RED BOMBERS RETAIN GRID HONORS

University of New Brunswick Red Bombers, mud on their uniforms and fire in their hearts, walked off College Field Saturday with their second straight New Brunswick Canadian Rugby Football Union title.

To accomplish the feat, Bombers fought off a determined crew of Tommies from St. Thomas University 14-11 in weather highly unsuitable for the occasion. The sea of mud Bombers were forced to navigate, played havoc with their vaunted ground attack. But unfortunately for St. Thomas, the handicap proved too little.

Butch Bouchard, the courageous UNB pivot, sparked the victory with two touchdowns and a rouge. Mike O'Connor, the team's most prolific producer during the regular NCRFU season, donated the other credits, two converts and a rouge.

Tommy TD's were provided by Fred O'Brien and Terry Gulliver. Jack Boyle converted one of them.

Despite the tight tally, UNB maintained a wide edge in the first downs and rushing departments. Bombers accumulated 20 first downs as against 11 by St. Thomas. Although they could only score a single in the initial 30 minutes, UNB did run up a 9-1 advantage in the downs-made category.

Bombers Pick Up 463 Yards

On the ground, Bombers chalked up a brilliant 463 yards, in spite of the sloppy footing. Tommies secured less than half that aggregate, 217. Again the first half saw UNB compile a very wide margin, 168-37.

It was through the air that Tommies stayed in contention. UNB tried only two passes, completing one — and that was on a pass interference ruling against St. Thomas. Don Grant of St. Thomas attempted 15 toward tosses, found team mates eight times. But three of his throws were hauled from the air by UNB and the interceptions proved costly to St. Thomas hopes of unseating the charges of UNB coach Gerard (Moose) Flemming.

The game was rough all the way. Referee Don Trueman dished out 23 penalties. The diminutive official marched off 165 yards against St. Thomas, 115 against UNB.

The day could have turned out differently had UNB not been adept at recovering its own fumbles. The Bombers lost control of the pigskin seven times, but a Red and Black type gathered in the loose ball on five of those thrilling occasions. St. Thomas miscued thrice, recovered twice.

Butch Bouchard's punting added strength to the some-side. He toed ten times, netted 355 yards in the process for a neat 35.5 mean. This was considerably more impressive than the 30.8 average scored by Jack Boyle of St. Thomas on 16 kicks.

UNB Leads 1-0 At Half

The first half ended 1-0 in favour of UNB. At the outset neither team could get going. After the opening kick-off by St. Thomas' Boyle, the ball changed hands seven times before a first-down was earned. UNB broke the spell on runs by Ian Watson and Dave Irvine. But even so the Bombers were forced to rid themselves of possession without a threat on that sequence.

The premier scoring opportunity came later on a field-goal attempt from the Tommy 30 by UNB's O'Connor. It was blocked. And so the first quarter ended without a point recorded.

In the second period, Bouchard opened the scoring with a high kick from the Tommy 40. It sailed through the end zone for a rouge to put Bombers in front by a unit.

The half ended with UNB in position for more points. Bombers were presented a first down on the St. Thomas 25 but couldn't count before the gun sounded. Mickey Lalor got to the 20, Bouchard's pass to Hugh Walford was hurried and incomplete and Ian Watson scooted to the 15 on the last play before intermission.

St. Thomas received the kickoff of the second segment but couldn't gain and kicked after two futile tries. Bombers then marched 81 yards on nine carries to go ahead 7-0.

Big runs in the rally were engineered by Joey George, Bouchard and Irvine. Bouchard climaxed the spurt from the Tommy three-yard line. He fumbled the snap, recovered and sailed into the end zone through left guard. O'Connor's convert split the uprights.

Tommies Go Ahead

Later in the third quarter, Tommies scored all 11 of their points to squeeze ahead 11-7 in the space of two minutes. UNB was backed deep into its own territory and forced to kick. Tommies took over on the Bomber 20. O'Brien then carried to the 16, Peter McKee to the 12, a pass by Grant was ruled complete: due to defensive interference on the three and O'Brien pushed the rest of the way on the next play. The convert attempt by Boyle was blocked.

Then, on the resulting kickoff, Boyle of St. Thomas hauled off a sweet deception. He merely tapped the ball forward nine yards and fell on it to give his squad possession again. Tommies didn't wait to make the play hurt. On the first scrimmage, Terry Gulliver broke loose around the right end and sped the requisite 42 stripes. Boyle's convert was wide but ruled good due to interference by UNB, giving the game a complete new air and Tommies an 11-7 edge.

But before the wild third quarter petered out Bombers were back in the lead. It took them six plays to turn the trick. George ran the kick back to his own 35, got two more yards on a plunge, Bouchard squeezed his way to the 44 and Irvine advanced the leather to the 48.

Bouchard Scores, George Stars

Next play saw George cross midfield and charge to the Tommy 48. His effort was followed by a terrific gallop on the part of Ian Watson. Watson skirted right end and skimmed 22 yards to the Tommy 26-yard-line. This gave Bouchard a chance to fracture the contest and the UNB signal-caller didn't let it go by. On the next play, he carried the ball himself, slipping over left guard into the secondary defence. As the Tommy linebackers moved into smother Bouchard, he shifted direction, accomplished a 90-degree bank to the right and went unimpeded into payoff turf. O'Connor added the extra point and the home side led 13-11 after three stanzas.

Perhaps the key play of the fourth quarter was George's early in the canto. Bombers were on their own 11, third down and three yards to go. Bouchard called a kick but the snap was too

Grid Action on Saturday

S.R.C. Meeting Debating

Dr. Colin B. Mackay spoke to the SRC at its weekly meeting in the Students' Centre Wednesday, Nov. 2nd. In his remarks the president expressed his appreciation to the students for their part in making Lord Beaverbrook's visit so successful. Dick Hale also read the following letter from His Lordship.

Dear Mr. Hale,
Thank you so much for the kind expressions of thanks in your letter.
It was a great occasion for me to speak to the students on Tuesday.

The university has never been in such high estate as it is at this moment. The enthusiasm of the students will build into one of the leading educational institutions of the country.

Yours sincerely,
Beaverbrook.

The next item on the agenda was Bill Griffin's report on the annual NFCUS conference held in Edmonton. Following the report Mr. Griffin was asked questions concerning future plans of the federation, and what they planned to do about the CUDU Debating Finals. He reported that \$200.00 will be paid to the winning team.

The newly elected freshmen reps. were introduced to the council, and promptly tried to get the motion whereby they were responsible for damage to Memorial Hall withdrawn. Their motion was defeated.

GREGG TO SPEAK

The Hon. Milton F. Gregg, Federal Minister of Labour, will speak at a gathering at the community Y Saturday, November 12th, on his experiences while in Israel last summer. A special invitation is extended to university students. The proceedings get underway at 8.00 p.m.

high and fell to earth in the end zone. It looked for a moment like UNB would be lucky to escape with a safety (two Tommy points). A possibility arose whereby a Tommy player might dive on the ball for a touchdown to put the visitors in the lead again. That could have been fatal at this stage of the afternoon.

But George came through to save the situation. He gathered up the ball from its resting place and nudged his way to the 21 for a first-down. Although Bombers were subsequently forced to kick, they had survived a bad moment and from then on the home side controlled the play enough to keep the hungry Tommies at bay.

Interceptions Save Show

Tommies were now desperately trying to come back. Their desperation forced them into the air with little discretion employed and UNB intercepted three of the late tosses to choke off the attempt at a renaissance. Mickey Lalor did the honours on the first interception and nearly got a TD for his trouble. He ran the ball back from his own 20 to the Tommy 15 before being hauled down, the game's longest run, a great 75-yard gallop.

When Tommies got their hands on the ball again after three fruitless UNB plays, they went 40 yards to the UNB 48 and looked like they might flash the rest of the way. But Irvine broke up one of their passes with the second clutch interception. He got to the Tommy 45 and seven plays later O'Connor kicked a rouge for the final point of the fixture.

Time was fast disappearing and but five plays remained before the gun sounded the end. On the third of those plays, Al Moller of UNB intercepted another Tommy pass on the visitors' 30 to give Bombers possession. Bouchard plunged twice for four yards to run out the clock.

Blood Drive Success

The annual Red Cross Blood Drive, held on the campus Tuesday and Wednesday, November 1st and 2nd, has proved a success, due to the fine response on the part of the students. Not only was the quota reached, but a new record was set at the provincial university, with 537 registering. This is well over the total for any other year, which has never exceeded 475.

Out of an approximate enrolment of 903, 523 students registered, and 14 from the faculty and administration. This gave a percentage of 59.46. It seems unfortunate that a greater number of the nearly 80 staff members could not have donated, and so boosted the total.

There were also a number students, who due to athletic commitments, could not donate. They will however, be given a chance at a later date, when, it is hoped, another clinic can be arranged.

The handicap at the university is 1.25, which gives a gross percentage of 74.33. Mt. Allison won the Corpucle Cup last year, signifying the highest donation per enrolment at a Canadian university, with 76%.

The breakup according to faculties reveals that Science racked up the highest score with 73%; arts, business and education followed with 72%, forestry with 57%, and those mighty engineers, half of the total enrolment at the university, with 43%. Was that great big needle too much for you, boys?

Thanks are extended to those who did donate, and especially to those who helped make the campaign so successful.

Bob Ross, Chairman Blood Committee.

Linton Claims Alcohol, Problem

Mr. John Linton, Field Secretary of the Inter-Collegiate Association for the study of the Alcohol Problem, gave a brief talk to interested students in the Lounge of the Students' Centre last Thursday evening entitled "Is Alcohol a Problem?"

Mr. Linton cited three examples whereby instruction in alcoholism was given to the university student. The Roberts Award Editorial Contest gives the student his right of expression and entitles him to part of \$2,400 in prize money. The topic this year is "Abstinence or Moderation?"

Secondly, a summer school is held at one university each year in Canada. Thirdly, the Association distributes literature to the libraries on various camps.

The main facets of the problem are the overtact and the disease concept. To overtact, means property damage and personal harm. These are the chief worries of the local authorities, which sometimes are placed above the disease concept, the root of the problem. There are over 200,000 alcoholics in Canada compared with 50,000 suffering from the malignant disease tuberculosis and 29,000 afflicted with polio.

An alcoholic is best defined as "one who when he drinks cannot stop". There is no control in the person afflicted and compulsive drinking becomes intensified as a result of resentment for those able to drink without becoming addicted. Their craving reaches a new high. Why can't he leave it alone? Nobody has been able to solve this enigma, but a few definite things are known. Alcohol will set up its own compulsion—a craving; and secondly there is the neurotic, a person who craves before drinking and drinks to quiet his nerves or dull the pain. People with neuroses to drink do not necessarily become alcoholics.

The dangers of alcoholism are malnutrition and mental breakdown. Physically alcohol causes hardening of the liver, skin diseases and eventually hallucinations which are serious nervous disorders.

The problem to readjust the alcoholics is a big one as the people concerned form a large part of our society and not of the skid row variety.

The teen-age level of alcoholism was described by Mr. Linton as a recreational drunkenness and the having of a good time. Mr. Linton stated that fraternity houses were the worst offenders and said that a definite problem exists in universities across the United States and Canada.

transportation and finance.

Those interested in securing an interview are asked to leave their names with the public relations office as soon as possible. The public relations office is situated in room 13, the basement of the Arts Building.

Students in maths., physics, chemistry and engineering are eligible for employment in the various departments if the company.

BRITISH AMERICAN OIL COMPANY

Representatives of the British American Oil Company will be on the campus November 15 and 16 to interview students for employment. The company is interested in students who will graduate in May, 1956, for permanent employment, and also undergraduate students for summer employment.

Students in maths., physics, chemistry and engineering are eligible for employment in the various departments if the company.

VOL. 88 FREDERICTON, N.B. NOVEMBER 9, 1955

Letters To The Editor

Fredericton, N.B. Oct. 20, 1955

The Editor, The Brunswickan

Dear Sir:

Last week you asked for opinions. Well, here's mine. I don't know how the rest of the students from God's country feel about this neck of the woods, but as far as I'm concerned, it's for the birds. I could talk about a lot of things but the thing that really gripes me is the liquor laws in this so-called province. Back home when a guy feels thirsty he can go to the nearest grocery store and buy a box of beer, if he wants a glass he can hop into a tavern. What happens here, a guy has to walk two miles for dishwater and drink it behind the bathroom door. A guy even has to fight for the brand of dishwater he likes. I guess they only make two brands in this province. Namely bad and awful. I've heard all about the rotten political setup, liquor-wise here, and

I've only been here three weeks. I guess everybody knows about it. I don't see anybody complaining to anyone but his best pal. Is everybody in this province a do-do bird? Also the movies that come to this town I've seen at least two years ago.

Yours truly,
 A disgusted Freshman
 P.S. The women here stink too.

(Editor's Note—It is quite true that we called for letters to the editor but we would draw your attention to the first of the notices—"Have You had an Intelligent Thought Lately?" This letter, we feel, does not fall into the category of intelligent thinking. Possibly a column dealing with "What I Don't Like About New Brunswick" could be instituted to give aggravated Upper - Comedians a chance to express themselves. It is difficult for the editorial staff to answer the comments on the New Brunswick Liquor situation given by "A Disgusted Freshman" for fear of agreement or bias. Any and all members of our readership are invited to answer for us. Space will be provided for any letters received.)

NFCUS President Rights The Brunswickan

The Editor, The Brunswickan

Dear Sir:

I have just read your editorial of Wednesday, October 26, entitled, "Order Out of Chaos". Since the subject matter is of such vital concern to NFCUS, I felt that it might be in order for me to write to you.

While I do not intend to comment on the "anti-federation sentiments which The Brunswickan has continually expressed", this being an editorial prerogative, I do feel that some effort should be made to correct the mis-statements and mis-interpretations of fact which appear in the editorial.

In the first paragraph of the editorial is a statement concerning "the mismanagement of last year's debating final in Toronto". Last year's debating final was held at McMaster University in Hamilton. The technical arrangements for the debate were admirably carried out and the event went off without a hitch. I, myself, was privileged to attend as a spectator and was impressed with the efficiency with which Ivan Cody of McMaster and Peter Tanguay, NFCUS CUSA Chairman, organized the proceedings. I believe that any of the debaters present will substantiate this judgment. Certainly, no criticism of the management was expressed at that time.

In the third paragraph of the editorial, there is a reference to "the complete loss of a student art exhibit". The implication being that the National Office of NFCUS was responsible for this loss. Two comments would appear to be in order. First, there was no complete loss of the exhibit. After a successful showing in Toronto a small number of pictures went 'in the road' to Western, Waterloo, and Assumption colleges. Some few of these pictures were, unfortunately, misplaced. The lost pictures represent less than 10% of a total number of over one hundred pictures and drawings. Secondly, the Art Contest last year was the mandated responsibility of the University of Toronto, and was not conducted from the NFCUS National Office. This procedure is in keeping with the familiar policy of NFCUS giving specific projects of this nature to member schools for implementation. The National Office contribution consisted of the circulation of publicity material prior to the contest. Finally, it is worth noting that the National Office has now taken upon itself the responsibility of finding the lost pictures. They are believed to be in one of the three universities mentioned above, and every effort is being made to find them so that they may be returned to their owners. It is needless to say that everyone in the NFCUS organization regrets the loss of these pictures.

A further statement in paragraph three refers to, "The long months of silence which followed one of those unique short story competitions". Here again the imputation would seem to be that this is the sole fault of the NFCUS National Office. Again the facts imply a different conclusion. The Short Story Contest was mandated to McGill University. The contest proceeded successfully to the point where the McGill NFCUS Committee sent the stories to the first judge. The stories were lost in the mails. Hence, of course, no winner could be announced. Further, while the contest was a mandated responsibility and not the responsibility of the National Office, nevertheless the National Office has taken upon itself the task of attempting, with the co-operation of the Post Office, to find the stories. Any results obtained will, of course, be immediately circulated by means of the newsheet, ITEMS, which you are receiving weekly.

It is suggested in the editorial that, "an investigation of NFCUS spending is in order. It is up to the member universities to investigate one." There is an annual investigation of NFCUS spending by the Conference, attended as you know by responsible representatives of all the member universities. It is this meeting which allocates funds for the coming year. In the case of the debating prize, referred to at length in the editorial, "money mismanagement", can be ultimately traced to the Toronto Conference at which the delegates passed the following resolution: "Ottawa/Queens: Be it resolved that the National Finals be held in accordance with the CUSA Constitution, and that the winning universities." The \$200 was subsequently 11th on the priority list for projects. It was on the basis of this resolution that the team be awarded \$200 and be sent to Europe to debate with other executive meeting in March was forced to act. The action taken was, and we still feel, the best possible under the circumstances. A number of considerations involving the Travel Department and the travel situation in general had arisen between the time of the Conference and the Executive Meeting, thus rendering the interpretation made the only possible one. It is worth noting, finally, that the prize money of \$200 to last year's winners, while originally intended as expense money for the European tour, has now been placed first on this year's priority list and will most certainly become available at some time within the next few months.

I hope that I have managed to clear up a certain amount of confusion by this letter, and I trust that you will exercise the trust placed in you by the students of U.N.B. by helping to correct the errors of fact which have been made.

With sincerest best wishes, I remain,
 Your sincerely,
 Peter G. Martin,
 President, NFCUS.

Our Reply

We feel that in any respect Mr. Martin has missed the point of the editorial "Order out of Chaos", printed in the October 26th issue of The Brunswickan, and has, in the end, substantiated the claims of the Brunswickan — i.e. that the NFCUS is inefficient and needs to be rejuvenated before it can expect the support and needs of the students of this campus.

We feel, and still feel, that there is a need for a national student lobby. The NFCUS is the only such organization at present. We appealed for action which would make the NFCUS an efficient and operating body. Present NFCUS inefficiency can be seen in the examples cited:

- (1) Mismanagement of the CUSA debating final. Although the actual debates may have been handled with expert administration the finals are not over until the winners have been given their just reward. This reward has not been given and it would appear to be the inefficiency of the NFCUS.
 - (2) The loss of a portion of the Art Exhibit. This has been substantiated by Mr. Martin's letter.
 - (3) The loss of the Short Story Contest entries. The question can be asked, "Why were these stories not sent by method of operating in something as serious as this competition?"
 - (4) An investigation of NFCUS spending is in order. We do not question the legality of the NFCUS expenditures but would like to see a more sensible allocation of funds. If money is to be spent on a debating prize then these funds must be guaranteed before the prize is advertised. Granted a large portion of the NFCUS revenue is taken up in administration costs, but it would be reasonable to ask that some of this revenue be used to finance projects in the NFCUS programme. These funds and the accompanying programme have been absent for some time.
- We do not condemn the NFCUS executive alone in this. If projects are mandated and the mandates are not fulfilled then the respective universities are responsible, to a point. It is still up to the national office to see that these mandates are carried out.
- Sir, we feel that your letter provides proof of NFCUS inefficiency and request that during your year in office you attempt to rectify some of the faults of the organization. If you can accomplish some improvements then you will be doing the NFCUS and all Canadian university students a great service in bringing the day when the Canadian students have a national representative body that nearer.
- Yours sincerely,
 The Editorial Board of The Brunswickan.

GOODFELLOW IS BULL 'O THE WOODS

MESSAGE FROM HOOT

Paul Bunyan has again visited the campus and is glad to note the many improvements:

The Students' Centre with its excellent cafeteria, the beginning of a much-needed Chemistry building, improved landscaping and improved walks and roads.

He also welcomes for the first time a post doctorate fellow in Forestry, Dr. Peder Braathe. Dr. Braathe is here for one year as a post doctorate fellow through the assistance of the National Research Council of Canada. He is a research officer (silvi-culture and mensuration) at the Norwegian Forest Research Institute, Vollebakk, Norway, and will continue studies in these fields in Canada.

Paul is also very pleased to learn that the Honourable Lord Beaverbrook, through the Beaverbrook Foundation, has made available scholarship at U.N.B. for graduates of British Forestry Schools. Under this new and welcome gift, he welcomes Roy F. Sutton, a graduate of Edinburgh University and working for a masters degree in the field of silviculture, Peter A. Pearce, a graduate of Aberdeen University and working for a master's degree in wood technology and Keith W. Brown, a graduate of University College of North Wales and working for a master's degree in forest entomology. He also welcomes another new graduate student, R. M. McKendry, U.N.B. '53, working for his master's degree in forest management.

Paul is also pleased to learn that we have over fifty new students listed as home addresses but regrets that more than many provinces and New Brunswickers who should be most forest-minded are not enrolling.

Paul is also getting ready to welcome, after Christmas, Prof. David Irwin who has spent the year at the University of Michigan in graduate work and will return with additional knowledge and techniques in seasoning and technology.

The year promises to be a busy one for students and staff and I trust, with the energy and enthusiasm already shown, will be most successful.

IS WELL ATTENDED

Our Forestry Reading Room was again the place for our annual Forestry Week Social which was held on Wednesday, 2nd. We were honoured in having as our chaperones, Dr. and Mrs. Pringle, Mr. and Mrs. Scheuit. Mr. and Mrs. Rae Brown were also in attendance although Rae was stag until well on in the evening which came to an end just as the coffee (?) was being served.

Movies were shown at the commencement of the evening which consisted of a variety of subjects from cartoons to fishing trout and salmon in Newfoundland.

There was dancing in the Reading Room under the able direction of disc-jockey J. Y. A. Barr who gave varied selections from Miller and Goodman, and a half-time Victor Borg presentation.

Coffee and sandwiches were served by the social committee at eleven and the brew was noted to be up to the standard of our Association meetings.

The social committee would like to thank all those who helped to make the evening a success. Special thanks to our sandwich makers who were forced to work under very trying conditions.

It is unfortunate that more of our faculty were unable to attend this function but it is hoped to make these socials a regular monthly affair of the Association.

The Years Ahead

One of the features of our economic life is the continuing increase in the productivity of the labour of men, an increase which springs from the rapid accretion of scientific knowledge and the dynamic technology which expresses the practical results of this knowledge. This growth in productivity in about 2 or 3 per cent per year and it makes possible the higher wages and expanding demand which support our rising standard of living.

All branches of industry do not share equally in this growth and one that is sluggish tends to be displaced because its product becomes expensive in comparison with that of its more aggressive competitors. Agriculture lagged for a long time and for this reason has often had to be subsidized. Although it has made a remarkable spurt in the last 25 years, increasing its output per man-hour at a rate of over 4% per annum in the U.S. and probably close to this in Canada, it is still only about one-half as efficient in terms of man-hour output compared to the industrial average.

A look at our forest industries shows that the lumber industry in the East, at least, has not been able to keep pace and has been losing markets to competing materials. There are several factors which contribute to this situation and they are not easy to change. The one bright prospect of improvement lies in a thorough integration with the pulp and paper industry, for the most effective use of wood and particularly for the converting of the large amount of sawmill waste into profitable use. The development of machines

(Continued on Page 4)

The Week In Review

The first event of Forestry Week was the Bushman's Ball. There was a good turnout and everyone agreed that it was very successful. We owe our thanks to Don Merrill and Co. for being able to procure the Boxing Room, thereby reducing the admission price. The Foresters chant was shouted several times during the evening under the capable leadership of Ted Edwards.

"Stumpy" Bird demonstrated some new methods of dancing. Bird seemed a little awkward but with more practice he should improve. Who were the office Foresters wearing white shirts and ties?

The annual soccer game on Sunday was a very good game. Only three goals went through the legs of "Sieve" Bryant. Could the Engineers please wear running shoes in future contests. Our star Squid Porter, is carrying a cast on his foot due to a broken ankle bone. It is too bad the transitmen have to resort to such tactics to win games.

Speaking of engineers, they seem to have heeded the instructions they received prior to Forestry Week. What do the apron strings feel like fellows.

No one person dominated the competitions on Field Day. B. for bushman, Goodfellow emerged as the Bull of the Woods, having garnered the most points.

There were no events planned for Tuesday night of Forestry Week. That is the Foresters had nothing planned, but it appeared that other faculties had ideas. Paul Bunyan passed away early Tuesday night. By his request, he was cremated and his ashes were spread upon the waters of the underground creek on the campus. Paul was created in fifteen days and he measured eight feet by twenty feet. He enjoyed watching over the campus for two days and nights from his place of vigil atop the Forestry Building. It seems that his moorings came loose and he tumbled twenty feet to the ground.

A decision from the inquest is still pending. When a verdict is reached, justice shall then be meted. Alas, there is one slight complication. If a true bill is, (Continued on Page 4)

Forestry Sports Night Highlight of Week

Bill Goodfellow, third-year forester from Plaster Rock, N.B., won the Bull of the Woods contest at the annual Forestry Field Night held on Oct. 31. Goodfellow amassed a total of 13 points 4 more than second-place Lindon Gray. Points were awarded on a 3-2-1 basis in the eight events. An average of nine contestants took part in each event. A new event this year was the power saw contest.

Results were as follows:—

- BACK PUMP RACE**
1. Goodfellow: 4 min. 7 sec.
 2. Cunningham: 4 min. 9 sec.
 3. Gray: 5 min. 11 sec.
- KNIFE THROWING**
1. Goodfellow
 2. Stewart
 3. Matiece
- AXE THROWING**
1. Griffiths
 2. Adderley
 3. Goodfellow
- CHAIN THROWING**
1. Gray
 2. McCormack
- CROSSCUT**
1. Gray - Dwyer
 2. Goodfellow - Doyle
 3. Saunders - Morgenstern
- AXE CHOPPING**
1. Goodfellow
 2. Gray
 3. Saunders
- POWER SAW**
1. Newcombe
 2. Stewart
 3. Cunningham and Lacate
- BUCKSAW**
1. Deichmann
 2. Gibson
 3. Goodfellow

JEFF'S MESSAGE

Another very successful and memorable Forestry Week has nearly ended. The bulk of the credit goes to the Chairman of the committees; Sid Eddy, Ted Renault and Paul Courtice for the Brunswickan, Art Cowie for advertising, Tom Ernest for the soccer game, Don Merrill for the Bushmen's Ball, Doug Sleeman for the Field Night, Jim Bruce for the Social Night, and Jack Adderley for the coming NOTORIOUS Hamerfest — with the help of committee members (Continued on Page 4)

"Elementary My Dear Watson"

One of the most popular writers of detective fiction during the period between 1887 and 1927 was Sir Arthur Conan Doyle. Better known even than the author himself is the famous hero of his stories, Sherlock Holmes.

It will be remembered that Sherlock Holmes, aided and abetted by the somewhat bumbling Dr. Watson, solved the mysteries with which he was confronted by deductive reasoning, after keen observation of the characters and objects connected with the crimes. In fact, it was Holmes' keen observation that led to the solution of the mysteries while poor Dr. Watson was left in the dark because, as Holmes suggested, he saw but he did not observe.

Too many of us today are real-life Dr. Watsons, tumbling through a world of monotones, seeing little, observing less, and deducting practically nothing from our meagre observations. In a world which is so crammed with colourful and interesting sights this failure to observe leads to a tragic drabness in our lives which could be eliminated for the most part, not by more and more spectacular television programmes or super colossal movies, but simply by observation of the world around us with an awakened awareness.

When autumn colours are at their height in the St. John River Valley it is indeed a dull person who does not notice them. When we see some familiar scene photographed in colour most people are amazed by the beautiful colours suddenly revealed. However it shouldn't be necessary to wait for some dramatic change or new perspective to bring to attention the interesting world around us. This fascinating scene is always there, it remains for us to observe it.

The failure to observe what is before us, however, is especially bad when it applies in our professional lives. Foresters, and indeed other scientists as well, often become engrossed in the mechanical gathering of complicated mensurational data without making sufficient use of information available simply from observation and deduction. The record of great discoveries made by keen deduction from carefully observed information is too long to dismiss this straightforward approach as "old-fashioned" or "not scientific".

Perhaps the greatest argument against personal observation and subjective reasoning is the danger of what has been called ego bliss — the tendency to see only those things that support some preconceived hypothesis. On the other hand a deep-rooted case of ego bias can be even more difficult to cure when it is complicated by masses of micrometrically measured, machine manipulated numbers. Six places of decimals are no substitute for careful observation and cautious reasoning.

So if you would push back the frontiers of knowledge in your profession take along the best tools available to you and use the latest techniques, by all means, but look up now and then from your measuring and look around. Who knows, you might observe something that none before has noticed.

Were You There?

"Now do you remember?"
"Oh yes, so that's what D.b.h. means."
"And remember the cartoon about the bleary-eyed surveyor, wasn't that some nice. And the look on that teddy bear."
"Say, do you foresters look like that all the time?"
"Well not quite all the time."
"You have to hand it to the foresters, that was the best dance ever."
"Yes sir, out just wait until next year!"
"Wasn't Bushmen's Ball a new name?"
"Yes it was; in fact, it was the first forestry dance held in the Boxing Room and it was a terrific success. There were about 200 people there and everyone really enjoyed themselves."
"Bye the way, who were the chaperones?"
"Dean Gibson and his wife, Prof. and Mrs. Hilborn and Prof. (Continued on Page 4)

SOPHOMORES VICTORIOUS OVER . . .

At 2:00 p.m. Wednesday, November 3rd, the Foresters held their annual inter-class tug-of-war contest on the terrace in front of the Arts building. Dr. Colin B. Mackay, president of the University, acted as official judge for the contest. This year there was more enthusiasm shown than we have seen in a long time. The first round saw the senior class pitted against the 3rd year class, while 4th year boys battled with the 2nd year class. The seniors

were easy victors and it seemed they might go all the way. The 2nd year team, however, had a tough fight for their win over the 4th year class.

In the second round, the seniors pulled against the freshmen, who had had a bye in the first round. This was a very well contested pull, but the old men weren't quite up to par and lost a real close one to

. . . FRESHMEN IN ROPE STRUGGLE

the lowly freshmen. Too bad boys, but I guess we seniors just weren't thirsty enough. In the final pull, the freshmen against the sophomores, the 2nd year boys once again proved their skill and power by edging out the freshmen in a very tough battle. This was one of the best contests we have seen in a long time. Congratulations sophomores; and to you goes a big box of green bottles. Collect it at the "Hamerfest".

VOL. 88 FREDERICTON, N.B. NOVEMBER 9, 1955

FORESTERS WON Engineers Three

The original, the one and only, the only one you need, that week, Forestry Week, opened Oct 29 at 1:30 on College Field with the perennial Soccer game between the Slide-Rule Jockeys and the Forest-Barons. Our Dean, Dr. J. Miles Gibson, officiated the opening.

With a grunt from the Engineers and a spirited cheer from the Foresters, the caper started off with swift play. Swiftly indeed, for even before all Engineers had time to evaluate their stand, as some of them were still fumbling for their slipsticks, the stubble-jumper from Manitoba, J. Chalmers, following a pass, unprecedented for its accuracy, from Herring-Choker C. Rayworth, literally shot the ball with inimitable athletic grace past the dumb-founded, goal-tending, stationary engineer. This score occurred after 7 minutes of play.

At the 1st 1/2, mechanic Hersey made a goal (Engineers consult Dictionary) from a corner of the field. This was removed "sur le champ". It was not before the end of the first-half that grease-monkey Randall got hold of the ball and etc., etc., etc.

Midway through the second half, T. Edwards, adroit centre half on the Forestry squad, decided the contest was getting sort of lopsided (the score does not always do justice to competency) so he kicked the ball into his own net. The above was tried again and again during the remaining time but without success due to mechanical, electrical, and civil obstructions.

Our extension of regrets to A. Porter. We, and especially your teammates, wish you a speedy recovery from your ankle fractured during this game.

As an African, from Iwaz-Asaukurpliaerfaurtheefbei, once said, "A defeated team is only so he kicked the ball into his own net."

THE YEARS AHEAD

(Continued From Page 3)

to do this is well on its way but the organization and accomplishment of this integration is a task which lies ahead.

The pulp and paper industry on the other hand, has been able to expand and to invade other fields. Its rapid technological development has permitted this, while making available to the industry increasing supplies of raw material in the form of what was formerly waste. These gains in productivity have been largely due to improvements in manufacturing techniques with little corresponding advance in the growing or production of wood.

The industry, now using over 30 million tons of wood a year is largely dependent on the United States market. It was built up principally because we were fortunate enough to have large quantities of long-fibred softwoods and low-cost hydroelectric power. These advantages are being threatened by new sources of power and new manufacturing techniques.

The pulp and paper industry in the United States is itself expanding rapidly and nowhere is this expansion so evident as in the southern group of states. This group of states, which now consumes twice as much pulpwood as the whole of Canada, is expected to increase its rate of production in the next 20 years by another 50 per cent.

It is increasingly evident that the industry is moving into a situation where it can avail itself of high wood productivity. The growth of trees is more rapid in the south and the general area permits the more general use of mechanical equipment in the production of wood.

This is the challenge we face and it means that we have to grow better trees faster and deliver wood to our mills at less cost. We have been very complacent about our trees. In the future we must think of introducing superior exotics or of breeding ones to suit our special purposes and to increase the productivity of our forests. Instead of pushing into more remote areas we have to develop our better growing and more accessible regions to their full capacity.

THE WEEK IN REVIEW
 (Continued From Page 3)
 punishment. It was learned that the power of the court has been turned by the Forestry jury, the revoked, and this power is now court cannot legally mete out being used by the governing

body. The governing body has joined in the game of retaliation. They have had a few co-eds confined to quarters for a period of one week.

The social, on Wednesday night, was attended by about forty people. The recording of Victor Borge, presented at the end of the evening, was a great climax for a successful evening.

The Tug-o-War was held at 2 o'clock in front of the Arts Building on Thursday. The sophomores were the winners and to them goes a case of bottles and the bill for lawn repairs.

Thursday night turned out to be a night of inactivity even though this was not the original intention of the Foresters.

Everyone knows what activity took place on Friday night. Congratulations Hazen Marr on your work and the theme of the Fall Formal. You will have to double time to beat your own records of success for the formals.

The Hammerfest was held on Saturday by a few Foresters. Officially it has been postponed to Saturday, November 12th, due to excessive rain last week-end.

We notice that Tom Foulkes has developed his talents and has joined the cheerleaders.

Many people heard us during the week, and many shall hear us again next Saturday. When Engineering Week rools around, remember the Foresters are still on the Campus.

JEFF'S MESSAGE

(Continued From Page 3)

from other classes. Credit is also due to all those in any way connected with the activities of the past week. The way students volunteered to help out during this week is indicative of greater things in the future for the Association.

Special thanks go to the Forestry Professors — Dean of Forestry, Miles Gibson; Hank Blenis; Director of the Maritime Forest Ranger School; George Miller and Doug Savage, of the New Brunswick Forest Service; The Eitor and Staff of The Brunswickian; and the many local merchants who contributed gifts towards the Field Day and the

FEATURES

★ ★ ★ SLABS 'N EDGINGS

We know that Foresters are irresistible, but last Tuesday night was the first time a Forester has ever been overcome by the co-eds. Talk about frustrated women! (We notice that the men (?) in the other faculties waited until the girls had made the kill and then came to pick the bones).

Last week it was our pleasure to announce that many merchants had generously donated prizes for the Field Nite. It is now with disgust that we report that some contemptibly cheap sneak-thief gathered up enough courage to remove a pair of moccasins, a flashlight, a compass and a box of chocolates from the display on the second floor. This display has always stood the test of people's honesty, but now we can see the depths to which some vermin will crawl. We wonder if the hero can dredge up enough guts to return the items.

Congratulations to Bill Goodfellow, this year's Bull of the Woods, and to Doug Sleeman for a most successful Field Nite. We would like to extend our thanks to the professors and students who contributed to the efficient handling of the various events.

The Bushman's Ball, on October 29, was a triumph, justifying the many hours of work Don Merrill and his committee spent in its preparation.

A young man was out on a first date with a rather flat-chested girl. The evening ended on the sofa in the young lady's parlor. The boy put his arm around her and made a few preliminary passes. The girl stiffened indignantly. "Here, here!" she exclaimed. "Where, where?" he replied.

The following definition of a Forester is reprinted by request. The Forester is an amateur woodsman with a college education.

There are two classes of Foresters. One class believes in keeping abreast of those broad, dynamic movements of the present day that challenge the best efforts of the nation's thinkers. The other class fight fire, builds truck trails, plants trees, and wears old clothes.

Some Foresters have offices, some live in Ottawa, and some work in the woods. Lots of Foresters spend practically their entire lives in God's great out-of-doors. They love to hunt and fish. They would, too, if they had time.

It used to be said that a Forester's best friends were his horse and his axe. Today a Forester has no need for a horse, and he might cut himself with an axe. Years ago most every Forester wore a big stetson hat, and carried a gun on his hip and a flask in his pocket. Nowadays his stetson hats are only worn in movies and you hardly ever see a Forester carrying a gun.

An interesting thing about a Forester's life is that he meets all kinds of people from hobos to multi-millionaires. It is not uncommon for a Forester to have the privilege of personally doing favours for a millionaire tourist. However, there is no record of a millionaire tourist doing a favour for a Forester. But even if they don't make much money, it's nice, steady work and they have lots of fun.

Another satisfactory thing about a Forester's career is that he is his own master, absolutely independent and answerable to no one for his professional conduct. That is, except to his wife, ladies, garden clubs, sportsmen's associations, nature lovers, newspaper editors and local politicians.

★ CAMPUS CO-ORDINATOR'S CORNER ★

The purpose of the Campus Co-ordinator is to assist in keeping club and social activities from clashing, to act as mediator among campus organizations and to keep the student body informed of new clubs and societies.

If you would like news of your organization to appear in this column, or should you plan a special event, place your information in a sealed envelope addressed to 'Campus Co-ordinator' and leave at the Brunswickan office.

SPECIAL EVENTS:

U.I.S. — Every Tuesday
Canterbury Club — Every Sunday, Cathedral Hall, 8:30 p.m.
S.C.M. — Every Sunday, St. Anne's Parish Hall, 8:30 p.m.
Debating Society — Monday, November 14.

REGULAR EVENTS:

Residence Formal — Lady Beaverbrook Building, Nov. 25.
Film Society — (Importance of Being Earnest), Nov. 20.
Senior Class Party — Student Centre, Nov. 18.
U.N.B. vs. CMR — College Field, Nov. 12.

In 18 Easy Lessons

How To Flunk

CUP FEATURE

1. Enter the course as late as possible. By changing your curriculum after school starts, you should be able to avoid classes until the second or third week.
2. Do not bother with a text book.
3. Put your social life ahead of everything else. Interesting conversation should be able to drown out the noise of the lecture.
4. Observe how seedy most professors look and treat them accordingly.
5. Make yourself as comfortable when you study. If possible draw up an easy chair by a window.
6. Have a few friends handy during the study periods, so that you can chat when bored.
7. If you must study, try to lump it all together and get it over with. The most suitable time would be the last week of school.
8. Keep the study table interesting. Place photographs, magazines, goldfish bowls, games and other recreational devices all around you while studying.
9. Ignore dictionaries. You could never learn all the words in one anyway.
10. Never interrupt your reading by checking on what you have learned.
11. Avoid bothering with notebooks. If you plan to use one, so that you can draw pictures of airplanes during the lecture, try to follow the simple arrangement of keeping all the notes for a given day on the same sheet of paper.
12. Remind yourself frequently how dull the course is.
13. Review only the night before examinations, and confine your efforts to trying to guess what the teacher will ask.
14. Stay up all night before important exams. You can spend the first half of the evening discussing your determination to cram and the latter half drinking coffee.
15. Write your exams rapidly. Glance at the question and then put down your first impression.
16. Do not let academic work get mixed up with your daily life.
17. When in the lab work hurriedly. Do not waste time worrying about what is going on.
18. Remember that success in life is your main aim and never let extraneous matters such as grades interfere with this objective.

Forestry is a very pleasant profession because it is so easy to get ahead. Many Foresters graduate from college with only a few debts and immediately get a job and a wife. In about ten year's time, in addition to the same job and the same wife, they have more debts and five kids. That's why Foresters are so happy.

Once again Woodbridge's Cabins were the site of the Engineer's Fall Smoker. Oct 28 saw over 100 students and one lone C.E. professor converge upon this outpost in the wilderness. Several hours of pranks, singing, and of course, drinking saw the liquid supply disappear. From there, we don't know where they went, but apparently a 4th year Electrical, of orchestral fame was found wandering home from Oromocto at 4:30 a.m.

This successful evening was capably organized by Lou Pertus. Sunday afternoon, Oct. 30, at college field, a high flying Engineer's soccer team defeated the Foresters by a score of 3-1. Jim Brooks, the engineer's goalkeeper became very bored and fell asleep three times during the contest. It is understood that he had been promised a free ticket to the Hammerfest if he let all the Forester's shots go in. Jim, widely known as the Forester's friend, kept his end of the bargain, but fears he will not receive his promised ticket due to the fact that the Foresters failed to get more than one shot on goal during the whole game. Which all goes to prove that Engineers always keep their promises — even to the bushmen.

The Glory Road

The above pictures portray some of the action which took place at College Field Saturday when the Red Bombers downed St. Thomas Tommies by a close 14-11 score, allowing UNB to retain the Senator Burchill Trophy.

A hard-fought battle throughout the game saw the determination of both squads brought into the fore as indicated by these closeups, depicting the evident rivalry which has always been the code of Bomber-Tommy tussles on the gridiron.

The first and last shots show the scoring of the two UNB majors by Butch Bouchard. The first touchdown (top picture) came as a result of a line-plunge by Bouchard. Recovering his own fumble, UNB's quarterback plowed his way across the goal line to give the Bombers a 6-0 lead in the game. The important part played by the unheralded linemen is shown by the hole which they opened to allow Bouchard to put UNB in the lead.

Bouchard is again depicted in the bottom picture as he crosses the line to score his second touchdown. On the Tommies 26-yard-line, the quarterback picked a hole in the line and weaved his way to pay-dirt without a Tommy hopeful laying a hand on him.

In the second picture from the top, Ian Watson is shown hitting the ground as a result of a St. Thomas tackle after a 15-yard end run. Bernie Chisholm (13) makes the tackle as Jack Boyle (39) races over to back him up.

An unidentified UNB ball-carrier goes down as he is tackled from behind in picture No. 3. Two other Tommie tacklers prepare to hit the Bomber carrier as Fred Jardine of UNB blocks and Bouchard and Gordon Campbell follow up the play.

The second shot from the bottom shows reliable Joey George being hit hard after an end run. Other UNB players recognizable in the picture are John Benson and Mickey Lolar. The remaining players are Tommies moving in for the kill.

Story in Statistics

Here are the statistics for Saturday's UNB-St. Thomas game.

	FIRST HALF		GAME	
	UNB	ST. T.	UNB	ST.
First downs, ground	8	1	19	6
First downs, air	1	0	1	5

Field goals, made	0	0	0	0

Discuss Maritime Union

The possibility of forming a Maritime Canadian Rugby Union, to govern the Canadian football game in the seaside provinces, is strong this week following a meeting of New Brunswick teams in Moncton Sunday.

The MCRU, if it becomes fact, would govern ball on all levels in New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland. The new group would be affiliated with the Canadian Rugby Union.

Sunday's meeting was held to determine whether interest was high enough in this province to warrant forming MCRU. Behind the move are the rich and enthusiastic Nova Scotia teams who want to join up with the CRU as soon as possible. However, they have been informed by the national body that they can't join alone and a Maritime group must be set up to facilitate the deal.

The feeling at the gathering in Moncton Sunday was that the New Brunswick Canadian Rugby Football Union is not ready as yet to take part in an annual Maritime playoff. What N.B. teams wish to do is join now with Nova Scotia in forming the MCRU with the understanding that the NBRFU will not have to field a team in playoff combat until such time as it feels strong enough to compete on an equal footing financially with Nova Scotia.

No final decision on the New Brunswick stand was made, however. Instead, the teams postponed a decision until they could discuss it at greater length. In the case of UNB Red Bombers, that means a pow-wow between team officials and the university athletic board. Tomorrow is the deadline for decisions on an individual basis.

If New Brunswick's loop says yes, a meeting will be held in Moncton this Saturday between the Provincial and Nova Scotia leagues. The setting-up of a MCRU in this case is regarded as a mere formality.

Delegates at last Sunday's meeting at Moncton represented UNB, St. Thomas University, Coverdale Navy-Trojans and Mount Allison University. Saint John Wanderers were not present but they had previously stated they wished to go ahead with the venture. As things now stand, Coverdale, Mount A and Saint John are definitely behind the move. UNB and St. Thomas are undecided pending discussions with university officials.

Campus Capsule

TOMORROW IS IT!

Tomorrow, believe it or not, is the last day for registration in the intramural basketball and hockey leagues. If you still want in, don't waste a minute and hop down to the Lady Beaverbrook Gym which houses the offices of the athletic department.

Another deadline is on the way. All those interested in water polo have until Thursday, Nov. 17th, to make their intentions known. Amby Logers of the athletic department is the gent to see.

CLUB DE SKI

The second UNB Ski Club meeting will be held tonight at 7:30 in room 106 of the Forestry Building. All ski-types are welcome, or rather needed.

GYMNASTICS

Gymnastic Classes are now in progress every Monday night from 8:30 - 10 p.m. and Saturdays 8:00 - 10 at the Lady Beaverbrook Gym. Anyone wishing to attend please see the Physical Director or Roch Poulin, phone 6023.

BADMINTON

All students who are interested in trying for UNB varsity or intramural positions in Badminton should come up to the gym on either Tuesday night, 7:30 to 10:30, or Saturday afternoon, 2:30 to 5.

Butch Changes Direction — — And Scores

A split-second decision by Red Bombers' Butch Bouchard Saturday returned the provincial Canadian football title and the Senator R. G. Percy Burchill Trophy to the UNB campus for another year.

The crafty Red and Black quarterback turned the tide in the sudden-death championship contest at College Field by a swift change in direction after penetrating the St. Thomas University secondary. The shift enabled Butch to chug 26 yards to the end zone, rack up his second touchdown of the day and supply UNB with a 14-11 victory and the 1955 niche on the coveted mug.

The great event occurred late in the third quarter after Tommies, inconsiderate of UNB interests, had opened up an 11-7 lead. The big play was a Bomber first down on the Tommy 26-yard-line. Bouchard took the snap, plowed over the left side of the line and, after the Tommy defence was committed to a leftish move, veered right to scamper the five-point route without so much as being brushed by a frantic Tommy guard.

The spectacular spurt established UNB on the happy extreme of a 12-11 tally. Mike O'Connor then hoofed a convert and added the final digit in the fourth quarter with a rouge.

Bouchard's brainwave proved the turning point of a great duel, conducted in a heavy mist on a sloppy field. The title tilt was one of the most exciting in the history of the New Brunswick Canadian Rugby Football Union, a fitting climax to an undefeated season in the league by UNB.

It was Bouchard's afternoon. The freshman from Trois Rivieres, Que., whose actual tag is Harcel Joseph, collected 11 points for his part in the proceedings. The total included a rouge and two majors. Another big feature of Butch's display was his excellent punting. Despite a plague of inept snaps, Bouchard consistently kicked for 40 yards on the important third-down boots.

But he was not alone on the field. All the Bombers came through with clutch work equal to the high standards demanded in defeat by a vastly improved, opportunistic Tommy aggregation. Tommies played a rough game, fought every play as if it was the last and bounced back time and time again when the Bombers threatened to drown the Chatham chances prematurely.

Coach Gerard (Moose) Flemming, in a post mortem, was especially enthusiastic over the showing of his linemen. He praised to the high heavens the performances of both offensive and defensive lines.

He called the game amazingly well-played under the bad conditions. Said Flemming, "St. Thomas had a great game but our boys were just a little better."

The Ladder competition in both ladies' and men's divisions will also be starting soon. All who are interested in this notice please leave your name at the gym office or with Dick Brown, Ph. 3565.

Remember! Some raquets are available at the gym. First come, first served for both the raquets and the "A" P. It's a race etna and help in learning the game.

Basketball Season Nears

Two games are scheduled for the UNB Red Raiders in the Lady Beaverbrook Gym next week. On Monday, November 14th, an exhibition game will be played with the Dover-Foxcroft USAF base case team. And on Saturday of that week, November 19th, UNB will play their first game in the North East Conference when they take on the Aroostook State College of Presque Isle, Maine.

Last week saw the start of the varsity basketball tryouts. The Lady Beaverbrook Gym was heard to resound with grunts and groans, as coach "Moose" Flemming put the boys back from last year's team and this year's hopefuls through a fast and furious set of conditioning calisthenics.

Between 28 and 30 players are trying out for the 10 varsity squad positions. These include some fine ball handlers and everyone is trying his best to be one of the choice third who the coach picks to carry the Red and Black to battle across the border and to the other maritime colleges.

BUTCH BOUCHARD

Leads Way To Win

"They drove all the way. I would say there was more spirit in the boys during the last quarter than in first period, even though they had some tough sledding in the interim. The whole university should be proud of the Bombers' showing. Their will to win and spirit ranks as the greatest seen on the campus in many years."

"We had to start without Hugh Auger and then we lost the services of Guy Doiron early in the struggle. It hurts to lose two great players like that but the Bombers didn't care. They just worked harder."

Auger did not play because of a leg injury suffered against Saint John in the league semi-final. Doiron was hurt early against St. Thomas. The steady backfield limped off the field after a pileup.

Tommies went down with a flourish. They did not content themselves with orthodox patterns, but mixed sleeper and sequence selections with deadly accuracy. The element of surprise was directly responsible for all the Tommy points.

But surprise, paradoxically, sent the visitors down the drain. Bouchard's gallop turned the tables on them. Tommies had the unexpected happen to them and couldn't recover in time.

Meet CMR Saturday

The last home game of the UNB Football season will be held at College Field this Saturday starting at 2 p.m. between UNB Red Bombers and a grid squad from College Militaire de Royale of St. Johns, Que.

Playing in an Intermediate League in that province, CMR is expected to field a very strong team. Like every Military College, they have the pick of the crop from across the nation and are reportedly among the best in the League. Bishops College of Lennoxville, Quebec, downed CMR 14-6 but also defeated McGill University, putting the visitors in a comparable class with McGill.

Expected to play out of a straight-T formation, this team should provide the Bombers with their toughest opposition of the year, and give UNB fans a chance to see a good brand of football.

At half time of the game, cross-country participants from CMR, Minto, and UNB will compete in a two and a quarter mile run. The UNB boys have been practicing for about a month for this event, and have put a lot of time and energy into preparation for this day.

Of this tryout number, seven are players back from last year's team. These include Jim Milligan, Don Brannen, John Gorman, Guy Doiron, John Forbes, Jim McLeod and Bob Wightman. These, most probably, will form the nucleus around which coach Flemming will mould his team.

FINAL SOCCER STANDINGS

Team	W	T	L	Pts.
Engineers	4	0	1	8
Chemists	3	1	1	7
Faculty	3	0	2	6
Science	2	2	1	6
Foresters	1	1	3	3
Business Adm.	0	0	5	0
