care is taken at the outset to protect the plants in the spring, and it has been suggested by a writer that all young apple trees should have a wrapping of straw, so as to protect them in the spring from alternate thawing and freezing, a great detriment to their growth. It has been proved that apple trees do thrive in this country, and there is ground to believe that the celebrated "Fameuse" of Quebec could be produced. In Minnesota, not many years ago, it was contended that apple trees would not grow there, and yet to-day the Minnesota apple is a notable product of that state. If Minnesota can produce apples, there is no reason why the Canadian North-West should not do so equally as well. We however refer our readers to the experience of several of our farmers in this respect as shown by their statements which appear in a later portion of this work. The cultivation of Flax and Hemp during the early days of the Red River settlement was carried on successfully by the old settlers, but at the same time the want of a market and the means to manufacture the raw material interfered with its profitable production then.

Lately several of our farmers have paid some attention to the production of these important crops, and the experience of those who have tried them is certainly of a very satisfactory character. There is not the least doubt that as the climate of the North-West is peculiarly favourable to the production of a good quality of both flax and hemp, they will play an important part in the future resources of the country. There is, however, another product to which we

would draw attention, and that is the sugar beet, a root for the cultivation of which the North-West is peculiarly adapted. A good deal of attention is already being paid in different parts of Canada to the cultivation of the sugar-beet and its manufacture into sugar, but there is no part of the Dominion where it can be raised in such paying quantities as in the North-West. The rich soil, the ease with which they can be cultivated, all tend to make the production of beet crops profitable, more especially when as in the case of the sugar beet, large quantities can be used for manufacturing purposes.

A calculation is given setting forth the estimated results of the manufacture of a thousand tons of sugar beets in the States of New York and Pennsylvania, as made by an American gentleman who has given long consideration to the subject. It is as follows :—

EXPENSES.

1,000 tons of beets at \$4 per ton.....	\$ 4,000 00
Estimated cost of manufacturing at \$3 per ton....	5,000 00
	<hr/>
Total.....	<u>\$9,000 00</u>

RESULTS.

200 tons of pulp at \$2.00 per ton.....	\$ 400 00
30 tons of syrup at \$20.00 per ton.....	600 00
60 tons of sugar at \$250.00 per ton.....	15,000 00
	<hr/>
Total Results.....	\$16,000 00
From which deduct expenses.....	9,000 00
	<hr/>
Leaves a profit of.....	\$ 7,000 00

Beet root sugar manufacturing will likely at no distant day be a question of much interest in the North-West, for without doubt the soil will produce very large crops of sugar beets.

We have endeavoured thus to show by practical proof the advantages of the North-West to the agriculturist. To

the sportsmen we may say that it presents many inducements, as the prairies, ponds and lakes abound with wild fowl, such as the prairie chickens, pheasants, partridges, pigeons, ducks, swans, cranes, geese, snipe, plover, &c.; and amongst the larger game we may enumerate, moose, deer, antelopes, bears, wolves, foxes and rabbits, &c., and in the far West the buffalo. In the rivers and lakes there is an abundance of fish of the following kinds: white fish, (regarded by many as equal to that caught in Lake Superior), pickerel, pike, catfish, sturgeon, rock bass and black bass, perch, suckers, sunfish, gold eye, carp, and in some parts, trout and maskinongé.

The dry air of the North-West, the clear skies and the rich flora of the prairies and woods indicate that bee-culture can be carried on successfully. Several of our farmers have already paid attention to the production of honey, and in the woods, swarms of wild bees can be found.

While agriculture will undoubtedly be the principal industry in the Canadian North-West for generations to come, that of stock raising will be next in importance.

Its vast prairies covered with rich grasses, the sheltering groves and forests here and there, the abundant supply of good water to be found almost anywhere, and the favourable climate all proclaim this fine country as certain to become one of the best for grazing in the world. We have already shown that the wild grasses are considered by many as superior even to the cultivated species.

The winters, owing to the atmosphere being dry, are most favourable, and in addition to this the great area of pasture available for the herding of immense herds, would indicate that stock raising will ere long be followed on a large scale in the North-West. The same advantages in connection with the raising of the larger class of stock apply also to sheep, and the experience of many of our old settlers shows conclusively that wool growing, in the Canadian North-West is a branch of industry which will prove of great profit to every farmer locating in it.

The Home market for meat will continue to grow in proportion to the rapid development caused by railway construction, and as new towns and cities spring into

existence the demand on the stock-raiser will increase in proportion. The prosecution of railways and public works will also create a great demand for meat and agricultural produce to feed the large numbers of men employed, but besides all this the trade in cattle, which is now being carried on so extensively between America and Great Britain, and which is likely to increase every year, will open up a large field for enterprise in this country. Messrs. Pell & Read who visited America in connection with the meat-trade question, would have done well had they visited the great plains of the Canadian North-West, for had they done so they would have been impressed with the importance of this country in that respect. The Canadian Pacific Railway, connecting the fertile prairies of the west with the Atlantic, is destined to be the avenue by which a very large proportion of the meat consumed in Europe will be brought from the pasture fields of the North-West for that purpose. The quality of the meat moreover is of a superior quality, as far as present experience shows, to any raised in more southern latitudes, and this is caused principally by the superior fattening qualities of the wild grasses on the prairies of the North-West.

We have already advised intending settlers to avoid burdening themselves with an unnecessary amount of luggage. We would, however, recommend them to bring with them as much of their clothing as they conveniently can, as it packs in small compass, and saves outlay in the new land.

Be sure, however, to bring your money, or that portion of it, which you will not require to use on the way, in the form of a draft or bill-of-exchange. If you lose the draft or bill, you can always have it replaced. If you bring gold, silver or bank notes, and lose them, you will probably never recover your loss. There are four large banking institutions in Winnipeg, any one of which will be able to cash your draft or bill on your arrival. As soon as you reach Winnipeg, by placing yourself in the hands of the Government land guides, you will be able to make your purchases at reasonable prices, and will be secure from any imposition in that respect.

The following figures may prove of interest to intending settlers as showing what can be done in the Canadian

North-West. Farms can be purchased at almost any price from one dollar per acre upwards, and one hundred and sixty acres can be secured as a homestead free, on payment of ten dollars entry fee. We will, however, base our calculations on the Government price for pre-emptions of one dollar, and we will illustrate a term of five years' occupancy :

FIRST YEAR.

Expenditure of settler with family of say five, for provisions, &c., one year.....	\$ 250 00
One yoke of oxen.....	125 00
One cow.....	35 00
Breaking plough and harrow.....	35 00
Waggon.....	80 00
Implements, &c.....	25 00
Cook stove, &c., complete.....	25 00
Furniture.....	25 00
Tent.....	10 00
Sundries, say.....	50 00
	<hr/>

Outlay for first year.....\$ 660 00

At the end of the year he will have a comfortable log house, barn, &c., cattle, implements, and say twenty acres of land broken, ready for seed.

SECOND YEAR.

Will realize from 20 acres—600 bushels of grain at 60c., which is a low figure.....	\$360 00
Expenditure, (say.....	300 00
	<hr/>

To the good, besides living... \$ 60 00

and he will have an additional 20 acres of land broken.

THIRD YEAR.

40 acres will give him 1,200 bushels grain @ 60c.	\$ 720 00
Will pay for land.....	\$ 160 00
Expenditure, including additional stock and implements.....	500 00
	<hr/>
	660 00

To the good, besides living..... \$ 60 00

And he will with his increased stock and other facilities be able to break at least 30 acres.

FOURTH YEAR.

70 acres will give him 2,700 bushels grain @ 60c.	\$1,260 00
Less expenditure for further stock, implements and other necessaries.....	600 00
	<hr/>
To the good, besides living.....	\$660 00

And another 30 acres broken.

FIFTH YEAR.

100 acres will give him 3,000 bushels grain @ 60c.	\$1,800 00
Less same expenditure as previous year.....	600 00
	<hr/>
To the good, besides living.....	\$1,200 00

At the end of the fifth year he will stand as follows :—

Cash or its equivalent on hand.....	\$ 1,980 00
160 acres of land increased in value to at least \$5 per acre.....	800 00
House and barn, low appraisal.....	250 00
Stock, including cattle and horses.....	600 00
Machinery and farm implements, 50 per cent of cost, say.....	200 00
Furniture, &c.....	150 00
	<hr/>
	\$ 3,980 00
Less—outlay first year	660 00
	<hr/>
To credit of farm, besides living.....	\$ 3,320 00

In the calculations we have endeavoured to be as near the truth as possible. We have increased the number of acres broken the three years, because with an increase of stock and other facilities for breaking, the settler can break more. This has been the experience of farmers here. Then we have placed the expenditure high, while the price quoted for the grain is much lower than is paid at present by buyers. We show a profit of over \$3,000 after paying

for everything in five years, but we can cite numerous cases where settlers have cleared more than \$4,000 and \$5,000 in the same time, where in many instances they had not \$100 to commence with. The whole success of the new settler depends upon his economical management, perseverance and untiring industry. If he pays more than \$1 per acre for his land he may be sure it will rise correspondingly in value as the country progresses. The intending settler, however, must never forget that he can always obtain 160 acres of land free from the Government in addition to that which he purchases.

There is one point we desire to impress upon intending settlers, and that is the large yield of grain in the Canadian North-West. From this time no immigrant need settle any great distance from railway communication unless he desires to do so, so that he will always be within easy reach of a steady market. We may safely place the average yield per acre at 30 bushels of wheat after the second year, and can also safely say that grain will fetch as high prices as in Minnesota or Dakota. In the Canadian North-West, however, allowing prices to be equal, how does the settler in the Canadian North-West stand as compared with those south of the boundary line.

Average yield per acre in the Canadian North-West, 30 bushels, say at 80c	\$ 24 00
Average yield in Minnesota, 17 bushels at say 80c.	13 60

In favour of Canadian settlers.....\$ 10 40

This is a considerable difference which is borne out by facts, and when it is considered that the cost of living is less than in the United States, the difference becomes still greater. It simply resolves itself into this, that settlers in the Canadian North-West can afford to sell their grain owing to their large returns at fully 50 per cent. lower than those in the United States and still be as well off, or they can (prices being equal) realize the same percentage more than their neighbours south of the boundary line. The opening of the Canadian Pacific Railway to Lake Superior, next year, will give the North-West equal shipping facilities with the Western States. What more can we say

for the information of those who are looking for new homes to guidethem to this "Land of Promise," but one more word in conclusion ; The Canadian Pacific Railway is to be pushed forward at a very rapid rate during the next few years, and will give employment to thousands of men.

A very large amount of Grain and other supplies will be required to carry on the extensive public works of the Canadian North-West, and farmers will be kept busy in order to supply this home demand for years to come.

In addition to this immigrants will be able to find plenty of work for themselves and their teams, during their spare time, so that the sooner settlers make up their minds to come here the better it will be for themselves. The next ten years in the Canadian North-West will assuredly be a time of great progress and prosperity.

Now, therefore, is the time for you to make up your mind to come here. In conclusion, we submit the following evidences, of actual settlers, to furnish information on any points which we may have omitted in the previous pages :

STATEMENTS OF ACTUAL SETTLERS.

"I am a native of Western Ontario and have been farming fifteen years. This is my fifth year here and I much prefer this country to anywhere else.

"JAMES STEWART,
"Meadow Lea."

"The usual time of sowing wheat, oats, and peas is from the beginning of April to the middle of May, barley from middle of May till the beginning of June. The weather during seeding and harvest is generally dry. The usual time to harvest is from the middle of August till September.

Jno. MCKINNON,
"Three Creeks,
"Portage-La-Prairie."

"In my opinion the month of September is the most favourable for settlers to come here, and in no case should they come earlier than May. Let them bring good medium sized close made horses with them. Have been here eight years and know the requirements pretty well.

"NELSON BROWN,
"High Bluff."

"I would just say that there are no obnoxious weeds here. When a field is ready to be reaped, as a rule you cannot see anything only grain. Flax grows well in this country. I think it can be grown with profit. I have seen it grow as tall as I saw it in Ireland.

"Vegetables of all kinds grow splendidly without much labor and with no manure.

"MATHEW OWENS, J. P.,
"High Bluff."

"Land ought to be ploughed in the fall and sown as early as possible in the spring. Seeding is from 10th to 15th of April, and harvest from 10th of August to 15th of September. The Mennonites here grow all their tobacco, and it stands about four feet high.

"JOHN W. CARLTON,
"Clear Springs."

"The month of May is generally fair; June wet, August and September fair weather. All kinds of roots and vegetables should be sown as early as the ground is in fit condition, and will be fit for gathering about middle of October. Brush ground broken in spring, will yield a good crop of oats or potatoes the same season.

"JAMES SINCLAIR,
"Greenwood."

"I have been in the country six years and have found the driest summer to give the best crops, even though there was no rain except an odd thunder shower. New settlers should come in May and break their land till July, then after cutting and saving plenty of hay for all the cattle, they can prepare their buildings for the winter.

"HENRY WEST,
"Clear Springs."

"For stock-raising purposes the district is unequalled, as the supply of hay is unlimited, and a man can raise as much stock as he is able to cut fodder for.

"DAVID CHALMERS,
"St. Anne, Point DuChêne."

"The potatoes raised here are the finest I ever saw. I have not been in the country but one year, but I am very well pleased with it. All kinds of roots grow better and larger here than in Ontario.

"WM. START,
"Assiniboine."

"I started with one cow, one horse and a plough 18 years ago, and to-day my assessment was for \$13,000. I did not fail one crop yet in 18 years of my farming here, and I must say this year's crop is better than I have had before. You can depend upon me

"BENJAMIN BRUCE,
"Poplar Point."

"Rye does well in this country. I have been in Scotland, England and the United States and in Ontario, but this country beats them all for large potatoes.

"ROBERT BELL,
"Burnside."

"I would suggest that intending settlers in the North-West who come to settle down on prairie land should break up an acre or two around where they build, on the West, North and East, and plant with maple seeds. Plant in rows four feet apart, the seeds to be planted one foot apart; they afterwards can be thinned out and transplanted. I have them 12 feet high, from the seed planted four years ago, and they will form a good shelter. I find, after a residence of nine years, that this North-West country is well calculated for raising the different kinds of grain sown by farmers. Market prices are very good. Wheat 85c. to \$1.15, oats 50c. to 60c., and barley 60 cents.

"JAMES STEWART,
"High Bluff."

"Farmers should have Canadian horses, and get oxen and cows, and purchase young cattle. By so doing they will double their money every year. I am in the business and know by experience.

"JAMES McEWEN,
"Meadow Lea."

"I can tell from experience that all root crops grow to a very large size, better than ever I have seen in other places. Turnips, carrots, mangel-wurzel, beets, onions, potatoes, cabbage, tomatoes, melons, cucumbers, citrons, corn, beans. All these grow splendidly here.

"The time to sow them is from 1st to 15th May, and to gather them from 1st to 15th October.

"DUNCAN McDUGALL,
"Meadow Lea."

"I would recommend intending settlers to try stock raising, more especially sheep.

"SAMUEL J. PARSONS,
"Springfield."

"I have seen fair crops raised by breaking early in the spring and sowing oats; but by breaking about 2 inches deep in June, and turning back in fall, getting up all the sub-soil you can, is the best way for the following spring crops.

"EDWIN BURNELL,
"Nelsonville."

"I would advise immigrants to fetch all the cash they can. They can suit themselves better by buying here about as cheap, and they will only get just what they need.

"GEORGE FERRIS,
"St. Agathe."

"Timothy, white Dutch, and Alsike clover grow well here. I have just cut a crop of seven acres that will average two and a half tons to the acre, and have thirty acres seeded down for next year.

"JAMES BEDFORD,
"Emerson."

"Spring weather, at time of seeding, is generally bright, with some warm showers of rain. In harvesting we rarely have rain; usually clear fine days.

"H. C. GRAHAM,
"Stonewall."

"I consider this country the place to come, provided any man wants to make a home and knows something of farming, that has about \$400 or \$500 to begin with.

"JNO. GEORGE,
"Nelsonville."

"Strawberries, currants, gooseberries, raspberries and in fact all small fruits bear in the greatest abundance and give every promise of being very profitable.

"W. A. FARMER,
"Headingly."

"Hops will do well cultivated; I have planted wild hops out of the bush into my garden along the fence and trained on poles, bearing as full and fine and as large as any I ever saw at Yalding and Staplehurst in Kent, England.

"LOUIS DIENSING,
"Emerson."

"The longer a farmer lives here the better he likes it.

"JULIUS F. GALBRAITH,
"Nelsonville."

"Now that we have the locomotive, we shall be able to compare with anything in the Dominion, and take the lead with roots, and I defy the United States for samples of grain of all kinds. They have only the start of us in fruits, but we are progressing well in that respect. If folks would work four months in the year they might be independent in this country. I came here in 1873 with only thirty dollars in my pocket, ten of which I paid for my homestead of 160 acres. It is going on two years since I began to cultivate the place I am now living on and I have 74 acres under cultivation, with a suitable house and other fixtures, and I could get \$3,000 for one of my quarter sections. I can be found in High Bluff any time with \$50 to back my words.

"JNO. A. LEE,
"High Bluff."

"Agricultural implements are reasonable here and can be bought cheaper than by individual importation.

"JOHN FRASER,
"Kildonan."

"My claim is situated on the banks of the Assiniboine and we therefore enjoy direct steamboat communication with Winnipeg. The land is not flat but rolling prairie, no need of drainage, but still it is well watered by running springs. All crops look well. I planted potatoes on 1st June, and in eight weeks we had our first meal of them. I expect about 300 bushels to the acre. The climate of the country is all that can be desired. Any man who wishes to furnish a home for himself should try and locate in this country, and if he be a man of any energy he will not be long in making a comfortable and profitable home for himself and family. It was a happy day that I first landed on this soil

"GEO. C. HALL,
"Portage-La-Prairie."

"There is no person need be afraid of this country for growing. There never was a better country under the Sun for either Hay or Grain.

"A. V. BECKSTEAD,
"Emerson."

"Flax does extra well in this country.

"GEO. A. TUCKER,
"Portage-La-Prairie."

"Plough as much land as you can in the fall, and sow as soon as the frost is out of the ground, enough for the Harrow to cover the seed. As far as my experience goes the ordinary vegetables, such as turnips, carrots, cabbage, onions, beets, peas, beans, &c., grow well here. I have raised as good vegetables since I have been here, with comparatively but little cultivation, as I have seen raised in my native place, County Kent, England, where market gardening is carried on to perfection.

"THOS. HENRY BROWN,
"Poplar Point."

"Native Hops here grow as large as any I ever saw cultivated.

"FRANCIS OGLETREE,
"Portage-La-Prairie."

"Hemp and Flax I have tried, and it grows excellently. Tame grasses of all kinds do well especially Timothy. My advice to all is to come to this country, where they can raise the finest samples of grain of all kinds, that ever was raised in any country.

"ANDREW J. HINKER,
"Greenridge."

"Spring is the best time to come to this country as the settler can then get a crop of oats put in on breaking, which will yield him 25 bushels to the acre, and potatoes grow well ploughed under the sod. He can raise enough to keep him for the season. That way I raised 50 bushels from a quarter acre.

"ARTHUR D. CADENHEAD,
"Scratching River."

"Gentlemen,—The average yield of my grain last year, was: oats 65 bushels; wheat 30 bushels; potatoes 100 bushels; although some of my neighbours had over six hundred; turnips, I should say about 750 bushels, I would much rather take my chances here than to farm with the spade in any of the old countries. If you doubt my words please come and see for yourself.

"JOHN BRYDON,
"Morris."

"Settlers should come without encumbering themselves with implements, &c., &c., as everything can be had at a cheap figure. Oxen we deem advisable to begin farming with.

"We expect to have a very plentiful garden supply this year though we sowed in May and June, April being the usual time, yet all is coming on well. Cucumbers growing in the open air, we have had already. Melons and tomatoes we expect to have in any quantity, the end of this month or beginning of next. Wild strawberries and raspberries, and many other kinds of fruit are to be had in abundance.

"The soil we find rich and capable of growing anything that we have yet tried, and that without any trouble.

"We plough the garden, doing any real fine work with the spade.

"ANDREW DAWSON,
"Headingly."

Intending settlers should not bring the long handle Canadian Plough, as it does not work well here, nor should they bring heavy iron axle waggons. The best thing to bring is some improved stock cattle, sheep and pigs.

"CHAS. LOGAN,
"Portage-La-Prairie.

"The weather in seeding as a rule is all that could be desired. Roots are gathered the first week in October, when the weather is all that could be desired for the ingathering of the fruits of the soil. Prices of grain are good and farmers are doing well.

"PETER FERGUSON,
"Gladstone."

"I would recommend settlers to get oxen for breaking the soil. Horses cost much more to keep as they require grain. Oxen can be worked on the grass. I am more in the stock line, and I can say the country is well adapted for stock-raising. The pasturage could not be better. Abundance of hay all for the cutting, and with a little care cattle winter well and come through in good condition.

"D. F. KNIGHT,
"Ridgeville."

"Would advise new settlers to buy oxen instead of horses, as they can be fed cheaper and will do more work if well treated and fed on grass and good hay.

"JAMES D. STEWART,
"Cook's Creek."

"I would advise any young man with good heart and \$300 to come to this country, for in five years he can be independent.

"JOSHUA APPELYARD,
"Stonewall."

"I like the country well and would not change.

"JNO. KELLY,
"Morris."

"I have found the cold in winter no worse to stand here than in Ontario, because it is dry.

"WM. GREEN,
"St. Agathe."

"The weather in April and May is usually dry and clear. A good deal of rain in June followed by very dry fine harvest, which usually begins in the second week in August. Have grown buckwheat successfully. Have seen good crops of flax among the Mennonite settlers. Timothy and clover also do well. Planted 20 apple-trees two years ago which are growing very well.

"ARTHUR J. MOORE,
"Nelsonville."

"I cultivate wheat, seldom seeding with other grains. This season I commenced seeding on 10th April, season being backward did not finish seeding till 5th May, and had then 80 acres under crop. Commenced harvest on 9th August, expect an average of 30 bushels, and a better sample than any since 1873. Have broken up 100 acres more this season. A prompt attention to fall ploughing is absolutely necessary for success. I am so well satisfied with my experience of farming here that I intend opening up two other farms the coming season.

"F. T. BRADLEY,
"Emerson."

"Bring your energy and capital with you; leave your prejudice behind you. Do not bring too much baggage. Buy your implements after you arrive, they are quite as cheap and better suited to the country. Be sure to locate a dry farm. Break your land in the rainy season (June), when it ploughs easy and rots well. Sow wheat, oats and potatoes. Barley don't do well on new land. Take advice from old settlers.

"ISAAC CASSON,
"Greenridge."

"I really think one cannot get a better farming country than this. I tell you, Sir, I have cropped 5 acres of land on my farm for six years successively without a rest, and this year a better crop I never saw. That is soil for you. I think immigrants will be satisfied with this country when they come here. You can't say too much in praise of it. I wish them all good luck that come this way. All I say is come brother farmers, come and help us plough up this vast prairie country. You can raise almost anything in this country.

"GEORGE TAYLOR,
"Poplar Point,
"Long Lake."

"I have run a threshing machine here for the last five or six years, and the average of wheat is from 25 to 30 bushels, oats 40 to 60 bushels, and barley 30 to 50.

"JABEZ GEO. BENT,
"Cook's Creek."

"I have over 1,000 apple trees doing very well and also excellent black currants.

"JAMES ARMSON,
"High Bluff."

"I am not good with the pen, so excuse me, but tell them to buy oxen and go at it with a will.

"ROBERT BLACK,
"Bird's Hill."

"Having only had two years' experience here, I cannot do justice to the country as I would like to do, for I believe it to be a good country. I was nine years in Ontario, and in Ireland up to manhood, and I prefer this country before either of them, taking the average of everything. The three crops I have seen enables me to believe that any man that works in this country will like the place, for he will have something for his trouble.

"EDWARD J. JOHNSTON,
"Springfield."

"Those who have no farms of their own come here and farm. Bring no horses; oxen are the things for a new settler.

"JAMES AIRTH,
"Stonewall."

"The weather both in spring time and harvest is very suitable for both operations. As a general rule the rainy season generally commences after seeding, in June, and settles again before harvest, and continues dry through the fall and until snow sets in the latter end of November, allowing good time for fall ploughing and threshing out grain.

"I would advise settlers in a general way to start with oxen, as they are less expensive in cost and keep the first year at a less risk than horses. I would advise them not to bring any implements with them, but procure the best of all classes here, as they are especially adapted for this country."

"JNO. FERGUSON,
"High Bluff."

"Flax and hemp have been grown successfully here, and manufactured by hand, many years ago, both by myself and several other old settlers. I have seen stalks of hemp grow twelve feet high.

"JOHN SUTHERLAND, Senator,
"Kildonan."

"Wild hops grow to a larger size than I ever saw in any hop field in Ontario.
"S. G. HIGGINSON,
"Oakland."

"Any one who wants land this is the place.
"ARCH. GILLESPIE,
"Greenwood."

"Roots and vegetables can be grown here as well or even better than in
England, as that is our native place we should be able to judge.

"WILLIAM HAYWOOD, JAMES SWAIN,
"Morris."

"A farmer cannot make a mistake by settling here.
"NEIL McLEOD,
"Victoria."

"I never knew crops to fail, only when destroyed by Grasshoppers, and that
was only twice that I know of during my lifetime,—now 50 years. I never took
any notice of the size of our vegetables until strangers began coming into the
country, who used to admire the growth of crops of all kinds. Then I began to
think our country could hold its own with any country—yes, beat them too. If
our soil here was worked as folks tell me land is worked in other places the
crop would grow that rank that it never would mature to perfection.

"ROBERT SUTHERLAND,
"Portage-La-Prairie."

"I am well satisfied with climate, farming facilities, &c., and consider them
far ahead of where I came from.

"JAMES MATHEWSON,
"Emerson."

"I would sooner live here, as I think I can do better than I could elsewhere.
"ANDREW NELSON,
"Stone wall."

"I consider this country the garden of the Dominion, and by all appearance
the granary not only of the Dominion but of Great Britain. I have grown flax
here for several years; it grows equal to any I ever saw. I have grown timothy
for eight years and have got from two to three tons per acre.

"THOS. DALZELL,
"High Bluff."

"I have been in this country nine years and I would not return to Ontario
or any part of Canada to make a living. I have prospered better here with less
manual labor or trouble than I could possibly do elsewhere. The soil is good
the climate is excellent, and everything is in a prosperous condition.

"JAMES F. VIDAL,
"Headingly."

"Any man with a family of boys as I have got, that intends living by farm-
ing and raising his boys to farm, is only fooling away his time in other places
when he can average a hundred per cent more each year with his labor here as
I have done. I have farmed in Europe, State of New York and Ontario, and
I can say this safely.

"THOS. H. ELLISON,
"Scratching River."

"I would not advise any man coming out here to farm to bring any more
luggage with him than he can actually help. I have sometimes weighed roots
here and found them to surpass any I ever grew in Canada. I do not think
there is any use telling the immigrants the weights as they will hardly believe
it. It is enough for them to know that this country can produce more to the
acre with less cultivation than any part of Canada.

"GEO. TINSBURY,
"High Bluff."

"Let them come—this is the best country I ever struck for a man with a few thousand dollars to go into stock. I only raise oats for my horses and have some eighty head of cattle, so cannot say much about crops. I will have 60 to 70 bushels of oats to the acre this season.

"JAMES FULLERTON,
"Cook's Creek."

"From what I have seen in other countries this is as good a place as any man can come to. For my part, I have done better here than I could ever do in any other country. I raised wheat here, and there have been men from California and other places, looking at it, and they said they never saw anything like it before. One year I raised 35 bushels to the acre of Black Sea wheat, and I have raised wheat which stood 6½ feet high, and not one straw of it lay down. I would be glad if half of the people of Ireland were here,—and they would then be in the best part of the world. Every one who comes here can do well if it is not their own fault.

"JAMES OWENS,
"St. Anne, Pt.-Du-Chêne."

"Good advantages for settlers in this country; plenty of hay and pasturage. Can raise any quantity of stock without interfering with the grain crop. Good water and plenty of wood.

"JOHN HALL,
"St. Anne, Pt.-Du-Chêne."

"We think this country cannot be beat for farming, and farmers can raise all the stock they want and cost them nothing, as they can cut all the hay on the prairie they want for winter feed, and their cattle will grow fat on it if well watered and cared for.

"JAMES LAWRIE & Bro.,
"Morris."

"Any man with \$500, willing to work, can soon be independent here.

"ALEX. ADAMS,
"Clear Springs."

"I had twenty-eight acres in crop last year, and had eleven hundred bushels of grain of which I sold four hundred and fifty dollars' worth, besides having feed for my team and bread for my family

"JAMES DAVIDSON,
"Ing. Bluff."

We have not space to give all the evidence from farmers which we have received in favour of the country. We have given the names and addresses however of those who are willing to bear testimony, and it not only speaks well for the country but also for those farmers who can thus come forward and give evidence that they have prospered in the new land.

Wherever you go throughout this land you will find the settlers industrious, prosperous, and contented, enjoying the advantages of church worship, schools, and Post Office facilities, thanks to the energy of the authorities for extending the benefits of civilization as fast as new settlements are formed.

At present there is a good home market, and this is likely to continue for some time, while immigration goes on and public works are proceeded with, thus creating a large demand for produce.

In addition to this, however, the rapid construction of railways will give immediate facilities, so that between a home and foreign demand the farmers of the Canadian North-West can look forward to years of prosperity, having as they will, *a fertile soil with willing hands to work it.*

GUIDE FOR INTENDING EMIGRANTS.

The following advantages are offered by the Dominion government to those who desire to settle in the Canadian North-West.

An officer of the Government, at Liverpool, will see the emigrants on board the ocean steamers in conditions to ensure their comfort and safety during the passage to America. He will render them any advice and assistance in his power.

The name and address of this officer is

JOHN DYKE,
15, Water Street,
Liverpool.

This officer may be written to for any desired information respecting removal of Canada.

Intending settlers in the Canadian North-West will be met on their arrival, either at Quebec or Halifax, by a regularly authorized officer of the Dominion Government, who will at once take them in charge, have their luggage properly looked after, and will see them safely on board the railway train for the West.

Settlers' effects, in use, will be passed free through the Custom House, and any necessary bonding arrangements will be made, which will thus prevent any delay, inconvenience or loss occurring. Each passenger, before his departure from the port in Great Britain, should be provided with address cards as follow :—

Mr.....
of.....England,
passenger to Winnipeg, Manitoba, Canada.
.....IN BOND.....

And he should see that one is pasted on each of his packages of luggage.

Immediately on the arrival of the settlers in the Canadian North-West, the Dominion Government agents will see them properly accommodated, will direct them in the purchase of necessary articles, and will give them every information to assist them in choosing a good locality to settle in.

Under this system, intending settlers need have no apprehension in trusting themselves to the care of the Canadian Government, or of selecting the Canadian North-west as the country in which to take up homes.

For rates of passage it is better to apply to the agents of the steamships, or the nearest Dominion Agent, who will give all information and directions.

The following are the officers of the Dominion of Canada in Great Britain :—

- LONDON . . SIR CHARLES TUPPER, K.C.M.G., &c., High Commissioner for the Dominion, 10, Victoria Chambers, London, S. W.
 MR. J. COLMER, Secretary, High Commissioner's Office, (address as above.)
- LIVERPOOL . MR. JOHN DYKE, 15, Water Street.
- GLASGOW . MR. THOMAS GRAHAME, 40, St. Enoch Square.
- BELFAST . . MR. CHARLES FOY, 29, Victoria Place.
- DUBLIN . . . MR. THOMAS CONNOLLY, Northumberland House.

The following are the agents of the Canadian Government in Canada .—

- OTTAWA . . . MR. W. J. WILLS, Wellington Street, Ottawa, Ontario.
- TORONTO . . . MR. J. A. DONALDSON, Strachan Avenue, Toronto, Ontario.
- MONTREAL . MR. J. J. DALEY, Bonaventure Street, Montreal, Province of Quebec.
- KINGSTON . . MR. R. MACPHERSON, William Street, Kingston.
- HAMILTON . MR. JOHN SMITH, Great Western Railway Station, Hamilton.
- LONDON . . . MR. A. G. SMYTH, London, Ontario.
- HALIFAX . . MR. E. CLAY, Halifax, Nova Scotia.
- ST. JOHN . . MR. S. GARDNER, St. John, New Brunswick.
- QUEBEC . . . MR. L. STAFFORD, Point Levis, Quebec.
- WINNIPEG . . MR. W. C. B. GRAHAME, Winnipeg, Manitoba.
- EMERSON . MR. J. E. TETU, Emerson, Manitoba.
- BRANDON . . MR. THOS. BENNETT.

These Officers will afford the fullest advice and protection. They should be immediately applied to on arrival. All complaints should be addressed to them. They will also furnish information as to lands open for settlement in their respective Provinces and Districts, Farms for Sale, demand for employment, rates of wages, routes of travel, distances, expenses of conveyance, and will receive and forward letters and remittances for Settlers, &c., &c.

DOMINION LANDS REGULATIONS.

The following Regulations for the sale and settlement of Dominion Lands in the Province of Manitoba and the North-West Territories shall, on and after the first day of January, 1882, be substituted for the Regulations now in force, bearing date the twenty-fifth day of May last :

1. The surveyed lands in Manitoba and the North-West Territories shall, for the purpose of these Regulations, be classified as follows :

CLASS A.—Lands within twenty-four miles of the main line or any branch line of the Canadian Pacific Railway, on either side thereof.

CLASS B.—Lands within twelve miles, on either side, of any projected line of railway (other than the Canadian Pacific Railway), approved by Order-in-Council published in the *Canada Gazette*.

CLASS C.—Lands south of the main line of the Canadian Pacific Railway not included in Class A or B.

CLASS D.—Land other than those in Classes A, B, and C.

2. The even-numbered sections in all the foregoing classes are to be held exclusively for homesteads and pre-emptions.

- a. Except in Class A where they may be affected by colonization agreement, as hereinafter provided.
- b. Except where it will be necessary out of them to provide wood lots for settlements.
- c. Except in cases where the Minister of the Interior, under provisions of the Dominion Lands Acts, may deem it expedient to withdraw certain lands, and sell them at public auction or otherwise deal with them as the Governor-in-Council may direct.

3. The odd-numbered sections in Class A are reserved for the Canadian Pacific Railway Company.

4. The odd-numbered sections in Classes B and C shall be for sale at \$2.50 per acre, payable at the time of sale :

- a. Except where they have been or may be dealt with otherwise by the Governor-in-Council.
- b. Except lands affected by colonization agreements, as hereinafter provided.

5. The odd-numbered sections in Class D shall be for sale at \$2 per acre, payable at time of sale :

- a. Except where they have been or may be dealt with otherwise by the Governor-in-Council.
- b. Except lands affected by colonization agreements, as hereinafter provided.

6. Persons who, subsequent to survey, but before the issue of the Order-in-Council of 9th October, 1879, excluding odd-numbered sections from homestead entry, took possession of land in odd-numbered sections by residing on and cultivating the same, shall, if continuing so to occupy them, be permitted to obtain homestead and pre-emption entries as if they were on even-numbered sections.

PRE-EMPTIONS.

7. The prices for pre-emption lots shall be as follows :

For lands in Classes A, B, and C, \$2.50 per acre.

For lands in Class D \$2.00 per acre.

Payments shall be made in one sum at the end of three years from the date of entry, or at such earlier date as a settler may, under the provisions of the Dominion Lands Acts, obtain a patent for the homestead to which such pre-emption lot belongs.

OFFICIAL NOTICE.

13. The Government shall give notice in the *Canada Gazette* of all agreements entered into for the colonization and settlement of tracts of land under the foregoing plans, in order that the public may respect the rights of the purchasers.

TIMBER FOR SETTLERS.

14. The Minister of the Interior may direct the reservation of any odd or even numbered section having timber upon it, to provide wood for homestead settlers on sections without it, and each such settler may, where the opportunity for so doing exists, purchase a wood lot, not exceeding 20 acres, at the price of \$5 per acre in cash.

15. The Minister of the Interior may grant, under the provisions of the Dominion Lands Acts, licenses to cut timber on lands within surveyed townships. The lands covered by such licenses are thereby withdrawn from homestead and pre-emption entry and from sale.

PASTURAGE LANDS.

16. Under the authority of the Act 44 Victoria, Chap. 16, leases of tracts for grazing purposes may be granted on the following conditions :

- a. Such leases to be for a period not exceeding twenty-one years, and no single lease shall cover a greater area than 100,000 acres.
- b. In surveyed territory, the land embraced by the lease shall be described in townships and sections. In unsurveyed territory, the party to whom a lease may be promised shall, before the issue of the lease, cause a survey of the tract to be made, at his own expense, by a Dominion Lands Surveyor, under instructions from the Surveyor-General; and the plan and field notes of such survey shall be deposited on record in the Department of the Interior.
- c. The lessee shall pay an annual rental at the rate of \$10 for every 1,000 acres embraced by his lease, and shall, within three years from the granting of the lease, place on the tract one head of cattle for every ten acres of land embraced by the lease, and shall during its term maintain cattle thereon in at least that proportion.
- d. After placing the prescribed number of cattle upon the tract leased, the lessee may purchase land within his leasehold for a home farm and corral, paying therefor \$2.00 per acre in cash.
- e. Failure to fulfil any of the conditions of his lease shall subject the lessee to forfeiture thereof.

17. When two or more parties apply for a grazing lease of the same land tenders shall be invited, and the lease shall be granted to the party offering the highest premium therefor in addition to the rental. The said premium to be paid before the issue of the lease.

GENERAL PROVISIONS.

18. Payments for land may be in cash, scrip, or Police or Military Bounty Warrants.

19. These regulations shall not apply to lands valuable for town plots, or to coal or other mineral lands, or to stone or marble quarries, or to lands having water power thereon; or to sections 11 and 29 in each Township, which are School Lands, or sections 8 and 26, which belong to the Hudson's Bay Company.

By order,

LINDSAY RUSSELL,

Surveyor General.

DEPARTMENT OF THE INTERIOR,
Ottawa, 23rd December, 1881.
