Foch Again Hurls His Forces Against Picardy Front In Determined Effort To Break The Enemy Resistance

GERMANS' STAND ONLY A TEMPORARY EXPEDIENT

Need Time In Which To Move Back
Stores and Organize Retirement

Great Activity Back of Enemy Lines as Germans Carry Off Supplies Gathered in Captured District; Pause in the Picardy Struggle as Allies Bring up Artillery and Germans Prepare for Greater Resistance

With the French Army in France, Aug. 12.—(By the Associated Press)—Difficulty in bringing up artillery ammunition over battered roads brought a comparative lull on the French sector today. Infantry activity was confined to local engagements.

The German guns have been more active with shells of all calibres and with gas. The enemy is now reinforcing his old line which he held from 1914 to 1917 and it will require heavier armament to batter a way through. The Germans have attempted several counter-attacks but they were without marked vigor and gained no success.

Aviators continue to play an important role in harassing the enemy behind his front line. They are obstructing the movement of convoys of ammunition and supplies.

It is believed that the stand the Germans are preparing to make in their old trenches is likely to prove only a temporary expedient to obtain time in which to move back the immense stores of material and to organize retirement of the artillery and infantry.

There is great activity within the German lines east of Roye and Chaules. All the roads are encumbered with wagon trains, indicating that the enemy is still moving out the ammunition and supplies he had gathered in that region.

War Summary

(By the Associated Press)— Allied forces this morning began a general attack against the German line running from Chaules south to the Oise River, a front of about twenty-five miles. Despatches from London shortly after noon reported important gains at various points, especially on the vital sector south of Lassigny, near the Oise.

The Lassigny Massif, the steep slopes of which have been strongly defended by the Germans, is reported to be almost within the grasp of the French, an unofficial despatch states. It is every prospect that this natural fortress will soon be wrested from the Germans.

Further south, the French have advanced to the village of L'Econville, just south of the eastern extremity of Thiescourt Wood and virtually on the crest of the hills overlooking long reaches of the Oise. Just to the west of L'Econville the French have made new progress north on the St. Claude Farm.

As an immediate result of the gains made in that sector, the Germans are abandoning their trenches in the bed of the Oise just west of the village of Bailly, east of Ribecourt. It is said that the French have occupied these positions.

North of Lassigny, in the region of Roye and along the railroad running northward to Chaules, there is, so far, no reports of progress.

If the Allies succeed in carrying the heights south of Lassigny, they will force the enemy to retire from the Roye district, as they will have the Roye-Noyon road under their fire and will dominate the whole region with their artillery. The advances reported during the last few hours would, if continued, probably have an effect on the German position in the Ouscamp and Carlepont forests, east of the Oise. If the Germans there are outflanked by the Allied movements, a retirement from that district would be probable and this would necessitate a relocation of the line running from the Oise and the Aisne at Soissons. Thus the attack launched this morning would appear to have a direct relation to the battle being fought along the Aisne and Vesle by the Allies.

Late despatches tell of hard fighting at Fismette, on the north bank of the Vesle between Soissons and Rheims. The Allies were forced from the village by the Germans and had to cross the Vesle, but an immediate counter-attack is reported to have restored the Allied position on the north side of the river.

From Chaules northward to the Aisne River the Allies appear to have been held up by the desperate German defense. There have been local engagements along this line, but at no point have the British and Americans engaged on this front succeeded in making any marked impression on the enemy lines, which are virtually resting on the old trench system held by the enemy in 1914.

THOMAS LOURIE DEAD.
The death of Thomas Lourie, for many years a resident of this city, occurred at his residence in Hammond River this morning. Mr. Lourie lived a resident in the city conducted a shoe-making business. He leaves two sons and one daughter.

HAS REACHED ENGLAND.
Mr. and Mrs. George Silliphant of 93 Middle street, West, has received word that their son, Harry Silliphant, of the engineers, has arrived safely in Seaford Camp, England.

ALLIED TROOPS OFF AGAIN IN THEIR ATTACK ON ENTIRE FRONT SOUTH OF CHAULNES

Artillery Now Has Full Control of Converging Roads In and Out of Noyon—Difficulty of Enemy in Carrying Out Retrograde Movement Greatly Increased—Germans Evacuating Trenches West of Bailly—Forced to Retire by French Pressure in The Valley of The Oise—Working Around Roye

Paris, Aug. 12.—The Allied forces in Picardy made a heavy attack today along the entire front from Chaules southward in a determined effort to break the resistance of the enemy.

The Allied artillery now has full control of the converging roads in and out of Noyon, near the southern end of the line, notably that running toward Ham, to the north. The difficulty of the enemy in carrying out a retrograde movement is thus markedly increased.

London, Aug. 12.—The French launched an attack this morning on the southern part of the Picardy battlefield, and according to reports shortly after noon were making progress in the valley of the Oise. The Germans are evacuating their trenches in the bend of the river west of Bailly and the French are occupying them.

To the northwest the French are almost entirely in the crest of the Lassigny Massif, where heavy fighting is in progress. Only at one corner of the Massif do the Germans appear for the moment to be in possession. This corner is one of the highest humps on the hills, rising above the positions now in possession of the French. The French are attacking the Germans strongly and there seems every prospect of the action ending in their favor.

When the French get their guns to the top here, the enemy's communication with Roye will come under observed fire.

German troops are evacuating trenches in the river bed of the Oise, just west of Bailly, according to news received here early this afternoon. The move has been forced by French pressure in the valley of the Oise.

Bailly is a village situated on the east bank of the Oise, about a mile and three-quarters east of Ribecourt. It is near the southern end of Ouscamp Forest, a wooded section which is of great strategic value in that part of the battlefield.

The French are working around Roye to the west and the south of this important German holding point, almost in the centre of the Picardy battlefield, and now hold high ground in this region.

The wooded area around Des Loges, south of Roye, was captured by the French last night, but a German counter-attack drove them back.

The village of L'Econville has been captured by the French and further ground has been gained by them north of the St. Claude Farm. (L'Econville is about three and a half miles southeast of Lassigny and virtually on the crest of the ridge overlooking the Oise.)

British troops have gained additional ground north of Roye and on the north bank of the Somme, says today's official statement from Field Marshal Haig. The Germans last night attacked the British positions in the Merris sector, Flanders. They were repulsed.

The Germans delivered a local attack near Fouquescourt, on the line between Roye and Chaules. It was repulsed. The statement follows:

"On the battlefield, our troops effected further improvements in their positions north of the Roye road and on the north bank of the Somme, and captured additional prisoners.

"A local attack made by the enemy in the neighborhood of Fouquescourt was repulsed.

"We captured a few prisoners last night in patrol encounters south of the Scarpe (Aras front) and in the neighborhood of Vieux-Berquin (Flanders).

"A hostile attack against our positions in the Merris sector was repulsed after sharp fighting."

(Continued on page 2, seventh column)

Serious Menace To Huns On The Eastern Front

Possibility Made Known In Announcement of "Supreme Government of Northern Territory," A Chain of Provinces Strongly Pro-Ally—General Lessard Denies Rumor That He Will Command Canadians In Siberia

Washington, Aug. 12.—The possibility of an establishment of an eastern front that will be a serious menace, at least to the Germans, is being considered by officials here, it became known today in connection with the making public of the full text of the proclamation of the "supreme government of the northern territory." The signers of the proclamation are, with two exceptions, members of the constituent assembly, representing the provinces of Novogorod, Archangel, Vologda, Viatka, Kazan and Samara... a chain of provinces extending from the Arctic to the region of the Don Cossacks in the south.

This chain is in the form of a crescent, making a complete front of peoples strongly pro-ally in sentiment and representing the best elements of the Russian population.

Growing Resistance.
London, Aug. 12.—Germany, in the bitterest hour of defeat in the west she has yet known, is menaced in the east not only by the advance of the Allied expeditions, but by the perpetually growing movement of unorganized resistance to her occupation, says the Daily Telegraph, in commenting on the situation in Russia.

There is not a part of Russia where German troops are stationed where the commanders have not all they can do to hold the people down by force of arms. The task, the newspaper adds, will soon fall to the Allied forces, for strong reinforcements apart from the question of meeting the Allied expeditions. The Telegraph continues: "If the enemy is in peril in the west, he is little better off in the east, and Prussianism is reaping wherever it has sown."

The removal of the German embassy to Petro, says the Daily Chronicle, is an admission by the Germans of their intense unpopularity in Russia.

The Daily News says that the salient fact of the political situation is the fall of the Bolsheviks to provide a rallying point for the nation. It believes that the fall of Lenin and Trotsky would be the first step toward a solution of the problem, for it would mean the emergence in Russia for forces disposed to stand for national self-assertion as against exploitation by Germany.

To Lead Canadians.
Montreal, Aug. 12.—The Gazette has the following from Ottawa: "It is stated here on high authority that Major-General F. L. Lessard will command the Canadian expeditionary force to Siberia."

Denies the Report.
Halifax, N. S., Aug. 12.—"There is no truth in the report that I am to command the Canadian expeditionary force to Siberia," said Major-General Lessard, officer commanding the sixth military district, to the Canadian Press today when informed that it was stated in Ottawa that he was to receive the appointment.

GERMANS INTEND TO OCCUPY PETROGRAD
London, Aug. 12.—The Germans intend to occupy Petrograd, a despatch to the Copenhagen Politiken from Helsingfors declares. The Exchange Telegraph office commanding the sixth military district, to the Canadian Press today when informed that it was stated in Ottawa that he was to receive the appointment.

Pitiless Annihilation.
Amsterdam, Aug. 12.—A new manifesto advocating the pitiless annihilation of all counter-revolutionaries has been issued by Premier Lenin, says the Rheinische Westfalsche Zeitung of Essen. Peasants retaining grain beyond their personal needs will be arraigned before revolutionary courts as enemies of the people. Capital punishment will be inflicted on illicit traders.

Release Confirmed.
London, Aug. 12.—Confirmation has been received from Stockholm by the foreign office of the release of Robert H. B. Lockhart, acting consul-general at Moscow, and the Allied consuls there who had been arrested by the Bolsheviks.

Russo-Hun Conference.
Amsterdam, Aug. 12.—A despatch to the Wolf Bureau says that M. Joffe, the Russian ambassador to Germany, together with several Russian delegates, has left Berlin for Moscow to report to the Soviet government on the economic negotiations arising from the Brest-Litovsk peace treaty.

DUTCH STEAMER SUNK.
An Atlantic Port, Aug. 12.—The Dutch steamship Sommerstad, one of the Dutch vessels taken over by the United States government, was sunk by a German submarine off Fire Island yesterday. The crew of thirty-one men was brought here today by a naval patrol boat.

MISPEC DAM REPAIRS.
The repairs to Mispec dam are progressing favorably, according to Commissioner Hilyard, who is in charge of the work. He has seven men rebuilding the section of the wall that is damaged.

FRESH HONORS FOR CANADIANS

Congratulations From Sir Douglas Haig and Premier Clemenceau Again Repulse Enemy Counter-Attack

With the Canadian Forces in the Field, 9 a. m. Aug. 12.—(By J. F. B. Livesey, Canadian Press Correspondent)—During the last two days the Canadian corps has had the honor to receive several distinguished visitors who have congratulated them on their splendid work. Among these have been Sir Douglas Haig and Premier Clemenceau.

Sir Douglas rode along the Canadian battlefield stopping to speak to officers and men at Canadian headquarters. He complimented Sir Arthur Currie not only on the achievement of the corps, but also on the wonderful spirit animating his men, battle weary after three days of savage fighting, yet whose only desire was to be let loose again on the Boche. The Canadian advanced line has been practically static since Saturday evening.

Yesterday the enemy having brought up fresh troops, made a strong counter-attack upon our sector but the Canadian infantry was too much for him and he retired precipitately, leaving many dead upon the field.

CHANGE IN GERMAN MILITARY POLICY

London, Aug. 12.—A marked change is taking place in German military policy, says the military correspondent of the Times. He believes that during the Allied victories of the last month, German strategy was clearly in a transitory stage from the ideas with which Ludendorff began the March offensive to ideas whose nature is not yet revealed and which can only be conjectured.

"The successful Allied raids on the Italian front," he continues, "are an example of the way these conjectures are being tested. Are the Germans strengthening the Italian front with a view to an autumn offensive, or is there a backward movement on the Italian front and what is its explanation? Doubtless these raids have enabled the Allied staff to answer these and other questions."

"Undoubtedly some revolution is in progress in German military policy to which we do not yet have the key."

Hard Fighting at Chaules.
London, Aug. 12.—The British are finding their hardest fighting in the district close around Chaules, where the German forces are making a desperate effort to keep the Allies back in order to retain the use of the important lateral lakes and highways out of Chaules. Allied artillery and aircraft are doing their utmost to make the use of these communications unpleasant for the Germans.

Bombing Americans.
With the American Army in France, Aug. 11.—(Sunday, by the Associated Press)—German airplanes dropped bombs on the American positions on the Woivre last night without inflicting damage.

The enemy has sent over balloons carrying propaganda for both American and French troops.

MISSING MAN DID NOT KNOW FAMILY WORRIED

Gordon McDonald Reaches Moncton—Mother Died Awaiting Arrival of Son Who Left Winnipeg in June

Moncton, Aug. 12.—Gordon McDonald, the telegraph operator who left the home of his brother near Winnipeg in June and from whom relatives at St. John had no word since, arrived in Moncton last evening from St. John and proceeded to Berry's Mills. It was before he reached Moncton that he learned there was anxiety as to his safety. Since leaving Winnipeg he had been in Minnesota and Ontario. He had not learned of his mother's death until his arrival here.

It is understood that Captain (Rev.) G. A. Lawson, former pastor of the First Baptist church, now overseas as chaplain, intends to return to Canada on leave so soon as arrangements can be completed.

GERMAN GENERALS PLACED ON THE RETIRED LIST

Paris, Aug. 12.—(Havas Agency)—General Von Mudra and General Liebricht, who commanded German armies in the offensive which began on July 15, have been placed on the retired list, according to Berne newspapers which have been received here.

BRITISH TORPEDO BOATS SUNK BY SUBMARINE

London, Aug. 12.—A British torpedo boat destroyer was sunk by an enemy submarine in the Mediterranean on Aug. 6. Seven of the destroyer's complement were lost. The admiralty made this announcement today.

WAR SESSION OF LABOR CONGRESS

Delegates From All Parts of Canada Gather Next Month in Quebec—Four Representatives from St. John

Another war-time Labor Congress of Canada will be convened in the historic city of Quebec early in September and St. John will be represented in the constructive deliberations. Jas. E. Tigh, C. G. Langhain and Jas. L. Sugrue will be the delegates from the Trades and Labor Council and Fred Collins has been appointed to represent the Canadian Brotherhood of Railway Employees.

The congress usually sits about 300 delegates from all over Canada. Of late years the representation has been quite comprehensive of the Dominion's industrial workers and a great deal of stabilizing legislation has been put on the books. In fact the Labor Congress is a legislative body, while trade unions have an entirely different status.

It is expected the approaching congress will have the usual delegation from the British Trade Union Congress, the American Federation of Labor and the Women's Trade Union League. These organizations will be represented in a spirit of fraternity and important addresses and reports are expected from the male bodies.

Jas. L. Sugrue, the local labor leader, says the congress next month gives promise of being a highly important one. As the war has progressed the industrial worker has become more of a factor each year and it cannot be denied he has done his bit patriotically and well. In fact a deep note of patriotism will undoubtedly characterize the deliberations of the working men.

WOMEN'S AUXILIARY FOR AMERICAN FORCE

London, Aug. 12.—Recruiting has been begun for a "pal" battalion of the women's auxiliary army corps for service with the American expeditionary forces. Five thousand women are needed and women who are friends are invited to enlist together.

STREET CAR MEN STRIKE; OTTAWA CITIZENS WALK

Ottawa, Aug. 12.—Not a street car is running in Ottawa today as a result of a decision reached early this morning by the street railway employees to go on strike.

Persons who depend on the street cars to reach their work, as a rule, very late this morning and their difficulties were added to by a heavy rain storm.

Both sides to the wage dispute are determined in their position.

WATER DEPARTMENT

Work in connection with the installation of a new water main in Winter street was commenced this morning. In order that it could be rushed to completion the street car service along Winter street was discontinued and all the cars now go via Wall street to City road.

Commissioner Hilyard plans to replace the old six inch water main with a new eight-inch in some places and a new ten-inch pipe in other places.

The commissioner of water and sewerage has a crew of men at work installing a hydrant in Cranston Avenue. At present there is none in this section and owing to the number of houses, he deemed it advisable to place one there in case of fire.

WEATHER REPORT

Issued by Authority of the Department of Marine and Fisheries, R. F. Stupart, director of meteorological service

Synopsis—Showers have been fairly general again in the west, while rain has fallen heavily over Lake Superior.

Lakes and Georgian Bay—Moderate to fresh south to west winds, showers or thunder storms in some localities, but mostly fair and very warm. Wednesday, moderate to west to northwest winds, generally fair.

Ottawa Valley and Lower St. Lawrence—Moderate to fresh south to west winds, showers or local thunder storms, but mostly fair and very warm; Wednesday, moderate to fresh westerly winds, clearing and moderating.

Upper St. Lawrence, Gulf and North Shore—Moderate to fresh south to west winds, local showers or thunder storms, but mostly fair and warm.

Generally Fair.

Maritime—Moderate winds, fair; Wednesday, a few local showers, but generally fair.

Superior—Moderate to fresh westerly winds, local showers at first, but mostly fair and comparatively cool; Wednesday, moderate winds, and comparatively cool.

All west—Fair and comparatively cool today and on Wednesday.

New England—Fair and slightly warmer tonight and Wednesday; gentle south winds.

GOOD THINGS COMING TO THEATRES OF ST. JOHN

PLENTY OF VARIETY AT THE OPERA HOUSE
"Great show this week—best for a long time," is what everybody is saying about this week's vaudeville programme at the Opera House.

SEATS FOR "EVERYWOMAN"
Prices for the return engagement of the great Henry W. Savage music-play and spectacle, "Everywoman," are selling steadily at the Imperial from 10 to 15 each day.

LOCAL NEWS

Wanted—Foster for mangle room. Royal Hat Laundry, T.F.
AFTERNOON SAIL
Wednesday, Aug. 14th, Steamer Hampton will leave Indiantown 8 p.m., returning about 6 p.m. Tickets 50 cents.

LOCAL 810, I. L. A.
A full meeting will be held tonight of the Coal Handlers and Trimmers. All members are requested to be present by order of president.

PERSONALS

Misses Jennie and Margaret Russell of New York arrived in the city yesterday and are the guests of Mrs. Robert May, Queen's Quay.
Hon. W. P. Jones, of Woodstock N. B., arrived in the city last night.

GERMANS WORRIED BY LACK OF SOAP

The following sketch of the soap shortage in Germany, which, according to a report sent out from Amsterdam on June 29, has developed a new skin disease among the Kaiser's subjects, was printed in the Berliner Tageblatt of June 9.

WATER THIS SPACE

Occupation is the most favorable antidote to the poison which creeps into the system after the mind is allowed to stagnate through long and forced idleness.

LIEUT. BOUCETT DIED OF WOUNDS

Ottawa, Aug. 12.—One casualty from the maritime provinces is reported in today's list, that of Lieut. J. T. Doucet, of Bathurst, N. B., who has died of wounds.

FIFTY TONS OF BOMBS DROPPED ON THE ENEMY

London, Aug. 12.—An official communication dealing with aviation, issued tonight, says: "Fifty tons of bombs were dropped by our airmen on Aug. 11 and the following night. The two chief objectives, both by day and by night, were the crossings and certain railway junctions of military importance."

RIOTS IN DETROIT OVER CAR FARES

Detroit, Mich., Aug. 12.—At one minute past midnight this morning, the city of Detroit through its corporation council secured a circuit court injunction against the Detroit United Railways Company, preventing that company from raising the newly enacted ordinance which became effective at midnight and provides for a five-cent fare on all city lines.

GERMANS WORRIED BY LACK OF SOAP

The following sketch of the soap shortage in Germany, which, according to a report sent out from Amsterdam on June 29, has developed a new skin disease among the Kaiser's subjects, was printed in the Berliner Tageblatt of June 9.

A BILLION PAID FOR CANADIAN SUPPLIES

Ottawa, Aug. 12.—On what a gigantic scale the operations in Canada of the imperial munitions board is indicated in an official statement that the total value of contracts for shells, raw materials and supplies of various kinds up to May 31 last was \$1,200,000,000.

CATHEDRAL PICNIC

The Cathedral Sunday school picnic is being held today at Torriburn. A number of extra cars were put on the suburban train this morning, which was held over from nine o'clock until 9:30, and this afternoon two train-loads of pleasure-seekers went to the grounds.

WATER THIS SPACE

Occupation is the most favorable antidote to the poison which creeps into the system after the mind is allowed to stagnate through long and forced idleness.

GREAT RAILWAY WRECK IN STAR THEATRE FEATURE

The Ruler of the Road With Frank Keenan in Star Role—Presents interesting problem
"The Ruler of the Road," a Pathe play featuring Frank Keenan, is the attraction at the Star Theatre for the first two days of this week.

RECENT DEATHS

The death of Mrs. Thomas Wren of St. John, N. B., occurred last Thursday morning in Boston, where she had gone for treatment. Thomas Wren is collector of customs at St. Andrews.

INDIGESTION AND CONSTIPATION

Quickly Relieved by "Fruit-a-tives" Bechoen, P. Q. "I suffered for many years with terrible indigestion and constipation. A neighbor advised me to try 'Fruit-a-tives.' I did so and to the surprise of my doctor, I began to improve and he advised me to go on with 'Fruit-a-tives.' I consider that I owe my life to 'Fruit-a-tives' and I want to say to those who suffer from indigestion, constipation or headaches—try 'Fruit-a-tives' and you will get well."

ONLY DESIRE TO HALT HUNS

Declaration Issued by The British Government to the People of Russia

No Wish to Exploit—In Entering Country Allies Only Wish To Help and Then Retire

London, Aug. 12.—British representatives at Vladivostok, Murmansk and Archangel have published a "declaration of the British government to the people of Russia."

The declaration says that the Allies are coming as friends to "help you to free yourselves from the domination of Germany." It declares that Allied troops are entering Russia to help and that not a foot of territory is desired, and states there is no intention of imposing a political system upon Russia, which must work out its own form of government.

The text of the declaration follows: "Your Allies have not forgotten you. We remember all the services your heroic army rendered us in the early years of the war."

"We are coming, as friends, to help you save yourselves from dismemberment and destruction at the hands of Germany, which is trying to enslave your people and use the great resources of your country to its own ends."

"The destinies of Russia are in the hands of the Russian peoples. It is for them to decide, alone, to decide their form of government and to find a solution for their social problems."

"Peoples of Russia: Your very existence as an independent nation is at stake. The liberties you have won in the revolution are threatened with extinction by the iron hand of Germany. Rally round the banner of freedom and independence that we, who are still your Allies, are raising in your midst, and secure the triumphs of those two great principles without which there can be no lasting peace or real liberty for the world."

MORNING NEWS OVER THE WIRES

D. H. McDougall, former general manager of the Dominion Steel Corporation, now president of the N. S. S. and Coal Company, was tendered a reception last evening by the mayor and citizens of Sydney on his departure last night for New Glasgow.

A school of 260 whales is ashore at River John, Station No. 5, St. John's Bay, where they were left on the beach when the tide receded.

A monster picnic was held at Bathurst Beach last Saturday by the Bathurst Lumber Company for their employees and their families.

An annual collection of the Christian Missionary Alliance taken up at Old Orchard, Me., on Sunday amounted to \$20,200. In former years it amounted as high as \$110,000.

Henri Vidal, a member of a Serbian detachment at Lauson, Levis, P. Q., and a Serbian soldier, Ciro Dubrovska, were killed last night in a shooting affair. It is said that Vidal was returning to the camp from Quebec and was under the influence of liquor.

Montreal, Aug. 12.—James Carruthers has resigned from the presidency of the Halifax Shippers' Company. He objects to the formation of a subsidiary concern, which he contends may deprive the shareholders of the parent company of the profits it might make.

DEMAND GENERAL STRIKE

Winnipeg, Aug. 12.—Railway shopmen throughout Canada are not in favor of accepting the McAdoo award and demand that a general strike be called off all railway mechanics immediately, according to union officials.

WARM TRIBUTES TO CANADIAN METHODS BY BRITISH PRESS

On Care of Disabled Soldiers and Sailors

Many Benefits Derived From Inter-Allied Conference—Canadian Representative Toured England

Mapor R. T. MacKeen, who accompanied Senator J. S. McLennan to London as one of the representatives of the Department of Soldiers' Civil Re-Establishment, who is the Department's Vocational Officer for the Province of Quebec, has accomplished a tour of the Re-Establishment in England. He visited the Lord's Hospital, which has been established in order that the civilian department may be kept well informed in advance of the amount and kind of work which will come into its hands as the overseas military authorities return men to Canada.

CHANGE OF WATER CAUSED DIARRHOEA

People moving from one place to another are very much subject to diarrhoea on account of the change of water, change of climate, change of diet, etc., and what at first appears to be but a slight looseness of the bowels should never be neglected or some serious bowel complaint will be sure to follow.

The safest and quickest cure for diarrhoea, dysentery, cholera infantum, cholera morbus, pains in the stomach, acidity and all looseness of the bowels is Dr. Fowler's Extract of Wild Strawberry.

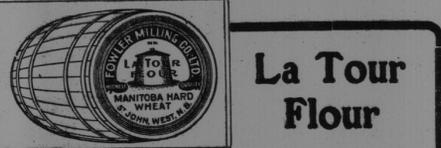

Mr. T. I. Allard, Parry Sound, Ont., writes: "In the fall of 1914 I was working on the new 'Chilet Gun' factory, on Carlaw Ave., in Toronto, when I had a violent attack of diarrhoea, owing, I think, to the change of water. One of the foremen advised me to get a bottle of Dr. Fowler's Extract of Wild Strawberry, which I did, with the result that I hadn't taken it all before I was completely cured."

Dr. Fowler's Extract of Wild Strawberry has been a national remedy for the past 72 years, and is sold by medicine dealers everywhere at 50c. a bottle. Don't let anyone palm off a substitute on you. When you pay your money for the genuine, you've a right to get it. Put up only by The T. Millburn Co., Limited, Toronto, Ont.

mutually helpful has been arranged for. Propaganda work in the hospitals where Canadian soldiers are being cared for has been established in England by the representatives. Distribution of literature and of the film, "Canada's Work for Wounded Soldiers" has been arranged for, the department's official being instructed to visit each hospital once in five weeks, thus reaching a new group of men on each visit. Literature will also be distributed, the aim being to instruct the wounded Canadian soldiers of the form wounded Canadian soldiers of the work done in Canada to help them to return to civil life, and to interest them in their own future as Canadian citizens.

Connected with the conference was an exhibit at which Canada had 1600 square feet. Products of the industrial re-education classes and of the occupational work done in the wards were displayed in great profusion, as were 250 photographs illustrating all phases of the work of the Re-Establishment department. This exhibit was visited by the king and queen and other members of the royal family, all of whom manifested a keen interest in the exhibit, including the film, is now on a tour in the British Isles at the request of the British government. It will be shown in all of the large cities.

The Canadian exhibit was the largest and most diversified dealing with industrial re-education. It included, in addition to the above mentioned items, several large scale maps of Canada showing the arrangement of hospitals, metal shops, exhibits of woodwork, architectural drawings, all of which were products of the industrial re-education classes. Many helpful points on the methods adopted in other countries were learned by the Canadian delegates, and the reputation of Canada's experience was commented on favorably by the other countries as instructive. From the English press it would appear that Canada is well in the lead. The Westminster Gazette stated that, "The Canadian exhibit was one of the wonders of the whole event," and another paper stated that the exhibit must have seemed some times to the Canadian delegates to be devoted to first principles and to problems already solved in Canada. Still another publication said that "in regard to both re-education and pensions Canada has given a worthy lead. She has taken up vocational training on a larger scale than any other country."

On his return Major MacKeen pointed out that several of the working methods adopted in Canada were not found in any of the European countries. Among these points were the following:

(a) In Canada every returned soldier is interviewed prior to his discharge with a view to ascertaining his needs.

(b) Canada has national, not a single control of the agencies operating for training of disabled soldiers.

(c) Canada has responsible paid officials, not only at headquarters but in all the provinces and districts.

(d) Canada utilizes returned officers, N. C. O.'s and men as officials and instructors as fully as possible.

(e) Occupational therapy is carried on in all military hospitals and is available for all hospital cases.

(f) It is the Canadian policy to give long and efficient courses leading to permanent occupations.

(g) Employment is found on a definitely organized system in close co-operation with and under the supervision of the Federal Department interested. All of these points are, of course, embodied in the new legislation in the United States and Australia, which is patterned very closely after the Canadian system.

ANOTHER DISCOVERY OF NICKEL IN ALASKA

Ore Containing Nickel and Copper Found in Three Distinct Deposits New York, Aug. 13.—Nickel ore has been discovered in three localities in Alaska, according to the United States Geological Survey. Deposits on Chicago Island, near Copper River, and on Knight Island, Prince William Sound, are being prospected, but little authentic information regarding them is yet available. Deposits on Chicago Island are on the west coast, about sixty-five miles north-west of Sitka. Ore containing nickel and copper was found in three unconnected outcrops about half a mile apart. Neither the outcrops nor the underground workings are of sufficient extent to permit any reliable estimate of the amount of ore that may be present in this vicinity. It is believed that diamond drilling near the known outcrops and at the localities where disseminated ore is seen may reveal additional ore bodies that do not reach the surface. The small amount of underground work done in the Copper River district makes estimates of nickel ore there impossible. A selected specimen of ore contains 7.23 per cent nickel and a trace of cobalt, but most of the known ore is believed to be of much lower grade. The deposit on Knight Island has not yet been investigated by the Geological Survey, and consequently there is no authentic information regarding it.

DR. BELAND TO SPEAK Toronto, Aug. 12.—Hon. Dr. Henri S. Beland in a letter to John G. Kent, manager of the Canadian National Exhibition, has signified his willingness to deliver an address on Aug. 29 or 30.

Are You Master

or does your business master you? Does it insist on following you home and to bed and worrying you day and night until you are on the verge of nervous collapse?

A few weeks' use of Dr. Chase's Nerve Food will do wonders for any business man or business woman whose nervous system has failed to stand the strain. It nourishes the nerves back to health and vigor.

JOHN TAYLOR & CO., Limited,
Dept. 9, TORONTO.

He Wouldn't Use Bread Substitutes

Quebec Baker is Accordingly Closed Up for a Week

Ottawa, Aug. 13.—The Canada Food Board has suspended for a period of seven days, beginning at midnight August 10, the bakery license of G. E. Drolet, 99 St. Vallee street, Quebec. During the period of suspension he has been forbidden to manufacture or sell bread, or products made from flour, or to take any delivery of any flour. This action was taken by the Canada Food Board because Mr. Drolet continued to violate the order requiring him to use substitutes in the manufacture of bread. It is the intention of the Canada Food Board to deal summarily with all bakers who do not use substitutes, or who offend against the Food Board's regulations in other ways.

The dining room and restaurant of the Dawson Palace Hotel, Limited, 373 Notre Dame street west, Montreal, has been closed by order of the Canada Food Board for seven days, from midnight on Sunday, August 11. When visited by an inspector, it was found that the establishment was serving beef during prohibited hours. During the period that the license is suspended, meals must not be served or food purchased.

HORLICK'S

Malted Milk for Invalids

A nourishing and digestible diet. Contains rich milk and malted grain extract. A powder soluble in water.

War Canning Bulletin

Issued by Canada Food Board

THINK OF THE FUTURE.

(Illustration by courtesy of National War Garden Commission, Washington)

Don't be short-sighted on the canning question and leave things to chance for next winter. By that time if your cellar shelves are not well stocked you will be mighty sorry that you did not see fit to the future somewhere around August.

Get out after the wild berries while they are to be had. They cost you nothing but a little time and labor. The children will gladly help to bring them in. Following is a syrup table for your canning operations. Hang it up in the kitchen and refer to it whenever necessary.

For sweet fruits—One pint sugar to two quarts water.
For slightly acid fruit—Two pints sugar to three pints water.
For acid fruits—One pint sugar to one pint water.
For very acid fruits—Two pints sugar to one pint water.

HOW TO CAN TOMATOES.

Select fresh, ripe, firm tomatoes. Grade for size, ripeness and quality. They will cook better if the same degree of ripeness and quality, and will look better. Wash, scald one-half to one and one-half minutes or until the skins loosen, but do not break. Scald means to immerse in boiling water. Cold dip, but do not allow them to remain in the cold water. Cut out the stem end, taking care not to cut into the seed cells or the seed and pulp will later be scattered through the liquid. Remove the skins. Pack the tomatoes whole in the jars, doing one jar from the beginning to placing in sterilizer, before starting on another. Shake down well, hitting the base of jar with palm of hand, and also press with a tablespoon, but avoid crushing.

Do not add water. Hot tomato pulp may be added, otherwise add no liquid whatever. Tomatoes are an exception to the general rule of hot water for vegetables and hot water of hot syrup for fruits. A large part of the tomato is water. It is not necessary to add anything but one level teaspoonful of salt to each quart, and if liked, one-half tablespoonful of sugar. The tomato pulp for home canning, made from large and broken tomatoes, cooked and strained, should have one teaspoonful of salt to each quart, and should be poured hot into the filled jars, allowing it to enter the spaces.

Put on rubber and top, adjust top ball or screw top on with rubber and little finger. Sterilize 20 minutes in hot water bath, or 16 minutes under five or ten pounds' steam pressure. Remove, tighten, seal and cool.

Food Board Flashes For Feminine Folk

An amusing little incident reported from Banff, Alberta, shows how two bears proved to be food patriots even while they were breaking one of the commandments.

They were foraging in the larder of the Alpine Club House which, of course, was not strictly "within the law"—but then bears will be bears! They helped themselves to four loaves of brown bread but left unmolested the white bread, pies and cakes which were in the larder.

Whether the distinction was a matter of taste or of patriotism it is impossible to tell, for the animals are still at large. There are lots of human bears, however, who grab the white bread and cakes first and ignore the brown bread and other food conservation products, despite the exigency of food conditions in Europe.

Science and Salt Unite To Save Food For The Home Gardeners

Chemists Meet Scarcity of Cans and Jars With Simple and Quick Method of Conserving; Corn, Beans, Beets and Even Green Peas May Be Kept in Brine With Oil or Paraffin Cover

Fruit jars are scarce and dear and so are tin cans. Butter tins may be had almost for the asking from the family grocer, earthen crocks are not cheap, but they cost nothing like the metal ones as tin cans or glass jars. So serious is the situation that the National War Garden Commission, and the War Department of Agriculture have warned home canners to go through cellars, attics, and dark closets and hunt out every vessel that will safely hold food for next winter and fill it. War garden crops thus far this summer have been nothing to brag about, but nearly every gardener has some surplus of beans, peas, summer cabbage, spinach, etc., that may be put away for winter, and every one of them is urged to prepare for the lean days when the snow covers the garden and food may be as scarce and dear as containers are now. In its efforts to help food conservation the department of agriculture has had its chemists compile a pamphlet telling how to preserve by fermentation and with salt. In a foreword the compiler says: "Owing to the enormous development of canning in this country during the last generation and the ease with which fresh vegetables may be obtained from some part of the country at almost any time of year, relatively little use has been made of the methods of preserving, which were used by our forefathers and which are still used in Europe to a considerable extent. In this country the only substances commonly prepared by fermentation are sauerkraut and salt cucumber pickles, and, as a domestic product in some regions, salted beans. Many other vegetables, however, lend themselves very readily to this method of preservation and furnish products quite different from the original substances, but which are none the less wholesome and appetizing and are greatly liked by many people. They also offer variety in the diet, which is an important consideration."

One advantage that these methods possess is that they make use of containers which could not be used for canning. For example, old kegs, lard and butter tubs, stone crocks or jars, wide-mouthed glass jars, and glass preserving jars without covers, if thoroughly cleaned, may be used for the storage of salted or fermented vegetables. Another advantage is that with a given amount of labor a great deal more material can be preserved in the same time if canning or drying alone were depended upon.

The methods of preservation group themselves naturally under three heads: Fermentation with dry salting, fermentation with brine, and salting without fermentation.

When vegetables are either packed dry with two or three pounds of salt to every 100 pounds of material, as in the making of sauerkraut, or are covered with a brine containing five pounds of salt

to every two gallons of water, as in the preparation of dill pickles, the sugars present in the vegetables are extracted from them and are fermented by the lactic-acid-forming bacteria which are present naturally in great numbers on the surface of the fresh material. After this action has gone on to a certain point enough of this lactic acid is formed to kill the bacteria and prevent any further change in the material, provided certain precautions are taken to prevent the growth of molds. The lactic acid permeates the fermented material and gives it a characteristic flavor not unlike that of a weak vinegar solution. This flavor is disliked by many. The lactic acid has no harmful effect. It is the same acid which is present in sour milk and it is digested and utilized by the body as a source of energy.

If the vegetables are covered with a very strong brine, or are packed with a fairly large amount of salt, lactic-acid fermentation and also the growth of other forms of bacteria and molds are prevented. This method of preservation is especially applicable to those vegetables which are so delicate that sufficient lactic acid cannot be formed by bacterial action to insure preservation of the material.

Clean wooden kegs or stone crocks are the best for home use. For the smaller sizes are preferable because the contents will then be used more quickly and there will be less chance of moulding from standing too long after being opened. Wooden vessels of yellow or pitch pine are undesirable, since they give a disagreeable taste to the foods. Ordinary line salt, which can be purchased in bulk for about two cents per pound, is most satisfactory for general use. Table salt is rather expensive. Clean white cloth (cheesecloth or muslin) is necessary for covering the material after it is packed into the container. It will be found convenient to cut this into circular pieces about six inches larger in diameter than the crock or keg.

Round pieces of board will be needed to put on the cheesecloth. For small containers, heavy plates of suitable size can be used instead of boards. Clean stones may be used as weights to hold down the mass in the crock.

Paraffin is needed to pour over the liquid in the containers (after fermentation has ceased) to prevent mold.

A pair of kitchen scales or steel-yard and a quart or gallon liquid measure completes the necessary equipment.

Fermentation with dry salting consists in packing the material with a small amount of salt. No water is added, for the salt extracts the water from the vegetables and forms the brine. The method, in general, is as follows:

Wash the vegetables. For each 100 pounds weigh out three pounds of salt; smaller quantities in proportion. Cover the bottom of the container with vegetable about one inch thick and sprinkle a little salt. Continue adding layers of the material sprinkled with salt until

the container is about three-fourths full, and spread over it one or two thicknesses of cheesecloth, tucking them down at the sides. On the cloth place one of the round pieces of board or plate, and on this put a clean stone or one or two clean bricks. The weight should be sufficient to extract the juices to form a brine, which will cover the top in about twenty-four hours. After this is packed allow the container to stand in a moderately warm room to ferment. As the fermentation goes on, bubbles arise to the surface of the liquid. The rate of fermentation depends principally upon the temperature. In warm weather it requires only eight to ten days, in cool weather two to four weeks may be necessary. When bubbling stops, fermentation is complete. A good way to determine this is to tap the receptacle gently, if no bubbles arise, fermentation is finished.

The containers should then be placed in a cellar or cool storeroom and the surface of the liquid treated to prevent a scum of mold. If allowed to be undisturbed, all the acid will eventually be destroyed and the fermented material will spoil. Exclusion of air from the surface of the brine will entirely prevent its formation. There are three feasible methods of accomplishing this.

The first is to cover the surface with very hot melted paraffine. If the paraffine is sufficiently hot to make the brine boil when poured upon it, a smooth crust will be formed before hardening, making a perfectly air-tight seal. Paraffine has the advantage of ease in handling, and of being easily separated from the fermented vegetables when they are removed. If the paraffine breaks it should be removed, remelted and replaced.

The second method is to pack a barrel or keg full and then replace the head. Fill the barrel or keg as full as possible with the fresh material to be fermented, and then add the weights. Let the barrel stand for forty-eight hours to allow part of the gas to escape. Then remove the board and head the keg up tight. Bore a small hole in the head and fill the barrel full with brine (made by dissolving three-fourths cup salt in one gallon water) so that there is no air space. Allow the barrel to stand until the fermentation has stopped, adding more brine at intervals to keep the container full. When bubbling has stopped, plug the vent tight. If the barrel does not leak, fermented products put up in this manner will keep indefinitely.

The third method is to use an oil, such as cottonseed oil, which floats on the surface and effectively prevents air from reaching the brine. Brine covered with a layer of oil one-quarter inch thick will keep indefinitely.

Experiments have shown that the following vegetables may be preserved successfully under home conditions by the above method of fermentation by dry salting: Cabbage, string beans, beet tops, and turnip tops, and it is probable that others may be added to this list as a result of further experiments. In general the method described above should be followed for all vegetables preserved by this plan.

Of all the vegetables named, cabbage is probably more generally preserved by salting and fermentation than any of the others. The chemists find that summer cabbage, contrary to popular belief, makes as good kraut and keeps as well as winter cabbage when the container is sealed with paraffine. They also recommend that salt at the rate of 2½ pounds to 100 pounds of cabbage be used.

No doubt the popular idea that sauerkraut made from early cabbage will not keep is based upon the fact that the fermentation of sauerkraut made from such cabbage occurs in warm weather

and the rapid growth of scum soon destroys both brine and kraut if the surface is not properly protected. Some vegetables which do not contain sufficient water are better fermented by covering them with a weak brine.

Wash the vegetables, drain, and pack in a keg or crock until it is nearly full. Prepare a weak brine as follows: To each gallon of water add one-half pint of vinegar and three-fourths of a pint of salt and stir until the salt is entirely dissolved. Pour the brine over the vegetables and set the vessel away in a moderately warm room to ferment. When fermentation has stopped the surface of the liquid should be treated to prevent mold by adding paraffin or oil.

Experience has shown that the following vegetables may be preserved satisfactorily by fermenting in brine: Cucumbers, string beans, green tomatoes, beets, beet tops, turnip tops, corn, and green peas. In handling cucumbers, on the bottom of the container place a layer of dill and a handful of mixed spices. When the container is full add more dill and spices. The dill and spices may be omitted if desired.

Remove the ends and strings from beans to be brined, and cut into pieces about two inches long, pack in the container, cover with brine, and ferment.

Green tomatoes should be packed whole and prepared as cucumbers. The dill and spices may be added if desired. Beets must be scrubbed thoroughly and packed whole. If peeled or sliced before being fermented the beets lose considerable color and flavor.

Beet tops and turnip tops should be washed thoroughly and packed into the container without being cut up.

Green peas should be shelled and packed in the same way as string beans. It is advisable to use fairly small containers for peas so that the quantity opened will be used before it has a chance to spoil.

In employing the method of salting without fermentation the vegetables are packed with enough salt to prevent the growth of yeasts or molds.

Wash the vegetables, and for each 100 pounds of vegetables weigh out twenty-five pounds of salt. Spread a layer of the vegetables about one inch deep on the bottom of a crock, and sprinkle heavily with salt. Add vegetables and salt until the container is nearly full, and then cover with the clean cloth, board, and weight as in fermentation, by dry salting. If the salt and weight have not extracted sufficient brine to cover the vegetables after twenty-four hours, prepare a strong brine by dissolving one pound of salt in two quarts of water, and pour enough of this over the vegetables to cover them, but this will not continue long. As soon as the bubbling has stopped the surface of the liquid should be protected with paraffine or oil.

Experiments have shown that the following vegetables may be satisfactorily preserved by the above method: Cabbages, beet tops, turnip tops, spinach, chard, kale, cabbage, string beans, green peas and corn.

If properly prepared and stored, fermented and salted products will keep for a long time. It is absolutely necessary to prevent mold from growing on the surface of the brine of fermented vegetables by the addition of paraffin or oil. Protection of the surface of salted vegetables is desirable, but not necessary if the containers are covered to prevent evaporation of the brine. Practically all of the trouble with the fermented or salted products may be traced to carelessness in protecting the surface of the brine. After fermentation has ceased the containers should be stored in a cool place.

Some fermented and salted vegetables, such as cucumbers, are eaten raw; others

NOTICE

NOTICE IS HEREBY GIVEN that under and by virtue of the power and authority contained in certain indenture of Leasehold Mortgage dated the thirtieth day of August A. D. 1909, and made between Charles E. Colwell, of the City of Saint John, in the Province of New Brunswick, Book-keeper, of the first part, and John Colwell, of the said City of Saint John, gentleman, of the second part, and duly recorded in the office of the Registrar of Deeds in and for the County of Saint John in Book 106, pages 168 to 171, No. 82967, default having been made in the payment of the said principal sum as well as the interest thereon, there will be sold at public auction, at Chubb's Corner, in the City of Saint John, in the City and County of Saint John, and Province of New Brunswick, on Saturday, the fourteenth day of September next at twelve o'clock noon, the leasehold lands and premises particularly mentioned and described in said indenture of Mortgage as follows: - All that lot of land, situate, lying and being in the City of Saint John, bounded as follows: Beginning on the eastern side of Adelaide Road at a point distant sixty-five feet eight inches southerly from the southern end of the railing of the Adelaide Road Bridge; running thence easterly at right angles to Adelaide Road until it strikes the old Adelaide Road; thence southerly along the same fifty-seven feet; thence westerly and parallel to first bounds to the Adelaide Road; thence northerly along the same fifty-two feet more or less to the place of beginning. Being the lot of land demised by Count Robert Visart deBury and Lucy Gertrude, his wife to one Thomas Brown, by indenture of Lease bearing date the seventh day of November A. D. 1894, and duly recorded in the Office of the Registrar of Deeds in and for the City and County of Saint John in Book 55, page 57. Together with all the buildings and improvements thereon, for the purpose of realizing the principal money and interest secured by the said Leasehold Mortgage.

JOHN COLWELL, Mortgagee.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Temporary Barracks, Fredericton, N. B.," will be received at this office until 12 o'clock noon, on Tuesday, August 27, 1918, for the construction of Temporary Barracks, Fredericton, N. B. Plans and specification can be seen and forms of tender obtained at the office of the Chief Architect, Department of Public Works, Ottawa, Superintendent of Dominion Buildings, St. John, N. B., and the caretaker of the Public Building, Fredericton, N. B. Tenders will not be considered unless made on the forms supplied by the Department and in accordance with conditions set forth therein. Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. By order, R. C. DESROCHERS, Secretary. Department of Public Works, Ottawa, August 7, 1918. 8-16

MUST GET RID OF CATS.

Court Warns Mrs. Dewint to Dispose of Her 22 Pets.

Because she had not disposed of her twenty-two cats, as ordered by Judge William F. Bleakley in the Court of Special Sessions last Monday, Mrs. John F. Dewint, 612 Warburton Avenue, Yonkers, was called to court again. Judge Bleakley told her that if she did not get rid of the cats she would be fined.

In addition to the cats, Mrs. Dewint owns four dogs. The court allowed her to keep these because she has licenses for them. Mr. Dewint, a lawyer of 40 Wall street, who appeared as counsel for his wife, said that he had urged her to dispose of her pets. Meat and cream bills for the animals, he said, had amounted to \$1,500 annually for the last eight years. When he notified butchers and milkmen that he would not pay any more bills he said his wife spent her own money to provide for them.

The complaint against Mrs. Dewint was filed by John Welsh of the Yonkers Health Department, who said that Mrs. Dewint's neighbors had been unable to sleep on account of the noise made by her cats.

Mrs. Dewint said that the cats and dogs had strayed to her house, and that when she fed them they stayed. She had intended, she said, to restore their spirits with food and then send them to the city pound, where stray animals are disposed of.

DUTCH HALT SAND DRIFTS WITH GRASS TUFTS.

Sand is used for railroad embankments in many parts of Holland, but much repair to the roadbed was made necessary by the fact that the freshly piled sand drifted during the high winds. To prevent this, tufts of coarse grass have been planted along the slopes, and as the roots spread, a well-secured bank is formed.-From the September Popular Mechanics Magazine.

WILSON BOX CO., Ltd.

Oil-heating system built for steam radiation. An oil-burning equipment for steam and hot-water heating plants is of especial interest at present, on account of the coal shortage. The outfit, which is illustrated in the September Popular Mechanics Magazine, consists of a two-wheel car containing a cog and attached to the rear of a motorcycle. Accompanying the outfit is a driver and a dog catcher equipped with a long-handled net.

WANTED

The police of Louisville, Ky., have found that a motorcycle outfit for dog catching is more easily handled than a horsedrawn outfit. One now in use there, shown in the September Popular Mechanics Magazine, consists of a two-wheel car containing a cog and attached to the rear of a motorcycle. Accompanying the outfit is a driver and a dog catcher equipped with a long-handled net.

WANTED

Men to work in our Fairville Lumber Yard.

WILSON BOX CO., Ltd.

Huge War Purchases

By The Dairy Branch

Staff Undertook Heavy Work Without Pay

There is often criticism of government departments as to the unbusinesslike way in which they conduct business, but it is doubtful if any business house could administer its affairs more efficiently and with less staff than have some of the branches of the government since the outbreak of war.

As an example, in the last three years the dairy and cold storage branch has purchased and shipped for the Imperial government nearly one hundred million dollars' worth of hay, flour, and oats. This has been done by the regular officials of the department, and with no outside help except the addition of necessary clerks. They have without doubt saved the British government an enormous expense in salaries, offices, etc. It has been done simply as a part of the routine of the office.

Eleven Millions in Hay.

In the summer of 1915, the British government called Canadian authorities asking if they could purchase for them ten thousand tons of hay. After rather unsatisfactory attempts to have the business handled by private companies the government decided to place the matter in the hands of the agricultural department. It was recalled that the dairy branch bought hay for the British army during the Boer war, and so the work was turned over to that branch. W. Moore of the branch, who looked after the purchases at the time of the Boer war, in the past three years there has been purchased over four hundred and forty thousand tons of hay at a cost of some eleven million dollars. The cost of compressing, freight rates, etc. When the work was first started the cost of compressing was \$7.18 a ton. This was regarded as too high by the department, and a modern compressing plant with a capacity of 1,000 tons a day was erected at a cost of \$2.95 a ton.

Huge Purchases of Oats.

Later the department was asked by the British government to purchase four and a half million bushels of oats. During the past three years 12,197,776 bushels of oats were purchased at a value of \$34,812,877. The average cost per bushel was 28.5 cents. The average cost per bushel was slightly over \$2.84. The average cost per bushel for handling was slightly over one cent, showing how remarkably efficiently the work has been done. The largest work of all was the purchase of oats. All together there has been handled slightly over 70,000,000 bushels of hay at a value of \$24,812,877. The total salaries for office work for handling this enormous amount of grain was only \$68,150.

The British Wheat Exporting Company has been purchasing for the British civilian population and it was decided to merge the two departments. This work has been done efficiently and unostentatiously by the officials of the department while they were still conducting their regular government work.

AS SOLDIERS JEST

THEY SHOW HATE

OF THE GERMANS

Cassed and Maimed Men, Home From Front to Ellis Island Hospital, Cheerful Except on One Subject

Almost every ship that returns from overseas brings home convalescent American soldiers. Hundreds of these heroes, many limbered, other crippled, and most of them still suffering from mustard gas, are at the Army Reception Hospital at Ellis Island.

It was the good fortune of a reporter for the New York World to talk with several of these wounded men the day after he had landed from France. With every man two qualities were prominent—good nature and perfect faith in the ultimate victory of the Allied arms.

But there was something else, something that seemed in direct contradiction to their extreme good nature and ever present American sense of humor. As they talked of the hell through which they had fought, other things took shape. It was a deep hatred of the German.

They described him as a coward in face of superior numbers, and inhumanly cruel. Their feeling was disgusted contempt.

The convalescent men, on crutches, or supported by comrades, walked about the recreation ground on the island. This open space faces the Battery, and the smoke and steam of the skyscrapers are plainly visible. The wounded men look toward the city with longing eyes. It happened that those who talked with the World were not New Yorkers.

All told the same story. Their treatment by the medical staff of the army and by the Red Cross had been beyond complaint. Everything that could be done for them had been done. They were all glad to be home once more—except that they wanted to get just one more chance at the German.

The island contains three hospitals. The most spacious and airy of the former immigration buildings have been assigned to the convalescent soldiers. Most of the men invalided to this country have been wounded too severely to return to action. Many have been so high and dry that they are because of threatened tuberculosis, caused by mustard gas.

The ever present sense of humor of the soldiers, even when telling of horrible moments of the war, is plain. A good example was given in a conversation with a man from Colorado, who had come to France with a St. Louis regiment.

He said that when his regiment was sent up to the front it was two days without fresh drinking water. So much of the water on the fighting front has been issued against a soldier drinking any of it.

But it was not water that worried the men on this particular occasion, said the soldier from Colorado. They were hungry. They had been fighting for some hours and had been permitted to drop back for "chow." Just as they were about to fall in line for mess, German artillery boomed their kitchens. The two cooks and dry cleaners were blown to atoms along with the food.

The Colorado soldier said: "The Americans feared neither rifle nor cannon fire."

"They walked right up to that," he said. "It was the machine guns, which put sixteen shots in a man in less than three seconds, that caused the trouble."

He said he had seen men brought in from the front with their bodies laid open from shoulder to hip, by machine gun wounds, the flesh being cut away as if with a pair of shears.

As the man from Colorado talked, sympathetic sailors and officers crowded about. A wounded man from a Michigan regiment told with pride how

the marines had fought at Chateau-Thierry. He was at the front, working with a medical unit, when the soldiers of the sea smashed into the Germans. He said the bravery and soldierly qualities of the business had aroused the wonder and endless admiration of the Allies and deep fear among the Germans. The Michigan man added that the Germans, unless they greatly superior numbers, die in terror from the Americans and the Australians.

How Many Lost Legs.

Most of the marines wounded in the action around Chateau-Thierry were struck below the knees, this soldier said. They went at the Germans running and erect. The Germans were not used to such recklessness. They had pointed their machine guns low, supposing the marines would crawl up. As a result of that machine gunner, the man from Michigan said, many soldiers of the sea suffered amputations of both legs below the knees.

This soldier brought back word of the gallantry of the 105th regiment, part of which is the old 69th of this state. He said the regiment had been continuously in the fighting than any single American unit in France, and it vied with the marines in bravery and soldier-like qualities.

The bravery and self-sacrifice of the medical units, he went on, were responsible for the saving of a great many Americans. The ambulances drove straight into the first line of fire. The stretcher-bearers were often within a few hundred feet of the men when they fell in the hottest advances.

Jokes From Sufferers.

The cheerfulness of the American soldier was apparent not only under fire, but in the ambulance. The soldier in the rear in ambulance one another, often making sport of their wounds. Frequently they were taken to the rear in ambulances containing wounded Germans. The soldier from Michigan laughed as he described the many arguments he had heard between wounded Americans and German prisoners who spoke English. Before they reached the emergency hospitals the Germans usually were invited "outside to fight."

The convalescent soldiers agreed that the French and English were too lenient with German prisoners. They explained quite frankly that the Americans were been on discipline when they captured any Germans, and made them toe the mark.

All the convalescents extolled the hospitality of the French people. They said the farmers had opened their hearts and homes to the American boys. When soldiers had

IMPERIAL PRESENTS ELSIE FERGUSON

Fine Photo-play Vehicle for Charming Star—War Picture Shows Colonial Troops on Way to the Front

The sacrifice by a young woman of her happiness to save the honor of her family threatened by the act of her erring sister, forms the basis of "The Lie," the new Arcraft picture starring Elsie Ferguson, which is displayed at the Imperial now.

BIG ZEPPELIN DESTROYED

London, Aug. 12.—British aviators today brought down a German Zeppelin in flames off the English east coast, according to advices to the Star.

PLAYGROUNDS IN SOUTH END OPENED

The formal opening of the new South End playground at the foot of Britain street drew hundreds of people last evening. The ball game was played by the Turtles and Victorias.

Delicate Young Girls, Pale, Tired Women

There is no beauty in pallor, but proof of plenty of weakness. Exertion makes your heart flutter, your back and limbs ache, and you sadly need something to put some ginger into your system.

The Morning War Summary

(By The Associated Press.)

Although the Germans are employing fresh forces of reserves in efforts to hold the British reserve troops who are pressing them from the region of the Somme to the Oise, the American, British and French armies continue to make progress.

Played The Game.
Teggie from Thorpe's and McAvity's hardware stores played a game of baseball on the old Marathon grounds last evening which ended in a tie, the score being 3 to 3. Moore pitched for Thorpe's and Myers for McAvity's.

BOWLING.
Black's Team Defeated.
A bowling team from Black's bowling alleys was defeated in Fredericton last Saturday night by a total of 1322 to 1315. The local team was made up of Allen Beattie, A. Covey, A. Smith, J. Coughlan and W. Riley.

GIANTS, 9; VICTORS, 5.
In the West End League, last evening, before a large crowd of spectators, the Giants won over the Victors by a score of nine to five, the game going five innings. The battery for the winners consisted of Brown, Wright and Milan, and for the losers King and McIntyre. Tonight the Courtenays and the Dominions play.

THE TURF.
Fast Stepping at Philadelphia.
Philadelphia, Aug. 12.—Spirited racing in a fast time marked the opening day of the grand circuit meeting at the Belmont Driving Club's track today. The .04 pace furnished the feature. Murphy landed the first and third heats but every one of the three was a hard drive. Baxter Lou took the second heat and led to the half in the third but the pace was too fast and Director J. won the heat from Hal Boy in 2:08 3/4. The 2:08 trot was a procession for Chilcot.

GET IN FOR THE FINISH
A ball game is not won until the last man is out. The final jump wins the race. The game man and the game horse show their gameness in the final moment.
This war will be won by the gamest side. The Allies have it, but it will be in the final quarter.
There is a chance for every man to get in on the finish. Farms of Canada need men and the Allies need the products of Canadian farms. Get out with the harvesters and make sure of the crop.

USE THE WANT AD. WAY
"EVERYWOMAN" TEACHES LESSON OF THE AGE IN FEW BRIEF HOURS
That most spectacular production, "Everywoman," will be the attraction at the Imperial Theatre Friday and Saturday of this week with Saturday matinee.

"Everywoman" is not a sermon play in disguise. It is not a quixotic effort to elevate the stage. Its intent is to furnish pleasure and entertainment to all classes of playgoers—hence the music, the songs, the choruses, the dances, the spectacular and scenic effects, and the realism of every-day life. Anna Held Dead
New York, Aug. 12.—Anna Held, the actress, died here late today after an illness of several months.
Miss Held had been ill since April of a rare malady known as myeloma, a disintegration of the spinal marrow, and her condition was reported several times as critical. She rallied repeatedly, however, and until attacked by pneumonia a few weeks ago was regarded as on the road to recovery. Her physicians said that only her remarkable will power had prevented her from succumbing long ago.

DRYING OUTFIT CAN SAVE SOFT CORN AT LOW COST
On account of weather conditions last year, millions of bushels of corn did not mature properly, and was so soft as to lose its market value. An apparatus for drying this corn, demonstrated at the Iowa State Agricultural College, is described and illustrated in the September Popular Mechanics Magazine. The equipment is quite simple and costs only about \$400.

Seventy-Five K. of C. Men Go Abroad Weekly
William J. Mulligan, chairman of the Knights of Columbus committee on war activities, in an address before the "Victory Convention" at the Waldorf in New York, Tuesday night, for the first time issued an official statement, containing facts and figures covering the big work being done by the knights here and abroad.
Mr. Mulligan declared that since the drive for secretaries started a few weeks ago, 255 secretaries have reached France and 125 others are ready to sail. Secretary service houses in New York, Boston, Baltimore, Washington, Chicago, Seattle, Tacoma, San Francisco and other cities.
In the last few weeks vast quantities of supplies have been shipped abroad. Mr. Mulligan gave some interesting figures in this connection.
Here is a partial list of supplies recently purchased for shipment abroad: Seventy-five million cigarettes—these are being sent over at the rate of 1,000,000 a week and each cigarette bears the monogram of the K. of C.; Ten thousand pounds of hard candy; Twenty tons of milk chocolate; Fifty-five thousand dollars' worth of mixed candies; Two hundred and twenty-five thousand cigars; Thousands of cases of condensed milk and thousands of pounds of tea and coffee; Twenty-five hundred cases of chewing gum; Soap and towels by the hundreds of gross; Two million smoking pipes; Six hundred athletic units, consisting of baseballs, indoor balls, volley balls, soccer balls, bats, gloves, and other articles. Part of this equipment is now in England and France.
"The committee have so organized the domestic service that the country has been divided into zones, each zone to have a department director, and each department director to have under him a number of supervisors, who will constantly keep in touch with the secretaries, and see that the service rendered to the soldiers in the various camps is kept at the very highest standards," said Mr. Mulligan.
The report that the committee had adopted the slogan, "Everybody Welcome and Everything Free" took the convention off its feet. It was explained that all supplies are being given free to sailors and soldiers.
The recommendation that the committee would go out for \$50,000,000 was greeted with wild applause and the representatives from each state jumped to their feet and stated that any allotment made would be forthcoming.

Aeroplane Making Growing Industry
Development of the Enterprise in Dominion Surprisingly Rapid
Ottawa, Aug. 12.—The number of Canadians who have joined the royal air force and its predecessors the royal air service and the royal flying corps, since the outbreak of the war is not available for publication owing to military secrecy. The same secrecy, however, is not applied to the other activities in Canada in connection with the development and maintenance of the Allies' air service.
In January of last year, the Imperial Munitions Board, through Canadian Aeroplanes, Limited, commenced the construction of aeroplanes for training purposes in Canada, at the national factory where the output of flying machines has now grown to a substantial total. The present capacity of the plant is 300 machines per month, which the experts turned out is equivalent to 320 machines monthly.
The total number of machines manufactured to the end of last May, together with the spares, was 5,000.
The number of employees engaged at this factory is 2,150 and recently the plant has been engaged in constructing the latest bombing planes for the United States navy, showing how close to the two Allied countries of North America are co-operating in their effort to best the enemy.
The Imperial Munitions Board has placed a contract for the construction of an important number of their latest improved type of high power aeroplane planes for service at the front. This is a somewhat surprising development, considering that the authorities of the United Kingdom would be inclined to restrict rather than encourage emigration to either the United States or Canada until after the war that few will care to migrate. In any event, there will be little transport for emigrants to either the United States or Canada until after the soldiers are all brought back. They will be eager to get home, and they would certainly be entitled to first consideration.
Discussing the emigration bill now before the British parliament, Mr. Calder said that it had been so radically amended as to be unobjectionable. As amended, there would be a commission to supervise emigration, but its function would be to direct and suggest rather than to restrict. He believed that upon this commission all the self-governing colonies would be represented. Indeed, the commission or board, he said, would probably be under the Colonial Secretary.
FIND ALBERTITE SHALE GOOD FOR OPEN GRATES
A demonstration of Albertite shale for grate fuel was held in Dr. Frink's office yesterday afternoon. A quantity of the shale was burned in the grate of the provincial fuel administrator's office. Mayor Hayes was present at the demonstration. He said that it burned freely. The test was very satisfactory. After witnessing the demonstration it was proposed that two car loads be brought to St. John for demonstration purposes. Hon. William Pusey has offered to bear one-third of the expense. Louis Corey has formed a small syndicate and is about to take over the property and

Immigration Control Will Be Autonomous
Each Self-Governing Part of Empire To Have Full Control

Ottawa, Aug. 6.—Hon. J. A. Calder, minister of immigration and colonization, asked as to the scope of the resolution on the subject of immigration recently passed by the Imperial Conference, said:
"That resolution affirms the principle that each self-governing nation of the Empire should have complete autonomy in the matter of admitting and excluding immigrants, even though they come from some other part of the Empire. Thus, Canada could exclude Hindus and India could exclude Canadians. All the great States of the Empire concurred in the resolution, including India."
"What will be its practical effect?"
"That will depend upon circumstances. The Imperial Conference has no legislative authority, and it will still be for each nation to work out its own policy. The resolution in effect, provides that the Hindus settled in Canada should be allowed to bring their wives and children from India. Whether they will be allowed to do so or not must depend upon what action is taken by the government and parliament of Canada."
Discussing the subject of immigration, Mr. Calder expressed the opinion that the authorities of the United Kingdom would be inclined to restrict rather than encourage emigration to either the United States or Canada until after the war that few will care to migrate. In any event, there will be little transport for emigrants to either the United States or Canada until after the soldiers are all brought back. They will be eager to get home, and they would certainly be entitled to first consideration.

EARTHEN AMMUNITION MADE FOR TRAINING PURPOSES
Terra-cotta shells, aerial bombs and hand grenades are being manufactured in large quantities for use in training our artillerymen, airmen, and grenadiers, according to the September Popular Mechanics Magazine. Apparently there are several advantages to be derived through the adoption of the plan. Terra-cotta ammunition is cheap and quickly manufactured. Its use conserves steel to an important degree. Lastly, it is less dangerous and in some respects perhaps more satisfactory for target practice than standard ammunition. At least so far as the shells and bombs are concerned, the ammunition is non-explosive.

It's a pretty strong claim to say a cigar is the best on the Continent.
But we claim this distinction in the 7c field for the Pippin.

7c will entitle you to one—a quarter will secure you 4.

CONCERT TOMORROW.
The Temple Band concert in Victoria Square will take place tomorrow evening. The band is out today with the Knights of Pythias. Hence the postponement.

MOTERING TO HALIFAX.
Mr. and Mrs. R. C. Bowes and their little daughters, Marjory and Doris, accompanied by Mrs. Theodore Evans of Lorneville and mother, Mrs. Causey, are motoring to Halifax, stopping at Amherst to visit relatives.

UNION STREET PAVEMENT
The new pavement in Union street will be completed in another week. Yesterday the road curbs at the regular corners was completed, and the intersection at Union and Germain streets was graded. The crew of men employed at this work are now working on Main street, placing the granite blocks in the car track section. When Union street is completed, the asphalt crew will commence the surface on the southern side of Main street.

A SERIOUS CHARGE.
On Monday Rev. George Scott, agent of the Children's Aid Society, swore out an information before Magistrate Adams in the county, involving a regular seven or thirty-eight years of age and a little girl of tender years. County Police Officer Saunders today arrested the man in question. He will be brought before Magistrate Adams this evening in Brookville for examination, when he will probably be remanded until next week.

EPIDEMIC OF ROBBERIES.
It has come to light that during the last few weeks there has been a regular epidemic of robberies committed in this city. That the work has been that of boys is quite evident, although in one instance the goods taken would suggest that the thieves were older. Included in the number of places broken into were The English and Scotch Woolen Company in Charlotte street, Stanley M. Webster's drug store in Charlotte street, the Standard Creamery in Main street and William Lunney's grocery store in Main street. In the first mentioned, two suits of clothes were stolen, in the second a quantity of cigarettes, in the third about \$6 in cash and in the last a quantity of canned goods and some peanut butter. G. A. Riecker's drug store in Charlotte street was also broken into within the last few days but details of this break were previously published. So far none of the thieves have been apprehended.

EXCELLENT RESULTS FROM SALE OF BONDS

Provincial Debentures, Offered Direct to Public, Prove so Much in Demand That Total of \$300,000 is Issued

The Comptroller General of the province has sold to the public at par \$800,000 six per cent twenty year debentures, \$200,000 were offered in the first instance, but so great was the demand for the bonds that an additional \$100,000 was sold.

MAGISTRATE DOES NOT APPROVE OF MANNER CASE WAS HANDLED

There was something of a mix-up in the police court this morning in the case of Edward Burke, charged with the theft of \$880 from William Padlock, a returned soldier. The police declaring all evidence in, Mr. Ryan, solicitor for the defence, asked for dismissal of the prisoner, claiming that there was no direct evidence against him.

The magistrate, in reply, admitted that the prosecution of the case by the police was very poor and in many cases very weak. He then turned to the police and explained that he was not going to prosecute the case. He was on the bench for the purpose of trying it and that was all he intended to do.

He said that all through the hearings, which have been many, considering the case, he had been hinting to the police to get busy, but all his efforts were in vain. He went on to say that a charge such as that Burke faces, was considered the third worst crime that a man could commit, and yet the case was prosecuted in such a manner that the lawyer for the defence could ask for dismissal on very good grounds. He said that he trusted that such a thing would never occur again in the police court of the City of St. John.

EASY ON THE ENGINEERS

John Hodd and Robert London, charged with operating an engine and boiler in the plant of the Marine Construction Company, Strait Shore, without having a license to do so under the factory act, were this morning fined \$10 each. The magistrate, however, before imposing the sentence, said that the sentence about to be handed out, was one of an old and feeble man, suffering from all the ailments that it was possible for an old man to have. He said that he would be lenient in this case on account of the two men charged. They were the men who would have to pay the penalty and therefore he did not feel like fining them the full penalty of the law, which would be up in the hundreds of dollars. The law is that a man proven guilty of the offence of running a steam boiler or engine, without having a license to do so, is liable to a penalty of \$10 a day for each and every day. The magistrate very clearly stated that the next case brought before him under the same circumstances would not be dealt with in such an easy manner.

KNIGHTS FULFIL SOLEMN PLEDGE TO DEPARTED

Annual Decoration of Graves of Former Members This Evening—New Number 138—The List

"In fulfilment of the promise made at thy open grave, and because we have a kindly remembrance of thee, in the name of Pythian friendship, we bestow these symbols."
Recently kneeling bare-headed at the graves of their brethren the Knights of Pythias of the city will this evening place floral tokens of love and tender memory in Fernhill, Cedar Hill, Church of England and Methodist burying grounds. There are 138 graves in all to be decorated with the floral cross and K. P. silk flag, the great majority of which are in Fernhill.

This annual decoration of graves is one of the strongest links in the Pythian bond of friendship and fraternity. It is actually the fulfilment of a pledge made at the graveside of each departed knight as a concluding token of brotherhood. When a Knight of Pythias dies his brother knights remove their mourning token of laurel from their lapels and drop it on to the coffin whilst the chaplain utters a pledge to keep his grave ever green.
Past Supreme Prelate Col. Jas. Moulson will deliver the oration at this evening's ceremonies and Past Chancellors E. E. Thomas and Jas. E. Arthur will read the scriptures and offer the prayer. The Temple of Honor Band under Wm. E. Jones will lead the singing of the hymns "Asleep in Jesus, Blessed Sleep" and "When the Day of Toil is Done."

The flowers will be conveyed to the cemeteries in two barouches with emblematic designs on each. Uniform Rank K. of P. will be represented by Victoria and Cygnus Companies and the subordinate lodges, New Brunswick No. 1, Union No. 2 and St. John No. 30 (N. E.), will be under the official charge of Chancellor Commanders R. C. Thomas, W. W. Armstrong and Thos. Totten respectively.

The procession will leave Castle Hall, Germain street, at 6 o'clock sharp and proceed to Fernhill by way of Germain, King, Imperial Place, Sydney and Waterloo.

The list of Pythian Graves being decorated today is as follows:
Fernhill
William Collins, William Kennedy, James Denney, John Campbell, S. A. R. Moulson, Robert Parkin, Joseph Duffell, Adam Young, Jr., John A. M. Hunter, Thomas S. Lyles, William S. Baldwin, E. W. "Boys' Shop" Talk

THERE'S A REAL REASON why so many mothers bring their boys here to be outfitted. It is not just because we say we are the largest Boys' Shop in Eastern Canada. Many mothers have come, made a pleasing choice, and the boy has proven the wearing qualities to be all and more than we claimed. So these mothers not only came again, but told other mothers the good news. These also came, were delighted, and bought. Thus the mothers have in reality made us the large "Boys' Shop" that we are today. We show our appreciation by carrying a range of boys wear that is up to the mark in every way, at prices that are very low, in keeping with the qualities offered. Whether it be BOYS' SUITS, BLOUSES, SHIRTS, UNDERWEAR, STOCKINGS, HATS OR CAPS, anything a boy wears. It will be found here in a style, quality and price to suit everybody.
