The City Hall is almost deserted this orning, Mayor McLaren, the City Solieitor, City Engineer, Secretary Brennan, and Chairman Allan, of the Board of Works, being in Toronto in connection with Hamilton's bill, which was before

the Private Bills Committee to-day. Because of the presence of a large Suffragette deputation, consideration of the Hamilton bill was laid over.

It is reported that the first real con struction work to be done by the Hydro Electric Commission will be the building of a telephone line along the route of the transmission lines from Hamilton to Guelph. This will be the Commission's private line. Thomas R. Allison, me-chanical engineer, was in Guelph yester-day, as representative of J. F. H. Wyse, aay, as representative of J. F. H. Wyse, the contractor, who holds a sub-contract with the McGuigan people to construct the private telephone lines. So far as possible, he says, he will bring his sup-plies to the eity over the Gueph Junc-tion line. His men will probably work through from the eity to Schaw Station, and from Schaw Station down grade to Dundas. A STRONG ROOM. The building and grounds committee of the City Council yesterday paid a vis-it to the local police station, and decided to make material changes. A strong room for boys will be built, also a sep-arate room for female prisoners, and provision will be made for a separate room for witness off the police court. The changes have long been advocated, and considerable money will be spent this year in making the improvements. LEAGUE ORGANIZED

COME TO TIME. Ontario Government Always Slow in Ottawa Matters.

(Special Despatch to the Times.) Ottawa, March 24.—The question of Provincial rights came up in the Private Bills Committee of the Commons this morning, where Mr. Conmee's bill to incorporate the Ontario & Michigan Pow-er Company again provoked a lively dis-cussion. cussion. Mr. R. G. Code, of Ottawa, ap-peared for the Provincial Government to ask for a postponement of the bill in order to allow Mr. G. T. Blackstock, K. C., an opportunity to be heard in oppo-sition to the attempt to usurp Provin-cial jurisdiction. Mr. Connee objected to the postpone-ment without first making at least some progress with the bill. Mr. Blackstock could be heard at the next meeting of the committee. A long argument ensued on this issue. Mr. Hugh Guthrie declared that the Province had always been lax in having its counsel on hand at the proper time, and the time of the committee should not be governed by the convenience of Ontario's counsel. Finally, after nearly Ontario's counsel. Finally, after nearly an hour's discussion, a motion to pro-ceed with the bill was carried, with clause two, declaring the work for the general advantage of Canada, standing over for argument by Mr. Blackstock. When the committee adjourned practi-cally no progress had been made with the bill. The main fight will come up at the next sitting of the committee, when the argument of the Ontario Govern-ment is reasented by Mr. Blackstock.

Some merchants like to do things just as everyone else does-are satisfied to let others introduce all the new ideas, and then it suddenly strikes them: Now that's a good scheme, we'll just do that too. The other fellow's way of doing things are perfectly good enough for them to use. They place no importance on the great strength originality would give to their methods of doing husiness, their advertising or to their new styles, as they show them from season to sea-son. Begg & Shannon are certainly not merchants of this class. Year after year they have proved themselves to be in a class by themselves when it comes to doing things in an original way, or in introducing the newest styles in men's wearing apparel. They seem to aim to have them far enough in ad-vance of their competitors to get the benefit of the cream of the advertising. This season, after five years of well merited progress in the men's clothing and furnishing business, finds them with store space almost twice the size it was a year are, and better arranuement of et others introduce all the new ideas,

A WARD BOSS INSPECTOR.

James Sturdy, the Tory boss in Ward 5, whose appointment as license inspector was demanded by the local Tory ma chine as a reward for his party work, has got the job, and another step toward "lifting the administration of the license law out of party politics" has been taken. Rumor had it that James Miller stood a good chance of securing the plum, and his friends had strong hopes of success; but the Sturdy wing of the party had the ear of the machine, and what it says goes with the Whitney spoilsmen. Some say that Miller is in a sition to appreciate the meaning the saying of old, that "a new king has arisen that knows not Joseph"; but his friends are still confident that his pull and his large knowledge of party secrets will doubtless secure for him "something just as good" as Sturdy

There is some guessing as to why af-ter recommending Sturdy, the senior lo-reduced prices. This is explained in the ral organ should have made a volte face and sought to prevent him from range an international agreement to re getting the job. Whatever the reason, strict production when the price of lead getting the job. Whatever the reason, strict production when the price of lead the organ has already "lain down," and falls below a minimum price. The agreeit hastens to present the new man as eclaring that he is "going to be square and fair between license-holders and the emperance people." The utterance is unfortunate. The temperance people are no concern of his. The law makes certain stipulations, and it is his duty to enforce it, no matter what the influences from without. If he will do that, he will have no trouble. But if he essays to cn force the law with one eye on the li cense-holders and the other on the temperance men, his bed will not be a lowny one. Let him forget that he has een a Tory machine man. Let him cut his party connections with the liquor this pap fed infant has apparently growa ring in Ward 5, of which the Spectator so deploringly the other day, when hold up and tax us artificial prices for considering his legibility to the inspec-torship, and knowing neither Grit nor Tory, whiskey man nor temperance man, insist on license-holders living up to the learns of the action contemplated by this letter and the spirit of the License Act, and he may "make good," notwithstand ing his "previous condition of servitude" to the party machine, and his dealings as ward boss with the license-holders. He has his chance now.

It is whispered that the party feels that it would hardly be expedient, having in view certain facts, to treat Mr. Birrell harshly, and that a bid will be made for his good-will by offering b'm a new appointment of some kind, probably at the Insane Asylum, the remuneration being substantial. Whether he will pocket his affront and accept, or enter private business and be free to speak freely, remains to be disclosed.

CANADA AND DEFENCE.

There are not lacking indications that the threatening military and naval programme of Germany, which has apparently aroused much alarm in Great Brigo to law about it? will result in so. tain. increasing apprehension throughout the British domains as to start the young and ed States tariff bill. Every influence of peaceful British states upon a wasteful selfishness and greed will be brought to policy of naval and military expendi-bear to prevent the reduction of duties tures. THE JURYMEN.

(Montreal Star.)

The Kinrade case illustrates the de-mands that society makes upon jury-men in the way of unrewarded public service. These jurymen are business men; and yet they have had to sit night men; and yet they have had to sit night after night listening to evidence until at last they decided to ask for a 12 o'clock adjournment in case the examining coun-sel desired to sit later. The lawyers will be well paid. The Coroner gets fees enough to make his position a coveted one. But the jurymen must work for nearly nothing. Some time society will recognize this anomaly and insist upon the proper payment and treatment of jurymen.

If this is to be the rule, then it is fairer and more pleasant to make it a law that each luncheon must be limited to a cer-tain number of courses, say four, and that they shall be simple. It the sewing circle is held in the adjacturatage. If the sewing circle is held in the afternoon, it should meet at 3 o'clock, and itea should be served about 5. It is well to limit this, too, and to keep it as simple as possible. Olives and to cheese sandwiches, tea and simple cakes should be sufficient. Sometimes during the hours of sewing one member reads aloud, but I think this is better left to the discretion of the hostess of the day, for a little general conversation is a relief, and if cutting must be done, it is difficult to concentrate one's attention on anything else.

There is much to be said on the sub-ject, but I am afraid it may not all come under the head of social usage. I can, however, mention a few details without overstepping my Subject. Tact is most essential in society. Without it one may not hope to suc-ceed, and with it must come charity and gentieness, for all three go hand in hand. MYERS CASE CONCLUDED

Medical Attention Might Have Prolonged His Life,

But His Heart Was Bad and His Days Numbered.

No One's Duty to Call in Medical Assistance.

Last night at No. 3 police station Coroner Hopkins presided at the inquest into the death of Walter B. Myers, which took place a week ago yesterday a: his home, 21 Case street, while being treated by Christian Science practition ers. After the evidence had all been put in the jury took only ten minute come to a verdict. The verdict was an open one, and to the effect that, though Myers' death was due to natural causes, his life might have been prolonged if proper medical attention had accorded him,

been accorded him. Dr. Coleman performed the autopsy on the body. He testified that the cause of death was heart failure of a variety known as simple dilation. He said that in his opinion exertion on the part of the dead man was the immediate cause of death. The heart was very bad, and was unable to perform its j functions when the dead man moved or exerted himself. He stated that he found the abdominal cavity full of fluid. This was when the imself. adominal cavity full of fluid. This used a pressure which acted against le heart.

caused a pressure which acted against the heart. Crown Attorney Washington asked the doctor if medical attention on the day of the man's death or continued from the time Dr. Parry's services were discontinued would have saved Myers. Witness was of the opinion that tapping the fluid therein would have relieved the fluid therein would have relieved the patient, but he said he would not a man of Myers' age. Mrs. Myers was called, and said that on the day of the doctor's last visit Mrs. Chard, a neighbor, was in, and her hus-band asked Mrs. Chard about Christian Science. She said a family named Strome, who lived across from Myers' home, believed in the faith healing, and that members of the family claimed to have been healed by it. Witness said her husband asked her to investigate, and Mrs. Strome recommended her to try Mrs. Calder, 59 Wentworth street north. She went there the next day, and told of her husband's ailment. Mrs. Calder asked his name and address, and closed her eyes and sat back in her chair for a few minutes. "I suppose she was treating him then," said the witness. The treatment for that day went no further than that, and the witness was told her husband would pass a good night. The next day

Thos. McLaclan conducted the service of the week, expressing his genuine sympathy for the patients, and also complimenting them on looking so well. There is one noticable point in thess services, which is that scarcely ever is there heard a cough, or any indication of a cold. In fact, severe colds among the patients are almost unknown. They hear about the fearful prevalence of grip and colds down town, but need have no fear, for they are practically immune. What can it be that thus pro-tects these people, who, it seems, would naturally be more prone to grip and colds than those in normal health, un-less it is their out-of-door life? RACING APPEAL.

What Will Happen to Kentucky

Turf ?

Lexington, Ky., March 24 .- The opinion

of Judge Harbeson, given at Covington

yesterday, to the effect that the law creating the State Racing Commission

creating the State Racing Commission is unconstitutional, is not accepted as conclusive by a majority of breeders and horsemen in the Blue Grass regions. The general impression here is that the Court of Appeals will reverse Judge Harbe-son's decision, just as the United States Circuit Court reversed Judge Evans, of the United States District Court at Log-isville in 1906, when the Cella interests sought an injunction against the com-mission because it would not grant cer-tain dates to Douglas Park, and attacked the constitutionality of the act on the ground that it was in violation of the unth section, first article, of the Federal constitution and fourteenth amendment thereto.

It is safe to say that the decision will

be had from the Court of Appeals by May 1, and until then the racing situa-

CONTRACTS FOR POWER.

The Government Bill Creates Some Discussion.

Hon. Mr. MacKay Points Out Some Objections.

Preliminary Points Raised on Law Reform Measure.

Toronto, March 24.-The Premier was the sponsor for the power bill to vali-date all contracts entered into by the icipalities and the Hydro-Electric Commission, which went through Committee of the Whole in the Legislature yesterday. Sir James made another address, and again severely igorous

vigorous address, and again severely stated the methods used by the oppon-ents of the power project. He detailed an interview with one of the members of the opposing interests with himself in his most humorous vein. Hon. A. G. MacKay followed the different clauses of the bill with a series of pointed questions. The main point, however, made by the Liberal leader against the Government's pro-cedure was that when the by laws, were submitted and the vote taken in 1907 the commission undertook to de-liver power at the limits of the various municipalities for the definite figures ipalities. municipalities for the definite figures given. Mr. MacKay argued that the ratepayers, therefore, did not need to be concerned as to the cost of trans-mission at all. The Government as-sumed all that when the vote was taken. Now, he held, the Govern-ment bill refused to guarantee the fig-ures, and the whole risk of construc-tion and transmission was placed on the municipalities. This, he argued, was on an entirely different proposi-tion, and it would be subversive of the fundamental principles upon which for the definite figure fundamental principles upon which the success of municipal machinery rested if the Legislature were now arbitrarily to force that risk upon the numeripalities without the ratepayers being consulted.

HISTORY OF POWER PROJECT.

In moving the bill into committee, Sir James Whitney traced the history of the power movement from its in-ception to the present time. The Pre-mier recounted the steps taken by the united billion by the commission and unicipalities, by the commission, and absequently by the Government in its

numeroalities, by the condities (5.1, and subsequently by the Government in its effort to secure the power contract for a Canadian company. This, he declared, it was not possible to secure at the figures offered by the Ontario Power Company. Finally, the Pre-mier reported the closing of the con-tracts for the construction of the line. The Government had put its hand to the plow in the cheap power movement and would not draw back. It was true, continued the Premier, that certain gentlemen of wealth and financial standing interested in the Fleetrical Development Company, the Electric Light Company, and the dif-ferent McKenzie & Mann enterprises— their interests stretching one to the other—had to all appearances combined to defeat the efforts of the Hydro-Elec-tric Commission. tric Commission.

"These interests," said Sir James, "have subscribed their money to funds designed under cover and hidden from the light to attack the commission and its work. Had it been an open attack it could and would have been met—met by the people themselves. I have already intimated my opnion of the gentiemen who ient themselves to this mode of hidden attack. Let me be understood as repeating all I have said concerning them, I am in a position to inform the House that one of these gentiemen offered \$1,000 tor a page of one of the newspapers during the campaign in Toronto. "I have never sud that the direct "These interests," said Sir James,

Sir James read a series of petitions from the various muni-icalities intersected acking for the meascipalities interested, asking for the mea ure, and pointed out that it was framed to carry out the intent of the House, to do justice to the municipalities, and to in no wise interfere with litigation and in no wise interfere with litigation and vested right. The Premier read the editorial from the Globe, emphasizing that journal's words, "Let no quibbles stand in the way." "This," said he of the article, "is an honest, creditable and patricitie pro-nouncement which does the Globe every events."

THE OPPOSITION LEADER. THE OPPOSITION LEADER. Hon. Mr. MacKay called attention to the fact that he had counselled last year the wisdom of submitting the question again to the ratepayers. "Had the sug-gestion been followed," the Liberal leader bserved, "all this litigation would have been avoided."

Mr. Studholme asked if Hamilton were Mr. Studnolme asked if Hamilton were ruled out of the project permanently. "Hamilton has no standing at present, whatever it may do in the future," the Premier replied. Hon, Mr. MacKay put a series of ques-tions to the Derwise out to Hon. Adam

Ottawa, March 23 .- The harmony of the Opposition is such that they cannot even agree upon a description for the Newmarket Canal. To-day they spent the better part of the ses sion in an effort to find one suitable to their own taste, with results that revealed a wonderful diversity opinion. Captain Wallace, who mov

ed" a resolution condemning the

ed' a resolution condemning the ex-penditure on the canal, regarded the work as a scandal. Dr. Sproule characterized it as a farce, not worthy of a moment's consideration, while Major Currie saw in it nothing more than a vote-catcher. "A white elephant" was the phrase applied to it by another member of the Opposition, and several treated it as a matter of grave moment. The only point upon grave moment. The only point upon which the party led by Mr. Borden seemed to be at one was that the canal should not be proceeded with, the chief reasons advanced being, first, that there is not sufficient water, and, secondly, that even if it were possible to obtain sufficient water-storage there would be little or no traffic.

the first age, when spiritual religion flourished in great power in the churches of the reformation. But the question remains how has this Dovare Spirit-given truth expressed itself in the language and thought of man? "Has it created for itself a rew and perfect form of thought and ex-pression, so that everything incorpor-ated in Scripture, its science and his-tory, as well as its religion and mor-ality, is stamped with the perfection of the Divine omniscience? "Ut do the mspring Spirit come to men at sundry times, and in divers manners, as they were, with their limitations and imperfections of shought, knowledge and language, and sanctifying these imperfect human in-struments for His use so inform them with the spirit of moral and religious truth that they were able to declare that truth as it was revealed from God to their fellow men and to place it on record as a treasure for all ages? -"Each of these views, with various in-termediate modifications, can claim the support of men whose piety, honesty and loyalty to truth and to the Word of God cannot be doubted. Each of these views will satisfy the requirements of the doctrinal standards of the Meth-odist Church, as expressed in our fifth article, while passages in Mr. Wesley's sermons and notes may be quoted in sup-port of either view. "Inasmuch as perfect honesty in the investigation of truth and perfect can-dor in its statement are essential parts of our religion, and especially impera-tive in our schools of theology, stand-ing as they do side by side with the great institutions of learning in the country, so long as our theological pro-fessors maintain their personal vital re-iation to Christ and the Holy Scrip-ture and adhere to the doctrinal stand-ards of our Church, in order that in an atmosphere of perfect Christian can-dor and true intellectual liberty they may conserve the faith of our Church in the minds of those who in days to younseries that they must be left free to do their own work, in order that in an atmosphere of perfect Chr would be little or no traffic. The funniest part of the proceed-ings was that, as the Speaker pointed out, the whole discussion was ir-regular, the item in the estimates re-lating to the Newmarket Canal being still under consideration in the Com-mittee of Supply, and, therefore, open to discussion only in that committee, However, notwithstanding the vigorous protestations of the Opposition, the matter did not seem to be taken seri-ously, and irregular though it was, the ously, and, irregular though it was, the iscussion proceeded. Captain Wallace offered his resolu

to as an amendment to the motion o go into supply. It affirmed that he canal was useless and that the exthe exhal was useless and that the ex-penditures upon it were wholly improvi-dent and unwarrantable, and constitut ed a wanton misuse and waste of public

money. MR. GRAHAM'S VIEW.

Hon. Mr. Graham dissented from the view that the canal would be useless. If they were to take the word of men who ought to know, the canal less. If they were to know, the canal of men who ought to know, the canal was perfectly feasible, and would when completed be as navigable as the Erie Canal, which for years had carried the grain of the western States to the east. Conservative members and their press had made merry over the prospect of water having to be pumped in the canal, but it was a fact that canals in other parts of the world w.re supplied to some extent by pumping systems and artesian wells. He contended that navigation would be impossible in any part of the Trent Valley Canal if reservoirs and dams were not used, as it was proposed to use them in the as it was proposed to use them in the case of the Newmarket Canal. (Special Despatch to the Times.) Nancy Rice, wife of Frederick Rice, pass-Toronto, Ont., March 24 .- The City ed away early this morning at her home, ed away early this morning at her home, 116 Cannon street west, aged 64 years. Mrs. Rice was an old and highly esteem-, ed member of the Women's Christian Association, Mission Church, Caroline street north, the many members of which will deeply mourn her death. She is survived by a husband and grown up family of two sons and nine daughters. The funeral will take place on Friday afternoon at 2.30 o'clock. of London's bill was considered by the Private Bills Committee this morning. The chief point of interest was the city's desire to exempt the Globe Casket Company from taxation. The company was burned out some time ago with heavy loss, and Mayor Steveley and several others spoke of the advisability of exempting the company, John D. Ivey, solicitor for the company, sepoke some-what bitterly about the London fire ap-pliances and stated that they had to pay \$432 all around on insurance. They Much sympathy will be extended to Mr. and Mrs. Charles Cowan on the loss of their infant daughter, Marguer-ite, who passed away yesterday, aged 18 months. The funeral took place this afternoon at 2 o'clock from her parents' residence, 10 Ferrie street west, to Ham-ilton Cemetery. Rev. Mr. Morton con-ducted the services at the house and grave.

to go there. John D. Parsons very strongly op-posed it on the grounds of principle, and said that the company did not need exemption. It was shown, however, that the committee had done a good deal of exempting. Hou. Adam Beck said the was exceptional, not bonusing, but nerely assisting. After a lot of discussion it was decided

After a lot of discussion it was decided to give the company total exemption from taxation for 15 years, with the ex-ception of the school rates, other com-promises were reached and the bill got through after an hour's discussion.

A larger number of sympathizing friends and relatives attended the fu-meral of the late Mrs. J. M. Peregrine, which took place yesterday afternoon at 2.30 o'clock from her late residence, 223 Jackson street west, to Hamilton Ceme-tery. The services were conducted by Rev. Richard Whiting, assisted by Rev. R. B. Rowe and Rev. R. J. Treleaven. The pall-bearers were: C. S. Sweet, J. O. Callaghan, J. G. Cloke, Thomas W. Wat-kins, J. B. Griffith and Alfred Ward. The large number of floral tributes bore silent testimony to the high esteem in which the deceased was held. The flower list was as follows: Gates ajar, husband; pillow, Mr. F. C. Webber, fath-er, pillow, trustee and Quarterly Board of Centenary Church; anchor, Rev. Dean Mahoney; violets, Mr. and Mrs. John Lee, Mrs. Mary and John Peregrine, Mrs. Hockaday, Mr. and Mrs. G. MURDERED IN BROOKLYN.

Cigarmaker Shot Down in the Street by Saloon Man.

Police Believe It to be Another Black Hand Affair.

Murdered Man's Wife Tells of the Cause of Tragedy.

New York, March 24 .- Another killing which the police declare should be added to the list of crimes of the "Black Hand"

Society was committed on the streets of Brooklyn to-day, when Joseph Genaro, a cigarmaker, and supposed to be the father of a vaudeville performer of that name, was shot down and killed in a fusillade of bullets that followed a meet-ing of Genaro and a crowd of several ing of Italian

ing of Genaro and a crown of Italians, The police made several arrests, and Mrs. Genaro, who stood by and implored her husband's enemies not to shoot him, decaired that Antonic Cincotta, a saloon-keeper, and one of the prisoners, had kill-ed her husband. Detectives have had Cincotta under surveillance for some time, believing that he might know some-thing of the movements of the "Black Hand" Society.

thing of the movements of the "Black Hand" Society. Genaro had trouble last night with Cincotta over a bail bond which the vie-tim had put up for a friend of Cincotta, who had fied Genaro told Cincotta that the laster should pay something toward the loss sustained, and the saloonkeeper threw him out of the place. This morn-ing Genaro, according to his wife, in-tended to see Cincotta, but she begged him to remain at home, saving that Cincotta and his friends would be wait-ing for him. Genaro when he went out to day was followed by his wife. They met Cincotta and his friends on the cor-ner, and the shooting followed.

THE MOULDERS

There appears to be no change in the Moulders' strike situation. While the stove manufacturers have increased their working forces to a certain ex tent, the shops are still running on only a small scale. The committee of the Un-ion handed out the following statement this morning: As articles have appeared in the

As articles have appeared in the press, from time to time, in connection with the dispute between the stove man-ufacturers of this city and the moulders, which have not been the exact facts, and in some cases misleading, the moulders desire to say that the reason for the dispute at present, between the firms and the moulders, is a desire on the part of the stove manufacturers to reduce wages of the moulders 20 per cent. The latest news in the musical world is the fact that the R. S. Williams & Sons Company, of Toronto, have pur-chased the good will and stock of Geo, W. The idea of the promoters is to make this one of the leading musical houses of Canada, and new energy and capital will be added to carry out the plan. Geo, W. Carey had the reputation of car.ying the finest line of pianos in Canada, and it will be the aim of the new company to sustain this repu-tation. With one or two changes the line of instruments will be the same. The famous Chickering, of Boston, will be added to the line for the benefit of those who want something just a little better than they have been able to get heretofore. The terms will be made very easy for those who are unable to pay cash, and the same general principles will be used as are found in the music houses of larger cities. The new company extends a cordial invitation to all to visit their ware-trooms and exempt the heretofic of the same.

Mr. Kinrade is also quoted as saying that he had hired no private detectives although many had seen him. The father of the murdered girl said that the family knew Miss Elliott to be a good Christia woman, who was the daughter of Dr. Elliott, in England. She married Colonel Warburton, and is now living in Califor-nia. Claude Elliott is also known to Mr. rade, who said he was the son of a ond wife of Dr. Elliott's. Florence trade called Miss Elliott "Aunty." Kin Kinrade 'Aunty." ANOTHER REVOLVER. ANOTHER REVOLVER. Speculation as to the kind of revolver used by the murderer is still rife. F. heles right through the universe girl, instead of the bullets being flatten-ed against a hair pad or against the jawbone. It is a "young Galling gun" and totally out of the question. Mr. George Evans, Toronto, has a pe-cullar "gun." and one that would not have such force behind it as some of the later day automatics. A Toronto exchange says of it: The idea of an eight-chambered gun has searcely been mentioned, yet there is in the possession of Mr. George Evans ,an insurance supervisor of this city, a revolver from which eight bul-lets may be fired without reloading. This weapon, which appears to hare been one of the forerunners of the present day revolver, contains a eircle of eight short barrels running back to the breach. It was suggested that these companies should be required to add to their expenses in Canada an amount equal to five per cent. of their Canadian premiums to provide for head office expenses. The companies asked that industrial insurance be exempted from all restrictions as to expenses. Mr. J. K. McDonald said companies hailed with satisfaction the provision making rebates illegal. He suggest-ed, however, that in certain cases, such as extreme poverty, a special sur-render value might be allowed. The bill will be further considered at next meeting of the committee. Mr. Geo. H. Perly obected to the condition that a member of Militia should get the consent of his insur-ance company before obeying a call to fight for his country. Mr. J. K. MacDonald, representing the Life Of-ficers Assurance Co., said that the companies did not desire at all to stand in the way of men going to the defence of Canada or the Empire, but they had to have some measure of pro-tection for the policyholders who did not go to war. . The system of voting has been haven't. havent. The system of young has been devised from time to time in the wis-dom of the Legislature as the best means for ascertaining the will of the people. I see the gentleman modding his head, but anyone who thinks differently has I see the generation when thinks differently has not been very well educated along the line of political history. After more remarks in gratitude for the compliments given the **Government**, Sir James said he could only ask them

There was a chorus of "We will."
