Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Under this Minimum Table a person of the age of 20, paying yearly £25 7s. 6d., the ordinary premium for £1,000, can for the same sum assure £1,000. A person of the age of 20 can, for the ordinary premium for £1,000, assure £1,500; and so on for other ages and ages in proportion.

Premiums may be limited to 5, 10, 15 or 20 payments on the same system. Being a purely Mutual Office, the whole profits belong to the assured. The Society's system of "Minimum Premiums" is the most economical mode of Life Assurance yet devised. The assured, after living five consecutive years within the Home Limits, pay no Extra Premium whatever for Foreign Travelling or Residence.

The Association has two Classes of Policies, A and B, having distinctive arrangements as regards Bonuses, &c.

CLASS A.

Cash Bonuses are allocated every year to policy-holders of five years' standing who have paid six years' premiums, and are applied in part payment of the next premiums payable for the policies. The Outlay required, after the sixth payment, is thus much below the usual amount.

CLASS B.

The Bonuses are declared every five years, and are in the form of Contingent Additions to the Sums Assured, and reserved for those who do not die before the average period. These Bonuses are accordingly three or four times larger than the ordinary Bonuses of other Offices.

The Association is Distinguished by its Liberal and Protective Regulations in favour of the Policy-holders.

The Policies are unusually favourable as regards Indisputability—Non-Forfeiture—Place of Residence, &c. In Class B., the assured may proceed to any part of the World.

The Utmost Protection is afforded under accidental omission or inability to pay premiums, and the policy-holder's convenience is met by arrangements for postponing payments; by Loans to the extent of the Value of the Policy; or by Reduction of the Assurance to a smaller amount, &c.

Discontinuing payment of his premiums, the policy-holder is protected against loss by the Non-Forfeitable Premium System, now extended to almost all kinds of Assurances.

Two-thirds only of the first Six Years' premiums on policies in Class A., or of the first Ten Years' premiums on policies in Class B., need be paid for Assurances of £300 or upwards. A policy of £1,500 may thus be secured for the outlay commonly required for £1,000.

FULL PREMIUMS NEED NOT BE PAID

Under whole of Life Assurances or Endowment Assurances, of not less than £300.

PURE WATER.

PURE WATER is as necessary for health as good and fresh air, consequently the importance of using "Pure Water" for drinking and cooking purposes cannot be over-estimated.

CHEAVIN'S

Improved Patent Rapid Water Filter.

The Only Filter which effectually removes Lead, Lime, Iron, Sewage, Organic, Mineral, and Saline impurities, and excels all others in Mechanical and Chemical action, and is the most Effective means known of Purifying Water, for Domestic, Manufacturing and General Purposes.

Advantages.—These Filters effectually purify River, Rain, Tap, Pond, Canal, or any other Water, however foul, making the most impure Water wholesome and sweet. They cannot be excelled in the purity or the rapidity of the process, whilst for Cheapness, Durability, Simplicity, Efficiency they stand unrivalled. They are not only filters capable of thoroughly removing animalculæ from water, and the Poisonous Salts of Lead, Lime, Sewage, all Colour, Taste and Odour arising from the decomposition of Organic Matter, and are so constructed as to prevent the passage of the most minute bodies. They materially reduce hardness, and are the only Filters which do not render water flat and insipid, as, instead of withdrawing carbonic acid from the water, they impart it. There is no water which they do not render sparkling, wholesome and agreeable. Their principle advantages over all other Filters is their simplicity of construction. With a cylinder, force pipe, outlet, and an arrangement of the Purifying Medium, whereby they can be thoroughly cleaned by any one in a few minutes (according to the instructions sent with each Filter,) without trouble or expense, and will retain their purifying powers for 20 years. This facility of cleansing constitutes the greatest improvement upon all other Filters now made. The RAPIDITY and REGULARITY with which it performs its work. Any kind of water is instantly purified, there being neither stoppage nor variation. The purified being beautifully soft and pure.

(The great defects complained of in all others is Slowness of Process, and not perfectly purifying the water, and above all soon choke up and are entirely useless, they cannot be cleaned only by the repeated expense and trouble of returning to the maker, and in most cases not without smashing the Filter.)

Filters erected for Hotels, Colleges, Mansions, Halls, and Public Buildings, &c. purify from 20 to 200,000 Gallons of Water daily.

These powerful and rapid Water Filters will purify the most offensive, stagnant or other waters with astonishing rapidity. The most efficient Filter which has yet been invented. The effect of this Filter upon even the foulest Thames water is surprising, and chemical analysis fails to detect the least trace of organic matter in the water that has once been passed through it.

Complete and descriptive prospectus, references, testimonials, and analysis, from the highest authority in the medical and scientific world FREE ON APPLICATION.

6,200 PHYSICIANS, SURGEONS AND CHEMISTS HAVE THESE FILTERS IN USE.

MONTREAL, 24th

P R E F A C E.

THE PUBLISHERS take pleasure in presenting to the public the **MONTREAL DIRECTORY** for 1876-77.

According to the Municipal Census of 1872, the population of Montreal was 117,865, divided among the following wards :

| | |
|-------------------|---------|
| East..... | 3,159 |
| Centre..... | 1,412 |
| West | 1,156 |
| St. Mary | 14,983 |
| St. Antoine | 27,506 |
| St. Lawrence..... | 14,410 |
| St. Louis..... | 16,452 |
| St. James..... | 19,146 |
| St. Ann..... | 19,641 |
| Total..... | 117,865 |

In addition to the above are added a large increase of the population during the past year, and the suburban villages (which are given in the **DIRECTORY**), and which properly form part of the city, the population is at least 165,000.

To canvass such a large population, (yearly rapidly increasing), to arrange the names in alphabetical order, classify the business of each advertiser and subscriber, and collate the vast amount of miscellaneous information appended to the work, is a task that requires the greatest anxiety and care.

The city is canvassed first by a large staff of Agents, and their work is afterwards revised and corrected from door to door.

The **STREET DIRECTORY**, an important and very necessary part of the work, will be found very full and reliable.

The Miscellaneous matter will also be found very complete.

The business of each Advertiser and Subscriber is carefully classified.

The Publishers beg to thank the public for their very generous support, and those who aided in supplying information, and bringing the **DIRECTORY** to a successful issue.

LOVELL'S MONTREAL BUSINESS DIRECTORY.

To meet the wishes of the Citizens generally, and to supply a want, the Publishers of "**Lovell's Montreal Directory**" will issue, next June, a **Complete Business Directory**, in which will be given, in Classified Order, the name of every firm or person engaged in business in Montreal.

The price of the book will be—

The Works of this Company are completely equipped with Machinery and Tools of the best description for Building

RAILWAY LOCOMOTIVES

On the most Approved Principles, with Facility and Despatch.

THE COMPANY HAVE TWO DESIGNS FOR

BROAD AND NARROW GAUGE ENGINES,

Both of which are confidently recommended to RAILWAY COMPANIES, as best adapted for the peculiarities of Road and Climate of the Railways of the Dominion.

SIX NARROW GAUGE ENGINES (3 ft. 6 in.) have been lately designed and built for the TORONTO AND NIPISSING RAILWAY, which are now at work and giving the highest satisfaction.

The Company is prepared to enter into Contracts for the Construction of Iron and Composite (Wood and Iron) Bridges.

This Company has built Locomotives for all the principal Railways in the Dominion, viz.:—*Grand Trunk, Great Western, Nova Scotian, Intercolonial, Northern, Midland, St. Lawrence & Ottawa, Brockville & Ottawa, and Toronto & Nipissing.*
