Montreal Stock Market.

STOCK IN CITY INDUSTRIES MAKES A GREAT DROP — WAR EAGLE WORKING TO ITS REAL PLACE — LONDON MUST COME DOWN OR MONTREAL MUST GO UP.

Montreal, Sept. 18.

Once the selling movement gets under way it often gathers additional impetus from motives altogether different from those that at first began the movement. Thus liquidation, begun on the local Exchange for profit and high rates, has today probably been intensified by the fears of such short interests as have been trading. The machinery assessment enactment would probably not have by itself depressed values and caused selling, but it, working with liquidation, for profit acts as an additional bearish influence. The reaction of Friday was not checked by changed conditions in money and resumed today with even more energy. Consequently the stock market showed a very attractive bargain counter.

Of War Eagle 1200 shares some 37 points lower were sold from 310 to 298, closing stronger at 303 offered and 305 wanted. This stock seems to be coming down to its real value.

Montreal St. Ry. was selling 10 points cheaper at from 312 to 305½, and of it 751 changed hands.

Royal Electric and Montreal Gas went at 5 and 6 less; of Electric 194 selling at from 186½ to 185½, and of Gas 775 at from 199 to 195½.

Street, Electric and Gas as being city industries owe a good deal of their break to the machinery tax for which they are now under assessment, though of course the stringency of money is the main cause, as it is of all the low priced selling today. As being almost, if not altogether, free from machinery assessment, Richelieu & Ontario might have been expected to sell possibly higher; and give sympathetically strength to the declining general list. It, however, like the rest, sold lower by some 3 points. It is astonishing that Canadian Pacific should in the face of higher London quotations fall off to the extent of 5 points this forenoon, and

it makes compulsory that either London lower prices to the Montreal level or Montreal heighten hers to the London basis. Toronto Railway, Republic, Bank of Montreal, Union Bank were sold 2 points lower. Montreal Cotton shrunk 13 points. Twin City lost 4. There was no recession today, but can be with some measure of certainty traced to the money situation and the great recessions on the city industry stock price is due to the machinery tax assessment. Toronto Railway, for instance, fell only 2, whereas Montreal Street dropped just five times as much. It will be noticed also that it is only the city industries that have fallen far, except in the case of War Eagle, the break in which had to come, as its price is by far too high.

MONTREAL MINING EXCHANGE.

GENERAL WEAKNESS DISPLAYS ITSELF — WAR EAGLE SLUMPS — BUSINESS DULL.

Montreal, Sept. 18.
The market was considerably off this forenoon. A combination of unfavorable events exerted their combined influence and had an exceedingly depressing result.

The New York markets were heavy. The Connecticut Bourses were lower. The market was affected by the heavy slumps in the high-priced stocks. There seemed to be no bottom on the Stock Exchange for the price of War Eagle. No sales were made on the Mining Exchange of either War Eagle, Payne or Republic, but they all suffered out of sympathy with the weakness in War Eagle.

For some time past there has been a lot of dissatisfaction amongst holders of War Eagle in regard to the arrangement of the Centre Star stock. The present holders claiming that they should be entitled to greater privileges. The Exchange News has often pointed out the unwarrantable high price of War Eagle and has cautioned investors from buying at the late high figures.

In other respects the market was fairly strong, 2000 Golden Star sold at 41. The last sale being made at 46 on September 11. Big Three also, sold for 2000 shares at 20; it was freely offered at 21; this should be a purchase around these figures.

Old Ironsides remains firm, 500 shares selling at 115, with 114½ being bid for more. Virtue, likewise, was quite steady at 45, 1000 shares changing hands.

In Slocan Sovereign and Montreal-London broken lots were sold at steady prices.

Montreal Gold Fields was in good demand round 15, and had the market been in a less nervous shape, it would no doubt have sold higher.

The demand for Rathmullen continues to be strong and can be called good. The news from the mine is satisfactory, and it is one of those cheap stocks which can be picked up with advantage at any time. Just at present the superintendent, Mr. O'Toole, is taking a well earned holiday, but during the last four months a great deal of development work has been satisfactorily accomplished. The demand this forenoon was good, but no sales took place.

Further development work on the Evening Star property necessitates the levying of a few cents assessments. The company, at present are considering the advisability of reorganizing, it seems necessary that for more economic operations a further power plant should be installed.

MORNING SALES.

- Big Three—2000, 20.
- Golden Star—2000, 41.
- Montreal-London—200, 52.
- Old Ironsides—500, 115.

NEW YORK EXCHANGE.

B. R. T. RECEDES FAR AND CLOSES STRONG — GENERAL RECESSIONS — CLOSE MONEY THE ASSIGNED CAUSE,

New York, Sept. 18.

There are many conflicting reports this morning from the other side in regard to the situation in the Transvaal, but local newspapers seem to agree that the countries are at more strained relations and are nearer to war than they have been yet. Consols both for money and account show declines of $\frac{1}{2}$ p.c.

The last half hour of business on Saturday in this market saw prices crumbling throughout the entire list and the market was the weakest we have seen in a long time.

The money situation is of course the dominant factor in the market now, for business conditions throughout the country were never so prosperous, and all the railroads continue to make most excellent showings.

Saturday's bank statement, however, was distinctly bad and promises tight, if not tighter money than we had last week.

Such a condition of affairs in the money market must result in a continuation of the liquidation which carried prices lower last week.

As yet the condition of the Exchange does not justify any movement of gold from the other side, but should the high rates for money continue, it is quite likely that money will be attracted from the quarter.

At present the support to the market, when there is any, seemed to come from the short interest. The short interest in the general list appears to be growing smaller day by day, and great many shorts put out at higher prices, covered on Friday and Saturday las. It seems quite likely that the demoralization of prices which was so much in evidence on Saturday will be even more far-reaching.

New York, (noon), Sept. 18.

As is usual when bad news comes during the last hour of Saturday's business, the full effect of the unsatisfactory bank statement was not felt till today. It is true the market declined on Saturday and that was largely due to active hammering by the bears, who anticipated that consideration of the bank statement over Sunday would result in a large number of selling orders being placed in commission house hands for execution this morning. Another depressing factor in the situation was the weakness of the London market and the decline in British Consols. It seems to be the universal belief in London that war with the Boers is now inevitable and financiers are inclined to believe that the war will be followed by a considerable disturbance in financial circles. The greatest pressure at the opening was in local traction stocks, namely B.R.T., Man. and Met. The first named was extremely weak and showed practically no rallying power, whatever until it had sold at 79. Around 79 supporting orders seemed to make their appearance, but the stock continued heavy. Metropolitan was nervous, but it looked rather as if selling was as much for short account as for liquidation. Man. was conspicuously without support in as much as there was considerable commission house buying last week. Selling from the same source was very apparent.

There is every indication of tight money today. Some loans have been made at 7 p.c. The quotation is now 8 p.c. bid and none offered. The financial condition of the banks is such that radical reduction in loans

must be made this week, and until such radical reduction has been made, lower prices for stocks and higher rates for money are inevitable.

ROYAL ELECTRIC.

DIRECTORS VISIT THE WORK AT CHAMBLY.

At the special invitation of Mr. Rodolphe Forget, president of the Royal Electric company, several of the directors of the company and a number of leading stockbrokers went out to Chambly Canton, on Saturday to inspect the works of the Chambly Manufacturing Company, which supply the power to the Royal Electric Company. The party was composed of Messrs. Rodolphe Forget, G. F. Caverhill, James Wilson, Gordon Strathy, A. A. Wilson, Godfrey Weir, F. Nash, W. I. Fenwick, W. J. Turpin, Fred. Barlow, G. H. Meldrum, C. E. Gault, and Mr. W. H. Brown, general manager of the Royal Electric Company. A special train took the visitors to Chambly Canton, and the first point of interest visited was the magnificent concrete dam, which extends first across the Chambly river for a distance of 550 feet, then down the river 1627 feet, and then inshore another 320 feet, forming a Z. The dam makes what is known as the head race, or supply pond, which provides the water to the power house for the generation of the power. Mr. Brown, the general manager, and Mr. P. G. Gossler, the electrical engineer, showed the visitors through the power house, and explained the machinery used in the generation of power. At present there are two exciters and four pug generators in operation, but there is room for four more generators, which will be placed in position as soon as the necessity arises. Each generator has a capacity of 2,500 horse power, making the total capacity at present 10,000 horse power, and the ultimate capacity will be 20,000 horse power.

On the gently sloping river bank on both sides of the Richelieu, it was quite apparent nature had been rudely treated by the hands of modern vandals. The dry land showed, there was a time not so remote, when the waters of the Richelieu played over the parched spots, making Chambly and Richelieu two of the most picturesque spots in the Dominion. What the country has lost in picturesqueness it has been a thousand times repaid in usefulness.

Mr. Brown explained that the generators were the largest machines of the kind that had ever been built, even bigger than the Niagara machines. They had all been made at the Royal Electric works. The machines generate the power for the incandescent lights, supplied by the company in the city, and it is the intention to shortly supply the power for the arc lights as well from Chambly.

From the machines the electricity is conveyed to another building, which is known as the terminal house, where the junction is made between the underground cable and the overhead lines, which carry the power into the receiving station at the Royal works in Montreal, a distance of sixteen and a half miles. What impressed the visitors most was the simplicity and solidity of the whole structure. Although three of the huge generators were working at the time there was not the slightest vibration, a fact which, as Mr. Brown explained, shows how perfect the machinery is. Another interesting feature which was explained to the visitors was the precaution that is taken against lightning storms. In addition to the transmission wires, a set of barbed wires are used and form a shield over the transmission wires. Each of the barbed wires is connected with a wire running to the earth. This arrangement allows the electricity in the air to accumulate on the barbed wires and to escape into the earth. Lightning arrestors are also connected direct with the copper wires and afford another means of escape. Even during the remarkable electrical storms that have occurred during the last couple of years, the company had not the slightest accident. All the visitors were greatly impressed with the fine machinery and the perfection of all the arrangements.

At about three o'clock, three of the party, especially, looked very dry, which suggested to mine host the popularity of a move towards the neat brick house already alluded to. "Soup is getting cold" was the signal for a move which could only be compared to the rush of water when the sluice gates were opened near the power house. Turkeys, chickens, lamb, roasts, pies and ham (and other things) fast disappeared and were followed by sweets and tales, some extra good ones, being recounted by President Forget, Manager Brown, Mr. James and Mr. Andrew Wilson. As they were less technical than those given at the power house, they were perhaps better understood by the majority of those present.

After lunch the party drove down to the old Chambly fort of which an enjoyable inspection was made. The curiosities of Mr. _____, the gentleman in charge, were examined with interest as were also the general surroundings. At 4 o'clock the visitors were driven to the Chambly and placed under the care of Captain Polette, an ideal skipper, who made our trip to Beloeil a thoroughly enjoyable incident. The Intercolonial then wafted us into Bonaventure, all feeling that they had made a red-letter day in their terrestrial journey. After bidding their host, President Rodolphe Forget, Mr. Brown and Mr. Gossler, good-bye, the party separated.

Amongst the visitors was Mr. W. R. Eckart, of San Francisco, the representative of the Blue Lakes and San Francisco Electrical Company, who is putting in a plant to supply power from the Blue Lakes in Nevada, to San Francisco, a distance of 150 miles, with a voltage of 60,000 volts, the highest voltage ever attempted. The machinery has been ordered from the Stanley Electrical Company, of Pittsfield, Mass., the associate company of the Royal, which designed the latter's machinery, and the special object of Mr. Eckart's visit was to inspect the machinery. Mr. Eckart expressed himself as much impressed with the perfection of the machinery and the completeness of all the arrangements.

CHICAGO MARKET.

CHICAGO MARKET—September 18, 1899.

From the Bartlett Frazee Co., Chicago. H. J. Coon, Manager, 39 St. Sacramento St.

PRICES SCARCELY ABOVE CALL PRICE — GRANGERS REPORT A SHORT WHEAT CROP.

Chicago, Sept. 18.

The call price was almost, but not altogether reached by the earlier transactions after the strong openings today. Wheat reports are showing less favorably and anticipations of some Grangers are not so hopeful. It has been the experience of these roads that returns never fail to weaken in years when wheat crops are small, even though other cereals should give a crop somewhat larger than what is usual. As these roads now are figuring on less returns, it is safe to conclude that the wheat crop in these districts is smaller than had been looked for. With this leverage prices might be priced up a point or two. Wheat today was up $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ at opening, and provisions started with nearly all options up 2 or 3 cents. Argentine shipments are a seriously felt influence. It is but a few years since this country imported vast quantities of agricultural implements and now it is exporting large quantities of wheat stuffs. Exports to Europe from America are still heard of in average amounts. Home demand continues, but neither of these nor general influences exert much upward effect on the market.
