Insurance exposures in the United States is the extreme irritation shown by the officials immediately interested over the investigation.

They press organs, the ordinary reader would imagine that a serious wrong was being done to the companies.

It appears to be thought that, because a certain amount has been distributed out of the unearned increase for the benefit of the insured, therefore this should cover a multitude of sins.

It is to the part of those whose duty it was to act in a fiduciary capacity in the administration of the funds.

This of itself shows the necessity for an investigation, and the wholly mistaken notion which exists regarding the nature of the responsibility of insurance managers and trustees.

Non-payment and malversation of office are not excused because, to a certain extent, the obligations of a trustee were fulfilled.

Such a plea can be put forward, so far from minimizing the effect of the exposure, only discloses the necessity for a more complete divergence.

It is a city divided against itself. Can it stand how the labor interest expect to do so? Yet there could not be a more complete divergence.

That between the Toronto and Montreal divisions of the Trades and Labor Congress. Taking the position of Canadian labor alone into consideration, it is difficult to see how there can be any opposition between the interests of the employers and the employed.

Situations in Canada, no doubt can exist that but for the partial protection afforded by the present tariff national industries would speedily become non-existent.

Nothing would please the United States producers more than an open market in the Dominion for the disposal of their surplus manufactures.

With their highly protected home market they could simply sweep the Canadian field and close the workshops of the Dominion.

And this, not because they can manufacture more cheaply, but because their advantageous position enables them to draw huge profits from their internal trade and accept small profit or even an actual loss on their exports.

This may be very objectionable from the point of view of the United States consumers, but for other reasons it is equally objectionable to the Canadian employer and workman, whose joint endeavor it is to build up national industries.

The simple fact is that if Canada is to prosper as the United States does, she must pursue the same policy of protecting her infant manufactures.

To be efficient that protection must be adequate, and both capital and labor should be united on this point.

Canadian raw material of every description should be finished on Canadian soil. Only thus can the Dominion become industrially independent and secure its place among the free nations of the world.

ANGLO-FRENCH AMENITIES. If anything were wanted to show the extent to which the spirit of the entente cordiale between Britain and France has prevailed over personal prejudices and antipathies it would be found in some of the incidents connected with the visit of the Paris municipal council to London.

Several of the members of the former body were not so long ago conspicuous for the virulence of their Anglophobia. Of these the most prominent is M. Maillard, municipal councillor for Plaine Monceau district, and also editor and proprietor of La Patrie, a Parisian journal to whom England and the English represented all that is hateful in the world.

Maillard, who has been in London for the special purpose of testing the sincerity of the entente cordiale, and am happy to say that it is found in a kinder and truer light. ALDERMAN RESIGNS

St. Catharines, Oct. 30.—(Special.)—At the city council meeting this evening, S. G. Donlon, one of the city assessors, was appointed to re-measure the property of ratepayers assessed for sewer dues as partial solution of the muddle into which the municipality has fallen in this matter, the city engineer, and which he took from the municipal assessment roll, having proved to be inaccurate.

On motion of Ald. Leubsdorf and Hodgins, a by-law was passed giving the committee, at its next meeting, the authority to re-measure the property of ratepayers assessed for sewer dues as partial solution of the muddle into which the municipality has fallen in this matter, the city engineer, and which he took from the municipal assessment roll, having proved to be inaccurate.

ST. KITTS CRITIC DECEIVED. Thought a "Sub" Took His Role on Friday Night—Attractions at Local Theatres.

Apparently younger than ever, the same Joseph Murphy of old was available for a little chat with The World man between acts at the Grand Opera House last night.

There is one thing that seems to puzzle some people in many towns where I play, and is so little annoyance to me, and that is, they cannot believe that I am the original Joe Murphy.

There was a rumor around town that the Wabash Railway was negotiating to purchase the Grand Trunk shops at St. Catharines.

The Campaign Goes On. A private meeting of the executive of the Municipal Reform League was held yesterday afternoon to consider the greater part of the program.

The Mystic Shrine. The Tamesse Temple, Mystic Shrine, held their semi-annual initiation ceremony and supper in the Temple last night.

Paintings at a Sacrifice. A munificent donation was made to the Home for Incurable Children yesterday by G. A. Farini, F.R.S.M., when he sold over 100 of his own paintings at auction in the art gallery of Chas. M. Henderson.

Local 91 Falls into Line. The special meeting of local Typographical Union No. 91, held last night to consider the change in assessment suggested by the international executive as a means of increasing the strike fund in preparation for the eight-hour day campaign, decided unanimously in favor of altering the basis.

# Fashionable Furs!

Deliveries of live stock on the Union Stock Yards yesterday were 76 cars, composed of 1700 cattle, 42 sheep and 13 calves. These were slightly in excess of last week when the receipts were 77 cars, composed of 1560 cattle, 168 sheep, 202 hogs and 13 calves.

While the quality of the cattle was generally fair, it was not equal to that of one week ago. There were altogether too many rough and unshorn cattle on the market, but there were noticeably exceptional some extra choice lots being seen here and there. A comparison of prices between those obtained yesterday and one week ago shows little, if any, change in quotations on the market in Great Britain is undoubtedly overstocked, and the trade there is in no better case than we are in this country to protect themselves, as far as possible. The prices obtained on the Union Stock Market yesterday by comparison with the British markets show a good margin of prices prevailing here. Buyers in this country are buying altogether too much money, another feature of the market is a drag on the local market is the heavy run of western cattle, which are being taken direct to the seaboard and shipped to foreign points. While this continues the retail trade can be expected to be a little better.

William Leveck bought some 20 cars of export cattle yesterday for which he paid from \$42.50 to \$44.00 per cow. The trade for exporters, said Mr. Leveck, is not too many of that class that were being brought forward for sale. The market is very quiet, but for the better class trade was fair at present. Some of the best lots of Mr. Leveck's quotations are for good export cattle, \$42.50 to \$44.00, medium, \$37.50 to \$39.00, best butchers, \$21.00 to \$22.50, medium butchers, \$18.00 to \$20.00, common butchers, \$15.00 to \$16.50, and bulls, \$12.50 to \$14.00.

Feeders and stockers. The demand for feeders and stockers cannot be said to have been other than nominal. The market for this class was offered on the Union Stock Yards yesterday. One lot of 55, weighing 1250 lbs. each, sold for \$10.00, and a lot of 40, weighing 1080 lbs. each, brought \$8.50 per head, and yet another lot of 10, weighing 1100 lbs. each, at \$8.00.

Children cows offered for sale, and a fair run of values may be said to have been from \$2.50 to \$3.00. As an extra choice, a pair of springers would sell readily, and at the same time command a better price.

There is no other store in the country that will show you, this winter, so varied and complete a collection of furs—and not every store has broken away yet from the habit of selling imitation fur.

Dineen furs all have individuality—a style of their own, and are not haphazard garments, made merely to sell.

## THEY WANT TO SELL LIQUOR ELKS CALL ON GOVERNMENT

Chatham Lodge Deputation Makes Request That Necessary Clause Be Inserted in Charter.

A deputation of charter members of the Elks' Lodge at Chatham waited upon Provincial Secretary Hays yesterday to ask for permission to dispose of liquor upon their club premises. They have a charter, but with a clause added for this purpose.

The members of the deputation were S. Stephenson, Chatham; F. H. S. Clements, M. P., West Kent; J. M. Pike, Jas. Macneil, G. W. Sulman and Dr. W. R. Hall.

Both the members of the deputation and the provincial secretary were reticent with regard to the matter. Some time ago the Toronto Elks got permission to sell upon their premises after a great deal of effort, and now the Ottawa and Chatham Elks are following the example. The government has a somewhat ticklish question upon their hands and it is understood the matter will be approached as a delicate question. The old way of handling these clubs was to allow them to sell liquor as if it was an understood thing, but in later years the government have drawn the cords tighter, and now the clubs' charters have such a prohibitory clause, or, in special cases, a qualified clause allowing liquor to be disposed of under conditions. It is for this qualified clause that the Chatham people are seeking.

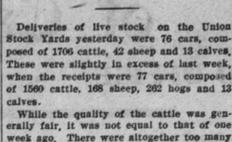

## GRAIN CARRIERS AGROUND. WINDS CAUSE LOW WATER.

Port Colborne, Oct. 30.—The prevailing northerly and easterly winds have caused low water at this end of Lake Erie, and the steamer Algonquin grounded on entering the channel last night, and was unable to reach the elevator until this evening.

The steamers Strathcona and Rosemount were also aground since early this morning. The Rosemount, not so deeply loaded, succeeded in reaching the elevator last. The steamers are drawing 18 feet 4 inches, and are bound from Port William to Kingston with wheat cargoes.
