### JUMPED INTO A TANK

Hakleman From Drowning by Quick Action at Y.M.C.A.

An officer of the 97th Battalion American Legion), Lieut. N. C. Moore, saved a private from drowning in the Central Y. M. C. A. swimming pool and has won much praise for the great presence of mind he used in effecting the rescue. Private Hakleman of the the rescue. Five a failed of the 97th, who could not swim, got into the part of the tark where the water is pine feet deep and had gone down for the first time.

The officer saw the need of quick action and without hesitation jumped into the water, fully clothed, including greatcoat, and rescued the strugging man. Lieut. Moore belittles the dam-age to his uniform and the ruining of

SUNDAY WEATHER

Mr. Dixon joined the British forces in due course, and was with them, when his last letter was received, on a valuable wrist watch. "What is a uniform to the life of one of my men?" a valuable wrist watch. he asked

"The censor would probably not

Milder, with sleet or rain. (Continued on Page 12, Column 1).

"I believe in peace. I love peace. I would not be a true American if I did not love peace, but I know that it costs something, and that the only

soudce of counsel is passion. It is not wise nor possible to guide national policy under the influence of passion. I would be ashamed of the passion of fear. America does not desire any-thing other than freedom, justice and right conduct."

The president also advised against taking the advice of professional sailors and soldiers on some questions. "It is time that we attempted, at any rate, to apply the standard of our own life to national defense. What do we want to defend? "We want to defend the equal right.

of the nation, as against all other na-tions, and we wish to maintain the peace of the western hemisphere. Whese are our great needs of defence. It seems to me that America is in love with efficien Need for Trained Men.

"Material efficiency of which we hear so much, only underlies, however, what

I may call spiritual efficiency. I, for my part, have a great enthusiasm for rendering America spiritually efficient. The plans for our military efficiency do not provide for a great army. We want only an army necessary for the cases of peace, but we want back of that army, a trained body of men. These men should be civilians who know that the arts of peace come before the arts of war. The details of the army plans do not make any difference

A Permanent Force .

"I am proposing something more than temporary. It is my conception that as the government has encouraged agricultural training it should, also encourage industrial training, and it is perfectly feasible along with industrial training to instruct our young men in the mechan-ism and handling of a rifle and in the rudimentary arts of warfare. Let us instruct them and at the same time quicken and ennoble the performance

Both parties should unite on this issue, he declared, since they were patriotic alike.

### POMERANIAN IN PORT VERY BADLY DISABLED

Terirfic Gale Had Played Havoc With Liner Bound for Canada From, Glasgow.

LIVERPOOL, Jan. 29.—The Allan Line steamer Pomeranian, which was disabled in a terrific gale while out-ward bound from Glasgow for Canada, and which arrived yesterday at Queens. town in tow, was in a badly crippled condition when she reached that port. She was rudderless, her after-peak tank was full of water to the transom and she was leaking badly. The S. S. Myra Fell, from Boston Jan. 11, for Manchester, lost her deck corgo during an extremely rough passage. She reached Liverpool yesterday.

# SONORA

## The Perfect Phonograph

Why will you spend your money on a phonograph which is built solely to exploit some particular record? Can't you see that it limits your choice to the artists hired by that particular maker? Just think this over. The Sonora is made to play any and every disc record on the world's market, including the beautiful Edison diamond disc, the artistic Pathe, the magnificent Columbia and Victor records, the renowned Odeon and Fonotipia, and the famous "English double diamond." See what this means to you in intrinsic value when you buy a Sonora. When you realize that the best judges in

America awarded a special Gold Medal of Honor and 100 per cent. for pure tone to the Sonora Phonograph in competition with all other makes, doesn't that fact alone speak volumes for the beauty and perfection of Sonora tone? Come in to-day and

### Semi-Annual Drapery Sale

Lowered prices on a host of pretty things, and we make up and hang free all purchases of drapery materials amounting to \$10 or more-but these advantages end Monday night.

### the lifeboat was found. At the London TWO TURK ARMY CORPS SHUT UP AT ERZERUM

office of the Elder Dempster Line, agents of the steamer, the belief was expressed that the total loss of life would aggregate 301, 87 first-class and LONDON, Jan. 29.-According despatches from Petrograd it is es-timated that two auny corps of Turks \$1 second-class passengers and 130 members of the crew. Russian correspondents on the western front have sent word to Petrograd that the Germans are re-ported to be manufacturing a new

Most of the passengers were Eng-lish and residents in London, while a majority of the crew were natives of Liverpool. Capt. H. G. Harrison of the Shipping Experts of Opinion Spot steamer was one of the oldest and ost reliable officers in the company s service.

Speculation regarding the cause of the catastrophe varies from a subma-rine attack to an internal explosion. The value of the liner and her cargo estimated at fully \$1,500,000

A very high rate for reinsurance is being quoted on the steamers Ariadne Elder-Dempster Line Officials and Clan MacTavish, which are overdue on voyages over the same route as the Appam took. Shipping men say there is little like-

hood that the Appam could have suc-cumbed to a storm without notifying LONDON, Jan. 29 .- The mystery of the British and African Steamship the world with her wireless, which was of the latest type.

Co.'s liner Appam takes first place in the news of the morning newspapers today, and they are all agreed that the prospect that she will ever come into port may now be regarded as hopeless.

Activity of the entente allies in the west had enabled the Germans to India. As a curious instance of the diplomacy of the Germans the corre-spondnt relates the appearance of of-ficers in the streets of Constantinople in civilian clothes, when crdinarily they rever lay off their uniforms. One German officer explained this fact by SANITARY WASHED WIPING RAGSS AND CHEESE CLOTH. E. PULLAN 20 Maud St. Ad. 760 Shripping experts believe the steamer sank about Jan. 16, northwest of Ma-deira. From the prevailing winds it is figured that the catastrophe occurred some distance north of the point where

this afternoon after the game between Battery and Riversides. Both college had out their strongest teams. The local collegians were favorites owing to their win over Pickering at Newmarket. The line-up:

loney, Spellman; rover, Ingoldsby; centre, O'Con

Cady, D. Pugsley; rover, Henderson; centre, Wight; wings, Annandale, H.

Pugsley, the Pickering defence man, pulled off a great rush which terminated in a great shot at Ryan. Wagner and Morgan wont up for the local collegians, but Morgan missed the pass. Wight stowed some great stick work for Pick-ering, and finished it with a rifle shot at Ryan, who just stopped it with his skate. O'Connor brought Lawrence' to his Innees when he shot from close quarters. De La Salle scored a rather lucky goal thru Wagner, who happened to be on the spot to get a loose puck, which he shammed into the net. De La Salle 3, Pickering 1.

siammed into the net. De La Salle o, Pickering 1. Morgan gave Lawrence a hot one, which the goaler nailed with one hand. Wight had almost stick-handled his way thru the local defence before being pulled up. Wagner and Morgan went down for De La Salle, but the latter shot wide. H. Pugsley gave Ryan a difficult shot to stop. Hendersch and Ingoldsby were benched for a little horse play. A nice rush by Wagner finished fruitlessly when Lawrence blocked his shot nicely. Second period score: De La Salle 3, Pickering 1. Third Period. The Sporting World

Second period score: De La Salle 3, Pickeging 1. Third Period. Wagner opened proceedings with a long shot, which Lawrence turned aside easily. Pugsley replied by rushing the length of the ice and shooting from the corner. Spellman and Morgan went up together for the locals, and the latter slammed the puck into the net from the rebound of the former's shot. De La Salle 4, Pickering 1. Wight almost spilled the beams for De La Salle by Checking Ryan, who was clearing his nets. The goaler managed to recover the puck in the nick of time. Pugsley again shone with one of his spectacular rushes, but he had no sup-port, and was skated into the corner. Wight scored No. 2 for Pickering 7. Pugsley got going again, and going thru the whole local team gave Rvan a hard shot to handle. Ingoldsby and Wag-ner combined down to the other erid, but Lawrence stopped the latter's effort. De La Salle could not stop Pugsley at any like a veteran. Pickering tried hard to gore, and had their whole attack around the locals', nets. Spellman got benched for cross-checking little Annadale into the boards. Bare over. Score: De La Salle 4, Pickthe boards. Gave over. Score: De La Salle 4, Pick-

swimming marvel is

### NINETEEN YEARS OLD NEW YORK, Saturday, Jan. 29-This country has produced several marvels of speed in swimming. The brilliant feats of Charles M. Daniels,

Perry McGillivray, Harry Hebner, Arthur Raithel and Ludy Langer, in particular, served to amaze the aquatic world. Yet not one of these inter-national record-breakers was able to display at the same age the skill that has of late Herbert Vollmer, the nineteen-year-old prodigy of Columbia University and the New York A. C. weeks ago the wonderful A few

A few weeks ago the wonterna young waterman covered 100 yards in .54 4-5 seconds in a 75 foot pool, the fastest time ever made anywhere under the conditions, and later he thrashed 150 yards in 1 minute 29 4-5 seconds in a bath of the same length, compietely eclipsing all previous perform-

ances at the distance. These achievements, most remarkable in themselves, assume far greater significance when it is considered that Vollmer is not essentially a sprinter, but rather a middle distance swimmer. for they give some idea of what may

over the longer course. Vollmer is the typical athlete. Standing 6 feet and weighing 170 pounds in racing trim, with broad shoulders and slim hips, he shows the long, clean, supple muscles which spell efficiency.

the wing. Gooch and McKenzie went down, but the latter shot high. Referee Whitehead's decisions seemed to dis-please the crowd at times, and they cer-tainly let him know about it. First period over. Score: Riversides 2 Botters 0

NEW YORK, Saturday, Jan. 29.-Secretary John H. Farren of the Nafional Association of Baseball Clubs, has announced a list of 122 players released by the Federal League un-der the terms of the recent peace agreement with organized baseball. They are henceforth free agents so far as the Feds are concerned. Unless the teams with which they played in organized baseball before jumping to the Feds claim them, they are free to negotiate with any other clubs. Included in the list are "Chief" Bender, Howard Camnitz, Charley Carr, Harry Swacina, Art Griggs, Hap Myers and a few others of past

prominence. Most of the players are little known in baseball. COLLEGE BOWLING CLUB.

In roll-off for the first series the Waldos won from the National Yacht Club by 48 pins. Scores: Waldos 2787, National Yacht 2749. E. Kearns was the big noise with a score of 590. League Standing.

The oldest and most prominent New York

families. Mr. DeLancey Robinson one of the leading architects in New York and belongs to one of the most historic families in England and Canada, his great grandfather being at one time English Governor of Virginia- He has been in New York for the last twenty years, and during that time has designed many of the most imposing structures in America.

A RECITAL.

Madame D'jane Lavoie-Herz and Miss Margaret George gave, a recital in the Nordheimer Hall, when the latter wore a lovely gown of mauve satin, brocaded with silver, with a chain of violets holding the chiffon sleeves, and silver tassels finishing the pointed draperies of the skirt. Madame Lavoie-Herz wore a Greek gown of heavy white crepe de chine. A few of those present were: Lady Falconbridge, Mrs. Herbert Jarvis, Mrs. Barclay-Ormitt, London; Miss Sharpe, Signor and Signora Carboni, Mr. E. W. Schuch, Mrs. Frank Mackelcan, Miss L. Cunningham, Miss Elliott, Mr. and Mrs.

A very quiet wedding took place on Jan. 8, when the eldest daughter of Mr. and Mrs. Wm. Griffiths, Marguer-Miss Frances Harman, who was nurs-ing during the summer at La Panne, Belgium, is now with No. 1 Canadian Stationary Hospital, with the British Mediterranean expeditionary force. ite Pearl (Greta), was married to Mr. Frederick Stevens, the Rev. Dr. J. F. German officiating. The bride wore a brown broadcloth suit and large hat to match, and carried a bouquet of lily of the valley and maiden hair ferns. Mr. and Mrs. R. Y. Eaton, who are in Carberry, Man., are expected back the beginning of the week. Wm. Griffin supported the groom After the ceremony the bridal party

held a reception at the house of the bride's parents; only immediate rela-tions of the bride and groom were present.

CABARET PARISIEN.

Parliament was brought here to mer the question: Shall there be an insion or an election? The answer apparently is expected to the term of parliament is the or of the government as frankly lared in the speech from the throne, ed, it has been said that in the barrend speech more importance

Another interesting rumor is to the effect that His Royal Highness the Governor-General, regards an election s thru it will be taken for granted t the elections are to go over until 7. It will, of course, always be in power of the government to go to country; but, if both parties unite the politicians to bridge over their dif-ficulties in forming a coalition gov-

bring about the extension there ould seem to be a moral obligation a the government to dismiss politics a time, and to devote itself entirely the prosecution of the war.

<text>

# JOIN THE WILLIAMS' ANNIVERSARY

THE TORONTO SUNDAY WORLD

Favorable trade conditions make it possible for us to present this great Piano Club again, with all its attractive features and savings.

# The Greatest Piano Offer in Canada

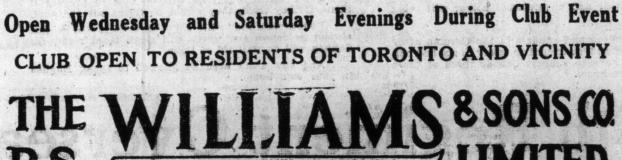

We have conducted this tremendous piano event for seven consecutive years. It has grown in volume and popularity because it is **undoubtedly** the most attractive piano offer made in Canada. Over 1,000 families are owners of instruments secured through this club. And they are pleased. Many families wait each year for the club to open. Its low price offer, easy terms, no interest and special privileges are the magnet that draws them. You cannot equal the value offered here.

## The Deal and the Pianos

The deal is a straight-out offer of 150 pianos. The instruments are of a most reliable and trustworthy character-THE WELL-KNOWN ENNIS & CO. PIANO, in which the real value is put on the INSIDE, rather than in fancy cases, although the cases are of genuine walnut or mahogany. We have known the piano for years. It is made by good, sturdy Canadian labor, in one of the best manufactories in the world, by men, many of whom have been working in the same shop from twenty to thirty years.

## The Value of These Pianos is \$360

Hundreds of these pianos are being sold every month all over the Dominion of Canada at \$360. THEY ARE WORTH \$360. Measured by any standard of value you wish, they are worth \$360. The Williams' Club price is \$267.50. The price includes everything. There are NO EXTRAS of any kind. No interest to be added. Nothing to be added for drayage, freight, stool —ABSOLUTELY NO EXTRAS. The saving to each Club Member—\$92.50—will pay for the musical education of one child for two years and five months at 75c a lesson.

**JANUARY 30 1916** 

11

These 150 pianos will be sold for \$5.00 cash, then \$1.25 a week. The \$5.00 just about covers the cartage and delivering—yet the \$5.00 payment made when you join the club is credited to your account. The piano is delivered immediately. You do not have to wait until the club is filled. You get your plano when you join. The remainder is payable every week. Club Members do not have to pay more than \$1.25 a week, if they wish. This gives them 210 weeks in which to pay for the piano, and still get it at the club price of \$267.50.

\$5

Exclusive Club A Williams F	
CASH SAVING—Every mem- ber selecting a piano saves \$92.50 cash. CLUB PAYMENTS—The spe- cial Club price is payable on	<b>REBATE FEATURE</b> —A Club member can lessen the spe- cial Club prize still more by paying faster than the Club terms call for.
reduced weekly terms — \$1.25. NO INTEREST—Club mem- bers pay no interest on Club pianos. The Club price in-	FREE TRIAL—Every member gets ten days' free trial, dur- ing which he can return his instrument, and get back every cent pald in.
cludes everything. There are no extras of any kind. This is a great saving also.	EXCHANGE PRIVILEGE - Club members have the privilege of exchanging thei piano within one year, with

n that debate is over the governnt's resolution for an extension of parliamentary term will be given right-of-way. If the resolution thru it will be taken for granted

Several rather notable speeches have been made during the past week in the debate upon the address. Mr. Carvell, the Liberal member for Carle-

tend the term of parliament is the policy of the government as frankly declared in the speech from the throne. Indeed, it has been said that in the vice-regal speech more importance vise attached to extending the life-time of parliament than to carrying on the war. It was at any rate given first place on the agenda or sessional pro-tram. Parliament will not be asked to answer inectly the question of the hour until the debate on the address is concluded. When that debate is over the govern-

ago the Liberals are said to have dis-cussed the whole question, and to have been anything but harmonious. Quebed and Maritime Province members de-stred to hazard everything on the couragement from their colleagues on this side of the Ottawa River. Sir Wilfrid Laurier asked the caucus to

Wilfrid Laurier asked the caucus to decide the question for him, but they against the committee voiced by a replied, in effect, that he must decide for them. That the Liberal chief-outside of the chamber. It is the old story of manufacturers with good plants, being told that no orders were tein personally favors an extension is pretty well known. It is therefore asavailable, while at the same time umed in some quarters that the reorders were being given to people who were not in the manufacturing business. Mr. Carvell gave a start-ling list of companies, especially organized, to get shell orders. They olution for an extension will be passd by the house without a division. That, however, does not mean that it will be passed without criticism.

Upon the proposed resolution as mbling a debate would be in order as the debate upon the address. The order as months' time, and yet, during that period manufacturers of good standing vainly applied for orders and were the debate upon the address. The oppo-tion might well propound many ques-tions to the government. They might told over and over again that none at fiscal changes are likely to be aced within the next two years curious feature of the whole business, what fiscal changes are likely to be which probably can be explained satmight insist upon knowing t is the government's policy in re-to the railway situation. They gated.

might ask for some assurance that the fovernment, after getting the extenalon, would not make a sudden dash to the country if, by any chance, the allies won a great victory in Europe-They might also demand an investigainto the operations of the shells

The general idea here is that the government wants an election. The hat is in the ring. If the Liberals want the house dissolved they will be promptly accommodated. The Ontario Conservatives, however, shrink from an election during war time unless the responsibility for such an election can be placed on the Liberals. They are

ernment. Some of them suggest that an extension should be refused unless the government agrees to investigate the shells committee. They think it would place the government in an awkward position if dissolution were resorted to for the purpose of staving

off an investigation. So it looks as tho both sides were anoeuvering for position. Not all embers on either side want an elec-

OLD

ss to the former aring a preserved ids to retain their

HERE r and restores the alp, and makes the This world-famed e great Hair Spe-Bedford Labora-

obtained from out the world. 7feb6 NTO.

There is probably not much in the contention that the prices were too high, altho at first blush it seems strange that the shell which at first cost \$8.45 now only costs \$1.75. By comparison, Canadian prices were moderate and at present are very

low; perhaps too low. The whole trouble would have been avoided if the government had gone into the making of munitions on a big scale at the start. Such action would not have interfered with private competi-tion, but it would have served as a regulator of prices and we would know to a certainty many things concerning which we can now only

anxious for a dissolution but they want the Liberals to make them dis-solve. A good many Liberals are also of the opinion that the party responsible for precipitating a wartime election will fare badly at the hands of the people. Many of them would like to see an election but they want the re-sponsibility for an election at this time to rest squarely upon the gov-ernment. Some of them suggest that ing anything very wrong, but he did convict him of having done the very things for which Mr. Carcell had un-mercifully denounced others. In short. having a contract to furnish hay to

DON'T FORGET

loronto World Sox Day, Feb. 15.

the government in 1902, Mr. Caravell farmer. As Archie McCoig observed made contracts with hay buyers in his on Friday: "We are all fond of the farmers, country, which stipulated that they especially at election time,", should not in any event pay any farm-

er more than \$8 a ton for loose hay. It was business, but poor business for the professional friend of the good speech. There was scarcely a

Toronto **Can Save** \$270,000.00 per Year

If Toronto citizens really and truly wish to economize and exercise thrift for their own good, and the good of the nation, they can save a cent a day in every household

## By Using LAWRENCE'S BREAD

There are about 90,000 homes in Toronto, and a cent a loaf saved on one loaf a day in each home makes \$270,000 saved by the city in less than a year. Try your part of this saving by using Lawrence's Bread in your home.

Order by Telephona College 321

> GEO. LAWRENCE, Baker. 21-31 Carr Street.

touch of his old style, however. Re-sponsibility sobers, as prosperity mel-lows, the right kind of a man. Sir Sam will always be frank, fearless and outspoken, but he will never again be the happy free lance that he was before the war. Now and then, how-ever ,a little of the old Sam Hughes bubbles up and flows over before the minister of war can push down the lid. This, Mr. Carroll, the Liberal Report Capture of Thousand member for Cape Breton, who is of military age, but has not enlisted, learned to his sorrow. Sir Sam was defending himself from the charge of

political favoritism. He said: I might point out that a gentle-man has written me—I do not know whether it is true or not that in one regiment in Nova Scotia twenty-four of the twenty-eight officers are Liberals and the other four Tories, that three of those Tories are at the front, but the Liberals are all occupying soft jobs at home. Whether that is true or not I can not say. I would not recognize such twaddle

anyway. Mr. Carroll: What regiment is that?

Sir Sam Hughes: I shall be glad to tell my hon. friend privately, but I can assure him it is not the regiment to which he belongs.

On the whole, some hits have been scored by both sides in the debate. Next week when the house comes to discuss the extension of parliament we will come near to a show of bands and a trial of strength. Party feel-, ings, I should say, runs higher this session than last and the politicians are more ready than they were for a contest. Someone said today that the two parties resembled two highthe two parties resembled two much price lawyers trying to scare one an-other by demanding an immediate trial, with neither of them quite will-ing to have his case go to the jury.

### City of New York Offered Large Sum for Privilege of Collecting It.

NEW YORK, Jan. 29-The war and NEW YORK, Jan. 29—The war and the resultant demand for nitro-giverine are given a sthe reasons for a legal contest which has begun here for a contract to remove the garbage of New York City. Altho the city has paid \$3.750,000 in seventeen years for removal of its garbage, a company now offers the city \$900,000 for that privilege f. five vegas.

now offers the city \$900,000 for that privilege f.r five years. Counsel for the new bidder ex-plained why the garbage had sudden-ly become so valuable by saying that the product of garbage after being treated with steam is grease, the value of which at present is high. From this grease, he said, comes glycerine, from which is made nitro-glycerine.

"In Wandre the inhabitants, without exception, were taken out and shot. This shooting was heartbreaking, as they knelt down and prayed, but that was no ground for mercy. And a witness states that this was followed by the rape in open day of fifteen or twenty women on tables in the square itself." (See Bryce report for fuller details.)

# This Will Happen in Toronto---if You Men Don't Enlist NOW to Prevent It

Canada's first line of defence is in France. The second line in the training camps in Great Britain. The third line is in the training camps in Canada.

The Power that can defeat Great Britain can dictate to the world.

If the Germans win this war, Canada will become a German colony. A conquered country—a land in which black despair and unspeakable horror will reign for many years.

The worst ruffians and vandals in the German army will be sent here and quartered in every town and village. You will have to support two or three of these terrorists in your home. Women will suffer at the hands of German soldiers. That is, and always has been, part of the German policy —as witness what happened to the women of Belgium and France.

Don't think your men will be able to prevent it then—if they tried, they would be taken out and shot. Young men, the "willy boys" especially, will be sent abroad as conscripts, which will serve them right, for Canada will be well rid of them.

And you won't even be allowed to speak English in your own home. Do you want these things to happen-must they happen before our men are aroused?

No! a thousand times no! Then for the sake of all we hold dear, our men must go NOW and fight in defence of human liberty, and the right to enjoy the free life we live today.

This is Canada's hour of need—you cannot—you will not—you dare not fail her.

Surely you will answer the call-and answer it now by joining the

make Sunday.

Everything points to a decided victory for The World "Sox Day" campaign, which closes on Tuesday, Feb. 15-the day after St. Valentine's. Dally between the hours of 12 and 5 o'clock a loyal brigade of knitters take up their po-sition on the fourth floor of the new World building, 40 West Richmond street, to do their bit for the men in those other centres of activity-the battle-fields of France and Flanders. The men from Canada will get to Berlin, but the women at home must provide the "festive" garbs-and The World Sox Sisters are making themselvos respon-sible for a huge donation of warm new foctwear with this particular occasion in view. Have you joined in the cam-paign? Why not? Are you not anxious to help some brave chap who has donned freedom? There are still two weeks and a few days in which to show where your sympathies reelly are. Hurry and do your bit! The sox you send in will go from The

sympathies resily are. Hurry and do your bit! To Somebody's Boy. The sox you send in will go from The World Bullding direct to somebody's son at the front, for our gifts are going where the need is most urgent direct to the fighting men. The knitting room in The World building is open at noon, especially for young business women, who are asked to spend an hour of their time in helping to swell the numbers. For the convenience of those who may not have read before, the materials re-quired are again printed: For the regu-lation sock (68 citiches), six ounces of 4-ply grey khaki, or white yarn is suf-ficient, and one set of No. 12 or 13 needles. This is all that is needed to produce a pair of warm wooly sox, except of course, your own time and application. If you are a good knitter, set up your sox at once and begin knitting for The World "Sox Day," Feb. 15. Chance for Beginners. If you are, like many others, only a willing beginner or an "old knitter," who has forgotten the dexterous art thru lack of practice, call in at the knitting room and ask for a little help from any of our experts, who will be only too anxious to assist you. Each Friday afternoon tea is served to the workers and a musical program ar-ranged for their enjoyment. A beauti-Walliams, camp chaplain. Sunday afternoon—Rhodes Avenue Presbyterian Church, Pte. SUNFLOWER WALL PAPER

BEST UNDER THE SUN

THE TOBONTO SUNDAY WORLD

**JANUARY 30 1916** 

FOR LATEST PATTERNS

DEMAND THIS BRAND

11

OPENING EXHIBIT HOME DECORATIONS

WE invite the home-makers of Toronto, Hamilton and environs and all others interested in economical home beautification, to the Opening of our new retail store and our First Exhibit of Modern Wall Decorations at 312-314 Yonge Street, from January 31st to February 5th inclusive.

During this week, no sales will be made. We want you to feel free to come in, inspect the hundreds of suggestions for modern interior decoration shown on our great display screens, get acquainted with the remarkable values this store will offer, without feeling in the least compelled to buy. Therefore, no sales will be made during this Opening Exh.bit, though where desired, reservations may be made to avoid the necessity of returning later to purchase.

## The Finest Wall Paper Store in the Dominion

We believe that the increasing metropolitanism of this city and the demand for more tasteful and up-to-date home decorations at more reasonable prices than present methods of distribution make available, these conditions demand such an establishment as this, devoted exclusively to home decorations, where the finest and most distinctive and beautiful modern wall papers of bot" Canadian and imported manufacture, can be secured in greater variety and at lower prices than ever before in this city.

### Enormous Stock

### Lower Prices

More than half a million rolls of new, 1916 wall paper, in the latest designs Because of the economy of our method of doing business, and our tremen-

dous purchasing power, we offer you this new and up-to-date stock at much lower prices than any other establishment selling wall paper in this city. There is no way to prove that statement except by the goods themselves. We invite your close inspection of these, all plainly priced. You will find at 10 to 25 cents a roll, better paper, more attractive designs, newer colors, than is sold by the most progressive wall paper stores in the city at present for 25 and 50 cents a roll. Confirm these statements for yourself during our Opening Exhibit Week—or later.

### **Convenient Location**

Our business will occupy the entire building at 312-314 Yonge Street, in the heart of the shopping district. The large and attractive rooms on the street level are devoted to our retail trade. Note our windows in passing— try to find time to visit our store during this Opening Exhibit. You will find it interesting and suggestive, whether you intend to decorate now or not.

**Real Estate Men and Property Owners** 

having homes for lease or sale will find it to their advantage to visit our store and learn how inexpensively, attractive, up-to-date wall papers can here be secured. You can make your property more attractive to desirable tenants or purchasers at the expense of a few dollars for re-decorating.

REMEMBER: No sales during Opening Exhibit, though reservations may be made. If you can't come in, ask your paperhanger to show you the Sunflower Sample Portfolio. Names of good paperhangers in your neighborhood furnished an request.

tions existing in Mesopotamia which make our work particularly valuable. The terrific heat, the desert marches, the swamp fighting and the difficul-ties of transportation which make short rations occasionally unavoid-able, have been some of the obstacles with which the men in France have not had to contend, but which have been only too real here. Furthermore, these hardships have not been offst by the social agencies at work at the bases in France. The only organiza-tion in the field has been the Royal Army Temperance Association, or as it is more familiarly known, the 'R.

This work was afterwards handed rom Michigan, who had been studying at Oxford.

"In opening up this new work," said Mr. Dixon, "the heartiness of the reception and co-operation afforded to us by the officers of the various units, has left little to be desired. 'T. M.C.A.' has proved to be a magic password among them all. Accompassword among them all. Accom-modation, equipment, transporta-tion—in fact nearly everything that we have required has been grant-ed us. The men have also been equally enthusiostic. This has been especially true of the Territorials, who have known the "Y.M." on Salisbury Plain and in the cantonments of In-dia. It has been a common thing for dia. It has been a common thing for them to come to us as they have been leaving the station where we are and ask: 'How soon may we expect you at -? Wish you were coming with

us now.' Work Among Convalescent. "Acting on the request of the quar-termaster-general, we began our work among the convalescents-men who had been discharged from hospitals, but who were too weak to resume ac-tive duty, or who, as in many cases, were awaiting transport to India. For these men our rooms proved to be a God-send. Instead of the hot dusty huts in which they had had to lie about all day, we were able to provide them with a comfortable room supplied with illustrated papers, writing facilities, indoor games, a gramophone and a tea-bar, where they could get pop, tea and biscuits. From the day

Have You Got

"I have used 'Fruit-atives' for Indigestion and Constipation with mos excellent results, and they continue to be my only medicine. I saw 'Fruit-atives' advertised with a letter in which someone recommended them very highly, so I tried them. The results were more than satisfactory, and I have no hesitation in recomm ending 'Fruit-a-tives.' "ANNIE A. CORBETT." Time is proving that "Fruit-a-tives'

that we first opened the place it has been crowded.

"The large numbers of sick and wounded in the hospitals have also provided a field for valuable work. Out here on the edge of the Arabian over to Mr. Dixon, who later was joined by several other Y.M.C.A. workers, including a Rhodes Scholar way of visitors to cheer them in their sufferings. Even the chaplains are scarce; for tho the staff has been

greatly increased during the past two months there is still more work than they can do. Consequently the Y. M.C.A. bloke's he came to be called by many of the 'Tommies' has received a warm welcome in the hospital wards. To help these men by taking them papers, cheering them with the latest news, writing their letters or providing much needed paper and en-velops for those who could write velops for those who could for themselves, and above all, carrying into the wards something of the joy of Jesus Christ has been a

privilege indeed. "Opportunities are now opening up for extending our work to those men who are 'fit' in adidtion to the sick, wounded and convalescents. We are

able to do much for them in the way of organizing and conducting their re-creation and games and helping in various ways to maintain and increase their efficiency.

Heed Deeper Reality. "Thruout our work the more defin-itely religious side is being kept al-ways to the fore. In this we are meeting with a much greater response than we did in the territorial work in India. Both 'Tommy' and the 'Ter-rier' realize the seriousness of their position and are much more disposed o give heed to the. deeper realities of life."

On opening his work at . • Mr. Dixon posted a notice that he had a consignment of khaki-bound pocket testaments. Scores of men came to get copies. One man said the one his mothed in had been ruined in

the swamp fighting. Another had never carried one before but his experience in the desert had made him

inaugurated and carried out by

## **BIG PRINT RED LETTER BIBLE** ON TERMS THAT AMOUNT ALMOST TO A GIFT Take heed of today's coupon, lest it be too late! Our limited supply cannot hold out much longer.

The Ubiquity of the Bible

The Bible is the one Book to which the toilers of the world turn for comfort — for consolation — for wisdom. It is the only message given to mankind that has lightened life of its burdens and shorn death of its terrors. Like the sun. its rays reach every nook and cranny of this globe. Unlike the sun, it never sets.

Wherever men lead lives of danger; wherever women lead lives of sorrow-you are sure to find the Bible. In the dripping mines deep in the bowels of the earth; in the blood-reeking trenches of the battle-field, with their awful hell of bursting bomb and shredded flesh; in the felon's cell where solitude and silence pierce the brain to madness; in the wrack and fury of the death ridden tempest; in the widow's lonely room where starving orphans cry for bread; in ALL the places of despair and desolation known toman--there will you find the Bible-the first refuge and the last resort of the human soulthat cries in agony unto its Maker.

frame your laws; upon what would you base your systems of ethics and morality? Upon the Bible! If by some fearful hap and hazard of history, a second Attila were to sweep through the world and destroy all its books-what one, only Book would the peoples in their anguish beseech him to spare and to preserve-the Bible! But were there universal conflagration-the world in flames-and all the works wrought by the hand of man to perish -- the Bible could not perish!

erly, and he disposed of them all in a few hours. Here is a gripping pictume of life in this isolated spot, and the comfort the "Y" men bring the troops. "A few days ago." writes Mr. Dixon, "I received a letter from the gunner in . . . , a lonely optpost in the de-sert. The writer stated that he had seen one of the khaki testaments which L had given to a gunner who had which I had given to a gunner who had since rejoined the batterv and asked if I could spare one for him also. One afternoon as I was talking to a man in one of the hospital wards,

a man in one of the hospital watch I gave him a copy which I had in my pocket. Next day when I went back I found that it had been passed from cot to cot and each of the patients in the ward had been reading it in turn. Our stock is now completely exhausted and I have had to cable to

India for more." Dixon notes that at the reques of the Bishop of Lahore, who was visit-ing the troops, he had been appointed chap.ain of the district, which widen-

ed his opportunities. believ "The greatest results of our work. ing, the John A. Smith Co. of Windhe continues, "have been obtained thru personal interviews. The weekly Bible classes, the Sunday evening sor, Ont., wants every one who suffers from rheumatism to try their treatment for rheumatism first at their ex-pense. For that reason they propose 'hymn-sings,' the services in the hos-pital wards, and the distribution of to distribute 50,000 free boxes among all persons sending them their name khaki testaments have opened the and address. Mr. Smith suffered all way for numerous personal conversa-the agonies and tortures of rheuma- tions, in which the men have showh the agonies and tortures of rheumatism, tried nearly every so-called remedy he heard of and yet utterly failed to find relief. At times he was here the the triangle of the reality of An Hereditary Impulse.

failed to find relief. At times he was so helpless that he had to take to It is not strange, however, to find this young Y.M.C.A., secretary from morphine and after considerable doc-toring he finally gave up in despair. Toron o working out in the deserts toring he finally gave up in despair. He then began to study into the causes of rheumatism. After many experiments and repeated failures he found a combination of drugs which completely cured him. After his es-cape from the cruel torture of rheucape from the cruel torture of rheumatism he called his new found tring before a typewriter, drawing treatment "Gloria Tonic." Those of up his weekly report as temporary his friends, relatives and acquaint-ances suffering from rheumatism were next cured and since that time the merits of this treatment have spread from a neighborhood gossip spread from a neighborhood gossip almost all over the world, especially peculiar appeal to Canon Dixon as he one of five men living who stood in England and in the British posses-

behind the movement in Toronto in its early years: one other being J. J. Gartshore, who is a member of the A gentleman from Toronto writes "Gloria Tonic" cured him and he benilitary service committee of the nalieves it has no equal in the world. ary force gradually gatherng strength in Mesopotamia, the Turks in the far east of their dominions are being tackled from three sides, north, east and south, and they will have to send heavy reinforcements and abandon their project on Egypt, or else abandon part of their country while engaged in a dash for the Suez Canal. Here the British forces are reported to have created elaborate defences, to have arranged for the flooding of a large area of the Egyptian desert so as to duplicate the disaster which overtook Pharoah when he pursued the Israelites, and they have even arranged for the defence of the Nile from one side, should the enemy break thru their positions along the Suez Canal.

In Mesopotamia the progress of the expedition for the relief of Kut-el-Amara has been held up by hurricanes, rains and floods, so that the latest attack on the Turks had to be suspended owing to the waterlogged ground. The force is not nine miles from Kut-el-Amara, but thirty-four. General Townshend has reported that the Turks besieging Kut have retired to positions a mile from the British defences.

KING

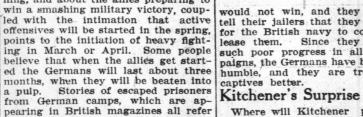

crushed. The only way to check such an operation as the British and French threaten to carry out would be for the Germans to retire behind Brussels and fight a general engagement in the open. But sufficient speed on the part of the allies would frustrate this design. The Germans would not be able to make a stand, and they then would retire into eGrmany. The French would probably invade Germany thru Lux-emburg, and cross the Rhine at Mann-

### you can obtain from The World this splendid Photo-Lithographic Reproduc-tion of Mobility Required

This entire operation would require great mobility in the forces attempt ing it, and the greatest problem for the allies would be the ability to move forward their big guns with sufficient rapidity. Motor transport might solve the problem, but the Germans found that this mode of transport had obvious defects when they fought the Russians in Poland. It limited their advance to five miles a day. Altho the roads are good in France and Belgium in fine weather, the allies must expect to find them destroyed by the Germans. How the enemy would get away his batteries and stores from the lines in France without huge losses in case he had to retreat remains to be seen.

### Views of Lloyd George

From the morning in the early tumn of 1914, when the lads of the contingent marched along Queen treet to the tune of the British arenadiers and embarked for Valcarher, until now Toronto has outshone her patriotism for King, for country, for the men themselves and even now campaigns are under way for more money; it has been one long campaign for men.

Just what is Toronto doing? We seen it in bulk time and again. On several occasions when we have ed off the car on the way to work we have been stopped by Torwomen who sold us a tag or flag olem of some kind and at the lose of the day or the beginning of next we have been told that so many thousand dollars have been ted for this or for that cause. us battalions have conducted aigns to get men, and at the we have been told that "so many" men have volunteered. An instance of this was the unique message con-Neved on a recruiting billboard outside he City Hall. Some 12 days after "Pals'" Battalion had opened its ampaign and after .we had watched the lad in khaki grow to full-sized manhood, the finish of the task arought these words, "All complete, hank you."

So, from time to time the subject has been treated in bulk without any ettling down to concrete cases. The bject of this story is to put on record what is being done at the City Hall n the way of recruiting, and the result of a few enquiries is amazing.

Seven Hundred Men rom Civic Employ From eight civic departments whose offices are quartered within the nes of the municipal building

sary inconveniences deserves every \$1.65 to \$31.66 a week. Four went the sewer section, 27 from the water distribution section, and so on, each section giving of its quota. The Department of Works is one

long ago during a recruiting meeting in Loew's Theatre and pointed to him as an example worthy of any man's ambition. , Were it left with the Lt -Colonel, himself, little would be known here of the valuable work he has done for he would never speak of it himself and his modesty was very plainly seen when, in giving an address on the work of the laboratories at the front he praised what Maj. Amyot and others had done, but never even suggested that he had been anything more than an interested spectator. So. Lt.-Col. Nasmith is a civic employe at the front, for he has just returned, of whom, Toronto is justly proud. But there are others from the Department of Medical Health who have received special mention and, have helped make Toronto a name to be known and remembered across the seas. One is Dr. A. R. B. Richmond, who went with the 9th Canadian Field Artillery. He is a veterinally surgeon, but enlisted as a gunner. His worth has been seen by the Imperial

orporation Counsel, Capt G. Reginald Geary, who left a \$9000-a-year position to fight for the Empire.

authorities who have promoted him to the B.B.S.C.

Dr. John McBride is another V.S. from this department who has won spurs. He, too, has been promoted to the Imperial forces for his excellent work at the front. Fred Phillips, the fourth name that is spolen of with respect, has been a prisoner of war since the battle of St. Julien. He enlisted with the 3rd Battalion and gave up a good position to do Three others went away with the first contingent. They are J. Mathews, W. Forsyth and J. Laurie, and to all these full pay is given. Since then, however, 12 more have signed up who receive part pay, and the total

FRENCH RAILWAY

TIRE MUCH MORE EASILY

They Are Not as Careful and Take More Risks Than Men.

No one would have thought even a year ago that women would have proved themselves capable of filling most of the positions on railroad trains and in companies' offices. Yet The Railway Age Gazette tells its readers that the army of 25,000 women who are engaged in France as porters, cleaners,

round conductors or agents are doing their work well. As cleaners and caretakers the women far excel the men, except when the work is overhead. Then they thre easily. Walter S. Heatt, special correspondent, writes of their work: "The insides of the cars, whether first, second or third-class, were clean and neat as new pins. The windows shone like those of a London haberdasher. There was not a spot of grease or coal dust on the tan-brown cloth cushions. The lace curtains placed over the cushions to protect them from wear were newly laundered, and looked as

were newly laundered, and looked as sweet as those of a parlor. The lin-oleum floors were as spotless as a Hol-land kitchen floor. I was surprised, because French trains used to be very dirty." Strangely enough, it is hard to teach women to be careful. They run dirty is hard to teach women to be careful. They run teach women to be careful. They run teach women to be careful. They run the fail of 1901. George Edeson, the father of Robert Edeson, is credited with having been a member of the San Francisco Min-strels in 1865 when this famous organ-

more risks than men employes do when a train is in motion. But they do not grumble, nor do they drink or steal. The engineers are satisfied, and well they may be, for one reads: "1 watched the women at work. They were clambering over the engine, oil-ing it multice is in 1865 when this famous organ-ization was then appearing at 585 Broadway, New York City. John Kellard will be most pleasantly recalled by Shaksperean lovers for his performance of "Othello" played with much success at the Garden The-atre, New York City, during the season of 1912-13.

watched the women at work. They were clambering over the engine, oil-ing, it, rubbing it down, in a matter of fact manner, much as if they were scrubbing their kitchen floors, handl-ing their oil cans and cotton waste with surprising ease." Quite as satis-factory are the women when employ-ed as ticket agents, or in other capa-citize in which they come into con-rest as the quarrel scene from "Julius"

factory are the women when employ-ed as ticket agents, or in other capa-cities in which they come into con-tact with the public. Their courtesy is remarkable, even in a country noted for politeness. Their directions are correct and easily understood, and there is much need for direction in a city full of strangers, many of whom are wounded soldiers. Even in rush hours, the women preserve their com-posure, and the account says: "In the populous suburbs toward St. Denis and Pantin, where the very poor people ilive and work, the tramways are more commonly used. Disputes between men car conductors and men pas-sengers were formerly rather frequent, but now they have materially decreas-ed, because of the magic smile of the

but now they have materially decreas-ed, because of the magic smile of the woman conductors." In the telephone and telegraph stations connected with the railway, most of the operators are women. It is satisfactory to learn that these women are employed on the same terms as men. but now they have materially decreas-ed, because of the magic smile of the

Some of the Most Noted Exponents of Higher Drama Don ned Burnt Cork Make-Up in Early Days of Their Career.

W HAT is popularly known as burnt cork comedy is purely an American institution and it is a peculiar fact that many of the actors on this continent who have the actors on this continent who have in a dramatization of Mrs. the actors on this continent who have attained the highest pinnacle of his-trionic success started their career as burnt cork artists. The black-face comedian was first exploited in min-strelsy but has since found a not un-important place in the discourse famous tale, "Uncle Tom's Cabin." Charlotte Crabtree, best known her stage name, Lotta, made her

appearance on the stage w years old in an amateur perfo important place in the American drama. date.

It must be remembered that Belgium ad existed only since 1830, when it is created as a result of internation-Beigian soldiers did not know whether they would fight German or French. A Beigian officer, billeted in our house, when asked what was going to hap-pen, answered: "We shall be the enemy of those who cross our fron-tier and the friend of those who don't." cs. From the point of view of olitics. From the point of View of great powers of Europe who made gium of such a geographical and tical condition as would offer the t danger to each, this settlement y have seemed satisfactory, but y little notice was taken of the in forcing which menseed the life So is it that we are the allies of France and England, not by our own choice, but thereto compelled by Ger-many. That is which makes the role of Bedefung sublime meny factors which menaced the life the new nation-2.000,000 Walloons, the new nation-2.00,000 wantons, the Latin race, speaking French, are ordered to live with 3.000,000 emings, of a Teutonic race, speaking emish, a language having the same sis as the Dutch. All had to be ruled role of Belgium sublime. And now has passed the second New Year's Day which Belgians have spent in exile, under German domination or by the same government. All had to they the same laws, and Flemings and

in the trenches. These have been bitter days for Belgium either in exile, or under German domination, or in the trenches, but none of them regrets what Belgium has done, whatever be their thoughts disconcomments or end character. Under these circumstances, King Leopold I. ascended the throne of this new kingdom. There was little trouble at this time. The Flemings. altho greater in number, were mostly of the poorer and unelucated class, and ac-Walloons were of an altogether differ-

King Albert always did the right thing, whether it concerned the merest trifle or the most important affair of state. I remember the day when for the first time for the day when for It is certain that when the interests of all Europe are at stake the fate of Belgium is a mere detail in the gigan-

Belgium is a mere detail in the gigan-tic international struggle, and yet we foel confident, with a confidence justi-fied by the knowledge of the accom-plished duty. We know that our fate lies in the hands of the allies, but an alliance without precedent has been created between little Belgium and great England. We Belgians have confidence in England, altho England may have today far greater interests to fight for than the neutrality of Bel-gium.

My confidence in England is found-My confidence in England is found ed on what I saw and heard during my stay in that country. I have con-fidence in the public opinion of the English nation, which is of more in-fluence than that in any other European country. Would not the whole world rise in indignation if Belgium were refused the only reward of her sacrifice? There will be once more a free Belgium, but, and this is per-haps more important than anything,

this free Belgium will be a new Bel-gium from all standpoints. As I have said, many situations in Belgium were said, many situations in Beigium were crying for improvement, and one of these things which needed reorganiza-tion most was the education of the poor-er classes. In the rural districts the ignorance is astonishing. Much Superstition

In Flanders there is much supersti-tion which is an obstacle to progress. This is all the more strange and wants all the more to be altered, because the Flemish people are one of the most in-telligent of all the nationalities I know. I have known the head of a great fac-tory who could not read or write, but had a most amazing memory. The commercial instinct of this same un-educated Flemish people is marvelous, anxiety of those days. Belgium was neutral during the first day after Ger-many declared war on France—and Belgian soldiers did not know whether educated Flemish people is marvelous and that is why it is a blessing, even in the great sorrow, that so many Bel gians, and mostly of the poorer class are now dispersed as refugees in Eng-land, Holland and France. During my

land, Holland and France. During my stay in England I have seen Belgians intermingle with English, and I have seen them develop; I have seen Belgian workmen hugely interest-ed in the study of different methods from their own, and it will be to their advantage. For many it means the eduwhich they missed in their cation youth.

BREAKFAST ON SHIP His Porridge Dish Eluded Him First Morning and He Went No Further.

Old Toronto Canoe Club boys, and many other friends of Herbert M. Arnott, will be interested in a letter which me on Dec. 30. Private Arhe wrote nctt was an active member of the Totonto Canoe Club, having carried off a number of cups and other trophies for this sport. He enlisted last October in the 34th Battery of Kingston, known as the Sportsman's Battery. A large number of Toronto Canoe Club boys helped to make up this battery, which sailed for England in December last, a few days efore Christmas.

Following is his letter describing the ourney and arrival:

"Have arrived in old Hingland at last. It is all I expected, and more, the prettiest, quaintest and most compact place

DODGING GERMAN SUBS FRENCH COMMISSARIAT IS FAULTLESS

French Army Medical Corps are sur-prising. Relatively speaking, the cases of illness due to weather conditions and the discomforts of the trenches were negligible. This year the French high command has taken every advan-tage of the experience it gained dur-ing the last winter campaign. It has not merely organized the army in such a way that the men have little, or very little, to fear from cold, but it has taken measures admirably calculated a way that the men have little, or very little, to fear from cold, built it has taken measures admirably calculated to give the soldier in the trenches an existence that in nine cases out of ten, spart from the dangers inseparable from war, is considerably more heal-thy than his ordinary existence in time of peace. The following brief re-view of the measures taken is based upon those now in force in the French those now in force in the French army.

Everyone will admit that the essen-tial question is that of food, and in this matter the experience of the past winter had very little to suggest. The French troops are better fed than the

the other side of the great wall built across Europe the Germans in the first line are given only one meal a day—at noon—and have to be con-tented at night with the coffee served out to them, or else with such provi-sions as they have been able to buy for themselves.

Food There in Plenty

The French commissariat has never failed to provide the entire army with two good meals a day, and for several weeks past an extra ration of meat has weeks past an extra ration of meat has been given to the men who are most exposed; as the weather gets colder this measure will be extended to all units. When the temperature requires it, hot drinks, too—coffee and fixed measures of alcohol—will be served out

Excellent service is being rendered by the cuisines roulantes (horse-drawn camp kitchens), which are attached to

such foundations as never were laid YOUNG MEN COUGHED

AND CHANGED VOICE

finally produced out of this sound a good full tone in the normal register. All this took me about an hour." The following day John E had his second lesson. Dr. Hallook practised with him, going from one note to an-other "until he got a range of an oc-tave in the normal register." The physician made him sing words and then repeat them in a singing tone. From one word he went on to two or three. The voice still broke occasion-ally, but it was a simple matter now to keep it fairly steady in the normal. Dr. Hallock thus made him say "good morning," "hello Charlie," "wake up," "how's the parrot today?" "wake no a full breach and in a "bold, bad man" sort of way. He told the patient to practise at home, both sing-ing and speaking, and to blurt out such phrases as these to anyone he hap-pened to meet. Was Squeaky Falsetto and Is TRANSFORMED IN WEEK Doctor Accomplished Alteration

How a doctor changed a squeaky

phrases as these to anyone he hap-pened to meet. On the fourth day Dr. Hallock sot him to read three or four verses of Longfellow, which he did so well that a lady he knew was utterly astonish-ed when she heard him. This treatment was kept up for a week. Then John E.'s normal voice was thoroly established as "a good manly baritcne." So proud was the young man of his new voice that he telephoned to everyone he knew with-in a hundred miles, so that they might How a doctor changed a squeaky falsetto voice to a rich baritone—an i did it all in a week—is rolated in this week's Medical Record by Dr. Frank Mead Hallock of New York The min with the falsetto voice was a telegraph operator aged 35, who had never supposed that anything could be done to change his voice until Dr. Hal-lock suggested it, when he was de-lighted. in a hundred miles, so that they might

hear it. "He was not sure for a considerable "He was not sure for a considerable time that it would last. One day, how-ever, a couple of months from the time I began with him," cays Dr. Hal-lock, "I saked him to begin again in the old way. He was unable to utter a sound in the falsetto; he had for-gotten how. This seemed to me fairly stunid, but he could not do it." lighted. The doctor began by getting John E. (as he calls his patient) to sing-but he had such a bad ear for music that whon the physician sounded notes on the piano he sang them consis-tently sharp or flat, and always in a high falsetto. "I brought him down in the de stupid, but he could not do it."

FROG SHOWER WAS EXPERIENCE OF GIBRALTAR

N May last, during a thunderstorm near Gibraltar, thousands of small frogs, apparently drawn up from a

"I brought him down in the de-scending scale as far as his voice would go, and then I sounded the next lower note," writes Dr. Hallock. "He promotily sang the same next in the upper scale—any note—all in the fal-getto. I tried the experiment several titmes , always with the same result. I sat quite puzzled and beaten." Then another idea came to the phy-sician. He told John E. to clear his throat several times while he listened carefully. He made the man cough over and over again while he listened. At the very end of the coughing noise Dr. Hallock thought he detected the natural voice. frogs, apparently drawn up from a lake twenty miles away, are said to have fallen upon the earth. Such showers of frogs, when satisfactorily authenticated, are to be classed with showers of herring, sticklebacks, and even larger fish. Some of those show-ers are vouched for by trustworthy persons, and can be easily explained. "I asked him to notice that as he cleared his throat the sound natu-rally separted into something like two parts, the cough and a noise which followed it. I perceived that I might followed it. I perceived that I might due this reaction to the cough, as it might be called the second part the sort of rebound, if I could get hold of it. All I had to do then was to get him to prolong the second sound. I made him repeat the exercise and, lit-the by little, got him to accentuate this second part of the cough. "Then I asked him to divide this cough-clearing process, consciously, into two parts, much as if he were to asy 'a-hem.' He learned to do this, tho it was difficult for him, as he often broke and the to the falsetto. In this way he

lightful and interesting afternoon for the sixty or more guests assembled.

The death of Joseph Vial, the young Australian concert violinist, at St. Margaret's Hospital, Ramsgate, England, is one of the saddest yet recorded in connection with the war. In 1911 Mr. Vial entered the Royal Conservawas tory of Music, Leipzig, and at the time was declared was looked upon as war one of the most promising pupils of that institution. On Sept 5, 1914, he Long's story of "Madame Butterfly" that institution. On Sept 5, 1914, he were delicately and suggestively por-trayed by Jean McBurney, while the trayed by Jean McBurney, while the was but nineteen years of age, was Mark Embury and his ward in "Mice" placed in a cell with a tubercular convict, and was compelled to live under most terrible insanitary conditions. By Christmas of the same year he was so ill and emaciated that he could neither stand or sit alone. On March 17 he was

ejected from the hospital and solution the street half clothed on a cold rainy day. Finally, thru the interference of the British foreign office, he was allow-ed to return to England, accompanied by Elmer L. Luck, M.A., of Edmonton. When Mr. Vial's death was reported in Newcastle, N.S.W., his home city, the citizens gave voice to their indignation by wrecking many of the big German business houses in the city. His moth-er, who had traveled nearly two months, via San Francisco and New York to reach his bedside, was with him when he died.

Jessie McAlpine, the brilliant pianiste, is giving a recital in February, when her program will comprise a number of the great compositions of piane literature. . . .

William Shakspere, dean of English singing teachers, says that on each succeeding visit to this side of the Atlantic, he finds more and more good voices, and the quality of singing, especially among women, is distinctly improving.

With a long list of talented and accomplished pupils to provide the pro-grams, Frank S. Welsman's recitals always reach a high standard of ar always reach a high standard of ar-tistry, and the recent one which took always reach a might statutard of ar-tistry, and the recent one which took place in the Toronto Conservatory of Music, on Monday evening, Jan. 24, was a most gratifying success. A pro-

Dowell Concerto, by Grace Martin, with Mr. Welsman at the second piano, delighted the audience. Particularly pleasing was the dainty Presto, which Miss Martin imbued with a seizing sprightliness. The first movement was also finely interpreted. Miss Martin's playing gives promise of greater things in the future. Muriel Robertson, in the Strauss-Schuett Kuss Waltz, Edith Buckley in the Chopin Mazurkas and Etude Op. 25, No. 12, and Master Bert low is to the west Juna o Sullivan is physically strong and she puts all her strength and vitality into her playing. She opened her program with the National Anthem and it is guite prob-able that no one in the audience had Proctor in the Carreno Valse, "Mi Teresita," all played with distinction of style and phrasing, while Virginia Coyne brought the recital to a brilliant close with her finely conceived and masterful rendition of the last two ever heard it played with more fervor and spirit. It was the kind of playing movements of the Grieg Concerto. May Wilkinson, a talented pupil of Dr. Ham, sang most artistically, and

Movements of the Grieg Concerto. May Wilkinson, a talented pupil of Dr. Ham, sang most artistically, and in fine voice, a group of songs by Landon Ronald, and Gluck's Divinites du Styx. An audience which filled the For-esters' Hall was in attendanse on the occasion of the first Carbonl lecture on vocal art, which was followed by a yudance. The chair was taken by vocal recital by artists under his certo in B minor, were the outstanding guidance. The chair was taken by features of the program. In the Sind-Mr. Moberly, the well known writer, and the lecture was read by Miss B. she had the assistance of Rudolf Lar-

the reading of the lecture. The recital which followed was in many respects a treat to the audience, as it revealed the true traditions of Bel Canto. Mrs. Mabel Manley Pickard displayed beau-tiful tonal quality in the "Letters" of Worther of Massenet. Mr. Arthur George's fine high notes were heard to great advantage in "Eri Tu" of Verdi; Winifred Parker sang with magnifi-cent style an air from "Ghoconda," Mrs. George Elliott rendered the "Cry of Rachael" in true dramatic style. Marjorie Gray sang "La Nilo of Ler-oux" very acceptably with the 'cello obligato. Cora de la Lowe, the colora-tura Soparno, interpreted bouutifully the Theme and Variation of Proch. s which Maestro Carboni has added

The selections of music to be sung by the choir of St. Andrew's Presbyterian Church, corner King and Simco terian Church, corner King and Simcoe streets, on Sunday evening next, 30th inst, both during service and at the re-cital which follows, will be chosen al-together from the works of Gounod. Three numbers from the Immortal Messe, Solonelle de St. Cecilia, the Sanctus, Agnus Dei, and Benedictus, with the accompanying tenor and acc with the accompanying tenor and soprano solos, two numbers from "Gallia," with the accompanying soprano solos, and the motettes, "Come Unto Him," and "By Babylon's Wave." Both Mrs. H. W. Parker and Mrs. W. M. Douglas, the soprano and contralto soloists will sing, the former the Bach-Gounod "Ave Maria," and the latter "Entreat Me Not To Leave **MASSEY HALL, WED. EVE., FEB. 9** Thee." W. S. Hamilton, the tenor solo ist of the choir, will sing the arias in the selections from the Messe Solonette. was taken by the Revolutionists. To-

ions. Where the subject is over the ge of 12 or 13 and well on into the age of 12 of 13 and well on into the adult stage, the question of such a one being at large without proper care and supervision becomes an appalling danger. The mental defective prob-

drunkenness, unemployment a other evils the greatest of which the white slave traffic; could be di-verted with far better results and to

a more economic end, for the good of both the state and the individual, if once this matter were seriously recog-nized by the thinking public.

A Round of Charity

In one instance in Toronto mentally defective woman (one of several who appeared at one

Braille, which is used very success-fully by blind stenographers, and is now being taught in the National In-stitute for the Blind in London.

Braille System

Braille is the most widely used sys tem for the blind. Its use is practically universal outside of the United States, and one school in Canada,

where New York Point is taught at the Brantford School for the Blind. The advantages of the Braille sustem may be summed up shortly as follows: feeble minded parents are more num-erous than those of normal men and women is surely sufficient evidence in avor of state supervision of such in It is a systematic code which can be read more rapidly than other systems;

for the Blind was opened, and have not the sensitive touch which is needed to learn an entirely new sys-tem. The fingers which have become tem. The ingers which have become hardened by work, or for other reasons have lost their acute touch, can easily trace over the fairly large characters of the Moon System, which differs very little from the ordinary print.

American Braille

American Braille is a combination of two systems, the Braille proper and New York Point, but it was decided by two American organizations for the blind, the American Association of Workers for the Bind, and the As-sociation of Teachers to the Blind, during a convention at California last summer that the British Braille was undoubtedly the best system. Books in

undoubtedly the best system. Books in the Braille purchased in England cost somewhere about 75 cents a volume, and from the United States 80 cents; these are printed on a stereotype ma-chine, but it takes anywhere from 3 to 80 of these volumes to make up one pack or the stire cost of 000 k, so that the entire cost of one book in Bratile, which in print could be

chased for 60 cents is as much as here that raised print came into use, \$16. Books which are copied by hand cost on an average 5 cents a sheet; these are done by skilled workers, and a single unbound copy of one work costs as much as \$12.45.

Cost of One Book

was taken by the Revolutionists. To-day it is still carried on in Paris un-der the name of the National Institute for Blind Young People.
The Dot System
A French army officer by the name of Charles Barbier, was the first to in-vent a dot system, but it was in phon-etics and not alphabetical. It was this system which gave Louis Braille the inspiration for his alphabet, taking
Cost of Chie Book
Now another work which is under way, a copy of one of the best Can-adian historical books, will cost \$60 to complete, in 15 volumes, at \$4 each. Voluntary workers, such as there are in England, who will train for this hand copying of books into the Braille, would be a great help to the blind cause. Particulars of special class-es may be obtained from the secretary of the Canadian free library. Any paid workers, and this is as it should be workers, and this is as it should be inspiration for his alphabet, taking inspiration for his alphabet, taking these dots or points he constructed the present system of Braille, which he perfected in the year 1835; the sys-tem has, of course, undergone some changes since then. It was introduced into England some 45 years ago by Dr. Armstrong, a London medical man. who, after losing his sight, experiment-ed with various systems, with a view to finding one that could be written as well as read, by a blind person. The sundamental Rawlia is a scient. for one unfortunate phase of work among the blind in Ontario is that

The fundamental Braille is a scien-tific system composed of raised points. A basic group of six points arranged two wide and three deep with 63 char-acters, and modification of two or three hundred other characters. acters, and modification of two or three hundred other characters. It is divided into three grades: First, the simple unabbreviated grade of 63 characters; the second grade employs a number of abbreviations, and the third is a complex system. There is also a distinct system of Shorthand Braille, which is used vory success.

What it is hoped may be done for the blind of this province may be best explained by an extract from the letter of Sir Frederick Frazer, head of the Halifax college for the blind, ad-dressed to the secretary of the Can-adian free library for the blind in this

7.05 -

"I know that the Canadian free lib rary is in itself a big institution which doing a grand work, but cannot you and those associated with you in this work, broaden your sphere of oper-ations, so as to meet the needs of the blind of Ontario? The first requisite would be a training shop in Toronto, then the establishment, thru your field secretary, of local workshops in other parts of the province, and the securing of legislation for the main-tenance or aiding of such shops. would suggest that you discuss this question with your committee and see if we in Canada cannot take a progressive step that will insure employ-

100 miles in 80 min., 21.4 sec., averaging 74.67 miles per hour, with driver and passenger.

The best previous stock car time was made by a car with more cylinders, more cylinder capacity and driver only.

75.69 miles in one hour with driver and

Some laps were made at 76.75 miles per hour.

70.74 miles in one hour, carrying 5 pas-sengers, with top and windshield up.

The best previous time for stock car similarly equipped was made by a car with more cylinders, more cylinder capacity, and with two passengers only.

A new monarch appears in Motordom this year, with records to prove its supremacy.

It is a light-weight Six, simple and economical. No added cylinders or size.

But it shows 80 per cent more efficiency than like-size motors heretofore developed.

It means that a Six-the ideal type of motorhas outrivaled Eights and Twelves. Its records have never been matched.

And this Super-Six is a Hudson invention. controlled by Hudson patents. So, for the first time, an epoch-making feature is found in but one car.

### SMALL, LIGHT, BUT 76 H. P.

The Hudson Super-Six, with this patented motor, remains in the Light Six class. Its cylinders are 31/2 x 5-identical with the Hudson Six-40. And its motor follows long-established practice in all respects save one. It involves no experiments whatever.

The legal rating of this-size motor is 29.4 horsepower. That's the rating accorded by the Society of Automobile Engineers.

In the best former types this size was made to deliver 42 horsepower at maximum.

The Super-Six delivers 76 horsepower.

That's 80 per cent more than formerly,

Standing start to 50 miles an hour in 16.2 sec.

> All these Hudson records were made with the same stock car, using the same motor, at Sheeps-head Bay Speedway in November, under super-vision of the American Automobile Association.

During these tests the car was driven 1350 miles at top capacity, at speed exceeding 70 miles per hour, without discoverable wear on any part.

The Super-Six was not built for speed. But speed requires power, and it also proves endurance.

motor size considered. Thus the Super-Six, for its cylinder capacity, is by far the most efficient motor known.

### 34 H. P. WAS WASTED

A motor of this size actually creates about 85 horsepower in energy. In former Light Sixes it delivered 42 horsepower. So 34 horsepower was heretofore wasted, as compared with the Super-Six.

That waste lay in vibration, causing friction. We have saved that waste by wiping out vibration.

No extra power is developed, no extra fuel is consumed. Simply by conserving the energy created we attain this vast reserve power.

### **NEVER SUCH SMOOTHNESS**

That 80 per cent of added efficiency comes through added smoothness. One result, at every speed, is quiet, flowing power. It instantly accelerates above every speed up to sixty miles an hour. Other motors have acceleration capabilities up to only forty miles an hour. You never knew such bird-like motion, such freedom from vibration.

That vast reserve power in a light car creates a marvelous performer. One may creep on high gear, and pick up with record quickness. Hills are climbed without effort. Sand and mud pre-

vast fuel economy. This utter smoothness also multiplies endurance. In that Speedway test 1350 miles were made at top capacity. No other stock car motor ever built has stood an equal test.

Years of ordinary driving would not match that strain. Yet the Super-Six came through that test without any discoverable wear. That means endurance far beyond the farthest limits ever known before.

### HUDSON NOW SUPREME

The Super-Six makes Hudson the greatest stock performer. Official records prove that beyond possible dispute. And a half-mile ride will fix the fact so you never can forget it.

The finest Sixes of the past now confront a like-size Six which is 80 per cent more efficient. And a Six so economical-so saving of wastethat no lower price is attractive.

Eights and Twelves have been outdone in the objects which they aimed at. No excuse remains for their extra weight, extra cylinders and extra complications.

So the Super-Six is the greatest value at any price which the world has ever seen.

### SIX LUXURIOUS BODIES

We have made the Super-Six so it looks its supremacy. Six of the finest bodies have been created for it. We have simply aimed at the farthest limit in luxury and beauty.

And again we have doubled our output. This season's production of the Super-Six will sell for \$42,000,000.

See the Super-Six. Then prove its supremacy, at the first opportunity, by taking a ride in our demonstrators.

7-Passenger Phaeton, \$1900, f.o.b. Windsor, duty paid; \$1925, f.o.b. Toronto. Also Roadster, Cabriolet, Touring, Sedan, Limousine and Town Car.

Charles Spencer who made it i Springfield, Mass., in October, 1909. Carl Goudy Beats Train. he story of how Carl Goudy defied of the speed laws and all the speed in his attempt to reach Bakers-before the death of his brother, Will, who died from injuries received hile practicing for the Bakersfield ces, has just been told here.

aces, has just been told here. When Carl got the telegram at San Diego telling him of the accident he runhed to the depot to catch a train for Los Angeles but missed it. He ran ack to his store, grabbed a big Ex-telsior off the floor and started for Los Angeles, 133 miles away. Rain had been falling and it was still raining, making the going hard and dangerous husiasm are always whole-hearted. Mr. Jones was president of the T. M. C. for 1915, and has been re-elected for another term. The members are looking forward to a successful season in but Carl gave his machine a wide open throutle. When he passed the first speed cop the officer immediately pur-ued but was left behind. Every cop along the nearly 100 miles met the the Hudson Motor Car Company brought is ing forward to a successful season in

It was only five or six months ago that the Hudson Motor Car Company brought out a new model. This car, known as the Six-40, was the most popular Hud-son ever produced. Within one month the demand forced the company to stop all advertising and the sales by twice over broke all Hudson records. But three months after this date the tests of the new Super Six motor showed that the end of the Six, as it has been, had arrived, so the company immediately stopped production on open models, losing, they assert, nearly 5000 sales as a consequence during the months of Sep-tember. October, November and Decem-ber. Every facility from that time on nas been devoted to the production of the super-Six. same fate, but the last one, just outside Los Angeles, telephoned ahead and as Carl reached the city limits a gate was red across the road in front of him, ing him to stop. When he explained why he was disregarding all speed laws he was permitted to go ahead and laws he was permitted to go ahead and rods up to Girton & Hoffer's store here. An auto was standing beside the curb waiing for him. He jumped into the auto and was rushed to the depot, cathing the train for Bakersfield that he would have connected with had he

scarce metal aluminium was introduc-ed for crank cases in '95. It was tried for many other services in the next few years by different builders, but not largely used, because at that time suitable alloys and proper foundry handling could not be had. But better steels came, better shop practice be-came common until the modern auto is a marvel of strength and endurance. came common until the modern auto is a marvel of strength and endurance. And so gradual has this all been that we have not thought of the weight that would have been required had it been possible to use enough of the older materials to secure the undern

strength.

strength. During 1915 there has been another long step forward in the matter of light-weight. The use of aluminium for pistons marks the success of ex-periments begun several years before the end of the last century. The light piston permits light connecting rods and light bearings. It permits high speeds and thus a reduction in engine weight. High speeds accompany small cylinders, which in turn mean many cylinders, which in turn mean many cylinders, which in of ly-wheel, and the strain on the transmission and driving shafts is both light and con-tinuous instead of a series of heavy impulses that require heavy parts to resist. resist.

So the vise of aluminium pistons not only saves a small amount of weight in the pistons, but it saves weight every inch of the way to the wheels. This saving permits lighter wheels, lighter frames and of course lighter springs and lighter tires to carry these lighter loads. It has been stated, and it is doubtless well within the truth that a pound saved at the fly-wheel of the engine permits five pounds to be saved in the weight of the car. Of the money value of this weight-

We sincerely believe that the car does not exist which excels the ALLEN in its class, for it is one of the few really remarkable car, values, and worth every cent of \$1100. This opinion is fully confirmed by the enthusiastic reception given the new ALLEN wherever Clean cut and sefined, it stands out from the rest. goes. A LARGER CAR WITH MORE ROOM BUT LESS WEIGHT

P.O.B. TORONTO

6 SHERBOURNE STREET

THE CAR THAT GOES OUT ON THE ROAD AND ACTUALLY DOES THE GREAT THINGS THAT A FEW CARS CLAIM TO DO.

Everyone knows that over-head valves spell power.

Everyone knows that twelve cylinders also spell power.

These are basic FACTS that no smiling salesman can upset. THE VALVE-IN-HEAD, TWELVE-CYLINDER PATHFINDER is here now at our showrooms

There the PATHFINDER sits-ready to actually DO those things that other cars claim to have done "once upon a time," when conditions were tender and favorable. And PATH-FINDER the GREAT is ready to do these things day in and day out-not merely on gala day occasions.

When these same twelve cylinders SPEAK, and these overhead valves spring into life in ACTUAL ROAD DEMONSTRATION, fact will triumph over fancy, and away will go the paper-claims, like confetti under an exhaust.

For PATHFINDER the GREAT has come to Toronto, fresh from the conquest of New York, with "the goods" tucked away under its hood and READY TO BE DELIVERED ON DEMAND.

PATHFINDER SHOW ROOMS with be located at 740 Yonge Street, and will be formally opened on Tuesday, February 8th, when we would advise you to make arrangements for a demonstration, as our allotment is small and will be taken up AT ONCE.

Canada's Duty to Her Blind Soldiers

While Canada will owe much to every man who has been fighting and will fight her battles overseas and returns home there will probably be none who will have as great a claim upon her as those who have sacrificed their sunlight for the rest of their lives that

the world may not be plunged into the darkness of military despotism. This being so is it not time that Canadians as a people and as individuals bestirred themselves to provide a means of making life easier for these unfortunates so that they will at least be able to do something to earn their own living and break the monotony of a sightless life with interesting work or recreation in the way of reading? It will be no easy task to teach these men to begin life over again, but it is a task that should be, and must be, undertaken. One Canadian at least, who has been blinded on the firing line is already being trained by Sir Arthur Pearson in the National Institute in London, England, in the touch system of typewriting, but at the end of the war the Dominion cannot depend on the Mother Country to look after this work, as she will be sufficiently occupied in taking care of her own at home. There are already three thousand sightless in Canada, and for their education there exists but five schools, one of which is located in Brantford, Ont., one in British Columbia, and the most completely equipped institution of its kind in the Dominion at Halifax. The others are situated in Montreal. Sir Frederick Fraser, head of the Halifax College for the blind has made the pertinent suggestion that the Canadian Free Library for the Blind in Toronto should prepare to meet the coming demands for educational facilities for the blind by broadening its sphere of operations to meet the needs of Ontario thru the establishment of a training shop in Toronto. He would then have this followed up by the establishment thru the field secretary, of local workshops in other parts of the province and would seek to secure legislation for the maintenance and aid of such shops. If such a step were taken in every province he is of the opinion that it would guarantee employment not only for the soldiers who return blinded, but for those of the three thousand blind already in the province who need it. Something must be done and this ggestion seems to offer the best possible solution.

. . .

Is Proven

Guilty

In addressing the grand jury at the open-Innocent Until He ing of the January assizes, Mr. Justice Middleton deplored the fact that the ignorant and thoughtless have been in the habit of referring to persons who have been suspected of being mentally unbalanced, on their release

from custody, as "jail birds." He pointed out the grave injustice of such an attitude on the part of the public; but while the public may be partly to blame the fault lies chiefly with the present system of detaining those suspected of mental deficiency until the medical officers have passed upon the state of their health. So long as they are detained in jail until freed from suspicion or turned over to the hospitals for the insane they are in danger of the stigma which, in the public mind. attaches to the man or woman who passes the doors of a jail, whether innocent or guilty. It is a principle of British law that a man is innocent until proven guilty, but it works out exactly the opposite in practice. An innocent person to whom circumstantial evidence points strongly as being guilty of an indictable offense, under the ordinary course of the law is immediately assumed to be guilty and cast into prison, so that in practice a man is guilty until he has proven his innocence. Even when honorably discharged the person who has been placed under suspicion will be regarded by some former associates as an enemy of society because he has spent a time behind prison bars awaiting trial for an offense of which he is innocent. In the case of crime this course of the state is doubtless the only safe one to pursue. sitho it may work injustice to the innocent. But surely some more desirable arrangement could be made for looking after those suspected of mental deficiencies until their state of health has been de-

termined.

erated Political Scheme

Maturely Delib-

That the conflict at present raging in Europe was brought on by Kaiser William II. as the result of a maturely deliberated political scheme, is explained in an article in The Paris Temps, under the title of "Germany in the Orient," in which the, Parisian newspaper sets forth the primary motives of the present military and other activities of the Germans in the near east. In the opinion of this writer, while the war of 1870 founded Germany, the struggle which commenced in 1914 was started in order to make Germany a world empire. A realization of this dream, which embraces both an increase of territory and an extension of German economic influence, presupposes not only a free disposal of the Maritime route to overseas colonies, but an overland commercial highway leading to the heart of Asia and

India by way of the Balkans and Turkey. "In his vision of a greater Germany, William II. sees the Balkans, Turkey, the Suez Canal territory, India and China as dependencies of the Fatherland," "For Af declares The Temps. rican possession his mind has picked out Egypt, Morocco, the Congo and Angola. Since he was lucky enough to get Belgium, a part of France, Poland and Serbia in his power, the kaiser thinks it might be worth while trying to realize also his other chimeric ambitions. That is why he is keeping the Sultan and the Bulgarian king busy fighting for him. It is according to the same idea that he is bullying Greece and Roumania and stirring up unrest throuout the Mussulman world. Any little tribe of the desert which may have a chance of making trouble for France, England or Italy is being seduced by the tempting offers of the kaiser's agents, while the emissaries of his vassal at the Golden Horn are simultaneously arousing the religious fanaticism of their coreligionists."

Following an account of the measures taken to counteract the German plots and to check their future progress, the article in The Temps sums up with the following general view of the situation:-"The establishment of a strong-

ly fortified position at Salonika, the landing of Italian troops at Avlona, Durazzo and Santi-Quaranta, the rehabilitation of the Serbian army and the Russian concentration in Bessarabia prove that the Allies are resolved on a co-ordinate effort to place insurmountable obstacles in the way of Germany's aspirations as far as the Orient is concerned. The

looking for any decisive action. All the same, they appreciate the fact that the effective checking of an enterprise which occupies such an important place in the program of their enemies as does the Oriental campaign of the Teutons, would involve a considerable prolongation of the war. Consequently they are impressed with the necessity of closing as quickly as possible the route which the Germans are trying to open. Salonika is one place where the kaiser's onward march can be conveniently stopped, and others may be selected later on. Besides, we may rest assured that the Entente Powers will know how to foil the German schemes in the Orient as they have done elsewhere." Thus the dreams of the kaiser, of making Germany a world power, are foreordained to be

wide character of the war, but it is not in the Orient that they are

Effect of War on Women

shattered.

Mrs. Rose Pastor Stokes, a noted American Socialist, in commenting on the possible position in relation to industries. of women in Europe after the war, expresses the belief that while there will undoubtedly be a large increase in the number of unmarried women, it will result only to some extent in a celibacy that will throw its unconscious energy into work for social progress. She takes the radical, not to say sensational' view, that among the great surplus of womenhood in Europe there will be an unprece-dented disregard of legal action in the love relations of men and women. She declares that once women earn their own living and establish their right to work, a not inconsiderable number of them will refuse to be cheated of their right to love and motherhood, regardless of what the "mal-adjustments" into society may be. Whether she be right or not the years that are to come will decide, but her attitude on the question as regarded at the present moment seems very much inaugurate. that of an extremist and a visionary.

Miss Amy Grant, the wellknown suffragist foresees in the results of the conflict the loosening of the shackles of women. To a large extent this will be true, because by necessity women have entered nearly every business and industry and there they will doubtless have to remain for 'a time at least thru the scarcity of men. Miss Grant takes the sane, that conditions resulting view from the war will not bring about any sociological change, but she is under the impression that the scarcity of men may temporarily tend to a riot of masculine egotism.

In the meantime the women of the countries of our Allies are

They have more serithe war. ous business to attend to and they are attending to it. Their work at present is to help their husbands, their brothers, their sons and their sweethearts and bring the conflict to a successful conclusion for the Allies. Outside the one great question of winning the war they are willing to let the problems of the future be adjusted in the future and feel confident that the decision, when that time arrives, will be the most satisfactory that can be reached.

Naval bases and hos-pitals, of course, are included, and pa-trol vessels on the high seas throw packages of literature on board the mine-sweepers and other small craft, ers," as he calls Admiral von Tirpitz, has been out in the North Sea looking for him, says The London Morning Post. Jack rubbed his eyes very hard when he read the other day this item of news made in Germany. He rubbed them till he winked to his messmates, and their unanimous comment, gar-nished with suitable ultra-marine ad-jectives. Was that that was a "wonmine-sweepers and other small craft, which are always hungry for news from home. "Up to date," says Maj. Vane Stow, "we have sent out between six and seven million newspapers, magazines, and other publications. In jectives, was that that was a "wop-per" and no mistake, and that there was no such luck for them as a sight on the high seas of Old Whiskers and his canal boats. Jack, of course, knows a great deal more about what is real-ly happening on the birth sea them the the case of the Dardanelles it has been difficult to maintain our regular supply. but we have done our best to meet a demand which naturally has been keener out there than in our own home waters. We have never appealed to the public for subscriptions, and the ly happening on the high sea than the writers for newspaper do, and when he is ashore he knows, too, how to keep money we get has been sent to us volhis mouth shut. But he is grateful for untarily. It is devoted mainly to payreal news, and can sift the kernel of truth from the husk of fiction as well ing staff wages and providing gramophones and games to aid in relieving any landsman. He owes it to the Swespapers-for-the-Fleet Committee a the London Chamber of Commerce that he never lacks reading matter a al kinds when he has the leisure peruse it. If is a committee which has been doing a great deal of work without advertisment it stoardd accommit the monotony which is inseparable from the game of patience our sailors have to play in protecting our com-merce and our lives. To different ships and hospitals we have sent about six hundred gramophones—all new— and some 14,000 double-sided new reout advertisment. It started operacords. The total number of packages ns so long ago as the 20th of August, we despatched up to the 6th of December was 204,574, and with the pressure of Christmas literature this has since 4, when the war was in its infancy, Jack had only begun his ceaseless been largely increased." Jack is very grateful for his press Il on the seas which he is now tining during a second winter of service, as numerous letters and postm and stress with invincible courand imperturbable patience. F. Similar Begg is the president of the committee, and Maj. H. Vane Stow, cards testify. The admiralty have thanked the committee, and so has Sir John Jellicoe, who has written to Maj. ecretary, who is active controller Vane Stow: the organization, explained how it The newspapers and gifts sent have Papers, while important from the point of view of prompt information con-geming current events and books, while gramophones, with records, needles, and everything court of the commutation to the section of the commutation to the section of the commutation of the commutation to the section of the commutation of the c records, needles, and everything com-plete, fall, within the compass of the enterprise. ## Answers to Health Questions

K. F., Hamilton.—Q.—I am a mother of eight children, and greatly troubled with varicose veins. What will you advise me to do for this? 2. I also have a poor memory. A.—Varicose veins may be cured by stitching, but may be relieved, how-ever, by wearing a rubber or elastic stocking. 2. Go to night-school and begin an education all over again, no matter what your age is. The memory grows on what it feeds. Each new if act must be linked or associated with old ones.

set the benefits that would come to those who would be the subjects upon which the expenditure would be exer-cised, and also the amount that would in the ultimate be saved the country thru the presentation.

"first floor back" the left ventricle. The whole house, in-cluding the partitions between the four chambers, is made of thick muscle, with portieres of thin tissue between the first and second stories, called "valves." Some infectious maladies are accompanied by bacteria and blood debris, which are deposited in the valves or exits of the heart, or in the large artery called the aorta. Hap-pily, most heart diseases are not the iniquitous visitations which many people imagine. Many of us have heart disorders without a knowledge of it. Others of us know it and appreciate that discretion and temperance in living will pro-loard our days. It is wise to be beforehand with a semi-annual hospital examination, and learn whether of not you have any disturbance of the "first floor front," the "second story back," the portieres or "valvee" of the heart or its tough muscles. Ailments of the "mitral" valve of the heart affect the curtains resembling the Pope's mitre, which lie between the auricle and the ventricle, and aortic valve disease are relatively common after 40. Irregular motions of the heart muscles, called "a flutter" however, are not

valve disease are relatively common after to. The structure, may arise from muscles, called "a flutter," however, are rare. Heart "flutters," like valvular diseases of this structure, may arise from contagious and infectious maladies of infancy and childhood. When examined and the discovery is made, many are astonished to be told that some heart distempers hark back to childhood's unhappy hours when joint fever, scarlatina, diphtheria, tonsilitis and similar abominations sat unpleasantly upon the

some authors would have us believe, her heart was not all

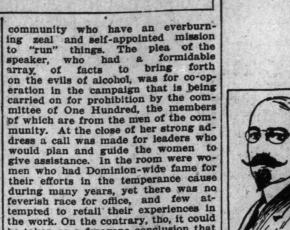

some authors would have us believe, her heart was not all "wobbly." Hearts need not be bowed down, dangerously sick nor excited to the extent that they actually flutter. The heart is like a house with a small attic, in which are the large veins—the pulmonary and the vena cava. The two bedrooms in the upper story are called auricles, and the "first floor front" is the right ventricle and the "first floor back" the left ventricle. The whole house, in-cluding the partitions between the four chambers, is made

hearts? The blushing maid or matron was very

well understood to be excited and all agog, but if

A Régular Life the Cure

youngster's brow. While these causes explain all sorts of heart ailments, heart "flutter" limited to one auricle or bed chamber, or to the "front porch"—the ventricle of the heart—is not always so easily accounted for. When the "flutter" occurs at such rare intervals that the person who has it becomes aware of it without fear, worry or excitement, and a physical search with an electro-cardiogrom device, stathogeone or other instruments, the trouble may be due to increase tear, worry or excitement, and a physical search with an electro-cardiogrom device, stethoscope or other instruments, the trouble may be due to irregular twitches or throbs of the heart muscles. Mild "flutters," if checked in time and their causes removed, may be permanently cured. If such things as loss of sleep, worry, emotional overflow and excessive loss from certain glands are controlled; if food, exercise and habits are readjusted, then true heart "flutter," uncomplicated with "valvular" injuries, may disappear for good and all.

Their presence brought to the bybe taken as a foregone conclusion that every woman there was strong in her conviction that prohibition during war-time at least was the thing for the country, the speakers generally were of the opinion that it is not the old workers alone who must enter into the campaign, that 'tho they were ready to do their snare, it is those who here tofore had taken no part or had no

strong opinion on the need, who should be awakened and induced to take a leading part in the movement, Finally, assembled at the city hall were in a a committee was named, consisting of Lady Eaton, Miss Walker, Mrs. F. McD.

Denison, Mrs. Thos. Crawford, Mrs. J. Oliver, and Mrs. G. H. Wood, and to these ladies was left the task of or-ganizing and arranging for the big work. In her presidential address at the an

nual meeting of the local council held in the Margaret Eaton Hall on Tuesday and Wednesday, Mrs. A. M. Hues-tis drew the attention of those present

to the condition in which the report of the Social Service Commission of Toronto finds itself. This report was made by a number of the most reputable men and women of the city. Their findings were printed at the expense of the people, and now the cir-culation of the report is in a manher prohibited. Mrs. Huestis deplored the

attitude of the city fathers on the matter. She pointed out that it was by no means the thought or wish of the commission to have the report sent out broadcast, but rather that it should ind its way into the hands of the heads of departments, and particularly that it should come to the knowledge of physicians, and those who might be

assisted to the betterment of humanity by the knowledge.

Another point in the address was the attitude of the province towards the expenditure of half a million of dollars in the proposed erection of cot-tages for the caring and training of the feeble-minded. In this connection, said Mrs. Huestis, nothing seems to come into prominence, but the size of the

Winifred Black MRITES ABOUT

Just Plain Folks

### A Man! Whose Man?

What did he mean by that strange look he gave you when the conductor asked the carefare? How strangely his hand trembled when he folded up the evening paper and sat down beside you in the train! What letter was that you saw him put in his pocket? Who wrote it — bold thing that she was—and how did he like it when he read it? A man! Whose man? That was the all-important, all-engrossing ques-tion. Women? What queer creatures they were—the other women! Brunettes were all right so long as there was no man about, but let a man appear and you never could count on them for a minute.

appear and you never could count on them for a minute. Blondes were good friends, they could keep a secret all right, but they were inclined to be satirical and make fun of your romantic ideas. Red-haired women you couldn't count on at all ever

were inclined to be satisfied and make the ore. haired women you couldn't count on at all, ever. Except yourself, of course—you were different. But in the main women were dear, sweet, gentle, kindly, good creatures who were always deceived and not treated as they should be, and you must

langue yourself with them against the men.

rue yourself with them against the men. Not any particular man, tho-there was, of course, always an exception. But now I have found that, besides men and women and boys and girls the world is full of just folks.

Folks who are men, but folks just the same; women who are women, bu tolks quite as well.

like the old-fashioned phrase, "men-folks" and "women-folks." something natural and human and wholesome and same about it, isn't there? See those men walking along there in the street? To the girl who sees

them from the car they are just grown-ups, and, as such, to be sedulously avoided. To the woman who is still in the choose-partners stage of develop-ment they are men—every one of them a possible chance for misery or bliss. To me, thank goodness, they're just folks.

### Human Nature Is Fine

That man with the flashing dark eyes and the cynical smile! I know he isn't worrying about a thing more romantic than what on earth to do when the landlord comes around and complains about the dents in the wall that his office how will office boy will persist in making. The pale, romantic youth who walks with him isn't pining away with unrequited love. He played Kelly pool too late last night and wishes he hadn't, that's all.

The plump person in the derby hat that looks too small for him may be on the verge of eloping with his employer's wife for all I know. That doesn't interest me in the least. What I want to know is; Does he pay his bills, can his friends trust him with their secrets, and will he stand the test of life like a man?

How much more interesting life is when we come to the "folks"! I used to know a doctor who said it always did him good to have cheap cynics say to drew cut unconscious admiration from him, as they always were saying:

had given ungrudgingly and udge the cheerfully of those who were their sup-port financially, and as the head of the port innancially, and as the head of the home, in many instances. There were no heroics. Just an orderly procession of women, smiling and bright, the greatness of the thing for which they stood being almost unrecognized even by themselves, so fine was the snipt by themselves, so fine was the spirit by which it was animated.

Scenically, the reception was some-thing that a great artist would like to

have glimpsed. All the glory did not go to the women, for the boys in khaki had no small share in enriching the kaleidscopic views that kept changing

every moment as the stream of visit-ors continued their onward march to the council chamber, where the recep-tion was in progress. The men in their smart uniform with rifles at the slope, formed a guard of honor for the women

who were the wives of themselves and of their mates far off at the front, some the widows of those who have already given the supreme offering, for "What can man do more than that he lay down his life?" and many of Toronto's

boys have already done this. The re-ception room was brightly centered with a great bed of ferns and brilliant pontezettia, and in the receiving line were Sir John Hendrie and Lady Hen-

drie, Sir William Mulock, Mayor Church and Miss Church, and the men in khaki stood near or about, adding meaning to the picture. It was nice to see the attention given the "wee" tots who toddled beside their mothers, and

the hosts. Mayor Church was particularly happy when he paid his addresses to one wee" maiden who scarcely

class all by themselves. They had given, and by their appearance one should

**CURRENT COMMENT** 

The greatest demonstration of loyal-

ty that Toronto has yet witnessed was

seen in the great outpouring of wo-

men who answered the invitation to the

reception at the city hall on Tuesday.

Did you see them? If not, you missed

one of the grandest sights of a life-

time. Six thousand-some say many

more-wives and mothers, many bring-

ing their little ones with them, were in the receiving line, and never did action

speak as did the presence of these wo-

men as they filed past and shook hands

with the men and women of the re-

ception committee.

**ON WOMEN'S WORK** 

BY M. L. HART.

ou must see a great d My doctor friend always answered them; 'Yes, thank heaven, I do."

For he, like most physicians I have ever known, always said there

nothing in the world so fine, after all, as human nature. That's the way I feel about folks. The meaner and smaller the little anxieties the more unromantic and less interesting the trials, the more I think of the folks who bear them patiently and uncomplainingly and live, the most of them, after all, decent, honest, kindly, uncomplaining, fairly happy lives. I'm glad I'm one of the "folks." Aren't you?

problem that just now confronts the land to the south of us, and, in fact, humanity generally.

Citizenship.

"The Bent Twig," Dorothy Canfleid's latest novel, "The Bent Twig," has for its subject modern American life, with its deleats and vic-tories, and her revelation is warm and charmingly sincere, the story being broader and stronger than any she has attempted heretofore. It has to do alsitempted heretolore. It has to do al-most enturely with the weather class, or what is generally known as the "inst" families. The supreme interest of the tale centres in and about the home of a college professor. In this home lives a beautiful and brilliant giri, whose very soul is torn by two contending elements-superficial pleasures, which come to her so readily, and the basic principles of a truly joyous and noble life. Her choice between the two and the events that lead up to it, occupy the reader's rapt attention. Holt & Co. are the publishers.

"The Bent Twig."

### Unpreparedness.

Unpreparedness. "The Military unpreparedness of the United States: A History of American Land Forces From Colonial Times Until June 1st, 1915," by F. J. Huidekoper, published by Macmillan's, may be read with profit by militarists and anti-mili-tarists. Altho the writer's point of view is that of an advocate of a marge and effi-ciont standing army, those who preach unpreparedness are compelled to look upon his principles with sympathy, if not with favor, because he clearly shows that upon his principles with sympathy, if not with favor, because he clearly shows that unpreparedness costs more in money and life than preparedness No sub\$ject is more widely and vehemently discussed at the present time than this one, and the facts herein cited cannot be altogether disregarded by those seeking to solve the

A. B., Toronto.-Q.-Will you please give me some remedy for puffs under the eyes? Also their cause? 2. After I have retired at night, I am troubled with very bad pains in my left hand It is a feeling like pins and and arm. needles going thru them. What shall I do to obtain relief?

A.—This may be due to too much indoor life, constipation, irregular liv-ing, not sufficient exercise in the open air, and many other things. Take active exercise in the open air each day, live an out-door life, sleep in a well ventilated room, eat plenty of good, wholesome foods, cereals, fruits, and drink three quarts of distilled water daily. Obtain more rest and sleep, and retire early—that is, about nine o'clock, and arise about seven a.m. 2. Take 15 drops of iodide of potash in water after meals, three times a day, increasing one drop at.a time until 50 are being taken, then decrease to 15 drops. Repeat this se-veral times. Use the small electric battery on the hands and arms every three hours. Manipulations, hot applications and dry heat will be beneficial to you,

M. C. O., Toronto.-Q.-Will you kindly tell me what to do for my daughter, who, tho she is in good health, is very thin?

A.-Have her take a wineglassful of olive oil about half an hour after meals, keep the bowels open, live an out-door life, and sleep in a well ventilated room. She should sleep twelve hours in the twenty-four, retire early, and get up early, also eat good whole-some foods, such as potatoes, meats, cereals, and fruits.

W. E., Toronto.—A.—If you will kindly send a stamped, self-addressed envelope with your query repeated. I will be glad to give you the desired information.

M. C. O., Toronto.-Q.-Please tell

solution in water after meals, times a day. Avoid all oil;

P. L., Toronto.—A.—If you will kindly enclose a stamped, self-addressed en-velope with your query repeated. I will be glad to give you the desired in-formation. Ben, Toronto.—Q.—Can you tell me something to do for small lumps in the skin, a sort of secretion? I have gone to two doctors with my trouble, and

to two doctors with my trouble, and

down your health. Hather be stout. Herbert M., Toronto.-Q.-Will please tell me what to do for a gre skin, covered with pamples and bla heads? 2. What will stop me from peoporating phiegm? A.-You must absolutely avoid all of dies, sweets, pastries, rith, starchy, h ly-seasohed foods, and those that of tain oil and grease. Do not wash hot water or soap, but with glycem ounce; subphur, 1 dram; rose water ounces. Stay out in the fresh alr sunshime as much pas possible, and a constipation. Dissolve the backne out wuth glycerine and benzoin, a spooning of each to a cupful of water. Rub in well each night benzo had, 1 ounce, to subphur, glyvenine, three drops of Fowner's arsenic sub-in water. Each night apply to the ples idodide of subphur, for and simple cerates, 1 ounce. 2. Have nose and throat examined at a horse and if necessary, the adenoids and the nose compressed so as to allow and rease. In the meantime, irreas to two doctors with my trouble, and they tell me it is nothing. A.—Take three drops of Fowler's arsenic solution in water after meals, three times a day. Apply white pre-cipitate ointment to the pimples each night. Avoid all oily, hot, greasy, rich, storchy and highly seasoned foods.

the nose compressed so as to all air space. In the meantime, irre-nose and throat three times a aikaline antiseptic fluid dilutes times in water.

There are thousands of women going along through life under a heavy physical burden; never entirely free from pain, never without those down-dragging symptoms which only a woman can fully understand; never with-out melancholy, depressed spirits that give rise to all sorts of forebodings and groundless fears.

Such sufferers often incur heavy doctor bills, 7st it avails them nothing. Being still uncured, they do not know what it means to enjoy even one single day of health and happiness.

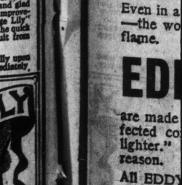

To all such, I want to say that I have been in precisely the same condition; caring little whether I lived or died, without hope for the future, a burden to myself and others. Because I know the joy and gad relief I experienced when I found permanent improve-ment through the use of the great "Orange Lily" discovery. I know how happy you will be at the ques improvement in your condition that will result from

& Co. are the publishers. A Field Hospital. "The only way to see war," says Mabel Dearmer, " is from a hospital." With husband and sons at the front, her oot-tage empty, this busy httle English-woman, writer of stories and dramas. realized that "there is war, and we are in it." A few weeks later she was in Serbia, where she was placed in charge of the hospital linen. Writing from Stobart Fleid Hospital on the 22nd of May, she says: "I am sitting in front of my tent in a sea of mud—the hitle drash round it and the other that leads into Broadway are like roaring rivers of brown water. I am dressed in breeches and top boots. Two cooks, a Serbian sergeant, the X-ray man, the sanitary in-spector, and two nurses are playing at hall and shouing in French, German and English. It is an awful thing if the ball falls because of the mud, and if it hits anybody excitement runs high." There most of the letters telling of the serious side of hospital work. "All the gilt is off war," she declares. "The Germans have accomplished that much. It is all ignorance and folly, and we are working out thru it to ordinary sense." And when speaking of her sons whom she might never see again she says: "I could na more be angry with the men or the nation that had taken you all from me than I could with an earthquake. It is all ignorance and folly. They know not what they do." Macmillan's are the publishers.

The writer throws a searchlight upon the five crises of the struggle between the monarchy and the people, bringing into prominence many details that have been overlooked by many historians. The episodes dealt with are the fateful choice of the king and queen in 1789, the flight of the royal family, the storming of the royal palace, the battle of Valmy, and the death of Louis XVI. In a chapter on Lafayette Belloc declares that the hero by whose ald America won its freedom was also the general by whose defection, i

to fly half way across the garage. One of Mary's lean shoulders slipped out of the garment. That gave the captive woman her inspiration. In trembling haste, she unfastened

buttons. Freeing herthe remaining self, she left the imprisoned coat to fall to the greasy floor of the garage-Max Lamar still gripping its corner, on The garage was small stuffy, ill lit by a single grimed window pane. The place reeked of gasoline, of oil, of

rease-rags. A big car filled more than half of it.

Across the greasy floor, thru the gloom, Mary groped her way: now slipping in a gasoline puddle; now caroming against the soiled mudguard of the machine.

She found the opposite wall, and felt along its all-but-unseen surface. At the farthest corner, her numbed fingers touched what they sought-the lintel of a door.

It was the garage's little back door, rounds. For one suicidal moment, the thought this back door was locked. But it was only stuck from long dis-use. She threw her whole fragile weight against the dirt-crusted portalshower of dust and spiders' webs cascaded down upon her head. But the door guivered at the impact.

She heard voices—one of them Lamar's. And again she cast herself against the door. This time it flew wide; with a whining of hinges and a olatter of falling debris; and the rush of her onset drove her half way across

the alley, outside. Darting back to close the door be hind her, the old woman cast a fearful look up and down the alley. The coast Travis. was clear. Incontinently Mary took to her heels; scuttling down the alley and around the first corner with the wkward haste of a frightened hen. She had much ado, too, to keep from squawking like one, in the reaction from her peril.

coat corner that protruded from the garage's front door. He heard muf-fied noises from within But they Max Lamar clung doggedly to the field noises from within. But they were so faint and the door was so thick, that he could not classify them. Nor, in-deed, had he time to. For, presently, June reappeared around the corner of the big house. With her were a hatless and rather annoyed-looking woman in a morning gown and a highly

man in a morning gown and a ngmy interested butler. "I'm still holding on, Miss Travis," Lamar hailed June; for the first time aware of the somewhat ridiculous figure he must be cutting. And he continued, addressing the

other woman: "Madam, I am very sorry to disturb you like this. But we have chased a thief into your garage, as Miss Travis has probably explained to you. I have hold of this corner of the fugitive's

coat, as you see. Will you let me break the lock of your garage door and get in? Of course, I'll pay-" "If I may suggest," said the woman

in frigid politeness, "it might be better to go into the garage by the back door before breaking my locks. Had that occurred to you, Mr. Detective?"

"Crime Specialist!" hastily corrected Lamar; then, "No, it hadn't occurred to me. I'm not familiar with garages of this type. Practically none of them have back doors. So 1-"

"We had one cut in," said the woman. "If you'll come around to the back of the garage with me-" "Yes," quickly agreed Lamar. "Yes,

or course. But-but-" He looked down at the coat corner he held.

planced at him and saw the reason. His eyes were fixed in stupid wonder at the right hand with which she was pointing. On the surface of the hand interested during the messenger's fireless fire scares on the nouse. It You-"He tripped me," sniffled Meeks "When I got up he had beat it." "With the coat?" asked I

"Yes sir! 'Twasn't my fault. I--" "Til have you broke for this, yo nincompoop!" stormed the chief. "Go clean away, did he? Coat and all flercely. "Only one clue," coweringly assen ed Meeks, "and that don't amount . anything, I s'pose."

The spell was broken. With a yell of alarm Yama grabbed up his fallen flute and dashed for the house. A 'What was it?" flute and dashed for the house. A second of so later burst unceremoni-cusly into the library where Mrs. Tra-vis and Mary were sitting. "Scuse!" he sputtered. "'Scuse, please! But man climb up to honor-able Miss June's room!" "What?" screamed Mrs. Travis and

"He he had a big, red ring-birthmark like on the back of his right hand. I took 1.otice of it when

"The Red Circle!" bellowed it chief, his nerves a-tingle, "the Re Circle-again!" "ircle-again!" (End of the Fourth Instalment). Mary, in one breath. "Yes!" panted Yama, his eyes roll-

ing wildly. "I see him, while I make a sweet music on this flute in a gar-

FABER INDUSTRY FURTHER PROOF GERMANS COPY

That even one of the most success ful German business men owes h success to the inventions of others Indicated in the history of Karl Ritter Von Faber, one of the founders of the Faber Pencil Factory at Nurema whose death was recently announce from Amsterdam.

dearie! There's a man-" "In a minute," yawned June's voice from the bedroom; "I can't find the As a matter of fact the business We The girl, never pausing for an infounded as long ago as 1760 by Kaspe stant, was hurling her manly attire Faber, who died in 1784, but it on stant, was hurning net many termination into a closet, garment by garment, as she replied. She tore off her wig, chook down her hair, flung a negligee wrapper around her, rumpled the pil-lows and threw back the coverings of ecame of world-wide importance du ing the reign of his great gran Johann Lothair Von Faber, who born in 1817, and died in 1896. was who established branches in her bed, and presently appeared sleepi-ly blinking, in the doorway. "My dear! My dear!" shrilled Mrs. Travis. "Come dut quickly. There's a Was who established branches in A York, Paris, London, Vienna, Petersburg and elsewhere, and ma the name of Faber a synonym for i lead pencil. He made his greate coup in 1856 when he contracted for the exclusive control of the graphi Travis. "Come out quickiy. There's a burglar in your rooms." "A burglar?" repeated June, sleepily cross. "How silly! There can't be." Mary, who feared nothing human or superhuman. had darted past her into the suite. Yama, tremblingly fol-lowed. Mrs. Travis brought up the the exclusive control of the grap.

only adapts and improves.

At first cautiously, then with grow ing courage, as no burglar contfronted them, the three searched the entire suite. June, still drowsy and resentlong as the supply lasted were fast oned out of sticks of the native graph ful at being waked from so sweet a sleep, followed them from place to ite as taken from the mine.

The strongest efforts were made enable manufacturers abroad to b "Who saw this wonderful burglar?" come independent of British suppli-and in the early days of the Faber I she asked, as they finished poking be-hind the portieres of the sitting room. "Yama saw him," said Mrs. Travis,

dustry pencils were made of powd ed graphite mixed with gum-but w very indifferent results. Then in 11 Or he thought he did." "Oh," laughed June. "Yama, eh? might have known it. This is the ed graphite maked wills. Then very indifferent results. Then came the great invention of N came the great invention of N Jacques Coute of Paris. Yama has discovered, and that nobody a mixture of graphite and clay, was perfect for the purpose, a but Yama was able to see. And he this process pencils of all sorts has waked us with no less than three manufactured at the present
