AND COMMERCIAL ADVERTISER

A SUMMARY OF FINANCIAL, COMMERCIAL AND MINING NEWS.

Vol. 2. No 23.

MONTREAL, TUESDAY, JUNE 27, 1899.

Published Daily at 4:30 p.m. Price 3 cents

Montreal Stock Market.

STRONG C.P.R. MARKET—BALANCE OF LIST SOFT AND DULL—MINES INACTIVE.

Yesterday's activity was but transitory, and business at this morning's session subsided into the rut of stagnation in which it has been running for a week past. The little that was done, however, was with few exceptions at improved prices. Montreal Gas was rather a weak feature declining about 1 p.c. on small transactions. With the exception of War Eagle, which receded slightly from yesterday's close, the mines were firm. But little business was done. There were only 17 sales involving over 2000 shares transacted. The various influences towards higher prices showed in one deal of 275 Canadian Pacific passing hands at $\frac{1}{4}$ higher than yesterday. Montreal Gas however, declined from 201 of yesterday as far as to 199 $\frac{1}{2}$. Montreal-London with 1000 shares rose one point. Less business was done in Payne, 1350 shares appearing small compared with 4,450 and 3,000 of Monday and Friday. Price was the same. A little business in Halifax Heat and Light was done, but Mr. Whitney's statement that this Company was a great success has had evidently no bullish results; the amount of Halifax traded in being only 25 shares and their price only 19.

Canadian Pacific—London quotation on this stock was another improvement, the cabled price being 100 $\frac{1}{4}$. Canadian Pacific on its opening sale reflected this improvement, selling at 98 $\frac{1}{2}$. Only 275 shares were traded in and all were at this figure. The bid was 98 with 98 $\frac{1}{2}$ wanted.

Montreal Gas sold down to 199 $\frac{1}{2}$ on transactions of 225 shares, and closed at this figure, a loss of $\frac{1}{4}$ p.c. as compared with the last quotation of yesterday's session.

Toronto Rails—This stock shows no signs of emerging from its rut of extreme dull-

ness. One hundred shares went at 116 $\frac{1}{2}$, which has been the prevailing price for days. The bid is discouraging at 116, with 116 $\frac{1}{2}$ asked.

Bank of Commerce—There were 256 shares of this stock traded in at a considerable decline from last week's prices. The opening sale was at 151 and the closing at 150 $\frac{1}{2}$, as compared with 154, the last posted price. The bid was 150 with 152 asked.

Payne and Montreal-London shared the principal trading in mines, Payne selling at 144 to 145 for 1300 shares, and Montreal-London at 51 for 1000. The bids were not indicative of any change.

War Eagle sold at 369, a drop of 1 point, on a transaction of 100 shares, but the bid is strong at 370, with 372 wanted.

R. & O. improved 1 point on 25 shares, and Halifax Heat and Light dropped to 19 for the same amount of business.

MORNING SALES.

BUSINESS IMPROVING—PAYNE AND GOLDEN STAR ACTIVE—BURLEY BREAKS.

By far the most active and most easily traded in stock at the morning board was Payne. It sold freely at 143 but there was more stock at the price. Buyers receded and seemed inclined to await a reaction of still further dimensions. Golden Star was in demand at 61½, but trading was narrow the bulk of the buying was in two hands and the selling by one house. California was wanted at 10, a small lot sold at this price. The affairs of the Company are in good hands and it promises to be the best of the low priced issues. The affairs of Burley call for the necessity of borrowing \$21,000 from the Bank of Ottawa; they also propose increasing the capital to \$1,500,000. The stock is weak on the news and sold at 10. Montreal Gold Fields and Black Tail both show life. The former was strong.

NEW YORK EXCHANGE.

BOSTON AND ALBANY DEAL GIVES NEW IMPETUS TO VANDERBILT'S BOOM—OTHER ISSUES STRONG IN SYMPATHY.

New York, June 27.

Beyond an undertone of strength and a fair amount of activity in London market for Americans. The market displays no feature of interest this a.m. Satisfactory earnings of the various roads reporting yesterday, are reflected in steady prices for all internationally listed stocks and fluctuations show $\frac{1}{2}$ decline to $\frac{1}{2}$ advance.

London was a considerable buyer of stocks yesterday, their purchase being estimated at from 25,000 to 40,000. It is reported to-day that some \$3,000,000 in gold have been engaged, but large bankers are quoted as being of opinion that the movement is nearly over. So far, nearly \$17,000,000 have gone out and it is not generally thought that it will extend to more than \$20,000,000. Continued buying movement in this market on part of London, would of course be an effectual check to further gold shipments of any considerable size.

There is nothing new in this morning's papers in regard to the New York Central and B. & A. deal. One of them, however, states positively that the deal is very near completion and it must be said that it is as significant fact that as yet there has been nothing like an official denial.

Officials of both Companies said that they had nothing for publication. It is announced that the injunction restraining Federal Steel from paying dividend on common has been withdrawn. This should have a stimulating effect on speculation in the steel and iron stocks which were inclined to be lag-gards yesterday.

The public knows no reason why tobacco stocks were so weak but it is rumored that there will be no div on Con. Tobacco pfd. for some time.

It is also rumored that interests that went into the Co. when it was started have signified their distrust in regard to its future, by selling out a great deal of their stock. The weakness of Con. T. extended to a sympathetic movement in A. M. T. although that Co is said to be making a very satisfactory showing. The directors meet some time next week and it is thought that they will declare $1\frac{1}{2}$ p.c. quarterly on the common. All the railroads reporting made most satisfactory showings; St Paul for 11 months showing a trifle over 10 p.c. earnings on the stock. It was an encouraging feature in yesterday's market that speculation and strength were diverted from industrials and traction shares, to the more stable R. R. properties.

New York, Noon, June 27.

Engagements of gold for abroad, and the hardening tendency which the money market has displayed yesterday and to-day, caused some diversity of opinion in speculative circles this morning. On the other hand were arranged a great many arguments which in the end dominated specula-

tion, and in most cases have carried prices higher than opening. The opening of the market was irregular, but in the main was at or about last night's close.

The dismissal of injunction against F. S. caused considerable activity and strength in both F. S and A.S.W. Flower & Co. were the largest buyers of the former, but on the advance there was some liquidation, which forced prices down.

B. R. T. has been rather a heavy feature, and although there is nothing new in regard to the reported difference between the employees and the management, the selling of the stock has been distinctly good. Most of the buying seemed to come from shorts put out yesterday.

The Tobacco stocks have shown a slightly hardening tendency as compared with yesterday's market, but selling of Con. Tobacco is still good, while there is no buying of a significant nature.

The real market this morning has been in the Standard Railway shares, St. Paul being the foremost in regard to strength and activity. The continued excellent earnings of the road are creating an excellent feeling on the stock, and it is continually going into strong hands. One house bought some 5,000 shares this a.m.

London continues to be a moderate buyer of stocks all through the international list.

It seems quite likely that during the balance of the week there may be an occasional flurry in the money market. July disbursements will be the largest the country has ever known, but no fear is felt for tight money, although between now and next week it may run up quite sharply.

METROPOLITAN STREET RAILWAY.

It is understood that the plans for the "melon cutting" by the Metropolitan St. Ry. are maturing rapidly. It is stated that the company will lease to the New York Gas, Electric Light & Power Co., which it controls, all of its new subways, and will also sell its surplus electric power to the same company.

The contract will call for more than the mere surplus power, but this can be provided cheaply when the new power plant is in operation. The rental of the subways and the selling of the power will bring into the company about \$2,050,000 annually. It is expected that the Metropolitan shareholders will be permitted to secure stock in the New York Gas, Electric Light, Heat & Power Co. at a low rate, or it may be that the Metropolitan will hold this stock in its treasury and issue new Metropolitan stock to present holders to offset the new asset. In any case the Metropolitan Co. will greatly benefit by the deal.

NEWS OF THE MINES.

REPUBLIC CAMP.

[Republic Miner, June 17th.]

It looks as though the opening of amazingly large ore bodies in Republic Camp would never come to an end. These great quartz leads are found everywhere within certain limits. The latest discovery is what is known as the Leiderkrantz vein which runs along the west side of the north fork of Granite creek from a point near the Mountain Lion. The existence of the vein has been known for some time, but little attention was given to it and it has only been in the last week or two that the real extent and character of the vein was understood.

The Hillside Company.

The Leiderkrantz belongs to a group of three claims, the other two being the Hillside and the Toronto fraction, which are the property of the Hillside Company, of which Thomas Clark, brother of Patrick Clark, and superintendent of the mines of the Lone Mine-Surprise Company, is president. The Hillside is the furthest north of the group and its north end line adjoins the Mountain Lion group on the west and south. The big Leiderkrantz vein comes in through the east side line, near the northeast corner of the Hillside, from the direction of the Mountain Lion and runs down through the Toronto fraction and Leiderkrantz, and then into the Racket, holding a south and west course and running along the well known Granite contact. The vein can be traced through the Hillside company's properties for more than 3,000 feet.

The Vein Is a Big One.

The editor of the "Miner" went over to see the Leiderkrantz vein yesterday in company with President Thomas Clark. We found the first outcrop on the Racket ground where there is an immense showing and where a crosscut tunnel is being run to tap the vein. We then rode on towards the north and east for several thousand feet, finding everywhere evidences of the vein. On the Leiderkrantz a crosscut has been started and has gone into the solid quartz fully twenty feet, with ore in the face. The ore body is thought to be from 70 to 100 feet wide at this point. Assays of large samples taken across the twenty feet of ore so far opened run from \$2.60 to \$6. This is excellent when the size of the ore body is taken into consideration. Where values like this can be obtained there is almost sure to be great pay chutes.

Many openings have been made on the vein as it runs up Granite Creek towards the Mountain Lion and everywhere the values obtained were fair for surface ore, and everywhere the ore body was found to be of great extent. The vein is certainly one of the largest, if not the largest, ever found in the camp.

To What Does It Belong?

The question will naturally arise as to the relationship between the Leiderkrantz vein and the Mountain Lion system. Where the Leiderkrantz vein leaves the Hillside through its east side line near the north end it crosses Granite Creek and appears to go into the Mountain Lion group. It undoubtedly runs along the granite contact so familiar to all mining men who have studied the camp. It is not surprising that big ore bodies should be found along this contact.

It will take a good deal of exploratory work to determine the relation which the Leiderkrantz vein sustains to the Mountain Lion veins or system of veins, for the Mountain Lion is known to have at least two veins. But that it comes into the Mountain Lion territory is almost certainly a fact. Be that as it may the vein has merits of its own outside of any relationship it may sustain to the Mountain Lion, and as it is now about to be taken up and developed by a strong company we shall soon know more about it.

CHICAGO MARKET.

AFTER AN EARLY SLUMP WHEAT TAKES ON STRENGTH AND SELLS AT ITS HIGH EST AT THE CLOSE.

Chicago, June 27.

July wheat was lower all to-day than yesterday's close. September did not rise except at the close of market beyond yesterday's close and often sunk below it. This advance was shared in by Dec. which after lagging all day below the close of Monday 75½ rose finally to 76-75½. Corn in its three divisions was of small amount but was steady and showed slight improvement. Ofoats the same holds true but prevailing impression among brokers is that markets will be higher to-morrow.

Provisions had little trading but prices were slowly improving up to the very close of the market. All signs therefore are towards better markets.

Cash demand for wheat continues poor and there are no signs of a halt in the downward course of prices. Primary receipts are heavy, being 1,318,000 bushels yesterday, as compared with 160,000 bushels a year ago. The Visible Supply has increased nearly 1,000,000 bushels, as shown by our table below.

Corn remains steady and shows a disposition to advance. Oats also shows strength.

The following is the visible supply of grain on the dates mentioned:

	June 26, 1899.	June 19, 1899.	June 27, 1898.
Wheat	28,859,000	27,943,000	17,225,000
Corn..	13,210,000	12,661,000	22,421,000
Cats...	5,982,000	7,353,000	7,600,000
Barley	855,000	1,359,000	366,000

The amount of wheat on passage to the United Kingdom shows a decrease of 1,040,000 bushels compared with a week ago, and an increase of 560,000 compared with a year ago.

The amount of wheat on passage to the Continent shows a decrease of 480,000 bushels compared with a week ago, and a decrease of 4,080,000 compared with a year ago.

The total amount of wheat in sight shows a decrease of 604,000 bushels compared with a week ago, and an increase of 8,112,000 compared with a year ago.

The wheat in sight, with comparisons, is as follows:

	June 26, 1899.	June 19, 1899.	June 27, 1898.
Vis'ble s'ply U.S. & Ca'da.	28,859,000	27,943,000	17,225,000
On pass. to U.K.	24,240,000	25,280,000	23,680,000
On pass. to C't'ent.	12,640,000	13,120,000	16,720,000
Total.....	65,730,000	66,313,000	57,625,000

BRADSTREETS VISIBLE.

Bradstreets worlds visible shows increase of 1,433,000 bushels. Chicago car receipts Wheat 110, Corn, 750. Oats 200. Hogs 17,000.
