## Community Club

### Constitution and Officers

Formed under the auspices and as part of the Community League.

The Community Club organization is now fairly complete, and as all are aware has been functioning during the past three or four weeks. As a complete list of officers and committees of the club has never been published, we are printing the list this week and also the constitution which was drawn up and adopted by the club.

#### OFFICERS

Hon. Pres. Mrs. W. A. Ryckman  
President Mr. W. G. Spencer  
Vice-Pres. Mrs. Walker Drummond  
Sec.-Treas. Mr. Chas. S. Burns

Social Section—Mr. J. F. Vance, Chairman, Mr. H. A. Drummond, Mrs. W. H. Torrance, Mrs. A. M. Slater, Mrs. J. F. Wedderburn, Mr. A. W. Palmer, M. F. J. Shaille, Mr. Henry Slater, Mr. C. P. McGregor, Mr. Richard Smith.

Musical Section—Miss E. Dale Sinclair, Chairwoman, Mrs. D. A. Hopper, Mrs. Sidney Alton, Miss A. Eager, Mr. Stewart Mitchell, Sec.

Horticulture Section—Mr. John Connon, Chairman, Mrs. W. G. Horning, Mrs. Walker Drummond, Rev. S. Bennetts, Mr. Stanley Sawell, Mr. A. C. Mullock, Secretary.

Literary Section—Mr. R. A. Riddell, Chairman, Miss M. Forrester, Rev. J. F. Wedderburn, Miss May Langford, Secretary.

Public Health and Social Service Section—Miss A. Forbes, Chairwoman, Mrs. Wm. Spence, Mrs. J. Connon, Rev. C. L. Poole, Dr. J. O. McGregor, Dr. D. A. Hopper, Dr. R. B. Gillie, Dr. R. J. Vance, Sec'y.

#### CONSTITUTION

##### Article 1

NAME—The Organization herein, after described shall be known as the Community Club of Waterdown.

##### Article 2

OBJECTS—The objects of the Club shall be to develop a Community spirit, to work together for the advancement of the whole community irrespective of class, creed or sect.

##### Article 3

MEMBERSHIP—Any person who is a resident of the Municipality of Waterdown, or vicinity, is a member of the Club and any, or all of the different sections of the Club.

##### Article 4

OFFICERS—(Sec. 1) The Officers of the Club shall consist of Honorary President, President, Vice President, Secretary-Treasurer and the Chairmen of the five sections of the Club. These shall be elected at the annual meeting of the Club, with the exception of the Secretary-Treasurer who shall be elected by the Executive Committee and shall hold office for one year or until their successors are elected. They shall form the Executive Committee of the Club and shall have power to add to their number when it is deemed advisable to do so.

Sec. 2. A Nominating Committee of three, not members of an executive committee, shall be appointed by the President to select officers for the ensuing year. This Committee shall be appointed at least two weeks prior to the annual meeting and shall have the nominations in the hands of the Secretary-Treasurer for publication one week previous to the annual meeting.

##### Article 5

DUTIES OF OFFICERS—The President shall preside at all business meetings of the Club and the Executive committee, and shall have general supervision of the affairs of the

Club. The Vice-President shall preside in the absence of the President. The Secretary-Treasurer shall keep minutes of the meetings, shall be custodian of all records, correspondence, etc., shall make reports of all receipts and keep account of all monies belonging to the Club, paying out same upon the direction of the Executive committee.

##### Article 6

SECTIONS—There shall be five sections, namely: Social, Musical, Literary, Horticultural, and Social Service and Public Health. Sections may be added when deemed advisable by the Executive committee. Each Section shall be in charge of a Chairman and committee appointed by its chairman. Such committee to be approved by the Executive committee. The policies of the different sections shall be subject at all times to the approval of the Executive committee.

##### Article 7

FEES—There shall be no membership fees.

##### Article 8

FINANCES—If any Section hold a function for which an extra fee is charged, or collection made, the net proceeds of such function shall be turned over to the Secretary-Treasurer of the Executive committee. Should a Section require any funds application for such shall be made by the chairman of that section to the Executive committee.

##### Article 9

MEETINGS—The annual meeting of the Club shall be held in January in each year, under the charge of the Social Section, at which a Summary of the previous year's proceedings shall be submitted by the Executive committee along with a financial report for the year.

The Executive committee shall meet monthly, or special meetings may be called as the President may direct.

##### Article 10

QUORUM—Not less than fifteen members shall form a quorum to transact business at an annual or special meeting of the Club, and not less than four members of the Executive committee shall form a quorum of the Executive Committee.

##### Article 11

PRESS REPORTS—When any Section wishes to publish an article in the press such article shall be headed as in the following example: "Community Club — Horticultural Section."

##### Article 12

CHANGE OF CONSTITUTION—The Constitution of the Club may be amended at any regular or special meeting of the Club by two-thirds vote of those present.

## Hubert E. Job

Hubert E. Job, a well known resident of Hamilton died at his home in that city last Tuesday in his 56th year. He had been a resident of Hamilton for the past 30 years during which time he was a member of the First Methodist Church. He was secretary of the trustee board, a member of the quarterly board of the church, a teacher in the Sunday School and missionary superintendent of the school. For many years he was proprietor of the Toronto and Hamilton Electric Co. His widow, a daughter Miss Margaret at home, two brothers, John R. of Freeman, J. B. of Porterville, Cal., and four sisters, Mrs. W. J. H. Emery of Toronto, Mrs. W. C. Adams of Westmount, Que., and Mrs. W. R. Flatt and Mrs. Geo. McMonies of Waterdown, survive him. The funeral took place Thursday afternoon.

## Community Club's Horticultural Section

About eighty-five ladies and gentlemen braved the blustery weather of Monday evening, February 12th, to wend their way to the Memorial Hall to hear Mr. J. A. Neilson, B. S. A. of the O. A. C., Guelph, lecture on "Improvements of the Home and surroundings", and indeed they were rewarded for their trouble as the lecture was most interesting and instructive.

Mr. Neilson made several valuable suggestions whereby our village could be improved, and also recommended shrubs and plants suitable for use about our homes. In connection a large number of fine slides were shown to illustrate his points. He also very kindly offered to pay us a visit in the spring to give a practical demonstration on tree pruning.

Mrs. Spencer and Miss Eager contributed very acceptably to the evening's entertainment, while Miss E. Dale Sinclair led in the community singing. The Horticultural Committee was very fortunate in securing a lecturer of Mr. Neilson's ability and it is hoped that when he again visits us that the weather conditions will be such that a larger attendance will result.

## Annual Meeting of Ladies' Bible Class

The Ladies' Adult Bible Class of the Methodist Church held their annual meeting and election of officers at the home of Mrs. J. Prudham on Tuesday evening, February 12th. The Treasurer's report showed the class had raised over \$200 during the past year. Over 200 visits to the sick and newcomers to the church were made. Flowers were placed in the pulpit each Sunday. A box of toys and books was sent to Morley, Alta. to the Indian children, and Christmas cards sent to aged and shut in members of the church. During the business session Mrs. F. Thomas favored with a solo which was much appreciated.

The following officers were elected for the coming year. Teacher, Mr. R. Broadbent; President, Mrs. J. Daley; Vice-President, Mrs. E. T. Sawell; Secretary, Mrs. A. Newell; Treasurer, Miss N. Smith; Convener of Devotional Committee, Mrs. J. Tuck; Membership Committee, Mrs. G. Nicholson; Social Committee, Mrs. S. Carey.

## Public Health and Social Service

The first entertainment of the Public Health and Social Service Section of the Community Club will be held in the Memorial Hall on Thursday evening, March 1st. The program will consist of an illustrated lecture on "Child Welfare" by a Toronto child specialist of the Provincial Board of Health. Dr. McClenahan, District Medical Officer, will also address the meeting. One of the features of the evening will be little Miss Alice Mawhinney an intrepid six year old dancer. Also Miss Dillon, piano soloist, and other entertainers. Dr. J. O. McGregor will preside as chairman.

**THE WATERDOWN REVIEW**

Issued Every Thursday morning from the office, Dundas Street, Waterdown  
 G. H. GREENE  
 Editor and Publisher  
 Member C. W. N. A.

**Farm Wife Should Be a Co-Partner.**

It is only a contented, willing, thrifty and competent wife that can provide adequately for the needs of the farmer and keep the social atmosphere of the farm so wholesome and pleasant that work becomes a joy to the family and to such help as may be employed. One of the shames of farm life is that such services are accepted as a matter of course, and that little, if any, recognition is given for the important place taken by the wife and mother in making the farm financially successful and the home a fit place in which to rear a family. One of the best definitions I have heard of an ideal farm is "A home with a farm business attached." If this view were to be commonly accepted the plane of living on farms would be much higher than it now is, and the duties and influence of the home manager would be put on a par with the duties and influence of the farm manager. Then the farm business would become a partnership in fact.

**Meat Consumption Figures.**

The average per head consumption of meat of all kinds, exclusive of poultry and game in Great Britain, was about 120 pounds a year prior to the war. Of this amount three-fifths was home-produced, and two-fifths was imported. Of the overseas supply 70 per cent. of the mutton, 17 per cent. of the beef, and 9 per cent. of the pork came from within the Empire—Canada, Australia, New Zealand and South Africa.

**DANCING**

Miss Dorothy Stock wishes to announce the opening of her classes in National, Classical, Toe and Modern Dancing, in the Memorial Hall, Waterdown, on

**Saturday, March 10th**

Classical and National class from 5 to 6.

Modern Class (Fox Trot, Waltz) 6.30 to 7.30.

The programme will consist of Drills, Folk Dances, Musical Numbers, Presentation of Diplomas, an Oratorical Contest and a Play entitled

**"A Woman's Won't"**

The Programme Commences Promptly at 8.15

Admission **35 cents**

### Ants Flee Before Tartaric Barrage.

A small amount of moistened tartaric emetic and powdered sugar in equal parts will drive ants away if placed near their haunts. The mixture should not be thrown out when no longer required, but should be set aside for another emergency. Add a little water and the mixture can be used as before. Care should be taken to keep it out of the reach of little children.

The first apple tree was planted in Manitoba forty years ago.

### Old Dobbin Steals March on Tractor.

"Tractor manufacturers and horse breeders associations may urge the relative merits of tractors and horses as sources of farm power with all the eloquence of which they are capable," declares G. A. Pond, in charge of the cost accounting section at Minnesota University Farm, "but the farmer who has both available keeps his eye steadfastly on the relative prices of kerosene and oats and adjusts his power supply accordingly."

Recently summarized data collected showed but 298 hours of use per tractor in 1921 as compared with 415 hours the year previous, a decrease of 28 per cent. The use of horse labor, on the other hand, increased an average of 610 hours per farm during the same period.

The fact that tractor fuel declined only 29 per cent. in price while horse feed decreased 55 per cent. partly explains the change.

### In the Orchard.

The foliage of stone fruits, as cherry, plum, and peach, is on the whole quite tender, and the arsenical sprays should be employed with caution. Arsenate of lead is least likely to do harm, though more than two applications, especially to peach, may cause shot-holing, dropping of leaves and burning of fruit.

The care of the home orchard provides for spare time congenial and profitable occupation for those who enjoy seeing things grow.

### Important in Chicken Yard.

The health of our family depends largely upon the kind of feed that is given them and the way it is served. It is just as important to feed right in the chicken yard. Have the right kind of feed and see that it is not tainted in any way.

## Farm Notes

Instructive Articles from the Ontario Department of Agriculture

### THE SUMMER FALLOW ABOUT SWEET CLOVER

Not So Good as Cultivation and Soil Improvement.

Good Occasionally for the Destruction of Weeds and Insect Pests—Stick to One Breed in Raising Live Stock—Pointers on Co-operation.

(Contributed by Ontario Department of Agriculture, Toronto.)

There is no soil so rich that it can stand the long continued practice of summer fallowing without decline in fertility. Experiments have shown that when summer fallowing is practiced, five times more nitrogen is rendered soluble and available than is required for the crop. The occasional fallowing of land to destroy pests either insect or weed may be justified even if it does destroy considerable vegetable matter. Cultivated and soil improvement crops whereby the soil is kept in use have largely taken the place of the summer fallow on many of the best operated Ontario farms. Rotation of crops and after-harvest tillage well practiced eliminate to a large extent any necessity for summer fallowing.—L. Stevenson, Toronto.

### STICK TO ONE BREED.

Fickleness of Mind in Breeding Live Stock Is Fatal to Success.

As the landscape speeds past while one travels by road or rail, it is disappointing to see a different breed or cross of cattle on practically every other farm. This practice causes more loss to the live stock industry than any other, owing to its almost universal adoption over very large areas. Not only is it a great national loss, but it never gets the individual farmer who adopts it, anywhere near success. Neither does it give any inspiration to his family to stay with an industry that is fascinating, healthy and profitable, when undertaken where pure-bred or intelligently bred herds are kept. If a person would make up his mind as to what breed of animal was desired, and then use the best sire available for that breed there would be a possibility of greatly improving the breed.

There is a fickleness of mind with many farmers, and they follow it by switching from one breed of bull to another to read their herds. They are rarely able to give a definite reason for their separate choices, or what they expect from the operation. Many of the prevailing popular ideas exhibit a lack of knowledge as to where the crossing of breeds will land, this lack of knowledge is all the more remarkable seeing that there are hundreds of cases in any county or section to show that it means retrogression, rather than progress.

The writer visited a farm lately where a farmer used the "in and out" game between the dairy and beef breeds of cattle. He had a herd of good useful grade dairy cows, and when the boom came to beef cattle, during the war, he used a Shorthorn bull on these dairy cows. Before he reached anything definite the price of beef had dropped and milk was commanding a more profitable price. He is now using a very poor specimen of a Holstein bull on the crosses the beef bull gave him, and the progeny are miserable specimens, that will produce neither milk nor beef.

The results of tinkering with different breeds always ends in a mongered herd, neither good to look at nor profitable at the stall or feed lot. The first generation of a cross may prove satisfactory, but carried beyond the first generation it is inevitably a failure. A farmer cannot keep two pure-breeds profitably for the purpose of crossing, when the progeny are unsuitable as breeding cattle.

If a man has a fancy for dairying, he should choose the breed which appeals to him and best fits the demands of the market he intends to supply, then always use a herd sire of that breed, and carefully select the heifers which are to be retained in the breeding herd. It is always found to be much more profitable to stay with one breed than to be continually switching.

Every stockman should aim at improving his herd of black, and to do this it is necessary to stay with one breed, use the best herd sire of that breed available, carefully select the breeding female, and feed a ration that will promote thriftiness and maximum development.—M. J. McNamee, Farmer.

Hints Regarding the Cutting, Curing and Siloing.

Should Be Cut Before Blooming—In Filling the Silo Tramp Well—Some Farmers Recommend the Use of Salt—Old Dobbin Steals a March on the Tractor.

(Contributed by Ontario Department of Agriculture, Toronto.)

Sweet clover should be cut for hay in the green sappy state just before blooming. If cut for hay, great care should be taken to properly cure it. It would seem that the best method is to cut it in the field and dry it thoroughly before drawing it to the barn. Wet, damp or poorly-cured hay provides ideal conditions for the development of mould.

As sweet clover hay is difficult to cure under the best conditions a very good means of preserving it would seem to be in the form of silage. The experience of the last year, however, has revealed the fact that certain precautions are necessary in making silage if it is to come out of the silo green, succulent, and free from mould.

### When to Cut for Silage.

Sweet clover for silage should be cut at the same time as for hay, i.e., just before blooming. The binder should be followed as closely as possible with the waggon and the sweet clover put into the silo at once. It should not be left lying on the ground for even a day, especially during hot, dry weather. The knives of the cutting box should be set to cut the sweet clover as fine as possible. If for any reason the feed seems dry a stream of water should be run into the cutting box, for it is essential to have the sweet clover well moistened so that it can be well packed in the silo.

### Clover Should Be Carefully Tramped.

One of the most important steps in the making of good silage is to be sure that it is spread evenly and tramped thoroughly in the silo. Seventy-five per cent. of the failures in making first-class silage last year were due to insufficient packing. At least two men—preferably more—are necessary to properly tramp sweet clover in the silo. Great care should be taken to see that it is particularly well tramped around the edge. Neglect to properly pack the silage was quite apparent throughout the country this spring, and it was not always in ratio to the number of men in the silo. One farmer said he had two men in his silo while it was being filled last summer, and he could not explain why one half of his silage was rotten from the top to the bottom, and that on the opposite side from the blower pipe. The condition was easily explained, however, when it was realized that the two men had stood on either side of where the cut food was blown in, and had simply forked it over to the other side and did not bother tramping at all. Because sweet clover has a hollow stem and has not the weight that cut corn has it requires to be packed more firmly to prevent the development of mould.

### Some Farmers Recommend the Use of Salt.

The use of salt either in curing the hay or in the silo is strongly recommended by some farmers, and if the sweet clover is not being handled under the most favorable conditions it would probably help in curing of the fodder.

In conclusion, it may be well to sum up the four important steps that must be followed if the sweet clover is going to be ensilaged in the best possible manner.

- (1) It should be cut before blossoming.
- (2) It should not be allowed to lie in the field after being cut.
- (3) It should not be cut fine.
- (4) It should be tramped well.—Ontario Agricultural College, Guelph.

### Small Garden Will Often Pay Big.

It is possible to make the garden pay big dividends for the amount of labor put upon it if that labor is well directed. A space 50 x 100 feet will, if properly planned and worked, give a supply of practically all vegetables, except potatoes, and a few other coarse vegetables, for a family of four the whole year. It must be rich soil, well cultivated, and a plan followed that will use the space all the growing season.

Oranges form the leading products in the export from Palestine.

Services at 11 a. m. and 7 p. m.  
10 a. m. Sunday School and Bible classes.

Prayer Service on Thursday evening at 8 o'clock.

### Pure-Bred Makes Best Gain.

The grade hog is more profitable for the farmer than the scrub or razorback and the pure-bred is more profitable than the grade. The pure-bred gains weight faster on the same feed than either the grade or the scrub and finishes so much better for market that it invariably commands a much better price.

The bigger a hog can make of himself the more profitable hog he is. Labor saving home machinery can be replaced; women's backs cannot.
