**WHY DOCTORS PREFER IT.**

MITCHELL, June 30th, 1891.—I take an especial interest in the "D. & L." Emulsion because it is unquestionably the best Emulsion that has ever come under my observation ; in fact it does not seem possible that an Emulsion could be made more perfect in every respect, it being particularly pleasant to take, will not get rancid, and is especially adapted to cure or greatly relieve many lung troubles and wasting diseases, the result of neglected colds or coughs. Further, may say I think it is excellent as a food tonic to build up and strengthen the body which may have become emaciated through a lengthened illness.

**IT WILL CURE YOU.**

*Read what well-known people say about it.*

DR. P. MEREDITH, of Cincinnati, says:—About one year ago took a cold, which settled on my lungs. A violent cough was the consequence, which increased with severity. I expectorated large quantities of phlegm and matter. During the last winter became so much reduced that I was confined to bed. The disease was attended with cold chills and night sweats. A diarrhoea set in. My friends thought I was in the last stages of consumption and could not possibly get well; was recommended to try Allen's Lung Balsam, the formula was shown, which induced me to give it a trial, and will only add that the cough is entirely cured, and I am now able to attend to my profession as usual."

ALBERT, N.B., December, 12th, 1887.

Three doses of Allen's Lung Balsam, at intervals of half an hour, relieved me of a very distressing and obstinate cough.

I have been similarly afflicted on previous occasions, but never found anything to check it so suddenly and effectually.
