He added that he was no partisan of the polity of fist-shaking, but he thought the war in South Africa gave the opportunity to seek certain settlements. Although he disapproved of the policy of crossed arms.

Nationalist cheers greeted this statement. M. Denys Cochin concluded with urging a more active policy in China.

M. Delcasse then moved the restablishment of the credit for an embassy at the Vatican as a matter of national interest to France, a great Catholic nation, adding that as long as the Government interested itself in the relations of the French clergy with the Curia, an embassy at the Vatican was absoluted.

AN INCIDENT OF CITY LIFE.

Pathetic Case of a Pretty Girl That Appealed For Symposity.
One o'clock in the morning. The ambulance clatters over the cobblestones in the street, glides more smoothly upon the paved disseway in the disty hall grounds and draws up sudenly in the radiant circle made by the are light in front of the Receiving hospital.

Quickly the hospital doors open and the steward runs out to lend a hand with the stretcher. Although for most persons it is long past heddime, a small and curious crowd has gathered from the outer darkness to see what the trouble is.

"Ready?" calls the steward.

"Aye," answers the policeman.
They lift the stretcher out of the smbulance and carry it into the hospital. Is aga low in the middle under the weight of a body. From beneath the blanket the head of a woman protrudes.

"She is young for this business," the policeman ejaculates as he helps to lay his burden upon a leather covered operating table.

"All right now," the doctor says. "Will everyhody but the steward and the matron please retire?"

The several attaches, the reporters and the policeman walk into the outer office. The policeman is still talking:
"I found her lying on the sidewalk in a quiet corner. Poor thing," thought I, and rang for the wagon."

The surgeon sticks his head out of the door of the operating room and follows if with his body. He is wiping his hands on a towel. The policeman springs to his feet.

The real Eugene Aram was a liar and the field, who, despite his learning, surrounded himself with low companions and who was the author of a plot to kill a shoemater for the sake of a little morey. He abandoned his wife and children to shift for themselves for 14 years, and on trial for lis life, instead of zhowing remorse, he conducted his own defense in a most masterly attack on contenstantial evidence.

Aram was born in 1704 in Yorkshire. By the time he was 14 years old he was regarded in the neighborhood as a prodigy of learning. His fame for plety and gentleness as a scholar spread, and as a result he was invited to Knaresborough to open a school in 1734. There a strange development took place is a mis character. on credit. He pretended out to give a great wedding salvers, spoons, etc., from whomever would lend them. As fast as the different articles were obtained Clark, accompanied by Aram and Houseman, carried them to a place called St. Robert's cave situated in a field adjoining the Nid, a river near Knaresborough. All the plate was hammered down flat and the smaller articles got in a shape difficult of identification under the supervision of Aram. When Clark had "borrowed" about everything valuable his acqualatances had to lend, the plotters decided it was time for him to disappear. So in the early morning of Feb. 8, 1745, he, Aram and Houseman went to the cave to divide the spoils before Clark left. Aram and Clark had quarreled a good deal during the progress of predatory operations. At the entrance to the cave the quarrel was renewed, and Aram, who was a man evidently of great terogrip pushed Clark avant reigned. He Made Allowance.

"After you with the paper, if you please," said the newcomer.

The other man nodded assent and went on reading, but at the end of half an hour had hardly finished the first column.

Just as the waiting customer was the quarrel was renewed, and Aram, who was a man evidently of great strength, pushed Clark away and rained down tremendous blows on his head and chest. Clark fell and died in a moment. Houseman, terrified at the sight and, as he said, afraid of meeting the same fate, turned and ran away. Aram did not show a particle of remorse or fear. He gathered up the booty and carried it to his house, where he buried Clark's body and heaped stones over the grave. In the afternoon he went for Houseman and threatened him if he disclosed the murder and made him believe he was squally guilty in law. Aram's wife heard the two men whispering over the deed. She told Houseman she believed her husband had made way with Clark. Houseman told the gentia Aram, whereupon he said they could admit the woman into the room and shoot her. Mrs. Aram, greatly terrified, asked no more questions. had hardly finished the first column.

Just as the waiting customer was about making a second and perhaps impatient application he noticed that the reader had lost one of his organs of sight. His resentment vanished.

"Ah," said he in a low voice, "I am not surprised. The poor man has only one eye and has to read everything twice over."

Colonel J. J. Sullivan of the Central National bank is something of a numismatist and owns many rare colus, among them a gold eagle of the date of 1800, in splendid preservation, and a \$50 gold-piece minted in 1851. There are but two other such coins in Ohio as far as known, one held by the First National bank of Fremont. The piece is not in the least unwieldy. In shape it is octagonal, bearing the date and the full name of the assayer on the rim, while the reverse, showing nothing but fine lathe lines, bears the number "50." Colonel Sullivan was six years finding this \$50 coin and prizes it far beyond its intrinsic value.—Cleveland Plain Dealer. Aram, greatly terrified, asked no more questions.

Clark's disappearance was not noticed for a day or two. Then the people from whom he had "borrowed" jewelry and plate began to make inquiries. Suspicion was directed at Aram in some way. The village authorities searched his house and found a bundle containing plate and clothing stained with blood. Notwithstanding this evidence of Aram's complicity in an intended robbery, no action seems to have been taken by the authorities, nor was it suspected that Clark had been murdered. The neighbors began to jeer at the learned schoolmaster, however, and Aram suddenly left his wife and children and walked to London. For 14 years his family heard nothing of him. He spent the greater part of the time wandering about from place to place, at last finding a situation as usher in a school at Lynn. In June, 1758, a horse dealer who had known him in Knaresborough met him in the Lynn market. Aram denied his identity. By a singular coincidence, almost the day the horse dealer accosted the now gray haired schoolteacher, a skeleton was found by some workmen digging a pit in Thistle hill, in Knaresborough.

backs and Short on Change.

Once They Were Long on Green-backs and Short on Change.

There is a good story of the presidential excursion down to the Eastern Shore of Maryland. The party embraced Secretaries Blaine and Windom and others. They were fortunate enough to hear an excellent sermon from the venerable Protestant Episcopal bishop of Maryland, who was there to administer the rite of confirmation. President Arthur and the two secretaries sat in quiet satisfaction. But their peace of mind was suddenly dispelled. The offertory was sung. At the familiar words, "Let your light so shine before men," etc., the president and the secretaries each quietly dropped a hand into a pocket.

"Lay not up for yourselves treasures on earth."

Windom drew forth a crisp \$1 note and held it between his thumb and forefinger, ready for the approaching plate. The president and Mr. Blaine went a little deeper into their pockets. One brought up a nickel and the other addime. Their faces flushed. It would never do to make such a contribution.

"Ho that coverful little shall rean little to the to govern little shall rean little and the source of the superior of the s haired schoolteacher, a skeleton was found by some workmen digging a pit in Thistie hill, in Knaresborough.

A country town has a keen recollection of everything that has occurred to disturb it, and immediately the disappearance of Clark 14 years before was remembered. Houseman, still alive, got drunk first and then joined the crowd of villagers looking at the exhumed skeleton. "Clark," he said, with drunken gravity, "was never buried here."

The latter, still too drunk to realize the gravity of his position, muttered that Clark's body would be found in St. Robert's cave. The crowd made a rush for that place, and soon a skeleton was exhumed.

"I did not kill him," gasped Houseman, now thoroughly sober and terrified. "If was Aram. I had no part."

Houseman was taken to the village jail and a warrant was sworn out for Aram. When the officers took him away from the school the pupils cried. The government used Houseman as a witness to convict Aram. The latter's speech in his own defense has come down complete—a masterly attack on circumstantial evidence, showing the intellectual power of the man. Aram made a half confession the night before his execution, followed by an attempt at suicide. According to the custom of the time his body was hanged in chains, and it swung in Knaresborough forest until 1778. Tears later, when the details of his crime were dim, his remarkable career attracted Hood and Bulwer, and thus the obscurs, talented, perverted man became a part of the suite of the custom of the suite career attracted Hood and Bulwer, and thus the obscurs, talented, perverted man became a part of the man and the suite of the suite o

"He that soweth little shall reap little, and he that soweth little shall reap little, and he that soweth plenteously shall reap plenteously. \* \* God loveth a cheerful giver."

The president went to his pocketbook and the secretary of state his vest pocket with nervous fingers.
"Zaccheus stood forth and said unto the Lord, 'Behold, Lord, the half of my goods I give to the poor, and if I have done wrong to any man I restore four fold."

The plate was ealy four pews away. What the president found in his pocket-book was one \$50 note and a \$10 green.

COLORADO'S BURNING MOUNTAIN.

COLORADO'S BURNING MOUNTAIN.

A Glow of Coal and Gas That Has Not Ceased During a Century.

A mountain which has been on fire for more than 100 years is situated just west of Newcastle, Colo. So close is it that its shadow envelops the town at 5 p. m., and yet the people thereabouts think no more of it than of the beautiful Grand river which washes the feet of the huge pile where the fire has burned so long. To the tenderfoot, however, the gilttering patches of deep red fire, where it breaks out on the side of the mountain and is exposed to view, there is nothing in all the state quite its equal.

The fire is fed by a big vein of coal which the mountain contains. Just how the coal became ignited is not known. The oldest resident says it was on fire when he came, and the Ute Indians, who once lived there, say it was on fire when he came, and the Ute Indians, who once lived there, say it was burning many years before the first white man crossed the continental divide. The supposition is that the coal was ignited by a forest fire at an early date in the present century. It has smoldered and steadily burned until this day. At night when the

forest fire at an early date in the present century. It has smoldered and steadily burned until this day. At night when the moon is dark is the best time to see the fire. Then it is that it resembles the regions of inferno as given us in the word painting of Dante. The earth covering the cosl is loosened by the heat and falls away, exposling the sheet of fire.

The escaping gas probably assets in stripping off the rocks and dirt, and wherever the vein of coal apply aches the surface the fire can be seen. The first fire I saw was fully 60 feet square. It had a peculiar red tint, while the burning gas coming up at the base of the coal vein added a bright blue coloring to the scene. In many places the surface of the scene. In many places the surface of the scene. It means places the surface of the scene.

Efforts have been made to extinguish the fire. Some time ago a company which owns a large amount of coal land constructed a ditch from a point several miles above the mountain, into which it succeeded in turning the water which goes to form Elk creek.

Previously a shaft had been sunk in the mountain, and into this shaft the water was permitted to flow. The shaft was soon filled, but the fire was above the level of the water, and the effort was a failure.

MARTHA MILLS WAS ALMOST A WIZ

Invariably Draw to a Seven Spot.

The old Mills tavera, by a toligate in the suburbs of Treaton, was kept for more than half a century by Marths Mills, a woman who made a small fortune out of the pennies she saved from her commission on the tolis that she collected at the gate that she opened and shut without missing a day for 50 years. To these savings she added thousands of dollars made in her dealings with politicians, who came to her hostely to lay plans and counive for the passage of measures by the legislature and for political appointments in which they were interested. She possessed a remarkably keen eye for business. Her terms were always cash, and her prices for favors and refreshments were at such a pitch that they yeleded her a liberal profit.

She was a tall, muscular woman, with an attractive face. She might have married many times during her younger days, but she frankly declared she loved money better than anything else on earth and that she wouldn't trust a man as far as she could throw a church by the steeple.

as tar as an extended to the steeple.

Among her other accomplishments Martha was an expert poker player, and coupled with her knowledge of the game and her careful estimate of the value of a hand was a "streak of good luck" that staid with her from one end of the game to the other. She rarely got up from the table a loser, and she would never take a hand unless there were seen players.

She explained this peculiarity by say-

Away back in the forties and fifties Away back in the forties and nities there were some pretry sharp poker players among the members of the New Jersey legislature and the politicians who hovered around the lobby. They played a "no limit" game, and when they felt like making a night of it without being disturbed they went to the Mills tavern and set dwar to the game in what was

disturbed they went to the Mills tavern and sat down to the game in what was known as the "Chamber of Fate," a big room in a remote part of the house. Here, with a jug of applejack on the floor, the players sweated and fumed and rejoiced from early in the evening until sunrise, and Martha staid up to count the "kitty" and lock it up in a small iron chest that she kept under her bed.

The biggest winning that Martha ever made was a \$1,500 pot, and a seven spot did the trick. It was in the winter of 1856. The legislature was in session, and the rallroads had several important bills that they wanted passed. As a consequence the lobby ists and members of the assembly had "money to burn." The sessions in the "Chamber of Fate" that winter were frequent and unusually exciting. sions in the "Chamber of Fate" that winter were frequent and unusually exciting.
There was not much chance for Martha
to get into a game, but the "kitty" was
a fat one every night, and she was satisfied with her income from that source.
One rainy night six of the "stiffest"
poker players who had the entrance to
the "Chamber of Fate" came together in
a room of Martha's tavern, and a tur, at
poker was suggested, and Martha was invited to take a hand.
"Gentlemen," she said, "!") piny it you

think it will be better if you will leave
me out."

Now," said one of the players before the cards were dealt, "let's find out which one of us has the least money, then we'll make him put it up. We'll watch his pile and then play table stakes."

The proposition met that the play table of the cards are the cards and the play table of the cards are the cards are

The proposition met with the approval of the other players. The man who had the smallest roll was George Sinclair, an Essex county man. He had \$300. He spread the money on the table, and the next minute there was \$2,100 displayed

of it.
"That's a pretty comfortable looking nile." remarked Whitehead, picking up he pack of cards.

There were six pat hands out. Martha was the only one to draw. "Well, gentlemen." she said, "it's all in the draw, after all, and if I make my hand I'll take the money. It's a show down, so here's my hand." She opened out the tray, four, five and six of diamonds and the ten of hearts.

"Now, Whitehead." said she as she discarded the ten of hearts, "you may give me the seven spot of diamonds: then I'll have a straight flush."

Whitchead dealt the card, turning it over as he threw it down, and, to the amazement of the players, it was the seven spot of diamonds. The straight flush was made, and it won the money.

That ended the game, which lasted exactly four minutes, and Martha's profits were \$1,800. She pocketed the money and a week after gave a disner to the six other players that was the most claborate affair of the kind ever spread under the roof of the old Mills tavern.—

One of the newest as well as the most successful cures for obesity is that of limiting the patient to one article of diet. It seems not to matter much what that may be, for the virtue of the method is that as one soon tires of any single article of food by limiting the patient to it one may be quite sure that the appetite will soon decline and that only enough food will be taken to ward off the pangs of starvation. Thus the surplus material is drawn upon to sustain life, and the weight of the patient rapidly diminishes.—Home Notes.

LARGEST FISH IN THE OCEAN.

Basking Sharks Are Veritable Monsters of the Deep.

The biggest fish that swims is known by seafaring men as the basking shark, from its habit of lying for hours on top of the waves when the weather is calm, basking in the sun. Scientific men call this fish the rhinodon. They say its extreme length is 40 feet, but there are plenty of old salts who swear they have seen "baskers" 60 feet long. Huge as the basking shark is, it never has been known to attack a man.

One came ashore off the New England coast some years ago, and another was beached on the California coast near Monterey in 1893. It was plump 40 feet long, and this lends color to the sallormen's big stories, since it is hardly probable that the largest specimen in existence has been caught. There was a time when basking sharks were termed "common," but that time passed so long ago that they now are counted extremely rare, and the authorities of the British museum have long made a standing offer of \$1,000 for the uninjured skin of one. Professor Jordan of the University of California, who examined the Monterey specimen, says that offer neves will be taken. THE DOCTOR'S JOKE.

He Thought It Funny, but His Pa-tient's View Is Unknown. therein is anything the old doctor dreads, it is to get the chronic cases. When he encounters one of them, he almost dreads to effect a cure. If the patient does get really well or even improves noticeably in condition and appearance, all the other chronic cases in the neighborhood, all the persons similarly afflicted within the knowledge of the rescued one and all that are within the knowledge of every one who has heard of the case, are promptly sent to the too successful doctor. And it is asking too much of a physician to request him to cure all of them. Not to put the matter too strongly, one may say the profession regards the chronic cases as hopeless. Well, a veteran physician at Wheaton had a case in the country that he knew he would lose. It was a man of 50, with an inherited predisposition to heart and liver troubles and ene whose habits of life had tended to aggravate the maladies.
