He was also at the battle of Waterloo, where he eminently distinguished himself. He wrote the "History of the Coldstream Guards," a work containing much interesting information. Died, 1836, aged 46.

MACKINTOSH, Sir JAMES, a celebrated British statesman and historian, was born in Inverness, in 1766. His father, Captain Mackintosh, intended him for the medical profession, and conferred on him an excellent education. In 1787, after taking his degree of M. D. at Edinburgh, he visited the continent. He preferred, however, the study of law to that of medicine; and, after the death of his father, devoted himself entirely to study for the bar. The French revolution, which had just then commenced, gave a new impulse to his mind, and political and legislative became the paramount objects of his attention. In conjunction with other partisans of reform, he published several works in advocacy of this cause, especially his "Vindicia Gallicæ," or defence of the French revolution, against the strictures and accusations of Edmund Burke. In 1799 he was appointed lecturer of Lincoln's Inn, where, in his splendid course of lectures on the Law of Nature and Nations, he exhibited himself as an uncompromising censor of the doctrines he had approved in the "Vindicia Gallicæ." It was Sir James Mackintosh who undertook the defence of the emigrant, M. Peltier, for a libel on Buonaparte in the *Ambigu*; and his address, eloquence, and profound knowledge of the law contributed greatly to lighten the penalty imposed on his client. Shortly after this, in 1803, he was appointed recorder of Bombay; and his administration there rendered him highly popular, especially his able protection of the rights of native and British subjects. He also established a Literary Society there, and became its president. On returning to England, he was elected member of parliament for Nairn; and, from this time, co-operated with the popular party. In 1816-17, he opposed the green-bag and spy system—con-ferred with Lord Milton in a motion for reducing the army—voted with Lord Althorp against the severe restrictions of the Alien Bill, and against Lord Castlereagh's measures generally. In 1818 he made his first celebrated motion for amending the criminal laws. During the Cauning administration of 1827, Sir James acted in concurrence with the premier, and held office for a short time, but went out on its dissolution; and, on the fall of the Wellington ministry in 1830, joined Lord Grey's, which succeeded it, as president of the India board. Besides the "Vindicia Gallicæ," Sir James Mackintosh published "The Regency Question," "Discourses on the Study of the Law of Nature and Nations," and a "History of England," of which he completed only 2 vols. Continued by Wallace and Bell it forms 10 vols. of Lardner's Cabinet Cyclopaedia. The portrait of Sir James Mackintosh, painted by Sir T. Lawrence, is now in the National Portrait Gallery. He was also an extensive contributor to the Edinburgh Review, and his essays and reviews have been published separately. Died, 1832.

MACKLIN, CHARLES, a celebrated actor and dramatist, whose real name was Mac Laughlin, was born in the county Westmeath, Ireland, in 1690. He came to London, and appeared at the theatre in Lincoln's Inn Fields, in 1725; but it was not till 1741 that he established his reputation, by his admirable performance of *Shylock*. He continued on the stage until 1789; but, during the last years of his life, his understanding became impaired, and he died in 1797, at the patriarchal age of 107. His "Man of the World," a comedy, exposes meanness, sycophancy, and political servility, with considerable skill; and his "Lovo à la Mode," was a very popular farce. During his long continuance on the stage he experienced the usual vicissitudes of theatrical life; but he was a zealous supporter of the rights of his professional brethren, and, though dictatorial and irascible, a most entertaining companion, and a steady friend.

MACKNIGHT, JAMES, a learned Scottish divine, was born in 1721, at Irvine, in Argyleshire; and was ordained minister of Maybole, where he composed his "Harmony of the Gospels" and his "New Translation of the Epistles." In 1772, he became one of the ministers of Edinburgh, and was employed nearly 30 years in the execution of his last and greatest work, viz. "New Translation from the Greek of all the Apostolical Epistles," with commentaries and notes. Died, 1800.

MACLAINE, ARCHIBALD, a learned divine, born at Monaghan, in Ireland, where his father was a dissenting minister, is advantageously known by his "Letters to Some of the *Jenyns* on his View of the Internal Evidence of Christianity," his translation of Mosheim's Ecclesiastical History, and a volume of sermons. Died, 1804.

MACLAURIN, COLIN, an eminent mathematician, who was born at Kilmoddan, in Scotland, in 1698, and educated at the university of Glasgow, where he applied himself assiduously to the study of the mathematics. In 1717 he obtained the mathematical professorship in the Marischal College of Aberdeen, and in 1725 was elected assistant professor of mathematics at Edinburgh. In 1734 he entered the lists against Berkeley, and produced his excellent "Treatise on Fluxions." He also wrote several papers in the Philosophical Transactions; a treatise, entitled "Geometria Organica," another on "Algebra," and "An Account of Sir Isaac Newton's Philosophical Discoveries." In the rebellion of 1745 he took so active a part in fortifying Edinburgh, that when the Pretender approached with his forces, Mr MacLaurin deemed it prudent to retire to York, where he was entertained by Archbishop Herring, in whose palace he died, in 1746.

MACLEAN, L. E. [LONDON, L. E.]
M'NICOL, Dr DONALD, a Celtic antiquary, well known as the author of "Remarks on Johnson's Journey to the Hebrides," was born at the farm of Socob, in the parish of Clachnaryart, in 1735. He was minister of Saddle and Shipness, previous to his translation to Lismore and Appin, to which united parishes he was admitted minister on the

15th July, 1766. Dr M'Nicol was 'deeply versed in Gaelic literature and antiquities, as his "Remarks" so amply testify. The great research and thorough knowledge of his subject, added to the keen spirit of satire which pervades every line, rendered him a match for the "literary Colossus," Dr Johnson, whose otherwise vigorous intellect was obscured by the mists of prejudice and a total ignorance of Scotland and the Scotch. Died, 1802.

MACNISH, ROBERT, M.D. and LL.D., better known as "the modern Pythagorean" (the name affixed to most of his contributions to magazines), was born in Glasgow, 1802. Though enjoying considerable practice as a physician, he found leisure to engage in literary pursuits; and his "Anatomy of Drunkenness," "Philosophy of Sleep," "Metempsychosis," and "Book of Aphorisms," gained for him a high place among the thoughtful writers of his age. Died, 1837.

MACPHERSON, JAMES, distinguished for his translations or imitations of ancient Gaelic poems, was born at Kingcastle, in Inverness, in 1738. Having, in 1760, produced "Fragments of Ancient Poetry, translated from the Gaelic or Erse Language," they were so well received, that a subscription was formed to enable the author to collect additional specimens of national poetry. The result of his researches was "Fingal, an Ancient Epic Poem, in six books," together with several other poems (professedly translated from originals), by Ossian, the son of Fingal, a Gaelic prince of the 3rd century, and his contemporaries. Dr Johnson treated him as an impostor, and a violent controversy ensued concerning their authenticity. From the evidence of the contending parties, it may be concluded, that Macpherson's prose epics were founded on traditional narratives current among the Highlanders; but the date of the oldest of their lays is comparatively modern; and it is now impossible to ascertain the precise extent of his obligations to the Gaelic bards of former ages. In 1764 he accompanied Governor Johnstone to Florida, as secretary. After his return he translated the Iliad into Ossianic prose; wrote a "History of Great Britain, from the Restoration to the Accession of the House of Hanover," and also employed his pen in vindicating the measures of government during the American war. He was afterwards appointed agent to the nabob of Aroot, became a member of parliament, and died in 1796.

MACROBIUS, AURELIUS AMBROSIVS THEODOSIVS, a Latin author in the reign of the Emperor Theodosius. He held the consular dignity; and was the author of a miscellaneous work, entitled "Saturnalia," curious for its criticisms, and valuable for the light it throws upon the manners and customs of antiquity. He wrote other works, of which his commentary on Cicero's "Somnium Scipionis," and an epitome of a grammatical work, have come down to us.

MADAN, MARTIN, an English divine, was born in 1726, and was educated for the bar, but took orders, and became a popular preacher at the Lock chapel, till, by publishing an apology for polygamy, in a work en-

titled "Thelyphthora," he lost his popularity, and retired from the pulpit. He was also the author of "A Commentary on the Articles of the Church of England," a "Treatise on the Christian Faith," and the translator of Juvenal and Persius. Died, 1790.

MADDEN, Dr SAMUEL, an Irish clergyman, born in 1687, and educated at Trinity College, Dublin, where he introduced the scheme for promoting learning by premiums at the quarterly examinations. In 1732 he published the first volume of "Memoirs of the Twentieth Century, or Original Letters of State under George the Sixth;" which was intended to form 6 vols. This work had excited considerable notice, and been brought out with extraordinary despatch, but the rapidity with which it was bought up, was still more surprising, 900 out of the 1000 copies that were printed being recalled and destroyed within a week of its publication. He founded a society at Dublin for the advancement of the arts, in 1740, similar to that which was afterwards established in London. In 1744 he published "Houster's Monument," a poem; and a play, entitled "Themistocles." Died, 1765.

MADDIX, ISAAC, an English prelate, was born in London, in 1697. Being left an orphan, he was taken under the care of a relation, who placed him with a pastry-cook; but he soon left that situation, and went to Scotland with a view of obtaining at St Andrew's a cheap but solid education, and eventually becoming a minister of the kirk. The tenets and discipline of Presbyterianism, however, not being congenial with his sentiments, he returned to England, entered at Queen's College, Cambridge, was episcopally ordained, and rose so rapidly, that in 1733 he was made dean of Wells. In 1736 he was consecrated bishop of St Asaph; whence, in 1743, he was translated to Worcester, where he died in 1759. Bishop Maddox published "A Vindication of the Church of England," in answer to Neal's History of the Puritans; and 14 occasional sermons.

MADERNO, CARLO, an Italian architect of the 16th century, appointed by Pope Paul V. to complete St Peter's, at Rome; in the execution of which he has been charged with committing some important errors. He was, however, in high repute, and built the Maffei palace, and many other public edifices at Rome. Born, 1556; died, 1629.

MADISON, JAMES, 4th president of the United States of America, was born in Virginia, in 1751. His education was of the best description, and for a time he devoted himself to the study of the law. He was only 21 when he was first invested with public employment, in which he soon distinguished himself by his zeal and ability; and as a member of congress, he was remarked for his fluency and eloquence. Attaching himself to Jefferson, he became secretary of state under that president; and, on the death of Jefferson in 1809, being appointed to succeed him, he made an inaugural address, which was inclined against the federal party. A few days after, he published an order in council, forbidding all communication with England and France, until those powers had

revoked their decrees. An embargo laid on the exports of England, to make the blockade complete, and the negotiation of the frigate attack, coast of the out between. ntil those powers had

revoked their orders in council and Berlin
decrees. At the same time, he took off the
embargo laid on all foreign vessels but those
of England and France, and took measures
to make the American flag respected. France
complied, but England did not: fruitless
negotiations followed; till, in 1811, a British
frigate attacked an American frigate on the
coast of the United States, and war broke
out between the contending parties in 1812.
In 1813, Congress re-appointed Mr Madison
to the presidency, and approved his mea-
sures with regard to England. Russia offered
her mediation between the belligerents; but
the right of search, the abandonment of
which was claimed by America, and refused
by England, was a constant obstacle. At
length, on the fall of Napoleon, in 1814, Mr
Madison, considering that England, strength-
ened by that event, would be less likely than
ever to sacrifice the point, declined to press
it as a *sine qua non*. Negotiations were
opened at Ghent, and closed again in con-
sequence of the American envoy (Gallatin)
declaring the conditions demanded by Eng-
land humiliating. The war was resumed;
the British fleet scoured the American coast,
made descents in various places, and took
and burned Washington, the capital. Not-
withstanding these misfortunes, and the
sincerity of the Federalists, he retained the
presidency till 1817, when peace was for-
mally concluded and ratified with England.
He then retired from office with a high re-
putation for ability and integrity. Died,
June, 1836.

MADOX, THOMAS, a legal antiquary and
historiographer, who published, in 1702,
"A Collection of Charters taken from the
Originals," with the title of "Formulare
Anglicanum." In 1711 appeared "The His-
tory and Antiquities of the Exchequer,"
folio; which was followed by his "Firma
Burgi, or Historical Essay concerning the
Cities, Towns, and Boroughs of England."
After his death, a collection of his manu-
scripts, occupying 96 volumes, was presented
by his widow to the British Museum.

MÆCENAS, GAIUS CILNIUS, the friend
and minister of Augustus, and the patron
of Virgil and Horace, was a Roman knight,
and traced his genealogy from the ancient
Etrurian kings. He has been described as
a pattern of every political virtue, and a most
generous patron of the sciences, and a most
luxurious and effeminate. Though
relaxation, he was vigilant and active in
business, and well understood how to em-
ploy the favours of fortune. Many pleasant
and useful qualities gained him the con-
fidence of Augustus, who employed him in
negotiations with Antony, and during the
civil war which ended with the battle of
Actium, left the government in his hands.
Mæcenus subsequently shared with Agrippa
the administration of state affairs. He re-
sided in B. C. 16, having lost the favour of
his master, and died in the year of Rome
715, and 5 B. C. So signal were his good
offices towards literary genius, that the
name of Mæcenus has since become synon-
ymous with that of a liberal patron.

MAES, NICOLAS. (MAAS.)
MAESTLINUS, MICHAEL, a celebrated

German astronomer, was born in the duchy
of Wurtemberg, about 1542. He went to
Italy, where he became intimate with Gal-
ileo; and on his return to Germany he was
chosen professor of mathematics at Tübing-
gen, where he had Kepler for a pupil. He
published many mathematical and astron-
omical works, and died in 1590.

MAFFEI, FRANCIACO SCIPIONE, Marquis,
an eminent Italian writer, was born in 1676,
at Verona; and was educated at the college
of nobles at Parma. He entered the army,
and distinguished himself as a volunteer at
the battle of Donauwert, in 1704; but, at the
end of the campaign, quitted the service,
and devoted himself to literature. In 1733
he set out on a tour through France, Eng-
land, Holland, and Germany, returning to
Verona in 1737. While in England he was
admitted to the Royal Society. Among his
works are, the tragedy of "Merope," a
"History of Diplomacy," "Museum Veron-
ense," and "Verona Illustrata." Maffei
took a leading part in establishing the
"Giornale del Letterati." Died, 1755.

There were several other learned Italians of
the name of Maffei, but better known by
their Latin denomination of MAFFÆUS.

MEGOTO, a native of Lodi; author of "Epi-
grams," "Essays," and a "Supplement to
Virgil," which he called the 13th book of the
Æneid. Julius Scaliger and Gerard Vossius
declared him a great poet. Born, 1407; died,
1459.—BERNARDINO, a learned cardinal,
who died at Rome, in 1553, aged 40. He
wrote a "Commentary on Cicero's Epistles,"
and a "Treatise on Medals and Inscriptions."

—GIOVANNI PIERO, a learned Jesuit, was
born at Bergamo in 1536, and died at Tivoli
in 1603. He wrote the "Life of Ignatius
Loyola," a "History of the Indies," and
other works, in the purest Latin.

MAGALHAENS. [MAGELLAN.]

MAGEE, WILLIAM, a learned Irish pre-
late and a theological writer, was born in
humble life, and admitted as aliar at Dublin
university. He was soon distinguished for
his scholastic attainments; and in 1806, be-
came a senior fellow of Trinity College, and
professor of mathematics. In 1801 he pub-
lished his celebrated "Discourses on the
Scriptural Doctrines of the Atonement and
Sacrifice," 2 vols.; a work directed against
the tenets of the Unitarians. By this he added
much to his former reputation; and he was,
in 1818, advanced to the deanery of Cork;
in 1819 he was consecrated bishop of Rap-
phoe; and, in 1822, translated to the see of
Dublin. Died, 1831, aged 66.

MAGELLAN, or MAGALHAENS, FER-
DINAND, a celebrated Portuguese naviga-
tor, who, in 1519, discovered and passed the
straits which have since been called by his
name. His services not being valued by his
own country, he offered them to Charles V.
of Spain, who intrusted him with a fleet de-
stined to attempt a westward passage to the
Moluccas; hence his discovery. He was
slain in 1521, in a skirmish with the natives
of one of the Philippine Islands.

MAGENDIE, FRANÇOIS, an eminent
French physician, was born at Bordeaux in
1783. He was a pupil of the anatomist Boyer,
but subsequently devoted his attention

chiefly to medicine and physiology. About 1804 he was appointed demonstrator of anatomy at the Faculty of Medicine, and later, physician to the Hotel Dieu. He contributed greatly to the progress of physiology by his numerous and laborious experiments; investigating the functions of the brain and special nerves, the absorption and action of poisons, the properties of certain kinds of food, absorbing power of the veins, &c.; and making some important discoveries. He practised vivisection to a great extent, and was restrained by the French government. Among his works are—"Formulaire pour la Préparation et Emploi de plusieurs Nouveaux Médicaments;" "Elémens de Physiologie;" "Leçons sur les Phénomènes Physiques de la Vie;" "Leçons sur le Sang," &c. He was chosen professor of anatomy at the College of France in 1831; was also a member of the Academy of Sciences and a commander of the Legion of Honour. He was founder and editor of the "Journal de Physiologie Expérimentale," and contributed to various medical and other dictionaries. Died, 1855.

MAGINN, WILLIAM, LL.D., one of the most fertile and versatile writers of modern times, was born at Cork, in 1793. Under the careful tuition of his father, he made such rapid progress that he was enabled to enter Trinity College, Dublin, when only 10 years of age! Gifted with a fertile fancy, and great classical learning, he made literature his profession, and having contributed various papers to the Literary Gazette, and, under a feigned name, to Blackwood's Magazine, he settled for nearly three years in Edinburgh; and Blackwood's Magazine owed much of its wit, eloquence, learning, and fun to "Sir Morgan O'Doherty." He visited London for the first time in 1823, and settling there, wrote so much, and for such a variety of works, that the attempt to enumerate all of them would be hopeless. In spite of the harassing demands upon him as a periodical contributor, he at this time wrote the striking romance entitled "Whitehall." About the year 1828, Dr Maginn became sub-editor of the Standard, in which his profound, various, and ever-ready learning made him a formidable opponent to the Liberals and Ultra-liberals, and gave the paper a proportionate degree of power and influence. While thus engaged, and while writing a multitude of light papers for a host of minor publications, he also contributed to Fraser's Magazine. Here he wrote a caustic review of a "fashionable" novel, entitled Berkely Castle. The author took offence, and, in company with a friend, committed a most merciless assault upon Mr Fraser. Aroused by this ill-treatment of his friend and publisher, Dr Maginn instantly offered the offended author satisfaction, and a hostile meeting took place. The duel proved a bloodless one, but it was very near having a different result, the doctor being hit on the heel of his boot, and his opponent on the collar of his coat. To vast learning, eloquence, fancy, and wit, the doctor added a perfectly boyish good humour and joviality. His friends had to regret that in his case, as in so many other cases, worldly common

sense was not added to genius, yet it is but right to say that the principal cause of the pecuniary embarrassment which embittered the last years of his life arose, not from self-indulgence, but from his indiscriminate kindness to others. Lenned among the learned, witty among the witty, gentle and unassuming as a child among men of less ability, he was crushing in his sarcastic scorn against all whom he deemed enemies of the altar and the throne. Died, August, 1842, aged 49.

MAGLIABECCHI, ANTONIO, a learned critic, whose eccentric habits were almost as extraordinary as his varied erudition, was born at Florence, in 1633. He was placed, when a boy, as servant to a dealer in fruit, or, as others say, with a goldsmith, in which situation he discovered such a propensity to letters, that a bookseller took him into his employment, where his talents and memory made him so much talked of, that the grand-duke, Cosmo III., appointed him his librarian. His attention was wholly absorbed by his books; among them he took his rest and meals; nor could he be persuaded to leave his old apartment for one more commodious which the duke had provided for him. A threadbare cloak served him for a garment by day, and a covering at night; he had one straw chair for his table, another to sleep on, and the only luxury in which he indulged was smoking. He left no literary work deserving of particular notice; but he freely afforded information to those authors who sought his advice or assistance. He bequeathed the valuable library which he had formed to the city of Florence, where it still perpetuates his name. Died, 1714, aged 81.

MAGNEUS, ARNAS, Icelandic historian and antiquary, was born in 1663, and at the age of 20 was sent to study at the university of Copenhagen. He afterwards visited Norway, and spent two years at Leipsic; was named keeper of the archives at Copenhagen, in 1710, and soon after professor of history. He collected a valuable library, especially of manuscripts illustrating Scandinavian history, most of which were burnt in the great fire of 1728. He had before that period been appointed assistant-librarian to the university. Died, 1730.

MAGNAN, D., an accomplished French antiquary and numismatist; born in 1731, died in 1800. His "Ville de Rome," 4 vols. folio, with 425 plates, is a superb work.

MAGNENTIUS, a German, who rose, from being a private soldier, to the first employments in the empire. The Emperor Constantine had a great esteem for him, and in a mutiny among the troops delivered him from the fury of the soldiers by covering him with his robe. Magnentius murdered his benefactor in 350, and assumed the title of emperor; but Constantius II. avenged the death of his brother, and after a bloody battle took Magnentius prisoner, and put him to death at Lyons, in 353.

MAHMOUD II., sultan of Turkey, succeeded to the imperial throne in the year 1808, on the murder, by the janizaries, of his predecessor, Mustapha IV. The murder of that prince impressed Mahmoud with a pain-

ful sense of safety and one brother the scars were pretext standing of Sultan directing frightful ing no political ilious pe most com fastness make fo upon th when h fatal bo learned deady a an exten ticipate in his er fortunate. 1812, cos of Mold further puly h the sulve converte monarch dicat e Mahmou MAHO MAHO the Otto nopic, w about 143 father's months t He succe his fathr his reign nopic, w May, 143 trenches the East XII., fei buried w the city age and establish allowed t He had converted donia we was succe Scanderb besieged in mense lo conquest pire of 7 since 120 Caramani quered th of the Ta prepared Rhodes, t and began fence, cor

The murder of ahmoud with a pain-

ful sense of the incompatibility of his own safety with the existence of the Janizaries; and one of his first acts was to put his own brother to death, to deprive that body, and the scarcely less formidable priests, of a pretext for open rebellion. The Janizaries were cut off to a man, Mahmoud himself standing within the railing of the mosque of Sultan Achmet on the hippodrome, directing as well as witnessing that most frightful massacre. Daring, subtle, allowing no moral considerations to weigh against political expediency, he subdued his rebellious pachas by force or fraud, as he found most convenient. If some distant and secure fastness rendered it next to impossible to make force available, honours were heaped upon the intended victim; and it was only when he reached Constantinople, and the fatal bowstring was at his throat, that he learned that Mahmoud's smile could be as deadly as his frown. Though successful to an extent that could scarcely have been anticipated, in bringing about internal changes in his empire, he was externally far less fortunate. His war with Russia, from 1809 to 1812, cost him Bessarabia, and no small part of Moldavia. The Greek revolution still further diminished his empire, and still further increased the confidence of his turbulent vassal of Egypt, who, if European policy had not brought European friends to the sultan's side, would not merely have converted his pachalic into an independent monarchy, but had been in a condition to dictate further concessions to the son of Mahmoud the Reformer. Died, 1840.

MAHOMET. [MOHAMMED.]

MAHOMET (MOHAMMED) II., sultan of the Ottomans, and conqueror of Constantinople, was son of Amurath II., and was born about 1430. He was proclaimed sultan on his father's retirement, in 1445, but in a few months the sceptre was resumed by Amurath. He succeeded to the throne on the death of his father, in 1451, and in the third year of his reign undertook the siege of Constantinople, which he took by storm on the 29th May, 1453, after fifty-eight days of open trenches; thus overthrowing the empire of the East. The last emperor, Constantine XII., fell bravely in the breach, and was buried with imperial honours. Three days the city was given up to the horrors of pillage and massacre; and then the conqueror established order, set free the prisoners, and allowed the conquered freedom of worship. He had the great church of Santa Sophia converted into a mosque. Thrace and Macedonia were soon subdued. In Albania he was successfully resisted by the famous Scanderbeg; and at Belgrade, which he besieged in July, 1456, was defeated with immense loss by Huniades. He made the conquest of the Morea in 1458; of the empire of Trebisond, ruled by the Comneni since 1204, in 1461; afterwards, Lesbos, Caramania, and Negropont. In 1476 he conquered the Crimea and appointed a khan of the Tatars as his tributary. In 1480 he prepared a formidable expedition against Rhodes, then held by the knights of St John, and began the siege in May. But the defence, conducted by the grand-master d'Au-

bussou, was heroic, and the siege was raised in August. Mahomet II. died in Bithynia, in May, 1481. "This prince," says a French historian, "the terror of Europe, overthrew two empires, conquered twelve kingdoms, and took from the Christians more than two hundred towns. He had received from nature excellent qualities, a robust constitution, a quick intellect, fertile in resource and apt for studies; but never prince was more lacking in the qualities of a good man. He knew neither faith nor law, cared nothing for integrity, and laughed at all religions, not excepting that of the prophet."

MAHOMET (MOHAMMED) IV., sultan of the Ottomans, succeeded to the throne on the murder of his father, Ibrahim, in 1649. He was but seven years old, and for some years anarchy prevailed; but order was restored on the appointment of Kioprili to the post of grand vizir. His greater son, Achmet Kioprili, filled the same post after him; and under them the Turkish arms were mostly victorious. The sultan gave himself up to a life of idle pleasure, and neglected public affairs. The leading events of his reign were the battle of St Gothard, at which the Turks were defeated by Montecuculi; the termination of the siege of Candia; war with Poland, in which Sobieski won several victories over the Turks; and in 1683 the siege of Vienna by the grand vizir Kara Mustapha and its deliverance by Sobieski and the duke of Lorraine. In 1687 general discontent led to the deposition of Mahomet IV., who, after five years of confinement, died, in 1693.

MAI, ANGELO, Cardinal, librarian of the Vatican, and one of the most distinguished scholars of the age, was born in 1782. He was a native of Bergamo, and at the age of 17 entered the Society of Jesuits, afterwards became a priest, and in 1808 settled at Milan, where he obtained a post in the celebrated Ambrosian Library. He there applied himself with singular zeal and patience to the decipherment and publication of the *palimpsest* (erased and re-written) manuscripts. Among the works he recovered were some fragments of the Orations of Cicero; letters of Fronto, the teacher of the Emperor Marcus Aurelius; writings of Philo, Porphyry, &c. In 1819 Mai was called to Rome, and appointed chief librarian of the Vatican, where he continued his important and unweary labours. He held the office of secretary of the Propaganda from 1833—1838, was then created cardinal, and had afterwards several other high offices, among them, that of librarian of the Roman church. The principal publications of this laborious scholar are—the "Republic" of Cicero, with a commentary; a vast collection of ancient writers from the codices of the Vatican, in 10 vols. 4to; another, of classical authors, in 10 vols. 8vo; a third, of Roman writers, of equal extent; and a fourth, of the Fathers, in 6 vols. 4to. The text of the precious Vatican Codex of the Bible was printed under his superintendence, but he died before its publication, in September, 1854.

MAIANO, BENEDETTO DA, a distinguished Italian sculptor and architect, was born at Florence in 1442. He was the son of a

mason, and at first worked in wooden mosaic. He made two cabinets for Matthias Corvinus, king of Hungary, and on presenting them in person found they had fallen to pieces from the damp. This decided him to work thenceforth in more durable material, and he applied himself to sculpture and architecture. He designed the Palazzo Strozzi, which was begun in 1489. In the next year he went to Naples, and was employed by the duke of Calabria and the Count di Terranova, for the latter of whom he executed a bas-relief of the Annunciation. Among his best works are the pulpit of Santa Croce at Florence, the altar of San Savino at Faenza, the monument to Filippo Strozzi at Florence, and the shrine of San Bartolo at San Gimignano. Died, 1497.

MAIANO, GIULIANO, Italian sculptor and architect, was elder brother of the preceding, and was born at Florence in 1432. He entered the service of the duke of Calabria, afterwards Alfonso XI., and lived for the most part at Naples, where he built the Porta Capuana, and the palace of Poggio Reale. He assisted Benedetto in some of his works, and was employed at Rome, Florence, and other cities. Died, 1490.

MAIGNAN, EMANUEL, an eminent mathematician and philosopher, was born at Toulouse, in 1601. He entered into the society of Minims, and acquired such celebrity as a mathematician, that his superiors called him to Rome, to take upon him a professorship, in 1636. He returned, in 1650, to Toulouse, where he became provincial of his order, and refused all higher preferments. He wrote "De Perspectiva Horaria," and "A Course of Philosophy," 4 vols. Died, 1676.

MAILLARD, OLIVER, was an eccentric French ecclesiastic, of the 15th century. His sermons were distinguished by their gross and ridiculous denunciations against those who might happen to offend him. Having glanced in one of them at some traits in the character of Louis XI., the king, who had just established the post in France, sent him word that he would have him thrown into the Seine. "The king is master," he replied; "but tell him that I shall get to heaven by water sooner than he will by his post-horses." Died, 1502.

MAILLEBOIS, JEAN BAPTISTE FRANÇOIS DESMARETS, Marquis of, marshal of France, was born at Paris in 1682. He was grandson of the great minister, Colbert. He entered the army at 21, and served under Marshal Villars; distinguished himself at the siege of Lille, and was named lieutenant-general in 1731. In 1739 he subdued Corsica, and two years later was created marshal. He was afterwards employed in Italy; became governor of Alsace in 1748, and died at Paris in 1762.

MAILLET, BENEDICT DE, a whimsical but ingenious French writer, born at Lorraine, in 1659. He successively became consul in Egypt and at Leghorn, and died in 1738. His principal work, "Tellamed" (the anagram of his name), contains a singular system of cosmogony, in which he maintains that all the land of the globe was originally covered with water, and that every species

of animal, man included, owes its origin to the sea.

MAIMBOURG, LOUIS, a celebrated French ecclesiastical historian, was born at Nancy, in Lorraine, in 1620. He entered into the Society of Jesuits; but having written a treatise in defence of the rights of the Gallican church against the see of Rome, he was expelled the order. Louis XIV., however, made him ample amends by giving him a pension. His chief works are, "A History of Arrianism," 2 vols.; "A History of the Iconoclasts," "A History of the Crusades," and Histories of Calvinism and Lutheranism. Died, 1686.

MAIMONIDES, or BEN MAIMON, MOSES, rabbi of the most celebrated of the Jewish rabbis, called by the Jews the "eagle of the doctors," and the "lamp of Israel," was born, in 1131, at Cordova; became the pupil and the friend of the famous Averroes; was profoundly versed in all the learning of the age, became chief physician to the sultan of Egypt, and died in 1204. His chief work is the "Moreh Nevochim," or "Guide of the Perplexed," originally written in Arabic, and containing explanations of obscure places in Scripture. It has been translated into Hebrew, Latin, French, and English.

MAINTENON, FRANCES D'AUBIGNÉ, Marchioness of, who rose to share the throne of France, was born in the prison of Niort, where her father, Constans d'Aubigné, was confined, in 1635. On his release he went with his family to Martinico, and died there in 1646, leaving his widow so poor, that she returned to Europe without this child, who was sent after her to France, and there taken under the protection of her aunt, Madame Villette, who brought her up in the Protestant persuasion; from which, owing to the interference of her mother, a strict Catholic, she was afterwards converted. Subsequently being left in very reduced circumstances, she married the celebrated poet and novelist, Scarron. On his death, in 1660, she obtained the continuance of his pension, through the interest of Madame de Montespan, who also appointed her governess of the children which she had by Louis XIV. This connection brought her under the observation of the monarch, who increased her pension; and in 1679 changed her name to Maintenon, giving her an estate with that title. Becoming fond of her society, he gradually passed from intimacy to love; Montespan was supplanted; and La Chaise, his confessor, having advised him to sanction his wishes by a secret but formal marriage, it was solemnized in 1683. After her elevation she lived in a sort of retirement from the world. Louis visited her several times a day; and transacted business with his ministers in her apartments, while she read or otherwise employed herself. The king, who sometimes teased her with his ill-humour, endeavoured to atone for this by proofs of his esteem such as he had never shown to any other woman. But she feared to attract the notice of the nation, and would receive nothing more than the estate of Maintenon, with a pension of 48,000 livres. Having founded the school at St Cyr, for the education of poor girls of good family, she re-

MAINZER, Dr JOSEPH, was born at Trèves, 1801. After a careful and liberal education in the college of Trèves, he entered on his apprenticeship in the coal-fields of Dutweiler and Sultzbach as a mining engineer. But the labour was too severe for his strength, and he was obliged to return home and abandon the career of a practical engineer. From his earliest childhood he had exhibited a marked predilection for music, and had during his college life studied the science with great assiduity, and he decided upon following it as a profession. He studied with success under Kinck, organist to the grand-duke of Darmstadt, scholar of Kittel, the last pupil of Sebastian Bach. He afterwards proceeded to Munich and Vienna, where he exercised himself under the two celebrated composers, the Chevalier Seyfried and the Abbé Stadler. At Rome he was admitted to the school of the Abbé Baini, the director of the Pontifical chapel. After an absence of two years, he returned to his native place, and turned his attention to the development of his new system of teaching music, which he had long since conceived, and which now began to attract attention in Germany. In 1830 he went to Paris, where he soon found a field for his plan of teaching and popularizing music; but the police became jealous of his ascendancy, and invited him to close his singing school in the Place de l'Estrapade—an invitation which he was not free to refuse. During his residence in Paris, Mainzer was a regular contributor to the "Revue des Deux Mondes," the "Revue du Nord," "La Balance," published by Bérner, and for six years he was the *réducteur* of the musical department of the "National." His contributions were much esteemed both in France and Germany, and he was the Paris correspondent of the "Musical Gazette" of Leipzig. In 1844 he came to England, where he found an ample field for his scheme of teaching singing to the masses. Soon afterwards he established himself in Scotland; and in 1848 he definitely took up his abode in Manchester, where he laboured with great assiduity and success till his death, in 1851. He left a great number of works in almost every style of composition. Much of the religious music is very good; but the preference must be given to his elementary works, as in those he excelled.

MAISTRE, JOSEPH, Count de, a distinguished supporter of absolutism and the papacy, was born at Chambéry, in Savoy, 1755. Driven by the invasion of the French from his native country, he went to Turin, whence, after publishing his first work, he was sent by the king of Sardinia as minister plenipotentiary to St Petersburg, where he remained till 1817, when he was recalled to Piedmont, where he became minister of state, in 1818. His literary career began in 1796, with his work entitled "Considérations sur la France," in which he combated the

revolutionary doctrines then in vogue. In 1810 appeared his "Essai sur le Principe Générateur des Institutions Politiques;" and ten years later he published his most celebrated work, "Du Pape," the best defence, perhaps, of papal infallibility that has appeared in modern times. Besides these he wrote "Soirées de Saint Petersburg," and "Examen Critique de la Philosophie de Bacon," both posthumous publications. Died, 1821.—His younger brother, XAVIER, who also went to St Petersburg during the revolutionary period, gained great celebrity by his "Voyage autour de ma Chambre," "Le Lepreux de la Cité d'Aoste," "Le Prisonnier du Caucase," and "Prascovie," the last being an interesting narrative of filial devotion on the part of a young Siberian girl.

MAISTRE, LOUIS ISAAC LE. [SACY.]
MAITANI, LORENZO, a distinguished Italian architect, born at Sienna. His great work is the cathedral of Orvieto, which he commenced in 1290, and with the assistance of a large body of Florentine and Siennese sculptors, architects, and painters, brought to a completion in 1330. The façade was adorned with numerous sculptures, which Maitani, occupied with the direction of the whole vast work, could hardly have executed himself, nor is it now possible to ascertain whose works they are. Died at Orvieto, 1330.

MAITLAND, Sir RICHARD, an early Scottish poet, distinguished also as a lawyer and a statesman, was born in 1496. He held the office of a lord of session, and in that capacity he took the title of Lord Lethington, from his estate. He was appointed keeper of the privy seal, in the reign of Queen Mary; which office, as well as his judicial seat, he resigned a few years after, and died in 1586. He made a valuable collection of early Scottish poetry. His own poems were published by the Maitland Club in 1830.—WILLIAM MAITLAND, of Lethington, the eldest son of Sir Richard, was made secretary of state to Mary queen of Scots. He soon, however, joined the reformers, and was appointed a lord of session in 1566.—JOHN MAITLAND, second son of Sir Richard, succeeded his father in the office of lord privy seal, and lost it through his attachment to the interests of the queen. He was afterwards secretary to James VI., and at length chancellor of Scotland. In 1589 he attended the king on his voyage to Norway, where his bride, the princess of Denmark, was detained by contrary winds. The marriage was immediately consummated; and they returned with the queen to Copenhagen, where they spent the ensuing winter. In 1590 he was created Lord Maitland, of Thirlstane. Towards the end of the year 1592, the chancellor incurred the queen's displeasure, for refusing to relinquish his lordship of Musselburgh, which she claimed as being a part of that of Dunfermline. He absented himself for some time from court; but was at length restored to favour, and died in 1595. Besides his Scottish poetry in the Maitland collection, he wrote several Latin epigrams, &c., to be found in the *Deliciae Poetarum Scotorum*.

MAITLAND, Rear-admiral Sir FREDERICK LEWIS, the third son of a rear-admiral, was born in 1779, and commenced his naval career at a very early age. Leaving the narration of his first exploits, we come to the period of the expedition to Egypt in 1801, when we find Captain Maitland commanding the armed launches employed to cover the landing of Sir Ralph Abercrombie's army, for which he received the thanks of the naval and military commanders-in-chief. His subsequent successes while cruising in the Mediterranean as captain of the Loire, of 46 guns, brought him into general notice, and in 1813 he was appointed to the command of the Goliath, and subsequently to the Bellerophon of 74 guns, in which ship he was sent to watch that part of the French coast off Rochefort. It was there that he happily frustrated the hopes of escape which Napoleon, after the events of the battle of Waterloo, had indulged in, by refusing to grant him terms of any sort; and the fugitive at length resolved to throw himself on the generosity of "the most powerful, the most constant, and the most generous of his enemies." He accordingly surrendered unconditionally to Captain Maitland on the 15th of July. The Bellerophon arrived in nine days after Buonaparte's surrender, and from thence proceeded to Plymouth, off which port he was removed to the Northumberland on the 7th of August, having previously proposed to present Captain Maitland with his portrait set with diamonds, of the value of 3000 guineas, which offer was politely declined. He was afterwards appointed to the command of the Vengeur, of 74 guns, subsequently attained the rank of rear-admiral; and on the 30th of December, 1839, died in the East Indies, of which station he had for several years been commander-in-chief.

MAITLAND, JOHN. [LAUDERDALE, Duke of.]

MAITLAND, WILLIAM, historian and topographer, was born about 1693, at Brechin, in Forfarshire. He was originally a travelling hair-merchant, but turned his talents to literature, gained a competent fortune, and became a member of the Royal and Antiquarian Societies. He wrote a "History of London," a "History of Edinburgh," and "The History and Antiquities of Scotland." Died, 1757.

MAITTAIRE, MICHAEL, a learned critic and bibliographer, was born in France, in 1668. His parents having fled to England, to avoid the persecutions in his native country, he was educated at Westminster School, and Christchurch College, Oxford; of the former of which he became for some time second master. His editions of Greek and Latin classics are numerous, and valuable for their accuracy; but his chief work is his "Annales Typographiques et Artis Inventionis," 5 vols. 4to. Died, 1747.

MAJOR, JOHN, a Scotch divine and historian, was born near North Berwick, in 1469. He was educated at Paris, where, as a doctor of the Sorbonne, he taught theology about 15 years, in 1519 became professor of divinity at St Andrew's, again went to Paris, and finally returned to St Andrew's,

where he spent the last 20 years of his life. He wrote in Latin some Commentaries, both philosophical and biblical, and a "History of Scotland," &c. Major had among his pupils Buchanan the poet and historian, and John Knox the reformer. Died, 1550.

MAJORIANUS, JULIUS VALERIUS, emperor of the West, was raised to the throne in 457. He made war against the Vandals with success, and drove Genseric from Italy. But the great fleet which he prepared for the invasion of Africa was burnt by the Vandals. He governed with equity and prudence, made excellent laws, and might probably have longer averted the fall of the western empire, had he not been deposed and murdered in 461, after a reign of less than four years. ♀

MALCOLM, Sir JOHN, a distinguished military officer and diplomatist, was born near Langholm, Scotland, in 1769. At the age of 14 he went out as a cadet to India; and, being placed under the care of his maternal uncle, Dr Paisley, he soon acquired an intimate acquaintance with the manners of the natives, and with the Persian language. The first service of any importance in which he was engaged, was the siege of Seringapatam, in 1792, where he attracted the notice of Lord Cornwallis. In 1794, the state of his health requiring a change of climate and a temporary relaxation from the active duties of his profession, he revisited his native country; but he returned to India the following year, and having shown great skill in minor situations of responsibility, he was not only appointed to the command of the regular troops belonging to the Nizam, but had the charge of all the supplies from the Deccan. After the termination of the Mysore war, Captain Malcolm was sent on a mission to Persia, and concluded an important commercial and political treaty with that court. In 1804 he concluded a treaty of alliance with Dostah Rao Scindia; and continued to display great judgment as the diplomatic agent of the British government in India for several subsequent years. In 1807, intelligence having been received that the French designed to invade India through Persia, Malcolm (then a lieutenant-colonel) was invested with plenipotentiary powers in Persia, the Persian Gulf, and Turkish Arabia; but he was at that time unable to accomplish the object of his mission; and it was not till 1810 that he succeeded in establishing satisfactory political and commercial relations between his country and Persia. He had now attained the rank of brigadier-general, and on his return to England, in 1812, he received the honour of knighthood. In 1817 he again went out to India; and in the war that followed the defection of the peishwa, his undaunted gallantry in the field, and the admirable tact he displayed in the subsequent negotiations, obtained the highest praise from Lord Hastings, and was universally acknowledged at home. Many brilliant exploits and important services continued to be performed by this able officer, till he quitted the theatre of action in 1822, with a determination to spend the evening of his life in

years of his life. He was secretary, both to the Emperor and to the King, and a "History of the Empire" was published by him among his other works. He died, 1550.

VALERIUS, emperor of the Vandals, was born in Italy. But he was prepared for the throne by the Vandals. His prudence and prudence might probably have preserved the western empire from falling into the hands of the Vandals.

A distinguished French philosopher, was born in 1769. At the age of 17 he went to India; and the care of his mother soon acquired with the manners of the Persians. He was of any importance in the siege of Mulla. In 1794, the change of opinion, he revisited India, and returned to India, showing great responsibility, and to the command of the army of the South. He was the terminus of the Persian, and co-ordinator of political.

In 1804 he was with Dostiah Rao to displace the British agent of the India for several years. He succeeded his father as president of the Court of Aids; besides which he had the superintendence of the press, in which office he acted with great lenity and justice. In 1774, on the abolition of the parliaments, Malesherbes was banished to his country-seat; but he was recalled three years afterwards, reinstated as president, and made minister of state, which post he soon resigned, and then went to Switzerland. In 1787 he was again called to the councils of his sovereign, Louis XVI., when he drew up two memoirs, "On the Calamities of France, and the Means of repairing them;" but his advice was rejected, and he retired to his country-house, where he employed himself in agricultural pursuits. He never hastened of his own accord, to plead the cause of his sovereign in 1792; and he was one of the last who took leave of him before his execution. This generous attachment to a fallen master excited the jealousy of the French rulers, and caused his destruction. Shortly after his return home, his daughter, Madame De Rosambo, and her husband were arrested, and conducted to Paris; and his own arrest, with that of his grandchild,

his native country; but by the earnest solicitations of the Court of Directors and his majesty's ministers, in 1827, he once more resumed his duties, accepting the high and responsible situation of governor of Bombay, which post he continued to fill till 1831, when he finally returned to England, and sat in parliament for the borough of Llan-castion. As an author, Sir John Malcolm also attained considerable celebrity, by his "History of Persia," a very valuable work, based on original Persian authorities, and the author's personal observation, "Sketches of Persia," "Memoirs of Central India," "The Administration of British India," &c. He died in 1833. A monument was erected to him in Westminster Abbey. His "Life and Correspondence" has been published by J. W. Kaye.

MALEBRANCHÉ NICOLAS, a celebrated French philosopher, was born at Paris, in 1639; and at the age of twenty-two, being determined to embrace the monastic life, was admitted into the congregation of the Oratory. His attention was first directed to metaphysics by perusing Descartes' Treatise on Man, and he immediately became a devoted partisan of the Cartesian philosophy. His famous Treatise "On the Search after Truth," was first printed in 1673, and is principally distinguished by the maintenance of a mysterious union between God and the soul of man, and the doctrine that the human mind immediately perceives God, and sees all things in him. Malebranche also wrote several other works, among which are, a "Treatise on Nature and Grace," "Christian Conversations," and "Dialogues on Metaphysics and Religion." He was highly venerated for his elevated genius, and nothing could be more amiable and simple than his conversation and manners. Died, 1715.

MALESHERBES, CHRÉTIEN GUILLAUME DE LAMOIGNON DE, an eminent French statesman, was born at Paris, in 1721. He succeeded his father as president of the Court of Aids; besides which he had the superintendence of the press, in which office he acted with great lenity and justice. In 1774, on the abolition of the parliaments, Malesherbes was banished to his country-seat; but he was recalled three years afterwards, reinstated as president, and made minister of state, which post he soon resigned, and then went to Switzerland. In 1787 he was again called to the councils of his sovereign, Louis XVI., when he drew up two memoirs, "On the Calamities of France, and the Means of repairing them;" but his advice was rejected, and he retired to his country-house, where he employed himself in agricultural pursuits. He never hastened of his own accord, to plead the cause of his sovereign in 1792; and he was one of the last who took leave of him before his execution. This generous attachment to a fallen master excited the jealousy of the French rulers, and caused his destruction. Shortly after his return home, his daughter, Madame De Rosambo, and her husband were arrested, and conducted to Paris; and his own arrest, with that of his grandchild,

family were extirpated by the merciless proscription of his persecutors. Malesherbes was beheaded, April 22, 1794, and bore his sufferings with a spirit worthy of his virtuous and honourable life. He was admitted to the Academy of Sciences in 1750, later to the Academy of Inscriptions, and in 1775 to the French Academy. He left several works on topics of the time, on agriculture and natural history.

MALHERBE, FRANÇOIS DE, a French poet, was born at Caen, about 1555; bore arms in the troops of the League, was pensioned by Henry IV., and died in 1628. His works consist of paraphrases on the Psalms, sonnets, odes, and epigrams. He also translated some of Seneca's letters; and may be considered as one of the first who gave to French poetry its polish and regularity; but he was as lax in morals and religion as he was rigid in his zeal for the purity of the French language.

MALIBRAN DE BERIOT, MARIA FELICITA, a celebrated singer, was the eldest daughter of Manuel Garcia, a well-known tenor singer of the Italian Opera, and was born in Paris, in 1808. She was brought to London by her parents when eight years old, and made music her unceasing study. Being sustained by a temperament of singular energy and vivacity, she was enabled, at the early age of 16, to make her *début* as *prima donna* at the opera. This was in 1825. During the following year she accompanied her father to America, where her union with M. Malibran, an elderly French merchant at New York, took place. Shortly after their marriage, her husband failed, and was thrown into prison; and Madame Malibran, believing she had been deceived, separated from him, and voluntarily giving into the hands of his creditors her marriage settlement, returned to Europe. Intense study, the love of her art, and the motives she had for exertion, had already made her a performer of unrivalled excellence. The Parisian audiences were perfectly enraptured, and every night she concluded her performances amid a thunder of applause and a shower of flowers. From Paris she came to London, where she shone with increased lustre, through the brilliant season of 1829, in the characters of *Rosina*, *Tancredi*, *Desdemona*, *Semiramide*, *Zerlina*, and *Ninetta*. Her widely extended reputation now occupied the attention of musical society throughout Europe; and after traversing incredible distances to fulfil different engagements, and receiving vast sums for her performances, she revisited England in 1835. She made her first appearance at Covent Garden, in an English version of "La Sonnambula," on the 18th of May. Her thorough knowledge of the English language, her full-toned pronunciation, and her high dramatic talent, combined with her wonderful voice, had the effect of enchantment. But it was not merely at the theatre that her brilliant talents were displayed; her nerve and spirit appeared to be unconquerable; her magic tones were heard at the numerous royal and noble entertainments to which she was invited, and at the concerts of professors; in short, such was

her perseverance, that, after her astonishing exertions in the evening, she often rose by five o'clock the next morning, and practised for several hours those miraculous chromatic passages by which audiences were again to be electrified. In March, 1836, Madame Malibran, then in Paris, having been divorced by the French courts from Monsieur Malibran, was married to Monsieur de Beriot, a Belgian, whose extraordinary ability as a violinist had placed him in the highest rank of his profession. In May following, she resumed her English performances at Drury Lane Theatre; and, at the close of the season, she accompanied her husband to Brussels, and other cities on the continent. But the end of her career was fast approaching. Having been engaged for the Manchester grand musical festival, she arrived in that town on the 11th of September, and, though evidently indisposed, commenced her arduous task the next day. Her illness rapidly increased, and, though she endeavoured to conceal it, by sustaining her part with the apparent vigour of health and unusual energy, she sank under the effort. On Wednesday, the 14th, her last notes in public were heard, in the duet, "Vanne scialberghi in petto," from *Andronico*, with Madame Caradori Allan. It was a desperate struggle with expiring nature; and many who were present declared that they found in Malibran's pealing melody a pathos superior to what they had ever before heard from her. She was immediately bled, and removed to her apartments; but notwithstanding she had the best medical attendance in Manchester, and that of her own physician, Dr Belloumin, the homœopathist, who was immediately sent for from London, she breathed her last on the 23rd of September, 1836, aged 28. There were many noble traits in the character of this accomplished vocalist. Her generosity was unbounded, so that, notwithstanding the immense sums she received, her liberality absorbed all. Of her genius, energy, industry, and high attainments, it is difficult to speak without appearing too eulogistic. In the words of an eminent critic, "she had all the endowment, all the acquisitions, and, above both, all the devotion and concentration of mind, common to those strong and gifted individuals who rise to pre-eminence, whatever the nature of their pursuits."

MALLET, DAVID, whose real name was MALLOTT, poet and miscellaneous writer, was born about 1700, at Crief, in Perthshire. He was tutor to the sons of the duke of Montrose; and, having made the tour of Europe, settled in London, where he altered his name to Mallet, and acquired literary reputation. His first publication was the ballad of "William and Margaret," which was followed by "The Excursion," a poem, and, in 1731, he produced the tragedy of "Eurydice." Soon after this, he formed an acquaintance with Pope, who introduced him to Bolingbroke; and about the same time he was appointed under-secretary to the prince of Wales. In 1739 his play of "Mustapha" was performed with success, and the next year he wrote, in conjunction with Thomson, the masque of "Alfred."

He also published a "Life of Lord Bacon" and the works of Bolingbroke, who left them to him as a legacy, and in whose scepticism he participated. He died in 1765.

MALLET DU PAN, JACQUES, political writer, was born at Geneva, in 1719. After filling the professorship of belles lettres at Cassel with great reputation, he engaged in politics, and continued at Geneva, but under a new title, the "Annales Politiques" of Linguet. He afterwards went to Paris, and there conducted the political part of the "Mercure de France." When the revolution broke out, he espoused the royal cause, and defended it at the risk of his life. Being driven from his country, he came to London, where he published his "Mercure Britannique," and was patronized by government. He also wrote a discourse on the "Influence of Letters upon Philosophy," and another "On Eloquence and Political Systems," "Considerations upon the French Revolution," "Correspondence for a History of French Republicanism," and other works of a similar class. Died, 1800.

MALLET, PAUL HENRI, historian and antiquary, was born at Geneva, in 1730; was successively professor of belles lettres at Copenhagen and at Geneva. Being deprived of his fortune during the first revolutionary war, he for some time received pensions from the landgrave of Hesse and the duke of Brunswick, of which he was deprived by the later war. His merit as an antiquary was very great. Among his works are, "Histories of Denmark, Hesse, the Swiss, the Hanseatic League, and the House of Brunswick, and a work entitled "Edda," on the mythology of the Celts, which Dr Percy translated, under the title of "Northern Antiquities." This translation forms part of Bohn's Antiquarian Library. Died, 1807.

MALMESBURY, WILLIAM OF, an English historian, who flourished in the 12th century, was born in Somersetshire, became a Benedictine monk of Malmesbury, and was elected librarian of the monastery. His writings were very numerous, and his veracity as a chronicler is rated high. His most important works are the "De Gestis Regum Anglorum," a general history of England, in five books, from the arrival of the Saxons, in 449, to the 26th Henry I., in 1126; a continuation of that work entitled "Historia Novella," to the year 1142, and "De Gestis Pontificum Anglorum," from 691 to 1122. Among his other works are biographies of Dunstan, St Patrick, St Wulstan, &c. Died, 1143. His Chronicle of the Kings of England, translated by Sharpe, is published in Bohn's Antiquarian Library.

MALMESBURY, JAMES HARRIS, Earl of, a distinguished diplomatist, the only son of the author of "Hermes," was born at Salisbury, 1746. After a careful education at Winchester and Oxford, he passed some time at Leyden, and in a continental career; and commenced his diplomatic career as secretary of embassy at Madrid, in 1767. Here he displayed such talent and firmness in conducting the transfer of the Falkland Islands to Great Britain, that he was appointed minister at the court of Berlin, and

of Lord Bacon" broke, who left and whose age died in 1765.

from this period, with few interruptions, down to the close of the century, he bore a large share in all the great diplomatic transactions of the time, representing England successively at Petersburg, the Hague, and Paris, and seeing his services rewarded by the order of the Bath, elevation to the peerage, and various other marks of honour. Died, 1820. His "Diaries and Correspondence," published in 1844, throw much light on many of the transactions of the eventful period to which they refer.

MALONE, EDMUND, critic and miscellaneous writer, was the son of an Irish judge, and born at Dublin, in 1741. He studied at Trinity College and the Inner Temple, and in 1767 was called to the Irish bar; but being possessed of an independent fortune, he retired from the profession, and devoted himself to literature. In 1780 he published two supplementary volumes to Stevens's Shakespeare, and in 1790 appeared his own edition of Shakespeare; in 1795 he exposed the imposture of the *Imitators*. As a commentator on Shakespeare, Malone is happily distinguished by good sense, respect for the early texts, and caution in conjecture and alteration. He also published a "Life of Sir Joshua Reynolds," prefixed to his writings; a "Life of Dryden," and a "Biographical Sketch of the Right Hon. William Wyndham." Died, 1812. There is a Life of Malone by Sir James Prior.

MALPIGHI, MARCELLO, an eminent Italian physician and anatomist; born, 1628; died, 1694. He was professor of medicine at Bologna and Pisa, and became first physician to Pope Innocent XII. in 1691. His discoveries in anatomy were considerable, particularly respecting the structure of the skin and the secreting glands; and his merit was very high as a vegetable physiologist.

MALTE-BRUN, CONRAD, one of the most celebrated geographers of modern times, was born in 1773, in the peninsula of Jutland. After studying theology a short time at the university of Copenhagen, he devoted himself to literature and politics. Having given offence by his writings in favour of the liberty of the press, and the enfranchisement of the peasants, he was banished to Sweden in 1796. After having resided for a time at Stockholm, he went to Paris, where he soon acquired great reputation, particularly as a geographer. He edited the foreign political department of the *Journal des Debats*, was a contributor to the *Biographie Universelle*, and produced various works, among these the greatest is the well-known "Précis de la Géographie Universelle," 8 vols. 8vo, was the first volume of which appeared in 1810, and the last after his death in 1829. The first six volumes only were completed by Malte-Brun. Among his other works are "Tableau de la Pologne Ancienne et Moderne," "Annales des Voyages," and the valuable treatise, published in conjunction with Mentelle, "Géographie Mathématique, Physique, et Politique," 16 vols. 8vo. Died, 1826.

MALTHUS, THOMAS ROBERT, F.R.S., the celebrated political economist, was born at Aibury, Surrey, in 1766, and educated at

Cambridge. He was appointed, about 1803, professor of history and political economy in the college of the East India Company at Haileybury, and continued to hold that situation till his death, which occurred in his 70th year. His best known work, the "Essay on the Principle of Population," which gave rise to so much discussion, and excited so much ignorant indignation against its author, first appeared in 1798. It was subsequently enlarged, and passed through many editions.—The Malthusian system is founded on the hypothesis, that population increases in a geometrical, while provisions only increase in an arithmetical, ratio. It proposes to remedy or alleviate the consequent evils and miseries of poverty by a "preventive check," the moral restraint on marriage, dictated by reason and reflection, and adhered to by deliberate and benevolent choice. Malthus was author also of an important "Inquiry into the Nature and Progress of Rent," and numerous other works. Died, at Bath, when on a visit to his relatives, 1835.

MALUS, ETIENNE LOUIS, a French mathematician and experimental philosopher, was born at Paris, in 1775; became a student in the Polytechnic School; and subsequently served as an officer of engineers, on the Rhine, in 1797, and under Buonaparte in Egypt, where he much distinguished himself. After this he entered on a course of experiments on the phenomena of double refraction, and ultimately discovered the polarisation of light. This discovery, the greatest since that of the achromatic telescope, gained him admission into the Institute; he also received the gold medal of the Royal Society of London, and honours flowed in upon him from all quarters. He died in 1812, and was at the time of his death director of the Polytechnic School, and superintendent of fortifications. He left a "Traité d'Optique" and his "Théorie de la double Réfraction."

MAN, JOHANNES DE, a Dutch historical and portrait painter. Born, 1621; died, 1706.

MANBY, GEORGE WILLIAM (*Captain Manby*), was a native of Norfolk, and was born in 1765. He served a short time in the army, in which he had the rank of captain; but his name will be remembered as the inventor of the apparatus for saving the lives of shipwrecked seamen. His method consists of throwing, by means of a mortar, a rope plaited of strips of untanned hides, to the wrecked vessel, and it was first successfully tried at Great Yarmouth in 1808. Much general interest was excited by the invention, and in the course of a few years the apparatus was furnished to above fifty stations on the coasts of Great Britain. Captain Manby was author of several other useful inventions, was rewarded by public grants and the thanks of several sovereigns. He died at Southtown, near Yarmouth, 1854.

MANCHESTER, EDWARD MONTAGUE, Earl of, statesman and general of the Commonwealth, was born in 1602. He was eldest son of Henry, first earl of Manchester. Educated at Cambridge, and created K. B. at the coronation of Charles I., he sat in his first parliament, was several times re-elected,

and was afterwards raised to the peerage by the title of Lord Kimbolton. At the commencement of the civil war he joined the popular party, and by his frankness and liberality made himself a general favourite. He took a command in the parliamentary army, and fought at Edge-Hill in 1642. On the death of his father the same year he succeeded to the earldom, and in 1643 was one of the keepers of the Great Seal. He was placed at the head of the confederation of the Eastern Counties, with Cromwell as lieutenant-general, and defeated the royalists at Horncastle. He contributed to the great victory of Marston Moor, and immediately afterwards besieged and took York. In October of the same year (1644) he fought the second battle of Newbury, the indecisive result of which occasioned general dissatisfaction, and Cromwell gave voice to it in parliament; severely blaming the earl. From that time Manchester leaned more to the king's side, resigned his commission the day before the Self-denying Ordinance was passed, was made speaker of the House of Lords, and opposed the trial of the king. He lived unnoticed during the Commonwealth, and contributed to the restoration of Charles II., who made him lord chamberlain and K.G., and restored him to the Chancellorship of Cambridge university, of which Cromwell had deprived him. Died, 1671.

MANDAR, TROPHILE, born in 1759, was one of the most enthusiastic of the French revolutionists, and as remarkable for his sonorous and powerful eloquence as for his small frame, which he told the Emperor Alexander was like a spark. He had the courage to seek Pétion, and the leading Jacobins, at Danton's house, during the massacre of September, 1792, and at a time that he would propose a dictatorship next day to the Convention, to prevent the further horrible effusion of blood. He produced a number of able works: "Le Génie des Siècles," "La Cité des Sages," "Des Insurrections," and numerous political brochures and translations from the English. He held no office under the Empire, was presented to the Emperor Alexander in 1814, and died in 1823.

MANDER, KAREL VAN. [VAN MANDER.]

MANDEVILLE, SIR JOHN DE, an English traveller, was born at St Alban's about the beginning of the 14th century; left his native country in 1327; spent 34 years in visiting the Holy Land, Egypt, India, and China; and on his return, published an account of his travels. He died at Liège, in 1372. His work, full of most interesting details, freely interspersed with all sorts of wonderful and incredible tales, earned him an extraordinary reputation among his contemporaries, and was soon spread over Europe in various translations. It is published, with other early travels in Palestine, in Bohn's Antiquarian Library.

MANDEVILLE, HERNARD DE, a Dutch physician, was born at Dort, about 1670. He settled in London at the beginning of the 18th century, and published, in 1709, a licentious book, entitled "The Virgin Un-

masked." In 1711 appeared his treatise on "Hypochondria and Hysterical Passions;" but the work by which he is most known is his "Fable of the Bees, or Private Vices made Public Benefits." He was also the author of "An Inquiry into the Origin of Honour," "Free Thoughts on Religion," &c. Died, 1733.

MANES, or MANICHÆUS, the founder of a Christian sect, called, after him, Manichæans, was a native of Persia, and born early in the 3rd century. He was instructed in the Christian religion, and afterwards distinguished himself by attempting to combine its doctrines with those of the Magi. The leading idea of his system is the existence of two creative powers, one good, the other evil. He rejected the Old Testament, and taught that Christ had come to save mankind, and that he himself was the Paraclete announced in the New Testament. He also pretended to the gift of healing; but failing to cure the son of the king of Persia, he was flayed alive, and his body given to the dogs, A.D. 274.

MANETHO, an ancient Egyptian historian, who was high priest of Heliopolis, in the reign of Ptolemy Philadelphus, about 280 B. C. He wrote the history of his country in Greek, and professed to have derived it from ancient sacred inscriptions. His work is no longer extant, but fragments of it are preserved by other writers, from which we learn the names of the Egyptian kings and the length of their reigns through what are called the thirty dynasties, occupying a period of above 3500 years.

MANFRED, regent and afterwards king of Sicily, was a natural son of the Emperor Frederick II. and a noble Lombard lady, and was born about 1235. His father gave him the title of Prince of Tarentum, and at his death, in 1250, named him regent of Sicily during the absence of Conrad, heir to the throne. He quelled the revolts stirred up in Apulia by Pope Innocent IV., the bitter enemy of his father, and on the death of Conrad, in 1254, again became regent during the infancy of Conradino. Another general revolt broke out, but in the course of the two following years Manfred recovered his power: and in 1258, on a report of the death of Conradino, he had himself crowned king at Palermo. He would not resign the crown on learning that the young prince was still living, but promised to leave it to him on his death. Manfred was excommunicated by Alexander IV., and by his successor, Urban IV.: the latter then offering the crown of Sicily to various princes. It was accepted by Charles of Anjou, and the pope proclaimed a crusade against Manfred. Charles was crowned king at Rome in January, 1266, and immediately invaded Naples: the decisive battle was fought near Benevento, and Manfred, through the treachery of his Apulian troops, was defeated and killed, 26th February.

MANLEY, MARY DE LA RIVIERE, was
the daughter of Sir Roger Manley, governor
of Guernsey, who suffered much for his ad-
herence to Charles I. She was left to the
care of a cousin, who seduced and then
abandoned her. Being thus dependent on
her own exertions for support, she was a
short time in the service of the duchess of
Cleveland, and afterwards became a dramatic
and political writer. She wrote, first, "The
Royal Mistress," a very licentious but suc-
cessful tragedy, which made her the centre
of a throng of the wits and roués of the day.
She lost her reputation completely, and after
retiring into the country, wrote her "Memoirs
and Manners of several Persons of the
Quality of both Sexes. From the New At-
lantis, an Island in the Mediterranean." It
is a curious allegorical picture of some fea-
tures and persons of her times, with scandal-
ous filthy details. For the libels contained
in this work she was arrested, but afterwards
admitted to bail; and a Tory administration
succeeding, she lived in high reputation
and gaiety. She was also employed in writ-
ing for Queen Anne's ministry; and when
Swift relinquished the Examiner, she con-
tinued it for a considerable time with great
spirit. She became the mistress of several
profligates in succession, and was authoress
of several other works now forgotten. Died,
1724.

MANLIUS, MARCUS, surnamed CAPITOLINUS, one of the heroes of early Roman history, lived about the close of the 4th century B.C. His story is involved in much doubt. But it is clear that he gained distinction by saving the Capitol from the attack of the Gauls, B.C. 390. Although a patrician, he was the favourite of the plebeians, whose interests he appears to have zealously promoted. He was subsequently charged with treasonable intentions, was reluctantly condemned by the people, and put to death by being thrown down the Tarpeian rock. We have not the means of judging whether the unfavourable verdict of antiquity was just or unjust.

MANLIUS, TILIUS, surnamed TORQUATUS, a famous Roman consul, who, in a war against the Gauls, B.C. 361, accepted a chal-

one of the leaders of the national party. In 1847 he took an active part in promoting the national movement; for this he was, with his friend, Tomaseo, cast into prison, but while awaiting his trial the revolutions of 1848 that burst out at Paris, Naples, and Vienna, found an echo at Venice, and the two prisoners were set at liberty by the people and borne in triumph. The expulsion of the Austrians and the proclamation of the republic immediately followed. During the siege which commenced in the autumn of the same year and lasted twelve months, Manin was at the head of the civil government, and to his counsels and patriotic spirit it was mainly owing that the Venetians maintained so long and brilliant a defence. After the capitulation Manin retired to Paris, where he maintained himself by giving lessons in Italian, and continued in various pamphlets and through the press to advocate the cause of Italian independence. Died, 1857.

MANLEY, MARY DE LA RIVIERE, was the daughter of Sir Roger Manley, governor of Guernsey, who suffered much for his adherence to Charles I. She was left to the care of a cousin, who seduced and then abandoned her. Being thus dependent on her own exertions for support, she was a short time in the service of the duchess of Cleveland, and afterwards became a dramatic and political writer. She wrote, first, "The Royal Mistress," a very licentious but successful tragedy, which made her the centre of a throng of the wits and roués of the day. She lost her reputation completely, and after retiring into the country, wrote her "Memoirs and Manners of several Persons of the Quality of both Sexes. From the New Atlantis, an Island in the Mediterranean." It is a curious allegorical picture of some features and persons of her times, with scandalous filthy details. For the libels contained in this work she was arrested, but afterwards admitted to bail; and a Tory administration succeeding, she lived in high reputation and gaiety. She was also employed in writing for Queen Anne's ministry; and when Swift relinquished the Examiner, she continued it for a considerable time with great spirit. She became the mistress of several profligates in succession, and was authoress of several other works now forgotten. Died, 1724.

MANLIUS, MARCUS, surnamed CAPITOLINUS, one of the heroes of early Roman history, lived about the close of the 4th century B.C. His story is involved in much doubt. But it is clear that he gained distinction by saving the Capitol from the attack of the Gauls, B.C. 390. Although a patrician, he was the favourite of the plebeians, whose interests he appears to have zealously promoted. He was subsequently charged with treasonable intentions, was reluctantly condemned by the people, and put to death by being thrown down the Tarpeian rock. We have not the means of judging whether the unfavourable verdict of antiquity was just or unjust.

MANLIUS, TILIUS, surnamed TORQUATUS, a famous Roman consul, who, in a war against the Gauls, B.C. 361, accepted a chal-

lenge given by one of the enemy, and having slain him, took his collar from his neck, on which account he assumed the name of Torquatus. Being consul B.C. 340, he commanded in the Latin war, and lost his popularity by a judicial act of great severity. Contrary to his order, that no Roman should engage in combat out of the ranks, his son accepted a challenge from one of the enemy. He came off victorious, and laid his trophies at his father's feet. But the consul immediately ordered his son's execution for disobedience. From this example of severity, all edicts of extreme rigour were called "Manliana edicta."

MANNERT, CONRAD, a distinguished German historian and geographer, was born at Altdorf, in Bavaria, 1736, held professorships at Nürnberg, Altdorf, and Landshut, and was at length appointed professor of history in Munich University, where he died in 1834. His chief title to fame rests upon his elaborate "Geography of the Greeks and Romans," which has gone through several editions.

MANNI, DOMENICO MARIA, an eminent Italian printer and antiquary, was born at Florence, in 1690; and died in 1788. His principal works are, "A Series of Florentine Senators," 2 vols. folio; "De Florentinis Inventis Commentarium," "Illustrations of the Decameron of Boccaccio," "Observations on the Seals of the Lower Age," 30 vols. 4to, &c.

MANNING, OWEN, an English antiquary and topographer, was a native of Northamptonshire; was educated at Queen's College, Cambridge; entered into orders, and became a prebendary of Lincoln, and vicar of Godalming. His principal literary labours are, an edition of Edward Lye's Anglo-Saxon and Gothic Dictionary, in 2 vols. folio, and the "History and Antiquities of Surrey," published after his death, in 3 vols. folio. He died, aged 60, in 1801.

MANSART, FRANÇOIS, a French architect, born, 1598; died, 1666. He built several churches, and other public edifices at Paris. — His nephew, JULES-HARDOUIN MANSART, born 1645, was also an excellent architect, and the superintendent of the royal edifices. He built the palaces of Versailles, Marly, and the Great Trianon; the Hospital of the Invalides, &c. Died, 1708.

MANSFELD, ERNST, COUNT VON, a celebrated soldier of fortune, who distinguished himself in the Thirty Years' War, was born at Meehlin, in 1585. In 1618, he took part with the Bohemians in revolt against the Emperor Ferdinand, and promoted the election of Frederick, elector-palatine, as king. He held out some time at Pilsen, and after the loss of that town enlisted in a new army, made a skilful retreat before Tilly into the Lower Palatinate (1621), and then maintained his troops by plunder and contributions in Alsace. He subsequently entered into the service of the Dutch, defeated the Spaniards at Pleurus, and compelled them to raise the siege of Bergen-op Zoom. He obtained for the elector auxiliary forces from England, and had the command of them; but was defeated by Wallenstein, in 1625. He soon after resigned

his command in Germany, and set out for Venice, but died on the way, in Bosnia, 1626.

MANSFIELD, WILLIAM MURRAY, Earl of, lord chief justice of England, was the fourth son of Lord Stormont, and was born at Perth, in 1705. Educated at Westminster School, and the university of Oxford, where he graduated M.A., he was called to the bar at Lincoln's Inn, in 1731. He rapidly made way in his profession, was made solicitor-general in 1743, and the same year entered parliament. In 1754 he became attorney-general, and two years later was raised to the bench as chief justice of England, and created a peer. For a short time he also held the office of chancellor of the exchequer. Lord Mansfield was a very able judge, but he incurred much popular dislike by the doctrines he laid down on some important trials touching the liberty of the press, particularly in the affair of Wilkes; and Junius in his letters assailed him with much bitterness. During the riots in London, in 1780, his house was attacked by the anti-catholic mob, and his books and manuscripts were burnt with it. He was created earl of Mansfield, in 1776, retired from the bench in 1788, and died in 1793. Though in politics Lord Mansfield leaned towards Toryism, he ever firmly maintained the principle of religious toleration; and he left behind him the reputation of a great lawyer, an upright man, a respectable scholar, and a sincere Christian. The fine portrait of this eminent judge, by Copley, is now in the National Portrait Gallery.

MANSI, GIOVANNI DOMENICO, a learned Italian prelate, and an indefatigable antiquary, was born at Lucca, in 1692. He was several years professor of divinity at Naples, and in 1765 was made archbishop of Lucca, where he died in 1769. His principal works are, a Latin translation of Calmet's "History of the Bible," with additions; "De Veteri et Nova Ecclesie Disciplina," "Commentaries on the Bible," 17 vols.; an edition of the "Annals" of Baronius, 30 vols. folio; another of the "Councils," 30 vols.; an edition of the "Orations" of Aeneas Sylvius, 2 vols.; and one of the "Bibliotheca Latina Media et Infimae Aetatis" of Fabricius, 6 vols. 4to.

MANT, RICHARD, bishop of Down, Connor, and Dromore, was born at Southampton, where his father was rector of the church of All Saints, 1776. He was educated at Winchester and Oxford, where he gained the chancellor's prize for an English essay "On Commerce," 1799; and, after taking his degree of M.A., he travelled for some time on the continent; on his return from which he became successively curate at Buriton, and Sparsholt, in Hampshire. In 1810 he was presented to the vicarage of Great Coggeshall, in Essex; and the sermons which he preached at the Bampton Lecture, in 1812, having attracted general attention, he rose rapidly in the church. In 1815, he became rector of St Botolph's, Bishopsgate Street, and, three years later, vicar of East Horsley, Surrey. In 1820 he was consecrated bishop of Killaloe, and translated to the see of Down and Connor in 1823; the care of

the diocese of Dromore devolving upon him in 1842, on the death of the last bishop, Dr Laurie. During his long life, Dr Mart was constantly engaged in authorship, chiefly on subjects connected with his professional duties. A mere catalogue of his various sermons, tracts, and charges, occupies nearly four columns of the Gentleman's Magazine for January, 1849; but perhaps those which have gained him greatest celebrity are, the edition of the Bible with notes and commentaries, which he prepared in conjunction with Dr D'Oyley, and several tracts printed by the Society for promoting Christian Knowledge, such as "A Step in the Temple," &c., "Romanism and Holy Scripture compared," "The Churches of Rome and England compared." Died, 1848.

MANTEGNA, ANDREA, an eminent Italian painter, was born near Padua, in 1431, and studied under Squarcione. In 1468 he entered the service of the marquis of Mantua, and settled in that city, where he executed his principal works. Among others, the series, now at Hampton Court, representing the "Triumph of Julius Caesar." He went to Rome also, and painted in the Vatican, for Innocent VIII. Mantegna is also distinguished as one of the earliest Italian engravers. The National Gallery has one fine specimen of this master, "The Virgin and Child enthroned; St John the Baptist, and the Magdalen." Died, 1506.

MANTELL, GIDEON A., LL.D., F.R.S., the popular writer on geology, was born at Lewes in 1790. At an early age he evinced a great aptitude for knowledge; and after the usual elementary education at a private school, he showed a predilection for the medical profession, the practice of which he entered upon and continued with great success till 1835, when he removed, first to Brighton, then to Clapham, and lastly to London. But it is chiefly as a student of Natural History, and as a geologist, that Dr Mantell is remembered. His "Organic Remains of a former World," "The Wonders of Geology," "The Medals of Creation," "Thoughts on a Pebble," and many other works on his favourite sciences, will show at once the extent of his acquirements and his assiduous application. Dr Mantell was also highly esteemed as a lecturer. He disposed of his geological collection to the British Museum for £500, and in 1831 he received a pension from the crown. Died, 1852.

MANUANO, [GHISI.]
MANUEL COMNENUS, emperor of the East, born 1120, was the younger son of the Emperor John Comnenus, whom he succeeded to the prejudice of his brother Isaac, in 1143. His long reign was almost a continual succession of wars. He obtained several victories over the Sultan of Iconium, in the year of his accession; the next year carried on war with Raymond, prince of Antioch; and in 1147, on the arrival of the crusaders at Constantinople, under the Emperor Conrad, and Louis VII. of France, he is charged with having flattered the Germans with promises, and by treacherous guides led them on to destruction. The French were received with great honours. Roger II., king of Sicily, having invaded

devolving upon him of the last bishop, Dr Mart was the authorship, chiefly on his professional side of his various lectures, occupies nearly the whole of the Magazine perhaps those which are the most celebrated, and which are noted and compared in conjunction with several tracts printed and reprinted, Christian Step in the Temple and Holy Scripture of Rome and died, 1848.

MAN, an eminent Italian painter, born in Padua, in 1511, and died in 1570. He was the marquis of Mantua, where he was born. Among others, he painted the Court, representing Julius Caesar, and the battle of Mantua. Mantegna is one of the earliest masters of the Italian school. He painted the St John the Evangelist. Died, 1506.

MAN, A. LL.D., F.R.S., a geologist, was born in 1791. He had an early age he devoted to knowledge; he received a liberal education at the University of Cambridge, and he practised the law, but he continued with great industry to study geology, and he was removed, first to the University of Cambridge, and lastly to the University of London, where he received a Ph.D. in 1852.

MAN, emperor of the Romans, the younger son of the emperor Augustus, whom he succeeded in 14 B.C. His brother Isaac, who was almost a co-emperor, was almost a co-emperor. He obtained the throne of Pontus; the next year he was crowned, and he was the first of the Emperors of the East. He was deposed by treacherous soldiers, and he was destroyed. He had several children, and he was succeeded by his son, who had invaded

Greece and carried off immense spoil, Manuel made war on him, and took Corfu. Reports of the Servians and Hungarians afterwards occupied him, and in 1168, he made an unsuccessful expedition to Egypt. In 1176, he was again at war with the Turks, with alternate defeat and victory. Died, 1180. Like his predecessors, Manuel assumed to be arbiter in theological controversies, and deposition or exile was the common penalty of resistance to his will.

MANUELL PALEOLOGUS, emperor of the East, second son of the Emperor John Palaeologus I., was born in 1318, was associated with his father in the empire in 1373, and at the time of his father's death, in 1391, was a hostage at the court of the Sultan Bajazet. He made his escape, and was received as emperor at Constantinople. Bajazet soon after besieged that city, but was compelled to retire. He besieged it again in 1397, and in the following year Marshal Boucault arrived with a French fleet to succour the Greek emperor. At the close of 1399, terms were agreed on between Manuel and Bajazet; but the former refused to keep them, and the latter prepared for a third siege, when the progress of Tamerlane called him to another scene of war. In 1400 Manuel, as a last resource, visited the West, in the hope of obtaining efficient aid against the Turks. He was received with the highest honours and a respectful pity in the principal cities of Italy, was welcomed at Paris by Charles VI., his princes, and nobles, chancellor and parliament: was lodged in the Louvre, and allowed freedom of worship after the rites of the Greek church. From France he passed over to England, where he was entertained by the monks of Canterbury, was met by Henry IV. on Blackheath, and remained in London some days. He returned through France, Germany and Italy, offending the pope by neglecting the Jubilee and its plenary indulgence, and arrived in Greece in 1402; his purpose having completely failed. A treaty of peace, which he concluded with the Sultan Solymann I., was observed by the two next successors of Solymann; but in 1423, Constantinople was besieged by Amurath II., who made use of cannon and destroyed the suburbs of the city. But the siege was raised, and in 1425, a treaty of peace was made. Manuel died in July of the same year, having retired into a monastery and taken the habit of a monk two days before his death. Among his sons were John Paleologus, his successor, and Constantine Dracoses, the last emperor of the East.

MANUEL, JACQUES ANTOINE, one of the most eloquent and intrepid defenders of French liberty, was born in 1775, at Barcolette, in the department of the Lower Alps. He entered the army as a volunteer, in 1793, and rose to the rank of captain. After the peace of Campo Formio, he quitted the army, studied law, was admitted to the bar at Aix, and soon acquired a high reputation for talent. In 1815 he was elected to the Chamber of Deputies evoked by Napoleon, after whose abdication he strenuously contended for the rights of his son. In 1818 he was elected a member of the Chamber of Depu-

ties by two departments, and became one of the most formidable opponents of the ministers. He was ardent in the cause of the party to which he had attached himself; but having used some violent expressions in his first speech, in the session of 1823, on the subject of the Spanish war, his expulsion was loudly demanded, the result of which was that a body of the *gendarmes* was introduced to arrest him. Manuel was again chosen to the Chamber of Deputies in 1824, and died in 1827.

MANUEL, NICOLAS, a Swiss painter, poet, and reformer, was born at Berne, in 1184. He studied painting, first at Colmar, and afterwards at Venice, under Titian, and was employed in the monastery of his native city to paint a series of pictures entitled the "Dance of Death." His works, however, have perished, and in his latter life Manuel became a soldier, took an active part in public affairs, and especially distinguished himself as a promoter of the Reformation. His writings consist of various controversial tracts, "Moralities and Mysteries," and popular songs. Died, 1530. An account of his Life and Works by Grönlund appeared in 1827.

MANUEL, FRANCISCO, a celebrated Portuguese lyric poet, born at Lisbon, in 1731. He was the author of many odes, and other poems, was compelled to fly from his country to avoid the Inquisition, and died at Versailles, in 1819.

MANI TIUS, ALDUS. [ALDUS.] MAP (erroneously called MAPES), WALTER, or CALENIUS, archdeacon of Oxford, a Welsh scholar and satirist of the 12th century, studied at the university of Paris, and became a favourite at the court of Henry II. He obtained various church preferments, was charged with a political mission to the court of Louis VII. of France, attended the Lateran Council of 1179, and was named archdeacon of Oxford, in 1196. He was in earnest as a preacher, a great wit, who spared nothing that was base, full of good stories, and a busy man of the world. Friend of Becket and Giraldus Cambrensis, assistant probably of Geoffrey of Monmouth in collecting and preserving the old legends of the Kymry (whence he was called Geoffrey's "familiar"), he is even believed by recent critics to have contributed to the Arthurian cycle of Romance the romances of the Quest of the Saint Grial, of Lancelot, and the Mort Artus. Map was author of a curious book entitled "De Nugis Curialium," "a note book of events of the day," says Mr Morley, "that were discussed among the courtiers . . . the gossip of the court, as it passed through the head of the best man at the court, and came out blended with his own right touches of satire or reflection." It was edited by Mr Thomas Wright for the Camden Society in 1850. To Map are also attributed some Latin poems, which have also been published by the Camden Society, under the same editorship. Among the most remarkable are the satirical "Apocalypse," and "Confession," of Bishop Gollin. The famous drinking-song, so generally misunderstood, and the occasion of a false conception of Map's character, forms part of

the Confession. The poems include a rhymed description of Wales. The most recent account of this remarkable man, is in Morley's "English Writers; the Writers before Chaucer," Bk I. ch. xvi.

MARA, ELIZABETH, celebrated singer, whose maiden name was Schmeiling, was born in 1750, at Cassel, in Germany. She commenced her musical education by playing on the violin, but as she grew up, she cultivated her vocal talents, and attained an almost unrivalled degree of excellence. On her arrival at Berlin she sang before Frederick the Great, and charmed him, though he had previously declared that he should as soon expect pleasure from the neighing of a horse as from a German singer. She afterwards visited Italy, Switzerland, England, France, and Russia. Madame Mara left England in 1802, and went to reside in Russia; and when that country was invaded by Napoleon in 1812, she lost her property at the conflagration of Moscow. About the beginning of 1820 she revisited England, and gave a concert at the Opera House; but age had weakened her powers. She died at Revel, in 1833, aged 82.

MARAT, JEAN PAUL, one of the chiefs of the French revolution, was born in 1744, at Baudry, in the province of Neuchâtel, in Switzerland. In his youth he applied himself to the study of medicine and anatomy; and settling in Paris, attracted notice as an empiric and vendor of medicines. But his ambition led him to desire a more extensive popularity, and he wrote a work, in 1775, which had for its title, "Man, or the Principles and Laws of the Influence of the Soul and the Body on each other." When the revolution began he savagely supported it, denouncing aristocrats and preaching massacre. He joined Danton's Club of the Cordeliers, and published a daily paper, called "L'Ami du Peuple," in which he disseminated his hatred towards royalty, and insulted the nobility and the most distinguished members of the National Assembly. He was chosen deputy to the National Convention, where his violence and extravagance led to his arrest, but he was acquitted. He was also president of the Jacobin Club, and first suggested the creation of the committee of Public Safety and the passing of the law of the "suspects." He denounced the generals of the French army as traitors to their country, and put the members of the Convention under arrest. The fall of the Girondists was a triumph for him and his friends, but it led quickly to his own end. It was at this time that Charlotte Corday resolved to rid the world of this monster, and he was stabbed by her, July, 1793. See CORDAY.

MARATTA, or MARAITA, CARLO, an eminent Italian painter, was born in 1625, at Camerino, in the papal territory. He early became a pupil of Andrea Sacchi; and on account of his numerous lovely Madonnas, was named by Salvator Rosa, *Carlo delle Madonne*. He was also a good architect and an engraver; was patronized by six popes, was knighted by Clement XI., who employed him in restoring Raphael's frescoes, and gave him a pension. Died in 1713. —His daughter MARIA, who married

J. B. Zappi, was also a good artist and a poetess.

MARBECK, JOHN, a musician of the 16th century, supposed to have been the first composer of the cathedral service of the Church of England. He was organist at St George's Chapel, Windsor; and author of a "Concordance of the Bible," "The Lives of the Saints, Prophets, and Patriarchs," &c. He was condemned with several friends as a heretic and favourer of the Reformation, but his musical renown saved his life.

MARCELLINUS, AMMIANUS. [AMMIANUS.]

MARCELLO, BENEDETTO, son of a Venetian senator, was born in 1686, and became a great proficient in the science of music. His "Psalmis," an elaborate work, in 8 vols. folio, first appeared in 1724 and 1726. It was reprinted with an English translation about the close of the 18th century. Died in 1739.

MARCELLUS, M. CLAUDIUS, Roman consul and conqueror of Syracuse, was of a plebeian family, and after holding several public offices was created consul B. C. 222. The same year he won a victory over the Insubres, then menacing central Italy, took their capital, Mediolanum (Milan), and killed, with his own hand, their king, Viridomarus, thereby obtaining the *spolia opima*. In the following year he had the honour of a triumph. Sent as praetor to Sicily, in 216, he was recalled after the defeat of the Romans at Cannæ, and opposed Hannibal in Apulia. Named consul a second time in 215, and the third time in 214, he was again sent to Sicily and undertook the siege of Syracuse. The city, defended by the science of Archimedes, was only taken after three years, its great mathematician and engineer was among the slain, and many of the works of art were carried off by Marcellus: a barbarous example afterwards too frequently followed. Marcellus was consul again in 210 and 208, was opposed to Hannibal on several occasions, and in the latter year was killed in an ambush near Venusia. He was then about 60 years of age, and was surnamed for his daring courage "The Sword of Rome."

MARCELT, JANE, miscellaneous writer, wife of Dr Marcelet, an eminent physician and natural philosopher, was born in London in 1769. Her father, F. A. Haldimand, was of Swiss origin, and an eminent merchant in the city. At an early age she manifested a great inclination for scientific pursuits, and in the course of her long life published, in the form of conversations for the instruction of young persons, works on chemistry, political economy, natural philosophy, and vegetable physiology, as well as several books for children, all of which were eminently successful. Dr Whately, archbishop of Dublin, was once heard to say that there were only two persons in England who could write conversations, viz. himself and Mrs Marcelet; and Professor Faraday, whose taste for chemistry was derived from her elementary work on that science, paid her the graceful compliment of inscribing on the first page of several of his publications, presented to her by himself, "From her faithful pupil." Her social

qualities were distinguished by a sense, simplicity, and purity.

MARCIUS, the 2nd Pontus. He was a Christian father, his parents were of the same name. He gave up the world, and entered a monastery.

MARCIUS, the 2nd Pontus. He was a Christian father, his parents were of the same name. He gave up the world, and entered a monastery.

MARCO POLO, an Italian merchant and explorer, was born in Venice in 1254. He accompanied his father, Niccolò Polo, on his expedition to the East, and returned in 1269. He was a great navigator and a great merchant.

MARCONI, GUGLIELMO, an Italian physicist and inventor, was born in Bologna in 1874. He is best known for his work on radio waves, and for his invention of the radio.

MARGARET, a name of several saints and historical figures. One of the most famous is Margaret of Antioch, a young girl who was martyred in the 3rd century.

MARCION, an illustrious Gnostic teacher of the 2nd century, was born at Sinope, in Pontus. He appears to have received the Christian faith at an early age, but whether his parents were Christians is not known. He gave up to the church most of his wealth and entered upon an ascetic life. Excommunicated from the church at Sinope, probably on account of his peculiar dogmatic tendencies, certainly not for unchastity as alleged by his theological adversaries, he went to Rome, where he expected that a better reception would be given to his views. But there again he was excommunicated, and nothing was left for him but to stand alone and gather disciples whence he might. He is said to have attached himself at Rome to the Gnostic teacher Cerdo of Antioch, and to have adopted many of his opinions. It is also alleged that he at last regretted having occasioned a schism, and sought readmission to the church. The starting-point of Marcion's system was his profound conviction of the wholly new and divine truth of Christianity. His aim at starting was to restore Christian faith and worship to their first purity. He sought to take his stand on the very words of Christ and his genuine disciples; considered Paul the only true apostle; rejected traditions, asserted that the received Christian records were falsified and corrupted, opposed all Judaizing and hierarchical tendencies, and rejected the allegorical interpretation of the Scriptures. To his mind there seemed so sharp a contrast between the Old and New Testaments that he maintained the existence of two gods, the God of nature and the old Jewish law, and the God revealed in Christ. He discontenanced marriage, and held that an ascetic life was of the essence of real Christianity. Although Marcion belonged to the Gnostics, he differed from them in this important particular; that he regarded all things on their *practical*, not on their *speculative* side.

MARCO POLO. [POLO.]

MARCOS of Coryncea, was commander of the forces of the Achaean League, in the expedition against the tyrant of Bura; and when, B. C. 255, the constitution of the League was altered, Marcos had the honour of being appointed first annual general or pretor.

MARCO AURELIUS. [AURELIUS.]

MARDONIUS, a celebrated Persian general, son of the satrap Gobryas and cousin of Xerxes, commanded the first Persian armament sent against Greece, B. C. 492, when a storm at Mount Athos destroyed his fleet, and his army was beaten in Macedonia. He accompanied Xerxes in his invasion of Greece, of which he had been the chief promoter; and after the battle of Salamis and the return of Xerxes to Asia Mardonius was left in occupation at Athens, which he held for 10 months. He was defeated by Pausanias, and killed at the battle of Platæa, in September, 479.

MARGARET OF ANJOU, daughter of

Réné d'Anjou, king of Naples, and wife of Henry VI., king of England, was an ambitious, enterprising, courageous woman. She was born about 1425, and was married to Henry VI. in 1445, the marriage being negotiated by the earl of Suffolk. It was very offensive to the duke of Gloucester, one of the young king's guardians, and unpopular because it was accompanied by the giving up of the English possessions in France. The king falling into a state of imbecility, the real power was in Margaret's hands, and to tell her story fully would be to give in great part the history of the civil war which soon broke out between the rival houses of York and Lancaster. Intrepid in the field, she signalled herself by heading her troops in several battles; and if she had not been the occasion of her husband's misfortunes, by pulling to death the duke of Gloucester, his uncle, her name would have been immortalized for the fortitude, activity, and policy with which she supported the rights of her husband and son. The fatal defeat at Tewkesbury, in 1471, however, put an end to all her enterprises; she with the king being taken prisoner, and Prince Edward, their only son, being killed. Margaret was ransomed by Louis XI. in 1475, for 50,000 crowns, and died in Anjou, 1482.

MARGARET OF FRANCE, queen of Navarre, daughter of Henry II., was born in 1552, and ranked as one of the greatest beauties of her age, with talents and accomplishments corresponding to the charms of her person. She married in 1572 Henry, then prince of Béarn, but afterwards Henry IV. of France. It was at the time of the celebration of this marriage at Paris that the massacre of St Bartholomew was perpetrated, and Margaret narrowly escaped. It was a marriage of policy, and not of affection; Margaret was gay and fond of dissipation, and on Henry's accession to the throne, he proposed to dissolve their marriage; to which she consented, on condition of receiving a suitable pension; and, having returned to Paris, lived in great splendour and dissipation till her death, in 1615, at the age of 63. Some very agreeable poems by her are extant, and her "Mémoires" are extremely curious.

MARGARET OF VALOIS, queen of Navarre, and sister to Francis I., king of France, was the daughter of Charles of Orleans, duke of Angoulême, and born in 1492. In 1509 she married Charles, duke of Alençon, who died in 1525. Her next husband was Henry d'Albret, king of Navarre, by whom she had Jeanne d'Albret, mother of Henry IV. She was a beautiful woman, and the most accomplished princess of her age, and was employed by Francis in some important negotiations, which she managed skillfully. She was authoress of some poems, and of a tract, entitled "The Mirror of the Sinful Soul," which was condemned as heretical by the Sorbonne. A volume of tales, entitled "Heptameron, ou Sept Journées de la Reyne de Navarre," which were written by her during the gaiety of youth, are as free in their tendency as those of Boccaccio; and it certainly, at the present day, appears somewhat extraordinary,

that a princess so pious and contemplative as Margaret of Valois should have been their author. Died, 1549.

MARGARITONE, an early Italian painter, sculptor, and architect, was born at Arezzo in 1236. He belonged to what is called the Byzantine school of painting, and lived to see the triumph of the nobler art of Cimabue and Giotto. Very few of his pictures are now extant. One of the best is his "Virgin and Child with Scenes from the Lives of the Saints," formerly in the church of St Margaret at Arezzo, and now in the National Gallery. His best work as sculptor is the monument to Gregory X. at Arezzo. He was employed as architect at Rome, Arezzo, and Ancona. Died at Arezzo, 1315.

MARGRAAF, ANDREW SIGISMUND, an eminent chemist, and director of the Academy of Berlin, was born in that city in 1709. He applied assiduously to mineralogy, which science he enriched by the discovery of the semi-metal, called manganese. He also made several important discoveries in chemistry, among which are the formic acid and beet sugar. Died, 1782.

MARIA DA GLORIA, daughter of the emperor of Brazil, Dom Pedro I., by his first consort, the Archduchess Leopoldine of Austria, was born at Rio de Janeiro, April 4, 1819. On the death of her grandfather, John VI., she was designated successor to the crown of Portugal, by virtue of the act of renunciation executed by Pedro, one of the provisions of which was that, upon coming of age, she should marry her father's brother, Dom Miguel, whom it was desirable to satisfy by such arrangement. When Dom Miguel had accepted of his arrangement, and received the regency, the young queen left Brazil, in 1828, to sail for Europe. Miguel had, meanwhile (June 30, 1822), declared himself absolute king of Portugal, and forbade the queen to land. She was now compelled to come to England, where she was received by the court as lawful queen of Portugal, but found no actual support, the ministry of the day secretly favouring the usurper. In 1829 she returned to Rio Janeiro, with Amelia of Leuchtenberg, her subsequent stepmother, and lived there until 1831, when her father found himself compelled to resign the crown of Brazil to his son Pedro II. She then resided in Paris while her father waged war for her rights in Portugal, and after the taking of Lisbon in September, 1833, she made her entry into that city. Pedro now administered the government as regent and guardian of his daughter. His power, however, was soon exhausted; and when, on the 18th of September, 1834, he announced to the Cortes that he was no longer able to conduct the government, that assembly declared the queen of full age, by which means the intrigues of the competitors for the Regency were defeated. In 1834 she was married to Duke Charles-Auguste-Eugène-Napoleon, of Leuchtenberg, who was made commander of the army, and was likely to become popular, when he died suddenly, March 28, 1835. On the 9th of April, 1836, she was married a second time, to Duke Ferdinand, son of Ferdinand of Saxe-Coburg, who, upon the birth of a

crown prince, was named king. In the course of the next ten years the corruptions of the government, which had fallen into the hands of the Cabrais, the suppression of the liberty of the press, and the increase of taxes, irritated a large portion of the nation. In May, 1846, civil war broke out in the Upper Minho, and was only finally suppressed by the intervention of the British fleet. In 1851, when the Duke de Saldanha carried out a military revolution, Donna Maria yielded with a very bad grace to the necessities of her position. Though of the royal blood of Portugal, she never secured the affections of her people, and her troubled career was an unremitting scene of paltry intrigues at court, and of discontent rising into rebellion throughout the country. Died, 1853.

MARIA LOUISA, ex-empress of the French, wife of Napoleon Buonaparte, was the eldest daughter of Francis I., emperor of Austria, and of his second wife, Maria Theresa of Naples, and was born 1791. In 1810 she was married to the emperor, then in the zenith of his power; in 1811 she presented her husband with a son—afterwards called king of Rome—to the great joy of the French nation; and, in 1813, on his departure to the army, she was nominated regent. In 1814 she refused to accompany Napoleon to Elba on the plea of ill-health; and having obtained, by treaty with the allied powers, the duchies of Parma and Piacenza, &c., she repaired thither with her chamberlain, Count Neipperg, for whom she had conceived an attachment, and whom she subsequently married. Maria Louisa was endowed with considerable talents, which she had cultivated with some care. Her marriage with Napoleon being purely conventional, it is not surprising that, with his well-known domestic qualities, he failed to elicit either her affection or her esteem; but the impartial biographer must still charge her with a selfishness of character and coldness of heart, which the difficulties of her position may perhaps extenuate, but cannot justify. Died, December 18, 1847.

MARIA THERESA, queen of Hungary and Bohemia, archduchess of Austria, and empress of the West, daughter of the Emperor Charles VI., was born at Vienna, 1717, and, in 1736, married Duke Francis Stephen of Lorraine, who, in 1737, became grand-duke of Tuscany. The day after her father's death, in 1740, she ascended the throne of Hungary, Bohemia, and Austria, and declared her husband joint ruler. The elector, Charles Albert of Bavaria, supported by France, laid claim to the Austrian hereditary territories, and the elector of Cologne and the elector-palatine would likewise not acknowledge her succession. Her states were invaded at the same time by Frederick the Great and by the elector of Bavaria; and being compelled to fly to Presburg, she convoked the diet and there threw herself upon the sympathy of her Hungarian subjects; to whom,—according to the beautiful poetic story universally circulated for more than a century, but now, like so many others, proved to be a myth,—with her child in her arms, she made this pathetic address:

"Abandon my cunctations, I will be faithful, I will be a commiserating king." mistfortune and excel Maria Th a calm, n ity and c she gave well-know longer pa main stat meet the l brought l favour w cam: a fa gary, by ferocity, German a time the n and the peace wit that the t the contin duced En Holland of death of of Austria Reverse, belligerent the treaty in 1748, by in her rig turbed by discovered formed fo solved to marched th gan the Se peror Fra press dep joined the Catharine By the dea of Bavaria tween Aus ated in 177 added to th Bavaria. proved sch and grante warded, al ant impro her attent She also church; su abolished t the admiss members o years. "Abandoned by my friends, persecuted by my enemies, attacked by my nearest relations, I have no other resource than in your fidelity, your courage, and your constancy; I commit to your hands the child of your king." The youth, the beauty, and the misfortunes of the queen made a deep impression. The magnates drew their sabres, and exclaimed, "Moriatur pro rege nostro Maria Theresia." Till then she had preserved a calm, majestic demeanour; but their fidelity and courage overcame her feelings, and she gave way to them in tears. Such is the well-known tale; and though it can no longer pass, as it stands, for truth, yet the main statement is true, that the queen did meet the Hungarian Diet—that her baby was brought in—and that the insurrection in her favour was voted with enthusiasm, and became a fact. The troops furnished by Hungary, by their mode of warfare and their ferocity, spread terror at first through the German and French armies. In the mean time the allies quarrelled among themselves, and the king of Prussia made a separate peace with the queen. The general opinion that the balance of Europe depended upon the continuance of the house of Austria, induced England to arm for Maria Theresa; Holland paid her subsidies; and after the death of Cardinal Fleury, in 1743, the cause of Austria triumphed throughout Europe. Reverses, however, followed; and all the belligerents having become desirous of peace, the treaty of Aix-la-Chapelle was concluded in 1748, by which Maria Theresa was secured in her rights. In 1756 this calm was disturbed by the king of Prussia, who, having discovered that secret plans were being formed for a combined attack on him, resolved to be beforehand with his foes, and marched into Saxony and Bohemia, and began the Seven Years' War. In 1765 the Emperor Francis died, which caused the empress deep and lasting distress. In 1772 she joined the king of Prussia and the Empress Catharine in the dismemberment of Poland. By the death of Maximilian Joseph, elector of Bavaria, in 1777, war was rekindled between Austria and Prussia, but was terminated in 1779, by the peace of Teschen, which added to the former state a small portion of Bavaria. Maria Theresa founded and improved schools, universities, and academies, and granted prizes to the students. She rewarded, also, those who made any important improvements in the arts, and turned her attention particularly to agriculture. She also reformed many abuses in the church; suppressed the Inquisition at Milan, abolished the order of Jesuits, and prohibited the admission of individuals of both sexes as members of convents before the age of 25 years. She also abolished the rack in all her states, and died in 1780, aged 63, with a just claim to the reputation of many royal and domestic virtues.

MARIANA, JUAN DE, a celebrated Spanish historian, was born at Talavera, in 1536, entered the society of Jesuits, and was successively professor of theology in their colleges at Rome and at Paris. In 1574 he retired to Toledo, and there devoted himself to literary labours. His chief work, "Historia

de Rebus Hispaniæ," in thirty books, was written in Latin and afterwards translated into Spanish by the author. It was published in 1592, and established his reputation. For veracity, lucid narration, and bold exposure of the crimes of great persons, it deservedly holds a high place. Seven years later appeared his treatise, "De Rege," in which he maintains the justice of killing a tyrant. It excited great clamour, and after the assassination of Henry IV. of France, in 1610, was publicly burnt by order of the parliament of Paris. Mariana wrote other learned works, some of which brought on him a judicial persecution. Died, 1624.

MARIE ANTOINETTE, archduchess of Austria and queen of France, born at Vienna, Nov. 2, 1755, was the daughter of the Emperor Francis I. and the celebrated Maria Theresa. To a beautiful person, and a cultivated mind, she added the charms of gentleness and feminine grace; not, however, without a large measure of courage and decisive energy, making her the worthy daughter of her imperial mother; and when she left Vienna for Versailles, in 1770, when only 15 years of age, to give her hand to the young duke of Berry, afterwards Louis XVI. of France, the capital of her native land was filled with sorrow. When her husband ascended the throne, in 1774, she gained the affections of the people by repeated acts of generosity. It was, however, soon observed that her natural liveliness and freedom of manner brought upon her the scandal of her enemies about the court. An extraordinary occurrence added fresh force to calumny, and tarnished the fair name of the queen. This was the affair of the diamond necklace, in which the Cardinal Louis de Rohan, the great quack Cagliostro, and a certain Countess de Lamotte were the chief actors. The jewellers demanded the payment of an immense price for the necklace, which had been purchased in the name of the queen. In the examination which she demanded, it was proved that she had never ordered it. A lady of her size and complexion had passed herself off for the queen, and at midnight had a meeting with the cardinal in the park of Versailles. Notwithstanding this, the enemies of the queen succeeded in casting a stigma on her; and the credulous people laid every public disaster to her charge. It was certain that she had great influence over the king, and that she constantly opposed such measures of reform as had been proposed. Her unpopularity increased, and the general indignation was raised to the highest pitch by the enthusiastic reception given her at the guards' ball on the 1st Oct., 1789, where the white Bourbon cockades were worn, and the national cockade was trampled under foot. The insurrection of women and the attack on Versailles followed in a few days. To put a stop to the scene of outrage, the king and queen showed themselves, with both their children, in the balcony. This spectacle made a momentary impression; but soon the cry resounded, "No children! the queen—the queen alone!" She instantly put her son and daughter into the arms of the king, and returned to the balcony alone. This

unexpected courage pacified the mob; and their threats were followed by shouts of "Vive la Reine!" It was the queen who advised the flight of the royal family from Paris in June, 1791; which ended in their capture and return. At length came the fatal 10th of August, 1792. Prepared for the worst, the queen exerted all her power to induce the king to meet death sword in hand; but he thought resistance was in vain, and was led, with his consort, before the Legislative Assembly, where she heard his deposition announced, and then accompanied him to the prison of the Temple. There, deprived of every semblance of royalty, and bereft of every comfort, she displayed the magnanimity of a heroine, and the patient endurance of a martyr. In January, 1793, she had the parting interview with her husband, on whom sentence of death was passed by the Convention. In August following she was removed to the Conciergerie, and in October she was brought before the revolutionary tribunal. She was charged with having dissipated the finances, exhausted the public treasury, corresponded with the foreign enemies of France, and favoured its domestic foes. She replied with firmness and decision, and a just indignation; and she heard her sentence pronounced with perfect calmness. On the following morning, when she ascended the cart which conveyed her to the scaffold, it was observed that grief had distorted her features, and in the damp, unwholesome prison, she had almost lost one of her eyes. Troops lined the road, a priest accompanied her, but she spoke little. There were shouts of "Vive la Republique," and "A bas la tyrannie," but she was unmoved. A glimpse of the Tuilleries, however, keenly touched her. Her head was quickly severed by the guillotine and shown to the people, who redoubled their diabolical shouts of exultation. Thus perished Marie Antoinette, in the 38th year of her age, Oct. 16, 1793. Collections of her letters have been recently published by the Comte de Hunolstein, and M. Feullet de Conches. But their genuineness has been vigorously impugned by Von Sybel and others, and a warm controversy is still going on (Feb. 1866). It appears certain that many of the letters included in these collections are forgeries.

MARIGNANO, GIOVANNI JACOPO MEDICHI, Marquis de, a celebrated commander, was born at Milan, in the beginning of the 16th century. Francesco Sforza, duke of Milan, employed him and another officer to murder Visconti, a Milanese nobleman; after which he determined to sacrifice the two instruments, lest he should be discovered as the author of the assassination. The one perished, but Medichino escaped, and obtained the government of Musso. In 1528 he entered it to the service of the emperor, and exchanged Musso for Marignano. In 1554 he defeated the French, commanded by Marshal Strozzi, in Tuscany, and took the city of Sienna, where he committed horrible cruelties. Died, 1556.

MARINO, ST., a native of Dalmatia, in the 4th century. He was originally a workman employed in building the bridge of

Rimirì, but his piety having been noticed by the bishop of Brescia, he was made a deacon, and he retired to an hermitage on Mount Titano, where he died. The miracles said to be wrought at the tomb of this *ci-devant* stonemason brought a crowd of pilgrims to the spot; houses were built to receive them; an independent community was formed; and thus rose into existence the republic of San Marino, which is the smallest state in Europe.

MARIOTTE, EDMÉ, a French mathematician and experimental philosopher, born at Dijon; became a member of the Academy of Sciences at Paris, in 1666; and died in 1684. He was a great experimentalist on the motion of fluids, the nature of vision, and the constitution of the air. Among his works are, "An Essay on Physics," treatises on "The Pressure and Motion of Fluids," the "Movement of Pendulums," &c. His name is attached to one of the laws of elastic fluids, discovered by him.

MARIUS, CAIUS, a celebrated Roman general and popular leader, who was seven times consul. He was born B. C. 137, and first distinguished himself at the siege of Numantia; was tribune of the people B. C. 119, and ten years afterwards went to Africa as lieutenant to the consul Metellus; superseded his commander, and obtained the consulship himself, when he subdued Jugurtha, king of Numidia, and conducted him in triumph to Rome. When Italy was threatened soon after by the Cimbri and Teutones, Marius was chosen consul as the man most capable of successfully resisting them. The danger was, however, postponed for several years, and when, in B. C. 102, the conflict took place, Marius defeated and, indeed, destroyed the host of the Teutones at Aquæ Sextiæ (Aix), in Gaul, and, with Carulus, in the following year, as completely overthrew the Cimbri, near Verceilæ. The conquerors shared the triumph, and Marius was called the third founder of Rome. In B. C. 90 he took part in the Social War, and his jealousy of Sulla began. Two years later Sulla was charged to conduct the war against Mithridates, but Marius succeeded in getting the command transferred to himself. At once Sulla marched to Rome with his army, and a civil war commenced to decide their superiority. Marius fled, and wandered out on the coasts of Italy, and, after escaping several times, was found by some horsemen in a marsh. He was conducted naked to Minturnæ, where the magistrate, after some deliberation, resolved to obey the orders of the Senate and of Sulla. But the Cimbrian slave, to whom the execution was intrusted, awed by the look and words of Marius, dropped his sword, and the people of Minturnæ, moved with compassion, conducted him to the coast, whence a vessel conveyed him to Africa. He landed at Carthage; but, his party once more triumphing in Italy, he was recalled by Cinna and Sertorius, who making themselves masters of Rome, a terrible proscription took place. Marius enjoyed the dignity of consul for the seventh time, B. C. 86, and died shortly after, aged 70.—**MARIUS, THE YOUNGER**, had all the ferocious character of his father. He

MARIVAUX, PIERRE CARLET DE CHAMBLAIN DE, dramatist and novelist, was born at Paris, in 1688. His father, who was director of the mint at Riom, gave him an excellent education, and his own talents and social merits gained him many friends. The drama first attracted his attention, and he was the author of about 30 pieces; but it is as a novelist that he is chiefly known. Of his works, "Le Paysan Parvenu," "Marianne," and "Le Philosophe Indigent," are accounted the principal. He also wrote "Le Spectateur François," &c. Died, 1763.

MARKHAM, GERVASE, an English author, who lived in the reigns of James I. and Charles I., and who served as a captain in the royal army during the civil wars. He was born at Gotham, in Nottinghamshire, but the exact time of his birth and death is unknown. He wrote "Herod and Antipater," a tragedy, besides several poems; but he was chiefly noted for his treatises on hawking, husbandry, horsemanship, the diseases of cattle, &c. Died, about 1650.

MARKLAND, JEREMIAH, an eminent critic and classical scholar, was born at Chidwell, in Lancashire, in 1693; was educated at Christ's Hospital, and Peter House, Cambridge; and died near Dorking, Surrey, in 1776. His principal works are, an edition of the "Sylvæ" of Statius, and "Remarks on the Epistles of Cicero to Brutus, and of Brutus to Cicero."

MARLBOROUGH, JOHN CHURCHILL, Duke of, one of the greatest generals and diplomatists of England, born at Ashe, in Devonshire, in 1650. He was the son of Sir Winston Churchill, a devoted adherent of Charles I. After receiving a defective education he was placed, at the age of 12, as page in the household of the duke of York. His passion for the life of a soldier was not long in showing itself, and in the defence of Tangier against the Moors, he had the first opportunity of distinguishing himself. The duchess of Cleveland is said to have conceived a passion for him, and to have presented him with £5000. During the five years, from 1672-77, Churchill served in the auxiliary force sent by Charles II. to Louis XIV., and so greatly distinguished himself, especially at the sieges of Nimeguen and Maestricht, that Turenne predicted his future eminence, and Louis XIV., after the latter siege, gave him the highest praise at the head of the army. He was at once raised to the rank of lieutenant-colonel. Continuing in the service of the duke of York, Churchill married about 1680 the beautiful and accomplished Sarah Jennings, favourite of the Princess (afterwards Queen) Anne. He was created a baron by Charles II. in 1682, and three years later was made brigadier-general and sent to France to announce the accession of James II. On his return he was raised to the English peerage by the title of Baron Churchill of Sandridge. He contributed greatly by his vigilance and skill to the suppression of the insurrection in favour of

Monmouth. At the revolution Churchill, with a duplicity and treachery deserving the severest condemnation, abandoned his master while professing still to serve him, and entered the service of the prince of Orange. He was created earl of Marlborough and privy councillor, and assisted at the coronation of William III. In 1689 he received the command of the English forces in the Netherlands, and after a brief service in Ireland, was recalled to Flanders in 1691. Suspected of a traitorous correspondence with James II., he was deprived of his command, and imprisoned in the Tower, and though shortly released, was not restored to the favour of the king till 1697. On the breaking out of the war of the Spanish succession in 1700, he received the chief command of the forces in the United Provinces, and was named ambassador to France. Marlborough was now to enter upon that career of military achievement which not only established his reputation as a general, but had most important results in the political state of Europe, especially in the destruction of the formidable preponderance of French power. As commander-in-chief of the allied forces he took several places in the Netherlands in 1702; with the Imperialists, under Prince Eugene, gained the famous victory of Blenheim (or Hochstadt) in 1704, for which the thanks of parliament were voted to him, and the manor of Woodstock conferred on him; defeated Marshal Villeroi at Ramillies in 1706, and closed the brilliant series of his victories by those of Audenarde in 1708, and Malplaquet in 1709. A national thanksgiving was appointed for the latter victory. But a reverse of fortune was at hand. The popular discontent occasioned by heavy taxation, the belief that the war was prolonged chiefly by Marlborough's influence, and for selfish ends, and the increasing power of the Tory party, led to his dismissal from all his offices at the beginning of 1712. An unfavourable report had been given by the commission appointed to examine the charge of peculation brought against him, and to escape the inquietude of a life at home, he went abroad with his duchess, who had also been displaced at court. Returning in 1714, George I. restored him to his offices, but he was soon after compelled by an attack of apoplexy to withdraw from public life, and he died at Windsor Lodge in 1722. The character of Marlborough presents a perplexing combination of noble and base qualities, which have served as the groundwork of extravagant eulogy and fierce invective. His rare ability as a general, his skill and success as a diplomatist, are unquestionable. No less so are his vast ambition, his avarice, and his treachery. There are numerous Memoirs of Marlborough and his campaigns. Among them are Coxe's, valuable for the original family papers embodied in it; Sir A. Alison's, which has passed through several editions; and Macfarlane's. The "Despatches" of the great commander have been edited by Sir George Murray. His portrait, painted by John Wyck, has been purchased for the National Portrait Gallery.

MARLOWE, CHRISTOPHER, an eminent

English dramatist, was born at Canterbury, in February, 1563-4. He was the son of a shoemaker, and was educated at the King's School, Canterbury, and at Cambridge, and graduated M. A. in 1587. He then appears to have gone to London, where he devoted himself to the stage, both as writer and actor. The principal plays attributed to him are, "Tamburlaine the Great," probably his earliest, "Edward the Second," in which Schlegel discovers the feeble model of Shakespeare's earliest "histories;" "The Tragical History of Doctor Faustus," remarkable as one of the first delineations of the workings of the sceptical spirit, and in that respect the forerunner of Goethe's great drama, and the "Jew of Malta." The authorship of several other plays attributed to Marlowe is questionable. He published translations from Ovid, Lucan, and other Latin authors. His life was not noble, and was closed by a disgraceful death in 1593. An edition of Marlowe's works, with a memoir and notes, by Mr Dyce, appeared in 1850, and a second edition in 1855.

MARMONT, AUGUSTE FREDERIC LOUIS VIESSE DE, marshal of France, and duke of Ragusa, the last of the band of heroes which constituted the brilliant staff of the Emperor Napoleon the Great, was born at Châtillon-sur-Seine, in 1774. In 1789 he was attached as sub-lieutenant to a regiment of infantry. In 1797 he was despatched by General Bonaparte, whose quick eye had already detected young Marmont's military genius, to present to the Directory the thirty flags which had been taken from the Austrians in Italy. From this time his advance was rapid. He served under Napoleon in Egypt, and after the *coup d'état* of the 18th Brumaire he was appointed a councillor of state, and commandant-in-chief of the reserve of the artillery. He was with Napoleon in some of his most brilliant actions, and his name is especially connected with the victory of Marengo. He commanded in Holland, in 1806, with the rank of inspector-general of artillery; and he soon afterwards received the title of duke of Ragusa as a reward for the successful occupation of the Ragusan republic. He was present at Wagram, Lützen, Bautzen, and Dresden; and after the emperor's disastrous retreat from Leipsic, he exhibited unrivalled military skill in the manner in which he protected Paris from the advancing armies of Russia and Austria. After the treaty of Paris, he swore allegiance to Louis XVIII., but unlike most of Napoleon's generals, he kept his oath when Napoleon returned from Elba. In 1830 he advised Charles X. not to publish his fatal ordinances. He retired into voluntary exile after the expulsion of that monarch, and his name was struck out of the list of marshals by Louis Philippe. Died, 1852.

MARMONTEL, JEAN FRANÇOIS, a distinguished French writer, born in 1723, in the Limousin, was educated at the Jesuits' college at Mauriac. He first settled at Toulouse, but being persuaded by Voltaire to try his fortune at Paris, he went there in 1745. By his tragedies of "Dionysius" and "Aristomenes," and other works, he soon gained reputation; and being patron-

ized by Madame de Pompadour, he received the appointment of secretary to the royal buildings. Soon after, he became connected with D'Alembert and Diderot in the preparation of the *Encyclopédie*. He also had a share in the *Mercurie Francoise*, in which his "Tales" first appeared; but having written a satire on the Duke d'Autmont, he was sent to the Bastille; from which, however, he was liberated in a few days; and in 1763 he obtained a place in the Academy, of which he afterwards became perpetual secretary. He survived the horrors of the revolution, having retired to a cottage in Normandy. In 1797 he was chosen deputy to the National Assembly; but his election being declared null, he again retired to his cottage, where he died of apoplexy, in 1799, aged 76. His "Moral Tales," "Bellisarius," "The Incas," his own "Memoirs," and "Elements of Literature," are his most esteemed works.

MAROT, CLEMENT, an eminent French poet, was born at Cahors, in 1495. Having accompanied the duke of Alençon to Italy, he was wounded and taken prisoner at the battle of Pavia; was afterwards persecuted for his attachment to the Protestant religion; was a favourite companion of Diana of Poitiers, and afterwards of Margaret, queen of Navarre, but fell into disgrace with both; passed through many vicissitudes of fortune, and died in 1544.

MAROZIA, a Roman lady of extraordinary beauty, and of infamous character, married, about 906, Alberico, marquis of Camerino. Left a widow soon after, she, with her sister Theodora, acquired immense wealth, palaces, castles, and territory, by prostitution. She carried on her intrigues with the principal barons, and even, it is said, with Pope Sergius II., for some time mistress of Rome, and occupied the castle of San Angelo. She married for her second husband Guizo, duke of Tuscany; caused Pope John X., who owed his elevation to the influence of Theodora, to be strangled in prison, and made two of her creatures successively popes. Widow a second time, she made one of her sons pope, John XI. in 931; and the next year married Hugh, king of Burgundy, who at the nuptial feast struck Alberico, her son by her first marriage, and thus occasioned a revolution. Alberico compelled Hugh to fly, imprisoned Marozia and the pope, her son, in San Angelo, and possessed himself of the supreme power, which he held for 20 years. Marozia died, it is said, in a convent. Her son (John XI.), grandson (John XII.), and great-grandson were raised to the chair of St Peter.

MARPRELATE, MARTIN. (PENNY, JOHN.)

MARPURG, FRIEDRICH WILHELM, an eminent German musician, born in 1718. He was the author of many valuable works on musical science, among which are a Handbook of Harmony and Composition, and a Treatise on the Fugue and Counterpoint. Died, 1795.

attention as political pamphleteer. He started the liberal paper, the "Tribune," in 1830, and was several times prosecuted for his severe criticisms on the government of Louis Philippe. He became a contributor to the "National," of which he was appointed editor in 1836. On the outbreak of the revolution of February, 1848, Marrast became secretary to the provisional government, and was several times chosen president of the National Assembly. He retired from public life on the fall of Lamartine, and died in 1852.

MARRYAT, Captain FREDERICK, R.N., the most popular of England's naval novelists, was born in 1786. Entering the navy at an early age, he served in the Impérieuse under Lord Cochrane, took part in the attack on the French fleet in Aix Roads, and in the Walcheren expedition in 1809; and in 1814, when lieutenant of the Newcastle, gained great distinction by cutting out four vessels in Boston Bay. For his services during the Burmese war he was promoted to the rank of captain, and he was subsequently made a C. B. with a good service pension of £150 a year. Captain Marryat commenced his literary career as a contributor to the Metropolitan Magazine, of which he afterwards became the editor; and in its pages several of his most successful stories appeared. His first work, in three volumes, was the "Naval Officer," published in 1829. This was followed in 1830 by the "King's Own;" and in 1832 appeared "Newton Foster," a great improvement on the two former works, and "Peter Simple," which is generally considered to be the best and most amusing of all his publications. From this period Captain Marryat's industry kept pace with his success; and among the numerous works, which flowed from his pen in an uninterrupted stream, may be enumerated, "Jacob Faithful," "Mr Midshipman Easy," "Masterman Ready," "The Paucha of many Tales," "Japhet in search of a Father," "Poor Jack," "The Pirate and Three Cutters," "Snarleyow," "Pereival Keene," &c.; besides the "Phantom Ship," originally contributed to the New Monthly Magazine, and "Joseph Rushbrook," which first appeared in the Era, a London newspaper. In 1837 he paid a visit to the United States, and on his return he published his "Diary in America," which reflected somewhat severely on the national character of the Americans. This was followed by three additional volumes, and by his "Travels of Monsieur Violet," supposed to be founded on the adventures of Chateaubriand in the woods of the New World. Few men have written so much and so well as Captain Marryat. To the last, his literary powers remained unabated; and by common consent he is *facile princeps* among the delineators of naval character and naval life. Died, Aug. 9, 1848.

MARS, Mademoiselle, a great French comedienne, was born in 1779. She made her debut at the early age of 13, and enjoyed the rare privilege of retaining the public favour till an advanced age, having kept the boards of the Théâtre Français at Paris, where she had gained innumerable triumphs,

till 1841, when she retired in her 63rd year.

MARSDEN, WILLIAM, D.C.L., F.R.S., &c., orientalist and antiquary, was born in 1754, in Ireland, and went to India at an early age. He contributed many interesting papers to the Philosophical Transactions and the Archæologia, upon subjects connected with the history and literature of Asiatic nations; and among the separate works he published are, "A History of the Island of Sumatra," a "Dictionary and Grammar of the Malay Language," "Numismata Orientalia Illustrata," a translation of "The Travels of Marco Polo," &c. In 1795 he was appointed second secretary to the admiralty; and, some years before his death, he voluntarily resigned a pension of £1500 a year, which had been bestowed on him as a reward for his public services. He also presented his valuable collection of oriental coins to the British Museum, and his extensive library to King's College, London. He died, aged 81, in October, 1836.

MARSH, HERBERT, D.D., bishop of Peterborough. Eminent both as a scholar and a divine, this prelate is chiefly known as the translator of the profound and elaborate work of Michaelis on the New Testament. For this work he was, perhaps better qualified than any English clergyman of his day; for, after finishing his classical studies at St John's College, Cambridge, he resided for many years at Göttingen, where he acquired an intimate acquaintance with the German language. On the invasion of Germany, by the French, he returned to Cambridge and took his B.D. degree, and in 1807 he was elected Lady Margaret's professor of divinity. In this important situation he made a most useful change. Up to his election the lectures of the Lady Margaret's professor had always been delivered in Latin, but he delivered his in English, and as he did so from the university pulpits, all ranks flocked to hear him. Besides several translations from the German, and a long list of controversial pamphlets, he published "A Course of Lectures, containing a Description and Systematic Arrangement of the several Branches of Divinity," &c., "A History of the Translations which have been made from the Scriptures," and "Hæreses Pelagicae." In 1806, Mr Marsh was created D.D., by royal mandate; in 1816 he was made bishop of Llandaff; and, three years later, translated to the see of Peterborough. Eminent as were his talents, and unwearied as was his zeal as a divine, he probably owed much of his success in life to some important information on public affairs, which he transmitted to the English government during his residence in Germany, and which Mr Pitt considered to be so important, that he rewarded it with a pension. Born, 1758; died, 1838.

MARSHALL, JOHN, a distinguished American judge, was a native of Virginia, and was born in 1755. He served in the army during the first years of the American war, and afterwards entered the legal profession. He became a member of the legislature of his native State, member of congress in 1799, and in the following year

secretary of state. In 1801 he was appointed chief justice of the United States, a post which he filled with great ability and honesty till his death. His decisions have been highly eulogized by Story. Judge Marshall was author of a "Life of Washington," and a "History of the American Colonies;" and he was a correspondent of the Institute of France. Died at Philadelphia, 1835.

MARSHAM, Sir JOHN, a learned writer on ancient history and chronology, was the son of a London alderman, and born in 1602; was educated at Westminster, and St John's College, Oxford; and was made one of the six clerks in chancery, which place he lost for his attachment to the cause of royalty during the civil wars. At the accession of Charles II., however he recovered his office, and was knighted, became M.P. for Rochester, and was afterwards created a baronet. His principal work, "Canon Chronicus Egyptiacus, Ebraicus, Græcus," displays much erudition and ingenuity. Died, 1685.

MARSHMAN, Dr JOSEPH, an eminent Baptist missionary in the East Indies, was the last survivor of those zealous men who were engaged in the Serampore mission. He arrived in India in 1799, and, by dint of incessant labour, he acquired a complete mastery over the Bengalee, Sanscrit, and Chinese tongues, into the latter of which he translated a considerable portion of the Scriptures. He was also author of "A Dissertation on the Characters and Sounds of the Chinese Language," "Clavis Sinica," and a translation of the works of Confucius. He was born at Westbury Leigh, in Wiltshire, in 1768, and died at Serampore, Dec. 1837.

MARSIGLI, LUIGI FERDINANDO, an Italian writer, was born in 1658 of a noble family, at Bologna. He served with great reputation in the imperial army, but was taken prisoner at the passage of the Raab, and sent to Rosna. The year following he was ransomed, obtained a colonel's commission, and was afterwards advanced to the rank of marshal; but when the Count d'Arco was condemned for giving up the fortress of Brisach to the duke of Burgundy, Marsigli, who commanded under him, was dismissed the service. He then retired to Bologna, where he formed a museum, and founded the Institute. His most important work is entitled "Dianubus Pannonico-Mysicus," 7 vols. folio; he also wrote "A Physical History of the Sea," and "The Military State of the Ottoman Empire." Died, 1730.

MARSTON, JOHN, an English dramatist, who lived in the reigns of Elizabeth and James I., and was upon terms of intimacy with Ben Jonson. He was educated at Oxford, became lecturer at the Middle Temple, and died after 1633. He wrote eight plays, and three books of satires, called the "Scourge of Villany."

MARTEL, CHARLES. [CHARLES MARTEL.]

MARTENS, DIETRICH, one of the earliest Dutch printers, was born at Alost, about 1440. He was at one time the associate of John of Westphalia; printed at Antwerp in 1476, being the first who practised the art there; afterwards worked at Louvain, at

Antwerp again, at Alost, and again at Louvain. In 1528 he retired to a monastery at his native town, and died there in 1534.

MARTENS, WILHELM FRIEDRICH VON, a distinguished diplomatist, was born at Hamburg, 1756. He was professor of public law at Göttingen; and, among various high offices which he held in succession, he was appointed secretary of the congress of Vienna in 1814, and representative of Hanover in the German Diet in 1816. His "Précis du Droit des Gens de l'Europe," his "Cours de Diplomatie," and his "Recueil des Principaux Traités de Paix," &c. (with its various supplements), are quoted as authorities by all who make diplomacy their study. Died, 1821.

MARTHA, SISTER.—ANNE DIGET, known as SISTER MARTHA, had, previous to 1792, spent many years in a convent at Besançon, as postress, and at that time retired on a pension of 133 francs, and, with another woman, devoted her time to the wants of the necessitous. They sought the wounded after an engagement, and by their humane exertions, saved numerous lives. The Spanish prisoners partook largely of their charity; and when they quitted Besançon the English troops succeeded them in the care and attentions of the good sister Martha, who declared that the unhappy of all countries were her friends. In the campaign of 1814, though Martha was nearly 70 years of age, yet her energy and activity seemed to receive a new impulse; and the powerful assistance she rendered the wounded French and allied soldiers earned the duke of Reggio to say to her, "Sister Martha, I was made acquainted with your character on the field of battle, for there I continually heard the wounded exclaim, 'If the good sister Martha were here, our sufferings would be relieved,' while blessing followed the name." When the allied sovereigns met in Paris, each was desirous to see this extraordinary woman; nor did they forget to reward her virtues. The emperor of Russia gave her a valuable gold medal, and a sum of money; the emperor of Austria gave her the cross with the order of Merit, and 2000 francs; and the kings of France and Spain also sent her medals, and each added a present of money. Martha had no other ambition than that of doing good; but she rejoiced in her fortune, as it gave her more ample means to exercise her charitable disposition; and she died, regretted and esteemed, at Besançon, in 1824.

MARTIALIS, MARCUS VALERIUS, a celebrated Roman poet, was born at Bilbilis (Bilbao), in Spain, A. D. 43. At the age of 23 he went to Rome, where his talents soon gained him distinction. He enjoyed the favour of the Emperor Domitian, who loaded him with honours, which he repaid with the most prodigal flattery and servility. Among the friends of Martial were Pliny the younger, Quintilian, Juvenal, and other literary men. After thirty-five years' residence at Rome he returned at the close of 100 to Bilbilis, where he lived on the estate of his wife, Marcilla. It is not known when he married her. His works consist of fourteen books of short metrical compositions, entitled "Epigrammata," distinguished for

MARTIN, ALEXÉ, a distinguished French
writer and critic, was born at Lyons, 1780.
At an early age he repaired to Paris, where
he soon gained a livelihood by his pen, at
one time writing in the columns of the
Journal des Débats; at another, editing the
works of La Rochefoucault, Racine, and
Fénélon; and he at last became professor
of belles lettres at the Polytechnic School,
and librarian at Sainte Gèneviève. At once
the pupil and friend of Bernardin de St
Pierre, he collected and published his works,
defended his widow from hostile attacks,
married his widow, and adopted his daughter
Virginie. His "Lettres à Sophie sur la Phy-
sique, la Chimie, et l'Histoire Naturelle,"
were highly popular; and his work on the
"Education des Mères de Famille" was
crowned by the Institute. Died, 1847.

MARTIN, JOHN, one of the most remark-
able painters of his age, was born, in 1789,
near Hexham, a few miles above Newcastle.
When very young, he expressed his deter-
mination to be an artist; and with a view
to becoming a heraldic painter, he was ap-
prenticed to a coachmaker at Newcastle.
He then became the pupil of an Italian
artist, named Horace Musso, and in 1806,
he removed to London to reside with the
son of his master, the celebrated enamel
painter, Charles Musso or Muss. In his
nineteenth year he married; and for some
time supported himself by painting on glass
or china, and by teaching. His first picture
was painted in the year 1812: the subject
was "Sndak in Search of the Waters of
Oblivion," and of this Martin himself says:
"You may easily guess my anxiety when I
overheard the men who were to put it in the
frame, disputing as to which was the top of
the picture." His next works were the "Ex-
pulsion from Paradise," which remained in
his own possession, and "Clytie," exhibited
at the Royal Academy in 1814. This was
followed by "Joshua," the "Fall of Baby-
lon," and "Belshazzar's Feast," which
gained the prize of £200 at the British In-
stitution. The works by which he is most
extensively known are his "Fall of Baby-
lon," "Macbeth," the "Destruction of Her-
culeum," the "Seventh Plague," "The
"Paphian Bower," "The Creation," "The
Deluge," and "The Fall of Nineveh;" and
his illustrations of "Milton." For many
years Martia was known to the world as the
author of various plans for the improvement
of the sanitary condition of London. All
Martin's works, and a contemporary, evince
genius of a high order, but of that class that
contains those every-day phenomena of
nature which when successfully described
are most gratifying to the senses. They
were always more agreeable as engravings
than as pictures, first, in consequence of a
marked mannerism in execution, and second-
ly, because of exaggeration of colour. Like
Fuseli, he relied entirely upon a highly
charged imagination, and nature forsook
him. His aim was always sublimity, but
sublimity was not the result: he often took

the one step which leads elsewhere. He left
unfinished three large works, "The Judg-
ment," "The Great Day of Wrath," and "The
Plains of Heaven." On the 12th of Novem-
ber, 1833, while painting, he was suddenly
paralysed, losing the power of speech and
the use of his right hand. From the first,
little hope was entertained of his recovery;
and he gradually sank, and expired in the
Isle of Man in February, 1834. His grave is
in the charmingly secluded churchyard of
Kirk Braddan.

MARTIN, SARAH, whose pious and philan-
thropic labours have linked her name with
those of Howard, Buxton, and Mrs Fry, was
born near Great Yarmouth, in 1791. Deprived
of her parents when very young, her educa-
tion was merely such as could be obtained
at a village school. At 11 she learned the
business of dress-making; and she pursued
her humble avocation for about 14 years,
when desiring to obtain admission to the jail
to read the Scriptures to the prisoners, her
wishes were gratified; and her visits were
again and again repeated, during such short
intervals as she could spare from her daily
labours. At first she merely read to the
prisoners; familiarity with their wants and
with her own powers soon enlarged the
sphere of her tuition, and she began to in-
struct them in reading and writing. After
three years' perseverance she began to in-
troduce employment, first for the female
prisoners and then for the male; and after
another interval she formed a fund for the
furnishing of work for prisoners upon their
discharge. For many years she read printed
sermons on Sundays to the prisoners; but
about 1832 she began to write her own ser-
mons, and after continuing this course for
five years she was enabled, she says, "by the
help of God, to address the prisoners with-
out writing beforehand, simply from the
Holy Scriptures." Her addresses were ad-
mirably suited to the circumstances and
comprehension of her audience; and there
is reason to believe that her appeals, urged
with kindly, warm-hearted sincerity, were
eminently successful. Meanwhile her cus-
tomers began to fall off, and she saw herself
on the verge of destitution. Still she never
paused in her course, and not only did she
continue her prison instructions, but she
organized and superintended a large school
at the workhouse, and devoted her spare
time to visiting the sick and other works of
charity. But such unremitting labours of
love proved too severe for a constitution
naturally delicate, and, after a few weeks of
poignant suffering, her pure spirit passed to
its reward, October 12, 1843. She was buried
in the churchyard of Calster, where a simple
monument records her name. She left a
small volume of poems, many of which
breathe the true poetic spirit.

MARTIN, ST., was born of heathen parents,
in 316, at Sabaria, in Pannonia, now Hun-
gary. He served in the army some years;
but being converted to Christianity, he em-
braced a religious life, and appeared as the
model of all virtue. In 371 he was made
bishop of Tours, but still retained the sim-
plicity and austerity of the recluse. He
erected the monastery of Marmontier, and

is considered as the apostle of the Gauls. Died, 397.

MARTIN, THOMAS, an English antiquary, was born at Thetford, in Norfolk, in 1697. He contributed to Le Neve's "Monumenta Anglicana," wrote "a History of Thetford," and was familiarly called "Honest Tom Martin, of Palgrave," where he long resided. Died, 1771.

MARTIN, WILLIAM, naturalist, was born in 1767, at Marsfield, in Nottinghamshire. Being deserted by his father, and left unprovided for, he took to the stage as a profession; but having married, he established himself at Burton-on-Trent, and, subsequently, at Macclesfield and Manchester, as a drawing-master; where, devoting much of his time to researches in natural history, he published "Outlines of an Attempt to establish a Knowledge of Extraneous Fossils on Scientific Principles," "Petrificata Derbiensia," &c. Died, 1810.

MARTINEZ DE LA ROSA, Spanish statesman and poet, was born at Granada in 1789. He was actively employed in the patriot cause during the peninsular war, and was sent on a political mission to London about 1810. Three years later he was chosen deputy to the Cortes, and greatly distinguished himself as an orator. On the restoration of Ferdinand VII., in 1814, he was sentenced to ten years' imprisonment in Morocco, but obtained his release in 1820. He was again exiled in 1823, and spent some years in France, occupying himself chiefly with literary tasks. He was recalled to power after the death of Ferdinand, in 1833, and was made prime minister. His measures, however, made him unpopular, his life was on one occasion threatened by the populace, and in 1836 he resigned. Under the ministry of Narvaez he was sent ambassador to Paris, and afterwards to Rome, where he was present at the commencement of the revolutions of 1848-9. He subsequently became president of the Chamber of Peers. Among the "Obras Literarias" of Martinez de la Rosa are several tragedies and comedies; a poem on the art of poetry with ten times its own quantity of critical notes and discussions; odes and lyrics; a novel entitled "Dona Isabel de Solis;" and a politico-historical work, "El Espiritu del Siglo," in 10 vols., published between 1835-61. Died, February 6, 1862.

MARTINI, GIAMBATTISTA, a celebrated writer on music and graceful composer, was born at Bologna, in 1706, and died in 1784. He wrote a "History of Music," 3 vols. folio; also, an "Essay on Counterpoint," &c. He was chapel-master to a convent of Franciscan Friars; and from the school of Martini issued some of the finest composers in Europe, among them, Jomelli, Mozart, Gluck, &c.

MARTINI, SIMONE, called through an error of Vasari, **SIMONE MEMMI**, a distinguished early Italian painter, was born at Sienna in 1283. He was the contemporary of Giotto, but there is no evidence that he was his pupil. His earliest known fresco is a "Madonna and Child enthroned" in the Hall of the Public Palace of Sienna, executed in 1315, and partly repainted in 1321. Among

the best works of Simone are an altar piece for the church of St Catherine, at Piasa, another at Orvieto, frescoes in the chapel of St Martin, at Assisi, and in the chapels and other parts of the palace of the popes, and the portico of the cathedral, at Avignon. Simone lived chiefly at Sienna, but in 1338 he removed to Avignon, where he became acquainted with Petrarch, and his Laura, whose portrait he painted. An interesting work by this master, "Christ found in the Temple," is in the Royal Institute, Liverpool. The style of Simone was remarkable for grace and tenderness and exquisite finish; but he did not attain to that unity and balance in composition which distinguished Giotto. Died at Avignon, 1344.

LIPPO MEMMI, brother of Giovanni, Simone's wife, was also a distinguished painter, and was long associated with Simone in his undertakings. Lippo died in 1356.

MARTINIERE, ANTOINE AUGUSTIN BRUGEN DE LA, a French miscellaneous writer, was born at Dieppe, in 1662; studied at Paris; and was successively patronized by the duke of Parma, the king of Naples, to whom he was secretary, and the king of Spain, to whom he was geographer. His principal work is entitled "Dictionnaire Géographique, Historique, et Critique," in 10 vols. folio. Died, 1749.

MARTOS, IVAN PETROVICH, an eminent Russian sculptor, who was for many years director of the Academy of Fine Arts, St Petersburg, died, April 17, 1835, aged 82. He had attained the highest excellence in his art, rivaling Canova in his draperies, and in subjects of bas-relief being superior to any of his contemporaries. Among his best works many he reckoned the colossal group in bronze of Minin and Pozharsky, at Moscow; the Emperor Alexander, at Taganrog; the duke of Kiebelien, at Odessa, &c.

MARTYN, JOHN, F.R.S., a skilful botanist and learned writer, was born, in 1699, at London. For nearly thirty years he was professor of botany at Cambridge, wrote many works, and died in 1768. Besides his botanical productions, he published "The Grub Street Journal," 2 vols.; "Virgil's Georgics," a "Dissertation on the Æneid," and assisted in the abridgment of the Philosophical Transactions.

MARTYN, THOMAS, F.R.S., an eminent antiquarian and natural philosopher, the son of the preceding, was born at Chelsea, in 1736; was educated at Cambridge, and, on his father's resignation, in 1761, succeeded to the botanical professorship, which he held for 64 years, during which time he obtained valuable church preferment, and died in 1825. The writings by which he is most advantageously known are, "Plantae Cantabrigienses," "Herbaticus Cantabrigienses," "The English Connoisseur," "The Antiquities of Herculaneum," "Elements of Natural History," "Flora Rustica," and an enlarged edition of "Miller's Gardener's Dictionary."

MARTYN, HENRY, the celebrated missionary, was born in Cornwall, in 1781; was educated at St John's College, Cambridge; and in 1805 went to India as a chaplain to the East India Company. When he arrived

 When he arrived

in the East he distinguished himself by his rapid acquirement of the native languages, being soon able to translate the Common Prayer into Hindoostanee, and to perform divine service in that language. From India he proceeded to Persia, and there translated the New Testament into the Persian tongue, held several conferences with the learned Mohammedans, and converted some to Christianity. Died, on his way to England for the restoration of his health, at Tokat, in Asia Minor, 1812.

MARTYR, PETER, a celebrated Protestant reformer, whose family name was VENTIGLI, was born at Florence, in 1500. He was originally an Augustine monk, and became an eminent preacher, and prior of St Fridin's at Lucca; but having read the writings of Luther, Zuinglius, and other reformers, he renounced the Romish faith, and found it necessary to quit his native country. He then, on the invitation of Edward VI., came to England, and was made professor of divinity at Oxford, and canon of Christchurch. But in the succeeding reign he was obliged to leave the kingdom; on which he went to Switzerland, and died at Zurich, in 1552. His wife, who had been a nun, died at Oxford, and in the reign of Mary her remains were taken up and buried beneath a dunghill; but when Queen Elizabeth came to the throne they were re-interred in a consecrated ground. Peter Martyr was the author of many works on divinity, including commentaries on some parts of the Old and New Testament. His personal character has also been represented as extremely amiable.

MARVELL, ANDREW, distinguished by his integrity as a senator, and by his wit as a political writer, was born at Kingston-upon-Hull, in 1620, and was educated at Trinity College, Cambridge. On the death of his father, he spent several years in foreign travel; was appointed secretary to the British legation at Constantinople; and on his return, in 1657, he became assistant to Milton, as Latin secretary. At the Restoration he was elected into parliament for his native place, with a salary from his constituents; and he obtained a high character for diligence, ability, and integrity. He had the character of being the wittiest man of his time, and wrote a number of poems, both humorous and satirical, which were highly effective. Among his prose tracts was one, entitled "An Account of the Growth of Popery and arbitrary Government in England," on the appearance of which a reward was offered for a discovery of the writer and printer. But though Marvell was obnoxious to the ministry, he was somewhat of a favourite with the king, who took great delight in his conversation. One day the lord treasurer Danby was sent to find out his lodgings, which were up two pair of stairs in a court in the Strand; and when his lordship opened the door, the patriot, evidently much surprised, told him, "he believed he had mistaken his way;" but was told by the earl, that he came from the king, "to know what his majesty could do to serve him?" to which Marvell replied, that "it was not in his majesty's power to serve

him." Lord Danby, finding that no argument could prevail upon him to accept a place, concluded by saying, that "the king had sent him a thousand pounds, as a mark of his private esteem." This also he refused without hesitation; though he was obliged, on the departure of the courtier, to send to a friend for the loan of a guinea. He suffered much from the malice of powerful enemies during the latter years of his life, and died in 1678. Marvell wrote some pieces against Parker, bishop of Oxford, besides several miscellaneous poems and tracts, which together were published in 3 vols. 4to.

MARY, Queen of England, daughter of Henry VIII. and his queen, Katharine of Aragon, was born at Greenwich, in February, 1516. She was soon declared princess of Wales, and was settled with a numerous household at Ludlow, where she was under the care of the countess of Salisbury. Brought up in the Catholic faith, she took the part of her mother in the disputes respecting the divorce, and thereby estranged herself from her father. Many schemes for her marriage were projected, but they came to nothing. After the execution of Queen Anne, in 1536, Mary was induced to acknowledge the king as head of the church in England, to confess that her mother's marriage was unlawful, and to express her sorrow for her resistance to his laws; and was then restored to his favour. She yielded an outward conformity to the successive changes in religion during Henry's reign, and the succession was secured to her by Act of Parliament passed in 1514. During the reign of her brother, Edward VI., she steadily refused conformity to the Protestant religion, which led to the attempt to make Lady Jane Grey queen instead of her. This attempt failed, although Lady Jane was actually proclaimed on the death of Edward, 6th July, 1553, and Mary entered London in triumph. She immediately set herself to the task of undoing the work of the preceding reign, and re-establishing the Catholic faith. She liberated the imprisoned Catholic bishops, imprisoned Cranmer, Latimer, and other leading Protestants, had Lady Jane Grey and her husband put to death on the charge of treason, and on the instigation of Gardiner procured the repeal of all the laws of Henry VIII. and Edward VI. respecting religion. An insurrection which was provoked by the proposal of her marriage with Philip of Spain, and was headed by Sir Thomas Wyatt, was immediately suppressed, and the marriage took place at Winchester, in July, 1554. Her chief advisers were Cardinal Pole and Bishop Gardiner, and the rest of her reign is filled with the relentless persecution of the adherents of reform. The number of victims is variously estimated, but at the lowest it was about three hundred. Bonner, bishop of London, especially distinguished himself as a promoter of this persecution. In 1557 war was renewed between France and Spain, and Mary took part with Spain; losing soon after the town of Calais, a blow felt as keenly by the queen as by the nation. Worn out with bodily and mental suffering, Mary died, 17th November, 1558, and was

buried in Westminster Abbey. The popular estimate of Queen Mary is expressed by the epithet "Bloody;" but while the fitness of the term to characterize her reign is acknowledged, it is necessary, if we would be just, to consider many things besides the fact of her persecutions, and to make large allowance for her. She must at least be credited with sincerity in her attachment to the faith of her mother, and in her endeavour to establish it by persecuting its enemies, she shared the spirit and followed the example of all dominant churches of the age. With Queen Mary the last hope of a triumph of Romanism in England died out.

MARY II., Queen of England, the wife of William III., was the daughter of James II. by Anne Hyde, daughter of the earl of Clarendon. At the age of 15 she was married to William, prince of Orange, whom she followed to England in 1689. The same year parliament having declared the crown vacant by the abdication of James, conferred it upon William and Mary. She died of the small-pox, in 1695, aged 32.

MARY STUART, Queen of Scots, famous for her beauty, her wit, her learning, and her fate, was daughter of James V., king of Scotland, and succeeded her father in 1542, eight days after her birth. In the following year she was crowned by Archbishop Beaton, and before she was six years old she was sent to the court of France. In 1558 she married Francis, dauphin, and in the next year, king of France. This monarch dying in 1560, she returned into Scotland, where during her absence Knox had preached, and the reformation had been established. She had an interview with Knox soon after her arrival. After rejecting several proposals of marriage, she married her cousin, Henry Stuart, Lord Darnley, in 1565. Being excluded from any share of the government (as he suspected) by the advice of Rizzio, an Italian musician, her favourite and secretary, the king, by the counsel and assistance of some of the principal nobility, suddenly surprised them together, and Rizzio was slain, in the queen's presence, in 1566. An apparent reconciliation afterwards took place, a new favourite of the queen appeared in the earl of Bothwell, and early in 1567 Darnley, who had continued to reside separately from the queen, was assassinated, and the house he occupied was blown up with gunpowder. This murder was but very imperfectly investigated; and in the month of May following, Mary wedded the earl of Bothwell, who was openly accused as the murderer of the late king. Scotland soon became a scene of confusion and civil discord. Bothwell, a fugitive and an outlaw, took refuge in Denmark; and Mary, made a captive, was treated with insult and contempt, and committed to custody in the castle of Loch Leven. After some months' confinement she effected her escape, and, assisted by the few friends who still remained attached to her, made an effort for the recovery of her power. She was opposed by the earl of Murray, the natural son of James V., who had obtained the regency in the minority of her son. The battle of Langside insured the triumph of her ene-

emies; and, to avoid falling again into their power, she fled to England, and sought the protection of Queen Elizabeth; but that princess treated her as a personal and political rival, and kept her in safe custody. For a period of 18 years was the queen of Scotland a state prisoner; and, during the whole of that long term, she was recognized as the head of the Popish party, who wished to see a princess of their persuasion on the throne of England. Mary, despairing of recovering that of Scotland, countenanced, if she was not directly concerned in, their plots. She was accordingly tried for a conspiracy against the life of the queen of England, condemned, and suffered decapitation, Feb. 8, 1587, in the castle of Fotheringay, where she had been long confined. Her body was interred, with great pomp, in Peterborough Cathedral, but subsequently removed by her son, James I., to Henry the Seventh's Chapel, Westminster Abbey, where a magnificent monument was erected to her memory. The character and conduct of Mary, queen of Scots, have been made the subject of much controversy; but the fact of her marrying Bothwell, "stained as he was by universal suspicion of Darnley's murder, is a spot upon her character for which we in vain seek an apology." Among recent Memoirs of Mary may be named those of Mignet, Lamartine, and Miss Strickland. A new work has just appeared, entitled "Mary Stuart, her Guilt or Innocence. An Enquiry into the Secret History of her Time." By A. M'Neel Caird. The celebrated Fraser Tyler Portrait of this Queen has been purchased for the National Collection.

MARY OF MEDICI, Queen of Henry IV. of France, was daughter of Francis, grand-duke of Tuscany, and was born at Florence in 1573. She was married to Henry IV. at Lyons in 1600, but the union was an unhappy one. She was crowned at St Denis, 13th May, 1610, and the next day the king was assassinated. Named regent during the minority of Louis XIII., she reversed the policy of Henry, formed a new ministry, and by her tyranny caused a civil war. Louis was declared of age by the parliament of Paris in 1614, and Mary's influence gradually declined. She was exiled to Blois in 1617, and was afterwards confined at Compiègne, whence she escaped to Brussels. She was reduced to want, and died in a garret at Cologne in 1642. Cardinal Richelieu was her bitter enemy. Paris owed to her its first aqueducts, the palace of the Luxembourg, and the promenade called the "Cours de la Reine." Mary of Medici was mother of Henrietta Maria, queen of Charles I. of England.

MARY OF ORLEANS, duchess of Würtemberg, distinguished for her love of art, was the daughter of Louis Philippe, duke of Orleans, afterwards king of the French, and was born in 1813. She was a pupil of Ary Scheffer in painting, and of L. J. David in sculpture. Her most admired work is the statue of Joan of Arc. She died at Pisa in 1839, having been married to the duke of Würtemberg less than two years.

the greatest Italian

painters, whose real name was TOMMASO DI SAN GIOVANNI, was born in 1402. He is believed to have studied under Masolino, and went while very young to Rome, where he painted in the church of Ss. Clemente a remarkable series of frescoes, the finest of which represents St Catherine and the doctors before Maxentius. In 1421 he was admitted into the guild of the Speziali at Florence. The greatest works of Masaccio are the famous frescoes in the Itrancecci chapel of the Carmine, among which are the Expulsion from Paradise, St Peter's sermon, the Tribute, the grandest composition in the series, St Peter baptizing, and the Resuscitation of the King's Son, the last of which was partly painted by Filippo. Masaccio by his bold rejection of conventionalism, and his independent study of nature, gave a powerful impulse to the art of painting, and made an epoch in its progress. He introduced the same plastic boldness into painting which Donatello did into sculpture, and was a great master of perspective and of chiaroscuro. A mystery hangs over his last days, but it is known that he died at Rome about 1429.

MASANIELLO, or ANIELLO, TOMASO, a fisherman of Naples, born 1623, when that kingdom was subject to the king of Spain, and governed by a viceroy. The people had borne the yoke with great patience until 1647, in which year a new and oppressive tax upon all kinds of fruit being imposed, occasioned general discontent. At this time, Masanello, then in his 24th year, earned his livelihood by fishing; and observing the murmurs that prevailed, he began to entertain an idea of redressing the grievance. He accordingly imparted his design to some companions, who laughed at him; but, when he assured them he was in earnest, they readily promised him their assistance. A riot ensued in the month of July, in consequence of the shopkeepers refusing to trade with the country people; and an officer was sent by the regent to quell the tumult. The multitude, however, grew more incensed at his appearance, and Masanello, by his harangues, inflamed them to acts of more daring violence. After burning the toll-houses, they marched to the palace of the viceroy, which they entered and rifled; the governor himself escaped with difficulty, and the prince of Bisignano, to whom the people were much attached, quitted the city. Thus left without a head, the multitude chose Masanello for their leader; a stage was erected in the market-place, on which this new ruler sat to give audience and to administer justice, which he did with equal gravity and impartiality. 150,000 men obeyed his orders, and an incredible number of women, armed like Amazons, were enrolled in the same cause. In this state of things, the viceroy applied to the archbishop, whose mild persuasions had nearly succeeded in restoring order, when an attempt being made to assassinate the new chief, the negotiation was broken off, and the rage of the people burst forth with redoubled fury. Masanello, however, was prevailed upon to renew the treaty, and to visit the palace, which he did with un-

common pomp, mounted on horseback, dressed in cloth of silver, a plume of feathers in his hat, and a drawn sword in his hand, attended by 50,000 armed followers. On the Sunday following the terms were ratified at the cathedral church, and everything had now an auspicious appearance; when, unfortunately for Masaniello, ambition induced him to violate his engagement, and to hold a power he knew not how to direct. He became so capricious and tyrannical,—was probably insane,—that a scheme was laid to assassinate him, and, as he fell, his last words were, "Ungrateful traitors!"

MASCAGNI, PAOLO, a celebrated Italian anatomist, was born in Tuscany in 1752, and became professor of anatomy, physiology, and chemistry, at Florence. He made several important discoveries in human anatomy, and published, among other works, "Vasorum Lymphaticorum Corporis humani, Historia et Iconographia." Died, 1815.

MASCHERONI, LORENZO, an eminent mathematician, was born at Bergamo, in the Venetian States, in 1750. He published notes on the "Differential Calculus" of Euler, and had a share in the experiments performed by the Institute of Bologna, with a view of proving the figure of the earth by the descent of bodies. The invention, however, which has rendered his name conspicuous, was his celebrated "Geometry of the Compass." He died, at Paris, in 1800.

MASDEU, DON JUAN FRANCESCO, a Spanish historian, born 1740, was a native of Barcelona, and member of the order of the Jesuits; author of "Historia Critica de Espana, y de la Cultura Espanola en todo genero," 20 vols. Died, 1817.

MASERES, FRANCIS, lawyer and mathematician, was born in London in 1731; was educated at Clare Hall, Cambridge, and afterwards studied at the Temple. Being called to the bar, he obtained the situation of attorney-general of Quebec, and on his return to England, was made *curator* baron of the exchequer. He published a collection of the "Scriptores Logarithmici," in 6 vols. 4to; a "Treatise on Life Annuities," "Elements of Plane Trigonometry," &c. Died, 1821, aged 93.

MASKELYNE, NEVIL, mathematician and astronomer, was born in London in 1732, received his education at Westminster and Cambridge; became a fellow of Trinity College, and took the degree of D. D. in 1777. Being chosen a fellow of the Royal Society, he was appointed, in 1761, to go to St Helena to observe the transit of Venus, and during the voyage he determined the method of finding the longitude at sea by lunar observations. In 1763 he undertook another voyage, to Barbadoes, to ascertain the longitude of that Island, as well as to prove the accuracy of Harrison's time-keeper, with other objects of practical science. On his return he succeeded Mr Bliss as royal astronomer; and in 1767 commenced the publication of "The Nautical Almanack," of which he edited 49 volumes. Dr Maskelyne was also the author of "The British Mariner's Guide" and "Astronomical Observations," in 4 vols. folio.

besides many valuable papers in the Philosophical Transactions. Of Maskelyne's "Observations," Delambre says, in his *Eloge*, that if all the other materials of science were lost, those volumes would suffice to reconstruct modern astronomy. Died, 1811.

MASOLINO, whose real name was TOMMASO DI CRISTOFORO FINI, a great Italian painter, was born at Florence in 1383. He was probably a pupil of Gherardo Starnina, and after obtaining admission to the guild of the *Speziali* in his native town, he went to Hungary, and was employed by Pippo Spani, governor of Temeswar, who erected churches and other buildings, and had many Florentine artists to decorate them. On the death of Pippo, in 1427, Masolino undertook a commission to paint a series of frescoes in the church of Castiglione di Olona, and in the adjoining baptistry. These pictures, which represent scenes from the lives of the Virgin, St Lawrence, St Stephen, and St John, were only discovered and freed from whitewash in 1843. Some of the frescoes in the Brancacci chapel at Florence have been attributed to Masolino; but, according to the judgment of the authors of the "New History of Painting in Italy," who have set his life and works in a new light, erroneously. Masolino is said to have been the master of his great contemporary Masaccio, and the resemblance of their style supports the supposition. The time of his death is not known.

MASON, Sir JOHN, an eminent statesman, who was employed by Henry VIII. in several embassies, and made a member of the privy council. He afterwards served Edward VI., and still held his places under Mary. Queen Elizabeth made him treasurer of her chamber, and he was chosen chancellor of the university of Oxford. He died in 1566. His favourite maxim was, "Do, and say nothing."

MASON, JOHN, dissenting minister, was born at Dunmow, Essex, in 1706. He was the author of a little volume of ethics, entitled "Self-knowledge," of which there have been numerous editions. Died, 1763.

MASON, WILLIAM, an English poet, was the son of a clergyman in Yorkshire, where he was born in 1725. He studied at Cambridge, and obtained a fellowship in Pembroke Hall. His first work was "Isis," in which he satirized the Jacobitism and high-church principles prevalent at Oxford. This was replied to by Thomas Wartou in his "Triumph of Isis." In 1752 Mason produced his "Elfrida," a dramatic poem, with choral odes on the ancient Greek model, which was well received, though the attempt to establish it on the stage proved abortive. On entering into orders he was presented to the living of Aston, and appointed one of the king's chaplains, and in 1762 he obtained the precentorship of York, with a canonry annexed. On the commencement of the American war, he became so active an advocate for freedom as to give offence at court, and was consequently dismissed from the chaplainship; but, like many other eager devotees at the shrine of liberty, when the French revolution broke out, he became alarmed, and his zeal considerably abated.

Besides the tragedies of "Elfrida" and "Caractacus," he wrote "The English Garden," a poem; "Memoirs of Gray," the poet, &c. Died, 1797. Mason was also author of the "Heroic Epistle to Sir W. Chambers," and other satirical pieces, published under the signature of Mac Gregor.

MASQUE DE FER, or the "Iron Mask," the name of an unknown person in France, who was conveyed in the most secret manner to the castle of Pigacrol, from whence he was transferred to the isle of St Marguerite. He was a man taller than ordinary, extremely well made, and was very attentive to his whole personal appearance. His education appeared to have been carefully attended to, and he amused himself by reading, and playing upon the guitar. He always wore a mask with steel springs, which was so constructed as to allow him free liberty to eat and drink. His keepers treated him with the greatest respect. At Pignerol he was intrusted to the charge of an officer named St Mars, on whose appointment as lieutenant of the isles, this unknown personage accompanied him, as he finally did to the Bastille, where he died in 1703, and was buried under the name of Marchiali. Conjecture has exhausted itself to discover who this mysterious personage might be. Voltaire observes, that at the period when the prisoner was confined, no person of importance disappeared from Europe; and yet it cannot be doubted that he must have been one. Laborde, first valet de chambre of Louis XV., and who had received from this prince many proofs of confidence, showed a desire to discover him. The king replied, "I pity him, but his detention injures only himself, and has prevented great misfortunes; you cannot know him." The author of "Secret Memoirs," published in 1745, pretends that it was the count of Vermandois, who was arrested, it was said, for having given a blow to the dauphin. Lagrange Chancel, in a letter to Frerou, attempts to prove that the prisoner was the duke of Beaufort, and that he was falsely reported to have been killed at the siege of Candia. St Foix, in 1768, wished to prove that he was the duke of Monmouth, who was said to have been beheaded in London, but who had been withdrawn from punishment. In a dissertation which precedes the romance of "The Man with the Iron Mask," by Regnault Warin, the author endeavours to prove that this mysterious personage was the son of the duke of Buckingham and Anne of Austria, and goes so far as to give the portrait of the prisoner. But still no satisfactory evidence has yet been given to establish any one of the hypotheses, and the secret history of "Masque de Fer" is, perhaps for ever, hidden beneath an impenetrable veil.

MASSENA, ANDRÉ, a French general, created prince of Essling, duke of Rivoli, and marshal of France, was born at Nice, in 1758. He went through the regular gradations in an Italian regiment, commencing his military career at the age of 17. After 14 years' service he obtained his discharge; but, in 1792, the revolution presented an enviable field for the display of military talents,

of "Elfrida" and "The English Garden of Gray," the poet, was also author of "Sir W. Chambers," &c., published under the name of "Iron Mask."

He was a person in France, of the most secret manner, from whence he fled to the island of St. Martin, taller than ordinary, and of very personal appearance. He was to have been executed, but amused himself by playing on the guitar. He was with steel springs, and was to allow him to drink. His keepers treated him with the greatest respect. At length he was ordered to the charge of the islands, on whose appointment he accompanied him, as a spy, where he died under the name of "John Bull," who has exhausted himself in mysterious personage. He observes, that at the execution he was confined, and disappeared from the world. It is not to be doubted that he was the same as the "Iron Mask," who, first valued by the king, and who had many proofs of confidence in him, but his desertion, and his presence in the "Secret Memoirs," tends to show that it was the same person who was arrested, it is given a blow to the monarch, in a letter to the king, and that he was killed at the execution, in 1768, wished by the duke of Monmouth, and he had been beheaded in the prison, which was withdrawn from the king's sight. The Man with the Iron Mask, the author of this mysterious history of the duke of Buckingham, and goes so far as to trait of the prisoner. Every evidence has yet been given in any one of the histories of "Masque," &c., ever, hidden beneath

and his natural sentiments in favour of liberty caused him to enter the service of the French republic, and he obtained rapid promotion. Napoleon, who was quick to discover genius, formed an intimate friendship with Massena; and, after the successful battle of Roveredo, in 1796, against Beaulieu, called him "the favoured child of victory." He had the chief command in Switzerland in 1799, when he finished the campaign by completely routing the Austro-Russian army under the Archduke Charles and General Korsakoff. In 1800 he commanded in Italy, but with less success than in his former campaigns. He was, however, again successful in the campaigns of 1805 and 1806, taking possession of Naples, and signaling himself in the campaign of Poland, which terminated by the treaty of Tilsit. He was afterwards employed in Germany, and eminently distinguished himself in the memorable battles of Essling and Wagram. His subsequent conduct in Spain, when advancing against Wellington, was equally skilful; but the prudence and superior tactics of his adversary prevented him from gaining fresh laurels; and the British general having taken up a strong position at Torres Vedras, Massena was at length compelled to retire. At the landing of Napoleon from Elba, in 1815, he swore allegiance to him, was made peer, and commander of the national guard at Paris, and contributed much to the preservation of tranquillity in that city during the turbulent period which preceded the return of the king. He lived afterwards in retirement, and died in 1817.

MASSILLON, JEAN BAPTISTE, an eminent French preacher, was born in 1663, at Hières, in Provence. He entered into the congregation of the Oratory, and became so celebrated for his eloquence, that the general of his order called him to Paris, where he drew crowds of hearers. Louis XIV., who knew the value of a kingly compliment, and seldom passed a bad one, observed to him, "When I hear other preachers, I go away much pleased with them; but when I hear you, I go away displeased with myself." In 1717 he was made bishop of Clermont, was admitted two years later to the French Academy, and he died in 1742. His discourses were published in 14 vols. 8vo, and are distinguished for simplicity, a graceful flow of eloquence, great knowledge of the human heart, and a richness of ideas.

MASSINGER, PHILIP, a distinguished English dramatist, was born at Salisbury, in 1583. He studied at Oxford, but quitted the university without taking a degree, in consequence, it is supposed, of having become a Roman Catholic. Little is known of his personal history, yet he appears to have been intimately connected with the wits and poets of his time, and died in 1639. In tragedy he is rather eloquent and forcible than pathetic; and, in richness and variety of humour, his comedy can by no means vie with that of his great master. Only eighteen of his plays are extant, among which are "The Virgin Martyr," "The Duke of Milan," "The Maid of Honour," "A New Way to Pay Old Debts," "The City Woman," &c.

MASUDI, a very celebrated Arabian tra-

veller, historian, and geographer, was born at Baghdad in the latter part of the 9th century. Eager for knowledge and laborious in study, he undertook extensive travels, and in A. D. 915 visited India and China; in the following years travelled in the principal countries of the East, and afterwards went as far west as Spain and Morocco. He was author of an immense number of works on an extraordinary variety of subjects. The most known of his writings is the work entitled "Meadows of Gold, and Mines of Gems;" a kind of cyclopaedia of history, geography, politics, &c., of all the nations he had visited. It is however merely a selection, with some additions, from two very voluminous works, entitled "History of the Times," and "Book of the Middle." His works are little known to Europeans. Died in Egypt, A. D. 956. A complete edition of the "Meadows of Gold," with a French translation, is undertaken by the Asiatic Society of Paris.

MATHER, INCREASE, D.D., one of the early presidents of Harvard College, was born at Dorchester, Massachusetts, in 1639. His learning, zeal, and general abilities were of great service to the institution over which he presided, and he was a skilful and efficient servant of the Commonwealth. In 1685 he was deputed to England as agent of the province, to procure redress of grievances. When James II. published his declaration for liberty of conscience, Dr Mather was again sent to England with an address of thanks to the king; but, before his return, the revolution occurred, and he obtained from William a new charter for the colony of Massachusetts. He was the author of "A History of the War with the Indians," "An Essay on remarkable Providences," and some other works. Died, 1723.

MATHER, COTTON, son of the preceding, was born at Boston in 1663, studied at Harvard University, and at the age of 20 was appointed co-pastor with his father at Boston. He was a zealous minister, a voluminous writer, and a courageous opponent of the despotic measures of Charles II. and James II. in the colony of New England. He made himself especially notorious as a believer in witchcraft, and by his influence caused a fearful persecution of those charged with it. Enormous excitement was occasioned, especially at Salem, a village near Boston, numerous trials were had, and a large number of persons were put to death; while many more lay in prison. At last the terrible affair produced a reaction in popular feeling, the trials were discontinued, and the prisoners liberated. Mather lost his influence from that time. Among the most noteworthy of his three or four hundred works are—"Memorable Providences relating to Witchcraft and Possessions;" "The Wonders of the Invisible World; or, Observations upon the Nature, the Number, and the Operations of the Devils;" "Magnalia Christi Americana," an important though unmethodical contribution to the Ecclesiastical History of New England;" and "Curiosa Americana," which gained him admission, in 1713, to the Royal Society of London. Cotton Mather was the friend, in his old age, of

Benjamin Franklin, who acknowledges his obligations to some of his writings. Died, 1728.

MATHEW, THEOBALD (FATHER MATHEW), Aposite of Temperance, was born at Thomastown House, Tipperary, in 1790. He was of a good family of Welsh origin, was remarkable in childhood for beauty and sweetness of disposition, and by a casual word of his mother was determined his devotion to the priestly office. He was sent to Maynooth, but left it suddenly in 1808, and joined the Capuehin Minorites, and in 1814 he was ordained priest. After a short residence at Kilkenny, where, as preacher in the Friary church, he became very popular, he settled at Cork as coadjutor to Father Donovan, and with great earnestness and faithfulness devoted himself to his work, especially showing himself the friend and counsellor of the poor. The daily sights and sounds of the streets of Cork, and the fearful prevalence of drunkenness, deeply moved his compassionate heart, and another chance word, spoken by a Quaker, sufficed to make him the Apostle of Temperance. He applied himself to the task about 1837, toiled for a year and a half before any impression seemed to be made on the enormous mass of evil and misery, and then success began, and rapidly rose to a full tide, and the name and fame of this better "Liberator" spread over the world. The most overpowering enthusiasm attended him in all the towns he visited, and from twenty to forty thousand persons are said to have pledged themselves to abstinence in a day. He extended his mission with like success to the principal towns of England and to the United States, and throughout his life he worked unweariedly in his chosen field. He was of a most catholic spirit, utterly disinterested, and a thorough gentleman. His thoughtless liberality involved him in pecuniary difficulties, which threw a shadow over his life. During his latter years he received a pension of £300 from the government. Died at Queenstown, December 8, 1857. A statue has been erected to him at Cork, and his "Biography" has been generally written by Mr Maguire.

MATHEWS, CHARLES, a comedian of transcendent ability, and one who was long regarded as the master-mind of the mimic art, was born in 1776. He was the son of a bookseller in the Strand, attached to the Wesleyan connection, and who had placed him in Merchant Taylors' school, and apprenticed him to learn his own business. The stage, however, proving more attractive to young Mathews than the shop of his father, the latter gave him twenty guineas and his indentures, with a permission to follow the bent of his inclinations; and a promise of twenty guineas more if he would abandon histrionics, and "turn to an honest calling." Like most other actors while in their novitiate, he rambled about with provincial companies for a time; but the great versatility of talent he possessed soon placed him at the top of his profession, and rendered him a general favourite with the public. He was, however, no stranger to the despotic rule of managers, or the envious rivalry of

fell. His metropolitan engagement grew so large, and he was determined to "set up for himself," and to depend solely on his own exertions. For sixteen years previous to his death, he was accustomed to entertain audiences by his single efforts, in a species of entertainment entitled "Mathews at Home;" and never was admiring crowds more highly delighted than in witnessing the vivid portraits which he so accurately drew. The "At Homes" of Mathews were not only well received throughout Great Britain and Ireland, but also in America, where some of his most felicitous portraits were sketched. While on his passage from that country he was taken ill, and on arriving at Liverpool his malady rapidly increased. He expired on his birthday, June 28th, 1835. He was twice married, and had one child only. Charles Mathews, also celebrated as a comedian.

MATHIAS, THOMAS JAMES, the reputed author of that powerful satire, "The Pursuits of Literature," was educated at Eton, and Trinity College, Cambridge. During a long life, spent in literary avocations, he naturally produced much that bore the mark of his superior talents; but though he wrote numerous satires, and displayed an extraordinary knowledge of Italian in the various poems he composed in that harmonious language, it was to the crude and caustic notes which are scattered with an unsparing hand throughout "The Pursuits of Literature," that he attained his chief celebrity; but for obvious reasons of a personal nature he never owned the authorship. Died, at Naples, 1835.

MATILDA, wife of William the Conqueror, was the daughter of Haldwin IV., count of Flanders, and of Adela, princess of France. She was married to William while duke of Normandy, in 1054, crowned queen of England in 1068, and died in 1083. Of her eleven children, the best known are Robert, who became duke of Normandy, William Rufus, and Henry Benuclerc, both of whom succeeded to the English crown. She had great influence with her husband, and brought about a reconciliation between him and his son Robert, who had taken up arms against him. To her is attributed the celebrated tapestry, preserved at Bayeux, representing the chief incidents in the conquest of England.

MATILDA, or MAUD, daughter of Henry I., king of England, and wife of Henry V., the emperor. On his death, in 1127, she married Geoffrey Plantagenet, earl of Anjou, by whom she had a son, afterwards Henry II., king of England. She was nominated in 1135 successor to the English throne by her father; but in her absence Stephen usurped the title. Arriving in England with a large army in 1139, she defeated Stephen, and was acknowledged queen in a synod held in 1141. Stephen afterwards defeated the empress, and Matilda was obliged to leave the kingdom. Matilda died in 1163, aged 67.

MATSYS, QUINTIN, an eminent painter, was born at Antwerp, in 1460. He was originally a blacksmith, but turned to painting to win the hand of a painter's daughter, and

succeeded both in art and in love. His greatest work is the "Descent from the Cross," now at Antwerp. One of his best pictures is that of the Two Misers, in the Royal Collection at Windsor. His pictures are all remarkable for very careful finish. He died in 1529.—His son, JAN MATSYS, was also a painter of considerable merit.

MATTHESON, JOHANN, an eminent musical composer and performer, was born at Hamburg, in 1681; and gave such early indications of talent, that at nine years of age he was able to perform compositions of his own on the organ. He composed music for the church and for the theatre, and was always present at the performance of it. Notwithstanding he gave up so much time to the pursuit of his favourite science, producing operas, anthems, and treatises on music, he held the office of secretary to the English resident in Hamburg for several years, and was intrusted with the conduct of various important negotiations. Died, 1764.

MATTHEW PARIS, a Benedictine monk of St Alban's, who flourished in the reign of Henry III. He is said to have enjoyed the favour of the king, and to have been sent on a mission to Norway by Pope Innocent IV. He was a mathematician, poet, divine, and historian; a man of great accomplishments and of rare integrity. His principal work is the "Historia Major," a history of England from 1066, the period of the Norman Conquest, to 1259, the year in which he died. He also wrote an epitome of this work, and the Lives of the Abbots of St Alban's.

MATTHEW of Westminster, an English historian of the 14th century. He was a Benedictine monk of the abbey of Westminster, and is highly esteemed for his veracity, acuteness, and diligence. The "Flores Historiarum" is a kind of Universal History, beginning at the creation, and coming down to the year 1307. Its authorship is however very uncertain.

MATTHIAS, emperor of the West, son of Maximilian II., was born in 1557. At the age of 21 he was sent by the Emperor Rudolph II. to take the government of the Low Countries then in revolt against Spain, but he was unequal to the task, and in a few years returned. In 1592, he commanded the army against the Turks in Hungary, and three years later became heir presumptive by the death of his brother Ernest. He was elected king of Hungary in 1607, king of Bohemia in 1611, and on the death of Rudolph in the following year he was chosen emperor. He resigned the crown of Bohemia to his cousin Ferdinand. In 1617, and the persecution of the Protestants in that country by the latter occasioned the Thirty Years' War. Matthias died, broken down by the sense of the calamities impending over his dominions, 1619.

MATTHISSON, FRIEDRICH SON, a celebrated lyric and elegiac poet, was born near Magdeburg in 1761; accompanied the princess of Dessau in various tours through the south of Europe; and in 1812 was appointed librarian at Stuttgart. Among his poems is to be found the celebrated "Adelaide,"

which, as set to music by Beethoven, is still listened to with delight. Died, 1831.

MATTHIEU, PIERRE, a French historian, was born in the diocese of Basle, in 1563, and died in 1621. He became an advocate at Lyons, and was made historiographer of France. He wrote "Histories of Henry IV.," "Louis XI.," and "St Louis;" also the "History of France," 2 vols. folio; and "La Guisliade," a tragedy.

MATURIN, ROBERT CHARLES, an Irish dramatist and miscellaneous writer, was born at Dublin, and educated in Trinity College, of that city; and, on entering into orders, obtained the curacy of St Peter's church. "Bertram," a wild but powerful tragedy, was the first production which, by its singular success, brought him into notice as an author. This play was performed at Drury Lane through the influence of Lord Byron and Sir W. Scott, the latter of whom spoke of it as "one of those things which will either succeed greatly or be damned gloriously, for its merits are marked, deep, and striking, and its faults of a nature obnoxious to ridicule." Having anticipated his resources, without contemplating the possibility of a failure, he contracted embarrassments, from which he was seldom entirely free. But he still prosecuted his literary pursuits, and wrote several popular novels, the first three of which, "The Fatal Revenge," "The Wild Irish Boy," and "The Milesian Chief," were published under the assumed name of Dennis Jasper Murphy. He was also the author of "Melmoth" and "Woman;" "The Universe," a poem; and the tragedies of "Manuel" and "Ferdolpho." Maturin was a most eloquent and energetic preacher; and six "Controversial Sermons," which he published in 1824, exhibit him as a well-read scholar and an acute reasoner. Died, 1825.

MATY, MATTHEW, an eminent physician, critic, and miscellaneous writer, born in Holland in the year 1718, but settled in England, where he became secretary to the Royal Society, and principal librarian of the British Museum. Died, 1776.

MATY, PAUL HENRY, son of the preceding, was born in 1745. He was appointed one of the librarians of the British Museum, and, in 1778, a secretary of the Royal Society; but, in 1784, when there were great divisions in the society, occasioned by the dismissal of Dr Hutton from the post of foreign secretary, Mr Maty resigned his place. Died, 1787.

MAUPERTUIS, PIERRE LOUIS MOREAU DE, an eminent mathematician and astronomer, was born at St Malo, in 1698. He studied in the college of La Marche, at Paris; and in 1723 was admitted a member of the Academy of Sciences, the memoirs of which contain many of his communications. A few years later he was chosen fellow of the Royal Society of London. In 1736 he was sent on an expedition to the polar circle, to ascertain the figure of the earth by measurement of an arc of the meridian. In 1740 he was invited to Berlin by the king of Prussia, Frederick the Great, whom he followed to the field, and was present at the battle of Mollwitz, where he was made pri-

olitan engagement was determined to depend solely on sixteen years previous single efforts, in which he was admitted to the rank of knight. He was admitted to the rank of knight in 1717. He was admitted to the rank of knight in 1717. He was admitted to the rank of knight in 1717.

While on his passage was taken ill, and his malady rapidly increased. He died on his birthday, June 17, 1717. He was twice married, and was the father of several children.

JAMES, the reputed author of the "Purcelliana," was educated at Eton. He was a member of the Society of Antiquaries. During a variety of occasions, he was employed in that office. He wrote a variety of works, and was a member of the Society of Antiquaries. He was a member of the Society of Antiquaries. He was a member of the Society of Antiquaries.

soner, and carried to Vienna. On regaining his liberty, he married and settled at Berlin, and was appointed president of the Royal Academy of Sciences. In this office, however, he became involved in a quarrel with Voltaire, which embittered his latter days, from the sarcasm with which the latter continued to assail him. The enormous vanity of Maupertuis might justify much laughter and sarcasm. The works of Maupertuis form 4 vols. Died, at Basel, 1759.

MAUR, ST, or MAURUS, the favourite disciple of St Benedict, was one of the young nobles who, early in the sixth century, were attracted by his fame, and joined him in his wild retreat at Subiaco. He followed him to Monte Casino, and shared in the reputation of his master both for holiness and power of working miracles. Before the death of St Benedict Maurus left Italy and settled in France; and founded the first Benedictine monastery in that country at Glanfeuillic on the Loire. "The name of St Maur," says Dean Milman, "is dear to letters." The reformed order of Benedictines, known as the "Congregation of St Maur," was founded in 1618, and among its members have been some of the greatest scholars of France.

MAUREPAS, JEAN FRÉDÉRIC PHELIPPEAUX, Count de, a French statesman, born in 1701. He was made minister of marine at the age of 24, and was afterwards at the head of the foreign department. He was hasty in his decisions, amiable in manners, quick in conception, artful, and penetrating; but being accused in 1749 of writing an epigram on Madame de Pompadour, he was banished from court. After a lapse of 25 years, he was placed at the head of the ministry by Louis XVI., but he was found incapable of performing its duties, and quite destitute of the vigour necessary to avert the troubles which then threatened the kingdom. Died, 1781.

MAURICE, emperor of the East, was born in Cappadocia, A.D. 539. He rendered great services to the empire under Justin and Tiberius, especially in his four campaigns in Persia, 578—581: and on his return to Constantinople, in 582, was declared Cæsar, and soon after crowned emperor, and married the daughter of Tiberius. His reign of 20 years was occupied almost constantly with wars; wars with the Persians, terminated by the defeat of Bahram, and the restoration of Chosroes in 591; and wars with the Avars, which lasted from 592—599. These were, however, mostly carried on by his generals. In 599 Comenticus was defeated, and an immense number of his troops captured by the Avars, who, on the refusal of Maurice to ransom them, put them all to death. During the reign of Maurice, John, patriarch of Constantinople, assumed the title of Universal Bishop, with the sanction or connivance of the emperor; and in 595 the pope, Gregory the Great, indignant at this claim of supremacy, wrote letters of remonstrance to the emperor and empress, who, however, only treated him with contempt. Hence the triumph of Gregory in the fall of the emperor and his shameful flattery of the tyrant Phocas. In

602 a mutiny broke out in the army on the Danube, Phocas was proclaimed emperor, and Maurice with his five sons was murdered at Chalcidæon. The six years later his wife and daughters were put to death by Phocas.

MAURICE OF NASSAU, prince of Orange, one of the most famous generals of modern times, was the youngest son, by a second marriage, of William I., prince of Orange, was born at Dillenburg, 1567, and was studying at Leyden, in 1684, when his father was assassinated. The provinces of Holland and Zealand, and, soon after, Utrecht, immediately elected the young prince stadtholder; and three years afterwards he was appointed captain-general of the United Provinces. His task was to conquer the Spaniards, and recover from them the large portion they still occupied of the Low Countries. Previous to the truce of 12 years, concluded in 1609, about 40 towns and several fortresses had fallen into his hands. His life was an almost unbroken series of battles, sieges, and victories. He had foes worthy of him in the celebrated duke of Parma, and the Italian General Spiaola. Like Montecuculi, he possessed the rare art of conducting a march and pitching a camp; like Vauban, the genius of fortification and defence; like Eugene, the skill to support the most numerous armies in the most unproductive and exhausted country; like Condé, that unerring coup d'œil which determines the issue of a battle; like Charles XII., the power of rendering the troops insensible to cold, hunger, and sufferings; like Turenne, that of sparing human life. In the opinion of Foindr, Maurice was the greatest infantry general that had existed since the time of the Romans. The moral qualities of Maurice were not worthy of his renown as a soldier. And most of all his name stained by his base treatment of the noble old pensionary Barneveldt, who saw and fearlessly opposed the selfish aims of Maurice. Maurice again took part in the war in 1621, and died in 1625. He was succeeded by his brother Frederick Henry.

MAURICE of Saxony. [SAXE, Marshal.] MAURICE, THOMAS, a learned oriental scholar and historian, was born at Hertford, in 1734; was educated by Dr Parr, and at St John's and University Colleges, Oxford. In 1791, he published the first two volumes of his "Indian Antiquities," which were succeeded, at intervals, by five more. In 1795, appeared the first volume of the "History of Hindostan," which was completed in a third volume, in 1799. About the same time he obtained the post of assistant librarian at the British Museum. In 1802, he produced the first volume of the "Modern History of Hindostan;" and in 1804 the second volume. Besides the works above mentioned, Mr Maurice wrote "Poems," "Sermons," his own "Memoirs," &c., in all of which a discovered spirit, elegance, and perspicuity. Died, 1824.

MAURO, FRA, a celebrated mathematician and cosmographer, of the 15th century, was a monk of the order of Camaldules at the monastery of St Michael, near Venice. He was chosen, in 1444, member of a commission to improve the course of the river

hreats, and to direct the works on the La-
goons. Between 1437-59, he constructed a
map of the world, which is still preserved
in the library of his monastery. He ap-
pears to have had some able designers to
assist him in his labours, and to have formed
a sort of school. The dates of his birth and
death are unknown.

MAURY, JEAN SIFFREIN, a French car-
dinal, was born in 1746; studied at Lyons;
and, on entering into orders, became a ce-
lebrated preacher at Paris, was admitted in
1785 to the Academy, and obtained an abbey.
When the revolution broke out, he was
chosen one of the representatives of the
clergy in the states-general, where he dis-
tinguished himself by his eloquence in behal-
f of his order, and also in defence of royalty.
On the dissolution of the Constituent Assem-
bly, he went to Italy, was nominated bishop
of Nizza, and, in 1791, made a cardinal; and
in 1808 Napoleon gave him the archbishopric
of Paris, but in 1814 he was obliged to quit
the archiepiscopal palace, and retire to
Rome. He was not only a great orator, but
a man of ready wit. On one occasion, when
a furious mob was following him with cries
of "A la lanterne l'Abbé Maury" he turned
round, and coolly said, "Do you think you
should see clearer if I were there?" which
well-timed joke saved his life. He was the
author of several works, the best of which
is his "Essai sur l'Eloquence de la Chaire."
Died, 1817.

MAVOR, WILLIAM, LL.D., was a native
of Aberdeenshire, and born in 1758. He
came to England early in life, and after
being engaged as assistant in a school
at Burford, established himself as school-
master at Woodstock, where he gained the
patronage of the duke of Marlborough, en-
tered into holy orders, and was presented
to the vicarage of Hurley, in Berkshire.
But it is as author and compiler of useful
books that Dr Mavor is chiefly remembered.
Among his literary labours are a "Universal
History," in 25 small volumes; a collection
of "Voyages and Travels," also in 25 vo-
lumes; "The British Tourist," 6 vols.; "The
Modera Traveller," 4 vols.; Histories of
Crease, Rome, and England; &c. Died,
December 29, 1837.

MAWE, JOSEPH, an eminent mineralogist
and conchologist, was born about 1755, tra-
velled in various parts of South America,
and published numerous works on the sub-
ject of his researches. Among them are,
"Travels in the Interior of Brazil," a "Trea-
tise on Diamonds and Precious Stones," "Fam-
iliar Lessons on Mineralogy and Geology,"
and "The Mineralogy of Derbyshire." He
died in 1829.

MAXENTIUS, MARCUS AURELIUS VAL-
ERIIUS, Roman emperor, was the son of
Maximianus Herculeus, and declared him-
self emperor in 306. He was opposed by
Galerius Maximianus, who was defeated,
and slew himself. Maxentius then marched
into Africa, where he became odious by his
cruelties. Constantine afterwards defeated
him in Italy, and he was drowned in cross-
ing the Tiber, in 312.

MAXIMIANUS, GALERIUS VALERIUS,
emperor of the East, was originally a shep-

herd in Dacia, afterwards a soldier, and was
raised to the imperial dignity by Diocletian,
who also gave him his daughter in marriage.
In 305 he compelled Diocletian to abdicate
the throne; but his cruelty soon rendered
him odious to the Romans, who raised Max-
entius to the throne. Died, 311.

MAXIMIANUS, MARCUS AURELIUS VAL-
ERIIUS, surnamed HERCULIUS, Roman em-
peror, who, from being a common soldier,
was associated in the government by Dio-
cletian. When that emperor abdicated the
crown in 304, he compelled Maximianus,
much against his will, to do the same; but
about a year afterwards the latter resumed
the dignity, and opposed his son Maxentius.
The troops, however, mutinied against Maxi-
mianus, who fled into Gaul, where he was
put to death by order of Constantine, in 310,
aged 60.

MAXIMILIAN I., emperor of the West,
son of Frederick III., was born in 1459. At
the age of 18 he married Mary, heiress of
Charles the Bold, duke of Burgundy, and
was involved in a war with France. Mary
dying in 1482, he obtained the promise of
the hand of Anne, heiress of Brittany, but
she was afterwards married to Charles VIII.
of France. In 1486 Maximilian was elected
king of the Romans, and in 1493 he succeeded
his father in the empire. He was the first
who took the title of emperor without being
crowned at Rome. For the sake of a large
dowry he married Blanche, daughter of Lodo-
vico Sforza, whom he made duke of Milan;
and soon after married his son Philip to Jo-
anna, daughter of Ferdinand and Isabella, and
thus brought Spain into the power of the
House of Hapsburg. He invaded Burgundy,
but was abandoned by the Swiss who formed
part of his army; he then made war on the
Swiss, but was several times defeated, and
had to make peace with them. In 1508 he
set out for Rome, was refused a passage
through the Venetian territories, and, at-
tempting to force his way, was defeated.
The same year he joined in the famous
league of Cambray against the Venetians;
from which he withdrew in 1513, and formed
another league against France. He served
in the English army as a volunteer at the
siege of Terouenne, and contributed to the
victory of Guinegate. In 1516 he made an
unsuccessful attempt on the Milanese. Two
years later he assembled the diet of Augs-
burg, at which Luther, just commencing
his great task, appeared on citation, and
appealed to the pope. Maximilian was not
only ambitious of dominion, and successful
in his schemes of aggrandizement, but he
had the desire to be pope and to be cano-
nized. Died in January, 1519.

MAXIMINUS, CAIUS JULIUS VERUS,
Roman emperor, was of barbarian origin,
and was at first a shepherd in Thrace. He
was a monster in size, strength, voracity,
and ferocity, and when about 20 years of
age became a soldier in the Roman armies.
His capacity for fighting procured him rapid
advancement, and under Alexander Severus
he had the command of a legion, with which
he served on the Rhine. In A. D. 235 he
took part in a conspiracy against Alexander,
and on his murder by the soldiers, was pro-

claimed emperor. He continued the war in Germany, and devastated a large tract of country. The Gordiani having been proclaimed in Africa, Maximinus hastened to Italy, and laid siege to Aquileia, which made heroic resistance to the hated tyrant. He was there murdered by his soldiers, together with his son, 238. It is said that Maximinus was eight feet high, that he could eat 40 pounds of meat a-day, and could break the leg of a horse with a kick.

MAXIMUS, FABIVS. [FABIVS MAXIMUS.]

MAXIMUS, MAGNVS, Roman emperor, a Spaniard, was general of the Roman army in Britain, when he proclaimed himself emperor, in 383. Gratian marched against him, but was defeated, and assassinated. Maximus having made himself master of Gaul, Britain, and Spain, fixed the seat of his empire at Treves. He next marched into Italy, where he committed dreadful cruelties, but was at last besieged in Aquileia, by the Emperor Theodosius. His soldiers delivered him up to Theodosius, who caused him to be beheaded, in 388.

MAXIMUS TYRIVS, a celebrated philosopher of the 2nd century, was a native of Tyre, in Phoenicia, whence he took his name. It is generally supposed that he flourished under the Antonines. He appears to have adopted the principles of the Platonic school, and left 41 dissertations on various philosophical topics, which are still extant.

MAY, THOMAS, poet and historian, was born in Sussex, in 1594, and educated at Cambridge; after which he entered of Gray's Inn, where he wrote some plays and translated several authors, particularly Lucan. Charles I. employed him in writing two historical poems; one on the life of Henry II., and the other on the reign of Edward III. But in the civil war May joined the popular party, and was appointed secretary and historiographer to the parliament. He published the "History of the Parliament which began in 1640," and an abstract of the same entitled a "Breviary of the History of the Parliament of England," a work which was extremely obnoxious to the royal party. After the Restoration, May's remains were removed from Westminster Abbey, and his monument destroyed. Died, 1659.

MAYENNE, CHARLES OF LORRAINE, Duke of, second son of Francis of Lorraine, duke of Guise, was born in 1554. He displayed great courage at the sieges of Poitiers and Rochelle, and at the battle of Montcontour. He also defeated the Protestants in Guienne and Dauphiny. In 1589 he entered Paris, and, as head of the famous League, exercised almost sovereign power for a time, with the title of lieutenant-general of the state and crown of France. He carried on war with Henry IV., and was defeated by him at the battles of Arques and Ivry. Disappointed in his hope of being elected king in 1593, and seeing Paris reduced, he kept up his resistance for some time in Burgundy, and at last made his peace with Henry in 1596. Died, 1611.

MAYER, SIMONE, German musical composer, was born in Bavaria, about 1760. He

studied and chiefly lived in Italy, where he devoted himself to operatic music. Among his best operas are "Medea" and the "Misteri Eleusini," which with others of his works gave an impulse to the progress of the art by their novel richness of harmony and varied accompaniments. Died, 1815.

MAYER, TOBIAS, a celebrated astronomer, was born at Marbach, in the duchy of Wurtemberg, in 1723. He taught himself mathematics, and at the age of 14 designed machines and instruments with the greatest dexterity and accuracy. His various merits procured him an invitation to Göttingen, as professor of mathematics, in 1750, and the Academy of Sciences chose him a member. About this time astronomers were employed in endeavours to solve the problem of finding the longitude at sea. Mayer overcame all difficulties, and his theory of the moon, and astronomical tables and precepts, were rewarded, by the English board of longitude, with £3000, which sum was paid to his widow; for, exhausted by his incessant labours, this astronomer died, in 1762, at the early age of 39. Mayer invented the repeating circle, which was improved by Borda. His works are numerous and valuable.

MAYNARD, Sir JOHN, an English statesman and lawyer, was born at Tavistock, in Devonshire, about 1602. After having studied at Exeter College, Oxford, he entered at the Middle Temple, and was in due course called to the bar. In the long parliament he distinguished himself as one of the prosecutors of Strafford and Laud; but afterwards he opposed the violent proceedings of the army, and the measures of Cromwell, for which he was twice sent to the Tower. After the Restoration, he was knighted, but refused the honour of being a judge. At the revolution he displayed great talent in the conference between the Lords and Commons, on the question of the abdication of the throne by James II., and warmly advocated that measure. When William III., in allusion to Serjeant Maynard's great age, remarked that he must have outlived all the lawyers of his time, Sir John happily replied, "Yes; and if your highness had not come over to our assistance, I should have outlived the law too." He was appointed one of the commissioners of the great seal, in 1689; and died in 1690.

MAYNE, JASPER, a dramatic writer of the 17th century, was born at Hatherleigh, in Devonshire, and received his education at Westminster School, and Christchurch, Oxford, where he took the degree of D.D., and entered into holy orders. His attachment to the royal cause exposed him to suffering during the civil war; but, after the Restoration, he rose to be archdeacon of Chichester. His dramatic productions display much broad humour; and he gave an odd instance of his fondness for a joke even in his will, by leaving an old trunk to his man servant, saying, that he would find in it something to make him drink. When the funeral was over, the poor fellow hastened to enjoy his treasure, and, on opening the trunk, found a red herring! Died, 1672.

ardinal and first

minister of Louis XIV., was born of a noble family, in Italy, in 1602. He studied at Alcalá, in Spain, after which he went to Rome, and became attached to the service of Cardinal Sacchetti, whom he accompanied on a mission into Lombardy. Mazarin rendered important assistance in the negotiations which effected a peace between the French and Spaniards. This procured him the esteem of the Cardinals Richelieu and Barberini, by the latter of whom he was recommended to the pope, who sent him, in 1634, as nuncio-extraordinary to the court of France. Recalled two years later, he entered the service of the French king in 1639, and was sent ambassador to Turin. In 1641 he was made a cardinal, and on the death of Richelieu, at the end of the following year, succeeded him as prime minister. At first he was rather popular, but in a short time cabals were formed against him, and he was dismissed from the royal presence, and compelled to leave the kingdom. But though a price was set upon his head, Mazarin contrived to dispel the storm; and he even returned to court, in 1653, with increased éclat, and held the reins of power till his decease, in 1661. This great minister had a leading part in the treaty of Westphalia, and has alone the honour of negotiating the treaty of the Pyrenees. As a politician he displayed great talents; as a man he possessed few virtues; his policy was characterized rather by finesse and forbearance, than by force; and his administration is marked by many grave faults. On his death-bed he endowed the college which bears his name.

MAZEPPA, JOHN, hetman of the Cossacks, whom Lord Byron has made the hero of a poem, was born about the middle of the 17th century, in Podolia, of a poor but noble Polish family, and became page to John Casimir, king of Poland. In this situation, Mazeppa had an opportunity of acquiring various useful accomplishments; but an intrigue was the foundation of his future elevation. A Polish nobleman, having surprised Mazeppa with his wife, ordered him to be tied naked upon a wild horse, and committed to his fate. The animal had been bred in the Ukraine, and directed his course thither; where some poor peasants found him half dead, and took care of him. Their warlike roving life suited his disposition; he made himself conspicuous and beloved by his dexterity, bodily strength, and courage; his knowledge and sagacity procured him the post of secretary and adjutant to the hetman Samoilowitz; and, in 1687, he was elected in his place. He gained the confidence of Peter the Great, who loaded him with honours, and he was finally made prince of the Ukraine. But though a prince, he was still a rascal; and his restless spirit made him resolve to throw off the yoke of subordination. He joined with Charles XII., who had just given a king to Poland, and aimed, by his assistance, to throw off the yoke of subordination. For a long time the intrigues of Mazeppa against Peter were disbelieved by the latter; but at length he openly joined the Swedish monarch, who by his advice fought the fatal battle of Pultowa. He then

sought refuge at Bender, where he died in 1709.

MAZZHINGI, JOSEPH, Count, a distinguished composer, was the descendant of an eminent Tuscan family, but was born in England, and of an English mother. He was very early noted for his musical ability, and so incessantly were his studies pursued, and so ably directed by his preceptors, that he was considered qualified for the difficult post of director of the opera house when he was but little more than 18 years of age. The theatre being destroyed by fire in 1789, among the valuable property that was lost was the whole of the music of Piesiello's opera, "La Locanda," and Mazzhingi rewrote the orchestral parts from memory. "The Blind Girl," the "Turnpike Gate," "Paul and Virginia," and a long list of other once popular pieces, were from his fertile pen, and Sir Walter Scott warmly thanked him for the manner in which he adapted some of his poetry. Died, 1811, aged 80.

MAZZOLINI, LODOVICO, an Italian painter, born at Ferrara about 1181. He is sometimes called Lodovico Ferrarese, and from Vasari's slight mention of him by a wrong name his works have been sometimes attributed to other artists. He excelled in pictures of small size, to which he gave high finish, and in which he usually painted architectural backgrounds. He was a pupil of Lorenzo Costa. There are three of his pictures in the National Gallery, considered good examples of his style. His best work, "Christ disputing with the Doctors," is in the Berlin Gallery. Died at Ferrara, 1530.

MAZZUCHELLI, GIAMMARIA, Count, a Venetian nobleman, was born at Brescia, in 1707, became keeper of the public library there, and died in 1765. He early projected a series of biographies of all the eminent writers of Italy, and devoted his life to the accomplishment of the task. His great work is entitled "Gli Scrittori d'Italia," and is in 6 vols. folio. He left many works in manuscript, besides a very voluminous correspondence.

MAZZUOLI, FRANCESCO, a celebrated painter, known by the name of PARMIGIANO, was born at Parma, in 1504. He became acquainted with Correggio, and studied his works; and in 1523 he went to Rome. There he studied the works of Michael Angelo and Raphael, and was employed in the Vatican. He narrowly escaped with his life at the sack of Rome by the Constable de Bourbon, when he was finishing the fine picture now in the National Gallery entitled "The Vision of St Jerome." One of his most famous frescoes is "Moses breaking the Tables of the Law," in a church at Parma. His reputation as a painter was very great, but in his last years he wasted his energies in the delusive labours of alchemy. Died, 1540.

MCCAUL, ALEXANDER, D.D., a distinguished church of England divine and Hebrew and Rabbinical scholar, was born at Dublin, May 16, 1799. He entered Trinity College, Dublin, in 1811, graduated B.A. in 1819, and became tutor to the earl of Rosse, since eminent as astronomer and mathematician. After a short visit to Poland as

missionary to the Jews, he was ordained in 1822; went soon after to St Petersburg and obtained from the Emperor Alexander protection for the mission in Poland; and in 1832 became a home missionary of the London Jews Society. He assisted in the translation of the New Testament and the Anglican Liturgy into Hebrew, and was created V.D. *honoris causa* by the university of Dublin, in 1837. Three years later he was named principal of the Hebrew College for Missionary students; was soon after called to the chair of Hebrew and Rabbinical Literature at King's College, London, and in 1846 to the chair of Divinity. Dr McCaul was offered the bishopric of Jerusalem, and also his choice of the colonial sees of Melbourne, Adelaide, Newcastle, and Capetown. He became rector of St James, Duke's Place, London, in 1843, rector of St Magnus, London Bridge, in 1850, and on the revival of Convocation was elected proctor for the diocese of London, which office he filled at the time of his decease. Among the numerous writings of Dr McCaul the most noteworthy are—"The Old Paths," "Sketches of Judaism," "Kimehl's Commentary on Zechariah translated," Warburtonian Lectures, Boyle Lectures, and "An Examination of Bishop Colenso's Difficulties." Of the last, his latest work, 13,000 copies were sold in a few months. Dr McCaul contributed the essays on "Prophecy" and "The Mosaic Records of Creation" to the volume entitled "Aids to Faith." Died, November 13, 1863. A "Memorial Sketch" by his eldest son, the Rev. Joseph B. McCaul, appeared the same year.

MEAD, RICHARD, an eminent physician, was born at Stepney, in 1675; studied at Utrecht, Leyden, and Padua, where he took his doctor's degree; and, on his return to England, was appointed physician to St Thomas's Hospital. He became very distinguished in his profession; was vice-president of the Royal Society, censor of the College of Physicians, and physician to George II. He interested himself much in the introduction of inoculation for the small-pox, and assisted in the preliminary experiments made on criminals. His works consist of "A Mechanical Account of Poisons," a "Discourse concerning Pestilential Contagion," "De Imperiis Solls ac Lunæ in Corpora Humana et Morbis Inde orlundis," "Medicina Sacra," and "Molta Medica." Dr Mead formed a large collection of art-treasures, many of which were sold by him to Frederick, prince of Wales, and now form part of the Royal Collection at Windsor. Died, 1754. His portrait, by Allan Ramsay, is in the National Portrait Gallery.

MECHAIN, PIERRE FRANÇOIS ANDRÉ, a French astronomer and geometriean, was born at Laon, in 1744. On settling at Paris in 1772, he was favourably received by Lalande, who procured for him an appointment in the dépôt of marine charts. He calculated the orbit of the comet of 1774, and discovered that of 1781. In 1782 he was admitted to the Academy of Sciences, and was subsequently employed in the measurement of an arc of the meridian in France and Spaln. He edited the *Cronnaissance des Temps* from 1786 to 1794. Died, 1805.

MECHITAR, an Armenian monk, founder of the order of Mechitarists, was born in 1676. He spent his youth in study, became a priest, but soon passed from the Greek church into the church of Rome, and was involved thenceforth in a long and perilous conflict. Desirous of visiting Rome, he set out, but by weather and ill health was compelled to return. With a handful of followers, organized at Fern in 1701, he settled in the Morea two years later, and founded a convent. The conquest of the Morea by the Turks disturbed them, and they escaped to Venice; the law of the state prevented their settling within the city, but the small island of San Lazzaro was given to them. There a convent was built, which has flourished ever since; and from the printing-press established in it a large number of Armenian works have issued. Mechitar was author of a Grammar and Dictionary of the Armenian language, and of other works. Died, 1749.

MEDE, JOSEPH, a learned divine, born in 1586, at Berden, in Essex; author of the "Clavis Apoclyptica," which is considered by biblical critics as one of the ablest expositions of the obscure prophecies to which it refers. Died, 1638.

MEDICI, CATHERINE DE. [CATHERINE.]

MEDICI, COSMO DE, an illustrious Florentine, surnamed "Father of his Country," was the son of Giovanni de Medici, and was born in 1389. He early took part in the important commercial concerns of his father, and also in the government of the Republic. He attended Balthasar Cossa, elected pope as John XXIII. to the council of Constance in 1414; and Cossa being there deprived of the papal dignity, found a home at Florence. In 1433 Rinaldo de Albizzi, head of a party opposed to the Medici, obtained the chief magistracy, and Cosmo was banished for ten years. He settled at Venice, and there founded the library in the monastery of St George. After one year he was recalled, and his life was thenceforth peaceful and prosperous. As chief magistrate Cosmo acted with consummate prudence; always aiming to rule without seeming to do so. He employed his influence and wealth in the patronage of literature and art, and had among his friends the most distinguished authors and artists of his age. He formed a large and valuable collection of manuscripts in various languages, which became the basis of the library known as the Laurentian. After the fall of Constantinople he welcomed many learned Greeks who sought refuge there. His influence on the political movements of Italy was immense. He once saved Florence from a war with Naples and Venice by calling in debts from these two states, and so incapacitating them for making war. He assisted Edward IV. of England with a large loan during the Wars of the Roses. In his latter years he applied himself to study, especially of the Platonic philosophy, and to farming. Died, aged 73, August 1, 1461.

MEDICI, GIAN GIACOMO. [MARIANNO.]

MEDICI, GIOVANNI. [LEO X.]

MEDICI, LORENZO DE', usually styled

that, in autumn 1832, he had carried his victorious arms within a few days' march of Constantinople. For seven years subsequently, Mehemet Ali remained undisturbed by war, during which his active mind was steadily directed to the internal improvement of his kingdom. But in 1839, the sultan resolved to have another trial of strength with his rebellious vassal, and despatched an army into Syria. Again was Ibrahim victorious on land, and the sultan found himself deprived of his navy, which was delivered into the hands of Mehemet Ali by a treacherous admiral. England and the allies (excepting France) resolved a second time to throw their shield over the sultan, and the English fleet, under Admiral Stopford and Sir Charles Napier, having battered down and wrenched Beyrout, Acre, and Sidon from his grasp, Mehemet Ali was compelled to resign Syria to the sultan in 1840. During the progress of this war, Mehemet Ali exhibited an instance of magnanimity that is scarcely to be found in the annals of war. At that period the overland mail was now carried across his dominions, when, instead of suspending its transit, in retaliation for what he must have deemed an aggression against himself, he commanded that every facility and protection should be given to those engaged in the duty. To raise Egypt, not only in her armaments but internal resources, to the scale of civilized Europe, was his ruling passion; and in this pursuit he shunned no means likely to prove successful. He had wars with the semi-barbarous tribes on his own frontiers, who had little chance with his disciplined and well-armed troops, and these conquests served to establish his power; but he had also to measure his strength with very different foes, and whom he could never dream of conquering: yet even those collisions with the powers of Europe did not shake his government, so broad was the basis on which he had placed it, and so enlightened the views which constantly directed his policy. He found Egypt a pachalic of the Porte, abandoned to a rude and careless sway, the effect of which was seen in the neglected state of cultivation, and the prevailing poverty of the inhabitants. He has handed it down to his successors a powerful kingdom, with ample resources, and, above all, with order and security prevailing; so much so, that foreigners can travel as safely within its limits as in the most civilized country. Mehemet Ali enjoyed robust health till nearly the close of his life. But, about two years before his death, his intellect became clouded, and in September, 1848, his sceptre passed to the hands of his stepson, Ibrahim Pasha, on whose death, ten months afterwards, it devolved on his grandson, Abbas Pasha, who has since died. Died at Alexandria, August 2, 1849.

MÉHUL, ÉTIENNE HENRI, a eminent musical composer, was born at Givet, in France, in 1763; and was an excellent organist when only 10 years old. He settled at Paris in 1779, where he studied with great advantage under Gluck; became inspector at the Conservatory of Music; professor of composition at the Royal School, member of

the Academy and Institute, and knight of the Legion of Honour. He produced the operas of "Stratonice," "Irajo," "Joseph," "Cora et Alonzo," &c., besides the ballets of "The Judgment of Paris," "Perseus and Andromeda," &c. Died, 1817.

MEIßHOM, JOHANN HEINRICH, physician, was born at Helmsstadt, in 1590. He became a professor at his native place, and afterwards physician at Lübeck, where he died in 1655. He wrote some works on medical subjects, and a "Life of Mæcenas," in Latin. — **HEINRICH MEIßHOM**, his son, was born at Lübeck in 1638. After travelling for improvement, he took his degree of M.D., and became professor of medicine, to which were added the chairs of history and poetry, at Helmsstadt, where he died in 1700. He published "Scriptores Rerum Germanicarum," 3 vols. folio.

MEIßHOM, MARC, in Latin **MEIßHOMIUS**, a German philologist, was born in Schleswig-Holstein in 1630. He lived some time at the court of Christina, queen of Sweden, who gave him a pension; was next librarian to Frederick III. of Denmark, and professor of belles lettres at Amsterdam. He visited England in 1674, and led a very restless life till 1711, when he died at Utrecht. Among his works are, a Dialogue on Proportion, a collection of seven Greek and Latin writers on Music, and an edition of Diogenes Laertius.

MEINERS, CHRISTOPH, a German historian and miscellaneous writer, was born in 1747, at Warstade, Hanover; studied at Göttingen, where he became professor of philosophy, and died in 1810, pro-rector of that university. Among his numerous works are, "A History of the Origin and Progress of Philosophy among the Greeks," "History of the Origin, Progress, and Decline of the Sciences among the Greeks and Romans," and others on kindred subjects.

MEISSNER, AUGUST GOTTLIEB, a German romance writer and dramatist, was born at Hantzen, in Lusatia, in 1757; studied at Leipzig and Wittenberg, and was successively keeper of the archives at Dresden, professor of belles lettres at Prague, and director of the superior schools at Fulda. Besides writing a number of historical romances and other works, he translated and abridged Hume's History of England. Died, 1807.

MELA, POMPONIUS, a Latin geographer, who lived in the 1st century of the Christian era. His treatise, in three books, "De Situ Orbis," contains a concise account of the state of the world as far as it was known to the Romans. By some authors he is supposed to have been related to Seneca and Lucan.

MELANCTHON, PHILIPP, condjutor with Luther in the Reformation, and one of the wisest and greatest men of his age, was born at Bretten, in the palatinate of the Rhine, in 1497. His family name was "Schwarz-erde," of which "Melancthou" is intended to be the Greek equivalent. While studying at Pfortsheim he became acquainted with the great scholar, Johann Reuchlin, who remained his friend. He next studied at

Heidelberg and Tübingen, and in 1518 was appointed Greek professor at Wittenberg, where he became the friend of Luther, and a convert to his doctrines. Luther was at that time professor of divinity there. In the following year he took part with Luther in the disputation with Dr Eck at Leipsic. Their personal characters, however, were widely different; Melancthon being as remarkable for snavity of manners as Luther was for impetuosity and unbending firmness. Melancthon's judgment, ripened by classical study, his acumen as a philosopher and critic, the uncommon distinctness and order of his ideas, the caution with which he advanced from doubt to certainty, and the steadfast zeal with which he held and defended the truth when found, — this combination of great qualities and merits, at all times rare, contributed greatly to the progress and success of the Reformation. The Augsburg Confession was drawn up by Melancthon in 1530, and, under the sanction of the elector of Saxony, he aided in framing a code of ecclesiastical constitutions. He wrote numerous theological treatises, Latin poems, works on history, philosophy, &c., and died at Wittenberg, in 1560. His life was written by his friend Camerarius. A monument to his memory was "inaugurated" at Wittenberg in the presence of the king of Prussia and a distinguished assemblage, Nov. 1, 1865.

MELBOURNE, WILLIAM LAMB, Viscount, prime minister of England, was the second son of the first Lord Melbourne, and was born, March 15th, 1779. He was educated at Eton, Cambridge, and Glasgow, and, on the completion of his academical course, he studied for the bar, and became a member of Lincoln's Inn. But having become, on the death of his elder brother in 1805, the representative of his family, he was brought into the House of Commons, where he joined the Whig party, and gradually rose to great distinction for his liberality, talent, and independence. He married Lady Caroline Ponsonby, daughter of the earl of Beshborough, celebrated for her literary talent and her masculine interference in political affairs. In 1827 he became secretary for Ireland; but in 1828 he resigned office, and the same year he was called up to the House of Lords by the death of his father. On the formation of Lord Grey's administration, in 1830, he was appointed secretary of the home department; and the latent energy of his character was then revealed by his able administration during a period of violence and lawlessness, such as has been rarely witnessed in the English annals. In March, 1834, on the retirement of Lord Grey, Lord Melbourne succeeded to the premiership; but in the autumn of the same year, Lord Althorpe's removal from the leadership of the House of Commons was thought to have so weakened the government, that William IV. somewhat summarily dismissed it, and called to his councils the duke of Wellington and Sir Robert Peel. The administration then formed, however, only served to show the great temper, extraordinary skill, and indefatigable industry of Sir Robert Peel as a

parliamentary leader; for in the spring of 1835 he resigned office, and Lord Melbourne, who, on quitting power, had refused the garter and a higher place in the peerage, once more became first lord of the treasury. In 1837, Lord Melbourne's government, which had become gradually weakened by the attacks of a powerful majority in the Upper House, and the hostility of a growing and powerful minority in the Lower, gained new strength from the accession of Queen Victoria, whose personal sympathies, it was alleged, were enlisted in favour of the party then in power. From this period to the close of his official career, he devoted himself to the task of instructing his royal mistress in the exercise of her important functions; and in this sphere of duty his various qualities, talents, and acquirements were so eminently displayed, as not only to merit the gratitude of his royal pupil, but to elicit expressions of approbation even from his political opponents. In 1839, the government having had only a majority of 4 on an important question, Lord Melbourne resigned; but a misunderstanding respecting the appointment of the ladies of the bed-chamber prevented the formation of a new ministry under Sir Robert Peel, and he once more returned to office. In 1841, after a strenuous but vain effort to effect some modification in the corn laws, he finally retired from his high post, and (though he for some time afterwards went down to the House of Lords), it may be said, from public life. Under the veil of good-humoured indifference and careless ease, Lord Melbourne concealed many of the best qualities of a statesman; a cool and courageous temperament, a dispassionate and unprejudiced mind, and a clear and manly intellect, which had been improved by incessant, though not forced, cultivation. In society he was perhaps the most graceful and agreeable gentleman that the present generation can remember. In some parts of his character he resembled the jovial, good-humoured, practical Sir R. Walpole; in others, the studious, the speculative, and refining Holfingbroke. Died, at his family seat, Hrocket Hall, Hertfordshire, Nov. 24, 1848.

MELCHTHAL, ARNOLD OF (so called from the place of his residence in the canton of Unterwalden), was the son of a rich farmer, who having been cruelly treated by the governor of the district, under Albert of Austria, Arnold conspired with two friends, Fürst and Stauffacher, to effect the deliverance of their country, and to the plan which they formed, in 1307, was Switzerland indebted for the restoration of its ancient freedom.

MELDOLA, Dr RAPHAEL, the learned Jewish high rabbi of the chief synagogue in England, was eminent as a profound theologian and philosopher. At an early age he published an interesting work, called "Korban Minha," a literary comment on the service of the high priest, which is read in every synagogue on the fast-day of Kippoor; and in 1796 a work of great importance, entitled "Hupat Hatanim." He died in 1828.

MELENDEZ-VALDEZ, Don JUAN, an

eminent Spanish poet, was born in 1754, at Alibera. He wrote three volumes of poems, which are distinguished for their graceful harmony, elegant diction, and rich imagery. He became councillor of state, and director of public instruction during the rule of Joseph Buonaparte, and fled Spain on the retreat of the French. He died at Montpellier, 1817.

MELI, GIOVANNI, a Sicilian poet, was born at Palermo, in 1740, and destined for the medical profession. His poetical works are of various kinds, but the most admired are his Idylls and his love songs. Died, 1815.

MELITO, bishop of Sardis, flourished about A. D. 160—172. He was author of many works, now known only by their titles and a fragment or two preserved by other writers. His "Catalogue of the Books of the Old Testament," however, is extant, and is the earliest list of them found in Christian literature. Melito addressed an Apology for the Christians to the Emperor Marcus Aurelius on occasion of their persecution under his edict.

MELAN, CLAUDE, a celebrated French designer and engraver, born at Abbeville, 1598. He first studied painting at Rome, but ultimately applied himself to engraving; in which he adopted a new method; producing varied effects of light and shade, not by crossed but by single lines broadened and thinned alternately. He executed a life-size face of Christ by one continuous spiral line. His print, after his own design, of "St Peter Nolansus borne by Angels," is considered his finest piece. Died at Paris, 1688.

MELLON, HARRIET, duchess of St Alban's, was born about the year 1775, and was the posthumous daughter of a Mr Matthew Mellon, whose widow married a Mr Entwistle, a musician. Mrs Entwistle, who was an accomplished woman, went on the stage; and the child early followed her example. At length, while playing at Stafford, in Stanton's company, she was introduced to Richard Brinsley Sheridan, and under his patronage she made her debut at Drury Lane, in January, 1795, as Lydia Languish, in the Rivals; and although she attracted but little notice at first, she gradually rose in public estimation. For several years Thomas Coutts, Esq., the wealthy banker, had evinced for her a strong degree of friendship; and he married her almost immediately after the death of his wife, which happened in 1814. In 1822 he died, appointing his widow universal legatee, and bequeathing to her his share in the banking-house and business in the Strand, and all benefit and interest to arise therefrom. After her marriage she had to endure every species of slander and detraction, but she wisely bore it in silence; and when assailed by a host of unprincipled scribblers, who thought that by vile threats they could extort bribes for silence, she had firmness and spirit enough to resist them. In June, 1827, she married William, duke of St Alban's, then in the 27th year of his age. She died, Aug. 6, 1837. The bulk of her immense property, including the half-profits of the banking-house, the mansion in Stratton Street, and all her moveables, plate,

diamonds, &c., she bequeathed to Miss Angela Burdett, youngest daughter of Sir Francis Burdett, and grand-daughter of Mr Coutts, who in consequence took the name of Countess.

MELMOTH, WILLIAM, an eminent advocate and miscellaneous writer, was born in 1666. He was a bencher of Lincoln's Inn, and in conjunction with Peter Williams, edited Vernon's Reports; but he was chiefly known as the author of a book entitled "The Great Importance of a Religious Life;" which has gone through numerous editions, and is forgotten. Died, 1743.

MELMOTH, WILLIAM, son of the preceding, was born in 1710. He published excellent translations of Pliny's and Cicero's Epistles. He was also the author of the "Letters," which bear the name of Sir Thomas Fitzosborne; some poems in Dodsley's collection, and memoirs of his father. He was brought up to the law, became a commissioner of bankrupts, and died in 1799.

MELOZZO DA FORLÌ, a celebrated Italian painter, was born about 1438. His biography is involved in obscurity, but it is pretty certain that his style was formed after that of Piero della Francesca. He obtained the favour of Pope Sixtus IV., was one of the first members of the Academy of St Luke, and was employed to paint a fresco in commemoration of the restoration of the Vatican Library. This occupied him from 1475—1480. He had previously decorated the tribune of the Church of the Apostles for Cardinal Riario. Melozzo was the friend of Giovanni Santi, the father of Raphael, and there are interesting traces in his works of Santi's influence on him. Many paintings which have been attributed to Melozzo are now believed to be the works of his scholar Palmezzano. Died, 1494.

MELVIL, SIR JAMES, a Scottish statesman and historian, was the son of Lord Keith, and born in 1530. He became page to Mary, queen of Scots; afterwards he entered into the service of the duke of Montmorncy. On his return to Scotland, in 1561, he was appointed privy-councillor, and gentleman of the bedchamber to Queen Mary, and continued her confidential servant until her confinement in Lochleven Castle. He died in 1606; but his "Memoirs, containing the most remarkable Affairs of State," lay long unknown in the castle of Edinburgh, and were not published till 1683.

MELVILLE, ANDREW, a learned Scottish professor and promoter of the Reformation, was born in 1545. At the age of 14 he went to the university of St Andrew's, and after studying there five years, completed his education at Paris and Poitiers. He next lived at Geneva, where he held the chair of Humanity, and enjoyed the friendship of Beza, and other leading reformers. Returning to Scotland, in 1571, he was chosen principal of Glasgow College, and rendered important services to the cause of education and literature, both by his noble enthusiasm and personal influence, and by the reforms he introduced. After six years he was called to St Andrew's to fill the office of principal of St Mary's College. He distinguished himself by his zeal and courage, in opposing the arbitrary measures of the court, and in

promoting the establishment of the presby-
terian form of church government, and, in
1582, was prosecuted and imprisoned. He
escaped, however, and for a time took refuge
in England; resuming his professorship in
1585, and pursuing the same course in public
affairs as before. James I. called him to
London, the year after his accession to the
throne of England, and, in 1607, he was im-
prisoned by a sentence of the privy council.
After several years' confinement he was al-
lowed to go abroad, and accepted a chair in
the university of Sedan, where he died in
1622. An interesting "Life of Andrew Mc-
ville" has been written by Dr Mc'Grie.

MELVILLE, HENRY DUNDAS, Viscount,
the son of Lord Arncliffe, a Scotch judge,
was born in 1740; received his education at
the university of Edinburgh; in 1773 became
solicitor-general; and soon after was ap-
pointed to the office of lord advocate, and
joint keeper of the signet for Scotland. In
1782 he was made privy-councillor and treas-
urer of the navy; and from that time he
took a leading part in all the measures of
the Pitt administration. He was appointed
president of the Board of Control, at its
formation; in 1791, made secretary for the
Home Department; and, in 1794, secretary
of War, which latter post he held till Mr
Pitt's retirement from office. He was then
created a viscount; and when Mr Pitt again
became premier, he was made first lord of
the Admiralty. But a variety of charges
had been got up against him by the oppo-
sition, and in 1805 he was impeached by the
Commons; though he was acquitted of the
alleged malversations, and only proved to
have been negligent of his duty with respect
to his agents, he took no further part in
public affairs, and died in 1811. For many
years his influence in Scotland was supreme;
and his countrymen, to mark their gratitude
for his services, erected a monument to his
memory in the Scotch metropolis.

MEMLING, HANS, one of the best paint-
ers of the 15th century. His name has been
spelt in an infinite variety of ways, most
commonly as MEMLING or HEMLING; but
recent investigations by Mr W. H. Weale,
seem to have settled the point in favour of
MEMLING. The place and date both of his
birth and death are unknown, but he is
believed to have painted from 1470—1495.
He was a pupil of Roger van der Weyden.
It is certain also that he was a rich and in-
fluential citizen of Bruges in 1479, and that
many of his finest works were executed in
that city. He is said to have visited Italy,
Germany, and Spain, and to have been in the
service of Charles the Bold, during his war
with the Swiss Cantons. In the hospital of
St John, at Bruges, are his fine "Marriage
of St Catherine;" his "Chasse de Ste Ur-
sule," the legendary story of St Ursula,
painted on the compartments of a beautiful
shrine; an "Adoration of the Magi;" a
"Descent from the Cross," &c. One of his
most extraordinary works is the "Joys and
Sorrows of the Virgin," with the Journey
of the three kings from the East, now one
of the greatest treasures of the Munich
Gallery, which possesses eight other pictures
by Memling. The National Gallery has two

small examples of this master, one of them
recently presented by the Queen. Other
works attributed to Memling are scattered
through various European galleries. The
admirable triptych by him in the Academy
of Bruges, has been this year (1865) repro-
duced in chromolithography by the Arundel
Society.

MEMMI, SIMONE. [MARTINI, SIMONE.]

MENAGE, GILLES, a distinguished man
of letters, was born in 1613, at Angers, where
his father was king's advocate. He dedicated
himself solely to literary pursuits; and,
being received into the house of Cardinal de
Retz, soon made himself known by his wit
and erudition. He died in 1692, at the age
of 79, leaving behind him some very able
works, of a critical and philological nature.
After his death, a "Métaglana" was com-
piled from notes of his conversation, anec-
dotes, remarks, &c., forming a most lively
and interesting work.

MENANDER, one of the most celebrated
of the Greek comic poets, was born at
Athens, 342 B. C., and is said to have drowned
himself, on account of the success of his
rival Philemon, though some accounts at-
tribute his death to accident, B. C. 291, in
the harbour of the Piræus. He composed
108 comedies; but there are only a few
fragments remaining of them. Menander
was the disciple of Theophrastus, and, like
him, excelled in the delineation of character.
He was also the friend of Epicurus, whose
philosophy he adopted. He was self-indul-
gent to the degree of effeminacy, and of im-
moral habits. The plays of Terence are for
the most part imitated or translated from
Menander.

MENDELSSOHN, MOSES, a celebrated
Jewish philosopher, commonly called the
"Socrates of the Jews," was born of an
honest but poor family, at Dessau, in 1728.
He was bred to merchandise, but devoted
himself to literature, in which he acquired
a distinguished reputation. In 1742 he set-
tled at Berlin, where subsequently he en-
joyed the friendship of Lessing. In 1753
he published his first piece, entitled "Pope
ein Metaphysiker;" it was written in con-
junction with Lessing. His best known
work is the "Phædon," a Discourse on the
Immortality of the Soul. He also wrote
"Briefe ueber die Empfindungen," "Morgen-
stunden," "Jerusalem," &c. At one time
he was associated with Lessing, Ramler,
Abbot, and Nicolai, in conducting a period-
ical work, entitled "Bibliothek der Schönen
Wissenschaften." He was remarkable for
the philosophical mildness of his disposition,
and for the excellence of his character; and
he was esteemed by persons of the most
opposite opinions. Died at Berlin, 1786.

MENDELSSOHN-BARTHOLDY, FELIX,
the greatest musical composer that this cen-
tury has produced, was born at Berlin, Feb-
ruary 3, 1809. His grandfather was the
celebrated philosopher, Moses Mendelssohn
above noticed. His father was a wealthy
banker, more favoured with the gifts of
fortune than of genius; and it is related
of him that he was in the habit of saying,
"When I was a boy people used to call me
the son, and now they call me the father, of

the great Mendelssohn." The precocity of his son's musical talent surpassed even that of Mozart. Before he was eight years of age, the accuracy of his ear, the strength of his memory, and, above all, his incredible facility in playing music at sight, excited the wonder of his teachers—Zelter and Berger—and gave room to hope that a successor of Mozart was at hand. In his 9th year he performed at a public concert in Berlin, to the admiration of his audience; the following year the boy-artist accompanied his parents to Paris; and when he was 12 years old, he composed his piano-forte quartett in C minor, which is still found to be full of interest and originality. His first compositions were published in 1824. These were soon followed by many others, among which was an opera, called "The Marriage of Gamacho;" which, though betraying inexperience, has much character and many beauties. Three years afterwards he made a musical tour through Italy, France, and England; and it was upon this occasion that he conducted, at the Philharmonic Concert, in London, his first symphony, and his overture to the "Midsummer Night's Dream," which produced an electrical effect. Having now resolved to devote himself exclusively to the artist life, he was appointed, in 1833, to the directorship of the concerts and theatre of Düsseldorf, where, in 1835, he produced his great oratorio of "Paulus;" and 10 years afterwards he accepted the same office at Leipzig, whither young men of talent flocked from all parts of Europe, as well to seek the acquaintance of the leading professor of the day, as to submit their own productions to his judgment. He afterwards accepted the musical directorship at Berlin, at the earnest entreaty of the king of Prussia, but resigned it after a short time, and returned to his favourite Leipzig, where he resided till his death, acting as conductor of the concerts, and, along with his friend Moscheles, director of the Conservatory of Music. During these labours he repeatedly visited England. He conducted the performance at three Birmingham Festivals; and in the season of 1844 he conducted the Philharmonic Concerts. His last visit was in 1847; and on that occasion he conducted the performance of his "Elijah" at Exeter Hall, amidst an enthusiasm of admiration which will be long remembered. But about this time his health began to fail, his strength being exhausted by fatigue and excitement; and the sudden death of a favourite sister at this period inflicted upon his nervous system a blow from which it never fully recovered. After trying to recruit his health and spirits amidst the scenery of the Alps, he returned to his home apparently in better health, but it again gave way, and on the 8th November, 1847, the great master and noble artist ceased to breathe. As a composer, Mendelssohn travelled over a wide field of art. But his genius as it reached maturity became more and more profound and lofty; and his two oratorios, "Paulus" and "Elijah," will form his most enduring monuments. His symphonies are ranked only second to those of Haydn, Mozart, and

Beethoven. The dramatic character of his genius is evinced, not only by his youthful opera above mentioned, but by his delicious music to the "Midsummer Night's Dream," by his "First Walpurgis Night," and the powerful choruses for "Antigone," "Athalia," and "Edipus." The few songs he wrote, and more especially the "Lieder ohne Worte," show that as a graceful and expressive melodist he has no superior. Mendelssohn was singularly happy in every character and relation of life. Born to affluence and ease, he pursued art with an ardour and activity scarcely ever paralleled; and his artist life was an unbroken career of triumph. As a man, he enjoyed the love and esteem of every one who knew him; that he had not an enemy in the world. An English translation of the Letters of Mendelssohn, by Lady Wallace, has lately been published.

MENDEZ-PINTO, FERDINAND, a celebrated traveller, was born in Portugal of a respectable family. He departed for the Indies in 1537, and, on the voyage, the ship was taken by the Moors, who carried her to Mocha, where he was sold for a slave; but after some adventures he arrived at Ormuz, and afterwards pursued his original object. In 1558 he returned to his native country, and published a very curious, but romantic, relation of his voyages, which was translated into French and English. From his excessive credulity, Mendez-Pinto has been classed with Sir John Mandeville; and for extravagant fictions his name has become a by-word.

MENDOZA, DIEGO HURTADO, a distinguished Spanish statesman, soldier, and historian, was born at Granada in 1503. After studying at the universities of Granada and Salamanca he entered the service of the Emperor Charles V., and was employed in Italy both as diplomatist and general, with equal success. He at last fell under the displeasure of Philip II. of Spain, and in 1567 was banished. He spent his last years in literary labours, forming a valuable library and writing his great work, the "Guerra de Granada contra los Moriscos," the noble truth and fearless impartiality of which prevented its publication for many years. Mendoza was author of many poems, some of which were published in 1610, the year in which his History first appeared. Died at Madrid, 1575.

MENENIUS LANATUS, AGRIPPA, consul of Rome, B. C. 503. He is celebrated for his successful intervention on occasion of the secession of the plebeians to the Sacred Mount, when he is said to have related the fable of the belly and the members; and died at an advanced age, very poor, but universally esteemed for his wisdom and integrity.

MENGS, ANTON RAPHAEL, a distinguished painter, who has been called the Raphael of Germany, was born at Aussig, in Bohemia, in 1728. He studied under his father, who was painter to Augustus III., king of Poland, after which he went to Rome, where he was patronized by Charles III., king of Spain, for whom he executed a number of

pictures. The most celebrated of these is the "Apotheosis of Trajan," in the royal palace of Madrid. The fine copy of Raphael's "School of Athens," now at Northumberland House, is the work of Mengs, and there is an altar-piece of his at All Souls' College, Oxford. Mengs wrote several works on his art, which were translated into English, and died, at Rome, in 1779.

MENINSKI, or MENIN, FRANÇOIS MESTIEN, a learned orientalist, was born, in 1623, in Lorraine; studied at Rome; accompanied the Polish ambassador to Constantinople, in 1652, and acquired the Turkish language; became principal interpreter of the oriental languages at Vienna, and was intrusted with several important commissions. His principal work is a Turkish, Arabic, and Persian Dictionary. Died, 1698.

MENNO, SIMONIS, was the founder of the sect of Mennonites, or Dutch Anabaptists. He was born in 1496, and was originally a Catholic priest. He maintained the necessity of rebaptism in adults; expected the millennial reign of Christ; condemned war and oaths; and denied that Jesus Christ received a human body from the Virgin. A price was set upon his head by Charles V., but he was fortunate enough to escape. He died at Oldeslo, near Hamburg, in 1561.

MENOU, JACQUES FRANÇOIS, Baron de, French general, was born in Touraine, in 1750. He was a deputy of the noblesse to the states-general in 1789, joined the *tiers état*, and took an active part on the popular side without acquiring the confidence of the leaders. He was employed in the Vendean war, led the attack on the Faubourg Saint-Antoine in May, 1795, and was named by the Convention general of the army of the interior. On the evening of the 13 Vendémiaire (5th October), he refused to attack the section Lepelletier, for which he was arrested and tried, but obtained an acquittal. He accompanied Napoleon in the expedition to Egypt, married there, and professed himself a Mohammedan, assuming the name Abdallah; was named commander-in-chief on the death of Kleber, was defeated by Abercromby at the battle of Alexandria, and afterwards became successively governor of Piedmont and of Venice. Died, 1810.

MENSCHIKOFF, ALEXANDER, Prince, a celebrated Russian statesman and general, was the son of a peasant, and born near Moscow, in 1674. Having attracted the notice of Lefort, he took him into his service, and discerning his great powers, determined to educate him for public affairs. On the death of his patron, Menschikoff succeeded him in the favour of the czar. He was the companion of Peter in his travels; and on several occasions he personated the czar, who appeared as a private person in his train. In the war with Charles XII. of Sweden, Menschikoff was the conqueror of Meyerfeldt, a general of that monarch; he also distinguished himself at Lesnau, in 1708, and at the battle of Pultowa. He became first minister and general field marshal, baron and prince of the German empire, and received the title of duke of Ingria. On the death of Peter, it was chiefly through

the influence of Menschikoff that Catharine was raised to the throne, and by him affairs were conducted during her reign. When Peter II. succeeded her on the throne, Menschikoff grasped, with a bold hand, the reins of government; but when his power was raised to its highest pitch, he was suddenly hurled from his elevation. Having embezzled a sum of money which the emperor intended for his sister, he was condemned to perpetual exile to Siberia, and his immense estate was confiscated. He died in 1729, two years after his banishment, having supported the hardships of his situation with great courage, and lived with such frugality, that out of his daily allowance of 10 roubles, he saved enough to erect a small wooden church. His children were recalled by the Empress Anne, and restored to an honorable rank in society.

MENZEL, FRIEDRICH WILHELM, private secretary in the royal cabinet at Dresden, whose treachery hastened the breaking out of the Seven Years' War. His dissipated habits had plunged him into embarrassments; and, in consideration of a large sum of money, he delivered to the Prussian ambassador at the court of Saxony, copies of the secret correspondence between Saxony, Russia, and Austria, relating to their project of a combined attack on Prussia. In consequence of this disclosure, Frederick II. resolved to anticipate the movements of his enemies, and at once invaded Saxony. Menzel was at length suspected, and though he attempted to save himself by flight, he was arrested at Prague, on the demand of the court of Saxony, and confined in the castle of Königstein, where he lived 33 years in the strictest custody. Towards the latter part of his life his condition was somewhat alleviated, by receiving better food, and permission to take the air occasionally; he was also relieved of the heavy chains which he had worn many years. He died in 1796, aged 70 years.

MENZINI, HENEDETTO, an eminent Italian poet, born at Florence, in 1616. He was patronized, at Rome, by Christina of Sweden; and at her death found another protector in Cardinal Albani. He died in 1704. Few of his countrymen excelled him in Anacreontic odes, sonnets, elegies, or hymns; and his "Art of Poetry" had many admirers.

MERCADO, or MERCATI, MICHEL DE, a learned physician, was born in Tuscany, and became first physician to Clement VIII.; he was also keeper of the botanical garden of the Vatican, where he formed a fine cabinet of metals and fossils. He was raised to the rank of nobility by Ferdinand, grand-duke of Tuscany. He wrote a treatise, "Degli Obelisei di Roma," and other works. Died, 1593.

MERCATOR, GERARD, mathematician and geographer, born in 1512, at Ruppelmonde, in the Netherlands. He published a great number of maps and charts, which he engraved and coloured himself, and is known as the inventor of a method of projection called by his name, in which the meridians and parallels of latitude cut each other at right angles, and are both repre-

sented by straight lines, which has the effect of enlarging the degrees of latitude as they recede from the equator. Died, 1594.

MERCATOR, NICHOLAS, an eminent mathematician, was born in Holstein, about 1640. He settled in England, where he became fellow of the Royal Society; and died about 1690. His works are "Cosmographia," "Rationes Mathematicæ," "Hypothesis Astronomica," "Logarithmotechnia," an exposition of a new and ingenious method of constructing logarithms, &c.

MERCIER, BARTHÉLEMI, a learned French bibliographer, known by the name of the Abbé de St Leger, was born at Lyons, in 1734. He entered into the religious society of St Gervaise, of which he became librarian. Louis XV. gave him the abbey of St Leger of Soissons, of which he was deprived and reduced to indigence at the revolution. He died in 1799.

MERCIEU, LOUIS SEBASTIEN, a French miscellaneous writer, was born at Paris, in 1740. He commenced his literary career as a poet, but soon renounced poetry for criticism. He attacked the reputation of Corneille, Racine, and Voltaire, in his "Essai sur l'Art Dramatique," and published a violent philippic against the comedians for paying no attention to his remarks. In 1781 he published, anonymously, the first volume of his "Tableau de Paris;" after which he removed to Switzerland, and printed at Neuchâtel ten more volumes of that work. Returning home at the beginning of the revolution, he declared himself a friend to liberty, and in concert with Carra he published "Les Annales Politiques," and "Chronique du Mois," two journals, displaying both moderation and spirit. He was a member of the Convention, and voted for the detestation, instead of the death, of the king. Died, 1814.

MERIAN, JOHANN BERNARD, perpetual secretary to the Royal Academy of Sciences at Berlin, was a native of Leichstul, near Basel, and was invited from Holland to Berlin, in 1750, on the recommendation of Maupertuis. He enriched the Memoirs of the Berlin Academy with numerous papers on mathematical and philosophical subjects, one of the most important of which is a parallel between the philosophy of Leibnitz and that of Kant. He also published a German translation of the Essays of David Hume. Died, 1807.

MERIAN, MATTHEW, Swiss painter and engraver, was the son of an eminent engraver, and was born at Basel in 1621. He studied under Sandrart and other eminent masters, was in high repute as a portrait-painter, succeeded about 1650 to his father's business as a book and print-seller at Frankfurt, and died there in 1687.

MERIAN, MARIA STYLLA, an ingenious artist, was the sister of the preceding, and was born at Frankfurt, in 1647. She undertook a voyage to Surinam to draw the insects and reptiles peculiar to that country, of which, on her return, she published a description with coloured plates, in 2 vols. 4to. Her daughter, who accompanied her to Surinam, added a third volume to this work. The mother also published a dissertation on

the Generation and Transformations of the Insects of Surinam. Died, 1717.

MERIVALE, JOHN HERMAN, an eminent lawyer and littérateur, was born at Exeter, in 1779. He studied at Cambridge, was called to the bar, and in 1831 was appointed Commissioner of Bankruptcy, a post which he held till his death. He edited a series of Chancery Reports, and wrote several pamphlets on legal subjects. In literature he made himself known chiefly as a translator, contributing to Hland's Greek Anthology, and translating some of Schiller's minor poems. He wrote some original poems, and contributed to the literary periodicals. Died, 1844.

MERRICK, JAMES, a divine and poet, was born at Reading in 1720; was educated at Trinity College, Oxford; and died in 1759. His principal works are, "Poems on Sacred Subjects," "Annotations on the Psalms," and on the "Gospel of St John," "A metrical version of the Psalms," and a translation of Tryphiodorus.

MERSCH, JOHN ANDREW VAN DER, leader of the Brabant patriots in 1789, was born at Menin, and entered the French service, in which he greatly distinguished himself during the Seven Years' War, and acquired the title of "The Brave Fleming." He rose to the rank of lieutenant-colonel, and afterwards served in the Austrian army. When the insurrection was organized in the Netherlands against the Austrian government, Vander Mersch was chosen commander. By a series of successful operations against the imperial troops in the Netherlands, Ghent and Brussels fell into his hands. Through party intrigue, however, he was removed from his command, and thrown into prison, where he remained till the Austrians recovered possession of the country. Died, 1792.

MERSENNE, MARIN, a French philosopher, was born at Oyse, in the province of Maine, in 1588. After studying at the college of La Flèche, at the same time with Descartes, he entered the society of Minims, and became an eminent teacher of philosophy and theology in the convent of Nevers. He was warily attached to Descartes, and corresponded with most of the scientific characters of his time. He wrote a variety of scientific works, of which the best known, and perhaps the most curious, is his "Harmonie Universelle," and died in 1648.

MERTON, WALTER OF, a learned and munificent prelate of the 13th century, and founder of the college which bears his name at Oxford, was born at Merton, in Surrey, and educated at the convent of that place. After obtaining several preferments, he became lord chancellor in 1253; was deprived of the seal the same year by the barons, but had it restored to him in 1261, and in 1274 was consecrated bishop of Rochester. Walter of Merton founded a hospital at Basingstoke for poor travellers and decayed ministers, and in this foundation he took always a warm interest. His college at Oxford was founded in 1264, and became the archetype of all colleges subsequently founded. Its great distinctive feature was that it was a "literary, not a sacerdotal institution."

MESMER, FRIEDRICH ANTON, a German
physician, author of the famous doctrine of
animal magnetism, also called Mesmerism,
was born in 1734, at Mersburg, in Suabia.
He first made his doctrines known to the
world in 1766, by a work on planetary influ-
ence, published at Vienna, in which he con-
tended that the heavenly bodies diffuse
through the universe a subtle fluid, which
acts on the nervous system of animated
beings. He quitted Vienna for Paris, in
1778; gained a number of proselytes, and
received a subscription of 340,000 livres.
Government at length appointed a com-
mittee of physicians and members of the
Academy of Sciences, among whom was
Franklin, to investigate his pretensions;
and the result of their inquiries appeared
in an admirable memoir, drawn up by
Bailly, which completely exposed the futil-
ity of animal magnetism, and the quackery
of its author, who died in 1815. His theory,
however, has of late years again excited
considerable attention.

MESSALA CORVINUS, M. VALERIUS,
Roman consul, orator, and historian, was
the friend of Brutus and Cassius, and fought
on their side at Philippi, B. C. 42. He after-
wards attached himself successively to An-
tony and Octavius, served at the battle of
Actium, 31, and the same year was chosen
consul. He subdued Aquitania, of which he
was made proconsul, and was honoured with
a triumph. For a short time he held the
office of prefect of Rome, 26, but the same
year retired, continuing, however, to hold
the office of augur. Messala was the friend
of Horace and Tibullus, of Mæcenas and
Asinius Pollio, and other distinguished men
of the age; was the zealous patron of liter-
ature and art; and one of the most eminent
Roman orators. Died, probably about B. C. 3.

MESSIER, CHARLES, a French astron-
omer, was born in 1730, at Badonviller, in
Lorraine. For a considerable period he
was assistant to Delisle, but afterwards
became astronomer to the navy. His at-
tention was particularly directed to the
discovery of comets; and in that he was
eminently successful. Died, 1817.

MESTON, WILLIAM, a burlesque poet,
was born in 1688, and educated at Aber-
deen; after which he became tutor to the
young earl marshal and his brother, and
was appointed professor of philosophy in
the Marischal College, which situation he
lost in 1715, by joining the Pretender. He
was an excellent classic. A scholar and ma-
thematician; but he is remembered chiefly
by the burlesque poems entitled "Mother
Grim's Tales." Died, 1745.

METASTASIO, PIETRO ANTONIO DOME-
NICO BONAVENTURA, an eminent Italian
poet, born at Assisi, 1698, was the son of a
common soldier, named Trapassi. When
he was only 10 years of age, his talent of
extemporizing in verse attracted the notice
of the celebrated Gravina, who took him
under his protection, called him (by a trans-
lation of his name into Greek) *Metastasio*,
paid great attention to his education, and

on his death, in 1717, left him his whole
estate. The young poet, being thus placed
in an easy condition, devoted himself to his
favourite study, and, under the guidance
of the celebrated singer, Maria Romanina
(afterwards Bulgarelli), created the modern
Italian opera. Charles VI. invited him to
Vienna in 1729, and appointed him poet-
laureate, with a pension of 4000 guilders.
Thenceforward no gain took place at court
which was not graced by his verses. The
Empress Maria Theresa bestowed upon him
magnificent presents, as also did Ferdinand
VI., king of Spain. Thus honoured and
beloved, his life presented a calm uniformity
for half a century, during which period he
retained the favour of the imperial family
undiminished, his extraordinary talents
being admirably seconded by the tenor of
his private character, and his constant ob-
servance of the conventional proprieties of
high life. He composed no less than 26
operas and 8 sacred dramas, besides inau-
numerable minor pieces. The poetical char-
acteristics of Metastasio are sweetness, cor-
rectness, purity, gentle pathos, and elevated
sentiment. He died in 1782.

METCALFE, CHARLES THEOPHILUS,
Lord, a distinguished officer in the civil
service of his country, was born at Fern
Hill, Berks, in 1785. At the age of 15 he
was sent out as a cadet in the East India
Company's service. In the first 7 years we
find him holding various important offices;
and in 1808 he was selected by Lord Minto
to take charge of a difficult mission to the
court of Lahore, the object of which was to
secure the Sikh states, between the Sutlej
and Jumna rivers, from the grasp of Runjeet
Singh. In this he fully succeeded, the
treaty being concluded in 1809. He sub-
sequently filled several other high offices of
trust; advancing from honour to honour. He
was at length, in 1835, upon Lord W. Ben-
tley's resignation, provisionally appointed
governor-general, which office he held until
Lord Auckland's arrival, in the year follow-
ing. During this short period he effected
many bold and popular measures, not the
least of which was the liberation of the press
of India from all restrictions. This, how-
ever, gave umbrage to the directors, and
caused his resignation, and return to Europe.
A new sphere was now selected for the ex-
ercise of his abilities; he was appointed
governor of Jamaica—a situation of peculiar
difficulty at that period (the Negro Emanc-
ipation Act having so recently been passed),
but which he discharged greatly to the
satisfaction both of the government and the
colonists. After a two years' residence, the
climate proved so unfavourable to his health,
that he was compelled to resign. It was
not long, however, before he was selected
to undertake the government of Canada. In
this truly important and difficult post, his
judgment, firmness, and general statesman-
like qualities were most advantageously
exerted; but he had by this time become a
martyr to a most distressingly painful and
dangerous disease; and in 1843 he once
more returned to his native country. He
had previously been raised to the peerage by
the title of Baron Metcalfe. Died, Sept. 12,

1846, aged 61. The "Life and Correspondence of Lord Metcalfe" has been published by J. W. Kaye.

METELLI, AGOSTINO, an eminent painter, was born at Bologna, in 1609. He excelled in painting and architecture; and, in conjunction with Michael Angelo Colonna, produced several great works. Metelli died at Madrid in 1660.

METELLUS, Q. CÆCILIUS, surnamed **MACEDONICUS**, Roman consul, was born of a distinguished plebeian family, and while prætor, B. C. 148, defeated and took prisoner Andriscus, the pretender to the throne of Macedonia. He then commanded against the Achæans, and had nearly closed the war before the arrival of Mummius. On his return to Rome he had a triumph, received the surname Macedonicus, and, in 143, was chosen consul. The same year he was sent to Spain as proconsul, and carried on the Celtiberian War, which was finished by Q. Pompeius. He was afterwards censor, and died, full of honours, 115.

METELLUS, Q. CÆCILIUS, surnamed **NUMIDICUS**, Roman consul, was nephew of the preceding, and was educated at Athens. After holding various public offices, he was chosen consul, B. C. 110, and was charged with the conduct of the war against Jugurtha, king of Numidia. He had virtually brought it to a close when, by an intrigue of his ambitious legate, Caius Marius, he was superseded in command by the latter. He was well received at Rome, 107, both by senate and people, and received a triumph. He became one of the firmest supporters of the aristocratic party, was censor in 102, and, through the influence of Marius, was exiled two years later. To prevent civil strife and bloodshed on his account, he quietly left Rome and went to Rhodes; whence he was recalled within a year. His eloquence is highly spoken of.

METELLUS, Q. CÆCILIUS, surnamed **PIUS**, Roman consul, son of the preceding, contributed by his earnest persuasions to the recall of his father from exile, B. C. 99, and thus acquired his honourable surname. He served in the Social and Samnite Wars, and joined the party of Sulla against Marius, winning several great victories. He was chosen consul for 80, and then for some years commanded against Sertorius in Spain, Pompey being associated with him from 76. After the death of Sertorius, Metellus returned to Rome, and, with Pompey, had the honour of a triumph. Metellus was pontifex maximus, and died probably in 63.

METIUS, JAMES, a native of Alkmaar, in Holland, who has the repute of having invented refracting telescopes about 1609. It was on the mere report of this invention that Galileo, in the following year, constructed his first telescope.—His brother, **AURIAN**, was professor of mathematics and medicine at Franeker, where he died in 1636.

METON, a Greek mathematician, who flourished 432 B. C. In the first year of the 87th Olympiad, he observed the solstice at Athens, and invented the cycle of 19 years, corresponding exactly nearly to 235 lunations. This is called the Golden Number, from its great use in the calendar.

METTERNICH, CLEMENT, Prince de, one of the most eminent statesmen of modern times, was born at Coblenz, in 1773. Educated at Strasburg, he early acquired information regarding public affairs by travels in Germany, Holland, and Great Britain; and having soon afterwards entered the diplomatic service, acted as secretary at the Congress of Rastadt, in 1799, where his abilities at once attracted notice, and led to his being appointed secretary of the Austrian embassy at St Petersburg, in 1802, and Austrian ambassador, in succession at the courts of Dresden, in 1803, and Berlin, in 1805. After the peace of Presburg, he was appointed ambassador at Paris, in 1806; and in that delicate situation, though representing a vanquished monarch, he succeeded in conciliating all who came in contact with him, by the urbanity of his manners, and the skill with which he maintained his difficult and important position. In 1809 he was appointed chancellor of state, upon the resignation of Count Stadion, under whose auspices he had risen to eminence, and whose known hostility to France compelled his retirement after the peace of Schönbrunn; and for nearly forty years from that period, he exercised, almost without control, the highest authority in the Austrian empire. One of his first aims after entering on his high office was to bring about a marriage between Napoleon and an Austrian archduchess, as a means of purchasing a respite for the empire. The negotiations for this purpose he conducted with Champagny, and after Napoleon was divorced from Josephine, Metternich escorted Maria Louisa to Paris. But this expedient of a humiliating sacrifice could not be permanent; and in 1813, after the great French disasters in Russia, war, at the instigation of Metternich, was again formally declared by Austria against France. In the autumn of that year the Grand Alliance was signed at Toplitz, and on the field of Leipsic, Metternich was raised to the dignity of a prince of the empire. In the subsequent treaties and conferences the newly created prince took a very prominent part, and he signed the treaty of Paris on behalf of Austria. Soon afterwards he paid a visit to this country, and received the honour of a doctor's hood from the university of Oxford. In 1815 he presided over the Congress of Vienna, and took a prominent part in the various congresses that were held in succession at Paris, Aix-la-Chapelle, Carlsbad, Laybach, and Verona; inculcating on all occasions, as far as in him lay, the principles of the divine right of kings, and repressing every aspiration of the people after civil, political, and religious liberty. In 1818 he was compelled to flee from Vienna; but he returned in 1821, and though he never again assumed office, his counsels are said to have swayed the emperor down to the moment of his death. Died, 1839.

METRÉ, JULIEN AFFRAY DE LA, French physician, philosophical and miscellaneous writer, was born at St Malo, in 1709. He studied under Boerhaave, and settled at Paris; served as army surgeon at the battle of Fontenoy, but on the publication of his "Histoire naturelle de l'Amé,"

[MET]

LEMENT, Prince de, statesman of France, as Cobentz, in 1773. He early acquired public affairs by Holland, and Great Britain afterwards entered, acted as secretary of state, in 1799, where his notice, and led to the secretary of the Austrian Empire, in 1802, and successation at the court of Berlin, in 1805. After 1806; and in that office he succeeded in coming in contact with him, manners, and the skill in his difficult and in 1809 he was appointed upon the resignation of whose auspices he had those known hospitable his retirement in Brunswick; and for nearly a period, he exercised, the highest authority. One of his first his high office was to be between Napoleon and duchess, as a means of for the empire. The purpose he conducted after Napoleon was de Metternich escorted. But this expedient could not be performed after the great French war, at the instigation gain formally declared. In the autumn Alliance was signed the field of Leipzig, and to the dignity of a. A New Universal Biography.

In 1746, he was compelled to withdraw from France, and take refuge in Holland, and the book, by order of the parliament, was burnt by the common haagman. Driven soon from Holland for other offensive writings, attacks both on the Sorbonne and the Faculty of Medicine, he was invited to Berlin by Frederick II. in 1748, and made reader to the king, and member of the Academy. Frederick is said to have liked him as "a jester and ingenious madcap, out of whom a great deal of merriment could be had." He did not rest in his new position, and was seeking permission to return to Paris, when he died of a fever brought on by over-eating, in November, 1751. The most notorious of his other works was "L'Homme Machine," which was burnt by the common hangman at Leyden. His philosophical works, which belong to the materialist and atheistic school, have been several times republished. Frederick II. read an *Eloge* of La Mettrie at the Academy, which, says Carlyle, might as well have been spared.

METZ, CONRAD MARTIN, German engraver, was born in 1755. He was a native of Bonn, and came to England, where he was a pupil of Bartolozzi. After a long residence he went, in 1801, to Rome, and there spent the rest of his life. Among his numerous prints are a series after Michael Angelo's "Last Judgment," and many after drawings of the old masters. Died, 1827.

METZU, GABRIEL, a celebrated Dutch painter, born at Leyden, in 1615, who took Gerard Douw, Terburg, and Meris for his models, but adopted a less finished style. A lady turning her late, and another washing her hands in a silver basin held by her woman, are among his best pieces. He usually resided at Amsterdam, and died there about 1661.

MEULEN, ANTON FRANS VAN DER, was born at Brussels, in 1634. By his talents as a painter of battle-pieces he was recommended to Louis XIV., who always took him on his expeditions, and pointed out the subjects which he desired him to represent. The painter had thus unusual opportunities of perfecting himself in this department of his art. Vander Meulen was the disciple of Sneyers, and the master of Huchtenburg. He was admitted to the Academy of Painting at Paris in 1673. Died, 1690.

MEUNG, or MEHUN, JEAN DE, a French poet, surnamed, on account of his immensity, CLOPINEL, was born at Meung sur Loire, about 1250. By his poetical talents and vivacity, he rendered himself a favourite at the court of Philip le Bel. Having exercised his satiric powers upon the ladies of the court, they were so irritated against him, that a party of them seized him, and resolved to give him a severe flogging; but his wit came to his assistance, and he escaped chastigation. He died about 1322. He was the author of several works, but his principal one was his continuation of the "Roman de la Rose," begun by Guillaume de Lorris, the continuation comprising more than three parts of the whole. This poet enjoyed an immense reputation, and has been called the Father

of Eloquence, the French Ennius, the equal of Dante, &c.

MEURSIUS, JOHN, a learned Dutch critic, historian, and antiquary, was born in 1579, at Losdun, near the Hague; studied at Leyden; travelled over great part of the continent as tutor to the sons of the noble pensionary Barneveldt, and on his return, after a ten years' absence, was elected professor of history and Greek at Leyden, with the title of historiographer to the states-general. In 1625 he removed to the professorship of history and politics at Sorø, in Denmark, where, also, he was appointed historiographer royal. His works, which are chiefly on Athenian history and manners, form 12 vols. His "Eliensia," to which all who have since written upon that subject have been indebted, is a valuable work. Meursius died in 1639.—His son JOHN, who died at an early age, in 1653, was the author of several valuable antiquarian treatises.

MEUSEL, JOHANN GEORG, a famous German bibliographer, was born in 1743, at Eyrlichshof, in Franconia. After completing his studies at the universities of Göttingen and Halle, he was appointed, in 1769, professor of history in the university of Erfurt, and he afterwards held a similar station at Erlangen, where he remained till his death, in 1820. He wrote statistical and historical works, and compiled several works on the history of literature and literary men; but his principal works are, "Bibliotheca Historica," in 22 vols.; and "Gelehrte Teutschland," a bibliographical dictionary of German authors living in his time, in 16 vols.

MEYER, FELIX, a Swiss painter, was born in 1653. He painted some fine views after nature in Italy and Switzerland, and died in 1713.

MEYER, HEINRICH, German painter and historian of art, and the intimate friend of Goethe, was born in 1759. He was long a pupil of Johann Caspar Fuessli at Zurich, first met Goethe at Rome, about 1786, and settled at Weimar in 1797. He edited and annotated the works of Winckelmann, and was author of a "Geschichte der bildenden Künste bei den Griechen," 2 vols., published in 1824. Meyer was director of the Academy of Fine Arts at Weimar, and titular councillor to the court. Died, 1832.

MEYER, JAMES, a Flemish historian, was born near Bailleul, in Flanders, in 1491, and died in 1552. He wrote a Chronicle of Flanders, and a work on the Antiquity and Genealogy of the Counts of Flanders.

MEYER, JEREMIAH, a miniature painter, was born at Tübingen in 1735. He came to England in 1749, with his father, a portrait painter, who placed him under Zinck, the eminent painter in enamel, but he soon surpassed him. In 1761, the Society of Arts having offered a premium for the best drawing of a profile of the king; the prize was gained by Meyer, and he was afterwards appointed painter in enamel to their majesties. He was one of the founders of the Royal Academy, and died in 1789.

MEYERBEER, JACOB or GIACOMO, a celebrated musical composer, born at Berlin in 1794. His genius showed itself so early

[MEY]

that at 6 years of age he played at a concert, and at 9 was one of the best pianists in Berlin. He was taught afterwards by Clementi and the Abbé Vogler at Darmstadt. He afterwards visited Italy, and fell under the influence of Rossini, in imitation of whose style he composed several operas. The first work which made him a man of mark was the "Crociato in Egitto," in which he adopted an eclectic style in which the German and Italian were blended. It was produced at Venice in 1824, and at Paris two years later. Meyerbeer became the favourite composer of the Parisian public, whose taste he satisfied by the popular works which followed the "Crociato," and which are now well known through Europe. "Robert le Diable" was produced at the opera of Paris in 1831; "Les Huguenots" in 1833; "Le Prophète," 1849; "L'Etoile du Nord," 1854, and "Diorah," or "The Pardon of Ploermeil," in 1859. He left the manuscript of another great opera, "L'Africaine," which was produced in London in the summer of 1865. Besides his operas Meyerbeer wrote a Stabat, a Miserere, a Te Deum, an oratorio, cantatas, and many songs. He had, says a contemporary critic, the instinct of the stage, and knew well how to gratify and retain his public. He was supreme in the French Opera for more than 30 years, was associate of the Institute, and officer of the Legion of Honour, member of the Academy of Fine Arts at Berlin, and chapel-master to the king of Prussia. But he wrote no great orchestral music, nor added one original melody to the world's store of song. Died at Paris, 1st May, 1864. His remains were removed with great ceremony to Berlin.

MEYRICK, Sir SAMUEL RUSH, an eminent antiquary, was born at London, 1783. After taking his degree of B. A. at Oxford, he became an advocate in the ecclesiastical and admiralty courts, and soon began to vary his professional avocations with those archaeological studies which formed the chief boast and occupation of his life. He contributed innumerable papers to the Gentleman's Magazine; on all questions relating to arms and armour his authority was unassailed, and his "Critical Inquiry into Ancient Armour," &c., has procured him a high place among the antiquaries of his time. In 1832 he was created a knight of the Guephic order, and soon afterwards dubbed a knight bachelor. Died, 1848.

MEZERAÏ, FRANÇOIS EUDES DE, a French historian, was born in Lower Normandy, in 1616, and educated at the university of Caen; on leaving which he obtained military employment, and served two or three campaigns in Flanders. Having left the army, he projected his "History of France," in writing which he was liberally encouraged by Cardinal Richelieu, and after its completion, in 1651, he obtained a pension from the king. In 1658 he published an "Abridgment" of his History, and by the freedom of some of his animadversions in it he displeased Colbert, and was deprived of his pension. He died in 1683. Besides his "History of France," he wrote a "Treatise on the Origin of the French," and a "Continuation of the History of the Turks."

As an historian, he is considered more bold than accurate, with a style harsh and incorrect, but clear, energetic, and occasionally exhibiting a vigorous consciousness.

MEZZOFANTI, Cardinal GIUSEPPE, a celebrated linguist, was born at Bologna in 1774. He first discovered his extraordinary power of acquiring foreign languages while attending the wounded soldiers of Napoleon's armies in the hospital of Bologna, to which he was chaplain. There he remained till 1831, having been appointed professor of Greek and Oriental languages in the university and one of the librarians. After the troubles which arose out of the French occupation of Ancona, he was sent with a deputation to Rome, where he attracted the notice, and secured the regard, of Pope Gregory XVI. In 1833 he succeeded the famous Angelo Mai as prefect of the Vatican—was made a cardinal on the 13th of February, 1838—and died on the 16th of March, 1849—his death being hastened by the shock of the revolution, and the exile of his protector, the pope. Byron says of Mezzofanti, "He is a walking Polyglot, and ought to have existed at the time of the Tower of Babel as universal interpreter. I tried him in all the tongues of which I knew a single oath, and egad! he astounded me—even to my English." In fact, there was scarcely any European dialect that he did not speak. During the latter years of Mezzofanti's life a sight of the highest interest was annually to be witnessed in Rome. At the examination of the pupils of the College of the Propaganda, it is customary for each of the young missionaries of various countries to deliver an oration in his own language. At these meetings Mezzofanti used to attend and converse with almost all of the scholars—passing with equal fluency from the dialects of the extreme West to those of the extreme East—from Irish, which he spoke with ease, to Chinese, of which he was peculiarly fond. In short, he was a phenomenon of peculiar genius, diligently and successfully cultivated to an extent without a precedent, and likely to remain without a parallel. There is a Life of Cardinal Mezzofanti by C. W. Russell.

MICHAELANGELO BUONAROTTI, the great Italian painter, sculptor, and poet, was born at Castel Tuscany, 6th March, 1475. His whose original surname was Camosciello held a high position in Florence for more than two centuries. His passion for drawing showed itself at a very early age, and he became the pupil of Domenico Ghirlandajo. At seventeen he attracted the notice of Lorenzo de' Medici, who employed him in his palace. He was present at the death of Lorenzo, and afterwards took refuge at Venice and Bologna, but returned to Florence in 1494. He soon after went to Rome, whither his renown as sculptor of the "Sleeping Cupid" had preceded him. He there executed his famous *Pietà*, or Virgin weeping over the dead Christ. For the next thirty years he lived mostly at Florence, but was frequently called to Rome. About 1505 he drew his design for the decoration of the council-hall of Florence, the "Cartoon

of Pisa," as it is called. From 1508 till 1512 he was engaged on the ceiling of the Sistine chapel; his frescoes representing the creation and the principal events of Sacred History. In 1530 the great artist took a leading part in the defence of Florence against Charles V., dividing his time between the works of the fort San Miniato, and his tasks as sculptor. Three years later he began painting his great fresco in the Sistine chapel, "The Last Judgment," which occupied him eight years. It is nearly 50 feet in height, and about 43 in breadth. During this period he enjoyed the friendship of Vittoria Colonna. In 1546 he was named architect of St Peter's, and planned and built the dome. He remained in that post under five popes, and until his death. He had commenced about 1505 a mausoleum for Pope Julius II., which he worked at at various times, but which the peremptory calls of successive popes did not allow him to finish. Michaelangelo is one of the greatest artists of that great period of art in which he lived; the age of Leonardo da Vinci, Raphael, Titian, Bramante, Ghiberti, and Brunelleschi; indeed, one of the greatest of all time. He was a profound anatomist, and his mastery of the human figure in the finest details is unsurpassed by any artist. He was also a poet, and the few poems he has left are sufficient to show what heights he could have reached in that sphere. As far as his face, so in the whole man and his deeds, there is visible a vast power, with calmness and sadness. He was greatly loved and also feared. He was never married, but is said to have been once in love. He died at Rome, on the 18th February, 1564, and was buried at Florence. A new "Life of Michaelangelo," translated from the German of Herman Grimm, has recently (1865) appeared. There is a remarkably good account of this great artist in Mr Perkins's "Tuscan Sculptors."

MICHAELIS, JOHANN DAVID, a learned orientalist and biblical critic, was born at Halle, in Saxony, in 1717, and there educated. He visited England about 1740, and for a time was preacher at the German chapel, St James's Palace, and on his return to Germany was made professor of theology and oriental literature at Göttingen; was honoured with the order of the Polar Star, conferred on him by the king of Sweden, and was made an aulic councillor of Hanover. Among the most valuable and best known of his works are his "Introduction to the New Testament," translated into English by Bishop Marsh, and his "Commentaries on the Law of Moses." Died, 1791.

MICHAELIS, JOHANN HENRICH, a German divine, was born at Ketteuburg, in Hohensteina, in 1668. He was educated at Leipzig and Halle, where he taught Greek and Hebrew. In 1699 he succeeded Francke in the Greek professorship at Frankfurt, and in 1707 was made librarian at the university of Halle. He afterwards became professor of divinity and the oriental languages. Died in 1738.

MICHAUD, JOSEPH FRANÇOIS, French historian and litterateur, was born in 1767. He studied at the college of Bourg, and

went to Paris soon after the beginning of the revolution, espousing the royalist side, and supporting it by his journal, "La Quotidienne." He narrowly escaped death during the Reign of Terror, was exiled to the Jura at the 18 Fructidor (August, 1797), and returned to Paris after the 18 Brumaire (November, 1799). In 1813 he was received at the French Academy, became a member of the Chamber of Deputies in 1815, and about the same time was named reader to the king. He lost the latter office in 1827, in consequence of his opposition to the proposed law of the press. The great work on which Michaud's reputation rests is his "Histoire des Croisades," in 10 vols. 8vo. His "Correspondance de l'Orient" was the fruit of a visit to the East in 1829. In conjunction with his friend Poujoulat he edited a "Nouvelle Collection de Mémoires relatifs à l'Histoire de France." Died, 30th September, 1839.

MICHAUX, ANDRÉ, a French traveller and botanist, born, in 1746, at Satory, near Versailles; spent many years in travelling in the United States, and died, in 1802, in Madagascar. His works are "Histoire des Chènes de l'Amérique Septentrionale," and "Flora Boreali-Americana."

MICHELLI, JACQUES BARTHÉLEMI, astronomer and mathematician, was born at Geneva in 1690. He entered into the military service of France, and became captain; but on the peace of Utrecht he retired to Switzerland, and devoted himself to the sciences. He constructed a number of charts, and invented a new thermometer. Several of his papers on astronomy, meteorology, and mathematics are in the Memoirs of the Helvetic Society of Basel. Died, 1768.

MICHELLI, PIERO ANTONIO, botanist, was born at Florence in 1679, and died there in 1737. He superintended the botanical garden founded by Cosmo de Medici, and established a society of Natural History at Florence. He published "Nova Plantarum Genera," and several other botanical works.

MICHELOZZI, MICHELOZZO DI, a celebrated Italian sculptor and architect, was born at Florence in 1396. He was a pupil of Donatello, and assisted him in the monuments of Pope John XXIII., Cardinal Brancacci, and Bartolomeo Aragazzi. He is distinguished as one of the revivers of classical architecture in Italy. He built the Medici palace, went into exile with his patron Cosmo de Medici in 1433, built the library of San Giorgio Maggiore at Venice, and restored the Palazzo Visconti at Milan. After his return to Florence in 1434, he restored the Palazzo Vecchio, built the Villa Careggi for the Medici, and rebuilt the convent of St Mark. Died in 1478, and was buried in that convent.

MICKIEWICZ, ADAM, the celebrated Polish poet, was born of a noble family in Lithuania in 1798. He was educated at the university of Wilna, and published his first poems while professor of classical literature at Kowno, in 1822. These poems excited enthusiastic admiration among his countrymen, who only loved the author the more when, in the following year, his known

patriotism and friendship with some leading patriots led to his arrest and imprisonment. Sentence of exile for life, as a member of secret societies, was passed on him in 1821. Four years later he published his poem, "Wallenrod," and soon after went to Italy, visiting Goethe on his way. He subsequently lived at Dresden and at Paris, where, in 1810, he was appointed professor of Sclavonic literature at the college of France. The fanaticism and extravagance in which he had for some time indulged in his lectures necessitated his dismissal from the professorship in 1811. The most admired poems of Mickiewicz are the "Grazyna," "Ancestors," "Sir Thaddeus," and "Wallenrod." His works have passed through many editions, and have been translated into French. The "Wallenrod" has been translated also into English. Died at Constantinople, 27th November, 1855.

MICKLE, WILLIAM JULIUS, poet, was born in 1731, in Dumfriesshire. In 1765 he was employed as corrector at the Clarendon press at Oxford, where he published a poem, called "The Concubine," in imitation of Spenser, which he afterwards republished under the title of "Sir Martyn." His principal production, the translation of "The Lusiad" of Camoens, appeared in 1775; prefixed to which is a historical and critical introduction, with a life of Camoens. He was also the author of many of the finest pieces in Evans's Old Ballads. Died in 1788.

MIDDLETON, CONYERS, a celebrated divine and critic, was born at York in 1683, and educated at Trinity College, Cambridge, of which he became a fellow. In 1717 he was created D.D. by mandamus, on which occasion he resisted the claim of Dr Bentley, then regius professor, to exorbitant fees. This occasioned a lawsuit, in which Middleton triumphed. A personal enmity was the consequence of this affair; and when Bentley printed his proposals for a new edition of the Greek Testament, Middleton attacked them with such force that the design was abandoned. In 1724 he visited Italy, and, five years later, he wrote his famous "Letter from Rome," in which he drew an elaborate and highly ingenious parallel between the religious rites of Popery and those of Paganism. He was subsequently Woodwardian professor of mineralogy, and librarian, at Cambridge. His greatest literary undertaking was "The History of the Life of M. Tullius Cicero," 2 vols. 4to, which ranks among the classical productions of our literature; but his "Free Inquiry into the Miraculous Powers which are supposed to have existed in the Christian Church from the earliest Ages through several successive Centuries," brought on the author the imputation of infidelity, and gave rise to much vehement censure from a host of opponents. Middleton's "Free Inquiry" and "Letter from Rome" have a fresh interest and value from the exciting controversies of our own time. They hold an important place in the history of the growth of religious liberalism in England. He died in 1750.

MIDDLETON, Sir HUGH, was the son of Richard Middleton, Esq., governor of Denbigh Castle, under Edward VI., Mary, and

Elizabeth. He entered into business in London as a goldsmith, and rendered the most important service in supplying the city with water derived from two springs near Ware, in Hertfordshire, conveying the same through various soils for a course of 36 miles. This grand work, called the New River, was begun in 1608, and completed in 1613. Middleton was knighted soon after its completion, and, in 1622, was made a baronet.

MIDDLETON, THOMAS, an English dramatist of the 16th and 17th centuries, was the contemporary and the assistant of Ben Jonson, Massinger, Fletcher, and Rowley. He wrote many plays, but no collection of them has ever been published, and most of them are little known. "A mad world, my masters," and "The Roaring Girl," have had the widest celebrity. The dates of Middleton's birth and death, and the facts of his life, are unknown.

MIDDLETON, THOMAS FANSHAW, first bishop of Calcutta, was born at Kedleston, in Derbyshire, in 1769; was educated at Christ's Hospital, and at Pembroke Hall, Cambridge, and, after having held various small livings, was, in 1809, collated to a stall in the cathedral of Lincoln, and was shortly after presented to the rectory of Puteeniam, Herts, and the archdeaconry of Huntingdon. The government having determined on providing for the spiritual wants of British subjects in the east, Dr Middleton was selected as the fittest person to take the important charge of bishop; he was accordingly consecrated at Lambeth, and in November, 1814, he arrived at Calcutta. In 1820 he laid the foundation-stone of a church at Calcutta, near to which a school was erected for the Christian poor, and soon after arose, on the banks of the river, a college for the liberal education of youth. But in the midst of his unwearied efforts for the propagation of true religion, he was seized with a fever, and died in 1822. His most important work is the "Doctrine of the Greek Article, applied to the Criticism and Illustration of the New Testament." He for some time edited the new series of "The British Critic."

MIEL, JAN, known also from his long residence in Italy by the Italian name of GIOVANNI DELLO VITE, was an eminent painter. He was born in Flanders in 1599, and having made some progress in his art, went to Italy, where he improved himself by the study of the works of Correggio and the Caracci. He excelled in small pictures of familiar country scenes, and especially in the delineation of animals. In these he imitated the style of Bamboccio. Some of his best paintings decorated the hunting-seat of the duke of Savoy, who named him his first painter, and knighted him. Died, 1664.

MIEREVILT, or MIREVELT, MICHAEL JANZEN, Dutch painter, was the son of a goldsmith at Delft, and was born in 1565. He became very distinguished as a portrait-painter, and painted many of the sovereigns and eminent persons of his time. Died, 1641.—His eldest son was also a portrait-painter.

MIERIS, FRANS, a celebrated painter, born at Leyden in 1635, and died in 1681. He was a pupil of Gerard Houw, whose

delicate finish he rivaled, and whose colouring he was thought to excel. He had two sons, JAN and WILLEM, both of whom possessed considerable talent, and adopted their father's style.

MERIS, FRANS, Dutch historian and antiquary, was born at Leyden in 1686. He was son of Willem Meris, an eminent painter, and at first cultivated his father's art, but became an eager student of history and antiquities. His chief works are, "Historie der Nederlundsche Vorsten," in 3 vols. folio; "Groot Charterboek der Graven van Holland," &c., in 4 vols. folio; and a History of the town of Leyden, left incomplete. He was aided in his researches by the States of Holland and West Friesland. Died, 1763.

MIGLIARA, GIOVANNI, Italian painter, was born at Alessandria in 1785. Educated under several able masters, he attained considerable note as a scene-painter, and later in life as a painter of architectural interiors. He usually introduced in his pictures some historical incident or dramatic group. He was named painter to the king of Sardinia, and died at Milan, 1837. Among his most admired works are his Interior of Milan Cathedral, Portico of the church of St Ambrose, Ildegonda, Condemnation of a Templar, &c.

MIGNARD, PIERRE, surnamed the Roman, a historical and portrait painter, was born at Troyes, in Champagne, in 1610. He studied at Rome, and, during his residence there of 22 years, enjoyed great favour from the popes. At length Louis XIV. sent for him to Paris, appointed him his principal painter, and director of the porcelain and tinsmith manufactories of Sèvres and the Gobelins, and ennobled him. Mignard was on terms of intimacy with the principal French wits, and was beloved by them for his social disposition. Died, 1695.

MIGNON, ABRAHAM, a painter of Frankfurt, was born in 1639, and died in 1679. He excelled in the representation of flowers, insects, and still life, which he painted with exquisite delicacy.

MIGNOT, VINCENT, littérateur, the nephew of Voltaire, was born at Paris about 1739. Without being a priest, he obtained several benefices, among which was the abbey of Sellières, in Champagne. He wrote "Histoire de l'Empire Ottoman, depuis son Origine jusqu'à la Paix de Belgrade, en 1740," 4 vols., &c. Died, 1790.

MILDMAY, SIR WALTER, a statesman of great integrity, who filled several offices under the Tudors. Under Henry VIII. he was surveyor of the court of augmentation; under Edward VI. he had the direction of the mint; in Queen Mary's reign he sat in parliament as member first for Peterborough, and afterwards for the county of Northampton; and by Elizabeth, he was appointed chancellor of the exchequer; an office which he held for 23 years, and discharged with zeal and impartiality. He was a Protestant, and probably at heart a Puritan. He was the founder of Emanuel College, Cambridge; and died in 1589.

MILL, JAMES, political economist and historian of British India, was a native of Kincardineshire, and born in 1771. He first

came to London as tutor in the family of Sir John Stuart, but gave up that post, and devoted himself entirely to literary pursuits. In 1818 he published his admirable "History of British India;" a work of great research and powerful reasoning. He also produced several valuable works on legislation and morals, viz. his "Elements of Political Economy," an "Analysis of the Human Mind;" and "Prisons and Prison Discipline, Colonies, Laws of Nations, and Education." He was also the contributor of many excellent articles to the Encyclopædia Britannica, and the Edinburgh, Westminster, and London Reviews. In morals and legislation he was the powerful auxiliary of Jeremy Bentham; in political economy, the ally of Adam Smith and Ricardo; and in philosophy he was a follower of Bacon and Locke. He held the office of chief examiner to the East India Company. Died, 1836. James Mill was the father of the distinguished philosopher, John Stuart Mill.

MILL, JOHN, a learned divine and biblical critic, was born at Shap, in Westmoreland, in 1615; received his education at Queen's College, Oxford; became rector of Hitchingdon, in Oxfordshire, prebendary of Canterbury, and chaplain in ordinary to Charles II. He was employed 30 years in preparing his valuable edition of the Greek Testament, with various readings, amounting to upwards of 30,000. This important work appeared in 1707. Died in 1707.

MILLAR, JOHN, a learned writer, was born at Shotts, in Lanarkshire, in 1735, and educated at Glasgow, where, by the interest of Lord Kames, in whose family he had been a tutor, he obtained, in 1761, the professorship of law, which he held for nearly 40 years. He was the author of "The Origin of the Distinction of Ranks in Society" and "An Historical View of the English Government."

MILLER, EDWARD, Mus. D., was the son of a paviour at Norwich, and bred to the same business; but having a dislike to it, he absconded, and became a pupil of Dr Hurney, who was then resident at Lynn. In 1756 he became organist of the church of Doncaster, where he remained till his death, in 1807. Dr Miller published "Institutes of Music," "The Elements of Thorough Bass and Composition," "The Psalms of David, set to Music, and arranged for every Sunday in the Year," and "The History and Antiquities of Doncaster."

MILLER, HUGH, one of the most remarkable men that Scotland has produced, was born in Cromarty, in 1802. When he was five years old, his father, the owner of some small vessels employed in the coasting trade, perished at sea, and his mother was left dependent for her own support and the education of her family on the generosity of her kinsred. At the parish school he was no otherwise distinguished than as a barum-scurum boy, with a turn for any literature but that which belonged to school—a reader of strange books, a teller of queer stories, a leader in expeditions among the caves and precipices of the neighbouring coast. In his 17th year he became a mason's apprentice, and soon after his apprenticeship expired he

went to Edinburgh as a stonecutter, working with a squad of wild dissipated masons, but employing his leisure hours in poring over the great classic writers of English literature, and storing his mind with the treasures they contain. Returning to his native town with impaired health, he spent some of the following years in the lighter work of his profession, such as the preparation of tombstones in the country churchyards of Cromarty and Ross. In 1828 he repaired to Inverness, where he published a volume of "Poems by a Stone-mason," which led to his being employed as an occasional contributor to the "Inverness Courier," on subjects of local interest, and eventually to his being appointed accountant in a branch bank that had been established in his native town. In 1835 he published his "Scenes and Legends of the North of Scotland," a work for which he had long been collecting the materials. Still his labours continued to be comparatively obscure, till 1839, when his "Letter from one of the Scotch People to Lord Brougham, &c.," on the Free-Church question, commanded immediate notice among the leaders of the Non-intrusion party, who soon afterwards established the "Witness" newspaper as the organ of their views, and appointed Mr Miller the editor. Under his guidance the "Witness" (of which he ultimately became the proprietor) continued to advocate with ability the opinions of the Free Church; and in this journal, besides many occasional contributions on literature and science, he wrote in succession the series of papers, which when afterwards published collectively as "The Old Red Sandstone," "First Impressions of England and its People," and "My Schools and Schoolmasters," not only ranked him among the chief geologists of the age, but have secured him an enduring fame as an English author for the beauty and purity of their style. In 1849 he published his "Footprints of the Creator," one of the many answers called forth by the "Vestiges of the Natural History of Creation," and in some respects the most systematic as well as the most eloquent of them all. He had just completed for the press his "Testimony of the Rocks," a work in which he exhibits the bearing of geological science upon natural and revealed religion, and especially upon the Mosaic account of creation,—when, in a paroxysm of insanity, he put an end to his life in December, 1856. Since his death "The Cruise of the Betsy" has appeared, being a republication from the columns of the "Witness" of various papers, in which he gives an account of visits to the Hebrides and to several other parts of Scotland.

MILLER, JOSEPH, a witty actor, was born in 1684, and was a favourite low comedian about the time that Congreve's plays were fashionable, to the success of which, it is said, his humour greatly contributed. He died in 1738. The compilation called "Joe Miller's Jests" was the work of John Motley. The name has, however, not only been used to pass off the original stock, but thousands of other jokes and witticisms, manufactured long since the bones of Joe were deposited in the church-

yard of St Clement's, in the Strand; where a stone still exists, with an epitaph written by his friend, Stephen Duck.

MILLER, PITTIER, gardener and botanist, was born in 1691. He succeeded his father as gardener to the Company of Apothecaries at Chelsea; and soon distinguished himself by his knowledge of plants. He communicated some papers to the Royal Society, of which he became a member; and in 1730 he published "A Catalogue of Trees, Shrubs, Plants, and Flowers in the Gardens near London." This was followed by his "Gardener's Dictionary;" a work which is highly eulogized by Linnaeus, and through which its author obtained from foreigners the appellation of *Hortulanorum Princeps*. Between 1755-71 appeared "Figures of Plants," adapted to the Dictionary, in 2 vols. folio. His other works are, the "Gardener's Calendar" and "The Gardener's and Florist's Dictionary." Died at Chelsea, 1771.

MILLES, DR JEREMIAH, an English divine and antiquary; born, 1713; died, 1784. He was educated at Oxford, and became dean of Exeter and president of the Society of Antiquaries. He engaged in the Chattertonian controversy, and published the whole of the supposed Rowley's poems, with a glossary.

MILLEVOYE, CHARLES HUBERT, a French poet, was born at Abbeville, in 1782, and displayed poetical talents at a very early age. Many of his pieces, particularly his elegiac compositions, are marked by great feeling, elegance, and purity. Died, 1816.

MILLIN, AUBIN LOUIS, an eminent archaeologist and naturalist, was born at Paris in 1759. In the reign of Napoleon he made two antiquarian journeys through France and Italy, and discovered remains which had been previously overlooked. He edited the "Magasin Encyclopédique" nearly twenty years, and was one of the founders of the Linnaean Society of Paris. His works are very numerous; among them the principal are, "Dictionnaire des Beaux Arts" and "Galerie Mythologique." His lectures, which were fashionably attended, contributed, with his works, to diffuse a taste for the study of antiquities in France. Died, 1818.

MILLINGEN, JAMES, classical archaeologist, was the son of a Dutch merchant at London, and was born in 1774. He was educated at Westminster School, became a banker at Paris, but applied himself closely to his favourite studies. About 1821 he went to Italy, where he spent the rest of his life. Among his most important works are—"Recueil de quelques Médailles Grecques inédites;" "Peintures antiques inédites de Vases Grecs," "Ancient Coins of Greek Cities and Kings," &c. Died at Florence, 1845.

MILLOT, CLAUDE FRANÇOIS XAVIER, a French historian, was born at Besançon in 1726. He entered into the society of Jesuits, but quitted it in consequence of being liberally treated, and officiated as a preacher at Versailles and Lunoville. For some time he held the professorship of history at Parma; but relinquished it to become preceptor to the Duke d'Enghien. In 1777 he was admitted to the French Academy. His principl-

ANÇOIS XAVIER, a
born at Besançon in
the society of Jesuits,
me of being illi-
litated as a preacher
life. For some time
of his story at Parma;
became preceptor to
in 1777 he was ad-
ademy. His principl-

pal works are, "Elements of the History of France," 3 vols.; "Elements of the History of England," 3 vols.; "Elements of Universal History," 9 vols.; "History of the Troubadours," 3 vols.; and "Political and Military Memoirs towards the History of Louis XIV. and Louis XV.," 6 vols.

MILLS, CHARLES, historian, was born at Greenwich, in 1788. He served his time as clerk to a solicitor, but relinquished his legal pursuits for others more congenial to his tastes. In 1819, he published his "History of Mohammedanism," which was succeeded by the "History of the Crusades," the "Travels of Theodore Ducas," and the "History of Chivalry." Died, 1825.

MILNE, COLIN, divine and naturalist, was born at Aberdeen, and educated at the Marischal College. Having been tutor to Lord Algegon Percey, he obtained, through the interest of the Northumberland family, the rectory of North Chapel, in Essex. His works are a "Botanical Dictionary," "Indigenous Botany," and "Institutions of Botany." Died, 1815.

MILNE, JOSHUA, author of the celebrated "Treatise on Annuities and Assurances," was clerk in the banking-house of the Messrs Currie previous to his becoming connected with the Sun Assurance Company, to which he performed the duties of actuary for upwards of 30 years. He contributed various memoirs of great practical value on the subject of mortality to the *Encyclopædia Britannica*; but his chief work is the Treatise to which we have already adverted. This, although published so long ago as the year 1815, and notwithstanding the disadvantage of an involved and awkward notation, still maintains its place as the most satisfactory and complete treatise on the subject. To Mr Milne the community is indebted for the construction of the tables founded on the data of the mortality collected at Carlisle by Dr Heysham, which are now generally adopted as the basis of calculation in life-assurance offices, and which have exercised a most important influence on the growth of life-assurance in Great Britain. He left behind him the most complete collection extant on subjects connected with the statistics of vitality. Died, 1831, aged 78.

MILNER, JOHN, a celebrated Catholic divine and writer on ecclesiastical antiquities and theology, was born in London, in 1752. He finished his studies at Douay. In 1777 he was ordained priest, and commenced his pastoral duties, in 1779, at the Catholic chapel, Winchester. In 1785 he published "A Letter to the Author of a Book, called a Candid and Impartial Sketch of the Life and Government of Pope Clement XIV." Dr Milner's attachment to the study of ancient ecclesiastical architecture led him to an attentive observation of the remains of Catholic antiquity with which Winchester abounds; and the learning and skill which he displayed procured him admission into the Society of Antiquaries, in 1790. He contributed many valuable papers to the *Archæologia*; and, in 1798, he published his "History, Civil and Ecclesiastical, and Survey of the Antiquities of Winchester," 2 vols. 4to; and, subsequently, a "Treatise on the Eccle-

siastical Architecture of England during the Middle Ages." In 1803 he was appointed vicar-apostolic in the midland district, with the title of "bishop of Castabala." In 1814 he visited Rome, where he remained about twelve months. In 1816 he published a treatise, entitled "The End of Religious Controversy," containing a defence of those articles of the Catholic faith usually regarded as most objectionable by Protestants; and he continued not only in the active exercise of his prelatial duties, but occasionally to publish theological and controversial treatises, till short time previous to his death, which took place in 1826.

MILNER, JOSEPH, a Calvinistic divine, was born at Leeds in 1744; received his education there, and at Catherine Hall, Cambridge; was successively master of Hull Grammar School, evening lecturer, and vicar of the Holy Trinity. He was the author of a "History of the Church of Christ," and "Sermons." Died, 1797.

MILNER, ISAAC, brother of the preceding, divine, mathematician, and natural philosopher, was born at Leeds in 1781. In his youth he was a weaver; but availing himself of his leisure hours to acquire a knowledge of the classics and mathematics, he made such progress as to become usher to his brother at Hull. He afterwards entered as a sizar at Queen's College, Cambridge, became senior wrangler in 1774, and gained the first mathematical prize. In 1783 he was chosen professor of experimental philosophy, master of his college in 1788, and about the same time he obtained the deanship of Carlisle. He was subsequently vice-chancellor of the university, and Lucasian professor of mathematics. Dr Milner wrote against Marsh, in favour of the Bible Society; and contributed many excellent papers on chemistry and natural philosophy to the *Philosophical Transactions*.

MILORADOWITCH, MICHAEL ANDREWITCH, Count of, a distinguished Russian officer, was born in 1770. He entered the service at an early age, and rose rapidly; in 1799 he commanded the vanguard of Suwarrow's army in Italy; acted as lieutenant-general in the battle of Austerlitz; fought victoriously against the Turks, in 1808; and was of the greatest service in the campaigns of 1812, 1813, and 1814. After the peace, he was appointed military commandant of St Petersburg; and, in 1825, at the accession of the Emperor Nicholas, he was killed by a pistol shot.

MILTIADES, a celebrated Athenian general, hero of Marathon, was the youngest son of Cimón, and succeeded his brother, Stesagoras, about B. C. 515, as tyrant of the Chersonese. He took part in the invasion of Scythia by Darius, held his government of the Chersonese at least 22 years, and retired to Athens in 493. On occasion of the second Persian invasion of Greece, under Datis and Artaphernes, 490, Miltiades was chosen one of the ten generals, and signalized himself by a great victory over the Persians on the field of Marathon. Having persuaded the Athenians to give him the command of a fleet, he used it for private ends in an attack on Paros. The attack

failed, Miltiades was severely wounded, and on his return to Athens was prosecuted and imprisoned for deceiving the people. His death took place in prison soon after.

MILTON, JOHN, the great English poet and illustrious statesman, was born in Bread Street, London, December 9, 1608. His father, a notary, was a man of cultivated mind, and especially skilled in music; and gave him a careful education, which was continued at St Paul's School and the university of Cambridge. He entered the latter in 1624, and quitted it in 1631, without taking his degree of M.A. He distinguished himself at Cambridge by the excellence of his Latin poems. The next few years he spent at his father's house in Buckinghamshire, devoting himself with such earnestness as only genius can to study and self-cultivation. Some of his minor poems were probably written during this period. In 1637 he set out for Italy, and visiting Paris on his way, made acquaintance with Grotius. At Florence he visited the aged Galileo in his prison, and at Rome Cardinal Barberini received him kindly. After three years' absence news reached him of the political troubles which were beginning in England, and, passionate lover of liberty as he was, he hastened home, to take what part he, as thinker or actor, might. The first of the long series of writings by which he showed himself the earnest and accomplished champion of freedom, were the "Two Books on Reformation in England," published in 1641. "Prelatical Episcopacy," and other tracts appeared the same year. In 1643 he married Miss Powell, daughter of an Oxfordshire gentleman attached to the royal cause. She very soon returned to her father's house, and for her desertion was repudiated by Milton, who soon after published successively his several treatises on divorce. About the same time he passed to the side of the Independents, and wrote the "Arcopagitica," one of the most magnificent and wonderful of his prose works. A reconciliation with his wife was brought about by friendly intervention, and she returned to him. In February, 1649, he was appointed Latin secretary to the Council of State; and among the duties assigned to him were those of writing a refutation of the sophistical "Eikon Basillike," then attributed to Charles I., and a reply to the violent work of Salmasius in defence of the king and the monarchy. Hence the masterly "Eikonoclastes," and the noble "Defence of the People of England." On the establishment of the Protectorate Milton became secretary to Cromwell, and remained so till the death of the latter in 1658. Several years before that time he had become totally blind, deliberately and heroically preferring, as he says, the loss of his sight to the desertion of his duty. The last short intervals of sight allotted him were devoted to the composition of the "Defence." His pathetic reference to his blindness in the "Paradise Lost" is well known, less known, but at least equally deserving to be so, are the passages in which he speaks of it in the "Defence," and in one of his Latin letters (XV.).

At the Restoration he retired into obscurity, old, poor, and blind; was once arrested by order of the Commons, but after a short confinement was liberated. The court went on with its gaudies and debaucheries, and the puritan poet wrote "Paradise Lost." He had lost his first wife, and a second, and married a third in 1660. His two daughters, whom he had taught to read Greek and Hebrew, were his readers and amanuenses. Music, too, lent its soothing influence to sweeten his lot. "Paradise Lost" was finished in 1663, and the next year, during the plague of London, Milton removed to Chalfont, in Buckinghamshire. For his great poem he could hardly find a publisher, and he received for it a miserable five pounds, with a conditional promise of other like sums afterwards. It appeared in 1667, and, as was likely in such a time, found few readers. Milton continued to write both poems and prose works, and on the suggestion, it is said, of his friend Ellwood, the Quaker, wrote "Paradise Regained," which has been unfairly depreciated. "Samson Agonistes," a grand tragic drama after Greek models, appeared about the same time. Among his other poems are the mask "Comus," one of his most exquisite creations; "L'Allegro," "Il Penseroso," "Lycidas," "Sonnets," and Latin and Italian poems. Among the prose works not already named are—"Reason of Church Government;" "Apology for Smeectymnus;" "Treatise on Education;" "Tenure of Kings and Magistrates;" "History of England," down to the Norman Conquest only, the first history of that early period derived from the Saxon Chronicles, as Milton was also the first of our historians who had a printed chronicle of the period (Wheloe's); treatise "Of True Religion, Heresy, Schism," &c.; "How to remove Hirelings out of the Church;" Letters of State, &c. Milton wrote also a Latin work on Christian Doctrine, the manuscript of which was discovered, so recently as 1823, in the State-Paper Office, and which was published under the care of Bishop Sumner. Milton died at his house in Bunhill Row, London, November 8, 1674, and his remains were buried in the parish church of St Giles, Cripplegate, where there is a monument to his memory. Another monument was subsequently erected to him in Westminster Abbey. A more enduring one is built up in the hearts of all lovers of truth and freedom, not his own countrymen alone, but men of all lands and times. Time has reversed and almost obliterated the verdict of the enemies of Milton, and he is now for all of us a man whose language we are proud to call our own, great among the greatest, and good among the best. Worth in his sublime Sonnet, Macaulay in his brilliant Essay, and Landor in his vehement tractate on Popery, have given words to the verdict of mankind; and Johnson's angry abuse, and Charles II.'s proclamation for the burning of the "Defence" and the "Eikonoclastes" (August 13, 1660), and the pettier hate of the Oxford bigots, who in 1683 burnt some propositions selected from his works, are all over and well-nigh forgotten. Professor David Masson has pub-

ed into obscurity, once arrested by after a short confinement the court went on to the theatre, and the "Paradise Lost." He had a second, and two daughters, and Greek and He and nuances. ing influence to "Paradise Lost" was next year, during Milton removed to Wiltshire. MIMNERMUS, a Greek satirical poet of the 7th century B. C., who is said to have invented the pentameter measure; but only a few fragments of his poems are in existence.

MINA, Don FRANCISCO ESPOZO Y, a distinguished Spanish general, who, for a long time, was commander-in-chief of the Catalonian army, was a native of Navarre, and born in 1782, at Ydoain, near Pampluna. He first distinguished himself in guerilla warfare, in which he displayed incessant activity and admirable presence of mind. Having co-operated in the blockade of Pampluna, and recovered Saragossa and several other places, he had the mortification to find that, at the general peace in 1814, he had been labouring only to re-establish the despotic policy of Ferdinand VII., and he made an ineffectual effort in the cause of freedom to gain over the garrison of Pampluna. He then sought an asylum in France; but whilst resident in the French capital, he was arrested by a commissary of police, employed by the Spanish ambassador. On this occasion the conduct of Louis XVIII. was most honourable; he dismissed the commissary, insisted upon the ambassador being recalled, and not only released Mina, but granted him a pension of 1000 francs. When the army of Cadiz, in 1822, unfurled the standard of freedom, by proclaiming the constitution of 1812, Mina hastened to Navarre, and was advancing against Pampluna at the head of a few hundreds of followers, when he was informed that the king had accepted the constitution. He was subsequently appointed captain-general of the three armies of Navarre, Catalonia, and Aragon; but when, by the intervention of France, Ferdinand was again enabled to discard his professed adherence to the constitution, Mina left Spain for England, and arrived at Plymouth, Nov. 30, 1823. After the accession of Christinn, he took an active part against Don Carlos; but many of his resources partook of the general snugginny character of this unnatural warfare, and tended to tarnish the laurels he had formerly so nobly won. Died, 1836.

MINUCIUS FELIX, MARCUS, a rhetorician and writer of the 3rd century, who is said to have been a native of Africa, and a lawyer by profession. He lived at Rome, where he wrote a dialogue in defence of Christianity, entitled "Octavius," which possesses considerable merit, and was long ascribed to Arnobius, till Baudouin discovered the real author in 1560. Another treatise, "De Fato," has also been ascribed to him.

MIRABEAU, VICTOR RIQUETTI, Marquis de, descended from an ancient family in Provence, but originally of Naples. He was one of the principal propagators of the doctrines of the French political economists, and wrote several books in support of them. His chief work is entitled "L'Ami des Hommes." The Marquis de Mirabeau was the father of the great Mirabeau, the subject of the following memoir. Born, 1715; died, 1789.

MIRABEAU, HONORÉ GABRIEL RI-

QUETTI, Count de, one of the most celebrated characters of the French revolution, was the son of the preceding, and born at Bignon, in Provence, in 1749. On leaving school, he entered the military service; and his intercourse with young and dissipated officers familiarized him with all their vices. His active mind, however, could not remain idle, and he read all the books which he could on the military art. He also fell in love, and his passion was marked by all the impetuosity of a strong and wild character. His father, who systematically thwarted his inclinations, procured his confinement in a fortress on the island of Rhé. After his liberation he went, as a volunteer, to Corsica, distinguished himself, and obtained a commission as captain of dragoons; but his father refusing to purchase him a regiment, he abandoned, though unwillingly, the military profession. In 1772 he espoused a rich heiress of Aix, but he soon squandered the fortune he received with her, and plunged himself in debt. He was confined in different prisons, and on obtaining his liberty, eloped to Holland with the wife of the marquis de Mounier. For this he was afterwards imprisoned in the castle of Vincennes, and remained there three years and a half. He then instituted an ineffectual lawsuit against his wife, who obtained a separation from him. In 1784 he visited London, and afterwards Berlin, sent to the latter city on a secret political mission; and he was variously employed in literary quarrels and occupations till the commencement of the French revolution. This offered Mirabeau an ample field for his activity. After unsuccessfully offering himself to the states of Provence as deputy to the states-general, he was elected for Aix and Marseilles as deputy of the third estate, and by the courtiers he was termed the plebeian count. In this new capacity, his extraordinary eloquence, his talent, and his boldness, soon gave him irresistible weight in the assembly, and rendered him the idol of the people. The story of his life thenceforth would be the history of the assembly, of which he was long the master-spirit, and was chosen president in January, 1791. At length he entered into a treaty with the court, to use his influence in stopping the progress of republicanism. He required a pension of 40,000 francs a week, and the promise of such a diplomatic or ministerial post as he should select, after the re-establishment of the royal authority. These demands were conceded, and he received the pension for several weeks. It was agreed that the dissolution of the assembly should be effected by an expression of the will of the nation, and that a new assembly should be convoked, composed of men of more moderate opinions. Before, however, he could carry his intentions into effect, a sudden illness terminated his existence in 1791. His remains were honoured with a public funeral, and deposited in the Pantheon. They were, however, in the following year, removed from the Pantheon, and deposited by night in a churchyard, and the great orator himself was declared traitor by the assembly! The works of Mirabeau have been several times

republished. His life and character are discussed in an elaborate Essay by Carlyle.

MIRABEAU, BONIFACE RIQUETTI, Viscount, younger brother of the preceding, was born in 1754; served in the French army against the English in America, but did not imbibe revolutionary principles therefrom. Being chosen deputy to the states-general from the nobility of Limousin, he constantly resisted the re-union of the three orders, defended the rights of the clergy, and opposed the progress of the revolution. In 1790 he emigrated to Germany, and raising a legion of loyalists, he joined the prince of Condé, and served under him with great reputation; but he was unequal to the fatigues to which he was exposed, and died in 1792.

MIRANDA, DON FRANCISCO, a general in the service of the French republic, and the earliest martyr in the cause of freedom in South America, was born at Caraccas, of an ancient Spanish family. He presented to different courts plans for the emancipation of the Spanish American colonies, and with this view went to Paris in 1792, where he connected himself with Pétion and the Girondists. While waiting for an opportunity to commence operations in America, Miranda was appointed general of division under Dumouriez. Some time after, he was imprisoned in consequence of his political intrigues. In 1794 he was liberated; but a few months only had elapsed before he received orders to quit France for renewed intrigues. This order he evaded; but a second sentence of deportation, in 1797, obliged him to take refuge in England. In 1803 he returned to Paris, and was again banished, for taking part in an opposition to the first consul. Miranda now devoted himself, with all the energy of his character, to the accomplishment of a long-cherished scheme, for overthrowing the Spanish dominion in America. Having procured some secret assistance, he sailed from New York in 1806, with one ship and a number of volunteers, and landed in Venezuela; but his attempts to rouse the inhabitants were altogether unsuccessful, and he found himself compelled to re-embark. In 1810 he renewed his attempt with more success, but was finally obliged to capitulate to the Spanish general Monteverde, who, in violation of the articles of surrender, treated him as a prisoner. Miranda was sent to Spain, and confined in the dungeons of the Inquisition at Cadiz, where, in 1816, he died, after an imprisonment of four years.

MIRANDOLA, GIOVANNI PICO DELLA, a young Italian nobleman, distinguished for his precocious talent, learning, and memory, was born in 1463. He studied at Bologna, and at many other universities in Italy and France, and made extraordinary acquisitions in languages, logic, philosophy, theology, and other subjects. Like the "Admirable Crichton," a century later, he showed his vanity and arrogance by publishing a challenge to dispute with any one on any of nine hundred propositions then set forth. He was then 23 years of age, and was living at Rome. Some of his propositions were submitted to the pope as heretical, and he

had them inquired into and censured. Pico, after some further wanderings, settled at Florence, where he enjoyed the friendship of Lorenzo de Medici, Poliziano, and other eminent scholars. He visited Lorenzo on his death-bed, and did not long survive him, dying at Florence, 17 November, 1494; the very day on which the city was entered by the French under Charles VIII. The works of Pico have been several times republished, but are now neglected. His Life was written by his nephew, Giovan-Francesco, who also wrote the Life of Savonarola.

MIRBEL, BUISSEAU, French botanist, was born in 1776. At the age of 25 he became professor of botany at Paris, where he spent his long laborious life, contributing by his researches to the progress both of botany and vegetable physiology. He was author of "Éléments de la Physiologie Végétale," and one of the collaborateurs in the continuation of Buffon's "Histoire Naturelle." He also assisted Lamarck, in the preparation of the "Histoire Naturelle des Plantes," and wrote several separate memoirs of great value. Died, 1854.

MIREVELT, M. J. [MIREVELET.] MITAN, JAMES, an historical engraver of some celebrity. Born in London, 1776; died, 1822.

MITCHELL, Sir ANDREW, a British admiral, born in Scotland about 1757. In 1776 he accompanied Sir Edward Vernon to India, as a midshipman; and while there his services were such that he was rapidly advanced to the rank of post-captain. On the commencement of hostilities with the French republic, he was appointed to the command of the Asia, of 64 guns, and next to the Impregnable, of 90. In 1795 he was made rear-admiral; and, in 1799, soon after his promotion as vice-admiral of the White, he joined Lord Duncan off the coast of Holland, and entering the Texel, the Dutch fleet surrendered to him without firing a shot. He was now created a knight of the Bath; in 1802 he was appointed commander-in-chief off the coast of America; and he died, at Bermuda, in 1806.

MITCHELL, Sir DAVID, an eminent naval commander in the reign of William III., was descended from a respectable family in Scotland. He commanded the Elizabeth, of 70 guns, at the battle off Beachy Head, where he behaved with great gallantry. In 1693, he was made rear-admiral of the Blue, and in 1694 had the honour of knighthood conferred upon him. He was employed in bringing over to England and carrying back, Peter the Great, and was also sent on a diplomatic mission to Holland. He died in 1719.

MITCHELL, THOMAS, a distinguished philologist, was born in London, in 1783, and educated at Christ's Hospital and at Cambridge, and subsequently devoted himself chiefly to private tuition and authorship. He contributed several excellent papers to the *Quarterly*, upon Greek manners and literature; and occasionally superintended the classical works that emanated from the Clarendon press; but his chief title to fame rests upon his admirable translation of the Plays of Aristophanes into English verse. Died, 1845.

MITCHELL, SIR THOMAS LIVINGSTONE, a distinguished Australian explorer, was a native of Stirlingshire, and was born in 1792. He entered the army at the age of 16, and served in the Peninsular war, after which he was employed by the English government to make surveys and maps of the battle-fields in the Peninsula. He was appointed, in 1827, deputy-surveyor-general of New South Wales, a post which gave him opportunity for making explorations of that unknown land, which his energy and sagacity enabled him to turn to the best account. His first three expeditions were made between 1831—1836, and led to the discovery of the Red River and of Australia Felix, and to an accurate knowledge of the course of the Darling River. The fourth was undertaken in 1845-6, and though its main object was not accomplished, important additions were made to the knowledge of the interior. Sir T. Mitchell published accounts of these explorations in two separate works in 1838 and 1848. He visited England in 1839 and 1853, and on the first occasion was knighted, and made D.C.L. Oxford. He was also chosen F.R.S. and F.R.G.S., London. Died, near Sydney, 1855.

MITCHELL, SIR ANDREW, British diplomatist, born at Edinburgh, about the close of the 17th century, was intended for the profession of the law, but had to discontinue his studies in consequence of the loss of his wife in 1719, and the deep sorrow it brought him. He spent some years in travelling, especially cultivating the society of superior men; studied mathematics under Maclaurin; and began his political career as secretary to the marquis of Tweeddale, secretary of state for Scotland 1741—45. In 1747, he was returned to parliament as member for the Banff boroughs; was named his majesty's resident at Brussels, in 1751; and, two years later, was created knight of the Bath, and sent as ambassador-extraordinary to the court of Berlin. There he acquired the confidence and esteem of Frederick II., and accompanied him throughout the campaigns of the Seven Years' War; reluctantly quitting his tent even on occasion of the defeat of the Prussians by Soltikoff. He filled his difficult and responsible post with rare good sense, manly spirit, and moderation; contributed to detach Prussia from the French alliance; and refused to comply with the request of the English minister that he should report officially some of the sharp sayings of Frederick. He visited England for his health's sake in 1765, but returned to Berlin in the following year, and there died, 28 January, 1771. The court attended his funeral, and Frederick looked on with tears. The letters and despatches of this distinguished ambassador are now in the British Museum, and they are among the most important of the documents illustrating the period they refer to.

MITFORD, JOHN FREEMAN. [REDES-DALE.]

MITFORD, MARY RUSSELL, miscellaneous writer, than whom none has better depicted English rural life in its most genial aspects, was born at Aresford in Hampshire, in 1789. Her father, Dr George Mitford, was

an impulsive and warm-hearted man, who fostered the premature capacity displayed by his daughter, by all the appliances that wealth and taste could furnish; but his irregularities plunged him into difficulties, which his daughter shared in the most unrepining spirit. When she was about ten years of age, she gained a lottery prize of twenty thousand pounds, which her father soon squandered. Yielding to a strong impulse of literary enthusiasm, she first appeared as the author of some poems; and when the habits of her father rendered it necessary that she should turn her talents to some account, she found a field for her labours in the "Annals;" but it was not till she had written for the "Lady's Magazine" were collected, in the volume entitled "Our Village," in 1832, that her fame was established. From this period her cottage in Berkshire became a place of pilgrimage, not only to her fellow-countrymen, but for all lovers of literature. In 1842 she received a pension from the queen. Meanwhile, she prosecuted her literary pursuits with equal industry and ability. As early as 1823, she had published the tragedy of "Julian;"—and she next produced "Foscari," "Charles I.," and "Rienzi," all of them highly intellectual compositions, though the last only has proved successful on the stage. After some years spent in seclusion, she again came before the world in a collected edition of her works, "Ather-ton, a Tale," and "Recollections of a Literary Life." Died, 1855.

MITFORD, WILLIAM, an eminent historian and miscellaneous writer, was born at London, in 1744; studied at Queen's College, Oxford, and then at the Middle Temple; but he early quitted the profession of the law, living for some time in retirement, and devoting himself to study. At the age of 25, he obtained a commission in the Hampshire militia, of which he rose to be colonel. He entered parliament in 1785, and represented successively, Newport, in Cornwall, Beeralston, and New Romney. But although he sat in the House of Commons about 23 years, he very seldom took part in the debates. He was professor of ancient history at the Royal Academy; and, besides his principal work, "The History of Greece," which appeared in 5 vols. between 1784—1818, he published an "Inquiry into the Principles of Harmony in Languages," "A Treatise on the Military Force, and particularly the Militia of this Kingdom," "Observations on the History of Christianity," &c. Mitford's History of Greece is written with a violent antipathy to democracy, is faulty in style, and dull in narration, and has long been superseded. Died, 1827.

MITHRIDATES, surnamed EUPATOR, and THE GREAT, king of Pontus, was born about B. C. 131. He was the son of Mithridates Euergetes, was brought up at Sinope, and displayed in his youth the extraordinary daring and tact which distinguished him through life. He diligently cultivated his mind by study and travel, and is said to have been master of more than twenty languages. He succeeded his father B. C. 120, and his first acts were the murder of his mother and

his brother. He then began his career of conquest by making himself master of Colchis and the Thauric Chersonese. The kingdoms of Bosphorus, Cappadocia, and Bithynia were successively added to his dominions. Friend and ally, as he professed, of the Romans, he obeyed the decree of the senate, to restore the two last-named countries to their lawful sovereigns. But in 88 he again expelled those kings, and did not shrink from a war with the Romans; took Phrygia and Galatia, almost all Asia Minor, and occupied Thrace and Athens. All hope of reconciliation with Rome was taken away by the massacre, which he is said to have ordered, of all Romans found in Asia. Eighty thousand are said to have been slain. Sulla was then sent against him, who, after taking Athens, and defeating his general, Archelaus, at Cheronca and Orchomenos, reconquered Ionia, Mysia, and Lydia. After four years of war, Mithridates was compelled to give up his conquests and his fleet, and pay a heavy contribution to the Romans. More fighting took place in 83 and 82, between Mithridates and the Roman commander Murena; and on the death of Nicomedes, king of Bithynia, in 74, the possession of his kingdom was disputed, and war again broke out. Mithridates invaded Bithynia, defeated the Romans at Chalcedon, and besieged Cyzicus. Lucullus soon compelled him to raise the siege, defeated him in Pontus, and drove him into Armenia, where he obtained the aid of Tigranes, his son-in-law. Lucullus, however, defeated the allied sovereigns again and again, and but for a mutiny of his troops, which compelled him to retire, would probably have ended the war. Again the tide turned, and Mithridates recovered a large part of his dominions. In 66, Pompey was sent to carry on the war, and defeated him near the Euphrates, so that he had no choice but to retire into the kingdom of Bosphorus. His spirit was still unbroken, and he formed the bold plan of invading Italy from the north, but at last his son Pharnaces was proclaimed king by the soldiers, and the great warrior, who had withstood the power of Rome for 25 years, took poison to end his life. It was ineffectual, from the frequent use he had made of poisons and antidotes, and he was put to death by a faithful Gaul in his service, n. c. 63. His remains were laid with those of his predecessors, at Sinope.

MITSCHERLICH, EUGEN, an eminent German chemist, was born in East Friesland, in 1791, and was educated at the universities of Heidelberg, Paris, and Göttingen. Soon after he applied himself to the study of chemistry, and made the discovery of the beautiful law of "isomorphism." In 1820, he visited Berzelius, at Stockholm, and for about a year pursued the study of chemistry under his direction. In 1822, he was called to the chair of chemistry at the university of Berlin; was chosen foreign fellow of the Royal Society of London in 1828; in the following year received the Royal Medal; and, in 1852, was named foreign associate of the French Institute. He was author of a highly esteemed Handbook of Chemistry, frequently republished. Died, 1863.

MITZLER DE KOLOF, LORENZ CARL, a

German musical composer, was born at Wettelsheim, in 1711; received his education at the university of Leipzig, where he not only perfected himself in musical science, but made a considerable proficiency in mathematics and natural philosophy. He afterwards settled at Warsaw, where he became so great a favourite at the court, as to obtain from the king a patent of nobility. His principal works are, "A Musical Library," 3 vols., and "The Elements of Thorough Bass." Died, 1778.

MOAWIYAH, sixth caliph, first of the dynasty of the Ommayydes, was the son of Abu Soflan, one of the chiefs of the Koreishites and the bitterest foe of Mohammed, and was born about 610. After the conquest of Mecca by the prophet, Moawiyah, with his father, embraced Islamism. He became secretary to Mohammed, and in 641 was made governor of Syria. He conquered the Islands of Cyprus and Rhodes, and on the murder of the Caliph Othman, 655, refused to recognize Ali, his successor; and after a campaign of several months on the Euphrates, defeated him. His life was attempted by a Chazegite in 660, but he escaped with a serious wound; and Ali being assassinated about the same time, Moawiyah procured the abdication of Hassan, son of Ali, and became undisputed sovereign. Civil war ceasing, the caliph extended his dominions by conquests both in the east and the west. In 668 he undertook the siege of Constantinople; the first attempt, which was to be followed by so many others, and only after nearly eight centuries to be crowned with success. The caliph's son, Yazid, accompanied the fleet; the operations were continued for six months, and the troops retired for the winter to Cyzicus. The attack was repeated for the next six summers, and at last, after immense losses, the Muslims had to retire and make peace. Moawiyah succeeded in making the caliphate hereditary, and his son Yazid was proclaimed his successor in 676. Died at Damascus, 680.

MOCHENACKI, MAURCY, Polish patriot and historian, was a native of Galicia, and was born in 1804. While a student at the university of Warsaw he was arrested and imprisoned on a charge of being a member of secret societies; and he took a prominent part in the insurrection of 1830. He risked his life by his violent opposition to the measures of the provisional government then established, and for some time had to remain in concealment. He retired to France after the defeat of his countrymen, and died at Auxerre, in December, 1834. He was author of a graphic and lively narrative of the "Insurrection of the Polish Nation," and of a treatise "On Polish Literature in the 19th century."

MOELLENDORF, RICHTARD JOACHIM REINICH, Count von, a Prussian general, born in 1721. His behaviour at the battles of Mollwitz and Kotowitz, in the first Silesian war, having attracted the notice of Frederick II., whom he accompanied thither as page, he was promoted to a company in the guards, became a colonel in 1761, afterwards lieutenant general, and in 1782 governor of Berlin. During the disgraceful

manded the Prussian troops, and did every-
thing in his power to alleviate the mis-
fortunes of the Poles. On his return home
he was created a field-marshal and governor
of South Prussia; and succeeded the duke of
Brunswick in the command of the Prussian
army on the Rhine, in 1794, when he gained
the victory of Kaisers-lantern. He was
present at the battles of Jena and Auerstadt,
where he was wounded; and he died in 1816.

MOHAMMED, ABUL KASEM IBN ABDAL-
LAH, the Arabian prophet and the founder
of ISLAM, was born at Mecca, A. D. 570 or
571. He was the only son of Abdallah and
Amina, his father, celebrated for his singu-
lar beauty, being of the family of Hashem,
the most illustrious in the noble tribe of
Koreish, princes of Mecca and guardians of
the Kaaba. Left an orphan in infancy, he
was brought up by his uncle, Abu Taleb,
who trained him to commerce, and took him
to the great fairs of Arabia and Syria.
The theory of his high cultivation is now
exploded. Some of the greatest orientalis-
—Sprenger, Renan, Caussin de Perceval—
hold that he could neither read nor write,
and that he knew the Rabbinical traditions
and Apocryphal Gospels only by hearsay.
When 25 years of age Mohammed married
Khadija, a rich and noble widow of Mecca,
and the following fifteen years of his life
were passed in domestic quietness, only in-
terrupted by occasional retirement into the
mountain solitude. From his youth the
future prophet had shown a fondness for
seclusion and serious meditation, and having
attained a ripeness of character and dis-
tinctness of aim and views, he began, at 40
years of age, to announce himself as a prophet,
and to proclaim the doctrine of *Islam*
(Salvation), that "There is no God but
Allah, and Mohammed is his Apostle." His
wife, Khadija, was one of the first to believe
in him; and among other members of his
family who readily acknowledged his mis-
sion was his cousin, the heroic and illus-
trious Ali, son of Abu Taleb. After three
years he made a more public announcement
of his doctrine, especially insisting on the
unity of God, and denouncing all kinds of
idolatry; but his followers were very few
for years, and the opposition of the elders
and people of Mecca growing more and more
bitter and violent, some of his disciples re-
tired into Æthiopia. In A. D. 621 Moham-
med lost his faithful and beloved Khadija,
who during the 24 years of their marriage
had retained his love, and had no rival. The
death of Abu Taleb took place about the
same time; and soon after the Koreishites,
headed by Abu Sophian, resolved to put the
prophet to death. He fled from Mecca, hid
himself in a cave for three days, and then,
with his only companion, Abubeker, with-
drew to Medina (then called Yatrib). From
the flight of Mohammed commences the
era of the *Hegira* (16 July, 622). He made a
public entry into Yatrib amidst the loudest
welcomes of the citizens, and at once as-
sumed the offices of king and priest. He
also there married his second wife, the beau-
tiful Ayesha, daughter of Abubeker, who
long survived him. He had, however, many

other wives, all widows except Ayesha, and
besides indulged without restraint his sen-
sual propensities. Persuasion, long tried
with small success, at length gave place to
force and war, and in the battle of Beder,
first of the long series of battles by which
the faith of Islam was established over so
large a part of the world, and gained a hold
which twelve centuries have not broken,
he defeated Abu Sophian and the Koreish
(A. D. 623). He was defeated by them soon
after at the battle of Ohud, and in A. D. 625,
they unsuccessfully besieged Medina, and a
truce for ten years was agreed on. Wars
with the Jewish tribes followed, many Ara-
bian tribes submitted themselves, and in 630
the conquering prophet marched to Mecca,
received the keys of the city, and was ac-
knowledged as prince and prophet. He
showed no malice against his former ene-
mies, performed the pilgrimage with the
customary observances, purified the Kaaba,
and destroyed its three hundred and sixty
idols, and decreed that no infidel should
enter the holy city. The whole of Arabia
was soon after conquered, and ambassadors
with arrogant claims were sent to the Em-
peror Heraclius, the king of Persia, and the
king of Abyssinia. War with the Roman
empire was begun; an expedition for the
conquest of Syria was prepared; when Mo-
ammed, believed to be immortal by some
of his disciples, fell into a fever, and after
14 days of suffering, died at Medina, June 7,
632, in the 63rd year of his age. He was
buried in a simple tomb on the spot where
he died. The history of this extraordinary
man has been, as was natural, overlaid and
obscured by an immense mass of falsehoods
and exaggerations; inventions to magnify
him on the part of his followers, and in-
ventions to disgrace and discredit him on the
part of Christian writers. These actions,
friendly and hostile, we have not space to
recite. But through praise and blame,
through the fact and the legend, it is not
difficult now to see the man of clear insight
and deep reflection, without book-learning,
but with profound knowledge of himself,
and of the works of God, familiar with Bible
narratives and eastern legends, endowed
with poetic imagination, and seeing, with a
clearness of spiritual vision at that time
peculiar to himself, the first truth and
eternal ground of all religion. The an-
nouncement of this with a prophet's earn-
estness and persistency, and the accom-
panying denouncement of the world-wide
lies and idolatries of his age, gave him the
great place he holds in the history of the
human race. The Koran, or Mohammedan
Bible, is composed of the various fragmen-
tary revelations alleged to be made to the
prophet from time to time as circumstances
made them needful. They were for a time
preserved orally, or written on palm-leaves,
but were collected two years after the death
of Mohammed by his friend and successor,
Abubeker. The collection was revised by
the Caliph Othman, in the thirtieth year of
the Hegira (652, A. D.). The English trans-
lation by Sale is well known. A good "Life
of Mohammed," by William Muir, appeared
in 1858. An important work on his life and

Doctrine, based on original researches, by A. Sprenger, was published in 1865, at Berlin. About the same time appeared a collection of Essays, by Barthélemy St Hilaire, entitled "Mahomet et le Coran," and a learned work on the same subject by Dr Dozy, of Leyden.

MOIR, DAVID MACNETT, poet and miscellaneous writer, the well-known "Delta" of "Blackwood's Magazine," was born at Musselburgh, in 1798, at which place, after passing through the medical classes of the university of Edinburgh, he practised as a surgeon. When he was 19, he committed his first verses to the press, and having once established his place in "Blackwood," under the signature of Delta, he continued, for more than 30 years, to enrich its pages with a series of poems, remarkable at once for great command of language and numbers, a delicate and graceful style, and a pure vein of tenderness and pathos. The last of his compositions, "The Death of Selim," left his hand a little more than a fortnight before his death. To the same Magazine he contributed also one of the most laughable embodiments of Scottish humour—"The Life of Mansie Waucho," begun in October, 1824; and four or five years later the autobiography of the Dalkeith Tailor was issued in a volume by itself, and obtained great success. In 1831, Mr Moir published his "Outlines of the Ancient History of Medicine, being a view of the progress of the healing art among the Egyptians, Greeks, Romans, and Arabians." The list of his works closes with "Sketches of the Poetical Literature of the past Half-Century, in six lectures," delivered at the Edinburgh Philosophical Institution. Died, 1851. A monument has since been erected to his memory in his native town.

MOITTE, JEAN GUILLAUME, French sculptor, was born at Paris in 1747. He was the son of an engraver, and became the pupil, first of Pigalle, and afterwards of Lemoigne. He obtained the grand prize of the Academy, and was sent to study at Rome, whence he returned in 1773. He was admitted to the Academy in 1783, and died in 1810. Among his works are—"David carrying the head of Goliath;" bas-reliefs of the barriers of Paris; colossal figures of Brittany and Normandy; a bronze equestrian statue of Napoleon I., &c.

MOLA, PIERFRANCESCO, an eminent painter, born in 1612 or 1621, at Caddra, in the Milanese. He was a pupil of Albani, and is distinguished both as a landscape and historical painter. Died, 1666.

MOLAI, JACQUES DE, the last grand-master of the Knights Templars, was a native of Burgundy. He was admitted into the order about 1265, and having signalized himself by his valour in Palestine, was unanimously elected grand-master on the death of William de Beaujeu. The great wealth and power of the Templars, their pride and their dissolute manners, created them a multitude of enemies, and at length Philippe le Bel, king of France, and Pope Clement V., formed a plan for their extermination. They were accused of heresy, implety, and various crimes revolting to human nature. In October, 1307, all the Templars throughout France were arrested at the same hour, and they were

tried and convicted, some on their own confessions, and others on such evidence as could be procured. Fifty-seven were committed to the flames in 1311; and after an imprisonment of seven years, De Molai shared their fate at Paris, in 1314, declaring the innocence of his order, in the last.

MOLE, Count LOUIS MATHIEU DE, a distinguished French statesman, the son of President Mole, who fell a victim to the French revolution, was born in Paris in 1780. After living some time with his mother in Switzerland and England, he returned to France, in 1796, pursued his studies with great zeal at the *École Centrale*, which was subsequently converted into the Polytechnic School, and in 1806 attracted the attention of Napoleon, by a volume of "Essais de Morale et de Politique," which contained opinions of a highly absolutist character. From this time his rise was rapid, and in 1813 he was appointed minister of justice, and received the title of count. On the fall of Napoleon he was made a peer of France, and in 1817 filled the office of minister of the navy under the duke of Richelieu, but quitted this post when some of his colleagues displayed those reactionary tendencies which ended in the expulsion of Charles X. from the throne. After the revolution of 1830 he held for a brief period the office of minister of foreign affairs; and in 1836 he was elevated to the post of prime minister, of which he was dispossessed in 1839 by the famous coalition of Thiers and Guizot. After the revolution of 1848, though elected both to the Constituent and the Legislative Assemblies, he took little part in political affairs, but remained staunch to his conservative views, and after the *coup d'état* of Dec., 1851, against which he protested, he retired into private life. Died, 1855.

MOLE, JOHN, an Englishman, who was eminent for his skill and knowledge in the science of algebra. Born of poor but respectable parents, he was seemingly indebted to chance for the discovery of his talent. Having, when a farmer's servant, been sent to a carpenter's shop for a load of timber, a workman asked him whether he could tell how many cubical quarters of larch could be cut out of a solid foot of wood; upon which Mole replied, he could tell how many could be cut out of ten thousand solid feet. He then answered the question,—How many farthings there were in a million of moldores, of the value of twenty-seven shillings each. Hitherto Mole had set down his figures in elukh, and asked his fellow-servants to decipher them, but from that period he applied diligently to acquire a knowledge of figures. He died in 1827.

MOLESWORTH, ROBERT, Viscount, an Irish statesman, born at Dublin in 1836, and educated at Trinity College. When James II. landed in Ireland, he caused Molesworth's estate to be confiscated, but, on the settlement of affairs under William III., he was made a privy-councillor, and sent ambassador to Copenhagen, where he had a dispute with the king, which induced him to return home abruptly. He then published "An Account of Denmark," which was complained of as a libel on the country by

MOLLESWORTH, Sir WILLIAM, bart., a distinguished statesman, descendant of a Cornish family, was born in London, in 1810. Succeeding to the baronetcy in 1823, he went to reside in Edinburgh, where he was initiated in classics and metaphysics, passed thence to Germany, and, on his return to England, in 1832, entered the House of Commons as member for the Eastern Division of Cornwall, and soon made himself conspicuous for his liberal opinions, voting for the emancipation of the Jews, national education, and the ballot. He became the proprietor and editor of the "Westminster Review." In 1837 he was returned for Leeds. From 1841 to 1845 he had no seat in parliament. Meanwhile he devoted his leisure to the publication of an elaborate edition of the works of Hobbes, and to familiarizing himself with those social and economical questions on which he afterwards became an authority. From 1845 till his death he sat for Southwark. In all matters that came before parliament, but more especially those relating to the colonies, he took an active part. In 1853, he was appointed first commissioner of works under Lord Aberdeen, and in 1855 he was transferred by Lord Palmerston to the colonial office—an appointment for which he was eminently qualified by his previous studies and acquirements. His opinions on many political subjects were far in advance of those entertained by his colleagues. But the long and brilliant career which seemed to open before him was prematurely closed; and though from his untimely end he has left no conspicuous monument of his public labours, few men have descended to the grave more universally respected. Died, 1855.

MOLÉVILLE, ANTOINE FRANÇOIS BERTRAND DE, a French statesman, was born at Toulouse, in 1741. He was minister of the marine in the reign of Louis XVI.; and when the revolution broke out, he sought an asylum in England, where he resided twenty-two years, and published "Memoirs of the Revolution," and several other works on that subject. During his residence in London, he acquired such a command of the English language as to write in it "A History of England." Died, at Paris, 1818.

MOLIERE, the great French dramatist, was born at Paris, 15th January, 1622. His real name was JEAN BAPTISTE POQUELIN, and he took the name of Molière out of regard to his parents when he first became an actor. He was brought up to his father's trade, that of upholsterer, but when 14 years of age he was sent to study at the college of Clermont, where he remained several years. As substitute for his father he attended Louis XIII. as valet-de-chambre on his expedition to Narbonne, in 1642. He studied law at Orleans, and was received advocate at Paris, and in 1645, he began acting there with a company of amateurs. After obtaining great success in the provinces, he settled at Paris in 1658, having previously produced his two comedies, "L'Etourdi"

and "Le Dépit Amoureux." In the following year he increased his reputation by the comedy "Précieuses Ridicules," which had a run of about 120 nights. Continuing to produce new plays, and acting in the principal comic parts, he was a favourite both with the court and the people. He succeeded to his father's office under Louis XIV., who gave him, in 1663, a pension of 1000 livres. He was the intimate friend of La Fontaine, Boileau, and other distinguished men; but his happiness was destroyed by an ill-assorted union with a young actress. He excited the animosity of the medical profession, by several sharp attacks on them in his comedies; and that of the priestly and priest-ridden classes, by his terrible attack on pious hypocrites in the famous "Tartuffe," which was withdrawn from the stage by order of the king. The order was annulled in 1668. Among the most admired plays of Molière are "L'École des Femmes," "Tartuffe," "Le Misanthrope," "Les Femmes Savantes," "Le Médecin malgré lui," and "Le Malade Imaginaire." In some of his comedies he borrowed from, or imitated, the Latin comic writers, and in some the Italian and Spanish. Among these imitations, are "L'Avare," "Amphitryon," and "Les Fourberies de Scapin." But in the delineation of character and the portrayal of the vices and follies of social life Molière is thoroughly original; and whatever materials he may have appropriated from earlier writers, he so treated them as to make the result entirely his own. He is called by Voltaire the Father of French Comedy, and alone among French comic writers is classical. While he treats some subjects with exquisite refinement, he indulges too frequently in exaggeration, coarseness, and mere buffoonery. His works, it is said, have been more frequently republished than those of any other French author. In 1673, he took part in the presentation of his last comedy, "Le Malade Imaginaire," being at the time seriously out of health; the effort was too much for him, and he died the same night, 17th February. He was buried without the usual religious rites, through the influence of the priests who hated him, though they could allege nothing against his character. His profession excluded him from the French Academy, but a century after his death, his bust was set up in the hall with this inscription— "Rien ne manque à sa gloire; il manquait à la nôtre."

MOLIN, JACQUES, usually called DUMOU-LIN, a celebrated French physician, was born in 1666; became chief physician to the army in Catalonia, at the age of 26; and on his return to Paris, in 1706, added to his reputation by his cure of the prince of Condé. In his medical practice he was so partial to venesection, that it is supposed Le Sage (in Gil Blas) intended to satirize him under the character of Dr Sangrado. Died, 1755.

MOLINA, LUIS, a Spanish Jesuit and theologian, was born at Cuenza, in 1535; was professor of theology at Evora for 20 years; and died in 1601. He was author of a treatise on free will, entitled "De Concordia Gratiae et Liberi Arbitrii," which gave rise to such a furious contest between the Do-

militians and the Jesuits, that the pope, Clement VIII., appointed a congregation to hear the matter discussed, and his successor, Paul V., prohibited the continuance of the controversy.

MOLINET, CLAUDE DU, canon regular and procurator-general of the congregation of St G n v ve, was born at Ch lons sur-Marne, in 1620, and died in 1687. He was a learned archaeologist and numismatist, and while librarian of St G n v ve, he formed the cabinet of curiosities of which he also published a description. He was author of a History of the Popes from Martin V. to Innocent XI., illustrated by their coins, and other works on ecclesiastical antiquities.

MOLINOS, MATEU, a Spanish theologian, and founder of the sect called *Quietists*, was born in 1627, near Saragossa, but passed the greater part of his life at Rome. There, in 1675, he published his celebrated "Spiritual Guide," which was condemned by the Inquisition 10 years after its first appearance, and the author sentenced to perpetual imprisonment. He died in prison, in 1696. The followers of Molinos, of whom Madame Guyon was the principal, were called Quietists, because they maintained that religion consists in an abstraction of the mind from external and finite objects.

MOLYN, PETER. [TEMPESTA.]

MOLYNEUX, WILLIAM, an ingenious mathematician, was born at Dublin, in 1656. The philosophical society, established at Dublin in 1683, owed its origin to him, and he became the first secretary. Soon after, he was appointed surveyor-general of crown buildings, and chief engineer. In 1685 he was chosen fellow of the Royal Society, and in 1689 he settled with his family at Chester, where he employed himself in finishing his "Treatise on Dioptrics," published in 1692. In this year he returned to Dublin, and was chosen one of the representatives for that city. Besides the above, he wrote "Scoliothericum Telescopium;" also, "The Case of Ireland stated, in relation to its being bound by Acts of Parliament made in England;" and some papers in the Philosophical Transactions. Died, 1698.

SAMUEL MOLYNEUX, his son, was born at Chester, in 1689; became secretary to George II., when prince of Wales; and was distinguished by his skill in astronomy.

MONARDES, NICHOLAS, a Spanish physician, was born at Seville, and educated at Alcal ; after which he settled in his native place, and died there in 1578. His works are, "De Rosa, et Partibus ejus," "Dos Libros de las cosas que se traen de las Indias Occidentales, que sirven al uso de Medicina," &c. This last work has been translated into Latin, French, Italian, and English; and the name of Monardes is perpetuated in that of the botanical genus *Monarda*, in the class *Dianthia* of Linnaeus.

MONCEY, ADRIEN, duke of Conegliano and marshal of France, was born at Hesangon, in 1734. Though he entered the army at 15 years of age, he did not become a captain till 1791, and in 1793, having been sent to the Pyrenees at the head of the "chasseurs Cantabres," he so distinguished himself by his gallantry, that in a short

time he became successively general of brigade and general of division. In 1795 and 1796 he made a most successful campaign in Spain and Italy; and, after the peace of Lun ville, he was appointed inspector-general of the gendarmerie; in which capacity he rendered such important services to Napoleon, that he was made one of his first marshals in 1801, and soon afterwards created duke of Conegliano. In 1808 he once more took part in the war with Spain, and contributed to the capture of Saragossa in 1809; but, during the last years of the empire, he ceased to take part in military operations which he disapproved, and did not reappear till 1811, when he tried, as major-general of the national guard, to defend the walls of Paris, laying down his arms only after the capitulation was signed. After the "Hundred Days," he refused to preside at the council of war appointed to try Marshal Ney; and for this generous act he was imprisoned in the fortress of Ham for three months, deprived of all his functions, and expelled from the Chamber of Peers, to which, however, he was readmitted in 1819. In 1823 he joined the Duke d'Angoul me in his invasion of Spain, and finished his military career with a success worthy of his first exploits. He was afterwards nominated governor of the H tel des Invalides, and in this capacity received the ashes of Napoleon in 1840. D. d., 1842.

MONGE, GASPARD, a celebrated French mathematician and natural philosopher, was born at Reaune, in 1746; taught physics and mathematics at the military school of M zill res; became a member of the Academy of Sciences, in 1780; was made minister of the marine, in 1792; and was one of the founders of the Polytechnic School. In 1796 he was commissioned to go to Italy, and collect the treasures of art and science from the countries conquered by the French; and, in 1798, he accompanied Buonaparte to Egypt, where he was chosen president of the Institute of Cairo. Napoleon when emperor made him a senator, created him count of Felusium, and gave him an estate in Westphalia, accompanied by a present of 200,000 francs. On the return of the Bourbons he was deprived of all his offices and emoluments, and he died in 1818. His principal works are, "Descriptive Geometry," "The Application of Analysis to the Geometry of Surfaces," and a "Treatise on Statics."

MONGE, Lieutenant-colonel, a French officer employed by Napoleon, after his return from Elba, to go secretly to Vienna, to bring off Maria Louisa and her son to France. He succeeded, by various disguises, in reaching Vienna, and was very near accomplishing his purpose, when the Austrian police got information of the plan, and Monge was compelled to fly. He got back to France, and fought bravely at the battle of Winterloo; but was eventually reduced to such distress as to work as a common labourer, and died in the hospital of St Louis, in 1829.

MONK, GEORGE, duke of Albemarle, a distinguished military commander, and the great promoter of the restoration of Charles II., was the son of Sir Thomas Monk, of

...uke of Albemarle, a
commander, and the
restoration of Charles
ir Thomas Monk, of

Potheridge, near Torrington, in Devonshire, and born in 1608. Being a younger son, he entered the army as a volunteer, and served under his relation Sir Richard Grenville, in an expedition to Spain, and afterwards served for some years in the Netherlands. On the breaking out of the war between Charles I. and the Scots in 1639, he obtained a colonel's commission, and attended his majesty in both his expeditions to the north. When the Irish rebellion began in 1611, his services there were so important, that the lords justices appointed him governor of Dublin. On his return to Eng-land he was sent to relieve Nantwich, where he was taken prisoner by the army of the parliament, and sent to the Tower, where he remained till 1616. The royal cause being ruined, he obtained his liberty on condition of taking a command in Ireland, concluded a peace with the rebels, which displeased the parliament, and had a vote of censure passed upon him for it. Cromwell, how- ever, who thought highly of his mili- tary talents, made him lieutenant-gene- ral, and gave him the chief command in Scotland. Monk distinguished himself at the battle of Dunbar, and afterwards in the war with the Dutch, for his successes in which he received great honours. He re- sumed his command in Scotland. But the sagacious protector had strong suspicions of Monk's sincerity; and not long before his death wrote him a letter, to which he added this postscript—"There he that tell me that there is a certain cunning fellow in Scot- land, called George Monk, who is said to lie in wait there to introduce Charles Stuart; I pray you use your diligence to apprehend him and send him up to me." On the de- cease of the protector, the resignation of power by his son, and the contest of parties which subsequently took place, he availed himself of the commanding situation which he occupied, to crush the republicans, and promote the recall and restoration of the Stuart family to the throne, in the person of Charles II. As the reward of his loyalty, he was created duke of Albemarle, with a pension of £1000 a year, made a privy-coun- cillor, and invested with the order of the Garter. In 1664 he was appointed admiral of the fleet in conjunction with Prince Rupert, and in 1666 obtained a great vic- tory over the Dutch, in a battle which lasted three days. He died in 1670, and was buried in Westminster Abbey. Guizot has written a History of General Monk, which has been translated into English.

MONMOUTH, JAMES, Duke of, a natural son of Charles II., was born at Rotterdam, in 1649. He was distinguished by his personal attractions, his affable address, and thoughtless generosity; hence he became very popular. But he was weak-minded and pliant; and had he not resigned himself to the guidance of the restless and ambitious Shaftesbury, who flattered him with the hopes of succeeding to the crown, his popu- larity would never have become dangerous. At the age of 14 he was created duke of Mon- mouth, and two years later was made master of the horse. He was concerned in various plots, which had for their object the exclusion

of the duke of York from the crown; and he was, in consequence, ordered by Charles to quit the kingdom. On the accession of James II., being urged to the act by some of his partisans, he left Holland and landed at Lyme, with scarcely a hundred followers (June, 1685); but their numbers were soon increased, and he assumed, at Taunton, the title of king, and asserted the legitimacy of his birth. The royal forces were sent against him, and an engagement took place at Sedgemoor, near Bridgewater, on the 6th July. The rebels were defeated, and the duke himself was made prisoner, being found in the disguise of a peasant, lying at the bottom of a ditch, overcome with hunger, fatigue, and anxiety. He nobly refused to betray his accomplices, and conducted him- self with much firmness on the scaffold, where his head was severed from his body, after four unsuccessful blows, 15th July, 1685. The people, of whom he was still the favourite, believed that the person executed was not Monmouth; and it was probably this belief which has led some to conjecture that the famous "Iron Mask" was the duke of Monmouth. His portrait, by Wissing, is in the National Portrait Gallery.

MONNOYER, or MONOYER, JEAN BAP- TISTE, commonly called BAPTISTE, a dis- tinguished flower-painter, born at Lille, in 1635. At an early age he went to Paris, and assisted Lebrun in the decoration of the palace of Versailles. Received at the Aca- demy in 1665, he came to England about 1680, and spent the rest of his life here. He exe- cuted many beautiful decorative works at Hampton Court, Montague House, Kensing- ton Palace, and in many mansions of the nobility. Died at London, 1699.—His son was also a flower-painter, but not equal in reputation to his father.

MONRO, ALEXANDER, an eminent phy- sician and anatomist, of Scottish descent, was born in London, in 1697. After study- ing under Cheselden and Roerinave, and travelling on the continent for improvement, he was, in 1719, appointed professor and de- monstrator of anatomy to the Company of Surgeons at Edinburgh; where, soon after, he instituted that medical school which be- came so highly celebrated. This was fol- lowed by the foundation of an Infirmary, where he delivered clinical lectures; and he also formed a society for collecting and pub- lishing professional papers; the result of which appeared in six volumes of "Medical Essays," and two more on "Physical and Literary Subjects." Besides the papers con- tained in these volumes, the doctor published a work, entitled "Osteology;" and an "Ac- count of the Success of Inoculation in Scot- land." Died, 1767.—His eldest son, Dr ALEXANDER MONRO, succeeded, on the death of his father, to the anatomical pro- fessorship; and published numerous works, among which are, "Observations on the Nervous System," "The Structure and Phy- siology of Fishes," "Outlines of the Anatomy of the Human Body," 4 vols., &c.—His second son, Dr DONALD MONRO, became a physician in the army, and wrote "Observations on the Means of preserving the Health of Sol- diers," 2 vols.; and a "Treatise on Medical

and Pharmaceutical Chemistry," 4 vols. Died, 1802.

MONROE, JAMES, 5th president of the United States, was born, in 1751, in Westmoreland county, Virginia. He entered the revolutionary army as a cadet, and, being soon after appointed a lieutenant, marched to New York, where he joined the army under Washington. He was engaged in the battle of Harlem Heights, in that of White Plains, in the retreat through the Jerseys, and in the attack on Trenton. In the last he was in the vanguard, and received a ball through his left shoulder. For his conduct in this action he was promoted to a captaincy. Subsequently he was attached to the staff of general Lord Stirling, with the rank of major, and he fought by the side of Lafayette, when that officer was wounded at the battle of Brandywine. He was afterwards promoted to the rank of colonel; and at the end of the contest, in 1783, he was elected a member of congress. In May, 1794, he was appointed minister plenipotentiary to France, but recalled from this mission in 1796, by President Washington, with strong marks of dissatisfaction, for having succumbed too much to the over-bearing policy of the French Directory. He went, however, to London in the same capacity, at a juncture of great importance; and, in 1801, was appointed secretary of state. Six years afterwards, the war department being in a very embarrassed state, he was chosen president, in 1817, as the successor of Mr Madison; and, in 1821, re-elected by a vote unanimous, with a single exception. He died on the 4th of July, 1831, the anniversary of American independence. The celebrated "Monroe Doctrine" took its name from this president of the United States.

MONSON, Sir WILLIAM, an English naval officer, was born at South Carlton, in Lincolnshire, in 1569; was educated at Balliol College, Oxford; entered the naval service; served in several expeditions in the reign of Elizabeth; and was knighted by the earl of Essex, for his conduct in the expedition to Cadiz. In the reign of James I. he distinguished himself against the Dutch, and died in 1643.

MONSIELET, ENGUERRAND DE, a French chronicler of the 13th century, born about 1350, and died in 1453. He was provost of Cambrai, and balliff of Waincourt; and wrote a Chronicle of Events, from the year 1400 to 1453, the year in which he died. An English translation of this Chronicle was published in 1810.

MONTAGU, BASIL, Q.C., the learned editor of Lord Bacon's Works, and the friend of Coleridge, was the son of Lord Sandwich by the unfortunate Miss Ray, the lady who was killed in the Piazza of Covent Garden, in the year 1779, by the Rev. Mr Hackman, in a fit of frantic jealousy. Mr Montagu was a member of Gray's Inn. He was called to the Bar in 1798; but he never distinguished himself either on circuit or in Westminster Hall, though he published some valuable treatises on the law of bankruptcy, the reputation of which gained him a commissionership. With Remilly and Mackintosh, he worked diligently for the mitigation of the

severity of the penal code; on capital punishments he wrote several pamphlets, which attracted much public notice; he published also, "Selections from Taylor, Hooker, Hall, and Bacon." But the work on which his reputation chiefly rests is his edition of Bacon's Works, with an original biography of the great philosopher. Died at Boulogne, in 1851, in the 82nd year of his age.

MONTAGU, GEORGE, an eminent naturalist, was a native of Wiltshire. He devoted his particular attention to the study of ornithology and conchology; and was the author of "An Ornithological Dictionary," and "Testacea Britannica, or Natural History of British Shells." Died at Knowle, near Kingsbridge, Devon, 1815.

MONTAGU, Lady MARY WORTLEY, a lady distinguished for her literary attainments, was the eldest daughter of Evelyn, duke of Kingston, and born, about 1690, at Thoresby, in Nottinghamshire. In 1712 she married Edward Wortley Montagu, whom she accompanied in 1716 on his embassy to Constantinople, from which place she wrote "Letters" to Pope, Addison, and other eminent literati of the time, which are very interesting, and contain many curious facts respecting the manners of the Turks. She also first introduced the practice of inoculation into this country. She closed a life marked by a great variety of adventures, in 1762. Her collected works have been published in six volumes; and her "Letters" certainly place her at the head of female epistolary writers in Great Britain.

MONTAGU, EDWARD WORTLEY, son of the preceding, was born at Wharfedale Lodge, in Yorkshire, about 1714. He received his education at Westminster School, whence he ran away, and became a chimney-sweep. His family had given him up for lost, when a gentleman recognized him in the street, and took him home to his father. He escaped a second time, and engaged with a master of a fishing smack; after which he shipped himself on board a vessel bound to Spain, where he served a muleteer. In this situation he was discovered, and conveyed home to his friends, who placed him under a tutor, with whom he travelled abroad. During his absence from England he published a book, entitled "Observations on the Rise and Fall of Ancient Republics." On his return to England, he obtained a seat in the House of Commons, where he sat in two successive parliaments. His future conduct was marked by eccentricities not less extraordinary than those by which he had been distinguished in the early part of his life. He went to Italy, where he professed the Roman Catholic religion, and from that he apostatized to Mahometanism. After passing many years in Egypt, and other countries on the Mediterranean coast, he died as he was about to return to England, at Padua, in 1776.

MONTAGU, EDWARD. [SANDWICH, Earl of.]

MONTAGUE, ELIZABETH, miscellaneous writer, was born in Yorkshire, in 1720. She studied under Conyers Middleton, to whom she was probably indebted for the tincture of learning which so remarkably influenced

Pepyzians, from the village of Pepyza, which Montanus fixed on as the seat of the millennial kingdom.

MONTANUS, BENEDICT ATTAS, a Spanish orientalist, was born at Frexenel, in Estremadura, in 1527, and educated at Alcala. He was present at the council of Trent, and, on his return to Spain, was employed in editing the famous Polyglott Bible usually called the Antwerp Polyglott. He completed it in 1572, and for his labours on it received from Philip II. a pension of 2000 ducats. He was afterwards made librarian of the Escorial. He was one of the most learned divines of the 16th century, and died at Seville, in 1598.

MONTBELLARD, PHILIBERT GUERNEAU, a distinguished French naturalist, born at Semur in 1720. He obtained great reputation in the scientific world, by his continuation of the "Collection Académique," a work compiled from the memoirs of the learned societies of Europe; he afterwards became the associate of Buffon in his great work on natural history; nor was any difference of style in their writings observed, until Buffon himself announced him in his preface. Died, 1785.

MONTCALEM DE SAINT VERAN, LOUIS JOSEPH, Marquis of, French general, was born near Nismes in 1712. He entered the army early, served in the Piedmontese and Italian campaigns, became *maréchal de camp* in 1756, and the same year was named commander of the French forces in North America. He obtained several victories over the English, fortified Quebec, and being attacked there by the English under General Wolfe, was defeated and mortally wounded, 14th September, 1759. He died two days later. Montcalm was a man of great political sagacity, and foretold, distinctly, the American War as the certain sequel to the English conquest of Canada.

MONTEAGLE, THOMAS SPRING-RICE, Lord, chancellor of the exchequer in Lord Melbourne's administration, was born at Limerick in 1790. He was educated at Trinity College, Cambridge, married in 1811, and in 1820 entered parliament as member for Limerick, which city he represented till 1832. In that year he was elected for Cambridge. Mr Spring-Rice was one of the most active members of the Whig party, the friend of Daniel O'Connell, and the supporter of all liberal measures, particularly of the repeal of the Test and Corporation Acts, the Roman Catholic Emancipation and Reform Acts. In 1827 he was made under-secretary of state for the home department; in 1830 secretary of the treasury; in 1834 secretary for the colonies and privy-councillor; and in April, 1835, chancellor of the exchequer. The latter post he filled nearly five years, and was the subject of much criticism and ridicule. He failed as a financier to cope with the difficulties of the time, was not a good speaker, and was accused of jobbing. The satirists of the day, "H. B." especially, made much of his short stature. It is not to be doubted, however, that as the advocate of liberal measures, and one of the leading friends of Ireland, he did good service. In September, 1839, he resigned the chan-

celorship, and was appointed comptroller of the exchequer. He was at the same time part in public affairs afterwards. Lord Monteagle was a fellow of the Royal Society, a trustee of the National Gallery, a member of the Senate of London University, and of the Queen's University in Ireland, and frequently sat on royal commissions on matters of art. He married a second time in 1811, his first wife having died in 1809. Died, at his seat, near Limerick, 7th February, 1866. His eldest son having died in the preceding year, he is succeeded in the peerage by his grandson.

MONTEBELLO, DUKE OF (LANNES.) MONTECUCULI, RAYMOND DE, a celebrated general, was born in 1608, of a distinguished family in the Modenese, and entered into the service of the emperor. In 1648, at the head of 2000 horse, he surprised 10,000 Swedes, and took their baggage and artillery; but he was soon after defeated, and taken prisoner. In 1657 he defeated Hagotzki, prince of Transylvania; in 1661 he gained a splendid victory over the Turks at St Gothard; and, in 1675 and 1676, he commanded on the Rhine, and foiled all the efforts of Turenne and the prince of Condé by his masterly manoeuvres. He died in 1681. Montecuculi wrote some excellent "Memoirs" on the military art, and a treatise on the "Art of Reigning."

MONTELUPO, RAFFAELLO SINIBALDI, Italian sculptor, was born near Florence about 1503. He learnt the goldsmith's art, and then studied sculpture under his father; he became a pupil and assistant of Lorenzetto; served as bombardier in San Angelo in 1527, and thence went to assist in making the bas-reliefs in the Holy House of Loretto. He soon after sculptured a statue of St Damiano at Florence, after a design by Michael Angelo, and in 1536 he was employed first at Rome, and then at Florence to make colossal statues for the occasion of the emperor's visits. He was again assistant to Michael Angelo, and was appointed architect of the castle of San Angelo, where he executed a marble angel and an effigy of Leo X. His monument to Baldassare Turini at Pescaia is considered his best work. His last years were spent at Orvieto, where he was named architect of the Duomo. Died at Orvieto, about 1570.

MONTEMAYOR, GEORGE DE, a Castilian poet, was born in 1520, and took his name from the place of his birth. After serving in the army, he was employed at the court of Philip II., where he died in 1562. He wrote "Diana," a pastoral romance, which was continued by Gaspar Polo.

MONTEN, DIETHICH, German painter, was born at Düsseldorf in 1799. He studied at the academy of his native city, and then at Munich, where he assisted Cornelius in the decoration of the Hofgarten with frescoes, and was afterwards employed by the king, Ludwig I. Montén distinguished himself by his battle-pieces, which he designed and executed with great spirit. Among his principal works are the battles of Sarbruck, Lützen, and Neerwinden, the storming of

upon him the earldom of Leicester, which had formerly belonged to his father, and gave him his sister, the countess dowager of Pembroke, in marriage. After this, Henry appointed him seneschal of Gascony; but he ruled so despotically there, that he was recalled, and a violent altercation took place between the king and his subject. A reconciliation was, however, effected, and De Montfort was employed on several occasions, in a diplomatic and military capacity. In 1258 he appeared at the parliament of Oxford, at the head of the discontented barons, all armed, and obtained the passing of the ordinances known as the Provisions of Oxford. De Montfort then became head of a new council of state and virtual sovereign. The king refusing to abide by the Provisions, a civil war broke out, which ended in the triumph of the barons at the battle of Lewes, in May, 1264. In January of the following year De Montfort carried out the first of the Provisions by summoning knights of shires and burgesses to the parliament. He thus became the founder of the English House of Commons. In the same year a powerful party was raised up against him among the barons, and soon after the battle of Evesham was fought, in which the royal forces were led by Prince Edward, and there, in attempting to rally his troops, by rushing into the midst of the enemy, De Montfort was surrounded and slain.

MONTGOLFIER, JACQUES ETIENNE, the inventor of air-balloons, was born in 1745, at Vidalon-les-Annonal. In conjunction with an elder brother, he devoted himself to scientific pursuits, and was the first who manufactured the vellum paper, still so much admired for its beauty. The origin of the invention of the balloon has been, as usual in such cases, variously related. A work of Priestley's is said to have suggested to the brothers the idea of using a gas lighter than air to ascend in the atmosphere. It is also narrated that one day while boiling water in a coffee-pot, the top of which was covered with paper folded in a spherical form, Jacques saw the paper swell and rise—and that hence he took the idea of a light machine, made buoyant by inflation, and traversing the air. After various preliminary trials, it being ascertained that a balloon, with a car attached to it, could be kept suspended by a supply of heated air, the first experiment was made by the brothers at their native Annonal, 5th June, 1783. It was successful, and the experiment was repeated at Versailles, when the Marquis d'Orlandes ascended in the presence of the royal family and a vast concourse of spectators. Jacques died in 1799. His brother, Joseph Michel, before mentioned, who was the inventor of a hydraulic machine, called the water-ram, was born in 1740, and died in 1810.

MONTGOMERY, JAMES, a distinguished poet, was born, November 4, 1771, at Irvine, in Ayrshire. His father was a Moravian missionary, who, leaving his son in Yorkshire to be educated, went to the West Indies, where he and the poet's mother both died. When only twelve years old, he composed some poems, but these indications of

genius could not save him from the fate of the poor, and he was sent to earn his bread as assistant in a general shop. Thirsting, however, for other occupations, he set out for the metropolis in the hope of finding a publisher for his verses. The bookseller who refused his poems made him his shop-fellow. In 1792 he gained a post in the establishment of Mr Gales, a bookseller of Sheffield, who had set up a newspaper called the Sheffield Register. On this paper Montgomery worked *con amore*, and when his master had to fly from England for printing articles too liberal for the government, the young poet became the editor and publisher of the paper, the name of which he changed to Sheffield Iris. Soon afterwards he was prosecuted, fined, and imprisoned, for reprinting a song commemorating "The Fall of the Bastille," and for an account he gave of a riot in Sheffield. But confinement could not crush his love of justice, and on his release he went on advocating the doctrines of freedom as before in his paper and in his books. In the long interval between those times and the present, the opinions which James Montgomery early pioneered in England have obtained general recognition, and as men became more liberal in their political views, he gradually rose in estimation. In 1797 he published "Prison Amusements;" in 1805, the "Ocean;" in 1806, the "Wanderer in Switzerland;" in 1809, "The West Indies;" and in 1812, "The World before the Flood." By these works, despite adverse criticism in the Edinburgh Review, he established his right to rank as a poet. In 1819 appeared "Greenland," a poem in five cantos; and in 1828, "The Pelican Island, and other Poems." In 1836 appeared the first edition of his collected poetical works, in three volumes; these were followed, in 1841, by another edition, in four volumes, embellished with portraits and vignettes; and lastly, in 1850, the entire collection of his poems appeared in a single volume. His latest contribution to religious literature was a volume of "Original Hymns." In 1846 Sir Robert Peel conferred on him a well-merited pension of £150 a year. Montgomery was a fervent hater of oppression and injustice. He was full of generous impulses, warm affections, and earnest longings after the welfare of his fellow-creatures. His religion was of no gloomy or sectarian character, but genial, broad, and healthy. His "Memoirs" have been published in 7 vols. Died, 1854.

MONTGOMERY, ROBERT, an eloquent preacher and popular poet, was born at Bath in 1807. Owing to the disastrous speculations of his father, his early life was a scene of persevering struggles against narrow means. At first he was intended for the law; but the casual perusal of some books of theology gave a fresh bent to his mind, and he resolved to obtain a university education. He had already shown a turn for poetry, and the great success which followed the publication of his poem, on "The Omnipresence of the Deity," enabled him to enter his name as a commoner of Lincoln College, Oxford, where he graduated B.A. in 1831, in mathematical honours.  ed B.A. in 1831, in
 In 1835 he was

ordained a clergyman of the Established Church. His first sphere of duty was at Percy Chapel, Fitzroy-square, but he subsequently removed to Glasgow, where he became incumbent of an Episcopal chapel. Religious mtngonism between him and his Presbyterian neighbours led to his return to London, where he resumed his ministerial labours in Percy-street Chapel, and drew a large congregation, among whom were many distinguished in science, art, and literature. His chief poetical works are, "The Omnipresence of the Deity," "Saturn," "Luther," "The Messiah," "Sacred Meditations," "The Christinn Life," "Lyra Christiana," and "The Sanctuary," published in 1851-1855. In spite of Lord Macaulay's castigation in the "Edinburgh Review," the poems of Robert Montgomery are still popular with certain classes, and though disfigured by bad taste, bordering occasionally on the profane, display great imaginative and descriptive power. Died, 1855.

MONTIOLON, General Count, distinguished for his long fidelity to Napoleon Buonaparte in every phase of his fortunes, was born in Paris in 1779. Entering the army at the age of fifteen, he attracted the notice of Napoleon, by the courage and by the devotion which he displayed on occasion of the revolution of the 18th Brumaire, and from that day his fortunes were closely connected with those of his master. Appointed alde-de-camp to Marshal Berthier in 1800, he served in that capacity in all the subsequent campaigns, and took part in the battles of Austerlitz, Wagram, Jena, and Friedland. He subsequently became one of the chamberlains of the emperor; during the Hundred Days he held the rank of general; and after the battle of Waterloo, together with his wife and children, he shared voluntarily the emperor's exile to St Helena, where he remained till his decease. Died, 1853.

MONTI, VINCENZO, one of the most celebrated poets of modern Italy, was born at Fusignano, near Ferrara, in 1753, and became as notorious for the versatility of his political principles as for his poetic talents. He commenced his career as secretary to Luigi Braschi, nephew of Pope Pius VI., and was then a violent enemy of the French; he afterwards became a republican, next a panegyrist of Napoleon, and ended by eulogizing the emperor of Austria. His "Basvillina," written on the murder of Hugo Basseville, the French ambassador at Rome, is in form a close imitation of Dante, and gained him a high reputation. His other chief works were, "Bardo della Selva Nera," an unfinished eulogy of Napoleon, "Cantica," another political poem, and a translation of Homer's Iliad; and his dramatic writings are the tragedies of "Galeotti Manfredi," "Aristodemo," and "Calo Gracco." He was successively appointed professor of the belles lettres at Milan, and of rhetoric in the university of Pavia; and historiographer of the kingdom of Italy; and, after the destruction of that state, he was fortunate enough to preserve his place and pension under the new government. He was also a knight of the Legion of Honour, and a

member of many learned societies. Died, 1828.

MONTMORENCY, ANNE DE, peer, marshal, and constable of France, born in 1493, was one of the greatest generals of the 16th century. He distinguished himself under Francis I., in the wars against Charles V., and was made prisoner at the battle of Pavia, which was fought against his advice. He zealously endeavoured to procure the release of his sovereign, also captured, and was rewarded by being made governor of Languedoc, and grand master of France. In 1538 he was made constable, but three years afterwards fell into disgrace, and was exiled. Restored to his office at the accession of Henry II., he suppressed with great severity the revolt which had broken out in Guienne. He was again taken prisoner at the siege of St Quentin, and in 1559 concluded the peace of Cateau-Cambresis. Owing to the hatred of Catherine de Medici, he lost his influence during the reign of Francis II.; but the rising of the Huguenots occasioned his recall to the court of Charles IX., and he joined the duke of Guise, in opposition to Condé, who was at the head of the Protestants. In the battle of Dreux, Montmorency was made prisoner by the Huguenots, and Condé was captured by the royal troops. The former was liberated the next year, and in the second civil war gained a decisive victory over his old enemies, at the battle of St Denis; but died of the wounds received in the action, in 1567, aged 74.

MONTMORENCY, HENRY II., Duke de, was born in 1595, and in his 18th year was created admiral of France. He defeated the Protestants in Languedoc, and in 1628 he gained decided advantages over the Duke de Rohan, leader of the Huguenots. In 1630 he held the chief command in Piedmont, and defeated the Spaniards under Doria. His services were at length rewarded with a marshal's bnton; and being jealous of the influence of Cardinal Richelieu, he, with Gaston, duke of Orleans, raised the standard of rebellion in Languedoc, where, being opposed by Marshal de la Force and Schomberg, he was wounded, and made prisoner at the combat of Castelnaudari, 1st September, 1632. All France, mindful of his services, his virtues, and his victories, desired that the rigour of the laws might be softened in his favour; but Richelieu was resolved to make an example of so powerful an enemy, and the marshal was condemned to death by the parliament of Toulouse, and executed, 30th Oct., 1632.

MONTORSOLI, FRA GIOVAN ANGELO, Italian sculptor, was born at Montorsoli, near Florence, about 1500. After studying at Fiesole, under Andrea Ferrucei, he was employed at Rome, Perugia, and Volterra, and then under Michael Angelo, at San Lorenzo, Florence. After the troubles of 1527, he became a monk. In 1530, he was called to Rome, and employed by Clement VII. to restore some ancient statues. He again assisted Michael Angelo at Florence, and in 1534 went to France, making but a short stay, and then returned to Italy. At Naples he executed the tomb of the poet Sannazzaro; at Genoa the statue of Andrea Doria, and

many works in the church of San Matteo; at Messina, the fountain in the Piazza, completing also the façade of the cathedral; and at Bologna several statues and bas-reliefs in the church of the Servites. Died at Florence, 1563.

MONTPENSIER, ANNE MARIE LOUISE, of Orleans, better known as Mademoiselle de Montpensier, born at Paris, in 1627, was the daughter of Gaston, duke of Orleans, and the niece of Louis XIII. In the civil contests which distinguished the minority of Louis XIV., she was a zealous partisan of Condé; and, in fact, her whole life was a scene of restless ambition and intrigue. Very numerous projects of marriage were entertained for her and abandoned, and at last she was privately married to Count Lauzun, and brought him a fortune of 20,000,000 francs, four duchies, the seignoury of Dombes, and the palace of Luxembourg. Lauzun was imprisoned for 10 years, and on his release, which he owed to his wife's devotion, he treated her with a hauteur which she could not brook, and she at length forbade him ever to appear again in her presence. From that time she lived in retirement, and died in 1693. Her "Memoirs," which form 8 volumes, are interesting.

MONTROSE, JAMES GRAHAM, Marquis of, a distinguished royalist leader under Charles I., was the son of the earl of Montrose, and was born at Edinburgh in 1613. He received an excellent education, which was improved by a residence in France, where he held a commission in the Scotch guards. On his return home he experienced such neglect through the jealousy of the marquis of Hamilton, as induced him to join the Covenanters; but he afterwards took a very active part on the side of the king, was created a marquis, and in a few months gained the battles of Perth, Aberdeen, and Inverlochy. In 1645 his fortune changed; and after suffering a defeat from Lesley, at Philiphaugh, near Selkirk, he was obliged to leave the kingdom; in 1649, he landed in Orkney with a few followers, but was soon overpowered, conveyed to Edinburgh, and there hung and quartered.

MONTUCCI, ANTONIO, a learned Chinese scholar, was born at Sienna, in 1762, and studied at the university there, devoting himself to the living languages with almost incredible application. In 1785 he was appointed professor of English in the Tolomei college; and, in 1789, accompanied Mr Wedgwood to England as Italian teacher in his family. Being in London in 1792, when preparations were making for Lord Macartney's embassy to China, Montucci took the opportunity of obtaining assistance from some Chinese youths attached to the embassy, in acquiring their language. The result was, that he projected a Chinese dictionary, the prospectus of which he forwarded to several princes and academies in Europe. In 1806 he went to Berlin, on the invitation of the king of Prussia; but the invasion of the country by Buonaparte for some time interrupted his plans, and it was not till 1810 that the engraving of the types for his great dictionary was begun. After 42 years' absence he returned to Italy, and died at Sienna,

in 1827. He was author of an "Italian Pocket Dictionary," and several elementary works in that language; and he edited the "Poesie inedite" of Lorenzo de' Medici, published at the expense of Roscoe.

MONTUCLA, JEAN ETIENNE, one of the most distinguished French mathematicians, was born at Lyons, in 1725. After studying at the Jesuits' College there, and at the university of Toulouse, he settled at Paris, and became the welcome associate of Lalande, D'Alembert, Diderot, and other savants. He devoted himself to literature and science, in 1761 had a government appointment at Grenoble, and three years later was sent to Cayenne as secretary to the expedition for founding a colony there, and astronomer to the king. He returned in 1765, and long held the office of chief clerk of the crown buildings, and that of censor royal, but at the revolution he was deprived and reduced to poverty. His principal work is the "Histoire des Mathématiques," in 4 vols. 4to, the first two of which appeared in 1758, and the remaining two in 1802. He also wrote "Histoire des Recherches sur la Quadrature du Cercle," and edited Ozanam's "Mathematical Recreations." He was a member of the Berlin Academy of Sciences. Died at Versailles, 1799.

MONTYON, ANTOINE JEAN BAPTISTE ROBERT AUGER, Baron de, French philanthropist, was born at Paris, in 1731. He held various offices under the government, quitted France at the revolution, and lived in England till the restoration of the Bourbons in 1814; and is remembered as the founder of the prizes for virtue, and for the work most conducive to good morals, in the gift of the French Academy. He was also author of several works of temporary interest. Died, 1820.

MOOR, KAMEL VAN, portrait painter, was born at Leyden, in 1656. He studied under Gerard Douw and Frans Miens. His works were greatly admired, and the emperor conferred on him the honour of knighthood. Died, 1737.

MOORCROFT, WILLIAM, an English traveler, was a native of Lancashire, and was educated as a surgeon, at Liverpool. In 1808 he entered the service of the East India Company, and went to Bengal as inspector of the military studs. He was soon afterwards sent on a difficult journey beyond the Himalaya. In 1819 he set out on another course of travel, through the Punjab, Tibet, Cashmeer, to Koundour and Bokhara, and after courageously facing the gravest difficulties and narrowly escaping great perils, he fell sick of fever at a small town in Bokhara, and died there in 1825. His tomb was visited by Burnes in his memorable journey from Lahore to Bokhara, 1831-33; and a narrative of his expedition was edited, from his papers, by Wilson, in 1841.

MOORE, EDWARD, an English poet and dramatic writer, was the son of a dissenting minister at Ablington, in Berkshire, and born there in 1712. He was brought up as a linen-draper in London, but quitted business for literary pursuits. In 1744 he published his "Fables for the Female Sex," which became deservedly popular, and procured him friends

among the great, particularly Lord Lyt-
ton, whom he afterwards complimented in a
piece, entitled "The Trial of Selim." After
two attempts at dramatic composition, in
the comedies of the "Foundling" and "Gil
Blas," he succeeded completely in the tra-
gedy of "The Gamester." He next became
the editor of a periodical paper, called "The
World," in which he was assisted by Lords
Lytton and Chesterfield, and other men
of rank and talent. Died, 1757.

MOORE, JOHN, physician, and miscellane-
ous writer, was born in 1730, at Stirling;
studied medicine and surgery at Glasgow;
and was successively a surgeon's mate in the
Netherlands, and surgeon to the English am-
bassador at Paris. In 1772 he took his degree
as physician, and became the partner of Dr
Gordon, an eminent practitioner at Glasgow.
After this he spent five years in travelling
upon the continent with the duke of Ham-
ilton; and on his return he settled in Lon-
don. In 1779, he published the fruits of his
travels in "A View of Society and Manners
in France, Switzerland, and Germany." This
work was so well received, that, in 1781, he
published "A View of Society and Manners
in Italy." After this, appeared his "Medi-
cal Sketches." His next performance was a
novel, entitled "Zeluco," which abounds
with incident, and affords striking illus-
trations of Italian character and manners. In
1795 he published "A View of the Causes
and Progress of the French Revolution,"
describing scenes which he had witnessed
during his residence at Paris. Died, 1802.

MOORE, SIR JOHN, a distinguished mili-
tary commander, was the eldest son of Dr
John Moore, and was born at Glasgow, in
1761. Being destined for the military profes-
sion, he was educated chiefly on the conti-
nent; and whilst his father was abroad with
the duke of Hamilton he entered the army,
at the age of 15, as ensign in the 51st regi-
ment of foot; of which, in 1790, he became
lieutenant colonel, and served with his corps
in Corsica, where he was wounded in storm-
ing the Mozello fort at the siege of Calvi.
In 1795 he went out as brigadier-general to
the West Indies, under Sir Ralph Aber-
cromby, who appointed him to the govern-
ment of St Lucia, in the capture of which he
had a principal share. On his return home,
in 1796, he was employed in Ireland during
the rebellion, and was raised to the rank
of major general. In 1799 he took part in
the expedition to Holland, where he did all
that military prudence could accomplish to
repair the mistakes of an incompetent com-
mander, and where he was again wounded
severely. He soon afterwards went to Egypt,
and at the battle of Alexandria received two
more wounds. For his skill and valour in
that campaign he received the order of the
Bath. He was then despatched on a mission
both military and diplomatic, to the court
of Sweden, in which he conducted himself with
equal firmness and dexterity. In 1808 he
was appointed to command an army in Spain,
where, after a skilful and arduous retreat
before a very superior force, he fell by a
cannon-shot, in a battle fought, under the
walls of Corunna, January 16th, 1809. His
death excited a great sensation throughout

the country. The House of Commons ordered
a monument to be erected to him in St Paul's
cathedral; and Glasgow, his native city, also
erected one to his memory. Wolfe's flae ode
on the "Burial of Sir John Moore" is well
known.

MOORE, SIR JONAS, mathematician, was
born about 1620, at Whittle, in Lancashire.
His skill in mathematical learning recom-
mended him to Charles II., by whom he was
employed in several works, and made sur-
veyor-general of the ordnance. He was
also one of the governors of Christ's Hospital,
and was the principal means of procuring
the endowments of a mathematical school in
that seminary. He compiled, for the use of
that institution, a "General System of Ma-
thematics," in 2 vols. 4to, which was pub-
lished after his death, in 1681.

MOORE, THOMAS, Ireland's national poet,
"the poet of all circles," as Byron empha-
tically styled him, "and the idol of his own,"
was born in Aungler Street, Dublin, in 1779.
Like Pope, it may be said that he sipped in
numbers; for in his thirteenth year he was
a contributor to the "Anthologia," a Dub-
lin Magazine. This turn for versifying was
coupled with great aptitude for singing and
acting, for which talents the social habits of
his native city afforded frequent opportuni-
ties of display; while at home, to use his own
words, "a most amiable father, and a mother
such as in heart and head has rarely been
equalled, furnished him with that purest
stimulus to exertion,—the desire to please
those whom we at once most love and re-
spect." His parents were Roman Catholics,
a class then depressed by penal enactments.
But parliament having, in 1793, opened the
university of Dublin to Roman Catholics,
young Moore was sent to College, where he
soon distinguished himself by his classical
attainments. In 1799, when in his nine-
teenth year, he proceeded to London with
the view of keeping his terms in the Middle
Temple, and publishing by subscription a
translation of Anacreon. The translation
appeared in 1800, and through the good offices
of the earl of Moira was dedicated to the
prince of Wales. At a subsequent period
Moore was among the keenest satirists of
this prince, for which he has been accused
of ingratitude; but he himself has stated
that the whole amount of his obligations to
his Royal Highness was the honour of dining
twice at Carlton House, and being admitted
to a grand fête given by the prince, in 1811,
on his being made Regent. His next publi-
cation—a brilliant but somewhat licentious
effusion—was entitled "The Poetical Works
of the late Thomas Little," printed in 1802,
with the Horatian motto, "Lusisse pudet."
Meanwhile the earl of Moira, in 1803, ob-
tained for him a government appointment in
Hernuda, whither he proceeded, but speedily
left his duties to be performed by a deputy,
and visited the United States. This visit
abated the admiration with which he had
previously regarded "American Institu-
tions." It was followed by the publication,
in 1806, of two volumes of Odes and Epistles,
which were the occasion of a bitter criticism
in the "Edinburgh Review." In conse-
quence of that article, Jeffrey and Moore met

as duellists at Chalk Farm; but no harm was done, and they subsequently became fast friends. A report getting spread about that Moore and Jeffrey fought with unloaded pistols, Byron commemorated the event in his "English Bards and Scotch Reviewers;" and Moore followed up his Chalk Farm adventure by sending a challenge to Byron. The challenge, however, led, as with Jeffrey, to a sincere friendship between the two rival poets. In 1811 he married Miss Bessy Dyke, an alliance which added materially to his happiness; and for some time after he resided in Bury Street, St James's, and became a frequent guest at the tables of the Whig aristocracy, enjoying the friendship of Lords Lansdowne and Holland. In 1813 he removed to Mayfield Cottage, near Ashbourne, in Derbyshire, and there commenced his patriotic task of wedding new words to the most exquisite of the Irish airs, and which resulted in the far-famed "Irish Melodies." At Ashbourne he also wrote his "Intercepted Letters;" or the Twopenny Post-bag," one of the ablest of his satires, and his "Sacred Songs," and commenced his Oriental Romance, "Lalla Rookh." Through the friendly offices of Mr Perry, the copy-right of that poem was secured to Messrs Longman's house for the sum of 3000 guineas. The work was hailed with a burst of admiration. Eastern travellers and Oriental scholars have borne testimony to the singular accuracy of Moore's descriptions; and, translated into Persian, this poem has even become a favourite with the Orientals themselves. Flashed with the success of "Lalla Rookh," Moore, with his friend Rogers, visited Paris, where he collected materials for his most humorous publication, "The Fudge Family in Paris." He next removed to Sloperton Cottage, near Howood, the residence of Lord Lansdowne; but he had scarcely settled there when he received the painful news that his deputy at Bermuda had involved him to the amount of some £6000, and that he must be ready at once with a sum to stop proceedings against him. At this period he had many offers of pecuniary assistance; but, feeling confidence in his own genius, he looked mainly to his pen. Meanwhile, a trip to the continent was projected; and Moore, accompanied by Lord John Russell, proceeded to Paris, and thence into Italy, where he paid a visit to his friend Lord Byron at Venice. On his return from this tour he took up his abode in Paris, where he resided till the end of 1822, when it was intimated to him by Messrs Longman that a final arrangement had been completed with his creditors, and that he might now safely return to England. During his stay in Paris, he had published "The Fudge Family in Paris," under the name of Thomas Brown the Younger, "Rhymes on the Road," and "The Loves of the Angels;" the former the result of his visit to Italy, and the latter founded on an Eastern story. He now turned his attention to prose. He had already published "Memoirs of Captain Rock," and the "Travels of an Irish Gentleman in Search of a Religion;" but his reputation was greatly increased by his "Life of Sheridan," which he published in 1825. This

was followed in 1827 by "The Epicurean," a prose tale, dedicated to Lord John Russell. In 1830 he produced "The Life of Lord Byron," in two volumes quarto. For this work he received from Murray 2000 guineas. His next works were, the "Life of Lord Edward Fitzgerald," in two vols. 8vo, 1831, and the "History of Ireland," written for Lardner's Cyclopaedia. When the Whigs returned to office in the spring of 1835, Moore received a pension of £300 a year, the reward of good service done to the Whig cause by his satirical and humorous poems. With the exception of writing short prefaces to the collected edition of his poetical works printed in 1841 and 1842, his career as an author terminated with his "History of Ireland." His latter years were clouded by a loss of memory; and in 1848 he fell into a state of second childhood, and the name of Thomas Moore was added to the sad list which includes the names of Swift, Scott, and Southey. But even the day before his death he "warbled," as Mrs Moore beautifully expressed it; and a love of music never left him but with life. Died, February, 1852. His "Memoirs, Journals, and Correspondence," published under the editorship of his attached friend Lord John Russell, are full of interest, reflecting, as they do (to use the noble editor's own words), "his virtues and his failings, his happiness and his afflictions, his popularity as an author, his success in society, his attachment as a friend, and his love as a son and a husband." A portrait-bust of Moore is in the National Portrait Gallery. His widow survived him nearly 14 years, and died at Sloperton Cottage, 4th Sept. 1865, aged 88.

MORALES, AMBROSIO, Spanish historian and topographical antiquary, was the son of a physician and professor at Cordova, where he was born in 1513. His fervent piety led him to become a monk, but circumstances afterwards induced him to live as a secular priest, and he became historiographer to Philip II., and professor of belles lettres at the university of Alcalá. He wrote a continuation of the "Coroica general de España," begun by Ocampo, "Antiquities of the Cities of Spain," &c. His account of a journey made by order of the king through the kingdoms of Leon, Gallaecia, and the Asturias, was only published in 1763. Died, 1591.

MORALES, LUIS, surnamed EL DIVINO, a Spanish painter, was born at Badajoz, about 1509. He was a pupil of Pietro Campana, and acquired his surname from his choice of sacred subjects alone. He was called to the Escorial by Philip II., but was soon dismissed, and in his old age received a pension from him. There are many of the works of Morales in various parts of Spain. He died, 1566.

MORANT, PHILIP, antiquary and divine, was born in the island of Jersey, and educated at Pembroke College, Oxford. He edited several works, and wrote a "History of Colechester," "History of Essex," &c. Born, 1700; died, 1770.

MORATIN, NICHOLAS FERNANDEZ, a Spanish poet, was born at Madrid in 1737. He practised the law there, and succeeded Ayala as professor of poetry. The reform

ere, and succeeded
poetry. The reform

of the Spanish theatre after French mo-
dels was the great aim of Moratin, but
he met with powerful opposition. One of
his best tragedies is "Hormesonda," pro-
duced in 1770. He wrote a poem on the
emse, entitled "Diana," "Las Naves de
Cortez destruidas," and other poems. He
contributed by his influence to get the "Au-
tos Snematales" driven from the stage.
His letters, and some of his prose writings,
are lost. Died, 1780.

MORATIN, LEANDRO FERNANDEZ DE,
dramatic poet, son of the preceding, was
born about 1760. He was patronized by the
minister Godoy, who enabled him to visit
the principal theatres of England, France,
and Italy, at the royal expense; and on his
return home, appointed him to the situation
of principal secretary interpreter. Under
the government of Joseph Buonaparte he
was made royal librarian; but he was sub-
sequently obliged to quit Spain, and died at
Paris, in 1828. He took Molière for his
model; and among his dramatic efforts are
the comedies of "El Cafe," "El Baron," &c.

MORDAUNT, CHARLES, earl of Peter-
borough, was born about 1659, and succeeded
his father, John, Lord Mordaunt, in 1675.
He entered into the navy, and distinguished
himself at Tangier when it was besieged by
the Moors. He was a distinguished opponent
of the tyrannical measures of James II., and
co-operated in the Revolution. In 1697, on
the death of his uncle, he succeeded to the
carlson of Peterborough; was employed in
the war of the Spanish Succession, as com-
mander of the English army in Spain; and
greatly distinguished himself by his courage
and a series of brilliant achievements. His
offensive arrogance, however, marred the
reputation he earned. He took part in the
intrigues and political contests of Queen
Anne's reign, enjoyed the friendship of the
leading authors and wits, and died, 1735.

MORE, SIR ANTONY, a celebrated portrait
painter, born at Utrecht, in 1525. He studied
first under Jan Schoorel, and early entered
the service of Charles V. He came to Eng-
land in the reign of Queen Mary, on whose
death he accompanied Phillip II. to Spain,
but presuming too much on his familiarity,
he incurred the displeasure of the king, and
quitted the country. He then entered into
the service of the duke of Alva, by whom
he was made receiver-general of the re-
venues of West Flanders. Thus patronized,
he was enabled to live in a style of magni-
ficence during the remainder of his life.
Died at Antwerp, 1581.

MORE, HANNAH, moralist and miscel-
laneous writer, was born at Stapleton, in
Gloucestershire, in 1744. She was one of
the five daughters of a village schoolmaster.
The literary abilities of Hannah early at-
tracted notice, and a subscription was formed
for establishing her and her sisters in a
school of their own. Her first literary pro-
duction, "The Seneca after Happiness," a
pastoral drama, was written when she was
only 18 years of age, though not published
till 1773. By the encouragement of Garrick,
she wrote "The Indesible Captive," a tra-
gedy, which was printed in 1764. Her tra-
gedy of "Percy," the most popular of her

plays, was brought out in 1778, and ran 14
nights successively; and her last tragedy,
"The Fatal Enslavement," was produced in
1779. Shortly after, her opinions of public
theatres underwent a change, and she did
not consider the stage, in its present state,
as "becoming the appearance or coun-
tenance of a Christian." Early in life she
was honoured by the intimate acquaintance
of Johnson and Burke, of Reynolds and
Garrick, and of many other eminent men.
But she quitted, in the prime of her days,
the circle of fashion and literature, and, re-
tiring into the neighbourhood of Bristol,
devoted herself to a life of active Christian
benevolence, and to the composition of
various works, having for their object the
religious improvement of mankind. Her
first prose publication was "Thoughts on
the Manners of the Great;" this was fol-
lowed by her "Estimate of the Religion of
the Fashionable World." In 1795 she com-
menced at Bath, in monthly numbers, "The
Cheap Repository," a series of admirable
tales for the common people, one of which
is the well-known "Shepherd of Salisbury
Plain." The success of this tale was extra-
ordinary; it is said that the sale reached the
number of 1,000,000 copies. She subse-
quently produced "Strictures on the Modern
System of Female Education," "Hints to-
wards Forming the Character of a Young
Princess," "Celebs in Search of a Wife,"
"Practical Piety," "Christian Morals," an
"Essay on the Character and Writings of
St Paul," and "Moral Sketches of the Pre-
vailing Opinions and Manners, Foreign and
Domestic, with Reflections on Prayer." The
collection of her works comprises 11 volumes,
8vo. She died at Clifton, in September, 1833,
aged 89, having realized upwards of £30,000
by her writings, and leaving in charitable
bequests about £10,000.

MORE, HENRY, an eminent divine of the
Church of England, was born at Grantham,
in Lincolnshire, in 1614; was educated at
Eton, and Christ's College, Cambridge; and,
while at the latter, profoundly studied the
most celebrated systems of philosophy, and
finnly adopted that of Plato. In 1640 he
published "Psycho-Zoia, or the Life of the
Soul;" a philosophical poem, which he re-
published, with other pieces, in 1647. He
refused the highest ecclesiastical prefer-
ments, and died, universally beloved, in 1687.
That he was a man of great genius and vast
erudition there can be no doubt; but his
opinions were singular, and deeply tinct-
ured with enthusiasm. The most admired
of his works are his "Enchiridium Ethicum"
and "Divine Dialogues."

MORE, SIR THOMAS, chancellor of Eng-
land, was the son of Sir John More, judge of
the King's Bench, and born in London, in
1480. He was educated at Christchurch,
then Canterbury College, Oxford; and, in
1499, became a student of Lincoln's Inn. At
the age of 21 he entered parliament, where
he opposed a subsidy demanded by Henry
VII. with such force, that it was refused by
the House. Having been called to the bar he
obtained the appointment of under sheriff
of London, which he held till 1519. In 1519
he published his "Utopia," a political ro-

mance; and about this time the friendship began between him and Erasmus, which lasted through life. By the interest of Wolsey he obtained the honour of knighthood, and a place in the privy-council. Various political missions were intrusted to him by Henry VIII. In 1520 he was made treasurer of the exchequer; and in 1523 chosen speaker of the House of Commons, where he resisted a motion for an oppressive subsidy, and gave great offence to his former friend, the cardinal. In 1530 he succeeded Wolsey as lord chancellor; and by his indefatigable application in that office, there was in a short time not a cause left undetermined. He resigned the seals, because he could not conscientiously lend his support to the divorce of Queen Catharine; and he was eventually committed to the Tower for refusing the oath of supremacy. After an imprisonment of 12 months he was brought to trial in the court of King's Bench, where, notwithstanding his eloquent defence, he was found guilty of treason, and sentenced to be beheaded. His behaviour, in the interval, corresponded with the uniform tenor of his life; and, on July 6, 1535, he ascended the scaffold, with his characteristic pleasantry, saying to the lieutenant of the Tower, "I pray you see me safe up; and as for my coming down, let me shift for myself." In the same spirit, when he laid his head on the block, he told the executioner to wait till he had removed his beard, "For that," said he, "hath committed no treason." Thus fell this illustrious Englishman, whose integrity and disinterestedness were on a par with his learning, and whose manly piety, genial wisdom, and tender kindness in his private relations, made him beloved of all who knew him.

MOREAU, JEAN MICHEL, an eminent designer and engraver, was born at Paris, 1741. He was a man of extensive information on works of art, and his industry was truly surprising. In 1775 he was made member of the Academy of Painting, and draughtsman of the royal cabinet. Besides what he completed as royal draughtsman, he prepared 160 plates of the History of France, 80 for the New Testament, 60 for Gesner's works, upwards of 100 for editions of Voltaire and Mollère, and an immense number more for the illustration of the standard works of ancient and modern authors. He became professor at the Central Schools in 1797. Died, 1814.

MOREAU, JEAN VICTOR, one of the most celebrated generals of the French republic, was born at Morlaix, in 1763. Though destined for the law, he abruptly left his studies, and enlisted in a regiment, before he had attained his 18th year; but his father procured his discharge. The revolution, however, enabled him to gratify his wishes, and he became commander of the first battalion of volunteers raised in the department of Morbihan, at the head of which he joined the army of the north. Having greatly distinguished himself, Plehegru, under whom he served, did all he could to befriend him; and, in 1794, being made general of division, he was intrusted with a separate force, to act in Flanders, where he took many towns.

He was soon after named commander-in-chief of the army of the Rhine, and began the famous campaign of 1796, which terminated in the skillful retreat from the extremity of Germaany to the French frontier. Meantime, the republic being torn with intestine dissensions, he, for a time, retired from active service; but his talents as a general again brought him forward; and Buonaparte having returned from Egypt, and being now first consul, intrusted him with the command of the armies of the Danube and the Rhine. The decisive victory of Hohenlinden closed the campaign. Having some time subsequently been implicated with Plehegru, Georges, and other royalists, in a plot against the consular government, he was brought to trial with 54 other persons, declared guilty upon slight evidence, and sentenced to two years' imprisonment. This was, however, commuted to a sort of voluntary banishment; and he retired to North America, where he bought an estate near Morrisville, on the Delaware. He there resided some years in the enjoyment of tranquillity, until listening to the invitation of the allies, and more especially of Russia, he embarked for Europe in July, 1813. At Prague he found the emperors of Austria and Russia, with the king of Prussia, all of whom received him with great cordiality; and he was induced to aid in the direction of the allied armies against his countrymen. Soon after his arrival, while conversing with the Emperor Alexander on horseback, in the battle before Dresden, a cannon-ball fractured his right knee and leg. Amputation was immediately performed, but the wound proved mortal, and he died on the 1st of September, 1813. Moreau was brave, generous, and humane; possessing rare merits as a soldier, and highly esteemed by those who served under him, for the affability and simplicity of his manners. It was thought, and probably with truth, that he was looked upon with a jealous eye by Buonaparte, whose fear of finding in Moreau a successful rival, led to his expatriation.

MOREL, the name of a family of eminent French printers, of whom—**GUILLAUME** was born in Normandy in 1505, was admitted to the corporation of printers at Paris in 1519, became director of the royal printing establishment six years later, and died in 1564. He added notes and various readings to many of the works he printed.—**FREDÉRIC**, named the elder, was born in Champagne in 1523, and acquired a great reputation as a scholar. He became printer to the king, translated into French some of the works of Chrysostom, published good editions of Quintilian, and of the "Architecture" of Philibert de Lorme, and died in 1583.—**FREDÉRIC**, son of the preceding, was born at Paris in 1558, and was one of the best Greek scholars of his time. He enriched his editions of classical authors with prefaces and annotations, and translated several of them into Latin and French. Died, dean of the king's printers and professors, 1630.—**CLAUDE**, brother of the preceding, born 1574, became manager of his brother's business in 1600 having the previous year entered the

amed commander-in-
the Rhine, and began
of 1796, which termi-

printers' guild. The business was given ap-
to him in 1617, and he was named printer to
the king in 1623. He published fine editions
of St Basil, St Cyril, St Gregory of Nazian-
zus, &c. Died, 1626.—CHARLES, son of
Claude, born 1602, named printer to the
king, 1628, and died 1640.—GILLE, brother
of Charles, was printer to the king, 1639-46,
and died about 1650.

MORELL, THOMAS, an eminent critic and
lexicographer, was born at Eton, in 1703.
He published new editions of Alnsworth's
Latia Dictionary, and Hederle's Greek Lexi-
con, and was author of "Annotations on
Locke's Essay on the Human Understand-
ing." He edited the plays of Euripides and
Æschylus, translated the Epistles of Seneca;
assisted Hogarth in writing his Analysis
of Beauty; and selected the passages of
Scripture for Handel's Oratorios. Died,
1781.

MORELLET, ANDRÉ, a celebrated abbé,
born at Lyons, in 1727. He wrote some
works on political economy and statistics;
lived in habits of friendship with the most
eminent of his countrymen; visited Eng-
land in 1772, and became acquainted with
some of the leading politicians, and with
Benjamin Franklin. He was admitted to
the French Academy in 1781, and was one of
the collaborators of the famous dictionary.
In 1792 he became director of the Academy;
wrote many political brochures during the
revolution; and died in 1819. He published
"Literary and Philosophical Miscellanies of
the Eighteenth Century," and his "Memoirs
on the Eighteenth Century" appeared after
his death.

MORELLI, COSIMO, Italian architect, was
a native of Imola. He was born in 1732,
obtained the patronage of Pope Pius VI.,
and built the cathedrals of Imola and Macer-
ata, the theatres of Imola and Ferrara, and
many churches and palaces in various cities
of Italy. Died, 1812.

MORELLI, GIACOMO, a celebrated Italian
bibliographer, was born at Venice in 1745.
He entered the church and was ordained
priest, devoting himself with ardour to study,
and the acquisition of historical, literary,
and antiquarian knowledge. In 1778 he was
chosen librarian of St Mark's, Venice, and
applied himself to the task of enriching,
perfecting, and arranging that valuable col-
lection. With infinite regret he was com-
pelled in 1797, and the following years, to
give up many of its printed and manuscript
treasures to be carried to Paris. He held
his post successively under French and
Austrian rule, and was no less distinguished
for his kindness and modesty than for his
learning. He was author of a Catalogue of
the Farsetti manuscripts, historical disserta-
tions on the libraries of St Mark's, and of
the Academy of Padua, "Epistole Septem
Variæ Eruditionis," "Bibliotheca Manu-
scripta Græca et Latina," &c. Died, 1819.

MORERI, LOUIS, a French ecclesiastic,
and the first author of the "Historical Dic-
tionary" which bears his name, was born
in Provence, in 1643; was educated among
the Jesuits at Aix, became almoner to the
bishop of Apt, and died in 1680. The volu-
minous compilation which Moreri com-

meneed owed its origin to the prelate before
mentioned; when it was first published by
Moreri, it consisted of one folio volume; but
the additions made to it by subsequent
writers have extended it to ten.

MORETO Y CABANA, DON AUGUSTIN,
an eminent Spanish dramatic poet of the
17th century, who, after writing 200 plays,
became an ecclesiastic. He was contem-
porary with Calderon, and was patronized
by Philip IV. He may be called the Spanish
Molière.

MORGAGNI, GIOVANNI BATTISTA, an
eminent physician and anatomist, was born
at Forlì, in Romagna, in 1682; studied under
Valsalva, at Bologna; and, in 1711, became
professor of medicine at Padua. In 1715 he
was appointed to the first anatomical pro-
fessorship, in which situation he continued
till his death, in 1771. His works form 5
volumes folio, and are held in high estima-
tion. The most important is that entitled
"De Sedibus et Causis Morborum per Ana-
tomen Indagatis." His "Adversaria Ana-
tomica" also holds a high place in medical
literature.

MORGAN, SIR HENRY, a celebrated com-
mander of buccaners in the 17th century,
was the son of a Welsh farmer. He took
Porto Bello and Panama from the Spaniards,
and for several years continued to enrich
himself and his followers by his marauding
expeditions. Having amassed a large for-
tune, he settled at Jamaica, of which island
he was appointed governor by Charles II.,
and was knighted.

MORGAN, SYDNEY, Lady, a distinguished
novelist, was born at Dublin in 1783. She
was the daughter of Mr Owenson, an Irish
musician and writer of songs, principally for
the stage. Miss Owenson herself began her
literary career as a song-writer, preceding
Moore in the happily-conceived work of set-
ting ballads to old Irish airs. Before com-
pleting her sixteenth year she was the au-
thoress of two novels, which are now seldom
heard of; but her third attempt at prose
fiction, the "Wild Irish Girl," raised her at
once into notoriety, and obtained for her a
welcome in the first literary and social
circles. Pursuing steadily the path she had
chosen, Miss Owenson wrote several books
in quick succession; and, in ten years from
the period of her first triumph, she was fully
established as one of the most popular
writers of the day. In 1811 she married
Sir Charles Morgan, an eminent physician,
whose congenial character and taste were
afterwards shown in the "Book without a
Name," and other works which they wrote
jointly. Besides the long list of novels,
verse, and light social sketches which pro-
ceeded from Lady Morgan's pen, she pub-
lished her travels in France and Italy and
many political and historical essays, charac-
terized by a genial sympathy with liberal
views and opinions, which subjected her to
severe attacks from the Tory writers of the
day. For some years she enjoyed a pension
of £300 per annum, conferred on her by Earl
Grey. A few months before her death she
published a "Diary," or species of auto-
biography, in which she recounted the in-
cidents and anecdotes of her early life. Died,

1859. Memoirs of her life have since been published.

MORGAN, WILLIAM, an eminent Welsh prelate, who took a leading part in the translation of the Bible into Welsh, printed first in 1588. He died in 1604.

MORGHEN, RAPHAEL, a very celebrated Italian engraver, was born at Florence in 1758. He received his first instructions in his art from his father, an engraver of Naples, and when about twenty years of age became the pupil of the distinguished Roman engraver, Volpato. He made brilliant progress, and soon assisted his master in important works, and married his daughter. Invited in 1792 to the court of Naples, he preferred to settle at Florence, whither he was called by the grand-duke of Tuscany. There he spent the rest of his life, and executed most of his great works. Of these, the chief are his print of the "Last Supper," after Leonardo da Vinci; the "Transfiguration," after Raphael (both, however, executed from drawings by other artists, not from the originals); the "Aurora," after Guido; the "Madonna della Seggiola," after Raphael, &c. He also engraved many admirable portraits. Died at Florence, April 8, 1833. This artist was an associate of the French Institute.

MORHOF, DANIEL GEORGE, a learned German author, born at Wismar, in Mecklenburg, in 1639; was educated at Stettin and Rostock; was successively professor of poetry and professor of history at the University of Kiel; came twice to England, and resided for a time at Oxford. His principal work, entitled "Polyhistor, sive de Notitia Auctorum et Rerum Commentarii" is a laborious compilation of materials for a general history of literature. Died, 1691.

MORIER, JAMES, whose novels, descriptive of eastern life and manners, enjoyed at one time great popularity both at home and abroad, was born in 1780. When still very young, he made an extensive tour through the East, the main incidents of which he described in his "Travels through Persia, Armenia, Asia Minor, to Constantinople." In 1810 he was appointed British envoy to the court of Persia, where he remained till 1816, and soon after his return he published "A Second Journey through Persia," &c. During his stay in the East, he made good use of his opportunity of studying the character of the people; and the knowledge thus acquired was turned to account in his "Adventures of Hajji Babaz of Isphahan" (a species of Gil Blas, like Hope's "Anastasis"), whose "adventures in England" he described in a second series; "Zohrab, or the Hostage," "Aysha, or the Maid of Kurs," "Abel Ahutt," "The Banished," &c.: in all of which, but especially in the first three, the manners, customs, and modes of thought prevalent in the East are portrayed with a liveliness, skill, and truthfulness to nature attained by few. Died, 1848.

MORISON, ROBERT, an eminent English physician, and professor of botany at Oxford, was born at Aberdeen, in 1620. He studied at the university of his native place till interrupted by the civil wars, in which he displayed great zeal and courage in behalf of

the royal cause. After this he went to France, where he took his doctor's degree, and was appointed director of the royal garden at Blois. In 1660 he returned to England, and was nominated physician to Charles II., and regius professor of botany at Oxford. In 1669 he published his "Præliudium Botaniceum;" in 1680, a portion of his "Historia Plantarum" appeared; but his death, in 1683, prevented him from finishing it, and the second volume was published by Botart.

MORLAND, GEORGE, an eminent painter of rustic scenery and low life, was born in London, in 1764. He was instructed by his father, who employed him constantly in making drawings for sale. By this means he acquired a wonderful facility of invention, and rapidity of execution. He had also great skill as a faithful copier of nature, and in the early part of his career confined himself to the delineation of picturesque landscapes; but having contracted irregular habits, and a partiality for the bottle and low company, he forsook the woods and fields for the ale-house; and stage-coachmen, postillions, and drovers drinking, became the favourite subjects of his pencil. Some of his best pieces exhibit farmyards and stables, with dogs, horses, pigs, and cattle; or scenes at the door of the village ale-house, designed with all the truth and feeling which communicate a charm to the nearest objects, and proclaim the genius of the artist. Many were painted in spunging-houses to clear him from arrest, or in public-houses to discharge his reckoning. In a spunging-house he died, in 1804, aged 40, a melancholy example of irregular and debasing habits. His wife survived him only two days.

MORLAND, SIR SAMUEL, mechanician, was a native of Berkshire, and born about 1623. He was employed on some diplomatic missions by Cromwell; and afterwards rendered considerable service to Charles II., for which, at the Restoration, he was made a baronet. Among his inventions are reckoned the speaking trumpet, an arithmetical machine, the fire-engine, and the capstan; but of some of these he was rather the improver than the original discoverer. He expended a considerable fortune in the prosecution of his favourite speculations, and, like many other projectors, was a benefactor to the public to the detriment of his private concerns. Died, 1696.

MORLEY, THOMAS, an eminent English musician in the reign of Elizabeth. He was distinguished both as a performer and a composer; and among his works are canzonets, madrigals, ballets, and church music. His chief work is entitled, "A plaine and easie Introduction to Practicall Musicke." Died, about 1604.

MORNAY, PHILIP DE, Sieur du Plessis Mornay, a celebrated French statesman and writer, was born at Buhl, Normandy, in 1549. He was a Protestant, and after the massacre of St Bartholomew's he left his country, and travelled in many parts of the continent, visiting England also, where he was received by Queen Elizabeth with distinguished marks of favour. In 1575 he entered into the service of the king of Navarre, afterwards Henry IV., whom for 30 years he

his he went to France, and received a doctor's degree, and was made the royal garden at St. James, and returned to England, and was made secretary to Charles II., and was secretary to the king at Oxford. In 1670 he published his "Prædium Botanicon" of his "Historia Plantarum"; but his death, in 1671, prevented him from finishing it, and it was published by Bobart. He was an eminent painter of a low life, was born in 1610, and was instructed by his father, and he sold him constantly in the market. By this means he acquired facility of invention, and execution. He had also a copy of nature, and his career confined him to a few pictures of irregularity for the bottle and the pipe, and the woods and the fields; and stage-coachmen, and drinking, became the subjects of his pencil. Some of his army yards and stables, and a cow, and a scene of a large ale-house, designed to give a feeling which commanded the meanest objects, and the artist. Many of his houses to clear the public-houses to disperse. In a spunging-house in 1740, a melancholy and debasing habits. His life was 70 days.

MORCELL, mechanician, of Shire, and born about 1680, and was employed on some diplomatic services; and afterwards received a pension from Charles II., for his services, he was made a knight, and his adventures are reckoned as an arithmetical machine, and the captain; but he was rather the improver of the art. He expended much in the prosecution of his affairs, and, like many others, was a benefactor to the poor out of his private concerns.

MORICE, an eminent English painter of Elizabeth. He was a performer and a composer of works are canzonets, and church music. His works, "A plain and easie method Musick." Died, 1650.

MORICE, Sieur du Plessis, a French statesman and diplomatist, Normandy, in 1540, and after the massacre of St. Bartholomew, he left his country, and spent the rest of his life in various parts of the continent, where he was employed by Elizabeth with distinction. In 1575 he entered the service of the king of Navarre, and was employed for 30 years by

served in the cabinet and the field with the utmost zeal and fidelity. After Henry had recoiled himself to the church of Rome, De Mornay sent in his resignation, and, retiring from a public sphere, devoted the remainder of his life to literary pursuits, advocating with his pen the cause which he had defended with his sword. His first work, a "Treatise on the Church," appeared in 1578, and was followed the succeeding year by another, entitled, "The Truth of Christianity." But his most celebrated one was a "Treatise on the Institution of the Eucharist," in which he opposed the doctrine of transubstantiation. So great was his learning, and such was his influence over the Huguenots, that he acquired the appellation of the Protestant pope; while his constancy and unblemished character obtained the respect even of his opponents. Died, 1623.

MORNINGTON, GARRET WELLESLEY, Earl of, musical composer, was born in Ireland, about 1720. A fondness for music showed itself in him from his earliest years, and at 15 he had qualified himself for the post of organist in his father's chapel. Among his most admired compositions, are the glees—"Here in cool grove," "O bird of eye," and "Gently hear me, charming maid." He wrote also some church music, and was created doctor in music, by Dublin University. He was raised from his Irish burgeoisie to the rank of earl, in 1760, and died in 1781. Among the sons of the earl of Mornington were the marquis of Wellesley, governor-general of India, and the duke of Wellington.

MORNY, CHARLES AUGUSTE LOUIS JOSEPH, Due de, president of the French legislative body, and one of the chief supporters of the Second Empire, was born at Paris in 1811. He was the son of Queen Hortense and the Count de Flahault, and was thus half-brother to the Emperor Napoleon III. Adopted by the Count de Morny, who received a large *douceur*, he entered the army, and took part with some distinction in the war in Algeria; was wounded at the siege of Constantine, and soon after named chevalier of the Legion of Honour. On the death of his mother in 1837, he left the army, and, with the fortune he acquired, engaged in large trading speculations. Five years later he was chosen member of the Chamber of Deputies, but after the revolution of February, 1848, he resumed his commercial speculations, and did not become prominent in political affairs till the *coup d'état* of 2nd December, 1851. On that day he became minister of the Interior, and energetically carried out the measures necessary to accomplish the tyrannical purpose of Louis Napoleon, up to that time president of the republic. After the decree for the confiscation of the property of the Orleans family, in January, 1852, he resigned his office. He was afterwards a member of the Corps Législatif, of which he became president in 1854. In this post he for some time suppressed all freedom of debate and the semblance even of deliberation; but he took a milder tone after the entrance of Berryer and Thiers into the Chamber, and became fairly courteous. Sent as ambassador extraordinary to attend the coronation of the

Czar, in 1857, he married, in Russia, the young Princess Troubetzkoi, whose dowry greatly augmented the wealth which he had already accumulated. He did not cease to speculate in railroads, mines, canals, &c.; and he gratified his refined taste, or his vanity, in forming a fine collection of paintings. Died at Paris, 10th March, 1865.

MORO, ATTONI. [MORE, SIR ANTONY.] MOROSINI, ANDREA, a senator and historian of Venice; born, 1558; died, 1618. He rose to be one of the council of ten, and, in 1598, was appointed historian to the republic, when, instead of writing a continuation of Paruta's "Istoria Veneziana," he undertook an independent history, and wrote it in Latin.

MOROSINI, FRANCESCO, doge of Venice, and one of the greatest captains of his age, was born at Venice in 1618. He early distinguished himself against the Turks, and being appointed, in 1651, governor of Candia, and commander-in-chief of the fleet, defended that island more than two years, with 30,000 men, against a Turkish force of four times that amount; but was ultimately compelled to surrender in 1669. On the renewal of the war in 1684, Morosini, as commander-in-chief, made himself master of the Morea, and in 1687 took Athens. In 1688 he was elected doge; had a triumph on his return in the following year; and died in 1694.

MORRISON, ROBERT, D.D., an eminent missionary, and Chinese scholar, was born in Northumberland, in 1782. He was bred to the law, but was called to the bar, and was an elder of the Scotch church. But Robert had a propensity to study, learnt the rudiments of Latin, Greek, and Hebrew; and was, at length, sent by the London Missionary Society to China (having previously studied the language), where he arrived in 1807. In the course of a few years he had prepared a grammar and dictionary of the Chinese language for the press, besides a Chinese version of the New Testament, which were afterwards printed. He was appointed by the East India Company their correspondent and interpreter; but never lost sight of the chief object of his toil, namely, to complete a Chinese translation of the Bible, and thereby extend and establish the Christian doctrine. In 1817, the degree of D. D. was conferred upon him by the university of Glasgow; and in the same year he accompanied Lord Amherst in his embassy to Peking. His Chinese Bible, the first portion of which was printed in 1810, was finished in 1818. He afterwards projected an Anglo-Chinese college at Malacca, of which he was a liberal patron until his death, which took place at Macao, in 1834. In him was lost to the world the greatest Chinese scholar Europe had produced, and one of the most zealous of Christians.

MORTIER, EDOUARD ADOLPHE CASIMIR JOSEPH, marshal of France, duke of Treviso, was born in 1768, entered the army in 1791 with the rank of captain, and having distinguished himself on various occasions, he was rapidly promoted. Buonaparte had so high an opinion of his skill and enterprise, that he appointed him to the command of the army sent to occupy Hanover in 1803.

In 1804 he was raised to the rank of a marshal, and decorated with the grand cross of the Legion of Honour. In the campaigns of 1805 and 1806 General Mortier headed one of the divisions of the grand army, commanded in chief by Napoleon in person; and displayed great enterprise and intrepidity. On one occasion, when at the head of 4000 men, he fell in with the main body of the Russian army under Kutusoff, and being compelled to fight or surrender, by his superior tactics and valour he held out till the arrival of sufficient reinforcements. In 1808 he was raised to the imperial dukedom of Treviso, receiving £4000 per annum out of the crown domains of Hanover; and, soon after the invasion of Spain, he took the command of the French armies there. He accompanied Napoleon in his expedition to Russia; and to him was intrusted the blowing up the Kremlin at Moscow. On the restoration of Louis XVIII. he gave in his adhesion, and lived as a private person in Paris till 1816, when he was appointed to the command of the 15th military division, at Rouen. He was afterwards elected a member of the Chamber of Deputies, in which he sat till 1819, when he was restored to the peerage. In 1834, Louis Philippe prevailed on him to accept office, on the resignation of Marshal Soult, but he soon after resigned. Being on the staff of the king and princes at the review at Paris, on the 28th of July, 1835, it was the fate of this brave officer to be one of the victims of the assassin, Fieschi, whose "infernal machine," sparing the king and princes, took deadly effect on Marshal Mortier, and on several who were near him.

MORTIMER, ROGER, earl of March, an English baron of the 14th century, was born about 1287, and on the death of his father, in the Welsh wars in 1303, was made the ward of Piers Gaveston. He served under Edward I. in the Scottish war, in 1306-7, and during the first fourteen years of the reign of Edward II. was employed in Scotland, Ireland, and France, and was appointed lieutenant in Ireland in 1317. Three years later he joined the barons in revolt to banish the king's favourites, the Spencers, but was taken and imprisoned in the Tower. Having escaped to France, he allied himself with Isabella, queen of Edward II., and the barons who shared her discontent. The queen accepted him as her paramour, and having obtained aid from the count of Hainault, they came to England in 1326, deposed and imprisoned the king, and governed the kingdom at their will. The young prince was proclaimed (Edward III.); Mortimer was created earl of March, and took a large share of the estates of the Spencers; the deposed king was shamefully murdered by his orders; and at last Edward, weary of subjection to this insolent usurper, and backed by the public hatred of him, assumed the government. Mortimer was seized at the castle of Nottingham, and hung at Tyburn, 29th November, 1330. The attainder was reversed by the parliament in 1334, on the ground of its illegality, Mortimer being condemned without a legal trial.

MORTIMER, JOHN HAMILTON, an Eng-

lish painter, was born at Eastbourne, in Sussex, in 1739. He was for a short time the pupil of Hudson, and became the friend of Sir Joshua Reynolds. In 1779 he was appointed by the king a royal academician; and died the same year. He excelled in sketches of banditti and fantastic subjects.

MORTIMER, THOMAS, miscellaneous writer, was born, in 1733, in London. He received a liberal education, and was for some time vice-consul in the Netherlands. His principal works are, "The British Merchant," 6 vols.; a "Dictionary of Trade and Commerce," and "The Elements of Commerce, Politics, and Finances." Died, 1809.

MORTON, (DOUGLAS.)
MORTON, JAMES DOUGLAS, fourth Earl of, regent of Scotland, was younger son of Sir George Douglas, of Pittendreich, and studied at Paris. Having married a daughter of the third earl, the earldom was transferred to him on the death of his father-in-law, in 1553. He favoured the Reformation, though not at first very boldly, and was made lord high chancellor of Scotland in 1563. Three years later he took part in the murder of Rizzio, and fled to England; he soon, however, obtained the queen's pardon through the influence of Ithwell. Informed of the plot against Darnley, he refused to share in it, but did not reveal it. He was one of the leading opponents of Ithwell, was again made chancellor, and in 1572 was appointed regent of the kingdom. His administration was arbitrary and burdensome, and having made himself odious to the people, he resigned in 1577. He found means of recovering his high office soon afterwards; but in 1581 he was charged as accessory to the murder of Darnley, tried, condemned, and beheaded, 3rd June. He died with great calmness, firmly maintaining his innocence.

MORTON, JOHN, archbishop of Canterbury and cardinal, was born in 1410, at Here, in Dorsetshire. He received his education at Balliol College, Oxford; after which he became principal of Peckwater Inn, now merged in Christchurch. In 1473 he was appointed Master of the Rolls, in which situation he adhered faithfully to Henry VI.; notwithstanding which Edward IV. made him bishop of Ely, and lord chancellor, in 1478. Richard III., however, committed him to the custody of the duke of Buckingham, who confined him in his castle of Brecknock; from which fortress he escaped to Ely, and next to the continent, where he joined the earl of Richmond. In 1485 he was made archbishop of Canterbury, and the next year lord chancellor; in 1493, he was created a cardinal; in 1494, elected chancellor of the university of Oxford; and he died, aged 90, in 1500. The "cut" in the Bedford Level named Morton's Leame takes its name from this prelate, by whom it was executed.

MORTON, SAMUEL GEORGE, American physician and ethnologist, was born at Philadelphia in 1799. He studied medicine at his native city and at the university of Edinburgh, graduating M.D. in both places, and in 1824 settled at Philadelphia, where he not only practised his profession, but dis-

at Eastbourne, in Sussex for a short time then became the friend of M. In 1779 he was appointed a royal academician; and excelled in many and fantastic subjects.

THOMAS, miscellaneous, 1733, in London. He was educated, and was for some time in the Netherlands. He wrote "The British Phlogiston," "The Elements of Trade and the Elements of Commerce." Died, 1809. (GLAS.)

DOUGLAS, fourth Earl, was younger son of the first, of Pittendreich, and he married a daughter of the Marquis of Cardross was transferred to the peerage of Scotland in 1707. He took part in the Jacobite rebellion and fled to England; he was pardoned by the queen's pardon book in 1716. In consequence of the Injunctions against Darnley, he refused to reveal it. He was an opponent of Bothwell as chancellor, and was regent of the kingdom. He was arbitrary and burlesque made himself odious by his high office soon after he was charged as regent of Darnley, tried, and executed, 3rd June. He was an honest, firm maintain-

archbishop of Canterbury was born in 1410, at Canterbury. He received his education at Oxford; after which he was appointed of Peckwater Inn, now the site of the church. In 1473 he was appointed to the rolls, in which office he served faithfully to Henry VIII. He was which Edward IV. was king, and lord chancellor. He was, however, committed to the Tower by the duke of Buckingham in his castle of Rochester, where he escaped to the continent, where he was confined. In 1556 he was appointed to the see of Canterbury, and died in 1593, he was succeeded by John Whitgift; in 1594, elected to the see of Exeter, and died in 1600. The "cut" in the name of Morton's Leametakes its name from the relation, by whom it was

DR. GEORGE, American naturalist, was born in 1791. He studied medicine at the University of Pennsylvania, M. D. in both places, and at Philadelphia, where he pursued his profession, but dis-

tinguished himself as an ardent student of physical science. A member of the Philadelphia Academy of Sciences from his twenty-first year, he was chosen professor of anatomy in 1839. Ethnology at length became his chief study, and as a basis for investigation of differences in the structure of the skull in the different races of men, he formed an immense collection of skulls, both human and brute. He published the results of his researches in the works entitled, "Crania Americana," "Crania Egyptiaca," and "Types of Mankind," the last named, however, only appearing after his death. Dr. Morton was also author of several medical treatises, among which are,—"An Illustrated System of Human Anatomy," and "Illustrations of Pulmonary Consumption." Died at Philadelphia, 1831.

MORTON, THOMAS, dramatist, was born in Durham, in 1761. He entered as a student at Lincoln's Inn, but his taste for theatricals caused him to abandon his profession, and he soon gave proofs of his talents as a dramatic writer. Some of his pieces still keep possession of the stage. They consist of "The Way to get Married," "Town and Country," "Speed the Plough," "Secrets Worth Knowing," "The School of Reform," "The School for Grown Children," "A Roland for an Oliver," &c. Died, 1838.

MOSCHUS, a Greek pastoral poet, a native of Syracuse, who flourished, with his friend Bion, about 250 B. C.

MOSER, GEORGE MICHAEL, painter and gold-chaser, was a native of Schaffhausen, and was born in 1704. He settled in London about 1735; conducted a private school of painting; distinguished himself as an enameller, and was employed by George III.; and was made in 1768 keeper of the new Royal Academy. Among his associates and friends were Hogarth, Roubilliac, Sir Joshua Reynolds, and other artists. Died at London, 1783.—MARY MOSER, his daughter, was a good flower painter, and was admitted R. A. She was born 1741, and died 1819.

MOSHEIM, JOHANN LORENZ VON, a learned German theologian, was born at Lubbeck, in 1634; became a member of the faculty of philosophy at Kiel; and was appointed in 1717 professor of theology and chancellor of the university of Göttingen, where he remained till his death, in 1755. His principal work is the "Institutiones Historiæ Ecclesiasticæ," written in Latin, but afterwards translated into German, with additions; also into English by Dr. Mac-laine. There are also French and Dutch translations. The learning and general firmness of this well-known history hardly compensate for its great faults of artificial and unphilosophical plan, entire want of spirituality, and general dullness of narration. Among his other numerous writings are, "De Jæbus Christianorum ante Constantinum Magna Commentarii," "a Life of Servetus," "Observationes Sacre," and "Moralis of Holy Scripture."

MOTHE-LE-VAYER, FRANÇOIS DE LA. (LA-MOTHE-LE-VAYER.)

MOTIERWELL, WILLIAM, poet, was born at Glasgow in 1798; and when a youth he obtained a situation in the sheriff clerk's

office at Paisley, where he continued till within a few years of his death. In 1827 he published a very interesting collection of ballads, entitled "Minstrelsy, Ancient and Modern;" and he was afterwards successively editor of the Paisley Magazine, Paisley Advertiser, and the Glasgow Courier. In 1833 was published a collected edition of his own poems, some of which possess a pathos and an intensity of feeling not often surpassed. Died, 1835.

MOTTLEY, JOHN, miscellaneous writer, was the son of Colonel Mottley, who followed James II. to France, and was killed at the battle of Turin, in 1706. The son was born in 1692, and received his education at St Martin's library school; after which he obtained a place in the excise office, but was obliged to resign it in 1720. He then had recourse to his pen for support, and wrote five dramatic pieces; also the "Life of the Czar Peter the Great," 3 vols., and the "History of Catharine of Russia," 2 vols.; but the work of his which obtained by far the greatest popularity, is the well known collection of fææles, called "Joe Miller's Jest," of which we have spoken under the notice of its assumed author. Titled, 1750.

MUFFET, or MUFFET, THOMAS, physician and naturalist, was born in London, and educated at Cambridge, after which he travelled through various parts of Europe; took the degree of M. D. while abroad; and, on his return, settled in London, where he practised with great reputation. He accompanied Lord Willoughby on an embassy to Denmark, was with the earl of Essex when he was sent in command of auxiliary forces into Normandy; and died about 1604. His works are, "De Jure et Præstantia Chemicorum Medicamentorum," "Epistolæ quinque Medicinales," "Nosomantia Hippocratica," "Health's Improvement, or Rules for preparing Food," "Insectorum, sive minimorum Animalium Theatrum," the last of which gave the author a very high rank among entomologists.

MOULIN, CHARLES DU, an eminent jurist, was born at Paris, in 1500. He was educated for the legal profession, and admitted an advocate in the parliament of Paris; but owing to an impediment in his speech, he gave up pleading for chamber practice, and devoted much of his time to the composition of legal works. He embraced the Protestant religion, and in 1552 having attacked the authority of the pope, was compelled to seek an asylum in Germany. On his return to France he suffered imprisonment at the instigation of the Jesuits, and could not recover his liberty without pledging himself to print nothing till he had obtained the royal permission. He afterwards reconciled himself to the Catholic church, and died in 1569.

MOULIN, PIERRE DU, a Protestant divine, was born at Buhl, in the Vexin, in 1568. He studied first at Sedan, and next at Cambridge, from which university he removed to Leyden, where he held a professorship of philosophy and also taught Greek; but in 1599 he returned to France, and became minister at Charenton. On the assassination of Henry IV., Du Moulin

charged the guilt of that detestable deed upon the Jesuits, which produced a violent controversy between them; and, in 1615, he visited England on the invitation of James I., who gave him a prebend in Canterbury Cathedral. He did not continue long in England; but after refusing the divinity professorship at Leyden, he finally settled at Sedan, of which place he became the pastor, filling at the same time the theological chair there. Among his writings are, "De Monarchia temporalis pontificis Romani," "Nouveauté du Papiame," &c. Died, 1658.

PIERRE DU MOULIN, his son, was born in 1600, at Paris, and graduated at Leyden; but coming afterwards to England, obtained, like his father, a prebend at Canterbury, and was chaplain to Charles II. He was author of "Chamur Regii Sanguinis," which, being anonymous, was attributed, by Milton, to Alexander More, and "A Defence of the Protestant Religion."—LOUIS DU MOULIN, his brother, became an Independent, and wrote "Parènesis ad Edificatores Imperii," dedicated to Oliver Cromwell; and "Patronus Bostæ Fidelis," a fierce invective against the Church of England. Died, 1683.

MOUNIER, JEAN JOSEPH, a distinguished member of the states-general of 1789, was born at Grenoble, in 1758; was brought up to the legal profession; and was successively advocate of the parliament of Grenoble and judge-royal. While he was a member of the National Assembly he exerted all his influence to promote the establishment in France of a limited monarchy; but finding his efforts vain, he retired first to his native place, and afterwards removed to Geneva, where he published "Recherches sur les Causes qui ont empêché les Français de devenir libres." He subsequently visited England, but resided chiefly in Switzerland, Italy, or Germany, till 1801, when he returned to France. In 1804 he was nominated a councillor of state, and died in 1806.

MOUNTFORT, WILLIAM, an English actor and dramatic writer, was born in Staffordshire, in 1659. He was an excellent comic performer; and being in the flower of his age, and one of the handsomest men on the boards, the parts of lovers were usually allotted to him. He fell a victim to the jealousy of a rival in love, one Captain Hill, who, in company with Lord Mohun, waylaid Mountfort one night, in the winter of 1692, in Norfolk Street, Strand, and killed him on the spot. Hill made his escape to the continent, and Lord Mohun was tried by his peers for the murder, but, for the want of sufficient evidence, was acquitted. This nobleman was himself eventually killed by the duke of Hamilton, in a duel fought in Hyde Park. Mountfort was the author of five plays.

MOURAD BEY, a famous Mameluke chief, was a native of Circassia. After the destruction of Ali Bey, in 1773, he obtained the government of Cairo, in conjunction with Ibrahim Bey, which notwithstanding some severe contests with Ismael Bey and the Turkish government, who tried to dispossess them, they contrived to keep. When Buonaparte invaded Egypt, Mourad opposed the French with great vigour; but he was at

length obliged to retreat to Upper Egypt. He subsequently entered into a treaty with General Kleber, and accepted the title of prince of Assouan and Jirgeh, under the protection of France. He died of the plague, in 1801.

MOURADBEA D'OHSSON, IGNATIUS, an Armenian by descent, was born at Constantinople, in 1740. At the age of twenty-four he understood most of the oriental languages; and, from having been secretary and first interpreter to the Swedish embassy, was eventually appointed minister of Sweden to the Porte. Died, 1807. He was the author of two valuable works, "A General View of the Ottoman Empire" and an "Historical View of the East."

MOZART, JOHANN CHRYSOSTOM WOLFGANG AMADEUS, one of the most eminent musical composers, was the son of Leopold Mozart, sub-chaplain-mstr of Salzburg. He was born in 1756; and the precocity of his musical talent was extraordinary. His father could not fail to observe his genius, and he gave him every advantage, so that, before the child was four years old, he could play on the harpsichord with correctness and taste. In his fifth year he wrote a concerto for the harpsichord. In his sixth year, his father took him and his sister Maria Anna, who was also a musical genius, to Munich and Vienna, where the little artists were introduced to the imperial court, and the unequalled execution of the boy excited universal surprise. In 1763, when young Mozart was seven years old, he was taken to Paris, where he remained six months, and was overwhelmed with attention and applause. Here he published his first sonatas. In 1764, the family proceeded to England, and performed at court, the son playing on the king's organ with great success. At a public concert, symphonies of his composition only were performed. Here, as well as in Paris, compositions of Bach, Handel, &c., were laid before him, all of which he executed with the greatest truth at first sight. During his stay in England, he composed six sonatas, which were published in London, and dedicated to the queen. After this he returned to Holland, and assisted at the installation of the stadtholder. The family next visited Paris, and after having been twice at Versailles, proceeded, by way of Lyons, through Switzerland to Munich. In 1766 they returned to Salzburg, where they remained till 1768, and then made a second journey to Vienna. In 1769, Mozart, who had been made master of the concerts at the court at Salzburg, commenced a journey to Italy, in company with his father. In 1770 he composed, in his 14th year, his serious opera of "Mitridates," which had a run of upwards of 20 nights in succession. When Mozart returned to Salzburg, in 1771, he found a letter, in which he was commissioned, in the name of the Empress Maria Theresa, to compose the grand theatrical serenata, "Ascanio in Alba," for the celebration of the nuptials of the Archduke Ferdinand. He undertook this commission, and in August returned to Milan for some months, where, during the festivities of the marriage, Mozart's serenata and an opera

composed by Haase were performed alter-
nately. In 1776 he went again to Vienna,
and, engaging in the service of the emperor,
he satisfied the great expectations which
were raised by his early genius. Among
the works of his which will always be the
delight of every musical nation, are the
"Idomeneo," by the composition of which he
won the hand of Constance Weber, the lady
he loved, the "Nozze di Figaro," the "Zau-
berflöte," the "Clemenza di Tito," and, above
all, the splendid "Don Giovanni," which
first appeared in 1787. The music of this opera
is the triumph of dramatic composition; and
though its great merits were not appre-
ciated on its first performance, its composer
lived to see justice done to it. When in his
36th year, and in a state of great physical
debility, he undertook the composition of
his sublime "Requiem," but the decline of
his bodily powers, and his great mental ex-
citement, hastened his dissolution: he was
seized with repeated fainting fits, brought
on by his extreme assiduity in writing, in
one of which he expired, Dec. 5, 1791. An
English translation of his letters, by Lady
Wallace, from the Collection of Ludwig
Nohl, appeared in 1865. These letters, writ-
ten in a frank confidential mood, possess
great interest, showing in the most striking
manner how the great artist lived and la-
boured, enjoyed and suffered.

MUDGE, JOHN, an English physician
and an excellent mechanic, was the son of
Zachary Mudge, vicar of St Andrew's,
Plymouth, author of a volume of sermons
and an ingenious essay for a new version of
the Psalms. Dr John Mudge settled as a
physician at Plymouth, where he wrote a
treatise "On the Catarrhus Cough." He
improved the construction of reflecting tele-
scopes, and died in 1793.—His brother
THOMAS, born in 1715, was an excellent
watchmaker, and made great improvements
in chronometers, for which he received a
parliamentary reward. Died, 1794.—WIL-
LIAM MUDGE, a nephew of the last men-
tioned, was born in 1762, at Plymouth, rose
to the rank of major-general in the army;
and died in 1820. He superintended the
execution of the grand trigonometrical sur-
vey of England and Wales, and wrote an
account of the operations. He was a fellow
of the Royal Society, and of the Society of
Antiquaries, a correspondent of the French
Institute, and a member of the Academy of
Sciences of Copenhagen.

MUIE, ROBERT, an industrious litté-
rateur, was born in Forfarshire, in 1777. In
1802 he was appointed Gaelic professor and
teacher of drawing in the Inverness Aca-
demy. He subsequently filled other situations
of a like nature; but at length turned his
attention exclusively to authorship, and
commenced his career with a novel, entitled
"Glenfergus," in 3 vols. He then for a
while sought employment as a reporter for
the London newspapers, and his literary
efforts were unceasing. Independently of
his contributions to periodicals, upwards
of 80 volumes from his pen were in rapid
succession brought before the public. Of
these the most prominent were: "Modern
Atheism" (a description of Edinburgh);

"Babylon the Great" (a description of Lon-
don), 4 vols.; "The British Naturalist," 2
vols.; "The Feathered Tribes of the British
Islands," 2 vols.; "Conversations in Moral
Philosophy," 2 vols.; "The Elements: the
Heavens, the Earth, the Air, the Sea," 4
vols.; "Man, in his Physical Structure, In-
tellectual Faculties," &c., 4 vols.; "The
Seasons," 4 vols.; "History of Hampshire
and the Channel Islands," 3 vols., &c. Died,
May, 1842, aged 64.

MUGGLETON, LUDOWICK, one of the
founders of the sect of Muggletonians, was
born about 1610. He was a tailor by trade,
and began to attract attention as a preacher
and writer in conjunction with one Itevee,
about 1650. The two gave themselves out
for the last and greatest prophets of Jesus
Christ, and pretended that they had absolute
power to save or damn. The numerous writ-
ings in which they set forth their ridiculous
pretensions and fantastic doctrines were
collected and published in 3 vols. 4to, so
recently as 1832. They found many be-
lievers in their day, and some remnants
possibly linger still among us, although
the sect is not mentioned in the Census Re-
port of 1851. George Fox and William Penn
were the principal opponents of the new
prophets. Muggleton was prosecuted and
convicted of blasphemy in 1676, and died in
1697.

MÜLLER, CARL OTTFRIED, an eminent
modern scholar and historian, was born in
1797, at Brieg, in Silesia. He studied at Bres-
lau and Berlin, and became, in 1819, professor
of archaeology in the university of Göttingen,
and distinguished himself by his researches
into Greek mythology and history. He
visited France and England in 1822, but his
life is marked by few incidents. While tra-
velling in Greece, with a view to the com-
mencement of an elaborate work on the
history of that country, he was taken ill,
and died at Athens, Aug. 1, 1840. His most
important works are, "Die Dorier," which
was translated into English by Sir G. C.
Lewis, "Prolegomena to a Scientific Myth-
ology," "Die Etrusker," "Handbuch der
Archæologie der Kunst," and a "History
of Greek Literature," which he did not live
to complete.

MÜLLER, GERARD FRIEDRICH, a Ger-
man historian and miscellaneous writer,
born in Westphalia, in 1705. After studying
at Leipzig he went to Russia, became mem-
ber of the Academy of St Petersburg, and
took part in several scientific expeditions.
He was afterwards made counsellor of state,
and on account of his important services in
literature and science was chosen F.R.S.,
London, and correspondent of the Academy
of Sciences of Paris. Among his works are
a "Collection for the History of Russia," in
German, "Origines Gentis et Nominis
Rusorum," and "Histoire des Voyages et
Découvertes des Russes." Died, 1783.

MÜLLEH, JOHANN, astronomer, called
REGIOMONTANUS, from Mons Regius, or
Königsberg, where, probably, he was born in
1436. After studying at Leipzig, he removed
to Vienna, where he studied the mathema-
tics under Purbach, whom he assisted in
his astronomical observations and in a Latin

version of the "Almagest" of Ptolemy. This version was completed by Müller after the death of Pirbaeh. At the desire of Cardinal Bessarion, Regiomontanus accompanied him to Rome, and visited the principal cities of Italy. After a long stay in Italy, he returned to Vienna, where he held the professorship of astronomy. He subsequently went to Buda; but on the breaking out of the war with the Turks he removed to Nürnberg, where he built an observatory, and founded a printing-office. He died in 1476, at Rome, whither he had been called by Sixtus IV., to assist in reforming the calendar, having been previously raised, for his services, to the archbishopric of Ratisbon. He wrote various astronomical works, and constructed some curious automata.

MÜLLER, JOHANN VON, an eminent Swiss historian, was born in 1752, at Schaffhausen, and studied at Göttingen. In 1780 he published the first part of his "History of the Swiss Confederation;" and shortly after he went to Berlin, where he printed "Historical Essays." His other principal work was a "Course of Universal History." His works were published collectively at Tübingen, in 27 vols. Müller was successively professor of Greek at Schaffhausen, and of history at Cassel, councillor of the imperial chancery, secretary of state for the ephemeral kingdom of Westphalia, and director-general of public instruction. Died, 1809.

MÜLLER, JOHANN GOTTHARD VON, an eminent German engraver, born near Stuttgart in 1747. He became a pupil of the French engraver Wille, and in 1776 was admitted to the French Academy. He was patronized by successive dukes and kings of Wurtemberg, became professor of engraving at Stuttgart, and a member of the principal German Academies. Among his best works are portraits of Louis XVI., Schiller, and Wille; "Alexand. ler conqueror of himself," after Flinck; the "Madonna della Seggiola;" and a "St Catharine," after Leonardo da Vinci. Died, 1830.

MÜLLER, CHRISTIAN FRIEDRICH VON, son of the preceding, was still more distinguished as an engraver. He was born in 1783, and studied first under his father, and then at Paris, where he remained till 1814. Müller's great work is the print of Raphael's "Madonna di San Sisto," his absorbing and exclusive task during the last few years of his life. His health broke down immediately on the completion of the plate, and he did not live to see a print from it. He had been appointed professor of engraving in the Dresden Academy in 1814, and died near Dresden in 1816. Besides some good portraits, he engraved Domenichino's "St John about to write his Revelation," and Raphael's "Adam and Eve under the Tree of Life."

MÜLLER, LUDWIG, a celebrated Prussian engineer. He served in the Seven Years' War under Frederick the Great, and died in 1804, aged 70. He was the author of a "View of the Wars of Frederick the Great," and other works relating to the military art.

MÜLLER, OTTO FRIEDRICH, a distinguished Danish naturalist, born at Copen-

hagen in 1730. He was from his early years a close and accurate observer of nature, and life contributed to the advance and enrichment of the sciences of zoology and botany. His most original and important works are the "History of Land and River Verms," in which he first attempted a classification of the Infusoria; treatises on the "Hydrachna;" and the "Entamostraca;" "Funa Friderichsdallana," and "Flora Friderichsdallana." He projected, but only lived to begin the great "Zoologia Danica," and was employed as continuator of the "Flora Danica." Most of his works are written in Latin. Died, 1781.

MÜLLER, PETER ERASMUS, bishop of Zealand, Denmark, a distinguished antiquary, was born at Copenhagen in 1776. After studying at the university of that city he visited Germany, France, and England, became professor of theology at Copenhagen, and in 1830 bishop of Zealand. He was author of the "Sagabibliothek," a useful chronological view of the perplexing mass of Icelandic legends; of critical examinations of the Edda of Snorro, and of the work of Saxo Grammaticus, and other historical and critical treatises, besides several theological works. He was also editor for 25 years of one of the leading literary journals of Denmark. Died, 1831.

MÜLLER, WILLIAM JOHN, an English painter, was a native of Bristol, and was born in 1812, at which time his father, a German, was curator of the Museum of that city. After studying awhile under Pyne, he travelled on the continent, and in 1828-33 visited Greece and Egypt, bringing home many excellent pictures and sketches from nature. He accompanied Sir Charles Fellows to Lycia in 1843, and made large additions to his sketches and studies during his stay in the East. The pictures he exhibited at the Royal Academy after his return were unfavourably hung, and did not attract the attention they deserved. Among his best works are—"Athens, from the road to Marathon," "Memnon," "Burial Ground, Smyrna," "Turkish Merchants with Camels," "Convent, Bay of Naples," &c. Died, at Bristol, 1845.

MULREADY, WILLIAM, a distinguished painter, was born in Ennis, county Clare, April 1, 1786. When about five years old he was taken to London, his father, a leather-breeches maker, removing thither with his family. His early skill in drawing attracted attention, and he became a pupil and protégé of Banks the sculptor, who succeeded in qualifying him for admission into the school of the Royal Academy in 1800. He earned his living for a time by designing book-illustrations and by scene-painting, and in 1804 married a sister of the painter Varley. The union turned out unhappy, and the young couple after a few years were separated. Mulready tried his hand first in the grand style, "high art," but soon wisely took to landscapes and the genre and humorous class of subjects in which he attained so great a mastery. He first exhibited at the Royal Academy in 1801, was chosen A.R.A. in 1815, and in less than a year R.A.

He was at one period a diligent student of the Dutch masters, and the fruits of this study appeared in the long series of admirable figure-pictures which he produced from 1810 till his death. From about 1821 he aimed at greater freedom in drawing and richness of colouring, and he was rewarded for his patient humble studies and persistence with a glorious success. He remained a student through life, and was in the Life School of the Academy only a day or two before his death. Among his numerous pictures we can only name a few of the most admired: "The Fight Interrupted," 1815; "Idle Boys," 1815; "Wolf and the Lamb," 1820; "The Last In," 1835, now in the National Gallery; "First Love," 1839; "Train up a Child," 1811; "The Whistonian Controversy," 1843; "Choosing the Wedding Gown," 1845; "Women Bathing," 1849; "The Bathers," 1849; and "The Toy-Seller," left unfinished, 1861. Mulready was chosen to design illustrations for the new edition of the "Vicar of Wakefield," which appeared in 1840; and several of these he afterwards painted. His pictures, drawings, and sketches, were exhibited at the Society of Arts in 1848, and again after his death at the South Kensington Museum. Mulready died at Bayswater, where he had lived so many years, July 7, 1863, and was buried at Kensal Green. The National Gallery has four of Mulready's works, which formed part of the Vernon collection; and many others are included in the collection presented conditionally to the nation by John Sheepshank. In 1856. The story of the early life of this admirable artist and genial man is told in one of William Godwin's children's books, entitled "Looking Glass, or True History of the Early Years of an Artist." By Theophilus Marchiffe, published in 1805.

MUMMIUS, LUCIUS, a Roman consul, who after serving as praetor in Spain, distinguished himself in B. C. 146, by the conquest of Greece. He took, burnt, and pillaged Corinth, and sent the finest works of art found there to Rome. To Mummius was then intrusted the task of organizing the new province of Achaia. He was honoured with a triumph, and the surname of Achaicus. He afterwards held the office of censor.

MÜNCHHAUSEN, JEROME CHARLES FREDERIC VON, was a German officer in the Russian service, who served in several campaigns against the Turks. He was a passionate lover of horses and hounds; of which, and of his adventures among the Turks, he told the most extravagant stories, till his fancy so completely got the better of his memory, that he really believed his most extravagant fictions, and felt very much offended if any doubt was expressed on the subject. Having become acquainted with Bürger at Pyrmont, and related these waking dreams to him, the poet published them in 1787, with his own improvements, under the title of "Wunderbare Abenteuer und Reisen des Herrn von Münchhausen." The wit and humour of the work gave it great success, and it was translated into several foreign languages. Died, 1797.

MUNDAY, ANTHONY, a dramatic poet of

the 16th century. He was the author of the "City Pageants," enlarged Stowe's Survey of London, and died in 1633.

MUNNICH, BURCHARD CHRISTOPH, Count, a military officer, was born in Oldenburg, in 1683. After distinguishing himself in the German wars, he entered into the Russian service, and rose to the rank of marshal; but in 1741 the Empress Elizabeth condemned him to perpetual exile in Siberia. He was, however, recalled from banishment on the accession of Peter III., and, on his arrival at court, made his appearance before the emperor in the sheepskin dress which he had worn during his captivity. Died, 1767.

MUNSTER, GEORGE FITZCLARENCE, Earl of, was the eldest son of the duke of Clarence (afterwards William IV.) and the celebrated Mrs Jordan. He was born Jan. 29, 1794, and after receiving the elements of instruction at Sunbury, under Dr Moore, was at twelve years of age received into the Royal Military College at Marlow; and when scarcely fifteen he commenced actual service in the Peninsula as cornet in the prince of Wales's hussars, and became aide-de-camp to General Sinde. On the disastrous termination of Sir John Moore's expedition he returned to England for a few weeks, and then started to join the army in Portugal as aide-de-camp to Lord Londonderry, then Sir Charles Stewart, with whom the young soldier (now a captain) joined the army under Sir Arthur Wellesley, in 1809. From this period to the conclusion of the war, he served on the staff at headquarters, and was present at twelve general engagements; and on some of those occasions, but especially at the battle of Fuentes d'Onoro, his conduct was marked by extraordinary skill and presence of mind. At Toulouse he was severely wounded in leading a charge against cavalry. In January, 1815, Captain Fitzclarence sailed for India as aide-de-camp to Lord Hastings, and while there he closely studied the Oriental languages and literature. During the Mahratta war of 1817, he had several opportunities of distinguishing himself. On the conclusion of peace with Scindiah, he was intrusted with the hazardous duty of carrying home the overland despatches from India; and in 1819 he published his "Overland Tour." At the recommendation of his friend the duke of Wellington, he received the brevet of lieutenant-colonel; soon after which he married Miss Mary Wyndham, a natural daughter of the earl of Egremont, and had seven children. Ere his royal father had been a year on the throne, he created his eldest son earl of Munster, Viscount Fitzclarence, and Baron Tewkesbury. "No person," says Mr Dodd in his Annual Obituary, "who has observed the career of Lord Munster, can overlook the fact, that he felt himself continually urged, by his peculiar position, to both mental and physical exertions, which were perhaps beyond his strength. The ill consequences of every temporary indisposition were aggravated by his sensibility," and on the evening of the 20th of March, 1842, he shot himself.

MUNSTER, Count, an Hannoverian statesman. In 1806, Hanover being invaded by

the Prussians, he entered a spirited protest and retired to England, where, on account chiefly of that protest, he was so great a court favourite, that when the mental malady of George III. was past all doubt, the count was one of the commissioners appointed to protect and administer his private property. But he is chiefly known for the part he took in the congress of Vienne, 1814, and the declaration of 1815, by which Napoleon was put out of the pale of the law. Died, 1836.

MUNSTER, SEBASTIAN, a German divine, was born at Ingelheim, in 1489, entered into the order of Cordeliers, but left them to join Luther. He then settled at Basel, where he succeeded Pellicanus in the Hebrew professorship. He published a Latin version of the Bible, from the Hebrew, with notes; "Universal Cosmography," which was translated into the principal European languages, and is noteworthy as the first of modern general geographies; a Treatise on Dialling, a Latin translation of Josephus, and several mathematical works. Died, 1552.

MUNZER, a fanatic, who, in the early part of the 16th century, rendered himself for awhile extremely formidable in Germany, where he preached equality and the community of property, and collected 40,000 followers, who committed many enormities. He was at length defeated by the Landgrave of Hesse, with the loss of 7000 of his devoted followers, and being chased to Frauchausen, was taken prisoner, and executed at Mulhausen, in 1525.

MURAT, JOACHIM, one of the most intrepid of the French marshals, and placed on the throne of Naples by Napoleon Buonaparte, was the son of an innkeeper at Cahors, where he was born in 1771. He was intended for the church, but escaping from the college of Toulouse, he enlisted as a chasseur, but was shortly after dismissed for insubordination. On the formation of the constitutional guard, he entered it, and displaying an active zeal for revolutionary principles, he was soon advanced to the rank of lieutenant-colonel. The overthrow of the Terrorists checked his progress for a time, but the Directory made him chief of brigade, and in 1796 he accompanied Buonaparte to Italy as his aide de camp. Here he distinguished himself as a cavalry officer, by his impetuous courage, and was employed as a diplomatist at Turin and at Genoa. He followed Napoleon to Egypt, where he decided the victory over the Turks at Aboukir, and returned as general of division. In 1800 he married Marie Caroline, the younger sister of his patron, who was then first consul; and, in 1804, he was made marshal, grand admiral, and prince of the French empire. His services in the campaign of 1805 against Austria, during which he entered Vienna at the head of the army, were rewarded with the grand-duchy of Berg. He continued to share the victories of his master with such distinction, that, in 1808, Napoleon placed him on the throne of Naples. After reigning peaceably four years, he was called to accompany Napoleon to Russia, as commander of all his cavalry; and, after the defeat of Smolensko, he imitated the example of his leader,

and left the army for Naples. Once more he took part with Napoleon in the fatal campaign of Germany; but, after the battle of Leipzig, he withdrew, and finding that the throne of his patron began to totter, concluded an alliance against him. In 1815, however, he again took up arms, and formed a plan to make himself master of Italy as far as the Po, at the very time that Austria and the allies, upon his repeated assurances that he would remain true to them, had determined to recognize him as king of Naples. It was too late. Austria, therefore, took the field against him, and he was soon driven as a fugitive into France. After the overthrow of Napoleon he escaped, in the midst of continual dangers, to Corsica, from which he sailed with a few adherents, to recover his lost throne. A gale, off the coast of Calabria, dispersed his vessels, but Murat determined to go on shore. He was seized, and carried in chains to Pizzo, brought before a court-martial, and condemned to be shot. This sentence was executed Oct. 13, 1815 when Murat met his fate with undaunted courage.

MURATORI, LUDOVICO ANTONIO, an eminent Italian historian and antiquary, was born in 1672 at Vignola, in the Modena; was made keeper of the Ambrosian library at Milan, and, subsequently, librarian and archivist to the duke of Modena. His literary productions are numerous and valuable, but his fame chiefly rests on his great historical collection, entitled "Rerum Italicarum Scriptores, ab anno Ære Christianæ," 29 vols. folio; in addition to which, his "Antiquitates Italice, Medii Ævi," 6 vols. folio; "Anecdota Latina," 4 vols. 4to; "Anecdota Græca," 4 vols. 4to; "Annali d'Italia," 18 vols. 8vo; with many other works, attest the magnitude of his literary labours. Died, 1750.

MURE, WILLIAM, of Caldwell, was born in 1799, and was educated at Westminster and the university of Edinburgh. He studied subsequently in Germany, thus strengthening if not acquiring that taste for criticism which has won for him a wide reputation amongst European scholars. He was M.P. for Herefordshire from 1846 to 1855, and Lord Rector of the university of Glasgow during the years 1847, 1848. His chief work, "A Critical History of the Language and Literature of Ancient Greece," was left unfinished; but the several portions of it, on the epic and lyric poets, and the historians, may be regarded as separate works. The first two volumes are almost wholly devoted to an examination of the Iliad and Odyssey, in which he endeavours to prove the essential unity of both these poems, together with the identity of their authorship; in opposition to the theory which regards them as collections of national songs composed by different authors, and possibly at different times. He died April 1, 1860, aged 61.

MURILLO, BARTOLOMEO ESTEBAN, one of the greatest of the Spanish painters, was born, in 1618, near Seville. He acquired the rudiments of art from his uncle, Juan del Castillo; and being encouraged to visit Madrid, he acquired the countenance and patronage of the great painter Velazquez, then in the height of his reputation. He after-

Naples. Once more Napoleon in the fatal but, after the battle of Wagram, and finding that he began to totter, against him. In 1815, up arms, and formed himself master of Italy as early time that Austria repeated assurances due to them, had de-termined as king of Naples. He, therefore, took the crown, and was soon driven as a prisoner to Austria. After the overthrow of Napoleon in the midst of confusion, from which he sought to recover his throne, he fled to the coast of Calabria. At Murat determined he was seized, and carried to France, and brought before a court-martial, and was shot. This occurred on Oct. 13, 1815, when he was of undaunted courage.

VICO ANTONIO, an Italian and antiquary, was born in Modena, in the Modena. He was the Ambrosian subsequently, librarian of the duke of Modena. He has numerous and chiefly rests on his own merits, entitled "Rerum ab anno Erae Christianae in addition to which, he wrote, "Medii Aevi," 6 vols. 4to; "Annoti-ae Latinae," 4 vols. 4to; with many other works; with many other works of his literary

Childwell, was born at Westminister in 1710. He studied law, and thus strengthened his taste for criticism, and acquired a wide reputation. He was M.P. for Glasgow during 1846 to 1855, and Lord of the Treasury. His chief work, "A History of the Language and Literature of the Middle Ages," was left unfinished; and of it, on the epic of Homer, and the historians, may be two volumes. The first two were devoted to an analysis of the Iliad and Odyssey, to prove the essential nature of the epic, together with the ship; in opposition to the views of others, and regards them as composed by different persons at different times. Died 61.

JOSÉ ESTEBAN, one of the Spanish painters, was born in 1760. He acquired the assistance of his uncle, Juan del Valle, and was encouraged to visit Mount St. Vincent, and painter Velazquez, then of great reputation. He after-

wards returned to Seville, and there founded an Academy of Painting, and earned by his labours an imperishable fame. While painting the admired picture of St Catherine, in the church of the Capuchins at Cadiz, he fell from the scaffold, and died in consequence of the injuries he received, in 1682. One of his last works was the "Holy Family," now in the National Gallery, which has also two other interesting pictures by this master.

MURPHY, ARTHUR, a dramatic and miscellaneous writer, was born at Roscommon, in 1739, and educated at St Omer's. At the age of 18 he returned to Ireland, and soon came to London, and tried his dramatic powers in the farce of "The Apprentice," which was soon followed by "The Upholsterer." He then produced the "Orphan of China," a tragedy, which was well received. He also wrote a weekly paper, called the "Gray's Inn Journal;" and two others, in defence of government, entitled the "Test" and the "Auditor." In these, however, he failed; and some ludicrous mistakes exposed him to ridicule. Having studied the law, he was called to the bar by the society of Lincoln's Inn, but never had much practice. His plays of the "Grecian Daughter," "All in the Wrong," "The Way to Keep Him," and the "Citizen," had great success. He acquired considerable reputation by his "Essay on the Life and Genius of Dr Johnson," published in 1792; as well as by his translations of Tacitus and Sallust, and the "Life of Garrick." He was zealous in defence of the government measures; and during his latter years he obtained the appointment of a commissioner of bankrupts, and a pension of £200 per annum. He died in 1805, aged 77. His portrait, by Dance, is in the National Portrait Gallery.

MURPHY, JAMES CAVANAH, an eminent architect, antiquary, and traveller, was a native of Ireland. He published his "Travels in Portugal, in 1789 and 1790," an elaborate work, with plates, entitled, "Arabian Antiquities in Spain," and "Plans, Elevations, Sections, and Views of the Church of Batalba, in Portugal." Died, 1816.

MURPHY, ROBERT, a distinguished mathematician, was born of poor parents at Mallow, in Ireland, in 1806. Disabled by an accident from manual labour, he applied to study, and soon showed such an extraordinary genius for mathematical science, that in 1825 he obtained admission to Caius College, Cambridge. He graduated B.A., and was chosen fellow of his college in 1829. At the close of 1832, in consequence of his indulgence in dissipation, he had to leave the university, and his fellowship was sequestered. A few years later he settled in London, and employed himself in authorship. He also obtained the appointment of examiner in mathematics and natural philosophy at the London University. His works are—"Elementary Principles of the Theory of Electricity;" "Treatise on the Theory of Algebraical Equations," prepared for the Useful Knowledge Society; and various scientific memoirs contributed to the Philosophical Transactions, the Cambridge Philosophical Transactions, &c. Died, 1843.

MURRAY, ALEXANDER, a self-taught

linguist, was born in 1775, at Kitterick, in Galloway; and his father being a shepherd, he also was employed, at the age of 10, as a shepherd's boy. By extraordinary application he made himself master of the Latin, Greek, Hebrew, and French languages; and when, in 1794, the fame of his acquirements gained him admission to the university of Edinburgh, he made a rapid progress also in the oriental languages. In 1806 he became assistant to Dr Muirhead, minister of the parish of Urr, and soon afterwards succeeded him in his pastoral charge; but in 1812 he was called from thence to fill the chair of oriental languages at Edinburgh, and at the same time received the degree of D.D. He left a "History of the European Languages," which was printed, with his Life prefixed, in 2 vols. Died, 1813.

MURRAY, Right Hon. Sir GEORGE, a gallant British general, governor of the Royal Military College at Woolwich, &c., was born at the family seat, in Perthshire, in 1772, was educated at the high school and university of Edinburgh, and entered the army in 1789, and gained great distinction in almost every quarter of the globe for his military achievements, and more especially for the skill and ability with which he discharged in the Peninsular war the difficult office of quarter-master-general. In 1812 he was appointed to the government of the Canadas; but on hearing that Napoleon had escaped from Elba, he obtained his release from the governorship of Canada, and joined the English army in France. On his return to England he was appointed governor of Edinburgh Castle; and in 1819 the governorship of the Royal Military College was given him. In 1823 he became lieutenant-general of the ordnance, was soon after elected M.P. for Perthshire, and in 1828 took office as secretary of state for the colonies. In Sir R. Peel's administration of 1834-5 he filled the office of master-general of the ordnance; but lost his seat for Perthshire. At the Westminster election in 1837 he opposed and was defeated by Sir Lacy de Evans and Mr Leader. When the Whigs resigned in 1841, Sir George again received the appointment of master-general of the ordnance. Sir George Murray came before the public as the editor of "Marlborough's Dispatches," 5 vols.; but it is not necessary to speak of him in any other capacity than that of a gallant and successful soldier and an able minister. He died, July 28, 1846, aged 74.

MURRAY, HUGH, a most voluminous and successful writer on geography and kindred subjects, was born at the manse of North Berwick, 1779, the living of which his ancestors had held uninterruptedly from the period of the revolution till the death of the last incumbent, his elder brother, in 1824. At an early age he became a clerk in the excise office in Edinburgh, where his official duties leaving him considerable leisure, he cultivated a taste for literature with rare and indefatigable ardour. In the early part of his career he edited the Scots' Magazine, then in the hands of Mr Constable, and contributed to the Edinburgh Gazetteer, and published successively discoveries and travels in Africa, Asia, and America, all of which acquired for

their author a liberal share of popularity. At a later period of his life he contributed no fewer than 15 volumes to the Edinburgh Cabinet Library, on subjects connected with his favourite study; but the work on which his fame will chiefly rest is his "Encyclopedia of Geography," a stupendous monument of reading, industry, and research. Died, 1846.

MURRAY, JAMES, an American by birth, whose real name was Lillibridge, was a partisan officer in the service of the East India Company. He entered the service of Holkar, the famous Mahratta chief, about the year 1790, and soon became noted for his bravery, military skill, and the good offices he performed to certain British officers, who had been taken prisoners, and who, but for his humane interference, would have been put to the sword. When the war broke out between the British government and Scindia, in which Holkar assisted the latter, Murray joined the British general, Lord Lake, with a body of 7000 cavalry. The marquis of Wellesley at that period had issued a proclamation recalling all British subjects from the service of the native princes, but this order could not extend to Murray, as being an American. He was treated by the British commander with great consideration, and was employed in many dangerous and important services, still retaining the command of the cavalry which he had brought with him. At the siege of Bhurtpore, where the British army lost nearly 10,000 men, in four attempts to take the fort by storm, he was in continual action, and attained the character of being the best partisan officer in the army. Died, 1807.

MURRAY, JAMES STUART, Earl of, regent of Scotland, was the natural son of James V. by Lady Margaret, daughter of Lord Erskine, and was probably born soon after 1530. At five years of age his father made him prior of St Andrews, and he was long known by that title. He accompanied his sister, the Princess Mary, to France, was present at her marriage with the dauphin, and was frequently passing to and fro between the French and Scottish courts. He became a warm supporter of the reformers, and was chosen a member of the council, and one of the lords of the articles. On the return of Mary to Scotland as queen, Murray became her chief adviser, and was created, first, earl of Mar, and then earl of Murray. He was opposed to the queen's marriage with Darnley, and has been accused of implication in the murder of the latter; he appears to have been aware of the plot, and to have stood aloof from it. He remained out of Scotland for some months, in 1567, only returning on the accession of James VI. He saw his sister a captive in Lochleven Castle, and was soon after named regent. Mary having escaped and taken arms, he encountered and defeated her at Langside, in 1568, and was one of the witnesses against her on her trial. The regent Murray fell by the shot of an assassin at Linlithgow, January 23, 1570.

MURRAY, JOHN, physician, was a native of Scotland, and educated at Edinburgh, where he rose to eminence as a lecturer in natural philosophy, chemistry, the materia medica, and pharmacy. He was the author of "Elements of Chemistry," "Elements of

Materia Medica and Pharmacy," "A System of Chemistry," &c. Died, 1820.

MURRAY, JOHN, F.S.A., the eminent publisher, known wherever the English language is known, was born in 1778. Mr Murray was a man of considerable literary acquirements; and while his singular neatness and sound judgment insured his success as a man of business, his fluency, his store of anecdote, and a certain dry quiet humour, closely allied to wit, rendered him an agreeable companion for such men as Scott, Byron, Moore, Southey, Lockhart, and a number of other celebrated writers, who were at various times his guests, and at all times, from their first acquaintance with him, his fast friends. In their dealings with him, literary men were soon convinced that no paltry attempts would be made to depreciate real merit, or to depress below a fair remunerating standard the wages due to intellectual labour: nay, so generous were his impulses, that if he found a work profitable to him beyond what he had calculated upon, he frequently added to the stipulated price of copyright—sometimes even doubling it! Of this we might adduce several instances, did our space permit: we shall conclude by observing, that as he was one of the most successful publishers, so he highly deserved success, were it only for his wise and consistent liberality. Died, June 27, 1843, aged 65.

MURRAY, LINDLEY, the grammarian, was born in 1745, of Quaker parents, at Swaturn, near Lancaster, in Pennsylvania. He was originally destined for a mercantile life; but having been severely chastised for a breach of domestic discipline, he left his father, who was then residing at New York, and, taking up his abode in a school at Burlington, New Jersey, he there contracted a love of books and study. He afterwards studied the law, and practised as a barrister; but in course of time he quitted the bar for the counting-house, and having realized a competency, he came, in 1784, to England, and settled at Holdgate, near York. His "English Grammar," which so long held its ground and has passed through an immense number of editions, appeared in 1795. He soon after published the "English Exercises" and "Key." These were followed by many other school-books, and several moral treatises. His private life was as amiable as his labours in the cause of education and morals were successful. He died in 1826, aged 81.

MURRAY, WILLIAM, an eminent Scottish actor, was born in 1791. He made his first appearance, in his nineteenth year, at Covent Garden, under the auspices of Mr Kemble. Soon afterwards he settled in Edinburgh, where he remained forty-two years as actor and lessee, and during that period, besides his professional fame, he enjoyed the respect of the citizens, and the friendship of Scott, Allan, Wilson, Jeffrey, and other leading literati of the "Modern Athens." Mr Murray was one of the most versatile actors ever on the stage, and there were few who could take successfully so wide a range of characters. His addresses at the beginning and close of the theatrical season were masterpieces of wit and humour. Died, 1852.

MURRAY, WILLIAM. [MANSFIELD,
Earl of.]

MURKAY, WILLIAM VANS, a distin-
guished American diplomatist, was born in
Maryland, about 1762. He studied the law
in England, practised it in his native coun-
try, and became a senator of the United
States. As minister at the Hague he suc-
ceeded in preserving harmony between the
American and Batavian republics; and the
reconciliation between the United States
and France was effected chiefly through his
agency as envoy extraordinary to the French
republic. Died, 1803.

MUSEUS, JOHANN KARL AUGUST, an
eminent German writer, born at Jena, in
1735. He was educated at the university,
and became a tutor, and then professor, at
the Gymnasium of Weimar. His most ad-
mired work is the "Volksmährchen der Deuts-
chen," a collection of popular German tales
and legends, gathered from the lips of the
people, and told in the most simple and
fascinating style. The first edition appeared
in 5 vols. in 1782; later editions were con-
siderably enlarged. Among his other works
are—"Grandison der Zweite," a satirical
imitation of the "Sir Charles Grandison,"
of Richardson; "Physiognomische Reisen,"
suggested by Lavater's treatise and the ex-
travagant admiration it excited; "Strauss-
federn," a series of short tales; and "Freund
Heins Erschelnungen," his last work. Mu-
seus, who for his quiet, kindly character
and life was called "the Good," died, 1787.

MUSGRAVE, WILLIAM, physician and
antiquary, was born at Charlton, in Somers-
setshire, in 1657, and educated at Winchester
School, and New College, Oxford. He be-
came a fellow of the royal college of physi-
cians, and also of the Royal Society; to
which last learned body he acted as secre-
tary. In 1691 he settled at Exeter, and there
died in 1721. Besides some Latin tracts on
the gout, he published four volumes of dis-
sertations on Roman and British Antiqui-
ties.

MUSS, CHARLES, an ingenious painter in
enamel, whose "Holy Family," after Parmigiano, is said to be the largest piece of
enamel ever painted. Died, 1824.

MUSSATO, ALBERTINO, historian and
poet, was born in Padua, in 1261. He rose
from a state of indigence to public employ-
ments in his native city; but notwithstand-
ing his services, he became an object of po-
pularity; and in 1314 an attempt was made
to murder him. The ringleaders in this con-
spiracy were put to death; but Mussato was
afterwards banished to Chioggio, where he
died in 1330. In his exile he wrote a history
of the Emperor Henry VII., and a narrative
of the affairs of Italy after the death of that
emperor.

MUSCHENBROEK, PIETER VAN, a cele-
brated Dutch natural philosopher and ma-
thematician, was born at Leyden, in 1692.
He applied himself chiefly to natural philo-
sophy; held professorships at Duisburg and
Utrecht, and finally, in 1740, became pro-
fessor of philosophy at the university of his
native town. He was a member of the Royal
Society of London, and of the French Aca-
demy of Sciences. His Course of Natural and

Experimental Philosophy first appeared,
under a different title, in 1726, and was trans-
lated into English by Colson. Muschen-
broek was also the author of "Physicæ Ex-
perimentales" and other scientific works,
besides memoirs contributed to learned so-
cieties. Died, 1761.

MUTIS, JOSE CELESTINO, a celebrated
naturalist, was born at Cadiz, in 1731. In
1760 he accompanied the Marquis de Cordera
to New Granada, and spent nearly half a
century in South America, contributing
greatly to the spread of science and the arts
of civilization in that country. On his re-
turn to Europe he was appointed keeper of
the royal garden at Madrid. He was the
first botanist that distinguished the various
species of cinchona. Died, 1808.

MUZIANO, GIROLAMO, Italian painter,
born near Brescia in 1528 or 1530. After
studying at Brescia, he improved himself at
Venice, and went, in 1550, to Rome, where
he soon distinguished himself, executed
many works, and enjoyed the patronage of
the pope, Gregory XIII. His most cele-
brated picture, now lost, was a "Resurrec-
tion of Lazarus," painted in the church of
Santa Maria Maggiore. He painted the fine
picture of "Christ Washing the Disciples'
Feet," in Rheims cathedral. Muziano was
a good portrait painter, greatly improved
the art of working in mosaic, distinguished
himself also as an architect, and had the
chief part in founding the Academy of St
Luke at Rome. He was employed to finish
the drawings, begun by Giulio Romano, from
the bas-reliefs of the Trajan Column. Died
at Rome, 1590 or 1592.

MYCONIUS, FREDERIC, a German divine,
originally a Franciscan monk, was born at
Lichtenfeld, in Franconia, in 1491. When
Luther declared against indulgences, My-
conius opposed him, but soon changed his sen-
timents, and became a missionary for the
propagation of the principles of the Reform-
ation. In 1538 he accompanied the chancel-
lor of Weimar in an embassy to England;
and, while here, held a disputation with
some bishops and other divines. On his re-
turn, he was employed to reform the churches
of Thuringia; but he protested strongly
against the alienation of the ecclesiastical
and monastic revenues to secular purposes.
Died, 1546.

MYCONIUS, OSWALD, or GEISSHAUSER,
a reformer, born at Lucerne, in Switzerland,
in 1488. He studied at Basel, under Eras-
mus and Glareanus, after which he became
successively master of the schools of St
Theodore and St Peter. He next removed
to Zurich, where he held the office of regent
of the college three years; after which he
returned to Basel, obtained the head pasto-
rship of the church, and was chosen professor
of theology. He wrote several commentaries
on the Scripture, a Latin version of the Cate-
chism of Geolampadius, and a "Narrative of
the Life and Death of Zwingli." Died,
1552.

MYLNE, ROBERT, architect, was born at
Edinburgh, in 1734. While studying at Rome,
he gained the chief architectural prize at the
Academy of St Luke; of which academy, as
well as of those of Florence and Bologna, he

was a member. He was the builder of Blackfriars Bridge, which was commenced in 1760, and completed in 1770. It was the first work of the kind executed in England, in which arches approaching to the form of an ellipsis were substituted for semicircles. Myline's bridge, having fallen into decay, was taken down in 1864. He obtained the appointment of surveyor of St Paul's cathedral, and was employed to erect many private edifices in various parts of the kingdom. Died, 1811.

MYRON, a very celebrated Greek sculptor, born at Eleutherae, in Boeotia, about B. C. 480. He was a pupil of Ageladas and the rival of Polyctetus. He worked in marble, wood, and metal, and especially distinguished himself by his skillful representation of animals. His most admired work was the bronze figure of a "Cow lowing," which was still extant at Athens in the time of Cicero. Another very celebrated work was the statue called the "Discobolus," or Quoit-thrower, of which the marble so called in the British Museum is supposed to be a copy.

It was found at Hadriau's villa, near Tivoli, in 1791. Though a large number of works by Myron are mentioned by ancient writers, not one of them is now known to be extant.

MYTENS, ARNOLD, a Dutch painter, was born at Brussels, in 1541. He painted several pictures for churches in Italy; and died in 1602.

MYTENS, DANIEL, an eminent Dutch portrait painter, born at the Hague about 1590. He came to England in the reign of James I., and was named painter to Charles I. on his accession to the throne. After several years' enjoyment of royal and noble patronage he declined in favour before the rising Vandyke, and went back to Holland. Many of his portraits are at Hampton Court. Died, after 1636.

MYTENS, MARTIN, a Swedish painter, was born at Stockholm, in 1695. He fixed his residence at Vienna, and was greatly esteemed by the Emperor Charles VI. Died, 1755.

N.

NABIS, tyrant of Sparta, who commenced his reign about the year 205 B. C. He was surrounded by an armed guard, had a number of secret spies in his service, put to death or banished every suspected person, and indulged in the exercise of every species of cruelty. He contrived an instrument of torture in the form of his own wife, whose rich dress concealed a number of iron spikes in her bosom and arms. He plundered Messene and Argos, and would have continued to extend his dominion still wider over Peloponnesus, had not the Romans, in alliance with the Achaeans, declared war against him. He pursued the war, and was for a time successful; but was at length defeated by Philopomen, at the head of the army of the Achaean league, and was killed while attempting to escape, B. C. 192.

NADIR SHAH, king of Persia, first known as **TRAMAS KULI KHAN**, was a native of Khorassan, and was born in 1688. He was of low origin, and began his military career as a brigand. Becoming chief of a band, he gradually acquired considerable power, and at length resolved to deliver Persia from the Afghans who had conquered it. In this he succeeded, took Ispahau, and restored the legitimate monarch, the real power however remaining with himself. In 1736 he was formally invested with the sovereignty, insisting at the same time on a very great change in the religion of the country, the extinction of the most influential sect. He made war on the Afghans, and took Candahar;

invaded Hindustan, and took Delhi, where he ordered a massacre of the inhabitants; and then extended his conquests to the north of Persia. He had frequent wars with the Turks, and won many victories over them. But the excesses of jealousy, cruelty, and tyranny in which he indulged in the latter years of his reign made him universally detested, and a conspiracy was formed against him by some of his generals who anticipated proscription. He was assassinated in his tent in the night, 19-23 June, 1747. The Life of this extraordinary man was written in Persian by Mohammed Mahadi Khan, his secretary.

NAEVIUS, CNEIUS, a celebrated early Roman poet, born probably in Campania, but resident at Rome for the greater part of his life. He wrote a poem on the first Punic War, in which he had personally served, and from this poem Virgil adopted some passages in the Aeneid. Naeivius wrote also several comedies, and by the freedom of his attacks on leading men, subjected himself to imprisonment, and afterwards to exile. Died at Utica, about B. C. 202. Some fragments of his writings are extant.

NAHL, JOHANN AUGUST, an eminent Prussian sculptor, born at Berlin, in 1710. He executed the admirable colossal statue of the landgrave Frederick, which stands in Frederick's Square. In 1755 he was appointed professor in the Academy of Arts at Cassel, and died there in 1781.

NANI, GIOVANNI BATTISTA, a Venetian

historian, was born in 1616. He distinguished himself as ambassador to the French court, a post which he held for 23 years. He was afterwards employed in other missions of importance, for which he was made proctor of St Mark. He was author of "Istoria della Repubblica Veneta," and was historiographer and keeper of the archives of the republic. Died, 1678.

NANER, or NANUK, a native of Hindostan, and founder of the sect of Sikhs, which has grown into a powerful nation. He was born at Talwendy, in Lahore, in 1469; propagated his doctrines with great success; and died in 1539.

NANNI, GIOVANNI. [UDINE, GIOVANNI DA.]

NANTEUIL, ROBERT, an eminent French engraver, was born at Rheims, in 1630. His merit obtained him the place of designer and cabinet engraver to Louis XIV., with a pension. Died, 1678.

NAPIER, or NEPER, JOHN, lord of Merchiston, in Scotland, a celebrated mathematician, was born in 1550, and educated at the university of St Andrew's. After having travelled in France, Italy, and Germany, he returned to his native country, where he wholly devoted himself to the study of mathematics and theology. Being much attached to astronomy and spherical trigonometry, he wished to find out a short method of calculating triangles, sines, tangents, &c.; hence, his admirable invention of logarithms, first made public in 1611, and which has immortalized his name. The Napier "bones," or "rods," for multiplying and dividing, were invented by him. He also made several improvements in spherical trigonometry, and was regarded by the celebrated Keplerns one of the greatest men of the age. Died, 1617.

NAPIER, Vice-Admiral Sir CHARLES, K.C.B., was born March 6, 1786, and entered as a volunteer on board the Martin sloop of war in 1799, and became lieutenant in 1805. In 1809 he aided in the reduction of Martinique, where he sailed one of the forts accompanied by only five men. In the same year he was appointed by Sir Alexander Cochrane to command the French frigate D'Hautpoul, which, having been taken chiefly by Napier's efforts, was added to the British navy under the name of the Abercromby. On receiving his promotion as a post captain, he served ashore with his cousins, George, Charles, and William Napier, in the Peninsula, and was wounded at Busaco. In 1811 he was appointed to the Thames, a 32-gun frigate, and was mainly instrumental in preventing the enemy from constructing a fleet in the Mediterranean. Being sent to America in 1814, he led the way in the ascent and descent of the Potomac, and took part in the operations against Baltimore. In the following year his offer to organize a naval brigade to serve on the French coast was accepted by the government, but rendered unnecessary by the battle of Waterloo. He now received the decoration of C.B., and being placed on half-pay, remained out of active service for fourteen years. His marriage took place in 1815, and during some years his time was spent in travelling with his family through Europe, where he amassed a vast store of

military observations, embodied in a valuable MS. volume of plans and statistics, which may probably be published. Settling at Paris, he established the first steamers on the Seine, and ventured to cross the Channel in one of them in 1821, although these boats were scarcely seaworthy. Being appointed to the Galatea in 1829, he adapted to this vessel paddle-wheels worked by manual labour, and thus urged on the adoption of better means of propulsion in the navy. While employed on the coast of Portugal, he accepted from Dom Pedro the command of the constitutional fleet. With this fleet of ill-paid, ill-manned, and weak vessels he sailed in search of the stronger fleet of Dom Miguel, and, engaging at the greatest odds, totally defeated it after an obstinate engagement, which concluded the war and settled Dona Maria on the throne. For this great service Dom Pedro created him Viscount Cape St Vincent, assigning him a pension of £600 a year with the grand cross of all the Portuguese orders. His office of admiral-in-chief gave him the nominal control of the Portuguese navy, which he found utterly mismanaged. His attempts to improve it were met by an amount of angry opposition from the officials, which led him to throw up his appointment and return to England. In 1840 he was sent to Beyrout, and after storming the Egyptian garrison at Sidon, he defeated Ibrahim Pasha himself in October among the heights of the Lebanon. A general rise of the mountaineers in consequence of this defeat compelled Ibrahim to retire to Egypt. Having greatly distinguished himself in the attack upon Acre on November 4, he was sent to blockade Alexandria. This blockade he maintained until the time when he knew that bad weather would soon drive him from the station. On his own responsibility he concluded with Mehemet Ali a convention which secured to him and his heirs the hereditary sovereignty of Egypt. Although for a short time repudiated, this convention was ultimately recognized by the British government. On his return to England he was made K.C.B., besides receiving various foreign orders. As M.P. for Marylebone he was prominent in his attacks on naval abuses, and in his efforts to improve the condition of the seamen. In 1847 he received the command of the Channel Fleet; and on the breaking out of the Russian war the ministry of Lord Aberdeen appointed him to command the fleet of the Baltic. The condition of the fleet seems to have been very unsatisfactory; but although he showed his moral courage by refusing to assail, with a force and supplies altogether insufficient, the immense granite fortifications of Cronstadt, he still retained 100,000 men employed in guarding St Petersburg, who would otherwise have been sent to the seat of war in the south. It was objected that the capture of Bomarsund had been accomplished with so little loss of life, and as he refused to bear the blame for the inefficiency which he maintained was caused by the Admiralty, he was dismissed from his command. He refused the Grand Cross of the Bath when offered to him by Lord Aberdeen's successor in office, and assigned his reasons for so doing in a letter to Prince Albert. In 1855 he was re

turned as M.P. for Southwark, and speedily succeeded in completely justifying his own conduct throughout his Baltic campaign; and the remainder of his life was spent in zealously promoting the interests of the seamen, in improving the management of Greenwich Hospital, and in other important naval measures. Failure of health and strength at last compelled him to retire, and he died, after a short attack of dysentery, November 9, 1860, aged 75. The narrative of his "Naval Campaign in the Baltic" has since been published. His "Life and Correspondence" has been edited by Major-General E. Napier.

NAPIER, General Sir CHARLES JAMES, one of the most gallant soldiers of his age, a brother of the distinguished historian, Sir William Napier, and cousin of the well-known admiral of the same name, was born in London, in 1782. His father, a thoroughly competent man, charged himself with his education, and in January, 1794, before he was twelve years old, obtained for him a commission in the 33rd regiment. His first services to the country were rendered in the suppression of the Irish rebellion in 1798, during which he was aide-de-camp to Sir James Duff. In 1804 he became a major in the 50th regiment, which he commanded through Sir John Moore's retreat to Corunna, as well as at the battle. Pierced in the back with a bayonet, struck with a sabre on the skull, and about to be despatched, he was saved by the intervention of a drummer named Gibert, and was taken to the rear as a prisoner, where he was received by Scott with kindness, and as soon as he was sufficiently recovered suffered to go to England on parole. On the Coa, Napier was again to be found fighting as a volunteer. Two horses were here shot under him, and at Lusaco he was shot through the face; but recovered in time to be at the siege of Fuentes, and in the second siege of Badajoz. In 1813 he served in the expedition to the Chesapeake, having a year before been made lieutenant-colonel. He was not called to take any part in the battle of Waterloo; he, nevertheless, made all haste to join the army as a volunteer, but arrived on the field early on the morning of the 19th. He accompanied the English army to Paris, and was at the storming of Cambrai. In 1824, having been a year on the Ionian staff, he was appointed lieutenant-governor of Cephalonia. In 1839 he was appointed to the northern military district of England, and in 1841 to the command of the troops in the Bombay presidency. In 1842 he was sent to Scinde, to keep open the communications between the columns of Generals Nott, English, and Pollock, then advancing in Afghanistan. Here he had to fight at an immense disadvantage. At the battle of Meeanee, with but 2600 men, he encountered the Beloches force of 35,000, and defeated it, with a loss of 20 officers and 250 rank and file, while the enemy lost 6000. At the battle of Hyderabad he broke the power of the Aneers of Scinde; and on being appointed governor of the newly acquired territory, abolished slavery, the suttee, and the practice of infanticide, opened canals, and directed commerce and industry into new channels. In the spring of 1849, when

the disasters of the Sikh campaign had awakened the anxieties of the people of England, all eyes were directed to the hero of Scinde, and by the advice of the duke of Wellington Napier was appointed to the command of the Indian army. On the 24th of March, 1849, he set out for India, but when he arrived there the object of the war had been attained. He, however, exerted himself in reforming abuses which had grown up in the army, especially among the officers. Having remained in India about two years, he resigned his command and returned to England. In the army Sir Charles will be remembered as the sternest of reformers; his own simple manner of life giving him power to enforce order, which a more luxurious commander could scarcely have acquired. He was the author of several volumes; among which may be mentioned his "Lights and Shades of Military Life," and "Indian Misgovernment," a posthumous publication. Died at Oaklands, near Portsmouth, 1852. A statue, by Adams, is erected to his honour in St Paul's. Memoirs of his Life, and a History of his Administration in Scinde, were written by his brother, Sir William Napier.

NAPIER, MACVEY, whose name will long be memorable in connection with the Edinburgh Review and the Encyclopædia Britannica, was professor of conveyancing in the university of Edinburgh, and one of the principal clerks of the court of session. He passed as a writer to the signet in 1799; but he soon displayed a decided bias for literary pursuits; and his various acquirements, literary and legal, his profound erudition, and his sound judgment, found ample scope for their development in the preparation of a new edition of the Encyclopædia Britannica, of which he became the editor. In 1829 he succeeded Mr (afterwards Lord) Jeffrey in the editorship of the Edinburgh Review; and it is no light praise to say that, under his management, which embraced a period of 17 years, that leading organ of constitutional and liberal doctrines, and of many and enlightened criticisms, suffered no decay. Died, 1847.

NAPIER, Sir WILLIAM FRANCIS PATRICK, was born in 1785. He entered the army when fifteen years old, and besides the expedition to Copenhagen in 1807, and to Spain in the year following, he served throughout the whole of the Peninsular war, in which he was many times wounded. He was for some years lieutenant-governor of Guernsey; and was created a K.C.B. in 1848, having risen to the rank of major-general in 1841. But his reputation rests not only on his distinguished military services, but on his writings, which are all characterized by great force of thought and eloquence of expression. His earliest writings were contributions to the "Edinburgh Review;" his "Conquest of Scinde" depicted the successful career of his brother, Sir Charles Napier; and he was also a frequent contributor to the Westminster and other Reviews. But his great work is the "History of the War in the Peninsula," written with a peculiar vigour of description and strong national feeling. In spite of much opposition, espe-

of much opposition, espe-

cially from military critics, this history has deservedly worked its way to permanent popularity. His personal feelings and opinions were strong; but he never allowed them to interfere with the accurate and impartial statement of historical facts, while this very enthusiasm has imparted a graphic and life-like power to his descriptions, of which even the minute features appear rather to be drawn from memory than embellished by the heart of the historian. This vivid eloquence of narrative, joined with his pre-eminent powers as a military historian, has caused this work to supplant others written with less military technicality and of a character more professedly popular. He died at the age of 71, February 12, 1860. A statue of Sir W. Napier, by Adams, has been set up in St Paul's. His Life, with his Letters and Journals, has appeared, edited by H. A. Bruce, M.P.

NAPIER, WILLIAM JOHN, Lord, a British naval officer, was born at Kinsale, in 1787. He entered the service at the age of 16, and was a midshipman on board the *Defiance* at the battle of Trafalgar. In 1833 he was appointed superintendent of the trade and interests of the British nation in China, and he arrived at Macao, in July, 1834. Here, however, the object of his voyage was frustrated by the governor of Canton, who appeared anxious that his lordship should not reach that place until notice should have been sent to the court of Peking, and the answer of the emperor be made known upon the subject. Lord Napier was not inclined to delay, and, getting into his boat on the 24th of July, sailed up the Canton river, and arrived at the factory (Canton) on the next morning. The orders of the governor, that he should return to Macao, were replied to by him in terms of positive refusal; commercial transactions between the British and Chinese merchants were prohibited by the governor; and Lord Napier sent the *Imogene* and *Andromache* frigates up the Hoyn river, which were fired at by the forts, and which, in return, battered the forts about the ears of the Chinese soldiers. This occurred on the 7th of September; but, owing to calms, the ships were obliged to come to anchor for several days. On the 11th of the same month Lord Napier became seriously indisposed; and that the interests of the British merchants might not be injured by a farther suspension of their arrangements, the men-of-war were ordered to "move out of the river," and he returned to Macao, where, on the 11th of October, 1834, he expired.

NAPOLEON BUONAPARTE. [BUONAPARTE.]

NARBONNE LARA, LOUIS, Count de, born at Parma, in 1755. He was minister of war for three months under Louis XVI.; lieutenant-general in the French army in the third year of the revolution; and, finally, one of Napoleon's aides-de-camp during the Imperial government. He attempted to defend the constitutional monarchy; and, after the 10th of August, 1792, which decided the king's fate, was outlawed by the triumphant party of the "Mountain." He was saved by the exertions of Madame de Stael and Dr

Hollman (who subsequently withdrew Lafayette from a similar search of the ultra-Jacobins), and retired first to England, and afterwards to Switzerland. Invested with military rank by Napoleon, who greatly esteemed him, he accompanied him in most of his Austrian campaigns, and was in the fatal Russian campaign, in 1812. In 1813 he was ambassador to Vienna, and died at the end of that year.

NARBOROUGH, Sir JOHN, British admiral, was a native of Norfolk, and entered the navy in 1664. After serving with distinction in the Dutch war, he was charged, in 1669, with the conduct of an exploring expedition to the Strait of Magellan, and the neighbouring coasts of South America. He subsequently published some very accurate plans of the strait and an interesting narrative of his voyage. He served in the second Dutch war, was made rear-admiral and knight, and, in 1676, was sent in command of a squadron against the *Key of Tripoli*, Cloudesley Shovel serving under him as lieutenant. He compelled the Tripolines to abstain from piracy; and soon after had a similar success in two expeditions against the Algerines. In 1680 he was named commissioner of the navy, and died about 1688.

NARDI, JACOPO, an eminent Italian historian, was born of an ancient and noble family at Florence, in 1476. Having distinguished himself by his opposition to the Medici, he was imprisoned and exiled; and he retired to Venice, where he passed the rest of his life in the cultivation of literature. He wrote a "History of Florence," the *Life of Malespini*, a distinguished military commander, &c.; and acquired much reputation by an elegant translation of Livy. The year of his death is not known.

NARES, JAMES, musical composer, was born at Stanwell, in Middlesex, in 1715. He was one of the children in the royal chapel, and studied under Dr Pepusch, after which he became organist of York cathedral. In 1735 he succeeded Dr Green as organist and composer to the king; and was created doctor of music at Cambridge. In 1757 he was appointed master of the choristers of the chapel royal. Dr Nares published some noble anthems and a collection of glees, which are marked by great genius and a thorough knowledge of the science, several books of instructions, and a composition entitled "The Royal Pastoral." Died, 1783.

NARES, ROBERT, a learned critic and theologian, was the son of the preceding, and received his education at Westminster School, and Christchurch College, Oxford. After entering into holy orders he was presented to the rectory of Sharnford, in Leicestershire; he was also chosen preacher at Lincoln's Inn, and obtained the office of assistant librarian at the British Museum. He was afterwards a prebendary of Lincoln; and at the time of his death, in 1829, he was archdeacon of Stafford, canon of Lichfield, and rector of Allhallows, London. Dr Nares, in conjunction with Mr Beloe, established and conducted the *British Critic*, a high church literary review; and among his separate works are, "Elements of Orthodoxy," "A Glossary of Words, Phrases, &c., in the

Works of English Authors of the Age of Queen Elizabeth," "A Chronological View of the Prophecies relating to the Christian Church," &c.

NARSES, a celebrated eunuch, who entered into the service of the Emperor Justinian at the court of Constantinople, rose by his merit to the highest dignities of the state, and distinguished himself by military exploits. After vanquishing Totila the Goth, he captured Rome; rescued Italy from the Ostrogoths and other barbarians; was appointed governor of the country, and ruled it 15 years; but was at length deposed, and died in 567.

NARVAEZ, **PAMPILLA DE**, a native of Valladolid, in Spain, who went to America soon after its discovery, and was appointed commander of the expedition against Cortez by Diego de Velasquez, governor of Cuba. He sailed, in 1528, with 400 men, intending to establish a colony in Florida; discovered the bay of Pensacola; and, having marched into the country, was never heard of more.

NARUSZEWICZ, **ADAM STANISLAUS**, an eminent historian and poet of Poland, who, having made an excellent translation of the works of the great Roman historian, obtained the appellation of the Polish Tacitus; but his fame chiefly rests on his elaborate "History of Poland," which he left unfinished at his death, in 1796.

NASH, **JOHN**, architect, was one of the architects of the board of works, and amassed a large fortune by the extensive speculations in which he engaged for the improvement of the metropolis. Regent Street, Waterloo Place, the Regent's and St James's Parks, and nearly all the important changes in the architecture of London (westward), are due to him. He also built Buckingham Palace, the Haymarket Theatre, All Souls' Church, &c. Died, aged 82, 1835.

NASH, **RICHARD**, commonly called *Beau Nash*, the once celebrated arbiter of fashion at Bath, was born in 1674, at Swansea, in Glamorganshire. He was originally intended for the law, but entered the army, which, however, he soon quitted, and took chambers in the Temple. Here he devoted himself entirely to pleasure and fashion; and when King William visited the Inn, he was chosen master of the pageant with which it was customary to welcome the monarch. So pleased was the king with the entertainment, that he offered him the honour of knighthood, which Nash, on account of his narrow circumstances, refused. In 1704 he was appointed master of the ceremonies at Bath, an office for which he was admirably qualified by an elegant taste and uncommon vivacity. He immediately instituted a set of regulations as remarkable for their strictness as for their judicious adaptation to the wants and society of the place; and as he drew the whole *beau monde* to Bath, he was regarded as a public benefactor there. While in the plenitude of his power and popularity, Nash lived in the most splendid style, supporting his expenses by a long run of success at the gaming table. His dress was covered with expensive lace, and he wore a large white cocked hat. The chariot in which he rode was drawn by six grey

horses, and attended by a long retinue of servants, some on horses, others on foot, while his progress through the streets was made known by a band of French horns and other instruments. His common title was the *king of Bath*; and his reign continued, with undiminished splendour, for more than fifty years. His health then began to decline, and his resources grew less plentiful. As the change in his spirits and circumstances became more evident, his former acquaintances gradually forsook him, and he died, in comparative indigence and solitude, in 1761. His remains, however, were honoured with a splendid funeral, at the expense of the city; and an appropriate epitaph, written by Dr Harrington, is placed over his tomb in the abbey church.

NASH, **THOMAS**, a satirist and dramatic writer, was born at Lowestoft, in Suffolk, about 1564; educated at St John's College, Cambridge; and settled in London, where he died in 1601. He wrote three dramatic pieces; but was chiefly distinguished by the virulence and scurrility of his pamphlets against Gabriel Harvey and the puritan Fenry, who assumed the title of Martin Marprelate. His principal performance is "Pierce Penniless," published in 1599.

NASH, **TREADWAY RUSSEL**, an English divine and antiquary, was educated at Worcester College, Oxford, where he took his degree of D.D. in 1758. He was a man of fortune, and died at his seat in Worcestershire, in 1811, aged 87. Dr Nash published "Collections for a History of Worcestershire," 2 vols. folio; a splendid edition of Hudibras, 3 vols. 4to; and some papers in the *Archæologia*.

NASMITH, **DAVID**, a Scottish philanthropist, was born at Glasgow, in 1799. At the age of 22 he became secretary to the united benevolent societies of his native town, in which capacity he gained the knowledge and experience which were of so much value to him in his subsequent labours. His name will be remembered with honour as the originator of "City Missions," the first of which he succeeded in establishing at Glasgow, in 1826. After retiring from his secretaryship two years later he devoted himself exclusively to the propagation of his favourite views, and the establishment of town missions. Not only in his own country, but in Ireland, in the United States of North America, and in Canada, and at last in England, he carried on his chosen task with success. He founded the London City Mission, in 1835. Died at Guildford, November 17, 1839, and was buried in Bunhill Fields, London.

NASMYTH, **ALEXANDER**, a celebrated painter, whose talents gave so strong an impetus to the art in Scotland, that he is not undeservedly called the father of the Scottish school of landscape painting. He was a pupil of his countryman, Allan Ramsay, and studied for some time in Italy. He painted portraits at first, and one of his most valued works is the portrait of Robert Burns, now in the National Portrait Gallery. His landscapes are numerous and pleasing. He sometimes gave his advice in landscape gardening, and to that advice the Scottish nobility and gentry owe some of the finest of

by a long retinue of horses, others on foot, through the streets was of French horns and His common title was splendour, for more than with then began to decrease grew less plentiful his spirits and circumstances evident, his former activity forsook him, and he indigence and solitude, however, were honoured funeral, at the expense appropriate epitaph, is placed over his

ENDER, a celebrated dents gave so strong an in Scotland, that he is called the father of the landscape painting. He countryman, Allan Ram- some time in Italy. He t first, and one of his most portrait of Robert Burns, al Portrait Gallery. His merous and pleasing. He s advice in landscape gar- at advice the Scottish no- owe some of the finest of

their park scenery. It may likewise be added, that to his suggestions his native city, Edinburgh, owes not a few of the judicious changes made in her streets and buildings. Born, 1737; died, 1840.

NASMITH, PATRICK, or PETER, an eminent landscape painter, son of the preceding, was born in Edinburgh, in 1786. At the age of twenty he removed to London, where his talents soon attracted notice, and procured him the appellation of the English Hobbima. His works are deservedly in high repute, and there are few collections of importance in England which do not contain some of them. Two of his small landscapes, forming part of the Vernon Collection, are in the National Gallery. This artist used to paint with his left hand, his right having been injured in early life. Died, at Lambeth, in August, 1831.

NASSAU, MAURICE OF. [MAURICE.]

NATHAN, ISAAC, or MORDECAI, a learned Jewish rabbi, who, about the middle of the 15th century, published the first Hebrew concordance of the Old Testament. This work, with considerable additions, has been several times reprinted; but little or nothing is known of the personal history of its original author.

NAUDÉ, GABRIEL, a French physician and man of letters, was born at Paris, in 1600; studied medicine at Padua; and, after a considerable stay in Italy, returned to Paris, and became librarian to Cardinal Mazarin; but when that minister was banished, Naudé went to Sweden as librarian to Queen Christina. He was the author of "Bibliographia Politica," "An Apology for the Great Men who have been accused of Magic," a work on the Rosicrucians, &c. Died, 1653.

NAUDET, THOMAS CHARLES, a French landscape painter, born at Paris, in 1774; died, 1840. He left a collection of near three thousand designs, comprehending the most beautiful views, and the finest monuments of ancient and modern times on the continent.

NAUNTON, Sir ROBERT, an English statesman, was born in Suffolk, and educated at Cambridge. After having been employed on various diplomatic missions in Scotland and France, he returned to the university, and in 1601 was elected public orator, in which capacity he attracted the notice of James I., who made him master of the requests, surveror of the court of wards, and in 1618 secretary of state. His "Fragmenta Regalia" contains many curious particulars of the court of Queen Elizabeth.

NAVARETTA, FERNANDEZ, a Spanish missionary, who went to China in 1659, and was expelled at the time when the persecution there took place. He was afterwards consecrated archbishop of St Domingo, and died in 1689. He was author of an account of the political and religious condition of the Chinese.

NAVARRETE, MARTIN FERNANDEZ DE, a Spanish naval officer and learned historian, was born in 1765, and was admitted in his infancy into the order of St John of Jerusalem. At the age of 15 he entered the navy, and served in it nine years, when ill

health led to his retirement. He served again for a short time a few years inter, but in 1797 finally retired, accepting an office under the government at Madrid. He was afterwards hydrographer to the Admiralty, and member of the Spanish Academy, and the Academies of History and the Fine Arts. In 1831 he was created a peer. The work on which his reputation chiefly rests is the voluminous "Collection of Voyages and Maritime Discoveries made by the Spaniards since the close of the 15th Century." Navarrete, early known as a scholar, received the royal commission to form such a collection in 1789, and the first portion was published in 1825. The collection fills seven vols. 4to, and is of immense value as materials for history. Navarrete wrote also a full "Life of Cervantes," and a "Dissertation on the History of the Nautical and Mathematical Sciences in Spain," and commenced the important "Collection of Unpublished Documents for the History of Spain," which was continued by his collaborators after his death. This learned and hard-working investigator died at Madrid in 1844.

NAVY LOR, JAMES, a leader among the early Quakers, was born in 1616, at Ardesley, in Yorkshire. He served eight years in the parliamentary army, and on his return home, in 1651, became converted to Quakerism by the preaching of George Fox; though at a future period, in consequence of his extravagant conduct, the Society were led to disown him. Misled by imaginary inspiration, he soon distinguished himself among those of kindred sentiments, both in London and other places, until, in 1656, he was committed to Exeter goal, for propagating his opinions. On his release from imprisonment, he repaired to Bristol, where his followers formed a procession, and led him into that city in a manner which they intended to resemble the entrance of Christ into Jerusalem. He was declared guilty of blasphemy by parliament, and barbarously sentenced to a double whipping at different times, branding, boring of the tongue with a hot iron, and imprisonment and hard labour during pleasure. This atrocious sentence, though illegal, was fully inflicted upon the unhappy man, who, when the delirium of fanaticism was over, humbly acknowledged and lamented the delusion under which he had laboured; and died in 1660.

NEAL, DANIEL, an eminent dissenting divine, was born in London, in 1678, and was educated at the university of Utrecht. On his return he began to officiate as a preacher, and, in 1706, succeeded Dr Singleton as minister of a congregation in Aldersgate Street, in which office he continued for 36 years. Although assiduous as a minister, he found leisure for literary labours, and published, among other works, the well-known "History of the Puritans," 4 vols.; and a "History of New England," 2 vols. Died, at Bath, 1743.

NEANDER, JOHANN AUGUST WILHELM, one of the most distinguished ecclesiastical historians of modern times, was born at Göttingen, 1789. His parents were Jews.

They removed to Hamburg when their son was very young; and to the excellent institutions of that city he was indebted for great part of his education. In his 16th year he was converted to Christianity, and proceeded to study first at Halle and then at Göttingen, where he gained the reputation of great learning and piety, though struggling with an extremity of poverty which would have crushed a less ardent and heroic soul. After a short sojourn in Hamburg, he removed to Heidelberg in 1811, and occupied himself in writing his first work, "The Emperor Julian and his Age," which led to his appointment to a chair of theology in that university, in 1812. A few months afterwards he was nominated to the same chair in the then infant university of Berlin, where he had Marheinecke and Schleiermacher for his colleagues; and here he laboured assiduously for 38 years, with what results will be seen if we look at his works on many periods of church history, his pamphlets and monographs of every variety of subjects, his daily lectures on every conceivable theological topic, philosophy, doctrine, history, biblical criticism, or the numberless pupils in Germany, England, and America, whom he inspired with a portion of his own noble enthusiasm, and sent out as labourers in the same sacred field. With Neander, theology was not as it is with too many both at home and abroad, a mere profession. The purity of his daily life—his devotion to Christian labour—the self-denial which was his soul's habit—prove how sincerely he believed the truth of his favourite motto, that it is neither the profoundest learning, nor most vigorous intellect, nor most fervid eloquence, but "pectus est quod facit theologum."—It is the heart which makes the theologian." Died, July 14, 1850. The first volume of Neander's great work, the "History of the Christian Religion and Church," appeared in 1825; and the remaining volumes at intervals during the following twenty years. Of his other works we may name the "Life of Jesus," and "History of the Planting of the Church by the Apostles," both of which, like the Church History, are well-known through translations and highly esteemed.

NEARCHUS, one of the generals of Alexander the Great, who was employed in conducting his fleet from India by the ocean to the Persian Gulf. Fragments of a narrative by this early voyager are extant, and form a curious and valuable record.

NECKAM (NEQUAM), ALEXANDER, a learned monk, born at St Alban's, in 1157. He was foster-brother to Richard Cœur de Lion, being born the same day, and his mother being nurse also to the young prince. After being educated at the Abbey School of his native town, he became master of Dunstable School, and, soon after, 1180, was professor at the university of Paris. He entered the Augustine order, and became abbot of Cirencester. Neckam was well versed in the learning of his age, and was wise enough not to think too highly of it. He wrote a work, entitled "De Naturis Herum," which though of little value for the student of science, is interesting enough for its curious

stories, odd "guesses at truth," and the many bits of information it contains on mediæval life, manners, and opinions. Neckam also wrote a work in verse, entitled "De laudibus Divinæ Sapientinæ," which appears to be merely a paraphrase of the former. These two works were re-published, carefully edited by Mr Thomas Wright, in 1863. Died, 1217.

NECKER, JACQUES, the celebrated French statesman, minister of finance to Louis XVI., was the son of Charles Frederic Necker, professor of civil law at Geneva, and born there in 1732. At the age of 15 he was placed in a banking-house at Paris, after which he became partner with Theilsson, on whose death he established a house of his own, in conjunction with his brother and two others. Having distinguished himself by his treatise, entitled "Sur la Législation et le Commerce des Grains," and acquired great reputation as a financier, he was, in 1776, appointed director, and, soon after, comptroller-general of the royal treasury. Being refused admission into the council on the score of his religion, as he was a Calvinist, he threatened to resign his official situation. He was in consequence removed, and ordered to retire to his country-seat. After this he went to Switzerland, where he purchased the barony of Copet, and published his work, "Administration des Finances de la France," 3 vols. 8vo, of which 50,000 copies were sold in a few days. He was recalled in 1788, as comptroller-general, when his convictions led him to support the convocation of the states-general, which was the wish of the nation. He was also in favour of the double representation of the third estate. When the government determined to take measures against the increasing troubles, Necker, who opposed the adoption of those measures, was dismissed, and ordered to leave the kingdom within 24 hours. No sooner was his removal known, than all Paris was in a ferment. The storming of the Bastille followed, and the symptoms of popular violence became so alarming, that the king found himself compelled to recall the banished minister. Necker's return to Paris resembled a triumphal procession: yet such is the uncertain tenure of popularity, that he soon became as much an object of antipathy to the people as he had been of their idolatry, and in 1790 he left France for ever. He died at Copet, in Switzerland, in 1804. Madame de Stael was the daughter of Necker.

NECKER, SUSANNE, wife of the preceding, and whose maiden name was Churchod, was the daughter of a clergyman in the canton of Berne, and in her youth was the object of the attachment of Gibbon the historian. She received an excellent education; nor was her heart less carefully cultivated than her mind; and, on her husband's elevation, she made use of his influence and fortune only for purposes of benevolence. She erected an hospital in the neighbourhood of Paris, at her own expense, and devoted to it her personal care. She wrote "Reflections on Divorce," and other works. Died, 1796.

[NEE]

man Catholic divine and natural philoso-
pher, was born in London, in 1713, and
educated at Douay, where he entered into
orders. He died rector of the Academy of
Sciencæ at Brussels, in 1781. He was F.R.S.,
London, and associate of the French Aca-
demy of Sciences. He made himself known
as an author by "New Enquiries upon Mi-
croscopical Discoveries, and the Generation
of Organised Bodies," "Enquiries concern-
ing Nature and Religion," &c. He also con-
tributed some microscopical observations to
Buffon's Natural History.

NEEDHAM, MARCHMONT, an active par-
tisan and political writer, was born at Bur-
ford, in Oxfordshire, in 1620, and educated
at All Souls' College, Oxford. During the
civil war he distinguished himself by his
political writings first against the parliament
and afterwards against the king, so that at
the Restoration he obtained his pardon with
difficulty. He conducted periodical journals,
somewhat in the manner of newspapers, the
titles of which were, Mercurius Britannicus,
Mercurius Pragmaticus, and Mercurius
Politicus. The last, after being continued
for eleven years, was suppressed in 1660.
When politics no longer afforded him em-
ployment, he practised as a physician. He
published a singular book, entitled "Medela
Medicæ." Died, 1678.

NEEFS, PETER, the elder, a painter of
architectural subjects, was born at Antwerp,
in 1570, and died in 1631. He studied under
Heary Steenwyck, and his favourite subjects
were views of the interior of churches, con-
vents, palaces, &c.—His son, known as young
Neefs, followed the same branch of art as his
father, but was inferior to him.

NEELE, HENRY, poet and miscellaneous
writer, born in 1795, was the son of an en-
graver in the Strand, and was educated for
the profession of an attorney, which he prac-
tised with reputation in the metropolis till
his death. He was a young man of amiable
disposition and inoffensive manners, and
had a decided taste for literary pursuits; but
his intense application to study produced a
fit of insanity, and he put an end to his ex-
istence, February 7, 1828. He was the author
of "Poems," "Dramatic Scenes," the "Ro-
mance of History," 3 vols.; and "Literary
Remains," published after his decease.

NEER, AART, or ARTHUR VAN DER, na-
tural painter, was born about 1619. He
excelled in painting coast scenery, fisher-
men's huts, and moonlight scenes. Died,
after 1690. The National Gallery has a fine
"Canal Scene" and two other works of this
artist.—His son, ELOM HENDRICK, was an
historical and portrait painter. Born, 1643;
died, 1703.

NELSON, HORATIO, Viscount, duke of
BRONTE, &c., England's greatest naval hero,
was the fourth son of Edmund Nelson, rector
of Burnham Thorpe, in Norfolk, and born
here, Sept. 29, 1758. He was educated first
at Norwich, and next at North Walsham;
but in his 12th year he became a midshipman
under his uncle, Captain Suckling, of the
Reasonable. Soon after this he sailed to the
West Indies in a merchant ship, and on his
return was admitted on board the Carracass,
one of the vessels sent on an expedition to

the North Pole, under the orders of Captain
Phipps. He went next to the East Indies.
In 1777 he obtained the rank of lieutenant,
and in 1779 that of post-captain, when he
was appointed to the command of the Hin-
dembroke, in which ship he sailed to the
West Indies, where he distinguished himself
in an enterprise on the Spanish main. After
the peace of 1783, he commanded the Boreas
frigate, stationed for the protection of trade
at the Leeward Islands, and while there he
married Mrs Nesbit, the widow of a physi-
cian. At the commencement of the war with
France he was nominated to the Agamemnon
of 64 guns, on board of which he sailed to
the Mediterranean, and was at the taking of
Toulon. He was also present at the siege of
Mastia, where he served at the batteries with
a body of seamen, as he afterwards did at
Calvi; and while employed before that place
he is said to have lost an eye. (A remark-
able narrative has lately appeared in the
Gentleman's Magazine, quoted from a foreign
journal, according to which Nelson lost his
eye in an attack on Fort San Carlos, on the
San Juan de Niearagna, about 1780.) While
before Calvi his intrepidity and incessant
activity were such that his name was dreaded
throughout the shores of the Mediterranean.
He was with Admiral Hotham in the action
with the French fleet, March 15, 1795; and
the same year he took the Island of Elba. In 1796
he was appointed commodore on board La
Minerve, in which frigate he captured La
Sabine, a forty-gun ship. Soon after this he
descended the Spanish fleet, and steered with
the intelligence to Sir John Jervis, off St
Vincent. He had scarcely communicated the
news, and shifted his flag on board the Cap-
tain of 74 guns, when the enemy were in
sight. A close action ensued, which termi-
nated in a complete victory on the side of the
British, although inferior in numbers. On
this occasion Commodore Nelson attacked the
Santissima Trinidad of 136 guns. He
afterwards boarded and took the San Nico-
las of 80 guns, from whence he proceeded in
the same manner to the San Joseph of 112
guns; both of which surrendered to him.
For his share in this glorious victory, the
commodore was honoured with the order of
the Bath; and having soon afterwards hoisted
his flag as rear-admiral of the line, he was
appointed to command the inner squadron
at the blockade of Cadiz. He there made a
bold but unsuccessful attempt to bombard
the city, heading the attack himself. The
next exploit in which he was engaged was
an attempt to take possession of Teneriffe,
which design also failed, and Nelson lost his
right arm by a cannon-shot, and escaped
with life by the devotion of his stepson, Cap-
tain Nesbit, who carried him off on his back
to a boat, after lying senseless and exhausted
for several hours. In 1798, he rejoined Earl
St Vincent, who sent him up the Mediter-
ranean, to watch the progress of the arma-
ment at Toulon, destined for the conveyance
of Buonaparte and his army to Egypt. Not-
withstanding the strictest vigilance, this
fleet found means to escape, but was followed
by Nelson, and, after various disappoint-
ments, traced to the bay of Aboukir. Here
he commenced an immediate attack, and by

a manœuvre of equal boldness and ability, sailed between the enemy and the land, though exposed to a double fire. The result was a victory so glorious and decisive, that all the French vessels, with the exception of two men of war and two frigates, were taken or destroyed. This achievement was rewarded with the title of Baron Nelson of the Nile, and an additional pension of £2000 besides the estate and dukedom of Bronte in Sicily, and high honours conferred by the Turkish sultan. Soon after this he sailed for Sicily, and from thence to Naples, where he quelled a rebellion and restored the king. Having performed these and other important services, Lord Nelson returned to England, and was received with enthusiastic joy.—And here we are compelled to record the fact, that during the admiral's stay at Naples, he fell under the fascination of Lady Hamilton, the wife of the English ambassador, allowed her to exercise a most pernicious influence over him; that he lived publicly with her after the death of her husband; and, as a natural consequence, that it produced a separation between him and Lady Nelson on his return.—But to resume our narrative of his naval glories. A confederacy of the northern powers having alarmed the government, he was employed to dissolve it. A fleet was fitted out in 1801, the command of which was given to Admiral Sir Hyde Parker, assisted by Lord Nelson. On their arrival off the Cattegat, and being refused a passage, Lord Nelson offered his services for conducting the attack on the Danish force, which was stationed to oppose an entrance. This being accepted, he shifted his flag to the Elephant, and passed the Sound with little loss. On the 2nd of April, the action commenced at ten o'clock, and after a sharp conflict, seventeen sail of the Danes were sunk, burnt, or taken. A negotiation was then entered into between his lordship and the crown prince, in consequence of which the admiral went ashore, and an armistice was settled. He next obtained from the Swedish government an order for taking off the embargo on English ships in the Baltic. Having accomplished these great objects, he returned to England, and was created a viscount. In August, 1801, he bombarded the enemy's flotilla of gun-boats at Boulogne, but without any material effect. A treaty being suddenly concluded, Nelson retired to his seat at Merton, in Surrey, but hostilities recommencing, he sailed for the Mediterranean, and in March, 1803, took the command of that station on board the Victory. Notwithstanding all his vigilance, the French fleet escaped from Toulon, and was joined by that of Cadiz, of which being apprized, he pursued them to the West Indies with a far inferior force. The combined squadrons, however, struck with terror, returned without effecting anything, and after a partial action with Sir Robert Calder, off Ferrol, re-entered Cadiz. Admiral Nelson returned to England, but soon set sail to join his fleet off Cadiz. The French, under Admiral Villeneuve, and the Spaniards, under Gravina, ventured out with a number of troops on board, Oct. 19, 1805, and on the 21st, about noon, the action began off Cape Trafalgar.

Lord Nelson ordered his ship, the Victory, to be carried alongside his old antagonist, the Santissima Trinidad, where he was exposed to a severe fire of musketry, and not taking the precaution to cover his coat, which was decorated with his star and other badges of distinction, he became an object for the riflemen placed purposely in the tops of the Buccentaur, which lay on his quarter. In the middle of the engagement, a musket-ball struck him on the left shoulder, and passing through the spine, lodged in the muscles of his back. He lived just long enough to be acquainted with the number of ships that had been captured, and his last words were, "I have done my duty, I praise God for it!" The signal which he hoisted on commencing this action, was—"England expects that every man will do his duty!"—a sentence that testified the pure Spartan love of country which animated his own breast. His remains were brought to this country, and buried with unprecedented honours in St Paul's cathedral, where a suitable monument was erected to his memory. There is a popular "Life of Nelson" by Southey. A portrait, painted at Vienna in 1800, is now in the National Collection. The "Death of Nelson" is the subject of one of the magnificent wall paintings by Mr Macleise in the Royal Gallery, Westminster Palace.—His brother, WILLIAM, D.D., &c., succeeded to the titles and honours enjoyed by the Hero of Trafalgar. His death occurred on the 28th of Feb. 1835, in the 78th year of his age. The titles, &c., descended to Thomas Bolton, of Wells, Norfolk, who was the son of Thomas Bolton, and Susannah (eldest child of Edmund Nelson, father of the admiral); but he dying, in his 50th year, in the November following, they descended to his son Horatio, born in 1823, and grand-nephew in the female line to the naval hero.

NELSON, ROBERT, a pious and learned writer, was born in London, in 1656; and received his education at St Paul's School, and at Trinity College, Cambridge. He was strongly attached to James II., and he continued to communicate with the nonjurors till the death of Bishop Lloyd, when he returned to the established church. He lived on terms of intimacy with Archbishop Tillotson, and was the zealous promoter of all works of charity, having the ability as well as the disposition to give what true benevolence prompted. He was the author of many popular works; among which are, "The Practice of True Devotion," "A Companion to the Festivals and Fasts of the Church of England," "The Whole Duty of a Christian," "The Great Duty of Frequenting the Christian Sacrifice," &c. Died, 1711.

NEPOS, CORNELIUS, a Roman historian, who lived in the last years of the republic, and died in the reign of Augustus. He was the friend and correspondent of Cicero, and of other eminent men, and wrote several historical and biographical works which are now lost. It is not known whether Nepos was author of the "Vita Excellentium Imperatorum," which has usually passed under his name. It is now thought to be probably an abridgment by another hand of an original work by Nepos.

NERI, ST PHILIP DE, founder of the congregation of the Oratory in Italy, was born, in 1515, of a noble family at Florence, and died at Rome in 1595. His order obtained its name from the place of its original establishment which was an oratory of St Jerome's church at Rome.

NERO, LUCIUS DOMITIUS, called after his adoption **CLAUDIUS DRUSUS**, Roman emperor, was the son of Cneius Domitius Aheperor, and of Agrippina, daughter of nobarbus, and of Agrippina, daughter of Germanicus. He was born A. D. 37; had the philosopher Seneca for his teacher; was adopted by Claudius, A. D. 50, and four years after succeeded him on the throne. At the commencement of his reign his conduct excited great hopes in the Romans; he appeared just, liberal, affable, and polished; but this was a mask which soon fell off. He caused his mother to be assassinated, and vindicated the unnatural act to the senate on the ground that Agrippina had plotted against him. He divorced his wife, and led a most shameless and abandoned life. In 64 Rome was burnt, and popular suspicion pointed to Nero as the author of the conflagration. He charged the Christians with it, and commenced a dreadful persecution of them. His cruelties, extravagance, and debauchery at length roused the public resentment. Piso formed a conspiracy against the tyrant, but it was discovered and defeated. That of Galba, however, proved more successful; and Nero, being abandoned by his flatterers, put an end to his existence, A. D. 68.

NERVA, MARCUS COCCEIUS, Roman emperor, who succeeded Domitian, A. D. 96, at the age of 64; and died after a reign of two years, during which his virtues did honour to the throne.

NESSÉLRODE, CARL ROBERT, Count von, a celebrated Russian statesman and diplomatist, born at Lisbon in 1770 or 1780. He early entered the diplomatic service, in which his father was also engaged, and after various subordinate employments, was made councillor of the Russian embassy at Paris in 1807. He became a great favourite with Napoleon, succeeded in detaching Russia from the Austrian alliance, and was present at the important conferences between the Emperors Napoleon and Alexander at Erfurt in 1808. He gained immense influence over Alexander's mind, was made chancellor of the empire, and dictated his foreign policy, followed him to France in 1814, and signed the Quadruple Alliance, took part in the Congress of Vienna, and in the dismemberment of Poland. At that congress Nesselrode shared with Metternich and Talleyrand the chief direction of affairs; and while his master sat at the feet of the mystic Madame Krudener, he managed to make her his instrument. He was the chief contriver of the "Holy Alliance," which made Russia virtually supreme in Europe, and Nesselrode supreme in Russia. The count took a leading part at the Congresses of Aix-la-Chapelle in 1818, and of Verona in 1822. Nesselrode's influence was considerably lessened under the Emperor Nicholas, and he long strove to avert the threatened war with the western powers, which broke out in 1855. After the

accession of Alexander II. Count Nesselrode retired from his office of chancellor of the Russian empire, and died at St Petersburg March 23, 1862.

NESTORIUS, a celebrated patriarch of Constantinople, from whom originated the sect of Nestorians, was born in Syria, in the 5th century. On entering into the priesthood he became so popular for his eloquence, that Theodosius nominated him, in 429, to the archbishopric of Constantinople; in which station he displayed great zeal against the Arians and Novatians. He at length fell under censure himself for affirming that the Virgin Mary is not the mother of God; for which he was condemned in the council of Ephesus, deprived of his see, and banished. He died before 431, but his followers continue to be numerous in the East, and are organized under a patriarch.

NEISCHER, CASPAR, a celebrated painter, was born at Heidelberg, in 1639. Being left destitute by his father, he was taken under the protection of a physician at Arnheim, who, perceiving his genius, placed him with an artist named Terburg. His subjects are conversation pieces and portraits; the velvet and satin draperies are exquisitely managed, and the whole finished with neatness and brilliancy. He died in 1684.—His sons, **THEODORE** and **CONSTANTINE**, were both good portrait painters. The first died in 1732, and his brother in 1722.

NEUHOFF, THEODORE STEPHEN, Baron von, the son of a Westphalian noble, was born at Metz, about 1690. While a student at Cologne, he killed a young man of rank in a duel, and fled to the Hague. But through the mediation of the Spanish minister he received a lieutenancy in a Spanish regiment destined to serve against the Moors in Africa, and, on account of his good behaviour, was promoted to a captaincy. When the Corsicans, after several unsuccessful attempts to free themselves from the oppressions of Genoa, resolved, in 1755, to form a government of their own, Neuhoff was crowned king, had silver and copper coins struck, and established an order of knighthood, under the name of the order of deliverance. He, however, could not maintain himself against the Genoese and a Corsican opposition. He fled to England. Here his Dutch creditors pursued him, and being arrested, he became a prisoner in the King's Bench for some years. His liberation was at length, however, effected, through the instrumentality of Horace Walpole; but he died soon after, in 1756.

NEUMANN, CASPAR, an eminent German chemist of the 18th century. After pursuing his studies with ardour, and travelling for improvement through England, France, and Italy, he was nominated professor of chemistry at the royal college of Berlin. His works, which at the time were important, were translated into English. Died, 1737.

NEVERS, LOUIS DE GONZAGA, Duke of, was a distinguished French military commander, was son of Frederick II., duke of Mantua, and was born about 1539. Brought up at the court of France, he was captured by the Spaniards at the battle of St Quentin, and in 1565 became duke of Nevers by marriage

with the heiress of that duchy. He took part in the civil war against the Protestants, distinguishing himself at the sieges of Mâcon and Rochelle, and in 1588 took several towns in Poitou. He espoused the cause of Henry IV., and joined him with a troop of gentlemen at the battle of Ivry. Henry sent him ambassador to Rome to negotiate his reconciliation with the holy see, but the pope refused him an audience. He was then made governor of Champagne, and died at Nesle in 1595.

NEVILLE, or NEVILLE, HENRY, a republican writer, was born in Berkshire, in 1620, and educated at Merton College, Oxford. In the rebellion he took the side of parliament, and was elected a member of the council of state; but on the establishment of the Protectorate of Cromwell he gave up his seat. He died in 1694. He published Machiavelli's works, and a piece entitled "Plato Redivivus, or a Dialogue concerning Government."

NEVILLE, RICHARD. [WARWICK, Earl of.]

NEWCASTLE. [CAVENDISH.]

NEWCASTLE, THOMAS HOLLES PELHAM, Duke of, prime minister of England, was eldest son of Sir Thomas Pelham, and was born in 1693. He inherited immense wealth both from his uncle, the duke of Newcastle, and from his father, and became a great favourite with George I. He was educated at Cambridge, married the daughter of the earl of Godolphin, and was made in 1717 a privy-councillor, and the next year Knight of the Garter. He signed the treaty of alliance between the king of England, the king of France, and the emperor in 1718; and was one of the lord's justices charged with the administration of the kingdom during the absence of the king. In 1724 he was named one of the secretaries of state, and on the death of his brother, Henry Pelham, in 1734, was named first lord of the treasury. His ambition was equalled by his vanity and his incompetence; instead of statesmanship there were miserable intrigues; Port-Mahon was lost to the French, and Admiral Byng failed to recover it; the admiral was sacrificed to the popular indignation, and Newcastle had to resign in November, 1756. In the following year he again took office, Pitt being secretary of state with the chief power, and on the appointment of Lord Bute in 1762 he again resigned. He was afterwards for a short time keeper of the privy seal, and died in November, 1768.

NEWCASTLE, HENRY PELHAM FIENNES PELHAM CLINTON, Duke of, the son of the third duke, by the fifth daughter of the second earl of Harrington, was born on the 30th January, 1785, and succeeded to the family honours as the fourth duke on the death of his father in 1795. At an early age he was sent to Eton, where he remained for seven years. After having attained the distinctions of that celebrated school, he accompanied some members of his family to the continent, where, in consequence of the war, he, with his relatives, was detained a prisoner for some years. Although his name is associated with the great era of reform, as

the boldest and most consistent opponent of that measure—and although he will be remembered as a prominent sufferer amongst those whose firm hostility to concession drew upon them the extremes of the popular wrath—his life, in the main, was one of domestic privacy and retirement; his political feelings more frequently finding expression in published letters to his friends, with occasional addresses to the community, than in the arena of parliament. As lieutenant of Nottinghamshire, he refused to insert the name of a gentleman in the commission of the peace on account of his not being a member of the established church. Lord Cottenham, then lord chancellor, remonstrated with the duke, who however replied by a stern refusal and a warm avowal of his reasons; and the result was his removal from the lord-lyingutenancy. In which post he was succeeded by the earl of Scarborough. Died, 1851.

NEWCASTLE, HENRY PELHAM FIENNES PELHAM CLINTON, fifth duke of, was born in London in 1811. He was educated at Eton and Oxford, having among his university friends Sidney Herbert (Lord Herbert) and Mr Gladstone. He entered parliament as member for South Nottinghamshire in 1832, joining the new conservative party under Sir Robert Peel. In 1831 Lord Lincoln (the title by which he was then known) held for a short time the office of a lord of the treasury, and in 1841 was named by Sir Robert Peel First Commissioner of Woods and Forests. This post he held till January, 1846, when he was appointed chief secretary for Ireland. In consequence of his altered political opinions, especially his adoption of the principle of free trade, he lost his seat for Nottinghamshire a month later, but was soon after elected by the Falkirk boroughs. He succeeded to the dukedom in 1851, and two years later was appointed secretary of state for the colonies, in the Aberdeen administration. On the breaking out of the Crimean war he was charged with the arduous duties of head of the war department, and notwithstanding his anxious and unceasing endeavours to secure a good working of the department, he was severely attacked and blamed for the serious failures and blunders that occurred. He resigned the office to Lord Panmure in 1855, and then visited the Crimea. The duke of Newcastle was again appointed colonial secretary in 1859, and discharged the duties of that office till April, 1861, when failing health compelled him to retire. He accompanied the prince of Wales on his tour through Canada and the United States in 1860, and during his last illness was visited by the queen and the prince of Wales. Died at Clumber Park, October 18, 1861. The duke married, in 1832, the only daughter of the duke of Hamilton, by whom he had five children. But the marriage was unhappy, and ended in a divorce.

NEWGOME, WILLIAM, archbishop of Armagh, a learned and exemplary prelate, was born, in 1729, at Barton le Clay, in Bedfordshire. He completed his studies at Pembroke College, Oxford; was successively bishop of Dromore, Ossory, and Waterford;

STAM, archbishop of
and exemplary prelate,
Barton le Clay, in Bed-
ted his studies at Pen-
ford; was successively
cesory, and Waterford;

was raised to the archbishopric of Armagh, in 1795, and died in 1800. His principal works are, "A Harmony of the Gospels," "An Historical View of the English Biblical Translations," and "Attempts towards an improved Version of Ezekiel and the Minor Prophets."

NEWCOMEN, THOMAS, a locksmith at Dartmouth, in Devonshire, who, towards the close of the 17th century, engaged in scientific researches, and to whom belongs the merit of the first great improvement in steam-engines by forming a vacuum under the piston, after it had been raised by the expansive force of the elastic vapour, and thus bringing into action the atmospheric pressure.

NEWDIGATE, Sir ROGER, bart., a munificent patron of learning, was born at Arbury, in Warwickshire, in 1719. He was first placed in Westminster School, whence he removed to Oxford, as a gentleman commoner of University College. He represented the university in parliament for many years, was a liberal benefactor to it, and bequeathed the sum of £1000 to furnish an annual prize for the best English poem on some subject connected with the fine arts, to be written by an under-graduate. Died, 1806.

NEWPORT, GEORGE, comparative anatomist and entomologist, was born in 1803. After filling the post of keeper of the Canterbury Museum of Natural History, he studied medicine, but he devoted his time and attention subsequently to his favourite sciences, and did not practise as a surgeon. He was chosen F.R.S. and F.L.S., became a member of the councils of both of those learned bodies, and contributed many memoirs, containing the important fruits of his researches, to the "Transactions." He was also a member of the Entomological Society, and was twice chosen president. Among the subjects of his investigations, are—the temperature and respiration of insects; the structure of their nervous system; the production of hums, and the development of ova in different species of animals. Died in 1854, having enjoyed for some years a government pension of £100.

NEWTON, Mrs CHARLES THOMAS (ANN MARY SEVERN), an accomplished English artist, was born in 1832. She was the daughter of the painter, Joseph Severn, the friend of John Keats, and displaying remarkable taste and skill in drawing, at an early age was placed under the instruction of Mr George Richmond. She distinguished herself especially in portrait and figure drawing, and by her copies in water-colour from the works of the old masters. In 1861 she married Mr C. T. Newton, superintendent of Greek and Roman antiquities at the British Museum, and became the enthusiastic and devoted companion of his labours. She executed many admirable drawings from sculptures and vase-paintings in the Museum, and also from the sculptures discovered by Mr Newton at Budrum and Cnidus. Her figures of " Elaine " and " Sebaste "—a mystical Christ child, from life, attracted great admiration. For her charming simplicity of character and grace of manner she was warmly beloved as for her singular intelli-

gence and artistic power she was admired and praised. Two of her latest sketches, a "Levantine Lady," and a "Jewess of Smyrna," were exhibited at the Dudley Gallery in Feb., 1866. Died at London; 2nd January, 1866. Mrs Newton's two brothers, Mr Walter and Mr Arthur Severn, are also well-known artists.

NEWTON, GILBERT STUART, a painter of considerable merit, was born at Halifax, Nova Scotia, in 1794; visited Italy, about 1820; and on his return to England, entered himself a student of the Royal Academy. He confined himself chiefly to small pictures, and illustrated many subjects in the "Annals," and other elegant publications, in a highly creditable manner. His female figures are strikingly expressive of innocence as well as beauty. Died, 1835.

NEWTON, Sir ISAAC, the most distinguished natural philosopher, mathematician, and astronomer of modern times, was born at Woolsthorpe, in Lincolnshire, on Christmas-day, 1642. Losing his father in his childhood, the care of him devolved on his mother, who gave him an excellent education. In 1654 he was sent to Grantham School, and at the age of 18 removed to Trinity College, Cambridge, where he had the learned Isaac Barrow for his tutor. After going through Euclid's Elements, he proceeded to the study of Descartes' Geometry, with Oughtred's Clavius and Kepler's Optics, in all of which he made marginal notes. It was in this early course that he invented the method of fluxions, which he afterwards brought to perfection, though his claim to the discovery was unjustly contested by Leibnitz. At the age of 22 Newton took his degree of bachelor of arts, and about the same time he applied himself to the grinding of object glasses for telescopes; and having procured a glass prism in order to investigate the phenomena of colours discovered by Grimaldi, the result of his observations was his new theory of light and colours. It was not long after this, that he made his grand discovery of the law of gravitation; but it was not till 1687 that the Newtonian system was first published in his great work, the "Philosophiæ Naturalis Principia Mathematica." On his return to the university, in 1667, he was chosen fellow of his college, and took his degree of master of arts. Two years afterwards he succeeded Dr Barrow in the mathematical professorship, on which occasion he read a course of optical lectures in Latin. He had not finished them in 1671, when he was chosen fellow of the Royal Society, to which learned body he communicated his theory of light and colours, with an account of a new telescope invented by him, and other interesting papers. When the privileges of the university of Cambridge were attacked by James II., Newton was appointed to appear as one of the delegates in the high commission court. He was next chosen a member of the convention parliament, in which he sat till it was dissolved. In 1696 he was made warden of the mint, and afterwards master; which place he held with the greatest honour till his death. On his last promotion he nominated Mr Whiston to fill his

chair at Cambridge, assigning to him the profits of the place, and resigned it entirely to him in 1703. During the same year he was chosen president of the Royal Society, in which station he continued 25 years. He was also a member of the Academy of Sciences at Paris, having been chosen in 1699. In 1704 he published his treatise on "Optics;" but the whole merit of this extraordinary work was not at first appreciated. In 1705 he received the honour of knighthood from Queen Anne; and he died, March 20, 1727. On the 28th his body lay in state in the Jerusalem chamber, from whence it was conveyed to Westminster Abbey, the pall being borne by the lord chancellor, two dukes, and three earls. A monument was afterwards erected to his memory; and his statue, by Roubilliac, has been placed in Trinity College, Cambridge. He enjoyed his faculties to the close of his long life. His temper, also, was remarkably even, and he had the humility which always accompanies real greatness. The common estimate, however, of his almost superhuman calmness and freedom from self-love, is contradicted by the stories of his dispute with Leibnitz, and his unjust treatment of Flamsteed. Newton was not only a philosopher, but a Christian, and spent much of his time in elucidating the sacred Scriptures. When his friends expressed their admiration of his discoveries, he said, "To myself I seem to have been as a child playing on the sea-shore, while the immense ocean of truth lay unexplored before me." The following is Pope's well-known epitaph on this prince of philosophers:—

"Isaacus Newton hic jacet,
Quem immortalæ cœli, natura,
Tempus ostendunt,
Mortalem hoc unarmor fatetur.

Nature and all her works lay hid in night;
God said, Let Newton be,—and all was light."

The fullest account of Newton is to be found in Sir D. Browster's "Memoirs of the Life, Writings, and Discoveries of Sir Isaac Newton," published in 1835.

NEWTON, JOHN, a church of England divine, was born in London in 1725. He did not enjoy the advantages of a regular education, having been bred to the sea under his father, who was master of a merchant vessel. Afterwards he sailed in the Guinea trade, and led a very irregular life for some years; but at last he grew both serious and studious. By indefatigable diligence he attained a knowledge of the Latin and Greek languages, and in 1764 was ordained to the curacy of Olney, in Buckinghamshire, where he became intimately acquainted with Cowper the poet, conjointly with whom he produced the "Olney Hymns." In 1779, Mr Newton obtained the rectory of St Mary Woolnoth, London, which he held till his death in 1807. He was the author of several works, among which are a "Review of Ecclesiastical History," "Cardiphonia, or the Utterance of the Heart," "The Messiah, a Series of Discourses," &c., forming altogether 6 vols. 8vo.

NEWTON, THOMAS, an English prelate,

was born at Lichfield in 1704. After finishing his education at Westminster, he was elected to Trinity College, Cambridge, where he obtained a fellowship, and in 1744 he was presented to the rectory of St Mary-le-Bow, Cheapside. In 1749 he published an edition of Milton's Paradise Lost, with Notes, and the Life of the Author; which was followed by the "Paradise Regained," in a similar form. But his reputation rests on his "Dissertations on the Prophecies," completed in 1758. He was made a prebendary of Westminster in 1757, and soon after precentor of York; both which preferments he resigned in 1761, on his promotion to the see of Bristol. In 1768 he was made dean of St Paul's, and died in 1782.

NEY, MICHAEL, duke of Eichingen and prince of the Moskwa, peer and marshal of France, and one of her greatest military heroes, was born at Sarre-Louis, in 1769. His early years were devoted to the study of the law, but disliking the confinement, he entered the army, as a private hussar, in 1787. His intrepid courage rendered him distinguished in the first years of the revolutionary war, when serving with the army of the Rhine, and in 1796 he rose to the rank of brigadier-general. On his marriage with Mlle Angulé, the friend of Hortense de Beauharnois, Napoleon presented him with a magnificent Egyptian sabre, and named him his envoy and minister plenipotentiary to the Helvetic republic; but in 1803 he was recalled to take the command of the army intended to make a descent upon England. In the following year, when Napoleon received the title of emperor, he resolved on restoring titles and decorations. Ney was then created a marshal, and also received other distinctions, whilst he was with one accord denominated by the army, "the bravest of the brave." After a succession of victories, during which Ney never relaxed in his exertions, he obtained the additional title of prince of the Moskwa; and in June, 1814, he was invested with the dignity of a peer of France. He retired to his seat in the country, from which he was recalled in March, 1815, by information that Napoleon had quitted Elba. Hitherto one motive alone, the love of country, impelled his every action; personal or family interest had never appeared throughout his conduct; he would have considered a bare attempt at deception degrading. He thought the return of Napoleon would prove injurious to France, and maintained that the mischief ought to be prevented. On taking leave of Louis XVIII. he therefore made many protestations of his zeal and fidelity to the king, and expressed his determination to stay the progress of the invader. Arrived at Besançon, the marshal found the whole country hastening to meet the returning emperor; at Lyons the Dukes d'Artois and d'Orleans acknowledged the fruitlessness of resistance; the troops which he commanded shared the delirium, and Ney himself yielded his opinion, and went over with his army to his former friend and master. He again fought under his banner at the battle of Waterloo, where he had five horses killed under him, and his cloak was perforated with balls. After the conclusion

tioned himself in front of the palace, where those regiments who were faithful to him were drawn up *vis-à-vis* to the revolted. The governor of St Petersburg, the veteran Milaradovitch, and the metropolitan archbishop, having in vain implored them to give way, the Czar ordered the regiments which were faithful to him to fire. Still, however, the rebels continued firm, till a shower of grape from the cannon with which the palace was defended fell upon them, and at the tenth round of this tremendous firing they gave way. Seven hundred were taken prisoners at first; of these seven suffered death, while numbers were sent to Siberia. Colonel Pestal was among the chiefs of the conspiracy. A solemn thanksgiving was offered up in the church of the admiralty for deliverance from this conspiracy, and two months after the day of thanksgiving the emperor and empress were crowned with extraordinary pomp at Moscow. From the moment of the accession of Nicholas I. he resumed that policy for the advancement of the power of Russia which had been commenced by Peter the Great, and carried on by all his successors. But the various wars and negotiations into which he entered belong more to history than to biography; and we shall here only state that throughout his reign the under current of Russian intervention in the affairs of Turkey may constantly be traced until in 1853 it occasioned the Crimean war and the fall of Sebastopol. The death of the emperor took place in March, 1855, during the progress of the siege, which did not end till the following September. Nicholas possessed some rare qualities adapting him for the station he filled. A frame which seemed insensible to fatigue, and a mind of nearly equal vigour, enabled him to support the labour of not merely reigning over, but of governing, his almost boundless dominions, and to the task of maintaining strict military order throughout his empire, and of devising and maturing designs for extending its limits, he devoted his life. His country had the first claim upon his time, his thoughts, and his actions. He committed many crimes, but none merely selfish. Under whatever mistaken views of policy and duty, those crimes would seem to have been committed for the sake less of himself than of his nation. Died March 2, 1855.

NICHOLS, FRANK, M.D., F.R.S., an eminent English physician, was born, in London, in 1699. He was educated at Westminster School, whence he removed to Christchurch, Oxford, where he took his degrees, and became reader of anatomy. On leaving the university he settled in London, and in 1743 he married a daughter of Dr Mead. He succeeded Sir Hans Sloane as physician to George II., an account of whose death he published in the Philosophical Transactions. Died, 1779. His works are, "De Anima Medica," "De Mortu Cordis et Sanguinis," &c., and a tract against man-midwifery.

NICHOLS, JOHN, printer, antiquary, and miscellaneous writer, who for nearly half a century conducted the Gentleman's Magazine, was born at Islington in 1745. Having

received a liberal education, he became apprentice, at an early age, to Bowyer, the learned printer, and was subsequently admitted into partnership with his master, on whose death he succeeded to the management of one of the first typographical establishments in London. Among his numerous publications are, "The History and Antiquities of Leicestershire," "Anecdotes of William Bowyer," "Literary Anecdotes of the Eighteenth Century," 9 vols., "Illustrations of the Literature of the Eighteenth Century," 6 vols. His personal exertions as well as his pen were frequently used to promote charitable purposes, and he had sometimes the gratification of being able to assist the indigent sons of genius in his office of registrar of the Literary Fund. Died, 1828.

NICHOLS, JOHN BOWYER, an eminent printer and antiquary, son of the preceding, was born at London in 1779. He was educated at St Paul's School, and joined his father in business in 1796. He assisted him in the editorship of the "Gentleman's Magazine," became proprietor of it in 1833, and transferred it to J. H. Parker, of Oxford, in 1856. Mr Nichols was one of the printers of the votes and proceedings of the House of Commons, printer to the corporation of London, master of the Stationers' Company, and one of the registrars of the Royal Literary Fund. He was chosen F.R.S. in 1812, F.S.A. in 1818, and became printer to the Society of Antiquaries in 1821. Some of the most magnificent works of County History were printed at his press; among them, Ormerod's History of Cheshire, Hoare's History of South Wiltshire, and Surtees's History of Durham. Among his own literary works are, "A brief Account of the Guildhall of the City of London," "Anecdotes of William Hogarth, with Essays and Criticisms, and a Catalogue of his Works," "Historical Notices of Fonthill Abbey," &c. He also completed his father's "Illustrations of the Literary History of the 18th Century." Died at Ealing, Middlesex, 19th October, 1863.

NICHOLSON, WILLIAM, a writer on chemistry and natural philosophy, was born, in London, in 1758, and went to India at an early age in the maritime service. In 1776 he became agent, on the continent, for Mr Wedgwood, and afterwards settled in the metropolis as a mathematical teacher. He published an "Introduction to Natural Philosophy," a "Dictionary of Chemistry," a "Journal of Natural Philosophy, Chemistry, and the Arts," which was continued for several years, and various valuable compilations. He also took out patents for several inventions; but he was unfortunate in his speculations, and died poor in 1815.

NICIAS, a distinguished Athenian general, who took a prominent part in the Peloponnesian war. He was a wealthy citizen and a successful general, caution being his leading characteristic. On the death of Cleon, whom he had steadily opposed, he negotiated the treaty called the Peace of Nicias (B.C. 421), by which the Athenians and Spartans agreed to a truce of 30 years. In 415, the peace being almost a dead letter, Nicias was joined with Alcibiades

and Lamech in command of the expedition to Sicily, of which, however, he wholly disapproved. After temporary success the tide was turned by the arrival of Spartan auxiliary forces at Syracuse, to meet which Athenian reinforcements were sent under Demosthenes and Eurymedon; but after more than two years' efforts the Athenians had to raise the siege and retire. An eclipse of the moon took place at the time fixed for their secret departure, and Niclas, a superstitious man, deferred the retreat; the Athenians were completely overthrown, and Niclas with his colleague put to death, 413.

NICOLAI, CHRISTOPH FRIEDRICH, a German author and bookseller of some note in the history of German literature, was born at Berlin, in 1733. After studying at the university of Frankfo., to which city he was first sent, in order to learn the book trade, he returned to Berlin, and wrote his "Letters on the Present State of Belles Lettres," in 1756. With the aid of other literati, he produced his "Letters on Modern Literature," and in 1765 established the "General German Library" (Allgemeine Deutsche Bibliothek), a work which was continued 40 years, though he ceased to edit it at the end of the 107th volume, in 1792. Among his other numerous works are, "The Life and Opinions of Sebaldus Notherker," a "Tour in Germany and Switzerland," "Characteristic Anecdotes of Frederick II.," &c. His criticisms were often severe, and not always just; hence he was frequently involved in disputes with his literary brethren, by some of whom he was treated very unceremoniously. Died, 1811.

NICOLAS, SIR NICHOLAS HARRIS, an eminent antiquary, was born in Cornwall, 1799. At an early age he entered the navy, and received his commission as lieutenant in 1815, after an active and adventurous service on the coast of Calabria. But he appears to have grown tired of the sea, for he was called to the bar in 1825. Shortly afterwards he was elected a fellow of the Society of Antiquaries; and he thenceforward devoted himself almost entirely to antiquarian literature, particularly in the departments of genealogy and history; and the works which he produced in rapid succession bore witness at once to his critical acumen and his almost unparalleled industry. Almost all his works have a substantial historical value; such, for instance, as his "History of the Battle of Agincourt," the memoirs in "The Siege of Carverock," and the "Scrope and Grosvenor Roll," the "Proceedings of the Privy Council," his "Life of Hatton," and his "Despatches of Lord Nelson;" but the most useful perhaps is his well-known "Chronology of History." Besides producing these substantial works, he was a frequent correspondent of the Gentleman's Magazine; in 1826 he became co-editor of the Retrospective Review, and he subsequently contributed occasionally to the Athenian Spectator, and Quarterly Review. In 1831 he received the honour of knighthood; a year later he was nominated chancellor; and, in 1840, grand cross of the order of St Michael and St George. Sir Harris prosecuted his favourite studies almost to his latest hour.

The last works on which he was engaged were a "History of the Navy," and the editing of the papers of Sir Hudson Lowe. Died, 1848.

NICOLE, PIERRE, an eminent French divine and moralist, was born at Chartres, in 1625. He became a member of the society of Port Royal, where he taught with great reputation, and assisted Arnaud in many of his works. In his latter years he espoused the cause of Bossuet against the Quietists, and was engaged in other controversies. His principal works are, "Moral Essays," 23 vols.; "The Perpetuity of the Faith of the Catholic Church respecting the Eucharist;" and a "Treatise on the Unity of the Church." Died, 1695.

NICOLL, ROBERT, a young Scottish poet, born of poor parents, in Perthshire, in 1814. He had no education but that which he gave himself by reading and study, and had to follow very humble occupations for bread. He made himself known in 1835 by the publication of his "Poems," which excited surprise and admiration; in the following year he became editor of the "Leeds Times," which he conducted with great spirit and success; and, in December, 1837, he died. His poems have been several times republished.

NICOLÒ DEL ABBATE. [ABATI, NICOLÒ.]

NICOLÒ, properly NICOLAS ISOUARD, one of the favourite musical composers of France, was born at Malta, in 1777. At Naples he completed his study of composition, under the famous Guglielmi. When the French evacuated Italy, General Vaubois took him to Paris as his private secretary. Here he formed himself on the compositions of Monsigny and Grétry, and produced the popular opera of "Cendrillon," in 1810. In light dramatical composition, he is distinguished for the ease and sweetness of his melodies, the fertility of his imagination, and the happy combination of the characteristics of the modern Italian school with those of the French. He died at Paris, in 1818.

NICOLSON, WILLIAM, a learned English prelate, was born at Orton, in Cumberland, in 1655; was educated at Queen's College, Oxford, became successively bishop of Carlisle, Derry, and archbishop of Cashel; but died suddenly a few days after he was raised to the archiepiscopal dignity in 1727. He published "The English, Scotch, and Irish Historical Library," the "Leges Marchiarum, or Border Laws," and several other works. He also distinguished himself by the zeal and ability with which he entered into the Hungarian controversy.

NICOT, JEAN, a French statesman, who being sent by Francis II. ambassador to Portugal, brought from thence the tobacco plant, which out of compliment to him received its Latin name of Nicotiana. He was author of the "Trésor de la Langue Française," the first dictionary in the French language, &c. Born, 1530; died, 1600.

NIEBUHR, CARSTEN, a celebrated traveller, was born at Ludingworth, in Hanover, in 1733. At the age of 22 he went to Hamburg, for the purpose of studying geometry, after which he devoted several years

to the study of the mathematics at Göttingen. Count Bernstorff, the Danish minister, having determined to send a scientific expedition for the purpose of exploring Arabia, Niebuhr accompanied it as geographer, in March, 1761, and, after touching at Constantinople, proceeded to Egypt. Here they remained a year, and reached Yemen, their point of destination, in 1762. In September, 1763, he sailed for Bombay, and in December, 1764, set out on his return overland, through Persia and Turkey. He arrived at Copenhagen in November, 1767, and laid the fruits of his researches before the world in his "Description of Arabia" and his "Travels in Arabia," which have been translated into various languages. He was the only one that returned from the mission, was liberally rewarded by the Danish monarch, and died in 1815. Carsten Niebuhr was father of the great historian. (See following memoir.)

NIEBUHL, BARTHOLOMEO GEORG, the great German historian and philologist, was son of the preceding, and was born at Copenhagen, in 1776. He was brought up at Meldorf, in Holstein, whither his father removed, and at the age of 18 was sent to the university of Kiel, where he studied two years. After holding situations in a government office at Copenhagen and in the Royal Library, he visited England, and studied a short time at Edinburgh. He accepted another official appointment in 1800, and the same year married Amalie, the sister of his friend, Madame Hensler. In 1803 he was invited to Berlin, and entered the service of the king of Prussia, whose confidence he long enjoyed, and who charged him with important diplomatic negotiations, and made him privy-councillor. On the establishment of the university of Berlin, Niebuhr was chosen lecturer on Roman history; and the lectures then delivered formed the basis of the great work by which his name is immortalized. He served in the campaigns of 1813-14, and was sent ambassador to the court of Rome in 1816, having married a second time shortly before. He succeeded in negotiating a concordat with the holy see in 1821. While at Rome he was the friend and associate of the learned Mai, librarian of the Vatican, and disputes subsequently arose between them as to certain literary discoveries. Niebuhr visited Verona, and there, after patient searching, discovered the fragments of the work of the great jurist Gaius. Quitting Rome in 1823, he was appointed adjunct professor at the new university of Bonn. He occupied himself with the preparation of a new edition of his great work, and with a republication of the Byzantine historians; but his labours were interrupted and his health and spirits broken by the French revolution of July, 1830. He died, January 2, 1831. The "Römische Geschichte," which first appeared in 1811, and in an extended and greatly altered form in 1827, is one of the most original historical works of the present century. It was a masterly attempt to reconstruct a true and vivid picture of the history of early Rome out of the most confused and hopeless materials, and was hailed as a great success. The method and system of Niebuhr, how-

ever, has not been able to stand the test of recent criticism; and of all his critics the most formidable is Sir George Lewis. Niebuhr was a great linguist and philologist as well as historian, and published, besides his History—"Frontonia Reliquie;" "Cicero pro Fontelo et Rabirio;" "Corpus Scriptorum Historiæ Byzantinæ;" and "Klein historische und philologische Schriften." The History of Rome was translated into English by Hare and Thirlwall; and some "Lectures on Roman History," and on "Ancient Ethnography," by Schmitz. The letters of B. G. Niebuhr were edited by Madame Hensler, and translated into English by Miss Winkworth, with additions by the Chevalier Bunsen.

NIELD, JAMES, a man who, like the philanthropist Howard, devoted a great part of his life to the relief of human wretchedness, was born at Knutsford, in Cheshire, in 1744; and, coming to London as an apprentice to a goldsmith, realized a fortune in that business. In 1773, by his exertions, a society was formed in the metropolis, having for its object the relief and discharge of persons confined for small debts. Of this benevolent institution Mr Nield was chosen treasurer, and he continued to hold that office through life. He travelled not as most do, for pleasure or profit, but to gauge the depths of human misery, and to alleviate the sufferings of his fellow-men. It was his constant practice in his prison excursions, as he called them, during thirty years, to wait upon the magistrates in cities and boroughs, and respectfully to represent what he saw amiss in their goals. By these means he was the instrument of producing many substantial improvements, and of diffusing a kindred spirit of beneficence far and wide, so that it would be difficult to estimate the extent of his services in the humane cause to which he cheerfully and perseveringly devoted his time and fortune. He died, universally lamented, in 1811.

NIEŃCEWICZ, JULIAN URSIN, a distinguished Polish statesman, poet, and miscellaneous writer, was born in Lithuania, in 1757. He served a short time in the army, and became acquainted with Kosciusko; was a leading member of the constitutional Diet of 1788-1792; served the popular cause at the same time by several patriotic dramas; and was aide-de-camp to Kosciusko in the fatal campaign of 1794. After two years' imprisonment at St Petersburg, he was released by the Emperor Paul, and with his friend Kosciusko went to America. There he married, and paid a long visit to Washington at Mount Vernon. He came back to Europe in 1802, but soon quitted it again for America, once more returning after the treaty of Tilsit and the establishment of the grand-duchy of Warsaw. He was then named secretary of the senate, and made a member of the Council of Public Instruction. He assisted, after the Congress of Vienna, in drawing up another constitution for Poland, was dismissed from the Council of Education in 1821, and lost his secretaryship after the failure of the insurrection of 1830-31, which he supported. He spent part of his exile in England, and then settled

at Montmorency, near Paris. The most popular of his poetical works are the "Historical Ballads," which, like the "Irish Melodies" of Moore, were set to music. Among his other poems are a collection of Fables, several tragedies and comedies, and translations from popular English poems. Niemcewicz published also Memoirs of his own Times, a Series of Memoirs on Ancient Poland, an account of his visit to Washington, and several Novels. He left many manuscripts unpublished. Died, at Montmorency, 1811.

NIEMEYER, AUGUST HERMANN, German theologian and miscellaneous writer, was born at Halle, in 1754, and died there in 1828. He first began to give lectures in the university of Halle in 1777, was appointed professor of theology in 1780, and continued to receive various appointments till 1808, when he was made a member of the estates of the kingdom of Westphalia, chancellor, and rector of the university. In 1813 the university was abolished by Napoleon; but when the Prussian government restored it, he was re-appointed. He produced a great number of works, particularly on the subject of education, the bare titles of which would occupy a very considerable space, besides others on theology, ethics, history, &c. Died, 1828.

NIEREMBERG, JOHN EUSEBIUS, a celebrated Spanish Jesuit, and a distinguished naturalist. He was born at Madrid, in 1590, took the habit of St Ignatius, applied himself to the study of natural history, and was appointed professor at Madrid, in which office he remained 14 years. His works are numerous. Died, 1658.

NIUWENTYT, BERNARD, an eminent Dutch philosopher and mathematician, was born at Westgraafdyck, in North Holland, in 1654, and died in 1718. He wrote a work on natural theology, entitled "The True Use of the Contemplation of the Universe," published in 1715, which was translated about three years later into English, and has been shown to have been very freely used by Paley in writing his "Natural Theology."

NINON DE L'ENCLOS. [L'ENCLOS.]

NIVERNIS, LOUIS JULES BARRON MANCINI MAZARINI, Duke de, was born at Paris, in 1716. He was successively ambassador at Rome, Berlin, and London, in which latter city he negotiated the peace of 1763. On his return to France he published some poetical imitations, or translations, of Virgil, Horace, Tibullus, Ovid, Ariosto, and Milton. He also wrote "Dialogues of the Dead," "Reflections on the Genius of Horace, Boileau, and Rousseau;" "Fables in Verse," &c. He was a member of the French Academy and of the Academy of Inscriptions; was imprisoned by the republicans in 1793, and died in 1798.

NIZAM AL MULUK, a celebrated grand vizier of Persia, born in Khorasan about 1017, and by successive steps rose from obscurity to be vizier to the Sultan Alp Arslan in 1061. He filled that office nearly 30 years, during which he showed himself an able statesman and general; but, above all, a zealous patron of learning, having founded and endowed the famous college of Bag-

dad, and numerous other seminaries, while his palace was always open to men of genius, many of whom he pensioned. He was also distinguished as the historian of his own times. In 1092 he met his death from the hand of an assassin, while reading a petition which his treacherous foe had just presented to him.

NIZAMI, or NIDHAMI, a celebrated Persian poet, author of some esteemed poems, among which is "The Loves of Lella and Mejnoun." Died, 1180.

NOAILLES, LOUIS ANTOINE DE, cardinal and archbishop of Paris, was the son of the duke of Noailles, and born in 1651. He studied at the Sorbonne; and, in 1695, obtained the archbishopric of Paris, in which office he distinguished himself by his zeal against the Quietists and Jansenists, for which, in 1700, he was created a cardinal. In 1715 he opposed the bull Unigenitus, but afterwards made his submission to the pope. Died, 1729.

NOAILLES, ADRIEN MAURICE, Duke of, nephew of the preceding, was born in 1678, entered the army, in which he long distinguished himself, and was president of the council of France during the minority of Louis XV., but was exiled through the influence of Cardinal Dubois, whose elevation he had opposed. On the death of that intriguing priest, however, he was reinstated in his former office, obtained a marshal's staff, and displayed great skill as a commander during the Austrian war of succession. In 1743, by the unreasonable impetuosity of his nephew, the count of Grammont, he lost the battle of Dettingen, and, by this means, the fruits of the wise measures by which he brought the British army to the verge of ruin. When his age no longer permitted him to fight at the head of armies, he entered the ministry, and gave proof of his statesmanlike talents, though he was by no means free from the common faults of courtiers in that age. Died, 1766. His two sons were, in 1775, made marshals of France.

NOAILLES, LOUIS MARC ANTOINE, Viscount of, born in 1753, was one of the noblest who, on the 4th of August, 1789, resolved to divest themselves of their exclusive privileges, and sit with the tiers état. After the dissolution of the Constituent Assembly, he went into the army, and was killed in 1801, while withdrawing from St Domingo, in an action with an English frigate off Cuba.—His son, ALEXIS, count of Noailles, figured both in the army and the cabinet. The princes of the house of Bourbon sent him on important missions to the continental courts, after which he repaired to the residence of Louis XVIII., at Hartwell, in England. He accompanied the allied army to France, was the plenipotentiary of Louis XVIII. to the congress of Vienna, and afterwards held office as a minister. Died, 1835.

NOBLE, MARK, historian and biographer, was a clergyman of the church of England, and was presented to the rectory of Harving, in Kent, in 1781, at which place he died in 1827. He was author of "Memoirs of the Protectorate House of Cromwell," 2

vols.; "Memoirs of the Illustrious House of Medici, with Genealogical Tables," "The Lives of the English Regicides," 2 vols.; a "History of the College of Arms," and a continuation of "Granger's Biographical History of England," 3 vols. He also wrote several papers in the *Archæologia*, and was F.S.A. London and Edinburgh.

NODIER, CHARLES, French poet and littérateur, was born at Besançon in 1783. He went to Paris under the patronage of Pichegru in 1796, but returned to Besançon in 1798. When military power began to be predominant and the conversion of the consulate into the empire was dreamed of, Nodier published his cry of indignation, his protest for freedom, in his poem, entitled "La Napoléone." He confessed himself the author, and was arrested and imprisoned. Allowed to return to his native city, he was placed under the surveillance of the police; escaped, however, and lived in the Jura; was again arrested on suspicion of conspiracy, and was liberated by the peasantry; long led a restless life, following various occupations for bread, and employing himself in such studies as he could by the aid of monastic libraries, until in 1814 he returned to Paris and became joint editor of the "Journal des Débats." After distinguishing himself for many years as journalist and miscellaneous writer, he obtained the post of librarian to the Arsenal at Paris, which he held till his death. Nodier was a prolific writer on a great variety of subjects, and among his works we may name the "Dictionnaire des Onomatopées;" the novels "Jean Sbogar," "Thérèse Hubert," and "Franciscus Colonna," and the "Bibliothèque Entomologique." He was a member of the French Academy and of the Legion of Honour, and a contributor to the "Biographie Universelle." Died, 1814.

NOEHDEN, GEORG HEINRICH, a learned German writer, who for many years resided in England, was born in 1770, at Göttingen, where he received his education. Being introduced to Sir William Milner, in 1793, he attended his son to Eton in the capacity of private tutor. Here he obtained the friendship of Jacob Bryant, William Herschell, &c., till the education of his young pupil being completed, he accompanied a younger son of the same family to Göttingen. After visiting the courts of Brunswick and Berlin, they returned to Eton, and in 1800 Noehden published his "German and English Grammar." He was an excellent numismatist, and some years before his death became head of the department of coins in the British Museum. He died in 1826, leaving unfinished his "Essay on the Northwick Coins," an "Introduction to Numismatology," &c.

NOGARET, WILLIAM OF, chancellor of Philip the Fair, king of France, was born in the diocese of Toulouse, of a race whose blood had been shed by the Inquisition. He had become a distinguished professor of civil law in the university of Montpellier, judge of Beaucaire, and a devoted servant of the king. He is remembered for the part he took in the famous quarrel between Philip and Pope Boniface

VIII, which began in 1301 by the publication of the bull "Anacletus, fili," full of arrogance and unjustifiable assumptions, and which was burnt by the king. At the parliament of Paris, held in March, 1303, William of Nogaret presented a formal complaint and accusation against the pope, which he offered to prove before a general council. His charges were reiterated at a second parliament at Paris in June; and Boniface, who went on after to Anagni, published several bulls on his self-defence, others against the prelates and the universities of France, and threatened to excommunicate the king and absolve his subjects from their allegiance. Boniface was on the point of publishing this excommunication, when William of Nogaret, who had been sent secretly from Paris, had been joined by Sciarra Colonna, and had hired troops, attacked the pope's palace, and that of his nephew, the marquis of Gaetani, arrested him 7th September, and kept him in close custody till the 9th, when the inhabitants of the town rose against the French and rescued him. The pope went immediately to Rome, and died about a month later. His captor was the only person of those concerned who was excepted from the absolution granted by Benedict XI. in 1304. Three years later he was absolved by Clement V. on condition of submitting to a certain penance. He rendered further important services to the king in the seizure of the Jews, the confiscation of their property, and their expulsion from France; in the accusation of the Templars at the great meeting of Poitiers in 1307, and in the prosecution of the memory of Boniface at the Consistory of Avignon in 1310. At this court William of Nogaret was sentenced to serve for life in the next crusade (which never was undertaken), and meantime to make certain pilgrimages to holy shrines. He died at Paris, in 1311.

NOLAN, Capt. LEWIS EDWARD, a distinguished soldier, was born in 1817. His father, who was British vice-consul at Milan, having procured him a commission in the Austrian army, he served for some time in Hungary and Gallizia. In 1829 he joined the British army, as ensign in the 15th Foot, whence he was transferred to the 15th Hussars, then stationed at Mairas. His soldier-like qualities, joined to great personal accomplishments which endeared him to the army, soon attracted the notice of Sir H. Pottinger, who appointed him an extra aide-de-camp; and he availed himself of his stay in India, to make himself thoroughly acquainted with the Eastern military systems. In 1852 he returned to Europe, and made a lengthened tour in Russia; and soon after England declared war against Russia, he was selected to proceed to Turkey, to make arrangements for the reception of the cavalry, and the purchase of horses. When the expedition to the Crimea was resolved on, he was placed on the staff of the quarter-master general; and fell at Balaklava, Oct. 25th, 1854, in the memorable cavalry charge, almost immediately after having delivered Lord Raglan's written order: so Lord Lucan, of which he had been

in 1301 by the publication of the "Ausculta, fili," full of justifiable assumptions, printed by the king. At Paris, held in March, Nogaret presented a mud accusation against the pope, offered to prove his charges were true, and parliament at Paris, who went soon after, offered several bills against the prelates of France, and threatened the king and absolve their allegiance. Point of publishing this execration William of Nogaret, secretly from Paris, had Larra Colonna, and had kept the pope's palace, nephew, the marquis of him 7th September, and custody till the 9th, when the town rose against the pope. The pope went home, and died about a year. The emperor was the only person who was excepted from the grants by Benedict years later he was ab- sconded on condition of sub- penance. He rendered services to the king in Jews, the consecration of their expulsion from possession of the Templars of Poitiers in 1307, and of the memory of Boni- fani of Nogaret was scru- lous in the next crusade undertaken, and mean- while pilgrimages to holy at Paris, in 1314.

EDWARD, a distin- guished philosopher, was born in 1700, at Pimpre, near Noyon. He applied himself especially to the science of electricity, and conducted many important experiments. In 1731 he was in England, and was chosen F.R.S. He was received at the Academy of Sciences in 1733. He repeated his lectures on experimental philosophy before the duke of Savoy, and afterwards before the royal family of France. In 1756 he was appointed to a professorship of physics in the college of Navarre at Paris, and afterwards held a similar post in the School of Artillery. He wrote "Leçons de Physique Expérimentale," 6 vols.; besides some works on electricity and other scientific subjects. Died, 1770.

NOODE, GERARD, a famous civilian, was born in 1647, at Nimeguen. He afterwards settled at Leyden as professor of law, became rector of the university, and died in 1725. He published a collection of his works in 1713, which are wholly on subjects of jurisprudence, and are esteemed of high authority.

NORDBERG, GEORGE, Swedish his- torian, born in 1677. He accompanied the army under Charles XII. in his various cam- paigns from 1703—1709, first as almoner, and then as chaplain to the king, and was captured at the battle of Pultawa, and kept prisoner in Russia till 1715. During the rest of his life he was minister of one of the parishes of Stockholm. He is remembered as author of a "Life of Charles XII.," esteemed for its authenticity and as the testimony on many matters of an eye-witness. Died, 1741.

NORDEN, FREDERICK LOUIS, an eminent Danish traveller, was born at Gluckstadt, in Holstein, in 1708. He was a volunteer in the English fleet under Sir John Norris in the Mediterranean, having

been previously sent by the king of Denmark to Egypt, to make drawings and observations of the ancient monuments of that country. These he executed with great fidelity, and his "Travels in Egypt and Nubia," with plates, were splendidly printed in 2 vols. folio. Being elected a member of the Royal Society of London, he presented to that learned body his drawings of ruins and colossal statues at Thebes, of which he also published a memoir. Died, 1742.

NORDEKENS, JOSEPH FIANCIS, was a native of Antwerp, who settled in London, where he obtained considerable reputation as a landscape painter, and died in 1748. His style resembled that of Watteau, whom he closely imitated.

NOLLEKENS, JOSEPH, son of the preceding, was a celebrated sculptor, and born in London, in 1737. He was placed under Scheemakers, the sculptor, on leaving whom he went to Rome, and studied there some time under Chavetti. While at Rome, he gained a gold medal from the Academy of Painting, Sculpture, and Architecture; and on his return to England, in 1770, he became royal academicalian, executed many works of great beauty, and was so extensively employed, particularly on busts, that he realized a fortune of £200,000. Nollekens was a great favourite with George III., and possessed many peculiarities of character, of which his insatiable love of money was not the least. Died, 1823. His portrait, by L. F. Abbott, is in the National Portrait Gallery.

NOLLET, JEAN STOTNE, a French natural philosopher, was born in 1700, at Pimpre, near Noyon. He applied himself especially to the science of electricity, and conducted many important experiments. In 1731 he was in England, and was chosen F.R.S. He was received at the Academy of Sciences in 1733. He repeated his lectures on experimental philosophy before the duke of Savoy, and afterwards before the royal family of France. In 1756 he was appointed to a professorship of physics in the college of Navarre at Paris, and afterwards held a similar post in the School of Artillery. He wrote "Leçons de Physique Expérimentale," 6 vols.; besides some works on electricity and other scientific subjects. Died, 1770.

NORDEKENS, JOSEPH FIANCIS, was a native of Antwerp, who settled in London, where he obtained considerable reputation as a landscape painter, and died in 1748. His style resembled that of Watteau, whom he closely imitated.

NORDEKENS, JOSEPH FIANCIS, was a native of Antwerp, who settled in London, where he obtained considerable reputation as a landscape painter, and died in 1748. His style resembled that of Watteau, whom he closely imitated.

NORDEN, JOHN, an old English writer, who is conjectured by Wood to have been a native of Wilts. He received his education at Oxford, and wrote some strange books in divinity, with very whimsical titles, as "The Sinful Man's Solace," "Anti-thesis, or Contrariety between the Wicked and Godly set forth in a Pair of Gloves fit for every Man to wear," &c. He was also the author of the "Surveyor's Dialogue," "Labyrinth of Man's Life," a poem, "England, or a Guide for Travellers," and "Topographical Descriptions of Middlesex, Hertfordshire, and Cornwall." He was surveyor of the king's lands, and died about 1623.

NORFOLK, ROGER BIGOD, Earl of, marshal of England, was head of the embassy of the king and the barons to the council of Lyons in 1245, to make formal complaint of the unjust claims and intolerable exactions of the pope, Innocent IV., in England. He also took part in the armed parliament of 1257-8, to compel Henry III. to confirm the Great Charter and redress the grievances of the nation, but he subsequently went over to the king's side. Died, without children, 1270. The marshalship was given to this Roger Bigod on failure of the male line of the earls of Pembroke, 1245.

NORFOLK, ROGER BIGOD, Earl of, marshal of England, nephew of the preceding, inherited the marshalship in 1270. He distinguished himself in the wars with Llewellyn, prince of Wales, and was for some time governor of Bristol and Nottingham castles. In 1297 he joined the earl of Hereford in opposing the exactions of Edward I., refusing to discharge the duties of his office, or to serve in the French war till Magna Charta was confirmed, which the king, in the following year, was compelled to do. He afterwards gave up to the king his estates and his office, receiving from him a pension. Died, 1307.

NORFOLK, THOMAS MOWBRAY, Duke of, was known as earl of Nottingham till 1397. He was one of the most powerful supporters of the king, Richard II., in the proceedings taken in that year against the duke of Gloucester, who had been head of the council of regency, and his associates, the earls of Arundel and Warwick. He was immediately rewarded with the title of duke of Norfolk. In the following year occurred his memorable quarrel with the duke of Hereford (Hollingbroke), to settle which a trial by combat was arranged to take place at Hereford. The combat was however prevented by the king, and Norfolk was banished for life. Died, 1399.

NORFOLK, THOMAS HOWARD, Duke of, eldest son of John Howard, duke of Norfolk, who fell, fighting on the side of Richard

III., at the battle of Bosworth, was created earl of Surrey in 1483. Taken prisoner at Bosworth, two years later, he was imprisoned in the Tower, by Henry VII., till 1488, when he restored to him his title and his freedom. He was employed against the insurgents in the north, and against the Scots; was made lord-treasurer in 1501; negotiated in 1502 the treaty with the king of Scotland, for his marriage with Margaret, daughter of Henry VII., and the next year conducted the princess to her spouse. Surrey retained his office under Henry VIII., was made privy-councillor, and charged with important negotiations; but his influence declined as that of Wolsey rose. In 1513 he gained over the Scots the memorable victory of Flodden, at which the king of Scotland, his son, and the flower of his nobility perished. He was soon after created duke of Norfolk. In 1514 he concluded a peace with France, by which the marriage of Louis XII. with the Princess Mary, sister of Henry VIII., was agreed on, and he conducted the young bride to Abbeville the same year. The duke of Norfolk presided at the trial of Buckingham, and, with deep emotion, had to pass sentence of death on him. Died at his seat at Framlingham, 1524, having resigned his office of lord-treasurer in 1522.

NORFOLK, THOMAS HOWARD, Duke of, son of the preceding, was born about 1473. He distinguished himself early as a soldier. He created K. G. in 1510, and lord-admiral in 1513. The same year he took part in the battle of Flodden, and was made earl of Surrey, having been previously known as Lord Howard. In 1520 he was named lord-deputy of Ireland, and during the two years of his administration was almost constantly engaged in war. He next commanded an expedition into France, on his return from which he was appointed lord-treasurer (1522), led an army against the Scots, and captured Jedburgh. He succeeded on his father's death to the dukedom, and was named lieutenant of the borders. Norfolk was one of the few witnesses present at the marriage of Anne Boleyn, who was his niece, to Henry VIII. But he was a steady opponent of the Reformation, and looked on as head of the Romish party. He presided at the trial of Anne Boleyn, and pronounced the sentence of death on her. On the breaking out of the Insurrection in Yorkshire, known as the Pilgrimage of Grace, in 1536, Norfolk was charged with its suppression, and he succeeded by negotiation in dispersing the insurgents. It was renewed the following year, but was quickly suppressed. The merciless law called the Act of the Six Articles was promoted by the influence of the duke of Norfolk, who also, through his niece, Catherine Howard, then queen, urged the king on in the path of persecution, and procured the arrest and execution of Thomas Cromwell. He was again employed in Scotland and in France, and then becoming an object of the king's suspicion, he was suddenly arrested with his son, the earl of Surrey, and committed to the Tower, December, 1546. Surrey was condemned and executed, and the duke was also sentenced to death; but the king died at the very time,

and he was left in prison till the accession of Queen Mary, who restored him to his dignities and estates. Died, at Kenninghall, in Norfolk, 18th July, 1554.

NORFOLK, THOMAS HOWARD, Duke of, grandson of the preceding, and son of the accomplished earl of Surrey, executed just before the death of Henry VIII., was born about 1536. He had for his tutor, in the house of his aunt, Mary, countess of Richmond, John Foxe the martyrologist, to whom in later life he showed great kindness, and granted a pension. He succeeded to the dukedom and the marshalship on the death of his grandfather, and was made K. G. by Queen Elizabeth in 1558. He was one of the commissioners sent to York, in 1567, to inquire into the guilt of Mary, queen of Scots; but he had formed the project of marrying her himself, and engaged in correspondence with her, for which he was sent to the Tower in 1569. Released in the following year, he pledged himself to correspond no more with Mary, and was allowed to live at his seat in Norfolk. This pledge he soon violated, and in 1571 was again sent to the Tower, and being tried and found guilty of treason, in January, 1572, the queen, after long hesitation, signed the order for his execution, which took place on Tower Hill, 2nd June of that year. It is remarkable that this noble man remained a Protestant by profession throughout his life, notwithstanding his intrigues with the queen of Scots and the Romish party.

NORSGATE, EDWARD, an English artist, was born at Cambridge, where his father was master of Hene't College. He was employed by the earl of Arundel to purchase pictures in Italy; but not being supplied with remittances, he was compelled to return without executing his commissions; and was afterwards made one of the clerks of the signet, and Windsor herald. Died in 1659, and was considered one of the finest illuminators of his age.

NORIS, HENRICO, cardinal, a learned Italian critic and theologian, was born at Verona in 1631, and became an Augustinian monk. He taught theology in several houses of his order, was appointed professor of ecclesiastical history at Pisa, was employed by Pope Innocent XII. in the Vatican Library, and in 1693 was created cardinal. Died at Rome, 1704. His works, in 5 vols. folio, were published after his death.

NORMANBY, CONSTANTINE HENRY PHIPPS, Marquis of, British statesman and diplomatist, was eldest son of Henry, first Earl Mulgrave, and was born in 1797. He was educated at Harrow School and the university of Cambridge, where he graduated M. A. in 1818. He soon after entered parliament as member for Scarborough, but resigned his seat in a short time, and went to Italy. He again sat in the House of Commons as a liberal from 1822 till 1832, when he succeeded his father as Earl Mulgrave, and was named governor of Jamaica. Under the ministry of Lord Melbourne he was made lord privy seal, and in 1835 lord-lieutenant of Ireland. Three years later he was created marquis of Normanby, and early in 1839 was appointed colonial secre-

prison till the accession restored him to his dignity. Died at Kenninghall, in 1654.

THOMAS HOWARD, Duke of Buckingham, and son of the Duke of Surrey, executed just before the death of Henry VIII., was born in 1510, and was bred for his tutor, in the family of the Countess of Richmond, a martyr, to whom he owed great kindness, and

he succeeded to the office of Marshalship on the death of his father, and was made K. G. by Henry VIII. in 1558.

He was one of the first sent to York, in 1567, on the death of Mary, queen of Scots, and formed the project of her execution, and engaged in carrying it out, for which he was executed in 1569.

He was afterwards head of the council in the province of Munster; and in 1592 had the command of the auxiliary forces sent to Henry IV. of France. On his return he resumed his old post in Ireland, where he had to oppose the earl of Tyrone, and died about 1598.

NORRIS, Sir JOHN, a brave naval officer, who served his country nearly sixty years, commencing in 1689, and terminating, with his life, in 1749. The frequent accidents and misfortunes which befell the ships and squadrons under his command, and which could not be ward off by any human prudence or sagacity, procured him the appellation of "Foul-weather Jack;" yet in the duties of his profession no man could be more assiduous; and so well did he second the exertions of his friend Sir Cloudesly Shovel in the Mediterranean, that the queen knighted him, and otherwise handsomely rewarded him.

NORRIS, JOHN, an eminent divine and Platonist, was born in 1657, at Collingbourne Kingson, in Wiltshire; was educated at Winchester School, and at Exeter College, Oxford; and became rector of Bemerton, near Salisbury, where he died in 1711. He ranks as one of the most eminent of the English Platonists, and was a good man, though a visionary. Among his works are, "The Theory and Regulation of Love," "Reflections upon the Conduct of Human Life," "Practical Discourses," 4 vols., "An Essay towards the Theory of the Ideal or Intelligible World," and "Philosophical Discourse concerning the Natural Immortality of the Soul."

NORTLI, Sir EDWARD, an eminent lawyer in the reigns of Henry VIII. and Queen Mary, by the latter of whom he was created Baron North of Catlidge, in Cambridge-shire.

NORTH, DUDLEY, Lord, great grandson of the preceding, was born in 1581, and succeeded to the title in 1600. In the civil war he espoused the cause of the parliament, and died in 1656.—His son, of the same name, wrote a "History of the Life of Edward Lord North," &c., and is classed by Walpole among the "Royal and Noble Authors." He left four sons, all of whom attained political or literary eminence. (See below.)

NORTH, FRANCIS, Baron Guildford, lord-keeper of the great seal under Charles II. and James II., was the eldest son of the last-mentioned Lord Dudley North, and was born in 1637. After studying at Cambridge and the Middle Temple, and being regularly called to the bar, he became solicitor-general in 1671, when he received the honour of knighthood; in 1673 he was made attorney-general; the next year, chief-justice of the Common Pleas; and, in 1683, he was appointed lord-keeper, and raised to the peerage. Soon after the accession of James II. he was succeeded in his office by the notorious Jeffreys. He was the author of "A Philosophical Essay on Music." He died in 1683.—**SIR DUDLEY NORTH**, brother of the lord-keeper, engaged in commercial pursuits, and became an eminent Turkey merchant. He was afterwards one of the lords of the treasury in the reign of Charles II.; wrote "Observations on the Manners, Customs, and Jurisprudence of the Turks;" and died in 1691.—**ROGER NORTH**, a lawyer and miscellaneous writer, was the youngest son of Dudley, Lord North, born about 1650, and died in 1733. He wrote the Lives of his three brothers; also the "Examen, or Inquiry into the Credit and Veracity of a pretended Complete History," &c.; the book referred to being Kennet's History of England. The "Examen," obviously written in defence of the Stuarts, abounds with curious information and anecdote.

NORTH, FREDERICK, earl of Guildford, better known as Lord North, was of the same family as the foregoing, and was born in 1732. He was educated at Eton, and at Trinity College, Oxford. After having held several less important offices, he was, in 1769, appointed chancellor of the exchequer, and, in 1770, first lord of the treasury. His administration continued through the whole of the American war, a period of peculiar difficulty and danger, during which he was incessantly assailed by the opposition, and was often threatened with impeachment. On his resignation of office, however, in 1782, instead of instituting against him that impeachment which they had so long threatened, a coalition was formed between him and the Whigs; but this heterogeneous administration lasted only a few months, after which Lord North held no responsible position in the state. He was distinguished for urbanity of manners and a turn for repartee. For several years previous to his death he was afflicted with blindness. Died, 1792.

NORTHAMPTON, SPENCER JOSHUA ALWYNE COMPTON, Marquis of, was born Jan. 2, 1790. Educated at Trinity College, Cambridge, he there acquired and cultivated the taste which distinguished him in after life. For a short period he sat in the House of Commons for his native county, but being defeated at one election, he was never induced again to enter on the field of politics. He rarely spoke in the House of Lords after he succeeded his father in the marquise in May, 1828, but he was invariably present at all important divisions, voting for Catholic emancipation, reform, the repeal of the corn laws, &c. In 1838,

tary of state, an office which he soon exchanged for that of home secretary. In September, 1841, he retired. He filled the post of ambassador at Paris from 1846 till 1852, and a similar post at Florence from 1854 till 1858. Lord Northampton disapproved the recognition by the government of Lord Palmerston of the French Republic of 1848, and after his return to England he remained a constant opponent of the policy of Lord Palmerston. He was a privy-councillor, knight of the Hanoverian Guephic Order, K.G.C.B., and K.G. Died at Kensington, 28th July, 1863.

NORRIS, JOHN, an English military commander of the 16th century, was son of Henry, first Lord Norris, and was sent to learn the art of war in France under Admiral Coligny. He served in Ireland and in the Low Countries; took part under the earl of Leicester in the expedition sent to succour Antwerp in 1585; was afterwards head of the council in the province of Munster; and in 1592 had the command of the auxiliary forces sent to Henry IV. of France. On his return he resumed his old post in Ireland, where he had to oppose the earl of Tyrone, and died about 1598.

NORRIS, Sir JOHN, a brave naval officer, who served his country nearly sixty years, commencing in 1689, and terminating, with his life, in 1749. The frequent accidents and misfortunes which befell the ships and squadrons under his command, and which could not be ward off by any human prudence or sagacity, procured him the appellation of "Foul-weather Jack;" yet in the duties of his profession no man could be more assiduous; and so well did he second the exertions of his friend Sir Cloudesly Shovel in the Mediterranean, that the queen knighted him, and otherwise handsomely rewarded him.

NORRIS, JOHN, an eminent divine and Platonist, was born in 1657, at Collingbourne Kingson, in Wiltshire; was educated at Winchester School, and at Exeter College, Oxford; and became rector of Bemerton, near Salisbury, where he died in 1711. He ranks as one of the most eminent of the English Platonists, and was a good man, though a visionary. He wrote the Lives of his three brothers; also the "Examen, or Inquiry into the Credit and Veracity of a pretended Complete History," &c.; the book referred to being Kennet's History of England. The "Examen," obviously written in defence of the Stuarts, abounds with curious information and anecdote.

NORTH, FREDERICK, earl of Guildford, better known as Lord North, was of the same family as the foregoing, and was born in 1732. He was educated at Eton, and at Trinity College, Oxford. After having held several less important offices, he was, in 1769, appointed chancellor of the exchequer, and, in 1770, first lord of the treasury. His administration continued through the whole of the American war, a period of peculiar difficulty and danger, during which he was incessantly assailed by the opposition, and was often threatened with impeachment. On his resignation of office, however, in 1782, instead of instituting against him that impeachment which they had so long threatened, a coalition was formed between him and the Whigs; but this heterogeneous administration lasted only a few months, after which Lord North held no responsible position in the state. He was distinguished for urbanity of manners and a turn for repartee. For several years previous to his death he was afflicted with blindness. Died, 1792.

NORTHAMPTON, SPENCER JOSHUA ALWYNE COMPTON, Marquis of, was born Jan. 2, 1790. Educated at Trinity College, Cambridge, he there acquired and cultivated the taste which distinguished him in after life. For a short period he sat in the House of Commons for his native county, but being defeated at one election, he was never induced again to enter on the field of politics. He rarely spoke in the House of Lords after he succeeded his father in the marquise in May, 1828, but he was invariably present at all important divisions, voting for Catholic emancipation, reform, the repeal of the corn laws, &c. In 1838,

when the duke of Sussex resigned the presidency of the Royal Society, the fellows immediately solicited the noble marquis to become the successor to the royal duke. His attention at the general meetings, and his brilliant ré-unions of distinguished men in science, literature, and art, at his mansion in Piccadilly, are well known; and when he retired in 1845, it was with the unanimous regret of not only the fellows of the Royal Society, but a large circle of literary friends. Shortly before he died, he resigned the presidency of the Royal Society of Literature. Died, 1851.

NORTHCOTE, JAMES, an eminent portrait and historical painter, was born in 1746, at Plymouth, where his father was a watchmaker. Having a taste for the fine arts, he pursued the practice of drawing and painting with so much assiduity, that Dr Mudge, a physician of Plymouth, recommended him as a scholar to Sir Joshua Reynolds, with whom he remained five years; and on leaving that great artist he commenced business on his own account, with great success, as a portrait painter. Aspiring, however, to the loftier, though less lucrative department of historical painting, he visited Italy in 1777, and remaining there three years, he returned to London with a vastly increased reputation. In 1787 he became a royal academician; and for a period of 30 years his productions formed a conspicuous part of the exhibitions at Somerset House. He studied deeply, was an acute observer of human nature, and possessed a sound judgment, a quick perception, and great conversational powers. He wrote "The Life of Sir Joshua Reynolds," also "Fables," "Conversations," and "The Life of Titian," in all of which he was assisted by Mr Hazlitt. He amassed a large fortune by his profession, and his habits were too penurious to dissipate it. He died, aged 85, in 1831. His portrait, painted by himself, is in the National Collection.

NORTHUMBERLAND, HENRY PERCY, Earl of, distinguished himself in the French wars of Edward III., who made him marshal of England. He received the title of earl of Northumberland from Richard II., during whose reign he took part in the Scottish war and took Berwick, and was also employed in diplomatic negotiations with France. He afterwards took part with Henry of Lancaster, and chiefly contributed to his elevation to the throne. In 1402, with his gallant son, Hotspur, he won the victory of Homildon over the Scots, and took Douglas prisoner, but soon after he engaged in a rebellion against Henry IV., and was defeated at the battle of Shrewsbury. The king pardoned him, but he again rebelled, and fell at the battle of Bramham Moor, in 1408.

NORTHUMBERLAND, ALGERNON PERCY, fourth duke of Northumberland, was born December 15, 1792. He was educated at Eton, and at the age of 13 entered the navy, in which he served till 1815. In the following year he was raised to the peerage by the title of Baron Prudhoe, of Prudhoe Castle, Northumberland, and by that title he was known till his brother's death in 1847, when he succeeded to the dukedom. He

had previously spent many years in travel, especially in the east, collecting various historical relics, sculptures, coins, and manuscripts. He married in 1842 Lady Eleanor Grosvenor, daughter of the marquis of Westminster, who survived him. Under the duke of Northumberland was first lord of the Admiralty, and laid the foundation of our steam navy. His long life and princely wealth were devoted to the noblest objects,—the promotion of religion and education, by founding and endowing churches and schools; the patronage of art, science, literature, and archaeology; and the support of charitable institutions. Foremost among the works which will illustrate his name is the restoration and decoration of Alnwick Castle, the ancestral seat of his family. He took deep interest in the welfare of our sailors, founded a "Sailors' Home" at North Shields, and gave many lifeboats of improved construction to stations on the coast of Northumberland. In 1853 he was created a knight of the Garter. The list of the honorary offices he held is too long for repetition here; we can only say that he was F.R.S., F.S.A., D.C.L. Oxford, and more than once president of the Royal Institution. Died at Alnwick Castle, 12th February, 1865; and after lying in state there, and at Northumberland House, London, was buried in Westminster Abbey.

NORTHUMBERLAND, Duke of. [DUDLEY.]

NOFWOOD, RICHARD, an English geometer of the 17th century, was the first person who measured a degree of the meridian in England. This was executed in 1635, the operations being carried on between London and York. He wrote treatises on navigation, trigonometry, and fortification; but no particulars of his life are recorded.

NOSTRADAMUS, MICHEL, a celebrated astrologer and empiric of the 16th century, was born in 1503, at St. Remy, in Provence. After graduating in medicine at Montpellier, in 1529, he acquired the reputation of a skillful physician by successfully arresting the progress of a pestilential disease. But he aimed at the character of an astrologer and adept in the occult sciences, and published a volume of obscure metrical rhapsodies in 1555, under the title of "Prophetic Centuries." Though some persons regarded these with contempt, and the author as an impostor, there were not wanting persons of distinction who had faith in these prognostics; one of which bore so remarkable an allusion to the death of Henry II., that Nostradamus received many presents, and was appointed first physician to Charles IX., who came himself in person to Salon, where Nostradamus then resided, for the purpose of visiting him. Died, 1566.

NOTT, JOHN, M.D., poet and oriental scholar, was born at Worcester, in 1751. After studying surgery at Birmingham, he visited Paris, and subsequently went to China, as surgeon in the East Indiaman. In 1788 he graduated in medicine, and soon after attended the duchess of Devonshire to the continent, in the quality of family

t many years in travel, east, collecting various pictures, coins, and manuscripts. In 1842 Lady Eleanor, wife of the marquis of Salisbury, survived him. Under administration in 1832, the island was first lord of the island, and laid the foundation of a long life and princely to the noblest objects, religion and education, and window churches and of art, science, literature; and the support of the. Foremost among the illustrate his name in the station of Alnwick Castle, of his family. He took the welfare of our sailors, "Tome" at North Shields, boats of improved construction on the coast of North-33 he was created a bar. The list of the honours is too long for repetition only say that he was of Oxford, and more than the Royal Institution, died 12th February, 1865, at North London, was buried in

RRLAND, Duke of.

HARD, an English geographer, was the first to receive the medical degree of the medicine. This was executed in being carried on to New York. He wrote treatises on trigonometry, and fortifications of his life are

poet and orientalist, Worcester, in 1731. He died at Birmingham; he subsequently went to the East Indian. In medicine, and soon success of Devonshire the quality of family

physician; in 1793 he returned to England, and settled at Clifton, where he continued to reside till his death, in 1826. Among his numerous writings are, "Alonzo, a poetic Tale," "Poems from the Italian of Petrarch;" translations of the Odes of Hafiz; an edition of "Catuslus," with the Latin text rendered into English verse; "The Odes of Horace," &c. He also published "A Chemical Dissertation on the Springs of Pisa and Asciano," "A Nosological Companion to the London Pharmacopœia," &c.

NOTE, Major-general Sir WILLIAM, one of the successful heroes of the Afghan war, was the son of an extensive mail-contractor, and proprietor of the Ivy-bush hotel at Carmarthen, where the distinguished soldier was born in 1782. From his earliest youth he had shown a strong predilection for the profession of arms, and he went out to India as a cadet in 1800; but although his talents and gallantry were well known he was unpatriotized, and he only arrived at a majority after a service of 26 years. His health at that time being seriously affected, he returned to England, visited his native place, and there purchased the seat called "Job's Well," where he resided a few years. The failure of the Calcutta bank, in which he had invested the greater part of his savings, having rendered it necessary for him to resume his active duties as a soldier, he, at 50 years of age, returned to India. "To relate the moving accidents by flood and field" through which this gallant officer led the troops under his command, would be to write a volume. By an exercise of skill, judgment, and valour, not often equalled, he extricated our army from difficulties by which they were surrounded in Afghanistan, and succeeded in conveying them, and the captives whom he released, across the frontier, bringing them with perfect safety, and without any loss of honour, within the limits of her majesty's dominions. The victories which he achieved in Candahar closed the Afghan war, and drew forth the gratitude and applause of the whole British empire; even the duke of Wellington departed from that peculiar severity of taste which marks his generally sparing eulogium, and with a fervour unusual to him, he—the best possible judge of Indian warfare—pronounced in a manner the most emphatic his unqualified admiration of General Nott. The crown, of course, lost no time in conferring on him the highest military distinction—that of a Knight Grand Cross of the Bath; neither was parliament slow to give expression to the national sentiment. "The Afghan war concluded, Sir William hastened to return to England, the hardships of a military life and the insalubrity of an Indian climate seeming to render repose absolutely necessary for the restoration of his shattered health; but he had not long revisited his native town when the unfavourable symptoms increased, and he died on the 1st of January, 1845.

NOTTINGHAM. [FINCH.]

NOTE, FRANÇOIS DE LA, surnamed Bras de Fer, or "Iron-Arm," a French soldier, and a zealous Calvinist, was born in Brittany, in 1531. He took Orleans in 1567, and

had a principal share in the battle of Jarnac in 1569. His left arm being amputated in consequence of a wound he received at the capture of Fontenoy, he had another constructed of iron, whence he derived his surname. In 1571 he surprised Valenciennes, and on his return the king gave him the command of the troops against Rochelle; but his indignation at the massacre of St Bartholomew overcoming his fidelity, he used the forces for its defence. In 1578 he entered into the service of the states-general in the Low Countries, where he took the Count Egmont prisoner; but he was taken himself in 1580, and did not regain his liberty till five years after. In the time of the league he rendered signal service to Henry IV., and was killed by a musket-shot at the siege of Lamballe, in 1591.

NOUREDDIN-MAHMOUD, MALEK-EL-ADEL, sultan of Syria and Egypt, was son of Emadeddin, sultan of Aleppo, and was born in 1118. He succeeded his father in 1145, and continued the war with the Christians; his successes in which, and especially his complete conquest of Edessa, gave occasion to the second crusade, preached by St Bernard, and led by Louis VII. and the Emperor Conrad III. Nouruddin compelled the crusaders to raise the siege of Damascus, their own want of discipline was fatal to success, and in 1149 they retired. The sultan immediately attacked and defeated Raymond, prince of Antioch, who fell in the battle. The next year he unsuccessfully besieged Tell-basher, a dependency of Edessa held by Josceline de Courtenay; but he soon after captured Josceline, and made himself master of Edessa. In 1154 he added Damascus to his dominions, and made the city his capital. The war continued, and, in 1159, Nouruddin was defeated by the Christians near the lake of Genesareth, and was menaced by the Greek Emperor Manuel Comnenus. By giving up to Manuel all the Christian captives, 6000 in number, he induced him to relinquish his enterprise. And soon after one of his generals defeated and made prisoner the famous Renaud de Chatillon, who was kept in captivity at Antioch for sixteen years. Nouruddin, being called in to support one of the rival claimants to the caliphate of Egypt, effected the conquest of it, and made it his own. The great Saladin was governor, but was ambitious of being an independent sovereign, and refused to obey the orders of Nouruddin. The latter was preparing to pass into Egypt when he was attacked with a quinsy and died, 1173. Friends and foes have agreed in the praise of this great ruler; among the Moslems he is revered as hero and saint.

NOVALIS. [HARDENBERG, FRIEDRICH VON.]

NOVATIAN, or NOVATIANUS, a celebrated heresiarch of the 3rd century, founder of the sect named after him. He adopted the doctrine taught by the presbyter Novatus, that it was sinful to admit persons who had once lapsed to idolatry to communion; a practice then universal in the church. This produced a schism, in which Novatian had many partisans. In 251 Novatian got himself elected bishop of Rome, in opposition to

Cornellus; but his election was soon annulled. His sect, after the council of Nice, fell into disrepute in the Western empire, though it continued to prevail for a much longer period in the East.

NOVERRE, JEAN GEORGE, a great master of the art of dancing, was born at Paris, in 1727. He was destined by his father for the military profession; but his taste led him to prefer the ballet. In 1746 he composed for the comic opera his Chinese ballet, which made an extraordinary sensation; and he acquired so much celebrity, that Garrick invited him to England. He afterwards entered into the service of Marie Antoinette, who appointed him chief ballet-master of the royal academy of music; but he suffered greatly at the revolution, and passed the latter years of his life in narrow circumstances. In his "Lettres sur la Danse" he proposed a radical reformation of his art; and at the time of his death he was engaged on a "Dictionary of the Art of Dancing." Died, 1810.

NOY, WILLIAM, a celebrated lawyer of the 17th century, who may be considered as one of the main authors of the civil war between Charles and his subjects, inasmuch as the fatal project of attempting to raise supplies by what was called ship-money, is said to have been advised by him. He had originally laboured to abridge the royal prerogative; but being made attorney-general, he suddenly veered about, and became its most strenuous supporter. Died, 1634. Among his works are, "A Treatise on the Grounds and Maxims of the Law of England," "The Perfect Conveyancer," and "The Complete Lawyer."

NUCK, ANTONI, a Dutch anatomist, who was professor of anatomy, and president of the college of surgeons, at Leyden, where he died in 1692. He was the discoverer of a new salivary duct, of the communication between the glands and the lymphatics, and of a mode of making preparations of the lungs by inflation. His principal works are, "De Vasis aquosis Oculi," "De Ductu Salivari novo," and "Operationes et Experimenta Chirurgica."

NUMENT, GEORGE GRENVILLE, Lord, second son of the marquis of Buckingham, and brother of the duke, was born, 1789. In his younger days he was known as Lord George Grenville; under which name he published a long poem on that portion of the Peninsular war of which Portugal was the scene. In 1812 he succeeded to an Irish barony on the death of his mother, who had been created a baroness in 1800, with remainder to her second son. During four parliaments previous to the reform bill, he sat in the House of Commons for Aylesbury, displaying great ardour as a politician, and taking an active part in promoting parliamentary reform, and all the liberal measures of the day. On the accession of the Whigs to office in the year 1830, he was appointed a junior lord of the treasury, and in that capacity he introduced the only legislative measure with which his name was connected—a bill for the abolition of certain oaths, which it was formerly necessary to take for the most ordinary objects connected with the revenue laws, and the substitution of

simple declarations in their place. In 1832 he vacated his seat in parliament on being appointed lord high commissioner of the Ionian Islands, which office he held until 1833. He was recalled during the short administration of Sir Robert Peel, and he was an unsuccessful candidate for Aylesbury at the general elections of 1837 and 1839, but succeeded in getting returned in 1847. Besides the poem above mentioned, Lord Nugent was the author of several other works. His "Memorials of Hampden and his Times," published in 1831, was favourably noticed in the Edinburgh Review by Macaulay; and his "Lands, Classical and Sacred," possesses much merit. Died, 1850.

NUMENT, LAVALL, Count, field-marshal in the service of Austria, and lieutenant-general in the British army, was born of an illustrious family in Ireland, in 1777. He went to Austria at the age of twelve, and at seventeen entered the Austrian army. His ability and services procured him rapid promotion and honours, and in 1809 he was made major-general. Soon after named second plenipotentiary at the congress which preceded the marriage of Napoleon with Maria Louisa, he refused to sign the conditions insisted on by Napoleon, and returned to England. He was made major-general in the British army, and afterwards lieutenant-general. After being employed on several diplomatic missions, he resumed active service as a soldier in 1813, drove the French out of Illyria, with Admiral Fremantle took Trieste, and engaged the French in several actions, till peace was proclaimed in 1814. He contributed to the defeat of Murat in 1815; was afterwards captain-general of the Neapolitan army, and in 1820 re-entered the Austrian service, was made general in 1838, commanded in Italy and Hungary in 1848-9, and received the bâton of field-marshal. He took part in the war with Sardinia under Radetzky, and in the war with France and Sardinia in 1860. He was a Roman prince, Magnate of Hungary, Knight Grand Cross of the Golden Fleece, and Knight of many other orders. Died in Croatia, August, 1862.

NUMENT, THOMAS, miscellaneous writer, was a native of Ireland, but settled in London, where he produced numerous works. He was an LL.D. and F.S.A.; and occupied himself in writing and compiling a variety of publications. Among them are, "A French and English Dictionary," which has been often reprinted; "Travels through Germany," 2 vols.; translations of Condillac's Essay on the Origin of Human Knowledge, President Hénault's History of France, &c. Died, 1772.

NUMA POMPILIUS, second mythical king of Rome, a Sabine by birth, and elected, according to the legends, after the death of Romulus. Wise, devout, and peace-loving, he reigned about 40 years, and, inspired by the nymph Egeria, he gave the Romans all the institutions of their religion. The foundation of the gateway bearing the name of Janus was attributed to him, and the passage was closed throughout his reign. It is a common error to call this gateway the "temple of Janus." NUMERIANUS, MARCUS AURELIUS, Ro-
man emperor, who succeeded to the throne
on the death of Carus, his father, A. D. 282;
but was murdered by his father-in-law, after
a reign of 8 months. He displayed con-
siderable talent both as a writer and an
orator.

NUNEZ ALVAREZ PEREIRA, a distin-
guished Portuguese commander of the 14th
century, was born about 1560. In the troubles
which followed the death of King Ferdinand
in 1383, he took the side of Don John, elected
regent of the kingdom, and was made one of
his counsellors of state. Nunez served him
faithfully, and was engaged in the war with
the king of Castille for about 25 years; his
principal exploits being the brilliant victor-
ies of Atoleir in 1584, of Aljubarota in Aug-
ust, 1586, and of Valverde in October of the
same year. The king made him constable,
and gave him the duchy of Braganza; and
his only daughter and heiress, in 1414,
married Don Alfonso, and thus gave origin
to the royal house of Braganza. Nunez took
part with distinction in the expedition
against Ceuta in 1415, retired to a monastery
about 1422, and there spent the last nine
years of his life in the exercises of devotion
and charity.

NUNEZ, FERNAN DE GUZMAN, a knight
and commander of the order of St Jago, in
the 16th century, was born at Valladolid,
studied at Bologna, and on his return home
was appointed Greek professor at the uni-
versity of Alcalá, by its founder, Cardinal
Ximenes, who also employed him on his
celebrated Polyglott. He afterwards re-
moved to Salamanca, where he was also ap-
pointed Greek professor; and died in 1553.
His writings chiefly consist of annotations

on the works of Seneca, Pliny, and other
classic authors.

NUVOLONE, CARLO FRANCESCO, a celo-
brated painter, born in 1608, at Milan, where
his father was an eminent artist, and directed
his studies with great success. He adopted
Guido's style, and his Madonnas were highly
valued. Died, 1651.—His brother, GIUSEPPE
NUVOLONE, also executed several fine pic-
tures, particularly one of St Dominic raising
a dead man to life. He died, aged 84, in 1703.

NUZZI, MARIO, commonly called Mario
dà Fiori, a celebrated flower-painter, was
born in 1603, at Penna, in the kingdom of
Naples. His pictures were highly esteemed,
and he was chosen a member of the Academy
of St Luke. Died, 1673.

NYE, PHILIP, an eminent Nonconformist
divine of the Commonwealth, was born of a
good family in Sussex about 1596. He gradu-
ated M. A. at Oxford, entered the church,
and after officiating three years in a London
parish he had to flee into Holland, to escape
persecution. Returning in 1640, he was pre-
sented by the earl of Manchester to the living
of Kimbolton, in Huntingdonshire. He ac-
tively promoted the taking of the Solemn
League and Covenant, sat in the Assembly of
Divines, and officiated in St Margaret's
Church, Westminster, on occasion of the
taking of the Covenant by the two Houses
of Parliament and the Assembly. For his
services he was presented to the rectory of
Acton, near London. Nye took part in vari-
ous other political affairs, was named one of
the "tryers" for examining ministers, and
was one of the leaders in the assembly of Con-
gregational churches at the Savoy in 1658.
Deprived of his living after the Restoration,
he spent the rest of his life in retirement.
He was author of numerous works, mostly
of temporary interest. Died at London, 1672.

O.

OATES, TITUS, the contriver of the *Popish*
Plot, born about 1619, was the son of an
Anabaptist preacher; received his education
at Merchant Taylors' School, and at Cam-
bridge; and afterwards entered into holy
orders. In 1677 he pretended to be a convert
to the Roman Catholic religion, and was ad-
mitted into the society of Jesuits; but sub-
sequently declared himself a Protestant, and,
in conjunction with one Dr Tongue, gave
information of a pretended popish plot for the
overthrow of the Protestant faith; falsely
accused several Catholic lords, and other
persons of quality, of being concerned in
it; and having excited a popular ferment,
brought Lord Stafford, among other inno-

cent men, to the scaffold. Such was the
credulity of the times, that he was rewarded
with a pension of £1200 per annum, and
lodged for safety at the palace of Whitehall.
On the accession of James II., however, he
was thrown into prison, and indicted for
perjury; and, being convicted, was sen-
tenced to stand in the pillory five times a
year during his life, and to be whipped from
Aldgate to Newgate, and thence to Tyburn.
Though the whipping was very severely in-
flicted, he recovered from its effects; and,
in the reign of William III., this execrable
tool of faction obtained his liberty and a
pension of £400 a year. He died in 1705.

OBERLIN, JEREMIAS JACOB, a German

antiquary and philologist, was born at Strasburg, in 1735. He began his career as teacher in the gymnasium of his native place, and after he had extended his knowledge and reputation by his travels, he was transferred to the university; in 1782 he obtained the chair of logic and metaphysics; to which, in 1787, was added the office of director of the gymnasium. The French revolution interrupted his learned labours; and in 1793 he was imprisoned at Metz, and treated with great cruelty; but at the termination of Robespierre's tyranny he was liberated, and resumed his literary occupations. He published valuable editions of Tacitus, Casar, Ovid, and Horace; and produced several works on archaeology, statistics, &c. Died, 1806.

OBERLIN, JEAN FRÉDÉRIC, Protestant pastor of the Ban de la Roche, was a brother of the preceding, and was born at Strauburg, in 1740. He was educated at the university of his native city, and under the influence of deep religious impressions, entered the church. After being engaged some years as private tutor he settled, in 1767, at Waldbach, one of the villages of the Ban de la Roche, as pastor of the Ban. He carried on with the utmost zeal, discretion, and perseverance the arduous task begun by his predecessor in that office, of civilizing, humanizing, and Christianizing the half-barbarous people of his district. Road-making, planting of timber and fruit trees, agriculture, and various manufacturing employments were introduced by his influence and example. Opposition of ignorance and stupidity gave way before the mild force of his teaching and deeds, and the waste became fruitful, and the people industrious and instructed. He did all and got all done religiously; embodying in his life the truth that "work is worship." His services were rewarded with the affection and gratitude of his people; and also with honours of another kind—the cross of the Legion of Honour, and a gold medal of the Royal Agricultural Society of Paris. Oberlin married in the year after his settlement in the Ban, had a large family, and lost his wife in 1784; when Louisa Schepfer, his servant and one of his school-teachers, became his housekeeper. She, too, was distinguished for her piety and philanthropy. Oberlin died, June 1, 1826.

O'BRIEN, WILLIAM SMITH, one of the most noted leaders of the so-called National Party of Ireland, was of an illustrious family whose descent is traced back to Brian Borohme, the king of Ireland, who fell at the battle of Clontarf, in 1014. He was born in 1803, received his education at Harrow School and Trinity College, Cambridge, and in 1826 he was elected member of parliament for Ennis. In 1835, he became member for Limerick, and sat for that town thirteen years. Although he started on his political life as a Tory, and distinguished himself as the opponent of Daniel O'Connell, at the famous election for Clare, he passed gradually over to the "extreme left," and was the associate and zealous supporter of "Young Ireland." He was one of the deputation from the Irish Confederation to the Republican government of France, in 1848; vehem-

ently opposed in the House of Commons the passing of a Coercion Bill, and only escaped arrest by the lord-lieutenant, for his project of an insurrection, by suddenly quitting Dublin. In July, under his instigation, the insurrection began at Mullinabone; and on the 25th took place the ridiculous affair of insurgents attacking the cottage which was held by a party of police, and O'Brien among the eabbages carrying on a parley with the besieged. O'Brien fled, his rebels were dispersed, wounded, or killed, and the insurrection was over. After hiding a short time among the mountains, O'Brien was arrested at Thurles railway-station, was imprisoned at Dublin, and in September was tried, with Meagher and Mac Manus, by a special commission. They were convicted of high-treason, and the usual sentence was passed on them—to be hanged, drawn, and quartered—but it was commuted to transportation for life. In Van Diemen's Land Mr O'Brien displayed his truthful and honourable character in first refusing to promise that he would not try to escape, and afterwards, having made such a promise, in faithfully keeping it. A free pardon was granted him in 1856, and after travelling for a time, he returned to Ireland. He died at Bangor, on the 18th June, 1861, and his remains were removed to his native country.

OCCAM, or OCKHAM, WILLIAM, an English monk and scholastic philosopher of the 14th century, was a native of Ockham, in Surrey; studied at Merton College, Oxford, under the celebrated Duns Scotus; and obtained the name of "the invincible doctor." He wrote against Pope John XXII., whom he treated as a heretic, and joined the anti-pope, Nicholas V., set up by the Emperor Louis of Bavaria. For this he was excommunicated, and he died in 1347. As a philosopher Occam opposed the doctrines of his master, Scotus, and became the head of the so-called Nominalists. Among his works is a "Summa totius Logice."

OCHINUS, or OCHINO, BERNARDINO, an Italian monk, was born at Sienna, in 1487. His eloquence was so much admired, that Pope Paul III. made him his confessor. Ochinus, however, embraced the doctrines of Luther, and went first to Geneva, and next to England, where he obtained a prebend in Canterbury cathedral; but on the accession of Queen Mary he retired to Strasburg, whence he removed to Zurich, and became minister of the Italian church; but was banished in 1563, for writing his dialogues in defence of polygamy. He then went to Moravia, where he joined the Socinians, but died of the plague the year following. He wrote the "Image of Antichrist," and several other controversial books.

OCHS, PETER, chancellor and grand tribune of the canton of Basel, was born in 1749; and having finished his neceadical studies, was soon distinguished for his legal and political knowledge. In 1795 he was chosen to assist in various important negotiations and in organizing a constitution for Basel, under the influence of France. He was a member of the Helvetic senate and directory, and subsequently went to Paris,

and, after remaining there some time, was appointed by Buonaparte a member of the council of state, under the new Helvetic government, which subsisted till the return of the Bourbons in 1814. He was author of "Histoire de la Ville et du Pays du Jûrie," 5 vols.; "Projet de Constitution Helvétique," and some dramatic pieces. Died, 1821.

OCHTERLONY, SIR DAVID, bart. of the East India Company's service, was born at Boston, in New England, in 1738. At the age of 18 he went to India as a cadet, and rose, by regular gradation, to the rank of major-general, in 1811. In the Nepanese war he distinguished himself by a series of successful operations and brilliant successes, and was rewarded with the order of the Bath, the dignity of baronet, and a pension of £1000 per annum. Died, 1825.

OCKHAM, WILLIAM. [OCCAM.]
OCKLEY, SIMON, a learned divine and eminent orientalist, was born at Exeter, in 1678, and educated at Queen's College, Cambridge. In 1705 he was presented to the vicarage of Swavesey, in Cambridgeshire; and in 1711 he was chosen professor of Arabic; and died in Indigence, in 1720. His most important work is the well-known "History of the Saracens," which appeared in 2 vols., in 1708 and 1718. His other works are, "Introductio ad Linguas Orientales," "The Improvement of Human Reason, or the Life of Hal Elm Yoh'dham," translated from the Arabic, &c.

O'CONNELL, DANIEL, of Derrynane Abbey, the great Irish "Agitator," or "Liberator," as he delighted to style himself, was the son of a small landed proprietor in the county of Kerry, where he was born, Aug. 6, 1775. Educated at the Catholic College of St. Omers, and at the Irish seminary at Douay, he at first intended to enter the church, but after the repeal of the act which prohibited Roman Catholics from practising at the bar, he became a student of Lincoln's Inn in 1794, was admitted a barrister in 1798, and soon acquired a large practice, which yielded him a handsome income. In 1809 he became connected with the associations which had the emancipation of the Catholics for their object, and the powers of eloquence, together with the boundless zeal which he displayed in this cause, soon made him the idol of his Catholic, and the dread of his Protestant, countrymen. The vehemence with which he denounced the wrongs of his country and its so-called "oppressors" frequently involved him in personal rencoures with his political opponents. In 1815, having applied the epithet "beggarly" to the Dublin corporation, he was challenged by Alderman d'Esteire, who resented it as a personal insult. The challenge was accepted, but the alderman fell. The same year Mr O'Connell received a hostile message from Mr Peel, then secretary for Ireland; but their meeting was prevented by the police, who had obtained knowledge of the affair; and Mr O'Connell soon afterwards resolved that he would thenceforward neither send nor accept a challenge for any injury that he might inflict or receive; a resolution to which he stedfastly adhered. Several years elapsed before Mr O'Connell's continued

efforts for the enfranchisement of the Irish Catholics were followed by any adequate result. But in 1823, in conjunction with Mr Shell, he founded a new Catholic association, which soon extended over the whole of Ireland, and from that period down to his decease, his personal history is identified with that of Ireland. In 1828, stimulated by his friends, and "encouraged by the strongest assurances of support, Mr O'Connell resolved, notwithstanding that existing disabilities precluded all hopes of legal success, to become a candidate for a seat in parliament; and a vacancy having occurred in the representation of the county of Clare, he was nominated in opposition to Mr (afterwards Lord) Fitzgerald, who had represented that county for many years. A most violent contest ensued, perhaps unparalleled in the history of electioneering. But Mr Fitzgerald's own connections, the influence of the government, and the power of the gentry, were unavailing against the ardour and determination of Mr O'Connell's friends; and on the 5th of July, 1828, he was returned to parliament by a large majority of the Clare electors. He lost no time in presenting himself at the table of the House of Commons, and expressed his willingness to take the oath of allegiance; but, refusing the other oaths, he was ordered to withdraw. Discussions in the House and arguments at the bar ensued; the speedy close of the session, however, precluded any practical result. Agitation throughout every part of Ireland now assumed so formidable a character, that ministers apprehended a civil war, and early in the next session the Roman Catholic Relief Bill was introduced and carried. Mr O'Connell was, therefore, in the month of April, 1829, enabled to sit for Clare without taking the objectionable oaths; but it was necessary that a new writ should issue, under which he was immediately re-elected. At the death of George IV., Mr O'Connell withdrew from the representation of Clare, and was returned to the new parliament for the county of Waterford. In the House of Commons, elected in 1831, he sat for his native county (Kerry). Dublin, the city in which the greater part of his life was spent, enjoyed his services as its representative from 1832 till 1836, when he was petitioned against and unseated, after a long contest, before a committee of the House of Commons. He then for some time represented Kilkenny; but, at the general election in 1837, he was once more returned for the city of Dublin, and in 1841 for the county of Cork. Mr O'Connell had thus a seat in the House of Commons for 18 years, in 7 several parliaments, and for 6 different constituencies. In 1841 he was elected lord mayor of Dublin. The return of the conservatives to power in the autumn of that year was the signal for renewed agitation in Ireland. In the following year a repeal of the union was demanded by every parish and hamlet in Ireland; and in 1843, 'monster meetings' were held on the royal hill of Tara, on the Curragh of Kildare, the rath of Mullaghmast, and other renowned localities. A meeting for Clontarf was fixed for the 8th of Oct., when the government interfered, and prosecutions were commenced.

Mr O'Connell was sentenced to pay a fine of £2000 and to be imprisoned for a year. This judgment was afterwards reversed by the House of Lords; but the prosecution and answer to its purpose, O'Connell's credit as a politician was impaired, and the costs of his defence had nearly exhausted the funds of the Repeal Association. The return of the Whigs to power in 1816, and Mr O'Connell's avowed adherence to them, introduced dissension among those with whom, for 50 years, he had possessed 'a voice potential.' The opposition which aforesaid he could put down with a jest, or awe into silence with a frown, now irritated and subdued him. He retired from the arena of strife, and commenced a pilgrimage in 1817, more for devotion than for health, towards Rome; but he had proceeded no farther than Genoa, when, with comparatively little suffering, he expired, in his 72nd year. His heart was embalmed, and carried forward to Rome; and his body was brought to Ireland for interment." To great abilities, marvellous activity and energy, and an extraordinary gift of popular eloquence, he united a thorough knowledge of and identification with the Irish character. By these qualities, and by long service on behalf of the rights of his Roman Catholic fellow-citizens, he obtained, and nearly to the last retained, an almost super-human power over the great body of the Irish people. But even if we should admit that he was a patriot at heart, and that he had noble desires for his country's welfare, it is but too manifest that he was altogether careless as to the means for accomplishing his ends. His political life was tinged throughout with the policy that distinguished that dangerous order in which his religion has found at times her ablest but most unscrupulous champions. The last years of his life were frittered away in the pursuit of an impracticable object, and his last moments were embittered by the spectacle of his unhappy country torn by political dissensions which he had mainly fostered, and groaning under a load of pestilence and famine. The only substantial literary achievement with which his name was connected are his "Memoirs of Ireland." Died, 1847. A statue of O'Connell, by Foley, is to be erected in Dublin.

O'CONNOR, CHARLES, a learned Catholic clergyman, who for many years was a resident in the family of the duke of Buckingham, at Stowe, as librarian to that nobleman. He was the author of "The Letters of Columbanus," 2 vols.; a "Narrative of the most interesting Events in Modern Irish History," and a collection of the ancient Irish Chronicles; his studies having been chiefly directed to the elucidation of the history and antiquities of Ireland. He died in 1828, at Ballinagar, the seat of his brother, the O'Connor Don.

OCTAVIA, sister of Augustus, renowned for her beauty, purity of character, and practical wisdom. She was first married to Marcellus, a noble Roman of consular dignity, and soon after his death, B. C. 40, to Mark Antony. This marriage, it was hoped, would strengthen the new alliance between Octavius, her brother, and Antony, her husband; and her influence more than once

prevented fresh civil war, and alleviated the sufferings of its victims. But Antony had seen Cleopatra, his passion for her had only slumbered; and he treated his wife with contempt and cruelty which Octavius could not forgive, and which became the occasion of renewed war. When Antony set out for the East again, Octavia was not allowed to accompany him. She mourned sincerely his miserable end, and brought up all his children as her own. To all her bitter trials was added, B. C. 23, that of the death of the young Marcellus, her son by her first husband, and the death of her son by her second husband, the destined successor of Augustus. She never rose above this sorrow, nor would she hear the name of her son mentioned. She died, B. C. 11.

OCTAVIANUS. [AUGUSTUS.]
ODENATUS, SEPTIMIUS, an Arabian prince, the husband of Queen Zenobia, and sovereign of Palmyra. He espoused the cause of the Romans in their contests with Persia; defeated Sapor, and was admitted by Gallienus to participate in the imperial authority. He was assassinated A. D. 267.
ODESCALCHI, BENEDETTO. [INNOCENT XI.]

ODESCALCHI, MARC ANTONIO, an Italian of high rank, who devoted his time and fortune to acts of philanthropy. He was brother to Pope Innocent XI., who offered him many high dignities in the church. Observing that though Rome contained several hospitals for the relief of the poor of different nations, there were many strangers who could find no asylum in any of them, but were obliged to take shelter in the porches of churches, the porticos of palaces, or the ancient ruins of the city, he converted his house into an hospital for the reception of these outcasts, without distinction. Here he fitted up 1600 beds, and employed a number of tailors constantly in making clothes for the objects of his bounty. If in his rides he chanced to observe a forlorn wanderer, he would stop, take him into his carriage, and convey him to his mansion. At his death, in 1670, he left all his property to the support of the hospital.

ODESCALCHI, TOMASO, another member of the same family, who was almoner to Pope Innocent XI. In imitation of the preceding, he gave himself up to works of charity. Perceiving that in the hospital of St Gail there were a number of children destitute of education, he conceived the idea of erecting an asylum for their reception; which he carried into execution, beginning with 38 children, who were instructed, and brought up to industry. The number soon increased, through the liberality of Pope Innocent, to 70; and, in 1686, Thomas Odescalchi laid the foundation of a large hospital for the education and employment of poor children in weaving cloth. This pious prelate died in 1692, and left considerable funds for the support of his institution, to which he gave the name of St Michael de Rippegrande.

ODEVAERE, JOSEPHUS DIONISUS, a distinguished Belgian painter, born at Bruzes in 1778. He studied in the Academy of Bruges, became afterwards a pupil of David at Paris, won the grand prize in 1804,

Flemish painter, born at
Brussels, studied in the Academy
of Rome afterwards a pupil of
Giovanni Stanetti, and won the grand prize in 1804,

and was sent to Rome, where he spent eight
years. He was afterwards named painter to
William I., king of the Netherlands, and
knight of the Lion of the Netherlands.
Among his most celebrated paintings are—
the Death of Phocion, the Coronation of
Charlemagne, Iramante introducing Raf-
faelle to Julius II., Battle of Nieuport,
Triumph of Cleopatra, &c. Died, 1830.

ODINGTON, WALTER, called Walter of
Evesham, was a monk of that monastery in
Worcestershire, and lived in the reign of
Henry III. He was an astronomer, mathe-
matician, and musician; on each of
which subjects he wrote treatises. "De
Motibus Planetarum et de Mutatione Aeris"
is attributed to him; and Dr Burney ob-
serves of his treatise entitled "Of the Specu-
lation of Music," which is preserved in
the library of Bene't College, Cambridge,
"that if all other musical tracts from the
time of Boethius to Franco and John Cotton
were lost, with this MS. our knowledge
would not be much diminished."

ODO, Sr, a celebrated abbot of Clugni, in
France, was born at Tours, in 879, and died
about 943. He introduced the most rigorous
discipline into his order, obtained a high
reputation for sanctity and wisdom, and
wrote several books.

ODO, archbishop of Canterbury in the
tenth century, was the son of a Danish chief-
tain, who took part in the invasion of Eng-
land in 870. Converted to Christianity and
persecuted by his father, he was adopted as
son by Athelm, an Anglo-Saxon noble, who
had him well-educated, and induced him to
enter the church. Odo's tastes were for a
soldier's life. In 887, he accompanied
Athelm on a visit to Rome, and eleven years
later his patron died. Odo was made bishop
of Ramsbury in 926, fought at the famous
battle of Brunanburgh in 937, and was se-
lected by Dunstan, then minister to king
Edmund, to be archbishop of Canterbury in
942. He previously entered the Benedictine
order. Odo made great improvements in
the cathedral, and set himself to effect three
measures of reform,—the separation of the
clergy from their wives, the expulsion of
the secular clergy from the cathedrals, and
the introduction of the Benedictine rule
into the monasteries. In carrying them out
he showed himself the soldier and barbarian
to the last, so that he got the name of Odo
Severus, though his agent, Dunstan, called
him the Good. The climax of his cruelty was
reached when, in 955, shortly after the coron-
ation of Edwy, he divorced the young king
and Elizabeth, and had the queen forcibly
carried off and branded in the face with hot
irons. Odo was employed on several diplo-
matic missions by Athelstan, Edmund, and
Edred. Died, June, 958, and was buried at
Canterbury.

ODO, bishop of Bayeux and earl of Kent,
was born in Normandy about 1032. He was
brother by the mother's side of William,
duke of Normandy (the Conqueror), and
was named by him bishop of Bayeux in
1049. He took a very active part in the
preparations for the expedition to England
in 1066, blessed the troops on the morning
of the battle of Hastings, and took part in

the battle. He was rewarded with a grant
of the town of Dover, and on William's re-
turn to Normandy Odo was charged with
the government of England, William Fitz-
Osborn being associated with him. They
exercised their power with the most pitiless
rigour, and quenched in blood the revolts
provoked by their tyranny. Odo amassed
immense riches, and had a large share of
power during the greater part of William's
reign. In 1080, he was sent to Durham to
lay waste and slay with fire and sword for
the frequent revolts of the wretched people.
Not at all satisfied with his almost royal
power and wealth, and irritated by the ap-
pointment of Lanfranc to the see of Canter-
bury, Odo cherished the hope of getting by
craft, money, or power the papal chair. He
had a palace built at Rome, sent his agents
there with rich presents for bribes, and
resolved to go himself, attended by Hugh,
earl of Chester, and other powerful barons.
The king, however, heard of the project, and
ordered the arrest of Odo, who had reached
the Isle of Wight; and as none of the officers
would lay hands on a bishop, the king
seized him, not, he said, as bishop, but as
earl of Kent. Odo was deprived of his
dignities and estates, and kept a prisoner at
Rouen till William's death, in 1087. Re-
stored to liberty and reinstated in his earl-
dom of Kent, he joined in a conspiracy to
dethrone William Rufus, but was besieged
in Rochester Castle, and compelled to sur-
render, obtaining leave to retire to Bayeux.
He retained great influence over Robert,
duke of Normandy; advised the seizure of
Prince Henry of England, in 1091, and was
charged with the custody of the prisoner.
Odo assisted at several councils, and, in
1096, set out for the Holy Land, but died at
Palermo early in the following year. The
famous Bayeux Tapestry was given to the
cathedral by Odo.

ODO OF KENT, was a Benedictine monk,
who became abbot of Battle, and died in
1200. Odo was a friend of Thomas à Becket,
and a panegyric of him was written by John
of Salisbury.

ODOACER, first barbarian king of Italy,
was son of one of Attila's officers. He en-
tered into the Imperial guards, in which
he rose to an honourable rank. In 476 he
was chosen chief of a confederate army, and
was saluted by them king of Italy. He de-
feated the patrician Orestes at Pavia,
banished his son, Romulus Augustus, last
Roman emperor, and made Ravenna, last
seat of his kingdom. He obtained the title
of Patrician from Zeno, emperor of the East,
and did not assume the Imperial ensigns.
By his wise and honourable administration
he showed himself worthy of the dignity to
which he was raised; but misery, desolation,
and gradual depopulation were the promi-
nent features of the condition of his king-
dom. In 489, Theodoric, king of the Ostro-
goths, invaded Italy, and Odoacer was three
times defeated by him: first near Aquileia,
then near Verona, and lastly near Ravenna.
He was then besieged three years in Ra-
venna, and at length, compelled by famine
and the clamours of the people, he made
a treaty with Theodoric, by which they

were to rule jointly. But after a few days Odoneer was assassinated by his conqueror, March, 493.

OECOLAMPADIUS, one of the most illustrious German reformers, was born in Franconia in 1482. His original name, JOHANN HAUSCHLEIN, was, according to the fashion of the time, turned into its Greek equivalent. He studied chiefly at the university of Heidelberg, became acquainted with Reuchlin, Capito, and Erasmus, assisted the latter in his edition of the Greek Testament, and after much cautious consideration adopted the views of Luther. About 1519 he retired to a monastery, where he spent two years; his opinions becoming more decided, he quitted it, and found an asylum, like other reformers, with the noble knight Franz von Sickingen. He soon after settled at Basel, as pastor and professor of theology. He took the same view of the eucharist as Zwingli; attended several theological conferences, and died, 1531. He was a man of considerable theological learning, published commentaries on the Bible, translations from the fathers, and other works.

ORDER, GEORGE CHRISTIAN, an eminent physician and botanist, was born at Auspach, in 1724. He studied at Göttingen, under Haller, by whose interest he became professor of botany at Copenhagen; but, on account of his intimacy with the unfortunate Struensee, he was obliged to retire to Oldenburg, where he died in 1791. His principal work is, "Flora Danica," 3 vols. fol.

OEHLenschLAGER, ADAM, the most celebrated dramatic poet of Scandinavia, was born at Copenhagen, 1777. When still a child he evinced great skill in writing verses; and even in his 9th year he wrote short comedies for private theatricals, in which the chief performers were himself, his sister, and a friend. These and similar attempts created the wish to go upon the stage; and when he was in his 17th year he put his design in execution. But he soon found that the stage was not in unison with his inclinations; and he abandoned it first for the study of law, and afterwards for general literature. In 1805 he left Copenhagen with a stipend from the Danish government on a lengthened tour through Germany and Italy; and on his return, in 1810, he was appointed to the chair of aesthetics in the university of Copenhagen, where he laboured assiduously till his death. His earliest works were composed in Danish, but he rewrote most of them in German, and Germany has given them a prominent place in her own literature. His most important works are, "Hakon Jarl," "Correggio," "Palnatoke," "Aladdin," "Der Hiltten knabe," &c. His "Autobiography" is a beautiful narrative, fully displaying the qualities for which he was distinguished through life—strong feelings and earnestness of purpose—and which gained him universal respect while he lived, and more than regal honours at his death. Died, Jan. 28, 1850.

OERSTED, HANS CHRISTIAN, the discoverer of electro-magnetism, was born in Denmark, in 1777. When twelve years of

age he became assistant to his father, who was an apothecary; but in 1791 he entered the university of Copenhagen, where he soon distinguished himself. In 1801 he left Copenhagen on a lengthened tour through Germany, France, and Holland; and, in 1806, he was appointed to the chair of natural philosophy, in Copenhagen, where he laboured assiduously till his death. It would exceed our limits to mention the numerous works which Oersted gave to the world, during his long and brilliant career. In 1819, his labours were crowned by his grand discovery of electro-magnetism. Renown and honourable testimonials streamed in upon him from every side. Many learned societies elected him as their member; the Royal Society of England sent him the Copley Medal, and the Institute of France, as an extraordinary acknowledgment, presented him with one of the mathematical class prizes, worth 3000 francs. In 1836 he visited England, and at the meeting of the British Association held at Southampton in that year, Sir John Herschel, in reference to his grand discovery, used these words:—"The electric telegraph, and other wonders of modern science, were but mere effluences from the surface of this deep recondite discovery, which Oersted had liberated, and which was yet to burst with all its mighty force upon the world. If I were to characterize by any figure the advantage of Oersted to science, I would regard him as a fertilizing shower descending from heaven, which brought forth a new crop, delightful to the eye, and pleasing to the heart." How all the world knows. On his return to Copenhagen, he continued to labour in his scientific pursuits, varied with excursions into the regions of politics and literature, till his death, which took place in 1851. His "Soul in Nature" has been translated into English.

OFFA, king of Mercia, succeeded Ethelbald in 753. He made war on Kent and Wessex, invaded Wales, and in 779 had the great dike made between his kingdom and Wales. In 792, he murdered Ethelbert, king of the East Angles, and took possession of his kingdom. Died, 794.

OGE, a creole of St Domingo, who at the commencement of the French revolution, having occasion to visit Paris on mercantile affairs, was there admitted into the society of Amis des Noirs, or Friends of the Negroes, and warmly solicited, though ineffectually, the National Assembly to grant to men of colour the rights of equality. Returning to his native island in 1790, with a determination to effect by force what was denied to his solicitations, he issued a proclamation, inviting all the people of colour, as well as the negro slaves, to join him. At first the insurgents demanded nothing but what was just,—freedom and political equality; but their cause was soon disgraced by crimes of the most atrocious description. These, however, were not attributable so much to Oge, as to his lieutenant, Chavannes, a sanguinary wretch, who delighted in deeds of violence. At length they were overpowered by the regular troops sent against them.

and Ogd and Chavannes were condemned to be broken on the wheel. When the former heard his doom, he took a quantity of black seeds in the hollow of his hand, and covered them with a small quantity which were white; he then shook them together, and the former remaining uppermost, he exclaimed to his judges, "Where are the whites?"—an impressive allegory, which was fatally verified in the subsequent revolution in that colony.

OGGIONE, or UGGIONE, MARCO DA, Italian painter, born about 1170. He is now chiefly remembered for his copy of the "Last Supper" of Leonardo da Vinci, of whom he was one of the most distinguished pupils. In consequence of the decay of the original picture, this copy is of great value. It was executed for a convent at Pavla about 1510, while the painting was still perfect, and is now in the Royal Academy, London. Oggione worked both in fresco and in oil, and was esteemed one of the best of the Milanese painters. Died, 1530.

OGILBY, JOHN, miscellaneous writer, was born at Edinburgh, in 1600. He became a teacher of dancing, in the practice of which he contracted a lameness. On going to Ireland with the earl of Strafford, he was made deputy master of the revels in that kingdom, and he built a theatre at Dublin; but in the civil war he lost all his property. After suffering great vicissitudes, he returned to England, and settled at Cambridge, where he published a translation of Virgil. At the age of 54 he learnt Greek, and published in 1660 a translation of the *Iliad*, which was followed by the *Odyssey* in 1663. While at Cambridge, he edited a superb impression of the Bible, for which he was remunerated by the House of Lords; and, in 1661, he was appointed to conduct the poetical part of the coronation pageantry. He was also restored to his place of master of the revels in Ireland, where he again built a theatre. In London, after the great fire, he erected a printing-office, and was appointed king's cosmographer; in which capacity he published several volumes of a large atlas, and an account of the great and cross roads of the kingdom, from his own actual survey. Died, 1676.

OGLETHORPE, JAMES EDWARD, an English general, was the son of Sir Theophilus Oglethorpe, of Godalming, Surrey, and was born in London in 1698. He served under Prince Eugene, and, in 1733, distinguished himself by his exertions to found the colony of Georgia, for which he obtained the royal charter. In 1745 he was promoted to the rank of major-general, and was sent against the Scottish rebels, but did not overtake them, for which he was brought to a court-martial, but was honourably acquitted. He died in 1755, at the advanced age of 57, being the oldest general in the service. The private character of Oglethorpe was extremely amiable, and he was eulogized by Thomson, Pope, and Johnson.

OIMACHT, LANDOLIN, a celebrated German sculptor, born in Würtemberg in 1760. After making great progress in his art under Melchior at Frankfurt, he spent two years in Italy, studying the remains of ancient

art, and afterwards lived and worked chiefly at Strasburg. Among his works there are—monuments to Generals Dessau and Küber, Koch, professor of history, and Oberlin. He executed a colossal statue of Adolph of Nassau, at Speyer, and some good busts, among which are those of Lavater and Klopstock. He had several pupils who became eminent. Died at Strasburg, 1834.

OJEDA, ALONZO DE, a Spanish maritime discoverer, was one of the companions of Columbus on his second voyage to the new world in 1493. Having quarrelled with him, Ojeda returned to Spain in 1498, and was at once charged with the conduct of another expedition of discovery, in which he was accompanied by Juan de la Cosa and Amerigo Vespucci. They reached the coast of Brazil, and explored the north-east coast of the South American continent. In 1502 Ojeda and Vespucci made a second voyage together, but on reaching the gulf of Uruba a mutiny broke out, and Ojeda was put in irons. He was left in Hispaniola, but in 1503 was again called into service by the king of Spain, Nicuesa being associated with him. They afterwards separated, and Ojeda founded the town of St Sebastian. Want of provisions compelled him to embark for Hispaniola; and soon after, worn out with hardships and disappointment, he died there.

O'KEEFE, JOHN, a celebrated dramatist, was born at Dublin, in 1748, and was originally intended for the profession of a painter; but his taste for theatrical amusements interfered with his studies, and he obtained an engagement at the Dublin theatre. He continued to perform in that city and in the provincial towns, for 12 years, as a comedian, with considerable success. His ambition to figure as an author led him at the age of 15 to attempt a comedy in five acts. Among his early productions was a kind of histrionic monologue, called "Tomy Lumpkin's Rambles through Dublin," which afforded him abundant scope for the exhibition of broad humour, and was received with applause, not only in Dublin, but at the Haymarket Theatre, London. He left Ireland about 1780, with the view of obtaining an engagement in London; but, as he did not succeed, he applied himself to dramatic composition; and between 1781 and 1798 he produced nearly 50 comedies, comic operas, and farces. Many of these acquired a flattering popularity, and some still keep possession of the stage; among them are "Wild Oats," the "Castle of Andalusia," the "Agreeable Surprise," the "Poor Soldier," "Peeping Tom," the "Young Quaker," &c. In 1800 O'Keefe, who was then blind, and had been reduced by misfortunes to a state of great embarrassment, had a benefit at Covent Garden Theatre, when between the acts of his comedy of the "Lie of the Day," he was led on the stage to deliver a poetical address of his own composition, in which humour and pathos were very happily blended. He subsequently published his "Recollections," or Autobiography; and died, at Southampton, in his 86th year, in 1833. A portrait of O'Keefe, painted by Laurensen, is in the National Portrait Gallery.

OKEN, LORENZ, a distinguished Swiss physiologist and naturalist, born in 1779, was educated at the university of Göttingen, and after teaching medicine a short time at Jena, was appointed professor of natural history at Zürich. In philosophy he was a transcendentalist of the school of Schelling, and he was guided by the principles of that philosophy in all his studies and observations of nature. The work on which his reputation mainly rests is the "Elements of Physio-Philosophy," as the English translation published by the Ray Society is entitled, or "Lehrbuch der Natur-Philosophie," according to the original title. To an observation and suggestion of Oken is owing the origination of the theory of "Unity of Organic Composition," which was worked out to such grand results by Geoffroy Saint-Hilaire, and Professor Owen. To Oken also belongs the merit of the first suggestion of the development of animal forms by cell-growth. Besides the work above-named he was author of a treatise on Generation, and editor of "Isis," a journal of natural history, for thirty years. Died at Zürich, August 11, 1851.

OLAFSEN, EGGERT, a learned Icelander, who studied at Copenhagen, after which he returned to his native island, which he travelled over repeatedly in company with his fellow-student Blarne Paulsen. The result of their observations was printed at Copenhagen in 2 vols. 4to, 1772. Olafsen was then appointed a magistrate in Iceland where he devoted much of his time to natural history and poetry; but, about four years before his death, he applied almost wholly to the study of the Scriptures. He was drowned with his wife in crossing the Breidafjord in 1776.

OLAVIDES, PAUL ANTONIO JOSE, Count de, was born in 1725, at Lima, in Peru, but was educated at Madrid. Charles III. created him a count, and appointed him intendant of the province of Andalusia. He undertook the great work of fertilizing the Sierra Morena, or the Black Mountain; and by his perseverance, and the colonies of Germans he brought thither, it became the seat of agricultural and commercial industry. Notwithstanding the benefits which this worthy man had thus rendered his country, he fell into disgrace, was charged with heresy, tried by the merciless tribunal of the Inquisition, and condemned to eight years' imprisonment in a monastery, and to be incapable of all public employment ever after. He contrived to escape from the convent, and took refuge in France, whither monastic hate pursued him, and he was forced to seek an asylum at Geneva. After the death of Charles III. he was permitted to return to France. He resided there at the revolution; and, under the Reign of Terror, he was imprisoned at Orleans, but was released after the fall of Robespierre. He employed the period of his confinement, and his subsequent leisure, in writing a work, entitled "The Triumph of the Gospel;" and the zealots who had persecuted the author, assuming the merit of having converted him, obtained his recall to Spain, and he retired to his estates in Andalusia, where he died in 1803.

OLBERS, HENRICH WILHELM MATTHIAS, German astronomer, born near Bremen, in 1758. He was educated at Göttingen, and practised all his life as a physician at Bremen; at the same time occupying himself with important astronomical investigations. He owes his reputation chiefly to his discovery of the two asteroids named Pallas and Vesta, the first in March, 1802, and the second in March, 1807. He had a well-constructed observatory, and a good astronomical library; he devised a new method of calculating the orbits of comets, and discovered a new comet in 1815; and made some valuable observations on aerolites and shooting stars. Olbers was a member of the Royal Society of London, and the French Academy of Sciences. Died at Bremen, 1840.

OLDCASTLE, SIR JOHN, Lord Cobham, the first martyr among our nobility, was born in the reign of Edward III. He was an adherent of Wickliffe, whose doctrines he propagated with such zeal, that in the reign of Henry V. he was sent to the Tower, whence he made his escape into Wales. A report was then circulated by the clergy, and sent to the king, that 20,000 Lollards were assembled in St Giles's for his destruction, with Lord Cobham at their head; upon which a bill of attainder was passed against him, and in 1418 he was captured in Wales, brought to London, and burnt in St Giles's Fields. He was a man of high spirit and extensive acquirements, and was author of "Twelve Conclusions, addressed to the Parliament of England."

OLDENBURG, HENRY, natural philosopher and first secretary to the Royal Society of London, was born at Bremen, about 1625. In early manhood he came to London, was engaged as tutor to several young noblemen successively, attending them at Oxford, and becoming himself a student there. He was early the friend of Milton, and of the eminent men of science to whose exertions the Royal Society owed its foundation. In 1662 he was named secretary to the Society, and as such published its "Transactions" for more than thirteen years, from March, 1664. He was author of various political and theological pamphlets, attempted an explanation of the Apocalypse, translated into Latin. It is said, some of the works of Boyle, and carried on correspondence with scientific men in France and Germany. Died, at Charlton near Woolwich, in 1678.

OLDHAM, JOHN, an English poet, was born at Shipton, in Gloucestershire, in 1633. He was educated at Oxford, and was afterwards engaged as private tutor in several families. He next resided with the earl of Kingston, and died, at his home, of the small pox, in 1683. His poems have been several times republished. There is much force and spirit in many of them, though they partake largely of the licentious sentiments which disgraced the age in which he lived.

OLDYS, WILLIAM, antiquary and miscellaneous writer, the natural son of Dr Oldys, a civilian, was born in 1656, became librarian to Lord Oxford, and was employed in the selection of the "Harleian Miscel-

lany;" was appointed Norroyking-at-arms,
and died in 1761. He was the author of
many works, of which the following are the
principal: "The Life of Sir Walter Raleigh,"
"The British Librarian," a useful contri-
bution to bibliography, and more valued now
than formerly, "The Universal Spectator;"
besides several Lives in the Biographia Bri-
tannica, General Dictionary, &c.

OLEARIUS, or ELSCHLAGER, ADAM,
an eminent traveller, was born in 1599, at
Aschersleben, in Anhalt. He received his
education at Leipsic; after which he became
secretary to an embassy sent to Russia and
Persia, by the duke of Holstein. On his
return the prince made him his librarian
and keeper of his museum. He was an able
mathematician; wrote an account of his
"Travels," a "Chronicle of Holstein," and
other works. Died, 1671.

OLIVA, GIOVANNI, an eminent antiquary,
was born in 1689, at Rovigo, in the state of
Venice. He became, successively, professor
of ethics at Azzolo, secretary to the con-
clave at Rome, and librarian to Cardinal
de Rohan, at Paris, where he died in 1757.
He published a treatise "On the Study of
Medals," and another "On the Progress and
Decay of Learning among the Romans," &c.

OLIVAREZ, GASPARD GUZMAN, Count,
Duke of an eminent Spanish statesman,
was born, about 1587, at Rome, whither his
father had been sent on an embassy to Pope
Sixtus V. When Philip IV. succeeded to
the crown, the management of public affairs
was intrusted wholly to Olivarez, and he
enjoyed, during a period of 22 years, almost
unbounded authority. The domestic affairs
of the kingdom he conducted with much
success; but in foreign affairs he was con-
stantly thwarted by the bolder genius of the
French minister Richelieu, and had the
mortification to witness the separation of
Portugal from the crown of Spain, and the
loss of Brazil and other foreign colonies,
which fell into the hands of the Dutch. In
consequence of these misfortunes the king
was reluctantly forced to dismiss him in
1643, and he died soon after. A fine portrait
of Olivarez, by Velazquez, was exhibited at
the British Institution in 1864.

OLIVER, GEORGE, D.D., a learned and
diligent antiquarian, born February 9, 1781,
was educated at Sedgley Park and Stony-
hurst College, and admitted into holy orders
in the church of Rome in 1806. In the fol-
lowing year he was appointed to the Roman
Catholic mission in the city of Exeter, where
he continued to reside for fifty-five years,
highly esteemed by his fellow-citizens. In
addition to the duties of his office, he was
industrious in studying the history and
antiquities of Exeter and Devon. His
"Historical Collections relating to the Mon-
asteries of Devon," published in 1820, was
followed by the "History of Exeter," and
many other works. But the work by which
he is most widely known is the "Monas-
tica Biocesis Exoniensis," published in
1847, and to which a supplement was printed
in 1854. Latterly he was engaged in writing
a more extended history of the cathedral
and city of Exeter, and the first portion,
comprising the "Lives of the Bishops and

History of the Cathedral of Peter," ap-
peared shortly before his death; the "Civil
History of the City" remains to be pub-
lished as a companion volume. He died
March 23, 1861, aged 80.

OLIVER, ISAAC, an English painter, was
born in 1556. He was a pupil of Hilliard,
and was employed to paint the portraits of
many royal and noble persons of his time.
His miniatures were painted in a style of
exquisite beauty, and are very highly valued,
and he also executed some good historical
pictures. Died, 1617.—His son, **PETER OLIV-**
VER, who died about 1664, was also an ad-
mirable portrait painter, and, like his father,
executed also some historical pieces. He
was much employed by Charles I.

OLIVET, JOSEPH THOUILLER D', a learned
critic, was born at Sallins, in France, in 1682.
He entered into the society of Jesuits, but
left them to lead a retired life at Paris, where
he was admitted a member of the French
Academy, and was employed to write a con-
tinuation of its history. His greatest work
is his edition of Cicero, in 9 vols. 4to. The
Abbé Olivet also published translations from
Cicero and Demosthenes, executed in a spirited
and elegant manner. Died, 1768.

OLIVETAN, PIERRE ROBERT, a French
reformer, who translated the Scriptures into
French immediately, he professed, from the
Hebrew and Greek. Some writers, however,
allege, that he made his version from that of
St Jerome; others say that he merely re-
touché the version of Lefèvre d'Estapler;
while others assert that Calvin, who was re-
lated to Olivetan, polished and revised the
whole work, which was printed at Neuf-
châtel in 1535, but is now exceedingly rare.
It is called the Bible of the Sword, on ac-
count of that emblem being adopted by the
printer. Olivetan being banished from Ge-
neva, went to Italy, where he died, as is
supposed, of poison, in 1539.

OLIVEIRA, FRANCISCO XAVIER DE, a
Portuguese knight, and gentleman of the
household to the king, was born at Lisbon,
in 1702. On going to Vienna, as secretary to
the embassy, he became a convert to the Pro-
testant faith; and came to England in 1746.
He published "Memoirs of his Travels,"
"Familiar Letters," "The Chevalier d'Oli-
veira burnt in Effigy as a Heretic, why
and wherefore?" &c.; and he left at his
death, which took place at Hackney, in 1783,
a great number of MSS., including "Olivei-
riana, or Memoirs, historical and literary,"
27 vols. 4to.

OLIVIER, GUILLAUME ANTOINE, an emi-
nent French naturalist and traveller, was
born in 1756, at Frejus. He made botany and
entomology his especial studies, went on a
scientific mission to Persia in 1792, returned
with a valuable collection after an absence
of six years, and died in 1814. He published
the result of his researches in the East, under
the title of "Voyages dans l'Empire Ottoman,
l'Egypte, et la Perse," 3 vols. 4to, with an
atlas and plates; also, a "Natural History
of Coleopterous Insects," &c.

OLYMPIAS, wife of Phillip, king of Mace-
donia, and mother of Alexander the Great,
was the daughter of Neoptolemus, king of
Epirus. Her haughtiness, and, more pro-

bably, her infidelity, induced Philip to repudiate her; and as Philip's murder soon followed this disgrace, some have attributed it to her intrigues. Antipater, the successor of Alexander on the Macedonian throne, left the administration of the country to Polyperchon, who, to confirm his power, recalled Olympias from Epirus, whither she had fled, and confided to her the guardianship of the young son of Alexander. She now cruelly put to death Arrhidæus, son of Philip, with his wife Eurydice, as also Nicanor, the brother of Cassander, with 100 leading men of Macedonia, who were inimical to her interest. But such barbarities did not long remain unpunished. Cassander besieged her in Pydna, whither she had retired with her family; and being obliged to surrender, after an obstinate siege, she was put to death, B. C. 315.

OMAR I., caliph of the Saracens, was the successor of Abubeker, and father-in-law of Mohammed. He began his reign A. D. 631, and is conspicuous among the conquerors who chiefly contributed to the spread of Islamism. His generals, Khaled and Abu Obeldah, drove the Greeks out of Syria and Phœnicia, and the caliph himself took possession of Jerusalem in 638, which city remained in the hands of the infidels till it was reconquered by Godfrey of Bouillon, at the end of the 11th century. Anru, one of his generals, defeated the troops of Heraclius, near Antioch, in 611; Memphis and Alexandria surrendered; all Egypt and a part of Libya were conquered from the Romans, and the famous library, which had been founded at Alexandria by Ptolemy Philadelphus, is said to have been burnt by the express order of Omar. Having fixed his residence at Medina, he was there assassinated by a Persian slave, in the 10th year of his reign, A. D. 643. He refused to appoint a successor, and thus the caliphate became elective. The era of the Hegira was established in the time of this caliph; who also introduced the system of standing armies, and a police force. Omar was highly distinguished for his impartial administration of justice.

OMEARA, BARRY EDWARD, the confidential medical attendant of the Emperor Napoleon in his last days, and author of "A Voice from St Helena," was a native of Ireland, and born about 1778. He was originally a surgeon in the British navy, and was on board the Bellerophon in that capacity, on the 7th of August, 1815, when Napoleon went on board. Napoleon having observed Dr O'Meara's skill and his knowledge of Italian, made overtures to him, on being transferred to the Northumberland, to accompany him to St Helena as his surgeon. Having obtained Admiral Keith's permission, Dr O'Meara assented, and remained with the ex-emperor till July, 1818, when he was recalled and deprived of his rank. He was latterly an active partisan of O'Connell's, at one of whose agitation meetings he is said to have caught the illness which terminated fatally, June 3, 1836. In the following month a sale of his effects took place: when a few lines in the handwriting of the French emperor sold for 11 guineas, and lock of his hair, £2 10s.; one of his teeth, 7 guineas and a half; and the

instrument used by O'Meara in extracting it, 3 guineas!

OOERT, ADAM VAN, Dutch painter, remembered less for his own works than as the first master of Rubens. He was born at Antwerp, in 1557, and died there in 1611. He was an intemperate man, and by the excesses in which he indulged, estranged from him his friends and his pupils. From his studio Rubens passed to that of Otto van Veen.

OPIE, AMELIA ALDERSON, Mrs, was a daughter of Dr Alderson, an eminent physician of Norwich, where she was born in 1771. From her earliest years she was distinguished for her wit and her musical and poetical powers. She removed to London in 1798, on becoming the wife of the artist, John Opie. She commenced her literary career in 1801, with the publication of her pathetic tale, "Father and Daughter." Success stimulated her to further efforts; and a long series of works of fiction, most of which were deservedly popular, proceeded from her pen. Of these, the principal were, "Simple Tales," "New Tales," "Temper, or Domestic Scenes," "Tales of Real Life," and "Tales of the Heart;" all portraits of domestic life. In 1807 she became a widow. A few years afterwards she joined the Society of Friends; and as the rules of that sect prescribe fiction, she turned her talents into a new channel, and produced two moral treatises, "Detraction displayed," and "Illustrations of Lying." The works of Mrs Opie were thrown into the shade by the brilliant fictions of Scott, the tales of Miss Edgeworth, and other contemporary writers; but they mark an era in English literature, and may still be read with interest and profit. Died, 1853. A volume of "Memorials" of her life has since been published.

OPIE, JOHN, an eminent historical painter, was born, in 1761, at St Agnes, near Truro, in Cornwall. At the age of 12, he had mastered Euclid, and commenced teacher to the peasants in his immediate neighbourhood. His father, who was a carpenter, saw his dwelling house hung with likenesses and sketches of landscapes with anger, at what he thought a more idle propensity; but his uncle witnessed these efforts of early genius with pleasure. His talents at length attracted the notice of Dr Wolcot, the satirist, whose instructions greatly served him. He commenced as a portrait painter, and after fair success in the country he removed to London, and was introduced to Sir J. Reynolds. Wolcot was impatient to see his progress; and as his fame had preceded him, the London connoisseurs were eager to behold the Cornish wonder. He was then 20 years of age, people of distinction crowded his door, and it became the fashion to sit to him; but as the novelty wore off, so did the fashion; and, by the time he was 40, though he gradually improved, he was comparatively deserted. The first specimen he gave of his literary ability was in a Life of Sir Joshua Reynolds, in Dr Wolcot's edition of Pilkington's Dictionary. He then published "An Enquiry into the requisite Cultivation of the Arts of Design in England;" and he delivered lectures at the Royal Institution. On Fuseli's death, he was appointed to succeed him as professor

by O'Meara in extracting it,

AN, Dutch painter, remembered more than as the first. He was born at Antwerp and died there in 1611. He was a man, and by the excesses of his life, estranged from him his pupils. From his studio that of Otto van Yeen.

ALDERSON, Mrs. was a woman, an eminent physician, where she was born in the earliest years she was distinguished by her musical and literary talents. She removed to London in 1780, the wife of the artist, John Alderson, and her literary career was the result of her pathetic "Daughter." Success attended her efforts; and a long and successful career, most of which was popular, proceeded from her pen. Her principal work, "Simple Tales," "Teaper, or Domestic Tales of Real Life," and "Tales of the Past," all portraits of domestic life, became a widow. A few years she joined the Society of Friends, the rules of that sect proved to her talents and industry, and produced two moral treatises, "The Duties of a Christian," and "Illustrations of the Works of Mrs. Ople." The works of Mrs. Ople are the shade by the brilliant pen of the tales of Miss Edgeworth, contemporary writers; but in English literature, and in the world with interest and profit. A volume of "Memorials" of her life has been published.

ALDRED, eminent historical painter, born at St. Agnes, near Truro, in the year 1712, he had music commenced teacher to the immediate neighbourhood. He was a carpenter, saw his talents with likenesses and escapes with anger, at what he considered his talents; but his talents at length attracted the notice of the satirist, whose talents served him. He was a painter, and after fair success he removed to London, and to Sir J. Reynolds. Wrote to see his progress; and succeeded him, the London connoisseur to behold the Cornish painter then 20 years of age, people crowded his door, and it was so did the fashion; and, by 40, though he gradually improved, comparatively deserted. The success of his literary ability gave of his literary ability Sir Joshua Reynolds, in Dr. Parr's "Pilkington's Dictionary," "An Enquiry into the History of the Arts of Design," and he delivered lectures on the subject. On Fuseli's death, he succeeded him as professor

of painting to the Royal Academy. He died in 1807, and was interred near Sir Joshua Reynolds, in St Paul's cathedral. His wife, the popular tale-writer, is noticed above. The portrait of Ople, painted by himself, has been purchased for the National Collection.

OPITZ, MARTIN, German poet and miscellaneous writer, was born at Bunzlan, in Silesia, in 1597. He studied at several universities and led a very restless life, having a great passion for travelling. In Holland he made acquaintance with Vossius and Helesius; and at Paris with Grotius. He spent the last years of his life at Dantzic, and was appointed historiographer to the king of Poland, Ludslaus IV. The great merit of Opitz was that he diligently cultivated and greatly refined the German language, as pioneer preparing the way for the great writers of the 18th century. His aim was early announced in his Latin dissertation entitled "Aristarchus, sive de contemptu linguæ Teutonice." His countrymen named him the "father" and "restorer" of their poetry. Besides his original poems, he was author of a metrical version of the Psalms and of a good translation of the "Argenis" of Barclay. Died of the plague at Dantzic, 1639.

ORANGE, WILLIAM OF NASSAU, Prince of, surnamed, for his singular discretion and reticence, "the Silent," founder of the Dutch republic, was born at the chateau of Dillenburgh, in Nassau, 1533. He succeeded his cousin René as prince of Orange, in 1544, and was brought up at the court of Charles V, who highly esteemed and placed great confidence in him. Philip II., however, distrusted and hated the prince; who after the death of Charles embraced the reformed faith, and took part with the Dutch in resisting the establishment of the Inquisition in the Netherlands, and the cruel tyranny of the duke of Alva. He was named stadtholder of Holland and Zealand; carried on the revolt against Alva and his successors, Don John of Austria and the duke of Parma; and though seldom victorious in battle, gradually became so in council; till at last, in 1578, he procured the famous treaty known as the Union of Utrecht, the foundation of the Dutch republic. Philip soon set a price on his head, and he was assassinated by Balthazar Gerard, at Delft, 10th July, 1584. The most diverse estimates have been formed of his character by historians. Motley's view, which avoids extremes, is probably fair. A new German work, by Klose, on the Life and Times of this great man, was published in 1864.

ORANGE, FREDERICK HENRY OF NASSAU, Prince of, stadtholder of Holland, was second son of the preceding, and was born at Delft, in 1584. Brought up by his brother Maurice, whom he succeeded as stadtholder in 1625, he contributed by his wise administration and by his military successes to confirm the independence and advance the prosperity of his country. Died, 1647.

ORANGE, WILLIAM V., Prince of, stadtholder of Holland, was born in 1748. He succeeded his father in 1751, under the regency of his mother, Anne, daughter of George II. of England; and after her death the regency

was shared between the states-general and the prince of Brunswick. In 1768 William assumed the government, retaining the prince as minister; but the long-continued discontent of the people necessitated his dismissal in 1782. Three years later the states deprived the stadtholder of the command of the garrison of the Hague, and suspended him from his office of captain-general. He retired to Nimeguen; obtained the aid of Frederick II. of Prussia, whose niece he married in 1767; and in 1787 was restored by a Prussian army. In the following year treaties were concluded with Great Britain and Prussia, for the maintenance of the hereditary office of Stadtholder in the Nassau family. In 1793 began the French revolutionary war in Holland, and two years later the prince of Orange was driven away by the French invaders and took refuge in England, where he was received with kindness; but nothing effectual was done for his restoration. Died at Brunswick, 1806. His son became, in 1814, king of the Netherlands, as William I.

ORANGE, Prince of. [WILLIAM III., king of England.]

ORCAGNA, ANDREA, one of the greatest of the early Italian painters, was one of the sons of Cione, a Florentine goldsmith. "Orcagna" is a corruption of "L'Arcagnolo," the name by which he was known during his life. He was first taught by the great sculptor Andrea Pisano, disciple and friend of Giotto; but with the great lessons of the Florentine school he learnt also the softer maxims of the Siennese, and combined in his works, as had never been done before, the severity and grandeur of Giotto, with the softness and tenderness of Simone and the Lorenzetti. He was great also as a sculptor and architect. Few of his frescoes have escaped the ravages of time and the restorer, so that they have now little attraction except for art-students. His greatest works were the frescoes in the choir of Santa Maria Novella, hopelessly damaged soon after their completion; frescoes of the Last Judgment, Paradise, and Hell in the Strozzi chapel; altar-piece in the same chapel executed in 1357; and as sculptor and architect, the Tabernacle of the church of Or San Michele, completed in 1359. Orcagna executed a mosaic for the cathedral of Orvieto in the following year. The great frescoes of "The Triumph of Death," "The Last Judgment," and "Hell," in the Campo Santo of Pisa, are attributed to him by Vasari, whose assertion is stoutly controverted on internal evidence by recent critics. Died at Florence, in or before 1376. In the National Gallery is a large altar-piece by Orcagna, and nine separate pictures once portions of it; but they have been much altered by restoration, and do not truly represent the master's style.

ORDERICUS, VITALIS, an early English historian, was born near Shrewsbury, in 1075, and was early sent to Normandy, where he became a monk. He spent his whole life in his monastery, and died probably before 1150. His chronicle, entitled "Historia Ecclesiastica," is in three parts, and extends from the creation down to the year 1142. The last part of the work is of great interest, containing much authentic information on the

history and manners of Western Europe in the 11th and 12th centuries. An English translation of this work is included in Bohn's Antiquarian Library.

O'REILLY, ALEXANDER, a native of Ireland, who entered into the Spanish army, where he obtained the favour of Charles III., and was raised to the highest military rank for his eminent services. Born, 1735; died, 1794.

O'REILLY, ANDREW, Count, a general of cavalry in the Austrian service, was a native of Ireland. He was a brave and skilful officer, and filled in succession all the military grades in the Austrian army, with the exception of that of field-marshal. At the battle of Austerlitz, so fatal to their cause, the remnant of the army was preserved from destruction by his courage and skill; and when, in 1809, he held the post of governor of Vienna, the difficult task of making an honourable capitulation with the French emperor devolved on him. He died in the 91st year of his age.

ORELLANA, FRANCISCO, born at Truxillo, in Spain, early in the 16th century, accompanied Pizarro to Peru, in 1531. Ambitious of adventure, he set out to explore the continent of South America, eastward from Peru; passed down a branch of the Amazons into that vast river, and thence to the sea; thus being the first European navigator of the Amazons. His accounts of the marvellous country he had crossed induced Charles V. to authorize him to settle colonies there, and he returned for that purpose in 1549, but died soon after his arrival.

ORFILA, MATHIEU JOSEPH BONAVENTURE, the most distinguished toxicologist of his age, was born at Mahon, in Minorca, in 1767, studied at Valencia and Barcelona, and in 1807 repaired to Paris, where he graduated in medicine; and after supporting himself for some years by public lectures, was appointed to the chair of chemistry, in 1823. During the reign of Louis Philippe, M. Orfila was made Dean of the Faculty of Medicine; but after the revolution of February, 1848, the provisional government revoked his functions. His scientific reputation chiefly rests on the "Traité de Médecine Légale," which appeared between 1835 and 1847; but there is scarcely a department of Medical Jurisprudence which he has not profoundly investigated, and the treatises which he published, on these and analogous subjects, have given him a world-wide reputation. Died, 1853.

ORFORD. [RUSSELL and WALPOLE.] ORIBASIUS, an eminent Greek physician of the 4th century, was a pupil of Zeno of Cyprus, and became the physician and intimate friend of Julian, afterwards Roman emperor. He accompanied Julian into Gaul, was afterwards quaestor of Constantinople, accompanied the emperor into Persia, and was attending him when he died. Orbasius was banished by the succeeding emperors, and took refuge among the "barbarians," but he was soon recalled, and lived in wealth and honours to a great age. He was author or compiler of numerous medical works, most of which are lost. The most important of those extant is the "Collectanea Artis Medicae," itself, however, only part of a very

extended work. Orbasius made several discoveries in anatomy.

ORIGEN, a father of the church, and one of the most learned ecclesiastical writers, was born at Alexandria, A. D. 185, of Christian parents, who early instructed him in religious knowledge and in the sciences. At the age of 17 he lost his father, who was attached for his profession of Christianity. Origen had now recourse to the teaching of grammar for the support of himself, his mother, and brothers; but this occupation he relinquished, on being appointed catechist, or head of the Christian school of Alexandria. In this situation he distinguished himself by the austerity of his life; and taking the Scripture in the most rigid sense, he went so far as to put in practice the passage of the gospel, "There be some who have made themselves eunuchs for the kingdom of heaven." He subsequently acknowledged the literal acceptation of this saying to be a mistake. From Alexandria he went to Rome, where he began his famous "Hexapla," an edition of the Hebrew Bible with five Greek versions of it. At the command of his bishop he returned to Alexandria, and was ordained. Soon after this he began his "Commentaries on the Scriptures;" but Meletius, who envied his reputation, persecuted him with violence, and in a council assembled in 231, it was decreed that Origen should desist from preaching, and quit the city. On this he went to Caesarea, where he was well received by the bishop, and permitted to preach. He was consulted in several episcopal synods; but in the persecution under Decius he was thrown into prison, and put to the torture. On his release he applied himself to his ministerial labours, and to writing. He died in 254. In his Commentaries he indulged too much the fancy for allegory; and in his other works he advanced notions more agreeable to the Platonic philosophy than to the Scriptures. To his contemporaries the most offensive of his doctrines were those of the pre-existence of souls, and the finite duration of future punishment.

ORLAY, BERNARD VON, or Bernard of Brussels, a celebrated Dutch painter, born about 1470. He went to Rome, became a pupil of Raphael, and directed in conjunction with Coxcie the preparation of the tapestries from his master's cartoons. He was subsequently named painter to Margaret, regent of the Netherlands, and to the Emperor Charles V. Among his works were a "Last Judgment," at Antwerp; several hunting-pieces, with portraits of Charles V. and his courtiers; a Virginia and Infant Christ, now in England, &c. In the National Gallery is his "Magdalen Reading." Died at Brussels, 1541.

ORLEANS, CHARLES, Duke of, was made prisoner at the battle of Agincourt, in 1415. He remained in England 25 years; and on his return to France he undertook the conquest of the duchy of Milan, to which he conceived himself entitled in right of his mother. He was not, however, successful in this enterprise; and died in 1465.

 JEAN BAPTISTE GASTON,
 son of Henry IV. of France,
 Mary of Medici, was born in

1608. He married, and was created duke of
 Orleans in 1624. Of a restless temper and
 unprincipled, he took part in the troubles of
 the reign of Louis XIII., with no result but
 dishonour to himself and injury to his asso-
 ciates. He showed his mother's hatred of
 Richelieu, and was continually engaging
 in intrigues and plots against him. When
 they were detected he made the meanest
 submission to authority, and unscrupulously
 betrayed his accomplices. He was four times
 banished and four times returned in arms
 against the king. In 1643, on the accession
 of Louis XIV., he was named lieutenant-
 general of the kingdom; in the war of the
 Fronde opposed the court; was once more
 lieutenant-general; but in 1652 was exiled
 to Blois, where he died in 1660.
 ORLEANS, PHILIPPE, Duke of, regent
 of France, son of the first Philip, duke of Or-
 leans, was born at St Cloud in 1674. He had
 for his tutor the infamous Dubois, entered
 the army at 17, and distinguished himself
 in the campaigns in the Netherlands (1692-3),
 and in 1701 became duke of Orleans by the
 death of his father. He had already become
 notorious for his licentious habits, and these
 went on growing worse and worse till he
 reached an almost unparalleled depth of
 foulness and shamelessness. In 1706 he com-
 manded the army of Italy and was defeated;
 the next year he was sent into Spain, where
 he took several important places. Louis XIV.
 showed great distrust and suspicion of the
 duke, and very grave suspicions arose
 among the people when the dauphin, the
 duke and duchess of Burgundy, and their
 eldest son all died almost suddenly, and
 within a year. Philip's life was endangered,
 and the public excitement was unbounded.
 On the death of Louis XIV., in 1715, the duke
 of Orleans had himself proclaimed regent
 with absolute power, and at once adopted a
 policy in most respects the reverse of that
 of Louis. He protected the Jansenists, aban-
 doned the cause of the Stuarts, maintained
 peace, and reformed the finances, adopting
 the schemes of the Scotchman Law. Plots
 were formed against the regent in which
 Cardinal Aiberoni took a leading part, but
 they were foiled; and in 1719 war was
 declared on Spain, which was soon closed by
 an advantageous peace. France, however,
 was distracted with domestic disquietudes
 and calamities, and the example of the re-
 gent hastened the decline of religion and
 the corruption of morals. The influence of
 Dubois as first minister was supreme, and
 the regent sacrificed everything to him. In
 1723, the young king, Louis XV., came of age
 and assumed the government; taking the
 duke of Orleans his prime minister. But
 the duke died suddenly, exhausted by his
 debaucheries, 25th December of the same
 year.
 ORLEANS, LOUIS, Duke of, was the son
 of Philip, the regent of France, and born at
 Versailles, in 1703. In study, devotion, and
 acts of charity he spent his life. In 1733 he
 saved numbers from perishing by fa-
 in the Orleanois, as he again did throughout
 France, in the death of 1740. He also ex-
 tended his benevolence to distant countries;
 while in his own he founded schools, pro-

fessorships, hospitals, and colleges. But his
 charitable occupations did not draw him
 aside from his studies, which he pursued
 with such diligence as to become master of
 the oriental languages, and most of the
 sciences. He died in 1752, leaving many
 works in manuscript, the chief of which
 were "Commentaries on the Scriptures."
 ORLEANS, LOUIS JOSEPH PHILIPPE,
 Duke of (better known by his republican
 appellation of *Egalité*), was the cousin of
 Louis XVI., and father of Louis Philippe, king
 of the French. He was born at St Cloud,
 in 1747; married the daughter of the duke of
 Penthièvre, grand admiral of France, in
 1769; was from his youth guilty of the most
 unbridled licentiousness; and acquired a
 base notoriety by his conduct during the
 French revolution. After the death of his
 father, in 1783, he became possessed of the
 hereditary title and estates; and, having
 indulged to satiety in all sensual pleasures,
 he found a new kind of excitement for his
 palled appetites in the storms of the revolu-
 tion, and a new source of pleasure in the
 gratifications of revenge. He had entered
 the navy, and was entitled by his birth to
 the place of grand-admiral; but having
 been accused of cowardice while in com-
 mand of a division of the fleet against Kep-
 pel in the action off Ushant, in 1778, instead
 of receiving promotion in the navy, the post
 of colonel-general of the hussars was created
 and bestowed on him. From this time may
 be dated his hatred of Louis XVI.; and he
 subsequently adopted every method to ob-
 tain popularity, with a view to political
 power. In the disputes between the court
 and the parliament, he constantly opposed
 the royal authority. His object evidently
 was to reduce the king to a state of tutelage,
 and to procure for himself the formidable
 office of lieutenant-general of the kingdom.
 He caused scandalous libels against the
 queen, whom he pursued with the most
 bitter hatred, to be distributed; and his bust
 was carried in triumph through the streets
 by the populace. He was chosen a member
 of the National Convention, with Marat,
 Danton, and Robespierre, in September, 1792,
 at which time the commune of Paris author-
 ized him to adopt for himself and his de-
 scendants the appellation of *Egalité*, in-
 stead of the name and titles of his family;
 and he not only voted for the death of the
 king, but was present at his execution. But
 he was not qualified to profit by the commo-
 tions he had promoted; he was as weak as
 he was wicked, as indecisive as he was am-
 bitious. The Jacobins had no longer any
 occasion for him; he was struck from their
 rolls, and included in the general proscrip-
 tion of the *Pouillons*; and was committed
 to prison at Marseilles, with other members
 of the family. Being brought before the
 criminal tribunal of the department, he was
 declared innocent of the charges of conspi-
 racy that were preferred against him; but
 the Committee of Public Safety forbade his
 liberation; and, after six months' detention,
 he was transferred to Paris, tried, and con-
 demned to suffer by the guillotine; to which
 he submitted with firmness and courage, on
 the same day, Nov. 3, 1793. His widow re-

turned to Paris after the Restoration, and died there in 1821.

ORLEANS, FERDINAND PHILIPPE LOUIS, Duke of, prince-royal of France, was born at Palermo in 1810, and was the eldest child of Louis Philippe, then duke of Orleans, and afterwards king of the French, by Maria Amelia, daughter of Ferdinand, king of the Two Sicilies. The prince served with great distinction with the French army at the siege of Antwerp and in the African war; and his horse was wounded at the time of the murderous attempt upon the life of his royal father in 1835. Young, popular, a patron of the arts and literature, and devotedly attached to his profession, everything seemed to promise to this prince a career glorious to himself and useful to his country, when he was unfortunately thrown from his carriage, and he died on the spot, July 13, 1842, aged 32, leaving a widow and two sons.

ORLEANS, MARIE, Princess of, daughter of Louis Philippe, ex-king of the French, was born at Palermo, 1813. From her earliest years she evinced a remarkable love of the fine arts, and more especially of sculpture, which she cultivated with a zeal and assiduity that soon gave her a prominent place among the most distinguished artists of her time. Her marvellous statue of Joan of Arc, in the museum of Versailles, was finished before she had reached her 20th year; and besides this she produced numerous bas-reliefs, busts, and statuettes, of rare beauty and excellence. In 1837, she married Alexander, duke of Wurtemberg; a union rich in promises of earthly happiness; but she was prematurely cut off by consumption in 1840, to the inexpressible grief of her family and the friends of art. This gifted woman was the favourite pupil and attached friend of Ary Scheffer, the distinguished French painter.

ORLOFF, GREGORY, a favourite of Catherine II. of Russia. He had a principal share in the revolution that placed his mistress on the throne of Russia; after which he was made grand-master of the artillery, and raised to the first dignities in the state, and was allowed to wear the picture of the empress in his button-hole. His ambition prompted him to aim at sharing the throne with the empress, who would have submitted to a private marriage. This he imprudently refused to accept, and he was supplanted by a new favourite. He was then ordered to travel, but was gratified with magnificent presents, and received the title of prince of the German empire, which Catherine procured for him. Died, 1783.

ORLOFF, ALEXIS, brother of the preceding, was remarkable for his gigantic stature and Herculean strength. He was one of the chief instruments in effecting the revolution that ended in the murder of Peter III., and is said to have been the person who strangled him in prison. He rose to high dignities in the army; and, in 1768, was made admiral to the Russian fleet in the Archipelago, with unlimited power, against the Turks, whom he defeated off Tchesme; for which exploit he was called *Tchesmenskoi*. On the accession of Paul I.

he was disgraced, and banished from Russia; but, after the death of that emperor, he returned to Moscow, and died there in 1808.

ORME, ROBERT, historian, was born in 1728, at Anjengo, in the East Indies, where his father was a physician in the Company's service. He was educated at Harrow, obtained a civil appointment in India, became a member of the council at Fort St George, and was a commissary and accountant-general. In 1758 he returned to England, and employed himself in writing "The History of the Military Transactions of the British in Hindostan," the first volume of which was published in 1763, and the second in 1778. The author compiled also a work, entitled "Historical Fragments on the Mogul Empire, the Mahrattas," &c. Died, 1801.

ORMOND, JAMES BUTLER, Duke of, an eminent statesman, was born in 1610, in London, and succeeded to the earldom of Ormond in 1632. During the wars between Charles I. and the parliament he strenuously laboured, though with very inadequate force, to uphold the king's authority in Ireland; and on the ruin of the royal cause, he retired to the continent, and exerted himself to promote the re-establishment of monarchy in England. After the restoration of Charles II. he was created a duke, and was twice appointed lord-lieutenant of Ireland. In 1670 he narrowly escaped with his life from a plot formed against him by the desperado Colonel Blood. Died, 1688.

ORMOND, JAMES BUTLER, second Duke of, was grandson of the preceding, and was born at Dublin, in 1665. He was brought up a Tory, but he joined the prince of Orange on his arrival in England, became his intimate friend, and served under him in Ireland and in Flanders. He was in favour with Queen Anne, and in 1702 took part with Sir George Rooke in the unsuccessful attack on Cadiz, and in the reduction of Vigo. The next year he was appointed lord-lieutenant of Ireland; was recalled after some years, and again appointed to the same office in 1709. After the disgrace of the duke of Marlborough Ormond was named commander-in-chief, but with orders to feature neither siege nor battle. On the accession of George I. the command was restored to Marlborough, and Ormond was impeached and attainted. He escaped to France with Lord Bolingbroke, and lived at Avignon, in close relations with the Pretender. Died, 1745, and was buried at Westminster. His portrait, by Dahl, is in the National Portrait Gallery.

OROBIO, BALTHASAR, a Spanish Jew, who became professor of metaphysics at Salamanca, and afterwards a physician at Seville, where his family were nominally Christians. Orobio at last fell under the suspicion of the holy office, and was tortured and imprisoned. At the expiration of three years he obtained his release, and then went to Toulouse; from which place he removed to Amsterdam, where he made an open profession of Judaism, submitted to the rite of circumcision, took the name of Isaac, and practised as a physician. He wrote a book against Spinoza, entitled "Certamen

ced, and banished from Spain. The death of that emperor, he rescued, and died there in 1806.

OSBERT, historian, was born in England, in the East Indies, where he was a physician in the Company's service. He was educated at Harrow, where, on his appointment in India, he became a member of the council at Fort St George. On his return to England, he was appointed commissary and accountant general. In 1758 he returned to England, and published himself in writing "The History of the Transactions of the British East India Company," the first volume of which appeared in 1763, and the second in 1764. He also published in 1763, and the second in 1764, "Historical Fragments on the Mogul Empire," &c. Died, 1801.

JAMES BUTLER, Duke of, an English nobleman, was born in 1610, in London. He succeeded to the earldom of Ormonde in 1632. During the wars between England and the parliament he strenuously upheld the king's authority, and on the ruin of the royal party fled to the continent, and endeavoured to promote the re-establishment of monarchy in England. After the death of Charles II. he was created a Duke, and twice appointed lord-treasurer of Ireland. In 1670 he narrowly escaped his life from a plot formed by the desperado Colonel Blood.

JAMES BUTLER, second Duke of Ormonde, son of the preceding, and was born in 1665. He was brought up in the army, and joined the prince of Orange in 1688. He became his intimate friend under him in Ireland and France. He was in favour with Queen Anne, and in 1702 took part with Sir John Churchill in the unsuccessful attack on the reduction of Vigo. After the death of the duke he was appointed lord-treasurer of Ireland, and was recalled after some time from office. He was again appointed to the same office in 1713, and was disgraced by the duke of Ormonde, who was named commander-in-chief, and with orders to venture on a battle. On the accession of George I. the command was restored to him, and Ormonde was impeached.

He escaped to France with the Pretender, and lived at Avignon, where he died in 1745. He was buried at Westminster. His portrait is in the National Gallery.

BALTHASAR, a Spanish Jew, philosopher, professor of metaphysics at Madrid, and afterwards a physician at Seville. His family were nominally converted to Christianity, but he fell under the suspicion of the holy office, and was imprisoned. At the expiration of his term he obtained his release, and then fled to Amsterdam, where he made an open profession of Judaism, submitted to circumcision, took the name of Isaac, and became a physician. He wrote a treatise on Spinoza, entitled "Certamen

propheticum." Limborch had a conference with him on the subject of the Christian religion, and published an account of it, entitled "Amica Collatio cum crudito Hebræo." Died about 1687.

OROSIUS, PAULUS, a Spanish presbyter and historian of the 5th century. He was a native of Tarragona, spent some time with Augustine at Hippo, and went thence into Palestine. He took a zealous part in opposing Pelagius, and again visited Augustine. He wrote a book entitled "Historiarum adversus Paganos libri VII.," for the purpose of defending the Christian religion against the charge of being the cause of the evils which oppressed the Roman empire. For the most part it is a compilation, but the latter portion contains an interesting narrative of contemporary events, especially of the sack of Rome by Alaric. It has been translated into most European languages, and frequently republished. Alfred the Great translated it into Anglo-Saxon.

ORKELEY, Earl of. [BOYLE.]

ORTE, Viscount d', whose name deserves to be recorded as an instance of manly integrity and true honour, was governor of Algiers at the time of the atrocious massacre of St Bartholomew. Having received an order from Charles IX. to put to death the Protestants in his government, he replied in the following words, "Sire, I have commended your Majesty's letter to the prison and inhabitants of this city. I have had only brave soldiers and good citizens, and not a single executioner."

ORTELL, or **ORTELIUS**, **ABRAHAM**, a learned geographer, born at Antwerp, in 1527. After travelling on the continent and in Great Britain, he published an Atlas, which gained for him the appointment of geographer to Philip II. of Spain. His principal work, the great Atlas, is entitled "Theatrum Orbis Terrarum." Died, 1598.

ORTON, **JOB**, an eminent dissenting minister, was born at Sirewsbury, in 1717. He was the author of a "Life of Dr Doddridge," "Meditations," "Discourses on Christian Worship," "Discourses on Practical Subjects," &c. After his death, which appeared in 1783, was printed his "Practical Exposition of the Old Testament," 6 vols. 8vo.

OSBORNE, **SIR THOMAS**. [DANBY, &c.]

OSLANDER, **ANDREAS**, a celebrated German Protestant theologian, was born at Mittenhausen, in Franconia, in 1498. He adopted the opinions of Luther, and took an active part in preparing the Confession of Augsburg; became minister and professor at Königsberg, in Prussia; and died in 1552. He was the author of "Harmonia Evangelicæ."—There were several other Protestant divines of this family, all equally distinguished.

OSMOND, **ST**, bishop of Salisbury in the 13th century, accompanied William the Conqueror to England, 1066, and was not less distinguished for military renown in the early part of his life, than for his learning and piety at a subsequent period. He erected a cathedral at Old Sarum, in which he was buried, but his ashes were afterwards taken

up and enshrined. He wrote a "Missal," or service book, which became the most popular manual of public devotion among the English clergy, and has principally contributed to hand down his name to posterity. Died, 1099; and was canonized in 1458.

OSSIAN, a mythical Gaelic hero and bard, is said to have lived in the 3rd century, and to have been the son of Fingal, a Caledonian hero, whom he accompanied in various military expeditions. His name has derived its celebrity from the publications of Macpherson, who, about 1760, gave to the world as the "Poems of Ossian," a remarkable series of ballads, on the deliverance of Erin from the haughty Swaran, king of Lochlin, by Fingal. They have been translated into all the European languages, and please by their delineation of the scenery of the Highlands, picturesque expressions, bold, but lovely, images and comparisons, and tender, melancholy tone. These poems, says a recent critic, took the world by storm, and filled the hearts of their readers with their own sentiment. But the great poetic genius of their author was forgotten in the tumult of the controversy which long raged respecting their genuineness. They no doubt contributed powerfully to the growth of the now wide-spread passion for Highland scenery. [See MACPHERSON, JAMES.]

OSSOLI, **MARGARET FULLER**, Marchioness of, a distinguished American authoress, was born at Cambridge Port, Massachusetts, in 1810. Her father, who was a lawyer, a politician, and a scholar, gave her the education of a boy. She was instructed simultaneously in the Latin and English grammar, and at six years of age began to read Latin works. The sudden death of her father, in 1835, reduced her to poverty; but she struggled against its trials with a spirit and energy that have seldom been surpassed. In 1837 she became the principal teacher in the Green-street School at Providence. In 1844 incessant exertion in teaching and writing, added to pecuniary anxieties and domestic cares, had so exhausted her energies that she resolved to change her mode of life. After publishing her "Summer on the Lakes," she accepted a lucrative offer from the proprietors of the "New York Tribune" to become a constant contributor. In 1846 she visited Europe, and in 1848 she married a Roman noble, the young marquis of Ossoli. On the 17th of May, 1850, she embarked on the Elizabeth, bound for New York, on her voyage homewards; but the vessel was wrecked on the 16th of July on the sand-bars of Long Island, and Margaret, her husband, and her child, perished together. Her "Memoirs," which are full of varied interest and romance, have been published since her death.

OSTADE, **ADRIAN VAN**, a painter of the Flemish school, was born at Lübeck, in 1610, and studied under Francis Hals. His pictures are characterized by an exact imitation of nature, and usually consist of alehouse interiors, with Dutch peasants smoking, quarrelling, or drinking. His colouring is rich and clear, his touch spirited and free, and all his works are highly finished. Died, 1685.

OSTADE, **ISAAC VAN**, brother of the pre-

eeding, was born at Lübeck, in 1612. He was taught by Adrian, painted the same class of subjects, and with no less ability. Some of his best pieces are in the Royal collection at Windsor, and in the Louvre. Died, 1671.

OSTERVALD, JOUS FREDERICK, a Swiss Protestant divine, was born at Neufchatel, in 1663; became pastor of the church in that place in 1699, and died in 1747. His chief works are, his French translation of the Bible, adopted by the Protestants, and called by his name; "A Catechism," "Treatise against Uncleanness," "Treatise on the Sources of Corruption among Christians," &c.

OSTERWICK, MARIA VAN, who is ranked among the most celebrated flower-painters, was born at Nootdorp, near Delft, in 1630, and died in 1693. She was patronized by the Emperor Leopold, William III., and Louis XIV.; and her pictures were eagerly sought after, and admitted into the choicest collections.

OSWALD, king of Northumbria, was obliged, after the death of Ethelfrith, his father, in 617, to take refuge in Ireland, his uncle, Edwin, having usurped the throne. He became a Christian in his retreat, and returning to his own country, after Edwin's death, defeated and slew the two usurpers of his kingdom. Oswald reunited the two kingdoms of Deira and Bernicia; but was slain in a battle with Penda, king of Mercia, in 642.

OTHMAN, third of the Caliphs, was cousin of Abu Sofian and one of the earliest disciples of Mohammed. He was one of those driven by persecution into Abyssinia, became secretary to the prophet at Medina, and married successively two of his daughters. On the death of Caliph Omar, in A. D. 644, Othman was elected to succeed him. The Mussulman arms made great progress during his reign; but the new conquests were chiefly made by his generals. Othman made himself odious by his pride, arrogance, and favouritism, and he was assassinated, after being a month besieged in his palace, in 656.

OTHMAN, or OTTOMAN I., founder of the Turkish empire, was one of the emirs who on the destruction of the empire of the Seljuicides, became independent chiefs. Joined by other emirs, he invaded the Eastern empire in 1299, and made himself master of Nicæa, Iconium, and other towns. He took no other title than Emir, but ruled with absolute power, not without justice and moderation. Died at a great age, 1326.

OTHO, MARCUS SAUVUS, Roman emperor, was born at Rome, A. D. 32. After Nero's death he attached himself to Galba, but that emperor having adopted Piso as his heir, Otho excited an insurrection, murdered Galba and Piso, and ascended the throne in 69. He was opposed by Vitellius, who was supported by the German army, and, in a battle between the two rivals near Bediacum, Otho was defeated, on which he slew himself, after reigning three months.

OTHO. [OTTO.]

OTTLEY, WM. YOUNG, F.R.S., F.S.A., and keeper of the prints in the British Mu-

seum. During the whole of his life Mr. Ottley devoted himself to the fine arts, and was known as an artist, a collector, and an author. When scarcely 20 years of age he proceeded to Italy, where, wrapt in admiration of the endless treasures of art, he not only employed his own talents 'at the most esteemed paintings, and in collecting whatever appeared most interesting and valuable. There he remained about 10 years; and on his return to England he produced a series of facsimiles of the original drawings of the best masters, under the title of the "Italian School of Design," a magnificent work, consisting of 81 plates. His other principal works are, "The Florentine School," the "Origin and Early History of Engraving," 2 vols. "The Stafford Gallery," and "The Descriptive Catalogue of the National Gallery." Born, 1772; died, 1836.

OTTMER, KARL THEODOR, German architect, was born at Brunswick in 1800. He studied at Berlin, and gained considerable reputation by the theatre and singing-school which he erected there. He afterwards studied in Italy. His principal work as an architect was the magnificent Royal Palace of Brunswick, completed in 1837. It was burnt down, 23rd February, 1863. Died, 1843.

OTTO I., emperor of the West, called the Great, was the eldest son of Henry the Fowler, and crowned king of Germany, in 936, at the age of 14. He carried on war with the Huns and drove them from the West; made Bohemia his tributary; deprived the duke of Bavaria of his estates, and then had to encounter the resistance of the great chieftains of the empire, aided by the king of France. He afterwards aided the same king against his revolted vassal, Hugh the Great, defeated the Danes, and again invaded Bohemia. He was then engaged for ten years in war with the Hungarians, and finally defeated them at Leck. Berenger having usurped the title of emperor in Italy, Otto entered Rome, where he was crowned emperor by John XII. That pontiff afterwards leagued with Berenger, on which Otto caused him to be deposed, and put Leo VIII. in his place in 963. On the emperor's return to Germany, the Romans revolted and imprisoned Leo; for which Otto again visited Rome, which he besieged, and restored Leo. He next turned his arms against Nicephorus, emperor of the East, whose army he defeated. John Zimisces, the successor of Nicephorus, made peace with Otto, who died in 973.

OTTO III., emperor of the West, son of Otto II., was born in 980, and was chosen to succeed his father in 983. He was soon after carried off by the duke of Bavaria to Magdeburg, but was restored to his mother, the Empress Theophania, to whom, with his grandmother, the regency was intrusted. Otto had for his tutors (St) Bernard, then bishop of Hildesheim, and the celebrated Gerbert. In 996 he was crowned king of Lombardy, and then went to Rome to receive the imperial crown from Pope Gregory V., his former chaplain, Bruno. On his return to Germany he recovered the margravate of Braudenburg from the Selaves, who had

ring the whole of his life devoted himself to the fine arts, and as an artist, a collector, and an engraver. When scarcely 20 years of age he went to Italy, where, wrapt in admiration of the endless treasures of art, he not only enjoyed his own talents, but also those of others, in taking copies of the most beautiful paintings, and in collecting the most interesting and valuable. There he remained about 10 years; on his return to England he produced a series of engravings of the most beautiful masterpieces of the original drawing masters, under the title of "The School of Design," a magnificent work consisting of 84 plates, a magnificent work. His other works are, "The Florentine School," "Origin and Early History of the Italian Schools," 2 vols., "The Stafford Gallery," "Descriptive Catalogue of the National Gallery," Horn, 1772; died, 1836.

KARL THEODOR, German architect, born at Brunswick in 1800. He studied in Berlin, and gained considerable reputation by the theatre and singing-school erected there. He afterwards resided in Italy. His principal work as an architect was the magnificent Royal Palace at Munich, completed in 1837. It was begun in 1823, and finished in 1863. Died,

Emperor of the West, called the youngest son of Henry the Fowler, the eldest son of Henry the First, king of Germany, in 936, and reigned over the empire. He carried on war with the Slaves, and drove them from the West; made the Danes tributary; deprived the duke of Saxony of his estates, and then had to contend with the resistance of the great chief of the empire, aided by the king of France. Afterwards aided the same king against the revolted vassal, Hugh the Great, duke of Normandy, and again invaded the empire. He was then engaged for ten years against the Hungarians, and finally defeated them at Leck. Berenger having been deposed, Otto was crowned emperor in Italy, Otto I., who was crowned emperor in 962. That pontiff afterwards deposed Berenger, on which Otto was crowned emperor, and put Leo VIII. on the throne. In 963, on the emperor's return to Italy, the Romans revolted and invited the emperor to besiege and restore Leo. He led his arms against Nicophorus, emperor of the East, whose army he defeated. He was the successor of Nicophorus, and died in 973.

Emperor of the West, son of Otto I., born in 980, and was chosen emperor in 996. He was soon after deposed by the duke of Bavaria to Magyars, who restored to his mother, the empress, to whom, with his wife, the regency was intrusted. He was succeeded by his tutors (St. Bernard, then Hildebrand), and the celebrated emperor, who was crowned king of Italy in 1000, and then went to Rome to receive the crown from Pope Gregory V., who crowned him emperor. On his return he recovered the margravate of Brandenburg from the Slaves, who had

seized it; in 998 restored Gregory, who had been driven from Rome by Crescentius, to the papal chair, and having got possession of Crescentius by promising him his life, put him to death. On the death of Gregory V., Otto had his able friend Gerbert chosen pope, who took the name of Sylvester II. Otto made a pilgrimage in the year 1000 to the tomb of the martyred Adalbert, apostle of Bohemia, his early friend, and founded the archbishopric of Gnesne, in Poland. He also visited the tomb of Charlemagne, took a cross of gold off the neck of his great predecessor, and part of his dress, and had the tomb closed again. Otto was full of a visionary ambition, hoping to restore Rome to her former greatness as the seat of empire. He returned to Italy in 1001, and at Rome was fascinated by the beauty of Stephania, widow of Crescentius; who, to avenge her husband's murder, and her own abandonment to the lust of Otto's soldiers, drew the young emperor to her as a mistress, and then gave him a subtle poison, of which, soon after leaving Rome, he died, at Paterno, in Campania, 1002.

OTTO OF FREISINGEN, a distinguished German chronicler of the 12th century, was the son of St. Leopold, margrave of Austria, and of Agnes, daughter of the Emperor Henry IV. His high birth, fine abilities, and careful education might have obtained for him the highest offices, but his ambition did not lead him that way. He studied at the university of Paris, became a Cistercian monk in 1126, and entered the abbey of Morimond, in Burgundy, was chosen abbot in 1131, and in 1137 was appointed bishop of Freisingen. He took an active part in the church affairs of his time, and died at Morimond, in September, 1158. His "Chronicon" extends from the creation (as usual) down to the year 1146, and the books which treat of contemporary events are highly esteemed. So also is his "De Gestis Frederici I. Casaris Augusti." Both works have been frequently reprinted. A good account of Otto, his Life and Works, by Wiedemann, appeared in 1849.

OTTO, LOUIS GUILLAUME, count de Mosloy, an eminent French diplomatist, was born in Baden, in 1754, and educated in the university of Strasburg. He was employed in 1779, secretary of embassy and *chargé d'affaires* to the United States of America, where he remained till 1792. He was then employed by the Committee of Public Safety in the foreign department of the state; but on the fall of the Girondists, he was sent to the Luxembourg prison, where he remained till the revolution of the 9th Thermidor. In 1800 he was sent to England, and he remained there, as minister-plenipotentiary, till the peace of Amiens, when he was succeeded by General Andréossy. In 1809 he was sent ambassador to Vienna, where he negotiated the marriage of Buonaparte with Maria Louisa, the archduchess; and remained there till 1813, when, on his return to Paris, he became minister of state. At the Restoration, in 1814, he was unemployed; and in 1815, during the Hundred Days, was made secretary for foreign affairs. He was, after the battle of Water-

loo, employed by Napoleon to negotiate for his personal security with the English government; but the object failed, through his not receiving passports. Died, 1817.

OTTOVENIUS, [VENIUS, O.]
OTWAY, THOMAS, an English dramatic poet, was born in 1651, at Trotten, in Sussex; was educated at Winchester, and Christchurch College, Oxford; and after having made some attempts as an actor, he became a writer for the stage. In 1675 he produced his first tragedy of "Alcibiades," and the following year appeared his "Don Carlos," which proved extremely successful. His reputation procured him the patronage of the earl of Plymouth, a natural son of Charles II., who gave him a cornetcy in a regiment of cavalry, destined for Flanders, in which country he served a short time, and then returned, pursued by habitual poverty. He continued to write for the stage, but died, during 1685, in his 34th year, at a public-house on Tower Hill, where he had secreted himself from his creditors, in a state of great destitution. As a tragical writer he stands high, and no one has touched scenes of domestic distress with more force and feeling. His tragedy of "Venice Preserved," founded on the story of Roderick's Conspiracy, and produced in 1682, is his best work. Among the others are the "Orphan," "Caius Marius," &c.

OUDINOT, CHARLES NICOLAS, Duke of Reggio, marshal of France, was the son of a merchant, and born in 1767. He entered the army early, and in 1791 was captain of the 3rd battalion of volunteers who served in the department of the Meuse. Distinguishing himself by his courage and military skill, he attained the rank of general of division, and was placed on the staff of Massena, whom he accompanied into Italy, in 1799, and by his courageous conduct during the siege of Genoa, in going twice through the English fleet to communicate with General Suchet, saved the French troops from becoming the victims of famine. In 1800 he joined General Brune's army in Italy, where he gained fresh laurels in forcing the Austrians to retrace the Adige; and when war again broke out between France and Austria, in 1805, Napoleon confided an honourable station to General Oudinot, who appeared covered with glory in the field of Austerlitz. In 1806 he was sent to take possession of Neuchâtel, where Oudinot conducted himself with so much disinterestedness, as to gain the esteem of its inhabitants, who, in token thereof, presented him with the freedom of their city. He assisted at the siege of Dantzic; and after the battle of Wagram, Napoleon made him marshal of the empire, and created him duke of Reggio. In 1810 he went to Holland to take possession of the country, which Louis Buonaparte had quitted in disgust. He afterwards shared in the disastrous invasion of Russia, and was there seriously wounded. In 1814 he was again called into action, and again was distinguished for his courage, and his great military talents, and a conduct that was never tarnished by the slightest accusation of inhumanity. On the capitulation of Paris, March 31, 1814, the duke agreed to the de-

termination of the provisional government, and did not see Napoleon after that day. On the return of Napoleon from Elba, he placed himself at the head of the grenadiers; but finding it impossible to secure their fidelity to the cause of Louis XVIII., he retired to his seat at Montmorenci. He subsequently received the command of the national guard at Paris; was made a peer of France and a minister of state; and during the war with Spain, in 1823, he entered Madrid, of which he retained the situation of governor a few months, and then returned to Paris. In 1830 he adhered to the new dynasty; and in 1842 succeeded Marshal Moncey as governor of the "Invalides." Died, 1847.

OUDRY, JEAN BAPTISTE, a French portrait and historical painter. Born, 1685; became a member of the Academy in 1717, and died in 1755.

OUGHTRIED, WILLIAM, an English divine and mathematician, was born in 1574, at Eton; was educated there, and at King's College, Cambridge; obtained the living of Shalford, in Surrey, which he exchanged for that of Albury, and died in 1660, as it is said, of joy, at hearing of Charles's restoration. Though a profound mathematician, his method of treating his subjects was both dry and obscure. He wrote treatises on trigonometry, arithmetic, conic sections, &c.

OUTRAM, SIR JAMES, a distinguished British general, one of the noblest of the heroes of our Indian empire, was born in Derbyshire, in 1803. Left fatherless in infancy, he was educated at Marischal College, Aberdeen, where he attained marked distinction, and went to Bombay as a cadet in 1819. He served for seven years in Candahar, became aide-de-camp to Lord Keane in 1838, and took part in the capture of Ghuznee. He displayed great ability and vigour as political agent at Guzerat, commissary in the Upper Scinde, and resident at Hyderabad, Sattara, and Lucknow. His employment as commissioner to negotiate with the Ameer of Scinde in 1842 led to a serious quarrel with Sir Charles Napier, whose conduct he severely criticised. He visited England in the following year, had soon after a command in the Mahratta country, and in 1847 was appointed resident at Baroda and also at Bombay, in which capacity he contributed, by courageous exposure of official venality, to purify the administration. In 1856 he was named chief commissioner of Oude, took part the next year in the war with Persia, and was created lieutenant-general and C. B. He succeeded Sir Henry Lawrence as resident at Lucknow, and played an important and most noble part in the suppression of the great mutiny. He lay for weeks at Alumbagh, with 4000 men entrenched, immovable by all the fierce attacks of the rebel forces. And he crowned all his courage and wisdom and gentleness with an act of the most touching and sublime unselfishness; the surrender of the lead to which his seniority entitled him to General Havelock when marching to the relief of Lucknow. He was afterwards made a baronet and G. C. B.; returned to England with broken health in 1860, and died at Pau, 11th March, 1863. The quality which

above all others distinguished Sir James Outram was his spotless integrity. No more glorious testimony can be given by his friends than that given by his bitter enemy, Sir Charles Napier, who pronounced him, "the Bayard of India, sans peur et sans reproche."

OUVRARD, JULIEN, was born at Nantes, in 1772, and was a grocer at the era of the revolution. Being an excellent calculator, and of great address and boldness, he soon made a rapid fortune. He was a contractor under the republican, the imperial, and the restored Bourbon régime; he had the provisioning of the foreign armies during their occupation of France by the allied troops in 1816, and of the French army in Spain during the war in 1823. He was often denounced for his contracts during the revolution, and escaped the guillotine in 1794, by General Bolvin concealing him in his house at Nantes. Under the successive régimes, he owed many an escape to the influence of his friend Fouché. In 1810 he was sent on a secret mission by the latter to England, while Napoleon also sent a mission to negotiate peace. The two ambassadors counteracted each other—the British government evaded what it considered as a trap—they were dismissed, and, on their return, Fouché was disgraced, and Ouvrard imprisoned by Napoleon. He subsequently became bankrupt, but he lived in such extraordinary luxury in prison, that his creditors held him confined there for a long time. Great complaints were made in the Chamber of Deputies in 1824, of the intrigues, extravagance, and material deficiencies of his contract for supplying the French army in Spain; but it was supposed he was protected by the strong arm of authority, as no inquiry into these financial operations was made. He subsequently resided in England, where he died, 1847.

OVERBECK, BONAVENTURA VAN, Dutch painter, was born at Amsterdam in 1660. He studied at Rome, and on his return to Holland lived for some time with Lairese, who had been his master. But he led a restless and dissipated life, alternately yielding to and fleeing from the seductions of sense; now at Rome, now at Amsterdam, then at Schevening. Died, 1706. After his death appeared the work by which his name is remembered, "Reliquie Antiquæ Urbis Romæ," with 150 plates, engraved by himself.

OVERBURY, SIR THOMAS, an English gentleman, principally known by the tragic circumstances of his death, was born at Hlnington, in Warwickshire, in 1581, and educated at Queen's College, Oxford, after which he became a student of the Middle Temple. The intimacy which he formed with Robert Carr, the worthless favourite brought from Scotland by James I., and who was afterwards earl of Somerset, proved his ruin. In 1608 he was knighted, and his father was made one of the judges for Wales, but at length Overbury, by venturing to dissuade his friend from marrying the divorced countess of Essex, provoked the anger of both, and through their contrivance he was sent to the Tower, where he was poisoned, Sept. 15, 1613. This iniquitous deed

was not discovered until two years after-
wards, when Sir Gervase Elways, lieutenant
of the Tower, and some others, were tried
and executed; but the principals, to the
eternal disgrace of the king, were pardoned,
from no assignable cause that will not add
to the ignominy of the proceeding. Sir
Thomas Overbury wrote a poem, entitled
"The Wife," which, with his piece called
"Characters," went through many editions.
—His nephew, Sir THOMAS OVERBURY,
published "An Account of the Trial of Joan
Perry and her two Sons for the Murder of
William Harrison;" a most remarkable case,
the parties who were executed having con-
fessed themselves guilty of the murder, al-
though innocent, "Queries on Persecution
in Religion," &c.

OID (OVIDIUS), PUBLIUS NASO, a cele-
brated Roman poet of the Augustan age,
was of the equestrian order, and born at
Sulmo, B. C. 43. He studied the law, and
is said to have pleaded with eloquence in the
court of the *ædumviri*; he was also con-
sulted one of the *triumviri*, whose au-
thority extended to the trial of capital
cases; but his decided predilection for
polite literature, and particularly poetry, led
him to neglect severer studies, and on suc-
ceeding to the paternal estate, he quitted
the bar for poetry and pleasure. Horace
and Propertius were his friends, and Au-
gustus was a liberal patron to him; but he
at length fell under the displeasure of the
emperor, who, for some cause never ex-
plained, banished him from Rome, and sent
him to live among the Gætae, or Goths, on
the Euxine. It is probable that the political
intrigues of the Empress Livia and her son
Tiberius contributed to the removal of the
poet; while the licentiousness of his writ-
ings, and the irregularities of his life, af-
forded plausible pretexts for the infliction
of this punishment. His chief works are,
the "Amores," "De Arte Amandi," the
"Fasti," and "Metamorphoses." He in
vain solicited his recall to Rome, and died
at Tomi, A. D. 18.

**OVIDIO Y VALDES, GONZALVO HER-
NANDEZ DE**, a Spanish military officer, who
was intendant or inspector general of com-
merce in America, in the reign of the Em-
peror Charles V. He wrote a complete
"History of the West Indies;" from which
succeeding writers have drawn much of
their information relative to the intercourse
of the Spaniards with America.

OWEN, EDWARD PRYCE, an admirable
artist, painter, and etcher, whose name was
almost unknown till the time of his death,
was son of Hugh Owen, archdeacon of Salop,
and was born about 1757. He was educated
at Shrewsbury Grammar School and Cam-
bridge University, where he graduated M. A.
in 1825. He entered the church, and after
being a preacher in London for several years,
became vicar of Wellington, and rector of
Eyton, Salop, in 1823. He resigned this
living in 1840. He was an ardent lover of
nature and student of art from his youth,
and he made, during several tours on the
continent, an immense number of drawings
and sketches, of a great variety of subjects,
all treated with singular ease, vigour, and

fidelly. At fifty years of age he applied
himself to oil-painting, and before his death
had executed above four hundred pictures.
He was also an admirable etcher, and two
books of his etchings, folio, were printed, not
published, in 1812 and 1855. An interesting
account of the works of this remarkable
man, with some charming illustrations, is
given in the Art Journal, No. 39, March,
1865. Mr Owen died at Cheltenham, 13th
July, 1863.

OWEN, HENRY, a learned divine of the
church of England, was born in Monmouth-
shire, in 1716, and educated first at Iutlin
School, and next at Jesus College, Oxford,
where he took his degree of M. D., but after-
wards entered into orders, and obtained the
rectory of St Olave, Hart Street, and in
1773 the vicarage of Edmouton, in Middle-
sex. He died in 1795, aged 80. His chief
works are, "Observations on the Four Gos-
pels," "An Inquiry into the present state
of the Septuagint Version," Sermons on the
Miracles, preached at Boyle's Lecture, 2
vols.; and "Critica Sacra, or an Introduc-
tion to Hebrew Criticism."

OWEN, JOHN, an epigrammatist, was
born in Caernarvonshire; was educated at
Winchester, and New College, Oxford; after
which he became master of Warwick School,
and died in 1622. His Latin epigrams pos-
sess great point.

OWEN, JOHN, D.D., a learned Independ-
ent divine, was born at Stadham, in Ox-
fordshire, in 1616, and educated at Queen's
College. In the civil wars he was a zealous
advocate for the parliament against the
king, and the day after the execution of
Charles I. he preached a sermon before the
parliament, in which he showed himself to
be of such a fine and tolerant spirit, that
Cromwell made him chaplain, and the par-
liament soon after gave him the deanery of
Christchurch, Oxford, where he served the
office of vice-chancellor in 1652. At the Re-
storation he was deprived of his deanery; on
which he retired to his estate in Essex. He
died in 1681. Dr Owen was a very voluminous
writer. His principal works are, "An Ex-
position of the Epistle to the Hebrews," 4
vols.; a "Discourse concerning the Holy
Spirit," a Treatise on Indwelling Sin,
"Vindiciæ Evangelicæ," "Tracts and Ser-
mons," &c. There is a portrait of Dr Owen
in the National Collection.

OWEN, ROBERT, the philanthropist and
socialist, was born at Newton, in Mont-
gomeryshire, in 1771. His parents being
poor, his education was scanty, and after
assisting in an elementary school in his
native town, and in a draper's shop at
Stamford, where he remained four years, he
went to London, where he was offered a
partnership, with the promise of the whole
concern and adequate capital after a time,
but he declined, and at eighteen became a
partner in a cotton-spinning factory. Ad-
vancing in prosperity, he commenced the
Chorlton Mills, near Manchester, and selling
those, took with his partners the New
Lanark Mills, in Scotland, including its farm
of 150 acres, and upwards of 2000 inhabi-
tants. New Lanark had been commenced in
1784 by Mr Dale, whose daughter Mr Owen

married; and when he took possession of it, it had become a scene of great disorder and immorality. But the zeal of the new administrator soon worked wonders, and during more than a quarter of a century that he conducted the mills, he was visited by many distinguished persons, desirous of witnessing the results of his system. In furtherance of his object, "to revolutionize peaceably the minds and practice of the human race," he published his "New Views of Society," the "New Moral World," and many pamphlets, founded several journals, and delivered lectures in all parts of the country. In 1823 he visited the United States, and founded the colony of New Harmony, which proved unsuccessful. Meanwhile the various schemes which he devised, and the speculations into which he entered, ruined his fortune. But he persevered in his exertions, and to the last hour of his existence he maintained that his opinions, if fully carried out, would be the regenerators of the human race. In 1833, when his faculties had lost much of their vigour, Mr Owen, though a sceptic as regards divine revelation, became a convert to the belief in spirit-rapping. He professed that any doubts which he might have entertained of a future life, and the existence of God, were removed by the ridiculous phenomena of so-called spiritualism. Died, 1838.

OWEN, WILLIAM, an English painter, was a native of Shropshire. After studying under Charles Catton, and receiving considerable attention from Sir Joshua Reynolds, he made great progress in the art, became R.A. in 1806, and in 1813 was appointed principal portrait painter to the prince regent, who offered to knight him, but he modestly declined the honour. He executed portraits of distinguished statesmen, &c., and also employed himself occasionally on historical subjects. Born, 1769; died, 1824.

OWEN GLENDOWER. [GLENDOVER.]

OXENSTIERN, AXEL, Count, an eminent Swedish statesman, distinguished for pro-

found sagacity, patriotism, and political honesty, was born in 1383. He was the favourite of Gustavus Adolphus, after whose death he conducted the affairs of the kingdom with equal ability and integrity. Died, 1634.—His sons, JOHN and ERIC, both distinguished themselves as diplomatists.

OXANAM, JACQUES, [HARLEY, ROBERT.] mathematician, was born at Boulogne, in 1640. He was educated for the church; but on the death of his father he relinquished theology, and applying to the study of the sciences, was for many years in high repute as a mathematical teacher. Died, 1717. He wrote a great number of useful works, the principal of which are, "Dictionnaire des Mathématiques," "Cours des Mathématiques," 5 vols.; "Récréations Mathématiques et Physiques," 4 vols.; "La Perspective Théorique et Pratique," &c.

OZEL, JOHN, a miscellaneous writer, was born in England, of a French family, and was intended for the church, which profession he declined, and obtained the offices of auditor-general of the city and bridge accounts, of the accounts of St Paul's cathedral, and of St Thomas's Hospital. His principal works are translations from the French, Italian, and Spanish, and among them are *Don Quixote*, and the works of Rabelais and Molière. He is described by Pope, in his *Dunciad*, as a man of consummate vanity; which he resented by an extraordinary advertisement, signed with his name, in a paper, called "The Weekly Medley," wherein he drew a comparison between Pope and himself, of course very unfavourable to the former, with regard to their general learning and poetical genius. Died, 1743.

OZEROFF, VLADISLAV ALEXANDROVICH, a celebrated Russian tragic poet, was born in 1770; entered the army, in which he attained the rank of major-general, and afterwards obtained a civil appointment. He wrote the tragedies of "Fingal," "Demetrius Donskoi," "Edipus," and "Polyxena," which exhibit beauties of a high order; he also wrote some lyric poems. Died, 1816.

P.

PAAW, PIETER, an eminent Dutch physician and botanist, born at Amsterdam, in 1564. He was appointed professor of medicine at Leyden, where he founded the botanical garden, and published several works on anatomical and botanical subjects, which, though surpassed by subsequent productions, are still esteemed. Died, 1617.

PACCA, Cardinal, was born at Benevento,

1756. After rising through the usual ecclesiastical degrees, and discharging the office of nuncio at various courts, he received from Pope Pius VII. the cardinal's hat in 1801, drew up the famous bull which excommunicated Napoleon in 1809, and was in consequence imprisoned at Fenestrella. In 1813 he rejoined Pius VII. at Fontainebleau, where he induced him to withdraw the con-

patriotism, and political

VII. at Fontainebleau,
him to withdraw the con-

cessions a short time previously established
with Napoleon by a concordat, returned to
Rome with the pope in 1814, and finally re-
tired from office in 1816, after having re-
established the order of the Jesuits. Died,
1814. His interesting "Memoirs" have been
translated into English by Sir G. Head.

PACCHIAROTTI, JACOPO, an early Ital-
ian painter, born at Sienna in 1474. His
principal works were executed in his native
city, and one of the best is the fresco in the
church of St Catherine of the Visit of St
Catherine to the body of St Agnes of Monte-
pulsiano, portions of which are by some
criticisthought worthy of Raphael. Pacchia-
rotti has been supposed to be a pupil or imi-
tator of Perugino, to whom some of his best
pictures have been ascribed. In 1535 this
master was implicated in a conspiracy and
fled to France, returning, however, soon
after. Four years later he was exiled and
outlawed, but soon obtained pardon. He
was living in 1540. Two beautiful easel pic-
tures by Pacchiarotti are in the Munich Gal-
lery; and a Madonna and Child in the Na-
tional Gallery.

PACE, RICHARD, a learned and eloquent
divine and statesman, was born in Hamp-
shire, in 1482, studied at Padua, and on his
return became a member of Queen's College,
Oxford, but soon afterwards accompanied
Cardinal Bambridge to Rome. In 1515 he
was sent to the court of Vienna, and in 1522
was made dean of Exeter. He was also dean
of St Paul's; but falling under the displea-
sure of Wolsey, he lost his preferments, and
retired to Stepney, where he died in 1532.
He wrote a book on the lawfulness of Henry
VIII's marriage with Catherine of Aragon,
"De Fructu Scientiarum," &c.; and he en-
joyed the friendship of Erasmus, Sir Thomas
More, and Cardinal Pole.

PACHECO, FRANCESCO, Spanish painter
and writer on art, was born at Seville, in
1571. He worked at first as a decorative
painter, but was commissioned with Alonso
Vasquez, in 1600, to paint a series of six large
pictures of scenes from the Life of St Ilya-
mond. After becoming acquainted with the
great works of earlier masters at Madrid and
the Escorial, he opened at Seville a school
of painting, and among his pupils was Ve-
lasquez, who also became his son-in-law.
Pacheco was afterwards appointed censor of
paintings sold at Seville with strict charge
to prohibit nude figures. His best and al-
most all his works are at Seville; among
them are particularly esteemed a "Last
Judgment" and "St Michael expelling Satan
from Paradise." Pacheco was sometimes
employed to colour statues. He was author
of an elementary work entitled—"Arte de
Pintura," published, 1619. Died at Seville,
1651.

PACIAUDI, PAOLO MARIA, an Italian
ecclesiastic, antiquary, and historian, was
born at Turin, in 1710. He studied at Bo-
logna, became professor of philosophy at
Genoa, but abandoned his chair, and devoted
himself for ten years to preaching in the
principal cities of Italy. Compelled by ill
health to relinquish this task, he settled at
Rome, and became in 1761 librarian to the
grand-duke of Turin, who also appointed

him his antiquary and director of some pub-
lic works; besides which he was historiogra-
pher of the order of Malta. He died in 1785.
His principal works are, "A Series of Medals
representing the most remarkable Events of
the Government of Malta," "Monumenta
Peloponnesiaca," 2 vols. 4to; and "Memoirs
of the Grand Masters of the Order of St John
of Jerusalem," 3 vols. 4to.

PACUVIUS, MARCUS, a Roman tragic
poet, was a native of Brundisium, and flour-
ished at Rome about 154 B. C. He obtained
great reputation by his tragedies, and was
much esteemed by Lælius and Cicero, but
we have nothing of his left, except a few
fragments printed in the "Corpus Poet-
arum." He died, aged 89, at Tarentum.

PADILLA, DON JUAN DE, a noble Span-
ard, who espoused the cause of the people
during their arduous struggle for liberty,
from 1520 to 1522. Being defeated and taken
prisoner at the battle of Villalar, he was put
to death on the following day, and met his
fate with the heroism of a true patriot.—

DONNA MARIA, his heroic wife, participated
in all his labours, and after his death gained
several advantages at the head of her troops,
and defended Toledo for several months.
She was at length deserted by the citizens,
and retired to Portugal, where she died.

PAER, FERDINANDO, a celebrated Italian
musical composer, born at Parma in 1774.
He studied at Venice, was called to the court
of Vienna in 1795, became chapel-master to
the elector of Saxony six years later, and
after the battle of Jena, entered the service
of Napoleon. He spent the rest of his life
at Paris, and from 1818 till 1825 held the
office of Director of the Italian Opera. He
was a member of the Academy of the Fine
Arts. His most successful productions were
the operas of "Criselda," "Agnese," "Ca-
milla," and "Achille." Died, 1839.

PAGAN, BLAISE FRANÇOIS, Count de, an
eminent French military engineer, was born
at Avignon, in 1604. He entered into the
army at an early age, and lost an eye, in
1621, at the siege of Montauban. After this
he distinguished himself on several occa-
sions, particularly at the passage of the Alps
and the barricade of Suza, where he was the
first to lead the way over a dangerous height.
In 1642 he lost his sight entirely; notwith-
standing which he pursued his military
studies, and in 1645 published an excel-
lent work, entitled "Traité de Fortification."
Died, 1665.

PAGANINI, NICOLÒ, the inimitable vio-
linist, was born at Genoa, 1784. His father,
who was a commission-broker by trade, but
a great musical amateur, initiated him in
the principles of music from his earliest
years; and the progress thus made under
parental care was still further increased by
subsequent instructions from Costa, Rolia,
and Paer. His first public engagement was
at Lucca. Here he found a zealous patroness
in the Princess Bacciochi, sister of Napo-
leon; but in 1815 he left Lucca for Milan,
and three years later his reputation had so
spread abroad, that the *Lepsic Musical Ga-
zette*, no mean authority at that time, pro-
nounced him the first violinist in the world.
From this epoch dates his wondrous per-

formance on a single string, which at a later period culled forth such bursts of applause from innumerable audiences in Germany, France, and England. In 1828 he visited Vienna, where he met with an enthusiastic reception. Thence he visited the chief cities of Germany; and in 1831 he made a musical tour through France and England, where he realized enormous sums, which, however, the gambling table swallowed up, frequently even with greater rapidity than he gained them. His last years were spent at his villa Gajona, near Parma; and he died at Nice, 1840. The most absurd stories were circulated regarding Paganini during his lifetime; nor did they cease even with his death. Crimes of the deepest dye were imputed to him without a vestige of foundation; though it must be admitted that the singular cast of his countenance, his reserved character, his sudden bursts of passion, and the mysterious veil which he was fond of throwing around all his proceedings, were well fitted to awaken public curiosity, with its usual adjunct, excessive credulity.

PAGET, PIERRE MARIE FRANÇOIS, Viscount de, celebrated French navigator, was born at Toulouse, in 1748. He sailed from Cupe François, in St Domingo, in 1797, with a view to explore the Indian Seas, and travel through China and Tartary to the Northern Ocean; but on arriving at the Philippine Islands in October, 1768, and finding it impossible to penetrate China, he went by sea to Bassora, and travelling through the desert to Syria, he reached France in December, 1771. He afterwards sailed in Kerguelen's expedition to the south pole, and on his return proceeded as far as 81 degrees and a half of north latitude. He served in the American war, after which he retired to his estate in St Domingo, where he was murdered during a revolt of the negroes in 1793.

PAGLET, HENRY WILLIAM. [ANGLESEY, Marquis of.]

PAGI, ANTOINE, a learned French chronologist, born in 1624, became a Cordelier, and died in 1690. The great work on which he spent the labour of his life is a Critique on the Ecclesiastical Annals of Cardinal Baronius; whose chronological errors, which were numerous, he undertook to correct. The work appeared in 4 vols., folio, between 1689—1705.—His nephew, FRANÇOIS PAGI, also a Cordelier, assisted his uncle in his great work on Baronius, and was the author of a history of the popes, general councils, and some ecclesiastical rites and antiquities, under the title of "Breviarum Historico-chronologico-criticum" &c., 4 vols. Died, 1721.

PAGNINO, SANTI, a Dominican friar, born at Lucca, in 1466. He was an able classical and oriental scholar, and was employed 25 years in translating the Scriptures, Leo X. furnishing him with all necessary expenses. He was also the author of a "Hebrew Lexicon and Grammar."

PAILEN, PETER, Count, descended from a noble Livonian family, was born, 1769. He was appointed military governor of Petersburg by the Emperor Paul, but fearing to fall a victim to the capricious disposition of that despot, he formed a conspiracy against him, caused him to be strangled in 1801, and

proclaimed his son Alexander emperor. Soon afterwards he withdrew from public life. Died, 1826.

PAINE, THOMAS (usually called TOM PAINE), political and miscellaneous writer, was born in 1737, at Thetford, in Norfolk, where his father, who was a Quaker, carried on the business of a staymaker, and brought up his son to it. He, however, subsisting at Lewes, in Sussex, when he lost his father in consequence of keeping a tobacco-shop, which was considered incompatible with his duties. His literary abilities having appeared in a pamphlet on the necessity of advancing the salaries of excisemen, he was introduced to Dr Franklin, who urged him to go to America, and use his pen in behalf of the colonies. He accordingly went there, and reached Philadelphia in 1774. At first he conducted the Pennsylvania Gazette, which from the boldness of its arguments attracted considerable notice. He then published his celebrated pamphlet, entitled "Common Sense," in which he made a furious attack on the English constitution, and dissuaded the Americans from reconciliation. Written with great vigour, and addressed to a highly excited population, it had a prodigious sale, and undoubtedly accelerated the famous Declaration of Independence. For this production the legislature of Pennsylvania voted him £500. He was afterwards also rewarded with a grant of 500 acres of well-cultivated land from the State of New York, and made clerk to the committee for foreign affairs. While in this office he published a series of political pamphlets on what he termed the "Crisis." In 1787 he embarked for France, and, after visiting Paris, came to England, with a view to the prosecution of a project for the construction of an iron bridge, of his own invention, at Rotherham, in Yorkshire. This scheme involved him in considerable difficulties; but his writings, in which he foretold, or rather recommended, the change that was approaching in France, brought him a supply of money. On the appearance of Burke's Reflections on the French Revolution, he wrote the first part of his celebrated "Rights of Man," in answer to that work. The second part was published early in 1792; and, May the 21st, in that year, a proclamation was issued against wicked and seditious publications, evidently alluding to, though it did not name, the "Rights of Man." On the same day, the attorney general commenced a prosecution against Paine, as the author of that work. While the trial was pending, he was chosen member of the National Convention for the department of Calais; and, making his escape, he set off for France, and arrived there in September, 1792. The garri-son at Calais were under arms to receive this "friend of liberty," the tri-coloured cockade was presented to him by the mayor, and the handsomest woman in the town was selected to place it in his hat. Meantime Paine had been declared in Paris worthy of the honours of citizenship, and he proceeded thither, where he was received with every demonstration of extravagant joy. On the trial of Louis XVI. he voted against the sen-

Alexander emperor. Soon drew from public life.

s (usually called TOM) miscellaneous writer, Theford, in Norfolk, who was a Quaker, ear of a staymaker, and it. On the ed against the sen-

tence of death, proposing his imprisonment during the war, and his banishment afterwards. This conduct offended the Jacobins, and towards the close of 1793, he was excluded from the convention, on the ground of his being a foreigner (though naturalized); and immediately after he was arrested, and committed to the Luxembourg. Just before his confinement he had finished the first part of his work, entitled the "Age of Reason;" and, having confided it to the care of his friend Joel Barlow, it was published. On the fall of Robespierre he was released. In 1795 he published the second part of his "Age of Reason;" and, in May, 1796, he addressed to the Council of Five Hundred a work, entitled the "Decline and Fall of the System of Finance in England," and also published his pamphlet, entitled "Agrarian Justice." Fearful of being captured by English cruisers, he remained in France till August, 1802, when he embarked for America, and reached Baltimore the following October. His subsequent life was by no means happy; for, although occupied in various mechanical and literary pursuits, and possessed of decent competence, his attacks upon religion had narrowed his circle of acquaintance; and his habitual intemperance tended to the injury of his health, and the production of a complication of disorders, to which he fell a victim in 1809. The Quakers refused to admit his remains among their dead, and he was buried on his own farm. Cobbett boasted of having disinterred him in 1817, and brought his body to England; many, however, asserted, that Cobbett did not take that trouble, but brought over from America the remains of a criminal, who had been executed. Tom Paine published a third part of the "Age of Reason" in 1807. The first part of this remarkable book is a coarse attack on the popular scheme of Christian theology; the second and third parts consist of a savage and ignorant tirade against the Bible; yet nevertheless starting questions which are still under controversy, though in a very different kind. Bishop Watson's famous "Apology for the Bible" was written as a reply to the "Age of Reason."

PAISIELLO, GIOVANNI, a celebrated singer and composer, was the son of a veterinary surgeon of Tarento, in Italy, and born in 1741. He was put under the care of the celebrated Durnute, and, in 1763, produced his first opera, "La Papilla," with great applause, at the Marsigli Theatre, in Bologna. From this period commenced a long career of success; and his works were not only applauded in Italy, but over the whole continent. In 1796 he was induced to enter the service of Catharine II. of Russia, who settled upon him a pension of 4000 roubles, and he remained there nine years. He next settled at Naples; and, on the French revolution extending to that country, he received from the republican government the appointment of composer to the antion. In 1801 he went to Paris at the request of Buonaparte; but, after having been there three years, he returned to Naples, where he died in 1816. His operas, serious and comic, exceed 70, and he wrote besides a great variety of ballets, cantatas,

&c. Simplicity, elegance, and correctness are the characteristics of his style.

PAJOL, CLAUDE PIERRE, a distinguished French soldier, was born at Hesaucou, 1772. Entering the army in 1791, he served in all the campaigns of the Republic and the Empire, and gradually rose to the highest military honours. Nominated general of division in 1812, he commanded the vanguard of the army of Davoust in the Russian campaign, when he took Minsk and some other towns; was left for dead at the battle of Leipsic in 1813, recaptured Montreau from the allies in 1814, and had gained possession of Namur, at the moment when the battle of Waterloo decided the fate of France. He then retired from the army, but re-entered it in 1830, when the revolution of July broke out, and directed the attack of the Parisians upon Rambouillet, which led to the flight of Charles X. For these services he was made a peer of France. Died, 1844.

PAJOU, AUGUSTIN, an eminent French sculptor, was born at Paris, in 1730; gained the prize at the academy when 18 years of age; studied at Rome, where he remained for 12 years; and obtained on his return a first-rate reputation from his countrymen, who called him the restorer of the art. Died, 1809.

PALÆOLOGUS, JOHN I., emperor of the East, born, 1332, was son of the Emperor Andronicus III. and of Anne of Savoy. He succeeded his father at nine years of age, under the regency of his mother and the "grand domestic," John Catauzene. The latter had himself proclaimed emperor, and ruled with much wisdom for five years as colleague of the young prince. In 1347 he made war on him, allied himself with the Turks by giving his daughter Theodora to the Sultan Orchan, and took Constantino-ple. A reconciliation took place, and John Palæologus married Helena, daughter of Catauzene, and settled at Thessalonica. He soon after made war on Catauzene, and in 1355 re-entered Constantinople, when his rival abdicated and became a monk. This was soon followed by the defeat and abdication of Matthew, son of Catauzene, and John became sole emperor. The continual advance of the Turks induced him, in 1369, to go to Rome to seek aid against them from the pope, but he got nothing better than promises. At Venice he was detained by his creditors, till his son Manuel paid his debts for him. A conspiracy against him was formed by his son Andronicus, who on its discovery was imprisoned. Two years later Andronicus was liberated by the Genoese, made himself master of Constantinople, and imprisoned his father; who in his turn escaped, took refuge with Bajazet, and by his aid recovered the capital. He then restored the fortifications, but at the bidding of Bajazet had them razed. John Palæologus, worn out with sensual indulgences, with disappointment and humiliation, despised by his subjects, and despicable, died in 1391.

PALAFOX, DON JOSEPH, immortalized by his heroic defence of Saragossa in 1808-9, was sprung from an old Aragonese family,

and having entered the military service of Spain at an early age, accompanied Ferdinand VII. to Bayonne, in 1808; but, on the resignation of that monarch, he returned to Aragon, and lived in retirement at a short distance from Saragossa. Proclaimed, in May, governor of Saragossa by the people, who saw themselves menaced on all sides by the armies of France, he took instant measures to sustain a siege; and such was the effect of his intelligence and determination, that with a handful of men, the city resisted an overwhelming force, and at length compelled the French general to retreat, after a siege of 61 days and the loss of thousands of his men. But the reduction of Saragossa was of too great importance to the French for them not to strain every nerve to accomplish it; and Marshals Mortier and Moncey marched in November of the same year, at the head of a large army, to recommence the siege. After suffering two defeats before Saragossa, Palafox once more retired within its walls, and commenced the same vigorous course of action which had been already crowned with success; but on this occasion all his efforts were in vain; the besiegers were backed by a force more terrible than themselves; an epidemic fever was raging in the garrison, and Palafox, who was attacked by it, was obliged to resign the command on the 20th February, 1809, to General St. Marc, who signed the capitulation on the following day. Palafox was now sent into France, and remained a close prisoner at Vincennes, till the restoration of Ferdinand, by whom he was sent on a secret mission to Madrid. In June, 1814, he was appointed captain-general of Aragon; but, for nearly 30 years before his death, he took no part in public affairs. Born, 1780. Died at Madrid, 1847.

PALESTRINA, GIOVANNI PIER-LUIGI DA. one of the most illustrious Italian musical composers, was born at Palestrina in 1524. He became chapel-master to Pope Julius III. in 1551, was dismissed four years later, and after holding various other appointments, was restored to that post in 1571. One of his most famous works is that known as the Mass of Pope Marcellus, which was composed in consequence of the discussions on church-music in the Council of Trent. Most of his compositions are sacred, and are distinguished by their profoundly scientific harmonies. He wrote also many madrigals. His "Musical Principles," as he was styled, died at Rome in 1594, and was buried in St. Peter's.

PALEY, WILLIAM, D.D., an eminent divine of the English church, was born at Peterborough, in 1743; and was educated as a sizar at Christ's College, Cambridge, of which he became a fellow in 1766. For ten subsequent years he resided at the university; but in 1776 he obtained the vicarages of Dalston, in Cumberland, and Appleby, in Westmoreland. In 1780 he was collated to a prebend in the cathedral of Carlisle, of which diocese he became archdeacon in 1782, and in 1785 he was appointed chancellor. In that year he published his great work, "The Elements of Moral and Political Philosophy," in 1 vol. 4to. His next publica-

tion was the "Horse Pauline." In 1793 he vacated Dalston, on being presented to the vicarage of Stanwix, near Carlisle; and the year following appeared his "View of the Evidences of Christianity," 2 vols. 8vo. The same year he was instituted to the prebend of St Pancras in the diocese of London, and soon afterwards was promoted to the deanery of Lincoln. In 1795 he took his doctor's degree on being presented to the living of Bishops Wearmouth, where he wrote his last work, entitled "Natural Theology, or Evidences of the Existence and Attributes of the Deity." It has been shown that in the composition of this celebrated work, Paley made rather unscrupulous use of a work of the Dutch mathematician, Nieuwentyt, which was translated into English under the title of "The Religious Philosopher." Besides the above, Dr Paley published some smaller works; and a volume of sermons appeared after his death, which took place in 1805. His portrait, painted by Sir William Beechey, is in the National Portrait Gallery.

PALGRAVE, Sir FRANCIS, K.J., was born in London, July, 1788, of Jewish parents. His father, Mr Meyer Cohen, was long known as a wealthy member of the Stock Exchange. But on the breaking out of the war with France, in 1803, his father sustained heavy losses, which entailed on his son the necessity of working for a living. Having acted as managing clerk to Messrs Loggin and Smith, solicitors, in Basinghall Street, he took chambers in the Temple in 1822, and was employed under the Record Commission. In 1823 he married a daughter of Mr Dawson Turner, of Great Yarmouth, and obtained permission to change his name from Cohen to Palgrave, that being the maiden name of his wife's mother. He was called to the bar in 1827, and was employed for several years as a barrister, chiefly in pedigree cases before the House of Lords. In 1832 he published his "Rise and Progress of the English Commonwealth," and "Observations on the Principles, &c., of New Municipal Corporations." In the same year he was knighted in acknowledgment of his contributions to constitutional and parliamentary history. In 1838 he was appointed to the post of Deputy Keeper of Her Majesty's Records, an office which he retained till his death. Among his numerous works, "The Merchant and the Friar," an imaginary history of Marco Polo and Friar Bacon, is well known, as also are his "Handbook for Travellers in Northern Italy," and his "History of England and Normandy." This last work is only a fragment. The first volume appeared in 1851, the second in 1857, the fourth volume was printed before his death, although the third was incomplete; but the work will be brought down to the death of Henry I. at least, from materials left by the author. He contributed, also, a long series of important articles to the Edinburgh and Quarterly Reviews. With Mr Hallam (with whom he had an intimate friendship) he shares the merit of having founded the modern school of historical criticism of the Middle Ages, while his services in the Record Office have had the effect of attracting

Pauline." In 1793 he was being presented to the king, near Carlisle; and he appeared his "View of the Christianity," 2 vols. 8vo. The king instituted to the prebend of the diocese of London, and was promoted to the see of Exeter. In 1795 he took a tour being presented to the king at Wearmouth, where he published "Natural Theology of the Existence and Utility." It has been shown in the edition of this celebrated work rather unscrupulous use of Dutch mathematician, which was translated into French under the title of "The Religious Duties of the above, Dr Paley's works; and a volume published after his death, which is his portrait, painted by Sir J. Reynolds, in the National Por-

FRANCIS, KIL, was born July, 1788, of Jewish parents. Mr Meyer Cohen, was a wealthy member of the community on the breaking out of the plague, in 1803, his father's losses, which entailed on him the necessity of working for a living, engaged clerk to Messrs solicitors, in Basinghall Street, and in the Temple in London under the Recorder. He married a daughter of the late Great Yarmouth, and on change his name to Francis, that being the name of his wife's mother. He was born in 1827, and was employed as a barrister, chiefly in the House of Lords. His works are "Rise and Progress of Wealth," and "Objections to the Principles of the Poor Laws." In the same year he published "Acknowledgment of his Constitutional and Parliamentary Rights." In 1838 he was appointed by the House of Commons Keeper of Her Majesty's Records, which he retained till his death. He was a member of the Society of Friars, an imaginary order, and Friar Bacon, is the name of his "Handbook for Travellers in Italy," and his "History of Normandy." This last work was published in 1837, the second in 1837, the third in 1837, and the fourth before his death, which was incomplete; but the materials left by the author, and a long series of papers to the Edinburgh Review. With Mr Hallam he was in the most intimate friendship, and having founded the Edinburgh Review, he had the great criticism of the Review, and the effect of attracting

attention to our ancient records, and insuring a real knowledge of our own history. He died, at Hampstead, July 6, 1861, aged 72. Mr F. T. Palgrave, the accomplished articler, and Mr W. G. Palgrave, author of the remarkable book of "Travels in Central and Eastern Arabia," are the sons of Sir F. Palgrave.

PALISSOT DE BEAUVOIS, AMBROISE MARIE FRANÇOIS JOSEPH, an eminent naturalist, was born at Arras, in the French Netherlands, in 1752. After studying at the Collège Harcourt, at Paris, he was, in 1772, admitted advocate to the parliament of that city; and subsequently became receiver-general of territorial imposts, till the suppression of that office in 1777. He then devoted himself to the study of natural history, and undertook a voyage to the coast of Guinea, with an intention to travel across the African continent to Egypt; but being unable to execute that design, he sailed for St Domingo, in 1788, and there occupied some official situations. Having opposed the revolutionary attempts of the negroes, he with difficulty effected his escape to America, purposing to return to France, when he learnt that he had been proscribed as an emigrant. He occupied himself while in America as a teacher of languages, and as a musician, but he did not neglect his favourite pursuits; and on hearing that his name had been erased from the proscribed list, he returned to his native country, taking with him the rich collection of natural curiosities which he had formed. He died in 1820. Among his works are, "Flore d'Oware et de Benin," "Insectes recueillis en Afrique et en Amérique," &c.

PALISSOT DE MONTENOY, CHARLES, a French dramatist, born at Nancy, in 1730. Having given great offence to the philosophical party of the French literati, by ridiculing Rousseau, he was engaged in a series of controversies, and in 1764 he published his "Duelade," an imitation of the satire of Pope. He wrote "Le Cercle," "Les Philosophes," and some other comedies; besides "Mémoires pour servir à l'Histoire de la Littérature Française," &c., and died in 1814.

PALISSY, BERNARD, the brave French potter and naturalist, was born at Agen about 1508. From his boyhood he showed an ardent desire for knowledge, an enthusiastic love of nature, and a courageous adhesion to truth. With the most limited education, and some skill in drawing and painting on glass, he set out in his twentieth year on a long course of travels, visiting all parts of France, the Netherlands, and Germany. He made large increase of his knowledge of the facts and varieties of nature, and of the arts of life, practised painting on glass, portrait-painting, surveying, and map-making, and examined the monuments of antiquity. In 1538 he was settled and married at the town of Saintes, when the future course of his life was decided by the intense admiration excited in him by a beautiful enamelled cup of Italian manufacture. Knowing nothing of the art of pottery, nothing of clays, he resolved to find out the secret, and make enamelled vases. By the

most heroic struggle, continued for sixteen years, he conquered the secret of the white enamel, and his ware became the necessary ornament of the mansions of nobles, and the palaces of princes. He called himself "Ouvrier de terre et inventeur des rustiques figures;" reproducing on his ware the forms and colours of plants and animals which he so warmly loved, and with the most minute truth to nature. Bernard Palissy was a man of deep religious feeling, a reverent student of the Bible, and a leader among the Huguenots. He was foremost of the small band who established the reformed worship at Saintes, and was imprisoned at Bordeaux to await execution. But his art saved him. He was liberated by the highest authority, and attached to the court by royal warrant, and there he lived, worked, and taught for nearly thirty years. He was known as "Master Bernard of the Tulleries." He formed a museum of Natural History, gave lectures, and held discussions, published several books, and continued to avow his Protestant opinions to the last. In his seventy-sixth year the heroic old man was sent to the Bastille, and after four years' imprisonment, died there, 1589. The writings of Bernard Palissy are of great interest both for the facts and truths and far-sighted suggestions on many matters contained in them, and also for the charming simplicity and unaffected grace of their style, remarkable for the period in which they appeared. The best account of Palissy and his works is the very full and most fascinating life of him by Mr Morley, published in 1852. During some excavations in the Place du Carrousel, in August, 1865, some interesting relics of Palissy were discovered: consisting of a potter's oven, and numerous large moulds and fragments of enamelled ware, believed to have been used by him in making the grotto in the garden of the Tuilleries for Catherine de' Medici about 1570, two years before the Massacre of St Bartholomew.

PALLADIO, ANDREA, a very celebrated Italian architect, born at Vicenza in 1518. In his early studies he was aided by the learning and friendly offices of his countryman Trissino, with whom he visited Rome and studied the works of ancient art. He owed his first reputation to his successful reconstruction of the Palazzo della Ragione in his native town, and from that time he was fully employed in building mansions, palaces, and occasionally churches in various parts of Italy. Among his most celebrated works are the churches of St George and the Redeemer at Venice, both examples of the Corinthian order of architecture. He left a Theatre at Vicenza unfinished at his death. The name of Palladio became almost a symbol for his art, and his works have served as models of domestic architecture in all European countries. His "Treatise on Architecture" appeared in 1570, and has been frequently republished. Died at Vicenza, 1580.

PALLAS, PETER SIMON, a celebrated German traveller and naturalist, was born at Berlin in 1741. He studied at Halle, Göttingen, and Leyden, and after making a long visit to England, every where applying

himself to his favourite science, zoology, he settled at the Hague. Having gained a great reputation by several scientific works, he was called in 1767 to St Petersburg by Catherine II., and named professor of natural history in the Academy. In the following year he set out with the expedition sent to Siberia to observe the transit of Venus, penetrated to the borders of China, and after great hardships and fatigues and the loss of most of his companions, he returned to St Petersburg in 1774. There he lived for nearly 20 years, loaded with honours, made tutor to the Grand-dukes Alexander and Constantine, and very busily engaged in literary labour. By his own desire he afterwards settled in the Crimea, the empress giving him a fine house and a good income. But in 1810 he returned to Berlin, and died there the following year. The principal works of this laborious observer are—"Elenchus Zoophytorum;" "Spicilegia Zoologica;" "Observations on the Formation of Mountains;" "History of the Mongolian Nations;" "Travels through the various parts of the Russian empire;" and "Zoographia Rosso-Asiatica." These works are of great value as storehouses of facts, and facts of very diversified kinds. Cuvier assigned to Pallas very high rank as a zoologist, and asserted that by his observation of the order of succession of the granite, slate, and chalk series of rocks he originated modern geology. Pallas was a member of the French Institute, the Royal Society of London, and many other scientific bodies.

PALLAVICINO, SFORZA, a learned and pious cardinal, was born at Rome, in 1607. He was employed by Pope Innocent X. in various important affairs, and obtained a cardinal's hat in 1657. He wrote a "History of the Council of Trent," intended as a reply to the great work of Father Paul on the same Council; and died, 1667.

PALLISER, Sir HUGH, an English admiral, was born 1721. He entered into the navy early in life, and distinguished himself on many occasions, particularly at the taking of Quebec. In 1773 he was made a baronet; but being second in command to Admiral Keppel, in the memorable battle off Ushant, July 27, 1778, some misunderstanding took place, and these two officers preferred charges against each other. Keppel was acquitted, and Palliser censured. This sentence, however, was considered as more the effect of party spirit than of justice; and he was made governor of Greenwich Hospital, where he died in 1796.

PALM, JOHANN PHILIPP, a citizen and bookseller of Nürnberg, who, in 1806, being accused of having distributed a pamphlet against Buonaparte, entitled "Germany in her deepest Humiliation," was arbitrarily arrested, by virtue of an order sent from Paris, and conducted to Braunau, where he was arraigned before a military commission, pronounced guilty, and shot. This act of tyranny was everywhere regarded with horror. Palm was considered throughout Germany as a martyr, and public subscriptions were entered into for his widow and children.

PALMA, JACOPO, the elder, Italian paint-

er, born near Bergamo, about 1480. He went to Venice, and was perhaps a pupil of Titian, whose works, with those of Giorgione, he appears to have imitated. His best works are praised for their sweetness, refinement of expression, beautiful colouring, and exquisite finish. His pictures are numerous, and many are found in the principal collections of Europe. One of his most celebrated is the "St Barbara" in one of the churches of Venice. Died, after 1520.

PALMA, JACOPO, the younger, Italian painter, was great nephew of the preceding, and was born at Venice, in 1544. He studied at Rome under the patronage of the eclectic principle. When he became a popular painter, his works deteriorated from the haste and carelessness of his execution. But in his careful and best productions he showed himself the worthy rival of Tintoretto and Paolo Veronese. To his influence is traced the first corruption of the art in the Venetian school. Died, 1628.

PALMBLAD, VILHELM FREDRIK, Swedish littérateur, born in 1788. He studied at the university of Upsal, and contributed greatly to a reform in the literature of his country: opposing the French school and making known in Sweden the works of the great German authors. He is now chiefly remembered as the projector and one of the principal contributors to the voluminous "Biographical Dictionary of eminent Swedes." Palmbiad was author of a "Handbook of Physical and Political Geography," in 5 vols.; of several novels, and some translations from Greek poets. He was also editor of several literary journals, and a professor at the university of Upsal. Died, 1852.

PALMELLA, Duke of, a distinguished Portuguese statesman, was born in 1781. He took an active part in all the political troubles of his country during 30 or 40 years; and it was owing to his aid and counsels that the Queen Donna Maria was laboured. In a great measure, for her establishment on the throne of her ancestors in 1833. A considerable part of his life was dedicated to the diplomatic service of his country, which he represented at the congress of Vienna and in London. In 1820 he made a fruitless voyage to Brazil, to pacify the revolution which had burst forth. He was also selected to attend at the coronation of Queen Victoria; and his great wealth enabled him to vie on that occasion with the representatives of the other courts of Europe. He was several times called on to offer advice to his sovereign, but only held office for a limited period. Died, 1850.

PALMER, JOHN, an eminent English actor, was born in London, about 1742, and made his first appearance in the metropolis at the Haymarket Theatre. He was afterwards engaged by Garrick at Drury Lane, and gradually rose to eminence in his profession, both in comedy and tragedy. He unfortunately involved himself in great pecuniary difficulties, by building a new theatre near Wettestose Square, for which a licence could not be obtained; and his career was closed by a tragical catastrophe.

Bergamo, about 1480. He and was perhaps a pupil of works, with those of Giorgione to have imitated. His expression, beautiful colouring, and finish. His pictures are many are found in the principal of Europe. One of his is the "St Barbara" in one of Venice. Died, after 1520. PRO, the younger, Italian nephew of the preceding at Venice, in 1544. He under the patronage of the and formed his style on the . When he became a popular works deteriorated from the success of his execution. But best productions heshow-orthly rival of Tintoretto. , an eminent English London, about 1742, and rance in the metropolis Theatre. He was after, Garrick at Drury Lane, to eminence in his pro-edy and tragedy. He ved himself in great pe-, by building a new Base Square, for which e obtained; and his y a tragi catastrophe.

While performing the principal character in "The Stranger," at Liverpool, Aug. 2, 1798, he fell on the stage in a state of exhaustion, and almost immediately expired, having just exclaimed, in the words of the drama, "There is another and a better world!"

PALMER, JOHN, the first projector of mail-coaches, was a native of Bath, where he was brought up as a brewer, but subsequently solicited and obtained a patent for a theatre in his native city, which proved eminently successful under his management. Being in the habit of travelling from place to place, for the purpose of securing rising performers, the idea occurred to him that a better mode of conveying the mails was most desirable, and he accordingly matured the plan of transmitting letters by coaches with guards. He succeeded in his object, though not without great opposition; but the utility of the plan soon became manifest, and he was made comptroller-general of the post-office, with a salary of £1500 a year. Some disputes, however, occurring, he lost his situation in 1792; and though he afterwards, through petitions, was reimbursed by parliament, the compensation was very inadequate to the percentage he was to have received, in case his plan succeeded. Died, 1818.

PALMER, SAMUEL, an English printer of considerable eminence; author of a "General History of Printing" and a "Printer's Grammar." Died, 1732.

PALMERSTON, Lord, HENRY JOHN TEMPLE, third Viscount PALMERSTON, prime minister of England, was born at Westminster on the 20th October, 1784. The Temple family trace their descent as far back as the period of the Norman Conquest. One of its most distinguished members was Sir William Temple, friend of William III., and eminent as a diplomatist and man of letters. It was from Sir William's brother, Sir John Temple, that Lord Palmerston was descended. He was educated at Harrow School at the same time as Lords Aberdeen and Ripon, Sir Robert Peel, and Lord Byron; then at the university of Edinburgh under Dugald Stewart, and completed his studies at St John's College, Cambridge. In 1802, the year before he went to Cambridge, he succeeded to the title by the death of his father. Like so many of his family before him, he chose a political career, and having graduated M.A. in 1806, he offered himself as a candidate for the representation of Cambridge University, but he was defeated, his opponent being Lord Henry Petty, afterwards marquis of Lansdowne. He renewed this attempt in 1807, and again in 1811, and on the last occasion was elected, and for the next twenty years sat in parliament for the university. He had, however, been returned for the pocket-borough of Bletchingley, in 1803, and afterwards for Newport, in the Isle of Wight. It was not long before he entered upon official life, being named a lord of the admiralty in 1807, under the Tory administration of the incident and ineapable duke of Portland. In 1809, under the ministry of Perceval, he was appointed secretary at war, a post which did not give

him a seat in the Cabinet. For about 20 years, through all sorts of changes, under the governments of Lord Liverpool, Canning, Lord Goderich, and the duke of Wellington, Palmerston kept his place at the war office. He began political life as a follower of Pitt, but for many years he showed little ambition to be or do much beyond the narrow limits of his official position, and he seldom spoke in the House except on the business of his office, and on that only when compelled to do so. The first few years of his appointment were those of the last great wars with Napoleon; and after the peace in 1815, Palmerston, as the "alpha and omega of the war office," had to oppose the policy of retrenchment, so ably and perseveringly advocated by Joseph Hume. In April, 1818, he was shot at by an officer at the Horse Guards, but was only slightly hurt. The officer was found to be insane, and spent the rest of his life in Bedlam. Lord Palmerston was one of the contributors to the satire on the Liberal party, entitled "The New Whig Guide," the other writers being Sir Robert Peel and Wilson Croker. In the latter years of the Liverpool government, Palmerston sided with the more liberal section, at the head of which was Canning, and, like him, was the advocate of Catholic Emancipation and the opponent of parliamentary reform, except within very narrow limits. After Canning's death he was recognized as the ablest of his disciples and the greatest master of foreign affairs. In May, 1828, he felt it necessary, on principle, to follow the example of Huskisson, in retiring from the Wellington administration, and the duke vainly attempted to win him back. While he remained out of office he made two important speeches, one on our foreign relations in general—1st June, 1829, and the other on our relations with Portugal—10th March, 1830. In November following a Whig ministry was formed, and Palmerston became secretary of state for foreign affairs, a post which he filled with the greatest ability till September, 1841, with the exception of the few months of the existence of the Peel ministry, Dec., 1834, to April, 1835. It was during this period that he won his world-wide fame, and became to foreign nations the most conspicuous and formidable type and representative of the power, knowledge, freedom, and noble instincts of the English nation. The principles of his foreign policy were the subject of frequent and vehement debates, his greatest rival being Lord Aberdeen. The results of his policy were of high importance. Among the principal were the establishment of the kingdom of Belgium, the Quadruple Alliance for the defence of the then existing monarchies of Spain and Portugal, and the brilliant exploit by which he completely defeated the aggressive attempt of Mehemet Ali in Syria; the siege and capture of the fortress of St Jean d'Acre, in 1840. Under the Peel ministry (1841-16) Palmerston was in opposition; became foreign secretary again on the formation of the Whig ministry under Lord John Russell; and held that office till 1851. During this period he had to cope with many hard and perplexing foreign questions; the Swiss difficulty respecting the expulsion of

the Jesuits, the affair of the Spanish marriages, in which Louis Philippe had an apparent but brief triumph; and then the continental revolutions of 1818, with the wars in Hungary and Italy, throughout which Lord Palmerston faithfully represented both the sympathies of Englishmen with the nations who sought and fought for freedom, and also their determination not to take up arms to aid them. The affair of Paclleo, a Greek Jew, whose claim on the Greek government for damages was supported by a British fleet sent to Athens, caused great irritation both in England and abroad. In the debates which arose in parliament on this affair, Palmerston made one of his most effective speeches, of which Sir Robert Peel said, that it made us proud of the man who made it. In 1815, he declared himself in favour of the Repeal of the Corn Laws. In December, 1851, Lord Palmerston hastily, and without consulting his colleagues in the Cabinet, pronounced in favour of Louis Napoleon and the *coup d'Etat* by which he made himself absolute master of France, and he had to resign. In twelve months the Whig ministry was broken up, the Derby ministry took its place, but was almost immediately succeeded by the Coalition ministry of Lord Aberdeen, in which Lord Palmerston accepted the post of home secretary. He applied himself zealously to his novel duties, but the Crimean war broke out, and the disasters arising from the misconduct of the operations occasioned great popular dissatisfaction, and dissections in the Cabinet. In February, 1855, the Coalition was dissolved, and Palmerston was called to the highest office in the state. As prime minister he successfully carried out the policy of alliance with France and the war with Russia, which ended with the fall of Sebastopol, in September, 1855. Feebly supported, however, by his colleagues, he lost strength in the House, and in the important debate on the war with China, the government was in the minority. Although on an appeal to the country he received enthusiastic support, and at first had a majority, from various causes he lost it once more, and being defeated on the question of the conspiracy bill, he resigned (1858). The second Derby administration succeeded, but a year later Palmerston was again called to be prime minister. With surprising energy and vivacity, industry and tact, almost unabated by age, he directed our policy through the Italian war, the American war, and the Polish insurrection. He was prime minister for a greater number of years than any man in this century, except Lord Liverpool, and retained his marvellous popularity to the last. Beyond and above all differences of mere opinion rose the general consciousness of his pure patriotism; and Englishmen were proud to be represented to other nations by one in so many ways like themselves, both in their strength and weaknesses. Through the summer of 1865, the state of his health excited many fears, which proved well-grounded. And on the 18th October he died, at his seat, Brockett Hall, Hertfordshire. On the 27th, his remains were interred with public honours, in Westminster Abbey,

where they rest near those of Pitt and Fox, Grantin, Castlereagh, and the two Canning. Lord Palmerston married, in 1839, the sister of Lord Melbourne, widow of the fifth Earl Cowper, who survives him; but as he left no children, his titles are extinct. Addresses of condolence were sent to Lady Palmerston from the principal municipal corporations in the kingdom, and from many scientific and other societies. A monument to the memory of Lord Palmerston, to be erected in Westminster Abbey at the national expense, was voted by parliament, Feb. 22, 1866.

PALMEZZANO, MARCO D'ANTONIO, Italian painter of the 15th and 16th centuries. He was the most eminent scholar of Melozzo da Forlì, to whom many of his works have been erroneously attributed. He painted some frescoes in the church of San Girolamo, Forlì, and in the Duomo of Loro. His finest work is a Madonna and Child, at Facuza, painted between 1497-1500. A large number of his works in oil are scattered through the galleries of Europe. He was living in 1536. The National Gallery has a "Deposition" by this artist, formerly part of an altar-piece in the cathedral of Forlì.

PALOMINO DE CASTRO Y VELASCO, ACISLO ANTONIO, an eminent Spanish painter, was born near Cordova, in 1653, and was a pupil of Valdes. He was appointed royal painter, with a pension; and he distinguished himself also as an author, by a work on the theory and practice of painting, with the Lives of the most celebrated artists, entitled "El Museo Pictorico," &c. Died, 1726.

PANCIOLO, GUIDO, an eminent Italian civilian, was born, at Reggio, in 1523. He became professor of the Institutes at Padua; and, after filling that chair seven years, was appointed to that of Roman law, but resigned it in 1571, to go to Turin, where he obtained the professorship of civil law. In 1582 he returned to Padua, where he died, in 1599; having given to the world several excellent works on jurisprudence, besides a curious treatise on the ancient inventions, which are lost.

PANCOUCKE, CHARLES JOSEPH, an eminent French bookseller, and man of letters, was born, in 1736, at Lille, where his father had carried on business, and likewise distinguished himself as an author. He settled at Paris, became connected with the most able writers, and published many magnificent works. He established the *Moniteur*, projected the *Encyclopédie Méthodique*, and was himself the author of "De l'Homme et de la Reproduction des Différents Individus," and other works. Died, 1798.

PANDULF, Cardinal, was sent to England in 1211, in consequence of the quarrel between King John and the pope, and for the purpose of making peace between them. Not succeeding, the pope soon after absolved the subjects of the King from their allegiance. In May, 1213, Pandulf received the homage of John to the pope at Dover, and submission being thus made, the country was relieved of the interdict and the King of his excommunication. In the Great Charter, granted in

PANORMITA. [BECCEDELLI, ANTONIO.]

PAOLI, PASQUALE DE, n Corsican patriot and general, son of Giacinto de Paoli, was born in 1726, at Stretta, in Corsica; followed his father into exile; and was educated at the Jesuits' College, at Naples. In 1755, his countrymen having elected him their generalissimo, he returned to Corsica, where he acted with such vigour against the Genoese, that he confined their dominion within the narrow limits of the fortified seaports, while he exerted himself in promoting such objects as were best calculated to secure the independence of the republic. The Genoese, however, having made a transfer of the island to France, such an overwhelming force was sent against the patriots that Paoli was again an exile; and, embarking on board an English vessel, came to England, where he obtained from the government a pension of £1200 a year. In 1789 the island was recognized by a decree of the National Assembly, as a department of France; and Paoli, being invited to resume his station at the head of affairs, resigned his pension, took his departure from England, and, in 1790, attended by deputies from Corsica, presented himself at the bar of the National Assembly at Paris, where he was received with enthusiasm, and took the oath of fidelity to the French government. The progress of the revolution disappointed the hopes which he had conceived; but he continued the connection with France till after the execution of Louis XVI., when he abandoned his allegiance, and was invested with his original dignities of the president of the national council, and commander-in-chief of the island. He was encouraged to adopt these measures by the promise of assistance from Great Britain; and in February, 1794, an English army landed in Corsica. On the 11th of June following a meeting took place of deputies from the different parts of the islands, when, through the influence of Paoli, a decree was made declaring the separation of Corsica from France, and its union to the British empire. Shortly after, Paoli revisited London; and, being in embarrassed circumstances, owing to a commercial failure at Leghorn, the English government restored his pension; and he continued to reside in the metropolis till his death, in 1807. A monument was erected to him in Westminster Abbey.

PAOLO SARPI. [SARPI.]

PAOLO VERONESE. [CAGLIARI.]

PAPIN, DENYS, an eminent natural philosopher and physician, was born at Blois, in France. After taking the degree of M. D. he visited England; and, in 1680, became a fellow of the Royal Society. While here he made many attempts to bring the steam engine to perfection, and published an account of an invention, which still bears his name.

His work is entitled "The New Digester, or Engine for the Softening of Bones," &c. Papin assisted Mr Hoyle in his pneumatic experiments; and, on leaving England, he went to Marburg, where he was made mathematical professor in 1687, and died in 1710.

PAPINIANUS, AMILIUS, n celebrated Roman lawyer, who became advocate of the treasury, and afterwards prietorian prefect under the Emperor Severus, who recommended his sons, Caracalla and Getn, to his care. When the former murdered his brother, it is said that he ordered Papinianus to justify the deed, which he not only refused, but nobly observed, that it was easier to commit a parricide than to excuse it, and that slander of Innocence was a second parricide. He was soon after put to death, A. D. 212.

PAPPENHEIM, GOTTFRIED HEINRICH, Count von, an illustrious German general, born in 1494. Educated at the universities of Altdorf and Tübingen, he travelled in the principal countries of Europe, was named aulic councillor of the empire, and then chose the military career. He took a prominent part in the Thirty Years' War; was severely wounded at the battle of Prague, in 1620; led the assault on the capture of Magdeburg, 1631; and the same year after the defeat at Leipsic saved the remnants of the imperial army. Arriving late to take part in the battle of Lützen, he was there mortally wounded, and died the next day, November 7, 1632.

PARACELSUS, theologist, physieinn, and chemist, was born at Einsiedeln, near Zurich, in 1493. His real name was PHILIP THEOPHRASTUS BOMBAST VON HOHENHEIM, but he assumed the high-sounding name of AUREOLIUS THEOPHRASTUS PARACELSUS. He learnt the rudiments of chemistry, astrology, and medicine from his father, and then became a wandering scholar; visiting almost all parts of Europe, and gathering information from physieinns, barbers, old women, conjurers, &c. He made some fortunate cures, and announced that he had discovered an elixir which would prolong life indefinitely; whereby he made himself, for a time, an immense reputation. In 1526 he was appointed professor of physic and surgery in the university of Basel, and there set the example of lecturing in the vulgar tongue. But his arrogance, coarseness of language, and habits of drunkenness and debauchery soon destroyed his fame and influence, and he lost his professorship, and left Basel at the end of 1527. The rest of his life was spent in roving from place to place, practising medicine, indulging in low habits, and writing his books, which were published in 10 vols. 4to. Notwithstanding all his faults, errors, and absurdities, Paracelsus gave a new direction to medical science, by his doctrine that the true use of chemistry is not to make gold, but to prepare medicines; and from his day the study of chemistry became a necessary part of a medical education. He opposed the theories of Galen and Avicenna, and publicly burnt their works at Basel; and their long reign came to an end. This was a few years after the burning of the pope's bulls by Luther, at Wittenberg. Paracelsus made great use of the Cabbalistic

writers; adopted the grossest pantheism; boasted of his own divine inspiration; and employed many new and barbarous words, and used old ones in new senses, thus obscuring his opinions. Died at Sulzburg, 1511.

PARADISI, Count GIOVANNI, born in Modena, in 1760. He was a director of the Cisalpine republic, and president of the Senate of Napoleon's kingdom of Italy. Author of "Recherche sulla Vibrazione delle Lamine Elastiche," "Il Vitalizzio, Commedia," &c.

PARÉ, AMBROISE, called the father of French surgery, was born at Laval, about the beginning of the 16th century. He was a bold and successful operator, particularly in the practice of tying divided arteries and in his treatment of gun-shot wounds. He was successively surgeon to Henry II., Francis II., Charles IX., and Henry III.; and died in 1590. His works have been translated into the principal European languages and frequently republished.

PARÉDES, DIEGO GARCIA DE, a distinguished Spanish general, the friend of the great captain Gonzalo of Cordova, was born at Truxillo, in 1466. He served in the campaigns against the Moors which ended with the conquest of Granada; then entered the service of the pope; and in 1499 joined Gonzalo in Greece. He afterwards took part with distinction in the war carried on in Italy between France and Spain; was at the battle of Cerignola, at the sieges of Verona and Vicenza, and at the battle of Pavia. Died, 1530.

PAREJA, JUAN DE, painter, was born in the West Indies, in 1610, and became the slave of Diego Velasquez. In the absence of his master, Pareja amused himself in drawing and copying his works, but secretly, for fear of giving offence. Philip IV., king of Spain, coming one day to visit Velasquez, Pareja contrived to place one of his own pictures in his way, with which his majesty was extremely pleased. The slave then fell on his knees, and besought the king to ask his master to forgive him. Philip not only did this, but obtained him his liberty; but the faithful Pareja would not quit Velasquez till his death. His portraits are very fine. He died in 1670.

PARINI, GIUSEPPE, an eminent Italian poet, was born in 1729, at Posizio, in the Milanese. He raised himself to eminence by his talents, which he employed in satirizing the vices and follies of the age. He first exerted his poetical abilities to procure the means of support for himself and his widowed mother, but he was obliged to struggle through nearly 20 years of obscurity and indigence, ere he emerged into reputation and competence. He was professor of belles lettres, eloquence, and the fine arts, at Milan; and died in 1799. His principal poem is entitled "Il Giorno." His works form 6 vols. 8vo.

PARIS, MATTHEW. [MATTHEW PARISIS.]

PARISOT, or NORBERT, PIERRE, a Curchin friar, was born at Bar-le-Duc, in 1697. In 1736 he went as a missionary to the East Indies; but having quarrelled with the Jesuits, they had him removed to America. He returned to Europe in 1740; and soon

after published a work, entitled "Historical Memoirs relative to the Missions in the Indies," which giving offence to his order, as well as the Jesuits, he withdrew to England, where he established two manufactories of tapestry. After visiting Germany and the Peninsula, he returned to his native country, became reconciled to his order, and again signed it. Died, 1770.

PARK, Sir JAMES ALLAN, an eminent English lawyer, was born at Newington, Surrey, and was educated at the free grammar school at Northampton. He was called to the bar in 1784, and speedily brought himself into notice by the profound knowledge he displayed in the profound knowledge he displayed in mercantile law and marine insurance. A work which he published on this latter subject rapidly became the text book of the profession, and long continued so. At the bar he was an admirable speaker; and when raised to the bench of Common Pleas, he proved himself a no less admirable judge. In addition to the legal work of which we have made mention, he published, in 1801, "An Earnest Exhortation to a Frequent Reception of the Holy Sacrament of the Lord's Supper, addressed to Young Persons, by a Layman. Died, 1839.

PARK, MUNGO, the celebrated African traveller, was born in 1771, at Fowlsheils, near Selkirk, Scotland, and brought up to the medical profession. After having made a voyage to the East Indies, as a ship's surgeon, he was engaged, in 1793, by the African Society, to penetrate into the interior of Africa, and explore the course of the Niger. He arrived on the coasts of Senegal in June, 1795, and in December proceeded from Fisi, on the Gambia, on his adventurous journey. On the 20th of July following, he came in sight of the long sought river; but after tracing it for a considerable distance, he was under the necessity of desisting from his enterprise, owing to the state of destitution to which he had been reduced. He accordingly returned towards the coast, and arrived in England at the end of the year 1797. Of his interesting discoveries he published an account in his "Travels in the Interior of Africa." He then returned to Senegal, married, and entered upon the practice of his profession at Peebles; nor would he in probability have again exposed himself to fresh perils, but for the extraordinary inducement held out to him by government to take the command of a second expedition. He took with him 41 Europeans, of whom 33 were soldiers, and the rest mechanics; and he was liberally provided with presents and merchandise. Some time having elapsed without any intelligence being received of him, Isaac, his interpreter (who had been sent back with communications from the Niger), was despatched to procure information. He succeeded in finding the person who had taken his place as interpreter, and from him received a journal, containing an account of the voyage, from which it appeared that the party was attacked by the natives at Boussa, and all killed with the exception of one slave. This account was subsequently confirmed by Clapperton and the Landers.

ed a work, entitled "Historical Narrative to the Missions in the Indies as the Jesuits, he withdrew to the West Indies, where he established two manufacturing establishments in the island of St. Vincent. After visiting Germany in 1770, he became reconciled to his order, and died in 1770.

JAMES ALLAN, an eminent lawyer, was born at Newington, Northampton. He was called to the bar in 1784, and speedily brought notice by the profound knowledge in mercantile law and equity. A work which he published on the subject rapidly became the property of the profession, and long remained in the hands of the bench. At the bar he was an admirer of the justness of the laws, and when raised to the bench he proved himself a no less able judge. In addition to the which we have made mention, in 1801, "An Earnest Exhortation to the Reception of the Holy Eucharist at the Lord's Supper, addressed to the Clergy and People," by a Layman. Died,

OSWALD GOSWOLD, the celebrated African traveller, was born in 1771, at Fowlsheils, Scotland, and brought up to the profession of a surgeon. After having made several voyages to the East Indies, as a ship's surgeon, he was engaged, in 1793, by the African Company to penetrate into the interior of Africa, and to explore the course of the Niger, and the coast of Senegal. In June, 1795, he proceeded from Fowlsheils to the coast of Senegal, and on his adventurous journey of July following, he came in sight of the river; but after a considerable distance, he was obliged to desist from his enterprise, on account of the state of destitution to which he was reduced. He accordingly returned to the coast, and arrived in London in the month of the year 1797. Of his travels he published an account, "Travels in the Interior of Africa," which was returned to him.

He was not only a philosopher; nor would he in any ordinary inducement, he again exposed himself to the extraordinary inducement of a second expedition. He was accompanied by 35 Europeans, of whom 35 were the rest mechanics, and provided with presents and some time having elapsed, diligence being required of the interpreter (who had been communicated from the natives) to procure information. In finding the person who was the interpreter, and from whom he had obtained an account, in which it appeared that he had been attacked by the natives at the time of the expedition, an account was subsequently obtained from the natives and the Landers.

The journal of Park's second expedition was published in 1815.

PARK, THOMAS, a celebrated bibliographer, was, after having published many works, and been admitted a fellow of the Society of Antiquaries, withdrew his name from its roll, and retired to Hampstead; where he devoted his latter days to affairs of a purely local nature. He died in 1834, aged 75.

PARKER, MATTHEW, archbishop of Canterbury, was born at Norwich in 1504, was educated at Cambridge, and entered the church. He adopted the views of the reformers; became chaplain to Anne Boleyn, and dean of the College of Stoke Clare; after the death of Queen Anne, was named chaplain to the king, and returning to Cambridge, was appointed master of Corpus Christi College, in 1541. As a married clergyman he was deprived by Queen Mary, and lived during her reign in studious retirement. Queen Elizabeth, the year after her accession, appointed him archbishop of Canterbury. He filled this office with much dignity, and by his wisdom and moderation contributed to the orderly establishment of the reformed church. The "Bishops' Bible" was prepared under his direction, and he published editions of several early English historians. He was also principal author of the treatise "De Antiquitate Britannicæ Ecclesiæ." Died, May 17, 1575, and was buried at Lambeth. His remains, disinterred during the civil war of the 17th century, were re-interred by Archbishop Sheldon.

PARKER, SAMUEL, bishop of Oxford in the reign of James II., was born at Northampton, in 1640. He was educated at Wndham College, Oxford, from whence he removed to Trinity College. In 1665 he became a fellow of the Royal Society, and published a work in Latin, entitled "Tentamina Physico-Theologica de Deo;" for which Archbishop Sheldon made him one of his chaplains, and gave him the archdeaconry of Canterbury. He also obtained a prebend in that church, and other preferments; in return for which he displayed his zeal by writing against the Nonconformists, in a "Discourse of Ecclesiastical Polity." At the commencement of the next reign he was made bishop of Oxford, and constituted by James II. president of Magdalen College, Oxford. He wrote many works, among which are, "A Demonstration of the Divine Authority of the Law of Nature and the Christian Religion;" but though he was a preacher of considerable learning, he was contemptible from his versatility and time-serving disposition. Died, 1687.

PARKER, THEODORE, a distinguished American theologian, philosopher, and social reformer, was born at Lexington, near Boston, 24th August, 1810. He entered Harvard College in 1830, continuing, however, for a time to work on his father's farm, and afterwards teaching in a school at Boston. In 1831 he entered the Theological School, the professors at which belonged to the then rising liberal school. After laborious and successful studies he was chosen in 1837 minister of a Unitarian congregation at West Roxbury, his marriage having taken

place just previously. He had there leisure for study and read extensively, enjoying the society of Dr Channing. His views of Christianity had diverged considerably from the standard of his sect, and great excitement was occasioned by his sermon "On the Transient and Permanent in Christianity," preached in 1841. Wounded with the bitterness and opposition of his adversaries, he visited Europe in 1843. The prejudice against him led to his quitting West Roxbury, and settling at Boston in 1846, as minister of the Twenty-eighth Congregational Society. In the following year he became joint-editor with Emerson and Cabot of the "Massachusetts Quarterly Review." He distinguished himself as the fearless opponent of the Fugitive Slave Law, and sheltered slaves in his own house. Notwithstanding his failing health he was very active as a public lecturer on various political and social topics, and was the correspondent of many eminent men; among them, Charles Sumner, Mr Buckle, Professor Gervinus, &c. Early in 1859 he was compelled to relinquish his duties and seek health in France and Italy. It was in vain, and he died at Florence, 10th May, 1860. His earliest published work was the "Discourse of Matters pertaining to Religion," which appeared in 1817. In this work alone he exhibits his fundamental principles in a systematic form. It has passed through several editions, has been widely read in Europe as well as in America, and is one of the most important and interesting of recent contributions to religious philosophy; one of the books which are worth reading for their honesty, earnestness, and beauty, whether we agree or disagree with their conclusions. Among his other works, of which a collected edition has been published by Miss Cobbe, are "Critical and Miscellaneous Writings," "Theism, Atheism, and the Popular Theology," "Discourses of Politics," "Experience as a Minister," &c. His "Life and Correspondence," edited by John Weiss, appeared in 2 vols. in 1863.

PARKES, SAMUEL, chemist, was born in 1759, at Stourbridge, in Worcestershire, and was educated at Market Harborough, under Dr Addington. He was eminent as an experimental chemist, belonged to several literary and philosophical institutions, and was the author of some useful works, viz., a "Chemical Catechism," "Rudiments of Chemistry," an "Essay on the Utility of Chemistry in the Arts and Manufactures," and "Chemical Essays." He died in 1825.

PARKHURST, JOHN, a learned divine, was born at Catesby, in Northamptonshire, and educated at Clare Hall, Cambridge. He published a "Greek and English Lexicon," also a "Hebrew and English Lexicon," once in high repute, but long superseded, and a tract in defence of the Divinity of Jesus Christ. Though he was in holy orders, he held no preferment; and being possessed of an independent fortune, he devoted himself entirely to literary pursuits. He died at Epsom, in Surrey, in 1797.

PARKINSON, JOHN, an English botanist, born in London in 1567. He became apothecary to King James I., and botanist to

Charles I., and was author of a book, entitled "Paradisi in sole, Paradisus terrestris. A choice garden of all sorts of rarest flowers," which appeared in 1629, and was dedicated to the queen of Charles I. In 1640 he published his principal work—the *Theatrum Botanicum*, a folio of 1746 pages, with innumerable woodcuts. It was in honour of this botanist that Plumier named the species "Parkinsonia." The "*Theatrum Botanicum*" of Parkinson and the "Herbal" of Gerard were long the chief botanical authorities in England. The time of Parkinson's death is not known.

PARKINSON, THOMAS, an eminent mathematician, was born at Kirkham, in Lancashire, in 1743, and educated at Christ's College, Cambridge. He became rector of Kegworth, archdeacon of Leicester, chancellor of Chester, and a prebendary of St Paul's, London. In 1789 he published "A System of Mechanics and Hydrostatics," a work of great value; and, while at college, he was employed by the Board of Longitude in the laborious calculation of tables of the series of parallax and refraction. Died, 1830.

PARMA, Prince of. [FAINESE, ALEXANDELL.]

PARMENIDES, a Greek philosopher of the Eleatic school, in the 5th century B.C. He was the teacher and friend of Zeno, wrote a poem on Nature, of which some fragments remain, and was highly esteemed, not merely as a speculative philosopher, but as the wise lawgiver of Elea.

PARMENION, a distinguished Macedonian general of the 4th century B.C. He was long in the service of Philip II., and of his son, Alexander the Great, and accompanied the latter in his expedition into Asia. He held high command, and greatly contributed to the victories of the Granicus, Issus, and Gaugamela (Arbela), and remained in Media when Alexander went in pursuit of Darius. He was there shamefully murdered by order of his master and friend, Alexander, on the groundless suspicion of being implicated in an alleged conspiracy, B.C. 330. His son Philotas was previously stoned to death on the same charge.

PARMIGIANO. [MAZZUOLI, FRANCESCO.]

PARNELL, THOMAS, a poet and divine, was born in Dublin, in 1679; educated at Trinity College, and, in 1705, presented to the archdeaconry of Clogher. He was connected with Addison, Congreve, Steele, and other Whigs in power; but later in life he was the friend of Swift and Pope, the latter of whom gave the works of Parnell to the press. His poems are pleasing, sprightly, and harmonious, while in sentiment they are elegant and pure in morals. He obtained a prebend in Dublin cathedral and the vicarage of Finglass. Died, 1717.

PARODI, DOMENICO, Italian painter, was the son of a sculptor of Genoa, and was born there in 1658. He studied at Venice, and copied some of the works of the great masters, imitating also their various styles. He decorated the great hall of the Negroni palace at Genoa, and his work there excited the astonishment of the engraver Raphael Neuge. His painting of St Francis de Sales

was greatly admired. Parodi was also a sculptor. Died, 1740.

PARR, THOMAS, an extraordinary instance of longevity, was born in Shropshire in 1483. He was bred to husbandry, in which he laboured after he was 130 years old. Ten years before this he married a widow; and he exhibited every sign of health, when, in 1635, the earl of Arundel took him to the court of Charles I., and he died at London through the change of air and mode of living, at the age (if we may trust the dates) of 152 years and 9 months. His body was opened by Sir Harvey, who discovered no internal marks of decay.—A grandson of Parr is said to have died in Shropshire, at the age of 120.

PARR, CATHERINE, the sixth and last wife of Henry VIII. She was married to him in 1543, being at that time the widow of Lord Latimer. She survived the king, who died in 1547, and the same year she married Sir Thomas Seymour, lord admiral of England, who is said to have treated her so ill that she died the year following. She wrote "Prayers," "Meditations," and other religious pieces.

PARR, SAMUEL, a learned divine and profound classical scholar, was born in 1746, at Hurrow-on-the-Hill, Middlesex, and was educated at the grammar school of that place, and at Emanuel College, Cambridge. He accepted the situation of usher at Hurrow, under Dr Sumner; at whose death he offered himself as a candidate for the mastership, but without success. He first opened an academy at Stannore, which commenced under very promising appearances, but which, ultimately failing, he gave up in 1773, and then became master of the grammar school at Colechester, whence, in 1778, he removed to that of Norwich. In 1786 he obtained the perpetual curacy of Hatton, in Warwickshire, and a prebend in St Paul's cathedral. In 1790 he exchanged Hatton for the rectory of Wadenhoe, in Northamptonshire, though he still continued to live at the former place, to which he was much attached, and the parish church of which he greatly ornamented. In 1802, Sir Francis Burdett gave him the rectory of Graffham, in the county of Huntingdon, and this completed the course of his church preferment. As an elegant classical scholar Dr Parr stood pre-eminent among his contemporaries, his prodigious memory and extent of research rendered him astonishingly powerful in conversation; but he was immensely vain, pretentious, and unfair in controversy, and it is to be regretted that the greater part of his writings had reference to topics which were of temporary interest, and therefore, though written with vigour, are fast sinking into oblivion. He died in 1825. A portrait of Dr Parr, by G. Dawe, is in the National Portrait Gallery.

PARRHASIUS, one of the most famous Greek painters, was a native of Ephesus, though others say he was a native of Athens, where he flourished in the time of Socrates, and was the rival of Zenxis. He rendered the great service to art of fixing a standard of proportion which was generally accepted, and the title of legislator was given to him.

AUS, one of the most famous ers, was a native of Ephesus, say he was a native of Athens, rished in the time of Socrates, ival of Zenxis. He rendered ee to art of fixing a standard which was generally accepted, of legislator was given to him.

He was so excessively vain as to wear a crown of gold, and to carry a staff studded with gold nails, to indicate that he was the prince of painters. Many of his works are mentioned by Pliny, one of the most admired being a typical figure of the Athenian people.

PARRY, Rear-Admiral Sir WILLIAM EDWARD, Knight, F.R.S., D.C.L., &c., was the fourth son of Dr Caleb Hillier Parry, of Bath, where he was born in 1790. He entered the navy in 1803, and in 1818 accompanied Sir John Ross, as second in command, to Baffin's Bay, in an expedition for the discovery of the North-west Passage. This expedition returned to England unsuccessful. But the year following Lieut. Parry was appointed to the command of the Hecla and Griper for a similar object; and this voyage resulted in the discovery of a considerable portion of the North-west Passage, the ships wintering at Melville Island. Capt. Parry afterwards commanded two other expeditions of a similar kind, but the nature of the ice on both occasions obliged the ships to return. In 1827 he again commanded the Hecla, in an attempt to reach the North Pole. The ship was left at Spitzbergen, and Parry with his boats succeeded in reaching the highest latitude ever attained, viz. 82° 43', but the southerly drift of the ice rendered further advance impossible. He was knighted in 1829, and from 1830 to 1835 lived at Port Stephens, in New South Wales, as commissioner of the Australian Agricultural Company. The neglected state of the colony rendered Sir Edward's task no easy one, but his judgment and firmness triumphed over all obstacles. Aided by his wife, he succeeded in establishing schools, and building a church, having previously conducted divine worship himself in a carpenter's shop. On his return to England he held successively the post of assistant-commissioner of poor law in Norfolk, comptroller of steam machinery at the admiralty, captain-superintendent of Haslar Hospital, and lieutenant-governor of Greenwich Hospital. He published a small volume entitled "The Parental Character of God," and a lecture, delivered at Southampton, on the Character and Responsibilities of Seamen. Died at Ems, in Germany, in 1855; and was buried in the mausoleum at Greenwich. "Memoirs of Sir Edward Parry" have been published by his son.

PARSONS, JAMES, an eminent English physician and medical writer, was born at Barnstable, in Devonshire, in 1705. His study, anatomy, natural history, antiquities, &c., are indebted to his skill and industry for many important discoveries. He was a fellow of the Royal Society, and of the Society of Antiquaries. His most remarkable production is his "Remains of Japhet," being historical inquiries into the affinities and origin of the European languages. Died, 1770.

PARUTA, PAOLO, an Italian historian and diplomatist, was a native of Venice, and was born in 1546. He held various public offices in the republic, and in 1592 was sent on an embassy to Rome. As historiographer to the republic he wrote his "Istoria Vene-

ziana," in continuation of the work of Contarini. He was also author of a history of the war in Cyprus in 1570-71; of "Discorsi Politici," and a treatise "Deila Perfezione della Vita Politica." His histories and political discourses are esteemed for their impartiality, truthfulness, and dignity of style. Died at Venice, December, 1598, having been shortly before made a knight and proctor of St Mark.

PASCAL, BLAISE, one of the most profound thinkers and accomplished writers of France, was born at Clermont, in Auvergne, June 19th, 1623. His family was one of considerable distinction, his grandfather having been a treasurer of France at Blom, and his father president of the Court of Aids, in Auvergne. From his earliest childhood he exhibited precocious proofs of genius, especially in mathematics. Having been purposely kept in ignorance of geometry, lest his propensity in that direction should interfere with the prosecution of other studies, his self-prompted genius discovered for itself the elementary truths of the forbidden science. At 12 years of age he was surprised by his father, in the act of demonstrating, on the pavement of an old hall where he used to play, and by means of a rude diagram traced with a piece of coal, a proposition which corresponded to the 32nd of the first book of Euclid. At the age of 16 he composed a little tractate on conic sections, which excited the mingled incredulity and admiration of Descartes. At 19 he invented his celebrated arithmetical machine, and at the age of 26 he had composed the greater part of his mathematical works, and made those brilliant experiments in hydrostatics and pneumatics, which have associated his name with those of Torricelli and Boyle, and ranked him amongst the first natural philosophers of his age. But a strong religious impulse having been imparted to his mind at this period, deepened no doubt by the attacks of disease, which he had suffered uninterruptedly from his 16th year, he suddenly renounced the career to which his genius so unequivocally invited him, and thenceforward devoted himself to theology and polemics, and to the promotion of the spiritual and temporal welfare of his fellow-men. After a short interval spent at Paris, he retired to Port Royal in 1654, where he spent the remainder of his days. The two works for which he is best known in England are, his "Provincial Letters," a caustic satire upon the Jesuits, published in 1656, under the name Louis de Montalte, and his posthumous "Pensées," which have always been regarded as among the richest repositories of eloquent thought and profound theology. Died, 1662. An excellent translation of nearly the whole of Pascal's works (exclusive of those strictly scientific) was published by Mr Fenree from the edition of Fougère in 1849 and 1850.

PASCUAL II., Pope, RAINIERI, was a native of Ubeda, in Tuscany, and became a monk of Cluni. Sent to Rome, he was created a cardinal by Gregory VII., about 1076, and on the death of Urban II., in 1099, was elected against his will to succeed him. His pontificate of 18 years was occupied chiefly

with the continued angry disputes respecting investitures. Several antipopes were chosen in succession, but they were imprisoned or driven away. In 1106 he visited France, and was received with great honours by King Philip and his son. In 1111 Henry V., king of Germany, who had deposed his father, visited Rome to get the imperial crown, when the quarrel about investitures again broke out, and Henry imprisoned the pope. After two months he was released, conceded the right of investiture, and crowned Henry emperor. He revoked the concession in a council of the following year, and allowed councils and legates to excommunicate the emperor. In 1116 Henry was again in Italy to dispute with the pope the inheritance of the Countess Matilda, and in the next year marched on Rome. The pope fled, and the emperor had himself again crowned in the church of the Vatican. Scandalous scenes took place about the same time on occasion of the election of a chief magistrate of Rome. The pope returned to Rome in 1117, and died there in January, 1118.

PASKIEVICH, IVAN, Prince, a distinguished Russian general and statesman, was born at Pultowa in 1780. At an early age he entered the corps of Pages, and after having distinguished himself by a brilliant course of study, was appointed a lieutenant in the guard, and aide-de-camp to the Emperor Paul. In 1805 he made his first campaign as captain in an auxiliary corps, which was sent to the assistance of the emperor of Austria against the French. In 1806 he served against Turkey, and through the whole time occupied by that expedition—1807 to 1812—he exhibited great military talents. The prince was several times employed in missions to Constantinople. When hostilities with Turkey ceased in 1812, and war broke out between France and Russia, the grand army of Napoleon advanced into the heart of the Czar's dominions. General Paskievich was appointed to the command of the 26th division of Infantry, which formed part of the corps of Prince Bagration, and was present at the battles of Dachkoffka, Soultanofka, Soolensko, and the Moskowa. In 1813 he was at the battle of Dresden, where he commanded the advanced guard, and then at Leipzig, where his conduct procured his promotion to the rank of lieutenant-general. He was subsequently employed successively in the blockades of Magdeburg and Hamburg; in 1814 he was intrusted with the command of the 2nd division of grenadiers, then in France, and at the battle of Arcis-sur-Aube he had a horse killed under him. In 1817 he accompanied the Grand Duke Michael on his tour through Germany, Holland, and Italy, and on reaching home, in 1820, he was appointed chief of a division of the imperial guard. When, in 1826, war broke out between Russia and Persia, Paskievich was nominated second in command of the army of the Caucasus, at the special request of General Yermoloff, the general-in-chief. Here he rendered such important services, particularly at Elisavetpol, that he was presented by the Emperor Nicholas with a sword mounted in diamonds,

and bearing the inscription—"To the Conqueror of the Persians at Elisavetpol." In the next year General Paskievich succeeded Yermoloff in the chief command, which he retained till peace was concluded with the Shah on the 16th of February, 1828. In the war with Turkey which followed, Paskievich captured Kara and Erzerum, and was marching upon Trebizond when hostilities were put an end to by the signature of a treaty. The Polish insurrection was the next great occasion on which Marshal Paskievich distinguished himself. Having succeeded to the command on the death of Poles and Diebitsch, he signally defeated which he was raised in the dignity of prince of Warsaw. In 1849 he was sent into Hungary, to suppress the insurrection there. In 1854 he was placed in command of the army of the Danube, sent against Turkey; was wounded at the siege of Silistria, and died in 1856.

PASLEY, General Sir CHARLES WILLIAM, K.C.B., who died April 19, 1861, aged 80, was educated for the Royal Artillery. He served at the siege of Copenhagen, and afterwards at Corunna. In 1812 he was appointed director of the Royal Engineer Establishment at Chatham, and while there, he undertook the task of blowing up the wreck of the Royal George at Spithead. His success in this long and tedious occupation, which extended over three years, made him an authority on all points connected with the employment of the galvanic battery for explosive purposes; and under his superintendence the Round Down was removed at Dover to make room for the South-Eastern Railway. He invented some improvements in pontoon bridges, and was author of a Treatise on "Military Instruction," and an "Essay on the Military Policy and Institutions of the British Empire."

PASQUIER, ETIENNE, an eminent French civilian, born at Paris in 1529, who first rose into reputation, as an advocate, by pleading against the Jesuits before the parliament. In his writings also he proved himself a formidable adversary of that encroaching order. Pasquier held the office of advocate-general to the Chambre des Comptes eighteen years, resigning it in 1603. His principal work is the "Recherches sur la France." Died, 1615.

PASQUIER, ETIENNE DENIS, Duke, a French statesman, who took a more or less prominent part in public affairs for more than half a century, was born at Paris in 1767. His father, a counsellor of the parliament of Paris, was guillotined in 1794, and the son narrowly escaped death for his exertions to save him. He had previously become counsellor of the parliament, was appointed master of requests in 1801, received the title of baron of the empire, and the cross of the Legion of Honour in 1809, and in the following year was appointed by Napoleon prefect of police. It was during his tenure of this office that the Mallet plot was formed, and Pasquier was seized by the conspirators and imprisoned, but on the defeat of the plot was continued in his office. On the advance of the allies to Paris, in 1814, Pasquier was

General Sir CHARLES WILLIAM,
 April 19, 1861, aged 80, was
 of the Royal Artillery. He served
 in the Crimean War, and after-
 wards in the Indian Mutiny. In
 1812 he was appointed director
 of the Engineer Establishment at
 Chislehurst, and he undertook the
 work of repairing the wreck of the Royal
 Naval Academy. His success in this
 occupation, which extended
 to the management of the
 works, made him an authority on
 the subject, and he was con-
 sulted with the employment
 of the Royal Artillery. He
 served as superintendent of the
 works removed at Dover to make
 room for the Eastern Railway. He
 was appointed to the position
 of superintendent of the
 works, and an "Essay on
 the Principles and Institutions of the

ETIENNE, an eminent French
 philosopher, was born in
 Paris in 1729, who first rose
 as an advocate, by pleading
 his rights before the parliament.
 He also he proved himself a
 worthy adversary of that encroaching
 body. He held the office of advocate-
 general in the Chambre des Comptes sixteen
 years. He died in 1803. His principal
 works are: "Recherches sur la France."

ETIENNE DENIS, Duke, a
 French statesman, who took a more or less
 active part in public affairs for more
 than thirty years, was born at Paris in
 1732, a councillor of the parlia-
 ment of Paris, and in 1791, and
 escaped death for his ex-
 treme views. He had previously
 been a member of the parliament, was
 elected to the office of minister of
 requests in 1801, received
 the title of duke, and the cross
 of the Legion of Honour in 1809, and in the
 year 1815 he was appointed by Napoleon
 to the office of minister of the interior.
 It was during his tenure
 of the office that the Mallet plot was formed,
 and he was seized by the conspirators
 but on the defeat of the plot
 he was released from his office. On the advance
 of the Allies to Paris, in 1814, Pasquier was

sent to treat with Nesselrode, whose in-
 structions in favour of the royalists he
 carried out. He gave his adhesion to the
 restored Bourbons, and was named director
 of the Ponts et Chaussées. After the second
 restoration he was a member of nearly every
 cabinet till 1822, and, for a short time, on
 the resignation of Decazes, was virtual head
 of the government. He uniformly opposed
 the violent measures of Charles X., and after
 the revolution of July, 1830, adhered to the
 Orleans cause and was appointed president of
 the Chamber of Peers, a post which he filled
 for 18 years with great dignity, equity, firm-
 ness, and imperturbable tact. In 1837 the
 dignity of chancellor of France was revived
 for him by Louis Philippe, a measure which
 was severely ridiculed by Prince Louis Na-
 poleon in a newspaper article of the time.
 Pasquier had presided at the trial of Louis
 Napoleon for the celebrated Boulogne at-
 tempt. In 1841 he was created duke by his
 own express desire. The public career of
 Duke Pasquier, a most skillful and suc-
 cessful time-server, ended with the revolu-
 tion of February, 1848; but his *salon* was still
 the resort of the most eminent persons in
 politics and in letters. He had been a mem-
 ber of the French Academy since 1842. Died,
 at Paris, aged 95, 5th July, 1862.

PASSAVANT, JOHANN DAVID, a German
 painter and distinguished art-critic and
 historian, was born at Frankfurt-on-the-
 Main, in 1787. His taste for art, and the
 delight excited in him by the masterpieces
 with which he became familiar at Paris be-
 tween 1810—13, led him to abandon trade,
 for which he was destined, and to make
 painting his profession. He studied at Paris
 under David and Baron Gros, and then at
 Rome, where he became the associate of
 Cornelius, Overbeck, and other rising artists
 of the German romantic school. He pub-
 lished, in 1820, a defence of their principles,
 in a work entitled "Ansichten über die bil-
 denden Künste." As artist he gained repu-
 tation by his "Designs for Tombs," and a
 portrait of the Emperor Henry II. at Frank-
 fort. His most important works as art-
 critic are, "Kunstreise durch England und
 Belgien," and "Rafael von Urbino und sein
 Vater Giovanni Santi." He wrote also "Die
 christliche Kunst in Spanien," and contrib-
 uted many valuable papers on the early
 German, Flemish, and Italian painters to the
 "Kunstblatt." Passavant long held the
 office of director of the Stadel Institute at
 Frankfurt, where he died, August 12, 1861.

PASSERI, GIOVANNI BATTISTA, an Italian
 painter and poet, was the friend of
 Domenichino. He wrote "Lives of the
 Painters, Sculptors, and Architects" of his
 time. Died, 1679.

PASSONI, DOMENICO, cardinal and li-
 brarian of the Vatican, was born at Fos-
 sonobroce, in the duchy of Urbino, in 1682;
 and studied in the Clementine College at
 Rome. In 1706 he went with Galanterio, the
 nuncio, to Paris; and in 1708, he became a
 secret agent for the pope in Holland. He
 was also employed on several other missions,
 particularly in Switzerland, of which he
 published an account, entitled "Acta Lega-
 tionis Helvetice," folio. Innocent XIII.

made him archbishop of Ephesus, Clement
 XII. raised him to the purple, and Benedict
 XIV. appointed him librarian of the Vati-
 can; in which situation he promoted Dr
 Kennelott's great undertaking, by causing
 the Hebrew manuscripts to be collated for
 his use. Died, 1761.

PASSWAN OĞLU, OSMAN, a celebrated
 Turkish rebel, was born in 1758, at Widdin,
 in Bulgaria. His father having been put to
 death by the Porte, Passwan took refuge in
 the mountains, and gathered round him a
 considerable body of partisans; and having
 seized upon Widdin, he held the fortress for
 several years, in spite of all the efforts which
 were made to dispossess him, so that the
 sultan at length felt it necessary to confirm
 him in the government. Died, 1807.

PASTA, JUMILIA, a celebrated singer, was
 born in Italy, in 1799. She was a Jewess by
 birth, and became a pupil at the Conserva-
 tory of Milan in 1814. She appeared on the
 Paris stage in 1821, and she succeeded in
 winning a first-rate reputation. She first
 distinguished herself in the operas of Ros-
 sini, "Tancredi," "La Donna del Lago," &c.,
 and later in Bellini's "Norma" and "Sam-
 sambulin," Pacini's "Niobe" (the last three
 being composed for her), and "Anna Bolena."
 She retired to her Como villa about 1835, and
 died there, 1 April, 1865. "The extent of
 her voice was remarkable. In her prime she
 is said to have had the full range of two and
 a half octaves."

PATERCULUS, CAIUS VELLEIUS, a
 Roman historian, was born in the year n. c.
 19; served long in the army, and especially
 under Tiberius in Germany, as commander
 of the cavalry; and, in the first year of that
 emperor's reign, was nominated praetor. He
 died probably in his 50th year, leaving an
 abridgment of Roman history in 2 books, of
 which part is lost.

PATERSON, SAMUEL, bibliographer, was
 born in London, in 1728. He became an or-
 phan at the age of 12 years, and was first a
 bookseller in London, then an auctioneer;
 and in 1757 he sold the manuscript collec-
 tions of Sir Julius Caesar, which circum-
 stance brought him into notice, and he was
 employed in the preparation of catalogues
 and the sale of libraries. His principal per-
 formance in this line is the "Bibliotheca
 Universalis Selecta." He also wrote "Cur-
 sory Remarks on a Journey through the Ne-
 therlands, by Coriat, junior." Died, 1802.

PATERSON, WILLIAM, originator of the
 Bank of England, and projector of the
 Darien expedition, was born in Scotland,
 probably about 1660. He travelled exten-
 sively, and was represented by some as a
 missionary, by others as a pirate. He com-
 menced his scheme for a great bank to
 the merchants of London, and it became the
 basis of the constitution of the bank of Eng-
 land, which was established in 1694. The
 same year he circulated his proposal for a
 settlement in Darien, which he anticipated
 might be made the great emporium of the
 world. His countrymen entered enthusias-
 tically into the scheme, immense funds were
 raised, and a company was incorporated in
 1695, by act of the Scottish parliament, for
 carrying it out. Jealously watched and op-

posed by English and Dutch merchants, and also by the English government, the plan grievously failed; quarrels, fever, and famine ruined the colonists, and the few survivors of the several expeditions were forcibly expelled by the Spaniards in 1700. Paterson was one of those who got back to Scotland, and in 1713 some compensation was proposed to be granted him by the government for his immense losses and sufferings. The bill, however, was not passed, and Paterson died in obscurity some years later.

PATKUL, JOHN REINHOLD, Count, a Livonian who endeavoured to shake off the Swedish yoke; but, being unsuccessful, went to Saxony, where he was made privy-councillor, and employed on a mission to the court of Russia. He entered the service of Peter the Great, first as diplomatist, and afterwards as lieutenant general in the war with Sweden. On being delivered up to Charles XII., he was executed on the charge of treason, in 1707.

PATRICK, ST, the apostle or patron saint of Ireland, is supposed by some to have been a native of Cornwall, whose zeal prompted him to cross the channel for the conversion of the pagan Irish. By others he is said to have been a native of Kirkpatrick, on the Clyde, and that his name was Saccuthus, until changed by Pope Celestine. Others again assert, that he was born in Brittany, and carried by some freebooters to Ireland, where he was at first employed in keeping sheep. His arrival in Ireland took place probably between 410—460. His endeavours were crowned with great success, and he established there a number of schools and monasteries. Nennius states that his missions continued 40 years, and various miracles are attributed to him, particularly the expulsion of all venomous creatures from Ireland. He died at an advanced age. His works, or at least those ascribed to him, were published, with remarks, by Sir James Ware, in 1658. There is a learned and valuable work on "The Life and Mission of St Patrick," recently published by J. H. Todd, D.D.

PATRICK, SIMON, an English prelate, born in 1626, at Gainsborough, in Lincolnshire. He was educated at Queen's College, Cambridge; became Vicar of Batterssea, in 1658; obtained the living of St Paul's, Covent Garden, in 1662; and endeared himself much to his parishioners by remaining with them during the plague. He was afterwards, successively, a prebendary of Westminster, dean of Peterborough, bishop of Clichester, and, lastly, bishop of Ely, where he died, in 1707, in high reputation for learning, talent, and piety. During the reign of James II. he was one of the ablest defenders of the Protestant religion; and among his works are "Christian Sacrifice," "The Devout Christian," "Jesus and the Resurrection Justified," &c.

PATRIN, EUGENE LOUIS MELCHIOR, a celebrated French mineralogist, was born at Lyons, in 1742. After ten years' travelling through the north of Europe, for the purpose of forming a collection of mineral specimens, he revisited France, and was chosen a mem-

ber of the National Convention for his native city. Having voted for the banishment of Louis XVI., he was proscribed, and obliged to conceal himself during the Reign of Terror. On the creation of the School of Mines, he presented his museum of minerals to that institution, of which he was made librarian. His principal work, "Histoire Naturelle des Minéraux," in 5 vols., forms a sequel to the works of Buffon. Died, 1815.

PAUL I., emperor of Russia, was born in 1754. He was only son of Peter III. and his wife, the infamous Catherine (II). He lost his father when 8 years old, and was brought up by his mother with great harshness, and in entire seclusion from all public affairs. He married the Princess Mary of Wurtemberg, in 1776, but did not escape from his solitude and rigorous treatment till on the death of Catherine, in 1796, he was proclaimed emperor. The hopes excited by some liberal measures in the first days of his reign were soon extinguished: and with arbitrary edicts he made a complete revolution in the administration, interfering even with minute matters of dress and ceremony. He joined the second coalition against France, and Russian armies appeared in Italy, under Suwarrof, in Switzerland, and in Holland; but he afterwards withdrew from it and entered into friendly relations with Napoleon. He got himself chosen grand master of the knights of Malta, and then claimed possession of the island from England. His rule and all his conduct grew more and more intolerable, seemed, in fact, that of a madman; and at length a conspiracy was formed against him, with Count Pahlen at its head, and he was murdered in his bed-room, March 24, 1801.

PAUL III., Pope, **ALESSANDRO FARSESI**, born in 1466, held seven bishoprics in succession, was created cardinal by Alexander VI., became dean of the sacred college, and was chosen pope after the death of Clement VII., 1534. He had several children by a marriage contracted before he entered the church, and he made one of his sons duke of Parma, and his grandson duke of Camerino. Reformation and the general desire for a council were the most pressing subjects of the time, and Paul III. had an interview with the Emperor Charles V. respecting them in 1536. After much delay a council was fixed to be held at Mantua, then at Vicenza, and finally it was convoked at Trent, and met there, in December, 1545. Paul had previously, 1528, published a bull, excommunicating and deposing Henry VIII. of England, thus completing the separation of the Anglican church. In 1547, in the eighth session of the great council, the pope decreed its removal to Bologna, and it was soon afterwards suspended. It was this pope who approved the order of Jesuits; published the arrogant bull named "In Cena Domini;" made the celebrated Sadoletto cardinal; and offered the same dignity to Erasmus; and established the Inquisition at Naples. Died, 1549.

PAUL, FATHER. [SARPI.]

PAUL THE DEACON, or PAULUS DIACONUS, was a native of Friuli, and a monk in the abbey of Monte Cassino, where he

National Convention for his banishment. Having voted for the banishment, he was proscribed, and concealed himself during the Reign of Terror. On the creation of the School of Mines, he presented his museum of minerals to the Emperor, of which he was made a member. His principal work, "Histoire des Minéraux," in 5 vols., forms the works of Buffon. Died, 1806.

PAUL, Emperor of Russia, was born in 1754, was only son of Peter III. and his wife Catherine (II). He lost his father when 8 years old, and was brought up by his mother with great harshness, and without affection from all public affairs. He was married to the Princess Mary of Württemberg in 1773, but did not escape from his mother's rigorous treatment till on the death of Catherine, in 1796, he was proclaimed Emperor. The hopes excited by his measures in the first days of his reign soon extinguished, and with arts he made a complete revolution in the administration, interfering even with matters of dress and ceremony. He seconded the coalition against France, and his armies appeared in Italy, under the command of Suvorow, and afterwards withdrew from it and entered into friendly relations with Napoleon. He was himself chosen grand master of the Order of St. Alexander Nevsky, and then claimed possession of the island of England. His rule and conduct grew more and more intemperate, in fact, that of a madman; and a conspiracy was formed against him, with Count Pahlen at its head, who was murdered in his bed-room, March 29, 1801.

PAULUS, Pope, ALESSANDRO FARNESI, was elected in 1546, and held seven bishoprics in succession. He created cardinal by Alexander VI. He was dean of the sacred college, and pope after the death of Clement VIII. He had several children by his first wife, but he contracted before he entered the church, and he made one of his sons duke of Cambrino, and the general desire for a successor, and the most pressing subjects of the day, led Paul III. had an interview with Charles V. respecting them in such delay a council was fixed at Mantua, then at Vicenza, and at length convoked at Trent, and met on the 13th of December, 1545. Paul had published a bull, excommunicating Henry VIII. of England, and demanding the separation of the Anglican Church, in the eighth session of the council, the pope deposed its regency, and it was soon afterwards as this pope who approved the bull, published the arrogant bull "In Nomine Domini," made the election of Erasmus; and established a university at Naples. Died, 1549.

PAULUS. [SARPI.]

PAULUS DEACON, or PAULUS DIACONUS, a monk of Monte Cassino, where he

A New Universal Biography.

PAULUS, wrote a "History of the Lombards." Died, 743.

PAULUS OF SAMOSATA, so named from the place of his birth, flourished in the third century. In 260 he was chosen bishop of Antioch; but having preached against the Divinity of Christ, he was deposed in 270. The Queen Zenobia took his part, but the Emperor Aurelian expelled him from Antioch in 273, and what became of him afterwards is unknown. His followers were called Paulianists for a long time after his death.

PAUL, ST VINCENT DE. [VINCENT DE PAUL, SE.]

PAULET, SIR W. [WINCHESTER, Marquis of.]

PAULIN DE ST BARTHELEMI, or JOHANN PHILIPP WERDIN, was a monk of the Carmelite order, born in Austria, in 1748, and having studied the oriental languages, went as a missionary to the East Indies, where he passed 14 years, and was honoured with the title of apostolic visitor. He was then recalled to Rome, to give an account of the eastern missions, and to correct the catechism, &c., then printing for the use of the missionaries. When the French invaded Italy in 1798, he removed to Vienna; but he returned to Rome in 1800; was patronized by Pius VII.; wrote an account of his travels, and the state of Christianity in India, published a grammar of the Sanskrit language, and died in 1806.

PAULINUS, patriarch of Aquileia, in the 4th century, was born near Friuli, in 326. He was a zealous defender of the doctrine of the Trinity, and died in 404.—Another PAULINUS, born at Bordeaux, in 333, having married a Spanish lady, who converted him, settled at Nola, of which he became bishop, and died in 439. He was a learned and liberal man, much esteemed by his contemporaries.

PAULINUS SUETONIUS. [SUETONIUS.]

PAULMY, MARC ANTOINE RÉNE DE VOYER, Marquis de, minister of state, and a member of the French Academy, was born at Valenciennes, in 1722. He collected one of the most magnificent libraries in Europe, which was sold to the Count d'Artois, brother to Louis XVI. M. de Paulmy published "Mélanges d'une grande Bibliothèque," 69 vols. 8vo, and a work entitled "Essays in the Style of those of Montaigne," 9 vols. 8vo. Died, 1787.

PAULUS ÆGINETA. [ÆGINETA.]

PAULUS ÆMILIUS. [ÆMILIUS.]

PAULUS, JULIUS, a celebrated Roman lawyer, of the 3rd century, who, being made an imperial counsellor under Severus and Caracalla, distinguished himself by the boldness with which he delivered his opinions. Under Elagabalus he was banished; but the Emperor Alexander Severus recalled him, raised him to the consular dignity, and appointed him prætorian prefect, after the death of Ulpius.

PAULUS, PIETER, a celebrated Dutch statesman, was born in 1754. As minister of the marine department, he displayed great activity and intelligence; but he was displaced in 1787, and retired into France, whence he afterwards returned, and was

chosen president of the first National Convention, March, 1796. Died, 1796. He wrote a "Commentary on the Treaty of Utrecht," 3 vols., and a "Memoir on the Equality of Mankind."

PAUSANIAS, the son of Cleombrotus, king of Sparta, governed the kingdom for his cousin Pleistarchus, son of Leonidas, during his minority, and commanded the allied Greeks at the battle of Platæa. Afterwards being discontented with his country, he entered into a secret treaty with the king of Persia; but this being discovered by the ephori, to avoid the punishment due to his treason, he fled into the temple of Minerva, which being held sacred, the Lacedæmonians blocked it up with stones, the first of which was placed by Pausanias's mother. He was there starved to death, B. C. 474.

PAUSANIAS, a Greek traveller and topographical writer, who flourished during the reigns of Hadrian and the Antonines. He taught at Athens, and afterwards at Rome, where he died. His Itinerary of Greece, in which he describes everything remarkable in Greece, is still extant, and is a valuable work for the antiquary.

PAUSIAS, a painter of Sicily, and the disciple of Pamphilus, flourished about 350 B. C. He was the first who applied colours to wood and ivory by fire, a process now called encaustic painting.

PAUW, CORNELIUS DE, a Dutch miscellaneous writer, was born at Amsterdam, in 1739. He was an ecclesiastic, and had a canonry in Cleves, where he died in 1799. He was uncle to the famous Anacharsis Clootz, and his opinions were in some respects singular. His principal work is entitled "Recherches Philosophiques, sur les Grecs, les Américains, les Égyptiens, et les Chinois," 7 vols. 8vo.

PAYNE, JOHN HOWARD, an American actor and dramatist, was born at New York in 1792. From childhood he was a prodigy. In his 13th year he was a writer for the press, and editor of the "Theatrical Mirror." At 16, he appeared as Norval in "Douglas," at the Park Theatre, New York. At Boston he appeared, among other characters, in those of *Hastings*, *Rolla*, *Edgar*, and *Hamlet*. In 1812 he came to England, and made his *début* at Drury Lane, in his 21st year. In 1826 he edited a London dramatic paper called "The Opera-Glass." A great number of dramas were prepared by him when on the London stage, chiefly adaptations from the French, and in some of them Charles Kemble appeared. The air of "Home, Sweet Home," first appeared in Howard Payne's "Clari, the Maid of Milan." In his latter years he occupied the post of Consul of the United States at Tunis, where he died, 1852.

PAXTON, SIR JOSEPH, an eminent landscape gardener, and designer of the "Crystal Palace" of 1851, was born of a humble family near Woburn, in Bedfordshire, in 1803. While still young he entered into the service of the Royal Horticultural Society, and having attracted the attention of the duke of Devonshire, was employed by him at Chatsworth, and became at length director of

the magnificent grounds, which he entirely recast. One of the most striking features introduced by him was the great conservatory, a then novel structure of iron and glass. He prevented the failure of the scheme of the first Great Exhibition, by his happy design, offered at the last hour, for a building of iron and glass. This was his chef-d'œuvre, and procured him the honour of knighthood. On the removal of the Palace to Sydenham he was employed to remodel it for its new situation, and was appointed director of the grounds. Sir Joseph was elected member of parliament for Coventry in 1854, and retained his seat till his death. During the Crimean war he did good service by organizing the Army Works Corps. He was author of several periodical or serial publications. Died at Sydenham, 8th June, 1865.

PAZZI, THE, an ancient and illustrious Florentine family, chiefly remembered as the jealous rivals of the Medici. Early in the 15th century they had by commerce become wealthy and powerful, and the gradual rise and ultimate supremacy of the Medici appears to have occasioned the ill-will which had such tragical results. The leading members of this family readily took part, in 1479, in the atrocious conspiracy formed against Lorenzo de' Medici by Pope Sixtus IV. and his nephew, Cardinal Riario. The attack was made on Lorenzo and his brother Giuliano, in the church of the Reparata during divine service, 26th April; the latter was assassinated by Francesco de' Pazzi, but Lorenzo escaped with a slight wound. At the same time Jacopo de' Pazzi was endeavouring to rouse the citizens to revolt. But the friends of the Medici were the strongest, and the conspirators were seized and hung. Guglielmo de' Pazzi, who had married Bianca de' Medici, was however saved.

PEARCE, ZACHARY, bishop of Rochester, a prelate of great learning and piety, was born in London, in 1690; was educated at Westminster School, and Trinity College, Cambridge; became, successively, vicar of St Martin's-in-the-Fields, dean of Winchester, bishop of Bangor, and bishop of Rochester. His principal works are, editions of Longinus and Cicero "de Oratore," a "Review of Paradise Lost," a "Commentary on the Four Evangelists," &c., 2 vols.; and "Sermons," 4 vols. He left, among other charitable bequests, £5000 to the college for clergymen's widows at Bromley.

PEARSON, GEORGE, M.D., F.R.S., was a native of Retherham, in Yorkshire. He studied medicine in London, Edinburgh, and Leyden; was one of the physicians of St George's Hospital; and rendered essential service to the lovers of chemistry by his experimental knowledge of the science. The component parts of Dr James's febrifuge powders having been kept a profound secret, Dr Pearson analyzed the composition, and proved them to be composed solely of antimony and phosphate of lime. He founded the original Vaccine Institution in 1799. Died, 1828.

PEARSON, JOHN, an eminent English prelate, was born at Snoring, in Norfolk, in 1612, and died bishop of Chester, in 1686. He

is principally known by his valuable "Exposition of the Creed." He also wrote "Vindicia Ignatii, or a Defence of the Epistles of St Ignatius," and other learned works.

PEARSON, MARGARET EGGLESTON, a lady distinguished for her skill in the art of enamelling, or painting on glass, was the daughter of Samuel Paterson, the bibliographer, and married an artist named Pearson, with whom she established a manufactory of stained glass at Hampstead. Some of her productions have scarcely ever been equalled, toms. Med, 1823.

PECK, FRANCIS, a learned antiquary, was born at Stamford, in 1692. He took his several degrees in arts at Trinity College, Cambridge; became rector of Trinity College, Leicestershire; obtained a prebend in the cathedral of Lincoln, and died in 1743. His principal publications are, "The Antiquarian Annals of Stamford," "The Antiquaria Curiosa," "Memoirs of Oliver Cromwell," and "Memoirs of John Milton."

PECOCK, REGINALD, bishop of St Asaph and of Chichester in the reign of Henry VI., was born in Wales about the end of the 14th century. He studied at Oxford, became fellow of Oriel in 1417, and was ordained priest in 1421. Having distinguished himself by his unwearied studies and great attainments in theological learning, he was called to the court, and in 1431 was promoted, probably by Humphrey, duke of Gloucester, then protector of the kingdom, to the mastership of Whittington College, London, to which the rectory of St Michael in Riola was attached. After filling that post for thirteen years, during which he diligently studied the controversy between the church and the Lollards, and probably wrote several books in English against the latter, he was made bishop of St Asaph in 1441, and at the same time D. D. Three years later he caused extraordinary excitement by a sermon he preached at Paul's Cross, in which he defended on grounds of reason the non-preaching of bishops, their non-residence, and the papal bulls of provision. In 1450 he was translated to the see of Chichester, but he soon after lost his patrons, the duke of Suffolk and the bishop of Norwich, and fell into disgrace at court. In the council held at Westminster in 1457 the wrath of his enemies burst forth, and he was expelled and cited to appear before the archbishop of Canterbury. His examinations took place at Lambeth in November of the same year, and being condemned, and compelled either to abjure his opinions or to die for them, he made a coward's choice; signed an abjuration, and afterwards read it, kneeling, at Paul's Cross in the presence of twenty thousand persons. He then handed his numerous books to the executioner, who threw them into the fire. His books were soon after publicly burnt at Oxford. He was kept a prisoner, but made his case known to the pope, who interfered in his favour, but unsuccessfully. His see was given to another, and he was sent to Thorney Abbey in Cambridgeshire, to be confined to one closed chamber, with no society, no books except a Bible and service books, and no writing

known by his valuable "Lancet Creed." He also wrote "Vindication, or a Defence of the Epistles of St. Paul," and other learned works. **MARSHALL EGGINGTON**, an artist, distinguished for her skill in the art of painting on glass, was the daughter of Samuel Paterson, the bibliographer, and married an artist named Pearson, who established a manufactory of glass at Hampstead. Some of her works have scarcely ever been equalled. Her copies of Raphael's cartons were published in 1823.

NETS, a learned antiquary, was born at Stamford, in 1692. He took his degree in arts at Trinity College, Cambridge, became rector of Goadby, in 1720; obtained a prebend in the cathedral, and died in 1743. His publications are, "The Antiquary of Stamford," "A Desiderata of Oliver Cromwell," &c.

EGINALD, bishop of St Asaph, in the reign of Henry VI., was born about the end of the 14th century, studied at Oxford, became fellow of Magdalen Hall, and was ordained priest in 1417, and was distinguished by his studies and great attainments. For his learning, he was called to the duke of Gloucester, probably in 1431, was promoted, and became duke of Gloucester, then of Lancaster, to the mastership of the College, London, to which St Michael in Riola was attached, which he diligently studied the between the church and the world. He probably wrote several books, but the latter, he was made bishop in 1444, and at the same time years later he caused excitement by a sermon in which he denoted the non-residence, and the provision. In 1450 he was elected see of Chichester, but he was patroned by the duke of Suffolk, and fell into the hands of the council held at 1457 the wrath of his enemies, and he was expelled before the archbishop of Canterbury's examinations took place at the end of the same year, was imprisoned, and compelled either to die for them, or to choose; signed an abjuration, and afterwards read it, kneeling, in the presence of twenty thousand. He handed his numerous letters, who threw them into the fire. His books were soon after burnt. He was kept a prisoner in his case known to the king, but in his favour, but justice was given to another, at Thorney Abbey in Cambridgeshire, confined to one closed cell, no books except the Bible, and no writing

materials. Nothing further is known of his fate. Most of his writings have perished. Among those extant are, "The Donet" (or "grammar"), "The Follower to the Donet," "The Book of Faith," and "The Repressor." The last is the most important, and was first printed in 1860, under the direction of the master of the Rolls, and edited by Churchill Babington, B. D. Its full title is "The Repressor of overmuch blaming of the Clergy," and its object is the defence of the church of England as it then was against the attacks of the Lollards. It has great historical value, and is distinguished by "fulness of language, pliancy of expression, argumentative sagacity, extensive learning, and critical skill. Peacock maintained the supremacy of reason as well as the infallibility of the pope; advocated religious toleration; and had the singular fate to be persecuted by the party which he defended, and also to be claimed as a friend by the party against which his whole energies were directed. His influence doubtless contributed materially to the reformation, which took place in the following century.

PECQUET, JEAN, a celebrated anatomist and physician, was born at Dieppe, and died at Paris in 1674. He discovered the thoracic duct and the receptacle of the chyle, and traced the progress of the chyle into the left subclavian vein. He wrote "Experimenta Nova Anatomica," and other works.

PEDRO I, ANTONIO JOSE D'ALCANTARA, Don, ex-emperor of Brazil, was the eldest son of John VI., king of Portugal, elder brother of Don Miguel, and nephew to Ferdinand VII., king of Spain. He was born in 1798, and was taken in 1808, with the rest of the royal family, to Brazil. In 1817 he married Maria Leopoldina, archduchess of Austria, daughter of the Emperor Francis I., by whom he had five children, among whom was the Queen, Dona Maria da Gloria. Leopoldina died in 1826; and in 1829 he married Amelia, princess of Leuchtenberg, the daughter of Eugene Beauharnois. On account of the events which led to Pedro's abdication of the crown of Brazil, in favour of his son, Pedro II., he embarked on board an English ship of war for Europe, in the spring of 1831, and arrived in London in July as a private gentleman, bearing the title of the Duke of Braganza. Operations immediately commenced for displacing his brother, Don Miguel, from the throne of Portugal, and many severe conflicts took place; at length, in July, 1832, the fleet of Pedro, under the command of Admiral Napier, signally defeated that of Miguel; which event, with other successes of the Pedro party, led to his brother's abandonment of the throne, and the accession of Dona Maria. Don Pedro died in 1834.

PEEL, SIR ROBERT, bart., third son of Mr Peel, of Peel Cross, Lancashire, and father of the prime minister of England who inherited his title, was born in 1750. He evinced at a very early age the quickness of perception and spirit of enterprise which distinguished him through life. He devoted much time to the improvement of machinery, embarked in the cotton trade in 1783, and carried on a manufactory at Lury with great suc-

cess. In politics he adopted the sentiments of Mr Pitt, and was a strenuous supporter of every measure which had for its object the commercial prosperity, or the internal peace, of the country. He was created a baronet in 1801. In the following year he brought a bill into parliament for ameliorating the condition of apprentices employed in the cotton and woollen trades. Sir Robert filled the office of vice-president of the Literary Fund, and was a governor of Christ's Hospital. He died at his seat, Drayton Manor, Staffordshire, in 1830.

PEEL, SIR ROBERT, bart., prime minister of England, the eldest son of the preceding, and the most distinguished English statesman of his age, was born Feb. 5, 1758. Destined by his father for a political life, he was educated first at Harrow, and afterwards at Oxford, at both of which places he distinguished himself by his patient diligence, his correct taste, and his scholarly achievements. At Oxford he took a first-class degree both in classics and mathematics. No sooner was this accomplished, than his father, in 1809, had him brought into parliament as member for Cashel; and the House of Commons became thenceforward the arena of his life. He had not sat long in it before he proved himself an able speaker, and a laborious and sagacious worker. This led to his speedily finding his way to office.

In 1811 he was appointed under-secretary of state for the colonies, under the Percival administration. In 1812 he was made chief secretary for Ireland—an office which he held with much advantage to the country till 1818. In 1817 he was elected one of the members for the university of Oxford. After remaining out of office for nearly 4 years, which, however, were signalized by his carrying through his famous currency measure, and many other useful acts, he in 1822 became secretary of state for the home department. Among many other useful measures identified with his name, during this period of his career, may be mentioned his admirable plan for the reform of the criminal code, which he brought forward and carried in 1826. On the accession of Canning to the premiership in 1827, he refused to take office under that distinguished statesman; but he returned in 1828 to the office of home secretary under the duke of Wellington, and held that post during the difficult times which preceded the dissolution of the Tory government in 1830. Hitherto, his political career had borne the aspect of devoted adherence to Toryism; but, on accepting office under the duke of Wellington, he entered upon a course in which the influence of a different set of principles came to be apparent; for he but feebly opposed the bill of Lord John Russell for the repeal of the test and corporation acts, and himself introduced, and carried through in 1829, the bill for the removal of Catholic disabilities, to which he had previously been opposed. The change in his opinions upon Catholic emancipation having excited great dissatisfaction among his constituents, he resolved to give them an opportunity of recording their sentiments, by resigning his seat; he was opposed and beaten by Sir

Robert H. Inglis, but found his way back to parliament for the small borough of Westbury. On May 3, 1830, he succeeded his father in the baronetcy, and also as member for Tamworth, which he continued to represent till his death. The accession of William IV., who was known to be attached to "liberal" opinions, together with the almost simultaneous outbreak of the French revolution, having given an irresistible impulse to the cause of reform in England, the Wellington administration resigned in November, 1830, after its defeat on the elvil list; and Sir Robert Peel offered to the reform bill of the Grey administration a persevering and able, though not factious, opposition. On the passing of that bill, however, he immediately accepted it as irrevocable, and set himself to reconstruct his party on the basis of the altered constitution of the House of Commons. The death of Earl Spencer, in 1834, having afforded the king a pretext for dismissing his Whig ministers, Sir Robert Peel was summoned from Rome, whither he had gone with his family, in the course of a continental tour, and requested to form an administration. He had now reached the summit of political power, and the same abilities which had displayed themselves whilst he was in subordinate offices, shone forth with increasing brilliancy now that he had the chief control of affairs. But his position in the House was not sufficiently strong to enable him to retain his place, and the government being beaten on more than one question, on the 8th of April, 1835, they resigned, and the Whigs once more returned to office. In 1839 he was again prime minister for a still shorter period, the famous "Bedchamber plot," as it was called, having compelled him to relinquish the reins almost as soon as he had grasped them. In the mean time, however, circumstances were gradually ripening to render his accession to power inevitable. Justly or unjustly, a general impression had gone abroad unfavourable to the Whig administration; it was accused of administrative incapacity; and, in the summer of 1841, Sir Robert Peel led on an attack which ended in the resignation of Lord Melbourne, and placed him once more at the head of affairs. Meanwhile, too, the conservative party had been busy in the registration courts; and on the dissolution of parliament in the autumn of that year, a new election returned to the house a large majority prepared to support the Peel administration. Sir Robert's power was now as real as his position was dignified. In 1842 he proposed one of the most extensive alterations in the tariff of the country that had ever been effected. Hundreds of imposts—many of them insignificant, but all of them vexatious—were swept away. The confidence of the protectionist party in their leader was grievously shaken, and their complaints of being duped by him were loud and clamorous. But in losing their confidence, he gained that of the opposite party, who began to look upon him as the man destined to realize all their hopes. In the autumn of 1843, the famine which then threatened to sweep over the country roused a universal agitation, free from all

party strife; and meetings were held in all the large towns, praying for the immediate opening of the ports, to relieve the people from their sufferings. The Peel cabinet split upon this question—Lord Stanley leading the opposition—and resigned in December. Lord John Russell attempted to form a government, but was prevented by personal disputes, and after some vain efforts, he was again reinstated. Shortly after the opening of the session of 1846, he formally announced, to the surprise of all, the hope of thousands, and the rage and dismay of his party, his intention, not of modifying, but of entirely repealing, the corn laws. Instantly invective, unceasing attack, and bitter reproach from those who accused him of having deceived them. All this he bore with that no other plan would meet the wants of the country, and he persevered against an opposition strong, bitter, and powerful, but ultimately unavailing, his policy triumphing in both houses of parliament. The corn laws were abolished in June, 1846, and free trade proclaimed as the commercial policy of the country. Simultaneously with the passing of this measure, Sir Robert Peel resigned office, a coalition of Whigs and Protectionists having defeated him on the Irish coercion bill. From that period he gave a general support to the Whigs, declaring that he had no wish to resume office. But though destitute of office, he was not destitute of power; for never, perhaps, was his influence over the destinies of this country more felt than during the four years which followed his retirement. The last time he spoke in the house was on Friday, the 28th of June, 1850, on the discussion of the foreign policy of the government. On the afternoon of the following day, while riding up Constitution Hill, his horse started and threw him over its head, falling heavily upon him. He was conveyed home, and his medical attendants were instantly with him, but he grew gradually worse, and expired July 2, to the great regret of all classes of the community, who mourned his loss as that of a statesman of a high order, a great financier, an excellent administrator, and an upright and truth-loving man. A national monument was voted to his memory. Her Majesty hastened to evince her sympathy in the loss which the nation had sustained, by offering to confer on his family the honours of the peerage; and the popular esteem for him was still further increased, when it became known that the great statesman had interdicted his family from accepting any honours for services which he might have rendered to his country. We believe that in avowing the conviction, that this country owes to him as deep a debt of gratitude as to any statesman that has ever presided over her destinies, we are only giving utterance to an opinion which posterity, a tribunal to which Sir Robert Peel was fond of appealing, will amply confirm. The reformer of the criminal code, the introducer of an effective system of police, the founder of a system of currency, which has been

and meetings were held in all
 vns, praying for the immediate
 the ports, to relieve the people
 offerings. The Peel cabinet split

 tenced to evince her sympathy
 which the nation had sus-
 ting to confer on his family
 the peerage; and the popu-
 l was still further increased,
 known that the great state-
 cted his family from accept-
 or services which he might
 to his country. We believe
 the conviction, that this
 him as deep a debt of grate-
 tude as man that has ever
 stitutes, we are only giving
 opinion which posterity, a
 Sir Robert Peel was fond
 l amply confirm. The re-
 terminal code, the introduc-
 tion of a system of police, the founder
 currency, which has been

auded by the most eminent financiers, the
 restorer of civil equality to Christians of
 all denominations, and his last and greatest
 achievement,—the introduction into British
 policy of the principles of free trade,—might
 well be entitled to the highest honours that
 could be rendered to his memory. But be-
 sides his devotion to politics, Sir Robert
 Peel found leisure for the pursuits of litera-
 ture, and the promotion of science and art.
 His own literary attainments were extensive,
 and his taste in the fine arts was attested
 by the magnificent gallery which he had
 formed. He munificently encouraged the
 exertions of all those engaged in the pur-
 suits of literature and art; as the dispenser
 of the public bounty, he caused it to flow
 liberally in their direction; and not a few
 families of men of genius were rescued from
 poverty by his prompt and judicious aid.
 In private life his character was "without a
 flaw;" and the reserve which perhaps not
 unnaturally marked his intercourse with
 strangers, is said to have had no existence
 within the domestic and social circle. Me-
 moirs of Sir R. Peel have been published,
 edited by Earl Stanhope. There have also
 appeared his "Political Biography," by T.
 Doubleday, and separate Lives by Guizot
 and Sir Lawrence Peel.

PEELE, GEORGE, a dramatist and poet of
 the Elizabethan age, was a native of Devon-
 shire, and was educated at Oxford, where he
 completed his degrees in arts in 1579. On
 coming to London he formed an acquaintance
 with Shakespeare, Ben Jonson, and other dra-
 matic writers, and wrote for the stage. He
 wrote five or six plays, which were well re-
 ceived; also, some pastoral and other poems.
 An edition of the works of this poet, to-
 gether with those of Robert Greene, was
 published by Mr Dyce in 1828. There is a
 scarce book still extant, entitled "The Merry
 conceited Jest of George Peele," &c. He
 died about 1598.

PEGGE, SAMUEL, L.L.D., an eminent di-
 vine and antiquary, was born at Chesterfield,
 in 1704, and educated at St John's College,
 Cambridge. Besides other church prefer-
 ment, he obtained two prebends, one in
 Lichfield cathedral, and the other in Lin-
 coln. His principal works are, "Dissertations
 on Anglo-Saxon Remains," "The Life of
 Robert Grosseteste, Bishop of Lincoln,"
 "Anonymiana; or Ten Centuries of Observa-
 tions." He also contributed numerous
 papers to the *Archæologia* and the *Gentle-
 man's Magazine*. Died, 1796.

PEIRESC, NICOLAS CLAUDE FABRI DE,
 a learned Frenchman, was born at Beaugen-
 sier, in 1580, and displayed extraordinary
 abilities, while at the Jesuits' college, at
 Avignon. He afterwards lived at Padua,
 and made himself master of the mathemat-
 ics, and of the Hebrew, Samaritan, Syriac,
 and Arabic languages. He also distinguished
 himself by the study of antiquities. In
 1605 he visited England, was presented at
 court, and became acquainted with Couden
 and other English literati. In 1607 he was
 admitted a senator at Aix, and in 1618 he
 obtained the abbey of Guistres, in Guienne,
 where he employed himself in literary and
 scientific pursuits till his death, in 1637.

His Life was written by his friend Gns-
 sendi.

PELAGIUS, an eminent church teacher of
 the 5th century, author of the system of
 doctrines called Pelagianism, was probably
 a native of Britain. He became a monk and
 went to Rome, where, about 409, Celestius,
 who had been an advocate, attached him-
 self to him. Pelagius appears to have be-
 come acquainted with St Augustine, who
 expressed the highest esteem and affection
 for him. He began to publish his doctrines
 about 413, having previously visited Car-
 thage with Celestius. In 415 he went to
 Palestine, where Jerome, still living at Beth-
 lehem, wrote against him, and the young
 Orosius attacked him, but unsuccessfully, at
 the synod of Jerusalem. Another synod was
 held at Diospolis, by which Pelagius was
 recognized as a member of the catholic
 church. His doctrine was soon after con-
 demned by two North African synods, by
 Innocent I., bishop of Rome, and his suc-
 cessor Zosimus; the latter having once de-
 clared it orthodox. In 418 it was again
 condemned by a council of Carthage, and
 through the influence of Augustine several
 imperial edicts were afterwards published
 against Pelagius and his adherents. Many
 bishops of the West were deprived for re-
 fusing to subscribe the condemnation. Pe-
 lagius was a man of cold temperament, with
 a sober, clear understanding, with no capa-
 city for such profound spiritual conflicts
 and experiences as those of his great ad-
 versary, with limited speculative power,
 but of genuine piety and spotless character.
 His system of doctrine is a protest against
 the extreme views of Augustine, and includes
 denial of the hereditary depravity of man,
 of absolute predestination to salvation, and
 of irresistible grace. Led by a strong practical
 interest, he sought to guard against what he
 considered errors dangerous to morality. He
 gave prominence to the freedom of the will,
 and the natural power of men to follow the
 divine commands; appealing to the exam-
 ples of goodness among the heathen. The
 controversy to which his views gave rise
 was long continued, and numerous councils
 pronounced his condemnation. Mere frag-
 ments of his writings are now extant. It is
 not known when or where Pelagius died.

PELHAM, Sir HENRY, prime minister of
 England, was born in 1696. After serving a
 short time in the army, during which he
 took part in the battle of Preston, he entered
 parliament in 1718, and was appointed sec-
 retary of state for war in 1721. Six years
 later he was made paymaster-general of the
 forces. In conjunction with his brother,
 the duke of Newcastle, and the party of the
 opposition, he succeeded in overthrowing
 the administration of Walpole, and in 1743
 became first lord of the treasury. The same
 year he was also named chancellor of the
 exchequer. He resigned in 1744, but was
 recalled to office in a few days, and remain-
 ed prime minister till his death. His min-
 istry was named the "Broad-Bottom Ad-
 ministration." Sir Henry Pelham was an able
 financier, and by his measures contributed
 to the growth of English commerce and
 manufactures. Died, 1754.

PELLHAM, THOMAS, earl of Chichester, English statesman, was born in 1756. He was nephew of the preceding, was educated at Cambridge, and entered parliament as member for Sussex in 1780. He accompanied the earl of Northampton to Ireland in 1783, as principal secretary; and filled the same office again under Marquis Camden during the rebellion of 1798. Three years later he was raised to the peerage as Baron Pelham, and in the Addington administration held the office of secretary of state for the home department. On resigning this office he was made chancellor of the duchy of Lancaster. He became earl of Chichester on the death of his father in 1805; was subsequently named postmaster-general in conjunction with the earl of Sandwich, and died in 1826.

PELLHAM, THOMAS HOLLES. [NEWCASTLE, Duke of.]

PELLISSIER, AIMA, **JACQUES**, duke of Malakhoff, marshal of France, was born near Rouen in 1781. He entered the army at the age of 19, served in Spain and in Greece, and in 1830 took part in the expedition to Algiers. He was again sent to Africa in 1840, and in 1845 he disgraced himself by kindling fires at the entrances to the caves in which they had taken refuge. He was created lieutenant-general in 1848, and was called in 1855 to take a command in the Crimea under General Canrobert; whom he soon superseded as commander-in-chief. He distinguished himself in the successful attack on Kerch, in the battle of the Tchernaya, and above all in the storming of the Malakhoff Tower at Sebastopol, September 8, 1855. He was soon after created marshal and duke of Malakhoff. In 1858 he was ambassador to London; was subsequently appointed governor-general of Algeria, and died there in May, 1864.

PELL, JOHN, a distinguished mathematician, born in Sussex, 1610, and educated at Cambridge, where he graduated M.A. in 1630. He was chosen professor of mathematics at Amsterdam, whence he removed to Breda in the same capacity. He was afterwards for six years agent for the English government to the Protestant cantons of Switzerland. After his return to England, in 1658, he entered the church, held several livings, was made chaplain to the private, but from neglect of his affairs got into debt, and died in great want, 1685. Pell was a friend of Sir Isaac Newton; wrote several mathematical works, and left an immense number of manuscripts, now in the British Museum.

PELLEGRINO DA BOLOGNA. [TIBALDEO.]

PELLERIN, JOSEPH, a French antiquary, who was commissary-general and clerk of the marine at Paris, where he died at the age of 99, in 1782. He applied himself to the study of numismatics, and formed a cabinet of medals, which was one of the richest in Europe, and was purchased by the king of France. He published "Recueil de Médailles des Rois, Peuples et Villes," in 10 vols. 4to.

PELLETIER, BERRIAND, an ingenious French chemist, was born at Bayonne, in 1761, and died of a consumption, brought on by inhaling oxymuriatic acid gas, in 1797.

He made various discoveries, the particulars of which were communicated to the public in the Journal of Natural History, of which he was the principal conductor. His "Mémoires et Observations de Chimie," were published after his death.

PELLETIER, CLAUDE E., a French bucceler, was born at Paris in 1630. He succeeded Colbert as comptroller of the finances in 1683. Six years afterwards he resigned his place, and in 1697 he retired from court to lead a life of study and devotion. The quay at Paris which bears his name was built by him. Died, 1711.

PELLEW, EDWARD. [EXMOUTH, Viscount.]

PELLICO, SILVIO, the celebrated Italian patriot, and victim of Austrian tyranny, author of "Mie Prigioni," was born at Saginza, in Piedmont, in 1789. In early life he gained considerable distinction as a writer for the stage; and his tragedy, "Francesca in Rimini," may still be read with interest. In 1819 he became connected with the press, at the same time that he was tutor in the family of Count Porro, and in 1820, he was seized as a Carbonaro, and in 1820, he was confined in the fortress of Spielberg for ten years. The volume on which his fame rests, tells the story of his imprisonment. His treatment was not distinguished by the most terrible hardships or tortures which other more illustrious persons have undergone, but it tells a tale of solitude, of patient endurance, and of pleasing sentiments continually keeping alive the strength of hope and affection, which has endeared the volume and the writer to numbers who could scarcely grasp the political idea involved. Released by the amnesty of 1830, he found shelter at Turin, and was employed as librarian in the house of the Marchese Baroli until he died. His imprisonment had ruined his health, and he took no further part in politics. But he was not forgotten. Gioberti dedicated one of his books to him, as "the first of Italian patriots;" and Charles Albert bestowed on him the decoration of St. Maurice. Died, 1851.

PELLISSON-FONTANIER, PAUL, an eminent French historian, was born at Beziers, in 1624. He was bred to the law, and, at the age of 21, published "A Commentary on the Institutes of Justinian." In 1652 he became secretary to the king, and in the same year he published the "History of the French Academy," which procured him the extraordinary honour of being admitted a member of that learned body, though at the time there was no vacancy. The minister, Fouquet, appointed him master of the accounts at Montpellier, but when that statesman was disgraced, Pellisson was sent to the Bastille, where he remained four years. On recovering his liberty, he attended the king as historiographer, in his expedition against Holland. After this he abjured the Protestant religion, entered into orders, and obtained several benefices. He was the author of "Histoire de Louis XIV.," "Histoire de la Conquête de la Franche Comté," "Réflexions sur les Différends en Matière de Religion," and other works. Died, 1693.

PELLOUTIER, SIMON, historian, was

various discoveries, the particulars which were communicated to the *Journal of Natural History*, of which he was the principal conductor. His labours et Observations de Chimie," finished after his death.

PIER, CLAUDE LE, a French philosopher, was born at Paris in 1680. He was Colbert as comptroller of the treasury in 1683. Six years afterwards he became a life of study and devotion to lead a life of study and devotion at Paris which bears his name. Died, 1711.

PINNEY, EDWARD. [EXMOUTH, VIS.]
 PIRRO, SILVIO, the celebrated Italian philosopher and victim of Austrian tyranny, was born at Salsomaggiore, in 1789. In early life he obtained a distinction as a writer; and his tragedy, "Francesca," may still be read with interest. He became connected with the press at a time that he was tutor in the Count Porro; and in 1820, he was confined in the fortress of Spielberg, in Bohemia. The volume on which he tells the story of his imprisonment was not distinguished by any terrible hardships or tortures more illustrious persons have suffered; but it tells a tale of solitude, of want, and of pleasing sentimentally keeping alive the strength of affection, which has endeared the writer to numbers who have grasped the political idea introduced by the amnesty of 1830. He died in the house of the Marchesa de... His imprisonment had health, and he took no further notice of his books to him, as Italian patriots; and Charles... on him the decoration of St. Ferdinand, 1851.

PONCE, N. FONTANIER, PAUL, an Italian historian, was born at Belluno. He was bred to the law, and published "A Commentary on the Institutes of Justinian." In 1652 he was secretary to the king, and in the same year he published the "History of the Republic of Venice," which procured him the honour of being admitted a member of the learned body, though at the time no vacancy. The minister, who appointed him master of the accounts, but when that statesman died, Pellisson was sent to the office, and he remained four years. On his return to liberty, he attended the king's chamber in his expedition against the Protestants; he secured the Protestants, entered into orders, and obtained several benefices. He was the confidant of Louis XIV. "Histoire de la France Comte," "Les Différends en Matière de Religion," other works. Died, 1673.

PONCE, R. SIMON, historian, was

born at Leipzig, in 1691. He became pastor of the French church at Berlin, counsellor of the consistory, and librarian of the Academy. He wrote a work replete with research, entitled "Histoire des Celtes."

PELOPIDAS, a valiant and patriotic Theban general, was the friend of Epaminondas and the associate of his victories. When the Spartans conquered Thebes, Pelopidas went to Athens, where he assembled his exiled countrymen; and expelled the invaders upon Thebes, and expelled the Lacedæmonians at Tegyra, and shared with Epaminondas the victory of Leuctra. Pelopidas being sent ambassador to Alexander, the tyrant of Phœnix, was thrown into prison; but on the appearance of Epaminondas he obtained his release. He went next to the court of Persia; and, after his return, commanded the forces sent to the relief of Thebes, where he fell, B. C. 361.

PEMBERTON, HENRY, a learned physician and mathematician, was born in London, in 1691; studied under Boerhaave, at Leyden; became intimately acquainted with Sir Isaac Newton and other eminent men, and was himself much distinguished for his scientific acquirements. He became professor of medicine in Gresham College, and an active member of the Royal Society. His principal works are, "A View of Sir Isaac Newton's Philosophy;" "Lectures on Physiology," besides memoirs presented to the Royal Society. Died, 1771.

PENBROKE, WILLIAM HERBERT, Earl of, a distinguished soldier and statesman of the 16th century, was the eldest son of Sir Richard Herbert of Ewyas, and the first of a new line of earls of Pembroke. He was early in the service of Henry VIII.; married Anne, the sister of Queen Catherine Parr; and received from the king many valuable offices and large grants of lands. In 1544, he was named captain of the castle and town of Aberystwith and keeper of Caermarthen Castle, and was about the same time knighted. He was a privy-counsellor, and was appointed one of Henry's executors. Under Edward VI. he zealously supported the Protestant cause, and in acknowledgment of his services was made K.G., president of the Council in the Marches of Wales, and, in 1551, Baron Herbert and earl of Pembroke. He supported Northumberland in the plot for the elevation of Lady Jane Grey to the throne, and engaged his eldest son to marry her sister; which, however, was not carried out. After the death of Edward VI., Pembroke wavered, tried to steal from the court, and at last actively supported Mary and secured her favour and his own estates. After some hesitation he opposed the insurrection of Wyatt; and he took part as captain-general at the siege of St. Quentin in 1557. He was long one of the trusted counsellors of Queen Elizabeth, but was induced by irritated pride to join, first, in a plot against her great minister, Cecil Lord Burghley, and then in a conspiracy with Norfolk and Arundel for the restoration of Mary, queen of Scots, to her throne. The conspiracy was discovered, and Pembroke was banished from the court and con-

signed to his own house. Died at Hampton Court, in 1574.

PENBROKE, Countess of. [SIDNEY, MARY].

PENN, Sir WILLIAM, an English admiral, was born at Bristol, in 1621. He commanded the fleet, and Venables the land forces, at the taking of Jamaica in 1653. After the restoration he served under the duke of York, in the successful battle with the Dutch fleet in 1664, for which he was knighted. He died at Wmstead, in Essex, in 1670.

PENN, WILLIAM, the founder and legislator of Pennsylvania, was the son of the preceding, and born in London, in 1644. He was educated at Christchurch College, Oxford, and there imbibed the principles of Quakerism, which he afterwards publicly professed. This was considered by Sir William as a heinous offence; and finding his son inflexibly adhered to that plainness of speech and deportment which are the distinguishing characteristics of the sect, he on two occasions drove him from his family; yet, after a while, becoming convinced of his integrity, he permitted him to return, though he never openly countenanced him, neither would he use his interest to get him released when imprisoned for his attendance at religious meetings. In the 24th year of his age, Penn first appeared as a minister and an author; and it was on account of his second essay, entitled the "Sandy Foundation Shaken," that he was imprisoned in the Tower, where he remained 7 months, during which time he wrote his most celebrated work, "No Cross, no Crown," and finally obtained his release from confinement by an exculpatory vindication, under the title of "Innocency with her open Face." In 1670 Sir William died, fully reconciled to his son, and leaving him a plentiful estate. Penn now devoted himself to the propagation of his opinions; and from that time published a great variety of tracts, and travelled in Holland and Germany to support the cause of Quakerism. In 1681 Charles II., in consideration of the services of his father, and sundry debts due to him from the crown at the time of his decease, granted Mr Penn and his heirs, by letters patent, the province lying on the west side of the river Delaware, in North America, and made them absolute proprietors and governors of that country. The name, too, was changed in honour of Penn, from the New Netherlands to Pennsylvania. Upon this he published "A Brief Account of the Province of Pennsylvania," proposing an easy purchase of lands and good terms of settlement to such as were inclined to remove thither. In 1682 he embarked for his new colony; in the following year he founded Philadelphia; and revisited England in 1684. The court favour which Penn enjoyed during the reign of James II. naturally exposed him to popular dislike and suspicion. Charges of a very grave sort are brought against him by Lord Maccanlay, which have been zealously controverted by other writers. The case is not so clear that we can come to any positive conclusion respecting Penn's guilt or innocence. He was deprived of his government of Pennsylvania by William III., but had it restored to him,

and in 1699 he went there again. He returned to England two years later. His last years were full of care and trouble; he was burdened with debt, and he fell into a melancholy "second childishness," and died in 1718. There is an interesting "Life of William Penn" by Mr Hepworth Dixon.

PENNANT, THOMAS, naturalist and antiquary, was born at Downing, the family seat in Flintshire, in 1726. He early showed the passion for natural history which ruled him through life, and after completing his studies at Oxford he travelled in Cornwall and other parts of England, pursuing his favourite researches. He subsequently travelled on the continent, and became acquainted with Buffon, Haller, and Pallas; and twice visited Scotland. His principal works are the "British Zoology," commenced in 1761; "History (Synopsis) of Quadrupeds," published in 1771; and "Arctic Zoology," 1784—1787. He was also author of a "View of Hindostan," "Tour in Wales," "History of London," &c. Pennant was the friend and correspondent of White of Selborne, who addressed to him a large proportion of the letters which compose the "Natural History of Selborne." He also assisted Lightfoot in his "Flora Scotica." Pennant was an eccentric man of genius, who had great reputation and influence in his day. His big quartos were served up in small portions in the magazines, which were then chiefly made up of extracts, and the account of his tours in Scotland contributed to the rise of the passion for Highland scenery. Many odd stories are told illustrating Pennant's hatred of the fashion of wigs. On the recommendation of Linnaeus Pennant was chosen a member of the Royal Society of Upsal. Died at Downing, in 1798.

PENNI, GIAN FRANCESCO, surnamed **IL FATTORE**, Italian painter, was born at Florence in 1488. He entered into the service of Raphael as "fattore" (factor, or house-steward), but showing great skill in painting, he became his scholar and assistant. He executed portions of the famous Cartoons, and of the frescoes in the Vatican, and Raphael named him his coheir with Giulio Romano. After his great master's death, Penni settled at Naples, and died there, 1528.

PENRY, JOHN, or **AP-HENRY**, the Brownist, known also by his assumed name of **MARTIN MAR-PRELAIE**, was born in Brecknockshire about 1559. He studied both at Cambridge and at Oxford, graduated M. A. at the latter university, and entered the church. After preaching before the universities and in Wales, he published a pamphlet on the necessity of religious reformation in the principality, and an address to the governors and people of Wales on the same subject. In 1590 appeared his famous tract entitled "Martin Mar-Prelate," and a special warrant was issued for his seizure; to avoid which he retired into Scotland, and remained there three years. Having prepared notes of a petition or address to the queen on church abuses and affairs, he came to London to present it if possible. But he was seized, tried, and condemned, not for his printed works, but for mere notes found on him, and hastily hung in May, 1593. His sentence was

both unjust and illegal, and he is not without reason counted among the martyrs of Puritanism.

PEPE, General **GUGLIELMO**, a distinguished Italian patriot, was born in Calabria in 1783. In 1799 he sided with the French party in the Neapolitan kingdom, against the infamous Cardinal Ruffo, for which he was condemned to death, but the sentence was commuted to exile, on account of his youth. He served two years under Napoleon, and in 1802 organized a conspiracy against Ferdinand IV., for which he was sentenced to imprisonment for life. Rescued by Joseph Buonsaparte, he served under him, and afterwards under Murat, and continued in the Neapolitan service after the restoration of the Bourbons. In 1820 and 1821 he was the leader of the revolutionary party, which extorted a constitution from Ferdinand; and as captain-general of the constitutional forces, entered Naples July 6, 1820, and received the oath of the king to the constitution. The Congress of Laybach followed, Pepe was defeated by the Austrians, and was again exiled, and resided in France and England until 1848, during which period he became acquainted with many of the most eminent men in both those countries. On the outbreak of the Italian revolutions, in 1848, he returned to Naples, and was appointed commander-in-chief of the army sent to Central Italy against the Austrians by the constitutional government of Ferdinand II. At Bologna he received orders to return, which he refused to obey, but resigned the command of the army, and repaired to Venice, where Daniel Manin, then president of the Republic, gave him the command-in-chief of the land forces. This post he held, with high distinction, during the long siege of the city by the Austrians, heroically holding out till August, 1849, when bread and powder failing, capitulation was inevitable. The defence of Venice was Pepe's crowning achievement, and there ended his long and chequered military career. From Venice he went to Paris, and continued to reside there until the *coup d'état* of Dec. 1851, when he finally removed and settled in Piedmont. Died, 1853. In December, 1863, the remains of this faithful patriot were transferred, according to his own express desire, to Naples, and interred in the Campo Santo, with the highest honours his liberated country could bestow.

PEPIN LE GROS, or **PEPIN DE HERISTAL**, sovereign of France, but without the title of king, was grandson of Pepin the Old, and made himself master of Austrasia in 680. He carried on war with Thierry, king of Neustria and Burgundy, and in 687 defeated and made him prisoner; thus virtually putting an end to the Merovingian dynasty, and becoming sole ruler of France. Pepin was master of Austrasia for 31 years, and of all France for 27 years, under four nominal kings. He was a successful soldier, a wise governor, and a promoter of religion. He sent Willibrord to preach Christianity in Friesland, and founded for him the see of Utrecht. Pepin died 714, leaving his son Charles Martel successor to his power.

PEPIN THE SHORT, king of France, first of the Carolingian race, was second son of

and illegal, and he is not without
ted among the martyrs of Paris.

General GUGLIELMO, a distinguished
patriot, was born in Calabria in
1799 he sided with the French party
in the Neapolitan Kingdom, against the
kingdom of Naples, for which he was con-
demned to death, but the sentence was com-
muted, on account of his youth. He
remained under Napoleon, and in 1802
was a conspirator against Ferdinand
and he was sentenced to imprisonment.
Released by Joseph Buonaparte, he
remained under him, and afterwards was
condemned to death in the Neapolitan ser-
vice, but the restoration of the Bourbons. In
1815 he was the leader of the revolu-
tion, which extorted a constitu-
tion from Ferdinand; and as captain-gen-
eral of the constitution, entered
Naples, 6, 1820, and received the oath of
the constitution. The Congress
of Vienna, and was again exiled, and re-
turned to England until 1848, dur-
ing which he became acquainted with
most eminent men in both those
countries. On the outbreak of the Italian
war in 1848, he returned to Naples,
and was appointed commander-in-chief of
the army of Central Italy against
the constitutional government
of Austria. At Bologna he received
the command, which he refused to obey,
and was banished from the
republic, where Daniel Manin,
chief of the republic, gave him
the command of the land forces.
He fled, with high distinction, dur-
ing the siege of the city by the Austrians,
and fled to the Adriatic, where
under failing, capitulation was
the defence of Venice was Pepe's
movement, and there ended his
military career. From
Paris, and continued to re-
side in the *campidoglio* of Dec., 1851,
removed and settled in Pied-
mont in 1855. In December, 1863, the
faithful patriot was trans-
ferred to his own express desire,
interred in the Campo Santo,
where he honours his liberated coun-
try.

PEPUS, or PEPIN DE HERIS-
LAIN, king of France, but without the
title of grandson of Pepin the Old,
self master of Austrasia in 680.
War with Thierry, king of
Burgundy, and in 687 defeated
him; thus virtually put
the Merovingian dynasty, and
ruler of France. Pepin was
married for 34 years, and of all
years, under four nominal
kings, a successful soldier, a wise
and promoter of religion. He
was the first to preach Christianity
in the north, and was found-
ed for him the see of
Reims, and died 714, leaving his son
Charlemagne as his successor to his power.

SHORT, king of France, first
of the Merovingian race, was second son of

Charles Martel, and was born in 714. On the
death of his father, in 711, he became mayor
of the palace (sovereign, under a nominal
king) of Neustria and Burgundy; and on the
retirement of his brother Carloman, in 717,
of all France. In 752 he had Childéric III.
deposed, and himself proclaimed and conse-
crated king at Soissons by St. Boniface. Two
years later he was crowned a second time by
Pope Stephen II., who declared him and his
successors patrons of Rome. Pepin then
marched into Italy to assist the pope against
Astolphus, king of the Lombards; defeated
him, acquired the exarchate of Ravenna and
the district called the Pentapolis, and made
a donation of this territory to the Holy See.
This was the commencement of the temporal
power of the popes. Pepin carried on wars
with the Saxons, the Saracens, and the duke
of Aquitaine. Died at St Denis, 768.

PEPUSCH, JOHN CHRISTOPHER, musical
composer and writer on the art, was born at
Berlin, in 1687, and gave early proofs of his
genius for music. After obtaining consider-
able reputation in his native place, he came
to England about 1698, and was very success-
ful as a composer for the stage. He took
part in founding the Academy of Ancient
Music, became Mus. D. Oxford, F. R. S., and
organist of the Charter House. Though he
acquired a handsome competency by marry-
ing Signora de l'Epine, an opera singer, he
continued to follow music as a profession till
his death, in 1752. He was author of a val-
uable treatise "On Harmony."

PEPYS, SAMUEL, secretary to the admiralty
in the reigns of Charles II. and James
II., was born at Bampton, in Huntingdon-
shire, in 1633; received his education at St
Paul's School, and at Magdalen College, Cam-
bridge; and being patronized by Montagu,
afterwards earl of Sandwich, accompanied
him as secretary, in the fleet that was sent
to bring back Charles II. He was in high
favour with the monarch, and introduced
many important improvements into the
navy. On the accession of William and
Mary he resigned, but published his "Memoirs"
relating to the navy. But, independent
of his great skill and experience in
naval affairs, he was well informed in history,
painting, sculpture, architecture, &c.; such
indeed was his reputation, that in 1684 he
was elected president of the Royal Society.
But that which has most contributed to give
an interest to the name of Pepys of late
years, is the publication of his very amusing
and instructive "Diary," which, besides
exhibiting his own prudent and wary char-
acter, his vanity and sensuality, with ex-
treme fidelity and naïveté, affords a most
curious and instructive picture of the court
of Charles II., and the habits, manners, and
conduct of the people at large. He died in
1703.

PERCEVAL, the Right Hon. SPENCER,
prime minister of England, second son of
John, earl of Exmouth, Lord Lovel and Hol-
land, was born in 1762, was educated at Har-
row and Trinity College, Cambridge, prac-
tised as a chancery barrister, and attached
himself at the outset of his political life to
Fox, who, in 1796, brought him into parlia-
ment for Northampton. Mr Perceval's know-

ledge of finance opened to him a field for
promotion; he was appointed one of the
counsellors for the crown, and soon became
solicitor-general, and, in 1802, attorney-gen-
eral. He advocated the union of Ireland with
England, but was opposed to concession to
the Catholics; in short, he was a firm sup-
porter of the measures of ministers during
the life of Pitt, and of the opposition during
the administration of Fox, at whose decease,
in 1807, he obtained a place in the Cabinet as
chancellor of the exchequer, and also that
of chancellor of the duchy of Lancaster. He
was supposed to have the lead in the Cabinet,
although he did not then hold the office
of first lord of the treasury, but to this
he succeeded at the death of the duke of
Portland in 1809. It was generally con-
sidered that he held the office *pro tempore*,
until the Marquis Wellesley should return
from his embassy to Spain; but when the
latter did return, Mr Perceval still managed
to retain his place. When the prince regent
took the reins of government into his own
hands, he confirmed Mr Perceval in his
office, and the Marquis Wellesley resigned
that of secretary for foreign affairs, telling
the prince he would willingly act with Per-
ceval, but not under him. Mr Perceval kept
his high office only a short period, for on the
11th of May, 1812, he was shot on entering
the lobby of the House of Commons, by a
man named Bellingham, who avowed that
his purpose was to kill Lord Leveson Gower,
late ambassador to the court of St Peters-
burg. The assassin was found guilty, and
executed on the 18th of the same month.
The portrait of Perceval in the National
Portrait Gallery was painted from a mask
taken after death by Nollekens.

PERCIER, CHARLES, French architect,
born at Paris, in 1764. He was the friend
and professional associate of the architect
Fontaine, with whom he first became ac-
quainted while studying at Rome about 1787.
They were patronized and much employed
by Napoleon on public monuments for the
decoration of Paris; and among their joint
works were the Arc du Carrousel and the
grand staircase of the Museum. They exe-
cuted also extensive restorations and im-
provements in the Louvre and the Tuileries.
Percier was named by Napoleon chevalier of
the empire and member of the Legion of
Honour. He was joint author with Fontaine
and Bernier of—"Palais, Maisons et autres
Edifices modernes, dessinés à Rome;" and
with Fontaine, of—"Recueil de Décorations
Intérieures pour tout ce qui concerne l'ameu-
blement," &c. Died, 1838.

PERCIVAL, THOMAS, an eminent phys-
ician and miscellaneous writer, was born at
Warrington, in Lancashire, in 1740. After
studying at Edinburgh and Leyden, he set-
tled at Manchester, and there founded a
literary and philosophical society, of which
he was chosen president. Among his works
are, "Essays, Medical and Experimental,"
"Medical Ethics," "Moral and Literary Dis-
sertations," &c. Died, 1804.

PERCY, HENRY. [NORTHUMBER-
LAND, Earl of.]

PERCY, HENRY, surnamed for his dashing
courage HOTSPUR, was son of Henry Percy,

earl of Northumberland, with whom he served on the borders. He afterwards served in France; defeated the Scots, and killed Douglas at the battle of Otterburn (Chevy Chase) in 1388; and in the following year was in France again. With his father he joined Henry of Lancaster, in 1399, and was made warden of the east marches. The king also gave him the Isle of Man. But after the battle of Homildon Hill, at which he distinguished himself, he joined in rebellion against Henry IV., and was killed at the battle of Shrewsbury, 1403.

PERCY, THOMAS, an eminent prelate, was born in 1728, at Bridgenorth, in Shropshire; was educated at Christchurch College, Oxford; became chaplain in ordinary to the king; was next promoted to the deanery of Carlisle; and, in 1782, advanced to the bishopric of Dromore, in Ireland, where he died in 1811. His principal works are, "The Hermit of Warkworth," a poem; "The Reliques of English Poetry," his best known work and frequently reprinted, a translation of Mallet's Northern Antiquities, &c.

PERIPLUCAS, regent of Macedonia, was one of the generals of Alexander the Great, and served in the Asiatic campaigns, and in the Indian expedition. To him Alexander presented his ring when dying, and he was under regent B. C. 323, jointly with Meleager; whom, however, he soon put to death with 300 of his partisans. He aimed at the crown, and to compass it scrupled at no means, intrigue, treachery, open or secret murder. He suppressed the insurrection of the Greek colonists in Asia, and after a battle in which they were betrayed, he had them trampled to death by elephants. At length he found himself opposed by a league of the other generals, especially Antigonus and Ptolemy, and the former having fled to Egypt, Perdicas invaded that country. In attempting to cross the Nile many of his soldiers perished, a mutiny broke out, and he was murdered in his tent, B. C. 321.

PEREIRA, JONATHAN, M.D., F.R.S., &c., the most distinguished writer on "Materia Medica" of his time, was born in Shoreditch, in 1804. When fifteen years of age, he was articled to an apothecary. In 1821 he attended the lectures of Clutterbuck, Birkbeck, and Lambe, at the General Dispensary, in Aldersgate Street, and in 1823 he was appointed apothecary to the same Dispensary. In 1825, he became a member of the College of Surgeons; succeeded Dr Clutterbuck as a lecturer on chemistry; in 1832, was elected to the chair of chemistry, in the London Hospital, which he held till 1846; and, in 1851, he became a full physician at the London Hospital. His professional advancement had been entirely owing to the works which had emanated from his pen. Among these may be mentioned his translation of the "Pharmacopœia" for 1824, "A General Table of Atomic Numbers, &c.," "A Treatise on Food and Diet," his contributions to the Pharmaceutical Journal and Transactions, and above all his "Elements of Materia Medica and Therapeutics," to which Dr Pereira gave the best years of his life, and which is considered to be one of the most elaborate and thoroughly worked out productions of

modern science. "The Life of Dr Pereira," says a contemporary writer, "presents an admirable model for the example of those who are entering upon the pursuit of science. He had an unquenchable thirst for science, an indefatigable thirst for knowledge, and an irresistible determination of original; but whatsoever he did, he did well; to others as they were creditable to himself." Died, 1853, in the 49th year of his age.

PEREIRE, JACOB RODRIGUEZ, a native of Estrenadura, in Spain, was the first who practised in France the art of teaching the deaf and dumb. His method of instruction was different from that of the abbé l'Épée; but it was considered so good, that Louis XV. bestowed on him a pension of 500 francs. He wrote several treatises on the subject, and died in 1780.

PEREZ, ANTONIO, Spanish minister of state, was son of Gonzalo Perez, secretary of state to Charles V. and Philip II., and succeeded his father in that office. He enjoyed for some time the confidence of the king, and was employed by him in 1578 to procure the murder of Escovedo, secretary to Don John of Austria, and the zealous promoter of the ambitious intrigues of the latter. Soon after Perez was arrested as a traitor for communicating state secrets to the princess of Eboli, of whom the king was enamoured, and was sentenced to two years' imprisonment. He escaped from his prison and went to Saragossa, where he was illegally seized and imprisoned, but was rescued by the indignant citizens. He was again arrested on the charge of heresy, and confined in the dungeons of the Inquisition. Again the citizens rose, and again succeeded in liberating him. At the close of 1591 he escaped into France, and joined Henry IV. in the war with the league; visited England, and was warmly received by Queen Elizabeth and the English ministers of state; returned to France, narrowly escaping several attempts to assassinate him, and died at Paris, 1616. He had published his "Relaciones," an account of his misfortunes, in 1598, but has left much obscurity over the origin of them.

PERGOLESI, GIOVANNI BATTISTA, distinguished musical composer, was born in the Kingdom of Naples, early in the 18th century, and died in 1737. He is called the Domenichino of music, and, according to the opinion of his countrymen, no one ever excelled him in musical expression. Among his most celebrated works are, the "Stabat Mater," "Glimplade," an opera, "Orfeo e Euridice," and "Salve Regina."

PERIANDER, tyrant of Corinth, and counted by some among the Seven Sages of Greece, succeeded his father, Cypselus, B. C. 625, and reigned 40 years. He was the friend of Thrasylbus, tyrant of Miletus, through whose counsel he is said to have made his government more despotic and oppressive. He made himself master of Epidaurus and Coreyra; patronized philosophers and literary men; and after suffering much unhappiness in his family relations, partly the

known that both vessels were lost on different islands of the New Hebrides, and that every soul on board perished.

PERRAULT, CLAUDE, a celebrated French architect, was born at Paris in 1613. He forsook the practice of medicine to study the fine arts, particularly architecture, in which he rose to great eminence, and constructed many noble works, the principal of which is the façade of the Louvre. He published a translation of Vitruvius, with notes; a work "On the five Orders of Architecture," "Medical Essays," and "Memoirs of the Natural History of Animals." Died, 1688.

PERRAULT, CHARLES, brother of the preceding, was born in 1628. He for some time practised as a barrister, but afterwards became *comptroller-general* of the royal buildings, in which situation he contributed to the foundation of the Academy of Painting, Sculpture, and Architecture. He was admitted into the French Academy in 1671, soon after which he had a famous controversy with Boileau, respecting the comparative merits of the ancients and moderns; Perrault maintaining the superiority of the latter, and Boileau as vigorously asserting that of the former. This dispute was carried on with great asperity and personal rudeness on both sides. The work by which Perrault is best known, is entitled "Eloges des Hommes illustres du 17^e siècle." Died, 1703.

PERRIER, FRANÇOIS, a French painter and engraver, celebrated for his engravings of antique statues and bas-reliefs. Died, 1650.

PERRONET, JEAN RODOLPHE, director of the school of bridges and roads of France, was born in 1708, and died at Paris in 1794. To him France is indebted for the construction of many noble bridges, particularly those of Neuilly, Nemours, Pont Ste Maxence, and Pont Louis XVI. at Paris; and, while under his management, the roads and canals of France were also greatly improved.

PERROT, NICOLAS, sieur d'Ablancourt, celebrated for his agreeably written but unfaithful translations into French of the Greek and Latin classics. Born, 1606, died, 1664.

PERRY, JAMES, an able political writer, known for many years as editor and proprietor of the *Morning Chronicle*, was born at Aberdeen, in 1756, and educated at the high-school and university of that city. He came to London in 1777, and was engaged as a writer in the *General Advertiser* and *London Evening Post*. In 1782 he projected, and for a time edited, the *European Magazine*; but this he quitted for the *Gazetteer*, with an express stipulation that he was to be left to the free exercise of his own judgment and political opinions in conducting it. Up to this period it had been the custom for a single person to furnish an abstract of the nightly parliamentary debates; but Mr Perry employed a succession of reporters for that purpose, and thus introduced the practice which is at present adopted. He subsequently became sole editor and proprietor of the *Morning Chronicle*, which he conducted in such a manner,

that Mr Pitt and Lord Shelburne, in order to make use of his influence, offered him a seat in parliament. This however, he refused; and continued to edit his paper (which was regarded as a sort of official organ of the Whig opposition) till the illness which preceded his death, in 1821.

PERSEUS, or **PERSES**, last king of Macedonia, was son of Philip V. From jealousy of his younger brother, Demetrius, he accused him falsely to his father, and induced him to put him to death. He came to the throne on the death of Philip, B. C. 173. The great event of his reign was the war with the Romans, which, long expected, began in 171. Perseus was at first supported by Eumenes, but he lost his alliance, and attempted to assassinate him. In 168 the war was ended by the total defeat of Perseus at Pydna by L. Anullius Paulus. Perseus escaped with his children and treasures to Samothrace, but soon gave himself up, and after being led in triumph at Rome, was cast into prison. He was however allowed to spend his last years at Alba. Perseus was the last king of Macedonia, which was then made a Roman province.

PERSIUS, FLACCUS AULUS, a Roman satirical poet, was born A. D. 31, at Volterra, in Etruria, and died in 62, aged 28. His six "Satires," which present a picture of prevailing corruption, are distinguished for vigour, conciseness, and austerity of tone. They have been frequently translated into English.

PERTHES, CHRISTOPH FRIEDRICH, a distinguished German bookseller and publisher, was born at Rudolstadt in 1722. Having early lost his father, he was brought up by an uncle, and at the age of 15 was apprenticed to a bookseller at Leipzig, in whose service he suffered many hardships. He read much and took a warm interest in public affairs; fell in love with his master's daughter, but had a rival in his fellow-apprentice, Nessig, and became acquainted with Goethe, Schiller, and other men of letters. In 1794, he became assistant to a publisher at Hamburg, where three years later he began business on his own account, in partnership with Nessig, who soon retired. He had afterwards Besser for his partner. The business was seriously injured by the French occupation of Hamburg, and Perthes, a fearless and zealous patriot, made himself obnoxious to the French, and, in 1813, had to fly from the town. His noble and devoted wife, Caroline, daughter of the pious Claudius of Wandsbeck, had previously been sent with their children to her father's house. They returned in 1814. Perthes settled in 1822 at Gotha, where his uncle had carried on the business of a bookseller, and was there the publisher of many important historical and theological works. He married a second time in 1825, having lost his first wife four years before; and died near Gotha, in 1843. An English translation of the *Memoirs* of this noble man appeared in 1836.

PERUGINO, IL, a celebrated Italian painter, born at Città della Pieve about 1446. His real name was PIETRO VANUCCI, but becoming a citizen of Perugia,

and Lord Shelburne, in order of his influence, offered him a parliament. This however, he refused, and continued to edit his paper, and was regarded as a sort of official Whig opposition till the illness preceded his death, in 1821.

PERSEUS, last king of Macedonia, son of Philip V. From jealousy of his brother, Demetrius, he accused falsely to his father, and induced him to death. He came to the death of Philip, B.C. 173. The event of his reign was the war with the Romans, which, long expected, he was at first supported, but he lost his alliance, and assassinated him. In 168 the war by the total defeat of Perseus by L. Julius Paulus, and his children and treasures to Rome, and he was led in triumph at Rome, was cast into prison. He was however allowed to live the last years at Alba. Perseus was king of Macedonia, which was then a Roman province.

PERSEUS, PLACIDUS AULUS, a Roman poet, was born A.D. 31, at Volterra, and died in 62, aged 28. His six books, which present a picture of prescription, are distinguished for their plainness, and austerity of tone. They have been frequently translated into

English. **PERSEUS, CHRISTOPH FRIEDRICH**, a German bookseller and publisher, born at Rudolstadt in 1722, and died in 1772. He was brought up to the trade, and at the age of 15 was appointed a bookseller at Leipzig, in which office he suffered many hardships, but he took a warm interest in literature; fell in love with his master's daughter, but had a rival in his fellow-apprentice, and became acquainted with the Schiller, and other men of letters. In 1794, he became assistant to a bookseller at Hamburg, where three years he carried on his own account, in partnership with Nessig, who soon retired afterwards Dessau for his health. The business was seriously interrupted by the French occupation of Hamburg, and he was a fearless and zealous patriot, and obnoxious to the French, and fled from the town. His noble wife, Caroline, daughter of the Count of Wandsbeck, had prevented with their children to her residence. They returned in 1814, and died in 1822 at Gotha, where he carried on the business of a bookseller, and was the publisher of many historical and theological works. He died a second time in 1823, having married his wife four years before; and died at Gotha, 1843. An English translation of his "Memoirs of this noble man" appeared in 1836.

PERUGINO, an Italian painter, was born at Città della Pieve about the year 1400, and became a citizen of Perugia,

and he acquired the name by which he is best known. He studied under Verrocchio, and soon attained great distinction as a painter in oil by his rich colouring. He was employed for ten years in the Sistine Chapel and the Stanze of the Vatican, and on his return to Perugia opened a school, and had Raphael among his pupils. Perugino was a sordid and eccentric man; adhered obstinately to the still conventional forms of the fifteenth century, and in his latter years produced many works unworthy of him for gain. His chief d'œuvre is the "Metà in the Pitti Palace." Among his best works are an "Ascension," at Lyons, the "Infant Christ adored by the Virgins," at Rome, "Madonna Enthroned," at Bologna, and the fresco of the "Baptism" in the Sistine Chapel. Two of his pictures are in the National Gallery; one of which—the "Virgin adoring the Infant Christ," is believed to be partly the work of Raphael. Died at Castello di Pontignano, 1524.

PERUZZI, BALDASSARE, Italian painter, but more celebrated as an architect, was born near Sienna, in 1481. He first painted at Volterra, and afterwards at Rome; where under the patronage of Agostino Chigi he applied himself to architecture. He built the Farnesina and the Palace Massimi, succeeded Raphael as architect of St Peter's, and was afterwards architect to the city of Sienna. He excelled as a painter of arabesques and architectural decorations. Peruzzi lost all he possessed at the sack of Rome, in 1527. Died at Rome, by poison. It is said, in 1536. There is a drawing of his in the National Gallery.

PEREGRINUS, M. (CANTARINI, SIMONE.) **PESECEANUS NIGER, CAIUS**, Roman emperor, was a native of Aquino. He was appointed governor of Syria, and commander of the legions in Asia, by Commodus; and on the death of Pertinax, in 193, the troops of Peseceanus appointed him emperor. He was defeated at Issus, in 195, and was killed by some soldiers, while on his flight to the Parthian dominions.

PESTALOZZI, JOHANN HEINRICH, celebrated for having introduced a new method of education, was born at Zurich, in Switzerland, in 1746. After having studied theology and jurisprudence, he relinquished his views with respect to the church and the bar, and adopted from inclination the employment of a teacher. Having become acquainted with the moral wretchedness of the lowest classes, he began a career of instruction by the admission of the children of paupers into his house; and, in 1798, the Directory of Switzerland invited him to establish a house of education at Stanz, where he became the kind and attentive instructor of 80 poor children. War destroyed this establishment, and Pestalozzi then took charge of a school at Burgdorf, where he also received pupils, who paid for their instruction, so that he could employ able assistants. This institution flourished, and, in 1804, he removed it to Yverdon, where he occupied the castle given to him by government. Pestalozzi's method is based on the principle of communicating all instruction by immediate address to the senses and the understanding,

and effecting the complete education and development of the child by gradually calling all his powers into exercise. He composed several works illustrative of his plans, and closed a long life of labours for the benefit of society, in 1827.

PETAU, DENIS, in Latin PETAVIUS, a learned French chronologist, born at Orleans in 1583. He entered the order of Jesuits in 1605, and sixteen years later was appointed professor of theology in the college of Clermont at Paris, where he spent the rest of his studious life. His great work is entitled "De Doctrina Temporum," and first appeared in 2 vols. folio, in 1627. He afterwards published an abridgment of it under the title of "Rationarium Temporum," which has been very frequently reprinted. He wrote and edited several other works, and died at Paris in 1652.

PETER, or PEDRO, III., king of Aragon, was son of James I. He was born in 1239, married Constance, daughter of Manfred, king of Sicily, and succeeded his father in 1276. He aspired to the crown of Sicily, and promoted, it is said, the massacre known as the "Sicilian Vespers." He landed in the island and was crowned king, defeating the fleet of Charles of Anjou at Messina. But the pope, Martin IV., excommunicated Pedro, and laid an interdict on the kingdom of Aragon. It was agreed to decide the dispute by a single combat of the two kings at Montevaux, but Pedro did not appear. His admiral, Roger de Loria, defeated the fleet of Charles near Naples; the pope proclaimed a crusade against Pedro, and the French invaded Aragon; but their fleet was destroyed by de Loria, and the army withdrawn. Pedro died, 1285.

PETER, or PEDRO, THE CRUEL, king of Castille, was born in 1334. He was son of Alfonso XI., and succeeded his father in 1350, under the regency of his mother and Albuquerque, his tutor. He earned his title of the Cruel by a long series of atrocious cruelties, beginning with the assassination of Eleonora de Guzman, his father's favourite mistress. He married Blanche of Bourbon, abandoned her in three days, and afterwards had her secretly murdered. Wives, mistresses, brothers, cousins, swell the list of his victims, besides a great number of nobles killed by his orders. At last, in 1366, a revolt broke out, headed by Henry of Trastamare, his natural brother, and supported by French troops under Bertrand du Guesclin. Pedro was defeated and expelled, but by the aid of the Black Prince, who won the victory of Najara, and took Bertrand prisoner in 1367, he was re-established on the throne. On the withdrawal of the prince of Wales, who was ungraciously treated, Pedro indulged his revenge, and a fresh revolt took place. Pedro was defeated by Henry at Montiel, and was killed by him in the tent of Du Guesclin, March, 1368. Pedro had some good qualities, but his training under Albuquerque was of the worst kind.

PETER ALEXIEVICH, usually styled **PETER THE GREAT**, Czar of Russia, was born in 1702; and in 1689 he obtained the sole authority, on the retirement of his brother Ivan,

with whom he had been before associated in the government of the empire. After having suppressed a conspiracy of the Strelitzes against his life, in which he displayed much personal courage, he travelled in foreign countries, not in the character of Czar, but as member of an embassy. At Amsterdam he worked, *incognito*, in a shipyard, went to the village of Saardam, where he caused himself to be enrolled among the workmen, under the name of Peter Michaeloff. Here he lived in a little hut for 7 weeks, made his own bed, and prepared his own food, corresponded with his ministers at home, and laboured at the same time in ship-building. Induced, by his love for the sea, to accept the invitation of William III. to visit London, he spent some weeks there, keenly observing and learning all that he could of trade, manufactures, and the arts. Having proceeded to Vienna, he there received intelligence of a new rebellion of the Strelitzes, on which he returned home, crushed the insurrection, and visited the rebels with fearful severity. In 1700 he entered upon a war with Sweden, which lasted till 1721. He was defeated by his great rival Charles XII. at the battle of Narva, and the war went on with various results till 1709, when he completely defeated Charles at Pultawa. In the following year the sultan declared war on him, and he narrowly escaped capture by the Turks, in the campaign of 1711. This war ended in 1713. Not satisfied with his immense power as Czar, Peter had suppressed the patriarchate, and made himself head of the church as well as of the state. In 1703 he founded St Petersburg, and began the fortifications of Cronstadt. Three years later he privately married Catherine, a girl of low origin and immoral character; married her publicly in 1710, and had her crowned in 1722. Peter extended the limits of the empire both in Europe and Asia, changed the face of Russia by his zealous promotion of trade, navigation, manufactures, and education, effected an immense change in the manners and customs of the Russians; and after the conclusion of peace with Sweden, received the title of Emperor of all the Russias and Father of his country. Reforming others, he failed to reform himself, but remained to the last an ignorant, coarse, brutal savage, indulging in the lowest vices, and gloating over scenes of cruel suffering. He would sometimes put his victims to the torture, play judge and executioner too, and drunk with wine, strike off twenty heads in succession, proud of his horrid dexterity. His state policy has been adhered to by his successors. Peter I. died at St Petersburg, after very severe suffering, January 28, 1725.

PETER OF BLOIS, so named from the place of his birth, was a learned ecclesiastic of the 12th century, who, settling in England in the reign of Henry II., obtained the archdeaconry of Bath, and afterwards that of London. His works, in one vol. folio, consist of letters, sermons, and treatises. Died, 1200.

PETER DE CLUGNY, sometimes styled **PETER THE VENERABLE**, from the gravity of his deportment, was a French monk, who

in 1123 became abbot of Clugny. In 1140 he afforded shelter to the unfortunate Abelard, and by his interposition at Rome he prevented the execution of the unjust sentence which had been pronounced against him. Died, 1156.

PETER THE HERMIT, the preacher and leader of the first crusade, was a French military officer, of Amiens, who quitting the military profession, made a pilgrimage to the Holy Land about 1093. Instigated by the difficulties and dangers he had undergone in his progress, and profoundly affected by the sad condition of the few Christians residing in that country, he went to Rome, obtained the sanction of Pope Urban II. for his project, and then travelled over the principal countries of Europe, and with earnest and restless eloquence preached a crusade for the recovery of Palestine from the Infidels. Peter himself led one part of the first irregular band of crusaders, amounting to about 100,000 men, and after crossing Germany, and encountering severe resistance in Hungary, reached Constantinople, where he was welcomed by the Emperor Alexis. He stayed there while the host of crusaders passed on to fresh conflicts and sufferings. He was at the siege of Antioch in 1097, but, despairing of success, fled from the camp, and was brought back by force. He accompanied the crusaders to the Holy City, and made a discourse to them on the Mount of Olives. Subsequently, it is not known how or when, he returned to his native country, where he founded the abbey of Noir-montier, and died in 1115.

PETER LOMIARD, [LOMIARD.]

PETER MARTYR, [MARTYR.]

PETERBOROUGH, Earl of. [MOR-DAUNT, CHARLES.]

PETERKIN, ALEXANDER, an able miscellaneous writer, was born at Macduff, Banffshire, of which parish his father was minister, in 1781. By profession a solicitor, he acted, from 1814 to 1823, as sheriff-substitute of Orkney. In the ecclesiastical struggles, which terminated in the "disruption" of the Scottish National Church in 1843, he took an active part as agent for the seven Strathbogie clergymen. He was long connected with the public press in Scotland, advocating the views of a "Whig of 1688," and his clear-sightedness, rectitude, and kindness of heart gave him great weight with his contemporaries. The works which bear his name as author in some cases, and as editor in others, are, "A Review of the Life of Burns," prefixed to an edition of the works of Burns, "Notes on Orkney," "Rentals of Orkney," "Compendium of the Laws of the Church of Scotland," "Records of Scotland," and the "Universal Book of the Kirke." Died, 1846.

PETERS, HUGH, an English fanatic, was born at Povey, in Cornwall, in 1520, and educated at Trinity College, Cambridge, where he obtained the degree of M.A., but was expelled for irregular behaviour. He afterwards went on the stage, where he acquired that fluency which subsequently distinguished him in the pulpit. He was for some time lecturer of St Sepulchre's,

abbot of Clugny. In 1140 he
interposition at Rome he pre-
execution of the unjust sentence
been pronounced against him.

THE HERMIT, the preacher and
the first crusade, was a French
leer, of Amiens, who quitting the
profession, made a pilgrimage to

y, where he founded the abbey
ntler, and died in 1113.

LOMBARD. [LOMBARD.]
MARTYR. [MARTYR.]
MOROUGH, Earl of. [MOR-
HARLES.]

IN, ALEXANDER, an able mis-
writer, was born at Mauchiff,
of which parish his father was
1781. By profession a solicitor,
1811 to 1823, as sheriff-substitu-
ey. In the ecclesiastical strug-
terminated in the "disruption"
ish National Church in 1843, he
vere part as agent for the seven
clergy men. He was long con-
the public press in Scotland,
the views of a "Whig of 1688,"
ear-sightedness, rectitude, and
of heart gave him great weight
temporaries. The works which
e us author in some cases, and
thurs, are, "A Review of the
s," prefixed to an edition of the
rus;" "Notes on Orkney," "Hent-
y," "Compendium of the Laws
h of Scotland," "Records of the
stitution of the Church of Scot-
the "Universal Book of the
ed, 1846.

HUGH, an English fanatic, was
vey, in Cornwall, in 1599, and
Trinity College, Cambridge,
ained the degree of M.A., but
d for irregular behaviour. He
vent on the stage, where he ac-
buffoonery which subsequently
d him in the pulpit. He was
one lecturer of St Sepulchre's,

London; but afterwards joined the Inde-
pendents, and went to America. At the be-
ginning of the rebellion he returned to Lon-
don, where he became a zealous preacher in
the cause of the parliament, and an active
promoter of the king's death. For this he
was tried and executed, with the regicides,
in 1660. Some of his Discourses, and his
"Last Legacy to his Daughter," have been
printed.

PETHON, DE VILLENEUVE, JÉRÔME,
a French revolutionary statesman, originally
an advocate at Chartres, was chosen deputy,
by the tiers état of that city, to the States-
general, and was elected, December, 1790,
general, and of the National Assembly. In
June following he became president of the
criminal tribunal of Paris, and was made
mayor, November, 1791. He became the
first president of the National Convention,
but excited the jealousy of Robespierre, and
was included in the proscription of the Gil-
rondists, May, 1793. He escaped to the de-
partment of Calvados, but, some time after,
his body was found in a field, half devoured
by wolves, and it was supposed that he had
perished from hunger.

PETION, ALEXANDRE, president of the
southern parts of the island of Hayti, was a
mulatto, and received his education in the
military school of Paris. Being a man of
cultivated understanding and attractive
manners, and, moreover, well instructed in
the art of war, he served in the French, and
afterwards in the Haytian, armies, with suc-
cess and reputation. He was in high credit
as a skilful eagleer, in which capacity he
rendered the most essential services to Tou-
ssaint and Dessalines; and, assisted by the
English, they at length, in 1804, expelled the
French from the island. After a variety of
struggles for superiority between Christophe,
the lieutenant and successor of Dessalines,
Petion was elected president in 1807, and re-
tained his office, in spite of all opposition,
till his death in 1818, when he was succeeded
by General Boyer.

PETIS DE LA CROIX, FRANÇOIS, a
French orientalist, was born in 1654. He be-
came secretary, and interpreter of the ori-
ental languages, to the king of France, in
which offices he succeeded his father. He
also undertook several voyages into the
East, and in 1692 was made Arabic professor
in the royal college. He died in 1713. His
"Persian Tales" were first published in
1712, in 5 vols. His other works are, "The
History of Timur Bee;" "The Stato of the
Ottoman Empire," &c.

PETIT, JEAN LOUIS, a distinguished
French surgeon, born at Paris, in 1674, was
a pupil of Littre, and having made rapid
progress in his studies, became, in 1692, sur-
geon in the army. He settled at Paris
after eight years' service, and opened a school
of anatomy and surgery, from which went
forth many eminent men. Petit acquired a
very high reputation, and by his teachings
and writings contributed to the advance of
his science. He was the inventor of several
surgical instruments. Besides many valu-
able memoirs, contributed to the Academy
of Sciences, of which he was a member, he
published "L'Art de guérir les Maladies des

Os," and "Traité des Maladies Chirurgi-
cales," the latter an outline of a great work
which he did not live to complete. Petit
was chosen Director of the Royal Academy
of Surgery of Paris, in 1731. He was also
F.R.S., London. Died at Paris, 1750.

PETIT, PIERRE, an eminent French ma-
thematician, was born at Montluçon, in 1598,
and died in 1677. He was appointed Inten-
dant of the Fortifications of France, and
wrote treatises "On the Compass of Propor-
tion," "On Sight," "On Comets," &c.

PETIT-THOUAIS, AUBERT DU, a dis-
tinguished French botanist, born in 1756
He spent ten years in the Isle of France,
visited Madagascar, and after his return to
France was for more than 20 years director
of the royal nursery of Roule, member of
the Institute, &c. He was author of several
works on the botany of the regions he had
explored, "Mélanges de Botanique," &c.
Died, 1831.

PETTITOT, JEAN, an unrivalled painter
in enamel, was born at Geneva, in 1607.
He visited England, was patronized by
Charles I.; after whose death he went
to France, and was employed by Louis
XIV. Besides painting the portraits of
many royal persons, he made copies in
enamel of works of Vandyck, Lebrun, and
other artists. Pettitot worked always in
association with his brother-in-law, Bordier,
who added drapery and backgrounds to
his pictures. After the revocation of the
Edict of Nantes, he with difficulty obtained
leave to return to Geneva. He died at Ve-
vey, 1691.

PETIVER, JAMES, an English botanist,
who was apothecary to the Charter House,
and died in 1718. He was fellow of the Royal
Society, and made so great a collection of
rare and curious plants, animals, and insects,
that Sir Hans Sloane, who afterwards pur-
chased it, offered him in his lifetime £1000
for his collection. He was the author of
several botanical works.

PETÖFI, ALEXANDER (PETÖFI SAN-
DOFI), the Hungarian poet, was born in the
county of Pesth, 1 Jan., 1823. He was the
son of a pork-butcher, and through his
youth and early manhood led a wild and
wandering life; alternately player, student,
soldier, and again student and player. He
was very early known by his associates as
"the poet," but his first published songs did
not appear till 1843. In the following year
appeared his first separate volume of poems,
which became immediately popular. "He
stormed," says Sir J. Bowring, "the national
enthusiasm. He filled up the void which
had been left longing for the Bard of the
Fatherland." Petöfi was, of course, a pas-
sionate lover of freedom, and entered with
intense earnestness into the patriotic strug-
gle of 1848-9. His songs were the most
effective battle-cries. He joined the army
under General Bem, and became his aide-de-
camp; served in the last desperate struggle
against the combined forces of Russia and
Austria, and in the battle of Schassburg,
31st July, 1849, in the full strength of his
youth, disappeared. His body was never
found, nor has he since been heard of; but
the Magyars still say that their hero-poet is

not dead. Petron was a very prolific writer, and published ten volumes of poems between 1844 and 1849, besides writing an immense number of minor pieces. He was well acquainted with English literature, and translated some of the works of Shakespeare, Moore, Shelley, and others. Specimens of his poems are given by Sir J. Bowring, in an article in the Gentleman's Magazine of Feb., 1866.

PETRARCA, FRANCESCO (PETRARCH), one of the most illustrious poets and scholars of Italy, was born at Arezzo, in 1304. His father, a friend of Dante, and, like him, an exile from Florence, settled afterwards at Avignon, and brought him up to the law, for which he had no relish. He studied at Montpellier and Bologna, and early made acquaintance with many eminent and noble persons. He entered into the galeties of the papal court at Avignon, but at the same time continued his literary studies. His passion for the beautiful Laura, which gave shape and colour to the rest of his life, was first kindled in 1327, as on the 6th April of that year she worshipped beside him in the church of St Clair. She was then 19, and had been married two years to Hugues de Sade. Petrarch's love for her was true and permanent, but was not returned by Laura; whose conduct throughout was marked by purity, kindness, and good sense. To escape or weaken the force of his hopeless passion he travelled frequently, and lived for some time in the secluded valley of Vaucluse. He took part in the political affairs of his time, was the friend of popes and princes, and was employed in many important negotiations. He rendered very great services to literature and learning by his diligent researches for and collections of ancient manuscripts and other remains; and by the gift of his books to the church of St Mark, Venice, he became the founder of its famous library. He was the friend of Boccaccio, who shares with him the honour of reviving classical literature; and the friend of Rhenzi, with whose enterprise, as Tribune of Rome, he warmly sympathized. In 1341 Petrarch received the highest testimony of the renown which he had acquired as poet and scholar, by being crowned as laureate in the Capitol of Rome. The death of Laura took place on the 6th April, 1348, anniversary of the day on which Petrarch first saw her. The tidings reached him in Italy, and he made a touching note of it in his Virgil. Petrarch was at Rome during the Jubilee of 1350; lived afterwards at Vaucluse, Milan, Padua, Venice, and in 1370 removed to Arqua, in the Euganean Hills, where, after long-continued ill-health, he died, sitting among his books, 18th July, 1374. Petrarch's works are partly in Italian and partly in Latin. The latter were those on which his reputation in his own day rested; but the former are those by which he is now most known. His Italian Sonnets, Canzoni, and "Triumphs" are all sweet, exquisite, glowing variations on one theme, Laura; those written after her death have an added purity and loftiness of sentiment. His Latin poems consist of an epic on the second Punic war, entitled "Africa," Epis-

tics, and Elegues. And among his prose works are, "De Remediis utriusque Fortiæ;" "De Vita Solitaria;" "De Vera Sapientia;" "Epistolæ Familiares," &c. The most eminent persons and potentates of the time, and treating of the exciting events amidst which he lived, are of high interest and great value.

PETROF, BASIL PETROVICH, a Russian poet and philologist, was born, in 1736, at Catharine, and became reader to the Empress; but he resigned his office in 1780, and devoted the remainder of his life to literary pursuits. His works were published in 3 vols. in 1811. But he wrote also a translation of the *Æneid*, which was not included in that collection. Died, 1799.

PETRONIUS, TITUS, surnamed **ARBITEER**, a Roman author, notorious for his licentiousness and obscenity, was born at Marsilles, and lived at the court of Nero. He was, for a time, the favourite of the emperor, who made him master of his voluptuous banquets and revelries. When he finally fell a victim to the suspicions of the tyrant, and was condemned to death, he avoided the ignominy of a public execution by opening his veins, A. D. 66. It is uncertain whether the book entitled "satyricon" is the work of this or some other Petronius.

PETTIGREW, THOMAS JOSEPH, the distinguished surgeon and archaeologist, was born in London, 25th October, 1791. His father was a surgeon, and as he early showed an extraordinary fondness for anatomical pursuits, he was placed with Mr Taunton, in whose medical school he soon began to teach. Admitted to the Medical Society of London in 1808, he became successively their secretary and registrar. Among his early friends were Dr Lettsom, Dr Cogan, Coleridge, and the Chevalier Aldini of the university of Wilna. He founded the Philosophical Society of London, and took an active part in its transactions. In 1813 he was named secretary to the Royal Humane Society, a post which he held for seven years, and through which he obtained the friendship and patronage of the duke of Kent. The duke appointed him his surgeon in ordinary, and charged him with the duty of vaccinating the Princess Victoria. He also introduced him to the duke of Sussex, who appointed him his surgeon and librarian. The latter office necessitated his active engagement in literary pursuits, and especially led to the preparation of the splendid work entitled "Bibliotheca Sussexiana; a Descriptive Catalogue, accompanied by Historical and Biographical Notices," of the ducal collection, which was published in 1827 and 1839. Meanwhile he was busy also in his profession, took part in founding Charing Cross Hospital, of which he was for a time senior surgeon, contributed papers to Medical Journals, and published several pamphlets. During the last thirty years of his life he devoted much attention to antiquarian subjects, and through his friendship with Edzont, B. Mangles, Dr Lee, Sir G. Wilkinson, and Dr Young, he was especially attracted to the study of antiquities of Egypt. He

[PET]

was one of the founders of the British Archæological Association, and was long their treasurer, vice-president, and editor of their Journal. Mr Pettigrew was also a fellow of the Royal Society, of the Society of Antiquaries, and the Royal College of Surgeons. Among his medical works are,—“Views of the Basis of the Brain and Cranium,” published on his 18th birthday. “General Views of the Application of Galvanism to Medical Purposes,” written in conjunction with Al-dini; “Observations on Cholera;” and “On dini;” “Observations on Cholera and Superstitions connected with Medicine and Surgery,” published in 1843. Among his other writings are,—“Memoirs of Dr Lett-er,” “History of Egyptian Mummies;” “The Medical Portrait Gallery,” in 4 vols.; “The Medical Lord Nelson,” 2 vols.; the “Memoirs of the Tombs;” besides very “Chronicles of the Tombs;” besides very numerous papers contributed to the Journal of the Archæological Association. Died at the South Kensington, 23 November, 1865. His wife had died eleven years earlier. Of a large family he left three sons and three daughters surviving him.

PETTY, Sir **WILLIAM**, the founder of the Lansdowne family, was born in 1623, at Romsey, in Hampshire, where, and at Cæca, in Normandy, he was educated. Having studied medicine and anatomy at Leyden and Paris, he took his degree, and was subsequently made professor of anatomy, and Gresham professor of music. In 1652 he was appointed physician to the army in Ireland, and secretary to Henry Cromwell, by whom he was employed in surveying the forfeited lands, for which charges were alleged against him in the House of Commons, and he was dismissed from his places. At the Restoration he was knighted, and made surveyor-general of Ireland. He was one of the first fellows of the Royal Society, to which he presented the model of a double-bottomed ship, to sail against wind and tide. He suffered much by the fire of London; but by marriage, and various speculations, he recovered his loss, and died very rich, in 1687. Of his works, the “Political Arithmetic,” and the “Political Anatomy of Ireland” are the most important.

PETTY, **WILLIAM**, first marquis of **LANS-DOWNE**, was a descendant of the preceding, and born in 1737. He succeeded his father as earl of Shelburne in 1761, and in 1763 was placed at the head of the Board of Trade, which he soon quitted to join Lord Chatham, with whom he came into power, in 1766; but on the change of ministry, in 1768, he became a zealous oppositionist, and so continued till 1782, when he was appointed secretary of state for the foreign department. When the marquis of Rockingham died, his lordship became the head of the ministry, but was forced to yield to the coalition of Lord North and Mr Fox, after which he was created marquis of Lansdowne. He died in 1805.

PEYRE, **ANTOINE FRANÇOIS**, a French painter and architect, born in 1739. He became a pensionary student at Rome in 1763, and executed some very beautiful designs. After his return he was ando comptroller of the royal buildings at Fontainebleau, and then at St Germain. During the Reign of

Terror he was imprisoned; but being liber-ated on the death of Robespierre, he was admitted a member of the Institute, of the council of civil architecture, &c. Died, 1823.

PEYRERE, **ISAAC DE LA**, was born in 1592, at Bordeaux; was for many years in the service of the prince of Condé, and obtained considerable notoriety by a work entitled “*Præadamitæ*,” which he wrote to support a favourite theory he entertained respecting the existence of a race of men before Adam. Died, 1676.

PEYRON, **JEAN FRANÇOIS PIERRE**, a French historical painter, was born at Aix, in 1744. He was a member of the Royal Academy, and director of the royal manuf-acture of the Gobelins, of which situation he was deprived by the revolution. Died, 1820.

PEYSSONNEL, **CHARLES DE**, an ingenious antiquary, was born in 1700, at Marseilles. He was secretary to the French embassy at Constantinople, and afterwards consul at Smyrna. He travelled over the greater part of Asia Minor, collecting rare coins and medals, and published the result of his observations on the topography and antiquities of the countries he visited. Died, 1757.—His son (born at Marseilles, in 1727, succeeded him as consul, and died in 1790) was an anti-queary and miscellaneous writer, and published, among other works, an “*Observation on the Ancient Inhabitants of the Banks of the Danube and the Black Sea*,” “*On the Commerce of the Euxine*,” &c.

PFEIFFER, **AUGUST**, a learned German orientalist, was born at Launburg in 1640. He professed the eastern languages at Leip-sic, and was superintendent of the churches in Lübeck, where he died in 1698. Among his works are, “*Pansophia Mosaica*,” “*Critica Sacra*,” “*Scelographia Systematica Antiquitatum Hebræorum*,” &c.

PFEIFFER, **FRANCIS LOUIS**, a Swiss general in the French service, was born at Lucerne, in 1716. After being 50 years in the army, he retired to his native country, and devoted his leisure hours to the con-struction of a model of the cantons of Un-terwalden, Schwitz, and Uri, 22 feet by 12, in which every object was laid down with the greatest precision. Died, 1802.

PFEIFFER, **INA**, one of the most enter-prising travellers of modern times, was born in Vienna in 1795. Her maiden name was Reyer. She was married in 1820, and the greatest part of her life was spent in Vienna, where she devoted herself to her domestic duties and the education of her children. On the death of her husband, in 1840, she was seized with an irresistible desire to visit foreign countries, and soon afterwards com-menced that career of travel which ended only with her life. Besides visiting all the countries of Europe and great part of Asia, in 1846, she made her first voyage round the globe, returning in 1848; and again in 1851 she sailed from London, penetrated Borneo, visited Java and Sumatra, and found her way back to England by California, South America, and the United States, in 1854. Her last expedition was directed towards Madagascar, in 1856. With the exception of her last adventurous trip, she published

an account of all her travels; and her two "Voyages Round the Globe" were translated into English, and met with great success. Died, 1858.

PHÆDON, a Greek philosopher of Elis, who flourished about 400 B. C., was originally a slave, but obtained his freedom by the interest of Socrates, whose disciple he became, and remained with him till his death. After this he settled at his native place, where he founded a school of philosophy.

PHÆDRUS, an elegant Latin poet, was a native of Thrace, and appears to have been the freed-man of Augustus. Under Tiberius he was persecuted by Sejanus; to which circumstance he has alluded in his fables, which are written with great purity of style.

PHALARIS, the tyrant of Agrigentum, in Sicily. His life involved in great obscurity, and little can be positively asserted respecting him. Born at Crete, or at Agrigentum, he is said to have made himself master of the city about B. C. 570, and to have ruled it for 16 years. His name is chiefly remembered in connection with the tradition of his savage cruelty, and of the brazen bull constructed for him by Perillus, in which he burnt his victims. A warm controversy took place in the last century respecting the epistles attributed to Phalaris, Boyle maintaining their genuineness, and Bentley successfully disproving it. Phalaris perished by a just retribution at the hands of his subjects.

PHÉLIPPEAUX, A. LE PICARD DE, a French officer of artillery, the fellow-pupil and rival of Buonaparte, was born in 1768. Having quitted France in 1791, he made a campaign the following year with the corps of emigrants under the French princes. In 1793 he re-entered France to organize a royalist insurrection in the central provinces when he took Sancerre, and for some time maintained his position in Berri. He afterwards went to Paris, where he effected the liberation of Sir Sidney Smith from the prison of the Temple, and, accompanying him to England, obtained the rank of colonel in the English service. He assisted Sir Sidney in the defence of Acre against Buonaparte; but died of fatigue shortly after the raising of the siege, in May, 1799.

PHÉRECRATES, a Greek comic poet, the contemporary of Plato and Aristophanes, some fragments of whose plays only have been preserved.

PHIDIAS, the great Greek sculptor, was born at Athens, probably between 490—450 B. C. Little is certainly ascertained about the circumstances of his life. He began to distinguish himself about 464, and was employed in public works at Athens under the administration of Cimón. He was one of the most intimate friends of Pericles, under whose rule he was appointed director of all the great temples and monuments which were to be erected in the city. Of these the most important were the *Parthenon*, or temple of Athens, on the Acropolis, and the *Propylæa*. He executed a colossal statue of the goddess for the interior of the temple with his own hand. The well-known "Elgin Marbles" of the British Museum were

the sculptured decorations of that unrivalled temple. Phidias spent some years at Olympia, and there he executed the most magnificent of all his works—the statue of the Olympian Zeus. Like the Athena, it was of ivory and gold, was nearly 60 feet in height, although a seated figure, and was deemed the greatest production of Greek art. It was destroyed by fire at Constantinople, Theodosius. Phidias was charged with peculation, and when the charge broke down, he was accused of impley on the ground of having introduced portraits of himself and Pericles on the shield of Athena. According to the generally received account he was thrown into prison, and died there, B. C. 432. This attack was made on him as the friend of Pericles, whom his enemies sought to wound indirectly.

PHILIDOR, ANDREW, a musician of some reputation, and celebrated as the best chess-player of his age, was born at Dreux, in France, in 1726; became a page in the king's band, and, before his 12th year, made much proficiency in music. As he grew up his passion for the game of chess increased into a passion, in order to indulge which he travelled over great part of Europe, engaging every where with the best players. He continued in England some time, during which he printed his "Analysis of Chess." He was a member of the chess club 30 years, and of his skill a stronger proof could not be given than his defeating blindfold two of the best players a short time before his death, in 1795. His real name was Danican.

PHILIP II., king of Macedonia, father of Alexander the Great, was son of Amyntas II., and was born B. C. 382. He was brought up at Thebes, and educated by Epameinondas, and began to reign after the death of his brother Perdiccas III. in 359. With great ability, energy, and success he first secured the internal peace and order of his kingdom, improved the discipline of the army, and created the famous *phalanx*, which contributed to so many Macedonian victories. He cherished vast schemes of conquest; aspired first to make himself master of all the states of Greece, and then to invade and conquer Persia. The siege and capture of Amphipolis, Pydna, and Potidaea took place between 358—356. Four years later, after taking Methone, and subduing Lycophron, tyrant of Phœria, he advanced towards Greece, but his course was stayed at Thermopylae by the Athenians. The same year Demosthenes delivered the first of his famous orations (*Philippic*) against the Macedonian conqueror. Philip took Olynthus in 347, after a war of three years; soon after made peace with the Athenians, conquered Phœcia, and closed the Sacred War, and was admitted into the Amphictyonic Council. In 340 he besieged Perinthus and Byzantium, but the Athenians, roused by the successive appeals of their great orator, and alarmed by facts, sent an expedition under Phocion, and Philip had to raise the sieges in the following year. But the crisis of Greek independence was at hand; the victory of Charonea, over the allied Athenians and Thebans, 338, made Philip master of

 at Corinth, and was named general of the
 confederate Greeks in the war to be under-
 taken against Persia. But in 336 he was
 assassinated at Egæ, and that war was re-
 served for his son.

PHILIP V., king of Macedonia, son of
 Demetrius II., and grandson of Antigonus
 Gonatas, was born B. C. 237, and came to
 the throne on the death of his uncle, Anti-
 gonus Dosis, B. C. 220. He distinguished
 himself as an able commander in the Social
 War, in which he aided the Achæans against
 the Ætolians, profiting by the counsels of
 Aratus; whom, however, he afterwards
 caused to be poisoned. Philip allied himself
 with Hannibal against the Romans; and
 with them in 205, and this attack was made on
 end of Pericles, whom his ene-
 y wound indirectly.

PHILIP I., King of France, was born in
 1053, and succeeded his father, Henry I., in
 1060, under the regency, first, of his mother,
 and then of Baldwin, count of Flanders; on
 whose death, in 1067, he assumed the govern-
 ment. He engaged in war with Robert the
 Frisian, count of Holland, and was defeated
 by him near Montessell in 1071. Four years
 later he defeated William I. of England, and
 compelled him to raise the siege of Dôle. He
 afterwards took part with Rocoert, duke of
 Normandy, against William Rufus, but was
 bribed to abandon him. Philip was twice
 excommunicated by Pope Urban II. for put-
 ting away his wife, and marrying Bertrade,
 wife of the count of Anjou. He was restored
 to the communion of the church by Paschal
 II. on a promise which he did not keep.
 Philip was naturally indolent, indulged in
 all sensual excesses, and had little influence
 on the affairs of his time. Died at Meium,
 1108.

PHILIP II., usually called PHILIP AUGUS-
 TUS, son of Louis VII., was born in 1165, and
 succeeded his father in 1180, under a regency,
 having been crowned in his father's lifetime.
 He suppressed a general revolt of his prin-
 cipal vassals, persecuted and expelled the Jews
 from France, and engaged in war with Henry
 II. of England. In 1190, he set out with
 Richard Cœur de Lion on the crusade, but
 after the siege of Acre he returned to France.
 He invaded Normandy while Richard was a

prisoner in Germany, and carried on the war
 with him till 1195; supported for a short time
 the claim of Prince Arthur to the English
 throne; conquered Normandy, and most of
 the English dominions in France; at the in-
 stigation of Cardinal Pandulf prepared to
 invade England, but was forbidden to do so
 on John's submission to the pope; and in
 1214 gained a great victory over the emperor
 Otto IV. and the Flemings. Philip sent his
 son Louis in 1216 to England, to assist the
 barons in revolt against King John, but after
 John's death Louis was compelled to return.
 Philip died at Mantes in 1223, the forty-third
 year of his reign. He married for a second
 wife the Princess Ingeburga of Denmark,
 and having put her away, married Agnes of
 Méranie. [INGEBURGA, AGNES OF MÉ-
 RANIE.]

PHILIP III., THE BOLD, king of France,
 eldest son of St Louis, was born in 1245, and
 was proclaimed king in the camp before
 Tunis on the death of his father there in
 1270. He was crowned at Rheims on his re-
 turn the following year, and made Pierre
 de la Brosse, his barber, grand chamberlain
 of France, who however lost his influence
 and his life in consequence of bringing an
 accusation against the queen. In 1279 Philip
 acquired the whole of Normandy by cession
 from Edward I. of England. In 1285 he
 made war on Peter III. of Aragon, who had
 just instigated the Sicilian Vespers; but his
 fleet was defeated by Roger di Loria, and
 after a few months he repassed the Pyrenees,
 and died at Perpignan the same year. His
 first wife was Isabella of Aragon, who died
 at Cosenza on the return from Tunis. His
 second, Mary of Brabant, survived him.

PHILIP IV., THE FAIR, king of France,
 son of Philip III. and Isabella, was born at
 Fontainebleau in 1268. He married, in 1284,
 Joanna, queen of Navarre, and succeeded
 his father the next year. In consequence of
 hostilities breaking out between the English
 and French seamen, Philip cited Edward I.
 to Paris to answer for his subjects; Edward
 sent his brother Edmund; but Philip seized
 all the English dominions in France, and
 again cited Edward; on whose non-appear-
 ance Philip declared him contumacious, and
 deprived him of all his fiefs. Edward de-
 clared war, and was supported by the Em-
 peror Adolphus and Guy, count of Flanders.
 The war was continued till 1294, when a truce
 was concluded for a short time. Philip soon
 after overran Flanders, but the Flemings
 revolted, and in 1302 totally defeated the
 French at Courtrai. Meanwhile the famous
 quarrel between Philip and Pope Boniface
 VIII. had begun; a violent bull had been
 published by the pope, and burnt by the
 king; who demanded a council, and was a
 second time excommunicated; and the pope
 was in 1303 arrested by order of Philip at
 Anagni. [BONIFACE VIII.; NOGARET,
 WILLIAM OF.] In 1307 Philip commenced
 proceedings against the Knights Templars,
 which resulted in the suppression of the
 order, the execution of the grand master
 and the principal knights, and the seizure
 of their possessions by the king. [MOLAI,
 JACQUES DE.] It was in this reign that the
 "tiers état" first sent deputies to the Na-

tional Assembly, since called States-general. Philip was greedy of money, prodigal in expenditure, and unscrupulous as to the means of satisfying his wants. He depreciated the coinage, and several times persecuted the Jews and the Lombard merchants with great cruelty. Died at Fontainebleau, 1314. His daughter Isabella became queen of Edward II. of England in 1308.

PHILIP V., THE TALL, king of France, second son of Philip IV., was born in 1294, and on the death of his brother, Louis X., in 1316, after being regent for a few months, succeeded to the throne, to the exclusion of Jeanne, daughter of Louis. The Salic law was on this occasion recognized, and became part of the constitutional law of France. During this reign the persecution of the Albigenes was carried on; shameful cruelties were also perpetrated on the Jews and on lepers. Died, near Paris, 1322.

PHILIP VI., or PHILIP DE VALOIS, the first king of France of the collateral branch of Valois, was the son of Charles, count of Valois, brother of Philip the Fair. On the death of Charles the Fair he was named regent, and on failure of male issue of Charles, became king, 1328, to the exclusion of Edward III. of England, who claimed the throne through his mother, daughter of Philip IV. Philip the same year invaded Flanders, and defeated the Flemings at Montessell. In 1329, Edward did homage for the duchy of Guienne, but not long after he assumed the title of king of France. This produced a disastrous war, which lasted, with a few intervals, for many years. In 1346, Edward gained the great battle of Crecy, in which the French lost near 30,000 men, and the flower of the nobility. This was followed by the loss of Calais and other important places. Edward sent a challenge to Philip to decide their pretensions by single combat, which the latter refused. Philip died in 1350.

PHILIP OF ORLEANS. [ORLEANS.]

PHILIP II., king of Spain, son of the Emperor Charles V. and Elizabeth of Portugal, was born at Valladolid in 1527. Of a cold and gloomy nature, he was educated by ecclesiastics, who did their best to make him both a bigot and a despot, and his reign an inexorable crusade against political and religious freedom. He married in 1543 his cousin Mary, of Portugal, who became the mother of Don Carlos, and died in 1545. [CARLOS, DON.] In 1554 he received from his father the kingdom of Naples, and the same year, after troublesome negotiations, married Mary, queen of England. He was disliked in England, and soon quitted it. His father gave up to him the Netherlands in October, 1555, and the kingdom of Spain early in the following year. He declared war on France, and induced Queen Mary to join him; won, by his troops under the duke of Savoy, the memorable victory of St Quentin over the French in 1557, and was present in person at the capture of the town, which followed. He vowed never to witness another battle, and he never did, he vowed also to show his gratitude for his success by building a monastery, which he more than fulfilled in the magnificent "Escorial." A

second victory over the French at Gravelines, in 1558, was followed by the peace of Cateau-Cambresis. Immediately on his return to Spain he began a terrible persecution of "heretics," and achieved the fatal success of crushing the Reformation in Spain in the auto-da fé, at which forty persons perished at the stake. The most momentous event of his reign was the revolt of the Netherlands, first excited by his edict against heretics, and his attempt to establish the Inquisition there in 1565; and resulting, after long years of war and desolation, in the establishment of the Dutch Republic. During this conflict the successive governors of the Netherlands under Philip were his sister Margaret, duchess of Farnin, the duke of Alva, Don Luis de Requesens, Don Juan of Austria, and Alexander Farnese, duke of Parma. [See ALVA, REQUESENS, FARNESE, CHRISTIAN MOORS OF GBRUADA, and provoked a revolt, which began in 1569, and after the greatest atrocities on both sides, ended by the flight or submission of the Moors in 1571. On the death of Henry, king of Portugal, in 1580, Philip conquered that country, and annexed it to Spain. He made immense preparations for an invasion of England, and in 1588, the year after Drake's attack on Cadiz, his great fleet, which he named with blundering arrogance "the Invincible Armada," sailed from Lisbon; but a great storm and contrary winds damaged and threw it into disorder, and though it arrived in the channel, its consecrated banner and the blessing of the pope could not save it from the English fire-ships and defeat. Philip carried on intrigues in France against Henry III. and Henry IV., but his aim was defeated by the conversion of the latter to the Romish faith. He is believed also to have employed agents to attempt the assassination of Queen Elizabeth. Philip died at the Escorial after severe sufferings, the fruit of his debaucheries, September 13, 1598. He had lived to see the failure of his designs on the Netherlands, on France, and on England. It was Philip II. who removed the seat of government from Toledo, and made Madrid the capital of Spain. A history of his reign was one of the latest works of Mr Prescott.

PHILIP III., king of Spain, son of Philip II. and his fourth wife, Anne Mary of Austria, was born in 1578. He succeeded his father in 1598, and the following year married the Princess Margaret of Austria, by whom he had seven children. He continued the war in the Netherlands, and his general, Spinola, took Ostend in 1604, after a siege of three years. But these successes were too costly, and Philip was compelled to recognize the independence of the United Provinces, and to make a truce with them in 1609. The king was indolent, and took little part in the government, and his favourite and prime minister, the duke of Lerma, had little capacity for his task. One of the most memorable, and for Spain most disastrous, of his measures was the expulsion of the Moors; industrious farmers and traders most of them. Whole provinces were de-

ory over the French nt Grave

Whole provinces were de-

populated. Died, 1621. Cervantes flourish-
ed during the reign of Philip III.

PHILIP IV., king of Spain, son of Philip
III. and Margaret, was born at Valladolid
in 1695, married Elizabeth, daughter of
Henry IV. of France, and succeeded his
father in 1621. He chose for his first minis-
ter the count of Olivarez, whose ambitious
policy and despotic administration brought
so many calamities on the kingdom. War
was renewed with the Dutch, and only
ended at the peace of Westphalia; war with
France began in 1635 and lasted till 1659,
when the peace of the Pyrenees was con-
cluded, and the Infanta Maria Theresa was
married to Louis XIV.; and a formidable
revolt broke out in Catalonia, which was
finally reduced by Don Juan in 1652. It was
in the third year of this reign that the
strange visit of Prince Charles of England
with the duke of Buckingham to Madrid
took place, for the purpose of wooing the
Infanta. Portugal threw off the yoke of
Spain in 1640, and war followed, which was
terminated by the victory of the Portuguese
at Villavieiosa in June, 1665. This last
of the long series of losses and calamities broke
Philip's heart, and he died in September of
the same year. His queen, Elizabeth, died
in 1644, and five years after he married the
Princess Mary Anne, daughter of the Em-
peror Ferdinand III., who long survived
him. It is said that Philip was only seen to
smile three times in his whole life. The
great painter Velazquez was court-painter
to Philip IV.

PHILIP V., duke of Anjou, the second
son of Louis, dauphin of France, and of
Mary Anne of Bavaria, assumed the title of
king of Spain in 1700, by virtue of the will
of Charles II. His claim, however, was con-
tested by the house of Austria, in favour of
the Archduke Charles. This produced the
great war of the Spanish Succession, in
which Austria was supported against France
and Spain by England, Holland, Savoy,
Portugal, and Prussia. The beginning of
this war was very disastrous to Philip, who
lost Aragon, Gibraltar, and the Islands of
Minorca and Majorca, also Sardinia and the
kingdom of Naples. The victories of the
duke de Vendôme, and those of Marshal Vil-
ars in Flanders, confirmed Philip on the
throne, and restored peace to Europe by the
treaty of Utrecht, in 1713. Died, 1746.

PHILIP, THE MAGNANIMOUS, landgrave
of Hesse, born in 1501, succeeded his father,
William II., in 1509, under the regency of
his mother till 1518. He was a man of sin-
gular ability, courage, and energy, and the
most illustrious among the German princes
who supported the Reformation. He visited
Luther at the diet of Worms, and became
afterwards the friend of Melancthon, through
whose influence he heartily embraced the
doctrines of Luther, in opposition to the
wishes of his mother and the efforts of his
father-in-law, Duke George of Saxony. He
contributed to the defeat of the Anabaptist
Münzer, and to the suppression of the in-
surrection of the peasants; demanded, with
the elector of Saxony, liberty of religious
worship at the diet of Spire; endeavoured
to mediate between Luther and Zwingli at

the conference of Marburg; signed the Con-
fession of Augsburg; and was one of the
principal members of the famous League of
Smalkald. In 1534 he took up arms in be-
half of Ulrich, duke of Würtemberg, who
had been dispossessed by Charles V., and by
a victory over the imperial troops at Lauffen
effected his restoration. Having commenced
war on the empire, in 1546, he was put under
the ban, and the Protestant princes being
defeated at Mühlberg in the following year,
he made his submission to Charles, who kept
him prisoner till 1552. Philip married in
1523 a daughter of Duke George, who bore
him several children; but their married life
becoming unhappy, Philip, with the formal
sanction of the leading reformers, took in
1540 another wife, the first still living.
Philip was a zealous friend to science and
literature, and founded the university of
Marburg.

PHILIP, THE GOOD, duke of Burgundy,
one of the most powerful sovereigns of his
time, was son of John "Sans-Peur," and
was born at Dijon in 1396. He succeeded
on the assassination of the duke, his father,
1419, and at once formed an alliance with
Henry V. of England, and joined in the
treaty of Troyes, which declared Henry re-
gent and heir of France. He fought on the
English side for several years, and gave his
sister Anne in marriage to the Duke of Bed-
ford. But jealousy and dissension arose,
and Philip abandoned the English alliance,
and his reconciliation with Charles VII. of
France was effected at the great congress of
Arras, 1435, attended by legates of the pope
and the council of Basel, and ambassadors
from almost all the states of Christendom.
He had married, in 1430, for his third wife,
Isabella of Portugal, in whose honour he
instituted the order of the Golden Fleece,
long the highest in Christendom. Philip ex-
tended his dominions by the conquest of
Brabant, Holland, and Hainaut, but revolts
broke out in several of the great towns,
which were only suppressed by the most
severe measures. The town of Dinant espe-
cially was besieged, stormed, burnt to ashes,
and all its inhabitants massacred, Philip
being present to see this act of vengeance.
He died at Bruges, June 15, 1467, and was
succeeded by his son, Charles the Bold.

PHILLIPS, AMTRUSE, poet and dramatist,
was a native of Leicestershire. He received
his education at St John's College, Cam-
bridge; and, on coming to London, asso-
ciated with Steele, Addison, and the literary
wits of the day. He was author of the
tragedies of the "Distrest Mother," "The
Briton," and "Humphrey, Duke of Gloucester,"
and some pastoral poems; and was also
a contributor to a periodical paper called the
Free-thinker, through his connection with
which he was made registrar of the Irish
prerogative court. Died, 1719.

PHILLIPS, JOHN, poet, was born at Bamp-
ton, in Oxfordshire, in 1676; was educated
at Winchester School, and Christchurch,
Oxford; and was author of "The Splen-
did Shilling," a mock-heroic composition;
"Heinheim," a poem in honour of Marl-
borough's victory; and "Cyder," his prin-
cipal poem, in which, as in all his works, he

imitates the verse of Milton's Paradise Lost. Died, 1708.

PHILLIPS, EDWARD, one of the nephews of Milton, was born in London, in 1630, and was educated by his celebrated uncle. He was the author and compiler of several works; but that by which he is best known is the "Theatrum Pictarum, or a complete Collection of the Poets."

PHILLIPS, RICHARD, F.R.S., an eminent chemist, was born in 1776. He first attracted the attention of the scientific world by the publication, in 1805, of "Analyses of the Bath Waters;" and this was followed by analyses of our mineral waters generally, and of minerals of a rare kind; these were published in the "Annals of Philosophy." In 1817 he was appointed lecturer on chemistry at the London Hospital; and he was appointed to deliver several courses of lectures at the London Institution. About this period he was also appointed by the government professor of chemistry at the Military College, Sandhurst; and lecturer on chemistry at Granger's School of Medicine, in Southwark. In 1821 Mr Phillips became sole editor of the "Annals of Philosophy;" in 1822, he was elected a Fellow of the Royal Society, and published a paper in the "Transactions," in which his name was honourably associated with that of Mr Faraday, and he always felt much pride in having been the first to introduce that distinguished philosopher to the Society. In 1824 Mr Phillips published his first translation of the "Pharmacopœia Londinensis;" and from the celebrity which he gained as a pharmaceutical chemist, he was consulted by the College of Physicians with respect to the chemical preparations of the work issued by that body in 1836. In 1839 Mr Phillips was appointed chemist and curator of the Museum of Practical Geology, then in Craig's Court, which office he held at the time of his death. Scattered through the "Transactions of the Royal Society" and the pages of the "Philosophical Magazine" will be found his numerous contributions to science; and all the chemical articles of the "Penny Cyclopædia" are from his pen. He was one of the original founders of the Geological Society, for many years a member of the council of the Royal Society, and for the last two years of his life president of the Chemical Society. Died, 1851.

PHILLIPS, THOMAS, R.A., a portrait painter of considerable merit, was born at Dudley, in Warwickshire, in 1770. Having had some practice in the country, he came to London when he was about 20, and found employment at Windsor, under Benjamin West, who was at that time engaged in decorating St George's Chapel. He had for many years to contend with the superior talents of West, Lawrence, Hoppner, &c.; but by unceasing application, he gained so much celebrity, as to number among his sitters some of the most eminent men in the kingdom. He wrote occasional essays on the fine arts; and, in co-operation with Turner, Chantrey, Robertson, and others, he planned and successfully matured the Artists' General Benevolent Institution. He died, April 20, 1845, aged 74.

PHILLIPS, WILLIAM, an eminent geologist and mineralogist, born at London in 1773. He early applied himself to science, and assisted in establishing the Askesian Society. By his ingenious observations and his writings he contributed to the progress and extended cultivation of geology and mineralogy, and became a fellow of the Geological, and later of the Royal, Society. He published an "Elementary Introduction to the Knowledge of Mineralogy," which passed through several editions, and was especially rich in crystallographic facts; "Outlines of Mineralogy and Geology," and, in conjunction with Conybeare, "Outlines of the Geology of England and Wales," which gave a powerful impulse to geological studies. Phillips communicated many valuable papers to the Geological Society. Died, at Tottenham, 1828.

PHILO JUDÆUS, a learned Jewish writer of Alexandria, who was one of the deputations sent by the Jews to lay their complaints against the Greeks of Alexandria before the Emperor Caligula, A. D. 40. He wrote many works in Greek, the principal of which treat of the Holy Scriptures, philosophy, and morals. Philo was well versed in the philosophy of Plato, and strove to show its harmony with the books of Moses. A fine edition of his works, in 2 vols. folio, was published under the editorship of Mangey in 1742.

PHILOLAUS, of Crotona, a celebrated Pythagorean philosopher, who probably flourished about B. C. 370. He was probably the first who published in writing the doctrines of Pythagoras, and he became celebrated for his system of astronomy.

PHILOPOMEN, eight times general of the Achaean League, "last of the Greeks," was a native of Megalopolis, and was born B. C. 252. He early chose the career of arms, and took for his model Epaminondas, whose memory was sacred to the citizens of Megalopolis. He was thirty years of age when his native city was taken by Cleomenes, and in the next year he contributed to the defeat of Cleomenes at Sellasia. After serving for some years in the civil wars of Crete, he was appointed, in 210, commander of the Achaean cavalry, the efficiency of which he increased by important reforms. Two years later he was chosen general of the League, and at once applied himself successfully to the introduction of more extensive reforms in the army. The same year he defeated the Spartans at Mantinea, and killed their leader Machanidas, obtaining for Greece peace for several years, and for himself the highest renown as protector of Grecian liberty. He subsequently recovered Messene from Nabis, tyrant of Sparta; defeated Nabis himself near Gythium, and again served for some years in Crete. After his return he was again head of the League, again defeated Nabis, and in 188 made himself master of Sparta, when he had its walls razed, exiled the citizens hostile to him, and abolished the laws and discipline of Lycurgus. While Philopomen was lying sick of a fever at Argos, in 153, Messene revolted and declared her independence of the League. He instantly set out for Mega-

S, WILLIAM, an eminent geologist, born at London in 1794, early applied himself to science, in establishing the Askesian Society, his laborious observations and his contributions to the progress of cultivation of geology and became a fellow of the Royal Society, and later of the Geological Society. He published an "Elementary Introduction to the Knowledge of Mineralogy," which has passed through several editions, and was enriched with crystallographic facts; "Mineralogy and Geology," and "An Introduction to the Study of Geology with Conybeare," "Outlines of the Geology of England and Wales," a powerful impulse to geology. Phillips communicated his papers to the Geological Society, at Tottenham, 1828.

D.EUS, a learned Jewish writer, who was one of the deputies of the Jews to lay their complaints before the Emperor of Alexandria, before the Emperor of Caligula, A. D. 40. He wrote in Greek, the principal of which are the Holy Scriptures, philosophy, and history. Philo was well versed in the works of Plato, and strove to show its agreement with the books of Moses. A fine edition of his works, in 2 vols. folio, was published under the editorship of Mangey in 1743.

PHILO, of Crotona, a celebrated philosopher, who probably lived about B. C. 370. He was probably the first published in writing the doctrines of Pythagoras, and he became celebrated for his system of astronomy.

PHILO, eight times general of the Athenians, "last of the Greeks," of Megalopolis, and was honorably chosen the career of arms, his model Epaminondas, whose death was sacred to the citizens of Megalopolis, was thirty years of age when he was taken by Cleomenes, and he contributed to the defeat of Cleomenes at Sellasia. After serving for many years in the civil wars of Crete, he died, in 210, commander of the army, the efficiency of which he effected important reforms. Two years after he was chosen general of the League, he applied himself successfully to the reduction of more extensive reforms.

The same year he defeated the Spartans at Mantinea, and killed their king, Cleonidas, obtaining for Greece a truce of several years, and for himself the title of protector of Grecian liberties. He subsequently recovered Messene from the tyrant of Sparta; defeated the Spartans near Gythium, and again recovered the city of Crete. After his death he was again head of the League, and in 188 made himself independent of Sparta, when he had its walls demolished, and the citizens hostile to him. He established the laws and discipline of the Milesian Philopomen was lying in wait at Argos, in 183, Messene declared her independence of the Spartans, and instantly set out for Mega-

polis, collected a small force, and marched to suppress the revolt; but was taken prisoner, thrown into a narrow dungeon at Messene, and compelled to take poison. His death, profoundly mourned by the Athenians, was avenged by the invasion of Messina, and the deaths of those who had condemned him. His remains were carried in solemn procession to Megalopolis, and there interred with heroic honours. The urn containing them was borne by Polybius the historian.

PHILOSTRATUS, FLAVIUS, a Greek rhetorician, born in the island of Lemnos, perhaps about A. D. 180. He taught at Athens and at Rome, and is chiefly remembered as the author of the marvellous Life of Apollonius of Tyana, which he wrote at the command of the Empress Julia Domna, and of the Lives of the Sophists. He was living in 239.

PHOCAS, emperor of the East, was at first a centurion in the army of the Emperor Maurice. In 602 he took advantage of the grievances and discontent of the soldiers to get himself elected emperor; a revolt at Constantinople followed, and Maurice and his five sons were murdered at Chaleedon, whither they had fled. Phocas was of low origin, and of equally low nature; ignorant, cowardly, and cruel, with no ambition as sovereign, but to indulge the more freely in lust and drunkenness. The Empress Constantina, accused of conspiracy, was tortured, and with her three daughters beheaded at Chaleedon; and numberless meaner victims perished without trial, and amidst refinements of cruelty and torture. Yet Phocas was acknowledged both in the East and West, and his image with that of his wife Leontia were set up in the Lateran by Pope Gregory, who stooped basely to flatter him. Chosroes, king of Persia, declared war on him and conquered several provinces of the empire, and at length the tyrant was overthrown and the empire delivered by Heraclius, son of the eunuch of Africa, who led an expedition to Constantinople in 610. Phocas was seized, put in chains, tortured, and beheaded, and his body burnt. He is described as small and deformed, with red hair, close shaggy eyebrows, and cheek disfigured by a great scar.

PHOCION, a celebrated Athenian general and statesman, was born about B. C. 400. He was a disciple of Plato and Xenocrates, served under Chabrias at the naval battle of Saxos, and became subsequently head of the peace party at Athens, steadily opposing Demosthenes and all bold patriots who were ready to fight for the independence of their country against the Macedonian invaders. He was a brave and successful soldier, and was 45 times appointed general; his private character was above suspicion, and that alone saves him from the infamy which his political course deserved. He was twice sent on embassies to Alexander the Great, and acquired his friendship. He is said to have advised that Demosthenes and other leading men should be given up to the Macedonians. When Athens was occupied by Polysperchon, Phocion fell one of the first victims to the enemies of his country whom he had aided. He was tried and sentenced to death, and met his end with philosophic

composure, B. C. 317. His bones were publicly interred at Athens, and a statue erected to him.

PHORMION, Athenian general, who succeeded Callias, B. C. 432, and completed the investment of Potidaea. He ravaged Chalcidice, and took several of the smaller towns. In 430 he assisted the Argives to recover their city, from which they had been driven by the Ambracian settlers. But his most celebrated exploits were two naval victories with greatly inferior forces over the Spartans in the Corinthian Gulf, B. C. 429. After securing Athenian interests in Acarnania, he returned with his prisoners and prizes to Athens.

PHOTIUS, patriarch of Constantinople in the 9th century, was a native of that city. He rose to the highest offices of the state before he entered into orders, which took place on the deposition of Ignatius in 857. Photius was deprived in his turn by Basilus in 867, but after living in exile 11 years, he forcibly regained his seat, which he kept till 886, and was then deprived by the Emperor Leo, who sent him into Armenia, where he died. His "Bibliotheca" contains the substance of near 300 ancient authors. He had great talents, but was fond of intriguing, and it was principally through his conduct that the separation of the eastern and western churches took place.

PHRYNICHUS, a Greek tragic poet, flourished at Athens, B. C. 511—476. He was a disciple of Thespis, and made important improvements in the character of the drama, introducing graver subjects, serious music, and female parts. The invention of the dialogue, however, was reserved for Aeschylus, with whom Phrynichus was for many years contemporary. The works of this poet are not extant.

PIAZETTA, GIOVANNI BATTISTA, a celebrated painter of Venice, was born in 1682, and died in 1754. He formed his style chiefly on that of Guercino, producing powerful effects by the contrast of light and shade.

PIAZZI, GIUSEPPE, a celebrated Italian astronomer, was born in 1746, at Ponte, in the Valtellina; entered into the order of the Theatines; and, after having been a professor at Genoa, Malta, Ravenna, and Palermo, was in 1787 made director of the observatory founded in the latter city. About this time he visited Paris and London, and entered into a correspondence with the most celebrated European astronomers. In 1801 he discovered a new planet, which he named Ceres Ferdinandea, the first-known of the now numerous asteroids, and in 1805 he made a new catalogue of 7616 fixed stars. This distinguished astronomer produced various treatises and memoirs of great importance to the science, and was a member of many learned institutions. He was chosen F. R. S., London, in 1804. Died, 1826.

PICARD, JEAN, French mathematician and astronomer, born at La Flèche in 1629. He observed the solar eclipse of August, 1615, in conjunction with Gassendi, and succeeded him ten years later in the chair of astronomy at the College of France. He measured an arc of the meridian of Paris; was the first to apply the telescope to the measure-

ment of angles, and to use the pendulum in astronomical observations; visited Uranenborg to ascertain the exact position of the observatory of Tycho Brahe, and planned the observatory of Paris. He had the mortification to see Cassini appointed director of it, and his own proposals slighted. Besides memoirs contributed to the Academy of Sciences, of which he was one of the first members, he wrote—"La Mesure de la Terre," and "Voyage de l'Uranenborg," and originated the periodical work entitled, "La Connaissance des Temps." His observations were published by Lemoine in 1741, under the title of "Histoire Céleste." Picard died at Paris about 1682.

PICART, REUNARD, an eminent engraver, was born at Paris in 1661, and died in 1733.

PICCINI, Nicolo, a celebrated musician, was born at Bari, in the kingdom of Naples. Having obtained great reputation at Naples, he was called to Rome about 1760, and spent 15 years there. During this period he produced his celebrated operas "La Ciccilina," and "Olimpiade." After a short stay at Naples, he went, in 1776, to Paris. Gluck was then in the zenith of his reputation, and a spirited contest was maintained between Piccini and him, and all Paris was for a time interested in it. At the revolution Piccini returned to Naples, where he was suspected of being a Jacobin; on which he went again to France, and died at Passy, in 1800, aged 72. Piccini was a most industrious and original composer; more than 300 operas, besides numerous oratorios, cantatas, &c., having been produced by him.

PICCOLOMINI, ORTAVIO, a distinguished Italian general in the service of Austria during the Thirty Years' War, was born in 1599. After serving in the Spanish army in Italy he entered the service of Ferdinand II.; took part in the battle of Lützen, contributed to the victory of Nordlingen, overran Suabia and Franconia, compelled the French to raise the siege of Thionville, and saved Austria from the threatened Swedish invasion. He was defeated by Torstenson at the battle of Leipzig (or Breitenfeld) in 1642, and in the following year entered the service of the king of Spain, who made him a knight of the Golden Fleece, grandee, and general-in-chief of the Spanish forces in the Netherlands. His career as general terminated with the Peace of Westphalia in 1648. He was created Prince of the Empire, and died at Vienna in 1656.

PICCOLOMINI, AENEAS SYLVIUS. [PIUS II.]

PICHEGRU, CHARLES, a celebrated general of the French republic, was born, 1761, of poor parents, at Arbois, in Franche-Comté; was educated in a monastery, and afterwards studied at the college of Brénne, where he distinguished himself by his progress in mathematical science. At an early age he enlisted as a soldier, and went to America. After his return, he was made serjeant-major; and soon after the commencement of the revolution, he attained the rank of general of division. In 1794 he took the command of the army of the North, where he was embarrassed by many difficulties arising from the flight of Generals Dumouriez and Lafay-

ette. He, however, restored order and discipline; and undertook the conquest of Holland, the most brilliant of all his exploits. The Convention now conferred on him the chief command of the army of the Rhine and the Moselle; but he retained at the same time the command of the army of the North, under Morvan, and of the army of the Meuse, under Jourdan. In April, 1795, he was called, to take command of the capital, where the Terrorists were making efforts to recover their power. Having suppressed the insurrection of the Faubourgs, for which he was called in the Convention "the saviour of the country," he returned to the army of the Rhine, where, however, his career now took another turn. He entered into negotiations with the prince of Condé, to co-operate in the restoration of the Bourbons; but the secret was soon revealed to the government, and he was recalled. In 1796, under pretence of going as ambassador to Sweden, Pichegru declined the post, but did not perceive the storm which threatened him; and, instead of saving himself while it was still time, retired to an estate near Arbois. In March, 1797, he was chosen deputy from the department of the Jura to the council of Five Hundred. He only retained his office till the 4th of September, when a new revolution taking place, he was one of the sixty-five deputies, who, together with Carnot and Barthélemy, two of the directors, were declared by their coadjutors guilty of a royalist conspiracy, and condemned to deportation. Pichegru with others was sent to Cayenne, whence he made his escape to England; and while there he became acquainted with Georges Cadoudal, the Chouan chief, and readily entered into the plans of the emigrants to effect the overthrow of Buonaparte. Having been landed on the French coast by Captain Wright, in January, 1801, with several of the old Vendean leaders, they repaired in disguise to Paris, hoping to find a party favourable to their views; but the police (under Fouquier) discovered the plot, and both Georges and Pichegru were arrested. The latter was confined in the Temple, and a process commenced against him; but he was found one morning strangled in prison, April the 6th, 1801. In this country it was believed that his death was by direct command of Buonaparte; but there is no positive evidence.

PICHELLE CAROLINE, one of the most prolific writers that Germany has produced, was born at Vienna, 1769. Her maiden name was Greiner. Her father held a high position at the court of Vienna; and his house was long celebrated for its reunions of all that was most distinguished in that metropolis for rank, fashion, and genius. She received a first-rate education, and showed an early predilection for literary pursuits; but it was not till after she had attained her 30th year that she appeared as an authoress, her first work, called the "Gleichnisse," being published in 1799. This was followed from time to time by various other works of considerable merit; but these were all thrown into the shade by her "Agatheles," which appeared in 1808, and was written with the

however, restored order and did not undertake the conquest of Holstein most brilliant of all his exploits. Promotion now conferred on him the command of the army of the Rhine and he retained at the same time the command of the army of the North, and of the army of the Moselle, &c. In April, 1793, he was made commander of the capital, where the Prussians were making efforts to recover it. Having suppressed the insurrection of the Faubourgs, for which he was the Convention "the saviour of the city," he returned to the army of the Rhine, however, his career now took another turn. He entered into negotiations with the prince of Condé, to co-operate in the invasion of the Bourbons; but the king soon revealed to the government, and he was recalled, in 1796, under the name of an ambassador, to Sweden, which he declined the post, but did not escape the storm which threatened him; and of saving himself while it lasted, retired to an estate near Paris. In March, 1797, he was chosen to the department of the Jura for a term of five years. He only remained in office till the 4th of September, when the revolution taking place, he was elected one of the sixty-five deputies, who, together with Brissot and Barthélemy, two of the most eminent of their coadjutors, were declared by their constituents to be royalist conspirators, and sentenced to deportation. Pichegru was sent to Cayenne, whence he made his escape to England; and while there he acquainted with Georges Cadoudal, a chief, and readily entered into a conspiracy of the emigrants to effect the liberation of Buonaparte. Having been discovered on the French coast by Captain Bouchard, in January, 1804, with several of the principal leaders, they repaired in disguise, hoping to find a party favourable to their views, but the police discovered the plot, and both Pichegru and Bouchard were arrested, and confined in the Temple, and a prosecution was commenced against him; but he was afterwards strangled in prison, April 18, 1804. In this country it was believed that he was by direct command of Napoleon; but there is no positive evidence.

M. CAROLINE, one of the most distinguished characters that Germany has produced, was born at Vienna, 1769. Her maiden name was Schlegel. Her father held a high post in the court of Vienna; and his house was celebrated for its reunions of all the most distinguished in that metropolitan, fashion, and genius. She received a liberal education, and showed an early inclination for literary pursuits; but till after she had attained her 20th year she appeared as an authoress, her first work being called "Gleichnisse," being published in 1799. This was followed by various other works of merit; but these were all thrown aside by her "Agatheles," which appeared in 1808, and was written with the

view of counteracting Gibbon's attacks upon the Christian faith. Her works amount to more than 60 volumes, consisting chiefly of romances and historical romances; of which may be mentioned the "Grafen von Hohenheim," "Die Belagerung Wien's von 1683," "Die Schweden in Prag," "Die Wiedereroberung von Ofen," "Henriette von England," "Die Frauenwürde," and the "Neubühler," &c. Died, 1813.

PICKEN, ANDREW, a miscellaneous writer, was born at Paisley, in Scotland, in 1758. After some unsuccessful attempts of a commercial nature, he entered on a literary career, by publishing a volume, entitled "Tales and Sketches of the West of Scotland." This was followed by "The Secretary" and "The Dominie's Legacy;" the latter of which established his fame as the author of a Scotch humble life. He subsequently engaged in writing tales, &c., for the periodical press; and a short time previous to his death appeared his "Traditional Stories of Old Families," in 2 vols., designed as the first part of a series, which was intended to embrace the legendary history of Great Britain and Ireland. His death took place in November, 1833; and a novel, entitled "The Black Watch," which he had not completed, was afterwards published.

PICO DELLA MIRANDOLA. (MIRANDOLA.)

PICKTON, SIR THOMAS, K.C.B., &c., a brilliant British officer, born in 1758, was descended from an ancient family of Pembrokeshire, and commenced his military career as an ensign in the 12th regiment of foot in 1771. He served on the Gibraltar station till 1778, after which he was promoted to a captaincy in the 75th. In 1794 he embarked for the West Indies; and, after the reduction of St Lucia and Trinidad, in 1797, he rose to the rank of colonel, and was appointed governor of the latter island. Whilst holding that situation he was applied to by a Spanish magistrate to sign an order for inflicting the torture on a female slave, named Louisa Calderon; and on being told it was a customary practice, he signed it without inquiry. The girl, who was only 14 years of age, was accordingly taken, with a view to extort from her the discovery of a theft committed by her paragon. For this act of cruelty the governor was, in 1807, indicted, and found guilty by an English jury. As many exaggerated rumours had preceded the exodus to England, a new trial was granted, and though he was acquitted of *moral guilt*, the deed threw a shade over his career. However, in 1809 he was again employed for his country. He was at the siege of Flushing, and on its capture was appointed governor. From Flushing he returned to England an invalid, but was soon again in the field. His courage and intrepidity shone on every occasion; ever foremost in the fight, he was a victorious leader at Badajoz, at Vittoria, Ciudad Rodrigo, &c. At the close of the Peninsular War he received the thanks of the House of Commons for the seventh time, June, 1814, and was made K.C.B. At the battle of Waterloo, 18th June, 1815, General Picton commanded the 5th division

of the army, and fell there, having just repulsed one of the most serious attacks made by the enemy. A monument to his memory was voted by parliament, and erected in St Paul's cathedral. The portrait of Sir T. Picton, painted by Sir M. A. Shee, is in the National Portrait Gallery.

PICTOR, FABIVS. (FABIVS PICTOR.) PIERCE, EDWARD, an English painter in the reigns of Charles I. and II. He was eminent in history and landscape; but as his works chiefly consisted of altar-pieces and ceilings of churches, there are few of his pictures in existence, most of them having been destroyed in the fire of London.—One of his sons was an excellent sculptor, and executed the statues of Sir Thomas Gresham and Edward III., which ornamented the Royal Exchange before it was destroyed by fire, Jan. 10, 1838.

PIERMAJINI, GIUSEPPE, Italian architect, born at Foligno in 1734. He was a pupil and assistant of Vanvitelli, and about 1769 settled at Milan, where he was appointed architect to the archduke, and subsequently professor of architecture at the Academy of the Brera. He built the theatre Della Scala, and many other public buildings and private mansions and villas at Milan, and died at Foligno in 1808.

PIGALLE, JEAN BAPTISTE, an eminent sculptor, was born at Paris, in 1714. He studied in Italy, and on his return to France became sculptor to the king, chancellor of the Academy of Painting, and a knight of the order of St Michael. Died, 1785.

PIGNOTTI, LORENZO, an Italian poet and historian, was born at Figini, in Tuscany, in 1739; was educated at Arezzo and Pisa; practised as a physician at Florence; was created historiographer of the court, and became rector of the university of Pisa. His "Fables" have acquired an extensive popularity, but his great fame was acquired by his "History of Tuscany." Died, 1812.

PILES, ROGER DE, a French painter and writer on painting, was born in 1635, at Clamecy. In 1692 he was sent by the French ministry into Holland as a secret negotiator, or spy, but being discovered by the Dutch, they imprisoned him for five years, during which period he wrote his "Lives of the Painters." He was also the author of "Dialogues on the Knowledge of Painting," "A Dissertation on the Works of famous Painters," &c. Died, 1709.

PILON, GERMAINS, a celebrated French sculptor, born at Loué, near Mans. He settled at Paris about 1550, was employed by Henry II. and his queen, and died probably about 1590. Among his most admired works are—the Group of the Graces, now in the Louvre; the bronze statues of Henry II. and Catherine de' Medici, forming part of the monument to Henry at St Denis; the mausoleum of Du Bellay, &c. Pilon worked in bronze and alabaster as well as marble.

PILPAY, or BIDPAI, reputed author of a very ancient and widely circulated collection of Indian tales or fables. Nothing whatever is known of him, or of the period in which he lived. The Fables found their way into Europe probably about the 12th century, when they were translated from the Arabic

of Abdallah Ben-Mocaffa into Hebrew by Rabbi Joel, and soon after into Latin. The Arabic version was made in the 8th century from a Pehlvi version made two centuries earlier. These "Fables of Bidpai" have been translated into almost all languages, and passed through innumerable editions.

PINDAR, the great Greek lyric poet, was born at or near Thebes, in Boeotia, about B.C. 522. He was of a noble family, and to have been skilled in music, and he learnt his father's art of flute-playing. At Athens he was a pupil of Lasus of Hermione, and on his return he was assisted by the advice of his celebrated countrywomen, Myrtis and Corinna, who were also his competitors, frequently successful ones, at the public festivals. Pindar made poetry and music the business of his life, and composed choral songs for princes and states in all parts of Greece; for which, as was the custom, he received money and gifts. Yet he did not become a mere hireling, but maintained such dignified position as befitted him as poet and man, and spoke truth fearlessly to all. He did not live at courts nor take part in public affairs. Pindar excelled in all varieties of choral poetry; hymns to the gods, psalms, odes for processions, drinking songs, &c. But the only poems of his now extant are the *Epinikia*, or *Triumphal Odes*, composed in celebration of victories at the great public games—the Olympian, Pythian, Nemean, and Isthmian. The praises of the victor, of his family, and his state are intermixed with mythical narratives and sententious maxims and admonitions; and the odes, sublime, enthusiastic, and full of lofty thought and sentiment, are marked by an extraordinary variety of style and expression. No two odes have the same metre. Pindar attained the highest renown in his own age, and as lyrical poet has no rival. When Thebes was destroyed by Alexander, the conqueror bade spare the house of Pindar. Died, probably, 442.

PINDAR, PETER. [WOLCOT, JOHN]. **PINDEMONTE**, HIRPOLITO, Count, an eminent Italian poet, was born at Verona, in 1753, and distinguished himself at a very early age by his lyrical compositions. He travelled in England, France, Holland, Germany, &c., forming acquaintance with eminent men, and obtaining the esteem of all who knew him. Died, at Verona, 1828.

PINE, JOHN, an eminent engraver, was born in 1690, and died in 1756. He executed some large plates of the tapestry hangings in the House of Lords, which were so approved, that parliament passed an act to secure to him the emolument arising from them. He also engraved the text of Horace, and the Itucles and Georgics of Virgil, illustrated with gems and bas-reliefs.

PINEL, PHILIPPE, an eminent French physician, particularly distinguished for the important improvements he introduced in the treatment of patients labouring under insanity. Among his works are, "A Medico-philosophical Treatise on Mental Alienation," "Philosophical Nosography," and "Clinical Medicine." He practised with great success at Paris, where he also acquired much popularity by his lectures. Born, 1742; died, 1826.

PINELLI, BARTOLOMEO, Italian engraver, born at Rome in 1761. He executed many etchings, illustrating the history and customs of ancient and modern Italy, besides drawings in chalk and water-colours. Died at Rome, in 1835.

PINGRE, ALEXANDRE GUI, a French astronomer, was born at Paris, in 1711. He was originally an ecclesiastic; and though he began the study of astronomy at a late period, he distinguished himself by the zeal and success with which he followed it. In 1769 he made a voyage to the island of Diego Rodriguez, to observe the transit of Venus; and undertook three subsequent voyages to try the chronometers of Berthoud and Le Roy. The most important of his works is his "Coneclographic," 2 vols. 1to. Died, 1796.

PINKERTON, JOHN, a prolific but eccentric author, was born at Edinburgh, in 1758. He was educated at Lanark grammar school, and served 5 years with a writer of the signet; after which he settled in London, and devoted the remainder of his life to literature. He began his career by several volumes of poetry, entitled "Rhymes," "Dithyrambic Odes," and "Tales in Verse." He also produced two volumes of pretended "Ancient Scottish Poems," a forgery, after the manner of Chatterton; and "Letters on Literature," under the assumed name of Robert Heron, in which he displayed a degree of impudent pedantry almost unparalleled. It obtained, however, the patronage of Horace Walpole; of whose witticisms, &c., he published a collection after his decease, under the title of "Walpoliana." A bare catalogue of the works of this indefatigable writer would fill a considerable space. Among them are an excellent "Essay on Medals," "Modern Geography," 3 vols.; "The Treasury of Wit," 2 vols.; "General Collection of Voyages and Travels," 19 vols.; "Iconographia Scotica," 2 vols.; "Recollections of Paris," 2 vols.; and "Petrology, or a Treatise on Rocks," 2 vols. For many years Mr Pinkerton resided at Paris, and there died in 1826.

PINSON, RICHARD. [PINNSON.]

PINTELLI, BACCO, Italian architect, was probably a native of Florence. He went to Rome about 1471, and was employed by Pope Sixtus IV. to design and build the Sixtine chapel, afterwards decorated by the great frescoes of Michael Angelo and other distinguished painters. Pintelli also erected the churches of Santa Maria del Popolo, Sant'Agostino, and others; the Ponte Sisto, and the Vatican Library. He was afterwards employed at Urbino. The time and place of his death are unknown.

PINTO, (MENDOZ) PINTO.

PINTURICCHIO, a distinguished Italian painter, born at Perugia, in 1451. His birth-name was BERNARDINO DI SIMONE. He is supposed to have studied under Perugino, whom he accompanied to Rome and assisted in some of his works. The chef-d'œuvre of this master is the series of frescoes at Sienna, illustrating the life of Pope Pius II., in which the young Raphael gave him some assistance. He painted in the church of Santa Maria del Popolo at Rome, and in the

del Popolo at Rome, and in the

March of St Francis at Sienna; and also
executed some good portraits. The National
Gallery has a small "Madonna and Child"
by Pinturicchio. Died at Sienna, deserted
by his wife and starved, in 1513.

PINZON, MARTIN ALONZO, one of the
companions of Columbus on his first voyage,
in 1492, was a rich citizen of Palos. He was
named captain and pilot of the *caravel*
Santa Maria; and by his counsel induced Columbus,
on the 12th October, to change his course
towards the south-west, in consequence, as
he afterwards appeared, of his having observed
the flight of parrots in that direction. This
led to the discovery of Guauahani, or
Columbus named it, San Salvador. Pin-
zon was unfriendly to his chief, and quar-
relled and separated from him more than
once. On the return of the expedition to
Spain, the king refused to see Pinzon, and
he retired to Palos. In a lawsuit carried on
against the heirs of Columbus, between
1493-15, Pinzon claimed the honour of the
discovery of the new world. — VICENTE
CANESE, brother of the preceding, and also
a companion of Columbus on his first voyage,
commanded the *caravel Nina*. It is not
known whether he accompanied Columbus
on his second voyage; but in 1499 he con-
ducted an expedition to the coast of Brazil,
discovered the mouth of the Amazon, and ex-
plored the coast of Guiana. He took part
in another expedition with Juan Diaz de
Sotomayor, in 1507, to the Gulf of Mexico; on his
return was consulted by the king with Ves-
putci and Jean de Cosa as to new explora-
tions, and was sent, with de Solis, to pene-
trate the interior of the American continent.
This was probably his last voyage of dis-
covery.

PIOMBRO, SEBASTIANO DEL, an eminent
Italian painter, born at Venice, in 1485. He
studied music, of which he was very fond,
and painting, and studied under Bellini, but
afterwards took Giorgione as a model. He
went to Rome about 1512, and worked in the
palace of the Farnesina. The delicacy of
his pencil was much admired, and Michael
Angelo encouraged him to enter into com-
petition with Raphael, and even supplied
him with designs, which he often exe-
cuted very happily, although by no means
capable of lofty conceptions or sublime in-
ventions. His greatest work is his "Resur-
rection of Lazarus," now in the National
Gallery. It was painted at Rome in 1519,
and exhibited there at the same time with
Raphael's masterpiece, the "Transfigura-
tion." It is said that parts of the "Rising
of Lazarus" were designed by Michael An-
gelo. This great work has recently been
engraved in line by Mr Doo. Sebastiano
excelled in portraits, two of his finest being
those of Andrea Doria and Giulia Gonzaga.
Died, 1547.

PIOZZI, HESTER LYNCH, born in 1739,
was the daughter of John Salisbury, Esq.,
a gentleman of Carnarvonshire. Early in
life she was distinguished by her beauty
and accomplishments, and, in 1763, mar-
ried Mr Thrale, a rich brewer in South-
wark, which brought her then represented
in parliament. Soon after commenced her
acquaintance with Dr Johnson, of whom, in

1786, she published "Anecdotes," in one 8vo
volume. On the death of Mr Thrale, in
1781, she had retired to Bath, where she
married Piozzi, an Italian music master,
with whom she went to Florence. Her sub-
sequent publications are, "Observations and
Reflections made in a Journey through
France, Italy, and Germany;" "The Flor-
ence Miscellany;" "British Synonymy;"
and "The Retrospect." But she is chiefly
remembered as an authoress for her inge-
nious tale of "The Three Warnings." On
the death of her second husband, Mrs Piozzi
returned to England, and died at Clifton in
1821. Her "Autobiography" has been edit-
ed by A. Hayward.

PIPI, (GIULIO ROMANO.)
PIRANESI, GIOVANNI BATTISTA, an
eminent engraver, architect, and antiquary,
was born at Venice, about 1720, but lived
principally at Rome, of which city, with its
models of ancient and modern art, he was an
enthusiastic admirer. He was one of the
most indefatigable of artists, and his talents
were equal to his industry; his works form
29 atlas fol. vols., and delineate, in the most
spirited manner, most of the remarkable
ancient edifices and works of art in the
Papal States, together with numerous views
and modern buildings. Died, 1778.

PIRANESI, FRANCESCO, son of the pre-
ceding, and, like him, an artist of great
talent, was born at Rome, in 1748. He com-
pleted many of the magnificent works begun
by his father, and executed many others of
equal magnitude; in which he was assisted
by his brother Piero and his sister Laura.
Having taken an active part in the revo-
lution, he ultimately found it necessary to
quit his native country; and he continued to
reside at Paris from that time till his
death, in 1810.

PIRON, ALEXIS, a French poet and dra-
matist, was born at Dijon, in 1689. Having
for a while earned a scanty subsistence at
Paris as a copyist, he turned his thoughts to
dramatic composition, and produced a piece
for the comic opern, entitled "Arlequin
Deuallon." This succeeding, he was en-
couraged to persevere, and L'Ecole des
Pères," a comedy; and the tragedies of
"Callisthène" and "Gustave Vasa" fol-
lowed. It was not, however, till 1739 that
he gained a place among the highest class of
dramatists, by his admirable comedy of
"Métromanie," which Laharpe character-
izes as excelling in plot, style, humour, and
vividly almost every other composition of
the kind. His "Bons Mots," "Poésies Di-
verses," and "Plays," form 7 vols. Died,
1773.

PISANO, ANDREA, a celebrated early
Italian sculptor and architect, was born in
1270. He was a pupil of Giovanni Pisano,
and having attained great reputation as a
bronze-caster, was charged to make the
gates for the Baptistery at Florence. The
modelling was finished in 1330, and nine
years was then occupied in the casting and
completion. When they were set up the
Signory went in state to thank Andrea, and
made him a citizen of Florence. Andrea was
the intimate friend of Giotto, and assisted
him in the sculptures of the Duomo and

Campanile. He fortified the Palazzo Vecchio of Florence, and built many palaces and castles in Tuscany. Died at Florence, 1345. Andrea Pisano was the master of Andrea Oragna.

PISANO, GIUNTA, an early Italian painter, lived in the first half of the 13th century. The facts and chronology of his life are very obscure, and there is but one work which is certainly known to be his, the crucifix of St Raineri e Leonardo at Pisa. He is said to have painted in the upper church of Assisi, after 1220. Art was then at the lowest ebb at Pisa, and Giunta did nothing to raise it.

PISANO, NICCOLA, one of the greatest of the early Italian sculptors and architects, was born at Pisa about 1206. When scarcely 15, he was appointed architect to the Emperor Frederick II., and followed him to Rome and to Naples. After working at Naples about ten years, he was called to Padua to design a basilica in honour of St Anthony. His first known sculpture is a relief of the "Deposition," executed at Lucca about 1234, still preserved. In 1248 he was at Florence, employed by the Ghibelline party to destroy the Baptistery, in which task he happily failed. He established his fame as an architect during the following years by building many churches and palaces, and in 1260 executed the noble pulpit in the Baptistery of Pisa, which placed him in the first rank as a sculptor. His next work was the sculptured sarcophagus for the remains of St Dominic at Bologna, in which he was assisted by his scholar, Fra Guglielmo Agnelli. In 1266 Niccola went to Sienna, to construct a pulpit for the Duomo, one of his finest works. He was afterwards employed by Charles of Anjou to build an abbey and convent to commemorate his victory of Tagliacozzo, and his last work was the beautiful fountain in the piazza of Perugia, partly executed by his son Giovanni. The services rendered to art by Niccola Pisano are thus summed up by a recent critic: "He gave the deathblow to Byzantinism and barbarism; established new architectural principles; founded a new school of sculpture in Italy; and holds the same relation to Italian art which Dante holds to Italian literature." Died, at Pisa, 1278. A cast of the famous Pisan pulpit is placed in the South Kensington Museum.

PISANO, GIOVANNI, a celebrated Italian sculptor and architect, son of the preceding, was born at Pisa about 1240. He assisted his father in executing the pulpit at Sienna, was employed for some years at Naples, and then at Perugia about the fountain of the piazza. On his father's death he settled at Pisa, and there built the church of S Maria della Spina, the first Gothic building in Italy, and the beautiful Campo Santo, in which he also executed several works of sculpture. In 1286 he began the façade of the Duomo at Sienna, and among his subsequent works are the shrine of San Donato at Arezzo, the pulpit in the church of San Andrea, Pistola, and the monument of Pope Benedict XI. at Perugia. Among his scholars was Andrea Pisano. Died at Pisa,

1320. There is a cast of Giovanni Pisano's pulpit in the South Kensington Museum.

PISISTRATUS, an Athenian citizen, who usurped the sovereignty of his country, was a descendant of Codrus, and inherited from his father, Hippocrates, a large fortune. He was ambitious, eloquent, and courageous; and, pursuing the policy which has so often succeeded in democracies, he gained over the lower classes of the citizens by his affability and unbounded liberality. He made no attempt to abolish the wise laws of Solon, but confirmed and extended their authority; and though he was twice expelled, he regained the sovereignty, and continued to exercise it, not as the oppressor, but as the father of his country. He died 527 B. C., leaving his two sons, Hippos and Hipparchus, to inherit his power. He established a public library at Athens, and collected and arranged the Homeric poems.

PITCAIRNE, ARCHIBALD, an eminent physician, born at Edinburgh, in 1682. After receiving his education in his native city and at Paris, he was for a short time professor of medicine at Leyden, and eventually settled at Edinburgh. Among his works are, "Disputationes Medicæ," and "Elementa Medicinæ Physico-mathematicæ." Died, 1713.

PITT, CHRISTOPHER, an English clergyman and an elegant poet, was born in 1699, at Blandford, in Dorsetshire; was educated at Winchester and at New College, Oxford; and having obtained the family living of Pimperne, he there passed his life, in the performance of his clerical duties and the cultivation of literature, beloved and respected for his suavity of manners and general benevolence. His poems have considerable merit, and his translations of the "Æneid" and "Vida's Art of Poetry" are both tasteful and harmonious. He died in 1748.

PITT, THOMAS, the founder of an illustrious family, was born at St Mary's, Blandford, in 1653. Towards the end of that century he went to the East Indies, as governor of Fort St George, where he resided many years and realized a large fortune; particularly by a diamond (called after him the Pitt diamond) which he purchased for £20,400, and sold to the king of France for somewhat more than five times that sum. A rumour having prevailed in England, that the governor gained this jewel unfairly, and Pope having most unwarrantably given the slender currency, by a sort of poetical adoption of it in the following couplet—

"Asleep and naked as an Indian lay,
An honest factor stole a gem away,"

he published a narrative containing a fair statement of the transaction, which completely refuted the calumny. In 1716, Mr Pitt was made governor of Jamaica, but did not hold that situation above a year. He sat in four parliaments, for Old Sarum and Thirsk; died in 1726, and was buried in Blandford church, where a monument was erected to his memory.—His eldest son, ROBERT PITT, of Boconnoc, who died in 1727, was the father of the great Lord Chatham.

here is a cast of Giovanni Pisano, the South Kensington Museum. TRATUS, an Athenian citizen, who the sovereignty of his country, was the son of Codrus, and inherited from Hippocrates, a large fortune. He was a philosopher, eloquent, and courageous. In pursuing the policy which has so often prevailed in democracies, he gained over the classes of the citizens by his affable and unbounded liberality. He made an attempt to abolish the wise laws of Solon, but he was confirmed and extended their authority; and though he was twice excluded from the sovereignty, he succeeded at last to exercise it, not as the oppressor, but as the father of his country. He died B. C., leaving his two sons, Hipparchus and Demetrius, to inherit his power. He was a public library at Athens, and arranged the Homeric poems. ARNE, ARCHIBALD, an eminent physician, born at Edinburgh, in 1682. He received his education in his native country, and was for a short time professor of medicine at Leyden, and eventually at Edinburgh. Having prevailed in England, that he gained this jewel unfairly, and was most unwarrantably given the treasury, by a sort of poetical adoption the following couplet—

PIT, WILLIAM. [CHATHAM, Earl of.] PITT, WILLIAM, prime minister of England, was the second son of the earl of Chatham, and born May 28, 1759, at Hayes, in Kent. After receiving the rudiments of his education at home, under the superintendance of his father, he was sent to Pembroke Hall, Cambridge, where his tutor was Dr Pretyman; and on leaving the university he was entered at Lincoln's Inn, and in 1783 was called to the bar. But he was destined shortly to move in a higher sphere. In 1780 he stood candidate for the university of Cambridge, but was unsuccessful. By means, however, of Sir James Lowther, he was returned for the borough of Appleby, and he immediately became one of the most distinguished opponents of the ministry. In 1782 he brought forward a motion for an inquiry into the state of the representation in parliament, which was rejected by a small majority. On the death of the marquis of Rockingham, Lord Shelburne obtained the office of first lord of the treasury; and Mr Pitt, then only 23 years of age, was appointed chancellor of the exchequer. A general peace soon followed, which being made the ground of censure by a strong opposition, the cabinet was dissolved, and the Fox and North coalition took its place. On his retirement from office, Mr Pitt resumed his efforts for a reform in parliament, and submitted three specific motions on the subject, which, though supported by Mr Fox, then secretary of state, were rejected. On the failure of Fox's India bill, which produced the dismissal of the coalition, Pitt, although at that time only in his 24th year, assumed the station of prime minister, by accepting the united posts of first lord of the treasury and chancellor of the exchequer. Although strongly supported by the sovereign, he stood opposed to a large majority of the House of Commons, and a dissolution took place in March, 1786. At the general election which followed, the voice of the nation appeared decidedly in his favour, and some of the strongest aristocratical interests in the country were defeated, Pitt himself being returned by the university of Cambridge. His first measure was the passing of his India bill, establishing the Board of Control, which was followed by fiscal and financial regulations, which gave *clat* to the early period of his administration. One of the most momentous periods in modern history had now arrived. The French revolution broke out, and produced agitation in every neighbouring state. War against free principles was declared on the one side, by which all amelioration was opposed; while on the other, the friends of rational reformation found themselves confounded with ignorant and heated men, who espoused some of the wildest and most visionary innovations. Under this state of things a vigilant eye and a steady hand were obviously necessary to steer the vessel of state; and whatever opinions may be formed by different parties, in respect to the necessity of our interference, or the measures adopted by the minister—whether he deserved the censures which were so

lavishly heaped upon him, or whether he was entitled to the gratitude of his country, as "the pilot that weathered the storm,"—certain it is, that he displayed talents, energy, and perseverance, almost unparalleled in the world's history. At length he succeeded to the wish that an experiment for peace should be tried, which took place in 1801, under Mr Addington; but the event proved how fallacious were the hopes of the people; and, in 1804, Pitt once more resumed his post at the treasury. Returning to power as a war minister, he exerted all the energy of his character to render the contest successful, and found means to engage the two great military powers of Russia and Austria in a new coalition against Napoleon, which was dissolved by the battle of Austerlitz. But his health was now in a very precarious state, and an hereditary gout, aggravated by public cares and a too liberal use of wine, by way of stimulant, completely undermined his constitution; and he died Jan. 23, 1806. Pitt was a minister of commanding powers, both as a financier and an orator; his eloquence, though not so imaginative as that of Burke, or so captivating as that of his father, was more uniformly just and impressive than either; while the indignant severity and keenness of his sarcasms were unequalled. A public funeral was decreed to his honour by parliament, as also a grant of £40,000, to pay his debts; for although his whole life was devoted to the service of his country, such was his disinterestedness in pecuniary matters, that he never received one shilling of the public money beyond his fair emoluments of office, to supply the occasional great expenses to which he was put as prime minister. A Life of Pitt, with Extracts from his MS. papers, has been published by Earl Stanhope, in 4 vols. His bust, by Nollekens, is in the National Portrait Gallery.

PITTACUS, one of the seven sages of Greece, was born at Mitylene, in the island of Lesbos, about 630 B.C. He was a warrior as well as a philosopher; expelled the tyrant Melancthus from Lesbos; and on becoming its sovereign, B.C. 590, he discharged the duties of his station in the most exemplary manner; retired after a reign of 10 years, and died B.C. 570.

PITTS, WILLIAM, an English sculptor, was born at London in 1790. He was passionately fond of his art, in which he displayed an exquisite fancy and grace, and great power of execution. At one time he was assistant to Flaxman. Among his works are—a "Shield of Achilles," bas-reliefs of the "Rape of Proserpine" and the "Marriage of Pelithous," the "Shield of Hercules," bas-reliefs in the drawing-rooms at Buckingham Palace, &c. He committed suicide in April, 1840.

PIUS II., Pope, JENAS SYLVIVS PICOLOMINI, was born in Tuscany in 1405, of an ancient and illustrious family. In 1431 he assisted at the Council of Basle as secretary; was afterwards secretary to the anti-pope Felix V., and then to the Emperor Frederick III., who sent him on various embassies, and gave him the poetic crown. Eugenius IV. chose him for apostolic secretary.

Nicholas V. made him a bishop, and sent him as nuncio to Bohemia, Moravia, and Silesia, and Calixtus III. created him cardinal. Piccolomini had by this time given up the more liberal opinions on church matters with which he started, and had become a zealous supporter of the power of the pope, both in opposition to the secular power, and to the authority of councils. He was one of the most learned men of his time, and notwithstanding the great change in his views, he distinguished himself by moderation and a conciliatory spirit. He was chosen to succeed Calixtus III. in 1458, and in the following year assembled a congress at Mantua for the purpose of arranging a crusade against the Turks. He soon after published a bull against appeals to a council, which occasioned some dispute with Louis XI. In 1463, by another bull, he retracted his former sentiments respecting the Council of Basel, condemning his defence of it, and praying to be condemned as Aeneas Sylvius but listened to as Pius II. Died at Ancona, August, 1464, whither he went to hasten preparations for war with the Turks. Among the writings of Pius II. are a "History of the Council of Basel," "History of Frederick III.," "History of Bohemia," "Cosmographia, &c."

PIUS V., Pope, MICHELE GUTSMEIR, was born in Piedmont in 1504, and early entered the Dominican order. He so distinguished himself by his austere life and his zeal against "heretics" that he was appointed inquisitor in Lombardy and afterwards inquisitor-general; an office which he executed with such rigour as to acquire the title of "Ecclesiastical Tyrant." He was created cardinal in 1557, and was chosen to succeed Pius IV. in 1566. He set himself to effect reforms both in morals and discipline, excited terror in Italy by the seizures, imprisonment, and burning of those convicted or suspected of heresy, among whom were several persons of note; revived the obnoxious bull "In carnem Domini," but found it impossible to put it in execution; enforced strictly the authority of the Index Expurgatorius; and expelled the Jews from the States of the Church, excepting only the cities of Rome and Ancona. In 1570 he published a bull of excommunication against Queen Elizabeth, having previously sent agents to England to carry on intrigues against her; and Felton, who posted the bull on the gates of the palace of the bishop of London, was tried for high treason and executed. Pius soon after suppressed the order of the *Uvalati* on account of their scandalous immoralities and disorders, and their attempt to assassinate St Charles Borromeo, archbishop of Milan, the pope's most intimate friend. The great victory over the Turks at Lepanto was the result in good part of the efforts of Pius V. His death, in May, 1572, was a matter of general rejoicing, and was publicly celebrated at Constantinople during three days.

PIUS VI., Pope, GIOVANNI ANGELO BRASCHI, was born at Cesena, in 1717, and succeeded Clement XIV. in 1775. His first act was to make a reform in the

public treasury; he then completed the museum in the Vatican; but the greatest work of his pontificate was the draining which bailed several of the emperors, and many of the popes. When the emperor Joseph II. decreed that all the religious orders in his dominions were free from papal jurisdiction, Pius, apprehensive of the consequences of such a measure, went in person to Vienna in 1782; but though he was honourably received, his remonstrances were ineffectual. The French revolution, however, was of more serious consequence to the papal see. The pope having favoured the allies, Buonaparte entered the ecclesiastical territory, and compelled him to purchase a peace by a contribution of several millions, and delivering up the finest works of painting and sculpture. Basseville was then sent as envoy from the republic to Rome, where he behaved with so much insolence, that the people assassinated him in 1793. General Duphot entered the city with his troops to restore order, but the papal soldiers routed them, and Duphot was slain. On this Buonaparte again entered Italy, and made the pope prisoner in the capital, which was plundered. The venerable pontiff was carried away by the victors, and hurried over the Alps to Valence, where he died of excessive fatigue and ill usage, Aug. 29, 1799.

PIUS VII., Pope, GREGORIO BARNABA CUIARAMONTE, born at Cesena in 1742, became a Benedictine monk, was created cardinal in 1785, and after the death of Pius VI. was chosen, after long deliberations of the conclave, to succeed him, March, 1800. In the following year a concordat with France was concluded at Paris; in 1804 the pope went to Paris and crowned Napoleon emperor, returning to Rome in May, 1806. Soon after Ancona was seized by the French, and the great quarrel between Napoleon and the pope began. The occupation of the castle of San Angelo in 1808 was followed by the annexation of the States of the Church to the French empire; on which the pope published a bull of excommunication against the perpetrators of the invasion. Pius was then arrested by the French officer Miollis and sent to Savona, and afterwards to Fontanebleau, whence he was not permitted to return to Italy till January, 1814. The congress of Vienna restored the States of the Church to the pope, who applied himself thenceforth to internal reforms. He, however, re-established the Jesuits and the Inquisition. The character of Pius VII. was such as to win him the esteem and sympathy of men of all churches and sects. Died, 20 August, 1823.

PIZARRIC, FRANCISCO, the conqueror of Peru, was the illegitimate son of a gentleman of Truxillo, and being left entirely dependent on his mother, a peasant girl, he received no education, and was, in his early years, employed as a swineherd. Quitting this inglorious occupation, he embarked, in 1510, with some other adventurers, for America; and, in 1521, after having distinguished himself under Nunez de Balboa on many occasions, he associated at Pa-

...sury; he then completed the Pontifical; but the greatest of his pontificate was the draining of the Pontine marshes, a project of several of the emperors, and decreed that all the religions is dominions were free from taxation, Pius, apprehensive of the loss of such a measure, went in person to the marshes in 1782; but though he was personally received, his remonstrances were of no avail. The French revolution, and its more serious consequences, were the cause of his death. The pope having favoured Napoleon entered the celebration, and compelled him to purchase by a contribution of several millions of francs the right of delivering up the finest works of sculpture. Bassville was sent as an envoy from the republic to the pope; he behaved with so much in the people assassinated him in the palace of the pope. Duphot entered the city with his army, and the pope fled to Rome, and then, and the pope was slain. Napoleon again entered Italy, and the pope prisoner in the capital, and was executed. The venerable pontiff was carried away by the victors, and to the Alps to Valence, where he died of fatigue and ill usage, Aug. 6, 1809.

PIZZI, GREGORIO BARNABA, a physician, born at Cesena in 1742, became a medicine monk, was created doctor in 1785, and after the death of Pius VI. after long deliberations succeeded him, March, 1800. During his year of concordat with Napoleon he concluded at Paris; in 1804 the pope was crowned Napoleon at Rome in May, 1805. Pius VI. was seized by the French, and quarrel between Napoleon and the pope began. The occupation of the papal States in 1808 was followed by the French empire; on which the pope issued a bull of excommunication against the perpetrators of the invasion. Napoleon arrested the French pope, and sent to Savona, and afterwards to Fontenay-le-Comte, whence he was not permitted to return to Italy till January, 1814. The congress of Vienna restored the papal States to the pope, who returned to Rome, and thenceforth to internal reform, re-established the Jesuits, and the character of his pontificate. The character of his pontificate was such as to win him the esteem of men of all churches and nations, Aug. 2, 1823.

PIZZI, FRANCESCO, the conqueror of the island of Sicily, an illegitimate son of a gentleman, and being left entirely destitute by his mother, a peasant girl, he was educated as a swineherd. Quitting his occupation, he embarked, in 1492, with Columbus, and in the same year he embarked, in 1521, after having dissolved himself under Nunez de Balboa, he associated at Pa-

PLAZA, PEDRO, a Spaniard, named with Diego de Almagro and Hernandez Lueque, a priest, in an enterprise to make fresh discoveries. In this voyage they reached the coast of Peru, but being too few to make any attempt at a settlement, Pizarro returned to Spain, where all that he gained was a power from the court to prosecute his object. However, having raised some money, he was enabled again, in 1531, to visit Peru, where a civil war was then raging between Huascar, the legitimate monarch, and his half-brother, Atahualpa, or Atabalipa, as he is variously called, the reigning Inca. Pizarro, by pretending to take the part of the latter, was permitted to march into the interior, where he made the unsuspecting chief his prisoner, while partaking of a friendly banquet to which he had invited him and his whole court; then extorting from him, as it is said, a house full of the precious metals by way of ransom, he had him tried for a pretended conspiracy, and condemned him to be burnt, allowing him first to be strangled, as a reward for becoming a Christian. In 1535 the conqueror laid the foundation of Lima; but, in 1537, a contest arose between him and Almagro, who was defeated and executed. The son and friends of Almagro, however, avenged his death, and on June 26, 1541, after ruling despotically for six years, Pizarro met with the fate he so richly deserved, being assassinated in his palace at Lima.

PLACE, FRANCIS, a native of Dinsdale, in the county of Durham. He was bred to the law, and afterwards expended considerable sums in an attempt to make porcelain. He was an excellent painter as well as engraver, but executed all his works for amusement; and he refused a pension of £300, to draw the royal navy. Besides etchings of landscapes and birds, he executed portraits in mezzotint. Died, 1723.

PLANTA, JOSEPH, librarian of the British Museum, was born in Switzerland in 1744, but his father soon after settled in London as pastor of the German reformed church. He was educated at Göttingen, was for twenty years secretary to the Royal Society of London, was also attached to the office of the secretary of state for foreign affairs, and, in 1799, was appointed first librarian of the British Museum, a post which he filled till his death. He was for a short time under-secretary of state. Died, 1827.

PLANTIN, CHRISTOPHE, a learned French printer, born near Tours in 1514. He learnt his art at Caen, visited the principal French printing establishments, and settled at Antwerp. He had the assistance of several learned men, and gained a great reputation for the accuracy and elegance of his workmanship. His chef-d'œuvre as printer is his edition of the famous Polyglott Bible of Alcala, since called the Antwerp Polyglott, which was published in 8 vols. folio between 1569—1572. Died, 1589, and was buried in Antwerp Cathedral.

PLATINA, BARTOLOMEO, an Italian historian, whose real name was Sacelli, was born in 1421. Having fallen under the displeasure of Pope Pius II., he was impris-

ed and put to the rack, on a charge of being implicated in a conspiracy against him. His sufferings, however, were afterwards recompensed by Sixtus IV., who, in 1475, made him keeper of the Vatican Library. His principal work, composed in elegant Latin, is a history of the "Lives of the Roman Pontiffs." He also wrote, in Latin, a "History of Mantua." Died, 1481.

PLATO, the great Greek philosopher, was born at Athens or in Aegina, in May, B. C. 429, the year in which Pericles died. He was son of Ariston and Perictione, who boasted of their descent from Cadmus and Solon, and he was named ARISTOCLES. The name Plato was afterwards applied to him in allusion to his broad brow or broad chest, or fluent speech. Endowed with a highly imaginative and emotional nature, he early began to write poems, but at the same time studied philosophy, and at the age of 20 became the disciple of Socrates. He burnt his poems, remained devotedly attached to Socrates for ten years, attended him on his trial, and was one of the few who listened to the final conversation on the immortality of the soul. After the death of Socrates he went to Megara to hear Euclid, thence to Cyrene, and perhaps to Egypt and south Italy. On his return he began to teach at Athens, in the plane-tree grove of the "Academia;" he taught gratuitously, and had a great number of disciples, many of whom became eminent teachers. Among them was Aristotle, distinguished as the "Mind of the School," and perhaps Demosthenes. Women are said to have attended. In his fortieth year Plato visited Sicily, but he offended the tyrant Dionysius by the political opinions he uttered, and only escaped death through the influence of his friend Dion. Two later visits to the court of the younger Dionysius were the only interruptions to his calm life as teacher and writer at Athens. Plato never married, had no children, took no active part in public affairs, lived absorbed in the pursuit of truth, and was so marked by gravity and melancholy that the saying became common—"as sad as Plato." His works have come down to us complete, and are chiefly in the form of dialogues; a form of literature in which he is unrivalled. They are singular in their union of the philosophic and poetic spirit; the depth of the philosopher and the rigorous exactitude of the logician with the highest splendour of imagination of the poet. In range of speculation the Dialogues of Plato are unparalleled. "Out of Plato," says Emerson, "come all things that are still written and debated among men of thought." And again, "Plato is philosophy and philosophy Plato." Attempts have been made to classify the dialogues, but without useful result; and attempts to construct a formal system from them have utterly failed. Plato did not aim at a system; nor did he even aim so much at teaching truths as at imparting and illustrating the method by which each should seek truth for himself. We owe to him the threefold division of philosophy into dialectics, physics, and ethics; the first sketch of the laws of thought; the doctrine

of "Ideas" as the eternal archetypes of all visible things; and the first attempt towards a demonstration of the immortality of the soul. And he proclaims the highest and purest doctrines of morality with clearness, courage, and unhesitating authority. He adopted as a writer the method of his great master, who forms also the central figure of the dialogues; and whose opinions and biography are so closely interwoven with them, that we cannot tell whether the light that shines on us comes from this or that side of the Twin Star, Socrates and Plato. Plato died, in the act of writing, it is said, in May, 317 B. C. His birthday was long observed as a festival. There is an admirable German translation of Plato by Schleiermacher, not complete however; a complete French one by Cousin; and English translations of some of the dialogues by Sydenham; of the whole by Taylor; and of a few by Whewell. Mr Grote's new work entitled—"Plato and the other companions of Socrates" (1865), is one of the most important contributions ever made to the study of Greek philosophy.

PLATOFF, Count, a celebrated hetman of the Cossacks, was born in the southern part of Russia, about 1763. He entered young into the army, distinguished himself against the Turks in Moldavia, and was made a general of cavalry. When the French invaded Russia in 1812, Platoff, with twenty regiments of Cossacks, harassed them in their flight, and contributed greatly to the advantages gained over them. He accompanied the Emperor Alexander to London, where he was the object of popular admiration. He retired to the banks of the river Don, and died in 1818.

PLAUTUS, T. MacciUS, the most celebrated Roman comic poet, born in Umbria, probably about B. C. 255. He spent the greater part of his life at Rome, where at one time he is said to have been reduced to the necessity of grinding corn with a handmill for a baker. He began to write plays about 230, and gained immense popularity with his countrymen by his numerous comedies, based, many of them, on Greek models, but made his own by a bold treatment and clever adaptation of them to Roman audiences. Twenty of his comedies are still extant out of the twenty-one pronounced genuine by Varro. One hundred and thirty were current under his name. His plays were still acted in the reign of Domitian, and some of them have been imitated by modern dramatists. There are several English translations of Plautus. Died, B. C. 184.

PLAYFAIR, Sir HUGH LYON, major in the East India Company's service, was born in 1786. He studied at the university of St Andrews, and went to India in 1803, where he served in the Bengal Artillery till 1815. After a visit to Europe for the benefit of his health, he returned to India in 1820, held for seven years the appointment of superintendent of the Great Military Road, Telegraph Towers, and Post Office Department, between Calcutta and Benares, was commander of artillery at Mundum for three years, and about 1830 returned to Europe. He settled at St Andrews, was named pro-

vost in 1842, knighted by the queen, and created I. L. D. by the university in 1856, and in the outward aspect and the social life of the decayed city, died there, January 21, 1861.

PLAYFAIR, JOHN, an eminent mathematician and natural philosopher, was born at Hervie, near Dundee, of which parish his father was minister, in 1740. He received his education at St Andrews; and, in 1772, succeeded to his father's living; but resigned it some years afterwards, and went to Edinburgh, where he became professor of mathematics. In his latter years he applied to the study of geology, which he pursued with indefatigable ardour; and, in 1816, undertook a journey to the Alps, for the purpose of making observations on those mountains. Among his works are, "Elements of Geometry," "Illustrations of the Huttonian Theory of the Earth," "System of Geography," 5 vols. 4to; and "Outlines of Philosophy." Died, 1819.

PLAYFAIR, WILLIAM, brother of the preceding, born in 1759, was an ingenious projector and author. After serving an apprenticeship to a millwright, he was engaged as a draughtsman at Boulton and Watt's establishment, Soho, Birmingham. On coming to London he obtained patents for various inventions, and engaged in many speculations, became a fertile writer on politics and other subjects, and died in 1823. His most important publications are, "A Commercial and Political Atlas," "An Inquiry into the Decline and Fall of Nations," "France as it is," "History of Jacobinism," and "British Family Antiquity."

PLINIUS SECUNDUS, CAIUS, or **PLINY THE ELDER**, one of the most celebrated writers of ancient Rome, was born, A. D. 23, at Verona, or at Como, served in the army in Germany, afterwards became an advocate, and was ultimately procurator in Spain. As an inquirer into the works of nature he was indefatigable, and he lost his life in a last attempt to gratify his thirst for knowledge. Being at Misenum with a fleet which he commanded on the 24th of August, A. D. 79, his sister desired him to observe a remarkable cloud that had just appeared. Pliny, discovering that it proceeded from Mount Vesuvius, ordered his galleys to sea, to assist the inhabitants on the coast, while he himself steered as near as possible to the foot of the mountain, which now sent forth vast quantities of burning rock and lava. Pliny and his companions landed at Stabie, but were soon obliged to leave the town for the fields, where the danger, however, was equally great, from the shower of fire which fell upon them. In this state they made the best of their way to the shore, but Pliny, who was very corpulent, fell down dead, suffocated probably by the noxious vapours. The eruption which caused his death was that in which the cities of Herculaneum and Pompeii were destroyed, in the first year of the Emperor Titus. He wrote several works which have perished, but his name and fame are preserved by his great work entitled "Natural History," in 37 books, one of the most precious monuments of antiquity extant. Its contents do not

842, knighted by the queen, and L.D. by the university in 1836, and being extraordinary improvements in the outward aspect and the social life of the city, died there, January 21, 1861.

AIR, JOHN, an eminent mathematician and natural philosopher, was born near Dundee, of which parish his father was minister, in 1740. He received his education at St Andrews; and, in 1772, succeeded to his father's living; but resigned it afterwards, and went to Edinburgh, where he became professor of mathematics in his latter years he applied to the study of geology, which he pursued with industry and ardour; and, in 1816, undertook a tour to the Alps, for the purpose of making observations on those mountains. His works are, "Elements of Geometrical Demonstrations of the Ilutonian Theory of Earth," "System of Geography," and "Outlines of Philosophy."

AIR, WILLIAM, brother of the preceding, in 1759, was an ingenious projector. After serving an apprenticeship in millwright, he was engaged as a surveyor at Boulton and Watt's establishment, Birmingham. On coming to London, he obtained patents for steam engines, and engaged in many speculative projects, and died in 1823. His most important publications are, "A Commercial Atlas," "An Inquiry into the Causes and Fall of Nations," "France as it is," "History of Jacobinism," and "British Intemperance."

PLINY THE ELDER, or PLINY THE VETERAN, one of the most celebrated historians of ancient Rome, was born, A. D. 23, at Comum, in the army, afterwards became an advocate, and ultimately procurator in Spain. As he was devoted to the works of nature he was called the "Naturalist," and he lost his life in a last voyage to Sicily, gratifying his thirst for knowledge by ascending Mount Vesuvius with a fleet which he commanded on the 24th of August, A. D. 79, when he desired him to observe a remarkable eruption that had just appeared. Pliny, who thought that it proceeded from Mount Vesuvius, ordered his galleys to sea, to assist in the operations on the coast, while he himself remained as near as possible to the foot of the mountain, which now sent forth vast quantities of burning rock and lava. Pliny's companions landed at Stabiae, and he was obliged to leave the town for the danger, however great, from the shower of lava which fell upon them. In this state of mind he pursued the best of their way to the city of Pliny, who was very corpulent, and died, suffocated probably by the heat of the eruption which caused his death. It was that in which the cities of Pompeii and Herculaneum were destroyed, in the year of the Emperor Titus. His works, which have perished, are preserved by his nephew, Pliny the Younger, in his "Natural History," in the most precious monuments of literature which exist. Its contents do not

answer to its title, but are immensely various in character. It is a laborious compilation, from almost innumerable sources, of facts, observations, and statements on almost all branches of natural science, on the fine arts, on inventions, and other subjects. Unfortunately Pliny did not observe for himself with the eye of a naturalist, nor make selection of his materials with the judgment of a critic, nor dispose them in any scientific order. Still we cannot afford to lose such a book. It has been translated into most European languages, and even into Arabic, and has been republished a very great number of times. Philemon Holland translated it into English about 1600.

PLINIUS CÆCILIUS SECUNDUS, CAIUS, or PLINY THE YOUNGER, nephew of the preceding, was born, A. D. 62, at Comum. He studied under Quintilian, and in his eighteenth year began to plead in the forum. Soon after this he went as military tribune to Syria; from whence he returned, when he had made one or two campaigns, and settled at Rome. He was promoted to the consular dignity by Trajan, in praise of whom he pronounced a famous oration, which is extant. He was afterwards under proconsul of Bithynia, from whence he wrote to Trajan his curious and well-known account of the Christians, and their manner of worship. The "Epistles of Pliny" are agreeably written, and very instructive; they were translated into English by Lord Orrery and Mr Nelmeth.

PLOT, ROBERT, naturalist, was born in 1640, at Borden, in Kent; was educated at Magdalen College, Oxford, where he graduated as LL.D., became one of the secretaries of the Royal Society, royal historiographer, and archivist of the herald's office, &c.; and died in 1698. His chief works are the Natural History of Oxfordshire and Staffordshire.

PLOTINUS, the celebrated Greek philosopher, founder of the Neo-Platonic School, was born, A. D. 203, at Lycopolis, in Egypt. He was trained in the school of Alexandria under Ammonius Saccus, then visited the East, and about 244 settled at Rome, where he spent the rest of his life as a teacher and writer, enjoying the esteem of the Emperor Gallienus, and of many leading persons. Porphyry, his most eminent disciple, wrote his life and arranged and published his works, divided into six sets of nine books each (*Enneads*). Plotinus was a profound thinker and deeply religious man, and his system, a sort of mystical idealism, a combination of Platonic with oriental notions, has been very attractive to many great thinkers in ancient and modern times. Died in Campania, 270.

PLOWDEN, EDMUND, an eminent lawyer, was born in Shropshire, in 1517, and died in 1584. His "Commentaries or Reports" are greatly esteemed.

PLUKENET, LEONARD, an eminent English botanist, was born in 1642. He practised as an apothecary at Westminster, and formed a small botanic garden there. After the greater part of his life passed in struggling against adversity, he was appointed superintendent of the gardens at Hampton Court, and royal professor of botany. He died pro-

bably about 1706. His "Phytographia" is an honourable proof of his abilities. He also published "Almagestum Botanicum," "Almagestum Botanicum Mantissa," and "Amalthæum Botanicum."

PLUNKET, WILLIAM CONYNGHAM, Lord Plunket, lord chancellor of Ireland, was the son of Thomas Plunket, pastor of a Presbyterian congregation at Enniskillen, where he was born, in 1764. His father having subsequently removed to Dublin, young Plunket entered Trinity College, where he obtained a scholarship, graduated with considerable credit, and acquired great reputation as an orator in a debating club called the "Historical Society." In 1787 he was called to the bar; and soon afterwards being returned to the Irish House of Commons for the borough of Charlemont, greatly distinguished himself by his resistance to the legislative union of Great Britain and Ireland, and on one occasion declared that he would imitate the father of Hannibal, and enjoin his sons "to swear eternal vengeance against the enemies of their country," i. e. the English. Mr O'Connell used in after years to call the junior Plunkets "young Hannibals." On the extinction of the Irish parliament in 1800, he continued to practise at the bar with great success. In 1803 he became solicitor-general for Ireland, and in 1805 he was advanced to the office of attorney-general, which he held till 1807. From this period he devoted himself to Chancery practice, appearing as leading counsel in every Chancery suit, and, besides increasing fame, earning an income which averaged £6000 a year. In 1812 he was returned member of parliament for Dublin University, and his ready, weighty, perspicuous, and condensed eloquence placed him at once in the foremost rank of parliamentary orators. In 1822, though he had been always a keen supporter of Roman Catholic Emancipation, he was appointed attorney-general for Ireland, under the Tory administration of Lord Liverpool; but his appointment, while it raised the hopes of the Roman Catholics, naturally disappointed the Orange party, and, so far from allaying dissensions, it was converted into a signal for renewed rancour and jealousy. In 1827 he was raised to the peerage, and at the same time appointed chief justice of the Common Pleas in Ireland; and during the three years that followed, besides presiding on the bench with great success, he materially aided the duke of Wellington in carrying the Emancipation Bill through the House of Lords. In 1836 he was appointed lord chancellor of Ireland; and, with the exception of five months between November, 1834, and April, 1835, he held this office till 1841, at which period his public life may be said to have terminated. Died, 1854.

PLUTARCH, the celebrated Greek biographer and moralist, was a native of Chaeronea, in Bœotia. In A. D. 66 he was a pupil of the philosopher Ammonius at Delphi. He visited Italy, and spent some time at Rome, lecturing there on philosophy as early as the reign of Domitian; but his name is not mentioned by any of the eminent Roman writers, his contemporaries. He returned to

his native town, where he held various magistracies, and was appointed priest of Apollo. Plutarch was married happily, and had several children. He was still living in 120, but the time of his death is not known. His great work is entitled—"Parallel Lives," and consists of biographies of 46 eminent Greeks and Romans, arranged in pairs, each pair accompanied by a comparison of characters. They are written with a moral purpose, and present not orderly narratives of events, but portraits of men, drawn with much graphic power, with great good sense, honesty, and kind-heartedness. Few books of ancient or modern times have been so widely read, so generally admired, as these "Lives." The English translation by the Langhorns is well known; less known, but more spirited, is that by North, made from Amyot's French version, and published in 1579; and some of the Lives have been translated by Mr George Long. A new edition of the translation called Dryden's, revised by Clough, appeared in 1839. Plutarch's "Lives," as tested by modern criticism, are not historical authorities; they were written with a practical, not a critical, aim. They set before us the most famous types of Greek and Roman character as understood by a careful, learned, imaginative, and philosophical writer of Trajan's time. To Englishmen, beside their intrinsic value, they possess the special interest of having been Shakespeare's main authority in his great classical dramas. They were accessible to him in North's version; and the correspondence between the Plays and the Lives is traceable "in incident upon incident, personage after personage, and in some places almost line after line and word after word." Most of Plutarch's other writings are ethical, and are entitled "Moralia."

POCOCK, Dr EDWARD, a learned English critic and commentator, famous for his great skill in oriental languages, was born at Oxford, in 1604; received his education at Magdalen and Corpus Christi Colleges; was named professor of Arabic; twice visited the Levant, for the purpose of collecting ancient manuscripts and coins; was afterwards Hebrew professor at Oxford, rector of Childrey, and canon of Christchurch; and died in 1691. Among his works are, "Specimen Historiæ Arabum," a Latin translation of the Oriental History of Abulfaragius, a Latin translation of the Annals of Eutychius, "Commentaries on the Minor Prophets," &c. Dr Pockock also translated into Arabic the treatise of Grotius "De Veritate Religionis Christianæ," and rendered valuable assistance in the preparation of the English Polyglott Bible. Died, 1694.

POCOCK, ISAAC, painter and dramatist, was born at Bristol, in 1782. His father distinguished himself as a marine painter; and Isaac, appearing to have the same genius, was placed first with Romney, and afterwards under Sir William Beechey. He gained the first prize given by the British Institution, for his picture of the murder of Thomas à Becket. He afterwards painted other pictures, but becoming independent, he gradually relaxed in the prosecution of his art, and retired to Maldenhead, where

he occasionally used both his pencil and pen, and produced many dramatic pieces, the greater part of which were successful. Here he was nominated to the commission of the county of Berks. He died, August 23, 1835. He was the author of about 40 melodramas, farces, and operatic pieces; among which were, "The Miller and his Men," "Hit or Miss," "John of Paris," "Robinson Crusoe," "Moutroue," &c.

POCOCKE, RICHARD, a learned prelate and traveller, was born at Southampton, in 1704; received his education at the free-school there, of which his father was master, and at Corpus Christi College, Oxford; travelled in the East from 1737 to 1742; and on his way home, was one of the party of Englishmen who, with William Windham, father of the statesman, at their head, set they then virtually discovered. Pococke was successively, precentor of Waterford, archdeacon of St Patrick's, bishop of Ossory, and of Meath; and died in 1765. His "Description of the East and of some other Countries," appeared in 1741—45, in 3 vols. folio.

POE, EDGAR ALLAN, a young American littérateur, born at Baltimore in 1811. He had fine natural talent, and received a good education, but threw away all his advantages, and shortened his life by his immoral and drunken habits. Died in a hospital of his native city, after a restless wandering life, in October, 1849. He has left a volume of Tales and one of Poems, which were contributed to periodicals, and which display singular power of imagination, a quick sense of the beautiful, much humour, and great command of impressive and also musical language. His tales furnish striking examples of what is now called "sensational" writing.

POELENBURG, CORNELIUS, painter, was born at Utrecht, in 1586. He was a disciple of Abraham Bloemart, and completed his studies at Rome. On his return he received much encouragement from Rubens; and Charles I. invited him to England, where he painted a number of beautiful landscapes, principally of a small size, and which are now rare. Died at Utrecht, 1660.

POGGIO BRACCIOLENI, a distinguished Italian scholar, was born at Terranuova, in Tuscany, in 1380. He became one of the pupils of Emanuel Chrysoloras at Florence, and at the age of 22 entered the service of the pope, Sixtus IX., as apostolic secretary. This office he filled under the seven succeeding popes. He attended the Council of Constance, and was present at the trial and martyrdom of Jerome of Prague, of which he wrote an almost sympathizing account. Poggio especially distinguished himself by his persevering and successful researches in different countries of Europe for manuscripts of the works of ancient authors, and among those which he discovered were—the Institutions of Quintilian, several books of the Argonautics of Valerius Flaccus, the great philosophic poem of Lucretius, several Orations of Cicero, Columella's work on Agriculture, &c. About 1417 he visited England, and was entertained by Cardinal Beau-

ly used both his pencil and pen, and many dramatic pieces, the most of which were successful. He was appointed to the commission of the peace as deputy-lieutenant of the county. He died, August 23, 1835. He was the author of about 40 melodramas, operatic pieces; among which "The Miller and his Men," "Hit or Miss of Paris," "Robinson Crusoe," &c.

RICHARD, a learned prelate, was born at Southampton, and received his education at the free-school of which his father was master. He was educated at Christ Church, Oxford; and in 1737 to 1742; and returned home, was one of the party of the king, with William Windham, statesman, at their head, set out to visit Chamouni, which was first discovered. Pococke was precentor of Waterford, archbishop of Ossory, and died in 1765. His "Description of the Mountains and some other Countries," 4 vols. folio.

ALAN, a young American, was born at Baltimore in 1811. He had great talent, and received a good education. He threw away all his advantages in life by his immoral habits. Died in a hospital of fever, after a restless wandering life, in 1849. He has left a volume of poems, which were controversial, and which display a great deal of imagination, a quick sense of humour, and great originality. His tales furnish striking examples now called "sensational."

ARGENT, CORNELIUS, painter, was born in 1586. He was a disciple of Pieter Bloemart, and completed his education. On his return he received encouragement from Rubens, who invited him to England. He painted a number of beautiful pictures, especially of a small size, and was very rare. Died at Utrecht, 1660.

ACCIOLINI, a distinguished philosopher, was born at Terranova, in Sicily, in 1680. He became one of the most celebrated Chrysoloras at Florence, and in 1722 entered the service of Pope IX., as apostolic secretary. He filled under the seven popes. He attended the Council of Trent, and was present at the trial of Jerome of Prague, of which he was an almost sympathizing witness. He was especially distinguished for his persevering and successful labours in different countries of Europe for the works of ancient authors, those which he discovered in the ruins of Quintilian, several manuscripts of Valerius Flaccus, and the public poem of Imeretius, see Clacero, Columella's work on Agriculture. About 1417 he visited England, and was entertained by Cardinal Beau-

fort, bishop of Winchester. He stayed here several years. Poggio was of a violent temper, and was involved in quarrels with contemporary scholars, especially with Filelfo, Lorenzo Valla, and George of Trebizond; in which he displayed the greatest rancour, scurrility, and licentiousness. The principal works of Poggio are—his Funeral Orations, History of Florence, a treatise "De Varietate Fortunae," "Facetiae," "Epistolae," and various moral treatises or essays, all in Latin. He also made several translations from Greek authors. He spent his last years at Florence, where he was chosen chancellor of the republic, and died in 1459. His statue in the cathedral of Florence is the work of Donatello.

POISSONNIER, PIERRE ISAAC, an eminent physician, was born at Dijon, in 1720. He became, in 1749, professor of medicine in the College de France, and was the first who gave chemical lectures at Paris. In 1758, being first physician to the French army, he went to Russia, nominally to attend the Empress Elizabeth in her illness, but in reality to conduct some secret political negotiations. In 1764 he was appointed inspector-general of medicine in the ports and colonies, and died in 1793. M. Poissonnier wrote several practical works, but he is chiefly known by his method of procuring fresh sea water, for which he received a pension of 12,000 livres.

POLE, REGINALD, Cardinal, an eminent statesman, and archbishop of Canterbury in the reign of Queen Mary, was descended from the blood-royal of England, and born at Stourton Castle, in Staffordshire, in 1500. He was educated at Sheen monastery and Magdalen College, Oxford; and after obtaining preferment in the church, went to Italy, where he long resided. During his residence there he became the friend of Bembo, Contarini, Caraffa, and Aloysius Priuli, the last-named becoming his constant companion. On his return to England he opposed the divorce of Henry VIII. from Catharine of Aragon in such earnest terms, that the king drove him from his presence, and never saw him more. He again left England, was made a cardinal in Dec., 1536, and had the offer of the papedom on the death of Paul III. After he had left England Henry put to death his mother and other members of his family, for corresponding with him. He found protection at Rome, was employed as nuncio, and was named president of the Council of Trent. When Mary ascended the throne, Pole returned to England as legate, in which capacity he absolved the parliament from the sin of heresy, and reconciled the nation to the holy see. The very day after the burning of Cranmer the cardinal was consecrated archbishop of Canterbury; soon after which he was elected chancellor of both universities, survived the queen but one day, and died Nov. 18, 1558. He was buried in Canterbury Cathedral, but his tomb has long lain neglected and scarcely distinguishable.

POLI, GIUSEPPE SAVERIO, an eminent naturalist, was born at Molfetta, in Italy, in 1746, and studied in the university of Padua. He was the friend of Morgagni,

Faccolati, Poleni, and Valsecchi; and became director of the Military Academy at Naples, where he died in 1825. He was the author of a very popular "System of Natural Philosophy," and also of a work on the "Testacea."

POLLIDORO DA CARAVAGGIO. [CALDARA.]

POLLIGNAC, JULES, Prince de, prime minister of Charles X. of France, whose administration produced the revolution of 1830, was sprung from an ancient family, whose vicissitudes of fortune were remarkable even in revolutionary France, and which numbered among its members the famous Abbé de Polignac, who died, 1741. Driven from France in 1789, his parents, the duke and duchess de Polignac, repaired to Vienna; but scarcely had they reached that capital, before the fate of her late mistress and friend, Marie Antoinette, was communicated to his mother, and within a few days she fell a victim to her grief and affection. Deprived of a mother's care, young Polignac and his two brothers were educated in devoted attachment to their religion and the exiled royal family; and, before reaching manhood, Jules de Polignac proceeded to Russia, then a refuge for the royalists, and shortly afterwards repaired to Edinburgh, where the Count d'Artois, afterwards Charles X., resided. Under the mingled influences of religion and loyalty, he embarked with his brother Armand in Georges' conspiracy in 1804 against Napoleon. The conspiracy was detected; the brothers were arrested, tried, and condemned to death; but, at the intercession of Josephine and Madame Murat, the emperor's sister, the sentence of death was commuted to imprisonment, and the two young men were sent to Vincennes, where they remained six years. On the restoration of Louis XVIII. Jules de Polignac devoted himself heart and soul to the so-called party of the Congregation, in the interest of the pope, the church, and the Count d'Artois; and his services were rewarded by the pope conferring on him the title of a Roman prince, by which he has since been known. In 1823, Prince Polignac was sent as ambassador to London, where he remained six years; and the intrigues of the priest party being finally crowned with success, he returned to Paris in 1829, to assume the premiership of the new ministry; but the nation was loud in its expression of distrust, till at length the unconstitutional course that he adopted towards the Chambers was suddenly arrested by the "glorious three days," which led to his own overthrow, and the dethronement of his sovereign. Imprisoned and taken at Granville, he was tried before the Chamber of Peers, and condemned; but his life was spared; and, after undergoing a short imprisonment at Ham, he was allowed to go into exile. After some years, spent chiefly at Munich, he was allowed to return to France, though not to Paris; but the death of Charles X. and the duke d'Angoulême gave the last blow to a constitution already broken down by many reverses, and he sank into a state of melancholy, from which he never recovered. Born, 1783; died, 1847.

His brother Armand died about a month before him.

POLLIGNAC, MELCHIOR DE, a French cardinal and statesman, was born in 1661, at Puy on Velay, in Languedoc. He was employed in some negotiations at Rome in 1689, was sent ambassador to Poland four years later, assisted in 1710 in negotiating the peace of Utrecht, and was made cardinal in 1711. During the regency he was banished to his abbey, but afterwards he was recalled, and appointed agent for French affairs at Rome. In 1706 he was made archbishop of Auch, and died in 1741. The abbe de Pollignac was an accomplished scholar and brilliant orator. He was admitted to the French Academy in 1704, and subsequently to the Academy of Sciences and of Inscriptions. He wrote a Latin poem entitled "Anti-Lucertus," which has often been reprinted, and was translated into English by Mr. Canning.

POLIZIANO, or POLITIANUS, ANGELO, an eminent Italian scholar, was born in 1454, at Monte Pulciano, in the Florentine territories, whence he derived the appellation by which he is more usually known than by that of CINIUS, his family name. He assumed the ecclesiastical habit, and acquired by his accomplishments the favour of Lorenzo the Magnificent, who made him tutor to his children, and presented him with a canonry in the cathedral of Florence, which he held with the professorship of the Greek and Latin languages. He attended Lorenzo on his death-bed with great tenderness and affection. Among the most esteemed of his writings are, "A Collection of Greek Epigrams," the "History of the Conspiracy of the Paris," the drama of "Orpheus," a Latin version of Herodotus, and Critical Observations on the Greek and Roman writers. Died, 1494.

POLK, JAMES KNOX, ex president of the United States of America, was born in North Carolina, 1795. After an honourable university course, he became a member of the Tennessee bar in 1820, and pursued his professional career with such success, that he was soon marked out by his countrymen for the highest services at their command. In 1825 he was elected to congress, where he became conspicuous for firmness, regularity, and assiduity, and after sitting in congress 14 years, two or three of which he was speaker, he was elected president of the federal republic in 1844. His administration was distinguished by various important events, bearing on the fortunes of the United States. By the annexation of Texas and California he extended the boundaries of his country, he laboured to organize the national treasury on the principles of the constitution, and introduced into the government many financial and commercial improvements. Died, 1849.

POLLAIUOLO, ANTONIO, Italian painter and sculptor, was born at Florence, probably in 1430. He was apprenticed to a goldsmith, and became assistant to Ghiberti. Ranked among the best goldsmiths and enamellers of his time, he applied himself to painting, and worked with his brother Piero, a pupil of Andrea del Castagno. He was a good

anatomist, and was the first painter who made dissections for the purposes of art. In advanced age he turned to sculpture, in which he displayed the impetuosity and extravagance of expression which marked all his previous works. Among his best paintings was the "Marriage of St. Catherine," now in the National Gallery. After Pope Sixtus IV. and Innocent VIII. and the bronze doors at St. Peter in Vincoli. Died, 1498.

POLLEXFEN, Sir HENRY, an eminent English judge, who in 1668 was one of the counsel for the seven bishops. After the revolution he was knighted, and made chief justice of the Common Pleas. Died, 1690.

POLLIO, CAIUS ACILIUS, a Roman orator and writer, was born B. C. 70. He was already distinguished when the civil war broke out between Caesar and Pompey, and he took the side of Caesar. He was present at Pharsalia and after Caesar's death became a partisan of Antony, who committed to him the government of Gallia Transpadana. He was chosen consul, B. C. 61, and assisted in the reconciliation of Augustus and Antony. He obtained a triumph the next year for a victory over the Dalmatians, then retired in great part from public life, and died, B. C. 4. Pollio was a liberal patron of literature and the fine arts, and was the first to establish a public library at Rome. Varro and Cicero were his friends, and to him Varro addressed his fourth Eclogue. The works of Pollio are lost.

POLLON, ROBERT, a Scotch clergyman and poet, was born in 1706, at Bingham, in Roxburghshire. He was intended for the church, he was sent to the university of Glasgow to study theology, but his health became so much impaired by study, that he had scarcely entered on his ministry before he found it necessary to quit the north for Italy, in order to try the effect of change of climate. He left Scotland in August 1737, but he had only proceeded to Southampton, when his malady increased to such a degree as precluded all hope of recovery, and he died there in the following month. His principal production is entitled "The Course of Time, a poem in 10 books, which has passed through more than twenty editions, and "Tales of the Covenanters."

POLLUX, JULIUS, was born in Egypt, A. D. 100. He taught rhetoric at Athens and was appointed preceptor to the Emperor Commodus, for whose use he drew up his "Onomasticon, or Greek Vocabulary."

POLLO MARCO, the celebrated traveller of the 15th century, was the son of a Venetian merchant, who, with his brother had penetrated to the court of Kublan the great khan of the Tartary. This prince bear him equal entertained with their account of Europe, made them his ambassadors to the pope, in which they travelled back to Rome, and with two missionaries, once more visited Tartary, accompanied by the young Marco, who became a great favourite with the khan. Having acquired the different dialects of Tartary, he was employed on various embassies, and after a residence of 17 years, all the three Venetians returned to their

and was the first painter who

PHILIP, a Scotch clergyman,
 born in 1709, at Inverness,
 where he was educated for the
 law. Being intended for the
 ministry he went to the university of
 study theology, but his health
 was impaired by study, that he
 entered on his ministry before
 necessary to quit the study for
 to try the effect of change of
 life. So that in August 1731
 he proceeded to Scotland, and
 he was appointed to such a degree
 of hope of recovery and he was
 a hope of recovery. His principles
 are contained in "The Course
 of the 16th century, which has passed
 than twenty editions, and
 Governments.

PHILIP, was born in Egypt at
 Thabeat, at Athens and was
 a member to the Empire. Some
 say he drew up the "Glossary
 of the Greek Vocabulary."

own country in 1296, with immense wealth.
 Marco afterwards served his country at sea
 against the Genoese, and, being taken pri-
 soner, remained many years in confinement,
 the tedious of which he beguiled by com-
 posing the history of his "Travels." Marco
 Polo relates many things which appear im-
 possible, but the general truthfulness of his
 narrative has been established by succeed-
 ing travellers. An English translation of
 his "Travels of Marco Polo" was published by
 William Marsden, the orientalist, in 1817.

POLWHELE, RICHARD, antiquary, his-
 torian, poet, and miscellaneous writer,
 whose works are extensively voluminous,
 was born at Truro, in 1660, where he was
 also educated, and where, when a boy, with
 the assistance of the celebrated Dr. Wolcot,
 he was a physician in that town, he made his
 first essay as a poet. His principal works
 are: "The History of Cornwall," 3 vols., 4to.
 "The History of Devonshire," 3 vols., 8vo.
 "Traditions and Recollections," 2 vols., 8vo.
 "The Rural Doctor," 1 vols., 8vo. "Biographical Sketches
 of Cornwall," 3 vols., 8vo. "Anecdotes of Me-
 thuenism," with poems, sermons, and other
 writings of a miscellaneous character. Died in
 Truro, aged 78, March, 1838.

POLYBENS, a Greek author in the 2nd
 century, who wrote books on the "Strata-
 gems" of illustrious generals. He appears
 to have been a Macedonian, and, after serv-
 ing in the army, he became an advocate
 under Augustus and Verus.

POLYBENS, the Greek historian, was
 born at Megalopolis, probably about B. C. 204.
 He was the son of Lycortas, who succeeded
 Philipponas as general of the Achæan
 League, and he profited both by the example
 and instructions of Philipponas. In the
 federal possession of the latter, from Messene
 to Megalopolis, Polybicus bore the urn
 containing the ashes of his friend. He was
 one of the thousand Achæans carried to Italy
 in 168 on the charge of not having assisted the
 Romans against Persesus. He lived in the
 house of Emilius Paulus, and became the in-
 timat friend of his son Scipio. He returned with
 his fellow-citizens to Greece in 161, accompa-
 nied by the siege of Carthage, whence
 he returned back to Greece, and rendered
 services to his country, then
 conquered by the Romans. His great work
 is a general history of the affairs of Greece
 and Rome from B. C. 220 to B. C. 146, the
 epoch of the fall of Corinth, prefaced by a
 summary view of early Roman History.
 His only of his forty books is now extant,
 with some fragments of the rest, but these
 are among the most important literary re-
 mains of antiquity. For Polybicus spared no
 pains to ascertain facts, studied and travelled
 extensively, had practical acquaintance both
 with politics and war, and insight into the
 manners of nations. His aim was didactic,
 and a large part of his history consists of
 questions. He wrote several other works,
 but they have perished. He died at the
 age of 62.

POLYCARP, St. one of the apostolical fa-
 thers of the church, and a Christian martyr,
 who, according to tradition, was a disciple of
 the Apostle John, and by him appointed
 bishop of Smyrna. He made many converts,

enjoyed the friendship of Ignatius, and op-
 posed the heresies of Marcion and Valenti-
 nus, but during the persecution of the
 Christians under Marcus Aurelius, he suf-
 fered martyrdom with the most heroic for-
 titude, A. D. 166. His short "Epistle to the
 Philippians" is the only one of his writings
 that has been preserved.

POLYCLETUS, one of the greatest Greek
 statuary and sculptors, was born either at
 Sicyon or Argos, and was a fellow-pupil of
 Phidias and Myron under Ageladas of Argos.
 Among his most famous works were the
Doryphorus, or spear-bearer, so noble an ideal
 of the human figure that it was named the
Canon, or Rule of Art, and the colossal
 statue of Hera, of ivory and gold, for her
 temple near Argos. Polycletus flourished
 about B. C. 450—410.

POLYDORUS VERGIL, "VERGIL,"
POLYGNOTUS, of Thasos, one of the
 greatest Greek painters, became a citizen of
 Athens and the friend of Cimón. His prin-
 cipal works were executed at Athens and
 at Delphi—at the former city in the temple
 of Thesens, the Propylæa, &c., and at the
 latter in the temple of Apollo, where he
 painted many scenes of the Trojan war.
 Polygnotus is supposed to have settled at
 Athens about B. C. 463, and he was still
 living in 411.

POMBAL, SEBASTIAO JOSE CARVALHO
MELHO, Marquis of, a Portuguese states-
 man, was born at Soure, in 1699. After
 having been ambassador to London and Vi-
 enna, he was, in 1750, appointed secretary
 of state for foreign affairs, and, in 1766,
 prime minister. He introduced many re-
 forms and changes in the government, but
 as his measures were frequently severe and
 arbitrary, he made many enemies, and on
 the death of the king, in 1777, he was dis-
 graced, and exiled to his estates, where he
 died in 1782.

POMFRET, JOHN, an English poet, was
 born at Luton, in Bedfordshire, in 1667; was
 educated at Queen's College, Cambridge,
 and obtained the living of Malden. He was
 the author of "The Choice," a poem which
 was once popular, but owing to an equivocal
 passage therein, Dr. Compton, bishop of
 London, thought him unfit for the clerical
 office, and refused to induct him to another
 benefice. Died, 1763.

POMPADOUR, JEANNE ANTOINETTE
POISSON, Marchioness de, the mistress of
 Louis XV. in whose affections she succeeded
 Madame de Chateauroux, was the daughter
 of a financier, and born in 1720. At the age
 of 21 she was married to M. d'Étiolles, first
 attracted the king's notice while he was
 hunting in the forest of Senart; appeared at
 court in 1745, under the title of marchioness
 of Pompadour, and died in 1764, aged 44
 years. She certainly used her influence
 with the king in promoting the progress of
 the fine arts, but her cupidity and extrava-
 gance were unbounded, and many of the
 evils which oppressed France in the suc-
 ceeding reign have been attributed to the
 power she possessed of filling the most im-
 portant offices of the state with her favour-
 ites, whose measures were generally inju-
 rious, both at home and abroad.

POMPEIUS MAGNUS, CNEIUS, the Triumvir, was son of Cn. Pompeius Strabo, and was born B. C. 106, six years before his great rival, Julius Cæsar. He served under his father in the Italian campaigns, and at 23 years of age, as an adherent of the aristocratic party, he raised three legions and joined Sulla, who, for his successes against the Marian forces, greeted him with the title of Imperator. After further successes in Sicily and Africa, he received the surname of *Magnus*, and compelled Sulla to allow him a triumph. In 77 Pompey was sent to reinforce Metellus engaged in the war with Sertorius in Spain; and there he served till 71, when, after the murder of Sertorius, the war was ended. On his march homeward he cut off the fugitive gladiators, remnants of the defeated army of Spartacus. He was soon after chosen consul with Crassus, and enjoyed a second triumph. At this time Pompey announced his adhesion to the popular party, and had some great measures of reform carried: the chief of which were the restoration of the Tribunes and a change in the constitution of the Law Courts. In 67 he was invested with the command of the expedition against the pirates of the Mediterranean, and in forty days he had cleared the sea west of Greece. He pursued and defeated them off the coast of Cilicia, and the whole campaign was ended by their submission within three months. The next year Pompey was appointed to the chief command against Mithridates, whom he defeated. He received the submission of Tigranes of Armenia, and made Pontus a Roman province. He next conquered Syria and Judæa, took Jerusalem after a three months' siege; and intruded into the Holy of Holies. After regulating the affairs of the East he returned to Italy, and in 61 had the honour of a third triumph. By the refusal of the Senate to confirm his arrangements in the East, he was induced to join the party of Cæsar, and formed with him and Crassus the alliance known as the first triumvirate. He also married, for his fourth wife, Julia, the daughter of Cæsar. In 55 he was again consul with Crassus, and Spain was assigned him for his province; but his popularity and influence were waning. The death of Julia loosened his alliance with Cæsar, and by the death of Crassus the triumvirate was dissolved. During the disorders which followed the death of Clodius Pompey was made sole consul; rejoined the aristocratic party, and resolved on war with Cæsar. As Cæsar advanced to Rome Pompey quitted it, and soon after left Italy and established himself at Dyrrachium, where he defeated Cæsar's attempt to blockade him. The great final conflict took place on the plain of Pharsalia, B. C. 48, when Pompey was defeated and fled to Egypt. He was murdered by order of the ministers of the young king immediately on his arrival. His body was left on the sands, and his head taken to Cæsar, who shed some manly tears at the sight and had it burnt with fitting honours.

POMPEIUS MAGNUS, SEXTUS, younger son of the Triumvir, born B. C. 75. He was sent to Lesbos with Cornelia, his step-mother, during the civil war; accompanied his fa-

ther to Egypt after the battle of Pharsalia, saw him murdered; and after the defeat of the Pompeian party at Thapsus escaped to Spain. He there joined his elder brother, after whose defeat and death his brother gradually collected followers, and made himself master of the north of Spain. He also obtained a fleet and took possession of Sicily, cutting off the supplies of corn sent from the East for Rome. He was declared an outlaw by the triumvirs, but they were compelled to make peace with him. He was betrayed by Antony, and war began again. Pompey was finally defeated by Agrippa off Naulochus, in 36; passed into Asia, and was there captured and put to death by the officers of Antony.

POMPONIUS LÆTUS, JULIUS, sometimes styled Peter of Calabria, a learned antiquary of the 15th century, was professor of rhetoric at Rome, and the founder of an academy, which was suppressed by Paul II., and many of the members imprisoned and put to the torture; but Sixtus IV. released them, and restored POMPONIUS to his professorship. Died, 1498.

POND, JOHN, F. R. S., an eminent English astronomer, born about 1767, who for a period of 25 years held the important office of astronomer-royal, died at his house, in Greenwich, in September, 1836, and his remains were interred in the same tomb, at Ler, which for 93 years had given shelter to the ashes of his celebrated predecessor, Dr Edmund Halley. According to the testimony of Sir Humphrey Davy, "the enthusiasm with which he pursued his favourite science, and the sacrifices of time, health, and money that he made in consequence, were great indeed. As a practical astronomer he had scarcely any equal; his talent for taking observations was quite unique; and to his zeal our national observatory is indebted for many of the new instruments which have, confessedly, rendered it so pre-eminent and complete."

PONIATOWSKI, STANISLAUS AGUSTUS, the last king of Poland, was the son of a private gentleman of Lithuania, and was born in 1732. Having been fortunate enough to please the grand-duchess, afterwards Catharine II., he was elected king in 1764. At the commencement of his reign he gave many proofs of his moderation and love of justice, but his attempts to introduce some modifications into the Polish constitution rallied a powerful party against him. The Protestants, who were excluded from a place in the diet and from the right of votes, claimed the restoration of the treaty of Oliva, made in 1699. The ministers of Russia, England, and Prussia favoured their claim, and Stanislaus was also inclined to grant their request, but the Catholic bishops protested against the measure, as favouring the enemies of the state. Russian troops soon after appeared at the gates of Warsaw, when the Catholics formed the celebrated "Confederation of Bar." Pulaski, one of their chiefs, proposed carrying off the king, and laid wait for him near the town. When the royal carriage approached, the party seized the king, and placed him on one of their horses. The night was dark, but they

pt after the battle of Pharsalia. He was murdered; and after the defeat of Pompey at Thapsus escaped to the party at which he fled. He was defeated and slain by his elder brother, and his followers were collected and made him of the north of Spain. He also fled and took possession of Sicily, and the supplies of corn sent from Rome. He was declared an outlaw, but they were compelled to make peace with him. He was finally defeated by Agrippa in 36; passed into Asia, and was arrested and put to death by the emperor Augustus.

PONTIUS LÆTUS, JULIUS, surnamed Peter of Calabria, a learned man of the 15th century, was professor of law at Rome, and the founder of a sect which was suppressed by Paul II. of the members imprisoned and tortured; but Sixtus IV. released and restored Pampontius to his property. Died, 1498.

PONTOUS, P. R. S., an eminent Engineer, born about 1767, who for a number of years held the important office of surveyor-general, died at his house, in London, in September, 1836, and his remains were interred in the same tomb, at St. George's, where for 93 years had given shelter to the remains of his celebrated predecessor, Dr. Hutton. According to the testimony of Humphrey Davy, "the enthusiasm which he pursued his favourite science, the sacrifices of time, health, and that he made in consequence, indeed. As a practical astronomer, his observations were quite unequalled; and our national observatory, and many of the new instruments, confessedly, rendered it so perfectly complete."

PONTOUS, STANISLAUS AUGUSTUS, king of Poland, was the son of a nobleman of Lithuania, and was crowned king in 1764. He was a weak and dissipated monarch, and was overthrown by the Russian and Prussian troops in 1795. He was confined in a prison at St. Petersburg, and died there in 1801. He was the last king of Poland.

forced the animal forward until they were exhausted; they then waited, dragging Stanislaus with them, but at dawn of day, finding they had missed his way, and that they were only a short distance from the city, they were only a short distance from the city, all, except Kosinski, fled. Struck with remorse, he implored the king's pardon, which was readily granted, and, on his return to his palace, the king settled a pension on the penitent chief. But Stanislaus still continued to be troubled by the divisions of his people. In 1772 the confederation was broken up, and the first partition of Poland took place. In 1787 the Empress Catharine visited the Crimea, and the king obtained from her a promise of security for his kingdom; the Emperor Joseph II. also made him a like promise. Nevertheless, in 1792 the Austrians and the Prussians invaded Poland, and, in defiance of the efforts of the brave Kosciusko, made the second partition of the unhappy kingdom, and Stanislaus was compelled to sign his abdication. He was then removed to St. Petersburg, and lived privately until his death, in 1798.

PONJATOWSKI, Prince JOSEPH, an illustrious Polish general, was the nephew of the preceding, and born at Warsaw, in 1763. At the age of 16 he entered into the service of Joseph II. of Austria, but quitted it for the purpose of aiding his country, the moment that he saw there were hopes entertained of her throwing off a foreign yoke. He served with courage against the Russians, under Kosciusko, who gave him the command of a division, at the head of which he distinguished himself at the two sieges of Warsaw. After the surrender of the city, he went to Vienna, and, rejecting the offers of Catharine and Paul, lived in retirement. On his return to Poland, at his estates near Warsaw. The creation of the duchy of Warsaw rekindled the hopes of the Polish patriots, and Poniatowski accepted the place of minister of war in the new state. In 1809 he commanded the Polish army against the superior Austrian force, which was sent to occupy the duchy; compelled it to retire, rather by skillful manoeuvres than by force of arms, and penetrated into Gallatin. In the war of 1812, against Russia, he was again at the head of the Polish forces, and distinguished himself in all the principal affairs of this chequered campaign. After the battle of Leipzig, during which Napoleon treated him marshal of France, he was ordered to cover the retreat of the French army. The enemy were already in possession of the suburbs of Leipzig, and had drawn light troops over the Elster, when the prince arrived, with a few followers, at the river, the bridge over which had been broken up by the French. The brave Poniatowski, already wounded, plunged with his horse into the stream, and was drowned, on the 19, 1813. His body was found on the bank, and, having been embalmed, was buried at Warsaw, with all the honours of his rank, in the order of the Emperor Alexander.

PONSONBY, Sir FREDERIC CAVENTISH, K. C. B., a distinguished cavalry officer and major-general in the British army, was the second son of the Earl of Hesborough, and born in 1783. He was appointed to a com-

pany in the 10th dragoons in 1806, and after passing through the intermediate grades of rank, obtained a majority in the 23rd light dragoons in 1807. During the Peninsular war this gallant soldier had frequent opportunities of distinguishing himself, and was regarded as the *beau idéal* of a cavalry officer. At Tula, Barrosa, Vimeira, Salamanca, and Vittoria, he performed some of the most brilliant exploits recorded in that fierce and enterprising era of the war; and during the whole of the retrograde movement of the army from the Douro, a day seldom passed without his being more or less engaged with the enemy's advance. But we must omit the details of his operations in the Peninsula, to describe the termination of his splendid career on the field of Waterloo. In the absence of his commanding officer, General Vandeleur, who had a few minutes before led forward the 16th light dragoons, he observed a French column rapidly advancing into the small valley which lay between the two armies. There was not a moment to lose: Col. Ponsonby, calculating the column at about 1000, exclaimed, "They must not be allowed to come further," and with his well known "Come on, 12th!" dashed down the field, followed by his men. At the very moment when they had driven their opponents back into the enemy's lines, and the colonel was anxious to draw off his comrades, who were now fighting at fearful odds, he received a cut on his right arm, which caused his sword to drop, and immediately afterwards he received another on his left, which he raised to protect his head. By the latter he lost the command of his horse, which galloped forward, and Col. Ponsonby, unable to defend himself, received a blow from a sword on his head, which brought him senseless to the ground. There he lay, exposed on the field, during the whole of the ensuing night. After being wantonly pierced through the back by a lance, plundered by a French tirailleur, rode over by two squadrons of Prussian cavalry, and encumbered for some hours by a dying soldier lying across his legs, he was at length rescued by an English soldier, whom he persuaded to stay by him until morning, when a cart conveyed him to the village of Waterloo. He had received seven wounds, but by constant attention he at length recovered. Colonel Ponsonby was one of the brightest ornaments of the army, and a universal favourite. To the most chivalrous bravery he united military talents of no ordinary cast, which were guided by a remarkable calmness of judgment and coolness of decision. No lesson of experience was ever lost upon him; and his authority in matters of his profession, particularly the cavalry service, was regarded with general respect. He died Jan. 11, 1837; being at the time a major-general in the army, K. C. B., and colonel of the royal dragoons, besides enjoying the honour of four foreign orders of knighthood. A monument to him, designed by Theed, and executed by Bailey, has been erected in St. Paul's.

PONTE, JACOPO DA. (RASSANO.)

PONTIUS, or DU PONT, PAUL, a celebrated Dutch engraver, born at Antwerp

about 1596. He executed many good prints after Rubens and Vandeyck: the "St Roch," "Slaughter of the Innocents," and "Tomiris with the head of Cyrus," being among the best. He was living in 1653.

PONTOPIIDAN, ETC., a Danish prelate, distinguished as a theological and historical writer, was born at Aarhus, in 1698; became bishop of Bergen in 1746; and died in 1764. His principal works are "Annals of the Danish Church," and the "Natural History of Norway."

PONZ, ANTONIO, Spanish painter, topographer, and writer on art, was born in 1725. He studied painting at Madrid and at Rome, where he was also attracted to the study of antiquities. He was employed to decorate the Library of the Escorial with portraits of eminent Spanish authors, and afterwards travelled through a large part of Spain, chiefly to gather information on works of art. The fruits of these journeys appeared in his voluminous work entitled "Viage de Espana." Ponz was secretary to the Academy of the Fine Arts, Madrid, F.S.A., London, and a member of several other Academies. Died, 1792.

POOL, MATTHEW, a Nonconformist minister, was born at York, in 1621. He studied at Cambridge, entered the church, and was ejected from a London benefice under the Act of Uniformity. From that time he applied himself to writing. He took part in the controversies with the Romanists and the Socinians, and for his zeal against Popery, according to the deposition of Titus Oates, his name was among those aimed at in the Popish Plot. On this he went to Amsterdam, where he died in 1679. Besides "Sermons," he wrote "Annotations on the Bible;" but his greatest work was the "Synopsis" of criticism and commentary on the Holy Scripture, collected laboriously from the works of all preceding biblical scholars, and now mournfully useless.

POPE, ALEXANDER, the celebrated poet, was born in 1688, in Lombard Street, London, where his father had carried on an extensive business as a linen-draper, and amassed a considerable fortune. His parents being of the Romish persuasion, he was placed at 8 years of age under one Taverner, a priest, who taught him the rudiments of Latin and Greek. At the age of 12 he retired with his parents to Binfield, in Windsor Forest, where his father had purchased a small estate. Here he wrote his "Ode on Solitude," which appears as the first fruits of his poetic genius. It was here also that he first met with the works of Waller, Spenser, and Dryden; but on perusing Dryden he abandoned the rest, and studied him as his model. At the age of 16 he wrote his "Pastorals," which procured him the friendship of the principal wits of the time. His next performance was the "Essay on Criticism," published in 1711. "The Messiah" appeared first in the Spectator, and this was followed by his "Ode on St Cecilia's Day." About this period also he produced the "Rape of the Lock," occasioned by Lord Petre's cutting off a ringlet of Mrs Arabella Fermor's hair. He next brought out his "Epistle from Eloisa to Abelard," "The

Temple of Fame," and "Windsor Forest." Pope now undertook his translation of the "Iliad," which he published by subscription, and cleared by it above £500, part of which he laid out in the purchase of a house at Twickenham, whither he removed in 1715. After completing the "Iliad," he undertook the "Odyssey," for which also he obtained a liberal subscription. He was, however, materially assisted in these works by the learning and abilities of others, particularly Broome, Fenton, and Parnell. The reputation he had acquired by the success as well as the merit of his works, procured him numerous enemies among writers of the minor class, from whom he experienced frequent spleenic attacks. Perhaps it would have been more to his honour had he taken no notice of them, but in 1727, he vented his resentment in a mock heroic, entitled "The Dunciad," in which he took more than warrantable revenge, and, what was worse, exposed to ridicule many ingenious and respectable persons who had given him no offence. In 1726, by the advice of Lord Bolingbroke, he turned his pen to a moral and philosophical subject, the result was his "Essay on Man," an ethical poem, addressed to that statesman, which attracted universal admiration. It was followed by "Imitations of Horace," accompanied by a "Prologue and Epilogue to the satires," and by "Moral Epistles," which exhibit him as a satirist of the school of Boileau. In 1737, Pope printed his "Letters" by subscription, for which he alleged as his excuse, that some of his epistles had been surreptitiously published by Edmund Curll. In 1742, at the suggestion of Warburton, he added a fourth book to his "Dunciad," intended to ridicule useless and frivolous studies, in which he attacked Colly Cibber, then poet-laureate. Cibber retaliated by a pamphlet which told some ludicrous stories of his antagonist, and so irritated the latter, that, in a new edition of the "Dunciad," he deposed Theobald, its original hero, and promoted Cibber in his place, who although a great coxcomb, could scarcely be deemed a dunce. An oppressive asthma began now to indicate a commencing decline; and while he was engaged in preparing a complete edition of his works, he expired, May 30, 1744, aged 56. The portrait of Pope, by Jervas, is in the National Collection.

POPE, SIR THOMAS, statesman and a patron of learning, was born at Redington, in Oxfordshire, in 1568, was educated at Eton, and, after studying at Gray's Inn, was called to the bar. He was knighted in 1599, and held various important offices under Henry VIII., Edward VI., Mary, and Elizabeth. He was the intimate friend of Sir Thomas More, to whom, by order of the king, he communicated the sad tidings of his intended execution. In 1534 he founded Trinity College, Oxford; and died in 1598. His career is a remarkable instance of success in difficult times, by the practice of discretion and reserve. He took part in public affairs, did not oppose any government, and yet did nothing dishonourable.

POPHAM, SIR HOME RIGGS, naval commander, was born at Gibraltar, in 1762. He

of Fame," and " Windsor Forest," which he published by subscription, cleared by it above £300, part of which he laid out in the purchase of a house at Kenilworth, whither he removed in 1750, after completing the "Iliad," he took the "Odyssey," for which also he had a liberal subscription. He was materially assisted in these works by the learning and abilities of others, especially Broome, Fenton, and Parnell. Station he had acquired by the success of the merit of his works, procuring numerous enemies among writers of the minor class, from whom he experienced frequent epigrammatic attacks. Perhaps he has been more to his honor had no notice of them, but in 1737, he was his resentment in a mock heroic, "The Dunclad," in which he took a warrantable revenge, and, what is exposed to ridicule many ingenious and respectable persons who had given offence. In 1739, by the advice of a friend, he turned his pen to a philosophical subject, the result of which was "Essay on Man," an ethical poem, in which that statesman, which attracted the admiration. It was followed by "The Iliad," accompanied by a translation of Epilogue to the Satires, "Moral Epistles," which exhibit a satirical of the school of Boileau. Pope printed his "Letters," by subscription, for which he alleged as his excuse, that some of his epistles had been surreptitiously published by Edmund Curll. In the suggestion of Warburton, he published his fourth book to his "Dunclad," in which he ridiculed useless and frivolous persons, in which he attacked Colley Cibber, laureate. Cibber retaliated by a poem, which told some ludicrous stories of the poet, and so irritated the latter, that he published a new edition of the "Dunclad," in which he rebuked, its original hero, and Cibber in his place, who although a comical, could scarcely be deemed a poet. An oppressive asthma began now, and a commencing decline; and he was engaged in preparing a continuation of his works, he expired, May 30, 1744. The portrait of Pope, by Sir Thomas, statesman, and by Sir Thomas, statesman, was born at Dedington, Berkshire, in 1588, was educated at Oxford, after studying at Gray's Inn, was called to the bar. He was knighted in 1640, and held various important offices under Charles I., Edward VI., Mary, and Elizabeth. He was the intimate friend of Sir John More, to whom, by order of his execution. In 1634 he founded a school at Oxford, and died in 1638. It is a remarkable instance of recalcitrant times, by the practice of this reserve. He took part in public and did not oppose any government, and was distinguished.

M. SIR HOME RIGGS, naval commander born at Gibraltar, in 1758. He

served as lieutenant in the American war; and rose to the rank of post-captain soon after the commencement of the war with France, having rendered essential service in the duke of York in Holland. He was employed in the Baltic, and, in 1800, appointed to a command in the East Indies, in 1803 he entered the Red Sea, and settled on advantageous terms of commerce for the British merchants. In 1805 he commanded the expedition against the Cape of Good Hope, which he took, and afterwards engaged in an expedition against Buenos Ayres, for which, as he was charged with acting without sufficient authority, he was tried by a court-martial, and reprimanded. He finally obtained the situation of commander-in-chief on the Jamaica station; and had but just returned to England in 1810, when he died. Sir Home Popham was fellow of the Royal Society, and a knight of the Bath.

POPHAM, Sir JOHN, an eminent judge, was born in Somersetshire, in 1531. After serving the offices of attorney and solicitor-general, he was appointed, in 1581, chief justice of the King's Bench. He died in 1607. His "Reports and Cases," in folio, are esteemed.

PORDENONE (so called from his birth-place, his true name being GIOVANNI ANTONIO LICINIO), a painter of the Venetian school, and rival of Titian, was born in 1483. He executed many great works, both in fresco and oil, for Mantua, Genoa, and Venice; and died at Ferrara, in 1539.

PORLIER, JEAN DIAZ, surnamed EL MARQUESITO, a Spanish patriot and general, was born, about 1775, at Carthagena, in South America, where his father held a high military situation. He first entered the navy, and served as a midshipman at the battle of Trafalgar; but when the cry of independence spread through the Peninsula in 1808, he raised a guerrilla corps, of which he became a leader, and distinguished himself in a series of brilliant actions, and effected the celebrated retreat from Santander, closely pursued by a corps four times more numerous than his own. The regency then appointed him captain general of Asturias, in which station he remained till the restoration of Ferdinand VII. Having unsuccessfully attempted to restore the constitution of the Cortes in 1815, he was delivered over to the military authorities at Corunna, condemned, and executed.

PORPHYRY, or PORPHYRIUS, a Greek philosopher, whose original name was Malcus, was born at Tyre, in 233, studied under Origen and Lactantius; afterwards became at Rome a disciple of Plotinus, whose *Sehe* wrote; and died about 301. He wrote works against the Christian faith, which provoked numerous replies. It has not been preserved. Among those of his writings still extant, are his "Life of Plotinus," "Life of Pythagoras," "A Treatise on Abstinence from Animal Food," and "Questions on Homer."

PORPORATE, CARLO, a celebrated Italian engraver, born at Turin in 1741, died there in 1816. Among his *chef-d'œuvres* are the "Little Girl and the Dog," "Leda at the

Bath," "Susannah," and "Ehnoe and Paris." He was also a portrait painter, and his portraits are admired for their colouring and truth.

PORSON, RICHARD, an eminent critic, and professor of Greek in the university of Cambridge, was born in 1759, at East Ruston, in Norfolk, where he was first instructed by his father, who was the parish clerk, and afterwards by Mr Norris, the vicar. His proficiency in the classics was so great, that Mr Norris sent him to Eton in 1774, and in 1777 he went to Trinity College, Cambridge, where, in 1782, he was elected to a fellowship. In 1785 he took his master's degree, but having an objection to enter the church, he was under the necessity of resigning his fellowship, and, in 1793, was elected Greek professor. In 1797 he published the "Hecuba" of Euripides, which was followed by the "Orestes," the "Phœnissæ," and "Medea." One of his last literary works was an edition of "Æschylus." He enjoyed the reputation of being one of the best Greek scholars and critics of the age in England, notwithstanding which, he experienced little patronage—a circumstance partly attributable to his intemperate habits. Towards the latter part of his life he was appointed librarian to the London Institution, with a salary of £200 a-year; and it was there he died, in 1808. After his death were published his "Adversaria, or Notes and Emendations of the Greek Poets," and his "Tracts and Miscellanies." There is a life of Porson by the Rev. J. S. Watson, M.A.

PORTA, BACCIO DELLA. [BACCIO DELLA PORTA.]

PORTA, GIOVANNI BATTISTA DELLA, a natural philosopher and mathematician, was born at Naples, in 1540. He devoted a great part of his life to the sciences, established academies for their promotion, and was the inventor of the camera obscura. He wrote treatises on natural history, optics, hydraulics, physiognomy, and agriculture; and also produced nearly twenty dramatic pieces. The most celebrated of his works are the "Magie Naturalis libri XX.," part of which appeared in 1558; a treatise on Secret Writing; and "De Humana Physiognomonia," a remarkable work, frequently republished and generally known by translations. Died at Naples, 1615.

PORTALIS, JEAN ETIENNE MARIE, a French statesman, was born at Reaumont, in Provence, in 1746; and was at the commencement of the revolution one of the most distinguished advocates of the parliament of Aix. During the tyranny of Robespierre he was imprisoned, but subsequently became president of the Council of Ancients. He was proscribed by the Directory, in 1797, for the moderation of his principles, and fled to Holstein; but when Buonaparte became first consul, Portalis was recalled, and nominated minister for religious affairs, and grand cordon of the Legion of Honour. Died, 1807.

PORTER, GEORGE RICHARDSON, joint secretary of the Board of Trade, and an able cultivator of statistical science, was born in 1792. His first connection with the Board of Trade was at the direct request of Lord

Auckland, in 1832, when he was appointed chief of the statistical department. Under Lord Dalhousie, the superintendence of the newly formed railway department was also committed to his care. Both these offices he filled ably in 1846, till, on the retirement of Mr Macgregor, he was advanced to the post of joint-secretary. The greater part of the results of his study and labour will be found scattered throughout many official reports and papers contributed by him to the Statistical Society, the British Association, and other public bodies. But the most lasting monument of his talent and industry is his "Progress of the Nation," which has gone through several editions. Died, 1852.

PORTELL, SIR ROBERT KER, born at Durham, in 1780—distinguished in the arts, in diplomacy, in war, and in literature—was the son of a military officer, and brother to the novelists, Jane and Anna Maria Porter. Having a taste for drawing, he became a student of the Royal Academy, and soon showed his skill by the production of several altarpieces, of considerable merit, besides his large pictures of the "Storming of Seringapatam," the "Siege of Acre," and the "Battle of Agincourt," which latter was presented to the city of London. In 1804 he was appointed historical painter to the emperor of Russia, and during his stay at St Petersburg he gained the affections of the Princess Mary, daughter of Prince Theodore von Scherbatoff, to whom he was afterwards married. Though he had cultivated his talents as an artist, he had always shown a decided preference for the military profession; and on leaving Russia he accompanied Sir John Moore to Spain, in the hardships and perils of which unfortunate expedition he shared till its termination at Corunna. From 1817 to 1820 Sir Robert was engaged in travelling throughout the East. In 1826 he was appointed consul at Venezuela, in South America, where he continued to reside till 1841, when he left his mission on leave, and visited his old friends in Russia, with an intention of proceeding to England; but on the eve of the voyage he was seized with an apoplectic attack, and expired, May 3, 1842. His works consist of "Travelling Sketches in Russia and Sweden," 2 vols. 4to, "Letters from Portugal and Spain," "A Narrative of the late Campaign in Russia," "Travels in Georgia, Persia, Armenia," &c.

PORTER, ANNA MARIA, younger sister of Miss Jane Porter, and of Sir R. K. Porter, was the daughter of an officer in the army, who died a few months after her birth. With her orphan family, Mrs Porter retired to Edinburgh, where Anna Maria's early talents, accompanied by an enthusiastic love for the beautiful in nature and the pure in morals, quickly developed themselves. After a time they settled in the neighbourhood of London; the sisters distinguishing themselves in the literary world, while their private lives were models for imitation. Several admirable novels were produced by Miss A. M. Porter, besides poems, in all of which the inculcation of virtuous and heroic sentiments is steadily kept in view. Among her novels may be mentioned, "The Hungarian Brothers," "Don Sebastian," "Tales

round a Winter's Hearth," "The Recluse of Norway," "The Knight of St John," "The Barony," &c. Died, 1832.

PORTELL, JANE, sister of Sir Robert and of Anna Maria Porter, was born at Durham, 1776. Like her sister, she soon gave indications of superior abilities; and though she did not appear before the world as an author till she was in her 27th year, her first work, "Thaddens of Warsaw," published in 1807, at once placed her in the foremost rank as a writer of fiction. In 1809 appeared her "Scottish Chiefs," which was no less successful than its predecessors; and this was followed, at intervals more or less distant, by the "Pastor's Fireside," "Duke Christian of Lüneburg," "Tales round a Winter's Hearth" (in which she was joined by her sister), "The Field of Forty Footsteps," &c. She also contributed to the periodicals of the day; and her last separate publication was "Sir Edward Seaward's Diary," the forerunner of a class of works lately become numerous, and of which perhaps the best specimen is the well-known "Diary of Lady Willoughby." In 1842 she accompanied her brother, Sir R. K. Porter, to Petersburg; and after his death she resided chiefly at Bristol, where it is said she was chiefly engaged in writing her brother's memoirs. Died, May 21th, 1850.

PORTEUS, BILLY, an eminent English prelate, was born at York, in 1731, and entered as a sizar at Christ's College, Cambridge, where he obtained a fellowship. He was, successively, chaplain to Archbishop Secker, rector of Hulton, prebendary of Peterborough, rector of Lambeth, king's chaplain, and master of St Cross Hospital, near Winchester. In 1776 he was raised to the see of Chester, at the express instance of Queen Charlotte; and in 1787 he was translated to the bishopric of London, over which diocese he continued to preside till his death in 1808. Bishop Porteus was a man of deep erudition and considerable ability. Among his works are, a "Life of Archbishop Secker," "Sermons," and a Scatonian prize poem on "Death." It is said that he also assisted Hannah More in the composition of her religious novel, "Cecilia in Search of a Wife."

PORTLAND, WILLIAM BENTINCK, first earl of. [BENTINCK.]

PORTLAND, W. H. CAVENDISH, third duke of. [BENTINCK.]

POSTEL, GUILLAUME, one of the most learned men of his age, and one of the wildest visionaries, was born in Normandy, in 1510. In his youth he supported himself at the college of St Barthe, by waiting upon the other students. His reputation for general learning and antiquarian research induced Francis I. to send him to the East to collect manuscripts, which commission he discharged so well as to be appointed professor of mathematics and languages, but he afterwards fell into disgrace, and lost his appointments. Cherishing a visionary project of a universal monarchy under the king of France, he went to Rome, and was admitted by Ignatius to the order of Jesuits, but was soon sentenced to seclusion, and then made his escape. Having wandered about from place to place, he returned to Paris in 1550,

Winter's Hearth," "The Recluse of York," "The Knight of St John," "The ...," &c. Died, 1832.

PORTER, JANE, sister of Sir Robert and Maria Porter, was born at Durham. Like her sister, she soon gave indications of superior abilities; and though she appeared before the world as an author in her 27th year, her first work, "The Field of Forty Footsteps," &c., placed her in the foremost rank as a poetess. In 1809 appeared her "Tales round a Winter's fire," which was no less successful, at intervals more or less distant, than its predecessors; and this was followed by "Pastor's Fireside," "Duke Christian's Tales round a Winter's fire" (in which she was joined by her husband), "The Field of Forty Footsteps," &c., which contributed to the poeticals of the day. Her last separate publication was "Edward Seaward's Diary," the fore-runner of a class of works lately become popular, and of which perhaps the best specimen is the well-known "Diary of Lady Ashby." In 1842 she accompanied her husband, Sir R. K. Porter, to Petersburg; and after his death she resided chiefly at home, where it is said she was chiefly employed in writing her brother's memoirs. Died, 21st, 1850.

PORTER, HENRY, an eminent English lawyer, was born at York, in 1731, and was educated at Christ's College, Cambridge, where he obtained a fellowship. He successively held the offices of chaplain to the Archbishop of Canterbury, rector of Hinton, prebendary of Exeter, rector of Lambeth, king's counsellor, and master of St Cross Hospital, Winchester. In 1776 he was raised to the see of Chester, at the express instance of King George III.; and in 1787 he was translated to the bishopric of London, over which he continued to preside till his death. Bishop Porteus was a man of deep mind and considerable ability. Among his works are, a "Life of Archbishop Secker," "The Life of Archbishop Secker," &c. It is said that he also assisted in the composition of the "Life of King George III.," &c. He died in 1813.

POTTER, WILLIAM BENTINCK, first Baron (HENTINCK).
POTTER, W. H. CAVENDISH, third Baron (HENTINCK).
POTTER, GUILLAUME, one of the most distinguished men of his age, and one of the wild-romancers, was born in Normandy, in his youth he supported himself at the court of St Louis, by waiting upon the king. His reputation for general knowledge and antiquarian research induced the king to send him to the East to collect manuscripts, which commission he discharged so well as to be appointed professor of mathematics and languages, but he afterwards fell into disgrace, and lost his appointments. Cherishing a visionary project of universal monarchy under the king of France, he went to Rome, and was admitted into the order of Jesuits, but was afterwards sentenced to seclusion, and then made to wander about from place to place, he returned to Paris in 1831.

A New Universal Biography.

POTTER, again exiled, returned again, 1562, and resumed his public lectures, but was compelled to retire, and died in a monastery in 1581. Among the wild and extravagant notions that he entertained, one was, that he had descended from the soul of Adam; and hence he called himself "Postellus restitutus;" he also maintained, that woman should have the dominion over man; and that his writings were revelations of Jesus Christ.

POTTELETHWAYTE, MALACHI, a London merchant and a commercial writer; born, about 1707; died, 1767. He was a fellow of the Antiquarian Society, and the author of "The Dictionary of Trade and Commerce," "The True System of Great Britain's true System," "The Merchant's Public Counting-house," "Britain's Commercial Interest," &c.

POTEMKIN, GREGORY ALEXANDROVICH, a Russian prince and field-marshal, was born in 1736, near Smolensko. He distinguished himself against the Turks, particularly in the war of 1787, when he commanded in chief. He acquired an unbounded influence over Catharine II., and was regarded as one of her especial favorites. His introduction to the empress, and subsequent elevation are described as follows:—After Catharine had taken the veil from her weak husband, she paraded the streets of St Petersburg, sword in hand, being then 26 years of age, of a pleasing appearance, well-made and handsome, and wearing the sword which the empress had not the sword-knot, a mark of distinction attached to the swords of the north-commanders, instantly detached his, and presented it with a grace that was highly pleasing to Catharine, and from that day his fortune went rapidly forward. Though he had enjoyed the title of favorite, it soon became known that he had a rival, and that rival was the empress herself. He had the vanity to boast of the favor he received.—Orloff had then recourse to intrigue; he prevailed himself of the absence of Potemkin, whom his royal mistress had secured with a high commission in her army against the Turks, to introduce a youth to her notice of the empress, who was devoted to his service; so that, not Potemkin's name, though he came charged with vices, he found he had been supplanted, and instantly retired to a convent at Newsky, exchanged his military decorations for a coarse habit and the cowl. The empress, on her lady of honour, the countess de Potemkin, to bring her a true report of Potemkin's situation; and having heard of his great passion and the sacrifice he had made, she sent for him. He returned to the court, and soon regained the muster of the empress, and even of the proud Catharine herself. Died, 1791.

POTTINGER, JOHN, poet and miscellaneous writer, was born in 1647, at Winchester, and educated at Wykeham's school, of which his father was head-master, at Oxford. Besides a variety of minor poems, he composed "A Pastoral Reflection on the Death of King Charles II.," and translated Tacitus' "Life of Agricola." He studied at the Temple, was called to the bar, became comptroller to the king's office, and died in 1733.

POTHIER, ROBERT JOSEPH, an eminent French lawyer, was born at Orleans, in 1669. He became professor of law in the university of his native city, and died there in 1772, as much beloved for his virtues as admired for his extensive learning. His treatises on various legal subjects form 17 octavo vols.; but his great work is a "Digest of the Pandects of Justinian," in 3 vols. fol.

POTOCKI, Count IGNATIUS, a Polish nobleman, born in 1741. He interested himself greatly in the attempts to free his country from the yoke of her more powerful neighbours; and after the overthrow of Kosciusko, with whom he co-operated, he was arrested and sent a prisoner to Russia. Before the destruction of the Polish monarchy he was grand-marshal of Lithuania. Died, 1809.

POTOCKI, Count JOHN, born in 1769; a noble Polish historian, brother of the several Counts Potocki, most of whom were attached to Russia. He was one of the ambassadors to China, in 1805; was author of a work on that country, "Sarmatian Researches," "History of the Primitive Russians," &c. Died, 1815.

POTOCKI, Count STANISLAUS, a Polish statesman and writer, born in 1757, at Warsaw. He was one of those who contributed most actively to establish the constitution of 1791, was president of the senate in 1818, and died in 1821. Among his works are a "Treatise on Eloquence and Style," and "The Journey to Ciernogrod," a satirical romance.

POTOCKI, CLAUDINA, the wife of Count Bernard Potocki, was born in the grand duchy of Posen, in 1807. She was the lineal descendant of the Polish ambassador, Dzialynski, who was sent to England in Elizabeth's reign, to remonstrate against the infraction of a treaty between this country and Poland, and whose bold and successful eloquence is recorded in history. During the patriotic struggle for Polish freedom, from 1830 to 1833, the Countess Potocki not only became the munificent benefactress of her countrymen, but devoted her personal energies to the sacred cause, and alleviated, by her kind attentions to the sick and wounded, much of the misery that the unequal contest entailed on the gallant spirits who strove to shake off the oppressor's yoke. Surrounded by wounded warriors and the victims of cholera in the hospitals of Warsaw, neither the sight of hideous gashes, nor the fear of contagion, deterred her from her course of charity. There, for seven successive months, she was constantly occupied; and when the day of adversity came, the remains of her fortune, her influence, her personal exertions, were entirely at the disposal of the unfortunate refugees. At one time, while residing at Dresden, where she had formed a ladies' committee for the relief of these brave men, she pledged her jewels and most expensive dresses, for 40,000 florins, and the whole amount was instantly sent to its pious destination. For this the Poles assembled at Dresden presented to her a bracelet, with an inscription commemorative of the noble act, and pointing it out for national gratitude. She at length fixed her residence

at Geneva; and there, in the exercise of those Christian virtues, which will immortalize her name, but worn out by silent grief, she died in 1836.

POTT, PEEVAL, an eminent surgeon, to whom the science is materially indebted for many improvements, was born in London, in 1713, and became principal surgeon to Bartholomew's Hospital in 1749. John Hunter was one of his early pupils. Pott wrote "On Hernia," "On Fistula Lachrymalis," "On Hydrocele," "On Catarrh," "On Wounds of the Head," &c.; was especially celebrated for the mildness and humanity of his treatment, and was the inventor of many useful surgical instruments. Died, 1788.

POTTER, FRANCIS, an ingenious divine, who wrote a book on the mystic number 666, in the Revelation. He was also an able mathematician, and invented several hydraulic machines, for which he was elected a member of the Royal Society. Died, 1678.

POTTER, JOHN, archbishop of Canterbury, was born in 1674, at Wakefield, in Yorkshire, in the grammar school of which town he received the rudiments of a classical education. He then became a member of University College, Oxford, and, in 1697, printed his "Archæologia Græca, or the Antiquities of Greece," in 2 vols. 8vo, which passed through many editions, and was almost indispensable to the classical student. He was appointed archbishop of Canterbury, and died in 1747. His theological works, including his "Discourse on Church Government," were collected and published in 3 vols. 8vo.

POTTER, PAUL, a celebrated Dutch painter, was born at Enkhuysen in 1625, settled at the Hague, and painted cattle and landscapes, but was particularly successful in the former. His colouring is uncommonly brilliant, and for fidelity to nature he is unequalled, his pictures are consequently held in the highest estimation. One of his most celebrated pictures is the "Bull," at the Hague, in emulation of which Ward painted his group of the "Alderney Bull, Cow, and Calf," now in the National Gallery. Died, 1654.

POTTER, ROBERT, an English divine and classical scholar. He studied at Cambridge, held the livings of Lowestoft and Kessingland, with a prebend in the cathedral of Norwich, and is known by his excellent translations of Aeschylus, Sophocles, and Euripides. He also wrote some poems, an "Inquiry into some passages of Dr Johnson's Lives of the Poets," &c. Born, 1721, died, 1804.

POTTINGER, Right Hon. Sir HENRY, bart., G. C. B., a distinguished soldier and diplomatist, was born in 1789, went to India as a cadet in 1804, and at an early age attracted the attention of the civil and military authorities there by his energy, information, and ready administrative powers. During his long sojourn in that country he was employed in almost every branch of the public service, gradually rose through all the ranks of the service till he reached that of major-general, and after the Afghan campaign, in 1839, was raised to the baronet-

age, as a reward for services which he had rendered in the discharge of his difficult duties. Early in 1841 he was appointed envoy extraordinary, and minister plenipotentiary to China, where his far-sightedness contributed in no slight degree to bring about the successful treaty which put an end to the protracted hostilities with the crafty Chinese in 1842. For his services on this occasion he received the Grand Cross of the Order of the Bath. He was subsequently appointed governor and commander-in-chief of the Island of Hong-kong, which post he held from April, 1843, to the spring of the following year, when he returned to England, was sworn a member of the privy council, and received a pension of £1500 a-year. In September, 1846, he was again chosen for active service, being appointed to the governorship of the Cape of Good Hope, and discharged that office with great address and energy through a very troubled period, until September, 1847, when he was relieved by General Sir Harry G. W. Smith. In 1850 he went again to India, the scene of his early services, and held the post of governor and commander-in-chief of the Presidency of Madras until the year 1854, when he finally returned to England. Died, 1856.

POUSSIN, NICOLAS, one of the most eminent of the French painters, was born, in 1594, at Andelys, in Normandy. Having practised the art under different masters at Paris, he went to Rome, and studied the works of Raphael, Domenichino, and Titian, with great attention; but his taste for the antique prevailed, and is observable in all his works. Louis XIII. invited him to France in 1640; and gave him a pension, with apartments in the Louvre; but Poussin was so annoyed by the envy and intrigue of contemporary artists, that he returned to Rome, and remained there during the rest of his life. One of his best works is "The Seven Sacraments," which he painted twice. Both series are now in English collections. In the National Gallery are his fine "Bacchanalian Dance," "Bacchanalian Festival," "Cephalus and Aurora," and several other works. Died, 1665.

POUSSIN, GASPARD, an eminent painter, whose proper name was DUGHET, was born at Rouen, in 1615. His sister married Nicolas Poussin, which circumstance led him to study painting under that great master, whose name he adopted. He particularly excelled in landscapes. There are six examples of this master in the National Gallery, a noble "Landscape with figures," representing Abraham and Isaac going to the sacrifice, a "Land-storm," &c. Died, 1675.

POWELL, BADEN, was born in 1796, took first class honours at Oxford in 1817, and entered the church. He was first curate at Midhurst, then vicar of Plumstead until 1827. He became a fellow of the Royal Society in 1824, and in 1827 was appointed Savilian professor of geometry in the university of Oxford,—an office which he retained to the time of his death. He is well known as an author of works on purely scientific subjects, and of others on the relation of science to theology. In the former

as a reward for services which he had rendered in the discharge of his duties. Early in 1841 he was appointed envoy extraordinary, and minister plenipotentiary to China, where his far-sightedness contributed in no slight degree to bring about the settled treaty which put an end to our vexatious hostilities with the crafty Chinese. For his services on this occasion he received the Grand Cross of the Order of the Lion and commander-in-chief of the island of Hong-kong, which post he held from April to the spring of the following year, he returned to England, was sworn a member of the privy council, and received an annuity of £1500 a-year. In September, 1847, he was again chosen for active service, and appointed to the governorship of the island of Good Hope, and discharged that office with great address and energy through a troubled period, until September, 1847, when he was relieved by General Sir Harry Smith. In 1850 he went again to the scene of his early services, and held the post of governor and commander-in-chief of the Presidency of Madras until 1854, when he finally returned to England. Died, 1856.

POUSSIN, NICOLAS, one of the most eminent of the French painters, was born, in 1594, at Andelys, in Normandy. Having learned the art under different masters at Paris, he went to Rome, and studied the works of Raphael, Domenichino, and Titian, and attracted great attention; but his taste for the antique prevailed, and is observable in all his works. Louis XIII. invited him to France in 1640; and gave him a pension, and apartments in the Louvre; but Poussin was annoyed by the envy and intrigues of temporary artists, that he returned to Rome, and remained there during the rest of his life. One of his best works is "The Sacraments," which he painted twice. Copies are now in English collections. The National Gallery are his fine "Bacchanian Dance," "Bacchanalian Festival," "Cephalus and Aurora," and several others. Died, 1665.

POUSSIN, GASPARD, an eminent painter, whose proper name was DUGRET, was born, in 1615. His sister married Nicolas Poussin, which circumstance led him to painting under that great master, whose name he adopted. He particularly excelled in landscapes. There are six copies of this master in the National Gallery, "Landscape with figures," "Landscape with Abraham and Isaac going to sacrifice," "Landscape with figures," &c. Died, 1697.

POWELL, BADEN, was born in 1796, took his first honours at Oxford in 1817, and became a member of the church. He was first curate at Plumstead, then vicar of Plumstead itself. He became a fellow of the Royal Society in 1824, and in 1827 was appointed to a professor of geometry in the university of Oxford,—an office which he retained to the time of his death. He is well known as an author of works on purely mathematical subjects, and of others on the relation of science to theology. In the former

class he published the "History of Natural Philosophy" in 1834, a "View of the Undulatory Theory of Light," with many others. Belonging to the latter, he wrote "The Connection of Natural and Divine Truth," "The Unity of Worlds and of Nature," "Christianity without Judaism," "The Order of Nature," and others, in which he sought to define the limits of faith and of knowledge. In 1837 he was elected a fellow of the Geological Society; and although chiefly known for his labours in physics, and especially in light and heat, he contributed much, by a variety of writings, to the general acceptance by the public of geological investigations. His broad and liberal views, and his fearless assertion of the truths to which he was conducted by reasoning on facts, exposed him to much opposition. But, although conscious that he was putting a bar on his prospects of worldly advancement, he continued to work steadily in the course which his conscience dictated. His clear style, philosophical tone, and extensive learning secured for him, as a writer, the sympathy and support of the friends of intellectual progress, while in private he was esteemed by all for his constant readiness to assist and instruct, and his unassuming kindness. For many years he formed one of a small band at Oxford, who kept alive the study of the physical sciences during a season when they were not regarded with so much favour as at the present day; and when, in 1850, he was appointed to be one of the Oxford University Commissioners, he had the satisfaction of aiding to introduce some of those modifications which have now given to the physical sciences a recognized position in the system of studies adopted at the university. In 1851 he was one of the three appointed to adjudge the Burnett Theological Prize. Died, June 11, 1860, aged 63.

POWELL, SIR JOHN, bart., an eminent and honest lawyer, was born of a very ancient and wealthy family at Pentrymerrick, in the parish of Llanwrda, Carmarthenshire. He was a judge in the court of King's Bench, in 1688, and distinguished himself so much by his integrity and ability on the trial of the seven bishops, that James the Second deprived him of his office, but he was restored to it at the revolution, and sat there until his death in 1696. In Heber's Life of Jeremy Taylor it is stated that Powell was a pupil of that distinguished man, and was offered the great seal of England if he would have decided against the bishops. When every effort to influence him against the bishops had failed, the court, it is said, made the same attempt upon his eldest son Thomas, who for many years represented the county of Carmarthen in parliament, which reaching the judge's ears, he sent for him, and told him that if he accepted of any place, or the promise of any place, under government, he should consider it as intended to bias his judgment, and would disinherit him; and, as to himself, he would rather live upon his cockle-bank at Langhorne, than do anything so repugnant to his conscience.

POWELL, THOMAS, a learned antiquary

and politician, was born at Lincoln in 1722. He held several situations under government, and having exerted himself in America to suppress the rising spirit of discontent among the colonists, he was, in 1757, appointed governor of Massachusetts Bay, and subsequently of South Carolina. On returning to England in 1761, he was made director-general of the control office, with the military rank of colonel; but the latter part of his life was spent at Bath, in literary retirement. His principal works are, "Treatise on the Study of Antiquities," "On the Antiquities of the Provincia Romana of Gaul," "Descriptions of Roman Antiquities dug up at Bath," and "Intellectual Physics," besides many political tracts. Died, 1805.

POZZO DI BORGIO, CARLO ANDREA, Count, an eminent diplomatist, was born in the island of Corsica, in 1768, and belonged to an ancient family, which ranked high among the Corsican nobility. When the island was placed under the supremacy of Great Britain, Pozzo di Borgo was elected president of the state council, and the entire administration of the country was reorganized by him. It soon, however, became evident that Corsica must yield to France; the Count therefore sought refuge first at Naples and Elba, and afterwards in England, where he was received with every mark of respect. He was subsequently employed in some secret diplomatic missions, in the execution of which he displayed the greatest zeal and ability; but his labours were in vain. After the peace of Amiens, Pozzo di Borgo entered into the diplomatic service of Russia, and represented his royal master at Vienna, whither he was sent in order to consolidate a new coalition against France. Thence he repaired to Italy, where the combined military operations of England, Russia, and Naples were about to commence. After the battle of Austerlitz, and the secession of Austria from the league, he again went to Vienna, and thence to Petersburg. When Prussia joined the coalition, Pozzo di Borgo was created a count, and attached to the staff of the emperor as a colonel; but after the battle of Jena he was again employed at the Austrian court. His next mission was to the Dardanelles, for the purpose of co-operating with the British ambassador in treating with Turkey, and in the engagement between the Russian and Turkish fleets he greatly distinguished himself. When the hollow peace of Tilsit brought about a kind of intimacy between Napoleon and the young Czar, Pozzo di Borgo saw the impending danger, and requested permission to retire. He withdrew to Vienna, and from that time, till after the treaty of peace had been signed between Austria and France, he so energetically employed his diplomatic skill that Napoleon demanded that he should be delivered up to him; but the demand was refused, and in the following year (1810) Pozzo once more came to England. His thorough experience was here appreciated, and to him may much of that energy which subsequently appeared in the councils of Britain be traced. In 1812 the war between France and Russia broke out anew, and when the

mighty army of the French emperor perished on the whitened plains of Russia, Alexander thought that enough had been achieved. Not so, however, thought the great diplomatist: he felt convinced that the safety of Europe was only to be found in the complete destruction of Napoleon. At length Sweden and Austria appeared in arms, Pozzo was made a general in the Russian service, and joined Bernadotte, who was then covering Berlin. The defence of Dresden and the battle of Leipsic soon followed; and the allied forces moved slowly and warily towards France. In January, 1814, Pozzo di Borgo was despatched to London on the part of the allied monarchs; his mission succeeded, and Lord Castlereagh returned with him to the head-quarters of the allies at Baden. The moderation and irresolution of the Emperor Alexander often put the plans of his minister in extreme peril; but his advice eventually prevailed, the allied armies marched on Paris; the abdication of the French emperor followed; and when Pozzo di Borgo had at length obtained the promise of Alexander, that no negotiation should be entered into either with Napoleon or his family, he hastened to Talleyrand, exclaiming in the fulness of his joy, "Not only have I slain Napoleon politically, but I have just thrown the last shovel-full of earth over the imperial corpse!" But his labours were not yet at an end. He proceeded to London to announce to Louis XVIII. his restoration to the throne of his ancestors; after which he was summoned to the congress of Vienna, where he vehemently pressed the removal of Napoleon from Elba to some more remote place. And when the emperor had disembarked on the French coast, he said, "I know Buonaparte; he will march on Paris, our work is before us; not a moment must be lost." Pozzo di Borgo immediately joined the Anglo-Prussian army, forming the vanguard of the allies in Belgium; and, though wounded, he followed Wellington to Paris, and resumed his portfolio as Russian ambassador. His last political mission was as ambassador to England here he remained upwards of two years, till ill health induced him to return to Paris, where he died on the 17th of February, 1812, aged 73.

PRADIER, JACQUES, a distinguished French sculptor, was a native of Geneva, and was born in 1792. He gained the grand prize of the Academy in 1813, and was sent to Rome, where he studied and worked five years, and spent the rest of his life at Paris. The grace and tenderness of Canova were the qualities he chiefly aimed at in his work, but he allowed them frequently to pass in his hands into the voluptuous and the meretricious. He executed numerous Venuses, Bacchantes, Hebes, and other female figures, some portrait statues, and religious pieces, was admitted to the Institute and the Legion of Honour, and died, 1852.

PRADT, Abbe DOMINIQUE DE, a French ecclesiastic and political writer, was born in Auvergne, in 1759. He was, at the revolution, grand vicar to the Cardinal de la Rochefoucauld, and was elected deputy for the clergy of Normandy to the states general

in 1789. He opposed the union of his order to the *tiers état*, protested against the new order of things, and was consequently obliged to emigrate, establishing himself for a considerable time at Munster. In that city he published, in 1798, the first of his political pamphlets, entitled "Antidote to the Congress and her Neutrality." In another, termed "Prussia Europe against the French republic. But parte first consul, he made interest with his lee, and became his almoner. On the coronation of the emperor, in 1801, at which he assisted, he was invested with the title of baron, received a gratuity of 49,000 francs, was made bishop of Poitiers, and was ordained by Pius VII. in person, in 1805. He afterwards officiated at Napoleon's coronation as legate of Italy. In 1808 he accompanied him to the Bayonne conference. For his services there Napoleon gave him another gratuity of 50,000 francs, and made him, in 1809, archbishop of Malines, and member of the Legion of Honour. On the war against Russia occurring in 1812, he was sent ambassador to the duchy of Warsaw against his wish. During the retreat from Moscow, Napoleon had an interview with him in a lone cottage, reproached him with treachery, and divested him of his embassy. On his return to Paris he found all his employments taken from him. He was ordered to quit Paris for his diocese, and did not return till the fall of Napoleon and the entry of the Bourbons into France, in 1814. He was made by Louis XVIII. chancellor of the Legion of Honour, but a new disgrace overtook him; he retired from the scene, and did not re-appear till after the "Hundred Days." He subsequently ceded all the rights of his see to the king of the Netherlands for a yearly pension, and occupied himself with the publication of political pamphlets. In all these he espoused the cause of wise and temperate constitutional reform. He died in 1837.

PRÆD, WINTHROP MACKWORTH, poet and litterateur, was born in 1801, was educated at Eton and Cambridge, and graduated B.A. in 1825. He was one of the chief contributors to the monthly magazine called "The Etonian," and to "Knight's Quarterly Magazine," and his poems were distinguished by great originality, humour and elegance. A complete edition of them, with a Memoir by Rev. Dr. West Coleridge, was only published in 1861. Præd was called to the bar, and in 1830 he entered parliament, where he religiously opposed the Reform Bill. Died, 1839.

PRATT, Lieut.-gen. Sir CHARLES, K.C.B., a gallant and distinguished officer, who served throughout the Peninsular war, and was present at the battles of Salamanca, Vittoria, Nivelles, Orthes, and Toulouse. Born, 1771; died, 1839.

PRATT, CHARLES. [CAMDEN, Esq.]

PRATT, JOHN JEFFREYS. [CAMDEN, Marquis.]

PRATT, SAMUEL JACKSON, novelist, poet, and miscellaneous writer, was born at St Ives, in Huntingdonshire, in 1719. Early in

He opposed the union of his order with the *Etat*, protested against the new regulations, and was consequently obliged to establish himself for a considerable time at Munster. In that city he died in 1798, the first of his political works, called "Antidote to the Congress of Austerlitz." In another, termed "Prussian neutrality," he urged a coalition against the French republic. But in the revolution, which made Buonaparte's consul, he made interest with his power, to enter Buonaparte's service as his almoner. On the coronation of the emperor, in 1804, at which he was invested with the title of duke, he received a gratuity of 40,000 francs, and was appointed bishop of Poitiers, and was ordained in 1807. In 1808, he officiated at Napoleon's coronation as a cardinal. In 1808 he accompanied him to the congress of Erfurt. For his services Buonaparte gave him another gratuity of 100,000 francs, and made him, in 1809, bishop of Malines, and member of the Chamber of Deputies. On the war against Prussia in 1812, he was sent ambassador to the duchy of Warsaw against the retreat from Moscow, and had an interview with his emperor. He then, in 1812, approached him with treachery, and secured him of his embassy. On his return to Paris he found all his employments taken from him. He was ordered to leave for his diocese, and did not return till the fall of Napoleon, and the entry of the Prussians into France, in 1814. He was appointed by Louis XVIII. chancellor of the University, but a new disgrace overtook him, and he retired from the scene, and did not return till after the "Hundred Days." He eventually ceded all the rights of his kingdom of the Netherlands for a pension, and occupied himself with the composition of political pamphlets. In 1820 he espoused the cause of wise and constitutional reform. He died

WINTHROP MACKWORTH, poet, was born in 1801, was educated at Cambridge, and graduated in 1821. He was one of the chief contributors to the monthly magazine called "The Knight's Quarterly," and to "The Quarterly Review," and his poems were distinguished by originality, humor, and elegant simplicity of diction, with a happy command of the English language. He went to America, was only in 1841. He died in 1841. He entered parliament in 1830, and was distinguished by his opposition to the Reform Bill.

Gen. Sir CHARLES K.C.B., distinguished officer, who fought the Peninsular war, and was at the battles of Salamanca, Albuera, Orthes, and Toulouse. He died in 1833.

CHARLES CAMDEN, Earl of Devon, was born in 1692.

JOHN JEFFREYS, Camden, was born in 1690.

MURRAY JACKSON, novelist, poet, was born at St. Andrew's, Scotland, in 1719. Early in

life he went on the stage, but subsequently became an itinerant lecturer, a bookseller, and, lastly, author by profession. He settled at Bath, where, under the fictitious name of Courtney Melmoth, he published several novels and poems. The principal of his novels was, "The Tears of Genius, or the Death of Goldsmith." Among his novels were, "Liberal Opinions;" "Emma Corbett;" and "Family Secrets." Besides these works, he published "Gleanings in Wales, Holland, and Westphalia;" "Gleanings in England," &c. He died in 1814.

PRAXITELES, one of the greatest sculptors of Greece, flourished about 360 B. C. He worked both in bronze and marble, and Pliny has preserved a list of his principal statues. One of his most famous works was the "Venus of Cnidus," which perished in a great fire at Constantinople. In the Vatican is a copy in marble of his statue of Apollo the Lizard-slayer. Another very celebrated statue was his "Eros." The works of this great artist were especially characterized by grace and tenderness.

PRESCOTT, WILLIAM HICKLING, one of the most eminent historians that America has produced, was born at Salem in 1796, educated in the academy of Dr Gardner, a pupil of the famous Dr Parr, and graduated at Harvard University in 1814. While at college he had the misfortune to lose by an accident the sight of one of his eyes, while the other became so weakened as to deter him from any profession or pursuit in which strong eyesight was indispensable. Enabled by the possession of an independent fortune to follow the bent of his inclinations, he spent two years in wandering in England, France, and Italy, and then returned to his native country, where he married and settled down to a life of literary labour, which was rarely interrupted. Having made himself master of the literature of France, Italy, and Spain, he contributed as the first-fruits of his careful and various reading some critical papers to the "North American Review;" and at last, in 1827, selected the "Reign of Ferdinand and Isabella" as the subject of a more extensive work. Unable from the weakness of his eyesight to pursue an historical work requiring references to various Spanish authorities, he had recourse to a reader, whom he taught to pronounce Castilian with accuracy sufficient for his own ear, and with this inadequate assistance he became acquainted with the great authorities on Spanish history whom it was necessary to consult in the prosecution of his arduous labours. In this tedious process of collecting and digesting his materials ten years rolled on, but at length, in 1843, his great work was published, and was received with the utmost enthusiasm both in England and America; while Germany, France, and Spain acknowledged the new historian by transplanting his work into their respective languages; and the Spanish capital elected him a member of her Royal Academy of History. Stimulated by success, and with his skill considerably increased by practice and experience, Mr Prescott set about the composition of "The Conquest of Mexico," which he published in 1843, and four years

later he gave to the world "The Conquest of Peru." These works, like their predecessors, were received in both hemispheres with immense applause. They have frequently been reprinted, and they bid fair to remain the standard histories of some of the most interesting and eventful periods of human action and enterprise. In 1850 he paid a short visit to England and the continent, and on his return to America he began the composition of what he intended to be the greatest achievement of his latter years, "The History of Philip II." Of this work two volumes appeared in 1855, and a third in 1859; these volumes bear ample testimony to the undiminished genius of the author, and the world was looking forward to the completion of this work and many others from the same brilliant pen, when he was suddenly attacked by paralysis, and died at Preston, Jan. 28, 1859. A Life of Prescott, by George Ticknor, has since appeared.

PRESTON, THOMAS, dramatic writer, was fellow of King's College, Cambridge, afterwards doctor of the civil law, and master of Trinity Hall, where he died, in 1598. He acted a part in the tragedy of Dido, played before Queen Elizabeth, who settled a pension of £20 a year on him. He wrote a tragedy, called "The Life of Cambyses, king of Persia," which is mere fustian, and has not escaped the ridicule of Shakespeare, who, in Henry IV., makes Falstaff talk of speaking in "King Cambyses' vein."

PREVOST, PIERRE, a French painter, said to have been the inventor of panoramas, was born at Montigni, in 1764. Among the panoramas which he painted, were those of Paris, Rome, Naples, Amsterdam, Antwerp, London, Jerusalem, and Athens. The two last were the fruits of a visit to Greece and Asia Minor, in 1817; and he was engaged in painting a view of Constantinople, when he died, in 1823.

PREVOST D'EXILES, ANTOINE FRANÇOIS, one of the most fertile of French writers, was born in 1697, at Hesdin, in Artois. His early life was unsettled and changeable; he was alternately a Jesuit and a military officer; after which he entered into the monastery of St Germain des Prés; but quitted that society also, and withdrew to Holland. His next removal was to London; but in 1731 he obtained leave to return to France, where he became secretary to the Prince de Conti. His end was equally singular. In 1763 he was seized with apoplexy in the forest of Chantilly, and was found apparently lifeless. An ignorant magistrate being called in, ordered a surgeon to open the body, when a loud shriek from the victim convinced the spectators of their error; the abbé opened his eyes, but the incision was mortal, and he almost immediately expired. His works amount to one hundred and seventy volumes. The principal are, "Mémoires d'un Homme de Qualité;" "Histoire de M. Cleveland, Fils naturel de Cromwell;" "Histoire du Chevalier Desgrioux et de Manon Lescaut," reckoned his best work; "Pour et Contre," a literary journal, 20 vols; and "Histoire Générale des Voyages," 16 vols.

PRICE, JOHN, a learned critic, was born at London, in 1600. Having suffered considerably in the civil wars, he went to Florence, where he embraced the Roman Catholic faith; and the grand-duke appointed him his keeper or medals and Greek professor. He afterwards removed to Rome, where he died in 1676. He wrote Commentaries on the Psalms, the Gospel of St Matthew, and the Acts; Notes upon Apuleius, &c.

PRICE, Dr RICHARD, an eminent dissenting minister, and political and miscellaneous writer, was born at Tynon, in Glamorganshire, in 1723, and was educated at Talgarth, in his native county, whence he removed to a Presbyterian academy in London, and became pastor of a Nonconformist congregation, of Arian or semi-Arian principles, at Hackney, where he continued as long as he lived. During the American war he printed two pamphlets against the policy which led to it, one entitled "Observations on Civil Liberty," and the other "Observations on Civil Government," for which the corporation of London voted him thanks and a gold box, and the university of Glasgow conferred on him the degree of D.D. In 1778 he had a friendly controversy with Dr Priestley, on materialism and necessity. On the termination of the war, Pitt consulted Dr Price respecting the best mode of liquidating the national debt, the result of which, it is said, was the adoption of the sinking fund. When the French revolution broke out, the doctor distinguished himself by a sermon, "Of the Love of Country," in which he hailed that event as the commencement of a glorious era. This drew upon the preacher some strong animadversions from Burke in his celebrated Reflections. Besides many papers in the Transactions of the Royal Society, of which he was a fellow, he published sermons and pamphlets, which established his character as a sound advocate for civil liberty, and a master of financial science. Died, 1791.

PRICE, THOMAS, an eminent Welsh historian, and literary antiquary, born in Brecknockshire, in 1787. He entered the church, and became, in 1825, vicar of Cwmdu, where he spent the rest of his life. He was an enthusiastic lover of the Welsh language and literature, a zealous promoter of the "Eisteddfods," and a most industrious student and writer. His "Hanes Cymru" (History of Wales) is a work of considerable value. It appeared in parts between 1826—1842. Most of his writings are in Welsh, and were contributed to periodicals; but he also wrote several Essays, and an account of a Tour in Brittany, in English. Died at Cwmdu, 1848.

PRICHARD, JAMES COWLES, M.D., whose ethnographical researches have placed him high in the ranks of science, was born at Ross, in Herefordshire, 1780, settled as a physician at Bristol, in 1810, where he rose to eminence, and after devoting five and thirty years to professional duties, varied only by literary avocations, removed to London in 1845 as one of her majesty's commissioners in lunacy—a branch of medical science with which he had long been fa-

miliar. Dr Prichard's contributions to medical and scientific inquiry were neither few nor unimportant; but the work on which his reputation chiefly rests, is his "Reklind," which has been translated into almost every European language, and was long regarded as an authority. Died, 1848.

PRIDEAUX, HUMPHREY, a learned divine, was born in 1648, at Padstow, in Cornwall; and at Westminster School, dean of Christchurch College, Oxford; became dean of Norwich; and died in 1721. He wrote a "Life of Mahomet," "The Right of Tithes," &c.; but his great work is "The Connection of the History of the Old and New Testament."

PRIESSNITZ, VINCENT, originator of the water-cure (Hydropathy), was the son of a Silesian farmer, and was born at Grafenberg, in 1799. The successful application of cold water in his own case, when suffering from a serious accident, led him to advise others to try the same treatment; and about 1825 he began to have a name through Germany. An immense number of patients resorted to the baths he established at Grafenberg, and he presided over them till his death, which took place in 1851.

PRIESTLEY, JOSEPH, an eminent dissenting divine, chemist, and natural philosopher, was born in 1733, at Fieldhead, near Leeds, and educated at Daventry. He became minister to the congregation at Needham Market, in Suffolk; whence he removed to Nantwich, in Cheshire, and next to Warrington, where the dissenters had formed a seminary. While tutor in this institution, he published the "History and Present State of Electricity," which procured his election into the Royal Society, and the degree of doctor of laws from Edinburgh. It was here also that his political opinions were first manifested in an "Essay on Government." Soon after this he left Warrington, and went to Leeds, where he made those important discoveries with regard to the properties of fixed air, for which he received the Copley medal of the Royal Society in 1772. In 1776 he communicated to the same learned body his observations on respiration, in which he first experimentally ascertained that the air parts with its oxygen to the blood, as it passes through the lungs. He had already declared himself a believer in the doctrine of philosophical necessity, and expressed some doubts of the immateriality of the soul. The doctrine he supported in his "Disquisitions on Matter and Spirit," and the obliquity which these works brought on him producing a coolness in his patron, Lord Shelburne to whom he was engaged as librarian, the connection was dissolved, the doctor retaining an annuity of £150 per annum, by original agreement. He next removed to Birmingham, where he became once more minister of a dissenting congregation, and occupied himself in his "History of the Corruptions of Christianity," writing, also, in support of the claims of the dissenters for a repeal of the test acts. But it was the French revolution that afforded him the widest field, and he did not fail to display his warm sympathy

Dr Prichard's contributions to medical science were neither few nor important; but the work on which his reputation chiefly rests, is his "Researches into the Physical History of Man," which has been translated into almost every European language, and was long considered an authority. Died, 1848.

BURN, HUMPHREY, a learned divine, born in 1648, at Pindstow, in Cornwall, educated at Westminster School, and at Christ Church College, Oxford; became a Fellow of the Society; and died in 1724. He was the author of "The Original Principles," &c.; but his great work is his "History of the History of the Old Testament."

FRITZ, VINCENT, originator of the doctrine of Hydropathy, was the son of a farmer, and was born at Grafenau, in 1759. The successful application of this system in his own case, when suffering from a violent rheumatic accident, led him to advise the same treatment; and about 1800 he gave a name through German newspapers to a number of patients cured by baths he established at Graefenberg, where he presided over them till his death in 1851.

FRY, JOSEPH, an eminent divine, chemist, and natural philosopher, was born in 1733, at Fieldhead, near Davenry, where he was educated at Davenry. He ministered to the congregation at Market, in Suffolk; whence he removed to Southwich, in Cheshire, and next to London, where the dissenters had a meeting. While tutor in this institution, he published the "History and Principles of Electricity," which produced a great effect on the Royal Society, and was made doctor of laws from Edinburgh.

It was here also that his political opinions first manifested in an "Essay on the Rights of Man." Soon after this he left London, and went to Leeds, where he made important discoveries with respect to the properties of fixed air, for which he received the Copley medal of the Royal Society in 1772. In 1776 he communicated to the Royal Society his observations on the manner in which he first experimentally ascertained that the air parts with its oxygen, as it passes through the lungs, and already declared himself in favour of the doctrine of philosophical necessity.

Some doubts of the doctrine he expressed in his "Disquisitions on Matter and the Obliquity which these exert on him producing a coolness in the blood." Lord Shelburne to whom he was librarian, the connection of the doctor retaining an annual annuity, by original agreement removed to Birmingham, where he once more ministered to a congregation, and occupied himself with the history of the Corruptions of the Church, also, in support of the dissenters for a repeal of the Act of Union.

But it was the French revolution which first opened to him the widest field, and to display his warm sympathy

with it. This excited the indignation of the high church party; and in the riots which took place in July, 1791, his house, library, manuscripts, and apparatus were committed to the flames by the mob, and he was exposed to great personal danger. After this he removed to Hackney, where he succeeded Dr Price; but in 1794 he went to the United States of America, took up his abode at Northumberland, in Pennsylvania, and died there in 1801. His works extend to between 70 and 80 volumes. Besides those before mentioned are, "Experiments and Observations on Air," "Lectures on General History," on the "Theory and History of Language," and on the "Principles of Oratory and Criticism," "Hartleian Theory of the Human Mind," "Letters to a Philosophical Unbeliever," "History of Early Opinions concerning Jesus Christ," "General History of the Christian Church," "Institutes of Natural and Revealed Religion," &c. As a natural philosopher, his fame principally rests on his pneumatic inquiries. His Autobiography and Correspondence were published after his death.

PRIMATICCIO, FRANCESCO, Italian painter, born at Bologna, in 1504, was a pupil of Innocenzio da Imola, and afterwards assistant to Giulio Romano. He was one of the artists employed by Francis I. and Henry II. to decorate the palace at Fontainebleau; was sent to Rome to form a collection of casts of ancient works of art; and was afterwards named superintendent of royal buildings. The numerous large frescoes which he painted at Fontainebleau were destroyed in 1738. Primaticcio was made abbot of St Martin de Troyes in 1544, and died at Paris in 1570. There is one of his best works at Castle Howard—the "Ulysses returned to Penelope."

PRINCE, JOHN, a divine and antiquary, was born at Axminster, in Devonshire, and died about 1720. He published a work, entitled "The Worthies of Devonshire," which is curious and valuable, but very scarce.

PRINGLE, Sir JOHN, an eminent physician and natural philosopher, was born in 1707, in Roxburghshire, was educated at St Andrew's and Edinburgh, and afterwards studied at Leyden, under Boerhaave and Van Swieten. After settling at Edinburgh, where he became professor of moral philosophy, he was appointed physician-general to the forces abroad, and was generally on the continent till the peace of Aix la-Chapelle, after which he took up his residence in London, and engaged in medical practice. In 1759 he communicated to the Royal Society, of which he was a member, his "Experiments on Septic and Antiseptic Substances," for which he received the Copley medal. In 1752 he published his admirable "Observations on the Diseases of the Army," and in 1761 he was appointed physician to the queen's household. In 1766 he was created a baronet, and, in 1772, was elected president of the Royal Society, which office he resigned in consequence of ill health, in 1778; and died in 1782.

PRINGLE, THOMAS, poet and miscellaneous writer, was born at Islaiklaw, in Teviotdale, 1789. Soon after his studies at the uni-

versity of Edinburgh were completed, he obtained a clerkship in the register office; but in 1816 his "Scenes of Teviotdale," contributed to the "Poetic Mirror," having attracted the notice of Sir W. (then Mr) Scott, he was led to embrace literature as a profession. He was for a short period editor of Blackwood's Magazine in 1817, but a difference of politics between him and the publisher soon led to his resignation. After some abortive attempts to establish a newspaper in Edinburgh, he was enabled, through Sir Walter Scott's influence, to ex. grate to the Cape of Good Hope, where he settled, and for some years thrived under the governor's protection; but in consequence of his determination to publish a liberal journal, against the wish of the authorities, he was obliged to return to England in 1826, and became secretary of the Anti-slavery Society. Besides being editor of the annual, "Friendship's Offering," he published in 1828 his "Ephemerides," a collection of songs, sonnets, and other juvenile pieces; and in 1831 appeared his "African Sketches," which, together with his interesting account of a "Narrative of a Residence in South Africa," serve to perpetuate his name. Died, 1834.

PRINSEP, JAMES, an eminent orientalist, born in 1800. He entered the service of the East India Company, and long held an office in the Mint, first at Benares, and then at Calcutta. He was a diligent student of Indian history and antiquities, became secretary to the Asiatic Society, and editor of its "Journal," was chosen F.R.S. London, and by his labours and writings rendered important services to the cause of civilization and education in Hindostan. Died, 1810.

PRIOR, MATTHEW, an English poet and diplomatist, was born in 1664. He lost his father at an early age, and was brought up by his uncle, a tavern-keeper at Charing Cross, who sent him to Westminster School; but, after some time, took him home to assist in the business. His classical knowledge becoming known to the earl of Dorset, he sent him to St John's College, Cambridge, where he obtained a fellowship. In 1687 Prior wrote, in conjunction with Charles Montagu, afterwards earl of Halifax, the burlesque poem of "The City Mouse and Country Mouse." In 1691 he was appointed secretary to the English embassy at the Hague, and, soon after, King William made him one of his gentlemen of the bed-chamber. In 1697 he was secretary to the embassy at the treaty of Ryswick, and the following year he went in the same capacity to France. At length he was made under-secretary of state, and in 1701 he succeeded Locke as a commissioner at the Board of Trade. After the accession of Queen Anne he joined the Tories, by whom he was employed to negotiate the treaty of Utrecht, and was sent ambassador to the French court; from whence, at the commencement of the next reign, he was recalled, committed to custody, and threatened with an impeachment, which, however, did not take place. Being without any provision for his declining years except his fellowship, he again applied himself to poetry; and having finished his "Solomon," he published his poems by sub-

scription. The publication, being liberally encouraged by party zeal, produced a considerable sum, which was donated by the earl of Oxford, at whose seat the author died, after a lingering illness, in 1721, and was interred in Westminster Abbey. His poems are light and harmonious, and the ease and vivacity with which he tells a story, constitutes the great charm of his poetry. His "Alma" is a very clever burlesque poem, in the dithyrambic verse. Intended to ridicule the speculations, fashionable in his day, respecting the seat of the soul. Formerly his merit was overrated; at present perhaps bare justice is scarcely done to his genius. A portrait of Prior, by Richardson, is in the National Collection.

PRISCIANUS, a celebrated grammarian, born at Caesarea, in the 5th century, whose name is familiar from the proverbial saying of one who writes false Latin, that he breaks Priscian's head. He was head of a school at Constantinople, and was author of a work entitled "De Arte Grammatica," and several other grammatical works.

PRISCILLIANUS, a heretic of the 4th century, was a native of Spain, where his opinions were combated in 380, by a council held at Saragossa. Priscillian was ordained bishop of Avila by his own party; but put to death, with some of his adherents, in 387. He is said to have united in his system the errors of the Gnostics, the Manicheans, the Arians, and the Sabellians; and the Priscillianists were charged with infamous practices, resulting from these opinions.

PROTUS, MARCUS AURELIUS VALERIUS, Roman emperor, was born at Sirmium, in Pannonia, became ruler of the East, and in 276 was made emperor by the army there; obtained several victories over the barbarians, reigned with honour to himself, but was at length slain by his mutinous troops, in 282.

PROCCACCI, CAMILLO, an eminent painter, born at Bologna, in 1546. He studied the works of Parmegiano and Michael Angelo, and obtained a high reputation for the beauty of his colouring and the lightness of his touch. Died, 1626.—His brother, GIULIO CESARE, born in 1518, adopted the style of Coreggio, and surpassed all his other imitators. Died, 1626.—CARLO ANTONIO, another brother, excelled as a fruit and flower painter.

PROCIDA, JOHN OF, the great Sicilian patriot and chief promoter of the conspiracy known as the "Sicilian Vespers," was born at Palermo, about 1225. He was educated as a physician, became the trusted friend of the great emperor, Frederick II., and of his sons, Conrad IV. and Manfred. He took part in Conrad's unsuccessful attempt to recover his dominions from Charles of Anjou, and his estates were confiscated. The court of Aragon then received him and conferred on him wealth and honours; but he did not forget his country and its oppressions. In 1279 he visited Sicily, and began preparing the people for the insurrection he meditated, obtained the aid of the emperor, Michael Paleologus, and the sanction of the pope, Nicholas III., and returned to Sicily in 1291. The insurrection broke out in March, 1292, and was completely successful. John of

Procida, it is said, took no direct part in the massacre of the French. He continued to be the counsellor of the succeeding sovereigns, and died about 1303.

PROCLUS, a Greek philosopher, was born in 412, at Constantinople. He studied at Alexandria, and next at Athens, where he succeeded Syrianus in the Neo-Platonic school, and died in 485. Several of his works are extant.

PROCOPIUS, a Greek historian, was a native of Caesarea, settled at Constantinople, where he taught rhetoric, and was chosen to be secretary to Belisarius. He followed this great general in all his expeditions. In 562 he was appointed prefect of Constantinople. He wrote Histories of the Wars of the Persians, the Vandals, and the Goths, also a Secret History, or Anecdotes, of the imperial court, and a treatise on public buildings. Died, 565.

PROCTER, ADELAIDE ANNE, a young English poetess, daughter of the poet Bryan Waller Procter, better known by his *nom de plume* of "Barry Cornwall," was born in 1835. Although she contributed to "Household Words" her name remained unknown to the public till 1858, when her volume of charming "Legends and Lyrics" appeared. It was warmly welcomed, and has passed through many editions. The genuineness and simplicity of the poems, their thoughtful tone, their tenderness and grace, and the delicacy and variety of their style, ever musical, and their entire freedom from imitation, trick, and exaggeration, have given them a high place, and a place of their own, in the esteem and love of English readers. In many of them is heard the expression of a deep devotional spirit, the devotion of a convert to the faith of the church of Rome. In 1861 appeared a second volume of the "Legends and Lyrics," which was followed by "A Chimelet of Verse." This promising young writer died, after a long illness borne with quiet heroism, February 2, 1861.

PRODIGES, a celebrated sophist and rhetorician, was a native of the island of Ceos, flourished about 490 B.C. He had Socrates for one of his disciples, and is said to have been put to death at an advanced age, on a charge of corrupting youth. Prodiges was author of the well known fable of the "Choice of Hercules."

PRONY, GUYARD-CLAIR-FRANÇOIS-MARIE RICHE DE, Baron de Prony, a distinguished French mathematician. He was the pupil, and subsequently the assistant, of Perronet, and was much employed by Napoleon, though the latter was deeply offended by Prony's refusal to accompany him to Egypt. Independent of his various missions as an engineer, and of his labours as a professor at the Polytechnic School, Prony was author of between thirty and forty volumes, chiefly of most laborious and extensive calculations. One work, forming 17 volumes in folio, was executed in obedience to an order of the French government for "tables which should be as exact as possible, and, at the same time, the greatest and most imposing monument of calculation that had ever been executed, or even thought of." It is supposed that the French government

said, took no direct part in the French. He continued to be the editor of the succeeding volumes about 1303.

A Greek philosopher, was born in Constantinople. He studied at and next at Athens, where he was a pupil of the Neo-Platonic school in 155. Several of his works are, a Greek historian, was a native of Sicily, settled at Constantinople, a rhetorician, and was chosen to be the tutor of the emperor Constantine. He followed this office in all his expeditions. In 502 he was prefect of Constantinople during the Wars of the Persians, and the Goths, also a writer of Anecdotes, of the imperial history, and of the imperial decrees on public buildings.

ADÉLAÏDE ANNE, a young girl, daughter of the poet Bryan, better known by his *nom de plume* "Corymbus," was born in London in 1752. She contributed to "Houssier" a name remained unknown until 1858, when her volume of "Poems and Lyrics" appeared. She was warmly welcomed, and has passed through several editions. The genuineness of the poems, their thoughtfulness, and grace, and the variety of their style, ever maintaining freedom from imitation, have given them a place of their own, in the eyes of English readers. In 1858 she heard the expression of a spirit, the devotion of a confessor, the devotion of a confessor, the devotion of a confessor, the devotion of a confessor.

PRODIGES, an eminent Greek painter, who flourished about 330 B.C., was a native of Canus, in Caria, a city subject to Rhodes. A considerable part of his life was passed in obscurity, but he was at length brought into notice by Apelles giving a large price for his pictures. On the siege of Rhodes by Demetrius Poliorcetes, Prodiges is said to have continued tranquilly working at his house in the suburbs, and Demetrius spared that part of the city for the sake of the famous artist, and his precious works.

PROUDHON, PIERRE JOSEPH, a celebrated French publicist, was born at Besançon in 1809. Occupied with rustic labours in his earliest years, he received gratuitous instruction at the college of his native town, and at 19 became a compositor. He was employed in various printing offices till 1837, but had found time to think and study and make considerable acquisitions. The sense of the inequality of conditions among men, and of the social stigma attached to poverty, early weighed on his mind, and gave permanent direction to his speculations and endeavours. In 1840, after several small works, appeared his famous memoir entitled "Qu'est ce que la Propriété?" his answer to this question, "La Propriété c'est le Vol," being almost all that is popularly known of him. A second memoir on the same subject exposed him to a prosecution, but he was acquitted. After the revolution of February, 1848, Proudhon became editor of "Le Représentant du Peuple," and attracted great attention and popularity by his articles; so that in June he was chosen member of the Constituent Assembly for the department of the Seine. But he found no hearing at the tribune, and therefore started a newspaper under the title of "Le Peuple," which was suppressed, and reappeared three times. In 1849 he founded his "People's Bank," but being soon after sentenced, under the press laws, to three years' imprison-

ment and a fine, he left France, and the Bank was closed by the government. Returning a few months later, he submitted to his sentence, and was only liberated in 1852. His writings are very numerous. Among the principal are—"De la Création de l'ordre dans l'humanité;" "Contradictions économiques;" "Confessions d'un révolutionnaire;" "La Révolution Sociale démontrée par le Coup d'Etat du 2 Décembre;" and "De la Justice dans la Révolution et dans l'Eglise." The last named appeared in 1858, and was immediately seized, and the writer was again sentenced to three years' imprisonment and fined. He retired to Brussels, where he published several other works, and died at Paris, 19th January, 1865.

PROUT, SAMUEL, one of the most distinguished of British water-colour painters, was born at Plymouth in 1783. The early associate of Haydon, he first brought himself into notice by the sketches of Cornish scenery which he made for Britton's " Beauties of England;" and, in 1805, he settled in London, earning a living for some years by the sale of his drawings, and by teaching. He subsequently applied himself to lithography, then a new art, and published a set of "Studies" and several other series of lithographic views and lessons. His travels in France, in 1818, gave a new direction to his artistic efforts, and from that time he chiefly distinguished himself by his admirable sketches of the picturesque mediæval buildings of France, Flanders, Germany, and Italy, making repeated journeys through those countries, and with English energy and patience bringing home to us, says Mr. Philgrave, innumerable records of cathedral and castle, market-place and town-hall, from every city of Europe. Prout published besides his sketches several useful books for the help and instruction of art students. Though he worked so indefatigably, he was a constant sufferer from ill health, the consequence of a sunstroke in his childhood. Died, 10 February, 1852.

PROUT, WILLIAM, an eminent physician, born about 1786. He graduated M.D. at Edinburgh, and settled in London, where he devoted himself to his profession and to scientific researches, especially to the study of chemistry and the connection of chemical action with the phenomena of disease. His principal work is entitled, "On the Nature and Treatment of Stomach and Renal Diseases." He was also author of the "Bridge-water Treatise," on "Chemistry, Meteorology, and the function of Digestion, considered with reference to Natural Theology." He was a fellow of the Royal Society and of the Royal College of Physicians, and contributed memoirs to the "Philosophical Transactions" and to the "Transactions of the Geological Society." Died, 1850.

PRUDHOMME, LOUIS, editor of *Le Journal des Révolutions de Paris*, was born at Lyons, in 1752, where he was brought up to the business of bookseller. In 1788 he fixed his residence in Paris, and became a zealous promoter of the principles of the revolution. In 1789 he established the above journal, which had for its motto, "The great seem to us to be great, only because

we are on our knees: let us rise!" Although he constantly assailed the government in this publication, as well as in countless pamphlets, he opposed also the tyranny of Robespierre, and was in consequence arrested as a royalist; but having speedily obtained his liberty, he quitted Paris, and was absent till the death of that inexorable dictator. Among his numerous works is a "General History of the Crimes committed during the Revolution," 6 vols. Died, 1830.

PRUDHON, PIERRE PAUL, a French painter, born in 1760, at Cluny, where he was educated by the monks of the celebrated abbey of that place. After having studied at Rome, he settled at Paris, and gained celebrity by his allegorical picture, "Crime pursued by Divine Justice." His too early marriage turned out ill, and was followed by a divorce; and that, by another triumph of passion and bitter remorse. Died, 1823.

PRYNNE, WILLIAM, a learned lawyer, political writer, and antiquary, was born in 1600, at Swanswick, in Somersetshire, was educated at Bath grammar school, and Oriel College, Oxford; and removing to Lincoln's Inn to study the law, became barrister, bencher, and reader of that society. His attendance upon the lectures of Dr Preston, a distinguished Puritan, strongly attached him to that sect, and he began to write as early as 1627, attacking the drinking of healths, love-locks, Popery, and Arminianism, which he deemed the enormities of the age. In 1632 he published his work against theatrical exhibitions, entitled "Histriomastix," and having therein libelled the queen, he was the subject of a Star-chamber prosecution, and condemned to pay a fine of £5000, to be expelled the university of Oxford and Lincoln's Inn, to be degraded from his profession of the law, to stand twice in the pillory, losing an ear each time, and to remain a prisoner for life. Prynne continued writing against preiacy in prison; until, for a virulent piece, entitled "News from Ipswich," he was again sentenced by the Star-chamber to a fine of £3000, to lose the remainder of his ears in the pillory, and to be branded on each cheek with the letters S. L. (seditious libeller). This sentence was also executed, and he was removed for imprisonment to Caernarvon castle, and afterwards to the island of Jersey. In 1610 he obtained his liberty, was elected member for Newport, and bore a prominent part in the trial of Laud, his former persecutor. After the overthrow of Charles, however, Prynne endeavoured to effect an accommodation between him and his subjects, and he opposed Cromwell with such boldness, that the Protector imprisoned him. He joined in the restoration of Charles II, was appointed chief keeper of the records in the Tower, and died in 1669. He wrote a prodigious number of books, chiefly on politics and religion; also the "History of Archbishop Laud," and Lives of Kings John, Henry III, and Edward I.

PSALMANAZAR, GEORGE, a literary impostor, was born in France, in 1679, and received an excellent education. He commenced his career by leading a wandering life, and assumed the habit of a pilgrim;

but this not answering his purpose, he pretended to be a native of Formosa, and to alphabet, and a grammar of the Formosan with a clergyman named Limes, who, conceiving he could turn the impostor to good account, persuaded the pretended Formosan to suffer himself to be converted to the church of England, and the clergyman who latter was presented to Bishop Compton and others, and the former was rewarded for his zeal with church preferment. Psalmanazar had the effrontery to translate the Church Catechism into his newly invented Formosan language; and he published "History of Formosa," which was considered as authentic by many eminent men, nor been sent to Oxford. After this he had subsistence by writing for the booksellers, and became remarkable in his later years for his sincere and unaffected piety. A large portion of the ancient part of the "Universal History" was written by him, and he left behind him his own "Memoirs." Died, 1763.

PTOLEMÆUS SOTER, king of Egypt, founder of the dynasty of the *Lagide*, was a Macedonian, supposed to be a natural son of Philip II., and became a favourite general of Alexander the Great, whom he accompanied on his expedition to Asia. On the death of his master, in B.C. 323, Ptolemy obtained Egypt for his province. For twenty years he was almost constantly engaged in war. He defeated his rival Perdicas; acquired Phenicia and Coele-Syria; joined the league against Antigonus; was defeated by Demetrius in 306, and lost the island of Cyprus, and soon after took the title of king. He saved Rhodes when besieged by Demetrius, and received the title of SOTER (Saviour), and after the fall of Antigonus he applied himself to the promotion of commerce, literature, science, and the arts in his own dominions. Philosophers, poets, and painters gathered to his court, and the foundations were laid of the famous Alexandrian Library and Museum. In 283, Ptolemy resigned his crown to his son, surnamed Philadelphus, and died, 283.

PTOLEMÆUS PHILADELPHUS, king of Egypt, born in Cæ., B.C. 311, was the youngest son of the preceding by his favourite wife, Berenice. He became king on the abdication of his father in 283, and had a long and for the most part peaceful reign. He had been carefully educated, and he entered heartily into his father's plans for promoting the prosperity of his kingdom, completing the Alexandrian Library and Museum, patronizing learning and learned men, founding colonies, and increasing his army and his revenue. He made a treaty of alliance with the Romans, and encouraged the resort of Jews to Egypt. According to tradition it was by his order that the Septuagint version of the Old Testament was made. Philadelphus was twice married; his second wife being his sister Arsinoe, widow of Lysimachus. Died, 271.

insanity, from which he only recovered to pass into the shadow of death. Died, 1852. His "Notes of Travel in Italy, Switzerland, Flanders, Germany, and France, with Photographic Copies of 500 of his Drawings," was published in 1865.

PUISAYE, Count JOSEPH, a French royalist chief, was descended from an ancient and noble family, and born at Mortagne, about 1754. He was intended for the church, but preferred the military profession, and obtained the brevet of colonel in the royal Swiss corps. He sat in the Constituent Assembly, and regularly voted with the partisans of political regeneration. In 1793, forces having been collected in the northern departments to oppose the Jacobins, he was appointed to act as second in command under General Wimpfen, and was consequently proscribed by the Convention. He took refuge in Brittany, where he organized a formidable body of Chouans. He visited England in 1794, obtained a considerable succour, was invested with unlimited powers by the Count d'Artois; and, on his return to France, every preparation was made by the Bretons to join the English and emigrant troops as soon as they should appear on the French coasts. But his hopes were blasted by envious intrigues of his own party; the expedition was diverted to La Vendée, and the disaster at Quiberon followed. He at length resigned his commission and went to Canada; but he subsequently came to England, where he resided till his death, in 1827.

PULCI, LUIGI, an Italian poet, was born at Florence, in 1431. He was the personal friend of Lorenzo de Medici. His principal performance, entitled "Morgante Maggiore," is a poetical romance, and was printed at Venice, in 1488; and a spirited translation of it, by Lord Byron, was given in the *Liberal*. Pulci also wrote sonnets, published with those of Matteo Franco, in which the two authors satirized each other for their amusement. Died, 1487.—His brothers, BERNARDO and LUCA, were also poets. The former published a translation of the *Elogues* of Virgil, and a poem on the passion of Christ; the latter was the author of "Glostra di Lorenzo de Medici," and an epic romance, called "Il Cirillo Calvaneo."

PULTENEY, WILLIAM, earl of Bath, the political antagonist of Sir Robert Walpole, was born in 1682, and educated at Westminster School and Christchurch, Oxford. After travelling through Europe, he was elected into parliament, and became distinguished as a zealous Whig. On the accession of George I. he was appointed a privy-councillor and secretary at war; but a dispute with Sir Robert Walpole caused his removal to the ranks of the opposition. He joined Bolingbroke in conducting a paper, called the *Craftsman*, the object of which was to annoy the minister. This produced a duel between Pulteney and Lord Herve; and the king was so much displeased with the conduct of the former, that he struck his name out of the list of privy-councillors, and also from the commission of the peace. On the resignation of Walpole, in 1742, Pulteney was created earl of Bath; but from that time his popularity and influence ceased.

He became prime minister in 1746, but was in office only two days. Died, 1764.

PULTENEY, RICHARD, a physician and botanist, was born at Loughborough, in 1730. He first practised as a surgeon at Leicester; but in 1764 he took the degree of M. D. at the university of Edinburgh, and settled at Blandford, in Dorsetshire. He was the author of "Historical and Biographical Sketches of the Progress of Botany in England," besides several professional treatises, and a variety of papers in the *Philosophical Transactions*, &c. Died, 1801.

PURCELL, HENRY, one of the most illustrious of English musical composers, was born in 1658. He was trained in the Chapel Royal, and at the age of 18 was appointed organist of Westminster Abbey. In 1682 he became one of the organists of the Chapel Royal. He distinguished himself equally in all varieties of musical composition; published 50 anthems, some of which are still in use; a *Te Deum*, a *Jubilate*, numerous operas, sonatas, cantatas, overtures, songs and duets, glees and rounds. The songs were collected and published under the title of "Orpheus Britannicus." Among the operas for which he wrote the music were "The Tempest," "Diocletian," Lee's "Theodosius," D'Urfey's "Don Quixote," and Howard's and Dryden's "Indian Queen." Some of his finest songs are in Dryden's "Bonduca" and "King Arthur." Died, 1695, and was buried in Westminster Abbey.

PURCHAS, SAMUEL, author of the two curious and interesting books entitled—"Purchas his Pilgrimage, or Relations of the World and the Religions observed in all Ages," and "Purchas his Pilgrimages," the first of which appeared in 1613, and the second in 1625. He was born in Essex in 1577, studied at Cambridge, and entered the church; became chaplain to Archbishop Abbot; was highly esteemed for his learning, piety, and faithful discharge of his clerical duties, and died about 1629.

PURVER, ANTHONY, a self-instructed man, of humble birth, was born at Up Hurstbourne, in Hampshire, in 1702, and was apprenticed to a shoemaker. Being afterwards employed in keeping sheep, he found leisure for study; and his curiosity being excited by a tract in which some inaccuracies in the authorized version of the Bible were pointed out, he resolved to make himself acquainted with the Scriptures in the original tongues. Accordingly, with some assistance from a Jew, he acquired a knowledge of the Hebrew, then applied to the Greek, and next studied Latin. On settling at Andover as a schoolmaster, he undertook the labour of translating the Bible into English; which work he accomplished, and it was printed at the expense of Dr. Fothergill, in 2 vols. folio. Died, 1777.

PUSCHKIN, ALEXANDER, a distinguished Russian poet, was born at St. Petersburg, 1798. Having at an early age incurred the displeasure of the government for the liberality of his opinions, he was removed to a distant province of the empire, where he discharged various offices; but he was restored to favour on the accession of the Emperor Nicholas in 1825, and appointed im-

perial his consist of matic pie national e popular a and Ludm (the Bohem ghline," and of Byron's Godunow, hand of his

The most popular are his romantic poem, "Rouslan and Ludmila," published in 1820; "Tselgani" (the Bohemians), published in 1827; "Oneghine," an unfinished poem in the manner of Byron's Beppo; and his tragedy, "Horis Godunow," published in 1831. He fell by the hand of his own brother-in-law in a duel, 1837.

PYE, HENRY JAMES, poet-laureate, was descended from an ancient Berkshire family, and born in London, in 1745. He was educated at Magdalen College, Oxford; was for some time an officer in the Berkshire militia, and ruined his fortune by the expenses of a contested election for the county. In 1790 he was appointed poet-laureate; and, in 1792, one of the police magistrates. His works are forgotten. Died, 1813.

PYLE, THOMAS, an English divine, was born at Stody, in Norfolk, in 1674, and was educated at Caius College, Cambridge. On taking the part of Bishop Hoadley, in the Bangorian controversy, that prelate rewarded him with a prebend and residentiaryship in Salisbury cathedral. He was author of Paraphrases on the Holy Scriptures, and "Sermons." Died, 1756.

PYM, JOHN, one of the most distinguished statesmen of the Commonwealth, was born in Somersetshire in 1584. He studied at Oxford, became eminent as a lawyer, and entered parliament in the reign of James I., acquiring great influence as an opponent of the arbitrary measures of the king. He took part, in 1626, in the impeachment of the duke of Buckingham; and in the attack on Manwaring two years later; was one of the leaders intending to emigrate and prevented by royal proclamation in 1637; was very active in the short parliament of April, 1640; and on the opening of the Long Parliament procured the impeachment of the earl of Strafford, and undertook the conduct of the proceedings. Pym was one of the Five Members illegally arrested by Charles I. in January, 1642, and brought back in triumph from the city to Westminster. In November, 1643, he was appointed lieutenant of the ordnance, and in the following month he died. His body lay several days in public, and was then buried in Westminster Abbey. The whole House of Commons attended his funeral. Pym was one of the most able, devoted, and indefatigable of the popular leaders; cautious and well versed in the rights and customs of parliament; a master of eloquence, and author of most of the decisive measures of his party. The royalists slyly named him "King Pym." There is a Life of Pym by John Forster.

PYNE, WILLIAM HENRY, painter and littérateur, was born in 1770. He was one of the first members of the Society of Painters in Water Colours; was author of several works, of which the most important is—"Microcosm, or a Picturesque Delineation of the Arts, Agriculture, Manufactures, &c., of Great Britain," which appeared in 1803. In his later years he contributed some light papers to the "Literary Gazette" and Fraser's Magazine. Died, 1843.

PYNSON, or PINSON, RICHARD, an early English printer, was by birth a Norman, but naturalized in England by letters patent, and appointed king's printer. He was the first that introduced the Roman letter into this country. Died, probably, about 1529.

PYRRHO, the celebrated philosopher of Elis, and founder of the sect called Sceptics, or Pyrrhonists, flourished about B. C. 340. He was originally a painter, but afterwards became a disciple of Anaxarchus, whom he accompanied to India, in the train of Alexander the Great, and while there obtained a knowledge of the doctrines of the Brahmins, Gymnosophists, Magi, and other Eastern sages. On the return of Pyrrho to Greece, the inhabitants of Elea made him their high priest, and the Athenians gave him the rights of citizenship. Died, B. C. 288.

PYRRHIUS, king of Epirus, B. C. 306, was one of the greatest warriors of antiquity. He ascended the throne of his father when but 12 years old; and being driven from it, five years afterwards, by Neoptolemus, he soon regained it, and increased his power by the conquest of Mæcedonia. Of his various wars, that with the Roman republic occupies the largest place in history. The Romans entertained the highest opinion of his military skill, and from him, in fact, they learned much of the art of war. He was fond of glory, and personally brave, even to rashness; but his faults of ambition were counterbalanced by acts of courtesy and benevolence. He was killed by a tile thrown from the top of a house at the siege of Argos, B. C. 272.

PYTHAGORAS, the celebrated Greek philosopher, was born in Samos, probably about B. C. 580—570. So many legends have gathered about his history, that it is almost impossible to trace its details. He was the son of Mnesarchus, and, perhaps, a disciple of Pherecydes. He is said to have travelled extensively, especially in Egypt, and to have been initiated in the most ancient Greek mysteries. He attached great importance to mathematical studies, and is believed to have made several important discoveries in geometry, music, and astronomy. Aversion to the tyranny of Polycrates, in Samos, is said to have been the cause of his quitting that island after his return from the East; and he ultimately settled, between B. C. 540—530, at Crotona, one of the Greek cities of South Italy. There he set himself to carry out the purpose, probably formed long before, of instituting a society through which he might to some extent give embodiment and practical shape to his ideas. It was, says Thirlwall, at once a philosophical school, a religious brotherhood, and a political association, and was composed of young men of the noblest families, not exceeding 300 in number. Pythagoras himself was chief or general of the order. The doctrines he taught, the discipline and observances he established, and the ultimate objects of the society are wrapped in mystery. Similar societies were founded in other cities of Italy, and through all of them Pythagoras exerted a considerable influence on political affairs, and especially in opposition to democratic and revolutionary movements. This became at length

studied at the London Hospital, obtained in 1811 one of the studentships in anatomy at the College of Surgeons, and two years later was appointed assistant-curator of the Hunterian Museum. In 1836 he succeeded Professor Owen as principal curator and as professor of histology, which posts he held till his death. He compiled a valuable "Illustrated Catalogue of the histological series contained in the Hunterian Museum," which magnificent collection, including 16,000 specimens, was entirely formed by him; contributed memoirs to the Microscopical Society, which he assisted in establishing, and wrote a "Practical Treatise on the Use of the Microscope," and "Lecture on Histology." He was chosen F.R.S. in 1860. Died at Pangbourne, Berkshire, 20 August, 1861.

QUELLINUS, ERASMUS, an eminent painter, was born at Antwerp, in 1607. He was a pupil of Rubens, and executed several pictures of great merit. He died in 1678, and left a son, JOHN ERASMUS QUELLINUS, whose historical pieces are held in estimation. He had also a nephew, ARTHUR QUELLINUS, who was an excellent sculptor.

QUERCIA, GIACOMO DELLA, also called JACOPO DELLA PONTE, a distinguished Italian sculptor, was born at Siena in 1371. He learnt the goldsmith's art from his father, and studied sculpture under Luca di Giovanni. In 1401 he was one of the competitors for the Baptistery Gates at Florence, and his design held the first place after those of Brunelleschi and Ghiberti. One of his best works was the beautiful Fonte Gaja at Ferrara, executed between 1412—1419. Among his other works are the fifteen bas-reliefs on the façade of St Petronius at Bologna, the monument to Maria del Carretto at Lucca, and that of Antonio Bentivoglio at Bologna. There is a remarkable likeness between some of the reliefs at St Petronius and the frescoes of the same subjects, by Michael Angelo in the Sistine Chapel. Before painting these frescoes Michael Angelo visited Bologna, and made drawings. It is said, from Quercia's reliefs. Quercia died at Siena, 1438.

QUERENGHI, ANTONIO, an Italian poet, born at Padua, in 1546, distinguished himself at an early age by his erudition, was secretary of the Sacred College under five popes, and died at Rome in 1633.

QUERINI, ANGELO MARIA, Cardinal, was born at Vealce, in 1680. He entered the Benedictine order, travelled in the principal countries of Europe, was made archbishop of Brescia, in 1727, and cardinal soon afterwards. Cardinal Querini collected a magnificent library, which he gave to the town of Brescia, and though he was a zealous champion of the papacy, his writings are marked by candour and moderation. He died in 1755.

QUER Y MARTINEZ, JOSEPH, a Spanish botanist, born at Perpignan, in 1693. He was a surgeon-major in the army, and made good use of the opportunities which his visits to the coast of Africa afforded him, while attached to his corps, of collecting numerous plants and seeds. This led to the formation of a royal botanic garden at Madrid, over which Quer presided. He wrote and published the first 4 volumes of a Flora Española, o Historia de las Plantas

que se erlan en España," which was completed by the publication of 2 volumes more, by Ortega. Died, 1764.

QUESNAY, FRANÇOIS, the distinguished French economist, was born in 1694, near Montfort-l'Amaury. Brought up to the medical profession, he practised first at Mantes, and having gained some reputation, he was appointed, in 1737, secretary to the Academy of Surgery, surgeon to the king, and professor at the schools of surgery. He attended Louis XV. in his campaign in the Netherlands, in 1744; afterwards graduated M.D., and long enjoyed the confidence of the king, who called him his "thinker." Quesnay was a member of the Academy of Sciences and of the Royal Society of London. He was author of a curious "Histoire de l'Origine et des Progrès de la Chirurgie en France;" "Essai Physique sur l'Economie Animale;" "La Physicoeconomie, ou Constitution Naturelle des Gouvernements," published in 1768, and called by La Harpe, "The Koran of economists;" and many memoirs contributed to the "Encyclopédie," and various journals. Died, 1774. *Eloges* of Quesnay were composed by Condorcet, the Marquis of Mirabeau, and the Count d'Aillon.

QUESNEL, PASQUIER, a theologian, born at Paris, in 1634, who became the head of the sect of Jansenists. He wrote a great many books, chiefly of the polemic kind; but gave offence to the court of Rome by his edition of the works of Pope Innocent the Great. He had to retire to the Netherlands about 1685, joined the celebrated Arnauld at Brussels, and there completed his work, entitled "Reflections Morales." This was formally condemned by the bull "Unigenitus." After suffering imprisonment at Mechlin he went to Amsterdam, where he died, in 1719.

QUESNOY, FRANÇOIS DU, sculptor, was born at Brussels, in 1592. He acquired the principles and practice of the art from his father, but far excelled him. The Archduke Albert gave him a pension, and sent him to Italy, where he made himself known by some beautiful works, particularly a crucifixion wrought in ivory, which procured him the patronage of Pope Urban VIII. He excelled in making models and bas-reliefs of Cupids and children, which he finished with peculiar grace and delicacy; but he was at the same time capable of executing works of the highest importance, of which a St Susanna, in the chapel of Loretto, and a St Andrew, in St Peter's, afford sufficient proof. He died in 1646.

QUEVEDO Y VILLEGAS, FRANCISCO GOMEZ DE, the celebrated Spanish satirist, was born at Madrid in 1580. He was of an illustrious family attached to the court, and, early left fatherless, was sent to the university of Alcalá, where he applied himself to a wide circle of studies with great success, and was created doctor in theology at the age of fifteen. Accomplished in arms, he was several times engaged in duels, and on one occasion, to avoid prosecution, he went to Naples with the viceroy, the duke of Ossuna, who charged him with various government commissions. He is said to have taken part with his patron in the famous Bedmar conspiracy at Venice, narrowly escaped capture, and after the dis-

grace of Ossuna returned to Madrid, and was arrested, in 1620, on a charge of libel, and confined for three years to his country-honse. He took no further part in political affairs; gave up his church benefices in 1631, and married, but soon lost his wife. In 1641 he was again imprisoned on a false charge, thrown into a damp dungeon, treated with the greatest harshness, and only liberated after nearly two years. His estate was confiscated, and his health broken up, and in September, 1645, he died. Quevedo was one of the most original of Spanish writers, and, like Voltaire, distinguished himself by extraordinary versatility of talent, shining in almost every variety of composition, verse or prose. A large number of his writings were seized and destroyed in his lifetime, especially the dramatic and historical works. Among those most celebrated are the "Sueños" or "Visions," touching the gravest themes, yet abounding with wit and gaiety. They were translated into English by Sir Roger L'Estrange, and passed through ten editions in about forty years. Among his other prose works are, "Advice to Lovers of fine Language," an attack on Gongora and Lope de Vega; the "Life of the great Tacaño," a romance painting the national manners; several religious works, and treatises on moral philosophy. His poems, collected under the title of "El Paraisso Español," consist of lyrical poems, satires, burlesque pieces, and more than a thousand sonnets, some of remarkable beauty. The complete works of Quevedo form 11 vols. 8vo.

QUICK, JOHN, a comic actor, was the son of a brewer in London, where he was born in 1748. When only 14 years old he left his home, and joined a company of provincial actors; and as he gradually rose in his profession, he obtained an engagement at the Haymarket in 1769, and subsequently established his fame by his admirable performance of Mordecai in "Love à la Mode." He afterwards went to Covent Garden, where for many years he held a prominent station, filling the best parts in light comedy. In 1798 he retired from the stage, and died in 1831.

QUIN, JAMES, an eminent actor, was born in London, in 1693. He performed at Drury Lane and at the theatre in Lincoln's Inn Fields; and though for a considerable period he was confined to inferior parts, he at length rose into high reputation, and was without a rival till the appearance of Garrick. His last performance was Falstaff (1753), in which character he has perhaps never been excelled. He survived his retirement several years, which he spent chiefly at Bath, where his fund of anecdote, and pointed sense, made him much sought after. Quin, who was convivial and too fond of the bottle, was often coarse and quarrelsome, and had two or three hostile encounters, one of which proved fatal to his antagonist. He was otherwise manly, sensible, and generous. He had been employed by Frederick, prince of Wales, to instruct the royal children in elocution; and when Quin was informed of the graceful manner in which George III. delivered his first speech from the throne, he emphatically said, "Ay, it was I who taught the boy

to speak." About this time he obtained a pension. Died, 1766.

QUINAULT, PHILIPPE, a French dramatic poet, was born at Paris, in 1635, and died in 1688. His operas were highly and deservedly popular, but they excited the envy of Boileau, who attacked them with characteristic asperity. They were printed at Paris, with his Life, in 1739, 5 vols. 12mo.

QUINCEY, THOMAS DE. [DE QUINCEY.]

QUINCY, JOHN, an English physician and medical writer of the 18th century, who practised his profession, and delivered lectures in London, where he died in 1728. Among the works he produced was a "Lexicon Physico-Medicum," which served as the basis of Dr Hooper's Medical Dictionary, and other subsequent compilations of a similar nature.

QUINCY, QUATREMÈRE DE. [QUATREMÈRE.]

QUINTANA, MANUEL JOSE, a distinguished Spanish poet, born at Madrid, in 1772. He early became the friend and associate of Melendez, Jovellanos, and other eminent literary and political leaders, and the fearless champion of liberal principles in politics. He practised as an advocate, and obtained several government appointments; took a prominent part on the popular side during the Peninsular war, and suffered six years' imprisonment after the restoration of Ferdinand VII. Restored to his offices in 1820, and again deprived on the French invasion three years later, he lived in retirement till 1828, when he wrote a poem on the king's marriage, and soon regained his former honours and more. In 1855 he was publicly crowned with laurel by the queen of Spain. Besides his poems, among which are some spirited patriotic Odes, Quintana wrote "Lives of celebrated Spaniards," and edited the "Variedades," then one of the best Spanish periodicals, and the "Semansario Patriotic." Died at Madrid, 1857.

QUINTILIANUS, MARCUS FABIUS, the celebrated Roman rhetorician, was a native of Spain. In his early youth he was at Rome, and heard the lectures of Domitius Afer, who died A.D. . . . He accompanied Gaiba to Rome, in the year 68, became an eminent pleader, and still more eminent as a teacher of rhetoric. He taught at Rome for 20 years, was named preceptor to the grand-nephews of Domitian, had also Pliny the younger among his scholars, and had a salary from the public exchequer. He retired from his public duties in 89, and is supposed to have lived about 30 years longer. His great work is entitled, "De Institutione Oratoria," and was written after his retirement, but during the reign of Domitian. It is the most complete course of rhetoric handed down from ancient times, and is distinguished for its elegance of style as well as for sound judgment, cultivated taste, and various knowledge. The first complete copy of this work was discovered by Poggio, in the abbey of St Gall, about 1419, and the first printed edition appeared at Rome, in 1470. Ten other editions were published before the close of the same century. There are translations in English, French, German, Italian, and Spanish. Two Eng-

lish translations appeared in the 18th century, by Guthrie and Patsall, both incomplete and unscholarly. A new and complete translation by Watson has been recently published in Bohn's Classical Library.

QUINTUS CALABER, or QUINTUS SMYRNEUS, a Greek poet, who wrote a supplement to Homer's Iliad. He is supposed to have lived in the 5th century, and to have been a native of Smyrna. His poem was first brought to light by Cardinal Bessarion, who found it in the church of St Nicholas, near Otranto, in Calabria, whence the author had the name of Calaber.

QUIROGA, JOSE, a Spanish Jesuit, was born at Lugo in Galicia, and distinguished himself as a missionary in America. During his residence there he collected much information respecting the countries he visited,

and on his return published a "Journal" of his travels. Died at Bologna, 1784.

QUIROS, PEDRO FERNANDEZ DE, a celebrated Spanish navigator of the 16th century, who explored many of the islands afterwards visited by Captain Cook. Died, 1614.

QUITA, DOMINGOS DOS REIS, a Portuguese poet, born in 1728. He was apprenticed to a barber, but his attachment to learning enabled him to overcome the difficulties of his position; and making himself master of Italian, Spanish, and French, he wrote verses, and at length obtained the patronage of Count San Lorenzo. He was author of "Inez do Castro," and four other tragedies; besides many sonnets, elegies, pastorals, &c. Died, 1770.

R.

RABAUT DE ST ETIENNE, JEAN PAUL, one of the most steady, moderate, and honourable of the French revolutionists, was born at Nismes, in 1741; for which city he was chosen a deputy to the Constituent Assembly in 1789. He attached himself to the party of the Girondists. His father, a brave Protestant pastor at Nismes, was proscribed at the time of his birth; and he relates, in a short memoir of his life, attached to his romance called "Le Vieux Cevenol," that his infancy was passed in continual danger and alarm, and that he never knew when he awoke, where his mother and her friends would conduct him to sleep at night. He was proscribed, like the rest of the moderates, for opposing the excesses of the Mountain party in 1793. He was sheltered by friends for some days; but being at length discovered, he was immediately guillotined, after a short form of identification before the revolutionary tribunal. His wife killed herself, and all those who assisted in concealing him were guillotined. One of his numerous political works is "Sur la Nécessité d'Établir une Constitution."

RABELAIS, FRANÇOIS, the celebrated French wit and satirist, was born at Chinon, in Touraine, about 1493. He was at first a monk, but in consequence of having been punished for some indecorous behaviour, he quitted the Benedictine order, studied medicine at Montpellier, and for a time practised as a physician. He subsequently obtained, through the influence of his patron, Cardinal du Bellay, whom he accompanied to the court of Rome, the rectory of Meudon; and died in 1553. He was author of several books; but the only one by which he is known is the romance called "The Lives, Heroic Deeds, and Sayings of Gargantua and Pantagruel," an extravagant satire

upon monks, priests, popes, and pedants; in which much obscenity and absurdity are blended with learning, wit, and humour. Rabelais was a conscientious teacher of his flock, and it was his pleasure to instruct the children of his parish in sacred music. His house was the resort of the learned, his purse was always open to the needy, and his medical skill was employed in the service of his parish.

RABENER, GOTTLIEB WILHELM, a German satirist, born near Leipsic, in 1714, was educated for the legal profession, and obtained the office of comptroller of the taxes in the district of Leipsic. He died in 1771. His works have been frequently republished.

RABUTIN, ROGER, Count de Bussy, a French wit and satirist, was born in 1618, at Epiry, in Nivernois. He entered the army at the age of 12, under his father, and would probably have obtained a high rank but for the offence he gave to persons in power by his scandalous lampoons. In 1665 he was sent to the Bastille for writing a libel, entitled "Histoire amoureuse des Gnaules;" and on his release he was banished to his estate, where he remained till 1681, when he returned to court. His other works are, "Mémoires," 2 vols.; and "Lettres," 7 vols. Died, 1693.

RACHEL, ELISA, a celebrated tragedian, was born at Murn, in Switzerland, in 1820. Her father, whose name was Felix, was a poor Jewish pedlar, whose avocations led him into France, where his daughters Rachel and Sarah gained a precarious living by singing in the streets. In 1832 the voices of the two sisters having attracted notice, they were placed by the kindness of some connoisseurs under Choron, a celebrated singing-master; and in 1833, the elder sister Rachel, having shown great

tragic power, entered the "Conservatoire," at Paris, where she was carefully trained by Saint-Aulaire and Samson, and in 1838 made her first appearance at the Théâtre Français, in the character of Camille, in "Les Horaces," where her début was not auspicious. But the coldness of her reception was not of long duration. The sharp critical eye of M. Jules Janin soon discovered in her a worthy interpreter of the chefs-d'œuvre of Racine and Corneille; and his brilliant criticisms on her performances soon roused the public sentiment in her favour, which was fully justified by the result. In the course of a few months Mademoiselle Rachel completely revived the classic school of tragedy which had fallen into decay; though her crowning triumph was gained in 1843 in her representation of "Phèdre." Soon after this she made a provincial tour, visited the chief continental cities, and at last came to London, in 1846, reaping large harvests both of fame and wealth wherever she appeared. In 1855 she made a professional visit to the United States, which was understood to be a failure both in a financial and artistic point of view; and soon after her return she fell into a decline which resisted all medical treatment, and died at Carnet, near Toulon, on January 3, 1858.

RACINE, JEAN, the eminent French dramatic poet, was born at La Ferté Milon, in 1639, and was educated at Port Royal. He commenced his poetical career in 1660, by an ode on the king's marriage, for which he was handsomely rewarded. In 1664 he produced his tragedy of "la Thébaïde," which was followed in 1666 by "Alexandre." In 1685 appeared his "Andromaque," which placed him far above all his contemporaries except Corneille; and his fame was still further increased by the production of "Britannicus," "Bérénice," and other tragedies. In 1677 appeared his tragedy of "Phèdre," which was opposed by one on the same subject written by Pradon, which gave him great uneasiness; and owing to a base calat that was formed against him, he was induced to desist from writing for the stage. After a lapse of 12 years he wrote, by desire of Louis XIV. and Madame de Maintenon, the sacred dramas of "Esther" and "Athalie," which were performed by the young ladies of her institution of St. Cyr. Besides his dramatic works, he wrote "Canticles or Hymns for the Use of St. Cyr," the "History of Port Royal," &c. In 1673 he was received into the Academy, and continued to enjoy the highest favour at court; but having offended the king by a too free use of his pen in drawing up a memorial on the distresses of the people, he died of chagrin, in 1699.

RACINE, LOUIS, a son of the preceding, was born at Paris, in 1692, and educated under Rollin. He was eminent for talent, piety, and modesty, was made an inspector-general in the finance department, and died in 1763. Among his works are two poems, entitled "Grace," and "Religion," "Epistles," "Memoirs" of his father, and a translation of Milton's Paradise Lost.

RADCLIFFE, JOHN, an eminent physician, was born in 1630, at Wakefield, in

Yorkshire, and was educated at the grammar school there, and at University College, Oxford. Having obtained his medical degree, he settled in London in 1684, where he soon acquired great reputation, to which his ready wit and conversational powers contributed. In 1686 he was appointed physician to the Princess Anne of Denmark, and, after the revolution, he was often consulted by King William III., whose favour he lost in consequence of the freedom with which he delivered his opinions when in attendance on his royal master. When Anne succeeded to the crown, Godolphin could not obtain for him the post of chief physician, as he had given her offence by telling her that her ailments were nothing but the vapours. But, though deprived of office, he was consulted in all cases of emergency, and received a large sum of secret service money for his prescriptions. Dr Radcliffe left £40,000 to the university of Oxford for the foundation of a public library of medical science. He provided also for the purchase of new books, the cost of keeping the building in repair, and the salary of the librarian. Dr Radcliffe was also the founder of the two Travelling Fellowships, and of the Observatory and Infirmary at Oxford. Died, 1711.

RADCLIFFE, ANN, novelist, whose maiden name was Ward, was born in London, in 1764; and in her 23rd year was married to Mr W. Radcliffe, proprietor and editor of the English Chronicle. Her first performance was a romantic tale, entitled "The Castles of Athlin and Dumbline," which was succeeded by "The Sicilian Romance" and "The Romance of the Forest," but that which made her reputation was the "Mysteries of Udolpho," in 4 vols., for which she received the sum of £300. She also published "The Italians," and "Travels through Holland and along the Rhine," in 1793. Mrs Radcliffe possessed the art of exciting a high degree of interest in her narrative; her descriptive powers were of a superior order, especially in the delineation of scenes of terror, and in those aspects of nature which excite sentiment, and suggest melancholy associations. Died, 1823.

RADEMACKER, GERARD, Dutch painter, was the son of a carpenter at Amsterdam, and was born about 1672. He learnt drawing of his father, working also at his trade; then improved himself in painting under Van Goor, a clever portrait-painter, and afterwards spent three years at Rome. A large number of his pieces are of architectural subjects. Died, 1711.

RADEMACKER, ABRAHAM, Dutch painter and engraver, perhaps a relative of the preceding, was born at Amsterdam, in 1675. Most of his paintings are landscapes, with figures and buildings. He settled at Haarlem in 1730, and he became a member of the Society of Painters of that city. He published an interesting series of views of the monuments of antiquity in the Low Countries, drawn and engraved by himself. Died, 1735.

RADETSKY, JOSEPH WENZEL, a distinguished Austrian field-marshal, was born in Bohemia, in 1766, entered the army in 1784, and took a distinguished part in the war

with Turkey in France, through in the Austrian c he contributed g poleon at Aspern ic in 1813. ZEL, a distin- t, was born in army in 1781, t in the war

with Turkey in 1793, in the war with France, through all the campaigns in Italy, in the Austrian campaign of 1809, in which he contributed greatly to the defeat of Napoleon at Aspern, and at the battle of Leipzig in 1813. After the peace of 1815, he became successively commandant at Edenberg, Ofen, and Olmutz, where he remained ten years; in 1831 he was appointed general of the Austrian forces in Italy; and in this important office he effected such improvements in military tactics as to have attracted the notice of the best soldiers of every country in Europe. Raised to the rank of field-marshal, in 1846, he, though in his eighty-third year, displayed great skill and energy in checking the first insurrectionary movements that broke out at Milan in 1848, and though at first compelled to retire with his army to the fortresses of Legnano, Peschiera, Verona, and Mantua, he afterwards advanced against the Italian forces, and gained the important victory of Custoza, which led to the capitulation of Milan on August 6th, and the armistice between the Austrians and Sardinians. At the expiration of the truce, March 27th, 1849, he invaded Piedmont, took possession of Montara, and within three days completely annihilated the Piedmontese army and Italian independence on the field of Novara. Soon afterwards he proceeded to bombard Venice, which he forced to capitulate, after a heroic resistance of nearly three months, and in reward for his services he was appointed governor-general of the Austrian provinces in Italy. In 1856, when in his ninetieth year, he retired into private life; and died January 2, 1858, leaving behind him the reputation of a gallant soldier, and a consummate tactician, though tarnished in some degree by military excesses, which his devotion to absolutism led him to indulge.

RADOWITZ, JOSEPH VON, many years the favourite adviser of Frederick William IV., king of Prussia, and some time his recognized minister, was born February 6, 1797, at Blankenburg, among the Hartz mountains. Of Hungarian extraction, a Protestant by birth, on his mother's side, and at first educated in that faith, he was sent afterwards to a Roman Catholic school, and he conformed from that time to the Catholic church. At the close of his academic course at Paris, in 1812, he was appointed an artillery officer of Westphalia. At the battle of Leipzig he commanded a Westphalian battery, was wounded, and taken prisoner. Upon the dissolution of the Westphalian kingdom and the return of the elector of Hesse-Cassel, Radowitz entered the service of the latter, and made with the Hessian artillery the campaign against France. In 1815 he was appointed first teacher of mathematics and the military sciences to the school for cadets at Cassel. But being dismissed from the Hessian service, Radowitz, carrying a letter of recommendation from the electress, was provided for at the court of Berlin. He became, in the first instance, mathematical tutor to Prince Albrecht of Prussia, and was a captain on the general staff. He published two formal works on geometry,

and one on ricochet, during the first ten years of his new career, and was elected member of the highest military board, a professor at the military academy, and an examiner of artillery students. In 1828 he became major, and in 1830 chief of the artillery general staff. A religious mystic and enthusiast, his disposition agreed with that of the crown-prince; and this congeniality of temper proved of far greater power than the diversity of dogmas which, as Protestant and Catholic, the one and the other held. His "Dialogues on Church and State" are taken from actual conversations with Geulach, General Von der Groben, Count Brandenburg, and others of the old school. In 1829 he published two books remarkable for the diversity of their subjects. The first was "Iconography of the Saints," containing historic notices of all the representations of the saints which have come down to us in pictures, coins, and other memorials; the other was "The Theatre of War in Turkey." In 1836 Radowitz was named military plenipotentiary of Prussia at the Germanic Diet. In 1840 the prospect of war with France upon the accession of M. Thiers to office led to the recall of Radowitz to Berlin, whence he was shortly afterwards sent to Vienna, to stir up the government of Austria to the defence of Germany. On his return he tried to carry out several reforms calculated on a cautious but comparatively grand scale. He was the author of the proposition for abolishing the censorship in Prussia, which was debated in the cabinet, and declined; but several alterations of the old oppressive laws were introduced by the decrees of February 23, 1843. In 1847 the king called Radowitz from Frankfort, and commissioned him to draw up a memorial upon the reconstitution of the Confederation. With a view to make good his views with Prince Metternich, he went to Vienna in the following March, when the revolution broke out, which made all the proposed reforms seem insignificant. In April he retired from the Prussian service. In the elections to the National Assembly, which was to meet at Frankfort, he was returned for Arnsberg, in Westphalia. There he spoke and voted with the extreme right, desiring to see the thirty-nine sovereignties formed into one state, of which Prussia should be the head. The melancholy end of the Assembly, upon which Germany had built so many and great hopes, is too well known. But to the last, Radowitz was faithful to the principles which had always guided him; to the last he sought the unity of Germany by a voluntary arrangement between the governments and peoples. When his hopes in the Assembly had been frustrated, he returned to Berlin, by desire of the king, and became the author of the scheme called the Union. But delays and hesitation took place; and when Austria opposed with growing strength the establishment of a league against her, it was felt that Radowitz was bound to come forward and assume the responsibility of his own measures. He accordingly entered the cabinet in 1850. The Prussian army was mobilized, and the Landwehr called out; troops

occupied the Etappen-strasse through Hesse-Cassel, in which Austria had intervened. Shots were actually exchanged between Austria and Prussia, when the king gave way, and sacrificed, with expressions doubtless of sincere regret, his minister and friend. Radowits understood the wants of his country; and although the revolution struck the ground from under his feet, and compelled him to work upon a new basis, it can hardly be doubted that, if his policy had been carried out, it would have placed Prussia at the head of the German movement for practical and constitutional reform. Died, 1853.

RAEBURN, Sir HENRY, an eminent portrait-painter, was born in 1786, at Stockbridge, near Edinburgh; was apprenticed to a goldsmith, but turned his talents to painting, and acquired extensive popularity, being considered second only to Sir Thomas Lawrence. He received the honour of knighthood from George IV. when he visited Edinburgh, was appointed portrait-painter to the king in Scotland, and died in 1823.

RAFFAELLE SANZIO. [RAPHAEL.]
RAFFLES, Sir THOMAS STAMFORD, an eminent public functionary, was the son of a naval captain, and born at sea, off Jamaica, in 1781. He entered the India Company's service early in life, as a clerk in the home secretary's office; was appointed, in 1805, assistant secretary at Prince of Wales's Island; and, in 1811, became lieutenant-governor of Java. There he remained till 1816; and during his administration of the government many judicious reforms were effected. In 1818 he was placed at the head of the factory at Bencoolen, in Sumatra, where he introduced many wise reforms, and eventually succeeded in establishing the settlement and free port of Singapore, in 1819. On his last visit to the island, in 1823, he laid the foundation of a college for the encouragement of Anglo-Chinese literature, with a library, museum, branch schools, &c.; but the impaired state of his health rendered it necessary that he should return to Europe; and he accordingly, in February, 1821, embarked, with his family, on board the *Fame*. On the evening of the same day, when about fifteen miles from Bencoolen, the vessel took fire, and all his valuable collections and manuscripts became a prey to the flames. The crew and passengers, in utter destitution, with difficulty saved their lives in the boats; and Sir Thomas, with his family, again embarked in April, and arrived in England in the following August. He survived this event only about two years, dying of apoplexy, at Highwood Hill, Middlesex, in July, 1826. His chief work is, "The History of Java," 2 vols. 4to. Sir Stamford Raffles was the founder and first president of the Zoological Society of London. His portrait, by Joseph, is in the National Portrait Gallery.

RAGHIB PACHA, MOHAMMED, grand vizir of the Ottoman empire, was born in 1702, and manifested, at an early period, such a decided taste for learning, that he acquired the name of Raghib, or the Student. In 1736 he was appointed secretary-general to the grand vizir; became reia-

effendi, a pacha of three tails, and successively governor of Aidin, Aleppo, and Egypt. In 1737 he was elevated to the dignity of supreme vizir, and retained that dangerous post till his death, in 1768. He was one of the most enlightened ministers of the Turkish empire, and surpassed by none of his countrymen in literary talent.

RAGLAN, FITZROY SOMERSET, Lord, field-marshal, &c., &c., a distinguished soldier and military administrator, was the youngest son of the fifth duke of Beaufort, and born in 1789. He joined the 4th Light Dragoons at the age of sixteen, went with the troops to Portugal, and fought in all the great Peninsular battles, winning the notice and strong regard of the duke of Wellington, who made him first his aide-de-camp, and then his military secretary—a singular honour for a man under two-and-twenty. The duties of his various offices trained him in that habit of industry and aptitude for business which distinguished his whole life, and made him, in regard to the military executive, a sort of double of the duke of Wellington. After Buonaparte's abdication in 1814, he returned to England, and met with the honour due to his intrepidity in the field from those who could not be aware of his yet more important services in perfecting the organization and discipline of the army. In the August of that year he married the second daughter of Lord Mornington, and thus became the nephew by marriage of the duke of Wellington. On Napoleon's return from Elba, in 1815, he accompanied the duke of Wellington as aide-de-camp, and lost his right arm at Waterloo. In 1819 he was appointed the duke's military secretary, in his capacity of master-general of the Ordnance. Here he remained till the year 1827, when the duke became commander-in-chief at the Horse-Guards, and took with him as his secretary Lord Fitzroy Somerset, who never quitted that post till the duke's death, in September, 1832. In the same year he was appointed master-general of the Ordnance, an office since abolished, made a member of the privy-council, and raised to the peerage by the title of Lord Raglan. On the breaking out of the war with Russia, in 1854, he was appointed commander of the force ordered to proceed to the Crimea, commanded at the battles of the Alma, Balaclava, and Inkermann, was promoted to the rank of field-marshal, and during the protracted siege of Sebastopol which followed, in the midst of winter, in a severe climate, and surrounded by difficulties, maintained a calmness, dignity, and fortitude, which nothing could surpass. Grief at the unsuccessful attack on the Malakoff and the Redan upon the fatal 18th of June, and the loss of life which it entailed, preyed upon his mind, and he succumbed to an attack of diarrhoea, June 25th, 1855.

RAGOTSKI, FRANCIS, prince of Transylvania, was born in 1678. Zealous for the independence of his country, he secretly entered into a negotiation with Louis XIV., which being betrayed, he was arrested, and found guilty of high treason. He had, however, the good fortune to escape; receiving

assurances of success over Hungary, the people to tyranny of the was successful, prince of Trans Hungary. The vacant, was offered but he refused it being defeated by Tarkey, where he RAIKES, ROBERT who having real employed it with his acts of benevolence Stock, he planned schools, about 17 RAINBACH, J. line engraver, w. assurances of succor from France, he entered Hungary, and, by a manifesto, urged the people to free themselves from the tyranny of the Austrians. For a time he was successful, and in 1704 was proclaimed prince of Transylvania, and protector of Hungary. The crown of Poland, at that time vacant, was offered to him by the Czar Peter, but he refused it; and his patriotic exertions being defeated by the Hungarian states entering into a treaty with the emperor, he renounced his dignities, and withdrew into Turkey, where he died in 1733.

RAIKES, ROBERT, a printer at Gloucester, who having realized a good property, employed it with his pen and his influence in acts of benevolence. Conjointly with Dr Stock, he planned and instituted Sunday-schools, about 1751. Born, 1735; died, 1811.

RAIMBACH, ABRAHAM, a distinguished line engraver, was born in London, 1776. Educated in Archbishop Tenison's library-school, where he had Charles Mathews for a school-fellow, he showed an early predilection for the fine arts, and after serving his apprenticeship with Mr Hall, the engraver, he became a student of the Royal Academy, and soon obtained such proficiency in handling the pencil, that by uniting the profession of a miniature painter with that of engraver, he was enabled to earn a handsome livelihood. In 1802 he illustrated Smirke and Forster's edition of the Arabian Nights; in 1805 he made the acquaintance of Sir D. Owen Wilkie; an acquaintance which soon ripened into friendship, and led to his being employed in engraving that distinguished painter's works from 1812 down to his decease. In fact, it was chiefly in connection with Wilkie that Raimbach achieved his well-deserved reputation. Died, 1843.

RAIMONDI, GIOVANNI BATTISTA, a celebrated orientalist, born at Cremona, in Italy, about 1540. He passed several years in Asia, where he acquired a knowledge of the Arabic, Armeanian, Syriac, and Hebrew languages. Returning to Italy, Cardinal Ferdinand de' Medici made him director of the oriental press, whence originated the famous institution of the Propaganda. Raimondi was living in 1610.

RAIMONDI, MARC ANTONIO, a very distinguished Italian engraver, was born at Bologna about 1457. He was first a pupil of Francia, but admiration for some of Albert Dürer's prints determined his choice of engraving as a profession. He spent some time at Venice, and while living there copied on copper-plate a set of Dürer's prints with remarkable accuracy. Settling at Rome, he became acquainted with Raphael, and was employed by him to engrave many of his works. He was similarly engaged after Raphael's death for Raphael's eminent pupil, Giulio Romano; but having engraved some obscene designs as illustrations to the fifty verses of Arctio, he was imprisoned by the pope, Clement VII. The intercession of Baccio Bandinelli procured his liberation, and the skill with which he engraved his friend's "Martyrdom of St Lawrence," made the pope his firm friend. He lost all his property at the sack of Rome by the Constable de Bourbon in 1527, and returned to

Bologna. Among his celebrated works are the "Murder of the Innocents," "St Cecilia," "Transgression of Adam and Eve," "The Virgin lamenting over the dead Christ," "Battle of the Lapithæ," his last print, &c. Marc Antonio was living in 1539, but the year of his death is uncertain. He is said to have been assassinated. There is a fine collection of his prints in the British Museum, including some of the works of his best pupils.

RAINOLDS, JOHN, a learned divine, was born at Pinho, in Devonshire, in 1549, and became president of Corpus Christi College, Oxford. He was considered the leader of the Puritan party, and distinguished himself greatly at the Hampton Court conference, in 1603, where he suggested the necessity of the present translation of the Bible, in which work he was afterwards engaged. Died, 1607.

RALEIGH, or RALEGH, Sir WALTER, a distinguished statesman, scholar, and warrior, in the reigns of Elizabeth and James I., was born in 1552, at Budleigh, in Devonshire, and educated at Oriel College, Oxford. At the age of 17 he made one of a troop of a hundred gentlemen volunteers, whom Queen Elizabeth permitted to go to France, under the command of Henry Champernon, for the service of the Protestant princes. He next served in the Netherlands, and, on his return from the continent, his half brother, Sir Humphrey Gilbert, having obtained a grant of lands in North America, he engaged with a considerable number of gentlemen to go out to Newfoundland; but the expedition proving unsuccessful, Sir Walter returned to England. He proceeded thence to Ireland, where he made his bravery so conspicuous in quelling the insurgents, that he was received at court with considerable favour, and obtained permission and supplies to prosecute his discoveries in America, which ended in his settling a colony in that part of the country, called, in honour of his maiden sovereign, Virginia; whence he is said to have first introduced tobacco and potatoes into Europe. In the mean time the queen conferred on him the distinction of knighthood, and rewarded him by several lucrative grants, including a large share of the forfeited Irish estates. When England was threatened by the Spanish Armada, he raised and disciplined the militia of Cornwall; and afterwards, joining the fleet with a squadron of ships belonging to gentlemen volunteers, he contributed to the signal victory which it pleased Providence to give the English over the Spaniards. He was now made gentleman of the privy-chamber; but shortly after fell into disgrace, and was confined for some months, partly on account of a tract which he had published, entitled "The School for Atheists," which was unfairly construed by his enemies into a vindication of atheistical principles; and partly on account of a clandestine attachment to one of the queen's maids of honour, the daughter of Sir Nicholas Throckmorton; which lady, however, he afterwards honourably married. During his seclusion, he planned the discovery of Guiana, in South America, in which he took an active part

RAMMOHUN ROY, Rajah, by birth a Brahmin, and a man of most enlightened mind, was born about the year 1776, at Burdwan, in Bengal. His father gave him a good education, and trained him in the doctrine of his sect; but the son observing the diversities of opinion that existed on religion, not only among Mussulmans and Christians, but even among his Hindoo brethren, determined on leaving his home, for the purpose of investigating a subject on which he felt such a deep interest. For a time he sojourned in Thibet, and on his return to Hindostan he devoted himself to the study of the Sanscrit and other languages; after which he was employed by the East India Company as principal native officer in the collection of the revenues in the district of Burdwan. On the death of his father, in 1803, he appears to have commenced his plans of reforming the religion of his countrymen; and, on removing to Moorsshedabad, he published, in Persian, a work entitled "Against the Idolatry of all Religions." This raised up against him a host of enemies, and in 1814 he retired to Calcutta, where he diligently applied himself to the study of the English language. He afterwards translated from the Sanscrit into the Bengalee and Hindostanee languages the "Vedant," an extract from the Vedas, the principal book of Hindoo theology; and prefixed to some chapters of the Vedas, which he afterwards published, is a letter containing the following sentence: "The consequence of my long and uninterrupted researches into religious truth has been, that I have found the doctrines of Christ more conducive to moral principles, and better adapted for the use of rational beings, than any other which have come to my knowledge." In this spirit, having acquired a knowledge of Greek and Hebrew, that he might be competent to study the original Scriptures for himself, he published in English, Sanscrit, and Bengalee, a series of selections from the Gospel, entitled, "The Precepts of Jesus the Guide to Peace and Happiness;" which being animadverted upon by Dr Marshall, of Serampore College, the learned Hindoo published his "Second Appeal," and on this being replied to by the doctor, a "Final Appeal" appeared. During his residence at Calcutta, Rammohun Roy connected himself with the periodical press, and he was at different times the proprietor and conductor of newspapers printed in the native languages. In April, 1831, the Rajah, accompanied by his youngest son, arrived in England, where he was received with every mark of distinction and respect. In every kind of assemblage, religious, political, literary, and social, the amenity of his manners, his distinguished attainments, and his universal philanthropy, rendered him a welcome guest; and his advice was sought by ministers on topics connected with the future government of India. He did not, however, live to carry into effect the various plans for improving the condition of his countrymen, whose welfare he had so much at heart, having been taken "while on a visit to Bristol, where he expired in October, 1833.

RAMSAY, ALLAN, a Scotch poet, was

born at Leadhills, in 1685. He served his apprenticeship to a whig-maker, which trade he followed for a time, and then became a bookseller at Edinburgh, where, in 1721, he published a quarto volume of his poems, which were so well received, that he was encouraged to print another in 1728. The principal piece in the last collection is the celebrated pastoral, called "The Gentle Shepherd." His poems and fables rendered him in the highest degree popular; and while he acquired fame by his talents, he amassed a fortune by his trade; his acquaintance was courted by many distinguished persons, and his shop became the common resort of the literary characters and wits of Edinburgh. Died, 1758.

RAMSAY, ALLAN, an eminent Scottish portrait-painter, son of the preceding, was born in 1713. He studied three years in Italy, founded at Edinburgh the Select Society in 1751, soon after settled in London, and through the influence of Lord Bute was named first painter to George III., in 1767. He visited Rome several times, was frequently at Johnson's parties, and was author of some political and other papers, published under the title of the "Investigator." Died at Dover in 1784.

RAMSAY, ANDREW MICHAEL, better known as the Chevalier Ramsay, was born at Ayr, in Scotland, in 1686. He was educated at Edinburgh; visited Fénelon at Cambrai, and being received into his house as an inmate, the good prelate made a convert of him to the Catholic religion, and procured him the appointment of tutor to the duke de Chateau Thierry and the prince de Turenne. He next went to Rome, to educate the children of the Chevalier de St George, commonly called the Pretender; and on quitting that situation, he returned to Scotland, and resided in the family of the duke of Argyll. His principal works are, "Les Voynages de Cyrus," 2 vols.; "Philosophical Principles of Religion," 2 vols.; and the Lives of Fénelon and Turenne. Died, 1743.

RAMSAY, DAVID, an eminent American physician and historian, was born in 1749; studied medicine in Philadelphia; and practised at Charleston, South Carolina, where he soon acquired celebrity. From 1776 to 1785 he distinguished himself in a political capacity, first as a member of the legislature of South Carolina, and afterwards as a member of congress. He laboured zealously with his pen to promote the independence of his country; and among his publications are "The History of the American Revolution," "The Life of Washington," and "The History of South Carolina." But his most important work appeared after his death, and consisted of a series of historical volumes, entitled "Universal History Americanized, or an Historical View of the World, from the earliest Records to the Nineteenth Century," &c., 12 vols. 8vo. He died May 8, 1815, in consequence of wounds received two days previous from the pistol of a maniac.

RAMSDEN, JESSE, an eminent optician and mathematical instrument-maker, was born near Halifax, in Yorkshire, in 1735. He was brought up as a hot-presser, and after-

wards studied engraving. He next became a mathematical instrument-maker in Piccadilly, and marrying the daughter of Dollond, the optician, he adopted the same business as his father-in-law. He was the author of many inventions and important improvements in the construction of mathematical instruments. By his dividing-machine he gave much greater accuracy to the graduation of instruments, and received for the invention a premium from the board of longitude. His great theodolite was made for the Ordnance Survey of Great Britain. He was a F.R.S., and received the Copley medal in 1795. Died, 1800.

RAMUS, PETER, or PIERRE LA RAMEE, a French philosopher, was born in a village of the Vermandois, soon after 1500. When a boy he obtained the place of servant in the college of Navarre, where he devoted his leisure hours to study, and became a great scholar. Having ventured to attack the doctrine of Aristotle, he was interdicted from teaching philosophy; but this judgment was reversed by Henry II., and in 1531 he was made royal professor of rhetoric and philosophy. His spirit of free inquiry ultimately led him to become a Protestant; and he was obliged to leave Paris, to which city he returned in 1571, and lost his life in the massacre of St Bartholomew, in the following year. His works on mathematics, philosophy, logic, &c., are numerous. A French work entitled "P. Ramus, sa Vie, ses Ecrits, sa Mort," by Charles Desmazes, appeared in 1864.

RAMUSIO, GIAMBATTISTA, a Venetian scholar and diplomatist, born in 1483. He was employed as ambassador of the republic on several occasions, became secretary to the Council of Ten, and on his retirement, late in life, went to Padua, where he died, in 1557. He published an important "Collection of Voyages and Travels," in 3 vols. folio, enriching it with numerous dissertations and historical and geographical notes. The manuscript of a fourth volume was burnt.

RANCE, ARMAND JEAN LE BOUTILLIER DE, the reformer of La Trappe, was born in 1626, at Paris, and adopted the ecclesiastical profession. He obtained several benefices before he was in orders, acquired great celebrity as a preacher, and might have risen to the most elevated stations in the church, had he not taken the resolution of retiring from the world. Various reasons are assigned for this; the most probable of which appears to be, that although he was a man of large fortune, and admired in all the pleasures of the world, the death of the duchess of Montazon, to whom he was attached, produced such a revision in his feelings, that he abandoned society, and retired to his abbey of La Trappe, where he introduced a reform of the most rigid kind in the monastic discipline. He was the author of several theological works, and died in 1700.

RANDOLPH, Sir THOMAS, an eminent statesman, was born in Kent, in 1523, and died in 1590. On the accession of Elizabeth he was sent on embassy to Scotland, France, and Russia. His letters are in different col-

lections, and his account of Russia in Hackluyt's Voyages.

RANDOLPH, THOMAS, an English dramatic poet, born, 1605; died, 1631. He was educated at Cambridge, and settled at London, where his loose living destroyed his health, and shortened his life. His "Muse's Looking Glass," a comedy, was much admired.

RANSOME, JAMES, one of the most enterprising manufacturers of the age, was born near Ipswich, 1783. The firm with which he was connected is known not only throughout England, but in very distant parts of the globe, as manufacturers on the largest scale of agricultural implements and machinery; but his chief title to respect consisted in his almost incredible efforts to promote the comforts of his workmen and dependents; some account of which will be found in one of the admirable works published under the title of "Small Books on Great Subjects." Died, 1849.

RANTZAU, JOSIAH, Count de, a French marshal in the 17th century, was descended from an illustrious family in Holstein, and entered when young into the Swedish army. In 1635 he went to France with the chancellor Oxenstiern; and Louis XVIII. being pleased with his agreeable manners, he made him colonel of two regiments. He served under the duke of Orleans and the great Condé, with high reputation, rose to the rank of a marshal, completed the conquest of Flanders, and was made governor of Dunkirk in 1646; but becoming an object of suspicion to Cardinal Mazarin, he was confined 11 months in the Bastille, and died soon after his liberation, in 1650. During his different campaigns he was so often severely wounded, that at last he had but one eye, one ear, one arm, and one leg.

RAPHAEL SANTI (RAFFAELLO SANZIO), greatest of modern painters, head of the Roman school, was born at Urbino, April 6, 1483. He received his earliest instruction from his father, Giovanni Santil [see notice], after whose death, in 1494, he became the scholar of Perugino, with whom he remained at Perugia and other places for several years. In 1504 he visited Florence, and chiefly lived there till 1508, when he was called to Rome by Pope Julius II., and employed to paint the Stanzas (chambers) of the Vatican. Raphael spent the rest of his short life at Rome, where he formed a numerous school of painters, among whom the most eminent were Giulio Romano, Gianfrancesco Penni, Pierino del Vaga, Polidoro da Caravaggio, and Garofalo. In the numerous works, frescoes, and oil-paintings, of this unrivalled master, three styles are distinctly recognizable. The first is the Peruginian, in which sentiment predominates, and was the pure imitation of his master's manner. The second is the Florentine, marked by a great advance in respect of form and dramatic composition; it was the result of his studies at Florence, where he was impressed by the cartoons of Leonardo da Vinci, and Michael Angelo, and the works of Masaccio, Fra Bartolomeo di San Marco. The last-named painter, who especially excelled in his colouring,

and the truth of the intimate style is called Raphael's greatest of the equal quality design, color, representation, and concept. It is impossible to see very few distinguished facts of his place works for his visit "Coronation of the Virgin," a page of the "Among the "Entombment Gallery at the "chino," in "Madonna and Child," the Gallery; at or "Disputa executed in Athens," of first showed style. It was or "Poetry of Heliodorus," founded the Maccæ "Attila," from prison Stanza del Eliodoro. Incendio at by Raphael's scholars; to innumerable trust the works. The Vatican was the sublimeistine chiection of in 1515 he ptapestry of are lost, and ders, were Cromwell. They were William II. short interv. They now tion in Sou Raphael's o at Bologna Sisto," now which the tracing; the Madrid; a work, and of Raphael's the Vatican II." in the ous repetiti. The singl "Madonna known as bought for t

and the treatment of light and shade, was the intimate friend of Raphael. The third style is called the Roman, and is peculiarly Raphael's own; that which constitutes him greatest of painters. Its supreme excellence is the equable development of all the essential qualities of art, composition, expression, design, colouring; thus forming a truthful representation of nature, both in the grandest conceptions and in the minutest details. It is impossible here to name more than a very few of the works of Raphael, who is distinguished above other painters by the fact of having executed no merely commonplace work. Of the paintings executed before his visit to Florence, must be named—"Coronation of the Virgin," now in the Vatican, and the "Sposalizio," or "Marriage of the Virgin," in the Brera at Milan. Among those in his second manner, are—the "Entombment of Christ," in the Borgheese Gallery at Rome; the "Madonna del Baldacchino," in the Pitti Palace at Florence; the "Madonna del Gran Duca," in the same palace; the "St Catherine," in the National Gallery; and the grand fresco, "Theology," or "Dispute on the Sacrament," the first he executed in the Vatican. The "School of Athens," or "Philosophy," painted in 1511, first showed traces of his third and highest style. It was followed by the "Parnassus," or "Poetry," "Jurisprudence," "Expulsion of Heliiodorus from the Temple of Jerusalem," founded on a narrative in the book of the Maccabees; the "Mass of Bolsena," "Attala," and "Deliverance of St Peter from prison." These frescoes are in the Stanza della Segnatura and Stanza dell'Elidoro. The frescoes in the Stanza dell'Incendio and de Costantino, though designed by Raphael, were chiefly painted by his scholars; to whom he was compelled, by the innumerable commissions given him, to trust the execution of many of his later works. The Loggie (colonnades) of the Vatican were decorated under his direction; the sublime works of Michael Angelo in the Sistine chapel stimulated him in the production of his "Isaiah" and "Sibyls;" and in 1515 he prepared the "Cartoons" for the tapestry of the Sistine chapel; three of which are lost, and the other seven, sent to Flanders, were bought by Charles I., and under Cromwell were purchased for the nation. They were placed in Hampton Court by William III., where, with the exception of a short interval, they remained till May, 1865. They now form part of the National Collection in South Kensington Museum. Among Raphael's oil paintings are the "St Cecilia," at Bologna; the famous "Mndonna di San Sisto," now in the Dresden Gallery, and of which the National Gallery possesses a tracing; the "Spasimo di Sicilia," now at Madrid; and the "Transfiguration," his last work, and perhaps at once the chef-d'œuvre of Raphael and of painting. It is now in the Vatican. The fine portrait of "Julius II." in the National Gallery is one of numerous repetitions by Raphael or his scholars. The singularly beautiful cabinet picture—"Madonna and Child with St John"—known as the "Garvagh Raphael," was bought for the National Gallery, for £9000, in

1865. There is a fine altar-piece, "The Madonna Enthroned," at Bienenheim, painted by Raphael in 1505; and two other of his numerous Madonnas in the Bridgewater Gallery. His drawings are very numerous, and are to be found in most of the public and private museums of Europe. In this country the finest are to be seen in the Royal Library at Windsor, the British Museum, and the University Galleries at Oxford. But the greater part of those commonly ascribed to him are spurious. H.R.H. the late Prince Consort made a collection of representations of the works of Raphael in engravings or photographs. It lacks very little of absolute completeness, and is contained in above 60 large folio volumes, which form one of the greatest treasures in the Royal Library at Windsor Castle. Raphael, who had occupied himself with architecture as well as painting, was charged, on the death of his friend Bramante, in 1514, with the direction of the building of St Peter's. Raphael died at Rome from the effects of a cold caught in the Vatican, and after an illness of a fortnight, on his thirty-seventh birth-day, Good Friday, April 6, 1520. His body lay in state, and was interred with great pomp in the Pantheon. His school was dispersed at the sack of Rome, seven years after his death. There are Lives of Raphael by Vasari, Duppa, Quatremère de Quincy, and others. The most recent are those of Passavant and Baron von Wolzogen. An English translation of the latter, by Miss Bunnétt, has just appeared (1865). There is an important new work by W. Watkiss Lloyd, entitled "Christianity in the Cartoons." And among the latest publications is a series of twenty photographs of "The Great Works of Raphael," with Vasari's Life, and a complete list of his works from Passavant.

RAPIN DE THOYRAS, PAUL, an historian, was born in 1661, at Castres, in Languedoc. He studied law under his father, who was an advocate, until the revocation of the Edict of Nantes drove him from his native land. He went first to England, and subsequently to Holland, where he entered the company of French cadets. In 1688 he followed the prince of Orange to England, and distinguished himself at the battle of the Boyne, and the siege of Limerick. In 1707 he settled at Wesel, in the duchy of Cleves, and devoted himself to the composition of his "History of England," which was published at the Hague in 8 vols. 4to, and was for a long time in great repute, as the only complete narrative of English events. It was translated into English by Tindal. Died, 1725.

RAPP, JOHN, Count de, a French general, was born at Colmar, in Alsace, in 1772. He attracted notice by his skill and bravery in the early progress of the revolutionary wars; was aide-de-camp to General Desaix during his campaigns in Germany and Egypt, and to Buonaparte when first consul. In 1802 he was employed in Switzerland, defeated the Russian imperial guard, and took Prince Reppin prisoner at the battle of Austerlitz, was appointed governor of Dantzic in 1807, and after the retreat of the French army, he defended the city with consummate ability,

till he was compelled by famine to capitulate. Returning to France in 1814, he was received with distinction by Louis XVIII., but joined Napoleon on his return from Elba. He was, however, again taken into favour by the king, and died lieutenant-general of the cavalry, in 1821.

RASK, ERASMUS CHRISTIAN, a distinguished linguist and comparative philologist, was born in Denmark, in 1787. He studied at the university of Copenhagen, visited Iceland, Sweden, Finland, and Russia to increase his acquaintance with the languages of the North, and in 1808 was attached to the library of the university. About ten years later he was sent by the Danish government to Russia, Persia, and India, and returned after several years' absence, bringing above a hundred valuable oriental manuscripts. He was then named professor of literature, and in 1829 professor of oriental languages and librarian to the university. Among his works are, "Anglo-Saxon Grammar;" "Researches on the Origin of the Icelandic Language;" a new edition of the "Icelandic Dictionary" of Haldorsen; "Comparative Table of the Mother-languages of Europe and of South-eastern Asia;" a treatise "On the Age and Authenticity of the Zend-Avesta," &c. Died at Copenhagen, 1832.

RASORI, GIOVANNI, an eminent Italian physician, was born in 1767, at Parma; became professor of pathology at Pavia, was employed in his medical capacity by the vice-regal government, was imprisoned by the Austrians as one of the Carbonari, and died in 1824.

RASTELL, JOHN, a learned printer in London, who compiled "Chronicles of divers Realms, and most specially of the Realm of England, otherwise called the Pastime of People," and also wrote a "Description of Asia, Africa, and Europe," "Canones Astrologici," "Dialogues concerning Purgatory," &c. He married a sister of Sir Thomas More, had a controversy on religion with the noble John Fryth, and was converted to the reformed faith. His name appears as printer on the copy, dated 1526, of the long-sought "Hundred Merry Tales" of Shakespeare's time, discovered in 1864 in the Göttingen Library. Rastell died in 1536.

RATCLIFFE, THOMAS, earl of Sussex, who died in 1583, went as ambassador to Charles V. to negotiate the marriage between Queen Mary and Philip of Spain. On his return he was made lord deputy of Ireland, and chief justice of the forest north of Trent, and in the succeeding reign he was appointed to the office of lord chamberlain.

RAUCH, CHRISTIAN, a distinguished German sculptor, was born at Arolsen, in Waldeck, in 1777. His parents occupied a humble station in life; and he himself, after having received instruction at Cassel in the art of modelling, went to Berlin in the capacity of a royal lacquey. Here his genius was discovered by Queen Louisa, who sent him first to Dresden, and then to Rome, where, under the fostering care of Thorwaldsen and Canova, his talent was steadily developed. In 1811 he received a commission from the king of Prussia to execute a statue of the queen to be placed in the Mausoleum at

Charlottenburg; on the completion of which he revisited Rome, where he remained nine years. Among the very numerous works of this eminent sculptor are statues of Blücher, Maximilian of Bavaria, Goethe, Schiller, Luther, &c. The monument of Frederick the Great at Berlin was the last and greatest of his works. It was commenced in 1830, and occupied him above twenty years. Died at Dresden, in 1857.

RAVAILLAC, FRANÇOIS, the murderer of Henry IV. of France, was born at Angoulême, in 1578. Having been ruined by a lawsuit, and for a long time confined in prison for debt, his naturally gloomy disposition degenerated into a morbid fanaticism; and he became accustomed to consider the king, Henry IV., as the arch-enemy of the church, to destroy whom would be doing God service. Filled with this notion, he followed the royal carriage on the 14th May, 1610, from the Louvre to the Rue de la Ferronnerie, and while it stopped in the street, in consequence of some obstruction, he mounted the coach-wheel, and thrusting his hand in at the window, armed with a knife, stabbed the king to the heart. He was instantly seized, interrogated, and underwent the torture; but he declared he had no accomplice; and, on May 27, 1610, his limbs were torn asunder by horses.

RAVENET, SIMON FRANÇOIS, a French engraver, who came to England about 1750, and executed many large historical prints in an excellent style. Died, 1774.

RAVENSCHROFT, THOMAS, an English musician, whose collections of psalm tunes, songs, &c., were at one time in high repute. Died, 1640.

RAVIUS, or RAU, CHRISTIAN, a learned German professor, was born at Berlin, in 1613. Coming to England, and being an admirable orientalist, he was patronized by Archbishop Usher, who sent him on a voyage to the East for the purpose of procuring manuscripts. He afterwards resided at Utrecht, Upsal, Kiel, &c., where he read lectures in Arabic, and wrote several useful treatises on Hebrew, Samaritan, and other eastern literature. Died, 1677.

RAWDON, FRANCIS. (HASTINGS, Marquis of.)

RAWLEY, WILLIAM, an English divine, editor of Lord Bacon's works, was born at Norwich, 1588. He studied at Cambridge, and became a fellow of Bene't College. In 1616 he was appointed rector of Lanibtesch, in Cambridgeshire, a post he held for fifty years. On Bacon's appointments lord-keeper Rawley became his chaplain. He assisted his master in the preparation and publication of his works, writing prefaces also, and translating several works into Latin. Rawley was after the Restoration made chaplain to the king. Died, 1667.

RAWLINSON, THOMAS, eldest son of Sir Thomas Rawlinson, lord mayor of London, was a remarkable collector of books, of which he had so great a number, as to be obliged to take London House, in Aldersgate Street, to contain them. After his death, which occurred in 1725, his library was disposed of by auction, and the sale of the manuscripts alone occupied 70 days. His

bibliomania to designate Folio."

RAWLINSON, THOMAS, son of Sir Thomas Rawlinson, at St John's in that university. He was a ship. He was a philosopher; and the last of Studying.

RAY, JOHN, zoologist, born in 1667. He studied at Trinity College, and was afterwards among his pupils. He became his constant companion in studies and in the world.

was a Catalogue of the neighbourhood of London, and was the same time holding any living. He gave him lectures in studies; and was a guard against the last Black Note.

held a high position in the Catalogue, which severely being altered in the Britannicum Nova, arrangement of the works.

still accepted 3 vols., published in Methuen's Serpentinum. He logia" and "related the form of a collection of geological works. He died in 1700.

RAYMOND, RAYMOND V., his father in

wife Joanna, land, and was allied to the king of Europe.

terrible crusades for the heretic. Charles was excommunicated. Arnold had been sent by France to prevent the threatened assassination, and the pope, and the seven strokes in 1209 the Raymond himself. After the capture and the slaughter of the inhabitants, the king army was

completion of which he remained nine years. He wrote numerous works of the statues of Blücher, Goethe, Schiller, and of Frederick the last and greatest commenced in 1830, and terminated in twenty years. Died

FRANÇOIS, the murderer of King Louis XVI. was born at Angoulême, and was ruined by a long time confined in a naturally gloomy disposition to a morbid fanaticism, accustomed to consider himself as the arch-enemy of the nation, of whom would be doing with this notion, he was on the 14th May, 1793, on the Rue de la Ferrière, he stopped in the street, and on the same obstruction, he was struck and thrusting his sword, and armed with a knife, he struck the heart. He was in-stantly killed, and underwent the same punishment. He had no children. He was born on the 27, 1610, his limbs were deformed.

FRANÇOIS, a French philosopher, was born in England about 1750, and wrote several historical prints in French. Died, 1774.

THOMAS, an English poet, wrote several psalm tunes, and was in high repute.

CHRISTIAN, a learned philosopher, was born at Berlin, in Prussia, and being an excellent scholar, he was patronized by Frederick the Great, who sent him on a voyage to the East Indies, for the purpose of procuring natural history. He afterwards resided at Constantinople, &c., where he read and wrote several useful works on the Samaritan, and other languages. Died, 1677.

[HASTINGS, Mar-

THOMAS, an English divine, was born at Cambridge, and studied at Cambridge, and was Fellow of Bene't College. In 1700, he was rector of Lanibeach, and held for fifty years the post of a school-keeper. He assisted in the publication and the printing of the prefaces also, and wrote several works into Latin. He died, 1667.

THOMAS, eldest son of a nobleman, lord mayor of London, was a collector of books, and was in a number, as to be in a House, in Aldersgate Street. After his death, his library was dispersed, and the sale of the books occupied many days. His

bibliomaniac propensity induced Addison to designate him, in the Tatler, as "Tom Fool."

RAWLINSON, Dr RICHARD, the fourth son of Sir Thomas, was an eminent antiquary and topographer. He was educated at St John's College, Oxford, and founded in that university an Anglo-Saxon lecture-ship. He wrote "The English Topography," and translated "Du Fresnoy's Method of Studying History," 2 vols. Died, 1755.

RAY, JOHN, a distinguished botanist and zoologist, born at Black Notley, in Essex, in 1627. He studied at Cambridge, became fellow of Trinity College, in 1649, and three years later mathematical tutor. He had among his pupils Francis Willughby, who became his intimate friend, and the almost constant companion of his natural history studies and travels. Ray's first publication was a Catalogue of Plants found in the neighbourhood of Cambridge, which cost him ten years' labour and appeared in 1660. About the same time he took orders, but did not hold any living; and under the Act of Uniformity he lost his fellowship. Thenceforth he gave himself up wholly to his favourite studies; travelled on the continent with Willughby; after whose death, in 1672, he was guardian and tutor to his sons, and spent the last twenty-five years of his life at Black Notley. Among his works, which hold a high place in scientific literature, are "Catalogus Plantarum Angliæ," 1670, of which several editions appeared, the title being altered to "Synopsis Methodica Stirpium Britannicarum;" the "Methodus Plantarum Nova, 1692, in which he made a new arrangement of plants, basis of that which is still accepted; the "Historia Plantarum," in 3 vols., published between 1686—1704; "Synopsis Methodica Animalium, Quadrupedum et Serpentina Generis;" and "Historia Insectorum." He edited Willughby's "Ornithologia" and "Historia Piscium," and translated the former into English; and published a collection of Proverbs and several theological works. Ray was chosen F.R.S. in 1667. He died in January, 1704-5.

RAYMOND VI., count of Toulouse, son of Raymond V., was born in 1156, and succeeded his father in 1194. He married for his fourth wife Joanna, daughter of Henry II. of England, and widow of William, king of Sicily, and was allied to the chief sovereign houses of Europe. His reign is memorable for the terrible crusade against the Albigenses and for the heroic part he played as their defender. Charged with favouring the heretics, he was excommunicated by the legates Abbot Arnold and Peter of Castelnau, who had been sent by Innocent III. into the south of France to preach and persecute. A crusade was threatened, Peter of Castelnau was assassinated, and Raymond was accused of the crime. He made his peace, however, with the pope, and obtained absolution, delivering up seven strong places to the legate Milon. In 1209 the crusade was undertaken, and Raymond himself was compelled to join it. After the capture of Beziers and Carcassonne, and the slaughter or expulsion of their inhabitants, the chief command of the crusading army was intrusted to Simon de Mont-

fort, earl of Leicester. Raymond was required to deliver up, under pain of excommunication, all the heretics of Toulouse, but he went to Rome, and appealed in January, 1210, to the pope, who acquitted him of the charge of murder of Castelnau, and showed him great favour. Continuing to protect the Albigenses, he was again excommunicated by the legates at the council of Arles in 1211. An interdict was laid on Toulouse, the clergy quitted the town, and Simon besieged it, but had to retire. Raymond then took the offensive, and marched against Castelnau, but he was compelled to raise the siege. Pedro II., of Aragon, in defiance of the pope's prohibition, came to the aid of Raymond and began to invest the town of Muret. Their united forces were totally defeated in 1213, by de Montfort, and Pedro was slain; the power of Raymond was broken for a long time. By the council of the Lateran in 1215 the county of Toulouse and all conquests of the crusaders were assigned to Simon de Montfort, and Raymond became a refugee at the court of Aragon. Two years later the Toulousans rose in arms against the cruelty of their new master, and Raymond, aided by his brave son, recovered almost the whole of his states. Raymond was one of the ablest rulers of his time, and his court the most brilliant. He was the patron and friend of the troubadours, the welcome ally or the formidable foe of the greatest sovereigns, and had the glory of successfully contending for his independence against the most powerful combinations of ecclesiastical and secular forces. Died, 1222. His son, Raymond VII., who succeeded him, was the last count of Toulouse.

RAYMOND LULLY. [LULLY.]

RAYNAL, GUILLAUME THOMAS FRANÇOIS, an eminent French historian and philosopher, was born at St Genies, in 1713; and after quitting the Jesuits, by whom he was educated, he became an historical and political writer. He joined the French philosophical party, as it was called, adopted their principles to the fullest extent, and became one of the writers in the "Encyclopédie." He also published several works at Paris; the principal of which was his "Philosophical History of the European Settlements in the East and West Indies." This was followed by an essay on the "American Revolution," full of enmity to the English. In 1791 the Abbé Raynal addressed a letter to the Constituent Assembly, in defence of the rights of property, which greatly irritated the revolutionists; and though he escaped the tyranny of Robespierre, he was stripped of his property, and died in great indigence, at Passy, in 1796. Among his other works are, a "History of the Stadtholdership," 2 vols.; "History of the Parliament of England," 2 vols.; "History of the Divorce of Henry VIII. of England," &c.

RAYNOUARD, M., an eminent philologist, was born at Brignole, in Provence, in 1761. Until he was near 40 years of age, he practised as an advocate; when, having fortunately attained an honourable independence, he determined to gratify his love of literature by steadily pursuing it; but the events of the revolution forced him to

1792, though Mr Rees was only 19 years of age, he was appointed mathematical tutor of that institution, which office he filled till the academy was dissolved, in 1794. Soon after this he became theological and philosophical tutor in the new college, founded at Hackney, which place he held till 1795. In 1776 he was employed as editor of "Chambers' Cyclopædia," which he completed in 1789, in four vols. folio. After a lapse of 14 years, the proprietors embarked in a more comprehensive undertaking, the well-known "Cyclopædia" which bears the name of Dr Rees, and which, also, he brought to a conclusion in 45 vols. 4to. Besides these great literary performances, he published two volumes of "Practical Sermons," and several other works. It was at the express recommendation of Robertson, the historian, that Dr Rees obtained his degree from the university of Edinburgh. He officiated more than 40 years as minister of the congregation in the Old Jewry, was a fellow of the Royal Society and other institutions, and died in 1825.

REEVE, CLARA, novelist, was born at Ipswich, in 1723, and was the daughter of a clergyman, who gave her an excellent education. Her first literary essay was a translation of Barclay's "Argenis." Among her subsequent productions, the most popular was the well-known tale of "The Old English Baron." Died, 1808.

REEVE, JOHN, a celebrated comic actor, for many years the focus of attraction at the Adelphi Theatre, in the Strand, and whose matchless representation of burlesque characters will long be remembered, was born in London, in 1799; made his first appearance on the boards of Drury Lane, as "Sylvester Daggerwood," in 1819; was subsequently engaged at the Haymarket, English Opera House, and Adelphi; and died, aged 38, in January, 1838. John Reeve was the personification of jollity and good-humour; and was as much beloved by his friends for his frank and generous disposition, as he was admired by the public for his facetious drollery.

REEVES, JOHN, the founder of the celebrated association for protecting liberty and property against republicans and levellers, was born in 1752, and died in 1829. He was called to the bar in 1780, but discontinued the active practice of his profession, and was deputed by government to regulate the administration of justice in Newfoundland, for which purpose he made two voyages thither. Soon after his return from the first he published "The History of the Law of Shipping and Navigation," a work that proved highly useful. But having, in 1795, published a pamphlet, entitled "Thoughts on the English Government," in which an alleged libellous passage appeared, the author was prosecuted by order of the House of Commons, and underwent his trial at Guildhall, when he was acquitted. He was appointed one of the king's printers in 1799, and from 1803 to 1814 he had an appointment in the alien office.

REGIOMONTANUS. [MULLER, JOHANN.]

REGIS, PIERRE SYLVAIN, a French phi-

losopher, was born at Agenois, in 1632. After studying in the Sorbonne, he read lectures upon the Cartesian philosophy, till interdicted from doing so by the mandate of Harlay, archbishop of Paris. He, however, published an elaborate view of that system, in 3 vols. 4to; and wrote several defences of it, in answer to Huet, Du Hamel, and others. Died, 1707.

REGIUS, URBAN, or LE ROI, a learned poet and controversialist, distinguished also as one of the early reformers, was born at Langenargen, in Germany. He completed his studies at Ingoldstadt, under Ecklus; and when the Emperor Maximilian visited that university, he made Regius his poet-laureate and orator. He afterwards obtained a professorship; but when the controversy arose between Luther and Ecklus, he heartily adopted the reformed doctrines, and sided with the former against his old tutor. In 1530 he accepted an invitation from the duke of Brunswick to settle as pastor of the church of Lunenburg, and died in 1541.

REGNARD, JEAN FRANÇOIS, a celebrated French dramatist, was born at Paris in 1656. He went to Italy about 1676, and was returning home with considerable property, when he was captured by an Algerine corsair, and sold for a slave. During his captivity he obtained the favour of his master by his skill in cookery; but being caught in an intrigue with one of the women, he was required to turn Mahometan, or suffer death. The French consul, however, saved him by paying his ransom; and Regnard returned to France about 1681. After this he wrote a number of successful comedies, besides poems and other works; was made a treasurer of France, and died in 1709. Among his best comedies are "Le Joueur," "Les Ménechmes," "Démocrite Amoureux," and "Le Distrait." His works have passed through many editions.

REGNAULT, JEAN BAPTISTE, French painter, born at Paris in 1754. He obtained the grand prize of the Academy, and completed his studies at Rome. On his return to Paris his picture of "Perseus and Andromeda" procured him admission (1782) to the Academy as associate, and he was received a member the following year. He painted a "Descent from the Cross," for Fontainebleau, a "Jupiter and Io," and many other historical and allegorical pieces. Guérin was one of his pupils. Died, 1829.

REGNAULT, MICHEL LOUIS ETIENNE, a French advocate and statesman, was born at St Jean d'Angely, in 1760. Having distinguished himself at the bar, he was chosen deputy to the states-general from the *tiers état* of Aunis, and became editor of a daily paper called the *Journal de Versailles*. He was proscribed in 1792, and being discovered and arrested at Douai, he did not obtain his liberty till after the fall of Robespierre. During the consulate and the empire he was honoured and promoted, and acquitted himself with great ability as attorney-general, &c. He continued faithful to Napoleon, and followed Maria Louisa to Blois. After the battle of Waterloo he pleaded for the resignation of Buonaparte in favour of his son; and his proposition being rejected, he

quitted France, and remained four years in exile. He obtained permission to return to France the last stage of his life, but he expired in 1829.

REGNAULT, JEAN, a French mathematician and naturalist, was born at Arras, in 1683. He was a Jesuit, and was employed in mathematics at the university of Paris. His works are translated into English. He died in 1762.

REGNIER, JEAN, a French statesman, minister of Napoleon, was born at Nancy, in 1755. He was elected to the Assembly, retired from the Reign of Terror, and was employed in the Reign of Robespierre, but was afterwards banished to the island of St. Helena, and died there in 1829.

REGNIER, JEAN, a French writer, was born at Nancy, in 1755. He was elected to the Assembly, and was afterwards banished to the island of St. Helena, and died there in 1829.

REGULUS, JEAN, a French general, celebrated for his devotion to the king, was born at Paris, in 1754. He was made consul of France, and was afterwards banished to the island of St. Helena, and died there in 1829.

REICHARDT, JEAN, a French musical composer, was born at Königsberg, in 1754. He was elected to the university, and was afterwards banished to the island of St. Helena, and died there in 1829.

is, in 1632. After he read lectures on optics, till the intermandate of Harle, however, published that system, in which he defended it, and others.

ROI, a learned and distinguished also, was born at Paris. He completed under Eckius; and visited that his poet-laureate obtained a pro-controversy arose, he heartily joined, and sided with his old tutor. In 1711, he was appointed pastor of the church of St. Germain l'Auxerrois, and died in 1741.

ROI, a celebrated painter, was born at Paris in 1656. He was remarkable for his property, an Algerine eor-

During his capture of his master being caught in the women, he was executed, or suffer death. He saved him by his return. He wrote a number of poems, besides a treatise of a treasurer of the treasury.

Among his best works are "Les Ménéceux," and "Le passage through

PTISTE, French philosopher, was born in 1644. He obtained a doctor's degree, and commenced. On his return to France, he was arrested and imprisoned (1782) to the death. He painted a number of pieces. Guérin died, 1823.

LOUIS ETIENNE, a Frenchman, was born in 1660. Having distinguished himself, he was chosen editor of a daily paper at Versailles. He was discovered and did not obtain his freedom. He was of Robespierre. He was appointed attorney-general, to Napoleon, and died. He was elected for the Convention in favour of his being rejected, he

[REG]

quitted France for America, where he remained four years. He at length, in 1819, obtained permission to return; but being in the last stage of sickness when he landed, he expired in a few hours after his arrival.

REGNAULT, NOËL, French mathematician and natural philosopher, born at Arras, in 1683. He entered the Society of Jesuits, and was for a long time professor of mathematics at the college of Louis le Grand. His works are—"Entretiens Physiques," translated into English and Italian; "Origine Ancienne de la Physique Nouvelle;" "Entretiens Mathématiques," &c. Died at Paris, 1782.

REGNIER, CLAUDE ANTOINE, duke of Massa, minister of justice under the government of Napoleon, was born at Blamont, in La Meurthe, in 1736; practised as an advocate at Nancy, was a member of the Constituent Assembly, retired from public affairs during the Reign of Terror; but, after the fall of Robespierre, became a member of the Council of Ancients, and took an active part in the senate. He assisted in the elevation of Buonaparte as first consul; and, in 1802, he was appointed grand judge, minister of justice, &c. In 1813 he became president of the legislative body, and died in the following year.

REGNIER, MATHURIN, a French poet, and the first who succeeded in France as a satirist, was born at Chartres, in 1573. He was brought up to the church, which he disapproved of his debaucheries; yet he obtained a canonry in the cathedral of his native place, with other benefices, and a pension. Died, 1613. His "Satires" still retain a place in the standard literature of his country.

REGULUS, MARCUS ATTILIUS, a Roman general, celebrated for his patriotism and devotion in the service of his country, was made consul a second time about 256 B. C., and with his colleague, Manlius Vulso, commanded in the first war against Carthage. Made prisoner by the Carthaginians, he was sent to Rome with an embassy, that peace might be procured on favourable terms, and bound himself, by an oath, to return if the terms were rejected. He, however, considered it his duty to advise the continuance of the war; which being determined on, no entreaties or supplications could prevent him from fulfilling his solemn engagement; and the Carthaginians, on his return, put him to death.

REICHARDT, JOHANN FRIEDRICH, musical composer and author, was born at Königsberg, in 1751; studied at the university, under Kant, was for a long time director of the Italian opera at Berlin, and subsequently had the direction of the French and German theatres at Cassel. Among his compositions are the music to the "Tamerlane" of Morel, and the "Panthea" of Berquin. His literary productions are, "Familiar Letters written during Journeys in France in 1792, 1803, and 1804," 5 vols.; "Familiar Letters on Vienna," &c.; and "Napoleon Buonaparte and the French People under his Consulate," &c. Died, 1814.

REICHENBACH, GEORGE OF, a distinguished mechanician, was born at Manheim,

in 1772, and died at Munich, in 1826. He and his coadjutor, Fraunhofer, were unsurpassed in the manufacture of optical instruments generally, and quite unrivalled in the construction of telescopes, heliometers, theodolites, &c.

REICHSSTADT, Duke of. [BUONAPARTE, N. F. C. I.]

REID, SIR WILLIAM, a distinguished officer and man of science, was born in 1791, at Kinglassie, in Fife-shire, of which parish his father was minister. Educated at the military academy of Woolwich, he joined the Royal Engineers in 1809, and was sent to Spain, where he served under the duke of Wellington till 1814, was present at the battle of Waterloo, and took part in Lord Exmouth's attack on Algiers in 1816. In 1838 he was appointed governor of the Bermudas, where he remained till 1846, when he was transferred to Barbadoes; and his government was marked by such enlightened vigour that he received the appellation of the "Model Governor." Soon after his return from Barbadoes he received the command of the garrison at Woolwich; and in 1851 he was appointed chairman of the committee for managing the Great Exhibition, the duties of which he discharged with such skill and success as to obtain for himself the honour of K. C. B. and the governorship of Malta, which he filled with great ability during the Russian war. But great as was Sir William Reid's administrative capacity, and highly as it was valued, it is as the author of the able work on "The Law of Storms," that his name is likely to be best known to posterity. This work, which was first published in 1838, has gone through many editions, and is regarded as an authority both in Europe and America. General Reid was a fellow of the Royal Society, to which he was admitted in 1839. Died, 1858.

REID, THOMAS, a celebrated Scotch divine and metaphysician, was born in 1709 at Strachan, in Kincardineshire, and educated at the Marischal College, Aberdeen. In 1764 he succeeded Adam Smith as professor of moral philosophy at Glasgow, and died in 1796. His principal works are, "An Inquiry into the Human Mind," and "Essays on the Intellectual and Active Powers of Man." Dr Reid was the first writer in Scotland who attacked the scepticism of Hume, and he endeavoured to refute his theory by an appeal to what he called "Common Sense." A new edition of Reid's works was undertaken, but not completed, by Sir W. Hamilton, whose notes and commentaries are of great value.

REINHOLD, ERASMUS, a German mathematician and astronomer, was born at Saalfeldt, in Thuringia, in 1511; became professor of mathematics at Wittenberg, and died there in 1553. His works are, "Prutenice Tabule Cœlestium Motuum," &c. "Primum Liber Tabularum Directionum," &c.

REISKÉ, JOHANN JACOB, an eminent philologist and oriental scholar, was born at Zerbig, in Saxony, in 1716; studied at Halle and Leipsic, became Arabic professor at the latter place in 1748, was appointed rector of the college of St Nicholas, and died in 1774.

His works are numerous and erudite. They consist chiefly of editions and translations of the oriental and classical authors. Among them are the Annals and Geography of Abulfeda, editions of Theocritus, Plutarch, the Greek orators, &c. He was assisted in his researches by his wife, ERNESTINA CHRISTINA, who learnt Greek and Latin for the purpose: after his death she completed some of his undertakings, and published his autobiography. She died in 1798.

REIZ, or REITZ, FRIEDRICH WOLFGANG, a German philologist, born in 1733. He held successively the professorships of philosophy, Latin and Greek, and poetry, in the university of Leipsic, of the library of which he was also director. He edited the works of Herodotus and other classical authors. Died, 1790.

REIAND, ADRIAN, a learned orientalist, was born at Alkmaer, in 1676. He studied at Amsterdam, Utrecht, and Leyden; and was successively professor of philosophy at Harderwick, and of oriental languages and ecclesiastical history at Utrecht, where he died in 1718. Among his works are, "De Religione Mohammedica," "Antiquitates Sacre Veterum Hebræorum," "Dissertationes quinque de Nunnis Veterum Hebræorum," "Palestina ex Monumentis veteribus illustrata et Chartis Geographicis," &c. The last-named is his most important work. 2 vols. 4to.

REMBRANDT, HERMANZOOON (VAN RIJN), one of the most celebrated painters and engravers of the Dutch school, was born in 1606, at Leyden. His passionate love for art disappointed his father's desire of educating him as a lawyer; he received instruction in the art of painting from several masters, and then pursued his labours at home, taking nature as his sole guide. Rembrandt was master of all that relates to colouring, distribution of light and shade, and composition, and though deficient in other requisites of a true artist, it cannot be denied, that his pencil is masterly and unique, possessing an energy and effect belonging to no other painter. His etchings have wonderful freedom, facility, and boldness. Rembrandt was twice married, resided during the greater part of his life at Amsterdam, and acquired a large fortune. After the death of his first wife he was involved in serious pecuniary embarrassments, partly perhaps from his lavish expenditure in procuring works of art, and partly from the condition of his country the consequence of war. He died at Amsterdam in 1669. The National Gallery possesses thirteen pictures by Rembrandt, among which are the "Woman taken in Adultery," "Adornment of the Shepherds," two portraits of himself, and a small copy of his large picture known as the "Night Watch." In the British Museum is a large collection of his etchings.

REMIGIUS, ST, or REMI, was archbishop of Rheims, and converted King Clovis to Christianity. He died in 533.—There was another ST REMIGIUS, who was archbishop of Lyons in the 8th century. He defended St Augustine's doctrine of grace and predestination against Gotschalk, and pre-

sided at the council of Valence in 655. Died, 876.

REMUSAT, JEAN PIERRE ABEL, an eminent orientalist, was born at Paris, in 1788. He was professor of the Chinese and Tartar languages at the Collège de France; was admitted into the Academy of Inscriptions in 1816; and, after Visconti's death, in 1819, he was appointed editor of the Journal des Savans. His principal works are, "Essai sur la Langue et la Littérature Chinoises," "Plan d'un Dictionnaire Chinois," "Mélanges Asiatiques," and "Comtes Chinois," 3 vols. Died, 1832.

RENAU D'ELISAGARAY, BERNARD, an able French naval architect, was born in Béarn, in 1652. He was employed at Brest in the construction of large ships; and, in 1680, he conceived the idea of bomb-vessels, which were used at the bombardment of Algiers, and the success of which led to his being appointed to conduct several sieges under Vauban. For these services he was made a captain in the navy, and rewarded with a pension of 12,000 livres. These rewards, however, he lost by the death of his patron Seignely. He was afterwards made a member of the Council of Marine, and received the grand cross of St Louis. He wrote "Théorie de la Manœuvre des Vaisseaux," and died in 1719.

RENAUDOT, THÉOPHRASTE, a French physician, was born at Loudun, in 1553; and died at Paris, in 1653. He was the projector of "La Gazette," which he published from 1631 to 1653. He was the author of a "Life of Henry II., Prince of Condé," and other biographical works.

RENAUDOT, EUSÈBE, French orientalist, grandson of the preceding, was born at Paris in 1646. He was educated by the Jesuits, made great attainments in oriental literature, became a member of the French Academy and the Academy of Inscriptions, and in 1700 accompanied Cardinal de Noailles to Rome, where he enjoyed the friendship of Pope Clement XI. Renaudot bequeathed his numerous oriental manuscripts to the abbey of Saint Germain des Prés. His works comprise a Latin translation of Testimonies of the Eastern Church respecting the Eucharist; several treatises on the same subject; "Historia Patriarcharum Alexandrinorum Jacobitarum;" "Liturgiarum Orientalium Collectio," &c. Died, 1720.

RENÉ, surnamed THE GOOD, duke of Anjou, count of Provence, and king of Sicily, was born at Angers in 1409. He was son of Louis II., count of Anjou, married in 1420 Isabella of Lorraine, but was driven from that duchy, and kept prisoner by the duke of Burgundy for several years. He succeeded his brother Louis III. in 1434, and was chosen successor to the kingdom of Naples by Queen Joanna II. Being still a prisoner, he sent his wife Isabella to receive the homage of his new subjects. He was liberated in 1436, and was afterwards engaged in war for three years with Alfonso of Aragon, who, in 1442, finally got possession of Naples. René retired to Provence and devoted himself to the administration of his estates, and to the cultivation of poetry and the fine arts. His daughter Margaret

was married in 1446. On the 21st of XI. of France, in Provence, years, enjoying subjects. His some of his poet extant. Died, erected to him a of his life have la Salle, and the

was married in 1445 to Henry VI. of England. On the seizure of Anjou, by Louis XI. of France, in 1473, René retired to Aix, in Provence, where he spent his last years, enjoying the esteem and love of his subjects. His work on tournaments, and some of his poems and paintings, are still extant. Died, 1480. A marble statue was erected to him at Aix in 1823, and histories of his life have been written by Boisson de la Salle, and the Viscount de Villeneuve-Bargemont.

RENNELE, Major JAMES, was born at Chudleigh, in Devonshire, in 1742; first entered the naval service as a midshipman, and served in India, but quitted it for the East India Company's military service, and became surveyor-general of Bengal. Returning to England in 1782, he was elected a fellow of the Royal Society; and from this period he held an extensive correspondence with men of learning both at home and abroad. He now published his celebrated "Memoir and Map of Hindostan," and he assisted in the formation of the Asiatic Society. He was also author of "Observations on the Topography of the Plain of Troy," memoirs on the "Geography of Africa," the "Geographical System of Herodotus," and the "Marches of the British Army in the Peninsula of India," &c. He died in 1830.

RENNELE, THOMAS, D.D., dean of Winchester, and one of the most learned and eloquent preachers of his time, was born, 1733. In 1786 he was inducted to the living of Alton, in Hampshire; and in 1805 he was appointed to the deanery of Winchester, by his admirer and friend, Mr Pitt. Though his scholarship was at once profound and various, he published nothing but a volume of sermons, principally a selection from those which he preached at the Temple church, London, and in the cathedral of Winchester. This volume affords abundant proof that, "both as a theologian and a scholar, in the most comprehensive sense of the words, Dr Rennell was one of the most remarkable and accomplished men of the age." Late in life he lost his wife, the daughter of Sir William Blackstone. Died, 1840.

RENNELE, THOMAS, son of Dr Rennell, noticed above, was born in 1787, and was placed at an early age at Eton, where he distinguished himself by his proficiency in classical literature, and obtained Dr Burchan's prize for the best Greek Sapphic ode "On the Propagation of the Gospel in India." In 1806 he removed to King's College, Cambridge, and two years after gained the Brunonian prize for the best Greek ode. On taking his first degree, he entered into orders, and became assistant preacher to his father at the Temple church; in 1811 he published "Animadversions on the Unitarian Version of the New Testament;" about which time he undertook the editorship of the British Critic. In 1818 he was presented to the vicarage of Kensington, and in the same year he was elected Christian advocate in the university of Cambridge, in which capacity he published two excellent treatises; one, entitled "Remarks on Scepticism, especially as connected with

the Subjects of Organization and Life;" the other, "Proofs of Inspiration on the Grounds of Distinction between the New Testament and the Apocryphal Volume." In 1823, Mr Rennell was presented to the mastership of St Nicholas's hospital, and a prebend in Salisbury cathedral; but a violent attack of fever, which terminated in a gradual decline, put an end to the hopes of his friends and admirers in the following year. He died at Winchester, June, 1824, just as he had completed his last work, a new translation of "Munster's Narrative of the Conversion of Count Struensee."

RENNIE, JOHN, a celebrated civil engineer and mechanist, was born at Phantassie, in East Lothian, settled in London in 1783, and first became known by the talent he displayed in the construction of the Albion Mills. His next task was to superintend the new machinery of Whitbread's brewery, the execution of which increased his fame. He soon, however, became eminent in labours of a superior kind, and stood at the head of the civil engineers of this country. Among his public works may be mentioned, Ramsgate Harbour; Waterloo, Southwark, and New London Bridges; the Breakwater at Plymouth; the Crinan, Lancaster, Kennet and Avon, and other canals; several docks and harbours, among which are those of London, Hull, and Sheerness, and the extensive drainage schemes for the Lincolnshire fens, which he planned and executed. For steady resolution and inflexible perseverance Mr Rennie was rarely surpassed; and it was these qualities, combined with eminent natural talents, that so admirably fitted him to contend with or guard against the great physical operations of nature. Died, 1821. His sons, George and Sir John Rennie, have ably followed in their father's footsteps.

RENNIE, GEORGE, eldest son of the preceding, and like him a distinguished engineer, was born in 1791. Educated at St Paul's School and the university of Edinburgh, he learned the art of engineering under his father, and took part with him in many of his great works. He afterwards carried on business in partnership with his brother, Sir John Rennie, executed important dock and drainage works, was largely employed by the Russian government, constructed bridges, railways, steam-engines, &c. He was a fellow of the Royal Society, and of other learned bodies, and published several scientific works. Died at London, 30th March, 1866. His sons carry on the business.

REPPIN, NICHOLAS VASILIEVICH, Prince, born in 1731, was a Russian field-marshal, and served under Peter I. He was afterwards appointed by Catharine II. assistant to the Russian ambassador at the elevation of Stanislaus to the throne of Poland, in 1764, and he subsequently became Russian minister at Warsaw. He was soon after this employed on diplomatic missions at Constantinople and Breslau. In 1789 he succeeded Count Romanzoff in the command of the army of the Ukraine, and in 1791 he defeated the grand vizier Kusunuf, but having offended Prince Potemkin, he was disgraced and banished to Moscow; whence, however,

ho was recalled to be made governor of Livonia. In 1796, Paul I. promoted Prince Ropnin to the rank of a field-marshal; and in 1798 sent him on a secret mission to Berlin; but being unsuccessful in his endeavours to prevail on the Prussians to join the confederacy against France, he was on his return ordered to retire to Moscow, where he died in 1801.

REPTON, HUMPHREY, distinguished by his skill in ornamental gardening, was born at Bury St Edmunds, in 1752. In 1783 he accompanied Mr Windham to Ireland, and for a short time held a situation at Dublin, under government. On his return to England, he adopted the profession of landscape gardening, in which he soon obtained celebrity. He published several treatises on the theory and practice of his art. Died, 1818.

REQUESENS, LUIS DE ZUNIGA Y, grand commander of Castile, viceroy of the Netherlands, was Spanish ambassador at the court of Rome in 1564. He took part in 1570 in the expulsion of the Moors from Granada; distinguished himself under Don John of Austria at the famous battle of Lepanto, and after being for a short time governor of the Milanese, was appointed in 1573 to succeed the duke of Alba as viceroy of the Netherlands. He had to continue the war which Alba had provoked; saw his fleet destroyed by the Dutch; suppressed with some difficulty mutinies in his army; and besieged Leyden, which, however, was successfully defended against him. Died at Brussels, in March, 1576. He was a brave and able soldier, and a just and lenient ruler, but he struggled in vain against the results of Alba's cruelty.

RESTOUT, JEAN, a French painter, was born at Rouen, in 1692, became director of the Academy of Painting, and died in 1768.

RETZ, JEAN FRANÇOIS PAUL DE GONDI, Cardinal de, was born at Montmirail, in 1613; became coadjutor to his uncle, the archbishop of Paris; and, after many intrigues, and fighting several duels, he was made archbishop of Corinth, and cardinal. He conspired against the life of Cardinal Richelieu, and took a prominent part in opposing Mazarin during the minority of Louis XIV. At length Mazarin, who both hated and feared him, imprisoned him in the castle of Vincennes, then at Nantes, whence he escaped, and travelled through Holland, Flanders, and England. In 1673 he wished to give up his cardinal's hat, and retire from the world, but the pope would not receive it; and as the latter years of his life were some amendment on the past, he died regretted, at Paris, in 1679. He was daring, turbulent, and intriguing; and in his "Memoirs," which were written by himself during his retirement from the busy scenes of public life, he has drawn his own portrait with considerable skill and impartiality.

RETZSCH, MORITZ, an eminent German designer and etcher, born at Dresden in 1779. He received his education as a painter in the academy of that city, and in 1824 was named professor of painting. His fame as an artist rests on his wonderfully vigorous and beautiful etchings illustrative of the "Faust" of Goethe, and of Shakespeare's

"Hamlet," "Macbeth," "Romeo and Juliet," "Othello," and several other plays. The "Faust" etchings appeared in 1812, and the Shakespeare illustrations at various times from 1826—1845. Retzsch also published some admirable illustrations to Schiller's poems, and several other sets of Sketches and Designs. Of genial temper, warm-hearted and cheery, and simple in his way of life, he enjoyed the truest esteem of his fellow-citizens, and the love of a large circle of friends. Died at Dresden, June 11, 1857.

REUCHLIN, JOHANN, one of the greatest classical and Hebrew scholars of his time, was born at Pfortzheim, in the margravate of Baden, in 1455. His fine voice as one of the choristers in the church having attracted the attention of the margrave, the latter selected him in 1473 to accompany his son to the university of Paris. There he studied under John Wessel, and with such distinction, that at twenty years of age he taught Greek and Latin at Basel. He subsequently entered the service of Eberhard of Würtemberg, and in 1487 accompanied him to Italy, where he became acquainted with Chalcondylas, Pico of Mirandola, and other scholars, and delivered a Latin oration before the pope. Reuchlin was employed in several important negotiations, and obtained the title of count-palatine. After Eberhard's death he had to quit Stuttgart, and take refuge at the court of the Elector Philip at Heidelberg. He continued his scholarly labours, and spared neither pains nor money in collecting Hebrew and Greek manuscripts. He was sent again to Rome in 1498. His studies were not limited to philology, but extended to theology, and although he never quitted the church of Rome, his views leaned towards those of the Reformers. In 1509 he was consulted by the Emperor Maximilian I. on the measure proposed by the Dominicans of Cologne, of burning all Jewish books except the Bible. The edict had been obtained, and the books were given up to the Inquisitor and the monks; but Reuchlin gave an opinion against it, and the books were restored to the Jews. His work entitled "Speculum Oculare" appeared in 1511 and provoked an outburst of fierce hate and persecution against him. He was denounced as a heretic, was condemned by the Inquisitor, and his writings sentenced to be burnt. This brought Ulrich von Hutten into the field as a reformer; he published his "Triumphus Capionis," and put himself at the head of a league of statesmen, preachers, and literary men to oppose the Obscurantists (*Dunkelmänner*) of Cologne. Reuchlin appealed to the pope, and so did his enemies, and the cause was still undecided when the greater questions stirred by Luther put an end to it. Reuchlin was afterwards professor of Greek and Hebrew at Wittenberg, Ingolstadt, and Tübingen, and was resorted to by crowds of students. Reuchlin is the to by crowds of students. Reuchlin is the cousin of Melancthon, who studied under him at Pfortzheim. The labours of this eminent man contributed greatly to prepare the way for the reformation. He published a Latin Dictionary, a Greek Grammar, and the first Hebrew Grammar and Lexicon

which appeared in Germany. Died at Stuttgart, in 1822.

REUVENS, JOHN EVERARD, one of the most profound lawyers Holland has produced, was born at Haarlem, in 1763; studied at Leyden; acquired great reputation at the Hague as an advocate; and was appointed, in 1795, counsellor to the court of justice of the province of Holland. In 1801 he became president of the high court of justice; and under the regal government, in 1806, he was nominated counsellor of state extraordinary, and subsequently vice-president of the council. On the union of the court of appeal at the Hague; but was soon after invited to Paris, and made counsellor of the court of Cassation, which office he relinquished, when, in 1814, the independence of his native country was secured, and returned to the presidency he had quitted at the Hague. He went to Brussels in 1816, on a legal mission, and there perished, the victim of a conspiracy, the authors of which have never been discovered. His judicial and political knowledge enabled him to fill his different offices with efficiency; and he earned a lasting reputation by the criminal code of the Netherlands, which was almost entirely his work.

REVEILLERE-LÉPAUX, LOUIS MARIE LA, one of the members of the French Directory, was born at Montaigne, in 1753, and brought up to the profession of the law. On the breaking out of the revolution, he displayed great ardour in supporting popular opinions; became a member of the Constituent Assembly; and, in 1792, of the National Convention. He procured the decree of the Convention, purporting "that the French nation would give assistance to all oppressed people who wished to recover their liberty;" and voted for the death of the king, and against the appeal to the people. He afterwards opposed Danton, and in vain defended the proscribed Girondists; was compelled to seek for safety in concealment, but returned to Paris after the death of Robespierre. On the creation of the Institute, he was nominated a member of the class of moral and political sciences; advocated some religious ceremonies in accordance with the principles of the theophilanthropists; and was represented as the high-priest of that sect. He refused to take the oath of allegiance to Napoleon, and retired to the neighbourhood of Orleans, where he lived in obscurity for a time; afterwards returned to Paris, and died in 1824. He left "Memoirs," with directions for their being published at a future time.

REVELEY, WILLEY, an English architect and antiquary, was a pupil of Sir William Chambers. He travelled through Greece, and lived for a time at Athens, making numerous drawings during his progress. He was employed to edit the 3rd vol. of "Athenian" Stuart's great work on the "Antiquities of Athens." Mr Reveley built the church of All Saints at Southampton. Died, 1799.

REVETT, NICHOLAS, an English architect, was born in Suffolk, in 1721. In 1750

he met Athenian Stuart at Rome, accompanied him in his travels through Greece, and with him edited the "Antiquities of Athens." In 1766 Revett accompanied Chandler to Asia Minor, and the work entitled "Ionian Antiquities" was the fruit of their joint labours. One of his most remarkable works as architect was the church erected in 1778, for Sir Lionel Lyde, bart., at Ayott, St Lawrence, in Hertfordshire. Died at London, 1804.

REWBELL, JEAN BAPTISTE, one of the directors of the French republic, was born at Colmar, in 1746. He was chosen deputy for the tiers état to the States-general in 1789, was nominated deputy to the Convention in 1792, voted for the establishment of a republic, and strenuously recommended the trial of Louis XVI. After filling several important situations, he was at length raised by his colleagues to the highest magistracy of the state. He held the office of director till 1799, when he was replaced by the Abbé sieyes; and he died in comparative obscurity, in 1810.

REY, JEAN BAPTISTE, an eminent French musician, was born at Lanzerte, in 1734. While at Nantes, his reputation as a composer having reached the court, he was sent for, and appointed chamber-musician to the king, with a salary of 2000 francs; and though the revolution interfered with his promised advancement in the royal household, he continued to direct the opera orchestra for more than thirty-five years, and under Napoleon was appointed to superintend that of the chapel royal. He composed a number of operas, &c., and died in 1810.

REY, JEAN, a French physician of the 17th century, one of the precursors of the science of pneumatic chemistry. He published an interesting work in 1630, from which it appears he had discovered that the increase of weight in calcined metals arises from the absorption and solidification of air; and on this the antiphlogistic theory of chemistry is, in a great measure, founded. He died, in 1645.

REYNEAU, CHARLES RENÉ, an eminent French mathematician, was born at Briassac, in 1656, and entered into the congregation of the Oratory. Having become well acquainted with geometry, and studied the Cartesian philosophy, he taught mathematics and physics at Toulon and Angers. He was the author of "Analyse Démontrée," 2 vols. 4to; and "Science du Calcul des Grandeurs." Died, 1728.

REYNIER, JEAN LOUIS EBENEZER, French general, was born at Lausanne, in 1771. He entered into the army, and in the early campaigns of the French republic he so far signalized himself, as to be appointed general of brigade during the conquest of Holland in 1794. He afterwards served under Moreau, as chief of the staff; and in the memorable retreat in 1796, as well as on other occasions, gave proofs of his superior military talents. In 1798 he accompanied Buonaparte to Egypt, was present at the battle of the Pyramids, commanded for a time at Acre, overthrew the Janizaries, and thus contributed greatly to the victory of Heliopolis; but having subse-

China to preach Christianity; but being, through persecutions, compelled to relinquish his labours there, he returned to Europe, and afterwards engaged in a new mission to Persia, where he died in 1660. He wrote several works, relating chiefly to the progress of the gospel in those parts of the East which he had visited.

RHYNE, WILLEM TEN, a celebrated Dutch physician and naturalist, born at Deventer, about 1640. Being appointed physician to the Dutch East India Company, in 1673, he remained some time at the Cape of Good Hope, to examine the productions of the country and the manners of the inhabitants; after which he went to Java with the same object, and employed himself in scientific researches. While there, it is said, he made a voyage to Japan, and cured the emperor of a dangerous malady. On his return he published the result of his observations.

RIBALTA, FRANCISCO, an eminent Spanish painter, born at Castillon de la Plana in 1551. He studied several years in Italy, forming his style especially on that of Sebastiano del Piombo, and after his return to Spain settled at Valencia. He painted many pictures for the principal towns of Spain, among which are named a "Last Supper," an "Entombment of Christ," "Death of St Vincent de Ferrer," &c. The picture at Oxford of "Christ bearing his Cross" is most probably by this master. Died at Valencia, 1628. His son Juan was a good painter, but died the same year as his father. Ribalta was the teacher of Ribera.

RIBAS, JOSEPH DE, a general in the Russian army, was a native of Naples, and born about 1735, being at Leghorn at the time Alexis Orloff arrived there with his fleet for the purpose of carrying off the natural daughter of the Empress Elizabeth, whom Prince Radzivil had taken to Rome and then abandoned, he assisted in this undertaking, and then went to Russia to obtain from Catharine II., the reward of his services. After attending on the son of the empress by Gregory Orloff, in his travels, he obtained a regiment of carabineers; and in 1790 he commanded, with the rank of admiral, the fleet destined for the attack of Kilia and Ismail, to the success of which he greatly contributed. Having again signalized himself in her service, both as an officer and a diplomatist, the empress, in 1792, made him a rear-admiral, and further rewarded him with a pension of 20,000 rubles.

RIBERA, JOSÉ, called **LO SPAGNOLETTO**, an eminent Spanish painter, was born at Xativa, in Valencia, in 1598. He was at first a pupil of Ribalta, but went early to Italy, and had for his master Caravaggio, whose bold naturalistic style was the model of his own. He afterwards studied the works of Raphael, the Caracci, and Coreggio. He visited Parma and Modena, and thence went to Naples, where the viceroy named him his painter. According to some accounts, he left his house suddenly in 1648, and was never again heard of. Others state that he died at Naples, in 1656. His historical pictures are chiefly representations of martyrdoms, tortures, &c.; the genius of Spagnoletto, in fact,

seemed to revel in scenes of horror and cruelty. Ribera was one of the three artists who conspired to secure to themselves the art patronage of Naples, expelling all competitors. Among his pupils were Luca Giordano and Salvator Rosa. Two examples of Ribera are in the National Gallery.

RICARDO, DAVID, celebrated for his writings on finance and statistics, was born in London, of a Jewish family, in 1772. His character for probity, industry, and talent, early procured for him the means of support; and, becoming a member of the stock exchange, he accumulated immense property. In 1810 he appeared as a writer in the Morning Chronicle, on the subject of the depreciation of the national currency; he advocated the principles of Malthus concerning population; and published a treatise on "Political Economy and Taxation," which forms a luminous exposition of the origin and fluctuation of national wealth and expenditure. In 1819, Mr Ricardo was elected into parliament for the Irish borough of Portarlington; he seldom spoke, except on subjects of finance and commerce, on which occasions he was always heard with great deference. Died, 1823. His works were collected and published by Mr McCulloch.

RICHAUT, or RYCAUT, Sir PAUL, an English diplomatist, traveller, and historical writer, was the son of a merchant in London; received his education at Trinity College, Cambridge; and in 1661 went to Constantinople, as secretary to the embassy, and there wrote his "Present State of the Ottoman Empire." He was next appointed consul at Smyrna, where, by the command of Charles II., he wrote "The present State of the Greek and Armenian Churches;" and on his return home he was made secretary to the lord-treasurer of Ireland, privy-councillor, and a judge of the high court of admiralty. William III. employed him as English resident in the Italian Towns, where he continued 10 years. Besides the works before mentioned, he wrote a continuation of Knolles's "History of the Turks," and translations of Platina's "Lives of the Popes," and Garcilasso de la Vega's "History of Peru." Died, 1700.

RICCI, LORENZO, the last general of the Jesuits previous to their suppression by Pope Clement XIV., was born at Florence, in 1703; entered into the order of St Ignatius at the age of 15 became, successively, spiritual director of the Roman college, and secretary of his order; and succeeded, on the death of Centurioni, in 1752, to the office of general. On the suppression of the Jesuits he was confined as a prisoner in the castle of St Angelo, and there died in 1775.

RICCI, SCIPIO, an Italian prelate, was a nephew of the preceding, and born at Florence, in 1711. He was raised to the bishopric of Pistoja and Prato, in 1766; and distinguished himself by strenuously seconding the Grand-duke Leopold in the attempt to introduce a reform into the ecclesiastical discipline of the duchy. By doing this he incurred the displeasure of the pope, was obliged to resign his bishopric, and subsequently underwent much persecution;

though he became reconciled to the holy see, in 1805, by signing a formula of adhesion to the bulls which he had objected to. Died, 1810.

RICCI, or RIZZI, SEBASTIANO, Italian painter, born at Cividale di Belluno, in the state of Venice, about 1660. He was first a pupil of Cervelli, then studied the best works of the great masters in the chief cities of Italy, and distinguished himself by his clever imitations of them. His style was very popular, and he executed a great number of works, especially of the decorative sort, for employers in all parts of Europe. Queen Anne invited him to England, and he spent ten years in this country, painting in Chelsea Hospital, Montague House, Burlington House, and other houses of nobility. Died at Venice, 1734.

RICCIARELLI, [VOLTERRA.]
RICCIOLI, GIOVANNI BATTISTA, an eminent astronomer and geographer, born at Ferrara in 1598. He entered the order of Jesuits, taught in their colleges at Parma and Bologna, and ultimately gave himself up to the pursuit of astronomy. In his treatise entitled, "Almagestum Novum," published in 1653, he opposed the theory of Copernicus, while admitting the charm of its simplicity and beauty, and he proposed to construct the science anew on fresh bases. He did not recognize the importance of Keppler's discoveries. He made, with Grimaldi, a measurement of a degree of the meridian in North Italy, but his determination was far from correct. Notwithstanding his feeble health, he was an indefatigable worker, and published, besides the book above mentioned, "Astronomia Reformata," and a treatise on Geography. Died at Bologna, 1671.

RICCOBONI, LODOVICO, an eminent comedian and dramatic author, was born at Modena, in 1674, acquired an early reputation on the stage, and was popular both in his own country and at Paris. In 1729 the duke of Parma appointed him inspector of theatres in his dominions; but in 1731 he returned to Paris, where he devoted his last years to literature, and died in 1753. He wrote several comedies and poems, besides a "History of the Italian Theatre," and other works on dramatic subjects.

RICCOBONI, ANTONIO FRANCISCO, son of the preceding, was born at Mantua, in 1707, and was also an actor and dramatic writer. His comedies were very successful, but what he gained by the stage he spent in foolish attempts to discover the philosopher's stone. Died, 1772.—His wife was a celebrated French novelist; born at Paris, 1714; married early to Riccoboni, whose immoral life embittered her own. She sought relief in literary pursuits, and wrote several tales, which enjoyed a wide reputation. She died in poverty, in 1792.

RICH, CLAUDIUS JAMES, a learned orientalist, was born, near Dijon, in France, in 1786, but was brought to England, and educated at Bristol. A passion for oriental studies early seized him, and he rapidly made himself master of several oriental languages. At the age of 17 he was made a writer to the East India Company, and he

finally became their resident at Baghdad. His researches in the antiquities of the East were extensive, as may be seen by his "Memoirs of Ancient Babylon," and his valuable collection of oriental MSS., now in the British Museum. Died, at Shiraz, 1821.

RICHARD I., king of England, surnamed Cœur de Lion, was born in 1157, and ascended the throne on the death of his father, Henry II., in 1189. He had taken the cross previous to his accession, and now resolved to fulfil his vow in the fields of Palestine; for which object he raised money by the sale of the crown property and offices, and a great number of English barons joined in the enterprise. In 1190, Richard joined the Crusade with Philip Augustus of France; and 100,000 of their bravest subjects met together on the plains of Acre. The two royal crusaders proceeded by separate routes to Sicily. There they quarrelled, but made it up by means of a large money payment by Richard. After some months' stay in Sicily, they again set forward; Richard on the way making himself master of Cyprus, and giving it to Guy of Lusignan. In Cyprus Richard married the Princess Berengaria of Navarre. Early in June he arrived at Acre, which was then besieged by the crusaders. It was taken soon after; but mutual jealousies arose among the Christian princes, and Philip returned to Europe, leaving behind him 10,000 of his men. Richard remained in the East, where he displayed the most heroic valour against Saladin, whom he signally defeated near Casarea, and having made a truce, embarked in a vessel, which was shipwrecked on the coast of Italy. He then, in the disguise of a pilgrim, travelled through part of Germany; but being discovered by Leopold, duke of Austria, he was made prisoner, and sent to the emperor, Henry VI., who kept him confined in a castle some time. He was at length ransomed by his subjects, on the payment of 150,000 marks, and landed at Sandwich, in 1194; after which he was again crowned. Philip having, contrary to treaty, seized on part of Normandy, Richard invaded France with a large army, but a truce was concluded in 1196. The war was, however, soon renewed; and Richard, in besieging the castle of Chalus, in March, 1199, was wounded by a shot from the cross-bow of one Bertrand de Gourdon, who being asked what induced him to attempt the king's life, replied, "You killed my father and my brother with your own hand, and designed to put me to an ignominious death." The prospect of his own death inspired Richard with sentiments of moderation and justice, and he ordered Gourdon to be set at liberty, and allowed a sum of money; but the savage Marceade, who commanded the Brabançons, caused him to be flayed alive. Richard died of his wound on the 6th of April, 1199, in the 42nd year of his age, and the 10th of his reign, leaving no issue. His character was strongly marked, presenting much to admire and much to condemn. He was the bravest among the brave; frank, liberal, and often generous; at the same time, he was haughty, violent, unjust, and sanguinary; unlitigant, as Gibbon observes, "the ferocity of a gladi-

[RIC]

ator to the cruelty of a tyrant." His talents were considerable, both in the cabinet and in the field; neither was he deficient in the art of poetry, as some of his compositions, preserved among those of the Troubadours, bear witness. Two volumes have already (1865) appeared of "Chronicles and Memorials of the Reign of Richard I.," edited by W. Stubbs, M.A., under the authority of the Lords Commissioners of her Majesty's Treasury.

RICHARD II., king of England, was son of Edward, the Black Prince, and was born at Bordeaux, in February, 1366. His father died in 1376, and he was created prince of Wales; succeeding his grandfather, Edward III., on the throne, 22nd June, 1377. During his minority the government was carried on by council of regency, and the state was distracted by the intrigues and contentions of the young king's uncles, the dukes of Lancaster (John of Gaunt) and Gloucester. Richard showed no small courage and presence of mind on the outbreak of the insurrection provoked by the poll-tax and the scandalous manner in which it was collected; meeting the insurgents with their leader, Wat the Tyler, in Smithfield, and persuading them, by promises of full charters of freedom, to quit the city. Their chief, however, was killed, and they were soon dispersed by military force. Before the month (June, 1381) ended, the king revoked the charters, had the insurgents tried, and about 1500 of them put to death. War was going on with France, and the Lollards were rising into importance enough to be persecuted. In 1382 Richard married the Princess Anne of Bohemia, who acquired the title of the "good Queen Anne." On the departure of the duke of Lancaster for Spain, in 1386, the king was deprived of power by a council of regency with Gloucester at its head; which, however, was declared by the judges to be illegal. The king assumed the government in May, 1389, made William of Wykeham chancellor, and drove from the court the duke of Gloucester and his adherents. The queen died in 1394, and the same year Richard visited Ireland. Great agitation arose about the same time in consequence of the spread of Wickliffe's doctrines. His writings had been already condemned and seized as heretical. In 1396, the king married Isabella of France, then only seven years of age; and the French war was ended by a truce for 25 years, and the surrender of Brest to the duke of Brittany. The marriage and treaty increased the popular discontent, and Gloucester was encouraged to attempt to regain his power. But he, with several of his accomplices in conspiracy, were seized, tried, and condemned. The duke was put to death at Calais. The famous quarrel between the dukes of Hereford and Norfolk took place in 1399, when both were banished by the king. After the death of Lancaster, in the following year, Hereford (now duke of Lancaster) returned, professedly to claim his estates which had been seized by Richard; he was joined by the Percies and other nobles, and on Richard's return from Ireland, made him prisoner at Flint, August 20th, and compelled him to

resign the crown. Richard was sent to the Tower, then to Pomfret Castle, where he is commonly said to have been murdered. But nothing is certainly known of his end, and there are strong grounds for believing that he soon escaped from Pomfret and lived in Scotland till 1417 or 1419.

RICHARD III., king of England, brother of Edward IV., and youngest son of Richard, duke of York, was born at Fotheringay Castle in 1450. Soon after the accession of Edward IV. he was created duke of Gloucester, K. G., and lord high admiral, though only in his eleventh year. Other dignities and offices were afterwards conferred on him. In 1470, he accompanied the king to Flanders on the restoration of Henry VI. by the earl of Warwick; returned with him, and took part in the battles of Barnet and Tewkesbury, and in the expedition to France in 1475; and commanded the expedition against Scotland in 1482, when he took Berwick and Edinburgh. Already popular suspicion attached itself to Gloucester as the murderer of Prince Edward after the battle of Tewkesbury, and of Henry VI. in the Tower; but conclusive evidence is wanting. The attainder and death of his brother, the duke of Clarence, which took place in 1478, were more certainly instigated by him. On the death of Edward IV., in 1483, Gloucester, who was still on the borders, set out for London, got possession of his young nephew, Edward V., marched to London, and was named Protector of the kingdom. The duke of Buckingham associated himself with Gloucester in these measures, and was at once appointed chief justice and constable of the royal castles in Wales. The sudden arrest and execution of Lord Hastings was followed by that of Earl Rivers, Lord Grey, Vaughan, and Haute; the young king and his brother were sent to the Tower; and a sermon was preached at Paul's Cross by one Shaw, setting forth the bastardy of Edward IV. and Edward V., and the claim of Gloucester to the throne. This was supported two days later by a speech of Buckingham, and the Protector was offered and accepted the title of king on the 26th June. The young princes were no more seen, and the belief established itself that they were murdered there by order of Richard. After his coronation he made a progress through the country, and was crowned a second time at York. But plots were already forming, and an offer of the crown was conditionally made to Henry, earl of Richmond. Buckingham, who had just been made constable of England, joined in them, and falling into the king's hands, was beheaded at Salisbury. In the following year Richard lost his son, and a year later his queen, Anne, daughter of Warwick and widow of Prince Edward. On the 7th August, 1485, Richmond landed at Milford Haven; the battle of Bosworth was fought on the 22nd, and Richard was defeated and killed. His remains were buried in the monastery of the Grey Friars at Leicester; but his tomb was destroyed on the dissolution of the monasteries. Richard III. was the last of the Plantagenets. Whatever doubt and obscurity involve the crimes com-

only laid to his charge, it is certain that he was author of some wise and important laws; was watchful of the interests of trade and navigation; brave and skilful in war; and liberal and grateful in his private relations. In his reign first the statutes were written in English and printed; the first English consul, for the interests of commerce, was appointed; and the vague beginning of our vast Post-office system may be traced.

RICHARD, earl of Cornwall, and titular emperor of the Romans, was second son of John, king of England, and his queen, Isabella, and was born at Winchester in 1209. After serving with distinction in France, he went, about 1240, to Palestine, where his presence, as nephew of the formidable Richard Cœur de Lion, gave courage to the Christians and filled the Saracens with terror. On his return he had an interview with the Emperor Frederick II. in Sicily, and by his desire attempted to mediate between him and the pope, Gregory IX.; but unsuccessfully. He arrived in England in 1242; again served in France; mediated more than once between Henry III. and the barons, against whom he ultimately fought; was charged by the king, in 1255, to torture and extort money from the Jews, by which means he got much of his wealth; and in 1256, he accepted the title of king of the Romans, offered him after the death of William, count of Holland. He had a rival, however, in Alfonso of Castile, who was chosen by some of the electors. Richard was crowned at Aix-la-Chapelle, with his wife, Sanchia, in May, 1257, and won golden opinion by his prodigal gifts and expenditure. He returned to England after two years, but several times revisited Germany and exercised authority in some respects as emperor. He took part on the king's side at the battle of Lewes, and was captured, and kept prisoner more than a year. The assassination of his eldest son, Henry, a prince of great promise, by the sons of Simon de Montfort, in 1271, deeply affected him, and he died at Berkhamstead in April, 1272. His body was interred in the abbey of Hayles, which he had founded.

RICHARD OF BURY. [AUNGERVILLE.]

RICHARD OF CIRENCESTER (in Latin, RICARDUS CORINENSIS), an early English historian and theological writer, was a monk of Westminster, and lived through the second half of the 14th century. His name, recently, has been chiefly known in connection with a treatise on Roman Britain, entitled "De Situ Britannia," which for a century has been generally accepted as his work, not without critical question, but is now proved to be spurious. It was introduced to English scholars by the antiquary Dr Stukeley in 1737; and, as he believed, was discovered in manuscript by Bertram, a Copenhagen Professor, ten years earlier. No one ever saw the manuscript but Bertram, who says it came to his hands in a very wonderful way; and he, with flattering speeches, palmed off upon Dr Stukeley a pretended copy of it. Erroneous statements derived from this treatise have found

their way into many standard English works, from Lingard's History to Smith's Ancient Geography. (For a detailed account of this remarkable forgery see the papers by Mr. B. B. Woodward, F.S.A., published in the Gentleman's Magazine, 1866.) Richard of Cirencester appears to have visited Rome in the latter years of his life, and died about 1401.

RICHARD, duke of York. [YORK.]

RICHARD, LOUIS CLAUDE MARIE, an eminent French botanist, was born at Versailles, in 1734; completed his education at the Mazarin College, Paris, where he assiduously applied himself to the study of botany, comparative anatomy, mineralogy, and zoology. On being appointed naturalist to the king in 1781, he sailed on a voyage of research to French Guiana and the Antilles, and returned in 1789 with an immense collection of newly discovered plants, insects, birds, quadrupeds, minerals, geological specimens, &c. On the formation of the Institute, he was chosen a member of the first class in the section of zoology and comparative anatomy, was also a corresponding member of the Royal Society of London, and was made a member of the Legion of Honour. Besides writing many valuable memoirs in periodical works, he was the author of "Démonstrations Botaniques, ou Analyse du Fruit considéré en général." Died, 1821.

RICHARDSON, CHARLES, L.L.D., the distinguished lexicographer, was born in 1735. Brought up to the profession of the law, he soon abandoned it from a strong preference for literature, and led the uneventful life of an industrious student and writer. His great work is the "New Dictionary of the English Language," in 2 vols. 4to, which appeared as an independent work in 1835-37. It was originally compiled for the Encyclopædia Metropolitana, and the first part was published in connection with that work early in 1811. This Dictionary has been several times republished, and a "Supplement" to it appeared in 1855. The great merit and interest of Richardson's Dictionary is in the field of etymology. He connects the words with those related to them in German, Dutch, and Swedish, or in Italian, French, and Spanish, and traces them to their roots; deduces from their primitive meaning the successive usages, and gives illustrative quotations arranged in chronological order. A smaller edition of the Dictionary, in which the quotations are omitted, was published in 1838, and has been several times reprinted. Dr Richardson was also author of "Illustrations of English Philology," his first work; "The Study of Language," "Historical Essay on English Grammar and English Grammars," &c.; and was a contributor to the Gentleman's Magazine, and to Notes and Queries. Died at Feltham, October 6, 1865.

RICHARDSON, SIR JOHN, a distinguished Arctic voyager, physician, and naturalist, was born at Dumfries, in 1787. He studied medicine at the university of Edinburgh, and in 1807 entered the navy as assistant-surgeon. The same year he was present at the taking of Copenhagen, and the following

year at the "convention of Cintra." He was then engaged in less exciting naval service till 1814. He applied himself afresh to medical studies, and graduated M.D. at Edinburgh, in 1816. Three years later began his series of Arctic expeditions, when he volunteered to accompany Captain (afterwards Sir John) Franklin, as surgeon and naturalist, on the first Overland expedition. In 1825 he again sailed with Franklin in the same capacity on the second Overland expedition to the Arctic Sea, during which he conducted a separate exploring party along the coast between the Mackenzie and Coppermine rivers. He filled the post of physician to the Melville Hospital, Chatham, for ten years, and in 1838 was appointed physician to the fleet, and removed to Haslar Hospital, near Gosport. He was knighted in 1846, and two years later again sailed for the Arctic Regions, as commander of an expedition in search of his old and dear friend Franklin. He descended the Mackenzie river, explored the coast as far as ice permitted, visited the Great Bear Lake and Great Slave Lake, and returned to England late in 1849. He resumed his duties at Haslar, where he had the care of the Museum, and where he happily effected a valuable reform in the treatment of lunatic sailors. In 1855 he retired from the service, and spent the last ten years of his life at Lancerigg, near Grasmere; active, kindly, and unselfish to the last. The literary productions of Sir John Richardson are very numerous. The most important of them is his "Fauna Boreali-Americana," in which he was assisted by Swainson and Kirby, and which was published in parts between 1829-1837. Among his other writings are the "Arctic Searching Expedition; a Journal of a Boat Voyage," "The Polar Regions," and the sections on Natural History in the Voyages of Beechey, Ross, Belcher, &c. He was a fellow of the Royal Society, commander of the Bath, and inspector of naval hospitals. Sir J. Richardson was thrice married. Died, 5 June, 1865.

RICHARDSON, JONATHAN, painter and author, was born about 1665. He quitted the profession of a scrivener to become the pupil of Riley, the portrait painter, whose niece he married. After the death of Kneller and Dahl, he was considered at the head of his profession in this country. He painted portraits of Lord Chancellor Cowper, Matthew Prior (for Lord Harley), and Alexander Pope; taught Hudson, the master of Reynolds; and was author of an "Essay on the Art of Criticism in Painting," "An Argument in behalf of the Science of a Connoisseur," "Account of Statues, Bas-reliefs, Drawings, and Pictures, in Italy," "Notes and Remarks on Paradise Lost," &c. Died, 1745.—In the two last-mentioned performances he was assisted by his son, who died in 1771.

RICHARDSON, SAMUEL, the celebrated novelist, was born in 1689, in Derbyshire, and received his education at a common day-school. At the usual age he was bound apprentice to a London printer, and after the expiration of his time he worked as a compositor and corrector of the press some years. At length he took up his freedom,

and set up business for himself, first in a court in Fleet Street, and afterwards in Salisbury Square. He became eminent in his profession, and by the interest of Mr Onslow, speaker of the House of Commons, obtained the printing of the Journals. In 1754 he was chosen master of the stationers' company; and, in 1760, he purchased a moiety of the patent of law-printer to the king. In 1740 he published "Pamela," the popularity of which was so great, that it ran through five editions in one year, being recommended even from the pulpit. Two years later appeared the "Joseph Andrews" of Fielding, written as a burlesque of the prolix details and high-flown moral sentiment of "Pamela." In 1748 "Clarissa Harlowe" fully established the literary reputation of Richardson; and its pathos, its variety of character, and minute development of the human heart, will cause it ever to be regarded as a work of genius. The "History of Sir Charles Grandison" appeared in 1753, and was received with great applause. Besides these works, Richardson published "Familiar Letters for the Use of Young People," and "Æsop's Fables, with Reflections." His "Correspondence" was published in 1804, with his "Life" by Mrs Barbauld. He was pious and benevolent, but immensely vain, and lived surrounded by a circle of affectionate friends, mostly ladies, who valued him for his moral worth and amiable disposition. Died, 1761. The portrait of Richardson, by his friend Highmore, is in the National Portrait Gallery.

RICHARDSON, WILLIAM, poet and miscellaneous writer, was the son of the minister of Aberfoyle, and was educated at the university of Glasgow. He accompanied Lord Cathcart, who had been his pupil, to Russia; and was for more than 40 years professor of Humanity at Glasgow. Among his works are "Anecdotes of the Russian Empire," "Essays on Shakespeare's Dramatic Characters," "Observations on the Study of Shakespeare," poems, and tales. Died, 1814.

RICHELET, CÉSAR PIERRE, was born at Cheminon, in 1631, and died in 1698. He compiled a "Dictionnaire des Rimes," and a "Dictionnaire Français," the latter full of curious information, with much satire and obscenity. It was first published in 1680, in 1 vol.; but was afterwards enlarged to 3 vols.

RICHELIEU, ARMAND JEAN DU PLESSIS, Cardinal, Duke de, first minister of France under Louis XIII., was born at Paris in 1585. Destined at first for the army, he turned to the church on his brother's resignation of the see of Luçon, studied theology at the college of Navarre, and was consecrated bishop of that see in 1607. He occupied himself with his episcopal functions, especially aiming at the conversion of Calvinists, till 1614, when he was chosen deputy to the States-general; and having attracted attention by his eloquence, he was charged to harangue the young king, and was named almoner to the queen-mother, Mary of Medicis. Two years later he became secretary of state for war and foreign affairs. He had at this time the protection of the queen's favourite, the Marshal d'Ancre; after whose assassination,

and the exile of the queen to Blois, he was banished from the court, first to his diocese, and then to Avignon, where he employed himself in writing theological works. He afterwards managed a formal reconciliation between the king and the queen; was created cardinal in 1622; and in 1624 took his place in the council of state, as first minister, a post which he held for 18 years. He made himself absolute master of France, owning neither colleagues nor equals. His history for the rest of his life is the history of France, the government of which he chiefly contributed to make an absolute monarchy. In working out his policy, whether domestic or foreign, he was unscrupulous as to means. He broke the power of the nobility, put many of them to death, and imprisoned many more; he suppressed the Calvinists as a party in the state by his severe measures, and besieged and took Rochelle in 1628; while at the same time, to humiliate the house of Hapsburg, he aided the Protestants of Germany, Switzerland, and the Netherlands. Richelieu, meanwhile, like some other despotic ministers, distinguished himself by a liberal patronage of letters and the arts. In 1635 he founded the French Academy; he greatly improved the royal printing-office; built the Palais Cardinal, since called Palais Royal, and rebuilt on a grander scale the Sorbonne. By the imposition of additional taxes he excited in his latter years general discontent, and conspiracies were formed to assassinate him; in one of them Cinq-Mars and De Thou were implicated, and both perished on the scaffold in 1642. The queen-mother died the same year in want and misery at Cologne. Richelieu had lost by death four years before his friend and diplomatic agent, the Père Joseph; and the cardinal himself died at Paris, 4th December, 1642, having recommended Cardinal Mazarin as his successor.

RICHELIEU, LOUIS FRANÇOIS ARMAND DU PLESSIS, Duke of, French marshal, descended from the same family as the cardinal, was born in 1696. After the death of Louis XIV. he was admitted into the court of the regent, the duke of Orleans, and he largely participated in its profligacy. He was sent to the Bastille in 1716, for fighting a duel with the Count de Gacé, and again in 1719, as an accomplice with the Spanish ambassador, in a conspiracy against the regent. He distinguished himself under Villars, and afterwards at Kehl, Philippsburg, Dettingen, and Fontenoy; conquered Minorca, forced the duke of Cumberland to submit to the capitulation of Closterseven, and devastated the electorate of Hanover. In 1781 he obtained the rank of dean of the French marshals; and he concluded his long career, varied with acts of heroism and villainy, in 1788.

RICHELIEU, ARMAND EMANUEL DU PLESSIS, Duke of, grandson of the preceding, was born at Paris, in 1776, and eventually became prime minister to Louis XVIII. He emigrated at the commencement of the revolution, entered the Russian service, and distinguished himself at the siege of Ismail, for which he was rewarded with the rank of major-general. In 1801 he revisited France, when Buonaparte endeavoured to

attach him to his service; but he returned to Russia, and in 1803 he was appointed governor of Odessa, which city, by his prudent measures, he raised from insignificance to the height of prosperity. On the restoration of the Bourbons, he took his seat in the Chamber of Peers; accompanied Louis XVIII. to Ghent; and, returning with him to Paris after the battle of Waterloo, was appointed president of the council of ministers, and placed at the head of the foreign department. He soon resigned his post, but again held the office of prime minister in 1820, and died in 1822.

RICHMOND, HENRY, Earl of. [HENRY VII. of England.]

RICHMOND, LEGH, a clergyman of the established church, was born at Liverpool, in 1772; became chaplain to the Lock Hospital, London, and afterwards rector of Turvey, in Bedfordshire. He was principally known as the author of "Annals of the Poor," containing the "Dairyman's Daughter," and other devotional tales, written with great force, originality, and pathos. He also wrote a work, entitled "The Fathers of the English Church," &c. Died, 1827.

RICHTER, JEAN PAUL FRIEDRICH, commonly called **JEAN PAUL**, the great German humourist, was born at Wunsiedel, near Bayreuth, 21st March, 1763. The son of a village teacher and pastor, he was educated for the church, and was sent in 1780 to the university of Leipsic. Theology was soon abandoned for more attractive studies, poetry, philosophy, and general literature; and impelled by sheer want, he early began to write. His first book, entitled "Grönländische Prozesse,"—Greenland Lawsuits—appeared in 1783. It was five years before he could find a publisher for his second, the "Auswahl aus des Tenfels Papieren."—Selection from the Devil's Papers. Meanwhile he was bravely struggling against penury; had gone to live with his mother in a one-roomed house at Hof; tried tutorships, and continued to read and study and make chests full of excerpts. At last his works attracted attention, his prospects brightened up, and he became the friend of many of his most eminent literary contemporaries. After the death of his mother he left Hof, and settled in 1798 at Weimar; three years later he married, and about 1803 took up his residence at Bayreuth. A liberal pension lifted him above the oppression of the cares which he had known so long, and his latter years were sweetened by the warm affection of friends, and the high esteem and admiration of his countrymen. The works of Jean Paul are very numerous, and in the complete edition which appeared after his death they fill 60 volumes. Written in prose, they are full of the truest and most splendid poetry; and though most of them "novels" in name, they treat of every variety of subject, from the profoundest questions of philosophy to the trivial details of vulgar life. The writings of this wonderful man are not for idlers, they are hard enough for enthusiastic students. But the toil of mastering the peculiar language and style, of penetrating through all the harsh outward ob-

structions, to the very core and inner life, is

a thousandfold repaid by the truth, the beauty, the wisdom, the geniality, and the rich and rare humour with which they abound. Among the principal of these works are, "Titan," which the author considered his masterpiece, "Hesperus," "Levana," an admirable treatise on education; "Siebenkas, oder Blumen-Erucht- und Dornenstück," "Das Campanenthal," a discourse on the Immortality of the soul, and "Vorschule der Aesthetik." "Titan," "Levana," and "Siebenkas," have been translated into English. Carlyle was one of the first to make Jean Paul known in England, by his eloquent Essays on his Life and Writings. Jean Paul died at Bayreuth, 14th November, 1825, having been blind nearly a year.

RICHTER, OTTO VON, a Russian traveller, who accompanied Lindmann, a learned Swede, to Egypt and Nubia, where they discovered interesting remains of ancient architecture. They returned to Cairo, in 1815, and proceeded by water to Jaffa: at Acre the two friends separated, and Richter went alone, by way of Tyre and Sidon, to Baalbec, after which he traversed Syria as far as the mountains of Lebanon, and went to Tadmor in the desert; but on his return to Smyrna, in 1817, he died.

RICKMAN, JOHN, F.R.S., clerk assistant at the table of the House of Commons. He first brought himself into public notice by the great attention he paid to the means of obtaining accurate statistical knowledge of the population, &c., of Great Britain. He was for 38 years officially connected with the House of Commons, and his life may be best described as one course of laudable zeal in the service of the public. He lived on terms of intimacy with Southey, Coleridge, Charles Lamb, Telford, the celebrated engineer, and many other men, whose congenial tastes and acquirements rendered the connection mutually pleasant and desirable. Born, 1771; died, 1841.

RICKMAN, THOMAS, an eminent architect and writer on Gothic architecture, was born at Maidenhead, of a Quaker family, in 1776. He was educated for the medical profession, but after various changes of occupation he settled at Liverpool as clerk in an Insurance Office, and there became an ardent student of architecture. He ultimately adopted it as a profession, established himself at Birmingham, and having made himself a name by his admirable work, entitled "An Attempt to discriminate the Styles of Architecture in England," was employed to erect a great number of churches. He withdrew from the Society of Friends, and died in 1841.

RIDLEY, NICHOLAS, an eminent English prelate and Protestant martyr, was born in 1500, at Tynedale, in Northumberland, and educated at Cambridge. He travelled on the continent, and, during a 3 years' absence from his native country, became acquainted with several of the early reformers, whose doctrines he afterwards warmly espoused. Returning to Cambridge, he filled the office of proctor to the university, and as such protested against the claims of the papal see to the supreme ecclesiastical jurisdiction in the

realm. He was also chosen public orator, became one of the king's chaplains, bishop of Rochester, and was finally elevated to the see of London, where he discharged the duties of his office with unwearied diligence. He was likewise employed in all the most important ecclesiastical measures of that reign, particularly in the compiling of the liturgy, and the framing of the articles of religion. But one of the most distinguished acts of his life was that of inciting King Edward to endow the three great foundations of Christ's, Bartholomew's, and St Thomas's hospitals. Having unadvisedly concurred in the proclamation of Lady Jane Grey, he was, on the death of Edward, marked out as one of the most prominent victims of papal authority; and being condemned, as a heretic, to the stake, he suffered, with the venerable Latimer, at Oxford, Oct. 15, 1555.

RIDOLFI, CARLO, Italian painter and writer on art, was born at Vicenza in 1594. He painted in a better style than his contemporaries, was employed by the pope, Innocent X., and wrote the "Lives of the most illustrious Venetian Painters," a valuable contribution to the history of art, but incomplete. It was published in 1648, and reprinted in 1833. Ridolfi died at Venice in 1658.

RIEDINGER, JOHANN ELIAS, a celebrated painter of animals, born at Uim, in Suabia, in 1695; died, 1767. He lived chiefly at Augsburg, where he became director of the Academy of Painting. He excelled also as an engraver. His spirited drawings, chiefly of wild animals, are very numerous.

RIEGO, RAFAEL DEL, a Spanish patriot officer, was born in the Asturias, in 1785. The enthusiasm with which he embraced the cause of independence at the period of the French invasion in 1808, subjected him to a long imprisonment in France. Before he returned to Spain, he visited Germany and England. Till 1820 every effort for liberty had been followed by exile and the horrors of the Inquisition; nearly all the chiefs who favoured liberty were in confinement; but the valour of Riego was at once triumphant; he delivered Quilroga from the hands of his gaolers, and, on the 1st of January, his troops proclaimed the constitution. General O'Donnell made his victory difficult, but he was victorious; and in the first sitting of the Cortes, in 1822, they appointed him president. At the height of his glorious career his moderation was conspicuous; he avoided pride, and displayed real magnanimity, prudence, and disinterestedness. Fortune, however, changed; Ferdinand VII. was reinstated, and the popularity of the brave Riego exciting the jealousy of those in power, he was calumniated as a promoter of anarchy. Still he preserved the confidence of the people, and again appeared in arms, in 1823, to assert the liberty of his country, but it was destined to fall before foreign foes. He was taken prisoner after the surrender of Cadiz to the French, and conveyed to Madrid on the 2nd of October. His wife and brother came to England, where they hoped to obtain friends for Riego; but their supplications were vain, and he was

condemned to an ignominious death, viz. that his limbs should be sent to different parts of the Peninsula, and his head kept at Las Cabezas, where the constitution was first declared. He suffered, Nov. 7, 1823; and his wretched wife died of grief a few months after.

RIENZI, COLA DI, an illustrious citizen of Rome, who in the 14th century obtained great celebrity by his attempts to restore the republic. He was of low origin, but had received a liberal education, and possessed great eloquence and lofty views, which induced his fellow-citizens to send him as one of their deputies to Pope Clement VI., then at Avignon. Rienzi, on this occasion, drew so affecting a picture of the distressed state of the city, that the pope appointed him apostolic notary, which office he discharged with great credit. But while he appeared actuated by the purest loyalty, he was secretly forming a conspiracy for the alteration of the government, and he let no opportunity pass of exciting the discontent of the people, by haranguing against the nobility and the defects of the public administration. By these means he became the idol of the people, who conferred upon him the title of tribune, with the power of life and death, and all the other attributes of sovereignty. What was more extraordinary, the pope confirmed the title, and Rienzi for some time governed the city with judgment and moderation. But the intoxication of supreme power betrayed him into extravagances, and he was expelled and imprisoned for 3 years by Clement VI. He was released by Innocent II., who sent him again to the Roman capital as governor. But Rienzi's cruelties raised him new enemies, and he was massacred in 1354, about 7 years after the commencement of his extraordinary career.

RIES, FERDINAND, an eminent musical composer and performer, was born at Bonn, in 1783, and was early distinguished for the precocity of his genius. He became a pupil of Beethoven, and as a pianist he had few superiors. From the year 1813 to 1825 he resided in England, and produced numerous musical compositions, some of which possess first-rate merit. He died at Frankfort, Jan., 1838.

RIGAUD, HYACINTHE, an eminent portrait painter, was born at Perpignan, in 1663; settled at Paris in 1681, and died there in 1743. He was called the Vandeyck of France. He painted many royal and noble persons, and the most illustrious men of his age. In 1700 he was received at the Academy, of which he ultimately became director.

RIGAUD, STEPHEN PETER, Savilian professor of astronomy in the university of Oxford, was born at Richmond, in Surrey, and may almost be said to have been the inheritor of scientific pursuits, both his father and grandfather having filled the office of observer in the Royal Observatory at Kew. His contributions to the scientific works of the day were both numerous and valuable. Born, 1775; died, 1839.

RILEY, JOHN, an eminent portrait painter, born in London, in 1646. He learnt his art under Isaac Fuller and Gerard Zoust.

After the death of Sir Peter Ley he was appointed painter to the king, Charles II., and rose greatly in public estimation; but, according to the opinion of Lord Orford, his modesty and humility were great impediments to his advancement. Riley painted the portraits of Charles II., James II. and his queen, William and Mary, to whom he was named painter, Bishop Burnet, the poet Waller, Dr Busby, and Lord-keeper North. He died in 1691.

RINGGLI, GOTHARD, a celebrated Swiss artist, was born at Zürich, in 1575, and died in 1635.

RINTOUL, ROBERT STEPHEN, projector, editor, and proprietor of the "Spectator" newspaper, was born in Scotland in 1787. Little is known of his early life, but it is certain that before 1813 he had been appointed editor of the "Dundee Advertiser." His superior intelligence and splendid character were soon shown in the improved energy of the paper, and procured for it a greatly extended circulation. In 1818 he first met Joseph Hume, whose practical character made a deep impression on his mind, and with whose aims as a reformer he heartily sympathized. Rintoul gave up his connection with the "Dundee Advertiser" about 1825, and soon after accepted the editorship of the "Atlas," just established in London. This engagement, however, soon terminated, and with the aid of his friends he started the "Spectator," of which he was for thirty years editor and proprietor. The first number appeared on the 5th July, 1828. It at once took, and steadily held a very high place as weekly journal of politics, literature, and art; and its influence was especially powerful on the subject of parliamentary reform, and contributed to the passing of the Reform Bill of 1832. Rintoul was the friend of Whately, Grote, Molesworth, Buller, and other eminent men; had a great capacity for work; a very kind heart under a rough exterior; and enjoyed the kindest regards of those connected with him in business relations. He was married before he settled in London, and left his wife, son, and daughter, surviving. Died, April 22, 1858.

RINUCCINI, OTTAVIO, a Florentine poet, who went to France with Mary de' Medici, in the year 1600. He wrote "Daphne," "Eurydice," and "Ariadne," lyrical dramas or operas, besides many graceful and pleasing poems. He contributed to the revival among the moderns of the lyrical drama. Died, 1621.

RIOJA, FRANCISCO DE, a Spanish poet, was born in 1600, and became librarian and historiographer to Philip IV. Besides his poems, he produced several comic dramas, and other pieces adapted for scenic representation. Died, 1639.

RIOLAN, JEAN, an eminent French physician, born at Amiens, became dean of the faculty at Paris, and died in 1606. He was defender of the doctrines of Hippocrates and the ancients, against the chemists.—His son, of the same name, born in 1577, became royal professor of anatomy and botany, and physician to Mary de' Medici; and to him the university of Paris is indebted for its botanic

garden. He published a work on the work of the tomato rest. **RIPON**, Earl of, an younger son of Ham, and educated at school-fellow of deen, Lord. garden. He made discoveries in anatomy, published several works, and died in 1657. The work on which his reputation as anatomist rests, is the "Anthropographia."

RIPON, FREDERICK JOHN ROBINSON, Earl of, an English statesman, was the younger son of Thomas, second Lord Grant-ham, and born in London, in 1782. He was educated at Harrow, where he was the schoolfellow of Sir Robert Peel, Lord Aberdeen, Lord Palmerston, and Lord Byron. From Harrow he proceeded to St John's College, Cambridge, where he obtained Sir William Browne's medal for the best Latin ode in 1801, and graduated M.A. in the following year. In 1804, he was appointed private secretary to his relative, Lord Hardwicke, then lord-lieutenant of Ireland. In 1807 he was returned for Ripon, which he continued to represent for twenty years. After filling various subordinate offices, he was appointed president of the Board of Trade in 1818, chancellor of the exchequer in 1823, created Viscount Goderich and made secretary for the colonies in 1827, and on the death of Mr Canning in the autumn of the same year elevated to the high office of prime minister, which position, however, he held only for a few months. On the formation of Lord Grey's ministry in 1830, he resumed the seals of the colonial office, which post he held till 1833, when he was appointed lord privy seal, and was created earl of Ripon. In 1834 he retired from the Grey ministry; and in 1841 he accepted the office of president of the Board of Trade under Sir Robert Peel. He subsequently presided over the Board of Control, and finally retired from official life on the breaking up of Sir Robert Peel's administration in 1846. Died, 1859.

RIPPERDA, JOHN WILLIAM, Baron de, a celebrated adventurer, was born of a noble family in Groningen, in 1680; served some time as colonel of infantry in the Dutch army; and, in 1715, was sent on a mission to Spain, where he acquired such an ascendancy over Philip V., that the monarch took him into his service, made him prim. minister, and created him a duke. At length he fell into disgrace, and was imprisoned in the castle of Segovia, whence he escaped in 1728, and came to England. In 1731 he went to Morocco, where he was favourably received by Muley Abdalla, and declaring himself a convert to the Mahometan religion, and taking the name of Osman, he obtained the chief command of the Moorish army at the siege of Ceuta. But the Moors being defeated, he fell into disgrace; and, retiring to Tetuan, he there died in 1737.

RIQUET, PIERRE PAUL DE, a celebrated French civil engineer, born at Beziers, in 1694. He projected the noble canal of Languedoc, which opens a communication between the Mediterranean and the Bay of Biscay. It was commenced in 1666, and carried on during the remainder of his life. After his death, which occurred in 1680, his two sons completed it.

RITCHIE, JOSEPH, an English traveller, who, in 1819, in conjunction with Captain Lyon, engaged in the mission to explore the interior of Africa. They set out from Tripoli, and reached Mourzouk, the capital of

Fezzan, where for some months they resided in circumstances of distress, arising from the want of funds, heightened by the treacherous conduct of Muklu, the bey of that country. Mr Ritchie fell a sacrifice to the hardships and vexation he experienced; but Captain Lyon returned to England, and published his "Narrative" in 1821.

RITSON, JOSEPH, an English antiquary and miscellaneous writer, was born at Stockton, in Durham, in 1752; settled in London as a conveyancer; obtained a lucrative post in the duchy of Lancaster; and died in 1803. As an antiquary, particularly in the field of our early poetry, he exhibited much industry and intelligence; but his morbid angularities of temper, and his avowed contempt for religion, were great drawbacks to the merit of his services. He appears to have laboured under a species of protracted mental derangement, of which he died. His principal publications are, "A Collection of English Songs," "The English Anthology," "Metrical Romances," "Bibliographia Poetica," the "Robin Hood Ballads," &c.

RITTENHOUSE, DAVID, a celebrated American mathematician, was born in Pennsylvania, in 1732. In 1769 the American Philosophical Society employed him to observe the transit of Venus; and he afterwards constructed an observatory, where he made some important discoveries. After the revolutionary war he was appointed director of the mint, and treasurer of his native province. He also had the degree of LL.D. conferred on him, and he succeeded Franklin as president of the Philosophical Society. Died, 1796. Dr Rittenhouse was regarded by his countrymen as the Newton of America. That he possessed great talents and industry is indisputable; and his exertions in the cause of science contributed in no small degree to the diffusion of a taste for mathematical and physical knowledge in the United States; but their enormities of him were pardonably extravagant.

RITTER, JOHANN WILHELM, a celebrated German natural philosopher, was born at Samitz, in Silesia, in 1776. The study of electricity occupied his chief attention; and in 1798 he started the idea that the phenomena of animal life are connected with galvanic action; but, though highly scientific, he advocated the reveries of animal magnetism, &c. He wrote "Physico-Chemical Memoirs," 3 vols., and other works. Died, 1810.

RITTER, KARL, the distinguished founder of Comparative Geography, was born at Quedlinburg, in Prussia, in 1779. He was educated at the university of Halle, and was engaged for several years as private tutor. In 1820 he was appointed Professor Extraordinary of Geography in the university of Berlin, to which several other appointments were subsequently added. He became a member of the Berlin Academy of Sciences, and was chosen a foreign member of the Royal Society of London. His great work, entitled "Die Erdkunde in Verhältnissen zur Natur und Geschichte des Menschen," first appeared in 1817, 1818; and in a second, and much extended edition, between 1821—1846. It opened new views of the relations

between the physical and historical sciences, and will form a great landmark in the history of science. Ritter was a laborious student and writer, and his works are very numerous. Among them are—"Europa;" "Die Strupas," a treatise on the Topes of India; "Der Jordan;" an "Introduction to Comparative Geography," &c. He contributed the article "Asia" to the "Penny Cyclopædia," and introductions to many books of geography and travels. Died at Berlin, September 28, 1859.

RIVAROL, ANTOINE, Count de, an able French writer, was born in Languedoc, in 1757, and settled at Paris, where he formed an acquaintance with the most eminent literary characters of the age; but, on the breaking out of the revolution, he went to Germany, and obtained the patronage of Prince Henry of Prussia. He was much admired for his wit and satirical talent, and died at Berlin in 1801. He wrote "Discours sur l'Universalité de la Langue Française," translated into French Dante's "Inferno," edited the "Journal Politique et National," and published several other works of temporary interest.

RIVAZ, PIERRE JOSEPH DE, a skillful French mechanist, born in 1711. He made a watch which had the singular property of winding itself up; invented an improved pendulum, &c. He also drained the mines of Pontpéan, in Brittany, and made many mechanical discoveries. Died, 1772.

RIVE, JEAN JOSEPH, a French bibliographer, was born in 1730, at Apt, in Provence. He was brought up to the church; but, on the breaking out of the revolution, he became a furious anarchist, and ended a turbulent life at Marseilles, in 1792. He wrote numerous works, the most important of which is, "La Chasse aux Bibliographes et Antiquaires mal avisés," 2 vols.

RIVERS, Earl. [WYDEVILLE, ANTHONY.]

RIVIÈRE, MERCIER DE LA, a celebrated French political economist, who obtained the post of counsellor of the parliament of Paris, in 1747; was afterwards made intendant of Martinique; and, on his return, published his noted work, entitled "L'Ordre Naturel et Essentiel des Sociétés Politiques." His schemes and pretensions were ridiculed by Voltaire, Grimm, and others, for their singularity and novelty; and his prudent counsels were powerless to check the advance of the revolution, which he lived to witness. Died, 1794.

RIVIÈRE, the Marquis de, governor of the young duke of Bordeaux, was born in 1765, entered the army, and was a devoted servant of the Bourbons. He emigrated with the French princes in 1790, served in the army of Condé, and became aide-de-camp to the count of Artois, afterwards Charles X. Seven times he entered France in disguise, to correspond with the friends of his royal master; but in 1804 he was arrested, tried, and sentenced to death, from which he escaped through the intercession of Josephine, his punishment being mitigated into an imprisonment for 4 years. At the Restoration he resumed the military service, was made a peer of France, and sent

ambassador to Constantine. In 1826 he was appointed governor of the duke of Bordeaux, and died in 1828.

RIVINUS, AUGUSTUS QUIRINUS, an eminent botanist and physician, whose real name was Baehmann, was born at Lelpsic, in 1652; practised medicine, and was professor of physiology and botany in his native city, and died in 1723. He was the author of "Introductio generalis in Rem Herbariam," and "Systema Plantarum," in which he divides all plants into 18 classes, distinguished by the number and form of their petals. Died, 1723.

RIZZIO, RIZZI, or RICCI, DAVID, the son of a music and dancing master at Turin, was born there in the earlier part of the 16th century. His musical abilities procured him notice at the court of Savoy, while his talents as a linguist caused him to be selected by the ambassador from the grand-duke to Mary, queen of Scots, as a member of his suite. In 1564 he first made his appearance at Holyrood House, where he soon became so great a favourite with the queen, that he was appointed her secretary for foreign languages. The distinction with which he was treated by his royal mistress excited the envy of the nobles, and the jealousy of Darnley. A conspiracy, with the king at its head, was accordingly formed for his destruction, and before he had enjoyed 2 years of court favour, the Lord Ruthven and others of his party were introduced by Darnley himself into the queen's apartment, where they assassinated the unfortunate object of their revenge, who fell at the feet of his royal mistress, having received no less than 56 stabs in her presence. A. D. 1566.

ROBBIA, LUCA DELLA, a distinguished Italian sculptor, was born at Florence in 1400. He first learnt the goldsmith's art, but soon devoted himself to sculpture, and is said to have studied with Ghiberti. He executed a beautiful series of bas-reliefs for the Canonica in the cathedral of Florence, the bronze door of the sacristy of the same cathedral, and the tomb of Bishop Federighi. But his name is best known for the numerous works in enamelled terra-cotta, named "Robbia ware," executed by himself and other members of his family. Among those attributed to Luca are the "Coronation of the Virgin," an altarpiece, medallions for the façade of Or San Michele at Florence, an "Adoring Madonna" formerly at Pisa, and a fountain in the Sacristy of Santa Maria Novella. There is a valuable collection of these enamelled terra-cottas in the South Kensington Museum. Luca died about 1481.

ROBBIA, ANDREA DELLA, nephew of the preceding, and like him an admirable sculptor and worker in Robbia ware, was born at Florence in 1437. He worked in conjunction with Luca, and after Luca's death applied their art still more extensively in architectural decoration. One of his most important works was the frieze of the Ceppo Hospital at Pistoia, on which he spent, with his son Luca, eleven years. In the South Kensington Museum is a charming relief of the "Virgin and Child," by Andrea. Died, 1499.

all worked skillfully in the same field. Girolamo went to France about 1527, and was employed by Francis I., and three of his successors. He built and decorated the once famous Chateau de Madrid in the Bois de Boulogne, which was allowed to fall into decay, and was destroyed during the revolution. Girolamo died in France about 1567.

ROBERT I., king of Scotland. [BRUCE.] ROBERT II., king of Scotland, first of the Stuart line, was only son of Walter Stuart and Marjory, daughter of Robert Bruce, and was born in 1316. He took part in the battle of Halidon Hill, and acted a prominent part in the affairs of government during the minority of David II. He held the office of regent of Scotland during the captivity in England of his uncle David, 1346—1357, and succeeded to the throne on his death, in 1371. He was engaged for several years in war with England, in which he was aided by the French; lived chiefly in retirement during his latter years, the earl of Fife being named regent in 1389; and died at Dundonald Castle, in 1390.

ROBERT III., king of Scotland, eldest son of the preceding, succeeded his father in 1390. He was probably about fifty years of age, and being of feeble character and indolent, left the chief power in the hands of his brother, the duke of Albany (previously earl of Fife). In the tenth year of his reign war broke out with England; Henry IV. invaded the kingdom, and the Percies made an inroad the next year, 1401. The defeat of Douglas by the Percies at Homildon Hill took place in 1402. Robert, to guard against the ambitious designs of the duke of Albany, sent his son, James, to France; but the young prince was taken prisoner by the English on his way, and his father died, broken-hearted, in 1406.

ROBERT GUISCARD. [GUISCARD.] ROBERT, HUBERT, an eminent French painter, was born at Paris, in 1733. He resided in Italy 12 years, and during that time he made numerous admirable drawings both of scenery and ancient monuments. On his return to France he obtained admission into the Academy, but at the revolution he was released. When he obtained his release he was appointed keeper of the Museum of the Louvre, and continued in the exercise of his profession until his death, in 1808.

ROBERT, JAMES, French painter, born in Neuchâtel, in 1794. He studied at Paris under the engraver Girardet and the painter David, and after supporting himself a while by portrait painting, he went to Italy. He was an unwearied worker, produced few pictures, and seldom satisfied himself. But his works at length attracted attention, and brought him friends and patrons. Among his best productions are the "Moissonneurs," the "Improvvisatore Napolitano," the "Madonna dell' Arco," and the "Pêcheurs de l'Adriatique." He spent his latter years at Venice, where a love-cross threw him into a hopeless melancholy, and he killed himself, March 20, 1835.

ROBERTS, DAVID, an eminent painter, was born at Edinburgh in 1795. He began life as a house-painter, then became a scene-painter, and was associated in London with

Clarkson Stanfield, who remained his friend through life. He first exhibited in the Royal Academy, London, in 1826; soon after visited Spain, and published a volume of "Spanish Sketches;" became a member, and then vice-president, of the Society of British Artists; and in 1811 was chosen R.A. The fruits of a long visit to the East appeared in 1842, in his splendid work, entitled "The Holy Land, Syria, Idumen, Arabia, Egypt, and Nubia," in four vols. folio. Among the very numerous paintings which he subsequently exhibited, are—"Outer Court of the Temple of Edfou," "Temple of Denderah," "Thebes," "Entrance to the Crypt, Roslyn Chapel," "Ruins of the Temple of Karnak," "Jerusalem," "Destruction of Jerusalem," and "Rome." He excelled as an architectural painter, and a large proportion of his pictures are ecclesiastical interiors. Broadly treated, rapidly painted, and with no minute finish, his works were very popular, and have fetched high prices. Died at London, November, 1864.

ROBERTSON, PATRICK, an eminent Scottish judge, was born in Edinburgh in 1794. He passed advocate in 1815, and the clearness of his intellect, with his readiness, versatility, wit, and humour, served in no long time to establish him in great practice as well in the Parliament House as at the bar of the General Assembly. But he was no less remarkable in private life for his genial disposition; and he was without a rival in the Scottish metropolis for the same qualities of wit and humour which rendered Theodore Hook the life of London society. He was chosen Dean of the Faculty of Advocates in November, 1842. A twelvemonth afterwards, he was promoted to the bench of the Court of Sessions. In 1848 the students of Marischal College and University of Aberdeen elected him their Lord Rector. He was author of a volume of verse entitled "Leaves from a Journal and other Fragments." Died, 1855.

ROBERTSON, FREDERICK WILLIAM, M.A., Incumbent of Trinity Chapel, Brighton, one of the most suggestive thinkers and eloquent preachers of the age, was born in London, in 1816. He was the son of a soldier, and his earliest associations were with the incidents of a military life at Leith Fort, which gained a powerful fascination over his mind. After studying at the New Academy, Edinburgh, he was bent on being a soldier, and applied for a commission; but yielding to his father's wish, went to Brasenose College, Oxford, to prepare for the church. In 1840 he was ordained; held a curacy at Winchester for a year; went abroad to recruit his health, injured by hard work, and a semi-ascetic life; found, at Geneva, a wife in the daughter of an English baronet; and after his return to England, held a curacy at Cheltenham about five years. He worked with great energy as a clergyman, and found eager listeners among all classes. He continued to be also an earnest student, not of theology alone, but of philosophy, physical science, and political economy. The natural result of his wide and liberal culture, and of his ecclesiastical experience, was a very great change in his mode of thought and way of apprehending the truth which he was set to

preach. He passed through all the agony of doubt; and in the fear and darkness and perplexity that fell upon him for a time he gave up his Cheltenham curacy, and again went abroad for a few months. Returning healthier, and in comparative calmness of mind, he resumed work, first at Oxford, where he spent about two months, and then at Brighton. There, as minister of Trinity Chapel, he laboured for the last six years of his life; and notwithstanding great bodily weakness and the gradual advances of disease of the brain, causing him at times the most fearful sufferings, he never flagged nor failed in energy, nor lacked the cheer of honourable success and hearty public esteem. The impression produced by his preaching was extraordinary; and the high estimate formed by those who heard his "words that burn," is fully justified by his printed sermons, which, rich as they are in genius, truth, and poetic eloquence, are likely to hold a high place in our literature for some time to come. The interest of Robertson's life is very great, and of a kind peculiar to a period of intellectual and religious revolution, such as the present age. A man nobly true, intensely in earnest, heroically brave, and perfectly honest in utterance, yet endowed with a feminine sensitiveness which shrank from publicity, and still more from popularity; totally indifferent to honours and preferences; he started in life with a thorough belief in the traditional dogmas of the Evangelical school, passed through the fiery ordeal of modern doubt, which consumes the worn-out forms and garments of belief, and ended with a firmer faith than ever in the old truth, and with an absorbing love for Christ as the Divine Saviour, the abiding source and substance of truth and life for the world. He died—like Raphael, Byron, William Collins, Mendelssohn, and many another man of genius—at the early age of 37, August 14, 1853. His grave is in a hollow of the Downs he loved so well, and within hearing of the sea. His "Life and Letters," generally edited by Stopford A. Brooke, M.A., appeared in 1865, and have already reached a third edition (March, 1866).

ROBERTSON, WILLIAM, D.D., a celebrated historian, was born in 1721, at Borthwick or Edinburgh, where his father was minister. Having completed his theological studies at Edinburgh, he obtained a licence to preach, and in 1743 was presented to the living of Gladsmuir, in East Lothian. He soon became distinguished by his eloquence as a preacher; but it was not till 1759 that, by his "History of Scotland," he acquired a place among British classical writers. The distinction he acquired by this work, which reached a fourteenth edition before his death, appeared in his successive preferences. He became chaplain of Stirling Castle in 1759, king's chaplain in 1761, principal of the university of Edinburgh in 1762, and historiographer royal of Scotland in 1764. At the head of a flourishing seat of education, he was minutely attentive to all its duties; and co-operated with the greatest liberality in all the improvements which have raised Edinburgh to its present celebrity. Yet notwithstanding his numerous pursuits and

official avocations, he found time to write his celebrated "History of Charles V.," which, in 1777, was followed by the "History of America;" and his last publication was "An Historical Dissertation concerning the Knowledge which the Ancients had of India." He died in 1793. As an historian, Dr Robertson is admired for luminous and skilful arrangement, graphic description, and a singularly perspicuous style.

ROBESPIERRE, FRANÇOIS MAXIMILIEN JOSEPH ISIDORE, one of the most violent of the French revolutionists, was the son of a counselor at Arras, and was born in 1759. After completing his studies at the college of Louis le Grand, at Paris, he adopted the law as a profession, and distinguished himself as an advocate. At the convocation of the States-general, in 1789, Robespierre was chosen deputy, and spoke for the first time, in the Constituent Assembly, on the 17th June. He joined the Jacobin Club, and soon became one of its most influential members. His voice was raised against martial law, against the frequent punishment of death, and against slavery; and so invincibly appeared to be his justice and integrity, that he obtained the title of "*The Incorruptible*." The flight of the king in 1791 gave Robespierre an opportunity of announcing clearly his republican views. In June of that year he was named Public Accuser, an office which he held till April, 1792. He took no active part in the attack on the Tuilleries in the following August, nor did he sanction the September massacres. He was named deputy for Paris to the National Convention, and was almost immediately accused by Hebequi and Barbaroux of aiming at the dictatorship, but he successfully resisted them. In the discussions respecting the fate of the king he vehemently demanded his death, even without the form of a trial, as already condemned by the people. Robespierre was at this time one of the chiefs of the party named the Mountain, who were earnestly opposed by the Girondists. The influence of Robespierre prevailed, and the Girondists perished by the guillotine at the close of May, 1793. He had now virtually the power of a dictator, for in the Jacobin Club, in the Commune of Paris, in the Committee of Public Safety, and in the Convention, he was supreme. The "Reign of Terror" had begun. Danton was sacrificed and the anarchists who followed Hébert, and now the dictator set himself to the establishment of a new worship. The convention decreed "the Existence of the Supreme Being," and on the 8th of June, 1794, Robespierre, in person, celebrated what he impiously termed "The Feast of the Supreme Being." But, powerful and secure as he appeared, his tyranny and mysterious denunciations had alarmed many of those who had been most intimately connected with him, and a conspiracy was formed for his destruction. Instead of acting with his accustomed decision, he secluded himself for more than a month; and when he again made his appearance in the National Convention, Tallien and others openly accused him; and amidst cries of "à bas le tyran," he, with his brother, and his friends St Just, Couthon, and Le Bas, were arrested and sent

to the Luxembourg; however, he was conducted to the Paris, where he national guard, to receive him. proceeded to a commissaires Paris, seized the clates; and he with apparent in provided a pair with one of the other, put the tending to blow only fractured his day, July 29, 1794, guillotined. The revolution of 9 close of the Reign of Robespierre is only pronounced. But the lapse of agitation of terror possible to be committed that, which qualities are scarce has seemed worse guilty of all the some of his cruelty; the text during his retirement and purpose to p Robespierre "had Lewes.

to the Luxembourg prison. In the night, however, he was set free by the keeper, and conducted to the hall of the Commune of Paris, where Henriot, commander of the national guard, and others were waiting to receive him. Meanwhile his enemies proceeded to action. Barras and other commissioners, directing the military of Paris, seized the fallen tyrant and his associates; and he entered his solitary room with apparent indifference. Le Bas, having provided a pair of pistols, killed himself with one of them; and Robespierre, taking the other, put the muzzle to his mouth, intending to blow out his brains, but the ball only fractured his lower jaw. On the next day, July 28, 1794, he and his associates were guillotined. The fall of Robespierre is the revolution of 9th Thermidor. It is the close of the Reign of Terror. The name of Robespierre is abhorred. For long it was only pronounced with shrieks and curses. But the lapse of time has culmed the natural agitation of terror and hate, and made it possible to be fair to him. It is now admitted that, while good qualities and great qualities are scarcely discernible in him, he has seemed worse than he was. He was not guilty of all the atrocities charged on him; some of his colleagues surpassed him in cruelty; the terror became more terrible during his retirement; and it was his hope and purpose to put an end to it. A "Life of Robespierre" has been written by Mr G. H. Lewes.

ROBIN HOOD, a celebrated English outlaw in the 13th century—whose personal courage, skill in archery, boldness of enterprise, and generous disposition, have rendered his name famous in the legendary history of our country—lived in Sherwood Forest, in Nottinghamshire. The heads of his story, as collected by Stowe, are briefly these:—"In this time (about the year 1190, in the reign of Richard I.) were many robbers and outlaws, among whom Robin Hood and Little John, renowned thieves, continued in the woods, despoiling and robbing the goods of the rich. They killed none but such as would invade them, or by resistance for their own defence. The said Robin entertained 100 tall men and good archers, with such spoils and thefts as he got, upon whom 400 (were they ever so strong) durst not give the onset. He suffered no woman to be oppressed, violated, or otherwise molested; poor men's goods he spared, abundantly relieving them with that which by theft he got from abbeyes and the houses of rich old carles." Robin Hood was the hero of many popular stories, songs, and ballads, a collection of which was published by Ritson in 1795. In modern times he has been the subject of many curious speculations and controversies, his existence even being doubted by some critics. A bold defence of the substantial historical truth of his story has been made by Hunter the antiquary; to whom those will be grateful who would rather not see all old popular beliefs swept away by the remorseless tide of criticism. He died in 1247.

ROBIN, JEAN, a celebrated French botanist, to whose care the Jardin des Plantes,

at Paris, was first confided. Born, 1650; died, 1697.

ROBINS, BENJAMIN, an English mathematician of great genius and eminence, was born at Bath, in 1707; was a teacher of mathematics, became engineer-general to the East India Company, wrote "New Principles of Gunnery," and was the real narrator of Lord Anson's "Voyage round the World," though it was published under the name of Walter. Died, 1751.

ROBINSON, EDWARD, the distinguished American philologist and biblical scholar, was born in Connecticut, U. S., 10th April, 1794. His father, William Robinson, was pastor and farmer at Southington above forty years, and the son worked on the farm in his boyhood. He studied at Hamilton College, and graduated in 1816 with the highest honours. Continuing diligently his studies, he became associated, in 1822, with Professor Stuart at Andover in preparing a new edition of his Hebrew Grammar, and soon after was appointed assistant instructor in Sacred Literature, a post which he filled for four years. He visited Europe in 1828, studied at Halle under Gesenius, Tholuck, and other scholars, and at Berlin, where he enjoyed the society of Neander, Hengstenberg, and O. von Gerlach. On his return to America, in 1830, he was appointed Professor Extraordinary of Biblical Literature at Andover, where in the following year he established the "Biblical Repository," which he edited four years. In consequence of failing health he removed in 1834 to Boston, still devoting himself to work in his chosen field. He was chosen, in 1837, Professor of Biblical Literature in the Union Theological Seminary of New York, but before entering on his new office visited Palestine for the purpose of geographical exploration, and then spent two years at Berlin in the preparation of his "Biblical Researches in Palestine," which appeared in 1841. It gained him a European reputation, and also, by its courageous disregard of ecclesiastical traditions, provoked much bitter controversy. He received one of the gold medals of the Royal Geographical Society of London, and was created D.D. by the university of Halle. He visited Europe again in 1851, and Palestine in 1852. The latter years of his life were devoted to the preparation of a great work on the Physical and Historical Geography of Palestine, the only completed portion of which has appeared this year (1865). Dr Robinson was author of the well-known "Greek and English Lexicon of the New Testament," the first edition of which appeared in 1836, and a second, revised, in 1850. He published translations of Wahl's "Clavis Novi Testamenti," Buttman's "Greek Grammar," and Gesenius's "Hebrew Lexicon," of which five editions have appeared. He originated the "Bibliotheca Sacra" in 1843, and published a "Harmony of the Four Gospels" in Greek in 1845. His name is held in high honour as one of the soundest and most accomplished scholars of his age. Died at New York, 23th January, 1863. In 1828 Dr Robinson married for his second wife Teresa, daughter of Professor von Jacob of Halle, who has

distinguished herself as a writer under the assumed name of "Talvi."

ROBINSON, JOHN, the distinguished Puritan minister, sometimes called the Father of Independency, was born, probably in Lincolnshire, in 1575. At the age of 17 he entered Cambridge university, and was greatly influenced during his residence there by the preaching of several Puritan clergymen. On quitting the university he appears to have officiated as a clergyman in the neighbourhood of Norwich, without however taking full orders. Suspended by the bishop, he withdrew to Norwich, and there gathered a congregation, who became deeply attached to him. After a period of grave and painful mental conflicts, he felt it his duty to separate from the church of England; and in 1604 he left Norwich, gave up his fellowship at Cambridge, and settled in Lincolnshire. He became assistant and then sole pastor of a church at Scrooby, a village in Nottinghamshire, near the borders of Yorkshire and Lincolnshire; and when persecution dispersed the separatists he escaped, with the remnant of his church, in 1608, to Amsterdam. In the following year he removed to Leyden, and there collected and ministered to a congregation of fellow-exiles; attended lectures at the university, and became some years later a member of it; and took a zealous part on the Calvinist side in the great controversy which led to the Synod of Dort. A desire grew up among these exiles to remove to the New World, and permission was obtained for them to settle in Virginia. Accordingly on the 22nd July, 1620, the embarkation of the "Pilgrim Fathers" took place, at Delft Haven; a solemn service having been held on the previous day. They sailed in the "Speedwell" for Southampton, where the "Mayflower" was awaiting them. Robinson remained at Leyden with those who deferred their voyage till the roughest pioneering work should be done. He hoped then to follow with their wives and children. But early in 1625 he fell ill with an "inward ague," and died at Leyden, on the 1st of March. His remains were interred in a hired grave in St Peter's church, the oldest in Leyden; the members of the university and the ministers of the city attending his funeral. A collected edition of the works of John Robinson appeared in 1851, in 3 vols: 12mo, with a Memoir, embodying the scattered and very scanty materials for his biography, by Robert Ashtun. Among these works are—"A Justification of Separation from the Church of England," "Of Iteligious Communion," an "Apology for Certain Christians no less contumeliously than commonly called Brownists or Barrowists," a "Defence of the Doctrine propounded by the Synod of Dort," "Essays, or Observations Divine and Moral," &c.

ROBINSON, RICHARD, archbishop of Armagh and Baron Rokeby, was born in Yorkshire, in 1709, and died 1794. The archbishop, besides building a palace at Armagh, with an observatory, founded a school and a public library there, which last he furnished with a large collection of books, and left a liberal endowment for its support.

He also erected four new churches in his diocese.

ROBINSON, THOMAS, an English naturalist, was an episcopal clergyman, and held the rectory of Ousley, in Cumberland, where he died in 1719. His long residence in a mountainous and mineral district led him to turn his attention to the study of mineralogy, geology, &c. He wrote an interesting "Essay towards a Natural History of Westmoreland and Cumberland," &c.

ROBISON, JOHN, an eminent mathematician, professor of natural philosophy at Edinburgh, was born at Bognhil, in Strathshire, in 1739; was educated at Glasgow; became director of the marine cadet academy at Cronstadt, in Russia; and on his return to his native country, was appointed professor of natural philosophy at Glasgow, from whence he removed to Edinburgh, where he died in 1805. Dr Robison published "Elements of Mechanical Philosophy," several articles in the Encyclopædia Britannica, &c.

ROB ROY, or ROBERT THE RED, was a celebrated Highland freebooter, whose true name was Robert Macgregor, but who assumed that of Campbell, on account of the outlawry of the clan Macgregor by the Scotch parliament, in 1662. He was born about 1660, and was the younger son of Donald Macgregor of Glengyle, said to have been a lieutenant-colonel in the service of James II., by his wife, a daughter of Campbell of Glenfalloch. Like other Highland gentlemen, Rob Roy was a trader in cattle previous to the rebellion of 1715, in which he joined the adherents of the Pretender. On the suppression of the rebellion, the duke of Montrose, with whom Rob Roy had previously had a quarrel, took the opportunity to deprive him of his estates; and the latter began to indemnify himself by a war of reprisals upon the property of the duke. An English garrison was stationed at Inveranald, near Aberfoyle, the residence of Rob Roy; but his activity and courage saved him from the hands of his enemies, from whom he continued for some time to levy black mail. The time of his death is uncertain, but he is known to have survived the year 1733, and died at a very advanced age. The story of Rob Roy furnished Scott with the theme of one of his most fascinating novels.

ROBSON, GEORGE FENNEL, an eminent draughtsman and landscape painter in water-colours, was born at Durham; and as he showed a decided taste for the art while a mere child, he was placed under the tuition of Mr Itard, a drawing-master in that city. His progress was rapid; and before he attained the age of 20 he visited London, where his talents soon became known. His first publication was a view of his native city, the profits of which enabled him to undertake a long tour in the Scottish highlands. On his return to London, where he took up his future residence, he published "Outlines of the Grampian Mountains." One of his last and best pictures was a "View of London Bridge before Sunrise." He died in 1833. Among the engravings and published works of Robson may be men-

tioned, "Cities," w Britton, T tions of the Findex

tioned, "Picturesque Views of English Cities," with descriptive letter-press by J. Britton, F.S.A.; and "Landscape Illustrations of the Waverley Novels," engraved by the Findens.

ROBY, JOHN, whose varied acquirements and benevolent disposition gained him extensive fame, was long a banker at Rochdale, in Lancashire, the "Traditions" of which county he made known to the world in two works, published respectively in 1829 and 1831. His first literary production was "Sir Bartram," a poem in six cantos, published in 1815; and his last was his "Seven Weeks in Belgium, Switzerland, Lombardy, &c.," the fruit of a tour made in 1838. But besides conducting an extensive business, and engaging in literary pursuits, Mr Roby delivered lectures on various subjects of literature and science. His active career was cut short by the calamity which befell the "Orion," on her passage from Liverpool to Glasgow, June 17th, 1850.

ROCCA, ANGELO, a learned ecclesiastic, born at Rocca Contrata, in the march of Ancona, in 1545. He studied at Rome, Venice, and Padua; and in 1579 obtained a place in the Vatican, where also he had the superintendance of the apostolic press. His works display great learning, and chiefly relate to morals and history. At his death, in 1620, he left his valuable library to the Augustinian monastery at Rome, on condition that it should be accessible to the public.

ROCHAMBEAU, JEAN BAPTISTE DONATIEN DE VIMEUR, Count de, marshal of France, was born at Vendome, in 1725, and entered the army at the age of 16. In 1746 he became aide-de-camp to Louis Philippe, duke of Orleans; and afterwards obtaining the command of the regiment of La Marche, distinguished himself at the battle of Lafeldt, where he was wounded; obtained fresh laurels at Crevelt, Minden, Corbach, and Clostercamp; and, having been made lieutenant-general, was, in 1780, sent with an army of 6000 men to the assistance of the United States of America. Having embarked in Rhode Island, he acted in concert with Washington, first against Clinton, in New York, and then against Cornwallis. Rochambeau was raised to the rank of marshal by Louis XVI., and, after the revolution, he was appointed to the command of the army of the north; but he was superseded by more active officers, and, being calumniated by the popular journalists, he addressed to the Legislative Assembly a vindication of his conduct. A decree of approbation was consequently passed in May, 1792, and he retired to his estate, near Vendome, with a determination to interfere no more with public affairs. He was subsequently arrested, and narrowly escaped death under the tyranny of Robespierre. In 1803 he was presented to Buonaparte, who granted him a pension, and the cross of grand officer of the Legion of Honour. His death took place in 1807; and his "Mémoires" were published in 1809.

ROCHEFOUCAULD. [LA ROCHEFOUCAULD.]

ROCHESTER, JOHN WILLIAMS, Earl of, a

witty and profligate nobleman of the court of Charles II., was born in 1648, and, on the death of his father, succeeded to his titles and estates, the latter of which, by extravagance, he soon dissipated. He became the personal friend and favourite of his sovereign, who is said to have encouraged and shared many of his exploits. The levity of his disposition frequently brought him into disgrace, and he was more than once forbidden the royal presence; his companionable qualities, however, which made him necessary to the amusement of his master, prevented his occasional exile from being ever of long continuance. His constitution at length gave way under such excesses; and, at the age of 30, he was visited with all the debility of old age. He lingered for some time in this condition, and died, professing great penitence for his dissipated life, in 1680. His satirical poems are keen, but their obscenity and impiety render them alike dangerous and disgusting.

ROCKINGHAM, CHARLES WATSON WENTWORTH, Marquis of, a British statesman, born in 1730, succeeded his father in his titles and estates in 1750, and in 1765 became first lord of the treasury. American affairs formed at that time a leading subject of discussion; and Rockingham took the middle way, by repealing the stamp act, and declaring the right of Great Britain to tax the colonies. He was, therefore, deserted by some of his supporters, and retired from the ministry in 1766. He afterwards acted in concert with Chatham, in opposition to the ministry of Lord North; on the fall of which, in 1782, he was again placed at the head of the administration, but died in the same year, and was succeeded by Lord Shelburne.

RODNEY, GEORGE BRYDGES, Lord, a gallant English admiral, born at Walton-on-Thames, in 1718, was the son of Captain Henry Rodney, a naval officer, who, at the time of his son's birth, was commanding the yacht in which the king, attended by the duke of Chandos, used to pass to and from Hanover; hence he was christened George Brydges, the names of his royal and noble god-fathers. He entered the navy early in life, and obtained the command of a ship in 1742. In 1749 he was appointed governor of Newfoundland; and on his return, in 1753, married the sister of the earl of Northampton. In 1759 he was made admiral of the Blue; and in the same year he destroyed the stores prepared at Havre de Grace for an invasion of England. In 1761 he served on the West India station with such activity, that at the conclusion of the war he was made a baronet. In 1768 he was elected into parliament for Northampton; but the contest ruined his estate, and he found it necessary to retire to the continent. The French government made some overtures to him, which would have recruited his fortune. These he rejected, and, the fact having transpired, he was placed in command of a squadron destined for the Mediterranean. In January, 1780, he fell in with the Spanish fleet, off Cape St Vincent, and completely defeated it, thus making Gibraltar and Minorca safe for some time;

went next to the West Indies, where he had Sir Samuel Hood for second in command; took the Dutch settlement of St Eustatia; and on the 12th of April, 1782, obtained a decisive victory over the French fleet under de Grasse, capturing his flag-ship, *Ville de Paris*, with seven others, and sinking one of his largest vessels. The *Ville de Paris* was soon after lost in a storm. A barony and a pension of £2000 were bestowed upon him for his services; and on his decease, in 1792, a monument was voted to his memory, at the national expense, in St Paul's cathedral. The celebrated manœuvre of breaking the line is usually said to have been first adopted by Rodney. In the battle of 12th April, 1782.

RODOLPH I., emperor of the West, and founder of the imperial house of Austria, was born in 1218, being the eldest son of Albert IV., count of Hapsburg and landgrave of Alsace. He first served under Ottoear, king of Bohemia, against the Prussians, and distinguished himself by his prudence, valour, and the spirit of justice with which he protected the inhabitants of the towns from their baronial oppressors. In 1273, as he was encamped before the walls of Basel, he received the unexpected intelligence that he was elected king of the Romans and emperor, in preference to Alphonso, king of Castile, and Ottoear, king of Bohemia, the latter of whom opposed his election, and refused to do homage for his estates. But Rodolph, supported by powerful allies, made war on him, and compelled him to submit. Ottoear afterwards made another attempt to recover what he had lost, but in August, 1278, was defeated and slain. After a reign of 19 years Rodolph expired, in 1291, aged 72. He was brave, indefatigable, affable, magnanimous, intelligent, and just.

ROE, Sir THOMAS, an able statesman and diplomatist, was born about 1580, at Low Layton, in Essex, and educated at Magdalen College, Oxford. In 1604 he was knighted, and soon after went to make discoveries in America. In 1615 he was sent on an embassy to the Great Mogul, Shah Jehan, at whose court he remained three years. Of this embassy he left an interesting account. In 1621 he went in the same capacity to the Grand Seignior; in which post he continued under Osman, Mustapha I., and Amurath IV. During his residence there, he collected a number of manuscripts, which he presented to the Bodleian library, and also brought over the Alexandrian M.S. of the Greek Bible, as a present to Charles I., from Cyril, patriarch of Constantinople. In 1629, Sir Thomas negotiated a peace between Poland and Sweden; and it was by his advice, that Gustavus Adolphus entered Germany as leader of the Protestants in the Thirty Years' War. After the victory of Leipsic, the king sent him a present of £2000. In 1640 he was chosen to represent the university of Oxford in parliament. The next year he was sent ambassador to the diet of Ratisbon, and on his return was made chancellor of the Garter and privy-councillor. Died, 1641.

ROEDERER, PIERRE LOUIS, Count, French statesman and political writer, was born at Metz, in 1754. He became counsel-

lor of the parliament of Metz at the age of 25, deputy to the States-general in October, 1789, and member of the Jacobin Club. On its division in July, 1791, he joined for a short time the new club of the "Fecullants," but returned to the Jacobins, and was named Syndic of the department of the Seine. He was sent for by the king during the attack on the Tuilleries of 1792, and was consulted on the measures to be taken. It was by his advice that Louis XVI. with his family went to the National Assembly, never to enter the Tuilleries again. With his usual caution he kept himself in retirement during the Terror, appeared afterwards as the defender of the emigrants, and contributed with Talleyrand to the revolution of the 16th brumaire. He was consulted by Napoleon when first consul, made successively councillor of state, president of the section of the Interior, director of Public Instruction, senator, and commander of the Legion of Honour. He assisted Joseph Buonaparte in the organization of the kingdom of Naples, and was appointed his minister of finance. He soon returned to France, and was loaded with honours and offices. After the fall of Napoleon, he remained in retirement till the revolution of July, 1830, entered the Chamber of Peers two years later, and died at Paris, in December, 1835. His "Opuscules mêlés de Littérature et de Philosophie" appeared in 1802-1804. Among his later writings are, "Chronique de 50 Jours, du 20 Juin au 10 Aout 1792;" "L'Esprit de la Révolution de 1789;" and "La Première et la Seconde Année du Consulat de Buonaparte."

ROELAS, JUAN DE LAS, a great Spanish painter, born at Seville, about 1560. He probably studied painting in Italy, and afterwards returned to his native country, residing chiefly at Seville and Madrid, in which cities are many of his works. The most celebrated are "Death of St Isidore," "St Iago," "Holy Family with Jesuits," "The Conception," and "The Nativity." Roelas excelled in composition and in colouring, and his style appears to have been formed on that of Titian. Died at Olivares, 1625. Roelas was the master of Zurbaran.

ROEMER, OLAVUS, a Danish astronomer, was born at Arhusen, in Jutland, in 1644. He studied at the university of Copenhagen, where he applied so diligently to the mathematics, that he was appointed tutor to the dauphin of France. In 1681 he returned to his native place, and held several considerable offices previous to his decease, which took place in 1710. He made many scientific discoveries, the most important of which was that of the velocity of light, from the observation of the eclipses of Jupiter's satellites. Roemer invented the Transit Instrument, about 1690. It was first used in Greenwich Observatory about 30 years later.

ROGER I., conqueror and Count of Sicily, was the youngest of the twelve sons of Tancred of Hauteville, and joined his brother Robert Guiscard in Italy, about 1058. He was distinguished by a noble and graceful figure, heroic courage, and great eloquence. He assisted Robert in the completion of the conquest of Calabria, and in 1061 passed

Metz at the age of general in October, Jacobin Club. On 31, he joined for a of the "Feuillants," and was named of the Seine. He g during the attack and was consulted. It was by his with his family Assembly, never to ia. into Sicily, which had been held by the Mus- sulmans for 200 years. The conquest of the whole island was only effected after almost continual war for about thirty years; Pa- lermo was besieged in August, 1071, and taken early in 1072; and Roger was then in- vested with the government under the title of Count. Syracuse fell in 1088, and Girgenti in the following year. Roger governed Sicily with much wisdom, and re-established the Christian religion there; zealously sup- ported the party of the pope against the emperor; detached Sicily from the Greek church, and brought it under the jurisdiction of Rome, and for his services the pope, Ur- ban II., created him and his successors le- gates apostolical in Sicily. Roger married three wives successively, but had sons only by the third, Adelaide, niece of the marquis of Montferrat. His daughters formed illus- trious alliances, and his sons succeeded him as counts of Sicily. Roger I. died in 1101.

ROGER II., Count, and first king of Sicily, was the second son of Roger I. and Adelide, and was born in 1097. He was proclaimed count on the death of his father, under the regency of his mother, who in 1103 associated with herself in the government Robert of Burgundy, giving him in marriage one of her daughters or nieces. In 1113 Adelaide mar- ried Baldwin, king of Jerusalem, who sought her rich dowry, and after he had got pos- session of it repudiated her, and sent her back to Sicily. She died in 1118. Roger executed his difficult task of governing Sicily, with its mixed population of Mussul- mans and Christians of the Greek and Ro- man churches, with great ability and suc- cess. In 1121 he invaded Apulia, and on the death of his cousin, William, he got himself recognized duke of Apulia and Calabria. This led to war with the pope, Honorius II., who led an army against Roger, and excom- municated him. Their armies lay opposite each other on the river Bradano for forty days, and the pope at last yielded, and in- vested him with the duchies of Apulia and Calabria and Naples. In 1180 Roger espoused the cause of the anti-pope Ana- cletus, whose sister Alberia he had married about ten years before, and received from him the title of the king of Sicily. Naples and Amalfi soon after submitted to him, and he was thus king of the Two Sicilies. He assumed the title of king of Italy. He ruled despotically henceforth, and his subjects frequently revolted. In 1137 he was driven from Italy by the Emperor Lothaire, who was urged by St Bernard to suppress the schism in the papacy and restore Innocent II. But Roger recovered his dominions as rapidly as he had lost them. Negotiations and war followed, and in July, 1139, the pope was taken prisoner by Roger, but was treated with all honour. Peace was made, the pope annulled all excommunications against Roger, and recognized his title of king. Roger was afterwards engaged in a career of conquest on the coasts of Africa and in Greece. One of his admirals, in 1149, re- scued Louis VII. of France, then a prisoner in the hands of the Greeks, and Roger gave him a magnificent reception at Potenza.

Died, 1154, and was buried in the cathedral of Palermo.

ROGERS, JOHN, an eminent English divine of the 16th century, was educated at Cambridge, and became chaplain to the fac- tory at Antwerp, where he assisted Tindal and Coverdale in translating the Bible into English. In the reign of Edward VI. he re- turned to England, and obtained a prebend in St Paul's cathedral. He was the first person executed in the succeeding reign on the score of his religion, being burnt at Smithfield, in 1555.

ROGERS, JOHN, a celebrated divine, was born at Ensham, in Oxfordshire, in 1679, and educated at Corpus Christi College, of which he became a fellow. He wrote an able treatise on the "Visible and Invisible Church of Christ," against Hoadly; 4 vol- umes of Sermons," and an "Answer to Collins' Scheme of Prophecy." Dr Rogers obtained the living of St Giles's, Cripplegate, and died in 1729.

ROGERS, SAMUEL, the poet and connois- seur, was born at Stoke Newington, near London, in 1762. His father was a banker, and the poet, after a careful private educa- tion, was introduced into the banking estab- lishment, in which he remained a partner through life. The perusal of "Beattie's Min- strel," when he was nine years of age, first gave him the desire of becoming a poet. When he was in his fourteenth year, his boy- ish enthusiasm led him to wish for an inter- view with Dr Johnson, and it is said that he twice presented himself at the door of Johnson's well-known house in Bolt Court, Fleet Street; but on both occasions he fail- ed in his object. Mr Rogers appeared as author of "An Ode to Superstition, and other poems," in 1786, the year of the first appearance of the poems of Robert Burns. In 1792 he produced "The Pleasures of Memory," with which his name is most fre- quently associated. In 1812 he published "The Voyage of Columbus," a fragment; in 1814, "Jacqueline," a tale; in 1819, "Human Life;" and in 1822, "Italy," a descriptive poem in blank verse. His collected works have been published in various forms, one edition containing vignette engravings from designs by Stothard. His wealth enabled him to cultivate his favourite tastes, to en- rich his house in St James's Place with some of the finest and rarest pictures, busts, books, and gems, and to entertain his friends with the most generous hospital- ity. His conversation was rich and vari- ous, abounding in wit, shrewd observa- tion, and interesting personal anecdote, specimens of which may be seen in the "Table Talk," published by Mr Dyce. He was familiar with almost every distinguish- ed contemporary author, orator, and artist, and many works were dedicated to him as memorials of friendship or admiration. His benevolence was equal to his taste; his bounty soothed and relieved the last days of Sheridan, and was exerted to a large extent in behalf of suffering or friendless talent. An interesting volume, entitled "Recollec- tions by the late Samuel Rogers, Esq.," has been published since his death. Died, 1855.

ROGERS, WOODS, an English circumnavigator, who was serving in the royal navy in 1708, when he was invited by the merchants of Bristol to take the command of an expedition to the South Sea. He set sail with two vessels, taking out Dampier as a pilot. Passing to the south of Terra del Fuogo, in January, 1709, they entered the Pacific Ocean, and in February arrived at the Isle of Juan Fernandez, where they found Alexander Selkirk; they then visited the coast of California, crossed the Pacific, and returned to England in October, 1711. Captain Rogers was afterwards employed with a squadron to extirpate the pirates who infested the West Indies. Died, 1732.

ROHAN, HENRI, Duke of, a very distinguished peer of France, born in 1579. After the death of Henry IV., in 1610, he became the chief of the Huguenots; and having ably maintained three wars against Louis XIII., procured a peace upon advantageous terms, 1629. He distinguished himself also as a political writer, but at length died of wounds received at the battle of Rhinfeld, in 1638. Among his works are, "Memoirs on French Affairs," "The Perfect Captain," and "Memoirs relative to the War of the Valtelline," 3 vols.—His widow, **MARGUERITE DE BETHUNE**, daughter of the great Sully, was a courageous woman, and defended Castres against Marshal de Themines. Died, 1660.—**ANNE ROHAN**, sister of the duke, was distinguished by her spirit, learning, and piety. At the taking of Rochelle, she and her mother refused to be included in the capitulation, and were made prisoners of war. Died, 1646.

ROHAN, LOUIS RENÉ EDOUARD, Prince de, cardinal, archbishop of Strasburg, was born in 1734. He became coadjutor to his uncle in the see of Strasburg, and afterwards his successor; was sent in 1772 ambassador to Vienna, where he displayed the most ridiculous luxury, but vainly sought to obtain the favour of the Empress Maria Theresa. As coadjutor, he had ceremonially received the Princess Marie Antoinette on her entrance into France. On the death of Louis XV. he returned to Paris, and for ten years bent all his energies and efforts to winning the favour of the queen, but all in vain. Nevertheless, he had meanwhile become, in spite of his known profligacy, archbishop, grand-almoner, cardinal, and commendator of St. Wast of Arras, one of the richest benefices in France. Associate of the quack Cagliostro, and of the infamous Madame Lamotte, he was duped by a forged letter with the signature of the queen, and induced to buy of Boehmer, the court jeweller, the now too celebrated diamond necklace, in the name of the queen. The necklace was placed in the hands of Madame Lamotte, forged autograph messages from the queen followed, and an interview in the park of Versailles, between the cardinal and a fair adventuress personating the queen. On the discovery of the fraud Rohan was summoned before the king, answered vaguely and unsatisfactorily, and was arrested and imprisoned in the Bastille, 15th August, 1785. After a year's proceedings he was acquitted and released, but at the same time

exiled from the court, and deprived of his grand-almonership. He was a deputy to the States-general in 1789; was afterwards accused of various disloyal intrigues and maladministration, gave up his see in 1801, and died in 1803. His character and career are admirably sketched by Crlytic in his Essay on The Diamond Necklace.

ROLAND, PHILIPPE DE LAURENT, an eminent French sculptor, was born near Lille, in 1746, and after studying at Rome, acquired great reputation in Paris. He became member of the Institute, professor at the Academy of Painting and Sculpture, and was employed five years in the palace of the Luxembourg and the Tuilleries. One of his best works is the statue of Homer. Died, 1816.

ROLAND DE LA PLATRIERE, JEAN MARIE, a French statesman of the revolution, was born near Lyons in 1732. He obtained an appointment as inspector-general of manufactures at Amiens, and married, in 1780, Jeanne Philpon, afterwards so distinguished as **MADAME ROLAND**. He travelled with her in Italy, Switzerland, and in 1784 in England, and afterwards removed to Lyons, where he held the office of inspector of commerce and manufactures at the outbreak of the revolution. He was engaged at the same time in preparing a Dictionary of Manufactures for the new *Encyclopédie*. He and his wife enthusiastically welcomed the promise of the new epoch; and in February, 1791, he was sent to Paris as deputy extraordinary to the Constituent Assembly, Madame Roland accompanying him. He was occupied in arranging the municipal affairs of Lyons with the committees of the Assembly, and at the same time made acquaintance with Pétion, Buzot, Robespierre, and other popular leaders, who spent four evenings in the week at his house. After a stay of seven months in Paris, he returned to Lyons, where he founded a Jacobin club. After the abolition of his king's inspectorship he again went to Paris, February, 1792; to claim his retiring pension; to renew intercourse with the patriot leaders, and to finish and publish his book. His wife was with him, and they on this visit first met the brave young Barbaroux. On the formation of a patriot ministry, in March, Roland was named minister of the interior, on which occasion he astonished the court usher by appearing at a reception without buckles to his shoes. He applied himself diligently to the duties of his office, guided, however, both in speech and action by the genius of his wife. In consequence of a very plain-spoken "Letter to the King," written in fact by Madame Roland—he, with the rest of the ministry, was dismissed. Recalled after the events of the 10th August, he struggled conscientiously against the lawlessness and violence of the time, but his influence declined with that of the whole moderate (Girondist) party, the September massacres took place, and the day after his execution of Louis XVI. he resigned his office. On the fall of the Girondists, in June, 1793, Roland fled, no one knew whither; his wife was arrested. He found

ROLAND, MANON JEANNE PHILIPON
(MADAME ROLAND), wife of the preceding,
was born at Paris in 1754. She was the
daughter of an engraver; received a good
education, and made extraordinary progress
in her studies, and early gave proof of great
ability and energy of character. At nine
years of age she pored with enthusiasm over
Plutarch's Lives, and wished she had lived
in the days when heroes lived. Soon re-
ligious feelings became predominant, and
she desired to enter a convent, which she
did for a time as pensionary. On the death
of her mother, in 1775, she divided her time
and attention between the house affairs and
her favourite studies and readings. In 1780
she married M. Roland, who was by twenty-
two years her senior. She travelled with
him, entered with sympathy into all that
engaged and interested him, and welcomed
the revolution with passionate joy. She
assisted him in editing the "Courier de
Lyon," and contributed to it a narrative of
the Federation of Lyons, of which 60,000
copies were sold. She accompanied her
husband to Paris in 1791, frequented the
sittings of the Assembly and the Jacobin
Club, and exercised a marked influence on
the leading men and political affairs. On
his second visit she was again with him,
and so great was her influence that it was
said she was minister of the interior. "Se-
reane and queenly" she was in the saloons
once occupied by Madame Necker, "as in
her own hired garret of the Ursullines con-
vent." The course of events soon excited
in her painful misgivings. In January,
1793, she was accused as a spy, and summoned
before the Convention; but with few words
completely cleared herself. Seeing the
hopeless decline of the Girondist party, she
urged M. Roland's resignation, and after
the destruction of that party, 31st May,
favoured his flight, which, however, she
would not share. She was arrested and im-
prisoned in the Abbaye the day he fled, and
after five months' confinement, during which
she wrote her remarkable and well-known
"Memoirs," distinguishing herself to the
last by a sublime calm courage, she perished
by the guillotine, 8th November, 1793. She
left one child, a daughter, for whose benefit
she wrote some counsels in her prison. [See
also preceding Notice.]

ROLLE, DENNIS, a native of Devonshire,
who professed to trace his descent from Rollo,
first duke of Normandy. In 1766 he purchased
a whole district in Florida, whither he pro-
ceeded with a thousand persons to people his
new possessions; but through the unhealthi-
ness of the climate, and the desertion of those
who escaped disease, he soon found himself
without colonists and without money; so
that, in order to revisit England, he was
compelled to work his passage back in an
American vessel. He was then satisfied to
live on his paternal estate, had a seat in
the House of Commons, and filled the office
of sheriff for the county. He devoted much

of his time to the improvement of the con-
dition of the lower classes. Died, 1797.

ROLLE, HENRY, an eminent lawyer and
judge, was born at Heanton, in Devonshire,
in 1589, and educated at Exeter College,
Oxford; after which he became a student of
the Inner Temple, and was called to the bar.
In 1640 he was made a serjeant-at-law,
and in 1648 he accepted the office of chief
justice of the court of King's Bench. He
wrote "Reports," 2 vols. folio; and "An
Abridgment of Cases and Resolutions of the
Law," which was published by Sir Matthew
Hale.

ROLLI, PAOLO ANTONIO, an Italian poet,
born at Todi, in 1637. He came to England,
and was employed in teaching the children
of George II.; and died at Rome, in 1767.
He published a collection of poems; also
editions of several Italian authors; was the
editor of Marchetti's Lucretius, and the trans-
lator of Milton's Paradise Lost into Italian
verse.

ROLLIN, CHARLES, an eminent historian,
born at Paris, in 1661. He was intended for
business, but his talents obtained the notice
of a learned Benedictine, and he was enabled
to gratify his inclination for learning. After
going through a course of theology at the
Sorbonne, he received the tonsure, and was
twice chosen rector of the university of
Paris. When elected a third time, he was
deprived of his situation by the intrigues of
the Jesuits; but he employed his leisure in
composing his work, "On the Manner of
Studying and Teaching the Belles Lettres,"
4 vols. This was followed by his "Ancient
History" and nine volumes of the "Roman
History." Rollin's works, especially his
"Ancient History," obtained great and
wide-spread popularity. They are written
in a pleasing and attractive style, and nar-
rative is freely interspersed with just moral
reflections, without being burdened with
profound thought. They are entirely un-
critical, and of no value to the student; but
they still find readers, at least in France.
Died, 1741.

ROLLO, or ROLF, the conqueror of Nor-
mandy, was a Norwegian chief, banished
from his country on account, of his piracies,
by Harold Harfager, who conquered Norway
in 870. He first retired with his fleet among
the islands of the Hebrides, whither the
flower of the Norwegian nobility had fled
for refuge when Harold had become master
of the kingdom. He was there received
with open arms by those warriors, who,
eager for conquest, waited only for a chief
to lead them on. In 876 he sailed up the
Seine to Rouen, took the city, the capital of
the province, then called Neustria, twice
defeated Renaud, duke of Orleans, and took
part in many expeditions. So terrible were
the ravages of these Northmen in France,
that the king, Charles the Simple, was glad
to procure peace by the cession, in 911, of
Neustria and Brittany to Rollo, with the
title of duke. Rollo was persuaded to em-
brace Christianity, and was baptized by the
archbishop of Rouen the same year. The
year of Rollo's death is not known. It is
given as 917, 920, and 932. But it is certain
that the last years of his life were spent in

retirement, after he had abdicated the dukedom in favour of his son, William Longsword. This great chieftain was of gigantic size and strength. It is said that he was too big to ride on horseback, and thus acquired the surname of the Walker.

ROMAGNOSI, GIAN DOMENICO, a distinguished Italian publicist and jurist, was born near Piacenza in 1761. He became an advocate, held the office of chief magistrate of the city of Trent, and in 1802, having gained some reputation by his writings, was chosen professor of law at the university of Parma. He took part in revising the criminal code for the kingdom of Italy constituted by Napoleon, and after teaching civil law at the university of Pavia for two years, removed to Milan in 1809 to lecture on Jurisprudence, which he continued to do till 1817. From that time he taught privately, and occupied himself in writing his numerous works. Among them are, "Genesi del Diritto Penale," "Introduzione allo Studio del Diritto Pubblico Universale," "Assunto primo della Scienza del Diritto Naturale," and "Saggio filosofico-politico sull' Istruzione Pubblica Legale." Romagnosi was a member of the Institute of France, and of various Academies. He was an independent thinker, the courageous champion of the principles of true liberty, and his fame has increased with the lapse of time. Died, at Milan, 1835.

ROMAINE, WILLIAM, a popular Calvinistic divine, was born in 1714, at Hartlepool, in Durham, and was educated at Hartford and Christchurch colleges, Oxford. In 1748 he obtained the lectureship of St Botolph, Bishopsgate; the year following he was chosen lecturer of St Dunstan in the West; and, in 1750, he was appointed assistant morning preacher at St George's, Hanover Square. Soon after this he was elected Gresham professor of astronomy, which situation he soon resigned. He obtained such popularity by his opposition to the bill for the naturalization of the Jews, that his publications on that subject were printed by the corporation of London. In 1764 he was elected to the living of St Ann, Blackfriars, where, as well as at St Dunstan's, he continued to officiate till his death, in 1795. Among his works are, "Discourses on the Law and the Gospel," "The Life of Faith," "The Walk of Faith," and the "Triumph of Faith."

ROMANA, DON PEDRO CARO Y SUREDA, Marquis de la, a Spanish general, was born at Majorca, in 1761. He distinguished himself in the campaigns against the French, on the Pyrenean frontier, from 1793 to 1795; and commanded the auxiliary Spanish corps of 14,000 men, which was sent to the north of Germany by Napoleon; but when Spain rose against her oppressor, La Romana, aided by an English squadron, succeeded in embarking his troops from the island of Fuca, and leading them home in safety. During 1809 and 1810 he displayed great talents both as a general and a statesman; and his death, in 1811, was a real loss to his country.

ROMANINO, IL (GIROLAMO ROMANI), an eminent Italian painter, was a native of

Brescia, and was born about 1480. He was the rival of Bonvicino, in Brescia, and is supposed to have imitated the style of Titian and Giorgione. Among his finest works are named a "Descent from the Cross," now in the Berlin Gallery; the "Dead Christ, with Mourners," at Venice; and a "Nativity," in the National Gallery. This master painted as late as 1541, and survived till about 1560.

ROMANO, GIULIO. [GIULIO ROMANO.]

ROMANZOFF, PETER ALEXANDROVICH, Count, a Russian general and field-marshal, was born about 1730, and having entered the army when very young, his courage and abilities soon procured him promotion. He succeeded Prince A. Galitzin, as commander-in-chief against the Turks, in 1770, and obtained many advantages over the enemy in that and the following years, previously to the treaty which he compelled the grand vizier to sign, in his camp at Kainardji, in 1774. He soon after set out for his government of the Ukraine. He was again placed at the head of an army against the Turks, in the war which began in 1787; but being thwarted by Potemkin, he retired in disgust. Died, 1796.

ROMANZOFF, NICHOLAS, Count, son of

the preceding, was born in 1753, entered early on his public career, became privy-councillor, senator, minister of commerce, of war, and, in 1807, minister of foreign affairs. He accompanied his sovereign, in 1808, to the conference, with Napoleon, at Erfurt. He was afterwards employed in several important negotiations, and retired from office in 1814. He had rendered great services to his country by his intelligent promotion of commerce, of education, of literature, and religion. He employed his wealth in erecting churches and schools, and was at the expense of fitting out the expedition of discovery conducted by Captain Kotzebue. The sculptor Canova, a short time before his death, sent him as a present, a colossal statue representing the Goddess of Peace holding the olive branch, and leaning against a pillar, on which is engraved, "Peace of Abo, in 1713; Peace of Kutchuk Kainardji, in 1774; Peace of Fredricksham, in 1809;" these treaties having been severally signed by himself, his father, and his grandfather. Died, 1826.

ROMBOUTS, THEODORE, an eminent Dutch painter, born at Antwerp in 1597, was a pupil of Janssens, and went to Italy in 1617. He soon made himself a reputation, was employed at Florence by the grand-duke, and settled again at Antwerp about 1625. He hoped to equal or surpass Rubens, and did not fall far short of his aim. His best works are those in which he especially competed with Rubens; "St Francis receiving the stigmata," "Sacrifice of Abraham," "Themis with her Attributes," and a "Descent from the Cross," the last-named being in the cathedral of Ghent. Died at Antwerp in 1637 or 1640.

ROMILLY, Sir SAMUEL, a celebrated English lawyer, and M.P. for Westminster (descended from a Protestant family, who left France after the revocation of the Edict of Nantes), was born in London, in 1757,

and placed in the office of a solicitor, which he quitted to study for the bar. Called to the bar in 1783, for some years his practice was chiefly confined to draughts in equity; but he gradually rose to distinction in the court of chancery, and ultimately took the lead, being equally distinguished by profound information and forcible eloquence. His general politics agreeing with those of the Whigs, he was, during the short administration of Mr Fox, in 1806, appointed to the office of solicitor-general, and knighted. He eloquently pleaded the necessity of a revision of the criminal code; and wrote a very able pamphlet, entitled "Observations on the Criminal Law of England." His knowledge of the law, his great talents, and his known integrity, rendered him the highest authority of his time. Grief for the death of his wife brought on a brain fever, and, during a paroxysm, he put an end to his life, Nov. 1818. There is a Life of Sir Samuel Romilly, by his sons.

ROMNEY, GEORGE, an eminent English painter, was born at Dalton, in Lancashire, in 1734. At the age of nineteen he was apprenticed to Stacie, a portrait painter at Kendal; married in 1756, and soon began to paint on his own account. In 1762 he went to London, where he quickly made himself a name, and got full employment as portrait painter. He subsequently spent two years in Italy, and after his return was recognized as the rival of Reynolds and Gainsborough. He lived more than 20 years in Cavendish Square, whence, in 1797, he removed to Hampstead; his wife and family all the while remaining at Kendal, and visited by him only twice during 37 years. In 1799 he returned to them, but soon became imbecile, and died in 1802. Romney was an admirer of Lady Hamilton, and is said to have painted twenty-three portraits of her, in a great variety of characters. One of these, a study for a Bacchante, is in the National Gallery. His portraits of distinguished persons are very numerous, and his poetic and historical compositions are scarcely less so. The latter were very highly praised by Flaxman, who affirmed that few artists since the 15th century had done so much as Romney in so many different branches. Romney's portraits of Flaxman modelling the bust of Hayley, and of Cumber land the dramatist, are in the National Portrait Gallery. He never exhibited at the Royal Academy, and was therefore not a member of that body.

ROMULUS, mythical founder and first king of Rome. According to the legends, he was the son of the vestal Rhea Sylvia, by the god Mars; Sylvia being a daughter of Numitor, rightful heir of the king of Alba, but deprived by his brother. Exposed with his twin-brother, Remus, the babes were suckled by a she-wolf, and afterwards brought up by a shepherd. Their parentage was discovered, and they determined to found a city on the banks of the Tiber, the scene of their exposure. The right to choose the site was acquired by Romulus, and Remus, not acquiescing in his disappointment, was slain. Inhabitants for the new city were found by establishing a refuge for murderers and fugitive slaves on the Capitoline hill,

and by carrying off the Sabine maidens at a feast to which they were invited. This led to war with the Sabines, which ended, through the intervention of the Sabine women, in a union of Romans and Sabines under their two kings, Romulus and Titus Tatius. The latter was soon slain, and Romulus reigned alone. He was regarded as the author of the fundamental division of the people into tribes, curiæ and gentes; and of the institution of the senate, and the comitia curiata. After a long reign Romulus disappeared; taken, it was said, up to heaven in a chariot of fire. The date commonly assigned for the foundation of Rome is B. C. 753.

RONSARD, PIERRE DE, a French elegiac and epigrammatic poet, of a noble family. Born, 1524; died, 1585.

ROOKE, Sir GEORGE, British admiral, was born near Canterbury, in 1650. He entered the navy early, and in 1689 commanded a squadron on the coast of Ireland, to intercept communications with James II. He took part in the engagement with the French fleet off Beachy Head, and, as vice-admiral, in the battle of La Hogue, after which he performed the service of destroying the French ships which had escaped. Soon after he was knighted, and received a pension of £1000 a year. In 1697 he entered parliament as member for Portsmouth, attaching himself to the opposition. The war of the succession recalled him to active naval service, and he commanded, in 1702, a joint English and Dutch expedition against Cadiz; which failing, he co-operated with the duke of Ormond in an attack on Vigo, and destroyed in its harbour the Plate fleet and its French convoy. On his return to England he was made a privy-councillor. His last exploit was the capture, in conjunction with Sir Cloudesley Shovel, of the fortress of Gibraltar, in August, 1704, followed a few days later by a severe and indecisive engagement with the French fleet. His last service was not rewarded by the government, and he spent the rest of his life in retirement. Died at his family seat, near Canterbury, January 24, 1709.

ROOKE, LAURENCE, an eminent geometrical and astronomer, born at Deptford, in Kent, in 1623; became astronomical professor of Gresham College, and was one of the original members of the Royal Society. Died, 1682.

ROSA, SALVATOR, a celebrated painter, poet, and musician, was born near Naples, in 1615. After studying under Fraanzano, and displaying his genius in many studies of wild landscape, he went to Rome. But his taste was formed more from the study of nature among the wilds of the Appennines, than from the lessons of other artists; and he delighted in delineating scenes of gloomy grandeur and magnificence. He also wrote plays, and performed parts in them; besides which he composed many cantatas. He was liberally patronized by the grand-duke of Tuscany, and lived some years at Florence. Salvator executed many pictures for churches; but his principal merit lay in the representation of the wild scenery of nature, storms, &c. Died, at Rome, 1673.

There is one good example of Salvator in the National Gallery—a landscape with Mercury and the Woodman; and many of his pictures are in English collections.

ROSAMOND, usually called Fair Rosamond, was the daughter of Walter de Clifford, baron of Hereford, and the favourite mistress of Henry II. She had two sons by Henry; William, called Long-sword, and Jeffery, who became archbishop of York.

ROSAPINA, FRANCESCO, a celebrated Italian engraver, was born near Rimini, in 1762, and settled at Bologna. Many noble engravings from the old masters owe their existence to his superior skill; but his greatest performance is the work known as the "Gallery of Bologna," of which all the drawings and most of the engravings were executed by his own hand. Died, 1841.

ROSCIUS, QUINTUS, a Roman actor, born near Lanuvium, was so celebrated for his powers of representation, that his name has become the common designation of performers of pre-eminent merit. Roscius enjoyed the friendship of Cicero and Sulla. Died, B. C. 61.

ROSCOE, WILLIAM, an eminent historian and miscellaneous writer, born at Liverpool in 1753. His parents, who were in a humble sphere, gave him the mere rudiments of a common education. Placed very early in a lawyer's office, he found leisure to make himself master of the Latin and Greek languages; and he then went through a course of study of modern languages, reading the best authors in each. On the expiration of his clerkship he entered into partnership with Mr Aspinall, an attorney of considerable practice. But while he strictly attended to his professional duties, he did not lose sight of literature and the arts. In 1773 Roscoe took part in founding at Liverpool a society for the encouragement of the arts of painting and design, and he early gained the friendship of Sir Joshua Reynolds, Fusell, and Mason, the friend of Gray. When the abolition of the slave-trade became a subject of public discussion he warmly interested himself in its success; and his ardent love of liberty led him to hail the commencement of the French revolution as an era of happiness to the human race. His studies, however, gradually settled in the field of Italian history and literature. In 1796 the first-fruits of these studies appeared in his "Life of Lorenzo de' Medici;" soon after which he retired from the practice of an attorney, and entered himself as a student at Gray's Inn, with a view to the bar. But in 1799 he retired to his estate at Allerton, and devoted himself to literary labour. In 1805 appeared his second great work, "The Life and Pontificate of Leo X." These two works became immediately popular, and gained him a great reputation throughout Europe. The cool impartiality, however, with which he treated religious controversies offended both Romanists and Protestants; and while some of the latter angrily denounced him for his severe treatment of the Reformers, and his lenient comments on their opponents, Papists were equally dissatisfied, and Pope Leo XII. consigned the Italian translation

of the "Life of Leo X." to the Index. Roscoe being attached to the Whig party, they supported him as a candidate to represent Liverpool, and after a severe contest with General Tarleton, in 1806, he was returned. He retired, after the dissolution of parliament, in 1807. Some time previous to this he had become a banker at Liverpool; but the house to which he belonged failed, and his private property was lost; his valuable library, prints, drawings, &c., producing about £3000. Roscoe had long been considered as the head of the literary and scientific circles of his native town; and much of his time was spent in promoting the interests of its many noble public institutions. He was one of the first to recognize and encourage the genius of the great sculptor John Gibson. A statue of Roscoe was executed by Chantrey, and placed in the Royal Institution of Liverpool. Died, June 30, 1831.

ROSCOE, HENRY, youngest son of the preceding, was born about 1800; studied the law, and was called to the bar in 1826. Like his father, he united with his professional studies an extensive acquaintance with polite literature, and was an accomplished writer. Independent of many "Digests" of different branches of the law, he was the author of "Lives of eminent British Lawyers," in Lardner's Cyclopædia; a "Life" of his father, 2 vols.; and the editor of "North's Lives." Died, 1836.

ROSCOMMON. [DILLON.]

ROSE, GEORGE, a statesman and political writer, was born at Brechin, in Scotland, in 1744. He was a pursuer in the navy, but through the interest of the earl of Marchmont he was afterwards made keeper of the records in the exchequer. Here his talents for business were soon discovered, and he was appointed to superintend the publication of the Domesday Book, and to complete the Journals of the Lords. From this period his advancement was rapid; and when Mr Pitt (whose friendship and full confidence he possessed) returned to power, Mr Rose was made president of the Board of Trade, and treasurer of the navy. On the death of that minister he lost these situations; but when the administration formed by Lord Grenville retired, he resumed his former station, and continued in it till his death, which happened at Cuffneils, his seat in Hampshire, in 1818. He published "A brief Examination into the Increase of the Revenues, Commerce, and Navigation of Great Britain," "Considerations on the Debt due by the Civil List," "Observations respecting the Public Expenditure, and the Influence of the Crown," &c.

ROSELLINI, IPPOLITO, one of the most celebrated archaeologists of modern times, was born at Pisa, 1800; completed his studies at the university of his native town, in 1821; three years later obtained the chair of oriental languages, which he had prosecuted at Bologna mean while with great zeal under the celebrated Cardinal Mezzofanti. Having made Egyptian antiquities his peculiar study, he followed eagerly in the steps of the illustrious Champollion, whom he accompanied first to Paris and then to Egypt in the pro-

X." to the Index, candidate to represent a severe contest in 1806, he was re-elected the dissolution of the time previous to the rank at Liverpool; he belonged failed, property was lost; his drawings, &c., Roscoe had long been of the literary and native town; and spent in promoting noble public institutions the first to recognize the genius of Roscoe as the great sculptor of the statue of Roscoe was placed in the Liverpool. Died, June

youngest son of the about 1800; studied the bar in 1826. Like with his professional acquaintance with was an accomplished of many "Digests" of the law, he was the eminent British Law-cyclopædia; a "Life" ; and the editor of ed, 1836.

[MILLON.]

statesman and political rechin, in Scotland, in the navy, but of the earl of Marchmonts made keeper of the quer. Here his talents on discovered, and he friend the publication of, and to complete the books. From this period was rapid; and when Mr ship and full confidence led to power, Mr Ross of the Board of Trade, navy. On the death of at these situations; but ration formed by Lord resumed his former ed in it till his death, Cuffnalls, his seat in s. He published "A into the Increase of the ce, and Navigation of siderations on the Debt list," "Observations re e Expenditure, and the wn," &c.

POLITO, one of the most ogists of modern times, 600; completed his studies his native town, in 1821; obtained the chair of orich he had prosecuted life with great zeal under inal Mezzofanti. Having quities his peculiar study, in the steps of the illus- whom he accompanied hen to Egypt in the pro-

secution of his researches; and on whose death he undertook the publication of the splendid work, the result of their united efforts, entitled the "Monuments of Egypt and Nubia," &c. Died, 1843.

ROSEN, FRIEDRICH AUGUST, a distinguished orientalist, professor of oriental languages in London university, was born at Hanover, in 1805. He studied at the universities of Leipsic and Berlin, and afterwards studied Sanscrit under Professor Ropp. Having distinguished himself by the publication of his "Sanskrit Roots," he was appointed professor of oriental languages in the London university, a post which he held for several years. He was afterwards professor of Sanscrit in University College, honorary foreign secretary to the Asiatic Society, and secretary to the Oriental Translation Committee. His studies and literary labours were gradually concentrated on the earliest Indian literature, and he began to publish but did not live to complete the hymns of the *Rig Veda* with a Latin translation. He edited the "Essays" of his friend Colebrooke, and the "Algebra" of Mohammed Ben Musa, with an English translation; prepared the catalogue of Syriac manuscripts in the British Museum, which was published by Forshall; and contributed many articles on oriental literature and geography to the "Penny Cyclopædia." Rosen was the correspondent of the most eminent foreign scholars, and was as much esteemed for the charms of his character as he was respected for his scholarship. Died suddenly at London, 12th September, 1837.

ROSENMÜLLER, JOHANN GEORG, a celebrated German theologian, was professor of theology at Erlangen and Leipsic, and distinguished himself as a preacher, and by his activity in the cause of education. Born, 1736; died, 1815.—His son, ERNST FRIEDRICH CARL, a distinguished orientalist, was born at Leipsic, in 1768; in which university he became professor of Arabic, &c., and rendered important services to oriental literature by various learned works. One of the most important is his "Scholia" on the Old Testament, in 23 vols. Among his other works are, a "Handbook of Biblical Antiquities," and a useful Arabic Grammar. Died, 1835.—Another son, JOHANN CHRISTIAN, celebrated as an anatomist, was born at Hessberg, in 1771; became professor of anatomy and surgery at Leipsic, and died in 1826. He was the author of "Anatomieo-Surgical Delimitations," a "Manual of Anatomy," &c.

ROSIN, JOHANN, or ROSINUS, a German antiquary, was born at Eisenach, in 1551, and died of the plague in 1628. He wrote "Antiquitatum Romanarum Corpus," a work of considerable value, and several times reprinted.

ROSMINI, CARLO DE', Italian historian and biographer, born in the Tyrol, in 1758. He wrote a History of Milan, and Lives of Ovid and Seneca, of Guarino Veronese, Vittorino da Feltrè, Filicfo, and Trivulzio. He was a member of the Florentine Academy, and died at Milan, in 1827.

ROSS, ALEXANDEI, a native of Aberdeen, was master of the grammar school at South-

ampton, and chaplain to Charles I. His works are very numerous; the most known of which is, a "View of all Religions." He was also author of a curious book, entitled "Virgilius Evangelizans," a cento on the life of Christ, taken wholly from Virgil. He died in 1654.

ROSS, ALEXANDER, a Scotch poet, born in Aberdeenshire, in 1699. He was educated at the Marischal College, Aberdeen, and spent his life in discharging the duties of a parish schoolmaster, at Lochlee, in Angusshire. It was not till he was nearly 70 years of age that he first appeared as an author, when he published "Heienore, or the Fortunate Shepherdess," a poem which in the north of Scotland is nearly as popular as the writings of Ramsay and Burns. He was also the author of some favourite songs, and died in 1784.

ROSS, Sir JAMES CLARK, Captain R.N., a distinguished maritime discoverer, was the nephew of Sir John Ross, noticed below, and was born in London, in 1800. He entered the navy at twelve years of age, accompanied his uncle on his two voyages in search of a north-west passage, and in the interval between them accompanied Parry in his three arctic voyages. He was promoted to the rank of post-captain in 1834, for his services during the second voyage of Sir John Ross. His most memorable expedition was that to the Antarctic Ocean, undertaken in 1839, which occupied four years. He commanded the Erebus, and was accompanied by Crozier in command of the Terror. The discovery of Victoria Land, the observation of a volcano, Mount Erebus, then in action, and valuable additions to scientific knowledge, in magnetism, meteorology, zoology, &c., were the fruits of this expedition; a narrative of which by Ross was published in 1847. The discoverer was knighted and created D.C.L., Oxford, after his return. He had long been F.R.S., F.L.S., F.R.A.S., and F.R.G.S., and he received in 1841 the gold medal of the last-named society. In 1848 Sir James Clark Ross commanded an expedition to the Arctic Seas in search of Sir John Franklin, but without success. Died, 3rd April, 1862.

ROSS, Sir JOHN, a distinguished navigator, was born in Ballaroch, in Wigtonshire, of which parish his father was minister, in 1777. Entering the navy when a mere boy, he was promoted to a lieutenantancy in 1801, and during the war with France earned great distinction in all parts of the world. In 1818 he was associated with Sir Edward Parry in the expedition to Baffin's Bay, and on his return published his "Voyage of Discovery in search of a North-West Passage." In 1829, aided by the munificence of Mr. afterwards Sir Felix Booth, he fitted out a steam vessel with the view of prosecuting researches in the same direction, and after spending four winters in the arctic regions, during which he made very valuable discoveries, he returned to England in 1833, and published his "Narrative of a Second Voyage." For his services on this occasion he received the honour of knighthood, and other distinctions; and in 1839 he was appointed British consul at Stockholm, which office he

held till 1845. In 1850 he made a last expedition to the Arctic Ocean in search of Sir John Franklin, and returned in 1851. Besides the works above specified, Sir John Ross was the author of "Letters to young Naval Officers," a "Treatise on Navigation by Steam," "Memoirs of Lord do Saunarez," &c., &c. Died, 1856.

ROSS, or ROUSE, JOHN, called the anti-quary of Warwick, of which town he was a native, studied at Balliol College, Oxford, and afterwards became canon of Osnay. After travelling over the greater part of the kingdom to collect information respecting historical events, he settled at Guy's Cliff, in Warwickshire, where he died, in 1491. He wrote a work on the "Antiquities of Warwick" and the "History of our Kings," and left a MS. on the "History of the Earls of Warwick," which is in the Bodleian Library.

ROSSELLI, COSIMO, Italian painter, was born at Florence, in 1439. He was a scholar of Neri di Bicci, and was, perhaps, afterwards connected with Benozzo Gozzoli. Having gained some reputation as a painter, he was employed by Sixtus IV. to paint in the Sistine Chapel, but his works there were unworthy of the masterpieces with which they were placed in competition. To make up for artistic defects he made free use of gold and ultramarine, and obtained the prize offered by the pope. The best of his frescoes there is the "sermon on the Mount," the landscape in which is said to be by Piero di Cosimo. His best work, however, is in the chapel of St Ambrogio at Florence, and represents the exhibition of achalice with the blood of the Saviour in it. There are several of Rosselli's pictures in the Berlin Gallery, and a "St Jerome in the Desert" is in the National Gallery. Cosimo Rosselli was the master of Fra Bartolomeo. Died, after 1506.

ROSSI, JOHN CHARLES FELIX, sculptor, was born at Nottingham, in 1762, of an Italian family, and was apprenticed to a local sculptor. He went young to London, and studied at the Royal Academy; obtained the gold medal, and went to Rome in 1785. He was chosen A.R.A. in 1800, and R.A. in 1802. He executed the monuments to Lord Heathfield, Marquis Cornwallis, Lord Rodney, Captain Faulkner, and several others in St Paul's cathedral; the figure of Britannia at the Liverpool Exchange, a statue of Thomson the poet, &c. He had the appointment of sculptor to the prince regent, and to William IV. Died, 1839.

ROSSI, PELLEGRINO, Count, was born at Carrara, in 1787. Though of humble origin, he received a liberal education, studied law at Pisa, and commenced practising at the bar of Bologna in 1809, where his success was rapid and complete. But in 1814, fired with the ambition of giving freedom to Italy, he renounced his profession for that of arms, and, on the overthrow of Murat, fled into Switzerland, where he sought consolation for political disappointments in the pursuits of science. At Geneva, where he fixed his residence, his varied acquirements, his great oratorical powers, and his commanding intellect, soon made themselves felt and acknowledged. In 1819 he was appointed

professor of law. In 1820 he was elected a member of the council of Geneva, and soon afterwards he was sent as deputy to the diet, when he drew up his celebrated report on the revision of the Swiss federal constitution, which has ever since been associated with his name. Meanwhile the moderation of his political views, so closely resembling those of the French Doctrinaires, had brought him into connection with the leading members of that party in Paris, Messrs Guizet and De Broglie; and willingly availing himself of their friendly services to open to him a more extensive career than Switzerland presented, he quitted Geneva for Paris in 1833, with a view to employment in the service of the French government. On his arrival at Paris he was appointed professor of political economy, was soon chosen member of the Institute, was created a peer in 1839; and in 1845, being now a naturalized Frenchman, he was appointed ambassador to Rome. Through his influence Pius IX. ascended the pontifical throne in 1846: and at his instigation the pope entered upon the liberal career, so soon cut short. In 1848, he heard with delight the cry of national independence raised in Piedmont. He immediately set out for Carrara, where he was welcomed with enthusiasm; which still further increased when he sent his son to join the army of Charles Albert, to contend for freedom. But the victories of Radetzky and the triumph of despotism for a time consigned him to privacy and neglect. He was permitted, however, to have one more glimpse of fortune. In the midst of confusion and danger he was appealed to by the pope, then in the Quirinal, to aid him with his counsel. Responding to the appeal, he took office as prime minister, 16th of September, and for two months laboured to secure freedom for the Roman people and peace for Italy; but his career of noble promise was cut short by an assassin, Nov. 14, 1848, and immediately afterwards the revolution broke out, which compelled Pius IX. to take refuge at Gaeta. Count Rossi has not left behind him any literary production commensurate to his great reputation; but his "Traité du Droit Penal" (3 vols.), and his "Cours d'Economie Politique" may be consulted with profit.

ROSSI, ROSSO DE', or IL ROSSO, Italian painter, born at Florence about 1496, or perhaps somewhat earlier. He acquired from his study of the cartoons of Michael Angelo a bold and grand style; painted at Florence, Rome, Venice, and other cities of Italy; and in 1530 entered the service of Francis I. of France, who employed him in the decoration of the new palace of Fontainebleau, giving him a good salary, and a house at Paris. He gathered a group of pupils about him, and thus founded the school of Fontainebleau. Many of his paintings in the palace were destroyed by Primaticcio, who succeeded him there, and his other works are scarce. Il Rosso was a handsome and accomplished man; but either from jealousy of Primaticcio or remorse for having falsely charged his friend Pellegrini with theft, he poisoned himself, in 1541.

ANDER WEDDEBURN,

[ROS]

Earl, of an eminent lawyer and statesman,
was born in Scotland, in 1733. He received
his education at Edinburgh, and was called
to the bar in 1757. His application was in-
defatigable, and in 1763 he obtained a silk
gown as king's counsel. Not long afterwards
he was returned to parliament for Richmond.
He joined Mr Grenville in opposition to the
administration, and distinguished himself
by his eloquence and political firmness. In
1771 he was appointed solicitor-general; in
1778, attorney-general; and, in 1780, chief
justice to the Common Pleas, with the title
of Lord Loughborough. He adhered to the
party of Fox when Pitt first came into
power; but joined the administration, with
many others, under the alarm produced by
the French revolution in 1793, and succeeded
Lord Thurlow as chancellor, which office
he held till 1801, when he retired with the
title of the earl of Rosslyn, and died in
1805. In legal affairs he was able, plausible,
subtle, and eloquent; in his political cap-
acity, a steady partisan, highly serviceable to
the cause he espoused. His lordship wrote
a pamphlet, entitled "Observations on the
State of the English Prisons, and the Means
of improving them."

ROSSLYN, JAMES ST CLAIR ERSKINE,
Earl of, eldest son of Lieutenant-general
Sir Henry Erskine, and nephew of the pre-
ceding, succeeded his father as a baronet in
1763, and commenced his military career in
1778, as cornet in the 1st horse-guards. In
1782 he served on the staff in Ireland, as
aide-de-camp to the lord-lieutenant, and
was subsequently appointed assistant-ad-
jutant-general in that country. In 1783 he
obtained a majority in the 8th light dra-
goons, and in 1792 the lieutenant-colonelcy
of the 12th light dragons. He served with
that regiment at Toulon in 1793, and after-
wards as adjutant-general to the forces in
the Mediterranean, under Sir David Dundas
and Sir Charles Stuart. In 1795 he obtained
the rank of colonel, being appointed aide-
de-camp to the king. He was employed as
brigadier-general and adjutant-general to
the British army in Portugal, from Nov.,
1796, to the end of 1797. In 1798 he was
appointed major-general, and was present
at the reduction of Minorca. In 1805 he was
appointed lieutenant-general, and placed on
the staff in Ireland; in 1806 he was again
appointed to serve in Portugal, was at the
siege of Copenhagen in 1807, and in 1809 in
the Zealand expedition. In 1810 his lordship
received the colonelcy of the 9th lancers;
and in June, 1814, he was appointed general.
Sir James Erskine was a member of the
house of Commons for 23 years before his
accession to the peerage in 1805. In 1829 he
was appointed a keeper of the privy-seal,
and sworn a member of the privy-council;
and in December, 1834, he was lord president
of the council in Sir Robert Peel's brief
administration. The earl of Rosslyn was
one of the most intimate friends of the
duke of Wellington, and a firm upholder
of Conservative principles. He died in 1837,
and was succeeded by his son, Lord Leugh-
borough.

ROSTOPCHIN, FEODOR, Count, a Rus-
sian statesman and military officer, was born

in 1765; entered the army as a lieutenant
in the imperial guards; received high pro-
motion from the Emperor Paul, but was dis-
missed in disgrace; and subsequently, under
Alexander, became governor of Moscow. He
exercised an important influence over the
campaign of 1812, and is charged by the
French with having caused the conflagration
of Moscow, which is the general opinion
even in Russia, although Rostopchin has
positively denied it. It is certain, however,
that he took measures for the destruction of
the magazines in that city; and if his emis-
saries set fire to the ancient capital of Russia
at his express commands, it must be regarded
as the act of a patriot, which deprived the
French invaders of a resting-place, and was
the death-blow to Napoleon's boundless am-
bition. In 1814 Count Rostopchin accom-
panied the Emperor Alexander to the congress
of Vienna, afterwards spent several years in
France, and died at Moscow, in 1826.

ROTHSCHILD, NATHAN MAYER,
the greatest *millionnaire* of the age, was
one of five brothers, who, by their wealth,
connections, and financial skill, exercised
a great control over the money, commercial,
and political interests of Europe. Mayer
Anselm, their father, and the founder of
the house of Rothschild, was born at Frank-
fort. Though educated for the priesthood,
he turned his attention to commerce, became
eminent as a banker, and being trusted with
the most important affairs by the landgrave
of Hesse during the dominion of Napoleon in
Germany, he executed his trusts so faithfully
and successfully, that his house ranked
among the most celebrated on the continent.
Mayer Anselm died in 1812, leaving for in-
heritance to his sons the example of his life
and wise counsels, an immense fortune, and
unbounded credit; and they, by combining
their operations, and always acting in concert,
formed among themselves an invincible
phalanx, whose power at one time was suf-
ficient to influence the counsels of a mighty
empire, and to regulate its financial opera-
tions. Their names and residences were as
follow: ANSELM, at Frankfurt; SOLOMON,
at Berlin and Vienna; NATHAN MAYER, at
London; CHARLES, at Naples; and JAMES,
at Paris. N. M. Rothschild, whose life we
are recording, came to England in 1800,
and acted as agent for his father in the
purchase of Manchester goods for the con-
tinent. Shortly afterwards, through the
agency of his father, for the elector of Hesse
Cassel and other German princes, he had
large sums placed at his disposal, which he
employed with such extraordinary judgment,
that his means went on at a rapid rate of
accumulation. Besides the essential co-
operation of his brothers, he had agencies in
almost every city in the world, with hosts of
minor dependent capitalists who participated
in his loans, who placed implicit confidence
in the family, and were ready at all times to
embark with them in any operation that
was proposed. Nothing, therefore, was too
great or extended for him. His great success
in loan operations made it a matter of rivalry
with all states which wanted to borrow,
to obtain his co-operation; and yet he continued
to steer clear of all bad bargains. His trans-

actions in bullion and foreign exchanges were also on an immense scale, and not less lucrative, perhaps, than his foreign loans. Mr Rothschild had gone to Frankfort, to be present at the marriage of his eldest son, Lionel, with one of his cousins, a daughter of Baron Anselmi, when he was taken ill, and speedily died. His corpse was conveyed to London, and deposited in the burial-ground belonging to the German synagogue in Duke's Place, on the 8th of August, 1836.

ROTHOU, JEAN DE, a French dramatic poet, was born in 1609, at Dreux; and died in 1650. He was the author of 37 plays, many of which were highly popular; but he willingly bore public testimony to the superior merit of his rival Corneille. Being at Paris when a pestilential disorder broke out at Dreux, he hastened to afford relief to his fellow-citizens; but, three days after his arrival, in 1650, he died, the victim of his benevolent exertions.

ROTTECK, CARL VON, a celebrated modern historian, was born at Frelburg, in Baden, in 1775. Carefully educated under the care of his father, who had been ennobled for his medical skill, he entered the university of his native town in 1790 as a law student; and eight years later he obtained the chair of history, his lectures forming the foundation of the great historical work which has secured him so high a place among the historians of Europe. In 1818 he exchanged his chair of history for that of politics and the law of nations; in 1819 he was chosen member for the university and the liberal tenor of his lectures and speeches was well seconded by numerous able works which flowed from his pen on various constitutional questions. The outbreak of the French revolution in 1830 having given fresh vigour to his liberal views, he founded various journals to propagate his opinions; but his zeal was viewed with a jealous eye by the government, which not only deprived him of his chair in 1832, but interdicted him from editing any political journal for five years, and sought in various ways to thwart his designs. Henceforth he was regarded as a martyr to the liberal cause; his name became a watchword to the opposition; and though in 1844 he was restored triumphantly to his previous offices, the redress came too late, for he died the same year, to the general regret of his countrymen. A list of his various productions would occupy more space than we can afford; but his fame chiefly rests upon his "Allgemeine Welt-Geschichte," which appeared between 1811 and 1827, and has been translated into nearly every European language.

ROUHILLIAC, LOUIS FRANÇOIS, an eminent sculptor, was a native of Lyons, but came to England in the reign of George I., and was employed on several great works; among which are, the monument of the duke of Argyle, in Westminster Abbey; the statue of Handel, at Vauxhall; that of Sir Isaac Newton, at Trinity College, Cambridge; and many other statues and monuments in various parts of the kingdom. He long stood at the head of his profession, and died, 1762.

ROUCHER, JEAN ANTOINE, a French

poet and miscellaneous writer, was born at Montpellier, in 1745, and obtained from Turgot a place in the revenue department. When the revolution took place, he opposed the excesses of the more violent politicians; and for his moderation suffered by the guillotine, in 1794. His principal work is "Les Mois," a poem, in 2 vols.

ROUELLE, GUILLAUME FRANÇOIS, one of the earliest of the modern chemists in France, was born at Caen, in 1703. Having devoted great attention to chemical science, botany, and pharmacy, he settled at Paris as an apothecary, and afterwards became professor of chemistry at the Royal Botanic Garden. He also held the office of inspector-general of pharmacy at the Hôtel Dieu, and was a popular lecturer. Died, 1770.

ROUSSEAU, JACQUES, a French painter, born at Paris, in 1630. He studied in Italy, where he acquired great skill in his art; and returning to France, was employed by Louis XIV. He was admitted to the Academy in 1662. Compelled to leave his country after the revocation of the Edict of Nantes, he came to England. Died at London, 1694.

ROUSSEAU, JEAN BAPTISTE, a distinguished lyric poet, was born at Paris, in 1670. His father, though a shoemaker, gave him a liberal education, and at an early period he displayed a decided taste for poetry. In 1688 he became page to the French minister at the court of Denmark; after which he was secretary to Marshal Tallard, in his embassy to England. In 1701 he was admitted into the Academy of Inscriptions; but, in 1712, he was banished from France, on the charge of writing some grossly libellous verses, which, during the remainder of his life, and even in his last moments, he solemnly declared were forgeries, devised for his ruin. He then went to Switzerland, and afterwards to Vienna, under the patronage of Prince Eugene. Some of his odes and epigrams are excellent, but among the latter are many which are obscene. Died at Brussels, 1741.

ROUSSEAU, JEAN JACQUES, the French philosopher and miscellaneous writer, was the son of a watchmaker at Geneva, where he was born, in 1712. His father had a taste for literature: this he communicated to his son, whose love of marvellous adventure he encouraged by reading romances with him in his childhood, while he fostered the growth of those free principles which are the characteristics of a zealous republican. Rousseau learnt little at school, but the frequent reading of Plutarch's Lives supplied him with noble ideals of human character, and kindled a passionate admiration of them. On leaving school he was first placed with an attorney, who soon dismissed him for negligence; he was then apprenticed to an engraver, from whom he ran away before he was sixteen, and wandered about for some time in Savoy, where he was saved from starving by a priest, who sent him to Anancy to be under the care of the noted Madame de Warens, a recent convert to the Catholic church. This kind-hearted lady caused him to be instructed in science and music, and procured him admission to a school at Turin, where he professed

him to be instructed in
and procured him admis-
urin, where he professed

himself a Catholic. After a very short stay
he was a wanderer again; entered the serv-
ice of the countess of Verecillis, then of the
Count de Gouvon; and again returned to
Madame de Warens. She renewed her kind
attentions and services, and her house was
for many years open to him as a home. In
the pleasant retreat near Chambéry, to which
she removed, the restless wanderer found re-
pose for a time, and applied himself more
steadily than he had done to the study of
philosophy. A more intimate relation had
sprung up by this time between him and his
protectors. In 1740 jealousy led him to
quit the house of Madame de Warens, and
in the following year he went to Paris to try
his fortune as musician. He failed, but ob-
tained the place of secretary to the French
ambassador in Venice, in 1742. But it was
not till 1750 that he manifested his splendid
literary talents. In that year he gained the
prize offered by the academy of Dijon, on
the question, "Whether the revival of learn-
ing has contributed to the improvement of
morals"—taking the negative side of the
question, it is said, at the suggestion of
Diderot. From this period his pen became
fertile and popular. He soon after brought
out his "Devin du Village," a comic opera,
which was received with general favour;
but the appearance of his celebrated "Letter
on French Music" (1753), in which he pointed
out its defects, excited a general storm.
Singers and connoisseurs, who could not
wield the pen, contributed to spread calum-
nies, pasquades, and caricatures against the
author, who retired to Geneva. He now
again embraced Protestantism, and was for-
mally reinstated in the privileges of a free
citizen of Geneva. Rousseau had recently
published his essay, "Sur l'Origine de l'Iné-
galité parmi les Hommes," which excited
still more sensation than his first prize essay.
Soon after he went again to Paris, and there
accepted the offer of Madame d'Epinay,
whose friendship he had enjoyed for several
years, of her house called the Hermitage for
his residence. His mistress, Thérèse Levas-
seur, and her mother accompanied him. In
1760 he published "Julie, ou la Nouvelle
Héloïse," a romance, of the most seductive
description. This was followed, in 1762, by
"Emile, ou de l'Éducation;" which was
anathematized by the archbishop of Paris,
and ordered to be burnt by the parliament
of Paris and the authorities of Geneva. His
famous "Contrat Social" appeared soon
afterwards, and his bold though superficial
speculations on the condition and destiny of
man and society alarmed and irritated men
still more. Obligated to flee from France and
Switzerland, the author took refuge in Neuf-
châtel, where he published his "Letter to the
Archbishop of Paris," and "Lettres de la
Moatagne," a remonstrance against the pro-
ceedings of the Genevese republic, the citizen-
ship of which he renounced. Thenceforth his
existence was passed in frequent changes of
place, to escape real or fancied persecution,
for his mind was now completely under the
tyranny of the morbid habit of suspecting all
his friends of insulting and conspiring against
him. This was particularly the case with
respect to Hume, the historian, who secured

for him a hospitable asylum in England, but
whose friendship he solemnly renounced, and
returned to France after a stay of 16 months.
In 1770 he was permitted to return to Paris.
His last days were spent at Ermenonville,
where he died suddenly, in 1778. Rousseau
was the author of many works besides those
we have noticed, all of them exhibiting his
peculiar warmth and energy of style, and
vigour of thinking. That he exercised a
great influence over the opinions of the age
at the period of the French revolution, there
can be no doubt; but his works, with all their
fascination of splendid and passionate elo-
quence, have no place among the lights that
men love and walk by. His social and polit-
ical theories have no basis more solid than
his personal feelings; and these he inter-
preted falsely. His "Confessions," one of
the most singular books of its kind, ap-
peared soon after his death.

ROUTH, MARTIN JOSEPH, D.D., president
of Magdalen College, Oxford, was born
at South Elmham, near Beccles, in 1755. He
matriculated at Magdalen College, Oxford,
in 1770. In July, 1776, he was admitted a
Fellow, and in the same year proceeded
Master of Arts. In 1781 he was appointed
College Librarian; subsequently he was
elected Senior Proctor of the University,
and Junior Dean of Arts. In 1786, he pro-
ceeded Bachelor of Divinity, and in 1791 was
elected president of Magdalen on the resig-
nation of Dr Horne, Bishop of Norwich. His
principal work is the "Reliquiæ Sacre,"
and he also edited Bishop Burnet's "His-
tory of his own Times," and his "Reign of
James the Second." He bequeathed his
valuable library to Durham University.
Died, in the 100th year of his age, 1854.

ROVEZZANO, BENEDETTO DA, Italian
sculptor, was born at Rovezzano, near Flo-
rence, about 1490. He executed a noble monu-
ment to San Giovanni Gualberto, founder of
the convent of Vallombrosa, adorned with
numerous life-size statues and bas-reliefs,
but it was wantonly destroyed by the troops
during the siege of Florence in 1530, and only
a few mutilated figures now remain. In
1524 Rovezzano came to England, and un-
dertook his second great work, a tomb for
Cardinal Wolsey. On Wolsey's fall the king
ordered the sculptor to finish it for him, but
it was not finished when he died. Charles
I. wished to be buried in it, but it remained
unoccupied till the death of Lord Nelson,
whose remains were deposited in it. Rovez-
zano acquired a fortune in England, returned
to Florence, and after several years of total
blindness, died in 1550.

ROVIGO, duke of. [SAVARY, ANNE
J. M. R.]

ROWE, ELIZABETH, miscellaneous
writer, was the daughter of a dissenting
minister at Bechester, where she was born in
1674. She was married to Thomas Rowe, a
young littérateur, who died a few years
after; upon which she retired to Frome,
where she resided for the remainder of her
life. Her principal works are, "Friendship
in Death," "Letters, Moral and Entertain-
ing," and "Devout Exercises of the Heart."
Died, 1737.

ROWE, NICHOLAS, poet and dramatist,

whose father was a serjeant-at-law, was born 1673, at Little Heckford, in Bedfordshire; was educated at Westminster School, and was intended for the bar; but on the death of his father he gave up all thoughts of the profession, and devoted himself to literature. His first tragedy, published when he was 24, was "The Ambitious Step-mother," and its success gave him encouragement. It was followed by "Tamerlane," "The Fair Penitent," "Ulysses," "The Royal Convert," "Jane Shore," "Lady Jane Grey," and a comedy called "The Biter." He also wrote miscellaneous "Poems" and the "Life of Shakespeare;" but his principal performance is a translation of Ivar's "Pharsalla." On the accession of George I. he was made poet-laureate, and he also obtained several government situations. He died in 1718, and was buried in Westminster Abbey.

ROWLANDS, HENRY, a Welsh divine and antiquary, was a native of Anglesey, of which island he published an elaborate account, entitled "Mona Antiqua Restaurata." Died, 1722.

ROWLANDSON, THOMAS, an artist celebrated for his skill in caricature, was born in London, in 1756. He studied drawing at Paris; and, on his return, continued his studies at the Royal Academy; rose to some degree of eminence in his profession, and died in 1827. Among his works are the plates to "Dr Syntax," "The Dance of Life," and "The Dance of Death."

ROXBURGH, WILLIAM, physician and botanist, was born at Craigie, in Ayrshire, in 1759. He received his education at Edinburgh, served his time to a surgeon, went to India, and was appointed, in 1793, keeper of the botanical garden at Calcutta, where he formed an intimacy with Sir William Jones, and became a member of the Asiatic Society. Dr Roxburgh made several important discoveries, particularly of the colouring matter of the laced insect, and rendered important services by the introduction of new plants into Bengal, for which he received three gold medals from the Society of Arts. His principal work is, "The Plants of the Coasts of Coromandel," 3 vols. folio. He died at Edinburgh, in 1815.

ROXBURGH, JOHN, Duke of, a celebrated collector of rare books, was born at Bristol in 1746. He spent most of his fortune in the formation of an immense collection of rare and curious books, and died at London in 1811. His library was sold by auction the following year, and some of the books fetched enormous prices. The *Roxburgh Club*, named after this bibliophile, was established in 1813.

ROY, Count ANTOINE, an able French statesman, was born at Savigny, in 1764. Soon after the first revolution broke out, he quitted the bar, to which he had been admitted in 1785, and took part in several mining speculations, which turned out most successful. After the fall of Napoleon he ably maintained constitutional principles in opposition to the ultra-royalist opinions then in vogue. He also displayed such a thorough acquaintance with financial questions, that he was made minister of finance

in 1819-20; and short as was his tenure of office, it was distinguished by various measures of reform, which won for him the honours of the peerage. He was a member of the Martignac administration in 1828, but retired from office when Prince Polignac became minister in 1829; and though he accepted of no office under the régime of Louis Philippe, his long experience, sagacious judgment, and moderate counsels were for many years placed at the service of the Chamber of Peers. His private fortune was immense. Died, 1847.

ROY, JULIEN LE, a celebrated clock and watch-maker, was born at Tours, in 1658. When very young, he showed a decided partiality for mechanical pursuits, and acquired the reputation of being a first-rate horologist. Died, 1759.—His son, PIERRE LE ROY, was watch-maker to the king, and died in 1785. He published "Mémoires pour les Horlogers de Paris," "Etrennes Chronométriques," &c.—JULIEN DAVID, another son, became a member of the National Institute, and attached himself to the study of architecture. He wrote "On the Ruins of the finest Monuments of Greece," "On the Construction of Christian Temples," &c.

ROY, PIERRE CHARLES, a French satirist and dramatic poet, was born at Paris, in 1683. His principal pieces adapted for theatrical representation are, the operas of "Callirhoë" and "Semiramis," and the comedy of "The Captives," imitated from Plautus. His satires against the members of the French Academy prevented his gaining admission into that body, and he died in 1764.

ROY, WILLIAM, British general, a distinguished geodesist and antiquary, was employed in 1746, at which time he was colonel and assistant quarter-master-general, to make a survey and map of Scotland for military purposes, of which only a reduced copy was ever published. He was chosen F.R.S. in 1767, and made several important contributions to the "Philosophical Transactions." But his great achievement was the successful measurement of the Hounslow base, in 1784, the first step in the great Ordnance Survey of the United Kingdom; for which he received the Copley medal of the Royal Society. He afterwards directed the observations and measurements for connecting the English triangulation with the French; a task which he completed in 1788. Died at London, 1st July, 1790. His elaborate work on "The Military Antiquities of the Romans in North Britain" was published by the Society of Antiquaries after his death.

ROYER-COLLARD, PIERRE PAUL, a distinguished French statesman and philosopher, was born at Sommepeis, 1763. Not long after his admission to the bar at Paris, he embraced the principles of the revolution of 1789; but he soon became disgusted with the scenes of violence that prevailed, and after an abortive attempt to aid the cause of the royalists, he bade adieu for a time to politics, and gave himself up wholly to literary pursuits. In 1811 he was appointed to a chair of history and philosophy. After the Restoration he once more entered upon

e more entered upon

a political career, and gradually rose in public favour by his sagacity, moderation, and honesty, till in 1828 he was nominated president of the Chamber of Deputies, of which he had long been a member, but retired from this office in 1839. He was one of the founders of the school of politicians in France, known by the name of *Doctrinaires*; and as philosopher he introduced in France the system of philosophy so clearly illustrated by Cousin, Jouffroy, and Damlron, and which bears some analogy to that of Reid and the other Scotch philosophers. Royer-Collard was a member of the French Academy and chevalier of the Legion of Honour. Died, 1845.

ROZEE, Mademoiselle, an ingenious artist, was born at Leyden, in 1632. She neither used oil nor water colours in her pictures, but silk floss on the ground, disposed according to the different degrees of the bright and dark tints, which she applied with great judgment and taste. In this manner she executed historical subjects, landscapes, and portraits. Died, 1682.

ROZIER, JEAN, botanist and agricultural writer, was born at Lyons, in 1734. He was an ecclesiastic, and obtained a priory, but devoted himself almost wholly to botany and natural history. He conducted the *Journal de Physique et Histoire Naturelle*, and was author of a "Course of Agriculture," "Elementary Demonstrations of Botany," &c. He was killed during the siege of Lyons, in 1793.

RUBENS, PETER PAUL, the most distinguished painter of the Flemish school, was born at Siegen, in Westphalia, in 1577. When he was ten years old his mother, then a widow, returned to her native place, Antwerp. He received an excellent education; and, after studying in his own country, especially under Otto Van Veen, he went to Italy, where he improved himself by copying the works of the best masters, but chiefly Titian. While in Italy he was employed by the duke of Mantua, not only as an artist, but on an embassy to Madrid. He returned to Antwerp in 1608, and was soon after made court-painter to the Archduke Albert, Spanish governor of the Low Countries. In 1620 he was employed by the Princess Mary de' Medici to adorn the gallery of the Luxembourg with a series of paintings, illustrative of the principal scenes of her life. While thus engaged, he became known to the duke of Buckingham, who purchased his museum. He was afterwards employed by the Infanta Isabella and the king of Spain in some important negotiations, which he executed with such credit as to be appointed secretary of the privy-council. On going to England with a commission from the Infanta, he obtained the favour of Charles I. While here he painted the fine picture called "Peace and War" now in the National Gallery, the Apotheosis of James I. (or of William the Silent, as it is now named), and the picture of Charles I. as St George; for which he was knighted, and received a chain of gold. Rubens acquired immense wealth, and was twice married, the second time in 1631, to a lovely girl of sixteen. He died at Antwerp, in 1640. Rubens, beyond

all comparison, was the most rapid in execution of the great masters; and according to Sir Joshua Reynolds, he was the greatest master of the mechanical part of his art that ever existed. His works are very numerous and very diversified in subject. There are nearly a hundred in the Picture Gallery at Munich. The "Descent from the Cross," at Antwerp, is perhaps his masterpiece. It is as a composition remarkably similar to the fine fresco of the same subject, painted by Daniele du Volterra, in the preceding century. The National Gallery contains eleven of the works of Rubens. The portrait of his mother in the Dulwich Gallery is a charming example of his skill as a portrait painter.

RUBENS, ALBERT, son of the preceding, was born at Antwerp, in 1611. He succeeded his father as secretary to the council, and was greatly esteemed by the Archduke Leopold, governor of the Low Countries. Died, 1657. He wrote "De Re Vestiaria Veterum," "Regum et Imperatorum Romanorum Numismata," "De Vita Flavii Manlii Theodori," &c.

RUBINI, GIAMBATTISTA, one of the most accomplished vocalists of his age, was born at Romano, in 1795. He was early initiated in the study of music by his father, who was a professional musician. In 1815, he was engaged at Naples at a modest salary, and his reputation continued to increase till he went to Paris in 1825; there he obtained triumphant success in the "Cenerentola," "Donna del Lago," "Gazza Ladra," and "Otello;" and he soon afterwards became the acknowledged "King of Tenors," not only at Paris, but in London, Vienna, St Petersburg, and all the other European capitals, which he visited repeatedly, and in succession. Died, 1851, leaving a fortune of nearly £100,000.

RUBRUQUIS, a distinguished traveller of the middle ages, whose real name was WILLEM DE RUYSBROEK, was born in Brabant, probably about 1230. He entered the Franciscan order, set out for the Holy Land, and, in 1253, was sent by St. Louis, who was then in Palestine, on an embassy to Manchu, the great Khan of Tartary, and in search of the famous but undiscoverable Prester John. He was accompanied by two other monks, and had interviews with Batu Khan and his son, the great Sartak, and the grand Khan Manchu. After an absence of two years and a half, Rubruquis returned to Syria, and entered the Franciscan monastery at Acre. He sent the narrative of his journey to St. Louis, and wished to visit France; but whether he did is not known. He was living in 1293. His narrative is full of curious information, and is remarkable for accuracy and sobriety.

RUCCELLAI, BERNARDO, an Italian statesman and historian, born at Florence, in 1449. Having married the sister of Lorenzo de' Medici, he was promoted to the office of gonfalonier of justice, and employed on several important diplomatic missions. After the death of Lorenzo, he protected the members of the new Platonic Academy, for whose use he erected a palace with gardens, embellished with noble monuments of ancient

and modern art. Died 1514.—His son, GIOVANNI, born in 1475, was sent ambassador to Venice in 1505; and in 1512, he took an active part in the measures which led to the restoration of the Medici family. He was afterwards papal nuncio in France, apostolical prothonotary, and governor of the castle of St Angelo. Died, 1525.

RÜCKERT, FRIEDRICH, one of the most distinguished German poets of his time, was born at Schweinfurt in 1789. He completed his education at the university of Jena, where he was for a short time lecturer; assisted in the editorship of the "Morgenblatt," at Stuttgart, between 1815-17; visited Rome, and on his return settled at Coburg, where he married. There he applied himself earnestly to the study of oriental literature, the influence of which is so marked in much of his own poetry. In 1826 he was named professor of oriental literature at Erlangen, whence he was called in 1840 to Berlin. His heart, however, was not in his professional work, and in 1849 he left Berlin and took up his abode on his estate at Neuses, a charming retirement in the country near Coburg, and there he passed the rest of his life. Rückert excelled as a lyric poet, but he wrote also epic and dramatic poems, and made many admirable translations from oriental poems. The themes and the forms of his verse are almost endlessly diversified. His first volume of poems—"Deutsche Gedichte"—appeared under an assumed name in 1814; and he continued writing almost to the last. Among his works, too numerous to be named, are "Kranz der Zeit," "Oestliche Rosen," "Morgenländische Sagen und Geschichten," "Kostem und Suhrab, eine Heldengeschichte," "Die Weisheit der Brahmanen," &c. Rückert was the warmly beloved friend of Uhland. Died, at Neuses, Jan. 31, 1866.

RUDBECK, OLAUS, an eminent Swedish anatomist, botanist, and antiquary, born in 1630. When about twenty years of age he discovered the lymphatic vessels, of which he soon after published an account. After visiting the principal seats of learning in Germany and the Netherlands, at the expense of Queen Christina, he settled at Upsal, founded the Botanic Garden, and became professor of anatomy and botany, rector of the university, and perpetual curator. He compiled a voluminous work on the early history and antiquities of Sweden, but the whole perished in the great fire at Upsal of April, 1702. Overwhelmed by this loss, he resigned his place, and died a few months later. Rudbeck was author of a curious book, in 4 vols. folio, entitled—"Atlantica, sive Manheim vera Japheti posterorum sedes et patria."

RUDBECK, OLAUS, Swedish botanist and philologist, was son of the preceding, and was born at Upsal about 1670. He travelled in Lapland, Germany, Holland, and England; founded, in conjunction with Benseinius, the Society of Sciences at Upsal; prepared a Treatise on Botany, of which he lost the greater part of the manuscripts by the conflagration of 1702; published several botanical and philological works; and died in 1740.

RUDDIMAN, THOMAS, grammarian and critic, was born in 1674, at Boyndie, in Banffshire; was educated at King's College, Aberdeen; became assistant-keeper of the advocates' library at Edinburgh; set up a printing-office in conjunction with his brother; was one of the founders of the earliest literary society in Scotland, in 1718; and died in 1757. His "Rudiments of the Latin Tongue," long used as an elementary book in schools, was the most popular of his productions; but he wrote other grammatical works, and was the editor of the works of George Buchanan. He also established the Caledonian Mercury.

RUDING, ROGERS, an English divine and distinguished numismatist, born at Leicester, in 1751; became fellow of Merton College, Oxford; was presented to the living of Morden, in Surrey; and soon after was elected a fellow of the Society of Antiquaries, to whose Archaeologia he was a contributor. He published, in 1817, an elaborate and important work entitled "Annals of the Coinage of Britain and its Dependencies," in 4 vols. 4to. Died, 1820.

RUDOLPH. [RODOLPH.]

RUFFO, FABRIZIO, Cardinal, born at Naples of an ancient family, in 1744. He entered the church, held the office of treasurer-general to Pope Pius VI., was created cardinal, and became intendant of the royal palace of Caserta. On the French occupation of Naples, he followed the king, Ferdinand I., to Sicily, and the next year, 1799, he was sent into Calabria to excite an insurrection of the people against the French republicans, and restore the royal authority. In this he succeeded, but his career of conquest was marked by the most atrocious proscriptions, and blood was shed without stint. He also invaded Apulia, and entered Naples, which was the scene of fierce contest and terrible carnage. Ruffo at length made terms with the republicans, but the convention was set aside by the king, and many of them were executed. The cardinal afterwards entered the service of the pope, attended the second marriage of Napoleon, and was admitted to the Legion of Honour, rejoined Pius VII. on his restoration, assisted at the election of Leo XII., and died at Naples, in 1827.

RUFINUS, by some called TORANUS, a priest of Aquileia, in the 4th century. He became attached to St Jerome, and accompanied him to the East; but being persecuted by the Arians, he was banished to a remote part of Palestine. After his return he founded a monastery on Mount Olivet, and employed himself in translating Greek authors into Latin. His version of Origen gave such offence to his old acquaintance, Jerome, that he wrote bitterly against him, and Rufinus was cited to Rome by Pope Anastasius. The pope condemned his works, upon which he retired to Sicily, where he died, about 410. The works of Josephus, the Ecclesiastical History of Eusebius, and the writings of Gregory Nazianzen and St Basil, were also translated by Rufinus.

RUGENDAN, GEORG PHILIPP, a celebrated battle-painter, born at Augsburg, in 1666. Such was his zeal for the advancement of his art that, during the siege of

Augsburg, he freely exposed himself amidst the fire and carnage, that he might be able to sketch the scenes around him. Died, 1742.

RUHNKEN, DAVID, a celebrated philologist, was born in Pomerania, in 1723. He studied at Wittenberg, and under Hemsterhuys, at Leyden, whose assistant in the professorship of Greek he became in 1757. Four years later he was appointed professor of eloquence and history, and was afterwards rector of the university, and keeper of the library. He edited the *Lexicon of Timæus*, and many classical works, with commentaries; wrote a *Life of his master and friend Hemsterhuys*, and various "Opuscula," which were published in a collected edition in 1797. Died at Leyden, 1798.

RUINART, THIERRY, a French theological writer, was born at Rheims, in 1657. He became a Benedictine, and was the associate of Mabillon in his literary labours. He also printed an edition of the works of Gregory of Tours, a volume on the Martyrs of the first four centuries, and other books on ecclesiastical history. He died in 1707.

RUMFORD, Count (a title conferred on him by the elector of Bavaria), whose real name was **BENJAMIN THOMPSON**, was born at Woburn, New England, in 1752. He acquired, when young, a knowledge of natural philosophy, and employed himself as a teacher, till he was raised to independence by an advantageous marriage, when he became a major in the militia of his native province; and when the war took place between Great Britain and her colonies, his local knowledge enabled him to render services of importance to the English commanders. He came to England, and obtained a situation in the foreign office. Towards the close of the war, he was sent to New York, where he raised a regiment of dragoons, of which he was appointed colonel, and returning to England in 1784, received the honour of knighthood. He was for some time one of the under-secretaries of state. Soon after he went to the continent, and through the recommendation of the prince of Deux-Ponts (afterwards king of Bavaria), entered into the service of the reigning elector-palatine and duke of Bavaria, when he effected many important and useful reforms in both the civil and military departments of the state. As the reward of his services, he received various orders of knighthood, was made a lieutenant-general, and created Count Rumford. He left Bavaria in 1799, and returned to England, where he employed himself in making experiments on the nature and application of heat, and on other subjects of economical and philosophical research. He suggested the plan, and assisted in the foundation, of the Royal Institution. In 1802 he removed to Paris, married the widow of the celebrated Lavoisier, and died in 1814.

RUMOHR, KARL FRIEDRICH LUDWIG FELIX VON, a distinguished German critic and historian, born near Dresden, in 1785. He began a course of study at the university of Göttingen, but soon left it for his favourite art-studies. He visited the principal German galleries, and went to

Italy in 1804, to study the great works of art at Rome, Florence, and other cities. He revisited Italy in 1815 and 1828 for the same purpose, and also to search for and examine original documents relating to the history of art and the biography of artists. The fruits of his investigations appeared in his great work entitled "*Italienische Forschungen*," which was published in 1827 and 1831. It is highly esteemed, and has contributed to the correction of various errors, and to the clearing up of many doubtful matters in the history of art. Rumohr was author of many other works on art, some poems, tales, and political pieces. Among them may be named "*Drei Reisen nach Italien*;" "*Zur Geschichte und Theorie der Formschneidekunst*;" and "*Der letzte Surlilo*," and "*Raphaels Lehr- und Wanderjahre*," poems. Rumohr was the friend of Wilhelm and Alexander von Humboldt, of Thorwaldsen, Koch, the two Tiecks, Overbeck, &c. Died at Dresden, 25 July, 1843.

RUMPF, GEORG EVERARD, botanist, was born at Solm, in Germany, in 1626. He took his doctor's degree in physic, after which he went as consul and senior merchant to Amboyna, where he made valuable botanical collections, the results of his labours being published by Burman, in 1751, under the title of "*Herbarium Amboinense*." Died, 1693.

RUNCIMAN, ALEXANDER, a Scotch painter, was the son of an architect, and born at Edinburgh, in 1736. After serving his time to a portrait painter, he went to Rome with his brother John, a promising artist, who died in Italy. Alexander continued his studies, and on his return home was employed by Sir James Clerk to decorate his house with scenes from Ossian. Among his pictures are, an "Ascension," in the episcopal chapel at Edinburgh; "*Lea*," "*Andromeda*," and "*Agrippina*." Died, 1785.

RUNJEET SINGH. [SINGH.]
RUPERT, or ROBERT, of HAVARIA, Prince, the third son of Frederick, elector-palatine, by Elizabeth, daughter of James I., was born in 1619, and received a military education. He commanded the cavalry of Charles I. during the civil war, and on various occasions manifested the most daring valour; but his impetuosity and imprudence more than counterbalanced the effects of his bravery: and at length, having surrendered Bristol to General Fairfax, by whom it was besieged, the king dismissed him from his service. The prince, however, was more successful as a naval commander, particularly after the Restoration, in the great Dutch war; on the conclusion of which he led a retired life, occupied wholly in scientific pursuits. He invented a composition, called "*prince's metal*," improved the strength of gunpowder, found out a method of fusing black lead, and practised the art of engraving in mezzotint. He was an active member of the Board of Trade; and to his influence is ascribed the establishment of the Hudson's Bay Company, of which he was governor. Died, 1682.

GEORGE PHILIPP, a cele-
brated painter, born at Augsburg, in
his zeal for the advance-
ment, during the siege of

was educated at Princeton College; took his degree at Edinburgh, in 1768; was chosen a member of congress for Pennsylvania, in 1776; was appointed professor of medicine and clinical practice at the university; and died in 1813. During the devastation caused by the yellow fever in 1793, Dr Rush highly distinguished himself, and his history of that epidemic is a work of great value. He also wrote "Medical Inquiries and Observations," and "Essays, Literary, Moral, and Philosophical."

RUSHWORTH, JOHN, historian, was born in Northumberland, in 1607; studied at Oxford, and became a barrister. In 1640 he was appointed assistant-clerk of the House of Commons, was much employed in negotiations during the civil wars, and after the Restoration he became secretary to the Lord-keeper Bridgeman. His "Historical Collections," in 8 vols., is a laborious and useful compilation.

RUSSELL, EDWARD, of Orford, a British admiral, was born in 1651. He became gentleman of the bed-chamber to James, duke of York; but on the execution of his cousin, Lord William Russell, he retired from court, and was an active promoter of the revolution. He gained the celebrated battle of La Hogue, in 1692, commanded subsequently in the Mediterranean, was first lord of the admiralty, and died in 1727.

RUSSELL, MICHAEL, LL.D., bishop of Glasgow and Galloway, was born at Edinburgh, 1781; studied at Glasgow, and having received ordination, was in 1808 appointed to St James's chapel, Leith, where he continued to officiate till his death. To extensive acquirements, theological and literary, Dr Russell added the pen of a ready and elegant writer. His contributions to the Encyclopaedia Metropolitana and the British Critic were remarkable for their learning and research; his works on Palestine, Egypt, and various other publications written for the Cabinet Library, still hold their ground; and his "Connection of Sacred and Profane Histories" extended his fame far beyond the limits of his native land. On his elevation to the episcopal chair in 1837, the university of Oxford marked its respect for his character and attainments by conferring on him the degree of D.C.L., by diploma; an honour never before bestowed on a Scotchman not educated at Oxford. Died, 1848.

RUSSELL, WILLIAM, fifth earl, and first duke of Bedford, was born in 1614; received his education at Magdalen College, Oxford; was a member of the Long Parliament in 1640, and commanded the reserve of horse at the battle of Edgehill; but in 1643 he joined the royal standard, and fought with great bravery at the battle of Newbury. He was not, however, in favour with the royal party, and he retired to private life till the Restoration, when he assisted at the coronation, and was elected a knight of the Garter. He also attended the coronation of William and Mary, who, in 1694, made him marquis of Tavistock and duke of Bedford. Died, 1760.

RUSSELL, WILLIAM, Lord, third son of the preceding, was a distinguished supporter of constitutional liberty, and was

born 1639. In 1679, when Charles II. found it necessary to ingratiate himself with the Whigs, Lord Russell was appointed one of the members of the privy-council. He soon, however, found that his party was not in the king's confidence, and the repeal of the duke of York, without their concurrence, induced him to resign. Although his temper was mild and moderate, his fear of a Catholic succession induced him to take decisive steps for the exclusion of the duke of York. In June, 1680, he went to Westminster Hall, and, at the court of King's Bench, presented the duke as a recusant; and, in November following, carried up the exclusion bill to the House of Lords, at the head of 200 members of parliament. The king dissolved the parliament, resolved to govern thenceforward without one; and arbitrary principles were openly avowed by the partisans of the court. Alarmed at the state of things, many of the Whig leaders favoured strong expedients, and a plan was formed for a simultaneous rising in England and Scotland. Among these leaders, including the dukes of Monmouth and Argyle, the Lords Russell, Essex, and Howard, Algernon Sidney, and Hampden, different views prevailed; but Lord Russell looked only to the exclusion of the duke of York. He was, however, accused of having engaged in "the Rye-house Plot," which had for its object the assassination of the king on his return from Newmarket; and on this pretext he was committed to the Tower, tried, condemned, and executed in July, 1683, being then in the 44th year of his age. After the revolution, the proceedings against him were annulled. A portrait of Lord W. Russell has been recently added to the National Portrait Gallery.

RUSSELL, LADY RACHEL, wife of the preceding, was daughter of the earl of Southampton, and widow of Lord Vaughan. In 1667 she was married to Lord William Russell; and the affectionate zeal with which she assisted him when in trouble, and the magnanimity of her behaviour after his death, have excited for her general respect and sympathy. Being refused counsel upon his trial, and allowed only an amanuensis, she accepted that office, and took down the notes. She survived his lordship 40 years, which period she occupied in the discharge of pious and social duties. Her "Letters," which do equal credit to her understanding and heart, have been often reprinted. Died, 1723. A Memoir of Lady Rachel Russell has been written by M. Guizot.

RUSSELL, WILLIAM, an historical writer, was born in Midlothian, in 1746. He was brought up as a printer, which business he followed for a time, and then became author by profession. He is now known chiefly by his "History of Modern Europe," 4 vols. 8vo; "A History of Ancient Europe," which was left unfinished at his death, in 1793, was completed in 3 vols. by Dr Coote.

RUTHERFORD, DANIEL, natural philosopher and physician, was born at Edinburgh, in 1749; studied in the university; succeeded Dr John Hope as professor of botany and keeper of the botanic garden, in 1786; and died in 1819. Dr Rutherford was the discoverer of nitrogen, and was the

first who represented oxygen gas (then called vital air) as the necessary constituent of all acids.

RUYSCH, FREDERICK, an eminent anatomist, was born in 1638, at the Hague, and died in 1731. He was professor of anatomy at Amsterdam, and was very skilful in making anatomical preparations. His anatomical works were collected and published in 1737. —His son HENRY published "Theatrum Animalium," 2 vols. folio.

RUYSCH, RACHEL, daughter of the preceding, was one of the most celebrated painters of fruit and flower pieces, and was born at Amsterdam in 1664, and died in 1750. Her pictures are distinguished for truth and splendour of colouring, united with great finish.

RUYSDAEL, JACOB, a celebrated Dutch painter, was born at Haarlem, about 1625. He stood unrivalled in the representation of woods and waters, particularly waterfalls; and died in 1681. Ruysdael is supposed to have been the master of Hobbema. The National Gallery has three of his works.

RUYTER, MICHAEL ADRIAN, a gallant Dutch admiral, was born in 1607, at Flushing. He entered the naval service when he was only 11 years old, and by dint of bravery and skill, rose to the summit of his profession. On many occasions he nobly distinguished himself when engaged against the English, especially in the terrible battle fought in February, 1653, near the mouth of the Channel, when Blake commanded the English, and Van Tromp and Ruyter the Dutch. In the reign of Charles II., Ruyter gained an advantage over Prince Rupert and Monk; but, two months afterwards, another battle was fought, in which the Dutch were defeated. The following year, however, he avenged himself, by sailing up the Thames, and destroying several English men of war at Sheerness. He died in the port of Syracuse, in 1676, in consequence of a wound received a few days before, when engaging with the French fleet off Messina.

RYCAUT, SIR PAUL. [RICAUT.]
RYLAND, WILLIAM WYNNE, engraver, was born in London, in 1732. He attained great excellence in his art; but his end was melancholy, for, in order to extricate himself from some embarrassments, he, in 1782, committed a forgery on the East India Com-

pany, and was tried and executed the year following.

RYMER, THOMAS, critic and antiquary, was a native of Yorkshre; studied at Cambridge and at Gray's Inn; and, succeeding Shadwell, in 1692, as royal historiographer, employed the opportunities afforded him by his office, to make a valuable collection of public treaties, which he began to publish in 1704, under the title of "Fœdera, Conventiones, et ejusequæ Generis Acta publica, inter Reges Angliæ, et alios Principes." This now well-known work extended to 15 vols. folio, five more being added by Robert Sanderson. Besides several minor works, Rymer left an unpublished collection relating to English history, in 88 vols., now in the British Museum. Died, 1713.

RYSBRACH, JOHN MICHAEL, an eminent sculptor, was born at Antwerp in 1693. He was the son of a painter, studied his art under Vander Voorst, and in 1720 settled in England. He made himself gradually known, and was at length employed on almost all important works of sculpture commissioned in this country. Among his very numerous statues, busts, and monuments, may be named the equestrian statue of William III., at Bristol; the monument to the great duke of Marlborough, at Blenheim; statues of Sir Isaac Newton, in Westminster Abbey; of Locke, at Oxford; of George II., at Greenwich Hospital; and the celebrated figure of Hercules, at Stourhead. The reputation of Rysbrach declined, as that of Scheemmaker and Boulliaue increased. Died, 1770.

RZEWUSKY, or RZEWIESKY, WENCESLAUS, a Polish nobleman, born in 1705. After travelling through the principal countries of Europe, he filled various high offices, among which was that of grand general of the crown, to which he was appointed on the invasion of Poland by the Tartars, in 1739. Having opposed the election of Stanislaus Poniatowski to the throne, he gave great offence to the empress, and was subjected to six years' imprisonment in Russia. As he possessed an extensive acquaintance with natural philosophy, and indulged his taste for literature, music, &c., he employed himself during his confinement in these pursuits. He translated the Odes of Horace, and was the author of some poems, dramas, and other works. Died, 1779.

S.

SAADI, Sheikh MOSLIM EDDIN, one of the most celebrated poets of Persia, was born at Shiraz, in 1175, and died in the 116th year of his age. He studied at Baghdad, and pursued a religious course of life under the direction of the famous Sophi Abd al Kadir Ghilani, whom he accompanied on a pilgrimage to

Mecca. He afterwards made the same pilgrimage fourteen times. He fought against the Infidels, and extended his wanderings into India and Asia Minor. Being, however, taken prisoner by the Turks, he was put to work on the fortifications of Tripoli; but was redeemed by a merchant of Aleppo, who

gave him his daughter in marriage with a dowry. Towards the close of his life he built a hermitage near the walls of Shiraz, where he passed his time in exercises of piety; and his tomb, on the spot where he had lived, was long visited by the admirers of his genius and devotion. The "Gullstan" is the most celebrated of Saadi's works. It is a collection of unconnected moral stories, historical and fictions, with admixture of verse. It has been several times translated into English, German, French, and Dutch. The "Bostan" is of like character, but entirely in verse. His other works consist of miscellaneous odes and essays.

SAAVEDRA. [CERVANTES.]

SAAVEDRA FAXARDO, DIEGO DE, a Spanish writer and diplomatist, was born at Algezars, in Murcia, in 1584. He became secretary to the embassy at Rome, and afterwards was appointed ambassador for Spain at the papal court. He took part in important diplomatic negotiations for more than 30 years in Italy and Switzerland, and received the collar of St Jago, a canonry of the church, and a seat in the council of the Indies. His "Idea de un Principe Politico-Christiano" was translated into Latin, French, and Italian, and with his other works has been frequently republished. He died in 1648.

SABATIER, ANTOINE, was born at Castres, in 1742. He was a very celebrated French writer, and was early connected with Helvetius and the philosophical party; but he soon left them, and showed his opposition to them in his work, "Les Trois Siècles de la Littérature Française." He emigrated at the revolution. At the Restoration he obtained but a small income, and continued his attacks on the court and clergy, till sickness reduced him to find shelter in the house of the Charitable Sisters at Paris, where he died in 1817.

SABATIER, or SABBATHIER, PIERRE, a learned Benedictine, born at Poitiers, in 1682. His great work was an edition of all the ancient Latin versions of the Bible, 3 vols. folio. Died, 1742.

SABBATINI, ANDREA, or ANDREA DA SALERNO, one of the first painters of the Neapolitan school, was born about 1480. He studied under Raphael, and imitated his Florentine manner with great success. He died at Naples, in 1545.—**LORENZO**, called also Lorenzino da Bologna, was another admired artist of the 16th century, and his pictures are sometimes mistaken for those of Andrea. He died at Rome, in 1577.

SABELLIUS, a distinguished heresiarch of the third century. He was an African by birth, and became a disciple of Noetus, and an eminent church teacher. He was one of the most profound thinkers who took part in the controversies respecting the insoluble problem of the nature of God and the mode of his existence. He was one of the so-called Monarchians, and especially insisted on the oneness of the Divine essence, treating the terms Father, Son, and Holy Spirit as merely different names for the same person according to the different relations in which he is conceived as standing to his creatures. Sabellius was opposed and formally con-

demned by Pappynsius of Alexandria, but his followers long existed as a distinct sect.

SABINE, JOSEPH, F.R.S., honorary secretary of the Horticultural Society, treasurer and vice-president of the Zoological Society, &c., was born in 1770, and was originally intended for the bar. In 1808 he was appointed inspector-general of taxes, which office he held for 26 years; and when it was abolished, in 1835, government allowed him a compensation pension of £350 per annum. Mr Sabine was a most accomplished man; and for many years previous to his death, which occurred in January, 1837, his time was almost wholly engrossed in managing the affairs of the scientific institutions of which he was a functionary.

SABINUS, GEORGE (in German, SCHELTEN), a modern Latin poet, was born in Brandenburg, in 1508. He studied at Wittenberg, when but 15 years old, under Melancthon, whose eldest daughter he married. He became professor of the belles lettres at Frankfurt-on-the-Oder, and afterwards rector of the new university of Königsberg. His great reputation made him known to the Emperor Charles V., who ennobled him, and employed him on several embassies. Died, 1560.

SACCHIETTI, FRANCO, Italian poet and novelist, was born at Florence, about 1335. He was probably engaged in commerce during part of his life, was a member of the council of Eight in his native city, and subsequently held the chief magistracy in several towns successively. He was the contemporary and friend of Boccaccio, and like him, one of the earliest Italian prose writers. His "Novelle" were reckoned inferior only to those of Boccaccio, and were cited as models of style by the academicians of La Crusca. They were not printed till 1721. Sacchetti was author of a comic poem, entitled "La Battaglia delle Vecchie e delle Fanciulle," printed or reprinted in 1819. Died, probably between 1400—1410.

SACCHI, ANDREA, an eminent Roman painter, born in 1598. He studied under Albano; and, assisted by the patronage of Pope Urban VIII., his talent raised him to great eminence. The churches and palaces of Rome contain many specimens of his skill and genius. Died, 1661.

SACCHINI, ANTONIO MARIA GASPARE, a celebrated Italian composer, was born at Naples, in 1735. He studied under Durante, and, after being employed in Rome, Venice, and several other cities of Italy with great éclat, he came to London, where he composed several operas. Meeting some opposition there, he left for Paris, where he reached the height of his fame, and obtained a pension from the queen. He died in 1786, leaving upwards of 80 dramatic pieces.

SACHEVERELL, HENRY, an English divine, was educated at Oxford, where, in 1708, he obtained the degree of D.D. In 1709 he was appointed preacher at St Saviour's, Southwark, during which period he preached his two famous sermons, the object of which was to create alarm for the safety of the church, and to excite hostility against the dissenters. Being impeached in the House of Commons, he was sentenced to be

[SAC]

suspended from preaching for three years. This persecution, however, established the fortune of Sacheverell, who was collated to a living near Shrewsbury; and the same month that his suspension terminated, he was appointed to the valuable rectory of St Andrew's, Holborn. His abilities, however, were poor and contemptible. Died, 1724.

SACHS, HANS. [HANS SACHS.]

SACKVILLE, GEORGE, Viscount, soldier and statesman, and was born in 1716. He was educated at Westminster, and afterwards at Trinity College, Dublin, when his father was lord-lieutenant of Ireland. Entering the army, he distinguished himself at the battles of Dettingen and Fontenoy; and in 1758 he was made a lieutenant-general; but the year following he fell into disgrace for his conduct at the battle of Minden, where he commanded under Prince Ferdinand of Brunswick, whose orders to advance with his troops during the engagement he disobeyed. His behaviour being, at home, attributed to cowardice, he was tried by a court martial, and sentenced to be dismissed from the service. Under the administration of Lord Bute, however, he was restored to favour, and in 1775 he was appointed colonial secretary of state, which office he held during the American war. On quitting office, in 1782, he was created viscount. On succeeding to the estate of Lady Germaine, he took, and was for a long time known under, that name. He died in 1785. From his talent, and the bias of his opinions, the "Letters of Junius" have been attributed to his pen.

SACKVILLE, THOMAS and CHARLES. [DORSET, Earl of.]

SACY, LOUIS ISAAC, whose real name was LE MAISTRE, was born at Paris, in 1613. He entered into orders, and was chosen director of the nuns of Port Royal, where he settled, and to which he gave the chief part of his property. Persecuted as a Jansenist, he quitted Port Royal in 1661, and concealed himself, but his retreat was discovered in 1666, and he was sent to the Bastille, where he was confined three years. He spent his time chiefly in making a new translation of the Scriptures. Died, 1684.

SACY, ANTOINE ISAAC SYLVESTRE, Baron de, a celebrated French orientalist, was born at Paris in 1758. At an early age he was inspired with a taste for oriental languages, by the learned Benedictine, Bertheureau, and he made rapid progress in them. He was elected associate of the Academy of Inscriptions in 1785, and assisted in the preparation of Notices and Extracts of unedited manuscripts in the Royal Library. He continued his studies, and was forgotten during the Reign of Terror; became a member of the Institute on its reorganization by Napoleon; and in 1808 was named professor of Persian at the College of France. The same year he was chosen a member of the Legislative Body, and sat in it till 1814; when on the return of the Bourbons he became a member of the Chamber of Deputies, and afterwards was for some years a member of the Commission of Public Instruction. After the accession of Louis Philippe, de Sacy was created a peer

of France and keeper of oriental manuscripts in the Royal Library. He was one of the founders and first president of the Société Asiatique. His principal works are, "Principes de Grammaire Générale;" "Chrestomathie Arabe;" "Grammaire Arabe;" "Callia et Dimna," the Arabic text with a French translation of the fables of Bidpai; and "Exposé de la Religion des Druses." Died, suddenly, at Paris, in February, 1838.

SADEEL, ANTOINE, a learned French Huguenot and theological writer, was born of a noble family, in the Maçonnais, in 1534. At an early age he preached the reformed faith; for which, however, he was imprisoned, but obtained his release through the interposition of his royal patron, Henry of Navarre. When Henry became king of France he made Sadeel his chaplain, and he attended that monarch in some of his campaigns; but, on the reconciliation of the king to the church of Rome, he retired to Geneva, where he was chosen pastor and Hebrew professor. He died in 1591, and his works were printed the following year.

SADELER, HANS or JEAN, a distinguished engraver, was born at Brussels, in 1550. He executed many masterly works, and was honoured by the patronage of the elector of Bavaria. Died, 1610.—RAPHAEL, brother and pupil of the above, was born in 1553. He worked in conjunction with his relative, and executed upwards of 500 engravings.—GILLES, the nephew and pupil of the above brothers, excelled both of them in correctness and taste. He was born at Antwerp, in 1570, went to Prague on the invitation of the Emperor Rudolph, and there executed most of his works. Died, 1629.

SADI. [SAADI.]

SADLER, MICHAEL THOMAS, F.R.S., was born at Snelston, in Derbyshire, in 1780; and it may be truly said of him that he was a scholar, an orator, a gentleman, and a philanthropist. He had chiefly devoted himself to mercantile pursuits at Leeds until 1829, when he was elected M.P. for Newark-upon-Trent. At the general election (1830) he was again returned for Newark; and, in the ensuing year, for Aldborough, Yorkshire. His chief object in parliament was to benefit the poor, for the agricultural portion of whom he sought parliamentary aid, to provide them with allotments of ground, &c.; while for Ireland he eloquently urged the necessity of a well-regulated system of poor laws. To spare the sacrifice of life among the children employed in the manufactories was another of his great objects; and on each he wrote as forcibly and clearly as he spoke. His parliamentary exertions, and the intense anxiety they occasioned, are said to have been the primary cause of his death, which occurred in July, 1835, while he was in Ireland. Mr Sadler's two principal works were, "Ireland, its Evils, and their Remedies," and his "Law of Population," in which the Malthusian doctrines were impugned.

SADLER, or SADLER, Sir RALPH, an English statesman, was born in 1507, at Hackney, in Middlesex. In early life he enjoyed the patronage of Thomas Cromwell, earl of Essex, who introduced him to Henry VIII., in consequence of which he was employed

[SAC]

alexandria, but his distinct sect.

, honorary secretary, treasurer of the Royal Society, was originally in the office he was appointed to which office he was abolished, and him a compensation. Mr Sadeel man; and for his death, which his time was all in managing the situations of which

German, SCHEPPEL, was born in 1335. He studied at Wittenberg, under Meier, who married. He wrote belles lettres at and afterwards rector of Königsberg. He was known to the emperor, and his embassy. Died,

Italian poet and orator, about 1335. He was engaged in commerce as a member of the Venetian city, and sub-magistrate in Venice.

He was the contemporary of the Italian prose writers, and inferior only to them. He was cited as an authority in the printed till 1721. He wrote comic poem, entitled Vecchi e delle, reprinted in 1819. 1400—1410.

eminent Roman orator. He studied under the patronage of the emperor, and raised him to the rank of consul, and his specimens of his oratory.

MARIA GASPARE, a composer, was born at Venice, and died in Rome, Venice, in 1758. He was of Italy with great talents, where he composed some operas. He died in 1758, and his dramatic pieces.

DRYDEN, an English poet, was born at Aldworth, in the county of D. In 1709 he was elected a member at St Saviour's, and he preached during the period he was employed for the safety of the city, and he was imprisoned in the Tower, and sentenced to be

In many political affairs, and in the dissolution of the monasteries, partaking also of the spoil. He was sent on various embassies to Scotland; and at the battle of Musselburgh, Sir Ralph greatly distinguished himself, and was made a knight banneret in reward of his services. At the accession of Elizabeth he was again sent to Scotland; and when Queen Mary came to England, she was for a time committed to his care. He died in 1587. A collection of his "Letters and Negotiations" was published in 1809, in 2 vols. 4to, with a memoir, written by Sir Walter Scott.

SADLER, WILLIAM WINDHAM, a well-known aeronaut and chemist. He was in the establishment of the first gas company in Liverpool, where he also erected accommodations for warm, medicated, and vapour baths. During this period, however, he practised aerostation, and made 30 aerial voyages, in one of which he crossed the Irish Channel, from Dublin to Wales. In the last attempt from Blackburn, in Lancashire, Sept. 30, 1824, while descending, the ear of his balloon struck against a chimney, and violently precipitated him to the earth and caused his death, aged 28.

SADOLETO, JACOPO, a learned cardinal, was born at Modena, in 1477. His father was professor of jurisprudence at Ferrara, where he received his education, and attained great celebrity by his Latin poetry and philosophy. On the election of Leo X. to the pontificate, he was made one of his secretaries, and soon after bishop of Carpentras. He suffered much from the vicissitudes of war, and was several times compelled to quit the city, leaving his palace, &c., to the plunder of the soldiery. Clement VII. restored him to his office; and the succeeding pontiff, Paul III., again recalled him to Rome, raised him to the purple, and employed him on many negotiations. Died, 1547.

SAEMUND, SIGFUSSON, a celebrated Icelandic priest, poet, legislator, and historian of the 11th century. He had a share in forming the ecclesiastical code, wrote a "History of Norway," and was the compiler of the collection of Scandinavian poetry and mythology termed "The Edda," printed at Copenhagen, in 1787, 4to. Died, 1135.

SAGE. [LE SAGE.]

SAHAGUN, BERNARDINO DE, Spanish historian, was born at Sahagun, in Spain. He was educated at Salamanca, entered the Franciscan order, and in 1529 was sent as a missionary to Mexico. There he laboured with great zeal and disinterestedness through a long life, studied also the history, antiquities, and traditions of the country, and wrote several voluminous works in illustration of them. The most important of these, and the only one yet printed, is the "Historia Universal de Nueva España," which he first wrote in the Mexican language, then translated into Castilian, and sent both versions to Madrid for publication. But the manuscript was no more heard of, except as a valuable lost work, till the close of the 18th century, when it was discovered in a convent at Folosa by Muñoz. It was first published by Bustamante, at Mexico, in 1829; and in the following year it was published in England by Lord Kingsborough, who believed

that he was the first to give it to the world. Sahagun's work is the most important authority on the religion and antiquities of the Aztecs, and is frequently cited by Prescott. Sahagun died at Mexico, at an advanced age, in 1590.

ST AIGNAN. [BEAUVILLIER.]

ST ARNAUD, JACQUES ACHILLE LEROY DE, marshal of France, was born at Paris in 1801. He entered the army in 1816, but after several years' service he quitted it and became an actor. Ten years he gave to the stage, and in 1831 re-entered the army. He assisted in the suppression of the insurrection in La Vendée, excelled by the duchess of Berri, and was charged with her custody in the castle of Blaye. In 1836 he was sent to Algiers, and there he remained fifteen years. He distinguished himself at the siege of Constantine, displayed a brilliant and dashing courage throughout the various campaigns of the war, and was rapidly promoted. He became a member and commander of the Legion of Honour, general of brigade in 1847, and three years later commander of the province of Constantine. In 1851 he conquered the country of the Kabyles, was named general of division, and on his return to Paris was made, in October, 1851, by Louis Napoleon minister of war. He became the intimate friend and supporter of the president, took a leading part in the *Coup d'Etat* of 2nd December, 1851, by which the republic was overthrown, and was made senator, marshal, and grand cross of the Legion of Honour. In 1854 he was intrusted with the chief command of the French army sent to the Crimea, and entered upon his duties with great spirit and energy, distinguishing himself especially at the battle of Alma. But his health had long been broken, and a week after the battle he left the Crimea, and embarked for Constantinople. Died at sea, September 29th, 1854. A pension of 20,000 francs was granted to his widow.

ST CROIX, GUILLAUME EMANUEL JOSEPH, Baron de, a learned French writer, was born at Montmoiron, in 1746; studied at the Jesuits' College, Grenoble; obtained the rank of captain in the grenadiers, but quitted the army for literary pursuits; suffered greatly during the revolution, and died in 1809. His principal work is a "Critical Examination of the Historians of Alexander the Great."

ST CYR. [GOUVION ST CYR.]

ST EVREMOND. [EVREMOND.]

ST GERMAIN, CLAUDE LOUIS, Count of, French general, minister of war under Louis XVI., was born of a noble but poor family in 1707. He first entered the army of the elector-palatine, and learnt the art of war under Prince Eugene; served afterwards in the Bavarian army; and after a visit to Berlin for the purpose of offering his services to Frederick the Great, whose rigorous discipline frightened him from doing so, he entered the French army. He was created lieutenant-general in 1748, and soon after was appointed commander in Lower Alsace. He was employed in the Seven Years' War, commanded a corps under Marshal Soubise at the battle of Rossbach, and saved the remnants of the French army after the defeat; was

defeated at Crevelt, and covered the retreat to Minden. He next served on the lower Rhine in co-operation with the duke de Broglie, and took part in the combat of Corbach. Slighted and disgraced, he passed in 1762 into the service of Denmark, and was charged to reorganize the army. He returned to France in 1768, lost his property by the failure of his banker, was presented to Louis XVI. at Fontainebleau, in October, 1775, and on the suggestion of Turgot was appointed secretary of state in the ministry of war. He entered heartily into the hopeless struggle then going on for financial and general reform, and falling like his colleagues, resigned in September, 1777. Died at the Arsenal, January, 1778.

ST HILAIRE. [GEOFFROY.]
ST JOHN, HENRY. [HOLINGBROKE, Viscount.]

ST JUST, ANTOINE, one of the associates of Robespierre, was born in 1768, and was educated for the legal profession. He voted for the death of Louis XVI., materially assisted in the destruction of the Girondists, acted as a commissioner of the National Convention to the army in Alsace, where he was distinguished for his severity; and, on his return to Paris, becoming involved in the ruin of Robespierre, was guillotined in July, 1794. This demagogue, who was the author of several works, among which were some licentious poems, has often been confounded with LOUIS LEON ST JUST, the writer of "Esprit de la Révolution, et de la Constitution de France."

ST LAMBERT, CHARLES FRANÇOIS DE, a French poet, and member of the Institute, was born at Nancy, in 1717. He entered the army, but left it at the peace of Aix-la-Chapelle, and obtained an office in the court of Stanislaus of Poland; became a devoted adherent of Voltaire, and a favoured admirer of Madame du Chastellet; again entered the army, and died in 1805. Among his works are, "The Seasons" a poem; "Oriental Tales," and a philosophical work, in 3 vols., entitled "Catechisme Universelle." He also contributed to the Encyclopédie.

ST MARTIN, LOUIS CLAUDE DE, a celebrated French mystic, styled "the Unknown Philosopher," was born at Amboise in 1743. He was of an honourable family, and received a careful and religious education. The first book which gave a decided beat to his mind, and led him to meditation on divine mysteries, was the "Art de se connaître Soi-même," of J. Abbade. For a short time he was set to study law, and then he entered the army. He soon quitted it, however, and with restless, unsatisfied spiritual nature, he fell under the influence of the Portuguese Jew, Martinez Pasqualis, and became one of his disciples. His cultivated and refined nature was attracted by the higher order of mysticism, and while desirous of spreading the spiritual doctrines which satisfied him, he aimed to do so unobtrusively. He was not a recluse, but moved and was welcomed in the best society. He was at one time a friend of Lalande, and afterwards of Rousseau. Richelieu was also his friend and protector. St Martin visited Italy in 1775 and 1787, being on the second occasion

the companion of Prince Alexis Galitzin. He spent about three years at Strasburg after his return, where he found congenial society, and first studied the works of Jacob Böhme. Expelled from Paris as a noble, in 1794, he retired to his native district, looking with a wise and steady hopefulness on the revolution. His first and best work is entitled—"Des Erreurs et de la Vérité," published in 1775. He translated some of Böhme's works, and wrote numerous original treatises. Died at Annay, near Paris, 1803.

ST PAIAYE, JEAN BAPTISTE DE LA CURNE DE, a learned and ingenious writer, born at Auxerre, in 1697; died, 1781. He studied the manners and customs of ancient France with great diligence and success, and wrote "Mémoires sur l'ancienne Chevalerie," 3 vols., which have been translated into English. After his death, the Abbé Millot published another work of his, entitled "L'Histoire des Troubadours," 3 vols.; and he left a voluminous collection of MSS.

ST PIERRE, CHARLES IRÉNÉE CASTEL DE, a French publicist and miscellaneous writer, was born at St Pierre, in Normandy, in 1658. He was brought up as an ecclesiastic; hence he is generally known as the Abbé de St Pierre; but he was more distinguished as a politician and philanthropist. Cardinal Polignac took him to the conferences at Utrecht, where he formed a project for a diet to secure a perpetual peace; which Cardinal Dubois called "the dream of a good man." He had the boldness to expose the errors of the government of Louis XIV., and to deny that monarch's right to the epithet of "Great," for which he was expelled the Academy. His works form 18 vols. 12mo. His aim through life was the social elevation of the people; and some of his ideas, though treated with ridicule at the time he wrote, have since been carried out. Died, 1743.

ST PIERRE, JACQUES HERNARDIN HENRI DE, a French miscellaneous writer, was born at Havre, in 1737, was educated in the engineer school at Paris; for a time followed the military profession in the service of Russia; afterwards obtained a commission in the engineer corps of France; spent three years in the Isle of France, about 1770-73; and, retiring from a military life, he devoted the remainder of his days to literature. In 1784 appeared his "Etudes de la Nature," and in 1788, his "Paul et Virginie," which, after passing through 50 impressions in one year, has been translated into almost all the languages of Europe. "For many years," says Humboldt, "it was the constant companion of myself and my valued friend and fellow-traveller Bonpland; and often, in the calm brilliancy of a southern sky, or when in the rainy season the thunder re-echoed and the lightning gleamed through the forests that skirt the shores of the Orinoco, we felt ourselves penetrated by the marvellous truth with which tropical nature is described in this little work." Carlyle has called it "the swan-song of old dying France." Napoleon conferred on St Pierre the order of the Legion of Honour, and Joseph Buonaparte granted him a pension of 6000 francs. St Pierre was also the author of "La Chau mière Indienne," "Harmonies de la Na-

ture," and several other works, all marked by elegant taste and philosophical feeling. Died, 1814.

ST SIMON, CLAUDE HENRI, Count de, the celebrated French social philosopher, founder of the school of Saint-Simonians, was born at Paris in 1760. He studied under d'Alembert, served twelve years in the army—three of them in the American war,—was imprisoned during the Reign of Terror; and soon after, with the conviction that society must be fundamentally reformed, and that he was the man to do it, he devoted himself for ten years to a laborious course of preparation for his self-chosen task. He aimed to acquire by study, travel, and personal experience, the knowledge of the sum of human thought, science, pleasure, and suffering, in order that he might find the highest starting-point for the future in the present. In the process he expended his fortune and reduced himself to want, but adhered constantly to his views and resolutions. The first public announcement of the fundamental ideas of his system was made in 1807, when he published his "Introduction aux Travaux Scientifiques du 19^e Siècle." Years elapsed before his theories attracted much attention, but about 1814 several young men, afterwards distinguished, became his disciples. Among these were Olinde Rodrigues, Augustin Thierry, and Auguste Comte; and later, Bazard, and (Père) Enfantin. Disheartened, nevertheless, by the slow progress of his doctrines, and struggling with poverty, St Simon attempted, in 1823, to kill himself. He failed in the attempt, but lost an eye. Among the works in which he expounded his system, are, "De la Réorganisation de la Société Européenne," written in conjunction with Thierry; "L'Industrie, ou Discussions politiques, morales, et philosophiques;" "Catechisme des Industriels;" with Comte; and "Nouveau Christianisme," his last work. He started and edited the periodicals entitled "Le Producteur," and "L'Organisateur," which were continued by his followers after his death. The leading idea of Saint-Simonianism is the supremacy of industry as the grand definitive aim of human society. He desired a new organization of society, in which capacity to labour, intellectually or physically, should determine the gradation of rank, and each man's place. He recognized religion as a necessity of man, and Christianity as the true religion; but held its progressive development, and in his last work proposed to carry this on a step further. Died at Paris, 1^o May, 1825.

ST SIMON, LOUIS DE ROUVROI, Duke of, was born in 1675. He entered the army early, and served in the campaigns in Flanders, was a member of the Council of Regency under the duke of Orleans, and in 1721 was appointed ambassador extraordinary to the court of Spain, to negotiate a marriage between the Infanta and Louis XV.; and died in 1755. His Memoirs of the Reign of Louis XIV. and the Regency contain a vast mass of information, and possess great historical value as a vivid, and on the whole truthful, representation of the times. A complete edition of the Memoirs did not

appear till 1830. A better edition, collated with the original manuscript by M. Chéruel, appeared in 20 vols. 8vo. in 1856-7. And M. Chéruel has this year (1865) completed his task by the publication of a valuable work entitled, "M. de Saint-Simon considéré comme Historien de Louis XIV." It consists of a biography and a critical examination of some portions of the Memoirs.

ST VICTOR, ADAM OF, one of the most distinguished Latin hymnologists of the middle ages, flourished in the 12th century. He is called a Briton, but it is unknown whether he was a native of England or of Brittany. He studied at Paris, where he entered the religious foundation of St Victor, and spent his whole life there; surviving till 1172, or more probably till 1192. He was buried in the cloister, and his epitaph, engraved on copper, existed till the French revolution. Adam of St Victor was the personal friend of Thomas Becket, who during his exile found a home at St Victor's. Till recently but a small portion of his Hymns were known; but thanks to the researches of M. Gautier in the Imperial Library of Paris, a considerable addition has been made to their number, and the whole were published by him, with an Essay on his Life and Works, in 1858. A selection of these hymns, with an interesting critical notice, forms part of Archbishop Trench's "Sacred Latin Poetry."

ST VINCENT, Earl of. (JERVIS, JOHN.) SAINTINE, XAVIER BONIFACE, French litterateur and dramatic writer, born at Paris, in 1798. He published, in 1823, a volume of "Poèmes, Odes, et Epitres," and about the same time became one of the collaborateurs of Eugène Scribe, and wrote a great number of dramatic pieces. His reputation rests, however, on his "Piccola," a most touching story of a flower and a prisoner, of which twenty-four editions have appeared in France. The tale was first published in 1836, and procured him, in the following year, the cross of the Legion of Honour, and the Montyon prize of the Academy. It has been translated into almost all languages, and several times into English. Among his other prose works are, "Jonathan le Visionnaire," "Le Mutile," "Les trois Reines," and "Seul." Died, January, 1865. "Saintine" is only a *nom de plume*; his family name is "Boniface."

SALADIN, or more properly, SALAH-EDDIN, the famous sultan of Egypt and Syria, was born about 1137, or A. H. 532. He was the son of Aynb or Job, of the pastoral tribes of Curds, and after passing in obscurity the first thirty years of his life, he followed, by command of the Sultan Nouredin, his uncle Shiracouh to Egypt, to combat the crusaders. By his courage and skill he contributed to the success of his uncle, who became grand vizier, and on his death succeeded him in that office. Without openly rebelling, he made himself master of Egypt, and was proclaimed sultan on the death of Nouredin, in 1173. He soon after undertook the conquest of Syria, took Damascus, Aleppo, and Diarbeckir, and protected Mecca and Medina from the attacks of Renaud de Chatillon. In 1187 he invaded the Holy

subsequently studied medicine, and died in 1742. He wrote the History and Antiquities of several of the English Counties, besides two works on the Roman Stations in Britain, and is esteemed for his accuracy and patient research.

SALVATOR ROSA. [ROSA.]
SALVI, GIAMBATTISTA. [SASSOFERRATO.]

SALVIATI, FRANCESCO ROSSI DEL, an eminent Italian painter, born at Florence, 1510; died, 1563. He was a fellow-student and friend of Vasari the biographer, and executed many works at Rome, Venice, Florence, and other Italian cities. He was also employed for a short time at Fontainebleau.

SANCERRE, LOUIS DE, constable of France, was born of an illustrious family in 1342. His father fell at Crecy, and he was brought up with the children of the duke of Normandy. At the age of 17 he served in the war against the English, and by his bravery attracted the notice of Bertrand Duguesclin, whose intimate friend he became. Created marshal by Charles V. in 1369, he took a brilliant part in the campaigns of 1372—1375, in which Poitou and part of Guenne were recovered by the French. With Duguesclin and Clisson he undertook, in 1380, to drive the English out of Guenne, and though Bertrand was killed at the first siege, and Clisson returned to Paris, Sancerre continued the enterprise. He assisted at the coronation of Charles VI., contributed to the victory of Rosebecque in 1382, and again passed into Guenne to oppose the English. Sancerre was named Constable in 1397, and died in 1402.

SANCROFT, WILLIAM, archbishop of Canterbury, was born at Fressingfield, in Suffolk, in 1616. In 1664 he was made dean of York; then dean of St Paul's, and, in 1677, he was raised to the highest station in the church of England, in which he conducted himself with zeal and judgment. He was one of the seven bishops sent to the Tower by James II.; but at the revolution he refused to take the oaths, for which he was deprived of his see. Died, 1693.

SANCTORIUS, or SANTORIO, an eminent physician, was born at Capo d'Istria, in 1561; filled the professor's chair in the university of Padua, was the first physician that endeavoured to ascertain the heat of the skin by a thermometer, made important experiments on the insensible perspiration, and rendered his name memorable by his work, entitled "Ars de Statice Medicina." Died, 1636.

SANDBY, PAUL, an eminent painter and engraver, born at Nottingham, in 1725. He took numerous views in Wales and Scotland, which he engraved on copper, in imitation of drawings in India ink; a method of aquatint engraving which he carried to great perfection. He especially distinguished himself by his admirable water-colour paintings. On the institution of the Royal Academy he was elected a member, and, in 1768, he was appointed chief drawing-master to the Military Academy at Woolwich. Died, 1809.

SANDBY, THOMAS, first professor of

architecture at the Royal Academy, was brother of the preceding, and was born at Nottingham in 1721. After holding the situation of draughtsman under the government of Scotland, and to the duke of Cumberland, he was appointed, in 1746, deputy ranger of Windsor Great Park, a post which he held till his death. He was a member of the Society of Incorporated Artists, and assisted in the project of an Academy of the Fine Arts; was professor of architecture at the Royal Academy from its establishment in 1768 till his death, and died at Windsor in 1798.

SANDEMAN, ROBERT, a Scotch minister, was born at Perth, in 1723, and educated at St Andrew's. He accepted and promulgated the peculiar theological views of John Glass, whose daughter he married. He thus became the recognized head of the small sect known as Sandemanians. In 1765 he went to New England, made many proselytes, and died in 1772. The chief practices in which the sect differs from others are, the weekly administration of the Lord's supper, weekly offerings for the poor, washing each other's feet, &c.

SANDERS, NICHOLAS, a zealous Roman Catholic writer, was born at Charlewood, in Surrey, about 1527. He was professor of canon law at Oxford, and about 1560 went to Rome, was present at the council of Trent, and was sent by Pope Gregory XIII. as nuncio to Ireland, where, to avoid falling into the hands of the English, he wandered about in the woods and bogs, and perished of want in 1581. His principal work is his treatise against the Reformation, entitled "De Origine ac Progressu Schismatis Anglicani."

SANDERSON, ROBERT, bishop of Lincoln, an eminent casuist, was born at Rotherham, in Yorkshire, in 1587. He studied at Oxford, became fellow of Lincoln College and reader in logic, entered the church, and in 1616 was presented to the rectory of Boothby Pannell, in Lincolnshire. Through the friendship of Laud he became chaplain to Charles I., whom he attended at Oxford, at Hampton Court, and in the Isle of Wight. Charles made him regius professor of divinity at Oxford, but he was ejected in 1648. At the Restoration he was made bishop of Lincoln. Sanderson was author of "Logice Artis Compendium," and many polemical works, among which are, "Episcopacy as established by Law not prejudicial to Regal Power," "Nine Cases of Conscience resolved," and "De Juramento Obligatione." Died, 1663.

SANDERSON, ROBERT, a learned antiquary, was usher of the court of Chancery and clerk of the Rolls. He continued "Rymer's Fœdera" from the 16th to the 20th volume, and died in 1741.

SANDEFORD, Sir DANIEL KEYTE, D.C.L., professor of Greek in the university of Glasgow, was the son of Dr Sandford, one of the bishops of the Scottish episcopal church. This accomplished scholar and brilliant orator was not more distinguished for his classic attainments, than for the enthusiasm with which he advocated the reform bill, and other measures which had for their

objects the extension of popular rights and privileges. As a teacher he was highly successful; and to his efforts Scotland is indebted for much of her present eminence, as a school for the study of classic literature. Died, Feb. 9, 1839.

SANDRART, JOACHIM, German painter, engraver, and writer on art, was born at Frankfort-on-the-Main in 1606. He was a pupil successively of Matthew Merian, Sadelier, and Honthorst, lived long in Italy, and afterwards returned to Frankfort. He was employed by the Emperor Ferdinand III. and the duke of Bavaria. Among his works are, "Teutsche Academie," a series of Lives of the painters, "Iconologia Deorum," "Admiranda Sculpturæ veteris," &c. Died at Nürnberg, 1688.

SANDWICH, EDWARD MONTAGU, Earl of, a distinguished naval commander in the reign of Charles II., was born in 1625. At the age of 18 he raised a regiment for the service of the parliament, and was present in several battles; but in the Dutch war he left the army for the navy, and was associated with Blake in the Mediterranean. Afterwards he commanded the fleet in the North Sea; but at his return was deprived of it on suspicion of being in the royal interest. Monk, however, procured his restoration, and he conveyed the king to England; after which he was created earl of Sandwich. In the war of 1664 he commanded under the duke of York, and had a principal share in the great battle of June 3, 1665. On the renewal of hostilities with the Dutch, he was again employed, and in the battle of Southold Bay, after he had by his conduct rescued a great part of the fleet from the most imminent danger, and given astonishing proofs of his bravery, his ship caught fire, on which he leaped into the sea and was drowned in 1672.

SANDYS, EDWIN, an eminent English prelate, was born in 1519, at Hawkshead, in Lancashire. He was educated at Cambridge, became master of Catherine Hall, and at the accession of Mary he was vice-chancellor. For preaching in support of the succession of Lady Jane Grey, he was deprived of his office, and sent first to the Tower, and afterwards to the Marshalsea. Liberated in a few weeks, he was again pursued, and escaped to Flanders. Similar danger there drove him to Germany. He lost his health, his wife, and his child; went to Zurich; and on the death of Queen Mary returned to England. Elizabeth appointed him one of the commissioners for revising the Liturgy. He was also made bishop of Worcester, and had a share in the translation of the Scriptures, commonly called the "Bishops' Bible." In 1570 he was translated to London, and in 1576 to York, where a conspiracy was formed by Sir Robert Stapleton, to ruin him by the imputation of adultery; but it was discovered, and the parties concerned in it were punished. He died in 1588.

SANDYS, Sir EDWIN, eldest son of the preceding, was born about 1561, and educated at Corpus Christi College, Oxford, under the learned Hooker. He then went on his travels, and published the result of his observations under the title of "Europa

Speculum." He was knighted by James I., who employed him in many important missions; and he died in 1629.

SANDYS, GEORGE, second son of the archbishop, was born in 1577, at Bishop's Thorpe, and was educated at St Mary Hall, Oxford. He travelled through the Levant and Italy, of which, in 1615, he published an account. Among his works are, a translation of Ovid's Metamorphoses, and paraphrases of various parts of Scripture. He died in 1643.

SANGALLO, ANTONIO DA, an eminent Italian architect of the 15th century, was born at Florence, and on visiting Rome, where he had two uncles who were architects, he was instructed by them, and subsequently perfected himself under Bramante, whom he succeeded as architect of the church of St Peter. He was employed under the Popes Leo X., Clement VII., and Paul III., both in fortifying towns, and in the construction of public buildings, the grandeur and solidity of which have been much admired. Died, 1546.

SANMICHELI, MICHELE, a celebrated architect, born at Verona, 1484. He erected several cathedrals and other magnificent edifices, and excelled in the construction of fortified works. Died, 1559.

SANNAZARO, JACOPO, a distinguished poet, who wrote both in Latin and Italian, was born in 1488, at Naples, where he died in 1530. He was author of sonnets, canzoni, elegies, eclogues, epigrams, and a poem entitled, "De Partu Virginis." His elegance of expression, no less than the poetical beauty of his thoughts, gave him a distinguished place among modern Latin poets.

SANSAVINO. [CONTUCCI, ANDREA.] SANSAVINO, JACOPO, whose real name was JACOPO TATTI, a celebrated Italian sculptor and architect, was born at Florence in 1477. He became a pupil of Andrea Contucci di Monte Sansavino, and the friend of Andrea del Sarto; went to Rome and learnt architecture under Gulliano di Sangallo; enjoyed the friendship of Perugino, Luca Signorelli, Bramante, and other great artists, and was employed by Pope Julius in the Vatican. About 1527 he settled at Venice, was appointed *Protomastro* of the Republic, and there spent the rest of his life. He restored the cupolas of St Mark, built the Public Library, his chief work, the Zecca, and a large number of palaces and churches, and founded at Venice, as well as at Florence and Rome, a school of architecture. Among his works of sculpture the most beautiful perhaps was a "Bacchus," for which his pupil, Pippo Fabro, stood as model. The exposure to cold made poor Pippo ill and mad, and at last killed him. Sansavino's architectural works were rich and picturesque, but extravagant and overloaded with ornament, and his style and influence helped to hasten the decline of art. His reputation was immense, and his services eagerly sought by princes and popes. Died at Venice, 1570.

SANSEVERO, RAYMOND DI SANGRO, eminent for his mechanical inventions and scientific discoveries, was born at Naples, in 1710, and died in 1771. Among the multi-

farious and extraordinary machines invented by him was a four-wheeled vehicle, to pass over the surface of the water, which he exhibited on the bay of Naples.

SANSON, NICOLAS, a celebrated geographer and engineer, was born at Abbeville, in 1600; and constructed, even while a youth, a map of ancient Gaul, remarkable for its excellence and accuracy. He subsequently produced upwards of three hundred maps, all on a large scale, with several volumes to illustrate them; reached the head of his profession, and was appointed geographer and engineer to the king. Died, 1667.—His three sons, **NICOLAS, GUILLAUME**, and **ADRIEN**, who also were excellent geographers, collected and published the works of their father, as well as several of their own.

SANTERRE, JEAN BAPTISTE, a French painter, was born at Magny, near Pontaise, in 1651. He painted historical subjects, on a small scale, and with great delicacy. Died, 1717.

SANTERRE, M., commandant of the national guard of Paris, and general in the republican army, was a rich brewer, who acquired some influence with the citizens, and acted a conspicuous part in the French revolution. He rendered himself notorious at the demolition of the Bastille on the memorable 14th of July, 1789; but, deficient in the talents which are necessary to form the leader of a party, he was satisfied to follow the inspirations of his more fortunate competitors for public favour. Appointed to command a battalion of the Parisian guard, he figured on the 20th of June, 1791, as the agent to intimidate the minority in the Legislative Assembly, and assist in delivering up Louis XVI. and his unhappy family to the violence of an infuriated mob. He presided at the execution of the king on the 21st January, 1793; and, by ordering the drums to beat when his Majesty addressed the people, prevented his voice from being heard. He was afterwards intrusted with a command in La Vendée against the royalist army; but, as he possessed more courage without any military talent, his campaign was a failure. He lost his counsellor by the death of Danton; and the Committee of Public Safety suspecting his fidelity, he was arrested in April, 1794. After obtaining his liberty, which he did in a short time, **Santerre** sunk into deserved obscurity. Died, 1809.

SANTEUL, JEAN DE, or SANTOLIUS, a distinguished modern Latin poet, was born at Paris, in 1630; and after studying under the Jesuits, entered among the canons of the abbey of St Victor, and died in 1697. He was eccentric, witty, and capricious; generally licentious, and endeavouring to atone for it by sudden fits of devotion.

SANTI, GIOVANNI, an eminent Italian painter, and the father of Raphael, was a native of Colbordolo, in the duchy of Urbino, where his grandfather had settled in 1418. About 1430 the family went to Urbino, and he appears to have been known as a painter in 1468. It is not known who instructed him, but his works show the influence of Melozzo of Forlì and Pietro Perugino. His

earliest known works are frescoes in the Tiranni chapel at Capri, probably executed about 1482. He painted a St Jerome at Pesaro, altar-pieces at Fano, at Gradara, near Pesaro, and at the convent of Monte Fiorentino, near Urbino. In the last and in some other of his works are noticed qualities prefiguring those of his greater son, who owed much to his earnest and conscientious instructions. Died, 1494. The National Gallery possesses one picture, a Madonna and Child, by Giovanni Santi.

SAPOR I., king of Persia, was son of Artaxerxes I. (Ardschir), and succeeded his father A. D. 241. He carried on war with the Romans, taking from them several towns in Syria and Mesopotamia, which were taken by Gordian. Early in his reign he procured the assassination of Chosroes, king of Armenia, who had maintained himself invincible during a war of thirty years, and Armenia was made a province of Persia. In 258 the Emperor Valerian arrived in the East, and took up his quarters at Antioch. After a fruitless march into Cappadoea he encountered Sapor near Edessa, in 260, and was defeated and captured. Sapor then crossed the Euphrates, and advanced on Antioch, which he surprised and pillaged; conquered Syria and Cilicia; besieged Casarea, in Cappadoea, and gained it by the treachery of a physician. In 261 the progress of Sapor was successfully opposed by Odenathus of Palmyra, who compelled him to retrace the Euphrates. He was assassinated by some of his satraps, A. D. 272. It was in the reign of Sapor I. that the famous heresiarch Manes (Maul), founder of the Manichean system, appeared.

SAPOR II., the Great, king of Persia, posthumous son of Huraonuz (Hormisdas) II., was crowned king by a strange ceremony before his birth, about A. D. 308 or 309. His martial character showed itself first in his invasion of Yemen, about 326. After the death of the Emperor Constantine, he began the war with the Romans, which was carried on through almost his whole reign, against Constantius II., Julian, and Jovian. Nine great battles were fought, in two of which Constantius commanded in person, the Romans usually being defeated. Sapor besieged the important town of Nisibis, in Mesopotamia, three times, in the years 333, 346, and 350, each time unsuccessfully. In 348 he won the battle of Singara against Constantius, took the son of the emperor prisoner, and had him shamefully put to death. After fruitless negotiations with Constantius in 358, Sapor in the following year invaded Mesopotamia, and laid siege to Amida. It was heroically defended from July to October, but was at last taken, and the people massacred. Sapor lost in this siege 30,000 of his soldiers. The next year he took Singara and Bezabde, and then retired. In 363 he attempted to avert by negotiation the threatened invasion of his dominions by Julian, but his overtures were despised, and Julian advanced to Antioch, passed the Euphrates and the Tigris, took several towns, burnt his own fleet, and soon after commenced his retreat. Sapor pursued and harassed the Romans, and in a battle

[SAP]

fought soon after Julian was killed. A treaty of peace was made with Jovian, and Sapor obtained Nisibis, Singara, and the five provinces beyond the Tigris. After a temporary subjugation of Armenia and Iberia, Sapor died at Ctesiphon, 379.

SAPPHO, the celebrated Greek poetess, was a native of the island of Lesbos, and flourished in the 6th century B. C. She was the contemporary and friend of Alcæus, and won so high a reputation by her exquisite lyrics that she was called the tenth Muse. Hardly anything is known of her biography, and fragments only of her nine books of poems are extant. Amongst them, however, is a fine hymn to Aphrodite, probably complete. The admiration of the ancients is justified by these precious remains of her songs. The moral character of Sappho has to be inferred from these compositions, and while some critics find ground for the gravest charges, others vigorously contend for her purity and virtue. She is said to have invented the lyrical measure called after her the Sapphic; so familiar to us through the poetry of Horace.

SARAZIN, JACQUES, a French sculptor, was born at Noyon, in 1598. After learning the rudiments of his art at Paris, he went to Rome, where he studied painting as well as sculpture, and, on his return, he was much employed at the palace of Versailles. Died, 1660.

SARPI, PIETRO, better known by his monastic name of **FRA PAOLO** or **FATHER PAUL**, the illustrious historian of the Council of Trent, was born at Venice in 1532. His great intellectual faculties early showed themselves in the ease and rapidity of his studious acquirements. Physical science, mathematics, and logic, philosophy and theology, and the classical and oriental languages engaged his attention, and in all he distinguished himself. About 1572 he became a monk of the Servite order; was for a short time professor of theology at Mantua; was consulted at Milan by the Archbishop San Carlo Borromeo; and in 1585 was proctor-general of his order. This drew him for a time from his cell, and brought him, by the various missions intrusted to him, into relation with some of the distinguished men of the time. In 1597 he was at Rome. He allowed himself to speak freely and severely of the corruptions of the papal court, and was never forgiven or forgotten. During the pontificate of Paul V. Venice was threatened with an interdiction for defying the claim of papal supremacy over secular governments, and Fra Paolo was employed by the republic to plead their cause. This he did boldly and successfully, and in recognition of his services he was named consulting theologian to the republic, and afterwards councillor of the tribunal of the Ten. Plots were formed by his adversaries to assassinate him, and in one instance he received a friendly warning from Cardinal Bellarmine. In October, 1607, Sarpi was actually attacked by a party of ruffians, and received many wounds from their weapons; but he recovered under the care of the famous surgeon, Fabricius of Padua, whose services were had at the ex-

pense of the state. It is related that he kept one of the daggers of the assassins as a memorial, and sarcastically named it "Stilo della chiesa Romana;" the "Pen (also Dagger) of the Roman church." From that time he seldom quitted his monastery, but worked there indefatigably with his pen, also a formidable weapon. He was chiefly occupied with the composition of his noble, learned, honest, and religious "History of the Council of Trent," which was published at London in 1619. It was translated into English and French, and has been frequently republished. The most complete edition of his works is that of Naples, 1790, in 24 vols. 8vo. Fra Paolo died at Venice after a long illness, January 14, 1623. The ambassadors of the republic were charged to announce his death to all the powers of Europe, and a marble monument was erected to him.

SARTI, GIUSEPPE, musical composer, born at Faenza, in 1730; who, after having been master of the conservatorio of La Pietà at Venice, was invited to St Petersburg by the Empress Catharine, who appointed him director of music at the conservatory of Ekaterinoslav, with a munificent salary, to which she afterwards added a title of nobility and an estate. Died, 1802.

SARTO, ANDREA DEL (ANDREA VAN-UCCHI), a celebrated Italian painter, was born at Florence in 1488. He was the son of a tailor, and was first apprenticed to a goldsmith, but afterwards studied painting under Piero di Cosimo. He was much influenced by the cartoons of Leonardo da Vinci and Michael Angelo, and became an imitator of the latter. The works of Fra Bartolomeo were also studied by him. Among his earliest and best works are the frescoes of the Santissima Annunziata at Florence, representing scenes in the life of the founder of that convent. In the same convent is his admired "Madonna del Sacco," painted in 1525. Andrea was invited to France by Francis I. in 1518, and was well received, but he returned to Florence the next year, and mispending the money intrusted to him for the purchase of works of art for Francis, he never saw Paris again. Among his other frescoes are a "Last Supper," in the convent of San Salvi, and an "Annunciation," and "Disputa della Santissima Trinità," in the Pitti Palace. The finest of his easel pictures is the "Madonna di San Francesco," now at Florence. One of his numerous Holy Families and a portrait of himself are in the National Gallery. Andrea del Sarto copied with singular skill the works of other masters. He had among his pupils Vasari, Frauciabigio, and Jacopo da Pontorno. Died at Florence, 1530.

SASSOFERRATO, IL, Italian painter, whose real name was **GIAMBATTISTA SALVI**, was born in 1605. He was first taught by his father, and afterwards studied particularly the works of the Caracci and their followers. He chiefly painted Madonnas, characterized by great sweetness, resignation, and also sentimentality. There are many points of likeness between his pictures and those of Carlo Dolce. There is one specimen of this master, a Madonna in

prayer, in the National Gallery. Died at Rome, 1685.

SAUMAREZ, JAMES, Lord de, a distinguished officer in the British navy, was born in the island of Guernsey, in 1757, and was descended from a French family, whose ancestor, it is said, accompanied William the Conqueror to this country. He entered the naval service at the age of 15, accompanied Sir Peter Parker across the Atlantic, and having signalized himself in an attack upon Fort Sullivan, received the command of the Spitfire; but the cutter having been much damaged, was burnt, to avoid falling into the hands of the enemy, and he returned to England. After being actively engaged, under Sir Hyde Parker, at Dogger Bank, and with Admirals Hood and Rodney, he was sent to cruise on the French coast, where he captured La Réunion, a fine French frigate, without the loss of a single man, while 120 were killed or wounded on the part of the enemy; which gallant action procured him the honour of knighthood. He afterwards sailed with Sir John Jervis to the Mediterranean, and shared in the victory off Cape St. Vincent in 1797; and going again to the Mediterranean, was second in command to Lord Nelson in the glorious victory of the Nile. On his return to England, Sir James received the decoration of the order of the Bath, and was appointed colonel of marines; and in 1801 he was made rear-admiral of the Blue, created a baron, and appointed to the command of the squadron off Cadiz. On the 6th of July he made a daring attack on a superior force in the bay of Algeiras; but owing to the protection of the batteries, and the wind failing, he was compelled to withdraw his ships after an action of five hours, and repair to Gibraltar to rest. With unparaleled expedition he again put to sea, and offered battle to the enemy's fleet, now amounting to 10 sail of the line, his own squadron consisting of only half the number; two of the enemy's 3-deckers being blown up, and a 74 gun ship captured; and though the darkness of night gave the remainder an opportunity of escaping, they were so crippled that they were laid up at Cadiz, and never again during the war left that port. For this brave action Sir James received the thanks of both Houses of parliament, and a pension of £1200 per annum. After this he performed a series of signal services to his country, as commander-in-chief of the British fleet in the Baltic; and in 1814, when this country was visited by the emperor of Russia and the king of Prussia, he received the personal thanks of those monarchs, together with those of Prince Metternich, on the part of the emperor of Austria, for the services he had rendered to the common cause of Europe. In 1831 he was appointed vice-admiral of England, and not long afterwards general of marines; and at the coronation of William IV. he was called to the House of Peers, as Baron de Saumarez. Died at Saumarez, his seat in the island of Guernsey, 1836.

SAUNDERS, Sir EDMUND, an English judge in the reign of Charles II. who was originally an errand boy at the inns of court.

A lawyer of St Clement's Inn perceiving his talent, took him into his office, and made him his clerk. He afterwards became an eminent counsel, and rose to be chief justice in the court of King's Bench. His moral character was as low as his origin. Saunders' "Reports," which are highly esteemed, were published in 1686. Died, 1683.

SAUNDERSON, NICHOLAS, an eminent mathematician, was born in 1682, at Thurlston, in Yorkshire. He lost his sight when 12 months old, by the small-pox; but was sent to the free-school at Pennington, where he made great proficiency in classical learning. At the age of 18 he was introduced to Mr West, a lover of the mathematics, who instructed him in algebra and geometry; and he made such progress, that his friends sent him to Cambridge, where he delivered lectures on the mathematics to crowded audiences. Having been created M.A. by royal mandate, he was appointed Lucasian professor of mathematics in 1711; and in 1738 he received the degree of LL.D. Died, 1739.

SAURIN, JACQUES, an eminent French Protestant preacher, was born at Sinesse, in 1677. Upon the revocation of the Edict of Nantes, in 1685, his father retired with his family to Geneva, where Jacques made considerable progress in learning, but quitted his studies and went into the army. When the duke of Savoy, under whom he served, made peace in 1696, he returned to Geneva, with a view to engage in the ministry. In 1700 he visited England, where he preached nearly 5 years to his fellow-refugees in London. He subsequently became pastor to a congregation of French refugees, who assembled in a chapel belonging to the prince of Orange, at the Hague. He was author of 12 vols. of "Sermons," "The State of Christianity in France," "Discourses, Historical, Critical, and Moral, on the most remarkable Events of the Old and New Testaments," &c. Died, 1730.

SAURIN, Right Hon. WILLIAM, an eminent Irish lawyer. He was called to the bar in the year 1790; in 1798 he received a patent of precedence, which was soon followed by his appointment to the office of solicitor-general. As a member of the Irish parliament he took an active part in the politics of the latter end of the 18th century; yet, turbulent as were the times, and fierce as were the political antagonists to whom he was opposed, his personal integrity and honour were on all hands admitted. His powers as a debater, and his eminence as a lawyer, caused him, in 1807, to be made attorney-general for Ireland, and he held that office until 1822, when he was succeeded by Mr. afterwards Lord, Plunkett. Though for many years previous to his death he had been in ill-health, his faculties remained unimpaired. Born, 1767; died, 1840.

SAUSMAREZ, [SAUMAREZ.]

SAUSSURE, HORACE BENEDICT DE, a celebrated naturalist, was born at Geneva, in 1740; attained an early proficiency in the mathematical and physical sciences, and was for several years professor of philosophy at Geneva. He enjoyed the friendship of Haller, and at first applied himself to the

BENEDICT DE, a
born at Geneva,
proficiency in the
cal sciences, and
essor of philosophy
the friendship of
ed himself to the

study of botany. He travelled in France, England, Italy, &c.; and by the valuable observations which he made, particularly among the glaciers of the Alps, he contributed much to the advancement of geology and meteorology. Saussure first visited Chamouni in 1760, his interest in the district having been excited by the narrative of the visit, in 1741, of William Windham, father of the English statesman. In 1788 he spent seventeen days on the Pass Col du Génêt. Saussure constructed several improved scientific instruments, viz., a thermometer, a hygrometer, an endiometer, an electrometer, &c. His most important work is the record of his Alpine observations, "Voyages dans les Alpes," in 4 vols., published between 1779-96. Died, 1799.

SAUVAGES, FRANÇOIS BOISSIER DE, a celebrated French botanist and physician, born in 1706, at Alais; became professor of medicine and botany at the university of Montpellier, was a member of nearly all the learned societies in Europe, and acquired, by his writings and lectures, as well as by his zeal, a high reputation. His principal work is entitled "Nosologia Methodica," 3 vols. Died, 1767.

SAUVEUR, JOSEPH, a French mathematician, born in 1633, at La Flèche. He was dumb till he had passed his 7th year, but such was his love for the mathematical sciences, that he acquired them with scarcely any instruction, and became professor at the royal college. He was received at the Academy of Sciences in 1696. He was the discoverer of that branch of science called musical acoustics, and died in 1716.

SAVAGE, RICHARD, an English poet, celebrated for his genius, irregular and dissipated life, and misfortunes, was born in London about 1698. The singular story of Savage, narrated by the pen of his intimate friend, Dr Johnson, has acquired great interest. He was the natural son of the countess of Macclesfield by Earl Rivers. No sooner did he see the light, than a most unnatural hatred took complete possession of his mother, who placed him with an old woman in the lowest state of indigence, with directions that he should be brought up in utter ignorance of his birth, and in the meanest condition. He was an apprentice to a shoemaker, when this woman dying suddenly, some of Lady Mason's (the mother of the countess) letters, which he found among her papers, discovered to him the secret of his birth. From this moment his attempts to obtain the notice of his mother were incessant, but all his assiduities and applications were unavailing; and in justice to the countess of Macclesfield it must be observed, that she always asserted that her child died while quite young, and that Savage was an impostor. He now became an author, and in 1723, produced the tragedy of "Sir Thomas Overbury," the profits of which amounted to £200; and he was rising in reputation, when in 1727, he accidentally killed a Mr Sinclair, at a house of ill-fame, in a drunken quarrel. For this he was tried, and found guilty; but obtained the royal pardon, through the intercession of Lady Hertford. Soon after, Lord Tyrconnel became his patron, received him into

his house, and allowed him £200 a year; but the bard and the peer quarrelled, and he was again turned adrift upon the world. A "Birth-day Ode," addressed to the queen, procured him a pension of £50, but on her Majesty's death this was discontinued, and he subsequently endured much misery and privation; till at length, in 1743, he died in the debtors' prison, at Bristol; exhibiting, as his biographer, Johnson, observes, a lamentable proof that "negligence and irregularity, long continued, will make knowledge useless, wit ridiculous, and genius contemptible."

SAVARY, ANNE JEAN MARIE RENÉ, duke of Rovigo, a distinguished French general, was born in Champagne in 1774. He entered the army in 1790, was rapidly promoted, and having distinguished himself in the army of the Rhine he was named aide-de-camp to General Desaix, and accompanied him in the expedition to Egypt and Syria. At the battle of Mirago, in which Desaix was killed, Savary rescued his chief's body and conveyed it to the headquarters of Napoleon. He was then made aide-de-camp to Napoleon, and was almost constantly employed by him on important missions for the next five years. The mock trial and shameful murder of the young duke d'Enghien was intrusted to his direction, and he never cleared himself of the disgrace which it brought on him. General of division in 1804, he was sent on a private mission to the Emperor Alexander both before and after the battle of Austerlitz; won the victory of Ostrolenka over the Russians in 1807; and received the grand cordon of the Legion of Honour; and for the part he took at Friedland was created duke of Rovigo. The next year he was sent to the Peninsula, to observe and to negotiate; and the conferences at Bayonne were the result of his influence. He accompanied Napoleon to the conferences at Erfurt; thence to Spain, and in 1809, throughout the campaign of Wagram. In June, 1810, Savary was appointed minister of general police, and while he held that post the formidable conspiracy of Mallet broke out. On the return of Napoleon from Elba, Savary was created peer of France. He would have followed his master to St Helena, but was refused permission, and was confined some months in Malta. Sentence of death for contumacy having meanwhile passed against him at Paris, he fled to Smyrna, afterwards to Austria and to England. In 1819, he returned to France, submitted to a trial, and being acquitted, was reinstated in his dignities. He attempted a vindication of his conduct in the murder of the duke d'Enghien, and threw the blame of it on Prince Talleyrand; but it only deepened his own disgrace, and he had again to leave France. On the accession of Louis Philippe he returned, was commander in Algeria for a short time, and died in 1833.

SAVARY, NICOLAS, a French traveller and author, was a native of Vitry, in Brittany; travelled to Egypt and the Levant, where he gathered much information relative to the antiquities, manners, and customs of the country, and died in 1788. He traas-

lated the Koran, wrote a "Life of Mahomet," "Letters on Egypt," &c.

SAVERIEN, ALEXANDRE, a French mathematician, was born at Arles, in 1720; and died in 1805. His principal works relate to naval tactics and maritime affairs; but he also wrote on philosophical and other subjects.

SAVILLE, GEORGE. [HALIFAX, Marquis of.]

SAVILLE, Sir HENRY, one of the most profound and elegant scholars of his age, was born in 1549, and after graduating at Brasenose College, Oxford, removed on a fellowship to Merton College, in the same university. In his 29th year he made a tour on the continent, and on his return was appointed tutor in Greek and mathematics to Queen Elizabeth. Seven years after, the wardenship of his college was conferred on him, which he held for about 36 years, the provostship of Eton being added to it in 1596. Sir Henry Saville was the founder of the Savilian professorships of geometry and astronomy at Oxford. He had printed at his expense a splendid edition of the works of Chrysostom, translated Tacitus, and published a valuable collection of the English historians. Died, 1622.

SAVONAROLA, FRA GIROLAMO, the great Florentine preacher and political reformer, was born at Ferrara in 1452. Of a deeply reflective and even ascetic temper, which was confirmed by the splendours and frivolity and corruptions of the court of the princes of Este, he lived there in his youth a sad and solitary life; praying, fasting, and studying the Bible and the works of Thomas Aquinas. The passion of love was awakened in him by a maiden of the Strozzi family, but she was proud, and refused his offer. At the age of 23 he secretly left home and entered the Dominican order at Bologna, where he spent seven years. The presentiment that he was called to some extraordinary mission had long been fixed in his mind, and gave a tone to his preaching. About 1483 he entered the convent of St Mark at Florence, with high unselfish hopes and purposes; but soon, with the bitter sadness of a man who finds such hopes illusions, quitted it. He preached at San Gemignano and at Arezzo, distinctly announced the idea which pervaded all his discourses as it ruled his life—"The church will be scourged and regenerated, and that quickly;" and produced the most extraordinary impression on the crowds who listened to him. In 1490 he was recalled to Florence by Lorenzo de Medici, re-entered St Mark's, the walls of whose apartments and cloisters were covered with the inspired and inspiring frescoes of the saintly artist, Fra Angelico; and the convent church becoming too small, he soon began to preach in the Duomo. He spoke with the fervour and authoritative tone of a prophet, and acquired almost unbounded influence both political and social. The despotic government of the Medici, administrative wrongs, social vices and immoralities, as well as ecclesiastical abuses, were the common themes of his vehement oratory; and in all these matters he found himself in collision with the scholarly and

politic Lorenzo. The latter, however, sent for him to give him absolution on his death-bed (April, 1492), and a memorable interview took place between them, of which there are two conflicting accounts. The invasion of Italy by the French under Charles VIII. appeared to be the fulfilment of the alarming warnings repeatedly uttered by Savonarola, who was twice sent ambassador to Charles. After the expulsion of Piero de Medici, successor of Lorenzo, in consequence of his disgraceful submission to the French, to whom he gave up some of the chief cities of the republic, Savonarola rose higher and higher; was real though not nominal head of the state, restored the democratic form of government, reformed taxation, abolished usury, passed a general amnesty, and improved the administration of justice; not a sword being drawn, nor any blood shed, and not even a riot taking place. Great social and moral changes gave the city a new aspect; but these fruits of mere legislation were very transitory. Meanwhile the pope, Alexander VI., was bent on the destruction of the friar, and the exiled Piero was at Rome. Savonarola courageously disobeyed a papal mandate; refused with equal decision a cardinal's hat; talked of a general council; was excommunicated, but not silenced. At last the pope sent an express order to the signory to prohibit his preaching, which they did in March, 1498. Then followed the famous "ordal by fire" (which has been for the first time set in its true light by Professor Villari), the immediate result of which was the loss of his credit with the populace. He returned to St Mark's, of which he had been prior since 1491, and with a few faithful friends, awaited the inevitable end. An attack was made on the convent by his enemies, he and his friends were seized and imprisoned; and after repeated examinations with brutal torture, they were hung and then burnt in the Piazza at Florence, 23rd May, 1498. The most contradictory judgments have been passed on this extraordinary man, and there are points in his life which must probably remain insoluble problems. But one thing is certain: that he was a man of rare sincerity and intensely in earnest. It is noteworthy that the results of his action do not appear to have lasted beyond his own lifetime, nor his influence to have been more than local. Among the disciples of Savonarola were the famous painters Fra Bartolomeo and Lorenzo di Credi, and the sculptor Luca della Robbia. His principal written work is entitled, "The Triumph of the Cross." In the "Compendium Revelations" he vindicates his prophetic gift and mission. Many of his sermons remain, and are sufficient to confirm the reports of his marvellous power as a speaker; and to testify to his clearness of spiritual vision, his profound scorn for mere shows, his deep and tender human affections, and his high principles of morality. The best account of him is Villari's History of his Life and Times, of which an English translation, by Leonard Horner, F.R.S., appeared in 1863. Perhaps the truest estimate of his character is that presented in "George Elliot's" fine story of

SAXE, MAURICE, Count de, marshal of
 France, was a natural son of Augustus II.,
 king of Poland, and was born at Dresden in
 1656. He entered the army at an early age,
 and was present with Prince Eugene at the
 siege of Belgrade. In 1720 he went to Paris.
 After an unsuccessful attempt to get himself
 elected duke of Courland, he took service in
 the French army, distinguished himself in
 the campaigns of 1733-35, and was made
 lieutenant-general. In the general war
 which followed the death of the Emperor
 Charles VI., Count Maurice took a distin-
 guished part. He captured Prague, defended
 Alsace, and in 1743 was named marshal of
 France. In the following year he held a
 command in Flanders. One of his most bril-
 liant achievements was his victory over the
 English and Hanoverian forces at Fontenoy
 in May, 1745. He was at the time "nearly
 dead of dropsy; could not sit on horseback,
 except for minutes; was carried about in a
 wicker bed; had a lead bullet in his mouth
 all day, to mitigate the intolerable thirst."
 (Carlyle.) The victories of Roncoux and
 Lawfeldt and the capture of Maestricht
 added to his fame in the two following years.
 Saxe was a man of great size and strength;
 intrepid, self possessed, and as a commander
 famed for his ingenuity and dash; he was
 one of the most dissolute men of his age, and
 unscrupulous in the gratification of his lust.
 He died of putrid fever, the result of his de-
 baucheries, November 21, 1750. Marshal
 Saxe was author of a work on military
 affairs, entitled "*Mes Réveries*," published
 in 1757, which was immediately translated
 into English. Two new biographies of this
 great soldier have recently appeared; one
 German, by Dr Karl von Weber (1863), and
 the other French, by M. St René-Taillaudier,
 (1865).

SAXE-COBURG, FRED., Prince of. [CO-
 BURG.]

SAXE-WEIMAR, BERNHARD, Duke of.
 [BERNHARD.]

SAXE-WEIMAR, AMALIE, Duchess of,
 was born in Italy in 1739. She was of the
 historical family of the Guelphs; married
 the duke of Saxe-Weimar in 1756, and in
 two years was left a widow and head of the
 government of the duchy. Under her rule
 Weimar became greatly distinguished as the
 residence of many of the most illustrious
 literary men of Germany. Goethe settled
 there in 1775, and among the other eminent
 men attracted to the court of Weimar were
 Wieland, Herder, Musæus, and Schiller; some
 of whom had honourable appointments under
 the government. In 1775 the duchess resigned
 her authority to her son, and retired to her
 country seat. She visited Italy in 1788-90,
 and had Goethe for her companion. Deeply
 affected by the humiliation of Germany by
 the victory of Napoleon at Jena, in 1806, she
 gradually declined, and died in the following
 year.

SAXO GRAMMATICUS, a Danish histo-
 rian, who was secretary to the archbishop
 of Lund, and died early in the 13th century.

He is known as author of the curious and in-
 teresting work entitled "*Danorum Regum
 Heroumque Historia*;" which is in great part
 composed of popular traditions and ballads,
 and is full of sagas, and is elegantly written.
 It was first printed in 1514, and has been fre-
 quently republished.

SAY, JEAN BAPTISTE, an eminent French
 political economist, born in 1767. He concert-
 ed with Champfort (who was guillotined)
 the "*Decade Philosophique*," during the re-
 volution. Buonaparte, on going to Egypt,
 made him his librarian extraordinary, and
 afterwards appointed him a member of the
 tribunate, from which post he was dismissed,
 for voting against the creation of the empire.
 His "*Traité d'Economie Politique*" is a
 valuable work, and popularized in France
 the doctrines of Adam Smith's *Wealth of
 Nations*. Among his other works are, "*Ob-
 servations sur l'Angleterre et les Anglais*,"
 "*Cours complet d'Economie Politique*," 6
 vols., &c. M. Say, as a political character,
 maintained throughout the stormy period of
 the French revolution, as well as during the
 despotism of Napoleon, an unsullied reputa-
 tion. He died in 1832.

SAY and SELE, Lord. [FIENNES, WIL-
 LIAM.]

SCALA, BARTOLOMEO, an Italian states-
 man and historian; born, 1430; died, 1497.
 Under the Medici he was made chancellor of
 Florence, secretary apostolic by Innocent
 VIII., and afterwards gonfalonier of the re-
 public. His chief work is a *History of the
 Florentine Republic*.

SCALIGER, JULIUS CÆSAR, generally
 known as the elder Scaliger, a celebrated
 classical scholar, was born in 1484, at the
 castle of Riva, on Lake Garda, and became
 page to the Emperor Maximilian, whom he
 served in war and peace for 17 years. When
 he was about 40, he quitted the army, and
 applied himself to the study of natural law,
 medicine, and the learned languages. In
 1525 he accompanied the bishop of Agen to
 his diocese in France, where he died in 1558.
 His work "*Poetices Libri VII.*" gained him
 much reputation, and few men have sur-
 passed him in erudition; but his vanity and
 insolence were on a par with his talents.
 His critical works are numerous.

SCALIGER, JOSEPH JUSTUS, a distin-
 guished philologist and chronologist, was
 son of the preceding, and was born at Agen
 in 1540. He was educated by his father, on
 whose death he continued his studies at
 Paris, chiefly in private. He travelled
 through the principal countries of Europe,
 and thus added to his immense stores of
 knowledge, and gained the acquaintance of
 many eminent men. He became a zealous
 Protestant, but did not take part in religious
 controversies, and was engaged in his philo-
 logical labours, when, in 1593, he accepted an
 invitation to fill the chair of belles lettres
 in the university of Leyden. There he spent
 the rest of his life, singularly absorbed in
 his literary occupations, and going, it is said,
 occasionally for days without meals. He was
 the teacher and warm friend of Grotius.
 Scaliger's learning and critical acumen ex-
 cited the astonishment of his contempo-
 raries, who called him the "*Ocean of Know-*

ledge" and the "chef-d'œuvre of nature." This scarcely surpassed his estimate of himself, for he was as ridiculously vain as his father. One of his minor writings is entitled "Epistola de Vetustate et Splendore gentis Scaligeranæ." It was satirized by Scoppius in his "Scalliger Hypoholmaus." Scaliger edited, commented on, and translated many of the Greek and Latin authors; but his most important work is that entitled "De Emendatione Temporum;" which was supplemented by the "Thesaurus Temporum." The first appeared in 1583; the last in 1609. For these works he is sometimes called the creator of chronological science. He published some poems, which are forgotten, but his Letters, collected after his death, have much historical interest. Died at Leyden, 1609. He was never married.

SCANDERBEG (REY ALEXANDER), whose proper name was GEORGE CASTRIOTA, was the son of John, prince of Albania, and was born in 1404. Being given by his father as a hostage to Sultan Amurath II., he was educated in the Mohammedan religion, and at the age of 18 was placed at the head of a body of troops, with the title of sangiac. After the death of his father in 1432, he formed the design of possessing himself of his principality; and having accompanied the Turkish army to Hungary, he entered into an agreement with Hunniades to desert to the Christians. This design he put into execution; and, having ascended the throne of his fathers, he renounced the Mohammedan religion. A long warfare followed; but although frequently obliged to retire to the fastnesses of mountains, he always renewed his assaults upon the first favourable occasion, until the sultan proposed terms of peace to him, which were accepted. He, however, renounced his treaty with the sultan, obtained repeated victories over the Turkish armies, completely established his power, and died in 1467. His personal prowess was doubtless prodigious, but the accounts of it exceed all credibility. His death was a great loss to Christendom; and when the sultan heard of it, he exclaimed, "Who shall now prevent me from destroying the Infidels, who have lost their sword and buckler?" The Albanians, after the death of their chief, appeared to be deprived of all energy, and in no long time submitted again to the Mussulman dominion.

SCAPULA, JOHN, the author of a Lexicon of the Greek language, published originally in quarto, in 1583, and which has since gone through many editions. The material of this Lexicon was stolen by Scapula from the grand "Thesaurus" just before published by Henry Stephens, in whose service he had been.

SCARLATTI, ALESSANDRO, musical composer, born at Naples, in 1658, was educated at Rome under Carissimi, and died in 1728. The Italians called him the "glory of the art," and the first of composers. He composed about 100 operas, a great number of motets, and nearly 200 masses, but very few of them were printed.—DOMENICO SCARLATTI, his son, born in 1683, resided for a time at Rome and Naples, but finally settled

at Madrid, where he obtained the appointment of chapel-master to the queen of Spain. He produced several operas and some good church music, and was on terms of friendship with Handel. Died, 1757.

SCARPA, ANTONIO, a celebrated Italian anatomist, was born in 1748, at Friuli; and died at Pavia, in 1826. He became professor of anatomy at Pavia, in 1783, and held that post, with brief interruption, till 1812. He obtained a first-rate reputation throughout Europe, by his admirable description of the nerves of the heart. His treatises on the organs of hearing, sight, and smell, and on aneurism, hernia, and lithotomy, &c., farther contributed to his surgical fame; while his exquisite taste for the fine arts, and his amiable disposition, rendered him a great favourite in a more extended sphere.

SCARRON, PAUL, a comic poet and satirist, was born at Paris, in 1610, and was intended for the church, to which he was averse, and for which his habits were decidedly unfit. At the age of 24 he travelled in Italy, where he gave himself up to indulgences of every kind, and continued his excesses after his return to Paris. At the age of 27, having appeared during the carnival at Mans as a savage, he was pursued by the populace, and being obliged to hide himself in a marsh, he lost the use of his limbs. Notwithstanding his sufferings, he never lost his gaiety; and settling at Paris, his wit and social powers gained him a wide circle of acquaintance, among whom was the beautiful Mademoiselle d'Aubigné, who became his wife, and was eventually rendered still more famous as Madame de Maintenon. His principal writings are, his "Roman Comique," and his "Enéide Travestie." Died, 1660.

SCHADOW, JOHANN GOTTFRIED, a distinguished modern sculptor, was born at Berlin, 1764. Having evinced an early predilection for the fine arts, he repaired to Rome in 1785, and after studying in the school of the best Italian masters, he returned to Berlin in 1788, where he was appointed professor of sculpture in the university, and subsequently director-in-chief of the Academy of the Fine Arts. Here he lived and laboured for 62 years, not only designing and producing the great works which have placed him in the first rank of artists, but forming the school so nobly represented by such men as Rauch, Bannecker, Zauner, Tieck, and others. One of his earliest works was the monument of Count van der Mark in the church of St Dorothy, at Berlin; and among his most celebrated productions may be mentioned, the statues of Frederick the Great at Stettin, Marshal Blücher at Bock, Luther at Wittenberg, and the Quadriga in bronze on the Brandenburg gate at Berlin. Died, 1850. One of his sons attained distinction as a sculptor at Rome, and another is a very eminent painter.

SCHADOW, ZENO RIDOLEO, an Italian sculptor, was born at Rome, in 1758, and was instructed by Canova and Thorwaldsen. He executed many admired sculptures and bas-reliefs, and died in 1822.

SCHAEFFER, JACOB CHRISTIAN, a dis-

obtained the appointment of the queen of Spain. He was successful in all his affairs and some good success on terms of friendship, 1757.

He was a celebrated Italian painter, born in 1748, at Friuli; and he became professor of painting in 1783, and held that office till 1812. His reputation throughout Europe is described in his treatises on the art of painting, and on light, and smell, and taste, and lithotomy, &c., which have secured to him his surgical fame; and his disposition, rendered him in a more extended

as a comic poet and satirist, in 1610, and was much, to which he was due to his habits were dangerous. He travelled in 1624 he travelled and gave himself up to indulgence, and continued his return to Paris. At the end of the year he was pursued by the king, and being obliged to hide himself, he lost the use of his eyes, and his sufferings, he and settling at Paris, he gained him a wide reputation, among whom was the Countess d'Aubigné, who was eventually jealous of him as Madame de Maintenon. His writings are, his "Rois" and "Enéide Træstique."

JOHN GOTTFRIED, a distinguished sculptor, was born at Göttingen, in 1735, and received an early preference for the arts, he repaired to Rome after studying in the Italian masters, he remained in Rome till 1788, where he was appointed director-in-chief of the Academy of Fine Arts. Here he lived for many years, not only designing great works which have raised him to the first rank of artists, but also nobly represented by the Countess, Zauner. One of his earliest works was the Countess van der Mark, at Berlin; and his celebrated productions may be seen in the statues of Frederick the Great, the Marshal Blücher at Rosenberg, and the Queen of Prussia at the Brandenburg gate. One of his sons attended the pope at Rome, and another died in 1822.

GIULIO RINALDO, an Italian sculptor, was born in 1756, at Ancona, and Thorwaldsen. He was an admired sculptor and died in 1822.

ADAM CHRISTIAN, a dis-

tinguished German naturalist, was born in 1715, and died at Ratsboon, in 1790.

SCHALKEN, GODFREY, a Dutch painter of considerable merit, who chiefly excelled in painting candle-light scenes. Born, 1643; died, 1766.

SCHANK, JOHN, a naval officer, was born in 1740, at Castleberg, in Fifeshire; entered the service early in life, and distinguished himself on the Canadian lakes during the American war as an able engineer. After the peace, he devoted himself chiefly to the improvement of shipping, and, among other contrivances, invented one for navigating vessels in shallow water, by means of sliding keels. He was actively employed in the defence of the British coast, and in the transport services, during the war with France, and rose to the rank of admiral of the Blue in 1821. He was one of the first founders of the Society for Promoting Naval Architecture, and wrote several valuable papers for the institution. Died, 1823.

SCHÉELE, CHARLES WILLIAM, one of the most illustrious chemists of the 18th century, was born at Stralsund, the capital of Swedish Pomerania, in 1742. He was apprenticed to an apothecary at Gotheborg, remained there eight years, and by his studies and experiments, constantly pursued, acquired extensive chemical knowledge and great practical skill. From 1765 he was engaged as assistant in apothecaries' shops in various towns; and soon after his settlement at Upsala, in 1773, he was introduced to Bergman, who became his steady friend. In 1775 he removed to Köping as *provisor* of the apothecary's shop. He afterwards bought the business, and engaged to marry the widow of his predecessor; which was, however, not fulfilled till he was at the point of death. He continued his researches and experiments during his residence at Köping, and published many chemical papers, every one containing a discovery. He was one of the most constant contributors to *Crell's Journal*, then the chief journal of chemistry in Germany. He gave himself up wholly to his chosen work, and seldom allowed himself any social relaxation. Scheele's most extraordinary work is that entitled "Experiments on Air and Fire," containing an immense number of new and important observations. His papers and memoirs were collected and published in 1788. The results of his labours are thus summed up by Dr Thomson:—"Scheele extended greatly the number of acids; indeed, he more than doubled the number of these bodies known when he began his chemical labours. The following acids were discovered by him, or at least it was he that first accurately pointed out their characters; fluoric, molybdic, tungstic, arsenic, lactic, gallic, tartaric, oxalic, citric, malic, saccharic, and chloric. To him also we owe the first knowledge of barytes, and of the characters of manganese. He determined the nature of the constituents of ammonia and prussic acid; he first determined the compound nature of common air and the properties of the two elastic fluids of which it is composed." Died at Köping, 21st May, 1786.

SCHÉEMAKERS, PIETER, an eminent

sculptor, was born at Antwerp, in 1691. He twice visited Rome, and about 1735 settled in London. He soon found great employment, and became the formidable rival of Rysbrack and Roubilliac. Among his numerous works in Westminster Abbey are the monuments to Shakespeare, Dryden, the dukes of Albe-marle and Buckingham, Admiral Watson, and Dr Mead. Scheemakers was the master of Nolkekus. He is supposed to have died at Antwerp, about 1770.

SCHÉFFER, ARY, the distinguished painter of the French school, was born at Dordrecht, in 1795, just after the occupation of Holland by the revolutionary army of France. His father was a German, his mother a Dutch lady; and the former dying in Ary's childhood, he with his two younger brothers was brought up by his wise and noble mother. They settled at Paris in 1811, and Ary, who had already given promise of artistic excellence, became a student in the school of Guérin; under whom he learnt little. He was one of the first to feel the new influence in art, out of which grew what is known as the Romantic School, in contradistinction to the classical. One of the first pieces which brought him into notice was the "Soldier's Widow." Some years later he became the intimate friend of Ingres, through whose influence his style was much changed. In 1818 Scheffer became acquainted with General Lafayette, and began to take a warm and active interest in political affairs. He was of course on the side of the opposition to the arbitrary measures of Charles X.; took part in the unsuccessful attempt at insurrection in 1822; fought on the barricades at the revolution of July, 1830, and was deputed with M. Thiers to offer the crown to Louis Philippe. Scheffer stood in the most intimate relations with the Orleans family, and was especially attached to the Queen Amalie and the Princess Marie, his pupil, whose beauty, genius, and goodness, too soon lost to the world, he has well depicted in one of his letters. At the revolution of February, 1848, Scheffer was captain of the national guard, and assisted the royal family in their departure from the Tuilleries. He fought under Cavaignac against the Red Republicans at the insurrection of June; refused the Grand Cross of the Legion of Honour immediately presented to him; was greatly discouraged by the turn events took under Prince Louis Napoleon; and did not recover hope after the destruction of French freedom by the *coup d'état* of December, 1851. Scheffer visited England in 1850 to attend the funeral of Louis Philippe; again in 1857, to see the exhibition of Art Treasures at Manchester; and once more, in 1858, to be present at the funeral of the duchess of Orleans. His health had been long broken, and his spirits depressed by political disappointments and private sorrows. The death of his favourite brother, Arnold, in 1853, was soon followed by those of his wife—an English lady to whom he had been married about three years—his oldest friend, Augustin Thierry, and Maugin, the defender of Venice. A serious illness was brought on by his last visit to London, and it ended fatally soon after his return. One of the first important

works of this distinguished painter was the "Defence of Missolonghi," followed not long after by his first life-size attempt, the "Femmes Sullotes." Among his most celebrated later works are the series of nine pictures from "Faust," of which perhaps "Margaret tempted in the Church" is the finest; the "Paolo and Francesca," from Dante, considered his masterpiece; the "Dante and Beatrice," exhibited at Manchester; "Mignon;" "Christus Consolator," "Augustine and his Mother," also exhibited at Manchester; and the "Temptation on the Mount." At his death he left unfinished the picture of "The Angel of the Resurrection." Scheffer painted many portraits, which, however, did not reach the highest excellence. The best is that of his mother, whom he tenderly loved, and lost in 1839. His last years were blessed by the love and ministry of his daughter Cornelle, the child of a lady with whom he early formed a connection. And after his death she had his works collected and exhibited at Paris. Died at his house, near Argenteuil, 15th June, 1853. A "Life of Ary Scheffer," by Mrs Grote, one of his personal friends, appeared in 1860.—His two brothers, ARNOLD and HENRI, attained distinction; the former as a political writer, the latter as a painter. Arnold was born in 1796, and died in 1853. Henri, born in 1799, died in 1862. He was a member of the Legion of Honour, and among his best works are, "Joan of Arc," "Charlotte Corday arrested," and "Madame Roland on the way to Execution."

SHELLING, FRIEDRICH WILHELM JOSEPH, the last survivor of that famous band of German philosophers of which Kant, Jacobi, Herbart, Fichte, and Hegel, are the other chiefs, was born in 1753, at Leonberg, in Wurtemberg. He studied first at Tubingen, where he and Hegel became intimate friends, thence he went to Leipzig and Jena. At Jena he studied under Fichte, whom he succeeded in the chair of philosophy at that university in 1798. In 1803, he was transferred to Wurzburg; and, in 1807, to Munich, where he remained till 1841, when he accepted a chair at Berlin. This chair he soon relinquished, and the last years of his life were spent in comparative seclusion. By the nature of his speculations developed in a number of fragmentary publications, chiefly in the earlier part of his life, Schelling's place in the great series of German philosophers is determined to be between Fichte and Hegel, the former of whom died in 1814, and the latter in 1831. Schelling's metaphysical theory is generally known by the name of the "System of Identity." It rests on the principle that the two elements of thought, the objects respectively of understanding and reason, called by the various terms of matter and spirit, objective and subjective, real and ideal, &c., are only relatively opposed to one another as different forms of the *absolute* or *infinite*, hence sometimes called the two *poles* of the absolute. Died, 1851.

SCHIAVONE, ANDREA, painter, was born in Dalmatia, in 1522. His family name was *Medola*. He began life as a house-painter, but showing taste for art, he was employed

as assistant to Titian in the library of St Mark at Venice. Tintoretto was similarly employed there at the same time. Schiavone successfully imitated Titian as a colourist, but he failed in drawing, which he never learnt. Among his best pictures are named a Nativity and an Assumption of the Virgin, at Rimini; and a Head of John the Baptist, in the Louvre. There are several of his works in English galleries. Died at Vicenza, 1582.

SCHIAVONETTI, LUIGI, an eminent engraver, was born in 1765, at Bassano, in the state of Venice, and settled in England, where he acquired a high reputation, both as an artist and a man. Died, 1810.

SCHILL, FERRINAND VON, a distinguished Prussian officer, was born in 1773, and entered the army in 1789. He was severely wounded at the battle of Jena; but took the field again at the head of a free corps, displaying great ability. Indignant at the subjection of his country to the rule of Buonaparte, he resolved to make a great effort for the liberation of Germany. With that view he collected a small body of troops, and commenced operations on the Elbe; but, after having obtained some successes, he was overpowered and slain at Stralsund, in May, 1809.

SCHILLER, JOHANN CHRISTOPH FRIEDRICH VON, one of the most illustrious German poets, was born at Marbach, in Wurtemberg, in 1759. After having studied medicine, and become surgeon in a regiment, he, in his 22nd year, wrote his tragedy of "The Robbers," which at once raised him to the foremost rank among the dramatists of his country. It was performed at Mannheim, in 1782. But some passages of a revolutionary tendency having incurred the displeasure of the duke of Wurtemberg, Schiller left Stuttgart by stealth, and made his way to Mannheim, where, after various wanderings and many hardships, he got his tragedy of "Jesco" brought out on the stage. The tragedies of "Cabal and Love," and "Don Carlos," were his next productions. In 1785 he repaired to Leipzig and Dresden, where he found many admirers. Here he wrote his singular romance called the "Geisterseher" and his "Philosophical Letters," and collected materials for a "History of the Revolt of the Netherlands under Philip II." In 1787 he repaired to Weimar, where he was welcomed with great warmth by Wieland and Herder, undertook the management of a periodical called the German Mercury, and not long afterwards made the acquaintance of Goethe, which soon ripened into a friendship only dissolved by death. In 1789 he was appointed to the chair of history in the university of Jena, and besides lecturing to crowded audiences, he published his "History of the Thirty Years' War," and engaged in various literary enterprises, which had great influence on the literature of Germany. "Die Horen" and "Der Maerchen-Almanach," to which the most eminent men in Germany contributed, belong to this period. He also produced the "Xenia," a collection of epigrams, and wrote his "Ballads," which are reckoned among the finest compositions of their kind in any

language. About 1780 he exhibited a strong
tendency to consumption, which by preclud-
ing him from lecturing, greatly reduced his
income; but he was relieved from the pres-
sure of misfortune by the kindness of the
prince of Denmark, who settled upon him a
pension of a thousand dollars for three years,
and thus enabled him to pursue his studies,
free at once from narrow circumstances and
public duties. He soon after settled at
Weimar, in order to direct the theatre in
conjunction with Goethe, in accordance
with their mutual tastes and opinions;
and here he at intervals published the works
which, together with those above mentioned,
have immortalized his name. Among these
are "Wallenstein," "Mary Stuart," "Joan
of Arc," and "William Tell." There is a
Life of Schiller by Thomas Carlyle, and an
English translation by Lady Wallace of the
Life by Pallaske. Coleridge translated the
"Plecolomini," and "Death of Wallenstein,"
and Sir E. B. Lytton has translated the
"Poems and Ballads of Schiller." An En-
glish edition of his works forms part of
Bohn's Standard Library. Died, 1805.

SCHIMMELPENNINCK, MARY ANNE,
best known as an author by her "Memoirs
of Port Royal," was the eldest child of
Samuel and Lucy Galton, near
Birmingham, and was born on 25th Nov.,
1778. Her parents belonged to the Society
of Friends. Her father was known as a man
of science, and was also engaged in mercan-
tile pursuits. Her mother, a lineal descen-
dant of Barclay the apologist, was a woman
of uncommon powers of mind, philosophic
views, and strong principles. From early
youth she was an enthusiastic student of
Lavater's physiognomy, and her mind seems
to have been matured by the society of the
literary men who habitually met at her
father's house. She had from childhood
deep religious feelings, but at an early age
she seems to have imbibed sceptical opin-
ions. By remarkable circumstances she was
thrown amongst members of the Church
of United Brethren or Moravians; with
them she found the peace she had long
sought, and she joined their communion in
1818. In 1806, she married Lambeth Schim-
melpenninck, of the Dutch family of that
name, and went to reside at Bristol. Her
"Memoirs of Port Royal" first introduced
that community to the English public, and
has been often reprinted. Her literary labours
comprehend essays on various religious sub-
jects, an ingenious theory on the "Prin-
ciples of Beauty," and pamphlets in the anti-
slavery cause. A slight paralytic seizure
in 1837 for a time impaired the vigour
of her mind, and was the occasion of her
removal to Clifton. Her genius was char-
acterized by that mixture of pathos and
humour that belonged to the poet Cowper,
and which, united to her wit and originality,
gave her unrivalled powers of conversation.
Her religion partook of the largeness of her
mind, and she had the rare art, without
effort, of making it a part of the daily inter-
est of life. Her autobiography has been
published since her death. She died at Clif-
ton, 29th August, 1856.

SCHINKEL, KARL FRIEDRICH, one of the

most distinguished architects of his age,
was born at Neu-Kuppin, in Brandenburg,
in 1781. He studied architecture at Berlin
under the two Gillys, David and Friedrich,
and spent some time in Italy between 1803-
1805. During the troubled years that fol-
lowed till the peace of 1815 he occupied him-
self chiefly with painting; but after that
time he had full work as an architect.
Schinkel by his numerous works and more
numerous designs gave a great impulse to
architectural art. He followed chiefly the
models of Greek art, seldom the Gothic;
and among his principal works are the Ber-
lin Museum, Theatre, and Observatory, the
Church of St Nicholas, at Potsdam, which,
however, was not completed, and Charlot-
tenhof. He published two collections of his
designs, "Entwürfe," and "Vorstudien der
höheren Baukunst;" among which were
those for the Singing School at Berlin, and
for the palace on the Acropolis of Athens;
neither of which were adopted. He was ap-
pointed chief director of public buildings in
1839, and died, 9th October, 1841.

SCHLEGEL, AUGUST WILHELM VON, a
celebrated critic, poet, and philologist, was
born at Hanover, 1767. After finishing his
studies at Göttingen, he became professor
at Jena, where he lectured on the theory
of art, and joined his brother Friedrich
in the editorship of the Athenæum. In 1802
he repaired to Berlin, as a wider field for his
literary pursuits; accompanied Madame de
Staël, in 1805, on a tour through Italy,
France, Germany, and Sweden; delivering
lectures in Vienna, in 1808, on dramatic art;
became secretary to Bernadotte, the crown
prince of Sweden, in 1813; and, after study-
ing Sanscrit in Paris, obtained in 1818 the
professorship of history at Bonn, which
he held till his death. Besides publishing
numerous profound philological works, and
many dissertations on subjects connected
with the fine arts and poetry, he was the
founder of the so-called *romantic* school, in
contradistinction to the *classical*; his poems
and ballads rank among the highest in
Germany; his lectures on dramatic art and
literature have become a standard work in
England; and his translation of Shakespeare
is accounted one of the most wonderful
achievements in that difficult, though too
often ill-appreciated, art. Schlegel often
displayed a puerile passion for titles and
small court distinctions, which formed a
great drawback to his real merits, and drew
down upon him merited ridicule. Died,
1845.

SCHLEGEL, FRIEDRICH VON, a cele-
brated German critic and philologist, and
a younger brother of the preceding, was born
in 1772, and studied at Göttingen and Leip-
sic. His first production of any importance
was the "Greeks and Romans." He then
joined his brother in conducting a periodical
called the Athenæum, and after publishing
the philosophical romance of "Lucinda," he
visited Paris, where he delivered lectures on
philosophy, and occupied himself with the
fine arts. In 1804 he published a "Collection
of the Romantic Poetry of the Middle Ages."
In 1805 Schlegel, with his wife, a daughter of
Moses Mendelssohn, was received into the

church of Rome, at Cologne. After this, he repaired to Vienna, and, in 1809, received an appointment at the headquarters of the Archduke Charles, where he drew up several animating proclamations. When peace was concluded, he delivered in Vienna the lectures on "The History of Ancient and Modern Literature;" a work which has been translated into nearly every European language. In 1812, he edited the "German Museum," and gained the confidence of Prince Metternich by the composition of various diplomatic papers; in consequence of which he was appointed Austrian counsellor of legation at the Germanic diet, which he held from 1814 to 1818. He then returned to Vienna, and resumed his literary occupations with great zest; contributing to various journals and reviews, lecturing on many topics connected with philosophy and aesthetics; and above all producing his "Philosophy of Life," "Philosophy of History," and "Philosophy of Language," which rank among his best literary efforts. Friedrich Schlegel's strong devotional tendencies are especially shown in his interesting "Letters on Christian Art." Died, 1829.

SCHLEIERMÄCHER, FRIEDRICH ERNST DANIEL, equally distinguished as theologian, philologist, orator, and translator, was born at Breslau in 1768; studied at Halle in 1787; and, after holding various ecclesiastical appointments in different parts of Germany, was called to Berlin in 1809 as preacher, and, in the following year, received the chair of theology in the university. The influence of his writings in Germany was, and still is, very great; but it was, perhaps, surpassed by that which his oral instructions and his personal character exercised over those who lived within his sphere. Of his numerous works we can only name the following: "Reden ueber die Religion," "Der Christliche Glaube," the translation of Plato, unrivalled in excellence, the Critical Commentaries on Luke's writings, and the Sermons. As a theologian Schleiermacher held a place in his own country very similar to that of Coleridge in England, midway between the extremes of orthodox and doubt. Died, 1834.

SCHLOETZER, AUGUST LUDWIG VON, a German historian, was born in 1737, became professor of philosophy and politics at Göttingen, and died in 1809. Among his works are, a "History of Commerce," "General History of the North," &c. He was editor of the "Staatsanzeigen" for more than ten years.

SCHMAUSS, JOHANN JACOB, historian and publicist, was born at Landau, in 1690. He was educated at Halle, and commenced a life of literary labour at the age of 21, from which he was relieved by the margrave of Baden-Dourlach, who gave him official employment at his court. In 1734 he was appointed professor of history at the university of Göttingen, which was then regarded as a school of diplomacy for the youth of the greatest families in Europe. Among his principal works are, "A Sketch of the History of the Empire," "Corpus Juris publici Academicum," and an "Introduction to the Science of Politics." Died, 1757.

SCHMIDT, GEORG FRIEDRICH, an eminent German engraver, born at Berlin in 1712. After completing his studies at Paris, where, in 1742, he was admitted to the Academy, he was called to Berlin by Frederick II.; was received at the Berlin Academy, and named court-engraver. Invited to St. Petersburg by the Empress Elizabeth, in 1756, he spent six years at her court. His prints are numerous, and many good engravers were trained in his school. Died, at Berlin, 1775.

SCHNEIDER, JOHANN CHRISTIAN FRIEDRICH, a distinguished composer, was born in 1786, near Zittau. His father began life as a weaver; but, by the force of perseverance, gained an appointment of organist at Watersdorf, and himself superintended the education of his boys. At an early period the son was distinguished, not merely as a pianoforte player, but as a composer; and during the course of his life, though contemporaneous with the career of Beethoven, Weber, Spohr, and Mendelssohn, he took his place among the musical creators of Germany. The list of his works includes almost every form of musical composition, theatrical writing alone excepted. His oratorios—the works by which he is best known in England—comprise his "Deluge," "Last Judgment," "Paradise Lost," "Pharaoh," "Christ the Master," "Absalom," "Christ the Child," "Gideon," "Gethsemane and Golgotha," besides cantatas, psalms, hymns, and other service music. At the time of his death he was chapel-master to the duke of Anhalt-Dessau. Died, 1853.

SCHNEIDER, JOHANN GOTTLIEB, an eminent German philologist and naturalist, was born at Köln, near Hubertsburg, in 1750. He was educated at the universities of Leipzig and Göttingen, chiefly applying himself to classical literature, under the influence of Reiske, Fischer, and Reiz. In 1774 he became assistant to Brunnck at Strasburg; and after publishing several works he was appointed, in 1776, professor of philology at Frankfurt on the Oder, a post which he held, including five years at Breslau, whither the university was removed, till 1816. In that year he was appointed chief librarian to the university of Breslau. The great merit of Schneider was the remarkable combination in him of philosophical learning with the knowledge of natural history, which enabled him to throw light on many parts of ancient literature previously neglected or misinterpreted. His works are very numerous, and we can only name here his editions of Demetrius Phalereus, Xenophon, Aristotle's History of Animals, and Theophrastus, his Greek Lexicon, and "Deluge Physique." His original writings on Natural History are in German. Died, at Breslau, 1822.

SCHNORR VON KAROLSFELD, FELIX, one of the greatest German fresco-painters, born at Leipzig in 1784. Having received his first lessons in art from his father, then director of the Academy of Art, he studied at Vienna, and in 1818 went to Rome, where he became the sympathizing associate of Cornelius, Overbeck, and other young artists of the Romantic School. SCHMIDT, ANTON, an eminent painter, born in Berlin in 1768. He studied at Paris, and was admitted to the Académie de Saint-Louis by Frederick the Great. He was professor in the Berlin Academy, and was invited to St. Petersburg by the Empress Elizabeth, in 1800, to reside at her court. He died in 1840. His school flourished in Berlin.

SCHNORR, CARL, a German composer, was born in 1765. His father began to play the violin for the purpose of procuring a pension. He himself superintended the school of boys. At an early age he distinguished himself, not merely as a pianist, but as a composer. His life, though uneventful, was devoted to the study of music. He was the creator of German church music. His works include almost all the departments of music. His oratorios—the most famous are "The Last Judgment," "Christ the Child," "The Resurrection," and "The Crucifixion." He also composed many hymns, and other pieces. He died in 1851. He was the duke of Anhalt.

SCHNORR, JOHANN, a German naturalist, was born in 1765. He studied at the universities of Halle and Göttingen, and was professor of natural history, and applied mineralogy, under the name of Schumacher, in 1800. He was invited to Brunck at Brunswick, where he published several works. He died in 1841. He was professor of natural history for five years at the University of Halle. He was appointed to the university of Halle in 1800. He was the author of the "Philosophie der Natur," which has enabled him to throw a new light on the ancient literature of natural history. His works are numerous, and we can only mention a few. His "History of the Greeks," his "Greek Lexicon," and his original works are in German.

SCHNORR, JULIUS, a German fresco-painter, was born in 1765. He received his education from his father, then a painter of Art. He studied in Rome, where he was the associate of other young artists. After a residence

of ten years at Rome, during which he painted his "Wedding at Cana," "Jacob and Rachel," "Ruth in the field of Boaz," and other pictures, besides assisting in the decoration of the Villa Massimo, he settled at Munich. He was appointed, in 1827, professor of historical painting in the Academy, by King Ludwig, to whom, while crown-prince, he had been introduced, and whose commissions kept him fully employed during the nineteen years of his stay at Munich. Schnorr removed in 1846 to Dresden, where he spent his remaining years as professor of painting, and director of the Picture Gallery. The most important works of this great painter are the four series of frescoes executed for the king of Bavaria in the palace of Munich, one series representing the successive scenes of the Nibelungen Lied, and occupying the walls of five rooms; the others, events in the histories of Charlemagne, Frederick Barbarossa, and Rudolph of Hapsburg, occupying three other rooms. The whole were designed by Schnorr, but the painting of many of the pictures was executed by his assistants under his direction. Schnorr executed many other paintings and designs, and his "Bibel in Bildern" is well known in England. His works display great force of imagination, variety of invention, and surprising technical skill. The frescoes are very impressive and very popular. Died, at Dresden, 13th April, 1853.

SCHOFFER, PETER, one of the inventors of printing, was born at Gernsheim, in the territory of Darmstadt; was a partner with Gutenberg and Faust, and having married the daughter of the latter, became sole possessor of the printing establishment. He died about 1502.

SCHON, or SCHONGAUER, MARTIN, a celebrated early German painter and engraver, was born at Ulm, about 1420, or, according to Wagen, about 1440. He was the son of an artist, and studied first engraving, in which he attained great excellence. He afterwards applied himself to painting, under Roger vander Weyden at Antwerp, and became one of the best of the artists of the Van Eyck school. He settled at Colmar about 1461, and there founded a school of art. His best works are in the college of Colmar. This artist was known as "Hübch Martin" among the Germans, was called "Bel Martino," and "Martino d'Anversa," by the Italians, and "Beau Martin" by the French. The National Gallery has a small "Death of the Virgin" by him. Died, at Colmar, 1488 or 1492.

SCHÖPFELIN, JOHANN DANIEL, a learned German historian, was born in 1694, and became professor of history and rhetoric at Strasburg; where he died in 1771. He published several works of great research, and was for more than half a century one of the most distinguished ornaments of the university of Strasburg. His valuable library and museum he left to the public.

SCHOLZ, JOHANN MATTHIAS AUGUST, German biblical scholar and philologist, was born near Breslau in 1794. He was educated at the university of that city, and early devoted himself to the task which occupied so many years of his life, the critical examina-

tion of the text of the New Testament. He spent several years in visiting the principal European libraries, and collating the manuscripts of the Greek Testament; travelled in Egypt and Palestine; was ordained priest in 1821, and two years later was appointed professor of theology at the university of Bonn, and canon of the cathedral. His principal work, the edition of the Greek New Testament, appeared in 1830—1835. Scholz maintained the existence of two recensions, or families of manuscripts, the Alexandrian, which he called Occidental, and the Constantinopolitan, which he called Oriental; and in forming his text he gave the preference to the latter, believing them directly descended from the autographs of the writers. His system, however, is based on assertions without proofs, and has been controverted, if not refuted, by Rück, and by Tischendorf in the Prolegomena to his edition of the New Testament. Among the other works of Scholz are a "Handbuch der biblischen Archæologie," and "Biblisch-kritische Reise." Died, in November, 1852.

SCHOMBERG, HENRI DE, marshal of France, was descended of a German family. He served in 1617, in Piedmont, under Lesdigulères, and afterwards against the Huguenots in the civil wars. In 1625 he was made marshal, and two years afterwards defeated the English at the Isle of Rhé. In 1629 he forced the passage of Susa, on which occasion he was severely wounded. The next year he took Pignerol, and relieved Casal. In 1632 he defeated the Huguenots in Languedoc at the battle of Castelnaudary, capturing their leader, the duke of Montmorency, for which he was made governor of that province. He wrote a narrative of the war of Italy, and died in 1632.

SCHOMBERG, FREDERIC ARMAND, Duke of Orange, was born about 1619, of an illustrious family, but not of the same as the preceding. He began his military career under Frederic Henry, prince of Orange, and his son William; but in 1650 he passed into the French service, became acquainted with Condé and Turenne, and obtained the government of Gravelines and Furnes. In 1661 he was sent to Portugal, where his success against the forces of Spain procured a favourable peace. On the revocation of the Edict of Nantes, he left France and went to Brandenburg, the elector of which made him minister of state. He accompanied the prince of Orange to England at the revolution, was created a peer, made knight of the Garter, and obtained a grant of £100,000. In 1689 he accompanied the king, William III., to Ireland, and was shot as he was crossing the Boyne, at the head of his regiment.

SCHOMBERG, ISAAC, a naval officer and historian. He served as lieutenant in the American war, distinguished himself in the victory gained by Admiral Rodney over Count de Grasse, and was captain of the Culloden in Lord Howe's fleet on "the glorious first of June," 1794. He eventually became a commissioner of the navy, and at his leisure devoted his attention to the composition of a work, entitled "Naval Chronology," 5 vols. Died, 1813.

SCHOPENHAUER, ARTHUR, a German philosopher, was born at Dantzic in 1788. His father was a merchant, and his mother the popular novelist and littérateur, Johanna Schopenhauer. His travels with them while a boy, and his early association with some of the leading literary men of the time—the Schlegels, Klopstock, Goethe, Wieland, &c., contributed to the development of his precocious intellect. He studied at Göttingen, attended the lectures of Fichte at Berlin, spent some time at Weimar and Dresden, and led a very restless life till 1831, when he settled at Frankfort on the Main. He was accompanied only by a female servant and a dog, and lived a quiet, reserved, selfishly comfortable life; seeming to some the model of a sage, and to others a surly fanatic. He despised his countrymen and their philosophies, read much of French and English literature, had the "Times" regularly sent to him throughout his life, and latterly paid much attention to oriental studies. He became an enthusiast for Buddha and the Vedas, and enjoyed tracling all Western accomplishments to Eastern sources. The principal work of Schopenhauer is entitled, "Die Welt als Wille und Vorstellung." It appeared in 1819, and after being neglected for many years attracted a good deal of attention, and received some sharp blows of criticism. The practical upshot of his system, which makes *Wili* the one sole reality, is intolerably melancholy, taking from man all that constitutes his greatness, his goodness, or his bliss. God—futuraity—the soul—mere names, illusions; and the world of men is to him bad, hopelessly bad, and made so. "Strange, melancholy, and deterrent," says the *Saturday Review* (5th Sept., 1863), "the speculations of Schopenhauer are likely to remain a monument of dark genius rather than a light of philosophy. They form no centre of warmth and hope, but the funeral pyre on which faith and trust and aspiration immolate themselves." Schopenhauer published several other works of philosophy, of which the most important is, "Die beiden Grundprobleme der Ethik." Died, at Frankfort, 21st Sept., 1860.

SCHOPENHAUER, JOHANNA, a German authoress of great celebrity, was born at Dantzic, 1770. Her father, whose name was Trosina, was a wealthy citizen of that town, and under the paternal roof she enjoyed every facility for the improvement of her great natural abilities. Soon after her marriage she made a tour through France, Italy, and the British Islands, of which she subsequently published an account; and, on the death of her husband, she went to reside at Weimar, where she lived in the closest intimacy with Goethe, her home being the resort of all the eminent persons who were attracted to that court. Her chief works are, "Ferno's Leben," "Ausflucht an den Rhein," "Jugendleben und Wanderbilder" (an English translation of which was published in 1847), "Sidonia," "Die Tante," and, above all, "Gabriele," which presents a charming picture of female character. Died, 1838.

SCHREVELIUS, CORNELIUS, a learned

eritic, was born at Haarlem, about 1614. His father was rector of the school at Leyden, in which office he succeeded him. His name was principally known in England by his "Greek and Latin Lexicon." Died, 1667.

SCHUBERT, FRANZ, one of the most celebrated German musical composers, was born at Vienna, in 1797. He belonged to a family distinguished for their musical talents, and from his earliest years showed so strong a bent to musical studies and composition that the wishes of his friends, who would fain have made him a philosopher, gave way, and he was allowed to follow his true calling. At 7 years of age he was the pupil of Michael Holzer; became a chorister in the imperial chapel, and the pupil of the court-organist and of Salieri. He studied the works of Haydn, Mozart, and Beethoven, and gave lessons in music for a living. The number and variety of his compositions is extraordinary. The most admired are his "Lieder," and among them "Der Erlkönig," "Ave Maria," "Der Wanderer," and "Die Erwartung," are perhaps the best known. But he wrote also operas, sonatas, symphonies, overtures, cantatas, 6 masses, &c. He left numerous works unpublished at the time of his death. Schubert spent almost his whole life at Vienna, and there died, 19th November, 1828. His remains rest near those of Beethoven. The characteristic charms of Schubert's music are its marked originality, depth of poetic feeling, grace of melody, and startling force and truth of expression. It is now more than ever relished and appreciated in England. His grand Mass in E flat, the first published (1856), is highly praised as a rich and elaborate work. A "Schubert Society" is projected in London.

SCHULEMBURG, JOHANN MATTHIAS, Count von, a celebrated general, born at Magdeburg in 1661. He first served in the Danish army; after which he distinguished himself as a brave and skilful general in the wars of Poland, under Sobieski; commanded the Saxon forces in the service of Holland against the French, especially distinguishing himself at the battle of Malplaquet, and, finally, became generalissimo of the Venetian forces, and in 1716 gained great renown by his noble defence of Corfu against the Turks. Died, 1747.

SCHULTENS, ALBRECHT, a German divine, who was designated the restorer of oriental literature in the 18th century, was born at Groningen, in 1686; became professor of oriental languages at Franeker, and afterwards at Leyden; wrote several learned works, among which are "Origines Hebrææ;" and a Commentary on the Book of Job; and died in 1750.—**JOHANN JACOB**, his son, who died in 1778; and **HEINRICH ALBRECHT**, his grandson, who died in 1793, were both distinguished by their knowledge of the oriental tongues, and filled the same chair at Leyden.

SCHUMACHER, HEINRICH CHRISTIAN, a distinguished astronomer, was born in Holstein, 1780; was successively professor of astronomy at the university of Copenhagen, director at the observatory of Mannheim, in the grand-duchy of Baden, and for many

SCHWARTZ, CHRISTIAN FREDERIC, a German missionary to the East Indies. He was born in 1726, and went to India in 1750. In 1767, he was employed by the English Society for the Promotion of Christian Knowledge, and he continued throughout his life to labour in the sacred cause with unceasing zeal. He was held in high esteem for his character by the Hindoos, and the rajah of Tanjore, when dying, made him tutor to his son. He was sent ambassador to Hyder Ali, and successfully negotiated a peace; and subsequently to Tipoo Saib, who refused to treat with him. Died, 1788.

SCHWARTZENBERG, CARL PHILIPP, Prince, an Austrian field-marshal, was born of an ancient and illustrious family at Vienna, in 1771. He entered into the army early, and rapidly proceeded through all the grades of military rank until he became a general officer. After serving two campaigns against the Turks, he was employed in the first campaign against the French in the war that followed the execution of Louis XVI. On the death of the Emperor Paul, in 1801, he was sent to St Petersburg to congratulate Alexander on his accession. He served under General Mack in 1805, and succeeded in withdrawing the cavalry under his command from the consequences of the capitulation of Ulm. He also took a share in the battle of Austerlitz, which was fought against his advice, and in that of Wagram. In 1812 he was appointed to the command of the auxiliary force of 30,000 Austrians, extorted by Napoleon in aid of his disastrous invasion of Russia; and in 1813 he was invested with the rank of field-marshal, with the commandership-in-chief of all the armies allied against France. On the return of Buonaparte from Elba he was again intrusted with the command of a great portion of the allied forces; and at the conclusion of the war he was made president of the aulic council, which post he occupied until his death, in 1820.

SCHWARZENBERG, Prince FELIX, an Austrian statesman, was born in 1800. He entered the army at an early age; but soon afterwards became attached to the Austrian embassy at St Petersburg, where he fell into a political scrape, in connection with a conspirator, which caused his expulsion from the Russian dominions. He was afterwards attached to the Austrian embassy in London, where he became acquainted with, and ruined, an English lady of high rank, and was compelled to fly under circumstances which for ever precluded his reappearance on British ground. He was subsequently sent as an Austrian minister to Turin and Naples. In 1848 he took part in the war that broke out between Austria and Sardinia, and was wounded; and in November of the same year he was recalled to Vienna, and became chief minister of the Austrian empire. The course which he then adopted to retrieve the shattered fortunes of his country belongs more to history than to biography; and we shall here only state that, though it is impossible to approve of the means to which he had recourse, his policy was successful, and a long and prosperous

career seemed to lie before him, when he died suddenly, in 1852.

SCHWERTIN, CHRISTOPH, Count von, Prussian field-marshal, was born in 1684. He entered the Dutch army, and served his first campaign in the allied army under Marlborough and Prince Eugene in 1704, passing afterwards into the service of the duke of Mecklenburg, and in 1720 into that of Prussia. He obtained the rank of lieutenant-general in 1731, and of commander-general of infantry in 1739; was made a councillor of state by Frederick the Great on his accession, and contributed the following year to the important victory of Mollwitz. He was then named governor of Neiss and Brieg. He had a command in the campaign of Bohemia in 1744, was again called into active service at the beginning of the Seven Years' War, and was killed at the battle of Prague, 5th May, 1757.

SCINA, DOMENICO, an eminent Sicilian scholar and natural philosopher, born at Palermo in 1765. He was named while young assistant professor of mathematics at the university of that city, and subsequently titular professor of experimental physics, chancellor in 1822, and the next year chief librarian. He reorganized the library, and did good service also as member of the commission of education. His writings are numerous, and on a variety of subjects. Among them are, "Introduction to Experimental Physics," "Elements of Physics," "Memoirs on the Life and Philosophy of Empedocles," "Views of the Literary History of Sicily during the 18th Century," "Topography of Palermo and its Neighbourhood," and various works on the natural phenomena of Sicily. Died, at Palermo, 1837.

SCIOPIUS, CASPAR, German philologist and polemical writer, was born in the palatinate in 1576. He was brought up a Protestant, but having obtained the notice of Pope Clement VII., by a "Panegyric," which he wrote in 1598, he abjured Protestantism at Rome, and became a Catholic. Rewarded with honours and offices, he wrote several treatises in defence of the holy see. He quarrelled with Scaliger, who had turned Protestant, and in his "Scaliger Hypobolimus," ridiculed his vanity of noble ancestry, and attacked Protestants with much bitterness. On a visit to Venice, in 1609, Sclopius had an interview with Father Paul, and endeavoured to win him to the side of Rome, for which he was imprisoned a few days. At Vienna, which he next visited, he was named aulic councillor, and created count-palatine. In 1613 he went to Spain, and at Madrid got a sound beating from the servants of the English ambassador, probably on account of his attacks on James I. in his recent works. These works were deemed worthy to be burnt by the hangman, both at London and at Paris. Sclopius fled from Spain, and discharged at the ambassador his "Legatus Latio." He wrote more and more ferociously against Protestants, especially in his "Classicum Belli Sacri," and afterwards wrote as savagely against the Jesuits, so that his life was not safe at Milan, and he fled to Padua. His

critical and polemical works are more than a hundred in number, and among the former are, "Verisimilium libri IV.," "Suspecta- rume Leticionum libri V.," "De Arte Critica," and "Grammatica Philosophica, sive In- stitutiones Grammaticae Latinae." In learn- ing and acuteness Scloppius might rival Scaliger, and some of his philological works are still of value. Died, at Padua, 1619.

SCIPIO AFRICANUS (the elder), **PUB- LICUS CORNELIUS**, one of the greatest of the Romans, was born of an illustrious patrician family, B. C. 234. He is said to have saved his father's life at the battle of the Ticinus, and by his courage and decision he prevented the desertion of the young nobles after the defeat at Cannæ. At the age of 24 he was chosen to command, as proconsul, in Spain, where instead of risking a battle with the superior forces of the Carthaginians, he laid siege to the city of Carthago Nova, and took it the same year. His humane and generous conduct on becoming master of the city, and especially his liberation of the Spanish hostages and prisoners found there, among them a very beautiful girl, excited the most enthusiastic admiration. He was even offered the sovereignty of Spain, but declined to be more than general of the Roman people. During the next three years Scipio made himself master of all Spain except the town of Gades. In order to prepare the way for the invasion of the Carthaginian territory, he made a secret visit to the court of Syphax, king of Numidia, and won his alliance. In 206 he returned to Rome, and was chosen consul for the next year. Sicily was given to him as his province, and having attracted by his character and success an army of volunteers, he crossed, in 204, into Africa, and began the siege of Utica, but on the approach of Hasdrubal retired into winter-quarters. In the spring he burnt, by stratagem, the double camp of the enemy, and destroyed their fugitive forces. Syphax, who had joined Hasdrubal, was captured, and Cirta surrendered to the conquerors. Hannibal was recalled to oppose Scipio in Africa, and the second Punic War was terminated by the total defeat of Hannibal at the battle of Zama, 19th October, 202. Peace was signed the next year, and Scipio, on his return home, had the most splendid triumph which had yet been seen, and received the surname **AFRICANUS**. He declined other honours which were offered him; was subsequently censor, consul a second time, and in 193 ambassador to Antiochus, king of Syria, at whose court he is said to have met Han- nibal. Having accompanied his brother Lucius to the Syrian war as lieutenant, in 190, they were accused of misappropriation of monies received from Antiochus. Cato was the leader of the party opposed to Scipio, and the prosecution of Lucius was successful, but that of Africanus was dropped by the advice of Tib. Gracchus. The popularity of Scipio had waned, and he left Rome never to return. Died in his villa, at Liternum, B. C. 183, the same year in which Hannibal died. Scipio married the daughter of **Emilius Paulus**, and his youngest

daughter became the wife of Tib. Gracchus, and the mother of the tribunes, Tiberius and Cninus. Throughout his career Scipio was distinguished by extraordinary self-confidence and decision in action, and no less by a profound sense of religion. He professed, and it was believed by the people, that he was favoured with intercourse with the gods, and on all occasions he devoutly awaited divine direction before acting. The stately pride with which in his later years he disregarded the laws of his country obscured the lustre of the immense services he had earlier rendered.

SCIPIO, LUCIUS CORNELIUS, surnamed **ASIATICUS**, was brother of the preceding, with whom he served in Spain and Africa. He obtained the consulate, B. C. 190.

SCIPIO EMILIANUS AFRICANUS (the younger), **PUBLIUS CORNELIUS**, conqueror of Carthage, was born about B. C. 185. He was the youngest son of **Emilius Paulus**, and the adopted son of P. Scipio, son of Africanus the elder. In his youth he had the advantage of the instructions and friendship of Polybius, who, exiled from Greece, was permitted to live in the house of **Emilius Paulus**. He was an industrious student of literature, and early proved himself singularly free from the common vices of sensuality and covetousness. He began his military service in Spain in 131; gained great reputation soon after in Africa, in the third Punic War; and in 148, although not of age, was chosen consul. The next year, accompanied by Polybius and C. Laelius, he went to Africa, and at once commenced the siege of Carthage, which was heroically de- feated. It was entered by the Romans in the spring of 146; desperate fighting took place from street to street, and from house to house; with awful bloodshed, and at last a fire that raged nearly a week. Scipio mused mournfully over these horrors, and foreboded like ruin for Rome. By order of the Senate the walls and houses were totally destroyed, and a curse pronounced against whoever should rebuild the city. Scipio had a magnificent triumph on his return. He led a simple and frugal life, and during his censorship, 142, tried to effect reforms in the manners of his countrymen, but without success. In 131 he was again consul, with Spain for his province, and his great achieve- ment there was the siege and capture of Numantia; for which he had the surname **Numantinus**. His marriage with **Sempronis**, sister of the Gracchi, was not a happy one, and by his bold resistance to the proposed reforms, he lost the favour of the popular party; and at last, in 129, he was found dead in his bed. Suspicion of murder fell on various persons, but chiefly on Carho, one of the most rash advocates of the nerman reforms. Scipio was the friend of Terence, **Panætius**, and especially of **Laelius**, whose name is affixed to Cicero's discourse "De Amicitia."

SCOPAS, a celebrated Grecian sculptor, was a native of the Isle of Paros, and flour- ished in the 4th century B. C.

SCOPOLI, GIOVANNI ANTONIO, an Italian naturalist and physician, was born in 1723, at Cavalese in the Tyrol; and became, suc- cessively, first physician of the Tyrolese

mines, professor of mineralogy at Chemnitz, and professor of botany and chemistry at Pavia. He wrote several works on botany and entomology. Died, 1787.

SCORESBY, WILLIAM, D.D., whose name will long be perpetuated in connection with Arctic discovery, was born at Whitby in 1790. He was the son of the captain of a Whitby whaler, and such was his early passion for the sea, that at the age of ten he concealed himself in his father's ship, and did not present himself until the vessel was well at sea. Although the captain's son, he was not permitted to "enter by the cabin window," and beginning at the bottom of his profession, he worked himself gradually up. The long intervals during which the vessel was laid up in the winter, he spent in study at Edinburgh. In 1820 he published a very interesting account of the Arctic regions which he had repeatedly visited. Soon afterwards he came to Liverpool, out of which port he sailed for some years. In his last voyage he surveyed a large portion of the coast of Greenland, which still bears the name of Liverpool Coast, and upon any chart of that coast may be read a long list of the names of Liverpool families in headlands, bays, and islands. Considering that he had a call to the ministry, Mr Scoresby then abandoned the sea, and studied for orders at Cambridge with such success that he took a doctor's degree, accepted the chaplainship of the Mariners' Church, Liverpool, and at a later period took charge of an immense parish at Bradford. For the last few years of his life he resided at Torquay in retirement. Wherever he was he succeeded in gaining the warm affection of all who were brought in connection with him. It is, however, as a man of science that Dr Scoresby will be most widely known. Before he ceased his profession, he had upon several voyages turned his attention to the properties of the magnet, and much of the increased safety of iron ships is probably owing to the wholesome distrust of adjusted compasses excited by his experiments and lectures. Within a few months of his death, he went out in the Royal Charter to Melbourne, simply with the view of testing the truth of his theories. Besides his "Discourses to Seamen," which have gone through many editions, Dr Scoresby contributed numerous articles on natural history, physics, and meteorology, to the Edinburgh Philosophical Journal. Died, 1857.

SCOTT, JOHN, a Quaker poet, born at Bermondsey, in 1739. He resided, during the greater part of his life, at Amwell, a very picturesque village in Hertfordshire, enjoyed the friendship of Dr Johnson, and died in 1783. He was author of "Amwell," and other poems, which pleasingly reflect the charms of the pastoral scenery amidst which he lived; a "Digest of the Highway Laws;" and "Critical Essays." Amwell spring, the Emme-well of Domesday Book, is one of the heads of the New River, and Middleton has a monument there.

SCOTT, MICHAEL, a celebrated Scottish philosopher of the 13th century, whose knowledge of the occult sciences caused him to pass for a magician, was born at Balwirie, in Fifeshire. He is said to have

travelled in France, Germany, and England, and was received with great distinction by their respective sovereigns; received the honour of knighthood from the Scottish monarch, Alexander III.; and died in 1293. Several works on natural history and physical science are attributed to Michael Scott. But the account of his life is involved in much uncertainty, and it seems possible that there may have been two persons of the same name, and that their separate histories have been confused and run into one.

SCOTT, MICHAEL, the well-known author of "Tom Cringle's Log," was born in Glasgow, 1789; received his education at the high school and university of that city; went to Jamaica in 1806, where he remained till 1822; and finally settled in Scotland, where he embarked in commercial speculations. During his leisure he composed the entertaining sketches above mentioned, which first appeared in "Blackwood's Magazine;" and he preserved his incognito so well, that it was not until after his death that they were known to have proceeded from his pen. Died, 1835.

SCOTT, REGINALD, or REYNOLD, was a native of Kent, and received his education at Hart Hall, Cambridge. He had both the good sense and courage to oppose the absurd opinion, at that time prevalent, of the existence of witches, by publishing his "Discoveries of Witchcraft." Died, 1599.

SCOTT, SAMUEL, an eminent painter of sea scenery, who took Vandevelde for his model. His views of Old London Bridge and Westminster Bridge are in the National Gallery. Died, 1772.

SCOTT, THOMAS, an English divine, born in 1747, at Braytoft, in Lincolnshire, was intended for the medical profession, but entered the church, and rendered himself celebrated as a theological writer. He became chaplain of the Lock Hospital in 1785, and rector of Aston Sandford in 1801; was author of "The Force of Truth," a "Defence of Calvinism," the well-known "Commentary on the Bible," and "Sermons." Died, 1821.

SCOTT, Sir WALTER, bart, the great novelist, was born at Edinburgh, in 1771. He passed his youth in the pleasures of hunting, in the study of the law, and in reading old plays, romances, travels, and marvellous adventures. The antiquities and ancient poetry of Scotland early inflamed his imagination; he read the old chronicles, and made himself acquainted with the customs, obsolete laws, the traditions of families, and the superstitious beliefs of his countrymen. He made his debut as an author in "Minstrelsy of the Scottish Border," which had great success. His next work, the "Lay of the Last Minstrel," was received with still greater favour. "Marmion," "The Lady of the Lake," and "Rokeby" followed; but his poetical reputation was soon afterwards eclipsed by that of Lord Byron. Subsequently appeared "Paul's Letters to his Kinstfolk" and the "Battle of Waterloo." The first successful, the latter a failure. His novels, however, are his great passport to fame. Those masterly productions, on which criticism would

roune," "Les Huguenots," and "La Julve." Among his other most celebrated pieces are—"La Camaraderie," "Le Comte Ory," "Une Chaîne," and "Le Verre d'Eau." He was a member of the French Academy. Died at Paris, 20th February, 1861.

SCROPE, W., author of two popular works, "Days of Deerstalking," and "Days and Nights of Salmon Fishing," was the last male representative of the famous family of his name, seated at Castle Combe, in Wiltshire—of which they possessed the manor and estate as early as the reign of Edward the Third, and boasting among his historical worthies the name of Lord Scrope of Bolton, Lord Chancellor of England in the reign of Richard the Second. Mr Scrope was proud of his descent, but prouder of his skill with the gun, the rod, and the pencil, as well as of his classical attainments. He had an eye alive to the varieties of nature, and great power in communicating to his readers what he had seen. That he knew, and his books above named are worthy of a place beside Walton's "Angler" and Davy's "Salmonia." Died, in his 81st year, 1832.

SEATON, JOHN COLBORNE, Lord, field-marshal of England, was born in 1779. He was educated at Winchester School, and, at the age of 15, was appointed ensign in the army. He first served as lieutenant in the disastrous campaign of the duke of York in Holland in 1799, afterwards in Egypt, in Italy and Sicily, and took part in the battle of Maida. He was next military secretary to General Fox, and in 1808-9 accompanied Sir John Moore in the same capacity, and was with him at the battle of Corunna. Major Colborne was doubtless one of those who took part in the simple hasty burial of the hero, when "slowly and sadly" they "laid him down." The same year he joined Wellington's army in Spain, was at the battles of Ocaña and Busaco, and during the campaign of 1811, commanded a brigade which was employed as a flying force to keep in check the incursions of the French. His brigade was almost entirely destroyed at Albuera, being taken in flank and rear by the French. He greatly distinguished himself at the head of the 52nd Light Infantry in the assault on the fortress and town of Ciudad Rodrigo, 8th Jan., 1812; and though wounded in the shoulder by a musket-ball, still led his men on and won. Another most brilliant exploit was the carrying of the redoubts on the heights of Vera in the Pyrenees, on the 7th October, 1813. Colonel Colborne took part in the battles of Nivelle and the Nive; carried the entrenchments at Bidassoa, on which occasion Havelock, then very young, distinguished himself by an act of dashing courage; and led the attack on Soult's position at Orthes, Feb. 27th, 1814. He commanded the 52nd at Waterloo, and by one well-timed decisive movement contributed to the great victory. In 1825, he was made major-general; was lieutenant-governor of Canada from 1828 till 1836; he suppressed the rebellion which broke out subsequently, was created G. C. H., and raised to the peerage as Baron Seaton, with an annuity of £2000. He was afterwards Lord High Commissioner of the Ionian Is-

lands, and commander-in-chief in Ireland. On his retirement in 1854, he was named colonel of the 2nd Life Guards; general, a few months later, and in 1860, was created field-marshal. "He will be remembered," says a writer in the *Saturday Review*, "as one of the ablest and most trusted lieutenants of Britain's greatest general, and as having headed, on his most brilliant days, 'a regiment never surpassed in arms since arms were first borne by men.'" Lord Seaton died at Torquay, April 17th, 1863. He left his wife surviving him, and his three sons have distinguished themselves in the army. A colossal statue of Lord Seaton is being executed by Mr Adams to be erected at Southampton (1867).

SEBASTIAN, king of Portugal, was born in 1554, and ascended the throne at three years of age, on the death of his grandfather, John III. Possessed of a romantic disposition and an extravagant admiration of the glories of chivalry, he rashly determined to carry on war against the Moors in Africa, hoping thereby to effect something for Christianity and the fame of Portugal. He accordingly equipped a fleet and an army, which comprised the flower of the Portuguese nobility, and sailed for Africa in 1578, at the age of 23 years. A general engagement soon took place, at Alcazar-el-Xebir, and the ardour of the young king bore him into the midst of the enemy, who were already pouring on the rear of his troops. Sebastian fought with the most determined bravery, while most of his attendants were slain by his side. He at length disappeared; and so complete was the slaughter, that no more than 50 Portuguese are said to have survived this wild and ill-fated expedition. The mystery which involved the fate of this royal warrior led several adventurers to assume his person and his claims, but there seems to be no doubt that he died on the field of battle. An interesting work has just been published (1866), entitled "Les Faux Don Sébastien. Étude sur l'Histoire de Portugal," by Don Miguel D'Antas.

SEBASTIANI, HORACE FRANÇOIS, Count, marshal of France and diplomatist, was born in Corsica, in 1776. He entered the army in 1792, served in the campaign of Italy, and obtained the favour of Napoleon by the part he took in the revolution of the 18 Brumaire (November, 1799). Various negotiations were intrusted to him, which he managed with much tact. At Austerlitz he greatly distinguished himself, was severely wounded, and was made general of division. He was employed in the Peninsula, 1806—1811; took part in the expedition to Russia, and in the campaign of 1813; and after Waterloo was one of the envoys to the allied sovereigns. In 1819 he became a member of the Chamber of Deputies; minister of marine and minister for foreign affairs under Louis Philippe; filled the post of ambassador to England for five years, 1835—40; was soon after created marshal of France, and died at Paris in July, 1851. The unfortunate duchess of Praslin, murdered by her husband in 1847, was the daughter of Marshal Sebastiani.

commander-in-chief in Ireland. Promoted in 1854, he was named the 2d Life Guards; general, in 1857, and in 1860, was created a peer. "He will be remembered," says the *Saturday Review*, "as the ablest and most trusted lieutenant of our greatest general, and succeeded, on its most brilliant days, to never surpassed in arms since the first borne by men." Lord Seaton was created a peer, April 17th, 1863. He left Ireland, and his three sons distinguished themselves in the army. The statue of Lord Seaton is being erected by Mr Adams to be erected at on (1867).

SEBASTIAN, king of Portugal, was born in 1642, and ascended the throne at three years of age, on the death of his grandfather, Sebastian III. Possessed of a romantic and an extravagant admiration of the chivalry, he rashly deterred on war against the Moors in 1662, hoping thereby to effect something great, and to add the fame of Portugal. He was richly equipped a fleet and an army which comprised the flower of the nobility, and sailed for Africa in the month of August, 1662. A general engagement took place, at Alcanar, on the 22d of August, in which the ardour of the young king led him into the midst of the enemy, who were pouring on the rear of his army. Sebastian fought with the most bravery, while most of his attendants were slain by his side. He was killed, and so complete was the victory, that no more than 50 Portuguese were left to have survived this wild and desperate expedition. The mystery which surrounded the fate of this royal warrior led to various adventures to assume his person, but there seems to be no ground to be laid on the field of battle. An engraving work has just been published, entitled "Les Faux Don Sebastien, ou l'Histoire de Portugal," by Don Antonio de Antas.

SEBASTIANI, HORACE FRANÇOIS, Count, of France and diplomatist, was born in Corsica, in 1776. He entered the army in 1792, served in the campaign of 1793, and obtained the favour of Napoleon when he took in the revolution of the 18th of Brumaire (November, 1799). Various orders were intrusted to him, which he performed with much tact. At Austerlitz he distinguished himself, was severely wounded, and was made general of division. He was employed in the Peninsula, 1808-1809, took part in the expedition to Russia, and the campaign of 1813; and afterwards was one of the envoys to the allied powers. In 1819 he became a member of the Chamber of Deputies; minister of marine, 1820; minister for foreign affairs under Louis XVIII.; filled the post of ambassador to Prussia for five years, 1835-40; and afterwards created marshal of France, and died in Paris in July, 1851. The unfortunate princess of Prussia, murdered by her husband in 1847, was the daughter of Marshal Sebastiani.

SEBASTIANO DEL PIOMBO. [PIOMBO.] SECKER, THOMAS, archbishop of Canterbury, an eloquent and pious prelate, was born at Sibthorp, in Nottinghamshire, in 1633, and was educated with the view of becoming a dissenting minister. He, however, conformed to the Church of England, took orders, and obtained preferment. He became, successively, rector of Houghton-le-Spring, prebendary of Durham, king's chaplain, and rector of St James's, Westminster. In 1735 he was elevated to the see of Bristol; whence he was translated to that of Oxford, in 1737; and, in 1758, he was raised to the archiepiscopal see of Canterbury; in which situation he conducted himself with great dignity, munificence, and proper severity against any laxity in the morals and manners of the clergy under his more especial superintendance. His sermons, charges, and other works, form 12 vols. Died, 1768.

SEDDLEY, SIR CHARLES, a celebrated wit, courtier, and poet, of the age of Charles II., was born at Aylesford, in Kent, in 1633, and was educated at Wadham College, Oxford. He was a conspicuous character among the licentious circle which surrounded the gay monarch; but though himself a profligate, he was so much annoyed by an intrigue which James II. carried on with his daughter, afterwards created countess of Dorechester, that he took an active part in promoting the revolution. Died, 1701.

SEETZEN, ULRIC JASPER, a celebrated German traveller, was a native of East Prussia, and received his education in the university of Göttingen, where he particularly studied natural history and philosophy. Seconded by the patronage of the Dukes Ernest and Augustus of Saxe-Gotha, in a desire to visit Asia and Africa, he commenced his perilous undertaking in 1802, at Constantinople, where he stayed six months. The ambassadors there assembled, encouraged his enterprise; and at Smyrna the Russian Prince Oczakow, who had been over Asia Minor and Egypt, assisted him with many useful instructions. Seetzen stopped one year at Aleppo to learn the Arabic language, and to collect MSS. for the library of the duke of Saxe-Gotha, and reached Damascus in April, 1805. From thence he explored many parts of Syria, Palestine, and Arabia, which had not before been visited by any European; and in order that he might be able to undertake a pilgrimage to Mecca and Medina, he made a profession of Mahometanism. In 1810 he was at Mecca, whence he wrote the last letters that arrived from him in Europe. Having had his property seized by the Arabs, under the pretence of his being a magician, he proceeded towards Damascus, to complain to the imam of that place; and, a few days after his departure (December, 1811), he died suddenly at Tarsus, probably from the effects of poison given him by order of the imam.

SEGUIER, JEAN FRANÇOIS, an eminent botanist, was born at Nismes, in 1703, and died in 1781. His works are "Bibliotheca Botanica," "Planta Venenenses," 3 vols.; and a translation of the Memoirs of Maffei.

SEGUR, LOUIS PHILIPPE, Count de, a French diplomatist and historical writer,

was the eldest son of the Marshal de Segur, and born in 1753. He served during two campaigns in the American war, and was afterwards ambassador to St Petersburg and Berlin. On the overthrow of the French monarchy he relinquished his connection with affairs of state; he was, notwithstanding, arrested by order of the Committee of Public Safety; but being liberated shortly after, he quitted France; and did not return till after the fall of Robespierre. In 1803 he was nominated to the council of state; and, under the imperial government, he was appointed to the office of grand-master of the ceremonies at court. In 1813 he was made a senator; and, on the restoration of the Bourbon family, he was created a peer of France; notwithstanding which, after Buonaparte's return from Elba, he resumed his legislative functions, and again became grand-master of the ceremonies, and one of the peers appointed by Napoleon. On the final restoration of Louis XVIII. in 1815, the count was stripped of all his dignities, and passed the remainder of his life in literary retirement. He died in 1830. Among his works are, "A Political Picture of Europe," "The Reign of Frederick William II.," the "History of Modern Europe," &c.

SEGUR, PHILIPPE HENRI, Marquis de, marshal of France, was born of an ancient and noble family in Périgord, in 1721. His family were Protestants, and had suffered much both during and after the civil wars. He served with distinction in the wars of Bohemia and Italy; was dangerously wounded at the battle of Rancoux; had his arm shattered at Lawfeldt, but continued at his post till victory was complete, and was made immediately *maréchal de camp* and lieutenant-general. At Clostercamp he received a bayonet wound in the neck and a sabre cut on the head, and was taken prisoner. Appointed inspector of the peace, he became minister of war under Louis XVI., in 1781, and filled that post with much ability till 1788; introducing great improvements in military organization, discipline, and finance. It was during his administration that the unjust ordinance was published by which the nobles could become officers in the army; but he is said to have protested against it. He was created marshal in 1783, and retired when Cardinal Loménie de Brienne became first minister. During the Reign of Terror the old soldier and statesman, feeble and covered with wounds, was arrested, deprived of his dignities and property, and imprisoned. Liberated by Napoleon, he died at Paris, in 1801.

SEJANUS, JULIUS, minister of the Emperor Tiberius. [See TIBERIUS.]

SELDEN, JOHN, an English antiquary, jurist, and historian, of most extensive acquisitions, was a native of Sussex, and born in 1584. After receiving his education at Chichester, and Hart Hall, Oxford, he studied the law in the Temple, and was called to the bar. He practised chiefly as a chamber counsel, and devoted much of his time to studying the history and antiquities of his country. So early as 1607 he drew up a work, entitled "Analecta Anglo-Britannica," which was quickly succeeded by

several others; and in 1614 appeared his "History of Tithes," for which he was cited before the court of High Commission, and had to make a sort of apology. In 1623 he entered parliament, and earnestly supported the measures of the popular party. He did not, however, abandon literary pursuits, and in 1635 published his "Mare Clausum," in which he endeavours to establish the British right of dominion over the circumjacent seas. He was elected in 1640 member for Oxford; at which time he was so well affected to the king, that when the king withdrew to York, he had some notion of appointing him chancellor. At the commencement of the disputes between Charles and the parliament he acted with great moderation, and uniformly endeavoured to prevent an ultimate appeal to the sword. In 1643, the House of Commons appointed him keeper of the records of the Tower, and the following year, one of the commissioners of the admiralty, voting him £5000 as a reward for his services. He employed all his influence for the protection of learning, and was universally esteemed for his honesty, urbanity, and goodness of heart. Died, 1654. Selden's valuable treatise, "De Jure Naturali et Gentium juxta disciplinam Hebræorum," was published in 1649. His "Table Talk" appeared in 1689, and has been very popular. A portrait of Selden, painter unknown, is in the National Portrait Gallery.

SELEUCUS NICATOR, founder of the dynasty of the Seleucidae, was the son of a Macedonian general, and was born about B. C. 358. He greatly distinguished himself as a general in the campaigns of Alexander the Great in Persia and India. The satrapy of Babylonia was assigned to him after the death of Perdicas, in 322; but five years later, in consequence of the growing power of Antigonos, he fled to Egypt, joined the league formed against him, and after the victory of Gaza in 312 recovered Babylonia. From this year is reckoned the so-called era of the Seleucidae. Seleucus extended his dominions by conquest, and in 306 took the title of king. He took part in a second war with Antigonos, who was defeated and killed at the battle of Ipsus, in 301. By the acquisitions of territory made after this battle, Seleucus made his empire the greatest of those ruled by the successors of Alexander. He founded the cities of Antioch in Syria and Seleucia near Babylon, besides a great number of other cities, thus continuing the work which Alexander had begun. He married Stratonice, daughter of Demetrius Poliorcetes, but resigned her to his son Antiochus, to whom also he gave up a large part of his empire. Seleucus was afterwards engaged in war with Demetrius, made him prisoner in 286, and kept him so till his death, three years later. A war with Lysimachus ended in his defeat and death in 281, and Seleucus, advancing to the conquest of Macedonia, was murdered by Ptolemy Cernanus, 269.

SELIM III., sultan of Turkey, son of Mustapha III., was born in 1761, and succeeded his uncle, Abdul Hamid, in April, 1789. The

studies which he had diligently pursued, and the intercourse which he had held with eminent statesmen, made him ambitious of being a reformer; but the ill fortune of the Turks in the wars with Russia and Austria, and the numerous rebellions and insurrections in the various provinces of the empire, long prevented his attempting the task. War with France followed, and Egypt was conquered, but it was recovered by the English and restored to Selim. In 1800 he became protector to the Ionian Islands, and peace being established, he applied himself to the difficult work of internal reform. The organization and discipline of the army, the constitution of the divan, and the system of taxation were matters which he sought to regulate. War with Russia again broke out in 1806, the new army organization, "Nizam Jedid," excited immense dissatisfaction, and in May, 1807, the janissaries revolted, and Selim was deposed, imprisoned, and in the following year strangled, 28th July, 1808.

SELKIRK, ALEXANDER, was born at Largo, in Scotland, about 1699. He was a good navigator, and made several voyages to the South Sea, in one of which, having a quarrel with his commander, he was put ashore in the island of Juan Fernandez, with a few necessaries, a fowling-piece, gunpowder, and shot. Here he remained in solitude nearly three years, till he was taken away by Captain Woods Rogers, in 1709. On his return to England, he is said to have given Daniel Defoe the narrative of his adventures, and that from this source originated the "Adventures of Robinson Crusoe."

SEMLER, JOHANN SALOMO, an eminent German theologian, born at Saalfeld, in 1725. He was educated at the university of Halle, where, after residing at Coburg and Altdorf, he was appointed in 1751 professor of theology, a post which he held till his death. Semler was brought up a Pietist, but became subsequently distinguished as a Rationalist divine. His writings are very numerous, and among the principal are—"Abhandlung von der Untersuchung des Canons," "Apparatus ad liberalem Novi Testamenti Interpretationem;" a similar work on the Old Testament; "Selecta capita Historiæ Ecclesiasticæ," and his "Lebensbeschreibung." Semler was for more than 20 years director of the Theological Seminary at Halle. Died, 1791.

SENEBIER, JEAN, natural philosopher and historian, was born at Geneva, in 1712. He adopted the ecclesiastical profession, but his attention was more particularly directed to philosophy and natural history. He obtained the office of public librarian at Geneva in 1773, became one of the contributors of the Geneva Journal in 1787, and died in 1809. Among his chief works are an "Essai sur l'Art d'observer et de faire des Expériences;" "Mémoires Physico-chimiques;" "Histoire Littéraire de Genève;" and "Physiologie Végétale." He translated the works of Spallanzani, and contributed memoirs to various learned societies.

SENECA, LUCIUS ANNEUS, Roman philosopher, and tutor to the emperor Nero,

he had diligently pursued, and which he had held with him, made him ambitious of glory; but the ill fortune of the wars with Russia and Austria, and the rebellions and insurrections of various provinces of the empire, his attempting the task, he followed, and Egypt was it was recovered by the emperor to Selim. In 1800 he was sent to the Ionian Islands, and established, he applied himself to the work of internal reform. The discipline of the army, the reformation of the divan, and the system of public affairs, were the matters which he sought to reform. His war with Russia again broke up the new army organization, and excited immense dissensions. In May, 1807, the janissaries' revolt was suppressed, imprisoned, and following year strangled. 28th

ALEXANDER, was born at London, about 1699. He was a sailor, and made several voyages to the West Indies, in one of which, having been his commander, he was put on board of Juan Fernandez, and necessary, a fowling-piece, and shot. Here he remained in confinement three years, till he was rescued by Captain Woods Rogers. On his return to England, he is said to have written the narrative of his adventures, and that from this source is derived the "Adventures of Robinson Crusoe."

JOHANN SALOMO, an eminent theologian, born at Saalfeld, in Thuringia, was educated at the university of Jena, after residing at Coburg and was appointed in 1751 professor of divinity, a post which he held till his death. He was brought up a Pietist, but subsequently distinguished as a liberal divine. His writings are very numerous, and among the principal are: "Vernunft und der Untersuchung des Apparatus ad liberalem Novi Testamenti interpretationem;" a similar work on the Old Testament; "Selecta capita de theologia naturalis;" and his "Lebensgeschichte." Semler was for more than thirty years of the Theological Seminary at Halle, 1794.

JEAN, natural philosopher and mathematician, was born at Geneva, in 1712. He held the ecclesiastical profession, but his attention was more particularly directed to philosophy and natural history. He was the office of public librarian at Geneva, and became one of the conductors of the "Journal de Trévoux," and died in 1780. Among his chief works are: "Mémoires Physico-mathématiques observés de faire des expériences;" "Mémoires Littéraires de Genève;" and "Végétale." He translated the "Almagest," and contributed to various learned societies.

CLAUS ANNAUS, Roman senator, was tutor to the emperor Nero.

A New Universal Biography.

was the son of M. Annæus Seneca, an eminent rhetorician, and was born at Corduba, in Spain, about the beginning of the Christian era. Taken early to Rome, he became an advocate, gained some distinction, and was made quaestor. But under Claudius, his intimacy with Julia, daughter of Germanicus, and an accusation of adultery with her, brought against him by the infamous Messalina, led to his being banished to Corsica, where he lived eight years. For a time he alleviated the bitterness of exile with the consolations of philosophy, but he afterwards stooped to the basest adulation and the most servile entreaties to Claudius to be allowed to return to Rome. In A. D. 49 he was recalled, through the influence of Agrippina, who was just married to Claudius. He was made prætor, and then tutor to Agrippina's son, the future Nero. Seneca ingratiated himself with the young prince, and continued to enjoy his favour after his accession to the throne. How far the philosopher strove to correct the vices of the emperor, or whether he did not rather wink at or even pander to them cannot perhaps be ascertained. But the philosopher grew immensely rich, had a palace sumptuously furnished at Rome, country seats and splendid gardens, and an enormous amount of ready money. After long profiting by the favour of Agrippina, he took her son's part against her, probably sanctioned, tacitly, if not expressly, her murder by her son, and wrote Nero's letter of justification to the Senate. He soon after lost the favour of the emperor, who coveted his money; and by the emperor's permission he quitted Rome for the country. In A. D. 65 Seneca was accused of taking part in the conspiracy of Piso, his intimate friend, and was ordered to put himself to death. He opened a vein in each arm, then in his legs, but the blood flowed very slowly; a dose of hemlock had no effect, and at last his tortures, which he bore with Stoical fortitude, were ended by suffocation in a warm bath. His writings were very numerous, and many are still extant; among them are treatises "De Ira," "De Consolatione," "De Providentia," "De Animi Tranquillitate," and "De Vita beata;" 124 Letters to Lucilius; 10 Tragedies, and a remarkable work entitled "Questionum Naturalium Lib. VII." Seneca attached himself chiefly to the Stoic school, but adopted also principles from other systems. His works abound in quotable maxims and sentiments, his language is lucid and vigorous; but he is over-fond of antithesis. His style, like his conduct at his death, had a theatrical affectation about it. His works have been very much read, and very frequently republished.

SENEFELDELL, ALOYS, inventor of lithography, was born at Prague in 1771. He was the son of an actor; was sent to study law at the university of Göttingen, became an actor and a play-wright, and at last, taking great interest in the process of printing, set himself to discover some cheaper mode of multiplying copies of a manuscript. After various projects, trials, and failures, he perfected the invention of lithography in 1798. Several lithographic establishments

were founded and got into successful operation, and in 1809 Senefelder reaped the late but welcome reward of his labours in his appointment as Inspector of the Royal Lithographic Establishment of Bavaria, with a good salary. He published in 1819 an interesting account of his various experiments, failures, and success, which was translated into English under the title of "A Complete Course of Lithography." The same year he received the gold medal of the London Society of Arts. Died at Munich, 1834.

SENIOR, NASSAU WILLIAM, political economist and miscellaneous writer, was born at Compton, Berkshire, in 1790. He was educated at Eton and Oxford, where he graduated in 1811; was called to the bar at Lincoln's Inn in 1819, and in 1825 was appointed professor of political economy in the university of Oxford, a post which he held till 1830. He was named a master in chancery in 1836, and was re-appointed to the professorship of political economy in 1847. He held for some years the office of examiner in political economy in the university of London. He was author of numerous works, chiefly on political economy, among which are—"Outline of the Science of Political Economy," originally an article for the Encyclopædia Metropolitana; "Political Economy;" "A Journal kept in Turkey and Greece, in the Autumn of 1857 and the beginning of 1858;" "Biographical Sketches;" and "Essays on Fiction;" both reprinted from the leading reviews. Ill health compelled him to resign his professorship in 1862, and he died at Kensington, June 4, 1864. "Few men," says a writer in the *Saturday Review*, "who have neither sat in parliament, nor held permanent official situations, nor written great books, have done so many and such various services to the world as Mr Senior." He was one of the authors of the new poor-law; was a zealous promoter of popular education; a prominent member of the commission on that subject in 1858-1861; sat on several other philanthropic commissions; filled his professorship at Oxford with great success, and was for more than forty years one of the most distinguished contributors to our best periodical literature.

SEPULVEDA, JUAN GINEZ DE, born in 1491, was historiographer to the Emperor Charles V., and rendered himself ignobly conspicuous as the author of a "Vindication of the Cruelties of the Spaniards against the Indians," in opposition to the benevolent representations of Las Casas. He was also the author of a "Life of Charles V.," 4 vols.

SERASSI, PIERO ANTONIO, an Italian biographer, born at Bergamo, in 1721. He wrote the Lives of Tasso, Dante, Politiano, Petrarch, and other eminent Italians. Died, 1790.

SERGEL, JOHANN TOBIAS, a celebrated Swedish sculptor, was born at Stockholm, in 1740; studied in Italy, and rose to great eminence in his art; was ennobled on his return to Sweden, and died in 1814. His numerous able works are chiefly confined to Sweden, but his "Diomedes stealing the Palladium of Troy" is in England.

SERRES, OLIVE, the self-styled princess

of Cumber'nd, was born at Warwick, in 1772, and educated under the protection of her uncle, the Rev. Dr Wilmot. At an early age she married Mr Serres, marine painter to George III., but after a few years they separated. She was an artist, and was appointed landscape-painter to the prince of Wales. She attracted a large share of public attention for some years; believing, or at least professing, herself to be the legitimate daughter of Henry Frederick, duke of Cumberland, by a marriage with the sister of Dr Wilmot. In June, 1822, Sir Gerard Noel was induced to move for an investigation of her claims in the House of Commons, and was seconded by Mr Hume; but Sir Robert Peel saw there was abundant room for a laugh at the expense of the *soi-disant* princess and her supporters; and, in a vein of successful irony, he overturned the whole fabric that had been raised to support "the Princess Olive's claims." Her latter years were passed in poverty, within the rules of a prison, in consequence of debts contracted while under her delusion of royalty; having at that time commenced a splendid establishment, assumed the royal livery, &c. She was at length liberated, and went to reside with Miss Macaulay, at Somers Town, a short time previous to her death, which occurred in 1834, at the age of 62. The claim of Olive Serres is now (1866) once more brought into discussion by her daughter, Mrs Ryves, who styles herself Lavinia, princess of Cumberland and duchess of Lancaster, and is prosecuting her claim to £15,000 under the will of George III. She has published an "Appeal for Royalty," in the form of a letter to the queen.

SERTORIUS, QUINTUS, a distinguished Roman general, was a native of Nursia, in the country of the Sabines. He served under Marius in the Cimbric war, afterwards in Spain, and was made *quasstor*, B. C. 91. He joined the party of Marius in the civil war, and commanded with Cinna at the siege of Rome, B. C. 87; but was indignant at the atrocious proscription which followed. The licence and cruelties of the slaves especially excited his disgust, and he fell on them and slew several thousands. Appointed praetor in 83, he went soon after to Spain, where his courage and skill as a soldier were well known. He had, however, to retire before the forces of Sulla, and went to Africa; but on the invitation of the Lusitanians, returned and put himself at their head to fight for independence. His progress was rapid, he made himself master of great part of Spain, established a senate, founded a school at Osca for the education of young Spaniards in Greek and Roman learning, and to increase the superstitious reverence of the people for his person, gave out that he had communications with the gods through the white fawn which always accompanied him. Metellus Pius was sent against him in 79, but could effect nothing; two years later Pompey joined Metellus, but Sertorius, reinforced by Perperna, held out against both till 72. He entered into negotiations with Mithridates, which caused fresh alarm at Rome. But his influence and popularity were shaken by his despotic acts, and espe-

cially by the massacre of all the scholars at Osca; and he was assassinated by Perperna, his ally, at a banquet, in B. C. 72.

SERVETUS, MICHAEL, a learned Spaniard, memorable as the victim of religious intolerance, was born at Villanueva, in 1509; was educated at Toulouse, studied medicine at Paris, and was for some years in correspondence with Calvin. He published several anti-trinitarian works, especially one, entitled "Christianismi Restitutio," which excited against him the violent hatred of both Catholics and Protestants; and though he was so fortunate as to escape from the persecutions of the former, he could not elude the vengeance of the latter, headed and incited as they were by his implacable enemy, the stern and unforgiving reformer of Geneva. He was seized as he was passing through that city, tried for "blasphemy and heresy," and condemned to the flames, which sentence was carried into execution, Oct. 27, 1553. Servetus is supposed by many to have anticipated Harvey in the discovery of the circulation of the blood.

SERVIVS TULLIUS, the sixth mythical king of Rome. He married the daughter of Tarquinius the elder, whom he succeeded, and was murdered by his son-in-law, Tarquinius Superbus. To Servius are attributed the extension of the limits of the city of Rome, new fortifications, and a new constitution favourable to the plebeians.

SETTLE, ELKANAH, an English poet, was born at Dunstable, 1681; educated at Trinity College, Oxford; became for a short time the rival of Dryden as a dramatist; was much engaged in the political squabbles of the age, and wrote some clever pieces both in prose and verse. Died, 1724.

SEVERUS I., LUCIUS SEPTIMIUS, Roman emperor, was born A. D. 146, at Leptis, in Africa, and was raised to the throne on the death of Pertinax. He had to contend with several rivals; first Didius Julianus, whom he put to death; then Pescennius Niger, whom he defeated at Issus; and at a later period Albius, whom he defeated near Lyons in 197. Severus had in the preceding year taken Byzantium after two years' siege. He carried on a successful war in the East, and in 208 visited Britain, made war on the Caledonians, and built the great wall across the north of England from the Solway to the Tyne. As a monarch he was cruel; and it has been said that he never performed an act of humanity, or forgave a fault. He was a man of letters, and composed a history of his own reign. He died at York, in 211.

SEVERI S. (ALEXANDER SEVERUS); SEVERUS, SULPICIUS. (SULPICIUS SEVERUS.)

SÉVIGNÉ, MARIE DE RAUJIN, Marchioness de, daughter of the Baron de Chantail, was born in 1626. At the age of 18 she married the Marquis de Sévigné, who was killed in a duel seven years afterwards, being thus left a widow, with two children, she devoted herself to their education; and when her daughter married the Count de Grignan, she kept up a correspondence with her; to which circumstance the world is indebted for the greater part of those letters on which her reputation securely

published.

SEWARD, ANNA, daughter of the Rev.
Thomas Seward, himself a poet and editor
of Beaumont and Fletcher, was born at
Eyam, in Derbyshire, in 1747. She evinced
a poetical taste in early life. In 1782 she
published her poetical romance of "Louisa,"
and she subsequently printed a collection of
sonnets, and a "Life of Dr Darwin," in
which she asserted her claim to the first
fifty lines of that author's "Botanic Garden."
Died, 1809. An edition of her works, with
a biographical preface, was published by Mr
(afterwards Sir Walter) Scott; her "Let-
ters" also appeared in 6 vols.; but her fame
has passed away.

SEWARD, WILLIAM, a biographical
writer, was born in London, 1747. He was
educated at the Charter House and at Ox-
ford; was intimate with Dr Johnson, and
other eminent literary characters; and was
author of "Anecdotes of distinguished Per-
sons," "Biographiana," &c. He died in
1799.

SEWELL, WILLIAM, the son of an English
refugee at Amsterdam, who, though brought
up as a weaver, made himself master of
several languages, and compiled an "Eng-
lish and Dutch Dictionary;" but he is best
known by his "History of the Quakers," of
which sect he was himself a member. Died,
1725.

SENTUS EMPERICUS, a Greek philo-
sopher and physician, who lived in the
reign of Commodus. Only two of his works
are extant, the "Institutes of Pyrrhon-
ism," and ten books against the mathema-
ticians.

SEYMOUR, EDWARD, duke of Somerset,
in the reign of Edward VI., to whom he
was maternal uncle, being brother of Jane
Seymour, third wife to Henry VIII. He
devoted himself to the military profession,
and commanded in a maritime expedition
against the Scots, in 1514, when he landed
a body of troops at Leith, and set fire to
the city of Edinburgh. On the death of
Henry VIII. he rose to unbounded power,
procuring himself to be appointed governor
of the king, and protector of the realms. In
1548 he obtained the post of lord treasurer,
was created duke of Somerset, and made
earl-marshal. The same year he headed
an army, with which he invaded Scotland,
and after having gained the victory of Mus-
selburgh, returned in triumph to England.
His success excited the jealousy of the earl
of Warwick and others, who first procured
his confinement in the Tower, for a short
time during 1549, on the charge of arbit-
rary conduct and injustice, and finally caused
him to be again arrested, two years after-
wards, on the charge of treasonable designs
against the lives of some of the privy-coun-
cillors, for which he was beheaded on Tower
Hill, Jan. 22, 1552.

SFORZA, JACOPO, a very celebrated Ital-
ian condottiere, head of the illustrious family
of Sforza, was born at Cotignola in the Ro-
magna, in 1369. His family name was *Atten-
dolo*, but on quitting his father's farm for
the pursuit of arms he took the name of
Sforza. He formed a company of soldiers

with which he entered into the service of
any prince or state for pay; passing from
one to another as seemed expedient. He
was successively in the pay of the lords of
Milan, the Florentines, the marquis of Fer-
rara, the Pope John XXIII., and the pope's
enemy Ladislaus, king of Naples, who named
him grand constable of the kingdom. After
the death of Ladislaus he was twice im-
prisoned, but regained his liberty, acquired
several towns and estates, and augmented
and strengthened his band of soldiers, who
were strongly and devotedly attached to
him. He found a worthy rival in Braccio
de Montone, and was for several years at war
with him. In 1417 he was sent to re-estab-
lish the authority of the pope at Rome, in
which he succeeded. In 1420 he passed into
the service of Louis of Anjou, being still op-
posed to Braccio. In 1422 he had a meeting
with Braccio, and obtained his mediation
with Joanna, queen of Naples, so that she re-
ceived Sforza into favour again, and made
him constable of the kingdom. He was em-
ployed to combat her adopted son, Alfonso
of Aragon, who had taken possession of Naples,
and compelled him to quit the city. Sforza
was drowned while attempting to cross the
river Pescara in January, 1424.

SFORZA, FRANCESCO, duke of Milan,
son of the preceding, was born in 1401. He
followed his father in all his campaigns, and
on his death succeeded to the command of
his forces. He entered in 1425 the service
of the duke of Milan, and was employed
against the Florentines and Venetians. In
1431 he occupied the March of Ancona, and
made it independent of the pope. About the
same time he gained the firm alliance of
Cosmo de Medici. After serving the Venet-
ians and the Florentines against the Mil-
lanese, who were commanded by Piccinino,
another celebrated condottiere, he married,
in 1411, the daughter of the duke of Milan,
and received with her the sovereignty of
Cremona. The next year the pope, Eugenius
IV., and the king of Naples, on the instiga-
tion of the duke, made war on Sforza to re-
cover Ancona; and the pope excommuni-
cated him. The war lasted till 1447, when
Sforza gave up the last town he held in the
March. On the death of his father-in-law
the same year he claimed the states of
Milan, and after several years of fighting,
and finally blockading the city, he compelled
the people to proclaim him duke, in March,
1450. War with the Venetians occupied him
for two years, in which he was supported by
René of Anjou, and peace was made in 1454.
Sforza used his power with great prudence
and moderation, and executed several im-
portant works for the strengthening and
beautifying of Milan. Died, 1466.

SFORZA, LUDOVICO, surnamed *the Moor*,
duke of Milan, was third son of the preced-
ing, and was born in 1431. He was exiled
from Milan during the reign of his brother,
Galeazzo Maria, and again under his nephew,
Giovanni Galeazzo; but in 1479 he returned
in arms, put to death the wise Simonetta,
secretary to the duchess-regent, and made
himself absolute master. He married in
1491 Beatrice of Este; two years later in-
vited Charles VIII. of France to invade

Italy and seize the kingdom of Naples, and at the same time prevailed on the Emperor Maximilian to give him the investiture of the duchy. On the death of the young duke his nephew, in October, 1494, by slow poison, it was said, administered by order of Ludovico, the latter succeeded him. Alarmed at the rapid conquest of the French, he joined in 1495 the league of the pope, the emperor, the king of Spain, and the princes of Italy against Charles, who, however, succeeded in fighting his way back to France. In 1499 the invasion of the Milanese was renewed under Louis XII., and the whole territory was conquered by his generals, Trivulzio and Torelli, Louis himself entering the capital in October. Ludovico succeeded in re-entering Milan in the following year, but was besieged in Novara, and betrayed to the French, who carried him with other princes of his house to France; and he passed the rest of his life as a prisoner at the château of Loches. Died, 1508 or 1510. His surname, the Moor, was given him either because of his swarthy colour, or in allusion to his device, the mulberry-tree, in Italian *El Moro*.

SHADWELL, SIR LANCELOT, vice-chancellor of England, was born 1779; educated at Eton and Cambridge, where he took his degree of B.A. in 1800, as seventh wrangler, obtaining also the second chancellor's medal. He was called to the bar by the honourable society of Lincoln's Inn in 1803, was appointed a king's counsel in 1821, sat for Ripon as M.P. in 1826, and was elevated to the vice-chancellorship of England in 1827. His honour also twice filled the office of a commissioner of the great seal, first in 1835, after Lord Brougham's, and in 1850, after Lord Cottenham's resignation of the chancellorship. As a judge, Sir Lancelot gave great satisfaction. He disposed with great rapidity of the mere routine business of his court, and he was no less remarkable for his affability and courtesy, than for the humour and classical wit with which he seasoned his dicta. Died, Aug. 10, 1850.

SHADWELL, THOMAS, a dramatic poet, was born in 1640, at Stanton Hall, Norfolk, and was educated at Cambridge. When Dryden was removed from the offices of laureate and historiographer royal, Shadwell was appointed his successor, which exposed him to the severity of that poet's satire, who ridiculed him under the appellation of *Macflecknoe*. Died, 1692. His principal plays are "Epsom Wells," "Timon the Misanthrope," the "Virtuoso," the "Gentleman of Alsace," and the "Lancashire Witches."—**CHARLES SHADWELL**, supposed to have been the son or nephew of the preceding, wrote some plays, the best of which is entitled the "Fair Quaker of Deal." Died, 1726.

SHAKESPEARE, WILLIAM, the poet, was born at Stratford-on-Avon, a pleasant and very old town in Warwickshire, in 1564. He was baptized on the 26th April, and his birthday, according to tradition, was the 23rd April. Strange to say, of the life of this child of poets, latest-born of the great Triad—Homer, Dante, Shakespeare—we

know almost nothing with any certainty. From such trivial matters as the spelling of his name and the house in which he was born, up to the high and difficult question of the meaning of his sonnets, almost all the particulars of his biography are either involved in total darkness, or only seen by the imperfect and bewildering light of conflicting traditions. All that it is possible to do here is to tell the story as it is usually told, or the most probable particulars of it. The poet's father was John Shakespeare, a well-to-do inhabitant of Stratford, probably glover, grazier, and dealer in wool, owner of landed property, alderman, and in 1568 chief magistrate of Stratford. His mother was Mary Arden, of an ancient and wealthy family, but of whom personally nothing whatever is known. His name appears in the forms—Shakespeare, Sinksper, Shaksper, Shagspere, Saxpere, Chackaper, and with other variations, and is spelt differently by himself on different occasions. His birth-place, as pointed out by tradition, is the house in Henley Street, Stratford, which belonged to his father. But his father owned several other houses, and there is no evidence to show where he lived in 1561. The house is now the property of the nation. William Shakespeare was educated at the free Grammar School of Stratford, where he probably remained from the age of 7 to about 14. During his boyhood Stratford was frequently visited by companies of strolling players, whose performances doubtless first attracted him to the stage. The beautiful scenery of the Avon and the places of historical interest in the neighbourhood could not fail to influence his fine and sensitive nature. In his 19th year he married Anne Hathaway, daughter of a yeoman at the neighbouring hamlet of Shottery, and eight years older than himself. No register of the marriage is known to exist, nor is the place of its celebration known; but the marriage-bond is extant, taken by the bishop of Worcester for his security in licensing it with only one publication of banns. A first child, a daughter, was born about 6 months afterwards, May, 1583. Among the many suspicious stories told of Shakespeare's early life, one is of a drinking challenge made by a club at Bidford, called "The Topers," and accepted by him and his comrades; and of his sleeping off the effects of the hunt under a crabtree on the way home. More celebrated is the tale of his taking part in stealing deer from the park of Sir Thomas Lucy at Charlote, and of his detection and prosecution. This affair is said to have been the immediate occasion of his going to London, about 1586. It is quite a probable that nuptial disappointments and dissatisfaction may have driven him from home; and very natural that his course should be to the metropolis with its large, full, and fascinating life. It is certain that he did go to London, and lived there many years, leaving his wife and children at Stratford; that he gained an honourable position as actor, play-writer, and shareholder in the Blackfriars and afterwards in the Globe Theatre, enjoyed the favour and patronage of Queen Elizabeth, James I., and the earl of Southampton, the

nothing with any certainty, and matters as the spelling of the house in which he was born, and the high and difficult question of his sonnets, almost all the facts of his biography are either in darkness, or only seen by the bewildering light of conflict. All that it is possible to do is to tell the story as it is usually told, and to give the probable particulars of it. The name of John Shakespeare, a wealthy merchant and dealer in wool, owner of a messuage, and in 1568 chief burgess of Stratford, probably his father, and his mother was of an ancient and wealthy family, of whom personally nothing is known. His name appears in the records of Stratford, Shakespeare, Shakspeare, Shakspeere, Saxpere, Chackeper, and other names, and is spelt differently on different occasions. His birthplace, as tradition has it, is the Henley Street, Stratford, which was his father's residence. But his father owned several houses, and there is no evidence where he lived in 1561. The property of the nation. Shakespeare was educated at the Stratford School, where he remained from the age of 7 to 14, during his boyhood Stratford was visited by companies of actors, whose performances doubtless excited him to the stage. The theatre of the Avon and the places of interest in the neighbourhood to influence his fine and sensitive nature. In his 19th year he married Anne, daughter of a yeoman at Stratford, and the wife of a young hamlet of Shottery, and she was like herself. No register of marriages is known to exist, nor is the date of the celebration known; but the fact is extant, taken by the bishop of Exeter for his security in licensing it, and the publication of banns. A first son, Hamnet, was born about 6 months before the death of his father, in May, 1583. Among the many stories told of Shakespeare's life is that of a drinking challenge which he accepted of a club at Bidford, called "The Merry Club," which was accepted by him and his companions, and his sleeping off the effects of the challenge on the way home. This is the tale of his taking part in a drinking challenge from the park of Sir Thomas Lucy, and of his detection and punishment. This affair is said to have been the occasion of his going to London. It is quite as probable that his disappointments and dissatisfaction with his course should be to the merits of his large, full, and fascinating career that he did go to London, and that he spent many years, leaving his wife at Stratford; that he gained the position as actor, play-writer, and manager in the Blackfriars and after the Globe Theatre; enjoyed the patronage of Queen Elizabeth, and the earl of Southampton, the

warm friendship of Ben Jonson, and the highest respect and admiration of his associates not only for his pre-eminence as a poet, but for his honesty, geniality, and worth as a man. Shakespeare gained also wealth, and became the purchaser of the house at Stratford called New Place, and afterwards of a large estate which he annexed to it. It was his ambition to found a family, and it was probably by his desire that his father, in 1597, obtained a grant of arms from the Heralds College and subsequently permission to impale the arms of Shakespeare with those of Arden. During his residence in London he is said to have visited his native town annually, and he returned to spend his last years there perhaps about 1604. Enjoying the dignified ease of the country gentleman, and the sweets of the rare wisdom to which he had attained, he awaited the end; not ceasing to write, but producing in those quiet years some of his grandest works. Of the end we have no other account than the short statement in the diary of the Rev. John Ward, vicar of Stratford, that "Shakspeare, Drayton, and Nea Jonson had a merry-meeting, and it seems drank too hard, for Shakspeare died of a fever then contracted." The date of his death is 23rd April, 1616. Two days after, his remains were buried in the chancel of Trinity Church, Stratford, and the well-known bust was executed and placed near the spot within seven years. Shakespeare's will, executed about a month before his death, is still preserved in Doctors' Commons. Besides his first child, Susanna, his only other children were a boy and a girl, twins, born in 1585. Susanna married Dr Hall, a physician of Stratford, in 1607, was left a widow in 1635, and died in 1640. She had one child only, a daughter, who, though twice married, left no children. Of the twins, the boy, named Hamnet, died at the age of eleven, and the girl, Judith, married Thomas Quincey in February, 1616, and had three sons, who all died childless. Shakespeare's wife, Anne, survived him, and died in 1623. His father died in 1601, and his mother in 1608. Although we have no proof that Shakespeare ever sat to a painter, portraits of him exist; but they curiously differ, and only three are thought of much importance; viz., that engraved by Martin Droeshout for the folio of 1623; the Chandos portrait; and that preserved in the museum at the birth-place. The bust is probably the best authenticated likeness. Ben Jonson's testimony is, however, very strong in favour of the Droeshout engraving. The Chandos portrait was presented by the earl of Ellesmere, in 1856, to the National Portrait Gallery. The first collected edition of Shakespeare's Plays was the folio of 1623. His poems of "Venus and Adonis" and "The Rape of Lucrece," were published in 1593 and 1594, and were the only works which appeared with his name in his lifetime. Of the 36 plays (exclusive of "Pericles") the dates of publication of only a few are known. The "Two Gentleman of Verona" and "Love's Labour's Lost" were among the earliest, and "Tempest," "Troilus and

Cressida," "Henry VIII.," "Coriolanus," "Julius Cæsar," and "Antony and Cleopatra" among the latest. "Midsummer Night's Dream," "Merchant of Venice," "Romeo and Juliet," "Richard II.," "Richard III.," "Henry IV.," and "King John" were all produced before 1598. A copy of "Hamlet" is extant, bearing the date 1602. "Twelfth Night" was produced in 1601; "King Lear" was printed in 1607; "Tempest" was written in 1611. The second folio edition of the collected plays appeared in 1632, and two others subsequently. It is said that by 1830 not less than eighty-two editions had been published, without including separate plays and poems and commentaries. Since then the number has been enormously increased. The list of editors, biographers, and commentators is too long to give here; but among the most recent must be named Charles Knight, J. P. Collier, Dyce, Singer, Staunton, Keightley, Mr and Mrs Cowden Clarke, and the editors of the "Cambridge Shakespeare." A "Concordance to Shakespeare" has been compiled by Mrs Cowden Clarke. The work of Victor Hugo, entitled "William Shakespeare," and Guizot's "Shakespeare and his Times," must not be omitted. The works of Shakespeare have become to a large part of the world one of the primal necessities of life. In no other man's books, probably, is to be found so much truth, wisdom, and beauty as in his. Great to all men, he is greatest to the great, and the homage of the highest intellects of the world is silently or with eloquent speech yielded to him. The myriad-minded man, the greatest intellect, who in our recorded world has left record of himself in the way of literature, the poet of the human race, the melodious priest of a true Catholicism—such are some of the phrases in which other great men have striven to express their sense of his superiority. Ben Jonson, Milton, Dryden, Pope, and in our own day Coleridge, De Quincey, Carlyle, and Emerson have led the chorus of his praise. In Germany Lessing revived the knowledge of his works; and after him, Herder, Tieck, Wieland, Schlegel, and Goethe have contributed to establish his supremacy. The most important of recent contributions to the critical study of Shakespeare is the Commentary of Professor Gervinus, of which an English translation has appeared. Another valuable critical work is Dr Hermann Ulrici's "Shakespeare's Dramatic Art," also translated. A Shakespeare Jubilee, the first celebration of the kind in England, was suggested and carried out at Stratford by David Garrick, 6—8th September, 1769. A similar celebration took place under the auspices of the Shakespeare club in 1824, and was appointed to be held annually. In April, 1864, a Tercentenary Festival, with dramatic performances, exhibition of relics, and even sermons, was held at Stratford. An attempt was made to get up a national subscription for a monument to the poet, but it failed miserably. But during the same year the works of Shakespeare, his true monument, were republished in an immense variety of editions, ranging from the costly and splendid reproduction by photography of the folio

of 1623, down to penny editions of the separate plays. In Germany, one result of the Centenary movement was the formation of a "Shakespeare Society," which is to publish annually a volume devoted to Shakespeare subjects. The first volume has already appeared. An interesting work has recently appeared entitled "Shakespeare in Germany in the 16th and 17th centuries," by Albert Cohn; in which it is shown that English actors performed the plays of Shakespeare in the great cities of Germany as early as 1590, and that some of the plays were translated into German by 1611. A perfect copy of the much-talked-of and long vainly sought "Shakespeare's Jest Book" was discovered in the Göttingen Library in 1864, and has just been published. It is entitled "A Hundred Merry Tallys," and bears the date of 1526. The latest addition to our Shakespeare literature is Mr Gerald Massey's "Shakespeare's Sonnets never before interpreted; his private Friends identified; together with a recovered Likeness of Himself." (April, 1866.)

SHARP, JAMES, archbishop of St Andrew's, a distinguished prelate of the 17th century, was born in Banffshire, in 1618, and obtained a professorship in the university of St Andrew's. The presbytery being abolished by parliament, under Charles II., Sharp, who had treacherously promoted that measure, was rewarded with the primacy, and appointed archbishop of St Andrew's. The wanton cruelties which followed confirmed the horror entertained against him, and raised the fury of some of his more bigoted opponents to conspire against his life. His carriage, in which he was travelling, about three miles from St Andrew's, on the 3rd of May, 1679, was met by some fanatics, headed by John Haffour of Burley, who were waiting there to intercept a servant of the archbishop's, named Carnichael. To tempers thus heated by fanaticism, the appearance of the archbishop himself was deemed a sign of the intention of Providence to substitute a more important victim; and, regardless of the tears and entreaties of his daughter, they dragged him from his carriage, and with savage ferocity murdered him before her face.

SHARP, JOHN, archbishop of York, was born at Bradford, in Yorkshire, in 1644; studied at Christ's College, Cambridge; and rose, by gradual preferments, to the deanery of Norwich. In the reign of James II. he gave such offence to the court by preaching against Popery, that an order was sent to the bishop of London to suspend him; but the bishop having refused on the ground of its being contrary to law, he as well as Dr Sharp were suspended by the ecclesiastical commission. The doctor, however, was soon restored to the exercise of his function; and, after the revolution, he was made dean of Canterbury. From whence, in 1691, he was elevated to the archbishopric of York. Died, 1713. His "Sermons," published after his death, form 7 vols.

SHARP, GRANVILLE, grandson of the preceding, distinguished for his philanthropy and learning, was born at Durham, in 1731. He obtained a place in the ordnance office, which he resigned at the commencement of

the American war, because he disapproved of its principles; after which he devoted his life to private study, and the active exercise of a benevolent mind. With infinite difficulty and expense, he established the right of negroes to their freedom while in England, instituted the society for the abolition of the slave trade, advocated the principles of parliamentary reform, and distinguished himself with equal zeal in other patriotic and benevolent objects; the last of which was the promotion of the distribution of the Scriptures. He was critically skilled in the Hebrew and Greek languages, and was the author of various works, the principal of which are, "Remarks on the Uses of the Definite Article in the Greek Testament," "Treatises on the Slave Trade, on Duelling, on the People's Right to a Share in the Legislature, &c." Died, 1813.

SHARP, RICHARD, well known in the literary world as "Conversation Sharp," and whose taste and judgment as a critic were equal to his conversational powers, died, aged 76, while on the road from Torquay to his residence in London, March 30, 1855. Mr Sharp was deeply engaged in commercial concerns, but employed his leisure hours in literary pursuits. He was the author of "Letters and Essays in Prose and Verse." He had formerly been an M.P. adhering to the Whig interest; and few men displayed more anxiety than he did for the extension of civil and religious liberty, and the moral improvement of the community. He left £250,000, which was divided between his nephews and nieces.

SHARP, WILLIAM, an eminent engraver, was born in London, in 1740, rose to excellence in his profession, and produced many admirable prints. But with all his merits as an artist, he was credulous in the extreme, and became, in succession, a believer in the reveries of Mesmer and a disciple of Swedenborg, a dupe of the notorious Richard Brothers, and a supporter of the pretensions of Joanna Southcott. Died, at Chiswick, 1811. His portrait, by Lonsdale, is in the National Collection.

SHARPE, GREGORY, oriental scholar and divine, was born in Yorkshire, in 1713, was educated at Westminster and Aberdeen, and eventually became master of the Temple. Among his writings are, "A Review of the Controversy on the Demoniales," "Defence of Dr Clarke against the Attacks of Leibnitz," "Dissertations on the Origin of Language," and the original Powers of Letters, with a Hebrew Lexicon, &c. Died, 1771.

SHAW, GEORGE, a distinguished writer on zoology, &c., was born in 1751, at Berton, in Buckinghamshire; was educated at Magdalen College, Oxford; studied medicine at Edinburgh, and graduated as M.D. at Oxford. He then settled as a physician in London, was elected F.R.S., and appointed a vice-president of the Linnæan Society, delivered lectures on zoology at the Leverian Museum and at the Royal Institution; and was made librarian and assistant keeper of natural history at the British Museum. He was the author of several works on Zoology, conducted the "Naturalist's Miscellany," and was one of the editors of the

an war, because he disapproved of it; after which he devoted his life to study, and the active exercise of his talent. With infinite dis- pensation, he established the right to their freedom while in Eng- land, and the society for the abolition of the slave trade, and advocated the principles of political reform, and distinguished himself in other patriotic and benevolent objects; the last of which was the promotion of the distribution of the Bible in the Greek languages, and was the author of various works, the principal of which are "Remarks on the Uses of the Bible in the Greek Testament," "Remarks on the Slave Trade, on Duelling, and on the Right to a Share in the Legisla- tion," &c. Died, 1813.

RICHARD, well known in the world as "Conversation Sharp," and whose wit and judgment as a critic were his conversational powers, died in London, March 30, 1805. He was deeply engaged in commercial pursuits, but employed his leisure hours in literary pursuits. He was the author of "Remarks on the Uses of the Bible in the Greek Testament," "Remarks on the Slave Trade, on Duelling, and on the Right to a Share in the Legisla- tion," &c. Died, 1813.

WILLIAM, an eminent engraver, in London, in 1749, rose to excel- lence in his profession, and produced many fine prints. But with all his merits, he was credulous in the extreme, and in succession, a believer in the Mesmer and a disciple of Sweden- borg. He was a supporter of the pretensions of the phre- nologist. Died, at Chiswick, 1821.

GREGORY, oriental scholar and author, was born in Yorkshire, in 1713, and was educated at Westminster and Aberdeen, and became master of the Temple. His writings are, "A Review of the History of the Denonians," "Defence of the Rights of the People," "Remarks on the Origin of Language," "The Original Powers of Letters," &c. Died, 1771.

GEORGE, a distinguished writer, was born in 1751, at Bicester, in Buckinghamshire; was educated at Balliol College, Oxford; studied medicine, and graduated as M.D. at Oxford; then settled as a physician in London, and was elected F. R. S., and appointed a member of the Linnaean Society; de- voted himself to zoology at the Leverian and at the Royal Institution; and was librarian and assistant keeper of the British Museum. He was the author of several works on Zoology, and was one of the editors of the

abridged Philosophical Transactions. Died, 1813.

SHAW, Sir JAMES, bart., was born at Riecarton, in the county of Ayr, in the year 1764; became a junior clerk in a mercantile house of the city of London; and, by constant diligence and great ability, gradually rose to a partnership in the firm. In 1798 he was elected alderman for his ward of Portsoken; in 1803 he served the office of sheriff, and in 1805 that of lord mayor; and, on the very day previous to his vacating the civic chair, he was elected M.P. for the city of London, which honourable position he retained till 1818, when he retired, having been created a baronet in 1809. In 1831 he was elected chamberlain of London, when he resigned his aldermanic gown. Simple in his habits, singularly industrious and persevering, Sir James was also extremely charitable. Died, Oct. 22, 1843, aged 80.

SHAW, THOMAS, an English divine and antiquary, famous for his "Travels, or Observations relating to several parts of Barbary and the Levant." Born, 1692; died, 1751.

SHEA, DANIEL, one of the professors of oriental languages at Hallebury College, was born at Dublin, in 1772, and educated at the university. Having held a situation as chief clerk to a large mercantile establish- ment in Malta, which had extensive connections in the East, he studied the Arabic and Persian tongues; and his oriental acquirements becoming known, a situation at Hallebury was provided for him. He translated Mirkhond's "History of the early Kings of Persia," and at the time of his death he had completed the translation of the Dabstaa. This translation was pre- sented to the Asiatic Society after his death. Died, 1836.

SHERBEARE, JOHN, physician and political writer, was born at Biddeford, in Devonshire, in 1709, where he was appren- ticed to an apothecary. Having made a visit to Paris, he there obtained the degree of M.D., and was admitted into the Academy of Sciences. He settled in London, and com- menced his career as a party writer; for his violence in which character he was once pilloried and twice imprisoned. After- wards, under the administration of Lord Bute, he apostatized from the popular cause, and obtained a pension. His chief works are, "Letters to the People of England," "The Marriage Act," a satirical romance; "Lydia, or Filial Piety," "Letters on the English Nation," and the "History of the Sunatrans," a political satire. Died, 1788.

SHEE, Sir MARTIN ARCHER, president and senior member of the Royal Academy, was born in Dublin, 1769. On his arrival in London he was introduced to Sir Joshua Reynolds, and other distinguished persons, by his illustrious friend and countryman, Edmund Burke. He became an exhibitor at the Royal Academy for the first time in the year 1789. In 1796 he reached what is now the full academical number of eight portraits, including that of Mrs S. Kemble in the character of Cowslip, in "The Agreeable Surprise." He continued equally indus- trious for many years; and was elected an

associate of the Royal Academy in 1799. In 1800 he was elected a full royal academical; and of his 39 brethren by whom he was chosen he was the last survivor. He continued to produce portraits with amazing readiness; and for a time he was in nearly as great re- quest as Lawrence. In 1805 he made his appearance as a poet by the publication of his "Rhymes on Art, or the Demonstration of a Painter; in two parts, with Notes and a Preface, including Strictures on the State of the Arts, Criticism, Patronage, and Public Taste;" and this was followed in 1809 by a second poem, in six cantos, entitled "Ele- ments of Art," to which Byron alludes in his "English Bards and Scotch Reviewers." A third poetical production, entitled "The Commemoration of Reynolds," &c., appeared from his pen in 1814. In 1824 he published a tragedy called "Alasco," with an angry preface directed against Mr Colman, the licenser of plays, who had some years pre- viously put a veto on its being brought upon the stage. On the death of Lawrence in 1830, Shee was elected president of the Royal Academy, and immediately knighted. Sir Martin excelled in short, well-timed, and well-delivered speeches, and his eloquence was highly appreciated within the walls of the Academy. His name, says a contem- porary from whom this memoir has been abridged, will descend in the history of painting as a clever artist with greater ac- complishments than have commonly fallen to the class to which he belongs, and as a painter who has preserved to us the faces and figures of Sir Thomas Munro, Sir Thomas Picton, Sir Eyre Coote, Sir James Scarlett, Sir Henry Halford, and the poet Moore. Died, Aug. 19, 1850. A Life of Sir M. A. Shee has been published by his son.

SHEEPHANKS, RICHARD, mathemati- cian and astronomer, was born at Leeds, in 1794. He studied at Cambridge, and became a fellow of Trinity College in 1817. He was called to the bar, but did not practise, and afterwards took orders. But from 1824, when he was chosen a fellow of the Royal Astronomical Society, he gave himself up to science, and especially to practical astronomy. He obtained a high reputation, and was con- sulted and employed on many important oc- casions. His most memorable achievement was the completion of the arduous task, commenced by Haily, of the restoration of the standards of measure and weight after their destruction by fire. It occupied him ten years. Mr Sheephanks was a fellow of the Royal Society, and a member of the Board of Visitors of the Greenwich Observa- tory. Died at Reading, 4th August, 1855.

SHEEPHANKS, JOHN, founder of the Sheephanks Gallery, brother of the preced- ing, was born about 1787. Having formed a fine collection of paintings by British artists, he presented it in 1856 to the nation. It contains above 230 oil paintings, besides drawings and sketches, and is at present in the South Kensington Museum. Died, 6th October, 1863.

SHEFFIELD, JOHN. [BUCKINGHAM- SHIRE, Duke of.]

SHEIL, RICHARD LALOR, one of the greatest orators that Ireland has produced,

was born in 1794. After receiving his education at Stonyhurst and Trinity College, Dublin, he was called to the Irish bar in 1814, and was making some way there when the formation of the Catholic Association opened a new and more attractive arena for his energies and his eloquence. Second to O'Connell alone, Shell often, in that famous assembly, surpassed even the Agitator himself in his powers of captivation, from the beauty of his language and the grace of his imagination. As an author, Shell was also eminently distinguished. He wrote some successful tragedies, one of them, "Evadne," still retains possession of the stage; and his articles in the "New Monthly Magazine" under Campbell's editorship, were generally admired, especially his able sketches of the Irish bar. When the Emancipation Act passed, Shell was elected member for Milbourne Port, and, in spite of his shrill voice and vehement gesticulation, his fervid eloquence placed him at once in the foremost rank of the most attractive speakers in the House. When O'Connell's energies declined, many in Ireland looked upon Shell as his successor; but the orator had too closely allied himself to the Whig party, and for some years was heard in the House but on rare occasions. Besides being a queen's counsel and a privy-councillor, Mr Shell was successively a commissioner of Greenwich Hospital, vice-president of the Board of Trade, judge-advocate-general, and master of the Mint. His last appointment was that of minister plenipotentiary at Florence, whither he went just prior to the bringing in of the Ecclesiastical Titles Bill in 1851. Died at Florence, 1851.

SHELBURNE, W. F. PETTY, Earl of [PETTY.]

SHELDON, GILBERT, archbishop of Canterbury, was born at Staunton, Staffordshire, in 1598. He studied at Oxford, graduated M.A., and became fellow of All Souls College. Entering the church, he was made chaplain to Thomas, Lord Coventry, then keeper of the great seal, through whose influence appointments and promotion came rapidly. He was named chaplain to Charles I., and as such assisted at the treaty of Uxbridge, and attended the king at Oxford. After holding the wardenship of his college for twelve years, he was deprived by the parliamentary visitors, in 1647, and imprisoned. He lived in retirement till the Restoration, and was then made, in succession, dean of the Chapel Royal, bishop of London, master of the Savoy, and in 1663, on the death of Archbishop Juxon, he was raised to the primacy. The celebrated "Savoy Conference" was held at his house, but he did not take part in it. He stood courageously at his post during the plague in 1665, and rendered great and generous service. He was afterwards chancellor of the university of Oxford; built there the well-known Sheldonian Theatre, and gave endowments to several colleges; and rebuilt the library at Lambeth. Died at Lambeth, 1677.

SHELLEY, PERCY BYSSHE, one of the most distinguished English poets, was born at Field Place, near Horsham, Sussex, in 1792. The rough experience of school life

was acutely painful to his over-sensitive organization, and gave a permanent unhappy tone to his mind. A similar experience at Eton, whither he was sent in 1805, roused him to a daring resistance to authority, and intensified his instinctive indignation at injustice. He quitted Eton after three years' stay, and, in 1810, was sent to Oxford university. During his two years of home life he had written a good deal, and he continued to write at Oxford. He published in 1811, without his name, a "Defence of Atheism," and on its authorship being discovered, he was at once expelled from the university, and even for a time refused admittance to his home. The same year he formed a rash marriage alliance, found not in it what he sought, and after two years had passed, and two children been born, a separation from his wife was arranged. On her death, in 1816, he disinherited his children, but a decree in Chancery was obtained for leaving them in the care of his wife's father, on the ground of his own alleged atheism, and consequent unfitness to have charge of them. He had before that time become acquainted with Mary, the daughter of William Godwin and Mary Wollstonecraft, had travelled with her on the continent, found in her an intellectual and sympathizing companion, free and brave as himself, and at last made her his wife. The dedication to her of "The Revolt of Islam" is one of the most exquisitely touching of his poems. Leigh Hunt, Lord Byron, and Keats, were among the friends of Shelley. After a visit to Geneva, in 1817, he lived a year at Marlow, and finally quitted England, in March, 1818, for Italy, residing at Milan, Rome, Florence, and other cities. He took a warm interest in the movements towards political liberty in Spain, Italy, and especially in Greece; but he was not the man to take effective part in them either by act or word. His life, so full of rich promise, was too soon lost to the world. He was drowned at sea, by the wreck of his small sailing-boat on the way from Leghorn to his house at St Arango, July 8, 1822. His body, found ashore after some days, was burnt, and the ashes buried near those of Keats in the Protestant graveyard at Rome. The obloquy and prejudice which long blinded his countrymen to the high poetic faculty, and the rare moral excellencies of Percy Bysshe Shelley, and made it a kind of sin to read, or even name him, have now passed away; and charity, in the best sense, covering his errors and faults, leaves us free to give his works the attention which they deserve, and the admiration they are certain to excite. In force, and splendour of imagination, he is perhaps unrivalled; and few poets equal him in wealth and felicity of diction. He is no realist; does not stand firmly on the ground and deal with men and women as Shakspeare does; but, while denouncing the evils and wrongs, corruptions and miseries of the world, dreams splendid dreams of truth and good and beauty and bliss, and creates scenes of Utopian peace and loveliness. His principal poems are—"Queen Mab," "The Revolt of Islam," "Prometheus Unbound," and "The Cenci,"

a tragedy full of Among his short singularly passionate over the death of and Helen;" "The Spirit of Solitude &c. His wonder and "To a Skyline collected edition of by his widow in 1840, also by Mrs year. Several Lives appeared since it was born in 1798: her wild and extraneous, which ity, and is still in She was also author of Frenchman, of "Italy," and of several husband's death.

SHENSTONE, V born in 1714, at Har was the son of a gentleman on his own estate, was educated at Oxford, possession of his property, distinguished all vices occupied himself the cultivation of poetry to render the Leisurely and elegant which he could but by no means a happy which he had created consist of songs, elegiacallaneousays, written by Dodsley. As a poet, and correct in his works display good taste. Died, 1763.

SHEARD, or S an English botanist, a native of Shrewsbury, shire, in 1659. About consul at Smyrna, and in the East he collected plants of Anatolia observations on substances and antiquities. His will gave £3000 to professor of botany at Hermann's "Paradise of Plants."

SHERBURNE, S an English writer, was born in 1710. He held the office of under Charles I., and the civil war; but was and knighted, by Charles II. He translated Cicero's astrological poem of "The Spheronia," and other works. Died in 1738.

SHERIDAN, DR THOMAS, friend of Dean Swift and died in 1758. He was a teacher; but being extravagant, he fell into poverty. He was translated into Latin, and a translation of Persius.

SHERIDAN, THOMAS, an English actor, was born in London, and was educated at Westminster school.

a tragedy full of horrors, and not ideal ones. Among his shorter pieces are "Adonais," a singularly passionate and beautiful lament over the death of John Keats; "Rosalind and Helen;" "Helias;" "Alastor, or the Spirit of Solitude;" "The Triumph of Life," &c. His wonderful lyrics, "The Cloud," and "To a Skylark," are well known. A collected edition of his poems was published by his widow in 1839, and "Memorials" of him, also by Mrs. Shelley, in the following year. Several Lives and notices of him have appeared since that time.—Mrs. SHELLEY was born in 1798. At the age of 18 she wrote her wild and extraordinary tale of "Frankenstein," which gained immense popularity, and is still in demand at Mudie's library. She was also author of the "Lives of Literary Frenchmen," in Lardner's Cabinet Cyclopædia, of "Rambles in Germany and Italy," and of several novels written after her husband's death. She died in 1851.

SHENSTONE, WILLIAM, an English poet, born in 1714, at Hales Owen, in Shropshire, was the son of a gentleman farmer residing on his own estate, called the Leasowes. He was educated at Oxford; and on coming into possession of his paternal property, he relinquished all views of an active life, and occupied himself with rural pursuits, and the cultivation of poetry. His great desire to render the Leasowes famous for picturesque beauty and elegance, led to expenses which he could but ill support, and he was by no means a happy inhabitant of the Eden which he had created. His works, which consist of songs, elegies, pastorals, and miscellaneous essays, were printed in 3 vols. 8vo, by Dodsley. As a poet, he is pleasing, tender, and correct in sentiment; and his prose works display good sense and cultivated taste. Died, 1763.

SHERARD, or SHERWOOD, WILLIAM, an English botanist, was born in Leicestershire, in 1659. About 1702 he was appointed consul at Smyrna, and during his residence in the East he collected specimens of all the plants of Anatolia and Greece, and made observations on subjects of natural history and antiquities. He died in 1728, and by his will gave £3000 to provide a salary for a professor of botany at Oxford. He published Hermann's "Paradisus Batavus," and a work entitled "Scholia Botanica."

SHERBURNE, Sir EDWARD, an ingenious writer, was born in London, in 1618. He held the office of clerk of the ordnance under Charles I. and suffered greatly during the civil war; but was restored to his office, and knighted, by Charles II. Died, 1702. He translated Seneca's tragedies, "the astrological poem of Manilius, entitled "Astrologia," and other works into English.

SHERIDAN, Dr THOMAS (the well-known friend of Dean Swift), was born in 1684, and died in 1758. He was eminent as a teacher; but being singularly thoughtless and extravagant, he closed his life in great poverty. He was the author of some sermons, and a translation of the satires of Persius.

SHERIDAN, THOMAS, son of the preceding, was born in 1721, at Cullica, in Ireland, and was educated at Westminster

School, and at Trinity College, Dublin. In 1742 he went upon the stage, and gained much celebrity as a tragedian, both in his native country and in England. He next became manager of the Dublin company; but being ruined by the opposition of a rival theatre and by riots in his own, he relinquished the profession, commenced as a lecturer on elocution, and for a time was very successful. During the ministry of Lord Bute, he obtained a pension of £200. He subsequently became manager of Drury Lane Theatre; but some disputes taking place, he retired, and resumed his attention to oratory. His principal works are, his "Dictionary of the English Language," and a "Life of Swift." Died, 1788.

SHERIDAN, RICHARD BRINSLEY, third son of the preceding, distinguished as a statesman, wit, and dramatist, was born at Dublin, in 1751. He was educated at Harrow School, and became a student of the Middle Temple, but was not called to the bar. His first dramatic attempt was "The Rivals," which was acted at Covent Garden in 1775, with moderate success; but the "Duenna," a musical entertainment, which followed, was received with general admiration; and his "School for Scandal" gained him the highest reputation as a comic writer. On the retirement of Garrick from Drury Lane Theatre, Sheridan purchased a share in that property, which qualified him for a seat in parliament; and, in 1780, he was chosen member for the borough of Stafford. He attained great celebrity as an orator, especially during the progress of the impeachment of Warren Hastings. The political changes consequent on the death of Pitt, in 1806, occasioned the rise of the party with which Sheridan was connected, and he obtained the lucrative post of treasurer of the navy, and the rank of a privy-councillor. This administration being weakened by the loss of Mr Fox, who survived his rival only a few months, new alterations took place, and Sheridan was deprived of office, to which he never returned. At the general election in 1806, he obtained a seat for Westminster, the great object of his ambition; but he was afterwards nominated for the borough of Iichester, which he continued to represent during the remainder of his parliamentary career. The latter part of his life was embittered by misfortunes, principally arising from his own improvidence. His profuse habits involved him deeply in debt; his loss of a seat in parliament deprived him of protection from arrest; intemperance had undermined his constitution; mental anxiety completed the destruction of his health, and his death took place, July 7, 1816. Besides the pieces already noticed, he was the author of part of "A Translation of Aristænetus;" the farce of "The Critic," and poems. Sheridan was twice married, first to Miss Linley, a celebrated singer; and the second time to Miss Ogle, daughter of the dean of Winchester.

SHERLOCK, WILLIAM, an eminent English divine, born in 1641. He became dean of St Paul's, and wrote numerous books and pamphlets, the greater part of which were of the controversial kind. His "Practical

Treatise on Death," however, has been highly valued and very much read. Died, 1707.

SHERLOCK, THOMAS, bishop of London, son of the preceding, born in 1676, was distinguished as a spirited controversial writer. He was educated at Cambridge, and became, successively, dean of Chichester, and bishop of Bangor, Salisbury, and London. He took a leading part in the Bangorian controversy, and did good service in his day, in the controversies respecting the evidences of Christianity, by his work on Prophecy, and by his clever and interesting "Trial of the Witnesses." Died, 1761.

SHERWIN, JOHN KEYSER, an eminent engraver, who, till the age of 19, pursued the humble occupation of a wood-cutter. He was employed on the estate of Mr Mitford, near Petworth, in Sussex; and being one day at the house of that gentleman, the attention with which he observed some of the family who were drawing, attracted Mr Mitford's notice, who asked him if he could do anything in that way! Sherwin said that he could not tell, but he should like to try. On this a port-crayon was put into his hand, and he produced a drawing which astonished all present; and the Society of Arts, to whom it was presented, voted him the silver medal. He was then placed under Bartolozzi, and became his favourite pupil. His engravings are of the first excellence. Died, 1790.

SHERWOOD, MARY MARTHA, one of the most popular writers of juvenile and serious fiction, was the daughter of Dr George Butt, chaplain to George III., vicar of Kidderminster, and rector of Stanford, in Worcestershire, where she was born in 1775. In 1803, she married her cousin, Henry Sherwood, of the 53rd regiment of foot, and accompanied her husband to India the same year, where she displayed great zeal in the cause of religion amongst the soldiers and natives dwelling around her. The great number of her books prevents an enumeration of even the most popular of them; but her principal works were "Henry and his Bearer," "The Lady of the Manor," "The Church Catechism," "The Nun," "The Fairchild Family," and more recently, "The Golden Gariand of Inestimable Delight." Died, 1851.

SHIELD, WILLIAM, an eminent musical composer, was born at Smalwell, Durham, in 1754. His father, a teacher of singing, died when his son was in his 9th year. He was apprenticed to a boat-builder, but quitted that business as soon as his indentures expired, for he had never ceased to cultivate the knowledge of the violin, which he had early acquired. It was not long before he gained reputation at Scarborough, as leader of the concerts, which led to his being offered a situation in the Italian Opera House, where he remained 18 years as principal viola. In 1778 he came forward as a dramatic composer in the music to "The Fifth of Bacon," the success of which was great and decisive. It procured for him the situation of composer to Covent Garden Theatre, which he held for several years. At the death of Sir W. Parsons, he was ap-

pointed master of his Majesty's musicians in ordinary; and he continued to enjoy a high degree of popularity to the time of his death, which took place in January, 1824. His style was simple, chaste, and graceful. Among his dramatic pieces are, "Rosina," the "Poor Soldier," "Robin Hood," "Marian," "Oscar and Malvina," "Hartford Bridge," &c. He also set to music many excellent songs, as "Tom Moody," "The Heaving of the Lead," "The Thorn," "Old Towler," &c.

SHIRLEY, ANTHONY, a celebrated English traveller, was born at Weston, in Sussex, in 1565. On leaving Oxford University, he served under the earl of Essex, with such reputation, as to receive the honour of knighthood. He next went to Italy, and from thence travelled to Persia, where he became a favourite with Shah Abbas, who in 1612 sent him as his ambassador to England. After this, the emperor created him a count, and the king of Spain appointed him admiral in the Levant seas. He died in Spain about 1630.

SHIRLEY, JAMES, an eminent dramatic poet, was born in London, about 1591; was educated at Merehaat Tailors' School, and at St John's College, Oxford; obtained a curacy at St Alban's, which he resigned on becoming a Catholic; and then endeavoured, though without success, to establish a school there. He removed to London, and became a fertile writer for the stage; and, having obtained celebrity, he was taken into the service of Queen Henrietta Maria. He afterwards accompanied the earl of Killmore to Ireland, but returned on the breaking out of the rebellion, and resumed his scholastic employment in the Whitefriars. At the Restoration many of his plays were again acted, and he appears to have been prosperous; but having lost his property by the fire of London, in 1666, both he and his wife were so affected by the calamitous event, that they died of grief and terror within 24 hours of each other, on the 21st of October, and were buried in the same grave. Shirley was the author of 37 tragedies, comedies, &c., besides a volume of poems; of which a complete edition was published by Gifford.

SHORE, JANE, the beautiful and unfortunate mistress of Edward IV., was the daughter of a London citizen, and the wife of a rich Jeweller in Lombard Street. She had entire command over the king's heart and purse; but his favour she never abused to any man's hurt, but often employed it to many a man's relief. After the king's death, she became attached to Lord Hastings, and their known partiality to the young princes rendered them obnoxious to Richard III., who accused them of witchcraft. On this charge Hastings was beheaded, and his pretended accomplice committed to the Tower. After undergoing the form of a trial, she was ordered to do penance in St Paul's in a white sheet, and was paraded through the public streets, the bishop of London heading the procession. Her house and fortune were seized by the protector, and she was reduced to the greatest distress; but the story of her per-

ishing in a ditch given rise to the rumour appear to be founded when she died in 1485. Sir Thomas Perse was and far so much in her behaviour; for a could both read and quick of answer; bling."

SHORE, SIR JOHN, Lord.]
