PRINCESS ZARA
BY ROSS BECKMAN.

(Continued.)

"You are a beautiful woman, princess, and with that aid alone you should accomplish much."

"Yes," she admitted, as calmly as if he had referred to a ring she wore on her hand; "but I find that to be the most unpleasant character of my employment. To use such beauty as I have, and such attractions as I possess, for the winning of men to our cause, whether they be fiscal or social, is hateful to me; and I do not hesitate."

"It is not a difficult task for men to join the nihilists because of love for you? I could, myself, almost forsake it, did you ask such a sacrifice."

"Shame on you!" she stormed, at him, snatching away her hand and darting out of his reach. "Shame on you for that! Those were treacherous words, and I expected them least of all from you. You make me ashamed; ashamed for you, and for the cause I uphold. Are all men so weak, and so easily left? Does the mere sight of a woman make cowards of them all? Could a pair of flashing eyes or the touch of soft hands, change the destinies of an empire?"

"They have done so more than once, princess."

"You make me hate myself—and you. I am afraid that you took me too literally," he said, with perfect composure, for although he knew that he had been lost in admiration, indeed he had not, he told her that he might even forsake the cause if such a woman as Zara could be so easily won. "Does the mere sight of a woman make cowards of them all? Could a pair of flashing eyes or the touch of soft hands, change the destinies of an empire?"

"I must correct myself. You intimated it; you did not say it."

"What was it?"

"You suggested, in one statement you made, that you had reason to fear that the spy-system as arranged against our cause, might be augmented by the addition of skilled operators and experts from this country. I had thought that we nihilists had a monopoly of that kind, and his nobles could claim only the loyalty of their own spies. But your suggestion fills me with doubt and dread. If Alexander were to introduce imported spies among our people—"

"He interrupted the princess by laughing heartily."

"Again you took me too literally," he asserted. "Here and there, there may be one who will seek Russia and the czar for such employment, but it will be for the enrichment of that high and noble, and we would have little cause to dread such spies, since we would not be long in identifying them, and ultimately believe they would assist, rather than retard our efforts."

"Perhaps so."

"There can be no doubt of your own loyalty to our cause, princess?"

"Certainly not."

"Are the others like you? Pardon me, there can be no others like you for there could never be another so beautiful and fascinating as you are. But are there others of your acquaintance, high in position, who are working for the czar as diligently as you are?"

"They are many. Their name is legion. They parted them. He to go about his several duties among the nihilist sympathizers who could not return to Russia without including Siberia in their itinerary, and she to stride across the room and stand for a long time facing herself in the mirror, studying the features of her own beautiful face in an effort to detect there the fascinating qualities before which all men with whom she came in contact seemed so ready to succumb."

But her eyes were cold and hard as she regarded her own reflection in the glass. There was a fire in their depths which could have attracted no man, and which would have repelled all alike, for it was threatening and gloomy.

Zara de Scheweria almost hated herself at that moment. Hated the beauty which gave her such power, and which exerted the magic that made slaves of men.

The hour came when she entered a carriage again to be driven to the steamship

SKIN ERUPTIONS AND PIMPLES

Disappear Under a Treatment With Dr. Williams' Pink Pills

There can be health and vigor only when the blood is rich and red. There are thousands of young men just approaching manhood who need the rich, red blood that only Dr. Williams' Pink Pills can make. They have no energy; tire out at the least exertion; and who feel by the time they have done their day's work, as though the day was a week long. In some cases there is a further sign of danger in the pimples and disfiguring eruptions which break out on the face. These are certain signs that the blood is out of order and that a complete breakdown may result. In this emergency Dr. Williams' Pink Pills is the medicine these young men should take. These pills actually make rich, red blood. They clear the skin of pimples and eruptions and bring health, strength and energy.

Here is the experience of Adolphe Roland, of St. Jerome, Que., a young man 19 years of age, who says: "For more than a year I suffered from general weakness, and I gradually grew so weak that I was forced to abandon my work. I was a very nervous and very discouraged state when a friend from Montreal came to see me. He strongly advised me to try Dr. Williams' Pink Pills. I did so, and in a few days I began to feel better, my appetite began to improve and I resumed to have a feeling of new courage. I continued the pills till I had taken ten boxes and I am now enjoying the best health I ever had. My cure surprised many of my friends who began to regard me as incurable, and I strongly advise other young men who are weak to follow my example and give Dr. Williams' Pink Pills a fair trial. Bad blood is the cause of all common diseases like anemia, headache, neuritis, rheumatism, scabies, indigestion, all nervous troubles, general weakness and the special ailments that only women folk know. Dr. Williams' Pink Pills are the best medicine for these ailments. Colored mull is exquisitely dainty for midsummer wear when trimmed with insets of lace and embellished with hand embroideries in self color. This lovely garden party costume is distinguished by the hand embroideries which ornament skirt and bodice; one of these embroidered sections forming a yoke over the hips—a feature of the season. This lavender costume has a removable lace yoke so that the costume may be pressed into service for dancing wear. For afternoon occasions long silk gloves of lavender shade and the charmingly embroidered silk gloves of that name.

TOD BREWER MISSING AND MAY BE DROWNED

St. Mary's Young Man's Clothes Found on Raft in River—Local Government Met Yesterday.

Fredericton, N. B., June 1.—The local government met this afternoon and transacted considerable business, but so far as can be learned there was nothing of a very important nature taken up. The meeting was held in Lingley Hall tonight, the attendance being unusually large. The program opened with prayer by Rev. Dr. Rogers, of Sussex, after that Mr. Allison, president of the university, spoke of the past year as being a record on both in point of attendance and in amount of practical work accomplished. This convention, he said, would be the last held in old Lingley, as the building was to be torn down and next year it was expected that the Fawcett assembly hall would be ready.

FERRY COMMITTEE ADOPTS SOME NEW REGULATIONS

In Future Ferry Fares Must Be Placed in Boxes Provided for the Purpose—Some Discussion Over S. H. Mayes' Pile Driving Contract.

At a meeting of the ferry committee yesterday afternoon it was decided to recommend to the council that in future boxes should be provided and that passengers be required to deposit their fares in these boxes before going through the turnstiles. The gatesmen will also have boxes for the collection of fares from tansmers and the mates of the boats will keep account of the single and double teams carried on each trip.

Those present, besides the chairman, Ald. Potts, were Superintendent Glasgow, City Engineer Murdoch, the common clerk and Ald. Wilson, Holder and Scully. The report of a sub-committee appointed to inquire into matters connected with the service, was not received. They recommended that eight boxes be procured for the fares of passengers, and four boxes for the fares of tansmers.

It is proposed to have the boxes at the collectors' windows near the turnstiles. The collectors will still be on duty and will see that proper fare is placed in the boxes and will supply change when asked.

Superintendent Glasgow said he wanted spruce deals for the repairs of the boats, and he and the chairman were authorized to purchase them. It was also decided to call for tenders for the supply of coal for the stoves in the toll houses.

A discussion then arose between the chairman and the superintendent over the missing of trips by the ferry boat. Ald. Potts wanted to know the reason for this. Mr. Glasgow blamed it on the frost, and then the chairman wished to know why the public were not informed as to the cause of delay at such times.

The superintendent said that when he was around, and was asked, he had no hesitation in telling, but he remarked that it was the sense of discipline among the crew of the ferry that they were not communicative. Indeed, he said, the discipline was the same on that point as on a war ship.

The chairman—"That is something new in the service isn't it to have a crew with such discipline?"

Another matter which received some attention was S. H. Mayes' contract for re-paving the piling in the approaches to the ferry.

Some one asked what rate of remuneration Mr. Mayes was receiving, and the superintendent said he understood it was \$14.00 a day. The pile driver had been on the job six weeks and had been idle three or four days. He said, however, he was not quite clear on the matter and volunteered to get the bill.

When he had left the room in search of the documents, the chairman remarked that in his opinion the ferry staff was at least as well paid now as any in the service of the city. They worked seven hours out of the day, while the police and firemen are on duty the whole twenty-four.

At this point Mr. Glasgow returned and presented his bill on the table. When footed up by the common clerk they totaled \$468. As the superintendent said forty-five pieces of piling had been driven it was figured out that the cost to the city was \$10.40 a piece.

In answer to Ald. Wilson the superintendent said that some years ago a tender had been received for driving piling at \$4.75. He understood that the present contract had been made by Engineer Peters, under an order from the council.

Engineer Peters was called to the committee room to explain the matter, and said he had spoken to the pile drivers as well as some of them would take a contract the work had to be done by days work. Mr. Mayes' charge was \$15 for the pile driver with three men, but he could engage extra men at the discretion of the engineer in charge of the work.

The next question asked by the board was as to how long this job was likely to last.

Engineer Peters said it was for Superintendent Glasgow to say, but he repudiated any responsibility.

City Engineer Murdoch solved the problem by saying that he would see about the matter today, and if the work was all done Mr. Mayes' job would terminate.

The committee passed an order that in future all the passengers on the ferry boat must be allowed to land before the teams.

MANY DON'T KNOW HEART AFFECTED.

More People than Aware of It Have Heart Disease.

"If examinations were made of everyone, people would be surprised at the number of persons walking about suffering from heart disease."

"This startling statement was made by a doctor at a recent inquest. I should like to say that heart disease is as common as this would imply," said the expert, "but I am sure that the number of persons going about with weak hearts must be very large."

"Hundreds of people go about their daily work on the verge of death, and yet do not know it. It is only when the shock comes that kills them that the unsuspected weakness of the heart is made apparent."

"But undoubtedly heart weakness, not disease, is more prevalent nowadays. There is no doubt but that this is correct, and we would strongly advise any one suffering in any way from heart trouble to try a course of Milburn's Heart and Nerve Pills."

SIR ROBERT AND MR. BOOTH A very entertaining account of a meeting between Sir Robert Perks, who will address the Canadian Club this evening, and Mr. John R. Booth, "the wizard of the Ottawa," is given by a writer in a recent issue of Collier's Weekly.

"One day there arrived at the little red brick Booth office, at the Chaudiere, two visitors. One was a financial agent of Ottawa and the other was Sir Robert W. Perks of London, England. Sir Robert had with him a Georgian Bay canal charter and an armful of Mexican franchisees.

"The principal advantages to be derived from this new or enlarged Welland canal would consist in permitting the very largest boats now on the Great Lakes to pass from Lake Erie to Lake Ontario with much larger cargoes than go through the present canal, and with fewer locks.

"The agitation begun by leading British journals for a cheaper press service between Britain and the overseas states may, in conjunction with the visit of the overseas journalists, result in practical benefit to all concerned.

It must be a dreadful shock to the Standard to learn that Dr. Pugsley has taken the Central Railway matter into the equity court, where partisan malignity cannot have its own way.

CHICAGO DOCTOR HELD FOR MURDER Dr. Clemonson Said Burglars Chloroformed His Wife But His Story Did Not Go. Chicago, Ill., June 1.—Dr. Haldane Clemonson, whose wife, Nora Jane, was found dead in bed Sunday, supposedly from chloroform poisoning, was formally held for murder today.

BRIDGETOWN NEWS Bridgetown, N. S., June 1.—Rev. A. A. Rideout, of Fredericton, en route to Wolfville, occupied the Baptist pulpit on Sunday. Next Sunday Rev. J. B. Ganong, of Sussex, will preach to the unsheltered congregation.

are mentioned as reasons against the building of the Georgian Bay canal. This writer adds, however, that Canada is quite able to build both canals if they are needed, and contends that the cost should not prevent the work being done.

Since the above article was prepared an Ottawa despatch to morning paper gives the following additional information: "It is understood that the government's reply to the offer of Sir Robert Perks on behalf of the Georgian Bay Canal Company to build the canal in return for a government guarantee of the bond issue with government control of rates and the option of taking the canal over at cost at any time will be that for this year at any rate the country will be committed to no further large obligations. There will consequently be no further developments in the project until another session of parliament. As has been previously stated by your correspondent it is likely that before any action is taken with regard to the Georgian Bay canal scheme a complete and exhaustive report will be obtained with regard to the cost and potentialities of a deepened Welland canal and an improved St. Lawrence River route to Montreal."

On the subject of athletics and the drink habit, Outdoor Canada takes note of a great change for the better. We quote: "Everybody agrees that there is much less drinking in Canada today than there was, say forty years ago. Surely the use of athletics has had much to do with this. Forty or fifty years ago there were virtually no athletic clubs. Cricket was too expensive for most men. Football was virtually unknown. But there were holidays as there are now, and Satan found mischief for idle hands in those days, as he does today. But it may be argued that there are fewer idle hands on idle days than there were in those remote years. Every boy who is worthy the name is either a participant in or interested in athletics. If, as the former, he simply must leave alcohol alone. If he is a weak-kneed brother his team mates will see to it that his uncontrollability does not interfere with the team's chances of success, and he has either to get into line or get off the team. All of this tends to self-discipline; all of it makes for good citizenship."

The new government of Newfoundland has to deal with a large deficit incurred by its predecessors. There is a floating debt of \$330,000 to be covered by a loan. However, Premier Morris proposes to introduce a progressive policy in relation to the fisheries, agriculture, telegraph service and other matters of importance, and promises an era of general development. This is the habit of new governments.

Engineer Murdoch says street paving is not a live issue in St. John. Ald. Vanwart expresses the view that St. John cannot afford to go into the paving business at the present time. Apparently the annual waste of money on the streets is to be continued. That free trip to Boston is involved in deeper mystery than ever.

The police will have the entire sympathy of the citizens if they promptly arrest and look up every person who refuses to keep to the paved walks on King Square when band concerts are given there. Vigorous action at the outset will put an end to vandalism for the season.

THE LOST CAR Lying one day "neath the auto, Sweating and milled with oil, I worked at a cranky engine, And my only reward was the toll.

My patience gave out on that engine; With the spanner I gave it a thump, That jerked loose some thinnaadinkus And started it up at a jump.

Before one could twinkle an eyelid— Before the area was clear for view, That car tore away down the highway, And I lay glistening up at the dew.

I sprang up, and madly I followed, But one gave up in disgust. For that runaway car quickly vanished In a cloud, whirling circles of dust.

I sought it in byways and hedges, In highway and busy street, And though I made thorough inquiries, With never a trace did I meet.

Perchance in some future existence, I shall once more make search for that auto But I doubt it—Louis Schneider, in Judge.

MR. MURDOCH HOME BUT SAYS NOTHING

City Engineer Has No Recommendation to Make Regarding His Paving Trip

William Murdoch, city engineer, who accompanied several of the aldermen on their trip to Lowell (Mass.), and other New England centres to inspect the paving...

Company returned home yesterday. Speaking to a Telegraph reporter, Mr. Murdoch said he was not prepared to make any recommendations at the present time.

Permanent pavement was not a live question in St. John, and as far as he knew the common council had no intention of taking up the matter in the immediate future.

The Hassam Company's pavement consisted of cement mixed with macadam, and he thought would make a good surface in streets when there was not much heavy traffic.

It would be more suitable on level streets than on hills, although he saw one hill laid with it where it appeared to give satisfaction.

A bituminous pavement manufactured by the Warren Company was also inspected. In this method bitumen took the place of cement, and a good surface was obtained.

The price of all classes of permanent pavement was about \$3 a square yard, and he had been incorrectly quoted as saying that St. John wanted a cheaper pavement.

He did not, however, believe that there was any very urgent demand at the present time for this additional expense to be incurred.

STRIKING LUMBERMEN WITH KNIVES AND GUNS MADE MEN LEAVE WORK

Serious Trouble at a California Lumber Camp—Six Hundred Armed Men Oppose Posses of Sheriffs

Sisson, Calif., June 1—Armed with knives and rifles a party of striking lumbermen at McCloud 14 miles east of here drove the guards away from the powder house of the McCloud River Lumber Company last night and now is in possession of a ton or more of dynamite, according to phone advices received early today.

Shortly after the message was received communication with McCloud was interrupted and it is not known whether the wire was cut or not.

Sheriff Howard of the county is in an ugly mood and that serious trouble was expected. Two hundred strikers went yesterday to the logging camps in the hills forty miles to the east of McCloud.

All carried weapons of some sort and they forced every man at work in the camps to lay down his tools.

CUSTOMS MEN BEATEN

Rival teams, representing the Customs men and the wholesale liquor dealers played a game of base ball on the Victoria grounds last evening.

The liquor men won, 11 to 12. There were three prizes. One for the man making most runs on the liquor dealers' team was captured by Coyle.

One for the man scoring most runs on the Customs team was won by Chas. Tilton. The third for the man making the most hits in the game went to Thomas Morrison, of the Customs.

A number of the members of the Tabernacle Brotherhood, accompanied by their pastor, Rev. J. W. Kierstead, assembled last evening at the residence of their president, George McKay, in Richmond street, who has recently joined the ranks of the liquor dealers.

McKay's interest in the interests of the brotherhood and congratulations on his recent marriage. Edgar Campbell, honorary vice-president of the brotherhood, on behalf of those present, presented to Mr. and Mrs. McKay a handsome carving set. Mr. McKay briefly replied.

WEDDINGS

Miller-Bizard

A wedding that has been anticipated with a great deal of interest in society circles took place this afternoon at 2.45 o'clock, at the residence of Frederick W. Bizard, 36 Orange street, when Miss Winifred A. Miller, daughter of George Norman Miller, manager of the Bank of Nova Scotia at Barrie, Ontario, was united in marriage to Charles Bizard, son of the late Charles Bizard, of Montreal, brother of the groom, was groomsmen, and Miss Mary Bizard, sister of the bride, was bridesmaid, with Miss Ethel McAvity, cousin of the bride, as maid-of-honor.

The bride was becomingly gowned in white chiffon satin, embroidered in pearls, and wore a veil of Brussels lace arranged with orange blossoms. She carried a bouquet of lily-of-the-valley, arranged in the old-fashioned nosegay effect.

The bridesmaid and maid-of-honor, were gowned alike in white chiffon satin, embroidered in self-colored trimmings of yellow pearls. The gowns were in purely distinctive style. The hats were leghorn trimmed in flower gaitered effect with mauve colored flowers. The young ladies also carried director's sticks of gold tied with gold ribbons and flowers, consisting of lily-of-the-valley, pink roses and pansies.

The originality in costuming and the appropriate floral decorations in the drawing room made a very attractive picture while the ceremony was being performed.

Mrs. Charles Miller, mother of the groom, and Mrs. Eric, of Campbellton, were among the out-of-town guests at the wedding.

After partaking of a dainty supper, the bride and groom will leave on the Montreal train, at 6 p.m., for Barrie, where they will reside.

Miss Bizard is one of St. John's most popular young ladies, and this was shown by the great array of very beautiful gifts that were showered upon her.

Green-Wilson

A very pretty wedding took place at the home of Mrs. Elizabeth Wilson, 37 Peters street, at 6.30 o'clock this morning, when her daughter, Mary E. Wilson, was united in marriage to Harry G. Green. Rev. Samuel Howard officiated. There were no attendants. The bride who was given away by her brother, J. E. Wilson, wore white serge with satin trimmings and a black picture hat. Her going-away dress was of Alice blue, with hat to match. The wedding gifts are many and costly, including cut glass and silverware. The groom's present to the bride was a diamond ring. Mr. and Mrs. Green left for a honeymoon trip to Boston and other United States cities, on their return they will reside at 102 Princess street.

Y.M.C.A. BOYS TO GET NEAR TO NATURE

Physical Director Robertson Outlines a Novel Scheme— Would Organize Boys Into MIMIC Indian Tribes and Camp Out.

An original and novel plan is under consideration by Mr. Robertson, physical director of the Y. M. C. A., for the benefit of the boys. He is trying to keep the boys who so faithfully attended the Bible class throughout the winter, together, and for that purpose has devised an interesting scheme.

A party of one hundred boys will be divided into five groups of twenty each, and will be known by some Indian tribal name to be selected by themselves. Each party or tribe will have its own distinctive totem, its conquering warrior, its big chief, his son, its renowned medicine man, its invincible braves, fleet of foot and famed for daring, its unrivalled pathfinders, and its messengers and messengers, and all other requisites of a real Indian camp.

The boys or braves, will be taught to manufacture baskets, kites, spears, arrowheads, bows and arrows and other articles of Indian make. They will indulge in such sports and games as made Indians famous in the olden days, such as stone throwing, arrow shooting, running, swimming, fishing, spear-throwing, etc.

The boys interested in signalling, which will be quite necessary and in accordance with Indian customs though their methods will be more modern than the aborigines, are being taught to send and read messages by J. Mackinnon, formerly of No. 8 Army Signal Corps, and his efforts are proving very satisfactory. Probably three or four members of each tribe will be instructed in the art of flag waving, and these will be used as messengers.

Mr. Robertson desires to have the boys get near to nature, as possible, and hence they will select their own camp grounds, somewhere just outside city limits on which they will bivouac one or two evenings each week during the summer months, and with no covering except their blankets. This scheme should meet with approval from the staff, and members of the society for the prevention of the spread of tuberculosis as the "fresh air cure," is now recognized as the best for that disease.

There will be a meeting soon, which all boys interested should attend, for then the questions unsettled at present regarding the time and place of camping, the general assembly of all the tribes, the colors and special markings, head-dresses, etc., will be definitely decided upon.

The braves will also have the privilege of electing their chief, medicine man, etc., and of deciding the contest of admission to the grand tribe.

All the boys wishing to enjoy a good time for the summer and who are interested in the plan of camping out should communicate with Mr. Robertson at once. (J.R.E. upyrd trlhw tathogbe)

FLOUR TAKES ANOTHER JUMP

Ontario Flours Advanced Fifteen Cents Per Barrel in This Market This Morning.

Flour continues to advance, and judging from the state of the wheat market much higher prices may be expected. This morning Ontario brands were advanced fifteen cents a barrel, bringing the whole sale quotation up to \$7 a barrel; as this is only fifteen cents below the figure asked for Manitoba brands, the latter are likely to go to at least twenty-five cents this afternoon or tomorrow. Usually there is a difference of something between fifty cents and a dollar in Ontario and Manitoba, and it has been many years since the quotations have been so near alike. Ontario now retail at \$7.25 to \$7.50, and Manitoba \$7.40 to \$7.50.

TO LIST U. S. STEEL ON PARIS EXCHANGE

This will be First Move in Plan to Have American Stocks Listed on the Paris Bourse

Paris, June 2nd—Negotiation for the listing of the shares of the United States Steel Corporation on the Paris Bourse were officially concluded yesterday. Six influential banking institutions have bought outright a large block of the stock and will offer it to the public.

The credit for the listing of steel companies on the Paris Bourse, which opens the door to the other American stocks, belongs primarily to J. P. Morgan, who has been in Paris directing the campaign which convinced the French bankers, the Governors of the Stock Exchange, and the Ministry of Finance, that the time had arrived when the bars should be laid down.

JUNE CAME IN WITH HEAVY HAIL STORM

Reports From Westfield Tell of Hail Storm and Heavy Froze Yesterday.

The advent of June was signalized yesterday by a severe hailstorm. Out along the line of the C. P. R. in the suburban district the hailstones were said to be quite large, some of them being the size of peas. The weather turned very cold last night and this morning residents in and about Westfield found ice formed on the pools caused by yesterday's rain.

A BOOM IN PYTHIANISM

Seldom in the history of Pythianism has there been such an increase in membership as at the present time, or has the interest among the members been as great. The three St. John lodges are all initiating new members at every meeting. New Brunswick Lodge, No. 1, have a number of candidates going through. Last Monday St. John Lodge, No. 30, who are holding their meetings in the new Temple of Honor hall, gave eight new members their third rank, and on this (Wednesday) evening Union Lodge, No. 2, will work the same rank on the same number. This meeting will be of special interest to all St. John knights, as some new work will be introduced.
