The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## HOLIDAYS, REMARKABLE EVENTS, &c.

### JANUARY.

Low the woods

Bow their hoar head : and ere the languid sun,  
Faint from the west, emits his eveping ray,  
Earth's universal face, deep hid and still,  
Is one wild dazzling waste, that buries wide,  
The works of man.

### FEBRUARY.

The keener tempest rise ; and fuming dun,  
From all the livid east, or piercing north,  
Black clouds ascend ; in whose capacious womb  
Vapoury deluge lies, to snow congealed,  
Leavy they roll their fleety world along ;  
And the sky saddens with the gather'd storm.

### MARCH.

Hush'd is the howl of wintry breezes wild ;  
The purple hour of youthful spring has smiled ;  
A livelier verdure clothes the teeming earth ;  
Buds press to life, rejoicing in their birth ;  
The laughing meadows drink the dews of night,  
And fresh with opening roses glad the sight.

### APRIL.

The blue-birds and the violets are with us once again,  
And promises of summer spot the hill-side and the plain.

The clouds along the mountain-tops are riding on the breeze,  
Their trailing azure trains of mist are tangled in the trees.

## MAY.

Behold, the young, the rosy Spring  
Gives to the breeze her scented wing,  
While virgin graces, warm with May,  
Fling roses o'er her dewy way.  
The intrairring billows of the deep  
Have languished into silent sleep.

## JUNE.

Now have young April and the blue-eyed May  
Vanish'd awhile, and lo! the glorious June  
(While nature ripens in his burning noon)  
Comes like a young inheritor; and gay,  
Although his parent months have passed away;  
But his green crown shall wither, and the tune  
That usher'd in his birth be silent soon.

## JULY.

I stood upon the hills, when heaven's wide arch  
Was girt with the sun's returning march,  
And woods were brighten'd, and soft gales  
Went forth to kiss the sun-dad vales.  
The clouds were far beneath me; bathed in light,  
They gather'd mid-day round the wooded height.

## AUGUST.

If thou art worn and hard beset  
With sorrows that thou wouldest forget,—  
If thou wouldest read a lesson, that will keep  
Thy heart from fainting and thy soul from sleep,  
Go to the woods and hills! —No tears  
Dim the sweet look that Nature wears.

## SEPTEMBER.

Autumn winds are sighing,  
Summer glories dying.  
Harvest time is high.  
Cooler breezes quivering,  
Through the pine-groves shivering,  
Sweep the troubled sky.

## OCTOBER.

But see the fading, many-color'd woods I  
Shade deepening over shade, the country round  
Embow'd; a crowded umbrage, dusk and duo,  
Of every hue, from wan declining green  
To sooty dark,—these now the lonesome Muse,  
Low whispering, lead into their leaf-strown walks  
And give the season in its latest view.

## NOVEMBER.

Thou hast beauties: sterner ones, I own,  
Than those of thy precursors; yet to thee  
Belong the charms of solemn majesty  
And naked grandeur. Awful is the tone  
Of thy tempestuous nights, when the clouds are  
blown  
By hurrying winds across the troubled sky.

## DECEMBER.

This is the old-est of the seasons: he  
Moves not like Spring, with gradual step, nor grows  
From bud to beauty, but with all his snows  
Comes down at once in hour antiquity.  
No ralns nor loud proclaiming tempests flee  
Before him, nor to his time belong  
The suns of summer, nor the charms of song.

### Explanation of the Articles in the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

Moon's PHASES.—This Table gives the times for the two meridians when the Moon passes the geocentric longitudes of  $0^\circ$ ,  $90^\circ$ ,  $180^\circ$ , and  $270^\circ$  east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this Table are given the times at which twilight begins in the morning and ends in the evening, i.e., the times when the Sun's centre is  $18^\circ$  below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude  $43^\circ$ . When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

| Latitude .....                                      | $42^\circ$ | $43^\circ$ | $44^\circ$ | $45^\circ$ | $46^\circ$ | $47^\circ$ | $48^\circ$  | $49^\circ$  | $50^\circ$   |
|---|------------|------------|------------|------------|------------|------------|-------------|-------------|--------------|
| 1st Correction for Degrees.....                     | $-5' 27''$ | $-3' 43''$ | $-1' 55''$ | $0' 00''$  | $+ 2' 1''$ | $+ 4' 8''$ | $+ 6' 22''$ | $+ 8' 44''$ | $+ 11' 14''$ |
| 2nd Correction for each minute<br>of latitude ..... | $+ 1''.7$  | $+ 1''.8$  | $+ 1''.0$  | $+ 2''.0$  | $+ 2''.1$  | $+ 2''.2$  | $+ 2''.4$   | $+ 2''.5$   | $+ 2''.6$    |

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than  $45^\circ$ .

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

$$\begin{array}{ll} \text{Thus for latitude } 43^\circ 20' \dots \text{1st correction} = -3' 43'' & \text{2nd correction} + 1.8 \times 20 = +0' 36'' \\ " " 47^\circ 40' \dots " " = +4' 8'' & " " + 2.2 \times 40 = +1' 28'' \\ " " 45^\circ 10' \dots " " = +0' 0'' & " " + 2.0 \times 10 = +0' 20'' \end{array}$$

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of  $45^\circ$ .

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto and Quebec.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto and Quebec.

The column, SUN ON MERIDIAN, gives the time that a watch should show when the shadow of a sun dial is on the noon mark.

Moon's A.O.E.—This column shows to the nearest tenth of a day the Moon's age at Toronto, noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude  $4h. 46m. W.$  It passes the meridian in the morning from April 11 to October 10. It passes the meridian twice on October 10; and in the afternoon during the rest of the year.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The four last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

#### Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 46° north latitude.

To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (...) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 46°.

## THE YEAR.

The length of the year is strictly expressed by the space of time required for the revolution of the earth round the sun—namely, 365 days, 5 hours, 48 minutes, 49 seconds, and 7 tenths of a second, for to such a nicety has this time been ascertained. But for convenience in reckoning, it has been found necessary to make the year terminate with a day instead of a fraction of one, lumping the fractions together so as to make up a day among themselves. About forty-five years before Christ, Julius Cesar, having, by the help of Sosigenes, an Alexandrian philosopher, come to a tolerably clear understanding of the length of the year, decreed that every fourth year should be held to consist of 366 days, for the purpose of absorbing the odd hours. The arrangement he dictated was a rather clumsy one. A day in February, the sixth before the calends of March (*sextilia*), was to be repeated in that fourth year; and each fourth year was thus to be *bissextile*. It was as if we were to reckon the 23rd of February twice over. Seeing that, in reality, a day every fourth year is too much by 11 minutes, 10 seconds, and 3 tenths of a second, it inevitably followed that the beginning of the year moved onward ahead of the point at which it was in the days of Cesar; in other words, the natural time fell behind the reckoning. From the time of the Council of Nice, in 325, when the vernal equinox fell correctly on the 21st of March, Pope Gregory found in 1582 that there had been an over-reckoning to the extent of ten days, and

now the vernal equinox fell on the 11th of March. To correct the past error, he decreed that the 5th of October that year should be reckoned as the 15th, and, to keep the year right in future, the overplus being 18 hours, 37 minutes and 10 seconds in a century, he ordered that every centurial year that could not be divided by 4 (1700, 1800, 1900, 2100, 2200, &c.) should not be bissextile, as it otherwise would be; thus, in short, dropping the extra day three times every four hundred years. The Gregorian style, as it was called, readily obtained sway in Catholic, but not in Protestant, countries. It was not adopted in Britain till the year 1752, by which time the discrepancy between the Julian and Gregorian periods amounted to eleven days. An Act of Parliament was passed, dictating that the 3rd of September that year should be reckoned the 4th, and that three of every four of the centurial years should, as in Pope Gregory's arrangement, not be bissextile or leap-year. It has consequently arisen—1800 not having been a leap-year—that the new and old styles now differ by twelve days, our first of January being equivalent to the 13th old style. In Russia alone, of all Christian countries, is the old style still retained; wherefore it becomes necessary for one writing in that country to any foreign correspondent, to set down his date thus: <sup>12th</sup> March, or <sup>26th September</sup> <sub>7th October</sub>; or, it may be, <sup>28th December, 1870</sup> <sub>9th January, 1871</sub>.

\* The indicated decrease of the population of the City of St. John is attributable to the great fire which occurred in the year 1877, when half of the city was laid in ashes. Great numbers were thereby driven into the surrounding districts, and many whose business and social ties were thus severed did not return to the city.

The fluctuations in the expenses of management, and in the average cost of each transaction,—where not explained by variations in the amount of business and the number of transactions,—are mainly attributable to payments in one year for services not wholly chargeable to that year.

The total cost of maintaining the Post Office Savings Bank, including interest allowed to depositors and all expenses of management, averages about 4½ per cent. on the Savings Bank Balance in the hands of the Government.

Eight per cent. of the transactions during the last year, or one in every 13 deposits, were by depositors availing themselves of their privilege to deposit and withdraw at pleasure at any Post Office Savings Bank, without change of Pass Book. The transactions of this character numbered 10,140 during the year.

The business of 1882, as compared with that of 1881, shows an increase of 25,633 deposits, and an increase in the amount deposited of \$2,290,947.

The number of depositors' accounts advanced from 39,605 in 1881 to 51,463 in 1882, an increase of 11,858, and the balance due to depositors increased by \$8,265,434 76.

The total interest allowed to depositors and added to their deposits during 11 years' business amounted, on 30th June, 1882, to \$1,685,111 79.

The Offices of the Post Office Savings Bank, Canada, year by year, from 1st April, 1863, to 30th June, 1882.

## COPYRIGHTS IN CANADA.

Copyrights may be secured by any person domiciled in Canada, or any part of the British possessions, or being a citizen of any country having an International Copyright Treaty with the United Kingdom, who is the author of any book, map, chart, musical composition, or of any original painting, drawing, design, &c., upon the following conditions:—The books, maps, &c., must be published in Canada; and in the case of work of art, it must be produced in Canada, either prior to or simultaneously with its production elsewhere. Two copies of books, maps, &c., must be sent to the Minister of Agriculture; and in the case of paintings, statuary, &c., a written description of the same must be furnished.

The fee for registering a Copyright is one dollar, and

it runs for twenty-eight years. It may also be renewed for a further term of 14 years upon the same conditions.

An Interim Copyright may be obtained, pending the publication of any literary, scientific or artistic work, by depositing in the Office of the Minister of Agriculture a copy of the title, or a description of such work. The Interim Copyright runs for one month, and the fee is fifty cents. The work, however, must be published inside the time specified, or the author incurs a penalty not exceeding one hundred dollars.

The penalty for infringing a Copyright is the forfeiture of every copy of the work to the owner of the Copyright, and the payment of a fine of not less than ten cents, nor more than one dollar, for every copy found in possession.

## POST OFFICE SAVINGS BANK, CANADA.

Post Office Savings Banks in Ontario and Quebec are open daily for the receipt and repayment of deposits, during the ordinary hours of Post Office business.

The direct security of the Dominion is given by the Statute for all deposits made.

Any person may have a deposit account, and may deposit yearly any number of dollars, from \$1 up to \$300, or more with the permission of the Postmaster-General.

Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such woman.

Deposits for children under 10 yrs of age may be made—

Firstly—By a parent or friend as trustee for the child, in which case the deposits can be withdrawn by the trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both trustee and child.

Secondly—in the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

A depositor in any of the Savings Banks Post Offices may continue his deposits at any other of such offices, without notice or change of Pass Book, and can withdraw money at that Savings Bank Office which is most convenient to him.

Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums

paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

Each depositor's account is kept in the Postmaster-General's office, in Ottawa, and in addition to the Postmaster's receipt in the Pass Book, a direct acknowledgment from the Postmaster-General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster-General, by letter, being careful to give his address, and, if necessary, write again, because the Postmaster's receipt or entry in the Pass Book is not sufficient without the further receipt for the money from Ottawa.

Every depositor must send his book once a year, viz., on the anniversary of his first deposit, for comparison with the books of the Department, and for insertion of interest. The book will be returned to him by first mail. At no other time should a depositor suffer his book to be out of his own possession.

When a depositor wishes to withdraw money, he can do so by applying to the Postmaster-General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

## MANUFACTURING INDUSTRIES OF NATIONS.

The march of civilisation has been, in the present century, to some degree identified with the progress of manufactures. The industries that now occupy 12,500,000 workmen in Europe were in their infancy at the period of Waterloo, and since that time the countries most advanced in manufactures have been the most prosperous. The United States, if the manufacture of flour is included, stands first of all countries in the world. The annual product is nearly \$1 billion dollars, and it is not improbable that nearly 5,000,000 operatives are employed in its various industries. The product per operative, owing to the greater intelligence and skill of American artisans, is higher in the United States—namely, \$1,560 for each ; in the United Kingdom, \$1,120 ; in France, \$1,100 ; in Germany, \$515 ; in Russia, \$530 ; in Austria, \$600 ; in the Low Countries, \$500 ; in Spain and Portugal, \$595 ; in Italy, \$340 ; in Scandinavia, \$450 ; in the Colonies, \$500 for each. The textile manufacturers employ 3,500,000 workmen. England, of course, stands first in this regard ; but the United States holds the second position, and, as estimated, produced in 1880 a combined product of cotton and woollen goods valued at \$420,000,000 ; the total product for the world being \$2,435,000,000. The United States manufactures about one-sixth of the entire textile product of the world. More than two-thirds of the world's cotton crop is grown in the United States, the product, according to the census of 1880, being 5,730,968 bales. The world's product of silk is estimated at \$10,000,000, and something over 500,000 operatives are employed in this industry. France leads with 170,000 operatives and a product of \$240,000,000. According to the report of Special Census Agent Wyckoff, 34,440 persons are employed in the United States in the manufacture of silk, and the total value of the product is \$34,410,463, thus producing about 8 per cent. of the total production of the world. In 1850 the iron-producing countries of the world manufactured about \$1,360,000 tons of iron, of which but a little over 500,000 tons was produced by the United States. The construction of railways and the building of iron vessels have caused the production of iron to quadruple within thirty years, and to-day these countries produce upwards of 18,000,000 tons, 7,265,140 tons of which are produced in the United States. In 1880 the United States produced 741,475 tons of Bessemer steel rails, while the total product of the United Kingdom was only 732,910 tons. The United States to-day makes one-fourth of the world's iron and one-fifth of its steel. The total production of the iron and steel works of the United States in the Census year 1880 was 7,265,140 tons ; in 1870 it was 3,655,215 tons ; increase, 3,609,925 tons, or 98 76 per cent.

## LEGAL AND JUDICIARY.

### SUPREME COURT OF THE DOMINION AND COURT OF EXCHEQUER.

The Supreme Court, as a high Court of Appeal, constituted by Dominion Statute, 38 Vic., cap. 2, assented to 8th April, 1875, is composed of a Chief Justice and five Pulse Judges, and has appellate, civil and criminal jurisdiction within and throughout the Dominion of Canada. The Judges reside at Ottawa, where the Supreme Court holds annually three Sessions—the first beginning on the third Tuesday in February, the second on the first Tuesday in May, and the third on the fourth Tuesday in October. The Exchequer Court, presided over by the same Judges, possesses concurrent original jurisdiction in the Dominion in all cases in which it is sought to enforce any law relating to the revenue, and exclusive original jurisdiction in all cases in which demand is made or relief sought in respect of a suit or action of the Court of Exchequer on its revenue side against the Crown, or any officer of the Crown.

Hon. William Johnston Ritchie, Chief Justice; Hon. Samuel Henry Strong, Pulse Judge; Hon. Telesphore Fourrier, Pulse Judge; Hon. William Alexander Henry, Pulse Judge; Hon. Henry Elzear Taschereau, Pulse Judge; Hon. John Wellington Gwynne, Pulse Judge; Hon. R. Cassels, Junr., Registrar; George Duval, Reporter.

### THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By Revised Statutes of Ontario, c. 138, the Benchers theretofore appointed, from time to time, by their own body, are made, exclusive of *ex-officio* members, elective by the Bar, the *ex-officio* consisting of the Attorney-General of the Province for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elective*, thirty in number, being chosen by the ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

## SPECIAL TO THE TRADE.

Having every facility afforded us for purchasing direct from the makers, which Cash Payments can command: and having also a permanent representative in the British and Foreign Markets, together with our usual staff of departmental buyers semi-annually visiting the chief centres of manufacture, enables us not only to purchase on the most favourable terms, but to keep our stock well up with the latest Choice Novelties as they appear, another important feature of our business is that we have completed arrangements by which we entirely control several **LINE****S** and **PATTER****N**S for the Dominion.

The extent, variety and completeness of our stock during the regular, as well as the assorting season, give purchasers the advantage of supplementing their stock with the most seasonable goods as required.

## BANKING AND INSURANCE.

The paid-up capital of the three largest Banks in Canada is \$99,565,866. Over Twelve Million Dollars of this capital is kept employed, not in Canada, but at their U. S. branches, earning large dividends for their Canadian stockholders.

THE ETNA LIFE INSURANCE COMPANY offers to the business men of Canada a more direct and more profitable investment for their funds, by means of its convenient and valuable ENDOWMENT BONDS

running for 10, 15, 20, 25 or 30 years, and in sums of \$500 to \$15,000, and yielding annual cash dividends. These Bonds are issued at various prices, according to the age of the purchaser, and the length of time the Bond is to run. They may be paid for in one sum, or in annual or semi-annual instalments to suit the purchasers' convenience. They are unusually secured, not only by accumulated assets of over \$28,000,000, but by special deposits at Ottawa, and by a most valuable experience of 32 years in selecting the safest and most profitable investments.

At age 41, a payment of \$7,372 will purchase, on a healthy man, an ETNA Endowment Bond for \$10,000, payable 10 years from date, or at earlier death, and an annual cash dividend besides. The increase of the \$7,372 to \$10,000, the annual dividends, and the value of the life insurance, have yielded to those living the 10 years through, a return of EIGHT TO NINE PER CENT. AS AN INVESTMENT.

No. 63,784, an Endowment Bond for \$2,000 was issued to E. M. MORPHY, Esq., the well-known jeweller, Yonge street, Toronto, in June, 1869, and paid in 1890. Mr. MORPHY's opinion of the investment is shown by his taking three more ETNA BONDS. Ask him.

No. 64,944, an Endowment Bond of \$4,000, was issued in July, 1869, to C. QUINLAN, Esq., ex-Mayor of Port Hope, and cashed in 1879. Allowing for the 10 years' life insurance received, the balance yielded better than Eight (8) per cent. Compound Interest. When receiving his money, Mr. Quinlan expressed regret that he had not taken \$8,000 or \$10,000 in the first place, and thus saved thousands of dollars lost during the ten years in other investments which then promised better than this. He has re-invested with the ETNA on a liberal scale, and on the same 10-year Endowment Plan.

No. 70,607, an Endowment Bond of \$1,000 was issued to JOHN ROSS, Esq., Merchant, Galt, in 1870 and paid, with profits, in 1890. Mr. Ross' opinion is expressed in the form of two more, taken in 1880 and in 1892.

No. 74,684, an Endowment Bond of \$5,000, was issued to THOS. THOMPSON, Esq., "Mammoth House," Toronto, in June, 1870. He finished his ten payments in 1890 made a careful examination of the subject, and took another \$5,000 on the 10-year plan. He now receives two large cash dividends annually.

No. 82,050, an Endowment Bond of \$4,000, was issued to JOHN HOOG, Esq., Merchant, Guelph, in April, 1871, and settled in March, 1881. As an investment it resulted almost precisely the same as Mr. Quinlan's, and the company has now a still larger interest in Mr. H.'s good health, as well as in that of many of his business friends.

No. 87,957, for \$1,000 was issued to DANIEL ROSE, Publisher, of Hunter, Rose & Co., Toronto, in 1872, and cashed in 1882. His opinion is expressed in double the amount for another 15 years.

No. 89,952, for \$2,500 was issued in 1872 and paid in 1882, to A. T. H. BALL, Esq., Barrister, Galt, whose opinion is expressed in another of same amount, for another ten years.

No. 92,785, for \$5,000 was issued in 1872, and paid in 1882 to JAMES W. GALLO, Esq., Wholesale Merchant, Toronto, found a profitable investment, and repeated for another ten years.

The late SAMUEL PETERS, Esq., C.E., of London, Ont., held one of these Endowment Bonds, issued last December, for \$4,000. It cost him only \$443 to leave \$4,000 to his estate.

An additional sum of \$100,000 has just been deposited with the Government at Ottawa, making the ETNA's total deposit there \$3,255,000.

Write to the undersigned, Toronto, for further information respecting Endowment Insurance, or see an Agent of the ETNA LIFE.

WILLIAM H. ORR, Manager.

The Highest Amount of Nourishment in the Most Digestible and Convenient Form.

## THE ONLY FOOD SPECIALLY PREPARED FOR INFANTS.

"The Adult CANNOT thrive on the Milk provided for the Infant, while the food adapted for Adults MUST be too strong for Babes."

Abounding in FLESH-FORMING and BONE-FORMING substances, this FOOD perfectly fulfils its object, whereas other so-called Foods, such as Corn Flours, being entirely devoid of nourishing properties, induces rickety and idiotic condition. It is also carefully freed from the ground husks of the wheat, which cause irritation of the bowels, diarrhoea, &c.

**CAUTION.**—A Genuine Food should not contain an excess of Sugar, NOR BE TOO PALPABLY SWEET. Such Foods may be palatable, but they are also pernicious. For this reason so called Milk Foods, Condensed Milks, &c. are prejudicial to the health of Infants, from the large proportion of beet sugar they contain, rendering them utterly unlike the article they are supposed to represent, viz., MOTHER'S MILK.

## ASTHMA, DIFFICULT BREATHING, &c. DATURA TATULA INHALATIONS

AFFORD THE MOST PROMPT AND EFFECTUAL RELIEF.

Spasmodic Asthma, as well as the milder forms of the disease, and other complaints attended with short and difficult breathing, loss of rest, &c., quickly yield to the soothing influence of the fumes of Datura Tatula, and painful paroxysms are either averted or quickly subdued by its use in either of the following forms:

Cigars and Cigarettes, Boxes, 3s. 6s., 15s. Pastilles and Powder (for Non-Smoker use)—Boxes, 2s. 6d., 5s., 10s. For use as Tobacco—Tins, 2s. 6d., 5s., 10s., 15s.

## THE SPECIAL NUTRIMENT—PANCREATIC EMULSION IN CONSUMPTION.

Loss of Weight, Loss of Power to Digest and Assimilate Food and especially Fat.

"FAT IS ONE OF THE MOST ESSENTIAL ELEMENTS OF HEALTH."

*Dr. DOBELL on Loss of Weight, Lung Disease, &c.*

PANCREATIC EMULSION or Solid Fat "supplies the system with what it most wants, a large amount of nourishment with the least amount of digestive labour, and in a form most easily assimilated."

PANCREATIC EMULSION has been in extensive use for the last 20 years at the ROYAL HOSPITAL for DISEASES OF THE CHEST, LONDON, and also at many similar Public Institutions in London and the Country, as well as in private practice in all parts of the world.

"From 1863 to 1872, at the ROYAL HOSPITAL alone, I prescribed the Emulsion in more than 6,000 cases. Happily, to my own experience may now be added that of thousands of my professional brethren in different parts of the world, by whom Pancreatic Emulsion and Pancreature are daily prescribed and from whom I constantly receive testimony of their value."—DR. DOBELL, Senior Physician, Royal Hospital, &c.

"We have lately seen a young lady who has been taking PANCREATIC EMULSION for months, and while doing so she has been changed from a thin, nervous desponding creature, into a plump, tolerably robust and cheerful woman."—Dublin Quarterly Journal of Medical Science.

"Considering how largely PANCREATIC EMULSION is now used in the wasting diseases of adults, it is not surprising that scarcely a week passes but general practitioners relate cases of its success in the wasting delicate children. Certainly, of all the satisfactory effects of PANCREATIC EMULSION, none equal the almost magical recoveries of some of these children."—The Practitioner, London.
